FEDERAL REGISTER

Vol. 91 Tuesday,

No. 148 August 4, 2026

Pages 49269–50468

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 91 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register
Vol. 91, No. 148
Tuesday, August 4, 2026

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2026–4636; Project Identifier MCAI–2026–00070–A; Amendment 39–23430; AD 2026–15–18]

RIN 2120–AA64

Airworthiness Directives; Diamond Aircraft Industries Inc. Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain Diamond Aircraft Industries Inc. (DAI) Model DA20–C1 airplanes. This AD was prompted by a report of a certain emergency locator transmitter (ELT) not activating due to a missing jumper wire. This AD requires a continuity inspection of the D-sub connector of the Artex ELT 1000 and, if necessary, corrective actions. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective September 8, 2026.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of September 8, 2026.

ADDRESSES:

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2026–4636; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–91, West Building Fifth Floor, Room W58–213, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

- For Diamond Aircraft Industries material identified in this AD, contact DAI, 1560 Crumlin Sideroad, London, Ontario, Canada, N5V 1S2; phone: (519) 457–4041, fax: (519) 457–4045; email: *support-canada@diamondaircraft.com;* website: *diamondaircraft.com.*
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 1100 Main, Kansas City, MO 64105. For information on the availability of this material at the FAA, call (817) 222–5110. It is also available at *regulations.gov* under Docket No. FAA–2026–4636.

FOR FURTHER INFORMATION CONTACT: William Reisenauer, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (516) 228–7301; email: *ECB-COS@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain DAI Model DA20–C1 airplanes. The NPRM was published in the **Federal Register** on May 15, 2026 (91 FR 27871). The NPRM was prompted by Transport Canada AD CF–2026–03, dated January 21, 2026 AD CF–2026–03) (referred to as the MCAI), issued by Transport Canada, which is the aviation authority for Canada to correct an unsafe condition on all DAI Model DA20–C1 airplanes having an Artex ELT 1000 installed. The MCAI states that DAI received a report of an occurrence where the Artex ELT 1000 installed in a DA20–C1 airplane did not perform as intended. Further investigation by the manufacturer revealed that some Artex ELT 1000 units might not have a jumper wire between the D-sub pins 5 and 12, which could prevent the ELT beacon from being activated by the internal G-Switch and the aural alert buzzer from being activated in the event of an accident.

In the NPRM, the FAA proposed to require a continuity inspection of the D-sub connector of the Artex ELT 1000 and, if necessary, corrective actions. The FAA is issuing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2026–4636.

Discussion of Final Airworthiness Directive

Comments

The FAA received no comments on the NPRM or on the determination of the costs.

Conclusion

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed Diamond Aircraft Industries Mandatory Service Bulletin No. DAC1–25–05 Rev. 1, dated July 19, 2024. This material specifies procedures for performing a continuity inspection on the D-sub connector of the Artex ELT 1000 and, if necessary, installing the jumper wire into the D-sub connector.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Differences Between This AD and the Referenced Material

Although step 14 of the Accomplishment/Instructions of Diamond Aircraft Industries Mandatory Service Bulletin DAC1–25–05 Rev. 1, dated July 19, 2024, requires completing and sending an execution report to the manufacturer, this AD does not require that action.

Costs of Compliance

The FAA estimates that this AD affects 365 airplanes of U.S. registry.

The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Continuity inspection and corrective actions	1 work-hour × $85 per hour = $85	$0	$85	$31,025

The FAA estimates the following costs to do any repairs that would be required based on the results of the inspection. The agency has no way of determining the number of airplanes that might need these repairs:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Install jumper wire	1 work-hour × $85 per hour = $85	$3	$88

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2026–15–18 Diamond Aircraft Industries Inc.: Amendment 39–23430; Docket No. FAA–2026–4636; Project Identifier MCAI–2026–00070–A.

(a) Effective Date

This airworthiness directive (AD) is effective September 8, 2026.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all Diamond Aircraft Industries Inc. Model DA20–C1 airplanes, certificated in any category, that have an Artex emergency locator transmitter (ELT) 1000 installed.

(d) Subject

Joint Aircraft System Component (JASC) Code 2562, Emergency Locator Beacon.

(e) Unsafe Condition

This AD was prompted by a report of a certain ELT not activating due to a missing jumper wire. The FAA is issuing this AD to detect and address a missing jumper wire on the Artex ELT 1000. The unsafe condition, if not addressed, could result in the ELT beacon and aural alert buzzer not activating in the event of an accident.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Within 3 months after the effective date of this AD, perform a continuity inspection of the D-sub connector and accomplish all required corrective actions in accordance with the Accomplishment/Instructions, Paragraph I.9, of Diamond Aircraft Industries Mandatory Service Bulletin No. DAC1–25–05 Rev. 1, dated July 19, 2024.

(h) No Reporting Requirement

Although step 14 of the Accomplishment/Instructions of Diamond Aircraft Industries Mandatory Service Bulletin No. DAC1–25–05 Rev. 1, dated July 19, 2024, requires completing and sending an execution report to the manufacturer, this AD does not include that requirement.

(i) Alternative Methods of Compliance (AMOCs)

The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (j) of this AD and email to: *AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(j) Additional Information

For more information about this AD, contact William Reisenauer, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (516) 228–7301; email: *ECB-COS@faa.gov.*

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Diamond Aircraft Industries Mandatory Service Bulletin No. DAC1–25–05 Rev. 1, dated July 19, 2024.

(ii) [Reserved]

(3) For Diamond Aircraft Industries material identified in this AD, contact Diamond Aircraft Industries Inc., 1560 Crumlin Sideroad, London, Ontario, Canada, N5V 1S2; phone: (519) 457–4041, fax: (519) 457–4045; email: *support-canada@diamondaircraft.com;* website: *diamondaircraft.com.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 1100 Main, Kansas City, MO 64105. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on July 27, 2026.

Paul R. Bernado,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 95

[Docket No. 31678; Amdt. No. 593]

IFR Altitudes; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule

SUMMARY: This amendment adopts miscellaneous amendments to the required IFR (instrument flight rules) altitudes and changeover points for certain Federal airways, jet routes, or direct routes for which a minimum or maximum en-route authorized IFR altitude is prescribed. This regulatory action is needed because of changes occurring in the National Airspace System. These changes are designed to provide for the safe and efficient use of the navigable airspace under instrument conditions in the affected areas.

DATES: 0901 UTC, September 3, 2026.

FOR FURTHER INFORMATION CONTACT: Brian Murphy, Manager, Aeronautical Information Services, Aeronautical Information Group, Aeronautical Data Team, Federal Aviation Administration. Mailing Address: FAA Headquarters, Aeronautical Information Group, 800 Independence Ave. SW, Bldg. 10A, Room 507L, Washington, DC 20591. Telephone (202) 267–4389.

SUPPLEMENTARY INFORMATION: This amendment to part 95 of the Federal Aviation Regulations (14 CFR part 95) amends, suspends, or revokes IFR altitudes governing the operation of all aircraft in flight over a specified route or any portion of that route, as well as the changeover points (COPs) for Federal airways, jet routes, or direct routes as prescribed in part 95.

The Rule

The specified IFR altitudes, when used in conjunction with the prescribed changeover points for those routes, ensure navigation aid coverage that is adequate for safe flight operations and free of frequency interference. The reasons and circumstances that create the need for this amendment involve matters of flight safety and operational efficiency in the National Airspace System, are related to published aeronautical charts that are essential to the user and provide for the safe and efficient use of the navigable airspace. In addition, those various reasons or circumstances require making this amendment effective before the next scheduled charting and publication date of the flight information to assure its timely availability to the user. The effective date of this amendment reflects those considerations. In view of the close and immediate relationship between these regulatory changes and safety in air commerce, I find that notice and public procedure before adopting this amendment are impracticable and contrary to the public interest and that good cause exists for making the amendment effective in less than 30 days.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 95

Airspace, Navigation (air).

Issued in Washington, DC, on July 31, 2026.

Tom Carrigan,

Manager, Aeronautical Information Services, Aeronautical Information Group, Data Systems Team, Federal Aviation Administration.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, part 95 of the Federal Aviation Regulations (14 CFR part 95) is amended as follows effective at 0901 UTC, 3 Sep 2026.

PART 95—IFR Altitudes

■ 1. The authority citation for part 95 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113 and 14 CFR 11.49(b)(2).

■ 2. Part 95 is amended to read as follows:

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

14 CFR Part 382

[Docket No. DOT–OST–2021–0137 and DOT–OST–2022–0144]

RIN 2105–AE89

Accessible Lavatories on Single-Aisle Aircraft and Ensuring Safe Accommodations for Air Travelers With Disabilities Using Wheelchairs

AGENCY: Office of the Secretary (OST), U.S. Department of Transportation.

ACTION: Notification of enforcement discretion.

SUMMARY: The U.S. Department of Transportation (DOT or Department) is extending its previously announced enforcement discretion for four provisions of the final rule on ''Ensuring Safe Accommodations for Air Travelers With Disabilities Using Wheelchairs'' (Wheelchair Rule I) related to airline liability for mishandled wheelchairs, refresher training frequency, pre-departure notifications, and fare difference reimbursements from December 31, 2026 to April 30, 2027. To maintain regulatory consistency, the Department is also expanding this enforcement discretion to include the 12-month hands-on training mandate for flight attendants regarding on-board wheelchair (OBW) assistance and lavatory accessibility in the final rule titled ''Accessible Lavatories on Single-Aisle Aircraft'' (Accessible Lavatory Rule). These provisions will be formally addressed in an upcoming rulemaking titled ''Airline Obligations to Accommodate Air Travelers with Disabilities Using Wheelchairs'' (Wheelchair Rule II). This extension is necessary to allow sufficient time for the Department to review and analyze public comments, and to make final determinations regarding the content of the final rule. This exercise of enforcement discretion is intended to remove the burden of complying with the requirements under review by DOT and does not prejudge the outcome of the new rulemaking. This notice does not affect the enforcement of requirements in the Accessible Lavatory Rule other than the one identified.

DATES: As of August 4, 2026, enforcement of 14CFR 382.125(e), 382.130(a), 382.132, and the at least once every 12-month training

requirements found in §§ 382.141(a)(6) and 14 CFR 382.63(h)(1) are delayed until April 30, 2027.

ADDRESSES: This notification of enforcement discretion, the notice of proposed rulemakings (NPRMs), all comments received, the final rules, and all background material may be viewed online at *www.regulations.gov* using the docket numbers listed above. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365 days each year. An electronic copy of this document may also be downloaded from the Office of the Federal Register's website at *www.federalregister.gov* and the Government Publishing Office's website at *www.GovInfo.gov.*

FOR FURTHER INFORMATION CONTACT: Tori Ford, Robert Gorman, or Blane Workie, Office of Aviation Consumer Protection, U.S. Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–9342 (phone), *victoria.ford@dot.gov, robert.gorman@dot.gov,* or *blane.workie@dot.gov* (email).

SUPPLEMENTARY INFORMATION: On August 1, 2023, DOT issued a final rule on ''Accessible Lavatories on Single-Aisle Aircraft'' (Accessible Lavatory Rule).[1] Among other things, this rule requires airlines to train flight attendants to proficiency on an *annual* basis to assist in transporting qualified individuals with disabilities to and from the lavatory from the aircraft seat using an on-board wheelchair (OBW).[2] This training must include hands-on training on the retrieval, assembly, stowage, transfer features, and use of the OBW. It also requires flight attendants to be trained on the accessibility features of lavatories themselves. This provision of the rule is scheduled to become effective on October 2, 2026.

In May 2024, Congress passed the Federal Aviation Administration (FAA) Reauthorization Act of 2024 (2024 FAA Act). Section 542 of the 2024 FAA Act directed the Department to issue a rulemaking to develop requirements for minimum training standards for airline personnel or contractors who assist wheelchair users who board or deplane using an aisle chair or other boarding devices, and airline personnel or contractors who stow wheelchairs and scooters on aircraft. Under the 2024 FAA Act, recurrent training must be conducted within 18 months of initial training, and trainees must be recertified on the job every 18 months thereafter by a relevant superior to remain qualified for providing aisle chair assistance. On December 17, 2024, DOT issued a final rule on ''Ensuring Safe Accommodations for Air Travelers With Disabilities Using Wheelchairs'' (Wheelchair Rule I).[3] The final rule, which included certain provisions required by the 2024 FAA Act such as training requirements, expanded existing airline obligations in 14 CFR part 382 regarding the treatment of air travelers with disabilities. In that regulation, the Department requires initial training by June 17, 2026, and at least once every twelve months thereafter for these personnel.[4]

Recently, the Department has initiated a new rulemaking titled ''Airline Obligations to Accommodate Air Travelers with Disabilities Using Wheelchairs'' (Wheelchair Rule II) [5] that will address four provisions of Wheelchair Rule I related to airline liability for mishandled wheelchairs,[6] refresher training frequency,[7] pre-departure notifications,[8] and fare difference reimbursements.[9] The Department previously announced that it would exercise its enforcement discretion and not enforce these requirements while it engages in the rulemaking process.[10] In that prior announcement, the Department stated that the earliest date it expected to make a decision on whether to move forward with a final rule was December 31, 2026. However, the Department now anticipates that the earliest date it will be decided is April 30, 2027. Consequently, the Department is expanding its exercise of enforcement discretion and extending the temporary compliance pause for the four affected Wheelchair Rule I provisions from December 31, 2026 to April 30, 2027.

Recently, a large U.S. carrier asked the Department for flexibility in enforcement regarding the annual training requirements of the Accessible Lavatory Rule. The carrier explained that it received approval from the FAA to conduct certain flight attendant safety training, as required by 14 CFR part 121, on an 18-month cycle rather than a 12-month cycle. The carrier argued that it is inefficient to conduct one type of training (required by DOT) on an annual basis while conducting another type of training (required by the FAA) on an 18-month basis.[11]

To ensure that the various training requirements in part 382 are consistent with the law and Administration policies, the Department has decided that the training frequency issue raised by the Accessible Lavatory Rule will be addressed within the scope of Wheelchair Rule II. Wheelchair Rule II will consider the frequency of refresher training for flight attendants on how to assist passengers to and from aircraft lavatories, including hands-on training with the OBWs and the accessibility features of the lavatories. As such, the Department believes that the public interest is best served by the Department extending its temporary pause in enforcement to the frequency of the training requirement in 14 CFR 382.63(h)(1) to align with the updated Wheelchair Rule II. This notice of enforcement discretion does not affect the enforcement of requirements in the Accessible Lavatory Rule other than the one identified above.

Issued in Washington, DC, under authority delegated in 49 CFR 1.27(a):

Gregory Zerzan,

General Counsel.

[FR Doc. 2026–15835 Filed 8–3–26; 8:45 am]

BILLING CODE 4910–9X–P

[1] 88 FR 50020 (Aug. 1, 2023).

[2] *See* 14 CFR 382.63(h)(1). OBWs are specialized wheelchairs that are stowed onboard the aircraft. They are used to transport passengers between the aircraft seat and the lavatory, often while in-flight. They are distinct from both standard wheelchairs (used to transport passengers within the airport) and aisle chairs (used for enplaning and deplaning).

[3] 89 FR 102398 (Dec. 17, 2024).

[4] 14 CFR 382.141(a)(6).

[6] Codified at 14 CFR 382.130(a).

[7] Codified at 14 CFR 382.141(a)(6).

[8] Codified at 14 CFR 382.125(e).

[9] Codified at 14 CFR 382.132.

[10] *See* 90 FR 46751 (Sept. 30, 2025). Aside from refresher training frequency, our exercise of enforcement discretion applied to provisions of Wheelchair Rule I related to airline liability for mishandled wheelchairs, pre-departure notifications, and fare difference reimbursements.

[11] Specifically, the carrier stated that this ''incongruence'' would require the carrier to transport almost 30,000 flight attendants to training sessions off-cycle, removing them from operations for an additional day each year.

FEDERAL MEDIATION AND CONCILIATION SERVICE

29 CFR PART 1404

RIN 3076–AA31

Requests for Arbitration Panels

AGENCY: Federal Mediation and Conciliation Service.

ACTION: Interim final rule; request for comments.

SUMMARY: The Federal Mediation and Conciliation Service (FMCS) is issuing an interim final rule with requests for comments to amend its arbitration

services regulations. The interim final rule clarifies the circumstances in which the Office of Arbitration (OA) may decline to issue an arbitration panel, make a direct appointment, or provide related arbitration services. The rule would remove language that could be read to require FMCS to honor every unilateral request for an arbitration panel, regardless of legal constraints or FMCS's authority. FMCS seeks public comment on this interim final rule.

DATES: This interim final rule is effective August 4, 2026.

Comment date: Comments must be received on or before September 3, 2026.

FMCS will consider all timely comments received. After reviewing the comments, FMCS may revise, withdraw, or confirm this interim final rule through a subsequent document published in the **Federal Register**.

ADDRESSES: You may submit comments for this interim final rule within the Federal eRulemaking Portal at *https://www.regulations.gov/.* Follow the instructions for submitting comments.

All comments must be received by the end of the comment period for them to be considered. All comments and other submissions received generally will be posted on the internet at *regulations.gov* as they are received, without change, including any personal information provided. However, FMCS retains discretion to redact personal or sensitive information, including but not limited to personal or sensitive information pertaining to third parties, where appropriate.

A summary of this rule may be found in the docket for this rulemaking at *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Anna Davis, General Counsel, Federal Mediation and Conciliation Service, (202) 606–3737, [EMAIL] *adavis@fmcs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background and Purpose

FMCS administers a Roster of Arbitrators and provides arbitration-related services under 29 CFR part 1404. Those regulations provide that voluntary arbitration and fact-finding are important means of resolving labor disputes and that OA administers requests for labor arbitration services. Current § 1404.9(b) states that a panel request, ''whether joint or unilateral, will be honored,'' while also stating that FMCS does not adopt any position on the status of an arbitration agreement, arbitrability of a dispute, or the terms of the parties' contract by issuing a panel or appointing an arbitrator. Current § 1404.10 similarly provides that the Office of Arbitration will not decide that a dispute is not subject to arbitration.

FMCS's authority is administrative and facilitative. Current § 1404.9(c) provides that FMCS has no power to compel parties to appear before an arbitrator, enforce an agreement to arbitrate, compel parties to arbitrate any issue, influence or set aside an arbitrator's decision, or compel, deny, or modify payment of compensation to an arbitrator. Current § 1404.9(d) also recognizes that the OA may decline to submit a panel or appoint an arbitrator if the request is overly burdensome or otherwise impracticable.

FMCS has determined that the current sentence stating that every joint or unilateral panel request ''will be honored'' could be misread as requiring FMCS to provide panels even where doing so would be inconsistent with law, a court order, or FMCS's statutory or regulatory authority. That was not the intended effect of the regulation. The proposed rule clarifies that FMCS retains authority to make limited threshold determinations concerning whether FMCS may lawfully provide the requested service.

FMCS's statutory authorities support that clarification. Section 203 of the Labor Management Relations Act authorizes FMCS to make services available to assist in the resolution of labor disputes and, in subsection (f), to make its services available to Federal agencies to aid in the resolution of disputes under subchapter IV of chapter 5 of title 5, including by maintaining rosters of neutrals and arbitrators. Those services are subject to provisions in 5 U.S.C. 572(a) and 572(c) making clear that alternative dispute-resolution procedures are voluntary and require mutual consent. In the Federal-sector collective-bargaining context, 5 U.S.C. 7121 separately governs negotiated grievance procedures and provides that unresolved grievances under such procedures are subject to binding arbitration invoked by either the exclusive representative or the agency.

Recent executive orders excluding certain agencies or subdivisions from Federal labor-management relations have increased the likelihood that FMCS will receive requests for arbitration panels in circumstances where one party asserts that participation in the requested arbitration process is prohibited by law, court order or otherwise outside FMCS's statutory or regulatory authority. Executive Order 14251 excluded identified agencies and subdivisions from coverage under chapter 71 of title 5 based on the President's national security determinations, and directed agencies covered by the exclusion, upon termination of applicable collective-bargaining agreements, to terminate agency participation in any pending grievance proceedings under 5 U.S.C. 7121. FMCS recognizes that litigation concerning these matters may affect particular requests and that FMCS must administer its arbitration services consistent with applicable law and any court orders.

This rule therefore clarifies the limited screening role FMCS may perform before issuing a panel or making an appointment. Where a request presents a threshold question about FMCS's authority to provide the requested service, FMCS may seek information from the parties and may decline the request, hold the request in abeyance, or take another administratively appropriate action. FMCS's action on such a threshold question does not adjudicate the parties' underlying contractual, statutory, or arbitrability dispute. These changes reflect the longstanding principle that arbitration is voluntary and correct confusing and potentially misleading language in FMCS's current regulation.

II. Regulatory Changes

This interim final rule amends 29 CFR part 1404, subpart C, which governs FMCS arbitration services, to clarify OA's authority to screen arbitration-panel and appointment requests before providing FMCS services. The rule preserves FMCS's existing role as an administrative provider of arbitration panels and appointments, but makes clear that FMCS is not required to issue a panel, make a direct appointment, or provide related arbitration services where doing so would be inconsistent with applicable law, a court order, or FMCS's statutory or regulatory authority.

Section 1404.9—Procedures for Requesting Arbitration Lists and Panels

The rule revises § 1404.9(b). Current § 1404.9(b) provides that, although parties are encouraged to make joint requests, a panel request ''whether joint or unilateral, will be honored,'' while also stating that issuance of a panel does not signify any FMCS position on the arbitration agreement, arbitrability, or contract terms.

The revised text retains the basic rule that, upon request, OA will refer a randomly selected panel of seven arbitrators to parties to an arbitration or fact-finding agreement, or where labor arbitration or fact-finding may be provided by statute. It also retains the requirement that each panel member's

biographical sketch include the background, qualifications, experience, and fee information furnished to FMCS by the arbitrator.

The rule clarifies when a panel request may be unilateral and when joint authorization is required. Under the revised text, a request for a panel may be joint or unilateral unless part 1404, applicable law, or the parties' agreement requires joint authorization for the requested service. Requests for a panel of other than seven names, for direct appointment of an arbitrator, or for special qualifications or other special service continue to require joint submission or authorization by both parties pursuant to mutual agreement.

The rule adds a new limited threshold-inquiry provision. OA may conduct a limited threshold inquiry to determine whether issuing a panel, making a direct appointment, or providing related arbitration services would be inconsistent with applicable law, a court order, or FMCS's statutory or regulatory authority. In conducting that inquiry, OA may request the parties' agreement, a statutory provision, regulation, court order, written authorization, or other information needed to determine whether FMCS may provide the requested service.

Following that limited threshold inquiry, FMCS may issue the panel or appointment, decline to provide the requested service, hold the request in abeyance, or take another administratively appropriate action. The revised text further clarifies that FMCS's issuance of a panel or appointment, refusal to issue a panel or appointment, or decision to hold a request in abeyance does not decide the validity of any collective-bargaining agreement, the merits of any grievance, the arbitrability of any dispute, or the parties' rights or obligations under any agreement or law.

For example, the doctrine of sovereign immunity requires statutory authorization before an agency can engage in binding arbitration. Without such authorization agencies cannot be brought before an external tribunal.[1] Congress has provided statutory authorization for agencies to engage in binding arbitration in a number of contexts involving both private parties and Federal employees.[2] However, in situations where statutory authorization is not available, the executive branch's obligation to take care that the law is faithfully executed precludes FMCS from providing panels for unlawful arbitration proceedings. FMCS cannot facilitate constitutional violations.

Section 1404.10—Arbitrability

The rule revises § 1404.10 to conform to the revised threshold-inquiry language in § 1404.9. The revised section preserves the rule that OA will not decide the merits of a claim by either party that a dispute is not subject to arbitration. It adds that OA may nevertheless conduct a limited threshold inquiry to determine whether FMCS may lawfully submit a panel, make a direct appointment, or provide related arbitration services under part 1404, consistent with § 1404.9.

Section 1404.11—Nominations of Arbitrators

The rule revises § 1404.11(b) and (c). Current § 1404.11(b) provides that OA will provide a randomly selected panel of arbitrators located near the hearing site, unless the parties jointly request special qualifications or no geographic restrictions. Current § 1404.11(c) provides that, if the parties do not agree on an arbitrator from the first panel, OA will furnish up to five additional panels upon joint request, or upon unilateral request if authorized by the applicable collective-bargaining agreement, and payment of additional fees.

The revised § 1404.11(b) makes nominations of arbitrators expressly subject to §§ 1404.9 and 1404.10. This conforming change ensures that ordinary panel nomination procedures do not override FMCS's threshold authority to decline or hold a request in abeyance where providing the requested service would be inconsistent with law, a court order, or FMCS's authority.

The rule also updates the nondiscrimination sentence in § 1404.11(b). It replaces ''gender'' with ''sex'' and adds a catchall prohibiting inclusions or exclusions based on ''any other basis prohibited by applicable law.''

The revised § 1404.11(c) preserves the existing additional-panel process but expands the sources of authority that may support a unilateral request for additional panels. Additional panels may be furnished upon joint request, or upon unilateral request if authorized by the applicable collective-bargaining agreement, statute, regulation, court order, or other binding authority, and payment of additional fees. The revised paragraph also states that the additional-panel process is subject to §§ 1404.9 and 1404.10, and that OA may decline to furnish an additional panel or hold the request in abeyance if furnishing the panel would be inconsistent with applicable law, a court order, or FMCS's statutory or regulatory authority.

Section 1404.12—Selection by Parties and Appointment of Arbitrators

The rule revises § 1404.12(b) and (c). Current § 1404.12(b) sets out the ranked-preference process for selecting an arbitrator from a panel and provides that, if one party submits its ranked preferences and the other party fails to respond within 14 days, the first party's choice will be honored. Current § 1404.12(c) provides that OA will make a direct appointment only upon joint request or as otherwise provided by part 1404.

The revised § 1404.12(b) retains the existing ranked preference process. Where the parties' collective-bargaining agreement permits each party to separately notify OA of its ranked preferences, or is silent on the selection method, FMCS will ask each party to rank the panel. If both parties respond, the arbitrator with the lowest combined number will be appointed. If one party fails to respond, the first party's choice will be honored.

The rule adds a conforming limitation to § 1404.12(b): the paragraph is subject to § 1404.9(b) and does not require OA to make an appointment where OA determines that the appointment would be inconsistent with applicable law, a court order, or FMCS's statutory or regulatory authority.

The revised § 1404.12(c) likewise makes direct appointments subject to §§ 1404.9 and 1404.10. OA will make a direct appointment only upon joint request or as otherwise provided by part 1404, but that appointment authority is now expressly subject to the rule's threshold-screening provisions.

III. Expected Impact

A. Statement of Need

FMCS is issuing this interim final rule to clarify its arbitration services regulations and prevent misinterpretation of current § 1404.9(b). The current language could be read to require FMCS to honor every unilateral request for an arbitration panel even when providing a panel, making a direct appointment, or providing related arbitration services would be inconsistent with applicable law, a court order, or FMCS's statutory or regulatory authority.

The interim final rule clarifies that OA may conduct a limited threshold inquiry into whether FMCS may

[1] *See United States* v. *Shaw,* 309 U.S. 495, 500–501 (1940) (''without specific statutory consent, no suit may be brought against the United States. No officer, by his action, can confer jurisdiction''). *See also U.S.* v. *Mitchell,* 463 U.S. 206, 215–216 (1983) (without statutory authorization ''no contracting officer or other official is empowered to consent to suit against the United States.'').

[2] *See* 5 U.S.C. 572 and 5 U.S.C. 7121.

lawfully provide the requested administrative arbitration service. The rule does not authorize FMCS to decide the merits of any grievance, the validity of any collective-bargaining agreement, the arbitrability of any dispute, or the rights or obligations of the parties under any agreement or law.

B. Costs

FMCS does not expect the rule to impose significant costs. The rule does not require any party to submit new recurring reports, maintain new records, or change the substantive terms of any collective-bargaining agreement. The rule clarifies FMCS's internal processing standards for arbitration-panel requests and related services. Some parties may submit information to FMCS in response to a threshold inquiry, but FMCS expects such submissions to be limited to circumstances in which a request presents a legal or authority-based objection to FMCS providing the requested service.

FMCS also expects any cost effects to be limited because the rule does not affect parties' ability to pursue any available remedy before the FLRA, a court, or another tribunal with jurisdiction. Where FMCS determines that it cannot provide a requested panel or appointment, parties remain free to pursue any other procedure or remedy available under law or their agreement.

C. Benefits

The rule will improve clarity, reduce confusion, and help ensure that FMCS administers its arbitration services consistent with law. The rule will make clear that FMCS's existing panel procedures do not require FMCS to provide a panel or appointment where doing so would exceed FMCS's authority or conflict with applicable law or court orders. The rule will also help parties understand that FMCS's threshold processing decisions do not decide the merits of a grievance, the validity of a collective-bargaining agreement, or the arbitrability of a dispute.

D. Alternatives Considered

FMCS considered retaining the current text of § 1404.9(b), but rejected that alternative because the phrase ''whether joint or unilateral, will be honored'' may be read too broadly and may create confusion about FMCS's obligations. FMCS also considered adopting a rule under which FMCS would decide arbitrability disputes before issuing a panel, but rejected that alternative because FMCS's role is administrative and facilitative, and current § 1404.10 provides that the Office of Arbitration does not decide the merits of arbitrability claims. The interim final rule adopts a narrower approach by authorizing only a limited threshold inquiry into FMCS's own authority to provide the requested administrative arbitration service.

E. Reliance Interests

FMCS recognizes that some parties may have relied on current § 1404.9(b) and prior FMCS practice when drafting or administering arbitration procedures. This interim final rule does not retroactively invalidate any panel previously issued, appointment previously made, or request previously submitted. Nor does it alter any party's contractual or statutory rights. The rule clarifies only FMCS's own authority and procedures for providing arbitration panels, appointments, and related services.

To the extent parties expected FMCS to honor unilateral panel requests in all circumstances, FMCS has determined that any such reliance is outweighed by the need to ensure that FMCS does not provide arbitration services where doing so would be inconsistent with applicable law, a court order, or FMCS's authority. Further, FMCS does not believe any expectation that FMCS would honor requests that conflicted with applicable law to be reasonable. FMCS also notes that parties remain free to pursue available remedies before the FLRA, a court, or another tribunal with jurisdiction. For example, any allegations that a party failed to comply with any provision of a CBA, including any arbitration provision, may be presented to the Federal Labor Relations Authority as an unfair labor practice pursuant to 5 U.S.C. 7116.

F. Severability

FMCS intends the provisions of this interim final rule to be severable. If any provision of this rule, or the application of any provision to any person or circumstance, is held invalid, FMCS intends that the remainder of the rule and its application to other persons or circumstances remain in effect to the fullest extent permitted by law.

IV. Regulatory Compliance

A. Administrative Procedure Act

FMCS is issuing this rule as an interim final rule with request for comments. FMCS finds good cause under 5 U.S.C. 553(b)(B) to issue this rule without first publishing a notice of proposed rulemaking because prior notice and public procedure are impracticable, unnecessary, and contrary to the public interest. Current § 1404.9(b) could be read to require OA to honor every joint or unilateral request for an arbitration panel regardless of whether providing the requested service would be inconsistent with applicable law, a court order, or FMCS's statutory or regulatory authority. FMCS has determined that it is necessary to clarify promptly that FMCS retains authority to conduct a limited threshold inquiry and to decline, hold in abeyance, or otherwise act on requests that FMCS cannot lawfully process or that would otherwise be inconsistent with law.

Delaying issuance of this clarification until after completion of notice-and-comment rulemaking would risk continued confusion regarding FMCS's authority and obligations when presented with requests that raise threshold legal or authority-based objections. FMCS therefore finds that issuing this rule on an interim final basis is in the public interest.

Although FMCS finds good cause to issue this rule without prior notice and comment, FMCS invites public comment on all aspects of this interim final rule. FMCS will consider all timely comments and may revise, withdraw, delay the effective date of, or confirm this interim final rule through a subsequent **Federal Register** document.

FMCS also finds good cause under 5 U.S.C. 553(d)(3) to make this rule effective upon publication. The same reasons supporting issuance without prior notice and comment also support immediate effectiveness because delaying the rule's effective date would perpetuate uncertainty regarding FMCS's authority to decline, hold in abeyance, or otherwise act on requests for arbitration services that FMCS may not lawfully process or that would otherwise be inconsistent with law.

B. Regulatory Review

FMCS has considered the costs and benefits of this rule. The rule clarifies FMCS's procedures for providing arbitration panels and appointments and does not impose significant compliance costs. OIRA has determined that this rule is not a significant regulatory action under Executive Order 12866. This rule is not an Executive Order 14192 regulatory action because it imposes no more than de minimis regulatory costs.

C. Regulatory Flexibility Act

Because FMCS is issuing this rule without prior notice and comment based on the good-cause exception in 5 U.S.C. 553(b)(B), the requirements of the Regulatory Flexibility Act for an initial or final regulatory flexibility analysis do not apply. In any event, FMCS certifies

that this interim final rule will not have a significant economic impact on a substantial number of small entities.

This rule clarifies FMCS's procedures for processing requests for arbitration panels, direct appointments, and related arbitration services. It does not impose new substantive compliance obligations, recurring reporting requirements, or recordkeeping requirements on small entities. The rule does not alter the fee schedule in appendix A to part 1404. To the extent a small entity requests FMCS arbitration services, the rule may affect whether FMCS issues a panel or appointment in the limited circumstance where FMCS determines that providing the requested service would be inconsistent with applicable law, a court order, or FMCS's statutory or regulatory authority. FMCS expects any economic effect to be minimal.

D. Federalism

FMCS has analyzed this rule under Executive Order 13132 and has determined that it will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.

E. Civil Justice Reform

This rulemaking meets the applicable standards set forth in section 3(a) and (b)(2) of Executive Order 12988.

F. Unfunded Mandates Reform Act

This rule will not result in expenditures by State, local, or tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year, adjusted for inflation. Accordingly, FMCS has not prepared a written statement under the Unfunded Mandates Reform Act.

G. Congressional Review Act

FMCS will submit this interim final rule to Congress and the Comptroller General in accordance with 5 U.S.C. 801. OIRA has determined that this rule is not a ''major rule'' within the meaning of 5 U.S.C. 804(2).

H. Paperwork Reduction Act

This rule does not impose a new collection of information within the meaning of the Paperwork Reduction Act because it does not require standardized reporting or recordkeeping by the public. If FMCS later revises Form R–43 or creates a standardized submission requirement to implement threshold inquiries under this rule, FMCS will evaluate whether approval from OMB is required under the Paperwork Reduction Act.

List of Subjects in 29 Part 1404

Administrative practice and procedures; Arbitration; Labor management relations.

For the reasons stated in the preamble, the Federal Mediation and Conciliation Service amends 29 CFR part 1404 as follows:

PART 1404—ARBITRATION SERVICES

■ 1. The authority citation continues to read as follows:

Authority: 29 U.S.C. 172 and 29 U.S.C. 173 *et seq.*

Subpart C—Procedures for Arbitration Services

■ 2. Amend § 1404.9 by revising paragraph (b) to read as follows:

§ 1404.9 Procedures for requesting arbitration lists and panels.

* * * * *

(b)(1) Upon request, OA will refer a randomly selected panel of seven arbitrators to parties to an agreement to arbitrate or engage in fact-finding, or where labor arbitration or fact-finding may be provided by statute. A biographical sketch will be provided for each member of the panel. This sketch states the background, qualifications, experience, and all fees as furnished to OA by the arbitrator.

(2) A request for a panel may be joint or unilateral unless this part, applicable law, or the parties' agreement requires joint authorization for the requested service. Requests for a panel of other than seven names, for direct appointment of an arbitrator, or for special qualifications or other special service will not be honored unless jointly submitted or authorized by both parties pursuant to mutual agreement.

(3) OA may conduct a limited threshold inquiry to determine whether issuing a panel, making a direct appointment, or providing related arbitration services would be inconsistent with applicable law, a court order, or FMCS's statutory or regulatory authority. OA may request from the parties the agreement, statutory provision, regulation, court order, written authorization, or other information necessary to determine whether OA may provide the requested service. Following such inquiry, FMCS may issue the panel or appointment, decline to provide the requested service, hold the request in abeyance, or take other administratively appropriate action.

(4) OA's issuance of a panel or appointment, refusal to issue a panel or appointment, or decision to hold a request in abeyance does not constitute a decision on the validity of any collective-bargaining agreement, the merits of any grievance, the arbitrability of any dispute, or the rights or obligations of the parties under any agreement or law.

* * * * *

■ 3. Revise § 1404.10 to read as follows:

§ 1404.10 Arbitrability.

OA will not decide the merits of a claim by either party that a dispute is not subject to arbitration. OA may, however, conduct a limited threshold inquiry to determine whether FMCS may lawfully submit a panel, make a direct appointment, or provide related arbitration services under this part, consistent with § 1404.9.

■ 4. Amend § 1404.11 by revising paragraphs (b) and (c) to read as follows:

§ 1404.11 Nominations of arbitrators.

* * * * *

(b) Subject to §§ 1404.9 and 1404.10, OA will provide a randomly selected panel of arbitrators located in geographical areas in proximity of the hearing site, as specified in the request. The parties may jointly request special qualification of arbitrators experienced in certain issues or industries or that possess certain backgrounds, or a panel with no geographic restrictions within the U.S. OA has no obligation to put an individual on any given panel or on a minimum number of panels in any fixed period. If at any time both parties request that a name or names be included, or omitted, from a panel, such name or names will be included, or omitted, unless the number of names is excessive. These inclusions/exclusions may not discriminate against anyone because of age, race, color, sex, national origin, disability, genetic information, religion, or any other basis prohibited by applicable law.

(c) If the parties do not agree on an arbitrator from the first panel, OA will furnish up to five additional panels to the parties upon joint request, or upon a unilateral request if authorized by the applicable collective bargaining agreement, statute, regulation, court order, or other binding authority, and payment of additional fees. This paragraph is subject to §§ 1404.9 and 1404.10. OA may decline to furnish an additional panel, or may hold the request in abeyance, if OA determines under § 1404.9(b) that furnishing the additional panel would be inconsistent with applicable law, a court order, or

FMCS's statutory or regulatory authority.

■ 5. Amend § 1404.12 by revising paragraphs (b) and (c) to read as follows:

§ 1404.12 Selection by parties and appointment of arbitrators.

* * * * *

(b) Where the parties' collective bargaining agreement permits each party to separately notify OA of its ranked order of preference, or is silent on the manner of selecting arbitrators, FMCS will ask each party to advise OA of its order of preference by numbering each name on the panel and submitting the numbered list in writing to OA. Upon receiving the rank order from one party, OA will notify the other party that it has fourteen (14) days in which to submit its selections. Where both parties respond, the name that has the lowest combined number will be appointed. If the other party fails to respond, the first party's choice will be honored. This paragraph is subject to § 1404.9(b) and does not require OA to make an appointment where OA determines that the appointment would be inconsistent with applicable law, a court order, or FMCS's statutory or regulatory authority.

(c) Subject to §§ 1404.9 and 1404.10, OA will make a direct appointment of an arbitrator only upon joint request or as otherwise provided by this part.

Dated: July 31, 2026.

Anna Davis,

General Counsel.

[FR Doc. 2026–15798 Filed 8–3–26; 8:45 am]

BILLING CODE 6732–01–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2026–0957]

RIN 1625–AA00

Safety Zone; Ohio River; River, Aurora, IN

AGENCY: Coast Guard, Department of Homeland Security.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone for navigable waters on the Ohio River, from mile marker (MM) 499 to MM 497 in Aurora, Indiana. The safety zone is needed to protect personnel, vessels, and the marine environment from potential hazards associated with an over water powerline replacement. Entry of vessels or persons into this zone is prohibited unless specifically authorized by the Captain of the Port, Ohio Valley, or their designated representative.

DATES: This rule is effective from August 3, 2026, through August 9, 2026. It will be enforced from 7 a.m. to 5 p.m. each day during this period, or until operations are complete, whichever occurs first.

ADDRESSES: To view available documents go to *https://www.regulations.gov* and search for USCG–2026–0957.

FOR FURTHER INFORMATION CONTACT: If you have questions about this rule, contact MST1 Jean Jimenez Sosa, MSD Cincinnati, U.S. Coast Guard; telephone 206–827–1363, or email *Jean.C.JimenezSosa@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background and Authority

The Coast Guard received notification that Duke Energy will be conducting aerial power line replacements within the Ohio River near Aurora, IN. Hazards from this project include but are not limited to deployment of heavy machinery, and various other activities which create hazards for workers and the public. The Captain of the Port (COTP) Ohio Valley has determined that potential hazards associated with power line replacements are a safety concern for anyone within the work area. Therefore, the COTP is issuing this rule under the authority in 46 U.S.C. 70034, which is needed to protect personnel, vessels, and the marine environment in the navigable waters within the safety zone.

Because of these potential hazards, the Coast Guard is issuing this rule without prior notice and comment. As is authorized by 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because it is impracticable and contrary to the public interest. The Coast Guard was notified of this event on July 13, 2026, but we must establish this safety zone by August 9, 2026, to protect personnel, vessels, and the marine environment. Therefore, we do not have enough time to solicit and respond to comments.

For the same reason, the Coast Guard finds that under 5 U.S.C. 553(d)(3), good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**.

III. Discussion of the Rule

This rule establishes a safety zone from August 3, 2026, through August 9, 2026. The rule will be enforced from 7 a.m. to 5 p.m. on each day during this period, or until operations are complete. The safety zone will cover all navigable waters of Ohio River, from mile marker (MM) 499 to MM 497 in Aurora, Indiana. Vessels and persons will not be allowed to enter the zone during this time, unless authorized by the Captain of the Port.

IV. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders.

A. Impact on Small Entities

The regulatory flexibility analysis provisions of the Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, do not apply to rules that are not subject to notice and comment. Because the Coast Guard has, for good cause, waived the notice and comment requirement that would otherwise apply to this rulemaking, the Regulatory Flexibility Act's flexibility analysis provisions do not apply here.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), if this rule will affect your small business, organization, or governmental jurisdiction and you have questions, contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards by calling 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

B. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

C. Federalism and Indian Tribal Governments

We have analyzed this rule under Executive Order 13132, Federalism, and

have determined that it is consistent with the fundamental federalism principles and preemption requirements described in that Order.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

D. Unfunded Mandates Reform Act

As required by The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538), the Coast Guard certifies that this rule will not result in an annual expenditure of $100,000,000 or more (adjusted for inflation) by a State, local, or tribal government, in the aggregate, or by the private sector.

E. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment.

This rule is a safety zone. It is categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A Record of Environmental Consideration supporting this determination is available in the docket.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051, 70124; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.4.

■ 2. Add § 165.T08–0957 to read as follows:

§ 165.T08–0957 Safety Zone; Ohio River, Aurora, IN.

(a) *Location.* The following area is a safety zone: All navigable waters of Ohio River, from mile marker (MM) 499 to MM 497 in Aurora, Indiana.

(b) *Definitions.* As used in this section, *designated representative* means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer operating a Coast Guard vessel and a Federal, State, and local officer designated by or assisting the Captain of the Port, Ohio Valley (COTP) in the enforcement of the safety zone.

(c) *Regulations.* (1) Under the general safety zone regulations in subpart C of this part, you may not enter the safety zone described in paragraph (a) of this section unless authorized by the COTP or the COTP's designated representative.

(2) To seek permission to enter, contact the COTP or the COTP's representative on VHF–FM channel 16 or by telephone at 1–800–253–7465. Those in the safety zone must comply with all lawful orders or directions given to them by the COTP or the COTP's designated representative.

(d) *Enforcement periods.* This section will be enforced from 7 a.m. to 5 p.m. daily from August 3, 2026, through August 9, 2026, or until operations are complete, whichever occurs first.

Randy L. Preston,

Captain, U.S. Coast Guard, Captain of the Port, Ohio Valley.

[FR Doc. 2026–15756 Filed 8–3–26; 8:45 am]

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2025–0041; FRL–13401–01]

Isofetamid; Pesticide Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes tolerances for residues of isofetamid in or on nut, tree, group 14–12, and almond, hulls. Under the Federal Food, Drug, and Cosmetic Act (FFDCA) ISK Biosciences Corporation submitted a petition to EPA requesting that EPA establish a maximum permissible level for residues of this pesticide in or on the identified commodities.

DATES: This regulation is effective August 4, 2026. Objections and requests for hearings must be received on or before October 5, 2026, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of this document).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2025–0041, is available at *http://www.regulations.gov.* Additional information about dockets generally, along with instructions for visiting the docket in person, is available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Charles Smith, Director Registration Division (7505T), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 566–1030; email address: *RDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What is EPA's authority for taking this action?

EPA is issuing this rulemaking under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a. FFDCA section 408(c)(2)(A)(i) allows EPA to establish an exemption from the requirement for a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the exemption is ''safe.'' FFDCA section 408(c)(2)(A)(ii) defines ''safe'' to mean that ''there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.'' This includes

exposure through drinking water and in residential settings but does not include occupational exposure. Pursuant to FFDCA section 408(c)(2)(B), in establishing or maintaining in effect an exemption from the requirement of a tolerance, EPA must take into account the factors set forth in FFDCA section 408(b)(2)(C), which require EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to ''ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . .'' Additionally, FFDCA section 408(b)(2)(D) requires that the Agency consider, among other things, ''available information concerning the cumulative effects of a particular pesticide's residues'' and ''other substances that have a common mechanism of toxicity.''

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a(g), any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. If you fail to file an objection to the final rule within the time period specified in the final rule, you will have waived the right to raise any issues resolved in the final rule. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify the docket ID number EPA–HQ–OPP–2025–0041 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing, and must be received by the Hearing Clerk on or before October 5, 2026.

The EPA's Office of Administrative Law Judges (OALJ), in which the Hearing Clerk is housed, urges parties to file and serve documents by electronic means only, notwithstanding any other particular requirements set forth in other procedural rules governing those proceedings. *See* ''Order Urging Electronic Filing and Service,'' dated December 3, 2025, which can be found at *https://www.epa.gov/system/files/documents/2025-12/2025-12-03-order-urging-electronic-filing-and-service.pdf.*Although the EPA's regulations require submission via U.S. Mail or hand delivery, the EPA intends to treat submissions filed via electronic means as properly filed submissions; therefore, the EPA believes the preference for submission via electronic means will not be prejudicial. When submitting documents to the OALJ electronically, a person should utilize the OALJ e-filing system at *https://yosemite.epa.gov/OA/EAB/EAB-ALJ_Upload.nsf.*

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket at *https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute. If you wish to include CBI in your request, please follow the applicable instructions at *https://www.epa.gov/dockets/commenting-epa-dockets#rules*and clearly mark the information that you claim to be CBI. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice.

II. Petitioned-For Tolerance

In the **Federal Register** of July 3, 2025 (90 FR 29516) (FRL–12474–05–OCSPP), EPA issued a document pursuant to FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide petition (PP 4F9151) by ISK Biosciences Corporation, 7470 Auburn Rd., Suite A, Concord, OH 44027. The petition requested that 40 CFR part 180 be amended by establishing tolerances for residues of the fungicide isofetamid, in or on Tree nut, crop group 14–12 at 0.15 parts per million (ppm) and almond hulls at 15 ppm. The petition also requested to remove tolerances in 40 CFR part 180 for residues of the fungicide isofetamid including its metabolites and degradates in or on the raw agricultural commodities almonds at 0.01 ppm, almond hulls at 0.01 ppm. That document referenced a summary of the petition prepared by ISK Bioscience, the registrant, which is available in the docket, *http://www.regulations.gov.* There were no comments received in response to the notice of filing.

Based upon review of the data supporting the petition, EPA is proposing a higher tolerance for Almond, hulls, based on the available data and the tolerance calculation procedures of the Organization for Economic Cooperation and Development (OECD). The reason for these changes are explained in Unit IV.C.

III. Final Tolerance Action

A. Aggregate Risk Assessment and Determination of Safety

Consistent with FFDCA section 408(b)(2)(D), and the factors specified in FFDCA section 408(b)(2)(D), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure for isofetamid including exposure resulting from the tolerances established by this action. EPA's assessment of exposures and risks associated with isofetamid is summarized in this Unit.

In an effort to streamline its publications in the **Federal Register**, EPA is not reprinting sections that repeat what has been previously published for tolerance rulemakings of the same pesticide chemical. Where scientific information concerning a particular chemical remains unchanged, the content of those sections would not vary between tolerance rulemaking, and EPA considers referral back to those sections as sufficient to provide an explanation of the information EPA considered in making its safety determination for the new rulemaking.

EPA has previously published several tolerance rulemakings for isofetamid in 2015, 2017, 2022 in which EPA concluded, based on the available information, that there is a reasonable certainty that no harm would result from aggregate exposure to isofetamid and established tolerances for residues of that chemical. EPA is incorporating previously published sections from the 2015 and 2017 rulemakings as described further in this rulemaking, as they remain unchanged.

Specific information on the risk assessment conducted in support of this action can be found in the document titled ''*Isofetamid. Human Health Risk Assessment for a New Tolerance Registration of Isofetamid on Tree Nuts, Crop Group 14–12 and the Amended Tolerance on Almond Hulls*'' and the documents cited therein, which are available in the docket for this action at *https://www.regulations.gov,* docket ID number EPA–HQ–OPP–2025–0041.

B. Toxicological Profile

Specific information on the studies received and the nature of the adverse effects caused by isofetamid as well as the no-observed-adverse-effect-level (NOAEL) and the lowest-observed-adverse-effect-level (LOAEL) from the toxicity studies can be found at *http://www.regulations.gov* in document Isofetamid. Human Health Risk

Assessment for a New Tolerance Registration of Isofetamid on Tree Nuts, Crop Group 14–12 and the Amended Tolerance on Almond Hulls. at page 10–12 in docket ID number EPA–HQ–OPP–2025–0041.

C. Toxicological Points of Departure/Levels of Concern.

For a summary of the Toxicological Points of Departure/Levels of Concern for isofetamid used for human risk assessment, please reference Unit III.B. of the July 30, 2015, rulemaking (80 FR 45438) (FRL–9923–86).

D. Exposure Assessment

1. Dietary Exposure From Food and Feed Uses

In evaluating dietary exposure to isofetamid, EPA considered exposure under the petitioned-for tolerances as well as all existing isofetamid tolerances in 40 CFR 180.681. EPA assessed dietary exposures from isofetamid in food as follows:

i. Acute Exposure

Quantitative acute dietary exposure and risk assessments are performed for a food-use pesticide, if a toxicological study has indicated the possibility of an effect of concern occurring as a result of a 1-day or single exposure. No such effects were identified in the toxicological studies for isofetamid therefore, a quantitative acute dietary exposure assessment is unnecessary.

ii. Chronic Exposure

In conducting the chronic dietary exposure assessment EPA used the food consumption data from the USDA 2005–2010 CSFII. This software uses 2005–2010 food consumption data from the U.S. Department of Agriculture's (USDA's) National Health and Nutrition Examination Survey, What We Eat in America (NHANES/WWEIA). The unrefined chronic dietary exposure assessment used tolerance-level residues and assumed 100 percent crop treated (PCT) for all registered and proposed commodities. Default processing factors were used for all other proposed and registered processed commodities. Exposure to drinking water was incorporated directly into the dietary assessment. A cancer dietary assessment was not conducted because isofetamid is classified as ''not likely to be carcinogenic to humans.''

2. Drinking Water and Non-Occupational Exposures

The previously recommended estimated drinking water concentrations (EDWCs) are unchanged and are considered protective potential drinking water residue levels anticipated from the proposed tolerance updates. As stated in the July 30, 2015, rulemaking, the chronic dietary exposure and risk assessment incorporate the highest total EDWC of 110 parts per billion directly into this dietary assessment (80 FR 45438) (FRL–9923–86). The residential exposure assessment has not changed since the June 14, 2017, rulemaking (new residential uses. For a summary of the residential exposure 82 FR 27149) (FRL–9961–80) because there are no proposed analysis for isofetamid used for the human risk assessment, please reference Unit III.C.3. of the June 14, 2017, rulemaking.

3. Cumulative Exposures

Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider ''available information'' concerning the cumulative effects of a particular pesticide's residues and ''other substances that have a common mechanism of toxicity.''

EPA has not found isofetamid to share a common mechanism of toxicity with any other substances, and isofetamid does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has assumed that isofetamid does not have a common mechanism of toxicity with other substances.

E. Safety Factor for Infants and Children.

1. *In general.* FFDCA section 408(b)(2)(C) provides that EPA shall apply an additional tenfold (10X) margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the database on toxicity and exposure unless EPA determines based on reliable data that a different margin of safety will be safe for infants and children. This additional margin of safety is commonly referred to as the Food Quality Protection Act (FQPA) Safety Factor (SF). In applying this provision, EPA either retains the default value of 10X, or uses a different additional safety factor when reliable data available to EPA support the choice of a different factor.

2. *Conclusion.* EPA has determined that reliable data show the safety of infants and children would be adequately protected if the FQPA safety factor were reduced to 1X. That decision is based on the following findings:

EPA concludes that there are reliable data to support the reduction of the Food Quality Protection Act (FQPA) safety factor from 10X to 1X. See Unit III.D. of the July 30, 2015, rulemaking for a discussion of the Agency's rationale for that determination. (80 FR 45438) (FRL–9923–86).

F. Aggregate Risks and Determination of Safety

EPA determines whether acute and chronic dietary pesticide exposures are safe by comparing aggregate exposure estimates to the acute PAD (aPAD) and chronic PAD (cPAD). Short-, intermediate-, and chronic-term risks are evaluated by comparing the estimated aggregate food, water, and residential exposure to the appropriate points of departure to ensure that an adequate margin of exposure exists. For linear cancer risks, EPA calculates the lifetime probability of acquiring cancer given the estimated aggregate exposure.

1. *Acute risk.* An acute aggregate risk assessment takes into account acute exposure estimates from dietary consumption of food and drinking water. No adverse effect resulting from a single oral exposure was identified and no acute dietary endpoint was selected. Therefore, isofetamid is not expected to pose an acute risk.

2. *Chronic risk.* Chronic Dietary risks of exposure for food and drinking water are below the level of concern (<100% chronic population-adjusted dose or cPAD) for the general U.S. population and all population subgroups. Isofetamid dietary exposure for food and drinking water is 1.1% of the cPAD for the general U.S. population and 3.9% of the cPAD for children 1–2 years old, the most highly exposed population subgroup. This unrefined chronic dietary exposure combined food and drinking water, and assumed 100% crop treated for all of the registered and proposed commodities.

A potential short-term adverse effect via the dietary and residential pathways of children 1 to <2 years old was identified; however, isofetamid is not registered for any use patterns that would result in short-term residential exposure. Based on the lack of evidence of carcinogenicity in two adequate rodent carcinogenicity studies, Isofetamid is not expected to pose a cancer risk to humans.

Based on these risk assessments, EPA concludes that there is a reasonable certainty that no harm will result to the general population, or to infants and children from aggregate exposure to isofetamid residues. More detailed information on this action can be found in the document titled ''Isofetamid. Human Health Risk Assessment for a New Tolerance Registration of

Isofetamid on Tree Nuts, Crop Group 14–12 and the Amended Tolerance on Almond Hulls.'' in docket ID number EPA–HQ–OPP–2025–0041.

IV. Other Considerations

A. Analytical Enforcement Methodology

For a discussion of the available analytical enforcement method, see Unit IV.A. of the July 30, 2015, rulemaking (80 FR 45438) (FRL–9923–86).

B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4). The Codex Alimentarius is a joint United Nations Food and Agriculture Organization/World Health Organization food standards program, and it is recognized as an international food safety standards-setting organization in trade agreements to which the United States is a party. EPA may establish a tolerance that is different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain the reasons for departing from the Codex level.

The Codex has established MRLs for isofetamid in or on almonds at 0.01 ppm and almond hulls at 0.8 ppm. Neither Mexico nor Canada has MRLs established on tree nuts. These MRLs are different than the tolerances established for isofetamid in the United States because of differences in the proposed U.S. use sites. No changes to the use pattern of almond were assessed.

C. Revisions to Petitioned-For Tolerances

The Agency is increasing the tolerance on almond, hulls from the proposed tolerance of 15 ppm, to 20 ppm, based on the available use data and the OECD calculation procedures.

V. Conclusion

Therefore, tolerances are established for residues of isofetamid, in or on almond, hulls at 20 ppm, and in or on Nut, tree, group 14–12 at 0.15 ppm. The existing 0.01 ppm tolerance on almond is removed.

VI. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at *https://www.epa.gov/regulations/and-executive-orders.*

A. Executive Order 12866: Regulatory Planning and Review

This action is exempt from review under Executive Order 12866 (58 FR 51735, October 4, 1993), because it establishes or modifies a pesticide tolerance or a tolerance exemption under FFDCA section 408 in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866.

B. Executive Order 14192: Unleashing Prosperity Through Deregulation

Executive Order 14192 (90 FR 9065, February 6, 2025) does not apply because actions that establish a tolerance under FFDCA section 408 are exempted from review under Executive Order 12866.

C. Paperwork Reduction Act (PRA)

This action does not impose an information collection burden under the PRA 44 U.S.C. 3501 *et seq.,* because it does not contain any information collection activities.

D. Regulatory Flexibility Act (RFA)

Since tolerance actions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the RFA, 5 U.S.C. 601 *et seq.,* do not apply to this action.

E. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of $100 million or more (in 1995 dollars and adjusted annually for inflation) as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any State, local, or Tribal governments or on the private sector.

F. Executive Order 13132: Federalism

This action does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.

G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have Tribal implications as specified in Executive Order 13175 (65 FR 67249, November 9, 2000), because it will not have substantial direct effects on Tribal governments, on the relationship between the Federal Government and the Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

This action is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because tolerance actions like this one are exempt from review under Executive Order 12866. However, EPA's 2026 *Policy on Children's Health* applies to this action. This rule finalizes tolerance actions under the FFDCA, which requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to ''ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue . . .'' (FFDCA 408(b)(2)(C)). The Agency's consideration is summarized in Unit III.E.

I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution or Use

This action is not subject to Executive Order 13211 (66 FR 28355) (May 22, 2001) because it is not a significant regulatory action under Executive Order 12866.

J. National Technology Transfer Advancement Act (NTTAA)

This action does not involve technical standards that would require Agency consideration under NTTAA section 12(d), 15 U.S.C. 272.

K. Congressional Review Act (CRA)

This action is subject to the CRA, 5 U.S.C. 801 *et seq.,* and EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides

and pests, Reporting and recordkeeping requirements.

Dated: July 27, 2026

Charles Smith,

Director, Registration Division, Office of Pesticide Programs.

For the reasons set forth in the preamble, 40 CFR chapter I is amended as follows:

PART 180—TOLERANCES AND EXEMPTIONS FOR PESTICIDE CHEMICAL RESIDUES IN FOOD

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.681, in paragraph (a) amend table 1 to paragraph (a) by

■ a. Removing the entry for ''Almond'';

■ b. Revising the entry for ''Almond, hulls''; and

■ c. Adding in alphabetical order the entry ''Nut, tree, group 14–12''.

The revision and addition read as follows:

§ 180.681 Isofetamid; tolerances for residues.

* * * * *

TABLE 1 TO PARAGRAPH (a)

Commodity	Parts per million
Almond, hulls	20
* * * * *	
Nut, tree, group 14–12	0.15
* * * * *	

* * * * *

[FR Doc. 2026–15761 Filed 8–3–26; 8:45 am]

BILLING CODE 6560–50–P

NATIONAL SCIENCE FOUNDATION

45 CFR Part 611

RIN 3145–AA74

Nondiscrimination in Federally Assisted Programs of the National Science Foundation

AGENCY: U.S. National Science Foundation.

ACTION: Final rule.

SUMMARY: The U.S. National Science Foundation (NSF or Foundation) is revising its regulations implementing Title VI of the Civil Rights Act of 1964 (Title VI). NSF is taking this action to align the conduct prohibited by NSF's regulations with Title VI's text, avoid constitutional concerns, reduce compliance costs, serve the public interest, ensure consistency with the final rule recently issued by the Department of Justice (DOJ), and implement the direction outlined in Executive Order (E.O.) 14281.

DATES: The Rule is effective on August 4, 2026.

FOR FURTHER INFORMATION CONTACT: Scott Carr, Equal Opportunity Specialist, U.S. National Science Foundation, Randolph Building, 401 Dulany Street, Alexandria, VA, 22314, (703) 292–7020, *ACB@nsf.gov.*

SUPPLEMENTARY INFORMATION:

I. Executive Summary

NSF is rescinding portions of its regulations promulgated pursuant to Title VI to more closely align its regulations with the language Congress enacted in Title VI prohibiting intentionally discriminatory conduct, *see* 42 U.S.C. 2000d. There are serious statutory and constitutional concerns with the legality of provisions in NSF's Title VI regulations that go beyond intentional discrimination by prohibiting conduct that has an unintentional disparate impact. This rule accordingly rescinds those portions of the regulations, which are in considerable tension with both the statute and the Constitution and do not sufficiently serve the public interest. First, this rule rescinds 45 CFR 611.3(b)(2), which currently prohibits the utilization of ''criteria or methods of administration which have the effect of subjecting individuals to discrimination because of their race, color, or national origin.'' Second, this rule removes the two uses of the phrase ''or effect'' from 45 CFR 611.3(b)(3). Third, this rule rescinds 45 CFR 611.3(b)(6). Fourth, this rule rescinds 45 CFR 611.3(c)(4), which addresses employment practices of Federal funding recipients. Fifth, this rule rescinds CFR 611.5(6) and (7), which provide illustrative examples of disparate-impact liability without a showing of intentional discrimination.

These changes also align NSF's Title VI regulations with changes made by DOJ in its 2025 Final Rule (2025 DOJ Final Rule). 90 FR 57141. Finally, NSF's rule conforms to E.O. 14281, *Restoring Equality of Opportunity and Meritocracy,* 90 FR 7537 (Apr. 28, 2025). The practical impact of this rule's deletions will be to clarify for NSF Federal funding recipients that NSF's Title VI regulations do not prohibit disparate impact and prohibit only intentional discrimination, and that NSF thus will not pursue Title VI disparate impact liability against its Federal funding recipients.

II. Discussion

A. Statutory Background

NSF is a Federal agency that supports science and engineering in all 50 States and in U.S. territories. Established by the National Science Foundation Act of 1950, Public Law 81–507, 64 Stat. 149 (codified at 42 U.S.C. 1861 *et seq.*), NSF promotes the progress of science; advances the national health, prosperity, and welfare; and secures the national defense. To support these missions, NSF funds basic research conducted at U.S. colleges and universities, in fields such as mathematics, computer science, engineering, and biotechnology, and Science, Technology, Engineering, and Mathematics (STEM) workforce development. NSF also funds research infrastructure, ranging from individual instruments to major research facilities and equipment (*e.g.,* computing facilities, U.S. Antarctic stations, and large telescopes). The funding is provided chiefly through grants.

Title VI, as amended, prohibits intentional discrimination on the ''ground of race, color, or national origin'' in all programs or activities that receive Federal financial assistance. 42 U.S.C. 2000d. Title VI also directs Federal departments and agencies that extend Federal financial assistance to ''effectuate the provisions of'' Title VI ''by issuing rules, regulations, or orders of general applicability.'' 42 U.S.C. 2000d–1. The section of Title VI that sets forth the prohibited conduct, 42 U.S.C. 2000d, specifically prohibits intentional discrimination and makes no reference to unintentional disparate effects or impact. *See Alexander* v. *Sandoval,* 532 U.S. 275, 280 (2001) (''[I]t is . . . beyond dispute—and no party disagrees—that [Title VI] prohibits only intentional discrimination.''). The statute does not provide any Federal department or agency with authority to prohibit unintentional disparate impact. And despite ample opportunities, Congress has enacted no subsequent amendments to Title VI to impose disparate-impact liability.

B. Regulatory History of 45 CFR Part 611

NSF's Title VI implementing regulations are codified at 45 CFR part 611. NSF issued these regulations in 1964 upon approval by President Lyndon B. Johnson. NSF's Title VI regulations were subsequently amended

five times: in 1973, *see* 38 FR 17920 (July 5, 1973) (incorporating changes recommended by DOJ); in 1984, *see* 49 FR 37594 (Sept. 25, 1984) (making technical corrections); in 1986, *see* 51 FR 22938 (June 24, 1986) (simplifying internal NSF procedures for approving orders suspending, terminating, or refusing to grant federal financial assistance); in 1994, *see* 59 FR 37437 (July 22, 1994) (housekeeping amendments); and in 2003, s*ee* 68 FR 51334 (Aug. 26, 2003) (aligning with the Civil Rights Restoration Act of 1987, Pub. L. 100–259). NSF's implementing regulation describing the scope of conduct considered to be discriminatory and therefore prohibited, codified at 45 CFR 611.3, currently includes prohibitions addressing conduct giving rise to an unintentional disparate impact. NSF's regulations also include examples illustrating the application of these provisions to some of the programs funded by NSF, at 45 CFR 611.5.

C. Relevant Supreme Court Decisions

The Supreme Court has concluded that Title VI, 42 U.S.C. 2000d, does not prohibit facially neutral policies that result in disparate outcomes when there is no discriminatory intent. Rather, it prohibits only intentional discrimination. In 1978, the Supreme Court concluded that Congress intended Title VI to prohibit ''only those racial classifications that would violate the Equal Protection Clause'' if committed by a government actor. *Regents of the Univ. of Cal.* v. *Bakke,* 438 U.S. 265, 287 (1978) (Powell, J., announcing the judgment of the Court); *id.* at 325, 328, 352–53 (Brennan, White, Marshall, and Blackmun, JJ., concurring in part and dissenting in part); *see also Students for Fair Admissions, Inc.* v. *President & Fellows of Harvard Coll.,* 600 U.S. 181, 198 n.2 (2023) (*SFFA*). Shortly before *Bakke*'s Title VI holding, the Supreme Court held that the Equal Protection Clause prohibits only intentional discrimination and that ''a law or other official act'' that has a ''racially disproportionate impact'' alone does not violate that Clause. *Washington* v. *Davis,* 426 U.S. 229, 239 (1976); *see also Vill. of Arlington Heights* v. *Metro. Hous. Dev. Corp.,* 429 U.S. 252, 265 (1977) (''Proof of racially discriminatory intent or purpose is required to show a violation of the Equal Protection Clause.''). Taken together, these Supreme Court cases establish that Title VI's statutory prohibition, like the Equal Protection Clause, extends only to intentional discrimination.

In 2001, the Supreme Court, in *Alexander* v. *Sandoval,* reaffirmed that settled understanding. 532 U.S. at 280 (''[I]t is . . . beyond dispute . . . that [Title VI] prohibits only intentional discrimination.''). In *Sandoval,* the Supreme Court held that private plaintiffs lacked a private right of action to enforce DOJ's ''disparate-impact regulations.'' *Id.* at 285–87. Though the Supreme Court had previously found a private cause of action to enforce Title VI's bar on intentional discrimination, *id.* at 279–80, that conclusion did not extend to enforcing DOJ's ''disparate-impact regulations.'' *Id.* at 285. As the Supreme Court explained, it is ''clear'' that ''the disparate-impact regulations do not simply apply'' the statutory prohibition, as the regulations ''forbid conduct that [Title VI] permits,'' so it is equally ''clear that the private right of action to enforce [Title VI] does not include a private right to enforce these regulations.'' *Id.* While the Supreme Court in *Sandoval* ''assume[d],'' without deciding, that DOJ's disparate-impact regulations were valid, the Court explained that the regulations are in ''considerable tension'' with the Supreme Court's Title VI precedents. *Id.* at 282. Similarly, the regulations do not ''authoritatively'' construe Title VI because the regulations ''forbid conduct''—namely, policies that unintentionally result in a disparate impact—that Title VI ''permits.'' *Id.* at 281–82, 284–85; *see also id.* at 286 n.6 (''[Title VI] permits the very behavior that the regulations forbid.''). The rationale of that holding applies with equal force to NSF's Title VI regulations, which mirror DOJ's Title VI regulations.

In 2023, the Court emphasized that ''the equal protection clause requires equality of treatment before the law for all persons without regard to race or color.'' *SFFA,* 600 U.S. at 205 (cleaned up). In reviewing the admissions policies of certain higher education institutions, the Court explained that the Constitution requires ''eliminating all'' racial discrimination. *Id.* at 206. To that end, it held that ''[a]ny exception to the Constitution's demand for equal protection must survive a daunting two-step examination known in our cases as 'strict scrutiny,' '' which requires that racial classifications '' 'further compelling government interests' '' and be '' 'narrowly tailored'—meaning 'necessary'—to achieve [such] interest[s].'' *Id.* at 206–07. Moreover, the Court explained that its ''precedents have identified only two compelling interests that permit resort to race-based government action,'' only one of which is relevant in general government administration: ''remediating specific, identified instances of past discrimination that violated the Constitution or a statute.'' *Id.* at 207.

Finally, in 2024, the Supreme Court overruled *Chevron U.S.A. Inc.* v. *Natural Resources Defense Council, Inc.,* 467 U.S. 837 (1984). *See Loper Bright Enters.* v. *Raimondo,* 603 U.S. 369, 409–12 (2024). In reaching that result, the Supreme Court made clear that ''statutes . . . have a single, best meaning'' that is '' 'fixed at the time of enactment.' '' *Id.* at 400 (quoting *Wis. Cent. Ltd.* v. *United States,* 585 U.S. 274, 284 (2018)). Thus, Title VI's bar on discrimination can have only one meaning. And under Supreme Court precedent, the single, best meaning of Title VI is that it ''prohibits only intentional discrimination'' and ''permits'' facially neutral policies that result in disparate outcomes when there is no discriminatory intent. *Sandoval,* 532 U.S. at 280, 286 n.6.

D. Executive Order 14281

On April 23, 2025, the President issued E.O. 14281. This Order restated the ''bedrock principle of the United States . . . that all citizens are treated equally under the law.'' 90 FR at 17537. The Order explained that this ''principle guarantees equality of opportunity, not equal outcomes,'' and ''promises that people are treated as individuals, not components of a particular race or group.'' *Id.*

The Order also explained that disparate-impact liability ''endangers this foundational principle.'' *Id.* Disparate-impact liability, the Order reasoned, ''all but requires individuals and businesses to consider race and engage in racial balancing to avoid potentially crippling legal liability.'' *Id.* As the Order explained, disparate-impact liability ''not only undermines our national values, but also runs contrary to equal protection under the law and, therefore, violates our Constitution.'' *Id.*

The Order relayed that because of disparate-impact liability's problems, ''[i]t is the policy of the United States to eliminate the use of disparate-impact liability in all contexts to the maximum degree possible to avoid violating the Constitution, Federal civil rights laws, and basic American ideals.'' *Id.* The Order directed the Attorney General to, among other things, review Title VI regulations and ''initiate appropriate action to repeal or amend'' them ''to the extent they contemplate disparate-impact liability.'' *Id.* at 17538. Accordingly, this rule revises the Foundation's Title VI regulations to effectuate the Order's policy and purpose under the leadership of the Attorney General.

In any event, the Foundation would have initiated steps toward making these changes regardless of E.O. 14281. The Order states, and the Foundation firmly agrees, a ''bedrock principle of the United States is that all citizens are treated equally under the law. This principle guarantees equality of opportunity, not equal outcomes. It promises that people are treated as individuals, not components of a particular race or group. It encourages meritocracy and a colorblind society,'' not race-, color-, or national-origin-based favoritism. 90 FR at 17537. And adherence to this principle, including in the issuance of grants, ''is essential to creating opportunity, encouraging achievement, and sustaining the American Dream.'' *Id.*

Imposing disparate-impact liability endangers these policy objectives. Disparate-impact liability also raises serious constitutional concerns, is in considerable tension with the single, best meaning of Title VI, creates confusion, increases the costs of compliance, and does not serve the public interest. After considering the relevant issues and factors and weighing the relevant considerations, the Foundation concludes that these reasons, separately and together, support eliminating disparate-impact liability from the Foundation's Title VI regulations.

E. 2025 DOJ Final Rule

Pursuant to E.O. 12250, *Leadership and Coordination of Nondiscrimination Laws,* 45 FR 72995 (Nov. 4, 1980), DOJ is the lead Federal agency responsible for defining the nature and scope of Title VI's prohibition of discrimination on the basis of race, color, and national origin in programs or activities receiving Federal financial assistance. As part of this responsibility, E.O. 12250 requires the Attorney General to approve other agencies' regulations implementing Title VI. *See id.* at 72995–96.

On December 10, 2025, DOJ issued the 2025 DOJ Final Rule rescinding portions of its Title VI regulations to more closely align the regulations with Title VI's prohibition on intentionally discriminatory conduct. 90 FR 57141 (Dec. 10, 2025). DOJ articulated statutory and constitutional concerns with the legality of provisions in DOJ's Title VI regulations that went beyond intentional discrimination by prohibiting conduct that has an unintentional disparate impact. *See id.* The 2025 DOJ Final Rule rescinded those portions of the regulations because DOJ concluded they were in considerable tension with the statute and Constitution and did not sufficiently serve the public interest. *See id.*

NSF agrees with the reasoning expressed in DOJ's final rule and provides a similar rationale for this rulemaking.

F. Need for Rulemaking

The Foundation's regulations at 45 CFR part 611, entitled ''Nondiscrimination in Federally-Assisted Programs of the National Science Foundation—Effectuation of Title VI of the Civil Rights Act of 1964,'' contain several provisions that prohibit conduct or activities causing unintentional disparate impact, without a statutory or constitutional basis for doing so. And in some instances, the regulations may encourage or even require unlawful discrimination labeled as ''reasonable action.'' Section 611.3(b)(2) is the current regulation's general disparate-impact prohibition, which states that a ''recipient . . . may not . . . utilize criteria or methods of administration which have the effect of subjecting individuals to discrimination because of their race, color, or national origin.'' 45 CFR 611.3(b)(2). Beyond that general prohibition, section 611.3(b)(3) addresses a Federal funding recipient's selection of the site or location of facilities and includes two references to ''effect'' that extend the scope of prohibited conduct to include conduct with unintentional disparate impact. *Id.* 611.3(b)(3). Section 611.3(b)(6) concerns the use of ''reasonable action,'' and provides that funding recipients may (and sometimes must) use race, color, or national origin to overcome unintentional disparate ''effects,'' but does not expressly specify that the funding recipient must narrowly tailor such use to serve a compelling governmental interest, as is required to satisfy strict scrutiny. *Id.* 611.3(b)(6). Section 611.3(c) addresses prohibited discriminatory employment practices and extends beyond intentional discrimination to prohibiting conduct that ''tends'' to have a discriminatory effect. *Id.* 611.3(c)(4). Finally, 45 CFR 611.5(6) and (7) provide illustrative examples of disparate-impact liability without a showing of intentional discrimination. *Id.* 611.5(6)–(7).

There are serious statutory and constitutional concerns with the legality of the Foundation's Title VI disparate-impact regulations. The Foundation also has serious policy concerns with its current disparate-impact regulations because they create confusion, undermine public confidence in the Nation's civil rights laws and the rule of law, and may produce burdensome litigation and compliance costs for the Foundation's grantees.

1. Serious Legal Concerns

There are serious statutory concerns as to whether Title VI authorizes the disparate-impact provisions of the current regulations. As the Supreme Court has made clear, Title VI prohibits ''only intentional discrimination'' and ''permits'' facially neutral policies that result in disparate outcomes when there is no discriminatory intent. *Sandoval,* 532 U.S. at 280, 286 n.6. That is the ''single, best meaning'' of Title VI. *Loper Bright,* 603 U.S. at 400. As summarized above, *Sandoval* calls into serious doubt the legality of the Foundation's ''disparate-impact regulations.'' 532 U.S. at 281–82, 284–85 (noting that DOJ's regulations are in ''considerable tension'' with the Supreme Court's Title VI precedents);[1] *see also id.* at 286 n.6 (''[Title VI] permits the very behavior that the regulations forbid.''). Although *Sandoval* resolved only the question of private enforceability, subsequent cases such as *Loper Bright* have made clear that the Foundation cannot extend Title VI beyond its single, best meaning. *See* 603 U.S. at 412–13 (holding that ''courts must . . . ensur[e] that [an] agency acts within'' its statutory authority). And even in the absence of Supreme Court precedent, the Foundation would have concluded that the best reading of Title VI is that it prohibits only intentional discrimination.

Title VI authorizes agencies to promulgate regulations ''to effectuate'' the statute's prohibition of intentional discrimination. 42 U.S.C. 2000d–1. The current regulations' extension of prohibited conduct to include conduct with an unintentional disparate impact reaches a vastly broader range of conduct than the statute itself. This range is too broad to be considered a simple prophylactic measure aimed at preventing intentional discrimination. *See Sandoval,* 532 U.S. at 286 n.6 (''[Title VI] permits the very behavior that the regulations forbid.''). Thus, the disparate-impact regulations do not ''effectuate'' Title VI. 42 U.S.C. 2000d-1.

There are also serious concerns about whether the Foundation's Title VI regulations pass constitutional muster under the Equal Protection Clause. As the Supreme Court recently held in *SFFA,* ''the Equal Protection Clause . . . applies without regard to any differences of race, of color, or of

[1] NSF's regulations, which are modeled off DOJ's regulations, and are approved by the Attorney General, would similarly be in tension with *Sandoval.*

nationality—it is universal in its application'' and the ''guarantee of equal protection cannot mean one thing when applied to one individual and something else when applied to a person of another color.'' 600 U.S. at 206 (internal quotation marks omitted) (first quoting *Yick Wo* v. *Hopkins,* 118 U.S. 356, 369 (1886); and then quoting *Bakke,* 438 U.S. at 289–90 (Powell, J.)). Despite the promises of the Equal Protection Clause, a funding recipient's risk of disparate-impact liability under the Foundation's regulations is triggered by unintentional disparate outcomes, which the recipient may not even know about without investigation. To evaluate and avoid this risk, the funding recipient must incur investigatory costs, such as conducting an impact analysis, and is coerced to proactively consider race, color, and national origin, and potentially use it to change the unintended disparate outcomes.

In short, disparate-impact liability encourages and, in some cases, requires covered entities to engage in the intentional use of race and racial balancing to eliminate those disparate outcomes by treating certain racial groups differently from others—the exact conduct the Equal Protection Clause forbids. *See id.* This serious constitutional concern further confirms that the best reading of Title VI is that it prohibits only intentional discrimination and does not authorize the Foundation to impose disparate-impact liability. *See Edward J. DeBartolo Corp.* v. *Fla. Gulf Coast Bldg. & Constr. Trades Council,* 485 U.S. 568, 575 (1988) (''[W]here an otherwise acceptable construction of a statute would raise serious constitutional problems, the Court will construe the statute to avoid such problems unless such construction is plainly contrary to the intent of Congress.'' (citing *NLRB* v. *Catholic Bishop of Chi.,* 440 U.S. 490, 499–501, 504 (1979)).

This use of race, color, or national origin violates the Equal Protection Clause unless it survives review under the ''daunting'' strict-scrutiny standard. *SFFA,* 600 U.S. at 206; *see also Free Speech Coal., Inc.* v. *Paxton,* 145 S. Ct. 2291, 2310 (2025) (''Strict scrutiny—which requires a restriction to be the least restrictive means of achieving a compelling governmental interest—is 'the most demanding test known to constitutional law.' '' (quoting *City of Boerne* v. *Flores,* 521 U.S. 507, 534 (1997)). The use of race, color, or national origin necessitated by the disparate-impact provisions runs into serious issues with the requirement of narrow tailoring to achieve a compelling interest. *SFFA,* 600 U.S. at 206–07.

Similarly, the ''reasonable action'' provision authorizes and sometimes requires the intentional use of race without requiring that this use be narrowly tailored to serve a recognized compelling interest. Instead, it encourages intentional racial balancing ''to overcome the consequences of'' unintended racial disparities. 45 CFR 611.3(b)(6). Thus, for substantially the same reasons as above, the ''reasonable action'' provision raises serious constitutional concerns.

As summarized above, there are serious statutory and constitutional concerns with the Foundation's disparate-impact regulations. But even if the regulations were legal, the Foundation finds that eliminating the potential constitutional concerns addressed above would independently justify the amendment of the regulations. *Cf. U.S. Tel. Ass'n* v. *FCC,* 188 F.3d 521, 528 (D.C. Cir. 1999) (concluding it was not ''arbitrary and capricious'' to adopt a certain policy in order to ''avoid[ ] raising a non-trivial constitutional question''). And even if the regulations did not raise serious constitutional concerns, the Foundation finds that eliminating the costs and confusion caused by the mismatch between the statute and the disparate-impact regulations would independently justify the repeal of the regulations.

2. Serious Policy Concerns

The Foundation also has serious policy concerns with the Title VI regulations' imposition of disparate-impact liability. While the Foundation expresses its policy concerns with disparate-impact liability independent of E.O. 14281, that Order sets forth many valid policy concerns with disparate-impact liability. As noted in section 1 of the Order, ''[o]n a practical level, disparate-impact liability has hindered businesses from making hiring and other employment decisions based on merit and skill, their needs, or the needs of their customers because of the specter that such a process might lead to disparate outcomes, and thus disparate-impact lawsuits. This has made it difficult, and in some cases impossible, for employers to use bona fide job-oriented evaluations when recruiting, which prevents job seekers from being paired with jobs to which their skills are most suited—in other words, it deprives them of opportunities for success.'' 90 FR at 17537. Moreover, the legal concerns identified above have caused uncertainty and confusion for Federal funding recipients as to whether and when they need to comply with the disparate-impact regulations and when they can or must consider race, color, and national origin. As explained above, *Sandoval* casts substantial doubt on the validity of the disparate-impact regulations that many Federal departments and agencies have promulgated pursuant to Title VI. 532 U.S. at 280–82.

Additionally in practice, and as explained above, disparate-impact liability leads covered entities to engage in racial balancing even as Title VI forbids intentional racial discrimination. This tension tends to create confusion, undermine public confidence in the Nation's civil rights laws, and undermine public confidence in the rule of law itself, as the law seems to both forbid and require the same conduct.

These problems are amplified by the arbitrary nature of the racial and ethnic categories typically used to measure disparate effects, which, by virtue of their arbitrariness, typically lack a meaningful connection to a compelling interest. *See, e.g., SFFA,* 600 U.S. at 216–17 (explaining that the ''[racial] categories'' at issue were ''themselves imprecise in many ways'' and ''the use of these opaque racial categories undermine[d], instead of promote[d], [their] goals''). Although many of the Foundation's grant proposals focus on minority groups to comply with statutory requirements, *see e.g.,* 42 U.S.C. 1862n–10 (minority-serving institutions undergraduate program); 42 U.S.C. 1862p–4 (undergraduate broadening participation program), some of them may have explicitly targeted certain racial groups without specific statutory authorization. For example, in 2025, NSF terminated awards to ensure alignment with agency priorities. A list of those awards, publicly available at *https://www.nsf.gov/updates-on-priorities#archived-information-41b,* identifies awards that targeted racial groups and inclusion and diversity in STEM education.[2] The Foundation believes that amending its regulations to avoid encouraging the use of imprecise and arbitrary racial categories will help maintain clarity and public confidence in the Nation's civil rights laws.

The Foundation has considered the view that looking at disparate effects can be useful in identifying and deterring subtle intentional discrimination or intentional

[2] This list can be found under the Frequently Asked Question, *Is there a publicly available list of the awards NSF has terminated?* The entries on this list notwithstanding, NSF has complied with the terms and conditions of all preliminary and permanent injunctions requiring award reinstatement.

indifference to unnecessary and arbitrary barriers. But any benefits are outweighed by the other issues and factors that the Foundation has considered, such as, for example, the need for NSF's regulations to be consistent with DOJ's regulations and other grant-making agencies' regulations. And in any event, the concern is mitigated by the fact that eliminating disparate-impact liability does not preclude the use of data on disparate outcomes to help prove intentional discrimination. Indeed, NSF's regulations at section 611.6, which remain unchanged by this rulemaking, require that recipients of NSF grant funding keep complete and accurate compliance information available for inspection by the responsible Foundation official. Private litigants rely on such data as a potential indicator of intentional discrimination. This use of statistical disparity to help establish, as an evidentiary matter, liability for intentional discrimination materially differs from using such disparity to impose liability for an unintentional disparate impact.

The Foundation has also considered the alternative of trying to adopt a modified version of disparate-impact liability, for example, by requiring covered entities to remedy unintentional discrimination for only certain types of cases involving areas with historical patterns of discrimination, such as education. But any version of imposing liability for unintentional discrimination is inconsistent with Title VI's single, best meaning. Regardless, even a modified version of disparate-impact liability would not eliminate the Foundation's serious legal and policy concerns. The Foundation determines that any benefits from a regulation adopting alternative versions of disparate-impact liability are outweighed by those concerns. And even if possible, developing such a rule would not solve the confusion or rule-of-law concerns expressed above, nor reduce the compliance and litigation costs that covered entities face. The Foundation believes that the better course is to avoid the complexities, costs, and litigation associated with this alternative, even if eliminating disparate-impact liability ultimately would leave some problems unaddressed and others inadequately addressed.

The Foundation additionally has considered the potential reliance interests of funding recipients and others on the disparate-impact regulations. As noted in section IV.B of this preamble NSF estimates that since 2017, fewer than 30 percent of the total number of civil rights complaints received included alleged violations of Title VI, and of that number, NSF accepted and investigated only 1.3 percent.[3] Moreover, NSF has not identified any Title VI violations by NSF awardees since 2005 and presently has no ongoing disparate-impact complaints, investigations, or other enforcement activity. Based on this data, NSF believes there exists minimal evidence of meaningful reliance interests. In addition, the *Sandoval* decision cast serious doubt on the continuing viability of the regulations more than 25 years ago. E.O. 14281 also directed all agencies to ''deprioritize enforcement of all statutes and regulations to the extent they include disparate-impact liability,'' which includes the Foundation's Title VI disparate-impact regulations. 90 FR at 17538. The Foundation accordingly believes that such minimal reliance interests would likely not outweigh the Foundation's legal and policy concerns. Further, each of the Foundation's concerns, whether considered cumulatively or separately, outweighs any reliance interests.

The Foundation notes that *Sandoval* has also led to a divergence between Title VI enforcement by private plaintiffs and enforcement by Federal departments and agencies. After *Sandoval,* private plaintiffs can enforce only Title VI's statutory prohibition on intentional discrimination, while the Foundation could continue to pursue disparate-impact liability. Repealing the disparate-impact regulations would eliminate this incongruent enforcement.

Overall, after considering the relevant issues and factors and weighing the relevant considerations, the Foundation finds that, regardless of the legality of the Foundation's disparate-impact regulations, the above summarized policy concerns, when viewed separately or cumulatively, independently justify the repeal of its disparate-impact regulations.

III. Regulatory Changes

For the reasons summarized above, NSF is revising its Title VI regulations at 45 CFR part 611 consistent with the 2025 DOJ Final Rule and the authorities described in the 2025 DOJ Final Rule. The practical impact of this rule's revisions will be to clarify for NSF federal funding recipients that NSF's Title VI regulations do not prohibit unintentional disparate impact and NSF thus will not pursue Title VI disparate-impact liability against its Federal funding recipients. A section-by-section analysis of the changes follows, consistent with the changes in the 2025 DOJ Final Rule.

A. Table Summarizing Amendments

The table below indicates the exact wording changes. For each section indicated in the left column, the text shown in the middle column is removed and the text shown in the right column is added:

Section	Remove	Add
611.3(b)(2)	Full text of paragraph: ''(2) A recipient . . . or national origin.''	''[Reserved]''.
611.3(b)(3)	Both instances of ''or effect''.	
611.3(b)(6)	Full text of paragraph: ''(6) This regulation . . . to accomplish the purposes of the Act.''.	
611.3(c)(4)	Full text of paragraph: ''(4) Where a primary objective of . . . beneficiaries.''.	
611.5	Full text of paragraphs (6) and (7)..	

B. Section-by-Section Analysis

Section 611.3(b)(2)

Section 611.3(b)(2) is the current regulation's general prohibition of unintentional disparate impact. This paragraph expands prohibited conduct from purposeful discrimination to Federal funding recipients who ''utilize criteria or methods of administration which have the effect of subjecting individuals to discrimination because of their race, color, or national origin.'' Because this paragraph's only purpose is to extend the scope of the regulation

[3] Of the 75 formal complaints filed with NSF that included an alleged violation of Title VI, 1 (1.3 percent) was accepted for investigation, 46 (61.3 percent) were dismissed due to jurisdictional, procedural, or contextual issues, 26 (34.7 percent) were referred to another office, 1 (1.3 percent) was withdrawn by the complainant, and 1 (1.3 percent) is currently under review.

to conduct causing unintentional disparate impacts, this rule deletes the paragraph, consistent with Title VI and the 2025 DOJ Final Rule. The rule replaces paragraph (b)(2) with a placeholder to maintain the numbering accuracy of previous citations and other references to parts of this section.

Section 611.3(b)(3)

Section 611.3(b)(3) addresses a Federal funding recipient's or applicant's selection of sites or locations of facilities. The paragraph provides that a funding recipient may not make selections with the ''purpose or effect'' of discriminating, or ''with the purpose or effect of defeating or substantially impairing the accomplishment of the objectives of'' Title VI or NSF's implementing regulations. The paragraph's two references to ''effect'' extend its scope to unintentional disparate impacts. This rule deletes both instances of ''or effect'' to conform paragraph (b)(3) more closely to Title VI, the 2025 DOJ Final Rule, and the other authorities described herein.

Section 611.3(b)(6)

Section 611.3(b)(6) addresses a recipient's ''reasonable action'' with respect to race, color, and national origin. Paragraph (b)(6) authorizes affirmative action in programs even in the absence of a finding of prior discrimination in a program ''if the purpose and effect are to remove or overcome the consequences of practices or impediments which have restricted the availability of, or participation in, the program or activity receiving Federal financial assistance, on the grounds of race, color, or national origin.'' This provision points not to intentional discrimination, but rather to the unintentional ''consequences of practices or impediments.'' The provision consequently authorizes intentional racial classifications, racial preferences, and other race-based actions without the compelling interest and narrow tailoring required by the Equal Protection Clause—practices that have long been unlawful under an Equal Protection Clause analysis.

Paragraph (b)(6) also requires a recipient ''to take reasonable action to remove or overcome the consequences of the prior discriminatory practice or usage, and to accomplish the purposes of the Act'' ''[w]here previous discriminatory practice or usage tends, on the grounds of race, color, or national origin, to exclude individuals from participation in, to deny them the benefits of, or to subject them to discrimination under any program or activity to which this regulation applies.'' This provision goes beyond the Equal Protection Clause, which, in limited circumstances permits, but does not mandate, a government to take narrowly tailored action to remedy the effects of its identified past discrimination. *See, e.g., Bakke,* 438 U.S. at 307 (Powell, J.). Moreover, even putting aside the mandatory language, this provision does not expressly require narrow tailoring to counter particular past discrimination. Accordingly, it promotes potentially illegal race, color, and national origin discrimination. This rule, therefore, removes paragraph (b)(6).

Section 611.3(c)(4)

Section 611.3(c) addresses prohibited discriminatory employment practices for Federal funding recipients. Paragraph (c)(4) extends the prohibition to employment practices of the recipient even ''[w]here a primary objective of the Federal financial assistance is not to provide employment'' if discrimination in the nonfunded ''employment practices tends, on the ground of race, color, or national origin, to exclude persons from participation in, to deny them the benefits of or to subject them to discrimination under the program receiving Federal financial assistance.'' This paragraph does not prohibit only intentional discrimination but rather extends to conduct that ''tends'' to have a discriminatory effect on a program without the primary objective of providing employment. Moreover, paragraph (c)(4)'s extension to employment practices where the Federal funding's primary objective is not to provide employment conflicts with Congress's statutory limitation wherein ''[n]othing contained in [Title VI] shall be construed to authorize action under [Title VI] by any department or agency with respect to any employment practice of any employer, employment agency, or labor organization except where a primary objective of the Federal financial assistance is to provide employment.'' *See* 42 U.S.C. 2000d–3. Consistent with Title VI and the 2025 DOJ Final Rule, this removes paragraph (c)(4).

Section 611.5

Section 611.5 provides examples to illustrate the application of the Title VI regulatory provisions to some of the programs aided by NSF. To conform with the changes discussed above, NSF is removing the two examples, paragraphs (6) and (7), that illustrate disparate-impact enforcement.

IV. Regulatory Certifications

A. Administrative Procedure Act

NSF issues this final rule without prior public notice and comment or a delayed effective date pursuant to the exception in the Administrative Procedure Act (APA) for rules ''relating to agency management or personnel or to public property, loans, grants, benefits, or contracts.'' 5 U.S.C. 553(a)(2).

Title VI and NSF's implementing regulations concern nondiscrimination conditions on the receipt of Federal financial assistance. They apply to the receipt of Federal ''[g]rants and loans,'' ''property,'' ''personnel'' and ''[a]ny Federal agreement, arrangement, or other contract which has as one of its purposes the provision of assistance.'' 45 CFR 611.13(e); *see also* 45 CFR 611.4 (requiring funding recipients to provide assurance of compliance with Title VI in such form as specified by the ''responsible Foundation official.''). *Cf. Education Programs or Activities Receiving or Benefitting From Federal Financial Assistance,* 82 FR 46655 (Oct. 6, 2017) (invoking the exception to amend Title IX regulations to ''promote consistency in the enforcement of Title IX for [Department of Agriculture] financial assistance recipients''); *Preserving Community and Neighborhood Choice,* 85 FR 47899 (Aug. 7, 2020) (invoking exception to repeal a Housing and Urban Development rule regarding Federal grantees); *Participation by Minority Business Enterprise in Department of Transportation Programs,* 53 FR 18285 (May 23, 1988) (invoking the exception to expand coverage of a Department of Transportation regulation regarding the Federal Aviation Administration's airport financial assistance program); *Nondiscrimination on the Basis of Handicap in Federally Assisted Programs: Suspension of Guidelines With Respect to Mass Transportation,* 46 FR 40687 (Aug. 11, 1981) (invoking the exception to suspend DOJ guidelines prohibiting disability discrimination in transportation programs and activities receiving Federal financial assistance).

Invoking this exception to notice and comment is consistent with the definition for Federal financial assistance provided by the U.S. Office of Management and Budget (OMB) in 2 CFR 200.1, which defines such assistance with the same categories as the APA's exception for rules ''relating to agency management or personnel or to public property, loans, grants, benefits, or contracts.'' With potentially limited exceptions not applicable to the Foundation, all the forms of Federal

financial assistance set forth under 2 CFR 200.1 that the Foundation administers would fall under the ''public property, loans, grants, benefits, or contracts'' exception. Finally, prompt alignment with the 2025 DOJ Final Rule is also necessary to ensure uniform administration of Title VI, and to avoid inconsistent enforcement and potential confusion by recipients of Federal funding assistance. Thus, NSF issues this final rule without prior public notice and comment or a delayed effective date.

B. Executive Orders 12866 (Regulatory Planning and Review), 13563 (Regulatory Review), and 14192 (Unleashing Prosperity Through Deregulation)

Executive Orders 12866, 58 FR 51735 (Sep. 30, 1993), and 13563, 76 FR 3821 (Jan. 18, 2011), direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. E.O. 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. It also recognizes that some benefits and costs are difficult to quantify and provides that, where appropriate and permitted by law, agencies may consider and discuss qualitatively values that are difficult or impossible to quantify. In a similar vein, E.O. 14192, 90 FR 9065 (Jan. 31, 2025), directs agencies to significantly reduce the private expenditures required to comply with Federal regulations and provides that ''any new incremental costs associated with new regulations shall, to the extent permitted by law, be offset by the elimination of existing costs associated with at least ten prior regulations.''

OMB has designated this rule a ''significant regulatory action'' under section 3(f) of E.O. 12866, although not economically significant under section 3(f)(1). Accordingly, this rule has been reviewed by OMB. It is also considered a deregulatory action under E.O. 14192.

As explained in the preamble, the regulatory modifications this rule makes are necessary to conform NSF's Title VI regulations to Title VI, the 2025 DOJ Final Rule, and the other authorities described therein. The practical impact of this rule's deletions will be to clarify for NSF Federal funding recipients that NSF's Title VI regulations do not prohibit conduct giving rise to disparate impact and that NSF thus will not pursue Title VI disparate-impact liability against its funding recipients.

As with the 2025 DOJ Final Rule, data limitations make the costs and benefits of the rule difficult for NSF to quantify. This rule affects NSF funding recipients. Congress appropriated approximately $8.8 billion to NSF in fiscal year 2025 to support NSF's rigorous merit review system. In that same fiscal year, NSF received over 43,000 proposals, generating 8,377 competitive awards to 1,621 institutions in 50 states, the District of Columbia, and 3 territories. *See* FY 2025 Agency Financial Report (Dec. 18, 2025), *https://www.nsf.gov/reports/performance/agency-financial-report.*

NSF estimates that, since 2017, fewer than 30 percent of the total number of civil rights complaints it received included alleged violations of Title VI. Of that number, 64 percent were dismissed due to insufficient evidence or other disqualifying factors, 33 percent were referred to another Federal agency, 1.5 percent were withdrawn by the complainant, and 1.5 percent were accepted and investigated by NSF. Although Title VI requirements are considered during on-site as well as virtual compliance reviews, since NSF established its awardee compliance review program in 2005, NSF reviews have not identified any Title VI violations by NSF awardee organizations.

Presently, NSF has no disparate-impact complaints under consideration, no active disparate-impact investigations, and no associated disparate-impact compliance-review activity. For enforcement actions that relate to both intentional discrimination and unintentional disparate impact, NSF does not track and cannot reliably quantify the costs attributable to the varying disparate-impact portions of enforcement actions. That disparate impact is sometimes a factor that may be considered in determining whether discrimination was intentional further impedes monetizing costs and benefits. Therefore, the overall cost effect on NSF is difficult to quantify. However, this deregulatory action should decrease NSF's enforcement costs. And the benefit of this rule is to align NSF's regulations with Title VI and DOJ regulations.

Similarly, NSF is unable to quantify how funding recipients will respond to the regulatory changes. But the deregulatory action may result in greater flexibility and lower compliance costs for recipients. NSF recognizes that a funding recipient may receive Federal funds from sources other than, and in addition to, NSF. DOJ noted in its rule that DOJ expected its rule will cause other Federal departments and agencies to consider similarly revising their Title VI regulations. Like DOJ, NSF does not envision that this rule will appreciably increase administrative costs or compliance costs for funding recipients who must also adhere to the regulations of other departments or agencies. The deregulatory action that NSF takes here does not create any new obligations for funding recipients. On the contrary, by eliminating disparate-impact liability from NSF's regulation, NSF eliminates a source of regulatory confusion, narrows and makes more specific the conduct prohibited, and thus lessens the costs of compliance and potential liability. Moreover, recipients who receive funds for the same program or activity from more than one Federal entity already enter into separate contractual assurances with each funding entity. *See, e.g.,* 45 CFR 611.4; 34 CFR 100.4. These contractual assurances already impose varying requirements that each Federal funding source deems necessary. Funding recipients will continue to be held to the most stringent contractual assurance standards. And in any event, NSF notes that it and other agencies are currently amending their regulations to align with the changes made in the DOJ Final Rule, so the Foundation anticipates that there will be little, if any, disparity in Federal requirements regarding disparate-impact liability going forward.

Based on the analysis of the practical qualitative costs and benefits noted above, NSF believes that this rule is consistent with the principles of EOs 12866 and 13563, including the requirements that, to the extent permitted by law, NSF adopt a regulation only upon a reasoned determination that its benefits justify its costs and choose a regulatory approach that maximizes net benefits. This action is also consistent with the directive of E.O. 14192 to reduce regulatory compliance costs.

C. Executive Order 12250

Pursuant to E.O. 12250, DOJ has the responsibility to ''review . . . proposed rules . . . of the Executive agencies'' implementing nondiscrimination statutes such as Title VI in order to identify those which are inadequate, unclear or unnecessarily inconsistent.'' 45 FR at 72995. DOJ has reviewed and approved this rule.

D. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA), as amended by the Small Business Regulatory Enforcement and Fairness Act of 1996, requires an agency to prepare and make available to the public a final regulatory flexibility analysis that describes the effect of a rule on small entities (*i.e.,* small

businesses, small organizations, and small governmental jurisdictions) when the agency was required ''to publish a general notice of proposed rulemaking'' prior to issuing the final rule. *See* 5 U.S.C. 604(a). This rule does not require a regulatory flexibility analysis because, for the reasons described above, no notice of proposed rulemaking is required under 5 U.S.C. 553. *See Or. Trollers Ass'n* v. *Gutierrez,* 452 F.3d 1104, 1123–24 (9th Cir. 2006) (noting that the RFA does not apply when an agency validly invokes an exception to the public comment requirements of 5 U.S.C. 553).

Further, even if a final regulatory flexibility analysis were required, NSF, in accordance with 5 U.S.C. 605(b), has reviewed these regulations and certifies that the rule's changes will not have a significant economic impact on a substantial number of small entities, because these regulatory changes do not impose any new substantive obligations on NSF's funding recipients. The rule merely amends and clarifies existing regulations that are required by Title VI, bringing NSF into compliance with Title VI and changes made by the 2025 DOJ Final Rule. All Federal funding recipients have been previously bound by the standards that will remain in place following this rule.

E. Paperwork Reduction Act

Under the Paperwork Reduction Act of 1995 (PRA), 44 U.S.C. 3501 *et seq.,* an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number issued by OMB. This rule does not propose new, or revisions to existing, ''collection[s] of information'' as that term is defined under the PRA, and its implementing regulations.

F. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (UMRA) is intended, among other things, to curb the practice of imposing unfunded Federal mandates on State, local, and Tribal governments. Title II of UMRA requires each Federal agency to prepare a written statement assessing the effects of any Federal mandate that may result in an expenditure of $100 million or more (adjusted annually for inflation) in any one year by State, local, and Tribal governments, in the aggregate, or by the private sector. The term ''Federal mandate'' means a Federal intergovernmental mandate or a Federal private sector mandate. *See* 2 U.S.C. 658(6), 1502(1). A ''Federal intergovernmental mandate,'' in turn, is a provision that would impose an enforceable duty upon State, local, or Tribal governments (except as a condition of Federal assistance or a duty arising from participation in a voluntary Federal program). *See* 2 U.S.C. 658(5). And the term ''Federal private sector mandate'' refers to a provision that would impose an enforceable duty upon the private sector (except as a condition of Federal assistance or a duty arising from participation in a voluntary Federal program). *See* 2 U.S.C. 658(7).

NSF has determined that this rulemaking will not result in the expenditure by State, local, and Tribal governments, in the aggregate, nor by the private sector, of $100 million or more in any one year as a result of a Federal mandate, and it will not significantly or uniquely affect small governments. In addition, UMRA's requirements do not apply to any provision in a proposed or final Federal regulation that establishes or enforces any statutory rights that prohibit discrimination on the basis of race, color, religion, sex, national origin, age, handicap, or disability. 2 U.S.C. 1503(2). Therefore, no actions are deemed necessary under UMRA.

G. Congressional Review Act

The Office of Information and Regulatory Affairs has found that this is not a ''major rule'' as defined by Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996, also known as the Congressional Review Act. 5 U.S.C. 804(2). This rule would not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign based companies in domestic and export markets. The rule merely narrows the scope of NSF's Title VI regulations to conform them to the scope of Title VI, the 2025 DOJ Final Rule, and the authorities described therein. Doing so does not impose any new obligations on any recipients of Federal funding.

H. Federalism

A rule has implications for federalism under E.O. 13132, *Federalism,* 64 FR 43255 (Aug. 4, 1999), if it has substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. NSF has analyzed this rule under this order and determined it does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

I. Civil Justice Reform

This rule meets applicable standards set forth in sections 3(a) and 3(b)(2) of E.O. 12988, *Civil Justice Reform,* 61 FR 4729 (Feb. 5, 1996) to minimize litigation, eliminate ambiguity, and reduce burden.

List of Subjects for 45 CFR Part 611

Civil rights, Reporting and recordkeeping requirements.

For the reasons stated in the preamble, the National Science Foundation amends 45 CFR part 611 as follows:

PART 611—NONDISCRIMINATION IN FEDERALLY–ASSISTED PROGRAMS OF THE NATIONAL SCIENCE FOUNDATION—EFFECTUATION OF TITLE VI OF THE CIVIL RIGHTS ACT OF 1964.

■ 1. The authority citation for part 611 continues to read as follows:

Authority: Sec. 11(a), National Science Foundation Act of 1950, as amended, 42 U.S.C. 1870(a); 42 U.S.C. 2000d–1.

■ 2. In section 611.3:
■ a. Remove and reserve paragraph (b)(2);
■ b. Revise paragraph (b)(3);
■ c. Remove paragraph (b)(6); and
■ d. Remove paragraph (c)(4).

The revisions read as follows:

§ 611.3 Discrimination prohibited.

* * * * *

(b) * * *

(2) [Reserved]

(3) In determining the site or location of facilities, a recipient or applicant may not make selections with the purpose of excluding individuals from, denying them the benefits of, or subjecting them to discrimination under any program to which this regulation applies, on the grounds of race, color, or national origin; or with the purpose of defeating or substantially impairing the accomplishment of the objectives of the Act or this regulation.

* * * * *

§ 611.5 [Amended]

■ 3. In § 611.5, remove paragraphs 6 and 7.

Brian Stone,

Senior Official Performing the Duties of the Director, U.S. National Science Foundation.

BILLING CODE 7555–01–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 107

[Docket No. PHMSA–2025–0095 (HM–268G)]

RIN 2137–AG09

Hazardous Materials: Improving Efficiencies for Special Permits and Approvals Renewals

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule amends the Hazardous Materials Program Procedures to allow an application to renew a special permit or approval to be filed any time on or before its expiration date rather than requiring the renewal application to be filed 60 days in advance as under the current regulations.

DATES: Effective September 3, 2026.

FOR FURTHER INFORMATION CONTACT: Eugenio Cardez, Transportation Regulations Specialist, 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–8553, *eugenio.cardez@dot.gov.*

SUPPLEMENTARY INFORMATION:

I. PHMSA Action

A. What action is PHMSA taking in this final rule?

PHMSA is revising the Hazardous Materials Program Procedures (49 CFR part 107) to simplify the renewal process for special permits and approvals. Instead of requiring applicants to file for a renewal at least 60 days in advance of the expiration date, this final rule allows for submittal at any time on or before the expiration date. This revision ensures that the special permit or approval remains active while PHMSA completes its administrative review.

B. Does this action apply to me?

The action applies to holders of special permits or approvals with an expiration date. Effective 30 days after publication of this final rule, persons will be able to apply for the renewal of a special permit or approval at any time on or before its expiration date.

C. Why is PHMSA taking this action?

PHMSA is taking this action because the agency no longer needs the 60-day lead time to process renewal applications. PHMSA established the 60-day requirement when the application process relied on paper filings submitted by mail. PHMSA has transitioned to an electronic system since that time and can process renewal applications far more efficiently. PHMSA has determined there is no safety case supporting the need for a special permit to expire if a special permit holder fails to submit a renewal application less than 60 days prior to the expiration date and the application is not approved before the expiration date.

II. Summary of Comments Received in Response to the Notice of Proposed Rulemaking

PHMSA published a notice of proposed rulemaking (NPRM), cited as *HM–268G,* to gather feedback on PHMSA amending the timeframe for filing of a renewal application.[1] Please refer to the NPRM for background and discussion of the proposed changes.

The following table alphabetically lists commenters to the NPRM:

Commenter name	Docket No.
Alliance for Chemical Distribution (ACD)	PHMSA–2025–0095–0024
American Coatings Association (ACA)	PHMSA–2025–0095–0009
American Pyrotechnics Association (APA)	PHMSA–2025–0095–0005
Association of American Railroads (AAR) and American Short Line and Regional Railroad Association	PHMSA–2025–0095–0028
Brotherhood of Locomotive Engineers and Trainmen (BLET)	PHMSA–2025–0095–0013
Commercial Vehicle Safety Alliance (CVSA)	PHMSA–2025–0095–0025
Compressed Gas Association, Inc. (CGA)	PHMSA–2025–0095–0011
Council on Safe Transportation of Hazardous Articles, Inc (COSTHA)	PHMSA–2025–0095–0014
Dangerous Goods Advisory Council	PHMSA–2025–0095–0023
Delaware Riverkeeper Network	PHMSA–2025–0095–0015
Household & Commercial Products Association	PHMSA–2025–0095–0016
Independent Cylinder Training LLC	PHMSA–2025–0095–0003
Industrial Packaging Association of North America (IPANA)	PHMSA–2025–0095–0020
Institute of Makers of Explosives	PHMSA–2025–0095–0019
International Vessel Operators Dangerous Goods Association (IVODGA)	PHMSA–2025–0095–0017
Medical Device Transport Council	PHMSA–2025–0095–0012
National Tank Truck Carriers (NTTC)	PHMSA–2025–0095–0006
PerVisum Ltd	PHMSA–2025–0095–0002
Reusable Industrial Packaging Association (RIPA)	PHMSA–2025–0095–0008
SMART TD	PHMSA–2025–0095–0022
Sporting Arms and Ammunition Manufacturers' Institute	PHMSA–2025–0095–0010
Transportation Trades Department, AFL–CIO (TTD)	PHMSA–2025–0095–0027
Utility Solid Waste Activities Group	PHMSA–2025–0095–0026
William Forbes	PHMSA–2025–0095–0018

PHMSA received widespread support for the proposal from a diverse range of industry stakeholders, including trade associations representing shippers, carriers, and packaging manufacturers. Commenters such as the APA, NTTC, and RIPA strongly endorsed the rulemaking, agreeing with PHMSA's assessment that the 60-day advance filing requirement is antiquated given the transition from mail-based paper correspondence to electronic filing systems. Supporters, including COSTHA and IVODGA, emphasized that the current rigid deadline creates unnecessary operational risks, noting that inadvertent lapses can lead to halted production, refused cargo, and supply chain disruptions. Furthermore, entities such as IPANA and AAR concurred that streamlining these

[1] 90 FR 28524 (Jul. 1, 2025).

renewal procedures would reduce administrative burdens and costs without having any adverse impact on transportation safety. Collectively, these commenters—which also included the ACA, CGA, and ACD—urged PHMSA to finalize the amendments to 49 CFR 107.109(b) and 107.705(c) as written to provide greater regulatory flexibility and certainty.

However, some commenters had additional questions or concerns regarding PHMSA oversight and transparency. In addition, two commenters requested clarification of implementation. PHMSA addresses the concerns and requests below.

A. Comments on Accountability

PHMSA received comments from BLET, Smart TD, TTD, and the Delaware Riverkeeper Network stating that the proposals increase the burden on agency personnel and undermine accountability by reducing the time available for review. Commenters further argued that eliminating the 60-day advance filing requirement would create administrative ambiguity and could allow unsafe special permits to remain in effect longer than allowed under the current system.

PHMSA appreciates these comments but disagrees that allowing grantees to file a renewal application at any time on or before expiration would impose undue burdens on agency personnel or create additional ambiguity. PHMSA established the 60-day timeframe when applicants submitted paper filings by mail to help ensure that the process for renewal could play out prior to expiration. However, the modern electronic system allows applications to be received, processed, and evaluated far more quickly, eliminating the need for 60-days of additional lead time. Regarding commenter concerns about the unsafe use of special permits beyond its expiration date, PHMSA disagrees. The underlying safety of a special permit is considered at the outset with the initial application based on a determination by the Associate Administrator,[2] and there is no need to terminate a special permit based solely on the failure to make a filing 60 days in advance, particularly with the transition from a mail-based to an electronic system. Furthermore, the administrative process and evaluation of applications for renewal is not the sole mechanism for safety oversight. PHMSA uses incident reporting, inspections and fitness determinations to help identify and address safety issues during the lifespan of a special permit. The legacy 60-day advance notice should not be misunderstood as necessary to determine safety of a special permit but rather was used as a marker to initiate renewal applications.

B. Comments on Continued Use

PHMSA received comments from CVSA and William Forbes stating that allowing grantees to file an application at any time on or before expiration of the special permit may cause confusion regarding timely submission and whether a special permit has indeed expired, possibly frustrating shipments made under a special permit that is in process under renewal application.

PHMSA appreciates these comments and notes that persons submitting a special permit renewal application via the PHMSA portal will automatically receive a timely filing letter. This letter will verify the submission of the renewal application, alleviating any confusion about the validity of the special permit and preventing frustration of shipments operating under the special permit in question. As stated in 49 CFR 107.109(b), if the application for renewal is received on or before the expiration date, the special permit will not expire prior to final administrative action on the application being taken. This will allow applicants to continue to operate with a special permit that would otherwise have been terminated unnecessarily.

C. Comments on Transparency

PHMSA received comments from BLET, Smart TD, and TTD stating that eliminating the 60-day renewal notice requirement undermines transparency by effectively limiting the time stakeholders have to evaluate special permit renewals. The commenters also argued that the 60-day requirement ensures that decisions regarding the extension of special permits are made with complete visibility and input from those most directly impacted.

PHMSA appreciates these comments and notes that, under the current regulations, new special permit applications—and applications for a modification—are docketed and published in the **Federal Register** under a notice for public comment. Renewals are not. PHMSA further notes that, as under the current process, stakeholders may publicly inspect special permit renewals via the PHMSA portal or request information associated with special permit renewals.[3] This transparency should alleviate commenters' concerns.

D. Additional PHMSA Clarification

PHMSA is making a conforming revision to 49 CFR 107.109(b) to mirror the language in 49 CFR 107.705(c) and clearly state that the use of an expired special permit not filed on or before the expiration date is prohibited. PHMSA notes that hazardous material placed into transportation on or before expiration of a special permit (or an approval) with timely filing for renewal may continue in transportation to its destination.

For these reasons, PHMSA is revising 49 CFR 107.109(b) and 49 CFR 107.705(c) to remove the requirement that renewal applications be filed at least 60 days prior to expiration. The text is revised to state that applications must simply be filed ''on or before'' the expiration date. PHMSA notes this is modified from simply ''before'' in the proposed rule to read ''on or before'' in order to make clear the date by which the renewal must be submitted and that it includes the day on which the PHMSA-issued document expires. In addition, language regarding late filings in 49 CFR 107.705(c) is updated to reflect that applications are timely if filed on or before the expiration date. PHMSA has determined that these revisions will not have any adverse impact on safety.

III. Regulatory Analysis and Notices

A. Legal Authority

This final rule is published under the authority of the Secretary of Transportation as set forth in the Federal Hazardous Materials Transportation Laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (*Regulatory Planning and Review*), as implemented by 49 CFR part 5, subpart B, requires agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' [4] In arriving at those conclusions, E.O. 12866 requires that agencies should consider ''both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify''

[2] 49 CFR 107.113(f)(2).

[3] 49 CFR 107.127.

[4] 58 FR 51735 (Oct. 4, 1993); 91 FR 22431 (Apr. 27, 2026); DOT Order 2100.7 (*Ensuring Reliance Upon Sound Economic Analysis in Department of Transportation Policies, Programs, and Activities*); *see also* DOT Order 2100.6B (*Policies and Procedures for Rulemakings*).

and ''maximize net benefits . . . unless a statute requires another regulatory approach.'' E.O. 12866 also requires that ''agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.'' Pursuant to 49 CFR part 5, subpart B, PHMSA and other Operating Administrations must generally choose the ''least costly regulatory alternative that achieves the relevant objectives'' unless required by law or compelling safety need. In addition, 49 CFR part 5, subpart B specifies that regulations should generally ''not be issued unless their benefits are expected to exceed their costs.''

E.O. 12866 and 49 CFR part 5, subpart B also require that PHMSA submit ''significant regulatory actions'' to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This final rule is not a significant regulatory action pursuant to E.O. 12866 and has not been designated as a ''major rule'' as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by 49 CFR part 5, subpart B and determined that this final rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for affected entities by simplifying the special permit and approval renewal procedures. PHMSA finds those cost savings will also result in reduced costs for the public to whom those entities generally transfer a portion of their compliance costs.

C. Executive Orders 14192 and 14219

PHMSA has determined that this final rule is an E.O. 14192 (*Unleashing Prosperity Through Deregulation*) deregulatory action.[5] PHMSA finds the total costs of the rule on the regulated community will be less than zero. This final rule does not implicate any of the factors identified in section 2(a) of E.O. 14219 (*Ensuring Lawful Governance*) indicative of a regulation that is ''unlawful . . . [or] that undermine[s] the national interest.'' [6]

D. Energy-Related Executive Orders 13211, 14154, and 14156

PHMSA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 14156 (*Declaring a National Energy Emergency*) and E.O. 14154 (*Unleashing American Energy*).[7] The President has declared a national emergency to address America's inadequate energy development production, transportation, refining, and generation capacity and asserted a Federal policy to unleash American energy by ensuing access to abundant supplies of reliable, affordable energy from (inter alia) the removal of ''undue burden[s]'' on the identification, development, or use of domestic energy resources. PHMSA finds this final rule is consistent with E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products and will give affected entities greater flexibility for renewing and continued use special permits and approvals.

In addition, this final rule is not a ''significant energy action'' under E.O. 13211 (*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*), which requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' [8] Because this final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; accordingly, OIRA has not designated this final rule as a significant energy action.

E. Executive Order 13132; Federalism

PHMSA analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132 (*Federalism*) and the Presidential Memorandum (*Preemption*) published in the **Federal Register** on May 22, 2009.[9] E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have ''substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.'' The Federal Hazardous Materials Transportation laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts State, local, and Tribal requirements on certain covered subjects, unless the non-Federal requirements are ''substantively the same'' as the Federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This final rule addresses items that may be covered in Paragraphs 2 and 5 above and would preempt State, local, and Tribal requirements not meeting the ''substantively the same'' standard. Though the final rule may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this final rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a final rule that has been subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the final rule will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (*Proper Consideration of Small Entities in Agency Rulemaking*) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act.[10] DOT posts information on a dedicated web page to help small businesses understand and navigate Federal regulatory processes.[11] This final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The final

[5] 90 FR 9065 (Feb. 6, 2025).

[6] 90 FR 10583 (Feb. 25, 2025).

[7] 90 FR 8433 (Jan. 29, 2025); 90 FR 8353 (Jan. 29, 2025).

[8] 66 FR 28355 (May 22, 2001).

[9] 64 FR 43255 (Aug. 10, 1999); 74 FR 24693 (May 22, 2009).

[10] 67 FR 53461 (Aug. 16, 2002).

[11] DOT, *Rulemaking Requirements Related to Small Entities* (last accessed Sept 3, 2024), available at: *https://www.transportation.gov/regulations/rulemaking-requirements-concerning-small-entities.*

rule will reduce burdens on special permit and approval holders looking to renew these government-issued documents. PHMSA finds the final rule will not impact safety as the timing for submittal of a renewal application has changed but the processing and evaluation of a renewal application remains unchanged. Therefore, PHMSA certifies the final rule does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of $100 million or more (in 1996 dollars) in any given year, the agency must prepare, among other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This final rule does not impose unfunded mandates under UMRA because it does not result in costs of $100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

PHMSA has analyzed this rule pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and has determined it is categorically excluded under 23 CFR 771.117(c)(20), which applies to the promulgation of rules, regulations, and directives. Under Section 9 of DOT Order 5610.1D, PHMSA may apply a categorical exclusion (CE) established in another Operating Administration's procedures. PHMSA followed the requirements outlined in DOT Order 5610.1D to apply the Federal Highway Administration's CE to this deregulatory action. PHMSA has determined no unusual circumstances are present under 23 CFR 771.117(b). PHMSA's Categorical Exclusion Determination memo for this action is available on PHMSA's website.[12]

I. Executive Order 13175

PHMSA analyzed this final rule according to the principles and criteria in E.O. 13175 (*Consultation and Coordination with Indian Tribal Governments*) and DOT Order 5301.1A (*Department of Transportation Tribal Consultation Policies and Procedures*).[13] E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing ''substantial direct compliance costs'' or ''substantial direct effects'' on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the final rule and determined it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (*Promoting International Regulatory Cooperation*) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally.[14] In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

Executive Order 14028 (*Improving the Nation's Cybersecurity)* directed the Federal Government to improve its efforts to identify, to deter, and to respond to ''persistent and increasingly sophisticated malicious cyber campaigns.'' [15] PHMSA has considered the effects of the final rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

M. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process better. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.* DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, or on DOT's website at *http://www.dot.gov/privacy.*

List of Subjects in 49 CFR Part 107

Administrative practice and procedure, Hazardous materials transportation, Penalties, Reporting and recordkeeping requirements.

[15] 86 FR 26633 (May 17, 2021).

In consideration of the foregoing, PHMSA amends 49 CFR Chapter I as follows:

PART 107—HAZARDOUS MATERIALS PROGRAM PROCEDURES

■ 1. The authority citation for part 107 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; Pub. L. 101–410 Section 4; Pub. L. 104–121 Sections 212–213; Pub. L. 104–134 Section 31001; Pub. L. 114–74 Section 701 (28 U.S.C. 2461 note); 49 CFR 1.81 and 1.97; 33 U.S.C. 1321.

■ 2. In § 107.109, revise paragraph (b) to read as follows:

§ 107.109 Application for renewal.

* * * * *

(b) If, on or before an existing special permit expires the holder files an application for renewal that is complete and conforms to the requirements of this section, the special permit will not expire until final administrative action on the application for renewal has been taken. Operation under an expired special permit not filed for renewal before the expiration date is prohibited. This paragraph does not limit the authority of the Associate Administrator to modify, suspend, or terminate a special permit under § 107.121.

■ 3. In § 107.705, revise paragraph (c) to read as follows:

§ 107.705 Registrations, reports, and applications for approval.

* * * * *

(c) For an approval with an expiration date, each application for renewal or modification must be filed in the same manner as an original application. If, on or before an existing approval expires the holder files an application for renewal that is complete and conforms to the requirements of this section, the approval will not expire until final administrative action on the application for renewal has been taken. Operation under an expired approval not filed for renewal on or before the expiration date is prohibited. This paragraph does not limit the authority of the Associate Administrator to modify, suspend, or terminate an approval under § 107.713.

* * * * *

Issued in Washington, DC, on July 31, 2026, under the authority delegated in 49 CFR 1.97.

Paul J. Roberti,

Administrator, Pipeline and Hazardous Materials Safety Administration.

[FR Doc. 2026–15811 Filed 8–3–26; 8:45 am]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 107

[Docket No. PHMSA–2025–0096 (HM–268H)]

RIN 2137–AG10

Hazardous Materials: Modernizing Payments To and From America's Bank Account

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule modernizes the payment system for hazardous materials transportation registration fees by eliminating the option to pay by paper check and requiring electronic payment through the U.S. Department of Transportation (Department or DOT) e-Commerce internet site. This action improves processing efficiency, reduces administrative burden, and aligns payment procedures with current Government-wide electronic commerce practices.

DATES: This final rule is effective September 3, 2026.

FOR FURTHER INFORMATION CONTACT: Yul B. Baker Jr., Transportation Regulations Specialist, 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–8553, *yul.baker@dot.gov.*

SUPPLEMENTARY INFORMATION:

I. PHMSA Action

A. What action is PHMSA taking in this final rule?

PHMSA is revising 49 CFR 107.616 to eliminate the option to pay the hazardous materials transportation registration fee by paper check and require electronic payment.

B. Does this action apply to me?

Effective 30 days after publication of this final rule, persons subject to the registration requirements in 49 CFR 107.601 must pay registration fees electronically.

C. Why is PHMSA taking this action?

PHMSA is taking this action in response to commenter feedback and to advance the goals of Executive Order (E.O.) 14247 (*Modernizing Payments To and From America's Bank Account*).[1] Executive Order 14247 directs that, as soon as practicable and to the extent permitted by law, all payments to the Federal Government must be processed electronically. The Order further requires the Secretary of the Treasury to take appropriate action to eliminate the need for the Department of the Treasury's (''Treasury'') physical lockbox services and to expedite the receipt of Federal payments—including fees—through electronic means.

II. Summary of Comments Received in Response to the Notice of Proposed Rulemaking

PHMSA published a notice of proposed rulemaking (NPRM), cited as *HM–268H,* to gather feedback on revising the hazardous materials registration fee payment system.[2] Please refer to the NPRM for background and discussion of the proposed change.

The following table alphabetically lists commenters to the NPRM:

Commenter name	Docket No.
Council on Safe Transportation of Hazardous Articles, Inc. (COSTHA)	PHMSA–2025–0096–0003
Dangerous Goods Advisory Council	PHMSA–2025–0096–0005
Institute of Makers of Explosives	PHMSA–2025–0096–0004
National Tank Truck Carriers	PHMSA–2025–0096–0002
Nuclear Energy Institute	PHMSA–2025–0097–0002

All commenters supported the proposed amendment requiring electronic-only payment of hazardous materials transportation registration fees. COSTHA expressed support for the proposal but requested clarification on whether members must use a credit card or may continue to make electronic bank-to-bank or Automated Clearing House (ACH) payments. COSTHA noted that many members use ACH payments through the Department's e-Commerce

[1] 90 FR 14001 (Mar. 25, 2025).

[2] 90 FR 28528 (Jul. 1, 2025).

site and that some users find ACH payments more practical and cost-effective than credit card transactions.

PHMSA is not removing the ability to make ACH payments. The electronic-only payment system will rely exclusively on digital or electronic methods for transactions related to hazardous materials transportation registration fees. Funds may be transferred through electronic networks using credit or debit cards, mobile wallets, direct bank transfers, or other digital platforms—including use of ACH payments.

III. Regulatory Analysis and Notices

A. Legal Authority

This final rule is published under the authority of the Secretary of Transportation as set forth in the Federal Hazardous Materials Transportation Laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order 12866 (*Regulatory Planning and Review*), as implemented by 49 CFR part 5, subpart B, requires agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' [3] In arriving at those conclusions, E.O. 12866 requires that agencies should consider ''both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify'' and ''maximize net benefits . . . unless a statute requires another regulatory approach.'' E.O. 12866 also requires that ''agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.'' Pursuant to 49 CFR part 5, subpart B, PHMSA and other Operating Administrations must generally choose the ''least costly regulatory alternative that achieves the relevant objectives'' unless required by law or compelling safety need. In addition, 49 CFR part 5, subpart B also specifies that regulations should generally ''not be issued unless their benefits are expected to exceed their costs.''

E.O. 12866 and 49 CFR part 5, subpart B also require that PHMSA submit ''significant regulatory actions'' to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This final rule is not a significant regulatory action pursuant to E.O. 12866 and has not been designated as a ''major rule'' as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by 49 CFR part 5, subpart B. PHMSA has determined that this final rule will impose negligible burdens for shippers and carriers who will be newly required to comply with electronic registration requirements because the means to make electronic payments have become ubiquitous and easy to obtain. PHMSA estimates a small cost savings to government focused on the reduction of processing paper forms and paper checks. Based on an estimated reduction of 156 hours per year of internal labor compensated at $49.31 per hour, PHMSA estimates an internal cost savings of $7,691.87 per year in 2024 dollars, at both three and seven percent discount rates.[4] The change to accept electronic-only payments aligns with the Treasury's initiative to eliminate the need for physical lockbox services and expedite receipt of payments through electronic means. This change will improve government efficiency for American taxpayers and result in additional unquantified cost savings accruing to the Treasury.[5]

C. Executive Orders 14192 and 14219

PHMSA has determined that this final rule is an E.O. 14192 (*Unleashing Prosperity Through Deregulation*) deregulatory action.[6] PHMSA finds the total costs of the rule on the regulated community will be less than zero. This final rule does not implicate any of the factors identified in section 2(a) of E.O. 14219 (*Ensuring Lawful Governance*) indicative of a regulation that is ''unlawful . . . [or] that undermine[s] the national interest.'' [7]

D. Energy-Related Executive Orders 13211, 14154, and 14156

PHMSA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 14156 (*Declaring a National Energy Emergency*) and E.O. 14154 (*Unleashing American Energy*).[8] The President has declared a national emergency to address America's inadequate energy development production, transportation, refining, and generation capacity and asserted a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of ''undue burden[s]'' on the identification, development, or use of domestic energy resources. PHMSA finds this final rule to be consistent with E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products.

In addition, this final rule is not a ''significant energy action'' under E.O. 13211 (*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*), which requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' [9] Because this final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; accordingly, OIRA has not designated this final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132 (*Federalism*) and the Presidential Memorandum (*Preemption*) published in the **Federal Register** on May 22, 2009.[10] E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have ''substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.'' The Federal Hazardous Materials Transportation Laws contain an express preemption provision at 49 U.S.C. 5125(b) that

[3] 58 FR 51735 (Oct. 4, 1993); 91 FR 22431 (Apr. 27, 2026); DOT Order 2100.7 (*Ensuring Reliance Upon Sound Economic Analysis in Department of Transportation Policies, Programs, and Activities*); *see also* DOT Order 2100.6B (*Policies and Procedures for Rulemakings*).

[4] Quantified cost savings are based on General Schedule grade GS–7 step 5 pay of $63,381 per year, with wages representing 61.8 percent of compensation for government workers. PHMSA estimated an internal labor cost of three hours per week to process paper forms and checks based on interviews with employees involved in the process. *See:* OPM, *General Schedule (GS) Salary Calculator,* available at: *https://www.opm.gov/policy-data-oversight/pay-leave/salaries-wages/2024/general-schedule-gs-salary-calculator/; see also* BLS, *Employer Costs for Employee Compensation Summary* (Mar. 20, 2026), available at: *https://www.bls.gov/news.release/ecec.nr0.htm.*

[5] *See* E.O. 14247, *Modernizing Payments To and From America's Bank Account* (Mar. 25, 2025), outlining the risks and costs of maintaining paper-based payments to the Federal Government.

[6] 90 FR 9065 (Feb. 6, 2025).

[7] 90 FR 10583 (Feb. 25, 2025).

[8] 90 FR 8433 (Jan. 29, 2025); 90 FR 8353 (Jan. 29, 2025).

[9] 66 FR 28355 (May 22, 2001).

[10] 64 FR 43255 (Aug. 10, 1999); 74 FR 24693 (May 22, 2009).

preempts State, local, and Tribal requirements on certain covered subjects, unless the non-Federal requirements are ''substantively the same'' as the Federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This final rule does not address any of the covered subject items listed above that would preempt State, local, and Tribal requirements not meeting the ''substantively the same'' standard. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a final rule that has been subject to a notice-and-comment rulemaking under the APA unless the agency head certifies that the final rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (*Proper Consideration of Small Entities in Agency Rulemaking*) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act.[11] DOT posts information on a dedicated web page to help small businesses understand and navigate Federal regulatory processes.[12] PHMSA developed this final rule in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA has concluded that the incremental costs of the final rule will be negligible and certifies that the final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of $100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This final rule does not impose unfunded mandates under UMRA because it does not result in costs of $100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

PHMSA has analyzed this rule pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and has determined it is categorically excluded under 23 CFR 771.117(c)(20), which applies to the promulgation of rules, regulations, and directives. Under Section 9 of DOT Order 5610.1D, PHMSA may apply a categorical exclusion (CE) established in another Operating Administration's procedures. PHMSA followed the requirements outlined in DOT Order 5610.1D to apply the Federal Highway Administration's CE to this deregulatory action. PHMSA has determined no unusual circumstances are present under 23 CFR 771.117(b). PHMSA's Categorical Exclusion Determination memo for this action is available on PHMSA's website.[13]

I. Executive Order 13175

PHMSA analyzed this final rule according to the principles and criteria in E.O. 13175 (*Consultation and Coordination with Indian Tribal Governments*) and DOT Order 5301.1A (*Department of Transportation Tribal Consultation Policies and Procedures*).[14] E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing ''substantial direct compliance costs'' or ''substantial direct effects'' on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) require that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (*Promoting International Regulatory Cooperation*) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and to compete internationally.[15] In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may

[11] 67 FR 53461 (Aug. 16, 2002).

[12] DOT, *Rulemaking Requirements Related to Small Entities* (last accessed Sept 3, 2024), available at: *https://www.transportation.gov/regulations/rulemaking-requirements-concerning-small-entities.*

[13] DOT, PHMSA, *Implementing Procedures* (Aug. 28, 2025), *https://www.phmsa.dot.gov/planning-and-analytics/environmental-analysis-and-compliance/implementing-procedures.*

[14] 65 FR 67249 (Nov. 9, 2000).

[15] 77 FR 26413 (May 4, 2012).

participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of this final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

Executive Order 14028 (*Improving the Nation's Cybersecurity*) directed the Federal Government to improve its efforts to identify, to deter, and to respond to ''persistent and increasingly sophisticated malicious cyber campaigns.'' [16] PHMSA has considered the effects of the final rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

M. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.* DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, or on DOT's website at *http://www.dot.gov/privacy.*

List of Subjects in 49 CFR Part 107

Administrative practice and procedure, Hazardous materials transportation, Packaging and containers, Penalties, Reporting and recordkeeping requirements.

In consideration of the foregoing, PHMSA amends 49 CFR Chapter I as follows:

PART 107—HAZARDOUS MATERIALS PROGRAM AND PROCEDURES

■ 1. The authority citation for part 107 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; Pub. L. 101–410 section 4; Pub. L. 104–121, Section 212–213; Pub. L. 104–134 Section 31001; Pub. L. 114–74 Section 701 (28 U.S.C. 2461 note); 49 CFR 1.81 and 1.97; 33 U.S.C. 1321.

■ 2. Revise § 107.616 to read as follows:

§ 107.616 Payment procedures.

(a) Each person subject to the requirements of this subpart must submit the registration statement and payment electronically in full through the Department's e-Commerce internet site. Access to this service is provided at: *https://www.phmsa.dot.gov/registration/registration-overview.* A registrant required to file an amended registration statement under § 107.608(c) of this subpart must submit it through the same internet site.

(b) Payment must be made by completing an authorization for payment by credit card or other electronic means of payment acceptable to the U.S. Department of Transportation as part of an internet registration as provided in paragraph (a) of this section.

(c) Payment must correspond to the total fees properly calculated in the ''Amount Due'' block of DOT form F 5800.2. A person may elect to register and pay the required fees for up to three registration years by filing one complete and accurate registration statement.

Issued in Washington, DC, on July 31, 2026, under the authority delegated in 49 CFR 1.97.

Paul J. Roberti

Administrator, Pipeline and Hazardous Materials Safety Administration.

[FR Doc. 2026–15812 Filed 8–3–26; 8:45 am]

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 107

[Docket No. PHMSA–2025–0097 (HM–268I)]

RIN 2137–AG11

Hazardous Materials: Reducing Recordkeeping Requirements for Domestic Carriers

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule amends the hazardous materials program procedures to allow motor and vessel carriers to carry PHMSA registration documents in electronic form.

DATES: This final rule is effective September 3, 2026.

FOR FURTHER INFORMATION CONTACT: Yul B. Baker Jr., Transportation Regulations Specialist, 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–8553, *yul.baker@dot.gov.*

I. PHMSA Action

A. What action is PHMSA taking in this final rule?

PHMSA is revising 49 CFR 107.620 to allow motor and vessel carriers to carry their PHMSA registration certificate, or a document showing their registration number, in either electronic or paper form.

B. Does this action apply to me?

Effective 30 days after publication of this final rule, motor and vessel carriers may carry a copy of the certificate required by the recordkeeping requirements in 49 CFR 107.620—or a document showing the registration number—in either electronic or paper form. Carriers must make these documents available upon request to authorized enforcement and inspection personnel, regardless of whether they are in electronic or paper form.

C. Why is PHMSA taking this action?

PHMSA is taking this action in response to commenter feedback and to allow for flexibility with no reduction in safety. Currently, the hazardous materials program procedures require motor and vessel carriers to carry a paper copy of their current PHMSA-issued Certificate of Registration (''certificate'') or another document showing the U.S. DOT Hazmat Registration Number on each truck or vessel transporting hazardous materials, and to make these documents readily available to authorized enforcement personnel upon request. PHMSA is revising its regulations to permit these documents to be presented in electronic format. PHMSA does not expect the revision to cause any adverse safety impacts because electronically formatted documents can be made as readily available to inspectors and first responders as paper copies.

II. Summary of Comments Received in Response to the Notice of Proposed Rulemaking

PHMSA published a notice of proposed rulemaking (NPRM), cited as *HM–268I,* to gather feedback on revising the registration recordkeeping requirements in 49 CFR 107.620. Please refer to the NPRM for background and discussion of the proposed changes.[1]

The following table alphabetically lists commenters to the NPRM:

[1] 90 FR 28531 (Jul. 21, 2025).

Commenter name	Docket No.
Alliance for Chemical Distribution	PHMSA–2025–0097–0008
Commercial Vehicle Safety Alliance	PHMSA–2025–0097–0009
Council on Safe Transportation of Hazardous Articles, Inc	PHMSA–2025–0097–0005
Dangerous Goods Advisory Council	PHMSA–2025–0097–0007
Institute of Makers of Explosives	PHMSA–2025–0097–0006
National Tank Truck Carriers	PHMSA–2025–0097–0003
Nuclear Energy Institute	PHMSA–2025–0097–0002
Sporting Arms and Ammunition Manufacturers Institute	PHMSA–2025–0097–0004

All commenters supported the proposed amendment permitting motor and vessel carriers to carry a copy of their PHMSA registration documents in an electronic or paper format. Commenters noted that this revision allows for flexibility in operations with no reduction in safety, as current technology allows electronic documents to be just as readily available to inspectors and first responders as paper copies. Therefore, PHMSA is revising 49 CFR 107.620 as proposed.

III. Regulatory Analysis and Notices

A. Legal Authority

This final rule is published under the authority of the Secretary of Transportation as set forth in the Federal Hazardous Materials Transportation Laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (*Regulatory Planning and Review*), as implemented by 49 CFR part 5, subpart B, requires agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' [2] In arriving at those conclusions, E.O. 12866 requires that agencies should consider ''both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify'' and ''maximize net benefits . . . unless a statute requires another regulatory approach.'' E.O. 12866 also requires that ''agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.'' Pursuant to 49 CFR part 5, subpart B, PHMSA and other Operating Administrations must generally choose the ''least costly regulatory alternative that achieves the relevant objectives'' unless required by law or compelling safety need. In addition, 49 CFR part 5, subpart B specifies that regulations should generally ''not be issued unless their benefits are expected to exceed their costs.''

E.O. 12866 and 49 CFR part 5, subpart B also require that PHMSA submit ''significant regulatory actions'' to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This final rule is not a significant regulatory action pursuant to E.O. 12866 and has not been designated as a ''major rule'' as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by 49 CFR part 5, subpart B and determined that this final rule will not generate economic costs to allow carriage of a copy of the Certificate of Registration or other document bearing the registration number in electronic form and will enhance efficiency for both motor and vessel carriers.

C. Executive Orders 14192 and 14219

PHMSA has determined that this final rule is an E.O. 14192 (*Unleashing Prosperity Through Deregulation*) deregulatory action.[3] PHMSA finds the total costs of the rule on the regulated community will be less than zero. This final rule does not implicate any of the factors identified in section 2(a) of E.O. 14219 (*Ensuring Lawful Governance*) indicative of a regulation that is ''unlawful . . . [or] that undermine[s] the national interest.'' [4]

D. Energy-Related Executive Orders 13211, 14154, and 14156

PHMSA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 14156 (*Declaring a National Energy Emergency*) and E.O. 14154 (*Unleashing American Energy*).[5] The President has declared a national emergency to address America's inadequate energy development production, transportation, refining, and generation capacity and asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from, *inter alia,* the removal of ''undue burden[s]'' on the identification, development, or use of domestic energy resources. PHMSA finds this final rule to be consistent with E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products.

In addition, this final rule is not a ''significant energy action'' under E.O. 13211 (*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*), which requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' [6] Because this final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; accordingly, OIRA has not designated this final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132 (*Federalism*) and the Presidential Memorandum (*Preemption*) published in the **Federal Register** on May 22, 2009.[7] E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have ''substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.'' The Federal Hazardous Materials Transportation Laws contain an express preemption provision at 49 U.S.C. 5125(b) that

[2] 58 FR 51735 (Oct. 4, 1993); 91 FR 22431 (Apr. 27, 2026); DOT Order 2100.7 (*Ensuring Reliance Upon Sound Economic Analysis in Department of Transportation Policies, Programs, and Activities*); *see also* DOT Order 2100.6B (*Policies and Procedures for Rulemakings*).

[3] 90 FR 9065 (Feb. 6, 2025).

[4] 90 FR 10583 (Feb. 25, 2025).

[5] 90 FR 8433 (Jan. 29, 2025); 90 FR 8353 (Jan. 29, 2025).

[6] 66 FR 28355 (May 22, 2001).

[7] 64 FR 43255 (Aug. 10, 1999); 74 FR 24693 (May 22, 2009).

preempts State, local, and Tribal requirements on certain covered subjects, unless the non-Federal requirements are ''substantively the same'' as the Federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This final rule does not address any of the covered subject items listed above that would preempt State, local, and Tribal requirements not meeting the ''substantively the same'' standard. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a final rule that has been subject to a notice-and-comment rulemaking under the APA unless the agency head certifies that the final rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (*Proper Consideration of Small Entities in Agency Rulemaking*) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act.[8] DOT posts information on a dedicated web page to help small businesses understand and navigate Federal regulatory processes.[9] PHMSA developed this final rule in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. Because the final rule is expected to reduce burdens, PHMSA certifies that it does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of $100 million or more (in 1996 dollars) in any given year, the agency must prepare, among other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This final rule does not impose unfunded mandates under UMRA because it does not result in costs of $100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

PHMSA has analyzed this rule pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and has determined it is categorically excluded under 23 CFR 771.117(c)(20), which applies to the promulgation of rules, regulations, and directives. Under Section 9 of DOT Order 5610.1D, PHMSA may apply a categorical exclusion (CE) established in another Operating Administration's procedures. PHMSA followed the requirements outlined in DOT Order 5610.1D to apply the Federal Highway Administration's CE to this deregulatory action. PHMSA has determined no unusual circumstances are present under 23 CFR 771.117(b). PHMSA's Categorical Exclusion Determination memo for this action is available on PHMSA's website.[10]

I. Executive Order 13175

PHMSA analyzed this final rule according to the principles and criteria in E.O. 13175 (*Consultation and Coordination with Indian Tribal Governments*) and DOT Order 5301.1A (*Department of Transportation Tribal Consultation Policies and Procedures*).[11] E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing ''substantial direct compliance costs'' or ''substantial direct effects'' on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) require that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (*Promoting International Regulatory Cooperation*) requires agencies to consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally.[12] In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may

[8] 67 FR 53461 (Aug. 16, 2002).

[9] DOT, *Rulemaking Requirements Related to Small Entities* (last accessed Sept 3, 2024), available at: *https://www.transportation.gov/regulations/rulemaking-requirements-concerning-small-entities.*

[10] DOT, PHMSA, *Implementing Procedures* (Aug. 28, 2025), *https://www.phmsa.dot.gov/planning-and-analytics/environmental-analysis-and-compliance/implementing-procedures.*

[11] 65 FR 67249 (Nov. 9, 2000).

[12] 77 FR 26413 (May 4, 2012).

participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of this final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (*Improving the Nation's Cybersecurity*) directed the Federal Government to improve its efforts to identify, to deter, and to respond to ''persistent and increasingly sophisticated malicious cyber campaigns.'' [13] PHMSA has considered the effects of the final rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

M. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.* DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, or on DOT's website at *http://www.dot.gov/privacy.*

List of Subjects in 49 CFR Part 107

Administrative practice and procedure, Hazardous materials transportation, Packaging and containers, Penalties, Reporting and recordkeeping requirements.

In consideration of the foregoing, PHMSA amends 49 CFR Chapter I as follows:

PART 107—HAZARDOUS MATERIALS PROGRAM AND PROCEDURES

■ 1. The authority citation for part 107 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; Pub. L. 101–410 section 4; Pub. L. 104–121, Section 212–213; Pub. L. 104–134 Section 31001; Pub. L. 114–74 Section 701 (28 U.S.C. 2461 note); 49 CFR 1.81 and 1.97; 33 U.S.C. 1321.

■ 2. Revise § 107.620 to read as follows:

§ 107.620 Recordkeeping requirements.

(a) Each person subject to the requirements of this subpart, or its agent designated under § 107.608(e), must maintain at its principal place of business in electronic or paper form for a period of three years from the date of issuance of each Certificate of Registration:

(1) A copy of the registration statement filed with PHMSA; and

(2) The Certificate of Registration issued to the registrant by PHMSA.

(b) Each motor carrier subject to the requirements of this subpart must carry a copy of its current Certificate of Registration issued by PHMSA or another document bearing the current registration number identified as the ''U.S. DOT Hazmat Reg. No.'' on board each truck and truck tractor (not including trailers and semi-trailers) used to transport hazardous materials subject to the requirements of this subpart. The Certificate of Registration or document bearing the current registration number may be carried in electronic or paper form and must be made available, upon request, to authorized enforcement personnel.

(c) Each person who transports by vessel a hazardous material subject to the requirements of this subpart must carry on board the vessel a copy of its current Certificate of Registration issued by PHMSA or another document bearing the current registration number identified as the ''U.S. DOT Hazmat Reg. No.'' The Certificate of Registration or document bearing the current registration number may be carried in electronic or paper form and must be made available, upon request, to authorized enforcement personnel.

(d) Each person subject to this subpart must furnish its Certificate of Registration (or a copy thereof) and all other records and information pertaining to the information contained in the registration statement to authorized enforcement personnel upon request. The Certificate of Registration and all other records and information may be furnished in electronic or paper form.

Issued in Washington, DC, on July 31, 2026, under the authority delegated in 49 CFR 1.97.

Paul J. Roberti,

Administrator, Pipeline and Hazardous Materials Safety Administration.

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 171

[Docket No. PHMSA–2025–0089 (HM–268A)]

RIN 2137–AG03

Hazardous Materials: Reducing Burdens on Domestic Aerosol Shippers

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: PHMSA is amending the Hazardous Materials Regulations by updating the definition of an aerosol to eliminate unnecessary regulatory burdens and maintain consistency with current international transportation standards.

DATES: This final rule is effective September 3, 2026.

FOR FURTHER INFORMATION CONTACT: Noah Jacobson, Transportation Regulations Specialist, 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–8553, *noah.jacobson@dot.gov.*

I. PHMSA Action

A. What action is PHMSA taking in this final rule?

PHMSA is revising the definition of an aerosol in 49 CFR 171.8 to add aerosols that consist solely of gases instead of requiring an aerosol to expel a liquid, paste, or powder.

The Hazardous Materials Regulations (HMR) currently define an aerosol in 49 CFR 171.8 as ''an article consisting of any non-refillable receptacle containing a gas compressed, liquefied or dissolved under pressure, the sole purpose of which is to expel a nonpoisonous (other than a Division 6.1 Packing Group III material) liquid, paste, or powder and fitted with a self-closing release device allowing the contents to be ejected by the gas.'' This HMR definition for aerosols is inconsistent with corresponding international standards, which do not include the limitation for gas to be used to expel a liquid, paste, or powder (*i.e.,* aerosol containers may expel a gas). The lack of harmonization between the HMR and international standards creates significant challenges for industry stakeholders engaged in global commerce, leading to confusion, increased compliance costs, and logistical inefficiencies, particularly for companies that manufacture, package,

or transport hazardous materials across borders. Lack of harmonization also impedes trade, delays shipments, and reduces the competitiveness of U.S. businesses in the global marketplace—all of which can increase prices for U.S. consumers. Therefore, PHMSA is revising the definition of an aerosol in § 171.8 to align with the international definition and no longer require that an aerosol container be designed for the sole purpose of expelling a liquid, paste or powder, thereby reducing undue regulatory burdens without compromising safety.

B. Does this action apply to me?

Effective 30 days after publication of this final rule, offerors of aerosols that consist solely of gases (*i.e.,* that do not contain a liquid, paste, or powder) may be shipped as aerosols when prepared and shipped in compliance with the HMR.

C. Why is PHMSA taking this action?

PHMSA is taking this action to align the HMR definition of ''aerosol'' with the international definition, which permits the shipment of pure gases as aerosols. As outlined in the final Regulatory Impact Analysis (RIA), PHMSA estimates that this change would result in annualized cost savings of $254,565.[1]

II. Summary of Comments Received in Response to the Notice of Proposed Rulemaking

PHMSA published a notice of proposed rulemaking (NPRM), cited as *HM–268A,* to gather feedback on amending the definition of an aerosol to include a compressed gas other than the propellant, instead of restricting the definition to the expulsion of a liquid, paste, or powder.[2] Please refer to the NPRM for background and discussion of the proposed change.

The following table alphabetically lists commenters to the NPRM:

Commenter name	Docket No.
Aeropres Corporation	PHMSA–2025–0089–0014
American Coatings Association	PHMSA–2025–0089–0007
American Pyrotechnics Association	PHMSA–2025–0089–0004
Blaster Corporation	PHMSA–2025–0089–0010
Council on Safe Transportation of Hazardous Articles, Inc. (COSTHA)	PHMSA–2025–0089–0011
Dangerous Goods Advisory Council	PHMSA–2025–0089–0019
Diversified CPC International, Inc	PHMSA–2025–0089–0021
Household & Commercial Products Association	PHMSA–2025–0089–0017
Infotrac Inc	PHMSA–2025–0089–0003
International Vessel Operators Dangerous Goods Association	PHMSA–2025–0089–0018
ITW Techspray	PHMSA–2025–0089–0012
Medical Device Transport Council	PHMSA–2025–0089–0008
National Aerosol Association	PHMSA–2025–0089–0009
Pyro Shows, Inc	PHMSA–2025–0089–0005
Pyrotek Special Effects Inc	PHMSA–2025–0089–0002
Stoner Incorporated, Inc	PHMSA–2025–0089–0020

All commenters supported the proposal to harmonize the definition of an aerosol with international standards. In addition, COSTHA requested that, after publication of the amendment, PHMSA notify all holders of special permits for this type of aerosol product that their permits have been incorporated into the HMR. PHMSA clarifies that, while formal notice of incorporation will not be provided at the time of publication of the final rule, holders will be notified if their renewal applications are denied on the basis that the special permit is no longer necessary. Separately, Infotrac Inc. noted that 49 CFR 171.23(b)(1) would require a conforming revision to align with the new definition of an aerosol. PHMSA agrees and is revising 49 CFR 171.23(b)(1) in this final rule to reflect the revised definition for an aerosol in 49 CFR 171.8.

For these reasons, PHMSA is revising the definition of an aerosol in 49 CFR 171.8 and is making conforming revisions to 49 CFR 171.23 to align with the international definition of an aerosol, removing the requirement that an aerosol be designed for the sole purpose of expelling a liquid, paste, or powder. PHMSA has determined that these revisions will not have any adverse impact on safety.[3]

III. Regulatory Analysis and Notices

A. Legal Authority

This final rule is published under the authority of the Secretary of Transportation as set forth in the Federal Hazardous Materials Transportation Laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (*Regulatory Planning and Review*), as implemented by 49 CFR part 5, subpart B, requires agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.''[4] In arriving at those conclusions, E.O. 12866 requires that agencies should consider ''both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify'' and ''maximize net benefits . . . unless a statute requires another regulatory approach.'' E.O. 12866 also requires that ''agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.'' Pursuant to 49 CFR part 5, subpart B, PHMSA and other Operating Administrations must generally choose the ''least costly regulatory alternative that achieves the relevant objectives'' unless required by law or compelling safety need. In addition, 49 CFR part 5, subpart B specifies that regulations should generally ''not be issued unless their

[1] A copy of the RIA has been placed in the docket to this rulemaking.

[2] 90 FR 28540 (Jul. 1, 2025).

[3] PHMSA found minimal safety incidents in an analysis of 30 years of special permit data.

[4] 58 FR 51735 (Oct. 4, 1993); 91 FR 22431 (Apr. 27, 2026); DOT Order 2100.7 (*Ensuring Reliance Upon Sound Economic Analysis in Department of Transportation Policies, Programs, and Activities*); *see also* DOT Order 2100.6B (*Policies and Procedures for Rulemakings*).

benefits are expected to exceed their costs.''

E.O. 12866 and 49 CFR part 5, subpart B also require that PHMSA submit ''significant regulatory actions'' to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This final rule is not a significant regulatory action pursuant to E.O. 12866 and has not been designated as a ''major rule'' as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by 49 CFR part 5, subpart B and determined this final rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for manufacturers and shippers of aerosols. PHMSA finds cost savings will focus on those related to the reduction in burden for new special permit applications (*e.g.,* new entrants to the market) and renewals for current special permit holders, as well as cost savings from the ability to transition to a single system of marks, labels, and documentation for domestic and international transport. PHMSA finds those cost savings will result in reduced costs for U.S. consumers to whom those entities generally transfer a portion of their compliance costs.

The change aligns the HMR definition of aerosols with international standards (including the UN Model Regulations, IMDG Code, ICAO Technical Instructions, and ADR) and will not impose any new direct costs on U.S. aerosol manufacturers, shippers, or Federal regulatory agencies. The revision will expand regulatory flexibility by permitting the classification of gas-only aerosols without necessitating the presence of a liquid, paste, or powder. As a result, PHMSA finds this final rule will impose no new compliance, implementation, or oversight burdens.

The change offers multiple sources of cost savings and regulatory relief. The current U.S. definition excludes gas-only aerosols from qualifying for limited quantity exceptions, requiring their treatment as fully regulated hazardous materials. Aligning the HMR with international standards will eliminate added costs for qualifying products, streamlining logistics and reducing compliance burdens, such as preparation of shipping papers for highway and rail shipments, payment of hazmat transportation surcharges, investment in extensive employee training, and additional requirements for storage and documentation. In addition, companies currently operating under special permits to ship gas-only aerosols incur labor and administrative costs related to marking packages, using specific packaging, maintaining certain records, renewing permits every two to four years, and providing permit-specific training to relevant staff. PHMSA has issued dozens of special permits in different forms that allow for the transportation of pure gases in a manner equivalent to using the international definition of an aerosol. Examples of operational controls under these special permits include relaxation of the packaging requirements to allow transportation in DOT–2P, 2Q, or similar inner receptacles, and the elimination of certain shipping paper and placarding requirements.

Elimination of the special permit requirement will produce direct labor cost savings and reduce administrative overhead for the private sector and improve government efficiency for PHMSA. Harmonization with international definitions will simplify cross-border trade by eliminating inconsistencies in classification and labeling. U.S. companies currently face trade friction when exporting aerosols that qualify under international definitions but not under U.S. rules. By adopting the broader international standard, U.S. manufacturers and marketers will gain improved access to the global aerosol market. This change will enhance the international competitiveness of U.S. aerosol products, enabling companies to increase market share and reduce barriers to export. The regulatory change is broadly expected to increase efficiency in transportation and logistics, lower product costs for businesses and potentially for consumers, and foster economic activity by reducing barriers to entry. PHMSA does not expect the final rule to have any adverse impact on safety.

As outlined in the final RIA, PHMSA estimates this final rule will result in annualized cost savings from eliminating the need for new and renewal of special permits, reducing PHMSA reviews of special permit applications, and removing shipping paper requirements for qualifying gas-only aerosol shipments of about $254,565 (2024 dollars) at three percent and seven percent discount rates.

C. Executive Orders 14192 and 14219

PHMSA has determined that this final rule is an E.O. 14192 (*Unleashing Prosperity Through Deregulation*) deregulatory action.[5] As discussed in detail in the previous section, PHMSA has determined the total costs of the rule on the regulated community will be less than zero. This final rule does not implicate any of the factors identified in section 2(a) of E.O. 14219 (*Ensuring Lawful Governance*) indicative of a regulation that is ''unlawful . . . [or] that undermine[s] the national interest.'' [6]

D. Energy-Related Executive Orders 13211, 14154, and 14156

PHMSA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 14156 (*Declaring a National Energy Emergency*) and E.O. 14154 (*Unleashing American Energy*).[7] The President has declared a national emergency to address America's inadequate energy development production, transportation, refining, and generation capacity and asserted a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of ''undue burden[s]'' on the identification, development, or use of domestic energy resources. PHMSA finds this final rule to be consistent with E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products.

In addition, this final rule is not a ''significant energy action'' under E.O. 13211 (*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*), which requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' [8] Because this final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; accordingly, OIRA has not designated this final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132 (*Federalism*) and the Presidential Memorandum (*Preemption*) published in the **Federal Register** on May 22, 2009.[9] E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have ''substantial direct effects on the States, on the relationship between

[5] 90 FR 9065 (Feb. 6, 2025).

[6] 90 FR 10583 (Feb. 25, 2025).

[7] 90 FR 8353 (Jan. 29, 2025); 90 FR 8353 (Jan. 29, 2025).

[8] 66 FR 28355 (May 22, 2001).

[9] 64 FR 43255 (Aug. 10, 1999); 74 FR 24693 (May 22, 2009).

the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.'' The Federal Hazardous Materials Transportation Laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts State, local, and Tribal requirements on certain covered subjects, unless the non-Federal requirements are ''substantively the same'' as the Federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This final rule addresses items covered in Paragraph 1 above and would preempt State, local, and Tribal requirements not meeting the ''substantively the same'' standard. Though the final rule may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this final rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a final rule that has been subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the final rule will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (*Proper Consideration of Small Entities in Agency Rulemaking*) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act.[10] DOT posts information on a dedicated web page to help small businesses understand and navigate Federal regulatory processes.[11] This final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The final rule will reduce burdens and reflect current economic realities without adversely impacting safety. Therefore, PHMSA certifies the final rule does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of $100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This final rule does not impose unfunded mandates under UMRA because it does not result in costs of $100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

PHMSA has analyzed this rule pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and has determined it is categorically excluded under 23 CFR 771.117(c)(20), which applies to the promulgation of rules, regulations, and directives. Under Section 9 of DOT Order 5610.1D, PHMSA may apply a categorical exclusion (CE) established in another Operating Administration's procedures. PHMSA followed the requirements outlined in DOT Order 5610.1D to apply the Federal Highway Administration's CE to this deregulatory action. PHMSA has determined no unusual circumstances are present under 23 CFR 771.117(b). PHMSA's Categorical Exclusion Determination memo for this action is available on PHMSA's website.[12]

I. Executive Order 13175

PHMSA analyzed this final rule according to the principles and criteria in E.O. 13175 (*Consultation and Coordination with Indian Tribal Governments*) and DOT Order 5301.1A (*Department of Transportation Tribal Consultation Policies and Procedures*).[13] E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing ''substantial direct compliance costs'' or ''substantial direct effects'' on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections. There is potential for a slight reduction in the number of shipping papers required under OMB Control Number 2137–0034, *Hazardous Materials Shipping Papers & Emergency Response Information,* due to aerosols being shipped as limited quantities by highway or rail. However, this reduction will be minimal and difficult to quantify in relation to the overall shipping paper burden.

[13] 65 FR 67249 (Nov. 9, 2000).

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (*Promoting International Regulatory Cooperation*) [14] requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

Executive Order 14028 (*Improving the Nation's Cybersecurity*) directed the Federal Government to improve its efforts to identify, to deter, and to respond to ''persistent and increasingly sophisticated malicious cyber campaigns.'' [15] PHMSA has considered the effects of the final rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

[15] 86 FR 26633 (May 17, 2021).

M. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process better. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.* DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, or on DOT's website at *http://www.dot.gov/privacy.*

List of Subjects in 49 CFR Part 171

Definitions, Exports, Hazardous materials transportation, Hazardous waste, Imports, Reporting and recordkeeping requirements.

In consideration of the foregoing, PHMSA amends 49 CFR Chapter I as follows:

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

■ 1. The authority citation for part 171 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; Pub. L. 101–410 section 4; Pub. L. 104–134, section 31001; Pub. L. 114–74 section 701 (28 U.S.C. 2461 note); 49 CFR 1.81 and 1.97.

■ 2. In § 171.8, revise the definition of ''Aerosol'' to read as follows:

§ 171.8 Definitions and abbreviations.

* * * * *

Aerosol means an article consisting of a non-refillable receptacle containing a gas (compressed, liquefied, or dissolved under pressure), with or without a nonpoisonous (other than a Division 6.1 Packing Group III material) liquid, paste, or powder, and fitted with a self-closing release device allowing the contents to be ejected as a foam, paste, or powder or in a liquid state or in a gaseous state.

* * * * *

■ 3. In § 171.23, revise paragraph (b)(1) to read as follows:

§ 171.23 Requirements for specific materials and packagings transported under the ICAO Technical Instructions, IMDG Code, Transport Canada TDG Regulations, or the IAEA Regulations.

* * * * *

(b) * * *

(1) *Aerosols.* Except for a limited quantity of a compressed gas in a container of not more than 4 fluid ounces capacity meeting the requirements in § 173.306(a)(1) of this subchapter, the proper shipping name ''Aerosol,'' UN1950, may be used only for a non-refillable receptacle containing a gas compressed, liquefied, or dissolved under pressure fitted with a self-closing release device (see § 171.8 of this subchapter). In addition, an aerosol must be in a metal packaging when the packaging exceeds 7.22 cubic inches.

* * * * *

Issued in Washington, DC, on July 31, 2026, under the authority delegated in 49 CFR 1.97.

Paul J. Roberti,

Administrator, Pipeline and Hazardous Materials Safety Administration.

[FR Doc. 2026–15803 Filed 8–3–26; 8:45 am]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Parts 171, 172, and 173

[Docket No. PHMSA–2025–0093 (HM–268E)]

RIN 2137–AG07

Hazardous Materials: Remove Redundant List of U.S. EPA CERCLA Hazardous Substances

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: To improve efficiency and eliminate redundancy, this final rule streamlines the Hazardous Materials Regulations by modifying how hazardous substances are listed. Instead of maintaining a duplicative list, the regulations will now rely on the authoritative, comprehensive list already maintained by the U.S. Environmental Protection Agency.

DATES: This final rule is effective December 2, 2026.

FOR FURTHER INFORMATION CONTACT: Tony Horne, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–8553, *tony.horne@dot.gov.*

I. PHMSA Action

A. What action is PHMSA taking in this final rule?

PHMSA is modifying how hazardous substances and their reportable quantities are listed within the Hazardous Materials Regulations (HMR). Specifically, rather than maintaining a duplicative list found in Tables 1 and 2 to Appendix A of 49 CFR 172.101 that must be periodically

revised for consistency with the U.S. Environmental Protection Agency (EPA) list found at 40 CFR 302.4, PHMSA is amending Appendix A to reference the EPA list directly. In addition, PHMSA is revising the definitions of ''hazardous substance'' and ''reportable quantity (RQ)'' to reference the EPA list in a seamless manner. Finally, PHMSA is making a conforming revision to the requirements for empty packagings to reflect the newly modified structure of Appendix A.

B. Does this action apply to me?

Effective 120 days after publication of this final rule, persons offering for transportation and transporting materials that may be subject to hazardous substance requirements in the HMR must refer to the EPA regulations at 40 CFR 302.4 for the list of regulated hazardous substances and their reportable quantities. Importantly, because this action simply modifies how the list is referenced within the Code of Federal Regulations, it does not functionally change whether a material is classified as a hazardous substance.

C. Why is PHMSA taking this action?

To enhance government efficiency and eliminate regulatory redundancy, this final rule streamlines the HMR by modifying how hazardous substances are listed. Importantly, this action does not delete the entire Hazardous Materials Table (HMT); rather, it solely amends the HMR to modify Appendix A to the HMT—which currently houses a redundant list of hazardous substances and their reportable quantities (RQs)—by directing compliance to the comprehensive list already maintained by the U.S. Environmental Protection Agency (EPA) in a Table at 40 CFR 302.4. As a matter of sensible regulatory oversight, this alignment avoids the costly confusion of navigating out-of-sync regulations. In the past, stakeholders have expressed confusion whether a hazardous substance that is listed by EPA—but not yet listed by PHMSA via a rulemaking—is subject to transportation requirements under the HMR for hazardous substances.[1] It also ensures the regulated community can avoid the inverse; specifically, a circumstance where an entity incurs the unnecessary expense of continuing to transport a substance as a hazardous material simply because a separate DOT list lagged behind an EPA de-listing or an increase in the RQ.

In addition, this action conserves scarce government resources by eliminating the need for periodic, limited-purpose rulemakings previously required to keep the HMR's list and RQs consistent with EPA updates. Furthermore, directly referencing the EPA's list reflects the reality that treating these designated substances as hazardous materials in transport has been a statutory requirement all along, meaning that this rule should result in no real-world change to how regulated entities are operating.[2]

II. Discussion of Comments Received in Response to the Notice of Proposed Rulemaking

PHMSA published a notice of proposed rulemaking (NPRM), cited as HM–268E, to gather feedback on revising the HMR to streamline the listing of hazardous substances and reportable quantities by referring directly to the source list found in EPA regulations.[3] Please refer to the NPRM for background and discussion of the proposed change.

The following table alphabetically lists commenters to the NPRM:

Commenter name	Docket No.
Alliance for Chemical Distribution (ACD)	PHMSA–2025–0093–0009
Council on Safe Transportation of Hazardous Articles, Inc. (COSTHA)	PHMSA–2025–0093–0006
Commercial Vehicle Safety Alliance (CVSA)	PHMSA–2025–0093–0010
Dangerous Goods Advisory Council (DGAC)	PHMSA–2025–0093–0008
Infotrac, Inc	PHMSA–2025–0093–0003
Institute of Hazardous Materials Management (IHMM)	PHMSA–2025–0093–0005
Rex Railsback	PHMSA–2025–0093–0002
William Forbes	PHMSA–2025–0093–0007

PHMSA received mixed support for the proposed changes among the eight sets of comments submitted in response to the NPRM. Some commenters supported the proposed changes because eliminating the redundant list is a practical way to ensure consistency in how hazardous substances are regulated in transportation. For instance, COSTHA noted that the revision removes duplication that has historically caused inconsistencies between PHMSA's list and EPA's authoritative list, thereby creating confusion for shippers, carriers, and enforcement personnel.

PHMSA received varied feedback on the proposed changes and appreciates the input from all commenters. To enhance consistency, efficiency, and clarity, the agency is proceeding with the revisions to address the issue of redundant regulatory text. Addressing this duplication aligns PHMSA's requirements with the EPA's authoritative list and resolves historical inconsistencies that have caused unnecessary and avoidable confusion for shippers, carriers, and enforcement personnel.

However, some commenters expressed concerns with the proposals. PHMSA responds to those concerns as follows:

A. Introducing Potential Burden From a Second Set of Regulations

ACD, CVSA, DGAC, Mr. Rex Railsback, and Mr. William Forbes shared concerns regarding additional economic burdens associated with purchasing new regulatory texts and associated retraining. CVSA stated that commercial motor vehicle inspectors who conduct hazardous materials inspections must have ready access to information that is reliable, and that the proposed change may require inspectors to navigate a second set of unfamiliar regulations. DGAC believed that the proposed change would require trainers to provide print copies of, or excerpts from, the relevant 40 CFR provisions to

[1] *See* PHMSA Letter of Interpretation 25–0013 (Sept. 23, 2025), available at: *https://www.phmsa.dot.gov/standards-rulemaking/hazmat/interpretations/25-0013.*

[2] *See* 49 CFR 172.101 app. A, note 1 (''It should be noted that 42 U.S.C. 9656(b) provides that common and contract carriers may be held liable under laws other than CERCLA for the release of a hazardous substance as defined in that Act, during transportation that commenced before the effective date of the listing and regulating of that substance as a hazardous material under 49 U.S.C. 5101–5127.'')

[3] 90 FR 28571 (Jul. 1, 2025).

every affected hazmat employee, and that enforcement officers would have to maintain copies as well. Mr. Railsback stated that the relevant 40 CFR provisions are not available via the electronic oCFR (which PHMSA notes is an unofficial source provided as a courtesy on the PHMSA website), and that PHMSA does not make the relevant 40 CFR provisions available in print without purchasing additional text.

PHMSA respectfully disagrees and asserts this change will not impose any economic burdens nor create any accessibility issues. PHMSA does not make any resources available in print. Instead, the Office of the Federal Register maintains a web-based version of the entire CFR, to include relevant 40 CFR provisions, that is available for free via the electronic CFR (eCFR), and it is updated in real-time.[4] The relevant portions of 40 CFR can also be downloaded on an electronic device to use in areas with limited internet or cellular connectivity. Therefore, because the entire CFR is available free online, and it is updated on a daily basis, PHMSA does not believe this rule will be a barrier or create any burdens for trainers, hazmat employees, or enforcement personnel.[5]

B. Training

DGAC and Infotrac, Inc. stated the proposed changes would necessitate additional training on different sets of regulations that hazmat employees normally do not receive. DGAC further argued that:

[A]n inordinately large number of individuals will be impacted. In addition, because the determination of whether or not a material is a hazardous substance under the HMR is based on whether the quantity per package equals or exceeds the listed reportable quantity, the proposed change would require numerous additional individuals who package materials to require training in the use of 40 CFR in addition to their existing required training on the HMR.

DGAC concluded that the need for additional training stems from the prospect of materials being added to or removed from the list of hazardous substances and persons having to monitor the **Federal Register** for changes to relevant 40 CFR provisions.

PHMSA acknowledges the concerns raised by these commenters but respectfully disagrees. First, this action does not delete the Hazardous Materials Table (HMT) itself; rather, it solely modifies Appendix A. In addition, those persons using the free, online eCFR will be able to access the relevant 40 CFR provisions directly via a hyperlink.

More importantly, this rule imposes no substantive, real-world changes to the applicability of the HMR to hazardous substances. A hazardous substance is regulated under the HMR if it is listed in the relevant 40 CFR provisions and it equals or exceeds the (listed) RQ in a package.[6] Whether the list resides in the HMR or in relevant 40 CFR provisions has no bearing on its applicability to hazardous substances. The EPA list remains the authoritative list and resides in 40 CFR 302.4. PHMSA now refers stakeholders to the authoritative list located in relevant 40 CFR provisions. The eCFR provides hyperlinks anytime a portion of the CFR is cited in the regulatory text, making it readily accessible by way of the HMR.

Moreover, part of the scope of HMR training is providing assurances that a hazmat employee has familiarity with the general provisions of the HMR and can recognize and identify the presence of hazardous materials. Persons in the business of transporting hazardous materials that are hazardous substances subject to HMR requirements should already be familiar with the applicable requirements. Such persons should also be aware that changes can be made to the list—including removals, additions, or changes to RQs. In addition, PHMSA believes this general awareness or familiarization training should already be captured under the standard recurrent training expected of hazmat employers.

C. Preserving Appendix B

COSTHA and DGAC recommend maintaining Appendix B as written and, instead of converting the Appendix B list of marine pollutant to Appendix A as proposed, they suggest revising Appendix A by providing a direct reference to 40 CFR 302.4 for the list of hazardous substances and their reportable quantities. Specifically, COSTHA noted that ''keeping the . . . placeholder and including a reference link would provide better continuity and make the regulation easier to navigate,'' and that ''while referencing two regulations adds an additional step for compliance, it does improve long-term efficiency and accuracy of these applicable regulatory updates.'' Further, DGAC reasoned that adopting the changes to the 49 CFR 172.101 appendixes would cause confusion and potentially result in frustration or denial of shipments.

PHMSA agrees with the commenters. Rather than adopting the proposed changes to 49 CFR 172.101 and to avoid introducing confusion from relabeling appendices, in this final rule PHMSA will maintain the Appendix B to § 172.101—List of Marine Pollutants as written and instead revise Appendix A to reference 40 CFR 302.4.

D. Delayed Effective Date

IHMM asked PHMSA to consider a delayed effective date to allow entities to update systems and training materials consistent with the transition from an HMR list at 49 CFR to the EPA list at 40 CFR.

In consideration of the comments about training and familiarity with alternate regulatory text, PHMSA agrees with IHMM and is providing a delayed effective date to allow time to adjust. This final rule has an effective date 120 days from the date of publication of the final rule when Appendix A to 49 CFR 172.101 will refer to the list of hazardous substances in 40 CFR 302.4. PHMSA's outreach program will make efforts to ensure stakeholders are aware of this change and are educated on how to navigate from the relevant provisions 49 CFR to those in 40 CFR.

III. Regulatory Analysis and Notices

A. Legal Authority

This final rule is published under the authority of the Secretary of Transportation as set forth in the Federal Hazardous Materials Transportation Laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (*Regulatory Planning and Review*), as implemented by 49 CFR part 5, subpart B, requires agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' [7] In arriving at those conclusions, E.O. 12866 requires that agencies should consider ''both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify'' and ''maximize net benefits . . . unless

[4] eCFR, available at: *https://www.ecfr.gov/*.

[5] eCFR, Reader Aids, Understanding the eCFR, available at *https://www.ecfr.gov/reader-aids/understanding-the-ecfr*.

[6] *See* note 2, *supra* (discussing 49 CFR 172.101 app. A, note 1).

[7] 58 FR 51735 (Oct. 4, 1993); 91 FR 22431 (Apr. 27, 2026); DOT Order 2100.7 (*Ensuring Reliance Upon Sound Economic Analysis in Department of Transportation Policies, Programs, and Activities*); *see also* DOT Order 2100.6B (*Policies and Procedures for Rulemakings*).

a statute requires another regulatory approach.'' E.O. 12866 also requires that ''agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.'' Pursuant to 49 CFR part 5, subpart B, PHMSA and other Operating Administrations must generally choose the ''least costly regulatory alternative that achieves the relevant objectives'' unless required by law or compelling safety need. In addition, 49 CFR part 5, subpart B specifies that regulations should generally ''not be issued unless their benefits are expected to exceed their costs.''

E.O. 12866 and 49 CFR part 5, subpart B also require that PHMSA submit ''significant regulatory actions'' to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This final rule is not a significant regulatory action pursuant to E.O. 12866 and has not been designated as a ''major rule'' as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by 49 CFR part 5, subpart B and determined this final rule will result in cost savings to the government by streamlining regulations and eliminating redundancy. The rule will also benefit the regulated public by clarifying applicability and reducing confusion.

C. Executive Orders 14192 and 14219

PHMSA has determined that this final rule is an E.O. 14192 (*Unleashing Prosperity Through Deregulation*) deregulatory action.[8] PHMSA finds the total costs of the rule on the regulated community will be less than zero. This final rule does not implicate any of the factors identified in section 2(a) of E.O. 14219 (*Ensuring Lawful Governance*) indicative of a regulation that is ''unlawful . . . [or] that undermine[s] the national interest.'' [9]

D. Energy-Related Executive Orders 13211, 14154, and 14156

PHMSA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 14156 (*Declaring a National Energy Emergency*) and E.O. 14154 (*Unleashing American Energy*).[10] The President has declared a national emergency to address America's inadequate energy development production, transportation, refining, and generation capacity and asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of ''undue burden[s]'' on the identification, development, or use of domestic energy resources. PHMSA finds this final rule to be consistent with E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products.

In addition, this final rule is not a ''significant energy action'' under E.O. 13211 (*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*), which requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' [11] Because this final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; accordingly, OIRA has not designated this final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132 (*Federalism*) and the Presidential Memorandum (*Preemption*) published in the **Federal Register** on May 22, 2009.[12] E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have ''substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.'' The Federal Hazardous Materials Transportation Laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts State, local, and Tribal requirements on certain covered subjects, unless the non-Federal requirements are ''substantively the same'' as the Federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This final rule addresses items covered in Paragraph 1 above and would preempt State, local, and Tribal requirements not meeting the ''substantively the same'' standard. Though the final rule may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this final rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (RFA) for a final rule that has been subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the final rule will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (*Proper Consideration of Small Entities in Agency Rulemaking*) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act.[13] DOT posts information on a dedicated web page to help small businesses understand and navigate Federal regulatory processes.[14] This final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The final rule will reduce burdens. Therefore, PHMSA certifies the final rule does not have a significant impact on a substantial number of small entities.

[11] 66 FR 28355 (May 22, 2001).

[12] 64 FR 43255 (Aug. 10, 1999); 74 FR 24693 (May 22, 2009).

[13] 67 FR 53461 (Aug. 16, 2002).

[14] DOT, *Rulemaking Requirements Related to Small Entities* (last accessed Sept 3, 2024), available at: *https://www.transportation.gov/regulations/rulemaking-requirements-concerning-small-entities.*

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of $100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This final rule does not impose unfunded mandates under UMRA because it does not result in costs of $100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

PHMSA has analyzed this rule pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and has determined it is categorically excluded under 23 CFR 771.117(c)(20), which applies to the promulgation of rules, regulations, and directives. Under Section 9 of DOT Order 5610.1D, PHMSA may apply a categorical exclusion (CE) established in another Operating Administration's procedures. PHMSA followed the requirements outlined in DOT Order 5610.1D to apply the Federal Highway Administration's CE to this deregulatory action. PHMSA has determined no unusual circumstances are present under 23 CFR 771.117(b). PHMSA's Categorical Exclusion Determination memo for this action is available on PHMSA's website.[15]

I. Executive Order 13175

PHMSA analyzed this final rule according to the principles and criteria in E.O. 13175 (*Consultation and Coordination with Indian Tribal Governments*) and DOT Order 5301.1A (*Department of Transportation Tribal Consultation Policies and Procedures*).[16] E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing ''substantial direct compliance costs'' or ''substantial direct effects'' on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (*Promoting International Regulatory Cooperation*) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally.[17] In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (*Improving the Nation's Cybersecurity*) directed the Federal Government to improve its efforts to identify, to deter, and to respond to ''persistent and increasingly sophisticated malicious cyber campaigns.'' [18] PHMSA has considered the effects of the final rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

M. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process better. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.* DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, and may be viewed on DOT's website at *http://www.dot.gov/privacy.*

List of Subjects

49 CFR Part 171

Definitions, Exports, Hazardous materials transportation, Hazardous waste, Imports, Reporting and recordkeeping requirements.

49 CFR Part 172

Hazardous materials transportation, Hazardous waste, Labeling, Markings, Packaging and containers, Reporting and recordkeeping requirements.

49 CFR Part 173

Hazardous materials transportation, Packaging and containers, Radioactive materials, Reporting and recordkeeping requirements.

In consideration of the foregoing, PHMSA amends 49 CFR Chapter I as follows:

[15] DOT, PHMSA, *Implementing Procedures* (Aug. 28, 2025), available at: *https://www.phmsa.dot.gov/planning-and-analytics/environmental-analysis-and-compliance/implementing-procedures.*

[18] 86 FR 26633 (May 17, 2021).

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

■ 1. The authority citation for part 171 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; Pub. L. 101–410 section 4; Pub. L. 104–134, section 31001; Pub. L. 114–74 section 701 (28 U.S.C. 2461 note); 49 CFR 1.81 and 1.97.

■ 2. In § 171.8, revise the definitions for ''hazardous substance'' and ''reportable quantity'' in alphabetical order to read as follows:

§ 171.8 Definitions and abbreviations.

* * * * *

Hazardous substance for the purposes of this subchapter, means a material, including its mixtures and solutions, that—

(1) Is listed in 40 CFR 302.4, as referenced in appendix A to § 172.101 of this subchapter;

(2) Is in a quantity, in one package, which equals or exceeds the reportable quantity (RQ) listed in the 40 CFR 302.4 as referenced in appendix A to § 172.101 of this subchapter; and

(3) When in a mixture or solution—

(i) For radionuclides, the following requirements shall be used in determining if a package contains an RQ of a hazardous substance: (a) if the identity and quantity (in curies or terabecquerels) of each radionuclide in a mixture or solution is known, the ratio between the quantity per package (in curies or terabecquerels) and the RQ for the radionuclide must be determined for each radionuclide. A package contains an RQ of a hazardous substance when the sum of the ratios for the radionuclides in the mixture or solution is equal to or greater than one; (b) if the identity of each radionuclide in a mixture or solution is known but the quantity per package (in curies or terabecquerels) of one or more of the radionuclides is unknown, an RQ of a hazardous substance is present in a package when the total quantity (in curies or terabecquerels) of the mixture or solution is equal to or greater than the lowest RQ of any individual radionuclide in the mixture or solution; and (c) if the identity of one or more radionuclides in a mixture or solution is unknown (or if the identity of a radionuclide by itself is unknown), an RQ of a hazardous substance is present when the total quantity (in curies or terabecquerels) in a package is equal to or greater than either one curie or the lowest RQ of any known individual radionuclide in the mixture or solution, whichever is lower.

(ii) For other than radionuclides, is in a concentration by weight which equals or exceeds the concentration corresponding to the RQ of the material, as shown in the following table:

RQ pounds (kilograms)	Concentration by weight	
	Percent	PPM
5,000 (2,270)	10	100,000
1,000 (454)	2	20,000
100 (45.4)	0.2	2,000
10 (4.54)	0.02	200
1 (0.454)	0.002	20

(iii) The term does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance in 40 CFR 302.4, as referenced in appendix A to § 172.101 of this subchapter, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).

* * * * *

Reportable quantity (RQ) for the purposes of this subchapter, means the final RQ specified for each hazardous substance identified in 40 CFR 302.4, as referenced in appendix A to § 172.101 of this subchapter.

* * * * *

PART 172—HAZARDOUS MATERIALS TABLE, SPECIAL PROVISIONS, HAZARDOUS MATERIALS COMMUNICATIONS, EMERGENCY RESPONSE INFORMATION, AND TRAINING REQUIREMENTS

■ 3. The authority citation for part 172 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96, and 1.97.

■ 4. In § 172.101, revise ''Appendix A to § 172.101—List of Hazardous Substances and Reportable Quantities'' to read as follows:

§ 172.101 Purpose and use of the hazardous materials table.

* * * * *

Appendix A to § 172.101—List of Hazardous Substances and Reportable Quantities.

Refer to 40 CFR 302.4 to see the list of hazardous substances and their reportable quantities (RQs) in Table 302.4. The list includes an Appendix B to § 302.4 for radionuclides and their adjusted RQs.

* * * * *

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

■ 5. The authority citation for part 173 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96, and 1.97.

■ 6. In § 173.29, revise paragraph (h) to read as follows:

§ 173.29 Empty packagings.

* * * * *

(h) A package that contains a residue of a hazardous substance, Class 9, that does not meet the definition of another hazard class and is not a hazardous waste or marine pollutant, may remain marked, labeled and, if applicable, placarded in the same manner as when it contained a greater quantity of the material even though it no longer meets the definition in § 171.8 of this subchapter for a hazardous substance.

Issued in Washington, DC, on July 31, 2026, under the authority delegated in 49 CFR 1.97.

Paul J. Roberti,

Administrator, Pipeline and Hazardous Materials Safety Administration.

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Parts 171 and 173

[Docket No. PHMSA–2025–0101 (HM–268M)]

RIN 2137–AG15

Hazardous Materials: Adoption of Department of Transportation Special Permit 21287

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule removes undue regulatory burdens by adopting the provisions of U.S Department of Transportation (DOT) special permit (SP) 21287 to streamline the transportation of refrigerating machines—including common household appliances like refrigerators, window-mounted air-conditioning units, and dehumidifiers—that contain small quantities of certain low flammability refrigerant gases.

DATES: *Effective date:* This final rule is effective August 19, 2026.

Incorporation by reference date: The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of August 19, 2026.

The incorporation by reference of certain other material listed in the rule

was approved by the Director of the Federal Register as of January 1, 2004.

FOR FURTHER INFORMATION CONTACT: Candace Casey, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–8553, *candace.casey@dot.gov.*

I. PHMSA Action

A. What action is PHMSA taking in this final rule?

PHMSA is adopting the provisions of DOT SP 21287 into the Hazardous Materials Regulations (HMR; 49 CFR parts 171–180) by revising 49 CFR 173.307(a)(4) to provide an exception for the transportation of refrigerating machines containing certain low flammability refrigerant gases (*i.e.,* refrigerants). This revision expands the existing exception to include refrigerating machines that use a refrigerant that is a Category 1B refrigerant as specified in the Globally Harmonized System (GHS) of Classification and Labelling of Chemicals (which PHMSA is incorporating by reference) or a Group A2L refrigerant as specified in American National Standards Institute/American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ANSI/ASHRAE) Standard 34. PHMSA is also incorporating by reference ANSI/ASHRAE Standard 34–2024, ''*Designation and Safety Classification of Refrigerants,*'' which refers users to the list of flammable gases eligible for this exception.

B. Does this action apply to me?

Effective 15 days after publication of this final rule, offerors and carriers of affected refrigerating machines may begin to transport these products in accordance with the exceptions in 49 CFR 173.307 without expending the time and resources associated with obtaining special permit.

C. Why is PHMSA taking this action?

PHMSA is taking this action in response to commenter feedback and to provide relief to stakeholders by allowing the transportation of refrigerating machines containing certain flammable gases by adopting the provisions in DOT SP 21287. This change facilitates the transportation of refrigerating machines affected by the American Innovation and Manufacturing (AIM) Act, which required manufacturers to transition away from certain hydrofluorocarbon (HFC) refrigerants and replace them with refrigerants that were regarded as less damaging to the environment.[1] This action allows the HMR to account better for the more widespread use of certain refrigerants following the new requirements imposed by the AIM Act. PHMSA is also taking this action as part of its ongoing review of special permits that are appropriate for adoption into the HMR based on their safety record and positive impact on stakeholders.

II. Incorporation by Reference Discussion Under 1 CFR Part 51

According to the Office of Management and Budget (OMB), Circular A–119, *Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities,* government agencies must use voluntary consensus standards wherever practical in the development of regulations.

PHMSA currently incorporates by reference into the HMR all or parts of numerous standards and specifications developed and published by standard development organizations (SDO). In general, SDOs update and revise their published standards every two to five years to reflect modern technology and best technical practices. The National Technology Transfer and Advancement Act of 1995 (NTTAA; Pub. L. 104–113) directs Federal agencies to use standards developed by voluntary consensus standards bodies in lieu of government-written standards whenever possible. Voluntary consensus standards bodies develop, establish, or coordinate technical standards using agreed-upon procedures. OMB issued Circular A–119 to implement section 12(d) of the NTTAA relative to the utilization of consensus technical standards by Federal agencies. This circular provides guidance for agencies participating in voluntary consensus standards bodies and describes procedures for satisfying the reporting requirements in the NTTAA. Accordingly, PHMSA is responsible for determining which standards currently referenced in the HMR should be updated, revised, or removed, and which standards should be added to the HMR. Revisions to materials incorporated by reference in the HMR are handled via the rulemaking process, which allows for the public and regulated entities to provide input.

During the rulemaking process, PHMSA must also obtain approval from the Office of the Federal Register to incorporate by reference any new materials. The Office of the Federal Register issued a rulemaking that revised 1 CFR 51.5 to require that an agency detail in the preamble of a notice of proposed rulemaking (NPRM) the ways the materials it proposes to incorporate by reference are reasonably available to interested parties, or how the agency worked to make those materials reasonably available to interested parties.[2]

In this final rule, PHMSA is incorporating by reference ANSI/ASHRAE Standard 34–2024, ''*Designation and Safety Classification of Refrigerants,* copyright 2024, including addenda approved through August 30, 2024,'' ANSI/ASHRAE Standard 34–2024 establishes a uniform system for assigning unambiguous reference numbers, safety classifications (based on toxicity and flammability), and refrigerant concentration limits to refrigerants. This document is available for viewing at: *https://www.ashrae.org/technical-resources/standards-and-guidelines/read-only-versions-of-ashrae-standards.* PHMSA is also incorporating by reference Globally Harmonized System of Classification and Labelling of Chemicals, 9th Revised Edition, ST/SG/AC.10/30/Rev.9 (2021). This document serves as the international standard for defining and classifying chemical hazards (physical, health, and environmental) and communicating safety information through harmonized labels and Safety Data Sheets (SDS). ANSI/ASHRAE Standard 34–2024 and the Globally Harmonized System of Classification and Labelling of Chemicals, 9th Revised Edition can be reasonably obtained by interested parties through the applicable publisher contact information listed in § 171.7.

ANSI/ASHRAE Standard 15–1994 is referenced in §§ 171.7 and 173.307 of this document but was previously approved for those sections.

III. Summary of Comments Received in Response to the Notice of Proposed Rulemaking

PHMSA published an NPRM, cited as *HM–268M,* to gather feedback on adopting the provisions of DOT SP 21287 into the HMR.[3] Please refer to the NPRM for background and discussion of the proposed change.

The following table alphabetically lists commenters to the NPRM:

[1] 42 U.S.C. 7675 (2020).

[2] 79 FR 66278 (Nov. 7, 2014).

[3] 90 FR 28548 (Jul. 1, 2025).

TABLE 1—COMMENTERS TO THE NPRM

Commenter name	Docket No.
American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE)	PHMSA–2025–0101–0003
Council on Safe Transportation of Hazardous Articles, Inc. (COSTHA)	PHMSA–2025–0101–0004
Dangerous Goods Advisory Council	PHMSA–2025–0101–0005

All commenters were supportive of the proposed amendment to facilitate the streamlined ground transportation of refrigerating machines containing low flammability gases. However, some commenters had additional questions or suggestions related to the NPRM proposal.

First, ASHRAE expressed support for the proposed amendments but requested that PHMSA incorporate by reference the 2024 editions of both ANSI/ASHRAE Standards 15 and 34 in the relevant sections of the HMR. With respect to ANSI/ASHRAE Standard 15, *Safety Code for Mechanical Refrigeration,* PHMSA did not propose any changes to its current incorporation by reference and—therefore—the suggested change is considered beyond the scope of this rulemaking. However, PHMSA will consider this recommendation in a future rulemaking. With respect to ANSI/ASHRAE Standard 34, though the NPRM did not propose to incorporate by reference the 2024 edition, PHMSA agrees with ASHRAE that using this more recent version to include additional refrigerants that would otherwise not be eligible if the 2019 edition were incorporated by reference is appropriate. Moreover, PHMSA sees no safety concern with incorporating by reference the 2024 edition of ANSI/ASHRAE Standard 34 (instead of the proposed 2019 edition) for determination of eligible refrigerants.

Second, while supportive of the proposed amendments, COSTHA notes the provisions are limited to highway and rail only, and do not facilitate the transport of refrigerating machines to remote areas in the United States (*i.e.,* certain areas in Alaska) where air service is the only practical means of transportation. Similarly, COSTHA asked whether PHMSA intends to allow—or continue to restrict—vessel transportation under the exceptions for refrigerating machines. PHMSA recognizes that continuing to limit eligibility for exceptions to transportation by highway and rail may complicate the logistics of transporting these items to remote areas. However, PHMSA notes that, given the limited experience authorizing these items for vessel and air transportation, it is more appropriate at this time to continue permitting such transportation on a case-by-case basis through special permits, rather than codifying a general provision applicable to all modes. Once PHMSA gets more experience with these non-ground modes, we may consider this recommendation in a future rulemaking.

For these reasons, PHMSA is revising 49 CFR 173.307 to except from the HMR refrigerating machines containing up to 20 kg (44 pounds) of a flammable, non-toxic gas, classified as Category 1B in accordance with GHS or classified as an A2L refrigerant as specified in ANSI/ASHRAE Standard 34. PHMSA is also incorporating by reference ANSI/ASHRAE Standard 34 into 49 CFR 171.7 and referencing it in 49 CFR part 173.307.

One additional editorial note. At the proposed rule stage, PHMSA inadvertently omitted a cross-reference to 49 CFR 173.307 for the GHS Classification and Labelling of Chemicals publication in 49 CFR 171.7(dd)(3). Importantly, PHMSA included the full intent in the preamble and the substantive proposed regulatory text was correctly placed in 49 CFR 173.307. This text would add GHS criteria for Category 1B as an alternative criterion for eligibility for exception. PHMSA therefore asserts this additional editorial cross-reference revision to 49 CFR 171.7(dd)(3) is within the scope of this final rule and does not create a substantive amendment.

IV. Regulatory Analysis and Notices

A. Legal Authority

This final rule is published under the authority of the Secretary of Transportation as set forth in the Federal Hazardous Materials Transportation laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (*Regulatory Planning and Review*), as implemented by 49 CFR part 5, subpart B, requires agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' [4] In arriving at those conclusions, E.O. 12866 requires that agencies should consider ''both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify'' and ''maximize net benefits . . . unless a statute requires another regulatory approach.'' E.O. 12866 also requires that ''agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.'' Pursuant to 49 CFR part 5, subpart B, PHMSA and other Operating Administrations must generally choose the ''least costly regulatory alternative that achieves the relevant objectives'' unless required by law or compelling safety need. In addition, 49 CFR part 5, subpart B specifies that regulations should generally ''not be issued unless their benefits are expected to exceed their costs.''

E.O. 12866 and 49 CFR part 5, subpart B also require that PHMSA submit ''significant regulatory actions'' to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This final rule is not a significant regulatory action pursuant to E.O. 12866 and has not been designated as a ''major rule'' as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by 49 CFR part 5, subpart B and determined that this final rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for shippers of refrigerating machines by allowing for their transportation without the need for a special permit. Those cost savings may also result in reduced costs for the public to whom those entities generally transfer a portion of their compliance costs. In addition, the final rule will produce cost savings for the Federal Government, hence taxpayers, due to

[4] 58 FR 51735 (Oct. 4, 1993); 91 FR 22431 (Apr. 27, 2026); DOT Order 2100.7 (*Ensuring Reliance Upon Sound Economic Analysis in Department of Transportation Policies, Programs, and Activities*); *see also* DOT Order 2100.6B (*Policies and Procedures for Rulemakings*).

the reduction of special permit applications that would otherwise need to be processed by PHMSA personnel.

C. Executive Orders 14192 and 14219

PHMSA has determined that this final rule is an E.O. 14192 (*Unleashing Prosperity Through Deregulation*) deregulatory action.[5] PHMSA finds the total costs of the rule on the regulated community will be less than zero. This final rule does not implicate any of the factors identified in section 2(a) of E.O. 14219 (*Ensuring Lawful Governance*) indicative of a regulation that is ''unlawful . . . [or] that undermine[s] the national interest.''[6]

D. Energy-Related Executive Orders 13211, 14154, and 14156

PHMSA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 14156 (*Declaring a National Energy Emergency*) and E.O. 14154 (*Unleashing American Energy*).[7] The President has declared a national emergency to address America's inadequate energy development production, transportation, refining, and generation capacity and asserted a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from, *inter alia* the removal of ''undue burden[s]'' on the identification, development, or use of domestic energy resources. PHMSA finds this final rule to be consistent with E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products.

In addition, this final rule is not a ''significant energy action'' under E.O. 13211 (*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*), which requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.''[8] Because this final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; accordingly, OIRA has therefore not designated this final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132 (*Federalism*) and the Presidential Memorandum (*Preemption*) published in the **Federal Register** on May 22, 2009.[9] E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have ''substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.'' The Federal Hazardous Materials Transportation laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts State, local, and Tribal requirements on certain covered subjects, unless the non-Federal requirements are ''substantively the same'' as the Federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This final rule addresses a covered subject item listed in Paragraph (1) above and would preempt State, local, and Tribal requirements not meeting the ''substantively the same'' standard. Though the final rule may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this final rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to complete a Final Regulatory Flexibility Analysis (FRFA) for a final rule that has been subject to notice-and-comment rulemaking under the Administrative Procedure Act unless the agency head certifies that the final rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. Executive Order 13272 (*Proper Consideration of Small Entities in Agency Rulemaking*) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act.[10] PHMSA developed this final rule in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. Because the final rule is expected to reduce burdens, PHMSA certifies that it does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of $100 million or more (in 1996 dollars) in any given year, the agency must prepare, among other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This final rule does not impose unfunded mandates under UMRA because it does not result in costs of $100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

PHMSA has analyzed this rule pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and has determined it is categorically excluded under 23 CFR 771.117(c)(20), which applies to the promulgation of rules, regulations, and directives. Under section 9 of DOT Order 5610.1D, PHMSA may apply a categorical exclusion (CE) established in another Operating Administration's procedures. PHMSA followed the requirements outlined in DOT Order 5610.1D to apply the Federal Highway Administration's CE to this deregulatory action. PHMSA has determined no unusual circumstances are present under 23 CFR 771.117(b). PHMSA's

[5] 90 FR 9065 (Feb. 6, 2025).

[6] 90 FR 10583 (Feb. 25, 2025).

[7] 90 FR 8433 and 90 FR 8353 (Jan. 29, 2025).

[8] 66 FR 28355 (May 22, 2001).

[9] 64 FR 43255 (Aug. 10, 1999); 74 FR 24693 (May 22, 2009).

[10] 67 FR 53461 (Aug. 16, 2002).

Categorical Exclusion Determination memo for this action is available on PHMSA's website.[11]

I. Executive Order 13175

PHMSA analyzed this final rule according to the principles and criteria in E.O. 13175 (*Consultation and Coordination with Indian Tribal Governments*) and DOT Order 5301.1A (*Department of Transportation Tribal Consultation Policies and Procedures*).[12] E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing ''substantial direct compliance costs'' or ''substantial direct effects'' on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the final rule and determined it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires PHMSA to provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections. However, this rulemaking eliminates the need for persons to renew a special permit, resulting in a decrease in paperwork burden for special permit holders. PHMSA estimates the reduction in information collection burden as follows:

OMB Control No. 2137–0051: Rulemaking, Special Permits, and Preemption Requirements.

Decrease in Annual Number of Respondents: 12.

Decrease in Annual Responses: 12.

Decrease in Annual Burden Hours: 17.

Decrease in Annual Burden Cost: $0.

Please direct your requests for a copy of this information collection to Steven Andrews, Office of Hazardous Materials Standards (PHH–12), Pipeline and Hazardous Materials Safety Administration, 1200 New Jersey Avenue SE, 2nd Floor, Washington, DC 20590–0001.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (*Promoting International Regulatory Cooperation*) requires agencies to consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally.[13] In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (*Improving the Nation's Cybersecurity*) directed the Federal Government to improve its efforts to identify, to deter, and to respond to ''persistent and increasingly sophisticated malicious cyber campaigns.'' [14] PHMSA has considered the effects of the final rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

M. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process better. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.* DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, or on DOT's website at *http://www.dot.gov/privacy.*

N. National Technology Transfer and Advancement Act

The National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) directs Federal agencies to use voluntary consensus standards in their regulatory activities unless doing so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.,* specification of materials, test methods, or performance requirements) that are developed or adopted by voluntary consensus standard bodies. This rulemaking involves a voluntary consensus standard.

List of Subjects

49 CFR Part 171

Exports, Hazardous materials transportation, Hazardous waste, Imports, Incorporation by reference, Reporting and recordkeeping requirements, Definitions and abbreviations.

49 CFR Part 173

Hazardous materials transportation, Incorporation by reference, Training, Packaging and containers, Reporting and recordkeeping requirements.

In consideration of the foregoing, PHMSA amends 49 CFR Chapter I as follows:

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

■ 1. The authority citation for part 171 continues to read as follows:

[11] DOT, *Implementing Procedures for Considering Environmental Impacts* (Aug. 28, 2025), available at *https://www.phmsa.dot.gov/planning-and-analytics/environmental-analysis-and-compliance/implementing-procedures.*

[12] 65 FR 67249 (Nov. 9, 2000).

[13] 77 FR 26413 (May 4, 2012).

[14] 86 FR 26633 (May 17, 2021).

Authority: 49 U.S.C. 5101–5128, 44701; Pub. L. 101–410 section 4; Pub. L. 104–134, section 31001; Pub. L. 114–74 section 701 (28 U.S.C. 2461 note); 49 CFR 1.81 and 1.97.

■ 2. Amend § 171.7 by:
■ a. Revising paragraph (d);
■ b. Redesignating paragraphs (g) and (h) as paragraphs (h) and (i);
■ c. Adding new paragraph (g); and
■ d. Revising paragraph (dd) introductory text and paragraph (dd)(3).

The revisions and addition read as follows:

§ 171.7 Reference material.

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Parts 171 and 173

[Docket No. PHMSA–2025–0102 (HM–268N)]

RIN 2137–AG16

Hazardous Materials: Adoption of Department of Transportation Special Permit 21379

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule removes undue regulatory burdens by adopting the provisions of U.S. Department of Transportation (DOT) special permit (SP) 21379 to streamline the transportation of refrigerating machines and components containing certain low flammability refrigerant gases.

DATES:

Effective date: This final rule is effective September 3, 2026.

Incorporation by reference date: The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of September 3, 2026.

The incorporation by reference of certain other material listed in the rule was approved by the Director of the Federal Register as of January 1, 2004 and December 28, 2020.

FOR FURTHER INFORMATION CONTACT: Candace Casey, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–8553, *candace.casey@dot.gov.*

I. PHMSA Action

A. What action is PHMSA taking in this final rule?

PHMSA is adopting the provisions of DOT SP 21379 into the Hazardous Materials Regulations (HMR; 49 CFR parts 171–180) by revising 49 CFR 173.306 to streamline the transportation of refrigerating machines containing certain low flammability refrigerant gases (*i.e.,* refrigerants). This revision allows up to 5,000 lbs. of low flammability refrigerants in refrigerating machines if they are a Category 1B refrigerant as specified in the Globally Harmonized System (GHS) of Classification and Labelling of Chemicals (which PHMSA is incorporating by reference) or a Group A2L refrigerant as specified in American National Standards Institute/American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ANSI/ASHRAE) Standard 34. PHMSA is also incorporating by reference ANSI/ASHRAE Standard 34–2024, *Designation and Safety Classification of Refrigerants,* which refers users to the list of flammable gases eligible for this exception.

B. Does this action apply to me?

Effective 30 days after publication of this final rule, offerors and carriers of affected refrigerating machines may begin to transport these products in accordance with the exceptions in 49 CFR 173.306 without expending the time and resources associated with obtaining a special permit.

C. Why is PHMSA taking this action?

PHMSA is taking this action in response to commenter feedback and to

streamline the transportation of refrigerating machines, or their components, containing certain flammable gases by adopting the provisions in DOT SP 21379. This change facilitates the transport of large refrigerating machines affected by the American Innovation and Manufacturing (AIM) Act, which required manufacturers to transition away from certain hydrofluorocarbon (HFC) refrigerants and replace them with refrigerants that were regarded as less damaging to the environment.[1] This action allows the HMR to account better for the more widespread use of certain refrigerants following the new requirements imposed by the AIM Act. PHMSA is also taking this action as part of its ongoing review of special permits that are appropriate for adoption into the HMR based on their safety record and positive impact on stakeholders.

II. Incorporation by Reference Discussion Under 1 CFR Part 51

According to the Office of Management and Budget (OMB), Circular A–119, *Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities,* government agencies must use voluntary consensus standards wherever practical in the development of regulations.

PHMSA currently incorporates by reference into the HMR all or parts of numerous standards and specifications developed and published by standards development organizations (SDO). In general, SDOs update and revise their published standards every two to five years to reflect modern technology and best technical practices. The National Technology Transfer and Advancement Act of 1995 (NTTAA; Pub. L. 104–113) directs Federal agencies to use standards developed by voluntary consensus standards bodies in lieu of government-written standards whenever possible. Voluntary consensus standards bodies develop, establish, or coordinate technical standards using agreed-upon procedures. OMB issued Circular A–119 to implement section 12(d) of the NTTAA relative to the utilization of consensus technical standards by Federal agencies. This circular provides guidance for agencies participating in voluntary consensus standards bodies and describes procedures for satisfying the reporting requirements in the NTTAA. Accordingly, PHMSA is responsible for determining which standards currently referenced in the HMR should be updated, revised, or removed, and which standards should be added to the HMR. Revisions to materials incorporated by reference in the HMR are handled via the rulemaking process, which allows for the public and regulated entities to provide input.

During the rulemaking process, PHMSA must also obtain approval from the Office of the Federal Register to incorporate by reference any new materials. The Office of the Federal Register issued a rulemaking that revised 1 CFR 51.5 to require that an agency detail in the preamble of a notice of proposed rulemaking (NPRM) the ways the materials it proposes to incorporate by reference are reasonably available to interested parties, or how the agency worked to make those materials reasonably available to interested parties.[2] In this final rule, PHMSA is incorporating by reference ANSI/ASHRAE Standard 34–2024, ''*Designation and Safety Classification of Refrigerants,* copyright 2024, including addenda approved through August 30, 2024.'' ANSI/ASHRAE Standard 34–2024 establishes a uniform system for assigning unambiguous reference numbers, safety classifications (based on toxicity and flammability), and refrigerant concentration limits to refrigerants. This document is available for viewing at: *https://www.ashrae.org/technical-resources/standards-and-guidelines/read-only-versions-of-ashrae-standards.* Documents are available for purchase at the ASHRAE bookstore at: *https://store.accuristech.com/ashrae/ashrae_standards.html.*

PHMSA is also incorporating by reference Globally Harmonized System of Classification and Labelling of Chemicals, 9th Revised Edition, ST/SG/AC.10/30/Rev.9 (2021). This document serves as the international standard for defining and classifying chemical hazards (physical, health, and environmental) and communicating safety information through harmonized labels and Safety Data Sheets (SDS). ANSI/ASHRAE Standard 34–2024 and the Globally Harmonized System of Classification and Labelling of Chemicals, 9th Revised Edition can be reasonably obtained by interested parties through the applicable publisher contact information listed in § 171.7.

The following standards appear in the amendatory text of this document and were previously approved for the locations in which they appear: ANSI/ASHRAE Standard 15–1994 and Section VIII of the ASME Code.

III. Summary of Comments Received in Response to the Notice of Proposed Rulemaking

PHMSA published an NPRM, cited as *HM–268N,* to gather feedback on adopting the provisions of DOT SP 21379 into the HMR.[3] Please refer to the NPRM for background and discussion of the proposed change.

The following table alphabetically lists commenters to the NPRM:

Commenter name	Docket No.
American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE)	PHMSA–2025–0102–0004
Anonymous	PHMSA–2025–0102–0002
Council on Safe Transportation of Hazardous Articles, Inc. (COSTHA)	PHMSA–2025–0102–0005
Dangerous Goods Advisory Council	PHMSA–2025–0102–0006

PHMSA received four sets of comments in response to the NPRM, and the comments were largely supportive of the amendments as proposed. However, some commenters had additional questions or suggestions related to the NPRM proposal.

First, ASHRAE expressed support for the proposed amendments but requested that PHMSA incorporate by reference the 2024 editions of both ANSI/ASHRAE Standards 15 and 34 in the relevant sections of the HMR. With respect to ANSI/ASHRAE Standard 15, *Safety Code for Mechanical Refrigeration,* PHMSA did not propose any changes to its current incorporation by reference and—therefore—the suggested change is considered beyond the scope of this rulemaking. However, PHMSA will consider this recommendation in a future rulemaking. With respect to ANSI/ASHRAE Standard 34, though the NPRM did not propose to incorporate by reference the 2024 edition, PHMSA agrees that using this more recent version to include additional refrigerants that would otherwise not be eligible if the 2019 edition were incorporated by reference

[1] 42 U.S.C. 7675 (2020).

[2] 79 FR 66278 (Nov. 7, 2014).

[3] 90 FR 28552 (Jul. 1, 2025).

is appropriate. Moreover, PHMSA sees no safety concern with incorporating by reference the 2024 edition of ANSI/ASHRAE Standard 34 (instead of the proposed 2019 edition) for determination of eligible refrigerants.

Second, while supportive of the proposed amendments, COSTHA notes the provisions are limited to highway and rail only and may impact transporting refrigerating machines to remote areas in the United States (*i.e.,* certain areas in Alaska) where air service is the only practical means of transportation. Similarly, COSTHA asked whether PHMSA intends to allow—or continue to restrict—vessel transportation under the exceptions for refrigerating machines. PHMSA recognizes that continuing to limit eligibility for exceptions to transportation by highway and rail may complicate the logistics of transporting these items to remote areas. However, PHMSA notes that, given the limited experience authorizing these items for vessel and air transportation, it is more appropriate at this time to continue permitting such transportation on a case-by-case basis through special permits, rather than codifying a general provision applicable to all modes. Once PHMSA gets more experience with these non-ground modes, we may consider this recommendation in a future rulemaking.

Lastly, an anonymous commenter recommended that PHMSA prohibit the manufacture, use, and transportation of ''Group A1'' refrigerants, and instead promote ''more environmentally friendly products.'' Although PHMSA regulates the transportation of hazardous materials such as the refrigerants at issue here, PHMSA notes that the ability to prohibit the manufacture and use of any substance is beyond the scope of our Agency's authority.

For these reasons, PHMSA is revising 49 CFR 173.306 to allow up to 5,000 lbs. of a flammable, non-toxic gas, classified Category 1B in accordance with GHS or classified as an A2L refrigerant as specified in ANSI/ASHRAE Standard 34. PHMSA is also incorporating by reference ANSI/ASHRAE Standard 34 into 49 CFR 173.306.

Two additional editorial notes. First, at the proposed rule stage, PHMSA inadvertently omitted a cross-reference to 49 CFR 173.306 for the GHS Classification and Labelling of Chemicals publication in 49 CFR 171.7(dd)(3). Importantly, PHMSA included the full intent in the preamble and the substantive proposed regulatory text was correctly placed in 49 CFR 173.306. This text would add GHS criteria for Category 1B as an alternative criterion for eligibility for exception. PHMSA has determined that this additional editorial cross-reference revision to 49 CFR 171.7(dd)(3) is within the scope of this final rule and does not create a substantive amendment. Second, note also that the NPRM discussed the incorporation by reference of the 7th revised edition of the GHS of Classification and Labelling of Chemicals which was a typo. PHMSA meant the 9th revised edition, as the 9th revised edition is the correct version and is already incorporated by reference in the HMR.

IV. Regulatory Analysis and Notices

A. Legal Authority

This final rule is published under the authority of the Secretary of Transportation as set forth in the Federal Hazardous Materials Transportation laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (*Regulatory Planning and Review*), as implemented by 49 CFR part 5, subpart B, requires agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' [4] In arriving at those conclusions, E.O. 12866 requires that agencies should consider ''both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify'' and ''maximize net benefits . . . unless a statute requires another regulatory approach.'' E.O. 12866 also requires that ''agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.'' Pursuant to 49 CFR part 5, subpart B, PHMSA and other Operating Administrations must generally choose the ''least costly regulatory alternative that achieves the relevant objectives'' unless required by law or compelling safety need. In addition, 49 CFR part 5, subpart B specifies that regulations should generally ''not be issued unless their benefits are expected to exceed their costs.''

E.O. 12866 and 49 CFR part 5, subpart B also require that PHMSA submit ''significant regulatory actions'' to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This final rule is not a significant regulatory action pursuant to E.O. 12866 and has not been designated as a ''major rule'' as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by 49 CFR part 5, subpart B, and determined that this final rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for shippers of refrigerating machines by allowing for their transportation without the need for a special permit. Those cost savings may also result in reduced costs for the public to whom those entities generally transfer a portion of their compliance costs. In addition, the final rule will produce cost savings for the Federal Government, hence taxpayers, due to the reduction of special permit applications that would otherwise need to be processed by PHMSA personnel.

C. Executive Orders 14192 and 14219

PHMSA has determined that this final rule is an E.O. 14192 (*Unleashing Prosperity Through Deregulation*) deregulatory action.[5] PHMSA finds the total costs of the rule on the regulated community will be less than zero. This final rule does not implicate any of the factors identified in section 2(a) of E.O. 14219 (*Ensuring Lawful Governance*) indicative of a regulation that is ''unlawful . . .[or] that undermine[s] the national interest.'' [6]

D. Energy-Related Executive Orders 13211, 14154, and 14156

PHMSA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 14156 (*Declaring a National Energy Emergency*) and E.O. 14154 (*Unleashing American Energy*).[7] The President has declared a national emergency to address America's inadequate energy development production, transportation, refining, and generation capacity and asserted a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from, *inter alia,* the removal of ''undue burden[s]'' on the

[4] 58 FR 51735 (Oct. 4, 1993); 91 FR 22431 (Apr. 27, 2026); DOT Order 2100.7 (*Ensuring Reliance Upon Sound Economic Analysis in Department of Transportation Policies, Programs, and Activities*); *see also* DOT Order 2100.6B (*Policies and Procedures for Rulemakings*).

[5] 90 FR 9065 (Feb. 6, 2025).

[6] 90 FR 10583 (Feb. 25, 2025).

[7] 90 FR 8433 (Jan. 29, 2025); 90 FR 8353 (Jan. 29, 2025).

identification, development, or use of domestic energy resources. PHMSA finds this final rule to be consistent with E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products.

In addition, this final rule is not a ''significant energy action'' under E.O. 13211 (*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*), which requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' [8] Because this final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; accordingly, OIRA has not designated this final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132 (*Federalism*) and the Presidential Memorandum (*Preemption*) published in the **Federal Register** on May 22, 2009.[9] E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have ''substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.'' The Federal Hazardous Materials Transportation laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts State, local, and Tribal requirements on certain covered subjects, unless the non-Federal requirements are ''substantively the same'' as the Federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This final rule addresses a covered subject listed in Paragraph (1) above and would preempt State, local, and Tribal requirements not meeting the ''substantively the same'' standard. Though the final rule may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this final rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a final rule that has been subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the final rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (*Proper Consideration of Small Entities in Agency Rulemaking*) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act.[10] DOT posts information on a dedicated web page to help small businesses understand and navigate Federal regulatory processes.[11] PHMSA developed this final rule in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. Because the final rule is expected to reduce burdens, PHMSA certifies that it does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of $100 million or more (in 1996 dollars) in any given year, the agency must prepare, among other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This final rule does not impose unfunded mandates under UMRA because it does not result in costs of $100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

PHMSA has analyzed this rule pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and has determined it is categorically excluded under 23 CFR 771.117(c)(20), which applies to the promulgation of rules, regulations, and directives. Under Section 9 of DOT Order 5610.1D, PHMSA may apply a categorical exclusion (CE) established in another Operating Administration's procedures. PHMSA followed the requirements outlined in DOT Order 5610.1D to apply the Federal Highway Administration's CE to this deregulatory action. PHMSA has determined no unusual circumstances are present under 23 CFR 771.117(b). PHMSA's Categorical Exclusion Determination memo for this action is available on PHMSA's website.[12]

I. Executive Order 13175

PHMSA analyzed this final rule according to the principles and criteria in E.O. 13175 (*Consultation and Coordination with Indian Tribal Governments*) and DOT Order 5301.1A (*Department of Transportation Tribal Consultation Policies and Procedures*).[13] E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing ''substantial direct compliance costs'' or ''substantial direct effects'' on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's

[8] 66 FR 28355 (May 22, 2001).

[9] 64 FR 43255 (Aug. 10, 1999); 74 FR 24693 (May 22, 2009).

[10] 67 FR 53461 (Aug. 16, 2002).

[11] DOT, *Rulemaking Requirements Related to Small Entities* (last accessed Sept 3, 2024), available at: *https://www.transportation.gov/regulations/rulemaking-requirements-concerning-small-entities.*

[12] DOT, *Implementing Procedures for Considering Environmental Impacts* (Aug. 28, 2025), available at *https://www.phmsa.dot.gov/planning-and-analytics/environmental-analysis-and-compliance/implementing-procedures.*

[13] 65 FR 67249 (Nov. 9, 2000).

regulatory amendments have a broad, national scope; therefore, this final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) require that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections. However, this rulemaking eliminates the need for persons to renew a special permit, resulting in a decrease in paperwork burden for special permit holders. PHMSA estimates the reduction in information collection burden as follows:

OMB Control No. 2137–0051: Rulemaking, Special Permits, and Preemption Requirements.

Decrease in Annual Number of Respondents: 10.

Decrease in Annual Responses: 10.

Decrease in Annual Burden Hours: 14.

Decrease in Annual Burden Cost: $0.

Please direct your requests for a copy of this information collection to Steven Andrews, Office of Hazardous Materials Standards (PHH–12), Pipeline and Hazardous Materials Safety Administration, 1200 New Jersey Avenue SE, 2nd Floor, Washington, DC 20590–0001.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (*Promoting International Regulatory Cooperation*) requires agencies to consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American businesses to export and compete internationally.[14] In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (*Improving the Nation's Cybersecurity*) directed the Federal Government to improve its efforts to identify, to deter, and to respond to ''persistent and increasingly sophisticated malicious cyber campaigns.'' [15] PHMSA has considered the effects of the final rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

M. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process better. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.* DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, or on DOT's website at *http://www.dot.gov/privacy.*

N. National Technology Transfer and Advancement Act

The National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) directs Federal agencies to use voluntary consensus standards in their regulatory activities unless doing so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.,* specification of materials, test methods, or performance requirements) that are developed or adopted by voluntary consensus standard bodies. This rulemaking involves a voluntary consensus standard.

List of Subjects

49 CFR Part 171

Exports, Hazardous materials transportation, Hazardous waste, Imports, Incorporation by reference, Reporting and recordkeeping requirements, Definitions and abbreviations.

49 CFR Part 173

Hazardous materials transportation, Incorporation by reference, Training, Packaging and containers, Reporting and recordkeeping requirements.

In consideration of the foregoing, PHMSA amends 49 CFR Chapter I as follows:

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

■ 1. The authority citation for part 171 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; Pub. L. 101–410 section 4; Pub. L. 104–134, section 31001; Pub. L. 114–74 section 4 (28 U.S.C. 2461 note); 49 CFR 1.81 and 1.97.

■ 2. In § 171.7, revise paragraphs (g)(2) and (dd)(3) to read as follows:

§ 171.7 Reference material.

* * * * *

(g) * * *

(2) ANSI/ASHRAE Standard 34–2024, Designation and Safety Classification of Refrigerants, copyright 2024, including addenda approved through August 30, 2024; into §§ 173.306; 173.307.

* * * * *

(dd) * * *

(3) Globally Harmonized System of Classification and Labelling of Chemicals (GHS), 9th Revised Edition, ST/SG/AC.10/30/Rev.9 (2021); into §§ 172.401; 173.306; 173.307.

* * * * *

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

■ 3. The authority citation for part 173 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96 and 1.97.

■ 4. In § 173.306:

[14] 77 FR 26413 (May 4, 2012).

[15] 86 FR 26633 (May 17, 2021).

■ a. Revise paragraphs (e)(1)(i) through (iii), and paragraphs (e)(1)(v) and (e)(1)(vi);
■ b. Add paragraph (e)(1)(ix); and
■ c. Revise paragraph (e)(2)(i) introductory text.

The revisions and addition read as follows:

§ 173.306 Limited quantities of compressed gases.

* * * * *

(e) * * *

(1) * * *

(i) Each pressure vessel may not contain more than 5,000 pounds of Group A1 refrigerant gas as specified in ANSI/ASHRAE Standard 15 (IBR, *see* § 171.7 of this subchapter), not more than 5,000 pounds of a non-toxic, flammable refrigerant gas in Category 1B as classified by the Globally Harmonized System of Classification and Labelling of Chemicals (GHS) (IBR, *see* § 171.7 of this subchapter) or a Group A2L refrigerant gas as specified in ANSI/ASHRAE Standard 34 (IBR, *see* § 171.7 of this subchapter), or not more than 50 pounds of refrigerant other than those specified in this paragraph.

(ii) Machines or components thereof having two or more charged vessels may not contain an aggregate of more than 2,000 pounds of Group I refrigerant, an aggregate of more than 2,000 pounds of a non-toxic, flammable refrigerant gas in Category 1B as classified by GHS or a Group A2L as specified in ANSI/ASHRAE Standard 34, or more than 100 pounds of refrigerant other than those specified above.

(iii) Each pressure vessel must be equipped with a safety device meeting the requirements of ANSI/ASHRAE Standard 15.

* * * * *

(v) Pressure vessels must be manufactured, inspected, and tested in accordance with ANSI/ASHRAE Standard 15, or when over 6 inches internal diameter, in accordance with Section VIII of the ASME Code (IBR, *see* § 171.7 of this subchapter).

(vi) All parts subject to refrigerant pressure during shipment must be tested in accordance with ANSI/ASHRAE Standard 15.

* * * * *

(ix) Machines or components thereof containing a Division 2.1 gas must be transported:

(A) On a motor vehicle utilizing an open flat-bed trailer;

(B) On an open flat-bed rail car; or

(C) In a well-ventilated closed transport vehicle (such as a trailer or rail car).

* * * * *

(2) * * *

(i) *Packaging.* Reconditioned (used) refrigerating machines (UN2857, Div. 2.2 or UN3358, Div. 2.1) may be excepted from the marking requirements of § 172.302(c) of this subchapter and transported by motor vehicle when they conform to the requirements prescribed in paragraph (e)(1) of this section, are secured or permanently attached to the motor vehicle, and are:

* * * * *

Issued in Washington, DC, on July 31, 2026, under the authority delegated in 49 CFR 1.97.

Paul J. Roberti,

Administrator, Pipeline and Hazardous Materials Safety Administration.

[FR Doc. 2026–15818 Filed 8–3–26; 8:45 am]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Parts 171 and 174

[Docket No. PHMSA–2025–0099 (HM–268K)]

RIN 2137–AG13

Hazardous Materials: Removing Burdensome Rail Reporting Requirements

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule reduces undue regulatory burdens by eliminating or replacing various rail transportation requirements that are either obsolete, overly burdensome, or conflict with other requirements in the Hazardous Materials Regulations.

DATES: This final rule is effective September 3, 2026.

FOR FURTHER INFORMATION CONTACT: Alexander Wolcott, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, 202–366–8553, *alexander.wolcott@dot.gov.*

I. PHMSA Action

A. What action is PHMSA taking in this final rule?

PHMSA is making several revisions to 49 CFR parts 171 and 174 of the Hazardous Materials Regulations (HMR) to eliminate or replace various rail requirements that are either obsolete, overly burdensome, or conflict with other requirements.

In Section 171.7, PHMSA is removing references to several outdated publications issued by the Association of American Railroads (AAR) Bureau of Explosives (BOE). Many of these publications have not been updated in decades and are no longer relevant to the Nation's modern supply chain. PHMSA is removing these obsolete publications from the table and making other conforming changes to §§ 174.55, 174.101, 174.112, 174.115, and 174.290 to remove subsequent references to the same publications.

In Section 174.200, PHMSA is deleting outdated requirements for rail carrier reporting to the AAR BOE. PHMSA finds removing these outdated reporting requirements would not adversely impact safety because rail carriers would still be able to make a determination that local conditions make the acceptance, transportation, or delivery of hazardous materials unusually hazardous.

In Section 174.67, PHMSA is removing certain outdated and unnecessary requirements from § 174.67, including removing the references to dirt and cinders in paragraph (b), amending paragraph (d) to provide flexibility in protecting open tank cars during transloading, and removing paragraph (n) because it is redundant with § 174.57.

B. Does this action apply to me?

Effective 30 days after publication of this final rule, PHMSA is making revisions to 49 CFR 171.7, 174.20, 174.55, 174.67, 174.101, 174.112, 174.115 and 174.290 that will eliminate or replace outdated and obsolete regulations that apply to rail offerors and carriers.

C. Why is PHMSA taking this action?

PHMSA is taking this action in response to commenter feedback and to eliminate or replace outdated rail requirements found in parts 171 and 174 of the HMR. PHMSA has determined that these changes will not have any adverse impact on safety as technological advances in the rail industry over the last 50 years have rendered them obsolete.

II. Summary of Comments Received in Response to the Notice of Proposed Rulemaking

PHMSA published a notice of proposed rulemaking (NPRM), cited as *HM–268K,* to gather feedback on eliminating or replacing various rail transportation requirements that are either obsolete, overly burdensome, or

conflict with other requirements in the HMR.[1] Please refer to the NPRM for additional background and discussion of the proposed changes.

The following table alphabetically lists commenters to the NPRM:

Commenter	Comment identifier
Brotherhood of Locomotive Engineers and Trainmen (BLET)	PHMSA–2025–0099–0005
Dangerous Goods Advisory Council (DGAC)	PHMSA–2025–0099–0004
Institute of Makers of Explosives (IME)	PHMSA–2025–0099–0003
Sheet Metal, Air, Rail, Transportation-Transportation Division (SMART-TD)	PHMSA–2025–0099–0002

PHMSA received four sets of comments in response to the NPRM, including positive comments from IME and DGAC. Specifically, IME noted that it supports the proposals, and that it participated in the Railway Safety Advisory Committee (RSAC) meeting that found the Association of American Railroads (AAR) Bureau of Explosives (BOE) reporting requirements could be eliminated without any reduction in safety. IME also noted that many of the publications discussed in this rulemaking have not been updated in decades and are no longer relevant to the modern transportation supply chain. DGAC also supported these revisions, stating that continuing to include obsolete references or requirements in the HMR risks causing misinterpretation and confusion for the regulated community, which should of course be avoided when possible.

However, some commenters had questions or concerns about the NPRM as discussed below.

A. Comments on American Association of Railroads (AAR) Bureau of Explosives (BOE) Reporting

PHMSA received comments from SMART-TD and the BLET opposing the removal of the AAR BOE reporting requirement in 49 CFR 174.20. SMART-TD asserts that railroads should not be allowed unchecked discretion, stating that rail carriers operate as ''profit-at-all-cost enterprises'' rather than safety agencies. SMART-TD further states that, in many instances, rail carriers have a much higher risk tolerance than other groups, such as labor unions, emergency responders, and independent safety experts. This includes decisions regarding moving hazardous materials through extreme weather or in heavier and longer trains. Finally, SMART-TD states that removing the AAR BOE reporting requirement would be a step backward for transparency, leaving workers, regulators, and the public blind to critical safety decisions.

BLET also submitted comments opposing the removal of the AAR BOE reporting requirements, refuting PHMSA's claim that the RSAC consensus recommendations from May 25, 2017 included the removal of 49 CFR 174.20. BLET is also concerned that if the AAR BOE is not receiving these reports and there is no other organization taking that role, then there will be no way to document rail cars containing hazardous materials that should not be accepted or transported by the railroads.

PHMSA appreciates the commenters' insights into this topic; however, they are based on a misunderstanding of the requirements in 49 CFR 174.20. The commenters argued that removing 49 CFR 174.20 would reduce safety by allowing railroads unchecked discretion to operate during unsafe conditions. PHMSA disagrees. The existing text of 49 CFR 174.20 permits—but does not mandate—railroads to implement local or carrier restrictions when transportation is deemed unusually hazardous. Consequently, the implementation of such restrictions, and thus when such restrictions must be reported, is already entirely within the discretion of the railroads. Therefore, removing 49 CFR 174.20 will not alter the railroads' authority or decision-making processes regarding local or carrier restrictions.

Regarding transparency, the requirements in 49 CFR 174.20 have remained virtually unchanged since at least 1949. There will no longer be any official record of railroads utilizing their discretion to implement restrictions, but this reporting requirement has outlived its utility and been made obsolete by modern technology. This regulation was conceived well before the development of modern communication networks. Today, railroads are more than capable of communicating their internal restrictions between offerors and other carriers without the need of a third-party to publish the restrictions. Furthermore, PHMSA and the Federal Railroad Administration (FRA) have not relied on this data in recent memory, nor is the agency aware of any other entity that relies on this data.

Finally, in response to claims that the May 25, 2017 RSAC recommendations did not include the removal of 49 CFR 174.20, PHMSA and FRA reviewed the record and confirmed that the committee clearly recommended the removal of this section. The recommendation is found on page 16 of the document titled *Hazardous Materials Working Group Task 15–04 Proposed Regulatory Text.*[2] PHSMA has added a copy of the document to the rulemaking docket. Accordingly, PHMSA is removing 49 CFR 174.20 as proposed.

B. Comments on Removal of Documents Not Incorporated by Reference

PHMSA received comments from SMART-TD opposing the removal of various AAR BOE standards from the *Materials Not Incorporated by Reference* listed in 49 CFR 171.7. SMART-TD argued that, while these standards are dated, PHMSA should not remove the standards without providing replacements. Specifically, SMART-TD noted that one of the standards proposed for removal, *Emergency Handling of Hazardous Materials in Surface Transportation,* was the reference used by the crew of the train that derailed in East Palestine, Ohio. SMART-TD further stated that this standard is the reason that the crew properly determined the evacuation zone for the exact chemical their train was spilling, which protected the crew and the surrounding communities.

PHMSA is removing these references because they are either optional or obsolete. Most of these documents are cited only as non-mandatory examples of loading practices. Only two exceptions exist: *Pamphlet 6A,* which is an optional standard for certain munitions, and the 1989 *Emergency Handling* guide that has been replaced by the modern Emergency Response Guidebook (ERG). Since these documents no longer provide unique, mandatory regulatory value, their removal will not impact safety standards. Therefore, PHMSA is

[1] 90 FR 28556 (Jul. 1, 2025).

[2] FRA, Railroad Safety and Advisory Comm., *Committee Documents* (last accessed Dec. 15, 2025), available at: *https://rsac.fra.dot.gov/meetings?id=56*.

removing the documents not incorporated by reference as proposed.

C. Comments on Transloading Requirements

SMART-TD opposed the proposed change to 49 CFR 174.67 regarding tank car unloading. SMART-TD argued that PHMSA has downplayed the significance of the section, and that relaxing transloading standards would disproportionately increase the risk of major incidents, particularly in areas where local responders may be ill equipped to handle them.

PHMSA disagrees with the commenter's statement that the proposed language relaxes the transloading standards. PHMSA is not removing safety requirements. PHMSA is modernizing outdated terminology to allow for more effective safety measures. First, in paragraph (b), PHMSA proposed to replace the mention of ''cinders'' and ''dirt'' and to instead simply use the word ''debris,'' because the modern railroad industry has long since stopped relying on coal-fired steam locomotives. This revision keeps in place the requirement to keep the area around the manhole covers clear from any kind of debris, rather than it being limited to just cinders and dirt. Similarly, in paragraph (d), PHMSA proposed to remove the mention of asbestos, metal, or burlap covers to protect against sparks, and to replace the language with a general requirement to protect the manhole opening from sparks when unloading. Finally, as stated in the NPRM, paragraph (n) was removed entirely because it was redundant to the language in 49 CFR 174.57. Therefore, PHMSA is making the revisions to 49 CFR 174.67 as proposed.

III. Regulatory Analysis and Notices

A. Legal Authority

This final rule is published under the authority of the Secretary of Transportation as set forth in the Federal Hazardous Materials Transportation Laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (*Regulatory Planning and Review*), as implemented by 49 CFR part 5, subpart B, requires agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' [3] In arriving at those conclusions, E.O. 12866 requires that agencies should consider ''both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify'' and ''maximize net benefits . . . unless a statute requires another regulatory approach.'' E.O. 12866 also requires that ''agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.'' Pursuant to 49 CFR part 5, subpart B, PHMSA and other Operating Administrations must generally choose the ''least costly regulatory alternative that achieves the relevant objectives'' unless required by law or compelling safety need. In addition, 49 CFR part 5, subpart B specifies that regulations should generally ''not be issued unless their benefits are expected to exceed their costs.''

E.O. 12866 and 49 CFR part 5, subpart B also require that PHMSA submit ''significant regulatory actions'' to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This final rule is not a significant regulatory action pursuant to E.O. 12866 and has not been designated as a ''major rule'' as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by 49 CFR part 5, subpart B and determined that this final rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for the railroad industry. PHMSA estimates that cost savings will focus on those related to removing unnecessary reporting requirements. PHMSA finds those cost savings will result in reduced costs for public to whom those entities generally transfer a portion of their compliance costs.

These changes amend requirements in the HMR that are either obsolete or unnecessarily burdensome. These changes, including the removal of outdated recommended industry standards, outdated reporting to the AAR BOE, and removal of the requirement to cover exposed manhole covers with asbestos when loading, will not impose any new direct costs on the rail industry or Federal regulatory agencies. The revision will expand regulatory flexibility by being less prescriptive on how open tank car manhole covers are protected and reduces reporting burden by removing the outdated AAR BOE reporting requirements. As a result, PHMSA finds this final rule will impose no new compliance, implementation, or oversight burdens.

C. Executive Orders 14192 and 14219

PHMSA has determined that this final rule is an E.O. 14192 (*Unleashing Prosperity Through Deregulation*) deregulatory action.[4] PHMSA finds the total costs of the rule on the regulated community will be less than zero. This final rule does not implicate any of the factors identified in section 2(a) of E.O. 14219 (*Ensuring Lawful Governance*) indicative of a regulation that is ''unlawful . . . [or] that undermine[s] the national interest.'' [5]

D. Energy-Related Executive Orders 13211, 14154, and 14156

PHMSA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 14156 (*Declaring a National Energy Emergency*) and E.O. 14154 (*Unleashing American Energy*).[6] The President has declared a national emergency to address America's inadequate energy development production, transportation, refining, and generation capacity and asserted a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from, *inter alia,* the removal of ''undue burden[s]'' on the identification, development, or use of domestic energy resources. PHMSA finds this final rule to be consistent with E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products.

In addition, this final rule is not a ''significant energy action'' under E.O. 13211 (*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*), which requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' [7] Because this final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; accordingly, OIRA has not designated this final rule as a significant energy action.

[3] 58 FR 51735 (Oct. 4, 1993); 91 FR 22431 (Apr. 27, 2026); DOT Order 2100.7 (*Ensuring Reliance Upon Sound Economic Analysis in Department of Transportation Policies, Programs, and Activities*); *see also* DOT Order 2100.6B (*Policies and Procedures for Rulemakings*).

[4] 90 FR 9065 (Feb. 6, 2025).

[5] 90 FR 10583 (Feb. 25, 2025).

[6] 90 FR 8433 (Jan. 29, 2025); 90 FR 8353 (Jan. 29, 2025).

[7] 66 FR 28355 (May 22, 2001).

E. Executive Order 13132: Federalism

PHMSA analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132 (*Federalism*) and the Presidential Memorandum (*Preemption*) published in the **Federal Register** on May 22, 2009.[8] E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have ''substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.'' The Federal Hazardous Materials Transportation Laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts State, local, and Tribal requirements on certain covered subjects, unless the non-Federal requirements are ''substantively the same'' as the Federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This final rule addresses items covered in Paragraph 2 above and will preempt State, local, and Tribal requirements not meeting the ''substantively the same'' standard. Though the final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this final rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a final rule that has been subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the final rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (*Proper Consideration of Small Entities in Agency Rulemaking*) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act.[9] DOT posts information on a dedicated web page to help small businesses understand and navigate Federal regulatory processes.[10] This final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. Because the final rule is expected to reduce burdens, PHMSA certifies it does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of $100 million or more (in 1996 dollars) in any given year, the agency must prepare, among other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This final rule does not impose unfunded mandates under UMRA because it does not result in costs of $100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

PHMSA has analyzed this rule pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and has determined it is categorically excluded under 23 CFR 771.117(c)(20), which applies to the promulgation of rules, regulations, and directives. Under Section 9 of DOT Order 5610.1D, PHMSA may apply a categorical exclusion (CE) established in another Operating Administration's procedures. PHMSA followed the requirements outlined in DOT Order 5610.1D to apply the Federal Highway Administration's CE to this deregulatory action. PHMSA has determined no unusual circumstances are present under 23 CFR 771.117(b). PHMSA's Categorical Exclusion Determination memo for this action is available on PHMSA's website.[11]

I. Executive Order 13175

PHMSA analyzed this final rule according to the principles and criteria in E.O. 13175 (*Consultation and Coordination with Indian Tribal Governments*) and DOT Order 5301.1A (*Department of Transportation Tribal Consultation Policies and Procedures*).[12] E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing ''substantial direct compliance costs'' or ''substantial direct effects'' on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. PHMSA has analyzed this final rule and will revise the approved information collections under the following OMB Control Numbers: OMB Control No. 2137–0559,

[8] 64 FR 43255 (Aug. 10, 1999); 74 FR 24693 (May 22, 2009).

[9] 67 FR 53461 (Aug. 16, 2002).

[10] DOT, *Rulemaking Requirements Related to Small Entities* (last accessed Sept 3, 2024), available at: *https://www.transportation.gov/regulations/rulemaking-requirements-concerning-small-entities.*

[11] DOT, PHMSA, *Implementing Procedures* (Aug. 28, 2025), available at: *https://www.phmsa.dot.gov/planning-and-analytics/environmental-analysis-and-compliance/implementing-procedures.*

[12] 65 FR 67249 (Nov. 9, 2000).

Rail Carrier and Tank Car Tanks Requirements, Rail Tank Car Tanks—Transportation of Hazardous Materials by Rail. This final rule removes 49 CFR 174.20(b), which requires reporting to the AAR BOE regarding any restrictions over any portion of its lines. PHMSA addressed the comments to the removal of this information collection in Section II of this final rule. PHMSA currently accounts for 34 offerors submitting 1.5 reports a year. Each report takes 20 minutes resulting in a reduction of 17 hours of annual burden.

Please direct your requests for a copy of this information collection to Steven Andrews, Office of Hazardous Materials Standards (PHH–12), Pipeline and Hazardous Materials Safety Administration, 1200 New Jersey Avenue SE, 2nd Floor, Washington, DC 20590–0001.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (*Promoting International Regulatory Cooperation*) requires agencies to consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally.[13] In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (*Improving the Nation's Cybersecurity*) directed the Federal Government to improve its efforts to identify, to deter, and to respond to ''persistent and increasingly sophisticated malicious cyber campaigns.'' [14] PHMSA has considered the effects of the final rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

M. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov*, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.* DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, or on DOT's website at *http://www.dot.gov/privacy.*

List of Subjects

49 CFR Part 171

Exports, Hazardous materials transportation, Hazardous waste, Imports, Reporting and recordkeeping requirements, Definitions and abbreviations.

49 CFR Part 174

Railroad safety, Hazardous materials transportation, Radioactive materials.

In consideration of the foregoing, PHMSA amends 49 CFR Chapter I as follows:

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

■ 1. The authority citation for Part 171 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; Pub. L. 101–410 section 4; Pub. L. 104–134, section 31001; Pub. L. 114–74 section 701 (28 U.S.C. 2461 note); 49 CFR 1.81 and 1.97.

■ 2. In § 171.7, amend ''Table 1 to 49 CFR 171.7—Materials Not Incorporated by Reference'' by revising the ''Bureau of Explosives'' entry in the table to read as follows:

§ 171.7 Reference material.

* * * * *

TABLE 1 TO 49 CFR 171.7—MATERIALS NOT INCORPORATED BY REFERENCE

Source and name of material	49 CFR reference
* * * * * * *	
Bureau of Explosives, Hazardous Materials Systems (BOE), Association of American Railroads, American Railroads Building, 50 F Street NW, Washington, DC 20001:	
Fetterley's Formula (The Determination of the Relief Dimensions for Safety Valves on Containers in which Liquefied gas is charged and when the exterior surface of the container is exposed to a temperature of 1,200 °F.)	173.315
* * * * * * *	

* * * * *

PART 174—CARRIAGE BY RAIL

■ 3. The authority citation for part 174 continues to read as follows:

Authority: 49 U.S.C. 5101–5128; 33 U.S.C. 1321; 49 CFR 1.81 and 1.97.

§ 174.20 [Removed and Reserved].

■ 4. Remove and reserve § 174.20.

■ 5. In § 174.55, revise paragraph (a) to read as follows:

§ 174.55 General requirements.

(a) Each package containing a hazardous material being transported by

[13] 77 FR 26413 (May 4, 2012).

[14] 86 FR 26633 (May 17, 2021).

rail in a freight container or transport vehicle must be loaded so that it cannot fall or slide and must be safeguarded in such a manner that other freight cannot fall onto or slide into it under conditions normally incident to transportation. When this protection cannot be provided by using other freight, it must be provided by blocking and bracing.

* * * * *

■ 6. In § 174.67:
■ a. Revise paragraph (b)(3);
■ b. Revise paragraph (d); and
■ c. Remove and reserve paragraph (n).
The revisions read as follows:

§ 174.67 Tank car unloading.

* * * * *

(b) * * *

(3) *Interior type.* All debris must be carefully removed from around the cover before the yoke is unscrewed.

* * * * *

(d) When unloading through the bottom outlet of a car equipped with an interior manhole type cover, and in each case where unloading is done through the manhole (unless a special cover with a safety vent opening and a tight connection for the discharge outlet is used), the manhole must be protected against the entrance of sparks or other sources of ignition of vapor.

* * * * *

■ 7. In § 174.101, revise paragraphs (o)(2) and (3) to read as follows:

§ 174.101 Loading Class 1 (explosive) materials.

* * * * *

(o) * * *

(2) Each truck body or trailer must be secured on the rail car so that it will not permanently change position or show evidence of failure or impending failure of the method of securing the truck body or trailer under impact from each end of at least 13 km (8.1 miles) per hour. Its efficiency must be determined by actual test, using dummy loads equal in weight and general character to the material to be shipped.

(3) Lading must be loaded, blocked, and braced within or on the truck body or trailer so that the lading will not change position under impact from each end of at least 13 km (8.1 miles) per hour.

* * * * *

■ 8. In § 174.112, revise paragraphs (b) and (c)(3) to read as follows:

§ 174.112 Loading Division 1.3 materials and Division 1.2 (explosive) materials (Also see § 174.101).

* * * * *

(b) Except as provided in § 174.101(b), (n), or (o), Division 1.3 materials and Division 1.2 (explosive) materials must be transported in a closed car or container car which is in good condition, and into which sparks cannot enter. The car does not require the car certificates prescribed in § 174.104(c) through (f). If the doors are not tight, they must be stripped to prevent the entrance of sparks. Wood floored cars must be equipped with spark shields (see § 174.104). Packages of Division 1.3 materials and Division 1.2 (explosive) materials must be blocked and braced to prevent their shifting and possible damage due to shifting of other freight during transportation.

* * * * *

(c) * * *

(3) Packages of Division 1.2 materials and Division 1.3 (explosive) materials are blocked and braced within the truck body, trailer, or container to prevent their shifting and possible damage due to shifting of other freight during transportation (ends, sidewalls, or doors of the truck body, trailer, or container may not be relied on to prevent the shifting of heavy loads).

■ 9. In § 174.115, revise paragraphs (a) and (b)(3) to read as follows:

§ 174.115 Loading Division 1.4 (explosive) materials.

(a) Division 1.4 (explosive) materials may be loaded into any closed car in good condition, or into any container car in good condition. Car certificates are not required. Packages of Division 1.4 (explosive) materials must be blocked and braced to prevent their shifting and possible damage due to shifting of other freight during transportation.

* * * * *

(b) * * *

(3) Packages of Division 1.4 (explosive) materials are blocked and braced within the truck body, trailer, or container to prevent their shifting and possible damage due to shifting of other freight during transportation. Ends, side walls, or doors of the truck body, trailer, or container may not be relied on to prevent shifting of heavy loads.

■ 10. In § 174.290, revise paragraph (e) to read as follows:

§ 174.290 Materials extremely poisonous by inhalation shipped by, for, or to the Department of Defense.

* * * * *

(e) Bombs, projectiles, and cannon ammunition being transported by rail must be loaded, blocked, and braced as shown in Department of Defense specifications. When a shipment is loaded in a gondola car it must be securely blocked and braced and not loaded higher than the sides of the car.

* * * * *

Issued in Washington, DC, on July 31, 2026, under the authority delegated in 49 CFR 1.97.

Paul J. Roberti,

Administrator, Pipeline and Hazardous Materials Safety Administration.

49 CFR Part 172

[Docket No. PHMSA–2025–0092 (HM–268D)]

RIN 2137–AG06

Hazardous Materials: Reducing Undue Paperwork Burdens to Domestic Carriers

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule removes undue regulatory burdens by providing domestic carriers and facility operators the option to maintain electronic copies of emergency response information rather than requiring a hard copy printed on paper.

DATES: This final rule is effective September 3, 2026.

FOR FURTHER INFORMATION CONTACT: Arthur Pollack, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–8553, *arthur.pollack@dot.gov.*

I. PHMSA Action

A. What action is PHMSA taking in this Final Rule?

PHMSA is revising 49 CFR 172.602 to provide domestic carriers and facility operators the option to maintain electronic copies of emergency response information rather than requiring a hard copy printed on paper.

B. Does this action apply to me?

Effective 30 days after publication of this final rule, carriers of hazardous materials and facility operators where a hazardous material is received, stored or handled during transportation will have the option to maintain emergency

response information in an electronic format rather than requiring a hard copy printed on paper. Carriers and facility operators are responsible for ensuring the reliability of their chosen method. A lack of cellular signal, device power loss, or device failure will not excuse compliance with the hazardous materials regulations (HMR).

C. Why is PHMSA taking this action?

PHMSA is taking this action in response to commenter feedback and to modernize the HMR to keep pace with modern technology by allowing domestic carriers and facility operators to maintain emergency response information using electronic means in lieu of hard copies. This action may reduce regulatory burdens for companies that choose to utilize this alternative form of compliance.

II. Summary of Comments Received in Response to the Notice of Proposed Rulemaking

PHMSA published a notice of proposed rulemaking (NPRM), cited as *HM–268D,* to gather feedback on modernizing the HMR to provide domestic carriers and facility operators the option to maintain electronic copies of emergency response information rather than requiring a hard copy printed on paper.[1] Please refer to the NPRM for background and discussion of the proposed change.

The following table alphabetically lists commenters to the NPRM:

Commenter name	Docket No.
Alliance for Chemical Distribution (ACD)	PHMSA–2025–0092–0009
Association of American Railroads and the American Short Line and Regional Railroad Association	PHMSA–2025–0092–0012
Brotherhood of Locomotive Engineers and Trainmen (BLET)	PHMSA–2025–0092–0008
Commercial Vehicle Safety Alliance (CVSA)	PHMSA–2025–0092–0010
Council on Safe Transportation of Hazardous Articles, Inc. (COSTHA)	PHMSA–2025–0092–0004
Dangerous Goods Advisory Council (DGAC)	PHMSA–2025–0092–0006
National Tank Truck Carriers	PHMSA–2025–0092–0003
Offen Petroleum LLC	PHMSA–2025–0092–0002
Sheet Metal, Air, Rail, Transportation—Transportation Division (SMART–TD)	PHMSA–2025–0092–0007
Transportation Trades Department, AFL–CIO (TTD)	PHMSA–2025–0092–0011
William Forbes	PHMSA–2025–0092–0005

The NPRM drew a range of reactions from various stakeholders. Supporters argued that the proposal would modernize regulatory frameworks to reflect current operational realities where drivers already utilize electronic devices for compliance. Several commenters emphasized the significant financial benefits, noting that the industry spends tens of thousands of dollars printing paper copies that are frequently rendered obsolete, and that the proposal would reduce violations associated with outdated paperwork. Regarding safety, the National Tank Trunk Carriers commented that its members have consistently reported that paper emergency response information is rarely consulted by first responders who rely on their own protocols or information contained directly on the cargo tank, and that paper documents can be rendered inaccessible if a vehicle catches fire. For example, DGAC added that electronic formats allow the most recent version of the Emergency Response Guidebook (ERG) to be uploaded, ensuring that drivers have the most current emergency response instructions. Furthermore, CVSA supported the proposal for reducing administrative burdens on inspectors and industry alike. However, commenters such as COSTHA and ACD recommended that emergency response information be downloaded locally to devices to ensure accessibility in areas lacking cellular connectivity. In response to these comments, PHMSA notes that this final rule merely provides the option to maintain electronic copies of emergency response information. There is no requirement at this time to move to an electronic-only system. Therefore, regulated entities, to maintain compliance, should continue to maintain paper copies or have electronic copies downloaded to a device if the geographic areas in which they are operating present concerns about network connectivity.

Some commenters had additional questions or raised concerns and opposition. BLET and SMART–TD stated that relying solely on electronic formats is unsafe because railroads traverse remote areas where cellular service is unreliable or nonexistent. They assert that electronic devices can lose power or become damaged during an incident, making paper a critical redundancy. They also emphasize that train crews are the first people on the scene and need immediate access to a physical manifest to assess personal safety before first responders arrive. Lastly, TTD argued that electronic communication technology is ''not mature enough'' to replace printed communication completely, citing the lack of internet access in remote areas. They contend that electronic formats should only be permitted in addition to paper copies, rather than replacing the paper copies entirely.

PHMSA acknowledges these concerns but disagrees with the contention that electronic formats should be restricted to a supplemental role or that they are inherently unsafe due to connectivity limitations. PHMSA emphasizes that the amendment establishes a performance-based requirement—mandating that emergency response information be immediately available (*i.e.,* to first responders and inspectors) at all times—regardless of the medium employed. The carrier has an obligation to ensure the reliability of the method chosen; any carrier whose emergency response information is not immediately available during an incident due to a lack of cellular signal, power loss, or device failure is in violation of the HMR. Therefore, carriers and facility operators choosing to use electronic devices must ensure their systems remain accessible in all operating environments, including those discussed above, effectively eliminating concerns regarding remote areas or technical maturity.

For these reasons, PHMSA is publishing this final rule to modernize 49 CFR 172.602 as proposed. PHMSA finds these revisions will not have any adverse impact on safety.

III. Regulatory Analysis and Notices

A. Legal Authority

This final rule is published under the authority of the Secretary of

[1] Jul. 1, 2025 (90 FR 28563).

Transportation as set forth in the Federal Hazardous Materials Transportation Laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (*Regulatory Planning and Review*), as implemented by 49 CFR part 5, subpart B, requires agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' [2] In arriving at those conclusions, E.O. 12866 requires that agencies should consider ''both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify'' and ''maximize net benefits . . . unless a statute requires another regulatory approach.'' E.O. 12866 also requires that ''agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.'' Pursuant to 49 CFR part 5, subpart B, PHMSA and other Operating Administrations must generally choose the ''least costly regulatory alternative that achieves the relevant objectives'' unless required by law or compelling safety need. In addition, 49 CFR part 5, subpart B specifies that regulations should generally ''not be issued unless their benefits are expected to exceed their costs.''

E.O. 12866 and 49 CFR part 5, subpart B also require that PHMSA submit ''significant regulatory actions'' to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This final rule is not a significant regulatory action pursuant to E.O. 12866 and has not been designated as a ''major rule'' as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by 49 CFR part 5, subpart B and determined that this final rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for hazardous materials shippers and carriers. The final rule will eliminate the need to print and maintain paper copies of emergency response information when the paper copies can be replaced with reliable electronic copies, producing cost savings for the transportation industry and the public to whom those entities may generally transfer a portion of their compliance costs. In comments to the docket, COSTHA indicated that two of its members estimated that allowance of electronic emergency response information could eliminate approximately $33,000 to $70,000 in costs for obtaining paper copies every ERG cycle. PHMSA, however, lacks information to extrapolate these potential cost savings nationwide.

C. Executive Orders 14192 and 14219

PHMSA has determined that this final rule is an E.O. 14192 (*Unleashing Prosperity Through Deregulation*) deregulatory action.[3] PHMSA finds the total costs of the rule on the regulated community will be less than zero. This final rule does not implicate any of the factors identified in section 2(a) of E.O. 14219 (*Ensuring Lawful Governance*) indicative of a regulation that is ''unlawful . . . [or] that undermine[s] the national interest.'' [4]

D. Energy-Related Executive Orders 13211, 14154, and 14156

PHMSA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 14156 (*Declaring a National Energy Emergency*) and E.O. 14154 (*Unleashing American Energy*).[5] The President has declared a national emergency to address America's inadequate energy development, production, transportation, refining, and generation capacity and asserted a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from, *inter alia,* the removal of ''undue burden[s]'' on the identification, development, or use of domestic energy resources. PHMSA finds this final rule to be consistent with E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products.

In addition, this final rule is not a ''significant energy action'' under E.O. 13211 (*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*), which requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' [6] Because this final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; accordingly, OIRA has not designated this final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132 (*Federalism*) and the Presidential Memorandum (*Preemption*) published in the **Federal Register** on May 22, 2009. E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have ''substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.'' The Federal Hazardous Materials Transportation laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts State, local, and Tribal requirements on certain covered subjects, unless the non-Federal requirements are ''substantively the same'' as the Federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This final rule addresses items covered in Paragraph 1 above and will preempt State, local, and Tribal requirements not meeting the ''substantively the same'' standard. Though the final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and

[2] 58 FR 51735 (Oct. 4, 1993); 91 FR 22431 (Apr. 27, 2026); DOT Order 2100.7 (*Ensuring Reliance Upon Sound Economic Analysis in Department of Transportation Policies, Programs, and Activities*); *see also* DOT Order 2100.6B (*Policies and Procedures for Rulemakings*).

[3] 90 FR 9065 (Feb. 6, 2025).

[4] 90 FR 10583 (Feb. 25, 2025).

[5] 90 FR 8433 (Jan. 29, 2025); 90 FR 8353 (Jan. 29, 2025).

[6] 66 FR 28355 (May 22, 2001).

responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this final rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a final rule that has been subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the final rule will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (*Proper Consideration of Small Entities in Agency Rulemaking*) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act.[7] DOT posts information on a dedicated web page to help small businesses understand and navigate Federal regulatory processes.[8] This final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. Because the final rule will reduce burdens, PHMSA certifies that it does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of $100 million or more (in 1996 dollars) in any given year, the agency must prepare, among other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This final rule does not impose unfunded mandates under UMRA because it does not result in costs of $100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

PHMSA has analyzed this rule pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and has determined it is categorically excluded under 23 CFR 771.117(c)(20), which applies to the promulgation of rules, regulations, and directives. Under Section 9 of DOT Order 5610.1D, PHMSA may apply a categorical exclusion (CE) established in another Operating Administration's procedures. PHMSA followed the requirements outlined in DOT Order 5610.1D to apply the Federal Highway Administration's CE to this deregulatory action. PHMSA has determined no unusual circumstances are present under 23 CFR 771.117(b). PHMSA's Categorical Exclusion Determination memo for this action is available on PHMSA's website.[9]

I. Executive Order 13175

PHMSA analyzed this final rule according to the principles and criteria in E.O. 13175 (*Consultation and Coordination with Indian Tribal Governments*) and DOT Order 5301.1A (*Department of Transportation Tribal Consultation Policies and Procedures*).[10] E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing ''substantial direct compliance costs'' or ''substantial direct effects'' on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (*Promoting International Regulatory Cooperation*) requires agencies to consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally.[11] In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (*Improving the Nation's Cybersecurity*) directed the Federal Government to improve its efforts to identify, to deter, and to respond to ''persistent and increasingly sophisticated malicious cyber campaigns.'' [12] PHMSA has considered

[7] 67 FR 53461 (Aug. 16, 2002).

the effects of the final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for affected entities.

M. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process better. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.* DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, and may be viewed on DOT's website at *http://www.dot.gov/privacy*.

List of Subjects in 49 CFR Part 172

Education, Hazardous materials transportation, Hazardous waste, Incorporation by reference, Labeling, Markings, Packaging and containers, Reporting and recordkeeping requirements.

In consideration of the foregoing, PHMSA amends 49 CFR Chapter I as follows:

PART 172—HAZARDOUS MATERIALS TABLE, SPECIAL PROVISIONS, HAZARDOUS MATERIALS COMMUNICATIONS, EMERGENCY RESPONSE INFORMATION, TRAINING REQUIREMENTS, AND SECURITY PLANS

■ 1. The authority citation for part 172 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96, and 1.97.

■ 2. In § 172.602, revise paragraph (b)(1) to read as follows:

§ 172.602 Emergency response information.

* * * * *

(b) * * *

(1) Printed legibly in English (either in hard copy printed on paper or in electronic format);

* * * * *

Issued in Washington, DC, on July 31, 2026, under the authority delegated in 49 CFR 1.97.

Paul J. Roberti,

Administrator, Pipeline and Hazardous Materials Safety Administration.

49 CFR Part 172

[Docket No. PHMSA–2025–0098 (HM–268J)]

RIN 2137–AG12

Hazardous Materials: Reduce Training Burdens for America's Farmers

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule makes an inflationary adjustment to the monetary threshold for farmers to be eligible for an exception from security plan and in-depth security training requirements.

DATES: This final rule is effective September 3, 2026.

FOR FURTHER INFORMATION CONTACT: Jose Cajar, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–8553, *jose.cajar@dot.gov.*

I. PHMSA Action

A. What action is PHMSA taking in this final rule?

PHMSA is making an inflationary adjustment to the monetary threshold for farmers to be eligible for the exception from the security plan requirements in 49 CFR 172.800(c). Specifically, farmers with less than $825,000 in 2025 dollars annually in gross receipts will be excepted from security plan requirements in 49 CFR part 172, subpart I. Farmers who are exempt from the security plan requirements in 49 CFR 172.800(c) are also exempt from the in-depth security training requirements for hazardous materials employees in 49 CFR 172.704(a)(5). Indexing to 2025 dollars will ensure that the threshold automatically accounts for future inflationary changes.

B. Does this action apply to me?

Effective 30 days after publication of this final rule, farmers with less than $825,000 in 2025 dollars annually in gross receipts from the sale of agricultural commodities are not subject to the security plan requirements in 49 CFR 172.800(c). PHMSA notes that the Notice of Proposed Rulemaking (NPRM) inadvertently styled the effect of the proposed revision as limited to an exception from the in-depth security training requirements.[1] This final rule clarifies that the actual scope of the rulemaking pertains to both the exception in 49 CFR 172.800(c) for security plan requirements and the in-depth training requirements associated with a security plan found at 49 CFR 172.704(a)(5).

C. Why is PHMSA taking this action?

PHMSA is taking this action based on positive commenter feedback and to advance the goals expressed in Executive Order (E.O.) 12866 (*Regulatory Planning and Review*).[2] E.O. 12866 requires agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' Raising the threshold for eligibility for relief from the security plan ($500,000 in 2005 to $825,000 in 2025 dollars) will provide relief to small farmers that have been unnecessarily burdened by this provision not being adjusted for inflation over time. As outlined in the final Regulatory Impact Analysis (RIA), PHMSA estimates this change would result in annualized cost savings of $5.7 million. A copy of the final RIA is available for review in the rulemaking docket. PHMSA does not expect the change to have any adverse impact on safety as it simply makes an inflationary adjustment to the exception from the security plan and in-depth security training requirements for small farmers.

II. Summary of Comments Received in Response to the Notice of Proposed Rulemaking

PHMSA published an NPRM, cited as *HM–268J,* to gather feedback on revising the Hazardous Materials Regulations to raise the monetary threshold for farmers to be required to have a security plan.[3] Please refer to the NPRM for background and discussion of the proposed change. PHMSA received one comment from the Dangerous Goods Advisory Council in support of the proposal. PHMSA did not receive any negative comments in response to the NPRM. Therefore, PHMSA is revising 49 CFR 172.800(c) to except farmers who generate less than $825,000 in 2025 dollars annually in gross receipts from the sale of agricultural commodities or products from the security plan requirements in 49 CFR part 172, subpart I.

[1] 90 FR 28528 (Jul. 1, 2025).

[2] 58 FR 51735 (Oct. 4, 1993).

[3] 90 FR 28528 (Jul. 1, 2025).

III. Regulatory Analysis and Notices

A. Legal Authority

This final rule is published under the authority of the Secretary of Transportation as set forth in the Federal Hazardous Materials Transportation Laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

E.O. 12866 (*Regulatory Planning and Review*), as implemented by 49 CFR part 5, subpart B, requires agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' [4] In arriving at those conclusions, E.O. 12866 requires that agencies should consider ''both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify'' and ''maximize net benefits . . . unless a statute requires another regulatory approach.'' E.O. 12866 also requires that ''agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.'' Pursuant to 49 CFR part 5, subpart B, PHMSA and other Operating Administrations must generally choose the ''least costly regulatory alternative that achieves the relevant objectives'' unless required by law or compelling safety need. In addition, 49 CFR part 5, subpart B also specifies that regulations should generally ''not be issued unless their benefits are expected to exceed their costs.''

E.O. 12866 and 49 CFR part 5, subpart B also require that PHMSA submit ''significant regulatory actions'' to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This final rule is not a significant regulatory action pursuant to E.O. 12866 and has not been designated as a ''major rule'' as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by 49 CFR part 5, subpart B and determined that this final rule will result in an estimated annualized cost savings of $5.7 million by reducing regulatory burdens and regulatory uncertainty for small farmers whose income threshold exceeds $500,000 by increasing the exception threshold to $825,000. In addition, farmers who no longer meet the new threshold of $825,000 in 2025 dollars would also no longer need to provide in-depth security awareness training to their employees on the implementation of the security plan. As outlined in the final RIA, PHMSA estimates that this change would result in annualized cost savings of $5.7 million (2024 dollars) at three percent and seven percent discount rates. A copy of the final RIA is available for review in the rulemaking docket.

C. Executive Orders 14192 and 14219

PHMSA has determined that this final rule is an E.O. 14192 (*Unleashing Prosperity Through Deregulation*) deregulatory action.[5] PHMSA estimates this final rule would generate annualized cost savings of $5.7 million (2024 dollars) at three percent and seven percent discount rates. This final rule does not implicate any of the factors identified in section 2(a) of E.O. 14219 indicative of a regulation that is ''unlawful . . . [or] that undermine[s] the national interest.'' [6]

D. Energy-Related Executive Orders 13211, 14154, and 14156

PHMSA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 14156 (*Declaring a National Energy Emergency*) and E.O. 14154 (*Unleashing American Energy*).[7] The President has declared a national emergency to address America's inadequate energy development production, transportation, refining, and generation capacity and asserted a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of ''undue burden[s]'' on the identification, development, or use of domestic energy resources. PHMSA finds this final rule to be consistent with E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products.

In addition, this final rule is not a ''significant energy action'' under E.O. 13211 (*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*), which requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' [8] Because this final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; accordingly, OIRA has not designated this final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132 (*Federalism*) and the Presidential Memorandum (*Preemption*) published in the **Federal Register** on May 22, 2009.[9] E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have ''substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.'' The Federal Hazardous Materials Transportation Laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts State, local, and tribal requirements on certain covered subjects, unless the non-Federal requirements are ''substantively the same'' as the Federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This final rule addresses items covered in Paragraph 2 above and will preempt State, local, and Tribal requirements not meeting the ''substantively the same'' standard. Though the final rule may operate to preempt some State requirements, it will not impose any regulation that has

[4] 58 FR 51735 (Oct. 4, 1993); 91 FR 22431 (Apr. 27, 2026); DOT Order 2100.7 (*Ensuring Reliance Upon Sound Economic Analysis in Department of Transportation Policies, Programs, and Activities*); *see also* DOT Order 2100.6B (*Policies and Procedures for Rulemakings*).

[5] 90 FR 9065 (Feb. 6, 2025).

[6] 90 FR 10583 (Feb. 25, 2025).

[7] 90 FR 8433 (Jan. 29, 2025); 90 FR 8353 (Jan. 29, 2025).

[8] 66 FR 28355 (May 22, 2001).

[9] 64 FR 43255 (Aug. 10, 1999); 74 FR 24693 (May 22, 2009).

substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this final rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a final rule that has been subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the changes in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (*Proper Consideration of Small Entities in Agency Rulemaking*) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act.[10] DOT posts information on a dedicated web page to help small businesses understand and navigate Federal regulatory processes.[11] PHMSA developed this final rule in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The final rule is expected to reduce burdens on farmers. PHMSA does not expect the final rule to impact safety as it simply makes an inflationary adjustment to the exception from the security plan and in-depth security training requirements for small farmers. Because the final rule is expected to reduce burdens, PHMSA certifies the final rule does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of $100 million or more (in 1996 dollars) in any given year, the agency must prepare, among other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This final rule does not impose unfunded mandates under UMRA because it does not result in costs of $100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

PHMSA has analyzed this rule pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and determined it is categorically excluded under 23 CFR 771.117(c)(20), which applies to the promulgation of rules, regulations, and directives. Under Section 9 of DOT Order 5610.1D, PHMSA may apply a categorical exclusion (CE) established in another Operating Administration's procedures. PHMSA followed the requirements outlined in DOT Order 5610.1D to apply the Federal Highway Administration's CE to this deregulatory action. PHMSA has determined no unusual circumstances are present under 23 CFR 771.117(b). PHMSA's Categorical Exclusion Determination memo for this action is available on PHMSA's website.[12]

I. Executive Order 13175

PHMSA analyzed this final rule according to the principles and criteria in E.O. 13175 (*Consultation and Coordination with Indian Tribal Governments*) and DOT Order 5301.1A (*Department of Transportation Tribal Consultation Policies and Procedures*).[13] Executive Order 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing ''substantial direct compliance costs'' or ''substantial direct effects'' on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (*Promoting International Regulatory Cooperation*) requires agencies to consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally.[14] In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

[13] 65 FR 67249 (Nov. 9, 2000).

[14] 77 FR 26413 (May 4, 2012).

L. Cybersecurity and Executive Order 14028

E.O. 14028 (*Improving the Nation's Cybersecurity*) directed the Federal Government to improve its efforts to identify, to deter, and to respond to ''persistent and increasingly sophisticated malicious cyber campaigns.'' [15] PHMSA has considered the effects of the final rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

M. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process better. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.* DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, or on DOT's website at *http://www.dot.gov/privacy.*

List of Subjects in 49 CFR Part 172

Hazardous materials transportation, Hazardous waste, Labeling, Markings, Packaging and containers, Reporting and recordkeeping requirements.

In consideration of the foregoing, PHMSA amends 49 CFR Chapter I as follows:

PART 172—HAZARDOUS MATERIALS TABLE, SPECIAL PROVISIONS, HAZARDOUS MATERIALS COMMUNICATIONS, EMERGENCY RESPONSE INFORMATION, AND TRAINING REQUIREMENTS

■ 1. The authority citation for part 172 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96, and 1.97.

■ 2. In § 172.800, paragraph (c) is revised to read as follows:

§ 172.800 Purpose and applicability.

* * * * *

(c) *Exceptions.* Transportation activities of a farmer, who generates less than $825,000 in 2025 dollars annually in gross receipts from the sale of agricultural commodities or products, are not subject to this subpart if such activities are:

(1) Conducted by highway or rail;

(2) In direct support of their farming operations; and

(3) Conducted within a 150-mile radius of those operations.

Issued in Washington, DC, on July 31, 2026, under the authority delegated in 49 CFR 1.97.

Paul J. Roberti,

Administrator, Pipeline and Hazardous Materials Safety Administration.

[FR Doc. 2026–15814 Filed 8–3–26; 8:45 am]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Parts 172 and 173

[Docket No. PHMSA–2025–0090 (HM–268B)]

RIN 2137–AG04

Hazardous Materials: Reducing Costs to Domestic Shippers and Carriers of Limited Quantities

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT)

ACTION: Final rule.

SUMMARY: This final rule removes undue regulatory burdens by allowing regulated entities to use a reduced sized marking for limited quantity shipments of hazardous materials by highway, rail, or vessel.

DATES: This final rule is effective September 3, 2026.

FOR FURTHER INFORMATION CONTACT: Jose Cajar, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–8553, *jose.cajar@dot.gov.*

I. PHMSA Action

A. What action is PHMSA taking in this Final Rule?

Currently, 49 CFR 172.315 specifies the marking requirements for limited quantities of hazardous materials, with paragraph (a)(2) of this section detailing the minimum size requirements. PHMSA is revising 49 CFR 172.315(a)(2) to allow regulated entities to use a reduced sized limited quantity marking on a package shipping label for certain shipments of hazardous materials in modes other than aircraft. PHMSA is also revising 49 CFR 173.25(a)(6) to specifically state that this marking is not authorized on an overpack.

B. Does this action apply to me?

Effective 30 days after publication of this final rule, persons subject to the limited quantities requirements in 49 CFR 172.315(a) will be allowed to use a reduced sized marking on packages containing limited quantities of hazardous materials transported by modes other than aircraft.

C. Why is PHMSA taking this action?

PHMSA is taking this action in response to commenter feedback and to reduce undue regulatory burdens on certain limited quantity shipments of hazardous materials. This final rule gives affected entities regulatory flexibility by authorizing the use of a reduced size limited quantity marking on certain packages. PHMSA expects this action will reduce costs and provide shippers and carriers of hazardous materials more options when transporting consumer products.

II. Summary of Comments Received in Response to the Notice of Proposed Rulemaking

PHMSA published a notice of proposed rulemaking (NPRM), cited as *HM–268B,* to gather feedback on revising the Hazardous Materials Regulations (HMR) to authorize reduced sized limited quantity markings.[1] Please refer to the NPRM for background and discussion of the proposed change.

The following table alphabetically lists commenters to the NPRM:

Commenter name	Docket No.
Amazon.com, Inc. (Amazon)	PHMSA–2025–0090–0009
Council on Safe Transportation of Hazardous Articles, Inc. (COSTHA)	PHMSA–2025–0090–0006
Dangerous Goods Advisory Council	PHMSA–2025–0090–0008
Household & Commercial Products Association	PHMSA–2025–0090–0007
Medical Device Transport Council	PHMSA–2025–0090–0005
Nuclear Energy Institute	PHMSA–2025–0097–0002
Sporting Arms and Ammunition Manufacturers' Institute	PHMSA–2025–0090–0004

[15] 86 FR 26633 (May 17, 2021).

[1] 90 FR 28571 (Jul. 1, 2025).

All commenters supported the proposed amendments to reduce costs to domestic shippers and carriers of limited quantities of hazardous materials transported by modes other than aircraft. However, Amazon and COSTHA had additional questions or suggestions related to the NPRM proposal.

Amazon expressed support for the proposal but requested additional amendments to 49 CFR parts 172, 173, and 176 to remove the shipping paper requirement for vessels. PHMSA did not include these additional amendments in the NPRM and cannot finalize them at this time. PHMSA may consider including these proposals in a future rulemaking.

COSTHA expressed support for the proposal but requested clarification on whether the quarterly reporting requirement in DOT–SP 21015 would also be incorporated into the HMR. COSTHA noted that numerous members found this reporting requirement to be administratively burdensome and unrelated to the original underlying safety basis for DOT–SP 21015. In this final rule, PHMSA is clarifying that the quarterly reporting requirement found in DOT–SP 21015 was only a condition of the special permit and is not required as part of this regulatory provision.

Having considered the comments received, PHMSA is revising 49 CFR 172.315(a) to allow for a reduced size limited quantity marking that is capable of communicating to carriers that the package contains hazardous materials shipped under a limited quantity exception and by the authorized mode of transportation. In addition, PHMSA is revising 49 CFR 173.25(a)(6) to specifically state that the reduced sized limited quantity marking is not authorized on overpacks. PHMSA does not expect these revisions to have any adverse impact on safety.

III. Regulatory Analysis and Notices

A. Legal Authority

This final rule is published under the authority of the Secretary of Transportation set forth in the Federal Hazardous Materials Transportation Laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (*Regulatory Planning and Review*), as implemented by 49 CFR part 5, subpart B, requires agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' [2] In arriving at those conclusions, E.O. 12866 requires that agencies should consider ''both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify'' and ''maximize net benefits . . . unless a statute requires another regulatory approach.'' E.O. 12866 also requires that ''agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.'' Pursuant to 49 CFR part 5, subpart B, PHMSA and other Operating Administrations must generally choose the ''least costly regulatory alternative that achieves the relevant objectives'' unless required by law or compelling safety need. In addition, 49 CFR part 5, subpart B specifies that regulations should generally ''not be issued unless their benefits are expected to exceed their costs.''

E.O. 12866 and 49 CFR part 5, subpart B also require that PHMSA submit ''significant regulatory actions'' to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This NPRM is not a significant regulatory action pursuant to E.O. 12866 and has not been designated as a ''major rule'' as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by 49 CFR part 5, subpart B and determined that this final rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for hazardous materials shippers and carriers. The final rule will eliminate the need for a separate limited quantity label, as the hazard communication information will be embedded in the shipping label, producing cost savings for the transportation industry and the public to whom those entities generally transfer a portion of their compliance costs. These cost savings are not quantified because PHMSA lacks comprehensive data for limited quantity shipments across all surface modes of transportation.

C. Executive Orders 14192 and 14219

PHMSA has determined that this final rule is an E.O. 14192 (*Unleashing Prosperity Through Deregulation*) deregulatory action.[3] PHMSA finds the total costs of the rule on the regulated community will be less than zero. This final rule does not implicate any of the factors identified in section 2(a) of E.O. 14219 (*Ensuring Lawful Governance*) indicative of a regulation that is ''unlawful . . . [or] that undermine[s] the national interest.'' [4]

D. Energy-Related Executive Orders 13211, 14154, and 14156

PHMSA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 14156 (*Declaring a National Energy Emergency*) and E.O. 14154 (*Unleashing American Energy*).[5] The President has declared a national emergency to address America's inadequate energy development production, transportation, refining, and generation capacity and asserted a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of ''undue burden[s]'' on the identification, development, or use of domestic energy resources. PHMSA finds this final rule to be consistent with E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products.

In addition, this final rule is not a ''significant energy action'' under E.O. 13211 (*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*), which requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' [6] Because this final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; accordingly, OIRA has not designated this final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132 (*Federalism*) and the Presidential Memorandum (*Preemption*) published in the **Federal Register** on May 22, 2009.[7] E.O. 13132 requires agencies to

[2] 58 FR 51735 (Oct. 4, 1993); 91 FR 22431 (Apr. 27, 2026); DOT Order 2100.7 (*Ensuring Reliance Upon Sound Economic Analysis in Department of Transportation Policies, Programs, and Activities*); *see also* DOT Order 2100.6B (*Policies and Procedures for Rulemakings*).

[3] 90 FR 9065 (Feb. 6, 2025).

[4] 90 FR 10583 (Feb. 25, 2025).

[5] 90 FR 8433 (Jan. 29, 2025); 90 FR 8353 (Jan. 29, 2025).

[6] 66 FR 28355 (May 22, 2001).

[7] 64 FR 43255 (Aug. 10, 1999); 74 FR 24693 (May 22, 2009).

assure meaningful and timely input by State and local officials in the development of regulatory policies that may have ''substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.'' The Federal Hazardous Materials Transportation laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts State, local, and Tribal requirements on certain covered subjects, unless the non-Federal requirements are ''substantively the same'' as the Federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This final rule addresses items covered in Paragraph 2 above and will preempt State, local, and Tribal requirements not meeting the ''substantively the same'' standard. Though the final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this final rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a final rule that has been subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the final rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (*Proper Consideration of Small Entities in Agency Rulemaking*) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act.[8] DOT posts information on a dedicated web page to help small businesses understand and navigate Federal regulatory processes.[9] PHMSA developed this final rule in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. Because the final rule is expected to reduce burdens, PHMSA certifies that it does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of $100 million or more (in 1996 dollars) in any given year, the agency must prepare, among other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This final rule does not impose unfunded mandates under UMRA because it does not result in costs of $100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

PHMSA has analyzed this rule pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and has determined it is categorically excluded under 23 CFR 771.117(c)(20), which applies to the promulgation of rules, regulations, and directives. Under Section 9 of DOT Order 5610.1D, PHMSA may apply a categorical exclusion (CE) established in another Operating Administration's procedures. PHMSA followed the requirements outlined in DOT Order 5610.1D to apply the Federal Highway Administration's CE to this deregulatory action. PHMSA has determined no unusual circumstances are present under 23 CFR 771.117(b). PHMSA's Categorical Exclusion Determination memo for this action is available on PHMSA's website.[10]

I. Executive Order 13175

PHMSA analyzed this final rule according to the principles and criteria in E.O. 13175 (*Consultation and Coordination with Indian Tribal Governments*) and DOT Order 5301.1A (*Department of Transportation Tribal Consultation Policies and Procedures*).[11] Executive Order 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing ''substantial direct compliance costs'' or ''substantial direct effects'' on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) require that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections. However, this rulemaking eliminates the need for persons to renew a special permit, resulting in a decrease in paperwork burden for special permit holders. PHMSA estimates the inventory reduction for this OMB control number as follows:

OMB Control No. 2137–0051: Rulemaking, Special Permits, and Preemption Requirements

Decrease in Annual Number of Respondents: 8.

Decrease in Annual Responses: 8.

[8] 67 FR 53461 (Aug. 16, 2002).

[9] DOT, *Rulemaking Requirements Related to Small Entities* (last accessed Sept 3, 2024), available at: *https://www.transportation.gov/regulations/rulemaking-requirements-concerning-small-entities.*

[10] PHMSA, *Implementing Procedures, https://www.phmsa.dot.gov/planning-and-analytics/environmental-analysis-and-compliance/implementing-procedures.*

[11] 65 FR 67249 (Nov. 9, 2000).

Decrease in Annual Burden Hours: 12.

Decrease in Annual Burden Cost: $0.

Please direct your requests for a copy of this information collection to Steven Andrews, Office of Hazardous Materials Standards (PHH–12), Pipeline and Hazardous Materials Safety Administration, 1200 New Jersey Avenue SE, 2nd Floor, Washington, DC 20590–0001.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (*Promoting International Regulatory Cooperation*) requires agencies to consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally.[12] In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (*Improving the Nation's Cybersecurity*) directed the Federal Government to improve its efforts to identify, to deter, and to respond to ''persistent and increasingly sophisticated malicious cyber campaigns.'' [13] PHMSA has considered the effects of the final rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

M. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.* DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, or on DOT's website at *http://www.dot.gov/privacy.*

List of Subjects

49 CFR Part 172

Hazardous materials transportation, Hazardous waste, Labeling, Markings, Packaging and containers, Reporting and recordkeeping requirements.

49 CFR Part 173

Hazardous materials transportation, Training, Packaging and containers, Reporting and recordkeeping requirements.

In consideration of the foregoing, PHMSA amends 49 CFR Chapter I as follows:

PART 172—HAZARDOUS MATERIALS TABLE, SPECIAL PROVISIONS, HAZARDOUS MATERIALS COMMUNICATIONS, EMERGENCY RESPONSE INFORMATION, TRAINING REQUIREMENTS, AND SECURITY PLANS

■ 1. The authority citation for part 172 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96, and 1.97.

■ 2. In § 172.315, add paragraph (a)(2)(iii) to read as follows:

§ 172.315 Limited quantities.

* * * * *

(a) * * *

(2) * * *

(iii) *Reduced size marking on shipping labels.* Except for the shipment of radioactive materials and hazardous materials transported by air or international vessels, the shipper may place a reduced size limited quantity marking on the package shipping label regardless of the size of packaging. Each marking must be a minimum of 25 mm on each side and the width of the border forming the square-on-point must be readily visible. The square-on-point must be durable, legible, readily visible, and displayed on a background of sharply contrasting color. Each shipping label must be capable of electronically communicating to carriers that the package contains hazardous materials shipped under a limited quantity exception and the authorized modes of transportation.

* * * * *

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

■ 3. The authority citation for part 173 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96, and 1.97.

■ 4. In § 173.25, revise paragraph (a)(6) to read as follows:

§ 173.25 Authorized packagings and overpacks.

(a) * * *

(6) For limited quantities, the overpack is marked with a limited quantity marking prescribed in § 172.315 of this subchapter, unless a limited quantity marking representative of the hazardous material in the overpack is visible. The reduced size marking (25 mm x 25 mm) is not authorized for use on the outside of an overpack.

* * * * *

Issued in Washington, DC, on July 31, 2026, under the authority delegated in 49 CFR 1.97.

Paul J. Roberti,

Administrator, Pipeline and Hazardous Materials Safety Administration.

[FR Doc. 2026–15805 Filed 8–3–26; 8:45 am]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Parts 172 and 173

[Docket No. PHMSA–2025–0104 (HM–268P)]

RIN 2137–AG18

Hazardous Materials: Adoption of Department of Transportation Special Permit 21478

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT)

[12] 77 FR 26413 (May 4, 2012).

[13] 86 FR 26633 (May 17, 2021).

ACTION: Final rule.

SUMMARY: This final rule removes undue regulatory burdens by adopting the provisions of U.S. Department of Transportation (DOT) special permit (SP) 21478 to allow empty intermediate bulk containers (IBCs) that only contain the residue of a hazardous material to be transported without shipping papers, placards, and United Nations (UN) identification (ID) numbers.

DATES: This final rule is effective September 3, 2026.

FOR FURTHER INFORMATION CONTACT: Noah Jacobson, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–8553, *noah.jacobson@dot.gov.*

I. PHMSA Action

A. What action is PHMSA taking in this final rule?

PHMSA is adopting the provisions of DOT SP 21478 into the Hazardous Materials Regulations (HMR: 49 CFR parts 171–180) by revising 49 CFR 173.29 to add a new subparagraph (d) that authorizes the transportation of ''empty'' IBCs only containing a residue of a hazardous material in a manner similar to what is already allowed for empty non-bulk packaging in 49 CFR 173.29(c). PHMSA is also making conforming revisions to 49 CFR 172.331, 172.504, and 172.514. These revisions include amending 49 CFR 172.514 to make clear that IBCs shipped in accordance with the conditions of the empty packaging exception are not subject to placarding. The new provisions will require a document (in paper or electronic form) to accompany the IBCs that denotes the phrase ''Residue IBC(s)'' and indicates the number of IBCs containing hazardous materials for each Class or Division of material transported on a transport vehicle.

B. Does this action apply to me?

Effective 30 days after publication of this final rule, holders of DOT SP 21478 will no longer need a special permit to transport ''empty'' IBCs in accordance with 49 CFR 173.29.

C. Why is PHMSA taking this action?

PHMSA is taking this action in response to commenter feedback and to provide relief to stakeholders from certain requirements in the HMR for the transportation of ''empty'' IBCs containing only the residue of hazardous materials. This final rule will allow the transportation of empty IBCs in a manner similar to what is already permitted for non-bulk packagings. Specifically, the relief provided for an ''empty'' non-bulk packaging in § 173.29(c) states that non-bulk packaging containing only the residue of hazardous materials covered by Table 2 of § 172.504—a table of comparatively lower hazard Classes and Divisions of materials—are excepted from certain hazard communication requirements of the HMR. These packages do not need to be included in determining the need for placarding and are not subject to the shipping paper requirements when collected and transported by a for-hire or private carrier for reconditioning, remanufacture, or reuse.

PHMSA issued DOT–SP 21478 to grant relief from the requirement to offer for transportation and transport IBCs containing only residue of hazardous materials in a similar manner to that offered to non-bulk packagings. PHMSA has authorized this widely-utilized special permit for years with a proven track record for safety. PHMSA is also taking this action as part of its ongoing review of special permits that are appropriate for adoption into the HMR based on their safety record and positive impact on stakeholders.

II. Summary of Comments Received in Response to the Notice of Proposed Rulemaking

PHMSA published a notice of proposed rulemaking (NPRM), cited as *HM–268P,* to gather feedback on adopting DOT SP 21478 into the HMR.[1] Please refer to the NPRM for background and discussion of the proposed change.

The following table alphabetically lists commenters to the NPRM:

Commenter name	Docket No.
AECOM Technical Services, Inc.	PHMSA–2025–0104–0011
Alliance for Chemical Distribution	PHMSA–2025–0104–0008
American Fuel & Petrochemical Manufacturers	PHMSA–2025–0104–0010
Commercial Vehicle Safety Alliance (CVSA)	PHMSA–2025–0104–0009
Dangerous Goods Advisory Council	PHMSA–2025–0104–0007
Industrial Packaging Association of North America	PHMSA–2025–0104–0006
Institute of Makers of Explosives	PHMSA–2025–0104–0005
Reusable Industrial Packaging Association	PHMSA–2025–0104–0003
William Forbes	PHMSA–2025–0104–0004

A majority of NPRM commenters submitted feedback in favor of the proposed revisions. However, some commenters had additional questions or suggestions related to the NPRM proposal.

William Forbes and CVSA commented that the quantity limits in the proposal are unenforceable and may not maintain safety. Both commenters state that enforcement personnel will have no practical means to determine whether the residue quantity limits are being met. PHMSA acknowledges these concerns but notes that the quantity limits as proposed can be effectively verified through established oversight practices such as routine inspections and documentation reviews.[2] These enforcement tools have a proven track record of ensuring compliance and mitigating potential safety risks. PHMSA also notes that by limiting the capacity of the IBCs, the safety concerns surrounding the actual quantities of residue are further mitigated. In addition, more than 40 entities have been approved to transport hazardous material residues under DOT SP 21478 since its issuance in 2021, and PHMSA has never received any reports of safety incidents related to its use. This operational history provides strong

[1] 90 FR 28566 (Jul. 1, 2025).

[2] PHMSA evaluated the safety hazards associated with the hazard communication exceptions and determined that there is an equivalent level of safety between transportation of ''empty'' IBCs and ''empty'' non-bulk packages. PHMSA also notes that, comparatively, the typical quantities of residue in these IBCs are less than the quantities that the Environmental Protection Agency (EPA) considers for a container to be empty under its Resource Conservation and Recovery Act regulations for residues of hazardous waste. EPA defines this amount as 0.3 percent or less of material by weight of the total capacity for a container greater than 119 gallons—the cutoff for a packaging to be considered non-bulk. *See* 40 CFR 261.7(b)(1)(iii)(B).

evidence that the permit conditions are both enforceable and effective in maintaining an appropriate level of safety.

CVSA expressed additional concerns that the NPRM no longer requires shipping papers, placards, and identification numbers to be displayed on the transport vehicle for residue IBCs. CVSA highlighted that under the NPRM, IBCs containing hazardous materials that are prohibited from being shipped together according to 49 CFR 177.848—which governs the segregation of hazardous materials—could inadvertently be transported together. CVSA also notes that shipping papers serve as a practical and effective means for verifying compliance with segregation requirements. Consequently, CVSA believes that eliminating the requirement for shipping papers on the transport vehicle introduces a significant safety risk by decreasing the ability of inspectors and emergency responders to verify proper segregation of hazardous materials.

PHMSA acknowledges CVSA's concerns regarding the elimination of the requirement for a traditional shipping paper under part 172 to accompany transport vehicles containing residue IBCs. However, PHMSA has determined that the proposed revisions to 49 CFR 173.29 provide an equally effective mechanism for communicating necessary hazard information while reducing unnecessary regulatory burden. As proposed, the driver must maintain—in either paper or electronic form—a document that accompanies the IBCs and includes the phrase ''Residue IBC(s)'' along with the number of IBCs containing hazardous materials for each hazard class or division transported. This documentation ensures that inspectors and emergency responders can quickly identify the type and quantity of hazardous materials present, thereby enabling verification of applicable segregation requirements without imposing the full shipping paper requirements of part 172. PHMSA has determined that this approach maintains safety by ensuring critical hazard communication while providing regulated entities with greater flexibility in meeting documentation requirements.

For these reasons, PHMSA concludes that the revisions as proposed will maintain appropriate levels of safety and authorize reasonable flexibilities. As such, PHMSA is adopting the provisions of DOT SP 21478 into 49 CFR 173.29 and making conforming revisions in 49 CFR 172.331, 172.504, and 172.514 in this final rule. PHMSA does not expect these revisions to have substantial adverse impact on safety.

III. Regulatory Analysis and Notices

A. Legal Authority

This final rule is published under the authority of the Secretary of Transportation as set forth in the Federal Hazardous Materials Transportation laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866: Regulatory Planning and Review

Executive Order (E.O.) 12866 (*Regulatory Planning and Review*), as implemented by 49 CFR part 5, subpart B, requires agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' [3] In arriving at those conclusions, E.O. 12866 requires that agencies should consider ''both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify'' and ''maximize net benefits . . . unless a statute requires another regulatory approach.'' E.O. 12866 also requires that ''agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.'' Pursuant to 49 CFR part 5, subpart B, PHMSA and other Operating Administrations must generally choose the ''least costly regulatory alternative that achieves the relevant objectives'' unless required by law or compelling safety need. In addition, 49 CFR part 5, subpart B specifies that regulations should generally ''not be issued unless their benefits are expected to exceed their costs.''

E.O. 12866 and 49 CFR part 5, subpart B also require that PHMSA submit ''significant regulatory actions'' to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This final rule is not a significant regulatory action pursuant to E.O. 12866 and has not been designated as a ''major rule'' as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by 49 CFR part 5, subpart B and determined that this final rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for affected entities by providing relief from undue regulatory requirements to those offering and transporting empty IBCs containing only hazardous materials residue or from the need to apply for a relevant special permit. PHMSA expects that cost savings will result in reduced costs for the public to whom those entities generally transfer a portion of their compliance costs.

C. Executive Orders 14192 and 14219

PHMSA has determined that this final rule is an E.O. 14192 (*Unleashing Prosperity Through Deregulation*) deregulatory action.[4] PHMSA finds the total costs of the rule on the regulated community will be less than zero. This final rule does not implicate any of the factors identified in section 2(a) of E.O. 14219 (*Ensuring Lawful Governance*) indicative of a regulation that is ''unlawful . . . [or] that undermine[s] the national interest.'' [5]

D. Energy-Related Executive Orders 13211, 14154, and 14156

PHMSA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 14156 (*Declaring a National Energy Emergency*) and E.O. 14154 (*Unleashing American Energy*).[6] The President has declared a national emergency to address America's inadequate energy development production, transportation, refining, and generation capacity and asserted a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from, *inter alia,* the removal of ''undue burden[s]'' on the identification, development, or use of domestic energy resources. PHMSA finds this final rule to be consistent with E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products.

In addition, this final rule is not a ''significant energy action'' under E.O. 13211 (*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*), which requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' [7] Because this final rule is not a significant action under E.O.

[3] 58 FR 51735 (Oct. 4, 1993); 91 FR 22431 (Apr. 27, 2026); DOT Order 2100.7 (*Ensuring Reliance Upon Sound Economic Analysis in Department of Transportation Policies, Programs, and Activities*); *see also* DOT Order 2100.6B (*Policies and Procedures for Rulemakings*).

[4] 90 FR 9065 (Feb. 6, 2025).

[5] 90 FR 10583 (Feb. 25, 2025).

[6] 90 FR 8433 (Jan. 29, 2025); 90 FR 8353 (Jan. 29, 2025).

[7] 66 FR 28355 (May 22, 2001).

12866, it will not have a significant adverse effect on supply, distribution, or energy use; accordingly, OIRA has not designated this final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132 (*Federalism*) and the Presidential Memorandum (*Preemption*) published in the **Federal Register** on May 22, 2009.[8] E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have ''substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.'' The Federal Hazardous Materials Transportation laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts State, local, and tribal requirements on certain covered subjects, unless the non-Federal requirements are ''substantively the same'' as the Federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This final rule addresses items (1), (2), and (3) above and may preempt state, local, and Tribal requirements not meeting the ''substantively the same'' standard. Though the final rule may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this final rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a final rule that has been subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the final rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (*Proper Consideration of Small Entities in Agency Rulemaking*) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act.[9] DOT posts information on a dedicated web page to help small businesses understand and navigate Federal regulatory processes.[10] PHMSA developed this final rule in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. Because the final rule is expected to reduce burdens, PHMSA certifies that it does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of $100 million or more (in 1996 dollars) in any given year, the agency must prepare, among other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This final rule does not impose unfunded mandates under UMRA because it does not result in costs of $100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

PHMSA has analyzed this rule pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and has determined it is categorically excluded under 23 CFR 771.117(c)(20), which applies to the promulgation of rules, regulations, and directives. Under Section 9 of DOT Order 5610.1D, PHMSA may apply a categorical exclusion (CE) established in another Operating Administration's procedures. PHMSA followed the requirements outlined in DOT Order 5610.1D to apply the Federal Highway Administration's CE to this deregulatory action. PHMSA has determined no unusual circumstances are present under 23 CFR 771.117(b). PHMSA's Categorical Exclusion Determination memo for this action is available on PHMSA's website.[11]

I. Executive Order 13175

PHMSA analyzed this final rule according to the principles and criteria in E.O. 13175 (*Consultation and Coordination with Indian Tribal Governments*) and DOT Order 5301.1A (*Department of Transportation Tribal Consultation Policies and Procedures*).[12] E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing ''substantial direct compliance costs'' or ''substantial direct effects'' on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the final rule and determined it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR

[8] 64 FR 43255 (Aug. 10, 1999): 74 FR 24693 (May 22, 2009).

[9] 67 FR 53461 (Aug. 16, 2002).

[10] DOT, *Rulemaking Requirements Related to Small Entities* (last accessed Sept 3, 2024), available at: *https://www.transportation.gov/regulations/rulemaking-requirements-concerning-small-entities.*

[11] DOT, *Implementing Procedures for Considering Environmental Impacts* (Aug. 28, 2025), available at *https://www.phmsa.dot.gov/planning-and-analytics/environmental-analysis-and-compliance/implementing-procedures.*

[12] 65 FR 67249 (Nov. 9, 2000).

1320.8(d) require that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections. However, this rulemaking eliminates the need for persons to renew a special permit, resulting in a decrease in paperwork burden for special permit holders. PHMSA estimates the inventory reduction for this OMB control number as follows:

OMB Control No. 2137–0051: Rulemaking, Special Permits, and Preemption Requirements.

Decrease in Annual Number of Respondents: 11.

Decrease in Annual Responses: 11.

Decrease in Annual Burden Hours: 16.

Decrease in Annual Burden Cost: $0.

This final rule also creates a requirement for shippers using the new provisions in 49 CFR 173.29 to have a document—in paper or electronic form—in lieu of a shipping paper, accompanying the IBCs that denotes the phrase ''Residue IBC(s)'' and indicates the number of IBCs containing hazardous materials for each Class or Division of material transported on transport vehicle. PHMSA estimates that 44 respondents will ship 50 shipments per year under this provision resulting in 2,200 shipments per year. PHMSA estimates it will take 30 seconds each for offerors to create this certification resulting in 19 burden hours (2,200 responses × 30 seconds per response). PHMSA will place this information collection under OMB Control Number 2134–0034 ''Shipping Papers and Emergency Response Information.'' PHMSA estimates there is no additional burden associated with this information collection.

Please direct your requests for a copy of this information collection to Steven Andrews, Office of Hazardous Materials Standards (PHH–12), Pipeline and Hazardous Materials Safety Administration, 1200 New Jersey Avenue SE, 2nd Floor, Washington, DC 20590–0001.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (*Promoting International Regulatory Cooperation*) requires agencies to consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally.[13] In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (*Improving the Nation's Cybersecurity*) directed the Federal Government to improve its efforts to identify, to deter, and to respond to ''persistent and increasingly sophisticated malicious cyber campaigns.'' [14] PHMSA has considered the effects of the final rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

M. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process better. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.* DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, or on DOT's website at *http://www.dot.gov/privacy.*

[13] 77 FR 26413 (May 4, 2012).

[14] 86 FR 26633 (May 17, 2021).

List of Subjects

49 CFR Part 172

Education, Hazardous materials transportation, Hazardous waste, Labeling, Markings, Packaging and containers, Reporting and recordkeeping requirements.

49 CFR Part 173

Hazardous materials transportation, packaging and containers, radioactive materials, uranium, reporting, and recordkeeping requirements.

In consideration of the foregoing, PHMSA amends 49 CFR Chapter I as follows:

PART 172—HAZARDOUS MATERIALS TABLE, SPECIAL PROVISIONS, HAZARDOUS MATERIALS COMMUNICATIONS, EMERGENCY RESPONSE INFORMATION, TRAINING REQUIREMENTS, AND SECURITY PLANS

■ 1. The authority citation for part 172 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96, and 1.97.

■ 2. In § 172.331, add paragraph (d) to read as follows:

§ 172.331 Bulk packagings other than portable tanks, cargo tanks, tank cars and multi-unit tank car tanks.

* * * * *

(d) Transport vehicles or freight containers used to transport empty IBCs in accordance with § 173.29(d) of this subchapter are not subject to identification number marking requirements.

■ 3. In § 172.504, revise paragraph (d) to read as follows:

§ 172.504 General placarding requirements.

* * * * *

(d) *Exceptions for empty packages.* (1) *Non-bulk.* Except for hazardous materials subject to § 172.505, a non-bulk packaging that contains only the residue of a hazardous material covered by Table 2 of paragraph (e) of this section need not be included in determining placarding requirements.

(2) *IBCs.* Transport vehicles or freight containers used to transport empty IBCs in accordance with § 173.29(d) of this subchapter are not subject to placarding requirements of this part.

* * * * *

■ 4. In § 172.514, revise paragraph (b) to read as follows:

§ 172.514 Bulk packagings.

* * * * *

(b) Each bulk packaging that is required to be placarded when it contains a hazardous material, must remain placarded when it is emptied, unless it—

(1) Is sufficiently cleaned of residue and purged of vapors to remove any potential hazard;

(2) Is refilled, with a material requiring different placards or no placards, to such an extent that any residue remaining in the packaging is no longer hazardous;

(3) Contains the residue of a hazardous substance in Class 9 in a quantity less than the reportable quantity, and conforms to § 173.29(b)(1) of this subchapter; or

(4) Is an empty IBC transported in accordance with § 173.29(d).

* * * * *

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

■ 5. The authority citation for part 173 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96 and 1.97.

■ 6. In § 173.29, redesignate current paragraphs (d) through (h) as paragraphs (e) through (i) and add new paragraph (d) to read as follows:

§ 173.29 Empty packagings.

* * * * *

(d) A steel, rigid plastic, or composite IBC not exceeding 2,100 L (550 gallons) containing only the residue of hazardous materials in packing group II or III of hazard Class or Division 3, 4.1, 5.1, 6.1, 8, and 9, is excepted from subpart C (shipping papers). Furthermore, transport vehicles and freight containers are not subject to the subpart F (placarding) of Part 172 of this subchapter and the marking requirements in § 172.331 (UN ID Number), provided the following conditions are met:

(1) Prior to shipment, the offeror must ensure that no more than 0.3 percent by weight of the total capacity of the IBC remains in the packaging;

(2) IBCs must be transported in a fully enclosed transport vehicle or freight container;

(3) Transportation is only authorized to a reconditioning, remanufacturing, requalification, disposal, or repair facility;

(4) A document (in paper or electronic form) must accompany the shipment of IBCs that denotes the phrase ''Residue IBC(s)'' and indicates the number of IBCs containing hazardous materials for each Class or Division of material transported;

(5) IBCs shall be marked and labeled in accordance with subpart D (marking) and subpart E (labeling) of Part 172 of this subchapter; and

(6) Transportation is authorized for only motor vehicle or rail.

* * * * *

Issued in Washington, DC, on July 31, 2026, under the authority delegated in 49 CFR 1.97.

Paul J. Roberti,

Administrator, Pipeline and Hazardous Materials Safety Administration.

49 CFR Part 173

[Docket No. PHMSA–2025–0094 (HM–268F)]

RIN 2137–AG08

Hazardous Materials: Reducing Burdens by Allowing Continued Use of Department of Transportation Special Permit Packagings

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule removes undue regulatory burdens by allowing for the continued use of packagings authorized under a manufacturing special permit for the useful life of the package. Manufacturing special permits typically authorize the manufacture, mark, sale, and use of the packaging authorized by the special permit.

DATES: This final rule is effective September 3, 2026.

FOR FURTHER INFORMATION CONTACT: Tony Horne, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–8553, *tony.horne@dot.gov.*

I. PHMSA Action

A. What action is PHMSA taking in this final rule?

PHMSA is revising 49 CFR 173.23 to allow for the continued use of a U.S. Department of Transportation (DOT) special permit (SP) packaging (*i.e.,* packaging associated with a manufacturing special permit) for which the SP has expired but the packaging remains otherwise safe and usable. Specifically, PHMSA is allowing DOT SP packagings to be used for the duration of their usable life regardless of the status of the grantee and whether the SP was not renewed—*e.g.,* when the original grantee has gone out of business but some of their packagings remain in commerce because a shipper has yet to use it for hazardous material shipment.

B. Does this action apply to me?

Effective 30 days after publication of this final rule, persons with a DOT SP packaging that is compliant with the requirements in 49 CFR 173.23 and the conditions of the most recent DOT SP on file with PHMSA may continue to use the packaging in hazardous materials service.

C. Why is PHMSA taking this action?

PHMSA is taking this action in response to commenter feedback and to allow the use of otherwise safe and usable packaging. Prohibiting the use of these packages solely because the original manufacturer (*i.e.,* the original special permit holder) has gone out of business or chose not to renew an SP is unnecessary. Authorizing the continued use of such packagings relieves an economic burden without compromising public safety.

II. Summary of Comments Received in Response to the Notice of Proposed Rulemaking

PHMSA published a notice of proposed rulemaking (NPRM), cited as *HM–268F,* to gather feedback on revising the HMR to allow conditional continued use of packagings authorized under a manufacturing special permit for the duration of its useable life.[1] Please refer to the NPRM for background and discussion of the proposed change.

The following table alphabetically lists commenters to the NPRM:

Commenter name	Docket No.
Commercial Vehicle Safety Alliance (CVSA)	PHMSA–2025–0094–0013

[1] 90 FR 28571 (Jul. 1, 2025).

Commenter name	Docket No.
Compressed Gas Association, Inc	PHMSA–2025–0094–0005
Council on Safe Transportation of Hazardous Articles, Inc. (COSTHA)	PHMSA–2025–0094–0006
Dangerous Goods Advisory Council (DGAC)	PHMSA–2025–0094–0011
Industrial Packaging Association of North America	PHMSA–2025–0094–0012
Institute of Makers of Explosives	PHMSA–2025–0094–0009
International Vessel Operators Dangerous Goods Association (IVODGA)	PHMSA–2025–0094–0007
National Tank Truck Carriers	PHMSA–2025–0094–0003
PerVisum Ltd	PHMSA–2025–0094–0002
Sporting Arms and Ammunition Manufacturers' Institute	PHMSA–2025–0094–0004
William Forbes	PHMSA–2025–0094–0008

PHMSA received eleven comments, the majority of which supported the NPRM. Specifically, commenters noted that the structural integrity and safety of packagings do not degrade simply because the underlying manufacturing SP expires or is not renewed by the grantee. Stakeholders emphasized that the current regulatory framework creates an ''unnecessary burden'' that forces the premature disposal of ''perfectly functional packagings,'' resulting in unwarranted economic and environmental waste. Commenters noted that the proposal would also eliminate unnecessary administrative hurdles and provide critical certainty for shippers and carriers, thereby reducing confusion in port operations and preventing the refusal of safe shipments without compromising safety standards.

However, several commenters expressed concerns and asked for clarification on certain topics. In addition, one commenter suggested some changes to improve the proposal. PHMSA responds as follows:

A. Expired/Inactive Manufacturing Special Permits and Use of Packagings

With regard to the continued use of packagings conforming with manufacturing DOT SPs that have expired, CVSA and William Forbes commented that expired DOT SPs are not readily available online and difficult to locate. The commenters suggested that the inability to access the SPs would be a burden for industry to demonstrate shipment compliance and would create barriers for enforcement personnel to verify the terms of the DOT SP. Similarly, COSTHA and IVODGA shared concerns that carriers may deny shipments based on expired SPs. Those commenters requested that PHMSA provide clear guidance to carriers and enforcement personnel to avoid unnecessary disruptions.

PHMSA acknowledges the concerns raised by these commenters and reiterates the following. First, PHMSA notes that there are many measures in place that demonstrate responsibility for maintenance or availability of SPs by shippers and carriers. Two standard parts of every SP issued by PHMSA—Sections 8 (Special Provisions) and Section 10 (Modal Requirements)—require that a current copy of the SP be maintained at facilities where it is used and be carried aboard transport vehicles used to move SP packages. Moreover, in Section 11 (Compliance), hazmat employees who perform a function subject to an SP must receive training on the requirements and conditions of said SP in addition to the training requirements of the HMR. This is reinforced in the general requirements of the HMR in 49 CFR 171.2(c), which states that each person performing a function covered by a SP must perform that function in accordance with the SP. Furthermore, the training requirements in 49 CFR 172.704(b) mandate that each hazmat employee must be provided function-specific training concerning requirements of SPs issued by the agency. This demonstrates further that entities need to have a copy of the SP to use the packaging. Second, PHMSA also makes SPs available at its website through its SP search page, and this will be expanded to include expired manufacturing SPs. Thus, PHMSA finds that the availability of expired manufacturing SPs to the public will not be a compliance or enforcement concern or lead to the denial of shipments by carriers.

B. Life of the Packaging

CVSA and William Forbes commented that the ''life of the packaging'' should be defined because current manufacturing SPs do not include information regarding the lifespan. The commenters question whether enforcement personnel would be able to ascertain if a packaging that is used after the expiration or non-renewal of an SP is still within its usable lifespan and, therefore, in compliance with the HMR. The commenters suggest that all manufacturing SPs should define the lifespan of the packaging.

PHMSA acknowledges the concerns but disagrees with the premise. Except for a few package types—*e.g.,* a DOT 3HT cylinder—the HMR do not designate a lifespan (*i.e.,* a service life) for an authorized package, nor does PHMSA typically designate lifespans as a provision in manufacturing SPs. Rather, the service life depends generally on whether the packaging conforms in all respects to requirements of the HMR and, specifically—for a packaging subject to periodic evaluation—whether it can achieve requalification for continued service. This applies to SP packaging as well. Thus, the service life of an SP packaging is the duration of time from production until the packaging can no longer meet the required conditions or a service life as specified in the SP. As noted by commenters supporting the proposed change, the current rules create situations where packaging is rendered obsolete solely by permit expiration—rather than functional failure—forcing businesses to discard functional packaging and procure costly replacements, a cycle that not only destabilizes distribution networks and burdens customers, but also suppresses industry innovation while generating significant economic and environmental waste without any tangible improvement to safety.

COSTHA and IVODGA further requested that PHMSA confirm whether packagings manufactured prior to the expiration of a SP can be reused, and whether shipments that are already prepared and waiting in warehouses—prior to the SP expiration—remain authorized once the SP has expired.

PHMSA confirms that SP packagings manufactured during the life of the SP can be reused if they conform in all respects to the requirements of the SP and the HMR. In addition, shipments prepared prior to the SP expiration remain authorized for transport.

C. Safety Concerns

CVSA asked how PHMSA will handle packagings whose SP has been terminated or not renewed due to a

safety issue identified by the agency. They admit that, ''while uncommon, there have been instances in the past when the agency chose not to renew a special permit due to safety concerns.''

PHMSA's position remains that, if an SP was terminated due to safety issues, the permit will be removed from the PHMSA website and replaced with a termination letter, and the packaging will no longer be authorized for use. Termination of an SP is equivalent to the removal of any of its authorizations. Therefore, PHMSA finds this final rule will not have any impact on authorized shipments per se and should not cause any safety concerns.

D. Party Status

COSTHA, IVODGA, and PerVisum Ltd. requested clarification regarding the continuation of ''party status'' for SPs if the original applicant is no longer in business. In addition, PerVisum Ltd. asked whether older SPs would be amended to remove the statement ''See individual authorization letter'' on the line that indicates the grantee of the SP.

PHMSA clarifies that party status is not authorized for manufacturing SPs. Such a packaging may be used as provided in 49 CFR 173.22a. Once the manufacturing SP expires, manufacturing cannot continue but existing packagings may continue to be used so long as the packaging continues to conform to the provisions of the SP as well as all applicable HMR requirements. The change adopted in this final rule will allow for the continued use of a manufacturing SP for the duration of its usable life as discussed above, regardless of the status of the grantee.

PerVisum Ltd. asked whether the statement ''See individual authorization letter'' will be removed from older SPs. PerVisum Ltd. linked this question to a broader inquiry about whether ''Party Status'' would no longer be applied to these SPs under this rule. PHMSA is clarifying that party status is not issued for manufacturing SPs; therefore, the statement ''See individual authorization letter'' does not appear on any current manufacturing SPs.

E. Suggested Additional Conditions to the Proposed Change

DGAC supports the change allowing the continued use of SP packaging but provided several suggested conditions to include upon its adoption into a final rule: (1) a copy of the most recent SP must be maintained at each facility utilizing the packaging; (2) the packaging must be marked with the SP number; and (3) the packaging must be used and maintained in accordance with the provisions contained in the SP.

PHMSA appreciates the feedback offered by DGAC. The change adopted in this rulemaking requires conformance with the terms of the most recent version of the SP. As discussed earlier, the terms of manufacturing SPs currently include the requirements that a copy of the SP must be maintained at each facility using the packaging, and that the packaging must be marked with the SP number. Note that, in some instances, the manufacturing SP may include other markings in addition to the DOT SP number on the package. PHMSA notes that SPs also contain standard language in Section 11 (Compliance) stating that no person may use or apply the SP—including displaying its number—when the SP has expired or is otherwise no longer in effect. The action in this rulemaking supersedes that provision. Therefore, future manufacturing SPs issued will no longer contain the provision and persons using manufacturing SP packaging may disregard the instruction within the SP that prohibits continued use or application.

For the reasons discussed above, PHMSA is revising 49 CFR 173.23 to allow for the continued use of a SP packaging for which the SP has expired but the packaging remains otherwise safe and usable. Authorizing continued use of such packagings relieves an economic burden without compromising public safety. PHMSA finds this revision will not have an adverse impact on safety.

III. Regulatory Analysis and Notices

A. Legal Authority

This final rule is published under the authority of the Secretary of Transportation as set forth in the Federal Hazardous Materials Transportation Laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (*Regulatory Planning and Review*), as implemented by 49 CFR part 5, subpart B, requires agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' [2] In arriving at those conclusions, E.O. 12866 requires that agencies should consider ''both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify'' and ''maximize net benefits . . . unless a statute requires another regulatory approach.'' E.O. 12866 also requires that ''agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.'' Pursuant to 49 CFR part 5, subpart B, PHMSA and other Operating Administrations must generally choose the ''least costly regulatory alternative that achieves the relevant objectives'' unless required by law or compelling safety need. In addition, 49 CFR part 5, subpart B specifies that regulations should generally ''not be issued unless their benefits are expected to exceed their costs.''

Executive Order 12866 (*Regulatory Planning and Review*) and 49 CFR part 5, subpart B also require that PHMSA submit ''significant regulatory actions'' to the Office of Management and Budget (OMB) for review.[3] This rulemaking is not considered a significant regulatory action under Section 3(f) of E.O. 12866 and, therefore, was not formally reviewed by OMB.

PHMSA has complied with the requirements in E.O. 12866 as implemented by 49 CFR part 5, subpart B and determined this final rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for affected entities by allowing use of packagings manufactured under a SP for the useful life of the packaging beyond expiration of the SP. PHMSA finds the cost savings are associated with the reduction in burdens for new SP applications (*e.g.,* renewals) and lost inventory. Those cost savings may also result in reduced costs for the public to whom those entities may generally transfer a portion of their compliance costs. In addition, the final rule will produce budget savings for the Federal Government, hence taxpayers, due to the reduction of SP applications that would otherwise need to be processed by PHMSA personnel.

The table below presents PHMSA's estimates of the costs and associated number of hours for SP applications, renewals, and for additional parties to join an existing SP. These estimates are based on prevailing compensation rates for specific occupations involved in developing and processing SP applications, and the number of hours

[2] 58 FR 51735 (Oct. 4, 1993); 91 FR 22431 (Apr. 27, 2026); DOT Order 2100.7 (*Ensuring Reliance Upon Sound Economic Analysis in Department of Transportation Policies, Programs, and Activities*); *see also* DOT Order 2100.6B (*Policies and Procedures for Rulemakings*).

[3] 58 FR 51735 (Oct. 4, 1993).

each occupation is estimated to commit to a SP application, renewal or additional party application. The rows marked ''private'' are the estimates for an SP applicant to apply, renew, or for another entity to join as a party to the SP. The rows marked ''government'' are the estimated costs for PHMSA to process SP applications, renewals, and additional party applications. PHMSA has not developed a comprehensive list of the SPs that would be affected by this rule and hence cannot estimate total cost savings.

Occupation title	Sector	New special permit		Special permit renewal		New special permit—additional parties	
		Hours	Cost	Hours	Cost	Hours	Cost
General and Operations Managers	Private	3.25	$310	2	$191	0.7	$62
Engineers	Private	25	2,091	3.75	314	5.0	418
Lawyers	Private	4	524	1.5	196	0.8	105
Office and Administrative Support Occupations	Private	1.75	63	1.75	63	0.4	13
Private Sector Subtotal		34	2,987	9	764	6.8	597
General and Operations Managers	Government	6	819	1	136	1.2	164
Engineers	Government	16	1,815	6	681	3.2	363
Lawyers	Government	4	580	2	290	0.8	116
Compliance Officers	Government	10	860	4	344	2.0	172
Government Subtotal		36	4,074	13	1,451	7.2	815
Grand Total		70	7,062	22	2,215	14	1,412

C. Executive Orders 14192 and 14219

PHMSA has determined that this final rule is an E.O. 14192 (*Unleashing Prosperity Through Deregulation*) deregulatory action.[4] PHMSA finds the total costs of the rule on the regulated community will be less than zero. This final rule does not implicate any of the factors identified in section 2(a) of E.O. 14219 (*Ensuring Lawful Governance*) indicative of a regulation that is ''unlawful . . . [or] that undermine[s] the national interest.'' [5]

D. Energy-Related Executive Orders 13211, 14154, and 14156

PHMSA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 14156 (*Declaring a National Energy Emergency*) and E.O. 14154 (*Unleashing American Energy*).[6] The President has declared a national emergency to address America's inadequate energy development production, transportation, refining, and generation capacity and asserted a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of ''undue burden[s]'' on the identification, development, or use of domestic energy resources. PHMSA finds this final rule to be consistent with E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products.

In addition, this final rule is not a ''significant energy action'' under E.O. 13211 (*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*), which requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' [7] Because this final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; accordingly, OIRA has not designated this final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132 (*Federalism*) and the Presidential Memorandum (*Preemption*) published in the **Federal Register** on May 22, 2009.[8] Executive Order 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have ''substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.'' The Federal Hazardous Materials Transportation Laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts State, local, and Tribal requirements on certain covered subjects, unless the non-Federal requirements are ''substantively the same'' as the Federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This final rule addresses items covered in Paragraphs 2 and 5 above and would preempt State, local, and Tribal requirements not meeting the ''substantively the same'' standard. Though the final rule may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this final rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

[4] 90 FR 9065 (Feb. 6, 2025).

[5] 90 FR 10583 (Feb. 25, 2025).

[6] 90 FR 8433 (Jan. 29, 2025); 90 FR 8353 (Jan. 29, 2025).

[7] 66 FR 28355 (May 22, 2001).

[8] 64 FR 43255 (Aug. 10, 1999); 74 FR 24693 (May 22, 2009).

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a final rule that has been subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the final rule will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (*Proper Consideration of Small Entities in Agency Rulemaking*) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act.[9] DOT posts information on a dedicated web page to help small businesses understand and navigate Federal regulatory processes.[10] This final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. Because the final rule will reduce burdens, PHMSA certifies that it does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of $100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This final rule does not impose unfunded mandates under UMRA because it does not result in costs of $100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

PHMSA has analyzed this rule pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and has determined it is categorically excluded under 23 CFR 771.117(c)(20), which applies to the promulgation of rules, regulations, and directives. Under Section 9 of DOT Order 5610.1D, PHMSA may apply a categorical exclusion (CE) established in another Operating Administration's procedures. PHMSA followed the requirements outlined in DOT Order 5610.1D to apply the Federal Highway Administration's CE to this deregulatory action. PHMSA has determined no unusual circumstances are present under 23 CFR 771.117(b). PHMSA's Categorical Exclusion Determination memo for this action is available on PHMSA's website.[11]

I. Executive Order 13175

PHMSA analyzed this final rule according to the principles and criteria in E.O. 13175 (*Consultation and Coordination with Indian Tribal Governments*) and DOT Order 5301.1A (*Department of Transportation Tribal Consultation Policies and Procedures*).[12] Executive Order 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing ''substantial direct compliance costs'' or ''substantial direct effects'' on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (*Promoting International Regulatory Cooperation*) requires agencies to consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally.[13] In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (*Improving the Nation's Cybersecurity*) directed the Federal Government to improve its efforts to identify, to deter, and to respond to ''persistent and increasingly sophisticated malicious cyber campaigns.'' [14] PHMSA has considered the effects of the final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for affected entities.

M. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process better. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.* DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, or on DOT's website at *http://www.dot.gov/privacy.*

List of Subjects 49 CFR Part 173

Hazardous materials transportation, Packaging and containers, Radioactive materials, Reporting and recordkeeping requirements, Uranium.

In consideration of the foregoing, PHMSA amends 49 CFR Chapter I as follows:

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGING

■ 1. The authority citation for part 173 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96, and 1.97.

■ 2. In § 173.23, add paragraph (j) to read as follows:

§ 173.23 Previously authorized packaging.

* * * * *

(j) Notwithstanding the prohibition of use of an expired manufacturing special permit (as defined in 49 CFR 107.1) in accordance with 49 CFR 107.109(b), a packaging having been manufactured in accordance with a special permit which has expired and has yet to be adopted as an authorized packaging for broad and general use in this subchapter, may continue to be used in hazardous materials transportation service for its useful life provided the packaging continues to conform to applicable requirements of this subchapter and the terms of the most recent version of the special permit.

Issued in Washington, DC, on July 31, 2026, under the authority delegated in 49 CFR 1.97.

Paul J. Roberti,

Administrator, Pipeline and Hazardous Materials Safety Administration.

49 CFR Part 173

[Docket No. PHMSA–2025–0091 (HM–268C)]

RIN 2137–AG05

Hazardous Materials: Reducing Burdens on Domestic Companies Using Battery-Powered Equipment in Trades

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule modernizes the Materials of Trade (MOT) exception in the Hazardous Materials Regulations (HMR) by increasing the maximum allowable quantities of lithium batteries that can be transported as MOTs. This increase removes an undue regulatory burden which constrains the ability of construction, landscaping, mowing, tree service, food service, and entertainment companies to perform their trade.

DATES: This final rule is effective September 3, 2026.

FOR FURTHER INFORMATION CONTACT: Arthur Pollack, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 1200 New Jersey Avenue SE, Washington, DC 20590–0001, 202–366–8553, *arthur.pollack@dot.gov.*

I. PHMSA Action

A. What action is PHMSA taking in this final rule?

This final rule removes undue regulatory burdens by increasing the maximum allowable quantities of lithium batteries that can be transported as MOTs. This allowance applies to domestic companies in sectors such as construction, landscaping, mowing, tree service, food service, and entertainment—enabling them to carry the power sources required to perform their trade safely and more efficiently.

B. Does this action apply to me?

Effective 30 days after publication of this final rule, lithium batteries transported under conditions meeting the definition of an MOT under 49 CFR 171.8 may take advantage of the increased quantity limits outlined in 49 CFR 173.6.

C. Why is PHMSA taking this action?

PHMSA is taking this action in response to commenter feedback and to modernize 49 CFR 173.6 to update the quantity limits for lithium batteries under MOTs. The HMR currently limits the aggregate gross weight of materials of trade—other than certain diluted mixtures of Class 9 materials—in a motor vehicle to 200 kg (440 pounds). This revision increases this allowance for lithium batteries by authorizing up to 30 kg (66 pounds) per battery, a 500 kg (1102 pounds) gross vehicle limit, and no limit for batteries installed in equipment, while including safety provisions to prevent short circuits, shifting damage, and accidental activation. This action will reduce regulatory burdens for companies that transport batteries and battery-powered equipment in support of a trade without any compromise in safety because of the safety provisions included in the revision. Finally, this action advances the goals of multiple Executive Orders and provides annualized cost savings to American businesses—please see a more detailed discussion in the Executive Order (E.O.) 12866 discussion in ''Section III. Regulatory Analysis and Notices.''

II. Summary of Comments Received in Response to the Notice of Proposed Rulemaking

PHMSA published a notice of proposed rulemaking (NPRM), cited as *HM–268C,* to gather feedback on modernizing the HMR to authorize increased quantities of lithium batteries under the MOTs exception.[1] Please refer to the NPRM for background and discussion of the proposed change.

The following table alphabetically lists commenters to the NPRM:

[1] 90 FR 28578 (Jul. 1, 2025).

TABLE 1—LIST OF NPRM COMMENTERS

Commenter name	Docket No.
American Pyrotechnics Association (APA)	PHMSA–2025–0091–0004
Battery Council International (BCI)	PHMSA–2025–0091–0016
Commercial Vehicle Safety Alliance (CVSA)	PHMSA–2025–0014
Council on the Safe Transportation of Hazardous Articles, Inc. (COSTHA)	PHMSA–2026–0091–0011
Dangerous Good Advisory Council (DGAC)	PHMSA–2025–0091–0013
Infotrac Inc	PHMSA–2025–0091–0003
Medical Device Transport Council (MDTC)	PHMSA–2025–0091–0010
Outdoor Power Equipment Institute (OPEI)	PHMSA–2025–0091–0009
Pyro Shows, Inc	PHMSA–2025–0091–0005
Pyro Spectaculars, Inc	PHMSA–2025–0091–0007
Rechargeable Battery Association (PRBA)	PHMSA–2025–0091–0008
Utility Solid Waste Activities Group (USWAG)	PHMSA–2025–0091–0015
William Forbes	PHMSA–2025–0091–0012

A majority of respondents supported the proposal to amend the MOT exception to authorize the transportation of increased quantities of lithium batteries. Support for the rulemaking came from a diverse coalition of stakeholders, including battery and equipment manufacturers, pyrotechnics and entertainment associations, utility groups, and transportation safety councils. Organizations, including PRBA, OPEI, and BCI, argued that the current MOT quantity limits are outdated and overly restrictive, creating logistical and financial burdens that limit growth in their industries.

Specific trade sectors also highlighted unique operational needs. For instance, APA, Pyro Shows, Inc., and Pyro Spectaculars, Inc. stated that the rulemaking would facilitate the efficient transport of drones used to supplement professional fireworks displays. Similarly, USWAG and the MDTC noted that the increased limits are essential for the transport of equipment used in electrical grid maintenance and life-saving medical care, respectively. Infotrac Inc. and OPEI emphasized the practical relief this rulemaking would provide to landscaping and maintenance professionals who currently face difficulties transporting heavy equipment, such as robotic mowers and yard tractors, under fully regulated hazardous materials frameworks. Furthermore, safety organizations, such as COSTHA and DGAC, supported the proposal on the grounds that it provides necessary economic relief and operational efficiency while preserving essential safety frameworks, such as testing and labeling requirements.

A few commenters had additional questions or concerns regarding this action. First, several respondents asked to extend the MOTs lithium battery allowance to sodium ion batteries. PHMSA did not include that proposal in the NPRM and is not prepared to address this issue in the final rule. PHMSA will consider adding sodium ion batteries to the MOT provision in a future rulemaking. In addition, commenters asked PHMSA to increase the 30 kg (66 pound) limit for lithium batteries to accommodate portable power stations—*e.g.,* rechargeable devices providing household AC power, often marketed as battery packs or ''generators.'' PHMSA appreciates these comments, but the agency did not include this proposal in the NPRM and lacks sufficient data to support increasing the authorized weight limit in this proceeding. PHMSA may consider this request in a future rulemaking.

Second, various stakeholders recommended that PHMSA authorize prototype and low-production-run batteries as MOT. These stakeholders noted that the NPRM would require all batteries to meet the testing criteria in Section 38.3 of the UN Manual of Tests and Criteria, and that this requirement would prevent untested prototypes—which are typically exempt from standard testing requirements—from being transported as MOT. PHMSA notes that prototype batteries are generally transported for testing, development, or certification. These commercial shipments are outside the scope of the MOT exception, which only applies to activities that are ''in direct support of a principal business.'' Furthermore, prototype batteries do not have an established safety record and generally pose a heightened risk of fire or thermal runaway during transport. Applying the strict safety requirements of the UN Manual of Tests and Criteria is necessary to mitigate the elevated risk to public safety that accompanies these shipments.

Third, PRBA and BCI requested a revision to 49 CFR 173.6 to clarify that outer packaging is not required for lithium batteries that are adequately secured against shifting. This allowance currently exists for other receptacles and articles under the MOT provisions. PHMSA agrees that this revision promotes regulatory consistency and efficiency and is amending 49 CFR 173.6 to authorize explicitly the transport of lithium batteries without outer packaging if they are properly secured to prevent movement during transport.

Finally, CVSA and Mr. William Forbes submitted comments opposing the proposed revisions to the MOT provisions. CVSA maintains that the current 440-pound weight allowance is sufficient and that increasing the quantity of lithium batteries directly correlates to the severity of potential incidents. CVSA cites recent crashes and fires involving lithium batteries that have resulted in significant highway and port closures. CVSA also points to the petitioner's own admission—that small businesses often lack the expertise to handle these materials outside of MOT—to argue that granting regulatory relief to inexperienced operators is inherently unsafe. Sharing similar concerns, Mr. Forbes characterizes the proposed weight increase as ''astronomical'' and argues that it poses an ''inherent risk'' without sufficient safety data. Mr. Forbes contends that the rulemaking would place an undue burden on first responders charged with managing these incidents.

PHMSA acknowledges these concerns but disagrees that the current 440-pound allowance is sufficient to meet industry needs or that the proposed changes pose an unacceptable safety risk. The weight increase in this final rule is a modest and incremental adjustment—not an ''astronomical'' expansion—that balances the operational needs of small businesses with robust safety standards. PHMSA is also retaining all mandatory performance-based packaging and hazard communication requirements currently applicable to lithium batteries.

Compliance with these requirements ensures that the increased weight allowance will not present an unacceptable risk to public safety. Consequently, PHMSA concludes that the final rule will not place an undue burden on first responders and that the economic benefits of facilitating commerce for small businesses—including the estimated annualized cost savings of $14.4 million (2024 dollars) outlined in the final Regulatory Impact Analysis (RIA) that is available for review in the rulemaking docket—outweigh any marginal increase in risk.

For these reasons, PHMSA is publishing this final rule to modernize 49 CFR 173.6 to update the quantity limits for lithium batteries under MOT. PHMSA finds these revisions will not have any adverse impact on safety.

III. Regulatory Analysis and Notices

A. Legal Authority

This final rule is published under the authority of the Secretary of Transportation as set forth in the Federal Hazardous Materials Transportation Laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

E.O. 12866 (*Regulatory Planning and Review*), as implemented by 49 CFR part 5, subpart B, requires agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' [2] In arriving at those conclusions, E.O. 12866 requires that agencies should consider ''both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify'' and ''maximize net benefits . . . unless a statute requires another regulatory approach.'' E.O. 12866 also requires that ''agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.'' Pursuant to 49 CFR part 5, subpart B, PHMSA and other Operating Administrations must generally choose the ''least costly regulatory alternative that achieves the relevant objectives'' unless required by law or compelling safety need. In addition, 49 CFR part 5, subpart B specifies that regulations should generally ''not be issued unless their benefits are expected to exceed their costs.''

E.O. 12866 and 49 CFR part 5, subpart B also require that PHMSA submit ''significant regulatory actions'' to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This final rule is not a significant regulatory action pursuant to E.O. 12866 and has not been designated as a ''major rule'' as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by 49 CFR part 5, subpart B and determined this final rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for the construction, landscaping, food service, and entertainment industries by distinguishing the weight limits for lithium batteries from other Class 9 hazardous materials. PHMSA estimated that these changes will result in annualized cost savings of $14.4 million (2024 dollars) at three percent and seven percent discount rates. The annualized cost savings under the three and seven percent discount rates are the same given that the annual cost savings are constant over the 10-year analysis period. A copy of the final RIA is available for review in the rulemaking docket.

C. Executive Orders 14192 and 14219

PHMSA has determined that this final rule is an E.O. 14192 (*Unleashing Prosperity Through Deregulation*) deregulatory action.[3] PHMSA finds the total costs of the rule on the regulated community will be less than zero. This final rule does not implicate any of the factors identified in section 2(a) of E.O. 14219 (*Ensuring Lawful Governance*) indicative of a regulation that is ''unlawful . . . [or] that undermine[s] the national interest.'' [4]

D. Energy-Related Executive Orders 13211, 14154, and 14156

PHMSA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 14156 (*Declaring a National Energy Emergency*) and E.O. 14154 (*Unleashing American Energy*).[5] The President has declared a national emergency to address America's inadequate energy development production, transportation, refining, and generation capacity and asserted a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of ''undue burden[s]'' on the identification, development, or use of domestic energy resources. PHMSA finds this final rule to be consistent with E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products.

In addition, this final rule is not a ''significant energy action'' under E.O. 13211 (*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*), which requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' [6] Because this final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; accordingly, OIRA has not designated this final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132 (*Federalism*) and the Presidential Memorandum (*Preemption*) published in the **Federal Register** on May 22, 2009.[7] E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have ''substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.'' The Federal Hazardous Materials Transportation laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts State, local, and Tribal requirements on certain covered subjects, unless the non-Federal requirements are ''substantively the same'' as the Federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

[2] 58 FR 51735 (Oct. 4, 1993); 91 FR 22431 (Apr. 27, 2026); DOT Order 2100.7 (*Ensuring Reliance Upon Sound Economic Analysis in Department of Transportation Policies, Programs, and Activities*); *see also* DOT Order 2100.6B (*Policies and Procedures for Rulemakings*).

[3] 90 FR 9065 (Feb. 6, 2025).

[4] 90 FR 10583 (Feb. 25, 2025).

[5] 90 FR 8433 (Jan. 29, 2025); 90 FR 8353 (Jan. 29, 2025).

[6] 66 FR 28355 (May 22, 2001).

[7] 74 FR 24693 (May 22, 2009).

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This final rule addresses items covered in Paragraph 1 and 2 above and will preempt State, local, and Tribal requirements not meeting the ''substantively the same'' standard. Though the final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this final rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a final rule that has been subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the final rule will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (*Proper Consideration of Small Entities in Agency Rulemaking*) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act.[8] DOT posts information on a dedicated web page to help small businesses understand and navigate Federal regulatory processes.[9] This final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. Because the final rule will reduce burdens, PHMSA certifies that it does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of $100 million or more (in 1996 dollars) in any given year, the agency must prepare, among other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This final rule does not impose unfunded mandates under UMRA because it does not result in costs of $100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

PHMSA has analyzed this rule pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and has determined it is categorically excluded under 23 CFR 771.117(c)(20), which applies to the promulgation of rules, regulations, and directives. Under section 9 of DOT Order 5610.1D, PHMSA may apply a categorical exclusion (CE) established in another Operating Administration's procedures. PHMSA followed the requirements outlined in DOT Order 5610.1D to apply the Federal Highway Administration's CE to this deregulatory action. PHMSA has determined no unusual circumstances are present under 23 CFR 771.117(b). PHMSA's Categorical Exclusion Determination memo for this action is available on PHMSA's website.[10]

I. Executive Order 13175

PHMSA analyzed this final rule according to the principles and criteria in E.O. 13175 (*Consultation and Coordination with Indian Tribal Governments*) and DOT Order 5301.1A *(Department of Transportation Tribal Consultation Policies and Procedures*).[11] E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing ''substantial direct compliance costs'' or ''substantial direct effects'' on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) require PHMSA to provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (*Promoting International Regulatory Cooperation*) requires agencies to consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally.[12] In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the

[8] 67 FR 53461 (Aug. 16, 2002).

[10] PHMSA, *Implementing Procedures* (Aug. 28, 2025), available at: *https://www.phmsa.dot.gov/planning-and-analytics/environmental-analysis-and-compliance/implementing-procedures.*

[11] 65 FR 67249 (Nov. 9, 2000).

[12] 77 FR 26413 (May 4, 2012).

standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of this deregulatory action and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (*Improving the Nation's Cybersecurity*) directed the Federal Government to improve its efforts to identify, to deter, and to respond to ''persistent and increasingly sophisticated malicious cyber campaigns.'' [13] PHMSA has considered the effects of the final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for affected entities.

M. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process better. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.* DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, and may be viewed on DOT's website at *http://www.dot.gov/privacy.*

List of Subjects

49 CFR Part 173

Hazardous materials transportation, Packaging and containers, Radioactive materials, Reporting and recordkeeping requirements.

In consideration of the foregoing, PHMSA amends 49 CFR Chapter I as follows:

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

■ 1. The authority citation for part 173 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96, and 1.97.

■ 2. Amend § 173.6 by:

■ a. Adding paragraph (a)(7)(iii);
■ b. Revising paragraph (b)(3);
■ c. Adding paragraph (b)(6);
■ d. Revising paragraph (c)(4);
■ e. Adding paragraph (c)(5); and
■ f. Revising paragraph (d).

The revisions to read as follows:

§ 173.6 Materials of trade exceptions.

(a) * * *

(7) * * *

(iii) Except when the cell or battery is contained in equipment, cells and batteries described in 173.185 of this part may not exceed 30 kg (66 pounds) net weight for each cell or battery and 500 kg (1102 pounds) aggregate net weight on a motor vehicle. Cells and batteries, including when contained in or packed with equipment, must be of the type proven to meet the criteria in part III, sub-section 38.3 of the UN Manual of Tests and Criteria (IBR; see § 171.7 of this subchapter).

* * * * *

(b) * * *

(3) Outer packagings are not required for receptacles (*e.g.,* cans and bottles), articles, or batteries that are secured against shifting in cages, carts, bins, boxes, or compartments or by other means.

* * * * *

(6) Cells and batteries, including cells and batteries contained in equipment, must be packaged or secured in a manner to prevent:

(i) Short circuits;

(ii) Damage caused by shifting or placement within the package, if applicable; and

(iii) Accidental activation of the equipment.

* * * * *

(c) * * *

(4) Cells or batteries, including when contained in or packed with equipment, in packages exceeding 30 kg (66 pounds) net weight of batteries must be labeled with the Class 9 label as specified in § 172.447 and marked with the four-digit UN identification number, as applicable.

(5) The operator of a motor vehicle that contains a material of trade must be informed of the presence of the hazardous material (including whether the package contains a reportable quantity) and must be informed of the requirements of this section.

(d) *Aggregate gross weight.* Except for a material of trade authorized by paragraphs (a)(1)(iii) and (a)(7)(iii) of this section, the aggregate gross weight of all materials of trade on a motor vehicle may not exceed 200 kg (440 pounds).

* * * * *

Issued in Washington, DC, on July 31, 2026, under the authority delegated in 49 CFR 1.97.

Paul J. Roberti,

Administrator, Pipeline and Hazardous Materials Safety Administration.

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 177

[Docket No. PHMSA–2025–0100 (HM–268L)]

RIN 2137–AG14

Hazardous Materials: Adoption of Department of Transportation Special Permits 12412 and 11646 Into the Hazardous Materials Regulations

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: PHMSA is amending the Hazardous Materials Regulations to adopt the provisions of U.S. Department of Transportation (DOT) special permit (SP) 12412 and DOT SP 11646. These amendments will provide greater regulatory flexibility and eliminate the need for special permit renewal requests, reducing paperwork burdens and facilitating commerce while maintaining an equivalent level of safety.

DATES: *Effective date:* This final rule is effective September 3, 2026.

FOR FURTHER INFORMATION CONTACT: Ryan Larson, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–8553, *ryan.larson@dot.gov.*

I. PHMSA Action

A. What action is PHMSA taking in this Final Rule?

PHMSA is adopting the provisions of DOT SPs 12412 and 11646 into the Hazardous Materials Regulations (HMR; 49 CFR parts 171–180). The adoption of these special permits will authorize the discharge (*i.e.,* emptying) of certain hazardous materials from specified packaging types without first removing the packaging from the vehicles on which they are transported. These special permits have been in place for over 20 years and have a well-established safety record.

B. Does this action apply to me?

Effective 30 days after publication of this final rule, persons transporting the specified classes of materials in the specified packaging types by motor vehicle will no longer be required to remove those packages from their vehicles prior to discharging their contents. Furthermore, stakeholders will no longer need to expend the time and resources associated with obtaining a special permit.

C. Why is PHMSA taking this action?

PHMSA is taking this action in response to commenter feedback and to improve the affected entities' ability to provide abundant, reliable, and affordable products in response to residential, commercial, and industrial demand. PHMSA is also taking this action as part of its ongoing review of special permits that are appropriate for adoption into the HMR based on their safety record and positive impact on stakeholders.

II. Summary of Comments Received in Response to the Notice of Proposed Rulemaking

PHMSA published a notice of proposed rulemaking (NPRM), cited as *HM–268L,* to gather feedback on adopting the provisions of DOT SPs 12412 and 11646 into the HMR.[1] Please refer to the NPRM for background and discussion of the proposed changes.

The following table alphabetically lists commenters to the NPRM:

Commenter name	Docket No.
Alliance for Chemical Distribution	PHMSA–2025–0100–0010
Dangerous Goods Advisory Council	PHMSA–2025–0100–0008
Household & Commercial Products Association (HCPA)	PHMSA–2025–0100–0005
Industrial Packaging Association of North America (IPANA)	PHMSA–2025–0100–0007
Rex Railsback	PHMSA–2025–0100–0002
William Forbes	PHMSA–2025–0100–0006

PHMSA received six sets of comments in response to the NPRM, five of which were supportive of adopting both DOT SPs 12412 and 11646 into the HMR. However, some supporters of the proposed revisions also provided recommendations concerning the implementation of these (and other related) special permits.

First, IPANA provided comments supporting the adoption of both special permits but added that PHMSA should consider referencing 49 CFR 177.837—which provides instructions for bonding and grounding containers (other than cargo tanks) prior to and during transfer of lading. PHMSA concurs with IPANA's comment to reference 49 CFR 177.837 to remind stakeholders of the existing requirements for the proper bonding and grounding of containers transferring Class 3 materials. As such, PHMSA is adding a reference to the bonding and grounding requirements in the new paragraphs (h)(1) and (h)(2) in 49 CFR 177.834.

Second, Rex Railsback provided comments suggesting that PHMSA should additionally adopt the provisions of DOT SP 21260, which authorizes the offloading of materials not covered by DOT SPs 12412 and 11646. Mr. Railsback noted that the adoption of DOT SP 21260 would improve compliance and safety by providing greater visibility in the HMR as compared to a special permit. PHMSA acknowledges the recommendation to adopt DOT SP 21260 into the HMR. However, DOT SP 21260 imposes stricter compliance requirements for high-hazard materials, including requiring packaging outlets to meet the same standards as cargo tanks. Because PHMSA did not propose such changes in the NPRM, further evaluation and stakeholder input is needed. PHMSA may consider adopting this recommendation in a future rulemaking.

Third, HCPA provided comments on a provision of DOT SP 12412 being adopted in this final rule as new paragraph 49 CFR 177.834(h)(2). This provision states that hypochlorite solutions and fluorosilicic acid may be loaded on the same vehicle and transported in separate Intermediate Bulk Containers (IBCs) provided certain safety precautions are taken, even though these two materials could create unsafe conditions if mixed. HCPA recommended that PHMSA consider expanding this exception to include additional materials, such as permitting certain acids to be transported on the same vehicle as alkaline materials, provided additional safety measures are in place. PHMSA acknowledges HCPA's comment regarding additional exceptions. However, PHMSA did not propose such changes in the NPRM. PHMSA declines to make such revisions in this final rule without further evaluation by subject matter experts and an opportunity for stakeholder comment.

Lastly, William Forbes opposed the proposed adoption of DOT SPs 12412 and 11646. Mr. Forbes commented that additional measures are needed to prevent the commercial use of IBCs to deliver gasoline to consumer vehicles. PHMSA acknowledges the safety concerns regarding the use of IBCs for mobile refueling operations. PHMSA notes that DOT SP 12412, as adopted in this final rule, does not authorize gasoline as one of the specified materials because gasoline is a Class 3 Packing Group II material. However, PHMSA recognizes that DOT SP 11646, as also adopted in this final rule, does not explicitly prohibit the discharge of gasoline from drums situated on a motor vehicle. Because PHMSA does not intend for the adoption of DOT SP 11646 to serve as justification for mobile refueling platforms, this final rule amends 49 CFR 177.834(h)(1) to specify that these provisions do not apply to petroleum distillate fuels. In addition, Mr. Forbes also expressed concern that this final rule will lead to IBCs and portable tanks replacing cargo tanks without equivalent safety controls. PHMSA acknowledges this concern regarding the substitution of these packagings for cargo tanks. However, PHMSA has not proposed any new materials for transport in these types of packaging; therefore, PHMSA does not anticipate any impact on the cargo tank market. On the contrary, this final rule will improve safety by reducing the hazards associated with removing fully loaded packagings from a motor vehicle prior to discharge. By adopting the special permits' provisions that allow for the discharge of contents from a motor vehicle, PHMSA is adopting specific safety controls that have established a successful safety record over many years of widespread use.

For these reasons, PHMSA is revising 49 CFR 177.834 to allow the unloading of certain hazardous materials from certain packagings while remaining on the motor vehicle but requiring safety

[1] 90 FR 28581 (Jul. 1, 2025).

controls, including attendance by a qualified person during unloading, not allowing the manifolding of multiple packages, and requiring that hoses are not attached to outlets during transportation.

III. Regulatory Analysis and Notices

A. Legal Authority

This final rule is published under the authority of the Secretary of Transportation as set forth in the Federal Hazardous Materials Transportation laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (*Regulatory Planning and Review*), as implemented by 49 CFR part 5, subpart B, requires agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' [2] In arriving at those conclusions, E.O. 12866 requires that agencies should consider ''both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify'' and ''maximize net benefits . . . unless a statute requires another regulatory approach.'' E.O. 12866 also requires that ''agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.'' Pursuant to 49 CFR part 5, subpart B, PHMSA and other Operating Administrations must generally choose the ''least costly regulatory alternative that achieves the relevant objectives'' unless required by law or compelling safety need. In addition, 49 CFR part 5, subpart B specifies that regulations should generally ''not be issued unless their benefits are expected to exceed their costs.''

E.O. 12866 and 49 CFR part 5, subpart B also require that PHMSA submit ''significant regulatory actions'' to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This final rule is not a significant regulatory action pursuant to E.O. 12866 and has not been designated as a ''major rule'' as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by 49 CFR part 5, subpart B and determined that this final rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for affected entities by reducing the time and manpower necessary for entities needing to unload these materials efficiently and safely without the need for special permits. PHMSA finds these cost savings will also result in reduced costs for the public to whom those entities generally transfer a portion of their compliance costs. In addition, the final rule will produce cost savings to the Federal Government, hence taxpayers, due to the reduction of special permit applications that would otherwise need to be processed by PHMSA personnel.

C. Executive Orders 14192 and 14219

PHMSA has determined that this final rule is an E.O. 14192 (*Unleashing Prosperity Through Deregulation*) deregulatory action.[3] PHMSA finds the total costs of the rule on the regulated community will be less than zero. This final rule does not implicate any of the factors identified in section 2(a) of E.O. 14219 (*Ensuring Lawful Governance*) indicative of a regulation that is ''unlawful . . .[or] that undermine[s] the national interest.'' [4]

D. Energy-Related Executive Orders 13211, 14154, and 14156

PHMSA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 14156 (*Declaring a National Energy Emergency*) and E.O. 14154 (*Unleashing American Energy*).[5] The President has declared a national emergency to address America's inadequate energy development production, transportation, refining, and generation capacity and asserted a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from, *inter alia,* the removal of ''undue burden[s]'' on the identification, development, or use of domestic energy resources. PHMSA finds this final rule to be consistent with E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products.

In addition, this final rule is not a ''significant energy action'' under E.O. 13211 (*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*), which requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' [6] Because this final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; accordingly, OIRA has not designated this final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132 (*Federalism*) [7] and the Presidential Memorandum (*Preemption*) published in the **Federal Register** on May 22, 2009.[8] E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have ''substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.'' The Federal Hazardous Materials Transportation laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts State, local, and tribal requirements on certain covered subjects, unless the non-Federal requirements are ''substantively the same'' as the Federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This final rule addresses items covered in Paragraph (2) above and would preempt State, local, and Tribal requirements not meeting the ''substantively the same'' standard. Although the final rule may (when finalized) operate to preempt some State requirements, it would not impose any regulation that has substantial direct

[2] 58 FR 51735 (Oct. 4, 1993).

[3] 90 FR 9065 (Feb. 6, 2025).

[4] 90 FR 10583 (Feb. 25, 2025).

[5] 90 FR 8433 (Jan. 29, 2025); 90 FR 8353 (Jan. 29, 2025).

[6] 66 FR 28355 (May 22, 2001).

[7] 64 FR 43255 (Aug. 10, 1999).

[8] 74 FR 24693 (May 22, 2009).

effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this final rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a final rule that has been subject to notice-and-comment rulemaking under the Administrative Procedure Act unless the agency head certifies that the final rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (*Proper Consideration of Small Entities in Agency Rulemaking*) [9] obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts information on a dedicated web page to help small businesses understand and navigate Federal regulatory processes.[10] This final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. Because the final rule is expected to reduce burdens, PHMSA certifies that it does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of $100 million or more (in 1996 dollars) in any given year, the agency must prepare, among other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This final rule does not impose unfunded mandates under UMRA because it does not result in costs of $100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

PHMSA has analyzed this rule pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and has determined it is categorically excluded under 23 CFR 771.117(c)(20), which applies to the promulgation of rules, regulations, and directives. Under Section 9 of DOT Order 5610.1D, PHMSA may apply a categorical exclusion (CE) established in another Operating Administration's procedures. PHMSA followed the requirements outlined in DOT Order 5610.1D to apply the Federal Highway Administration's CE to this deregulatory action. PHMSA does not anticipate any adverse environmental impacts from this rule, and PHMSA has determined no unusual circumstances are present under 23 CFR 771.117(b). PHMSA's Categorical Exclusion Determination memo for this action is available on PHMSA's website.[11]

I. Executive Order 13175

PHMSA analyzed this final rule according to the principles and criteria in E.O. 13175 (*Consultation and Coordination with Indian Tribal Governments*) and DOT Order 5301.1A (*Department of Transportation Tribal Consultation Policies and Procedures*).[12] E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing ''substantial direct compliance costs'' or ''substantial direct effects'' on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the final rule and determined that it would not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this final rule would not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking would not create, amend, or rescind any existing information collections. However, this rulemaking eliminates the need for persons to renew a special permit, resulting in a decrease in paperwork burden for special permit holders. PHMSA estimates the reduction in information collection burden as follows:

OMB Control No. 2137–0051: Rulemaking, Special Permits, and Preemption Requirements

Decrease in Annual Number of Respondents: 77.

Decrease in Annual Responses: 77.

Decrease in Annual Burden Hours: 115.

Decrease in Annual Burden Cost: $0.

Please direct your requests for a copy of this information collection to Steven Andrews, Office of Hazardous Materials Standards (PHH–12), Pipeline and Hazardous Materials Safety Administration, 1200 New Jersey Avenue SE, 2nd Floor, Washington, DC 20590–0001.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (*Promoting International Regulatory Cooperation*) requires agencies to consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally.[13] In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the

[9] 67 FR 53461 (Aug. 16, 2002).

[10] DOT, *Rulemaking Requirements Related to Small Entities* (last accessed Sept 3, 2024), available at: *https://www.transportation.gov/regulations/rulemaking-requirements-concerning-small-entities.*

[11] DOT, PHMSA, *Implementing Procedures* (Aug. 28, 2025), available at: *https://www.phmsa.dot.gov/planning-and-analytics/environmental-analysis-and-compliance/implementing-procedures.*

[12] 65 FR 67249 (Nov. 9, 2000).

[13] 77 FR 26413 (May 4, 2012).

United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the final rule and has determined that its regulatory amendments would not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (*Improving the Nation's Cybersecurity*) directed the Federal Government to improve its efforts to identify, to deter, and to respond to ''persistent and increasingly sophisticated malicious cyber campaigns.'' [14] PHMSA has considered the effects of the final rule and determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

M. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process better. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.* DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, or on DOT's website at *http://www.dot.gov/privacy.*

List of Subjects in 49 CFR Part 177

Hazardous materials transportation, motor carriers, radioactive materials, reporting, and recordkeeping requirements.

In consideration of the foregoing, PHMSA amends 49 CFR Chapter I as follows:

PART 177—CARRIAGE BY PUBLIC HIGHWAY

■ 1. The authority citation for part 177 continues to read as follows:

Authority: 49 U.S.C. 5101–5128; sec. 112 of Pub. L. 103–311, 108 Stat. 1673, 1676 (1994); sec. 32509 of Pub. L. 112–141, 126 Stat. 405, 805 (2012); 49 CFR 1.81 and 1.97.

■ 2. In § 177.834, revise paragraph (h) to read as follows:

§ 177.834 General requirements.

* * * * *

(h) *Precautions concerning containers in transit; fueling road units.* Reasonable care should be taken to prevent undue rise in temperature of containers and their contents during transit. There must be no tampering with such container or the contents thereof nor any discharge of the contents of any container between point of origin and point of billed destination. Discharge of contents of any container, other than a cargo tank, IM portable tank, or packaging authorized in paragraphs (h)(1) and (h)(2) of this section, must not be made prior to removal from the motor vehicle. Nothing contained in this paragraph shall be so construed as to prohibit the fueling of machinery or vehicles used in road construction or maintenance.

(1) *Drums.* For the purpose of this section only, Class 3 (PG II and III other than petroleum distillate fuels), Division 6.1 (PG II and III), Class 8 (PG II and PG III), and Class 9 materials are authorized. For liquids authorized under this section, the following conditions apply—

(i) Product transfer must be through pumps mounted on the motor vehicle or with an injection system indirectly mounted on a motor vehicle;

(ii) The drums must be attended at all times during unloading operations by a qualified person. For the purposes of this requirement, ''attended'' and ''qualified'' have the meanings described in paragraphs (i)(3) and (i)(4) of this section, respectively;

(iii) Hoses shall not be attached to container outlets during transportation;

(iv) Drums shall not be manifolded together during transportation;

(v) Each reused drum must meet the requirements prescribed in § 173.28 or an active special permit, as applicable; and

(vi) For Class 3 materials, see § 177.837(b).

(2) *IBCs and DOT specification 57 portable tanks.* For liquids other than Class 3 (PG II); Class 3 (PG III with a flash point of less than 100 °F (38°C)); Division 5.1 (PG II); or Division 6.1 (PG II) authorized to be transported in metal, rigid plastic, and composite UN standard IBCs or DOT Specification 57 portable tanks, the following conditions apply—

(i) Transportation is limited to private or contract motor vehicle;

(ii) IBC design types authorized are UN 31A, 31B, 31N, 31H1, 31H2, and 31HZ1;

(iii) If the IBC or portable tank is pressurized, it must be equipped with a pressure relief device set to open at not higher than two-thirds of the test pressure or 9 psig for a metal IBC;

(iv) Except for hypochlorite solutions and fluorosilicic acid, two or more materials may not be loaded on the same vehicle if any mixture of the materials would cause an unsafe condition. Hypochlorite solutions and fluorosilicic acid may be loaded on the same vehicle and transported in separate IBCs provided—

(A) No more than two IBCs are transported on a motor vehicle;

(B) Each IBC has a capacity not exceeding 1703 L (450 gallons);

(C) The materials shall not be discharged at the same time; and

(D) The hazardous materials are used for water treatment purposes only.

(v) Packagings shall not be manifolded together or have discharge outlets permanently connected to any part of the vehicle, including its discharge system. Hoses shall not remain attached to IBCs or portable tanks (*e.g.,* discharge outlets) during transportation (movement) of the motor vehicle;

(vi) The packagings must be attended at all times during unloading operations by a qualified person. For the purposes of this requirement, ''attended'' and ''qualified'' have the meanings described in paragraphs (i)(3) and (4) of this section, respectively;

(vii) Each IBC or DOT specification 57 portable tank must be discharged by—

(A) Using a mechanical pump with a positive means of stopping the flow of liquid from the pump;

(B) Gravity; or

(C) Pressurizing the IBC or portable tank.

(viii) Before starting each transfer of product to a receiving system, the person performing that function must determine that each component of the discharge system (including the hose) is of sound quality, free of leaks, and that connections are secure. A hose or associated equipment that shows signs of leakage, significant bulging, or other defects may not be used;

(ix) Packages shall not be filled or refilled while on a motor vehicle unless filled or refilled on the private property of the shipper, filler, or refiller. Prior to refilling, each IBC and its service equipment must be visually inspected in accordance with the provisions of §§ 173.35(b) and 180.352 and each DOT specification 57 portable tank and its service equipment must be visually

[14] 86 FR 26633 (May 17, 2021).

inspected in accordance with the provisions of § 180.605;

(x) Prior to reentering transportation, all hazardous materials must be purged from the pump, if equipped, the piping, and the discharge hose, as far as practicable; or all free-flowing hazardous material must be removed from the pump, if equipped, piping and the discharge hose in accordance with § 173.33(e). Residue remaining in these devices after product draining is not subject to this requirement provided these devices are capped and secured during transportation;

(xi) If the IBC or portable tank is unloaded using a pump, or if it is pressurized for unloading, prior to using a new or repaired transfer hose assembly (hose and associated fittings), the hose assembly must be subjected to a pressure test. The pressure test must be performed at no less than the pressure the hose is expected to be subjected to during product transfer. This test must be performed with all hose and hose fittings arranged in the configuration to be employed during transfer operations. Burst pressure must be at least four times the service pressure of the pump; and

(xii) For Class 3 materials, see § 177.837(b).

* * * * *

Issued in Washington, DC, on July 31, 2026, under the authority delegated in 49 CFR 1.97.

Paul J. Roberti,

Administrator, Pipeline and Hazardous Materials Safety Administration.

[Docket No. PHMSA–2025–0103 (HM–268O)]

RIN 2137–AG17

Hazardous Materials: Adoption of Department of Transportation Special Permit 14175

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule removes undue regulatory burdens by adopting the provisions of U.S. Department of Transportation (DOT) special permit (SP) 14175 to authorize a 10-year requalification period and the ultrasonic examination (UE) testing method for DOT specification 3A and 3AA cylinders in flammable and non-flammable, nonpoisonous gas service. This adoption reflects advances in testing technology and will relieve stakeholders of the burden of performing more frequent cylinder requalification.

DATES: This final rule is effective September 3, 2026.

FOR FURTHER INFORMATION CONTACT: Ryan Larson, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–8553, *ryan.larson@dot.gov.*

I. PHMSA Action

A. What action is PHMSA taking in this final rule?

PHMSA is adopting the provisions of DOT SP 14175 into the Hazardous Materials Regulations (HMR; 49 CFR parts 171–180) by adding new paragraph (b)(2) to 49 CFR 180.209. This change will authorize a 10-year requalification interval (rather than five years) when either UE testing or hydrostatic testing with visual inspection is used for DOT specification 3A and 3AA cylinder bundles in flammable and non-flammable, nonpoisonous gas service.

B. Does this action apply to me?

Effective 30 days after publication of this final rule, holders of DOT SP 14175 will no longer need a special permit to requalify DOT specification 3A or 3AA cylinder bundles used in flammable and non-flammable, nonpoisonous gas service using UE.

C. Why is PHMSA taking this action?

PHMSA is taking this action in response to commenter feedback and to provide relief to stakeholders by allowing longer requalification intervals for the specified cylinder types when used in certain types of service. Allowing for the use of a 10-year requalification interval with UE testing or hydrostatic testing with visual inspection will reduce costs and provide greater efficiencies while also maintaining safety. PHMSA is also taking this action as part of its ongoing review of special permits that are appropriate for adoption into the HMR based on their safety record and positive impact on stakeholders.

II. Summary of Comments Received in Response to the Notice of Proposed Rulemaking

PHMSA published a notice of proposed rulemaking (NPRM), cited as *HM–268O,* to gather feedback on adopting DOT SP 14175 into the HMR.[1] Please refer to the NPRM for background and discussion of the proposed changes.

The following table alphabetically lists commenters to the NPRM:

Commenter name	Docket No.
Compressed Gas Association (CGA)	PHMSA–2025–0103–0003
Dangerous Goods Advisory Council	PHMSA–2025–0103–0004

Both commenters supported adopting DOT SP 14175 into the HMR. However, CGA had additional questions or suggestions related to the NPRM proposal.

First, CGA argued that if UE and hydrostatic testing are treated as equals, the NPRM proposal to add text to Table 1 to Paragraph (a) in 49 CFR 180.209 and 49 CFR 180.209(b)(2) requiring UE to be performed by a valid Requalification Identification Number (RIN) holder for DOT 3A and 3AA cylinders is unnecessary. PHMSA concurs with CGA's comment that the proposed text requiring a valid RIN holder to perform UE could cause confusion since no similar requirement is stated for the other test methods—such as hydrostatic pressure testing. In addition, PHMSA notes that 49 CFR 180.205 already requires a valid RIN holder for all requalification functions. PHMSA is therefore removing the text in Table 1 to Paragraph (a) and Paragraph (b)(2) of 49 CFR 180.209

[1] 90 FR 28585 (July 1, 2025).

specific to valid RIN holders in this final rule.

Second, CGA noted that a prior rulemaking (HM–219D) authorized UE for certain cylinders based on a petition for rulemaking (P–1727) to incorporate by reference the UE testing procedures in CGA C–20 *Requalification Standard for Metallic, DOT and TC 3-series Gas Cylinders and Tubes Using Ultrasonic Examination, Second Edition*.[2] CGA noted that the HM–219D final rule failed to identify all DOT 3-series cylinders in Table 1 to Paragraph (a) in 49 CFR 180.209 as being eligible for UE and—unintentionally—only authorized UE for DOT 3T specification cylinders and exemption or special permit cylinders. PHMSA acknowledges CGA's comment that UE should be authorized for the additional DOT 3-series cylinders as was requested in the CGA petition P–1727. While PHMSA is not incorporating these revisions in this final rule, PHMSA will consider this suggestion in a future rulemaking.

Third, CGA suggested that PHMSA adopt provisions from additional special permits—such as DOT SP 20341—which authorize UE for additional cylinder types. CGA noted that in doing so, PHMSA should update the reference for UE from CGA C–20–2014 to the more recent CGA C–20–2021, as proposed in CGA petition P–1766. While PHMSA is not incorporating these revisions in this final rule, PHMSA will consider this suggestion in a future rulemaking.

For these reasons, PHMSA concludes that the revisions will maintain appropriate levels of safety and authorize reasonable flexibilities and is therefore adopting the provisions of DOT SP 14175 into 49 CFR 180.209 in this final rule. PHMSA does not expect these revisions to have substantial adverse impact on safety.

III. Regulatory Analysis and Notices

A. Legal Authority

This final rule is published under the authority of the Secretary of Transportation as set forth in the Federal Hazardous Materials Transportation laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (*Regulatory Planning and Review*), as implemented by 49 CFR part 5, subpart B, requires agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' [3] In arriving at those conclusions, E.O. 12866 requires that agencies should consider ''both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify'' and ''maximize net benefits . . . unless a statute requires another regulatory approach.'' E.O. 12866 also requires that ''agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.'' Pursuant to 49 CFR part 5, subpart B, PHMSA and other Operating Administrations must generally choose the ''least costly regulatory alternative that achieves the relevant objectives'' unless required by law or compelling safety need. In addition, 49 CFR part 5, subpart B specifies that regulations should generally ''not be issued unless their benefits are expected to exceed their costs.''

E.O. 12866 and 49 CFR part 5, subpart B also require that PHMSA submit ''significant regulatory actions'' to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This final rule is not a significant regulatory action pursuant to E.O. 12866 and has not been designated as a ''major rule'' as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by 49 CFR part 5, subpart B, and determined this final rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for affected entities by providing longer cylinder requalification intervals with an alternative test method that has proven to be more accurate and more efficient. PHMSA expects that cost savings will result in reduced costs for the public to whom those entities generally transfer a portion of their compliance costs.

C. Executive Orders 14192 and 14219

PHMSA has determined that this final rule is an E.O. 14192 (*Unleashing Prosperity Through Deregulation*) deregulatory action.[4] PHMSA finds the total costs of the rule on the regulated community will be less than zero. This final rule does not implicate any of the factors identified in section 2(a) of E.O. 14219 (*Ensuring Lawful Governance*) indicative of a regulation that is ''unlawful . . . [or] that undermine[s] the national interest.'' [5]

D. Energy-Related Executive Orders 13211, 14154, and 14156

PHMSA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 14156 (*Declaring a National Energy Emergency*) and E.O. 14154 (*Unleashing American Energy*).[6] The President has declared a national emergency to address America's inadequate energy development production, transportation, refining, and generation capacity and asserted a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from, *inter alia,* the removal of ''undue burden[s]'' on the identification, development, or use of domestic energy resources. PHMSA finds this final rule to be consistent with E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products.

In addition, this final rule is not a ''significant energy action'' under E.O. 13211 (*Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*), which requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' [7] Because this final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; accordingly, OIRA has not designated this final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132 (*Federalism*) and the Presidential Memorandum (*Preemption*) published in the **Federal Register** on May 22, 2009.[8] E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have ''substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and

[2] 89 FR 15636 (Mar. 4, 2024).

[3] 58 FR 51735 (Oct. 4, 1993); 91 FR 22431 (Apr. 27, 2026); DOT Order 2100.7 (*Ensuring Reliance Upon Sound Economic Analysis in Department of Transportation Policies, Programs, and Activities*); *see also* DOT Order 2100.6B (*Policies and Procedures for Rulemakings*).

[4] 90 FR 9065 (Feb. 6, 2025).

[5] 90 FR 10583 (Feb. 25, 2025).

[6] 90 FR 8433 (Jan. 29, 2025); 90 FR 8353 (Jan. 29, 2025).

[7] 66 FR 28355 (May 22, 2001).

[8] 64 FR 43255 (Aug. 10, 1999); 74 FR 24693 (May 22, 2009).

responsibilities among the various levels of government.'' The Federal Hazardous Materials Transportation Law contains an express preemption provision at 49 U.S.C. 5125(b) that preempts State, local, and Tribal requirements on certain covered subjects, unless the non-Federal requirements are ''substantively the same'' as the Federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This final rule addresses items covered in Paragraph (5) above and will preempt State, local, and Tribal requirements not meeting the ''substantively the same'' standard. Although the final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this final rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation Law. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a final rule that has been subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the final rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (*Proper Consideration of Small Entities in Agency Rulemaking*) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts information on a dedicated web page to help small businesses understand and navigate Federal regulatory processes.[9] PHMSA developed this final rule in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. Because the final rule is expected to reduce burdens, PHMSA certifies that it does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of $100 million or more (in 1996 dollars) in any given year, the agency must prepare, among other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This final rule does not impose unfunded mandates under UMRA because it does not result in costs of $100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

PHMSA has analyzed this rule pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and has determined it is categorically excluded under 23 CFR 771.117(c)(20), which applies to the promulgation of rules, regulations, and directives. Under Section 9 of DOT Order 5610.1D, PHMSA may apply a categorical exclusion (CE) established in another Operating Administration's procedures. PHMSA followed the requirements outlined in DOT Order 5610.1D to apply the Federal Highway Administration's CE to this deregulatory action. PHMSA has determined no unusual circumstances are present under 23 CFR 771.117(b). PHMSA's Categorical Exclusion Determination memo for this action is available on PHMSA's website.[10]

I. Executive Order 13175

PHMSA analyzed this final rule according to the principles and criteria in E.O. 13175 (Consultation and Coordination with Indian Tribal Governments) and DOT Order 5301.1A (Department of Transportation Tribal Consultation Policies and Procedures).[11] Executive Order 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing ''substantial direct compliance costs'' or ''substantial direct effects'' on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the final rule and determined it would not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires PHMSA to provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking would not create, amend, or rescind any existing information collections.

However, this rulemaking eliminates the need for persons to renew a special permit, resulting in a decrease in paperwork burden for special permit holders. PHMSA estimates the reduction in information collection burden as follows:

OMB Control No. 2137–0051: Rulemaking, Special Permits, and Preemption Requirements.

Decrease in Annual Number of Respondents: 30.

Decrease in Annual Responses: 30.

Decrease in Annual Burden Hours: 45.

Decrease in Annual Burden Cost: $0.

Please direct your requests for a copy of this information collection to Steven Andrews, Office of Hazardous Materials

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (*Promoting International Regulatory Cooperation*) [12] requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally.[13] In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the final rule and has determined that its regulatory amendments would not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (*Improving the Nation's Cybersecurity*) directed the Federal Government to improve its efforts to identify, to deter, and to respond to ''persistent and increasingly sophisticated malicious cyber campaigns.'' [14] PHMSA has considered the effects of the final rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

M. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process better. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy*. DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, or on DOT's website at *http://www.dot.gov/privacy*.

List of Subjects in 49 CFR Part 180

Hazardous materials transportation, Motor carriers, Motor vehicle safety, Packaging and containers, Reporting, and Recordkeeping requirements.

In consideration of the foregoing, PHMSA amends 49 CFR Chapter I as follows:

PART 180—CONTINUING QUALIFICATION AND MAINTENANCE OF PACKAGINGS

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 49 U.S.C. 5101–5128; 49 CFR 1.81 and 1.97.

■ 2. In § 180.209, revise paragraphs (a) and (b) to read as follows:

§ 180.209 Requirements for requalification of specification cylinders.

(a) *Periodic qualification of cylinders.* Each specification cylinder that becomes due for periodic requalification, as specified in the following table, must be requalified and marked in conformance with the requirements of this subpart. Requalification records must be maintained in accordance with § 180.215. Table 1 follows:

TABLE 1 TO PARAGRAPH (a)—REQUALIFICATION OF CYLINDERS [1]

Specification under which cylinder was made	Minimum test pressure (psig) [2]	Requalification period (years)
3	3000 psig	5.
3A, 3AA	5/3 times service pressure, except non-corrosive service (*see* § 180.209(g)), or UE [3].	5, 10, or 12 (*see* § 180.209(b), (f), (h), and (j)).
3AL	5/3 times service pressure	5 or 12 (*see* § 180.209(j) and (m) [4]).
3AX, 3AAX	5/3 times service pressure	5.
3B, 3BN	2 times service pressure (*see* § 180.209(g))	5 or 10 (*see* § 180.209(f)).
3E	Test not required	
3HT	5/3 times service pressure	3 (*see* §§ 180.209(k) and 180.213(c)).
3T	5/3 times service pressure or UE [3]	5.
4AA480	2 times service pressure (*see* § 180.209(g))	5 or 10 (*see* § 180.209(h)).
4B, 4BA, 4BW, 4B–240ET	2 times service pressure, except non-corrosive service (*see* § 180.209(g)).	5, 7, 10, or 12 (*see* § 180.209(e), (f), and (j)).
4D, 4DA, 4DS	2 times service pressure	5.
4E	2 times service pressure, except non-corrosive service (*see* § 180.209(g)).	5, 10, or 12 (*see* § 180.209(e)).
4L	Test not required	
8, 8AL		10 or 20 (*see* § 180.209(i)).
Exemption or special permit cylinder	See current exemption or special permit, or UE [3] as allowed by CGA C–20 (2014).	See current exemption or special permit.
Foreign cylinder (*see* § 173.301(j) of this subchapter for restrictions on use).	As marked on cylinder, but not less than 53 of any service or working pressure marking.	5 (*see* §§ 180.209(l) and 180.213(d)(2)).

[1] Any cylinder not exceeding two inches outside diameter and less than two feet in length is excepted from volumetric expansion test.
[2] For cylinders not marked with a service pressure, see § 173.301a(b) of this subchapter.

[12] 77 FR 26413 (May 4, 2012).

[13] 77 FR 26413 (May 4, 2012).

[14] 86 FR 26633 (May 17, 2021).

[3] Minimum test pressure is not applicable to those cylinders and tubes requalified using ultrasonic examination (UE).
[4] This provision does not apply to cylinders used for carbon dioxide, fire extinguisher, or other industrial gas service.

(b) *DOT 3A or 3AA cylinders.* (1) A cylinder conforming to specification DOT 3A or 3AA with a water capacity of 56.7 kg (125 lb.) or less that is removed from any cluster, bank, group, rack, or vehicle each time it is filled, may be requalified every ten years instead of every five years, provided the cylinder conforms to all of the following conditions:

(i) The cylinder was manufactured after December 31, 1945.

(ii) The cylinder is used exclusively for air; argon; cyclopropane; ethylene; helium; hydrogen; krypton; neon; nitrogen; nitrous oxide; oxygen; sulfur hexafluoride; xenon; chlorinated hydrocarbons, fluorinated hydrocarbons, liquefied hydrocarbons, and mixtures thereof that are commercially free from corroding components; permitted mixtures of these gases (*see* § 173.301(d) of this subchapter); and permitted mixtures of these gases with up to 30 percent by volume of carbon dioxide, provided the gas has a dew point at or below minus (52 °F) at 1 atmosphere.

(iii) [Reserved]

(iv) The cylinder is dried immediately after hydrostatic testing to remove all traces of water.

(v) The cylinder is not used for underwater breathing.

(vi) Each cylinder is stamped with a five-pointed star at least one-fourth of an inch high immediately following the test date.

(2) A cylinder conforming to specification DOT 3A or 3AA with a water capacity of 56.7 kg (125 lb.) or less that is not removed from any cluster, bank, group, rack, or vehicle each time it is filled, may be requalified by either hydrostatic testing and visual inspection described in § 180.205 or by ultrasonic examination (UE) every ten years instead of every five years, provided the cylinder conforms to all of the following conditions:

(i) The cylinder was manufactured after December 31, 1945.

(ii) The cylinder is used exclusively for air; argon; helium; oxygen; nitrogen; neon; tetrafluoromethane (CF4); hydrogen; deuterium; mixtures of hydrogen, argon, helium, oxygen, and/or nitrogen; mixtures of argon, xenon, and/or neon; mixtures of krypton and neon; mixtures of hydrogen, argon, helium, and/or nitrogen; and mixtures containing deuterium, provided all gas mixtures have a dew point at or below minus (52 °F) at 1 atmosphere.

(iii) Carbon dioxide in any concentration cannot be added to cylinders in the bundle.

(iv) Gases that are toxic and/or corrosive cannot be added to cylinders in the bundle.

(v) If requalified by hydrostatic pressure testing, the cylinder is dried immediately after testing to remove all traces of water.

(vi) The cylinder is not used for underwater breathing.

(vii) Each cylinder is stamped with a five-pointed star at least one-fourth of an inch high immediately following the test date.

(3) If, since the last required requalification, a cylinder has not been used exclusively for the gases specifically identified in paragraph (b)(1)(ii) of this section, but currently conforms with all other provisions of paragraph (b)(1) of this section, it may be requalified every 10 years instead of every five years, provided it is first requalified and examined as prescribed by § 173.302a(b)(2), (3) and (4) of this subchapter.

(4) Except as specified in paragraph (b)(3) of this section, if a cylinder, marked with a star, is filled with a compressed gas other than as specified in paragraph (b)(1)(ii) of this section, the star following the most recent test date must be obliterated. The cylinder must be requalified five years from the marked test date, or prior to the first filling with a compressed gas, if the required five-year requalification period has passed.

BILLING CODE 4910–60–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 260729–0180]

RIN 0648–BO27

Magnuson-Stevens Fishery Conservation and Management Act Provisions; Fisheries of the Northeastern United States; Northeast Multispecies Fishery; Framework Adjustment 72

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Interim final rule; request for comments.

SUMMARY: NMFS issues this interim final rule to implement Framework Adjustment 72 (Framework 72) to the Northeast Multispecies Fishery Management Plan (FMP), specifically to implement status determination criteria for Georges Bank yellowtail flounder, set catch limits for multispecies (groundfish) stocks, and revise the process for setting recreational measures for Atlantic cod and haddock. This action is necessary to respond to updated scientific information and to achieve the goals and objectives of the FMP. The measures are intended to help prevent overfishing, rebuild overfished stocks, achieve optimum yield, and ensure that management measures are based on the best scientific information available.

DATES: Effective August 4, 2026. Comments must be received by 5 p.m. EST on September 3, 2026.

ADDRESSES: A plain language summary of this interim final rule is available at: *https://www.regulations.gov/docket/NOAA-NMFS-2026-0859.* You may submit comments, identified by NOAA–NMFS–2026–0859, by the following method:

Electronic Submission: Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *https://www.regulations.gov* and type NOAA–NMFS–2026–0859 in the Search box (*note:* copying and pasting the FDMS Docket Number directly from this document may not yield search results). Click on the ''Comment'' icon, complete the required fields, and enter or attach your comments.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered. All comments received are a part of the public record and will generally be posted for public viewing on *https://www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. You may submit anonymous comments by entering ''N/A'' in the required fields if you wish to remain anonymous.

Copies of Framework Adjustment 72, including the Supplemental Information Report (SIR), the Regulatory Impact Review, and supporting documents prepared by the New England Fishery Management Council (Council) in support of this action, are available from Dr. Cate O'Keefe, Executive Director, New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950. The supporting documents are also accessible via the internet at: *http://www.nefmc.org/management-plans/northeast-multispecies* or *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Liz Sullivan, Fishery Policy Analyst, phone: 978–282–8493; email: *Liz.Sullivan@noaa.gov.*

SUPPLEMENTARY INFORMATION:

Summary of Approved Measures

The Northeast Multispecies FMP specifies the management measures for 13 groundfish species. The FMP was prepared by the Council and is implemented by NMFS through regulations at 50 CFR part 648, consistent with the requirements of the Magnuson-Stevens Act. The groundfish fishery includes recreational and commercial components, and the members of the commercial fishery choose whether to fish as part of the sector program or the common pool. Annually, the commercial groundfish fishery has a value of approximately $40 million (ex-vessel revenue from the most recent complete fishing year). Recreational fisheries, including the recreational groundfish fishery, contribute substantial value to the regional and national economies.

This action implements Framework 72 to the Northeast Multispecies FMP. The New England Fishery Management Council reviewed the regulations included in this rulemaking and deemed them consistent with, and necessary to implement, Framework 72 in a March 16, 2026, letter from Council Chairman Daniel Salerno to Regional Administrator Michael Pentony. Under the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act, or Act), on behalf of the Secretary of Commerce, the Greater Atlantic Regional Fisheries Office's Regional Administrator approves, disapproves, or partially approves measures that the Council proposes, based on consistency with the Act and other applicable law.

To help ensure that Framework 72 is implemented as early as possible in the 2026 fishing year, which began May 1, 2026, NMFS is implementing Framework 72 through this interim final rule, which is effective upon publication. NMFS is also affording the public the opportunity to comment on this action by accepting public comment until September 3, 2026. NMFS will review all of the comments received on this interim final rule. If substantive comments are received, and NMFS determines that changes to the rule are appropriate in response, NMFS will publish a new final rule.

NMFS has approved and is implementing all of the measures in Framework 72, as recommended by the Council. Framework 72:

- Incorporates status determination criteria (SDC) for Georges Bank (GB) yellowtail flounder provided by the most recent stock assessment;
- Sets shared United States/Canada quotas for GB yellowtail flounder and eastern GB cod and haddock for fishing year 2026;
- Sets specifications, including catch limits for 12 groundfish stocks: GB cod, GB haddock, and GB yellowtail flounder for fishing year 2026; and Southern New England/Mid-Atlantic (SNE/MA) yellowtail flounder, Cape Cod/Gulf of Maine (CC/GOM) yellowtail flounder, GB winter flounder, GOM winter flounder, SNE/MA winter flounder, redfish, white hake, ocean pout, and wolffish for fishing years 2026–2030; and
- Modifies the regulatory process for the Regional Administrator to set recreational measures for cod and haddock stocks that do not have a recreational sub-annual catch limit (ACL).

This action also makes minor, clarifying regulatory changes that are not part of Framework 72, under section 305(d) authority in the Magnuson-Stevens Act to make changes necessary to carry out the FMP. NMFS is making these changes in conjunction with the Framework 72 measures for expediency purposes. These changes are described below under the heading, Minor, Clarifying Regulatory Changes under Secretarial Authority.

Status Determination Criteria

In 2024, the Northeast Fishery Science Center (Center) completed a research track assessment of GB yellowtail flounder, which transitioned the assessment to a Woods Hole Assessment Model (WHAM). This replaced the previous empirical approach that had been used to set catch advice for past fishing years. The 2025 management track assessment produced revised SDCs for GB yellowtail flounder, including revised numeric estimates.

Framework 72 incorporates the previously revised SDCs for GB yellowtail flounder, and provides updated numerical estimates of these criteria, in accordance with the results and peer review recommendations of the 2025 stock assessments (tables 1 and 2). These replace the ''unknown'' SDCs for GB yellowtail flounder that had been incorporated into the FMP by Framework 53 (80 FR 25110, May 1, 2015).

Table 1 –Status Determination Criteria

Stock	Biomass Target (SSB_{MSY} or Proxy)	Minimum Biomass Threshold	Maximum Fishing Mortality Threshold (F_{MSY} or proxy)
GB Yellowtail Flounder			
Previous SDC	Unknown	Unknown	Unknown
Revised SDC	SSB_{MSY} Proxy	½ SSBmsy	F_{MSY}

SSB = spawning stock biomass; MSY = maximum sustainable yield; F = fishing mortality

Using revised SDC	WHAM	7,072	0.9	597

Fishing Year 2026 Shared United States/Canada Quotas

Management of Transboundary Georges Bank Stocks

Eastern GB cod, eastern GB haddock, and GB yellowtail flounder are shared stocks that are jointly managed with Canada under the United States/Canada Resource Sharing Understanding (Understanding). As part of the Understanding, the United States and Canada consider the most recent stock information and develop shared quotas that are allocated between the United States and Canada based on a formula that considers historical catch (10-percent weighting) and the current resource distribution (90-percent weighting). For historical information about the Understanding, see: *http://www.bio.gc.ca/info/intercol/tmgc-cogst/index-en.php.*

A new approach called the Integration of Science Advice for Transboundary Stocks (ISATS) process was followed to provide science advice to support the decision-making process for the management of the three transboundary stocks. ISATS includes a meeting of the stock assessment leads for both countries, where the outcomes of the United States and Canadian domestic assessments are compiled into a joint document, to be considered equally as the basis for informing catch advice. In 2025, the U.S. GB yellowtail flounder management track assessment was conducted after the ISATS process and results were considered directly.

For GB yellowtail flounder, the Council's Scientific and Statistical Committee (SSC) also recommends an acceptable biological catch (ABC) for the stock. The ABC is typically used to inform the development of the annual shared quota. Although the stock is jointly managed with Canada, the Council may not recommend catch limits that would exceed the SSC's recommendation. In 2025, the shared quota for GB yellowtail flounder was developed before the SSC had met to discuss the stock, and the SSC took this already-developed quota into consideration when making its recommendation to the Council. The SSC does not recommend ABCs for eastern GB cod and haddock because they are management units of the total GB cod and haddock stocks. The SSC recommends overall ABCs for the total GB cod and haddock stocks. The shared United States/Canada quota for eastern GB cod and haddock is included in these overall ABCs and must be consistent with the SSC's recommendation for the total GB stocks.

2026 United States/Canada Quotas

The United States and Canada developed shared quotas for 2026 based on the available domestic assessment information from both countries. The Council adopted these recommendations in Framework 72 (table 3), and this action approves them.

Table 3 -- 2026 Fishing Year United States/Canada Quotas (mt, live weight) and Percent of Quota Allocated to Each Country

Quota	Eastern GB Cod	Eastern GB Haddock	GB Yellowtail Flounder
Total Shared Quota	473	4,750	57
United States Quota	151 (32 percent)	998 (21 percent)	31 (54 percent)
Canadian Quota	322 (68 percent)	3,752 (79 percent)	26 (46 percent)

The 2026 U.S. quotas for the eastern GB cod represent an 84-percent increase, compared to 2025; the eastern GB haddock and GB yellowtail flounder quotas represent 36-percent and 68-percent decreases, respectively. A more detailed discussion of the 2026 catch advice for shared stocks, including a description of each country's quota share, is accessible online at: *https://www.nefmc.org/*.

The regulations implementing the United States/Canada Resource Sharing Understanding at 50 CFR 648.85(a) require deducting any overages of the U.S. quota for eastern GB cod, eastern GB haddock, or GB yellowtail flounder from the U.S. quota in the following fishing year. If catch information for the 2025 fishing year indicates that the U.S. fishery exceeded its quota for any of the shared stocks, NMFS will reduce the respective U.S. quotas for the 2026 fishing year in a future action, as close to May 1, 2026, as possible. If any fishery that is allocated a portion of the U.S. quota exceeds its allocation and causes an overage of the overall U.S. quota, the overage reduction would be applied only to that fishery's allocation in the following fishing year. This ensures that catch by one component of the overall fishery does not negatively affect another component of the overall fishery.

Catch Limits for Fishing Years 2026–2030

Summary of the Catch Limits

Specifications are adopted for multiple years. Any specifications for fishing years beyond 2026 are projections that will be considered and reaffirmed or adjusted in the annual framework for that fishing year. Previously, specifications have been adopted for 3 years, the Council's omnibus management flexibility amendment (Amendment 26 to the Northeast Multispecies FMP, 91 FR 27234, May 14, 2026) would increase this duration to up to 5 years. To reflect this, Framework 72 developed specifications for fishing years 2026–2030.

Tables 4 through 16 show the catch limits for the 2026–2030 fishing years. A brief summary of how these catch limits were developed is provided below. More details on the catch limits for each groundfish stock can be found in appendix II (Calculation of Northeast Multispecies Annual Catch Limits, FY 2026–FY 2030) to the Framework 72 SIR (see **ADDRESSES** for information on how to get this document).

Through Framework 72, the Council recommended catch limits, including overfishing limits (OFLs), for GB cod, GB haddock, GB yellowtail flounder for fishing year 2026, and CC/GOM yellowtail flounder, SNE/MA yellowtail flounder, GB winter flounder, GOM winter flounder, SNE/MA winter flounder, white hake, redfish, ocean pout, and Atlantic wolffish for the 2026–2030 fishing years, based on stock assessments or data updates completed in 2025. Specifications for the Atlantic cod stocks were set in Amendment 25 (Revised) (91 FR 39529, June 30, 2026). Framework 72 replaces the Amendment 25 (Revised) specifications for GB cod. Catch limits for other groundfish stocks were previously set by Framework 66 (89 FR 35755, May 2, 2024) and Framework 69 (91 FR 11141, March 9, 2026). Table 4 provides an overview of which catch limits change based on Framework 72, as well as when the stock was most recently assessed. Table 5 provides the percentage change in the 2026 catch limit compared to the 2025 fishing year.

All specifications projected for fishing year 2026 in previous frameworks or Amendment 25 (Revised) were considered for reaffirmation or adjustment, as warranted by the best scientific information available in the adopting framework/amendment, and any updates in this action. The previously projected and adopted specifications are reaffirmed, consistent with the considerations and determinations in the adopting frameworks and amendment, because no new or updated scientific information warranted changes to prior adopted specifications.

UNK = Unknown
Note: An empty cell indicates no OFL/ABC is adopted for that year. These catch limits would be set in a future action.

BILLING CODE 3510–22–C

Overfishing Limits and Acceptable Biological Catches

The OFL is calculated to set the maximum amount of fish that can be caught in a year, without constituting overfishing. The ABC is typically set lower than the OFL to account for scientific uncertainty. For GB cod, GB haddock, and GB yellowtail flounder, the total ABC is reduced by the amount of the Canadian quota (see table 1 for the Canadian and United States shares of these stocks). Additionally, although GB winter flounder, white hake, and Atlantic halibut are not jointly managed with Canada, there is some Canadian catch of these stocks. Because the total ABC must account for all sources of fishing mortality, expected Canadian catch of GB winter flounder (38 metric tons; mt), white hake (57 mt), and Atlantic halibut (71 mt) is deducted from the total ABC. The United States ABC is the amount available to the domestic fishery after accounting for Canadian catch (see table 3). For stocks without Canadian catch, the United States ABC is equal to the total ABC.

Annual Catch Limits

Development of Annual Catch Limits

The U.S. ABC for each stock is divided among the various fishery components to account for all sources of fishing mortality. For stocks with a recreational allocation, the U.S. ABC is typically first divided between the commercial and recreational fisheries, before being further divided into sub-components and sub-ACLs. An estimate of catch expected from state waters and the other sub-component (*e.g.,* Federal commercial non-groundfish fisheries and some recreational groundfish fisheries, if there is not a recreational allocation) is deducted from the U.S. ABC. The remaining portion of the U.S. ABC is distributed to the fishery components that receive an allocation for the stock. Components of the fishery that receive an allocation have a sub-ACL set by reducing their portion of the ABC (the sub-ABC) to account for management uncertainty and are subject to accountability measures (AM) if they exceed their respective catch limit during the fishing year. This process is described fully in appendix II of the Framework 72 SIR.

Sector and Common Pool sub-ACLs

For stocks allocated to sectors, the commercial groundfish sub-ACL is further divided into the non-sector (common pool) sub-ACL and the sector sub-ACL, based on the total vessel enrollment in sectors and the cumulative potential sector contributions (PSC) associated with those sectors. The sector and common pool sub-ACLs implemented in this action are based on fishing year 2026 PSCs and sector rosters. All permits enrolled in a sector, and the vessels associated with those permits, had until April 30, 2026, to withdraw from a sector and fish in the common pool for the 2026 fishing year. In addition to the enrollment delay, all permits that changed ownership after the roster deadline were permitted to join a sector (or change sector) through April 30, 2026.

Management Uncertainty Buffer for Sectors

As mentioned generally above, management uncertainty is accounted for in the setting of ACLs that are equal to or lower than the ABC recommended by the SSC. This difference between an ABC and ACL or sub-ACL is known as a management uncertainty buffer. Without changing the process for setting management uncertainty buffers, Amendment 23 (87 FR 75852, December 9, 2022) implemented a measure to adjust the management uncertainty buffer for the sector sub-ACL for each allocated groundfish stock to zero when appropriate. In years that the at-sea monitoring (ASM) coverage target is set at 100 percent, the management uncertainty buffer will default to zero for the sector sub-ACL for allocated stocks, unless the Council's consideration of the 100-percent coverage target warrants specifying a different management uncertainty buffer in order to prevent exceeding the sub-ACL. Based on Amendment 25 (Revised), this provision does not apply for SNE cod.

As established in Amendment 23, the ASM coverage target is dependent on the level of funding for ASM and observers, and NMFS must evaluate overall annual appropriations from Congress to finalize the ASM coverage target. NMFS provides the target as soon as it can each year so that sectors can establish their rosters and meet annual deadlines. On March 13, 2026, the Regional Administrator announced that the preliminary fishing year 2026 ASM coverage target of 100 percent, and nothing has changed since that announcement to require a lower ASM coverage target or to change the determination that the coverage target provides a basis for removing the management uncertainty buffer. Therefore, in this action, NMFS is removing the management uncertainty buffer for each allocated stock, other than SNE cod, for all sectors for the entirety of the 2026 fishing year. Because removal of the buffer is dependent on the annual determination of the ASM coverage target and consideration of its merit, the determination regarding the buffer in fishing years 2027 and beyond would be made in a future action.

In Framework 72, the Council recommended the removal of the management uncertainty buffer for the sector sub-ACL for white hake, if the ASM coverage target is 90 percent or higher, for each fishing year through 2030. The Council's goal is to mitigate the adverse economic impacts of the ACLs for this potentially constraining stock by increasing the sector sub-ACLs if the ASM coverage target is high enough to reduce uncertainty. While this measure is moot for fishing year 2026, given this year's 100-percent coverage target, it is approved for the future fishing years.

Table 6 provides the fishing year 2026 ACLs and sub-ACLs for all stocks with the management uncertainty buffer removed for sectors. Because the removal of the management uncertainty buffer for sectors is an annual decision, tables 7–10 show the ACLs and sub-ACLs for fishing years 2027–2030 with the buffer left in place, and these would be updated in a future action based on the coverage target for that fishing year.

The removal of the management uncertainty buffer for sectors alone is not likely to cause the ABC or OFL to be exceeded. The fishery remains accountable for remaining within the sub-ACLs allocated to it. Further, the revised management uncertainty buffer applies only to sectors and not to the common pool component of the fishery or other sub-ACLs or sub-components for any stocks. Therefore, the management uncertainty buffer continues to exist for the stock's ACL, but the sector-specific buffer is removed.

Sector Allocations for Fishing Year 2026

At the start of the 2026 fishing year, NMFS allocated annual catch entitlements (ACE) for the allocated stocks to each sector, based on preliminary sector rosters and the catch limits set by prior frameworks and default specifications for certain stocks. This rule updates the ACE allocated to sectors based on final sector rosters and the catch limits approved in Framework 72, including the revised GB cod ABC, and based on the catch limits for EGOM cod, WGOM cod, and SNE cod set by Amendment 25 (Revised). NMFS calculates a sector's allocation for each stock by summing its members' PSC for the stock and then multiplying that total

percentage by the commercial sub-ACL for that stock. The process for allocating ACE to sectors is more fully described in the final rule allocating ACE to sectors for the start of the 2026 fishing year (91 FR 22467, April 27, 2026) and is not repeated here. Table 11 shows the cumulative PSC by stock for each sector for fishing year 2026. Tables 12 and 13 show the ACEs allocated to each sector for fishing year 2026, in thousands of pounds and metric tons, respectively. NMFS has included the common pool sub-ACLs in tables 11 through 13 for comparison. NMFS uses final allocations, along with later adjustments including ACE transfers, reductions for overages, or increases for carryover, monitor sector catch.

Common Pool Total Allowable Catches

The common pool sub-ACL for each allocated stock (except for SNE/MA winter flounder) is further divided into trimester total allowable catches (TACs). Table 14 summarizes the common pool trimester TACs set in this action.

Incidental catch TACs are also specified for certain stocks of concern (*i.e.,* stocks that are overfished or subject to overfishing) for common pool vessels fishing in the special management programs (*i.e.,* special access programs (SAP) and the Regular B Days-at-Sea (DAS) Program), in order to limit the catch of these stocks under each program. Tables 15 and 16 summarize the Incidental Catch TACs for each stock and the distribution of these TACs to each special management program.

BILLING CODE 3510–22–C

Recreational Management Measures

Currently, the Regional Administrator sets recreational measures (open season, minimum fish size, and possession limit) for stocks that have a recreational sub-ACL (*i.e.,* WGOM cod, SNE cod, and GOM haddock) after consulting with the Council, consistent with regulations in the FMP and the Administrative Procedure Act. This process has been used to set recreational measures since 2013. Framework 72 provides for this process to be used for the two cod stocks and one haddock stock that do not have a recreational sub-ACL (*i.e.,* GB haddock, GB cod, and EGOM cod). This administrative change to recreational management measures setting is expected to result in more consistent development and

implementation of measures across stocks that have recreational fisheries, even if they do not have recreational-specific allocations. Framework 72 makes no changes to the current recreational measures for any cod or haddock stock.

Minor, Clarifying Regulatory Changes Under Secretarial Authority

This rule makes minor, clarifying changes in the regulations. Specifically, this action revises 50 CFR 648.89(b)(2)(ii) to add a single word to improve clarity of the text. Additionally, this action revises § 648.82(e)(1)(i) to remove references to the regulations detailing differential days-at-sea accounting that were removed in a previous action.

Classification

The NMFS Assistant Administrator has determined that this interim final rule is consistent with the FMP, other provisions of the Magnuson-Stevens Act, and other applicable law.

Executive Orders 12866 and 14192

This interim final rule has been determined to be not significant for purposes of Executive Order (E.O.) 12866. This rule is not an E.O. 14192 regulatory action because this rule is not significant under E.O. 12866.

Executive Order 13175

NMFS has determined that this action would not have a substantial direct effect on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes. Therefore, consultation with Tribal officials under E.O. 13175 is not required, and the requirements of section (5)(b) and (c) of E.O. 13175 also do not apply. A Tribal summary impact statement under section (5)(b)(2)(B) and (c)(2) of E.O. 13175 is not required and has not been prepared.

Administrative Procedure Act

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on the implementation of Framework 72, as prior notice and comment would be contrary to the public interest. The delay caused by providing prior notice and opportunity for public comment would prevent affected entities from being able to take advantage of an overall increase in fishing capacity during the extremely important summer season.

The Northeast multispecies fishing year started on May 1, 2026. Absent implementation of this rule to adjust Northeast multispecies catch allocations for 2026, the fishery will continue to be constrained to low rollover specifications from 2025, many of which are further reduced to 75 percent of the 2025 specifications. Implementing Framework 72 immediately and without prior notice and the opportunity for public comment is necessary to achieve optimum yield in the northeast multispecies fishery. The Magnuson-Stevens Fishery Conservation and Management Act requires conservation and management measures to comply with ten National Standards, the first one of which mandates preventing overfishing while achieving optimum yield on a continuing basis. Thus, in the groundfish sector fishery, catch allocations for all Northeast multispecies stocks are implemented annually on the basis of the best scientific information available. The specifications for fishing year 2026 include the allocations for each species adjusted by Framework 72 and the removal of the management uncertainty buffer for all stocks. These allocations reflect a balance of interests consistent with the national standards to comprise the greatest benefit to the nation and provide the increased fishing opportunity to fishery participants that is necessary for optimizing fishing operations.

Because specifications were not implemented at the beginning of this fishing year, May 1, 2026, pursuant to the Northeast multispecies fishery management plan regulations, default specifications were automatically reduced to 75 percent of the previous year's specifications for the Northeast multispecies stocks that did not have previously set specifications for 2026. Those reduced specifications remain in place until they are replaced through implementation of new specifications for this fishing year or October 31, whichever is earlier. Default specifications are set conservatively at only a portion of the previous fishing year's specifications and are intended to be only temporary stopgap measures until the current year's specifications can be implemented based on the most recent stock assessments and updated fishery information from preceding years.

In addition to an overall increase in catch allocations, this year's specifications also include an additional increase in catch allocations through the removal of the management uncertainty buffer for sectors. The management uncertainty buffer is not necessary in fishing year 2026 based on the 100-percent fishery monitoring coverage target, as specified in 50 CFR 648.90(a)(4)(i)(B). Based on an analysis of the catch limits in Framework 72 being implemented at the beginning of the fishing year, sector groundfish revenues are expected to increase up to $1.8 million from immediate removal of the management uncertainty buffer alone. Until Framework 72 is in effect, the buffers remain in place and sector participants cannot access the benefits from this measure.

The changes to the quotas for various stocks for this fishing year are especially beneficial to fishery participants, while maintaining all the conservation goals. This is because the current default quota for GB haddock has been a particularly constraining stock for the fishery, and the new quota will increase by 103 percent compared to the fishing year 2025 allocation. Under the Sector program, which accounts for 98 percent of the commercial fishery's catch, the current default for GB haddock has been restricting fishing operations across all stocks because sector vessels cannot fish in a stock area without an allocation for every species within that stock area. A lack of allocation for one species halts a vessel's fishing in that area for any species, unless the vessel owners pay to lease additional quota.

The restrictive GB haddock default limits require fishermen who have exhausted their allocation to pay for quota today that they will be able to otherwise access at no cost once Framework 72's higher GB haddock quota is in effect. The lease payments they are making today will generally not be recoverable even after allocations are increased. After the higher allocations are implemented, a sector may want or need to lease allocation back to another member or sector because the original lease was not ultimately necessary. However, lease prices for GB haddock and other species' catch limits often decrease after the implementation of increased catch limits, so leasing back to another member or sector would result in a net loss of funds for the sector member or sector. Also, if a fisherman cannot afford to pay for additional quota or a fisherman attempts to avoid these higher and potentially unnecessary costs by not fishing, they lose opportunities to fish until after Framework 72 is in effect. In these cases, this in effect acts as a temporary fishing closure for such fishermen, and these missed fishing opportunities cannot be replaced.

Thus, while the new specifications include decreased catch limits, in

addition to the limits that are being increased, the overall impact of the specifications provides stable and unfluctuating catch limits at the earliest available opportunity. While the decreased limits could potentially constrain some fishing activity, the greater availability of a higher value stock (*i.e.,* GB haddock) means the more constrained stocks may be limited only to when caught in pursuit of the higher value or more available stock. Due to GB haddock's value and availability, faster implementation of this fishing year's specifications allows more time for fishing under more accurate and beneficial market conditions.

Finally, losing fishing opportunities during the summer months redirects some fishing effort from warmer and generally calmer weather into colder and more hazardous weather. This is particularly challenging for smaller vessels, for which summer may be the only season in which they are able to participate in the fishery. Also, providing more days in a fishing year from which a fisherman can choose to fish generally provides a greater potential for choosing days with safer conditions. Implementing the 2026 fishing year quotas as soon as possible provides certainty and the greatest amount of time possible within this fishing year for participation.

For these reasons, there is good cause to waive the prior notice and opportunity for public comment for this rule.

For these same reasons, there is good cause under 5 U.S.C. 553(d)(3) for the measures in this final rule to become effective immediately upon publication. In addition, many of these measures relieve a restriction, pursuant to 5 U.S.C. 553(d)(1). Most of the allocations implemented through this rule are an increase over the current limits and setting the management uncertainty buffer at zero increases the allocation for all stocks. Therefore, the increased specifications and removal of the uncertainty buffer increases fishing opportunity for industry, thereby relieving current restrictions.

Although the rule will decrease the catch limit for a few stocks, it would be contrary to the public interest to implement allocation adjustments at different times. Implementing new catch limits, whether increasing or decreasing, in a piecemeal manner, would create confusion and add to the already ongoing difficult disruption to business planning and quota leasing markets arising from the current default specifications. And because the regulated community is expecting these decreases, sectors are already managing to the lower quotas. There is therefore no advantage to the regulated community for delaying implementation; fishery participants do not need to prepare to come into compliance and will not be able to maximize fishing opportunity for the stocks with quotas that are decreasing. In addition, there is potential danger of overfishing these stocks, which could then lead to the need for more restrictive conservation methods in future fishing years. Delaying the effective date of the lower quotas therefore offers no advantage for sector preparation, and immediate implementation does not disadvantage the non-fishing industry public in any way.

Stakeholder and industry groups have been aware of and have participated in the public meetings on Framework 72's development. Stakeholders voiced their strong support to have Framework 72 effective without delay. Public comments submitted in response to the Amendment 25 (Revised) proposed rule from industry groups, individual fishermen, and non-governmental organizations also urged quick implementation of both Amendment 25 (Revised) and Framework 72. Commenters noted that immediate implementation of both would provide economic and conservation benefits while averting the adverse economic and conservation impacts on fishery participants, fishing communities, and Northeast multispecies stocks that would result if these rulemakings were delayed. (Amendment 25 (Revised) was implemented on June 30, 2026 (91 FR 39529)). NMFS also has received correspondence citing a critical need for immediately implementing the new catch limits in Framework 72.

NMFS is inviting public comments on this interim final rule. NMFS will consider responding to any comments in a subsequent final rule, if warranted.

Regulatory Flexibility Act

Because prior notice and opportunity for public comment are not required for this rule by 5 U.S.C. 553, or any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.,* are inapplicable.

Paperwork Reduction Act

This final rule contains no information collection requirements under the Paperwork Reduction Act of 1995.

List of Subjects in 50 CFR Part 648

Fisheries, Fishing, Recordkeeping, and reporting requirements.

Dated: July 29, 2026.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons stated in the preamble, NMFS amends 50 CFR part 648 as follows:

PART 648—FISHERIES OF THE NORTHEASTERN UNITED STATES

■ 1. The authority citation for part 648 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 648.82, revise paragraph (e)(1)(i) to read as follows:

§ 648.82 Effort-control program for NE multispecies vessels.

* * * * *

(e) * * *

(1) * * *

(i) *Common pool vessels.* For a common pool vessel, Category A DAS shall accrue in 24-hr increments. For example, a vessel that fished from 6 a.m. to 10 p.m. would be charged 24 hr of Category A DAS, not 16 hr; a vessel that fished for 25 hr would be charged 48 hr of Category A instead of 25 hr.

* * * * *

■ 3. In § 648.89, revise paragraphs (b)(2)(ii) and (g) to read as follows:

§ 648.89 Recreational and charter/party vessel restrictions.

* * * * *

(b) * * *

(2) * * *

(ii) *Transiting.* If the minimum size specified for cod and haddock differ between stock areas, vessels in possession of cod or haddock that meet the minimum size specified for fish caught in one stock area, as specified in § 648.88, may transit a different stock area with that cod and haddock, provided all bait and hooks are removed from fishing rods, and any cod and haddock on board has been gutted and stored.

* * * * *

(g) *Regional Administrator authority for cod and haddock recreational measures.* The Regional Administrator, after consultation with the NEFMC, may adjust recreational measures for cod and haddock stocks that do not have a recreational allocation to set consistent measures with other stock areas, as appropriate. Appropriate measures, including adjustments to fishing seasons, minimum fish sizes, or possession limits, may be implemented in a manner consistent with the Administrative Procedure Act, with the final measures published in the **Federal**

Register prior to the start of the fishing year when possible. Separate measures may be implemented for the private and charter/party components of the recreational fishery.

* * * * *

BILLING CODE 3510–22–P

Proposed Rules

Federal Register
Vol. 91, No. 148
Tuesday, August 4, 2026

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2026–6934; Airspace Docket No. 26–AWA–3]

RIN 2120–AA66

Establishment of Class C Airspace and Removal of Class D Airspace; Wilmington International Airport, NC

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to establish Class C airspace and remove Class D airspace at Wilmington International Airport (ILM), NC. The FAA is proposing this action to enhance the efficient management of air traffic operations and reduce the potential for midair collision in the Wilmington, NC, terminal area. The Class C airspace would replace the existing Class D airspace at ILM. In addition, the non-regulatory Terminal Radar Service Area (TRSA) would be removed.

DATES: Comments must be received on or before October 5, 2026.

ADDRESSES: Send comments identified by FAA Docket No. FAA–2026–6934 and Airspace Docket No. 26–AWA–3 using any of the following methods:

* *Federal eRulemaking Portal:* Go to *www.regulations.gov* and follow the online instructions for sending your comments electronically.

* *Mail:* Send comments to Docket Operations; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W58–213, West Building, 5th Floor, Washington, DC 20590.

* *Hand Delivery or Courier:* Take comments to Docket Operations in Room W58–213 of the West Building, 5th Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

* *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at *www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W58–213 of the West Building, 5th Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FAA Order JO 7400.11K, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications/*. You may also contact the Rules and Regulations Group, Policy Directorate, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Ashley Toth, Rules and Regulations Group, Policy Directorate, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify the airspace structure as necessary to enhance the safe and efficient flow of air traffic within the Wilmington, NC, terminal area.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy*.

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Operations office (see **ADDRESSES** section for address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the office of the Eastern Service Center, Federal Aviation Administration, Room 210, 1701 Columbia Avenue, College Park, GA, 30337.

Incorporation by Reference

Class C airspace areas and Class D airspace areas are published in paragraphs 4000 and 5000, respectively,

of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11K, dated August 4, 2025, and effective September 15, 2025. These updates would be published in the next update to FAA Order JO 7400.11. FAA Order JO 7400.11K, which lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points, is publicly available as listed in the **ADDRESSES** section of this document.

Background

Wilmington International Airport (ILM) is located 3 miles northeast of the city of Wilmington, NC. The ILM Airport Traffic Control Tower (ATCT) consists of a combined tower and Terminal Radar Approach Control (TRACON) facility that operates from 0600 to 2300 local time, daily. Currently, Class D airspace, extending from surface to and including 2,500 feet mean sea level (MSL), surrounds the airport. When the ILM ATCT is closed, the ILM Class D airspace reverts to a Class E surface area. The Class D is effective during the specific dates and times established in advance by a Notice to Airmen (NOTAM), and thereafter as continuously published in the Chart Supplement.

A TRSA overlies the contiguous Class D airspace area in approximately a 20 nautical mile (NM) radius of ILM, within the TRACON's delegated airspace.

The airspace surrounding ILM is complex and congested due to runway configuration, geography, proximity to other airports, restricted airspace, navigational aids, flight training, tourists, skydiving, and military operations. Those factors coupled with the standard arrivals and departures into ILM make the TRSA airspace a web of intersecting flight paths. Participation in TRSA services is voluntary to pilots operating under visual flight rules (VFR). There are significant numbers of VFR pilots, which are not in contact with air traffic control (ATC), operating throughout the ILM terminal area. VFR pilots are often observed loitering or maneuvering in the departure corridors, along the final approach courses, or overhead the Class D. Without being in communication with ATC, air traffic controllers are unaware of the VFR pilots' intentions. Heading and altitude changes made by nonparticipating VFR aircraft are unpredictable, and this often requires controllers to take action to avoid possible conflicts with other aircraft under their control. With the current airspace configuration, there is no requirement for VFR pilots to contact ATC outside of the ILM Class D airspace area.

Class C Airspace and Terminal Radar Service Areas (TRSA)

Class C airspace areas are designated under 14 CFR part 71 rulemaking and can be used to improve aviation safety, reduce the risk of midair collisions in the terminal area, and enhance the management of air traffic operations therein. Operating requirements within Class C airspace keep ATC informed of all aircraft operating within the Class C airspace. Pilots are required to establish two-way radio communications with ATC prior to entering Class C airspace, and they must maintain communications with ATC while operating in Class C airspace. In addition, pursuant to 14 CFR part 91, no person may operate an aircraft in Class C airspace unless the aircraft is equipped with an operational transponder and Automatic Dependent Surveillance—Broadcast (ADS–B) Out.

TRSAs are not officially designated by airspace rulemaking action. They are not incorporated in 14 CFR part 71, nor are there any TRSA-specific operating rules in 14 CFR part 91. TRSAs are established around designated airports where ATC provides radar vectoring, sequencing, and separation services on a full-time basis for all instrument flight rules (IFR) and participating VFR aircraft. Pilots operating under VFR are encouraged to contact ATC to avail themselves of TRSA services. However, VFR pilot participation in TRSA services is voluntary. The limitations of the TRSA (*i.e.,* voluntary participation by VFR pilots) often fails to prevent nonparticipating VFR aircraft coming in direct conflict with higher-performance jets landing or departing ILM.

Need for Class C Airspace at ILM

Pursuant to FAA Order JO 7400.2, paragraph 16–2–1, to qualify for Class C airspace, an airport must be served by an operational ATCT and a radar approach control and meet one of the following criteria: (1) an annual instrument operations count of 75,000 at the primary airport; or (2) an annual instrument operations count of 100,000 and the primary and secondary airports; or (3) an annual count of 250,000 enplaned passengers at the primary airport.

ILM qualifies as a candidate for Class C airspace based on its annual enplaned passenger count. ILM's enplaned passenger count for calendar year (CY) 2024 (the latest year for which validated figures are available) was 737,065. This figure represents a 59.33% increase over CY 2021 numbers. Other factors considered are traffic volume, airspace complexity, and the potential for midair collision in the terminal area.

The existing TRSA does not adequately support the volume and diversity of aircraft operating in the congested ILM terminal area. Currently, there is no requirement for VFR pilots to establish radio contact with ATC outside of the existing ILM Class D airspace areas. Since participation in TRSA services is voluntary on the part of VFR pilots, the TRSA does not provide ATC with an adequate level of flight information or control required to segregate IFR and VFR aircraft operating in this complex airspace environment. VFR aircraft that are not in contact with ATC routinely operate in the area, and in so doing they cross ILM arrival and departure corridors and/or make unexpected heading and/or altitude changes. These aircraft frequently operate at altitudes that may conflict with aircraft arriving or departing ILM. As a result, IFR aircraft must alter their flight paths or altitudes to avoid them, thereby disrupting the orderly flow of ILM arrivals and departures.

Additionally, air traffic controller workload is increased due to the need for additional vectoring or altitude changes of ILM arrivals and departures to ensure separation from the non-participating VFR aircraft that are not communicating with ATC. Under this proposal, designation of Class C airspace would ensure that those VFR aircraft operating in the vicinity of the ILM arrival and departure corridors would be required to establish contact with ATC, making controllers aware of pilots' intentions and promoting increased safety and efficiency.

Benefits of Class C Airspace

All pilots would benefit from the enhanced safety provided by Class C services, which include the separation of aircraft, traffic advisories, and safety alerts. Class C airspace enhances safety by the requirement that two-way radio communication must be established with ATC prior to a pilot entering Class C airspace and maintained for the duration of flight in Class C airspace. The requirements for operating within Class C airspace will allow air traffic controllers to be aware of the intentions of VFR pilots and provide the opportunity to safely separate VFR and IFR traffic with more precision. Nonparticipating VFR aircraft will need to remain clear of the Class C airspace which will decrease the number of ILM arrivals and departures encountering nonparticipating VFR aircraft, thereby

reducing the potential for a midair collision. It also decreases the workload for air traffic controllers by minimizing the need to vector arrivals and departures to avoid conflicts with nonparticipating VFR aircraft due to the operating requirements for Class C airspace. Furthermore, it would minimize disruptions to the orderly flow of arrivals and departures to ensure pilots can fly stabilized approaches during a critical phase of flight.

Pre-NPRM Public Input

In 2024, the FAA approved the formation of an Ad Hoc Committee (Committee) to seek input and recommendations from representatives of affected aviation users for the FAA to consider in designing a proposed Class C airspace area at ILM. The Committee consisted of a diverse sampling of local aviation operators and organizations, including representatives from the Aircraft Owners and Pilots Association, pilots from the local airports and flight schools, the airlines, flight training, general aviation, military, business aviation, the ILM airport itself, and others.

Ad Hoc Committee Recommendations

The Committee met throughout 2024 and submitted its report to the FAA in February 2025. The initial Class C airspace design presented to the Committee would have extended from the surface to and including 4,100 feet MSL within a 5 NM radius of ILM; and the airspace would have extended from 1,300 feet MSL to and including 4,100 feet MSL within a 10 NM radius of ILM. However, based on the input and discussions from the meetings, the Committee recommended that the FAA include a 1 NM cutout from the outer shelf on the southern side of the ILM Class C surface area to accommodate Pilots Ridge Airport (03NC), NC, operations outside or beneath Class C airspace.

The Committee proposed the modification because it would allow users of 03NC to easily ingress and egress the airport without any negative impact on other airspace users. This modification does not present any undue challenges due to the location of 03NC at the outer edge of the proposed ILM Class C airspace. Additionally, the proposed cutout is located between the approach and departure corridors for both runways at ILM.

The Committee also considered a possible option to remove a slice of the Class C airspace along a line parallel to, and 1 NM north of 03NC, but it was not ultimately recommended by the Committee. This option was rejected because it would remove the outer shelf of the Class C where it would bisect the approach corridor for Runway 35 at a point where ATC vectors larger aircraft onto the final approach course and would create the potential for additional conflict with nonparticipating VFR aircraft.

After thorough review and analysis, the FAA concurred with the Committee's sole recommendation for modifying the proposal, *i.e.,* to include the cutout for 03NC. The design ensures all aircraft traversing the airspace centered around ILM receive positive control from ATC. It will ensure aircraft receiving radar services are not in conflict with nonparticipating VFR aircraft, especially high-performance jets in critical phases of flight. The design will prevent nonparticipating VFR aircraft from impacting operations while safely transitioning through the area. Finally, this design decreases risk and improves safety and efficiency for passengers and aviation professionals while still allowing access to 03NC.

Informal Airspace Meeting

As announced in the **Federal Register** (90 FR 40048; August 18, 2025), the FAA held an informal airspace meeting on October 1, 2025. The meeting was held virtually via the Zoom platform and was simultaneously broadcast on the FAA's YouTube channel. A total of 56 people logged into the Zoom meeting with 10 concurrent streamers on YouTube. The purpose of the meeting was to provide interested airspace users with an opportunity to present their views and offer recommendations regarding the proposed establishment of Class C airspace at ILM. The meeting began with a presentation describing the current ILM TRSA airspace and air traffic safety concerns and a review of graphical depictions of the updated Class C airspace proposal.

Next, the panelists participated in a live question-and-answer session with meeting attendees. Several questions were asked about whether the proposed airspace would limit general aviation aircraft's ability to transit the airspace as they currently do. General questions were asked about the flow of traffic in and around the area of ILM, how to obtain safety data, clarification on the proposed airspace design and modification process, and ADS–B requirements for Class C. No comments or recommendations were received from the informal airspace meeting.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 to establish Class C airspace and remove the existing Class D airspace area at ILM. The latitude/longitude coordinates for the ILM airport reference points (ARP) would be updated to reflect the current Airport Master Records data. Also, the existing ILM TRSA would be removed from aeronautical charts and replaced by the Class C airspace area. The FAA is proposing this action to enhance the safe and efficient use of airspace and reduce the risk of midair collision in the ILM terminal area (see the attached chart).

The proposed Class C airspace area would consist of one area, described as follows. The Class C airspace would extend from the surface to and including 4,100 feet MSL within a 5 NM radius of ILM; and the airspace that would extend from 1,300 feet MSL to and including 4,100 feet MSL within a 10 NM radius of ILM, excluding that airspace within a 1 NM radius of Pilots Ridge Airport.

As previously stated, the ILM Class D airspace area and the ILM TRSA would be removed if the proposed Class C airspace is implemented.

Regulatory Impact Analysis

E.O. 12866 (''Regulatory Planning and Review'') and E.O. 13563 (''Improving Regulation and Regulatory Review'') require agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' This rule is not a significant regulatory action as defined in Section 3(f) of E.O. 12866. This rule is not an E.O. 14192 regulatory action because this rule is not significant under E.O. 12866.

The airspace surrounding ILM is heavily trafficked, measured by the increase in enplanements since 2022. Currently, the airspace at ILM is class D with an overlying TSA, and serves commercial air carriers, general aviation aircraft, and military aircraft. ILM TRACON's traffic flow is dynamic and is routinely impacted by seasonal conditions, pilot training, Med-Evac, law enforcement, military operations, and the hourly activation and deactivation of military airspace. Beach traffic and pilot training increase significantly in the summer months. ILM has three flight schools based at the airport, and three flight schools are based at nearby airports that regularly use ILM for flight training requirements.

Nearby operations also include the Novant Health Regional Medical Center Heliport. The Novant Health Regional Medical Center, located 4 miles south of ILM, operates 4 Med-Evac helicopters.

In addition, there are three nearby private airports, including Pilots Ridge Airport, Topsail Airpark, and Stag Air Park. The current, outdated ILM Airspace was last modified in 1993 through a rulemaking that amended the Class D airspace.[1] The airspace no longer meets ILM's need for maintaining a safe and efficient airspace given the growth since 2022.

The FAA proposes establishing Class C airspace at ILM to replace the Class D airspace. The FAA's proposal adopts the Ad Hoc Committee's recommendation to include a 1 NM cutout from the outer shelf on the southern side of the ILM Class C surface area to accommodate Pilots Ridge Airport (03NC), NC, operations outside or beneath Class C airspace.

The FAA determined that this proposed rule would enhance the efficient management of air traffic operations and reduce the potential for midair collision in the ILM terminal area. The proposal would reduce air traffic controller workloads by lessening the need for additional vectoring of arrivals and departures to avoid conflicts with unknown VFR aircraft and minimize disruptions to the orderly flow of arrivals and departures to ensure pilots can fly stabilized approaches during a critical phase of flight. Pilots would also benefit from the enhanced safety provided by Class C services, including separation, traffic advisories, and safety alerts.

Class C airspace areas are designated under 14 CFR part 71 rulemaking to improve aviation safety by reducing the risk of midair collisions in the terminal area and enhancing the management of air traffic operations therein. Class C airspace is designed to keep ATC informed of all aircraft operating within the Class C airspace. Pilots are required to establish two-way radio communications with ATC prior to entering Class C airspace, and they must maintain communications while operating in Class C airspace. In addition, pursuant to 14 CFR part 91, no person may operate an aircraft in Class C airspace unless the aircraft is equipped with an operational transponder and ADS–B Out. VFR operators would only need to make minor adjustments to accommodate the proposed Class C airspace by flying under or around it. Therefore, the FAA expects the proposal would result in minimal cost to VFR operators. The FAA requests comments on the benefits and costs of this proposal to inform the final rule.

[1] *Amendment to Class D Airspace Areas,* 58 FR 54953 (Oct. 25, 1993).

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) of 1980, (5 U.S.C. 601–612), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121) and the Small Business Jobs Act of 2010 (Pub. L. 111–240), requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. The term ''small entities'' comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The proposed rule would replace Class D airspace with Class C airspace at ILM. The FAA is proposing this action to enhance the efficient management of air traffic operations and reduce the potential for midair collision in the ILM terminal area. The change would affect general aviation operators using the proposed Class C airspace. Operators flying VFR would need to comply with Class C operating and equipage requirements or make small adjustments to their flight paths to avoid the modified Class C airspace, if preferred or needed. Some VFR operators are already avoiding the existing Class D airspace to avoid heavy traffic. If an agency determines a rulemaking will not result in a significant economic impact on a substantial number of small entities, the head of the agency may so certify under section 605(b) of the RFA. Therefore, as provided in section 605(b) and based on the foregoing, the FAA proposes to certify this rulemaking would not result in a significant economic impact on a substantial number of small entities. FAA requests comments on this proposed certification.

International Trade Impact Assessment

The Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. Pursuant to these Acts, the establishment of standards is not considered an unnecessary obstacle to the foreign commerce of the United States, so long as the standard has a legitimate domestic objective, such as the protection of safety, and does not operate in a manner that excludes imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

The FAA has determined this proposal does not create an unnecessary obstacle to foreign commerce.

Unfunded Mandates Assessment

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) governs the issuance of Federal regulations that require unfunded mandates. An unfunded mandate is a regulation that requires a State, local, or Tribal government or the private sector to incur direct costs without the Federal government having first provided the funds to pay those costs. The FAA has determined the rule will not result in the expenditure of $193,000,000 or more ($100,000,000 adjusted for inflation using the most current Implicit Price Deflator for the Gross Domestic Product) by State, local, or Tribal governments, in the aggregate, or the private sector, in any one year.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) requires the FAA consider the impact of paperwork and other information collection burdens imposed on the public. The FAA has determined there is no new requirement for information collection associated with this proposed rule.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1G, ''*FAA National Environmental Policy Act Implementing Procedures*'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11K, Airspace Designations and Reporting

Points, dated August 4, 2025, and effective September 15, 2025, is amended as follows:

Paragraph 4000 Subpart C—Class C Airspace

* * * * *

ASO NC C Wilmington, NC [New]

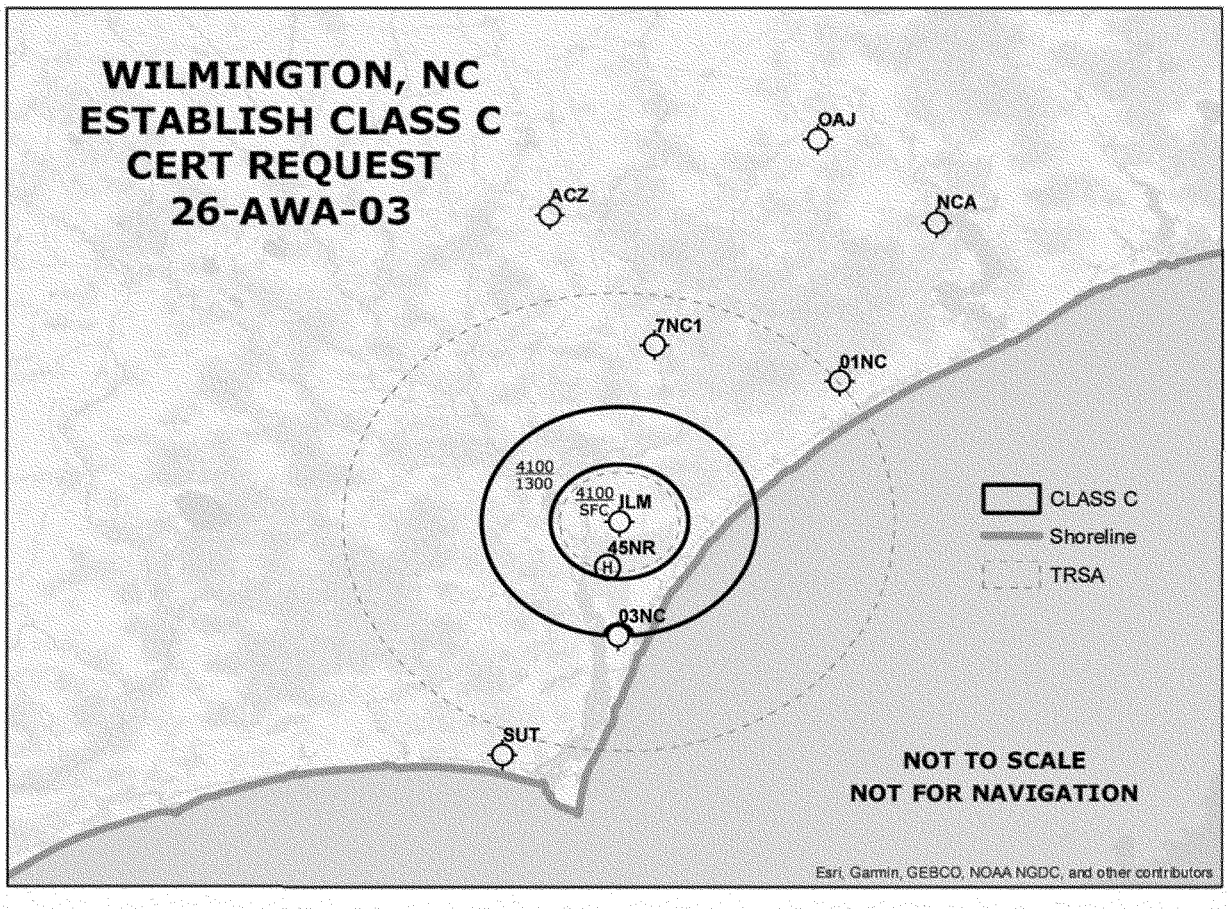
Wilmington International Airport, NC

(Lat. 34°16′27″ N, long. 77°54′17″ W)

Pilots Ridge Airport, NC

(Lat. 34°06′26″ N, long. 77°54′25″ W)

That airspace extending upward from the surface to and including 4,100 feet MSL within a 5-mile radius of the Wilmington International Airport; and that airspace extending upward from 1,300 feet MSL to and including 4,100 feet MSL within a 10-mile radius of the Wilmington International Airport, excluding that airspace within a 1-mile radius of Pilots Ridge Airport.



* * * * *

Paragraph 5000 Subpart D—Class D Airspace

* * * * *

ASO NC D Wilmington, NC [Removed]

* * * * *

Issued in Washington, DC, on July 31, 2026.

Alex W. Nelson,

Manager, Rules and Regulations Group.

FEDERAL TRADE COMMISSION

16 CFR Part 1

[File No. R607005]

Petition for Rulemaking of Matheus Garcia Pereira

AGENCY: Federal Trade Commission.

ACTION: Receipt of petition; request for comment.

SUMMARY: Please take notice that the Federal Trade Commission (''Commission'') received a petition for rulemaking from Matheus Garcia Pereira and has published that petition online at *https://www.regulations.gov.* The Commission invites written comments concerning the petition. Publication of this petition is pursuant to the Commission's Rules of Practice and Procedure and does not affect the legal status of the petition or its final disposition.

DATES: Comments must identify the petition docket number and be filed by September 3, 2026.

ADDRESSES: You may view the petition, identified by docket number FTC–2026–1024, and submit written comments concerning its merits by using the Federal eRulemaking Portal at *https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit sensitive or confidential information. You may read background documents or comments received at *https://www.regulations.gov* at any time.

FOR FURTHER INFORMATION CONTACT: Office of the Secretary (phone: 202–326–2514, email: *ElectronicFilings@ftc.gov*), Federal Trade Commission, 600 Pennsylvania Avenue NW, Washington, DC 20580.

SUPPLEMENTARY INFORMATION: Pursuant to section 18(a)(1)(B) of the Federal Trade Commission Act, 15 U.S.C. 57a(1)(B), and FTC Rule 1.31(f), 16 CFR 1.31(f), notice is hereby given that the above-captioned petition has been filed with the Secretary of the Commission

and has been placed on the public record for a period of 30 days. Any person may submit comments in support of or in opposition to the petition. All timely and responsive comments submitted in connection with this petition will become part of the public record.

This petition requests to issue an interpretive rule regarding consumer freedom of choice: the destructive impact of deceptive information on market fairness and competition. The Commission will not consider the petition's merits until after the comment period closes. It may grant or deny the petition in whole or in part, and it may deem the petition insufficient to warrant commencement of a rulemaking proceeding. The purpose of this document is to facilitate public comment on the petition to aid the Commission in determining what, if any, action to take regarding the request contained in the petition. This document is not intended to start, stop, cancel, or otherwise affect rulemaking proceedings in any way.

Because your comment will be placed on the publicly accessible website at *https://www.regulations.gov,* you are solely responsible for making sure your comment does not include any sensitive or confidential information. In particular, your comment should not include any sensitive personal information, such as your or anyone else's Social Security number; date of birth; driver's license number or other State identification number, or foreign country equivalent; passport number; financial account number; or credit or debit card number. You are also solely responsible for making sure your comment does not include any sensitive health information, such as medical records or other individually identifiable health information. In addition, your comment should not include any ''trade secret or any commercial or financial information which . . . is privileged or confidential''—as provided by section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2).

Authority: 15 U.S.C. 46; 15 U.S.C. 57a; 5 U.S.C. 601 note.

April J. Tabor,

Secretary.

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

36 CFR Part 1120

[Docket No. ATBCB–2026–0004]

RIN 3014–AA51

Revision of Freedom of Information Act Regulations

AGENCY: Architectural and Transportation Barrier Compliance Board.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Architectural and Transportation Barriers Compliance Board (Access Board or Board) is issuing this Notice of Proposed Rulemaking (NPRM) to update its regulations under the Freedom of Information Act (FOIA). The Board proposes to replace its existing FOIA regulations with this proposed rule, which streamlines the language of several procedural provisions; updates procedures consistent with current technology; incorporates changes required by amendments to the FOIA under the OPEN Government Act of 2007 and the FOIA Improvement Act of 2016, and developments in case law; and conforms to Department of Justice guidelines for agency FOIA regulations.

DATES: Submit comments by September 3, 2026. Comments received by mail will be considered timely if they are postmarked on or before that date. The electronic Federal Docket Management System (*https://www.regulations.gov*) will accept comments until Midnight Eastern Time at the end of that day.

ADDRESSES: You may submit comments, identified by docket number (ATBCB–2026–0004) by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Email: docket@access-board.gov.*
- *Mail:* Office of General Counsel, U.S. Access Board, 1331 F Street NW, Suite 1000, Washington, DC 20004–1111.

Instructions: All submissions must include the docket number, ATBCB–2026–0004. All comments received will be posted without change, including any personal information provided, to *http://www.regulations.gov* and will be available for public viewing.

FOR FURTHER INFORMATION CONTACT: Frances Spiegel, Attorney Advisor, (202)-0041, *foia@access-board.gov.*

SUPPLEMENTARY INFORMATION:

I. Introduction and Legal Authority

This proposed rule will update the Access Board's regulations under the Freedom of Information Act (FOIA), 5 U.S.C. 552. The Board proposes to replace its existing FOIA regulations with this proposed rule, which streamlines the language of several procedural provisions; incorporates changes required by amendments to the FOIA under the OPEN Government Act of 2007, Public Law 110–175, 121 Stat. 2524, and the FOIA Improvement Act of 2016, Public Law 114–185, 130 Stat. 538 (enacted June 30, 2016); and conforms to Department of Justice's guidelines for agency FOIA regulations.

The Board's FOIA regulations, 36 CFR part 1120—Public Availability of Information, were initially published in 1980, and revised in 1987 and 1990. *See* 45 FR 80976 (Dec. 8, 1980); 52 FR 43195 (Nov. 10, 1987); 55 FR 2521 (Jan. 25, 1990). While the Board has always administered its FOIA program consistent with the FOIA legislation and administrative directives, the Board now updates its FOIA regulations to reflect these changes.

II. Content of the Revised Regulation

The format and content of the Access Board's proposed updated FOIA regulation is consistent with the Department of Justice's guidance for agencies on FOIA regulations. *See* U.S. Dept. of Justice, Guidance for Agency FOIA Regulations (June 26, 2019), *available at https://www.justice.gov/oip/oip-guidance/guidance-agency-foia-regulations.* In addition to achieving consistency with statutory and administrative authorities that dictate the substance of agency FOIA regulations, the content has been updated to reflect changes in the Access Board's FOIA procedures due to advances in technology since the original regulation was published. The contents of each section are discussed below.

§ 1120.1 General Provisions

This section indicates that the regulation should be read in conjunction with the statutory text of the FOIA and the Uniform Freedom of Information Fee Schedule and Guidelines published by the Office of Management and Budget. It also points requesters to the agency's Privacy Act regulation for procedures to request records about themselves from an agency system of records.

§ 1120.2 Proactive Disclosure of Agency Records

This section indicates that records that are required to be made available

for public inspection by the FOIA are available on the agency's website.

§ 1120.3 Requirements for Making Requests

This section provides requesters with the information they need to make a FOIA request to the Access Board. Here the Board describes general information, including methods of submitting a request, how to find contact information for agency FOIA personnel, and additional requirements for requests for records pertaining to a third party. In addition, the section explains to requesters how to adequately describe records so that agency personnel can locate them with a reasonable amount of effort, and advises that agency personnel are available to help individuals formulate a sufficiently detailed request.

§ 1120.4 Responsibility for Responding to Requests

This section describes responsibility within the agency for responding to FOIA requests and explains the circumstances under which the Access Board will seek a consultation from another agency regarding whether information in requested records is exempt from disclosure, and when the Access Board will refer records directly to another agency for processing and response to the requester.

§ 1120.5 Timing of Responses to Requests

This section describes the statutory timeframes with which the Access Board must comply when responding to FOIA requests. It also states the Access Board's general practices for aggregating requests and undertaking expedited processing. The Access Board will approve requests for expedited processing where a requester demonstrates a ''compelling need,'' as defined by 5 U.S.C. 552(a)(6)(E)(v), and in other cases as determined by the agency. The statutory definition of ''compelling need'' includes circumstances where a lack of expedited processing could reasonably be expected to pose an imminent threat to the life or physical safety of an individual or where there is an urgent need to inform the public about a federal government activity and the request is made by a person primarily engaged in disseminating information. The Access Board envisions approving expedited processing in other cases only in rare circumstances that present a significant and substantiated level of urgency, similar to the level of urgency described in the statutory definition of ''compelling need.''

§ 1120.6 Responses to Requests

This section describes how FOIA office personnel communicate with requesters, in what instances tracking numbers are required to be assigned, and the actions the Access Board will take when it grants or denies a request. The section specifies the decisions that constitute adverse determinations or denials and describes the information that will be provided to a requester when the agency denies a request in whole or in part. Further, it states how information withheld under a FOIA exemption must be marked.

§ 1120.7 Confidential Commercial Information

This section describes the procedures that the agency will use when confidential commercial information contained in Access Board records is the subject of a FOIA request, and the steps that individuals who submit confidential commercial information to the Access Board should take to protect their interests.

Through this NPRM, the Access Board provides the public with notice and the opportunity to comment on proposed regulations establishing designation and predisclosure notification procedures for confidential commercial information, as required by Executive Order 12600 (June 23, 1987). *See* 52 FR 23781 (June 25, 1987).

This proposed section explains how individuals who submit confidential commercial information to the Access Board should mark it to alert agency FOIA personnel of the potential for protection from disclosure under FOIA Exemption 4, 5 U.S.C 552(b)(4). It describes the circumstances under which the agency will inform individuals or entities that information they submitted has been identified as responsive to a FOIA request, what the notification will include, and when the agency will not send a notice to a submitter.

In this section, the Access Board details how a submitter objects to disclosure of information that the submitter believes is exempt from disclosure under the FOIA. This section also affirms that the agency will consider the submitter's objections and describes the notice that will be provided to a submitter if the Access Board ultimately decides to disclose the information. Other notification requirements include notice to a submitter if the requester files a lawsuit seeking to compel disclosure, and notification to the requester in various circumstances: when a submitter is notified of a FOIA request for confidential commercial information, when the agency has notified the submitter of its intent to disclose the information, and when a submitter has filed a lawsuit to prevent disclosure.

§ 1120.8 Administrative Appeals

This section explains the procedures for appealing an adverse FOIA decision to the Access Board, specifying the format and content of the appeal. The section describes how the agency will adjudicate appeals, and what information will be contained in an appeal decision. Mediation services offered by the Office of Government Information Services of the National Archives and Records Administration (NARA) as a non-exclusive alternative to litigation are discussed in this section. Finally, this section clarifies that typically a requester must first submit a timely administrative appeal before seeking judicial review.

§ 1120.9 Preservation of Records

This section affirms that the Access Board will retain records related to FOIA requests for the length of time consistent with Federal law and the General Records Schedule 14 issued by NARA. It further states that records will not be disposed of or destroyed while they are the subject of a pending request, appeal, or lawsuit under the FOIA.

§ 1120.10 Fees

This section specifies the fees that may be charged to different categories of requesters for the processing of FOIA requests and under what circumstances. The fees and fee provisions stated in this section are consistent with the Uniform Freedom of Information Act Fee Schedule and Guidelines issued by the Office of Management and Budget (OMB). These Guidelines, originally published in 1987 and updated in 2020, provide general principles for how agencies should set fee schedules and make fee determinations, and define statutory fee terms, for consistency in administering the FOIA throughout the Federal government. *See* 52 FR 10012 (March 27, 1987); 85 FR 81955 (Dec. 17, 2020).

In November of 1987, the Access Board published an interim final rule amending its FOIA regulations to incorporate OMB's original 1987 Guidelines on fees, and a final rule in January 1990. *See* 52 FR 43195 (Nov. 10, 1987); 55 FR 2521 (Jan. 25, 1990). At that time, the Board set its search fee at $14.00 per hour, review fee at $20.00 per hour, and duplication fee at $0.20 per page. Consistent with OMB's guidelines, the search and review fees

were based on the prevailing basic rate of pay plus 16 percent for the employees who then undertook that work, and the duplication fee was based on the actual cost of duplication.

The Board now revises the search and review fees to reflect the change in salaries of government employees over the past nearly 40 years since the existing fees were set. The Access Board proposes the following fee schedule for search and review (basic pay plus 16 percent for benefits):

- Search or review by clerical personnel will be charged at a salary rate equivalent to a GS–9/step 5;
- Search or review by professional/managerial personnel will be charged at a salary rate equivalent to a GS–14/step 5; and
- Search or review by senior executive personnel and Board members will be charged at a salary rate equivalent to an EX-Level IV.

For simplicity, and to provide a fee schedule that is fair to requesters, the Access Board proposes to round down search and review time to the nearest hour. The Access Board proposes shifting its fee schedule from set dollar amounts to amounts based on the prevailing rate of pay at the specified general schedule and step for each personnel category to provide a schedule that will allow the agency to charge the full direct costs incurred as federal salaries change over time.

The Board proposes to maintain its duplication fee at $0.20 per page. This is a reasonable estimate of the Access Board's current cost of providing photocopies, which are rarely requested.

In addition to providing the fee schedule, this section provides information on restrictions on charging fees, notice requirements of anticipated fees, charges for other services, interest charges, aggregating of requests when it appears that a request has been divided to avoid fees, when advance payments are required, circumstances under which the fee schedule does not apply, and requirements for waiver or reduction of fees.

§ 1120.11 Other Rights and Services

This final section clarifies that nothing in this FOIA regulation should be construed as providing any person with a right to any service or record to which that individual is not entitled under the FOIA statute.

III. Regulatory Process Matters

Regulatory Review (E.O. 12866): The Office of Management and Budget has determined that this rule is not a ''significant regulatory action'' under Executive Order 12866, § 3(f), Regulatory Planning and Review, and accordingly this rule has not been reviewed by that Office.

Regulatory Flexibility Act: In accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), the Access Board certifies that this regulation will not have a significant economic impact on a substantial number of small entities. This rule will affect those who make requests for access to information under the provisions of the FOIA. Under the FOIA, agencies may recover only the direct costs of searching for, reviewing, and duplicating the records processed for requesters, and only for certain classes of requester and when particular conditions are satisfied. In satisfying these conditions, the Access Board typically does not charge fees for processing FOIA requests. While the Access Board has not updated its FOIA regulation since 1990, it has nevertheless been following the current statutory requirements of the FOIA and related administrative directives as reflected in DOJ's FOIA regulations template. Thus, other than the proposed fee schedule, this rulemaking simply serves to codify existing practice, which is already required by law and administrative authorities.

Unfunded Mandates Reform Act of 1995: This rule will not result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more in any one year, and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

Paperwork Reduction Act: This regulation contains no information collection requirements subject to review by the Office of Management and Budget under the Paperwork Reduction Act. *See* 44 U.S.C. 3501, *et seq.*

List of Subjects in 36 CFR Part 1120

Administrative practice and procedure; Freedom of Information Act; Privacy.

Approved by vote of the Access Board on July 29, 2026.

Christopher Kuczynski,

General Counsel.

For the reasons stated in the preamble, the Access Board proposes to amend 36 CFR part 1120, as follows:

PART 1120—PUBLIC AVAILABILITY OF INFORMATION

■ 1. The authority citation continues to read as follows:

Authority: 5 U.S.C. 552, the Freedom of Information Act, as amended.

■ 2. Revise and republish part 1120 to read as follows:

PART 1120—PROCEDURES FOR DISCLOSURE OF RECORDS UNDER THE FREEDOM OF INFORMATION ACT

§ 1120.1 General provisions.

(a) This part contains the rules that the Architectural and Transportation Barriers Compliance Board (''U.S. Access Board,'' ''Access Board,'' or ''agency'') follows in processing requests for records under the Freedom of Information Act (''FOIA''), 5 U.S.C. 552. The rules in this part should be read in conjunction with the text of the FOIA and the Uniform Freedom of Information Fee Act Schedule and Guidelines published by the Office of Management and Budget (''OMB Guidelines''). Requests made by individuals for records about themselves under the Privacy Act of 1974, 5 U.S.C. 552a, are processed under 36 CFR 1121 as well as under this part.

§ 1120.2 Proactive disclosure of agency records.

Records that are required by the FOIA to be made available for public inspection in an electronic format may be accessed through the Access Board's website at *www.access-board.gov.* .

§ 1120.3 Requirements for making requests.

(a) *General information.*

(1) Requests for records must be submitted in writing. The Access Board has a central FOIA office that processes all records requests for the agency. To make a request for Access Board records, a requester should send an email to *foia@access-board.gov* or submit a request to the Access Board through the *FOIA.gov*portal (*www.foia.gov*). Alternatively, requesters may send requests to FOIA Officer, U.S. Access Board, 1331 F Street NW, Suite 1000, Washington, DC 20004.

(2) The agency's FOIA Officer and FOIA Public Liaison are available to assist requesters. Contact information for these individuals is available on the agency's website at *www.access-board.gov.*

(3) A requester who is making a request for records about himself or herself must comply with verification of identity procedures specified by the FOIA officer.

(4) Where a request for records pertains to a third party, a requester may receive greater access by submitting either a notarized authorization signed

by that individual or a declaration made in compliance with the requirements set forth in 28 U.S.C. 1746 by that individual authorizing disclosure of the records to the requester, or by submitting proof that the individual is deceased (*e.g.,* a copy of a death certificate or an obituary). As an exercise of administrative discretion, the agency can require a requester to supply additional information if necessary in order to verify that a particular individual has consented to disclosure.

(b) *Description of records sought.* Requesters must describe the records sought in sufficient detail to enable agency personnel to locate them with a reasonable amount of effort. To the extent possible, requesters should include specific information that may assist the agency in identifying the requested records, such as the date, title or name, author, recipient, subject matter of the record, case number, file designation, or reference number. In general, requesters should include as much detail as possible about the specific records or the types of records that they are seeking. Before submitting their requests, requesters may contact the agency's FOIA officer or FOIA Public Liaison to discuss the records they are seeking and to receive assistance in describing the records. If after receiving a request the agency determines that it does not reasonably describe the records sought, the agency shall inform the requester what additional information is needed or why the request is otherwise insufficient. If a request does not reasonably describe the records sought, the agency's response to the request may be delayed.

§ 1120.4 Responsibility for responding to requests.

(a) *In general.* Except in the instances described in paragraph(c) of this section, the agency's FOIA office is responsible for responding to the request. Only the agency's Chief FOIA Officer or designee are authorized to grant or to deny any requests for agency records.

(b) *Re-routing of misdirected requests.* Where a request for records is received by agency personnel other than FOIA office personnel, the receiving personnel shall route the request to the FOIA office for processing.

(c) *Consultation, referral, and coordination.* When reviewing records located in response to a request, FOIA office personnel shall assess whether another agency of the Federal Government is better able to determine whether the record is exempt from disclosure under the FOIA. As to any such record, the agency shall proceed in one of the following ways:

(1) *Consultation.* When records originated with the Access Board, but contain within them information of interest to another agency or other Federal Government office, FOIA office personnel should typically consult with that other agency or office prior to making a release determination.

(2) *Referral.*

(i) When FOIA office personnel conclude that a different agency or other Federal Government office is best able to determine whether to disclose the record, the Access Board will typically refer the responsibility for responding to the request regarding that record, as long as the referral is to an agency or office that is subject to the FOIA. Ordinarily, the agency or office that originated the record will be presumed to be best able to make the disclosure determination. However, if the Access Board and the originating agency or office jointly agree that the Access Board is in the best position to respond regarding the record, then the record may be handled as a consultation.

(ii) Whenever the Access Board refers any part of the responsibility for responding to a request to another agency or office, it shall document the referral, maintain a copy of the record that it refers, and notify the requester of the referral and inform the requester of the name of the agency or office to which the record was referred.

(3) *Coordination.* The standard referral procedure is not appropriate where disclosure of the identity of the agency to which the referral would be made could harm an interest protected by an applicable exemption, such as the exemptions that protect personal privacy or national security interests. In such instances, in order to avoid harm to an interest protected by an applicable exemption, the agency should coordinate with the originating agency to seek its views on the disclosability of the record. The release determination for the record that is the subject of the coordination should then be conveyed to the requester by the Access Board.

(d) *Agreements regarding consultations and referrals.* The Access Board may establish agreements with other agencies to eliminate the need for consultations or referrals with respect to particular types of records.

§ 1120.5 Timing of responses to requests.

(a) *In general.* The FOIA office will typically respond to requests according to their order of receipt. In instances involving misdirected requests that are re-routed pursuant to § 1120.4(b), the response time will commence on the date that the request is received by the FOIA office, but in any event not later than 10 working days after the request is first received by an agency employee.

(b) *Multitrack processing.* The FOIA office may designate additional processing tracks that distinguish between simple and more complex requests based on the estimated amount of work or time needed to process the request. Among the factors the FOIA office may consider are the number of pages involved in processing the request and the need for consultations or referrals. If multitrack processing has been established for the fiscal year at the time a request is filed, the FOIA officer shall advise the requester of the track into which the request falls and, when appropriate, shall offer the requester an opportunity to narrow the request so that it can be placed in a different processing track. Requests that are granted expedited processing in accordance with the standards set forth in paragraph (e) of this section shall be placed in a separate track for expedited processing regardless of whether multitrack processing has otherwise been established.

(c) *Unusual circumstances.* Whenever the statutory time limit for processing a request cannot be met because of ''unusual circumstances,'' as defined in the FOIA, and the agency extends the time limit on that basis, the agency shall notify the requester in writing of the unusual circumstances involved and of the date by which processing of the request can be expected to be completed. Where the extension exceeds 10 working days, the agency shall, as described by the FOIA, provide the requester with an opportunity to modify the request or arrange an alternative time period for processing. The agency shall make available its FOIA officer and its FOIA Public Liaison for this purpose. The agency will notify the requester of the availability of the Office of Government Information Services to provide dispute resolution services.

(d) *Aggregating requests.* For the purposes of satisfying unusual circumstances under the FOIA, the agency may aggregate requests in cases where it reasonably appears that multiple requests, submitted either by a requester or by a group of requesters acting in concert, constitute a single request that would otherwise involve unusual circumstances. The agency shall not aggregate multiple requests that involve unrelated matters.

(e) *Expedited processing.*

(1) The Access Board will process requests and appeals on an expedited basis when the requester demonstrates a

compelling need, and in other cases as determined by the agency. A compelling need exists when:

(i) lack of expedited processing could reasonably be expected to pose an imminent threat to the life or physical safety of an individual; or

(ii) there is an urgency to inform the public about an actual or alleged Federal Government activity, if the request is made by a person who is primarily engaged in disseminating information.

(2) A request for expedited processing may be made at any time.

(3) A requester who seeks expedited processing must submit a statement, certified to be true and correct, explaining in detail the basis for making the request for expedited processing. For example, under paragraph (e)(1)(ii) of this section, a requester who is not a full-time member of the news media must establish that the requester is a person whose primary professional activity or occupation is information dissemination, though it need not be the requester's sole occupation. Such a requester also must establish a particular urgency to inform the public about the government activity involved in the request—one that extends beyond the public's right to know about government activity generally. The existence of numerous articles published on a given subject can be helpful in establishing the requirement that there be an ''urgency to inform'' the public on the topic. As a matter of administrative discretion, the agency may waive the formal certification requirement.

(4) The agency shall notify the requester within 10 calendar days of the receipt of a request for expedited processing of its decision whether to grant or deny expedited processing. If expedited processing is granted, the request shall be given priority, placed in the processing track for expedited requests, and shall be processed as soon as practicable. If a request for expedited processing is denied, any appeal of that decision shall be acted on expeditiously.

§ 1120.6 Responses to requests.

(a) *In general.* The agency will communicate with requesters primarily via electronic mail and telephone, unless a physical mailing address is the only contact information provided.

(b) *Tracking numbers.* The FOIA office shall assign a request an individualized tracking number if it will take longer than 10 working days to process.

(c) *Grants of requests.* Once the agency makes a determination to grant a request in full or in part, it shall notify the requester in writing. The agency also shall inform the requester of any fees charged under § 1120.10 and shall disclose the requested records to the requester promptly upon payment of any applicable fees. The agency shall inform the requester of the availability of the FOIA Public Liaison to offer assistance.

(d) *Adverse determinations of requests.* The agency shall notify the requester of an adverse determination denying a request in any respect in writing. Adverse determinations, or denials of requests, include decisions that: the requested record is exempt, in whole or in part; the request does not reasonably describe the records sought; the information requested is not a record subject to the FOIA; the requested record does not exist, cannot be located, or has been destroyed; or the requested record is not readily reproducible in the form or format sought by the requester. Adverse determinations also include denials involving fees or fee waiver matters or denials of requests for expedited processing.

(e) *Content of denial.* The denial shall be signed by the agency's Chief FOIA Officer, or designee, and shall include:

(1) The name and title or position of the person responsible for the denial;

(2) A brief statement of the reasons for the denial, including any FOIA exemption applied by the agency in denying the request;

(3) An estimate of the volume of any records or information withheld, such as the number of pages or some other reasonable form of estimation, although such an estimate is not required if the volume is otherwise indicated by deletions marked on records that are disclosed in part or if providing an estimate would harm an interest protected by an applicable exemption;

(4) A statement that the denial may be appealed under § 1120.8(a), and a description of the requirements set forth therein; and

(5) A statement notifying the requester of the assistance available from the Agency's FOIA Public Liaison and the dispute resolution services offered by the Office of Government Information Services.

(f) *Markings on released documents.* Markings on released documents must be clearly visible to the requester. Records disclosed in part shall be marked to show the amount of information deleted and the exemption under which the deletion was made unless doing so would harm an interest protected by an applicable exemption. The location of the information deleted shall also be indicated on the record, if technically feasible.

§ 1120.7 Confidential commercial information.

(a) *Definitions.*

(1) *Confidential commercial information* means commercial or financial information obtained by the agency from a submitter that may be protected from disclosure under Exemption 4 of the FOIA, 5 U.S.C. 552(b)(4).

(2) *Submitter* means any person or entity, including a corporation, State, or foreign government, but not including another Federal Government entity, that provides information, either directly or indirectly to the Federal Government.

(b) *Designation of confidential commercial information.* A submitter of confidential commercial information must use good faith efforts to designate by appropriate markings, either at the time of submission or within a reasonable time thereafter, any portion of its submission that it considers to be protected from disclosure under Exemption 4. These designations shall expire 10 years after the date of the submission unless the submitter requests and provides justification for a longer designation period.

(c) *When notice to submitters is required.*

(1) The agency shall promptly provide written notice to a submitter of confidential commercial information whenever records containing such information are requested under the FOIA if, after reviewing the request, the responsive records, and any appeal by the requester, the agency determines that it may be required to disclose the records, provided:

(i) The requested information has been designated in good faith by the submitter as information considered protected from disclosure under Exemption 4; or

(ii) The agency has a reason to believe that the requested information may be protected from disclosure under Exemption 4, but has not yet determined whether the information is protected from disclosure under that exemption or any other applicable exemption.

(2) The notice shall either describe the commercial information requested or include a copy of the requested records or portions of records containing the information. In cases involving a voluminous number of submitters, notice may be made by posting or publishing the notice in a place or manner reasonably likely to accomplish it.

(d) *Exceptions to submitter notice requirements.* The notice requirements of this section shall not apply if:

(1) The agency determines that the information is exempt under the FOIA;

(2) The information has been lawfully published or has been officially made available to the public;

(3) Disclosure of the information is required by a statute other than the FOIA or by a regulation issued in accordance with the requirements of Executive Order 12600 of June 23, 1987; or

(4) The designation made by the submitter under paragraph (b) of this section appears obviously frivolous, except that, in such a case, the agency shall give the submitter written notice of any final decision to disclose the information and must provide that notice within a reasonable number of days prior to a specified disclosure date.

(e) *Opportunity to object to disclosure.*

(1) The agency will specify a reasonable time period within which the submitter must respond to the notice referenced above. If a submitter has any objections to disclosure, it should provide the agency a detailed written statement that specifies all grounds for withholding the particular information under any exemption of the FOIA. In order to rely on Exemption 4 as basis for nondisclosure, the submitter must explain why the information constitutes a trade secret or commercial or financial information that is privileged or confidential.

(2) A submitter who fails to respond within the time period specified in the notice shall be considered to have no objection to disclosure of the information. Information received by the agency after the date of any disclosure decision will not be considered by the agency. Any information provided by a submitter under this subpart may itself be subject to disclosure under the FOIA.

(f) *Analysis of objections.* The agency will consider a submitter's objections and specific grounds for nondisclosure in deciding whether to disclose the requested information.

(g) *Notice of intent to disclose.* Whenever the agency decides to disclose information over the objection of a submitter, the agency will provide the submitter written notice, including:

(1) A statement of the reasons why each of the submitter's disclosure objections was not sustained;

(2) A description of the information to be disclosed; and

(3) A specified disclosure date, which shall be a reasonable time subsequent to the notice.

(h) *Notice of FOIA lawsuit.* Whenever a requester files a lawsuit seeking to compel the disclosure of confidential commercial information, the agency will promptly notify the submitter.

(i) *Requester notification.* The agency will notify a requester whenever it provides the submitter with notice and an opportunity to object to disclosure; whenever it notifies the submitter of its intent to disclose the requested information; and whenever a submitter files a lawsuit to prevent the disclosure of the information.

§ 1120.8 Administrative appeals.

(a) *Requirements for making an appeal.* A requester may appeal any adverse determinations. Appeals can be submitted by email to *FOIA@access-board.gov* or by regular mail to: Chief FOIA Officer, Office of General Counsel, U.S. Access Board, 1331 F Street NW, Suite 1000, Washington, DC 20004. Examples of adverse determinations are provided in § 1120.6(d). The requester must make the appeal in writing and to be considered timely it must be postmarked, or in the case of electronic submissions, transmitted, within 90 calendar days after the date of the response. The appeal should clearly identify the agency's determination that is being appealed and the assigned request number. To facilitate handling, the requester should mark both the appeal letter and envelope, or subject line of the electronic transmission, ''Freedom of Information Act Appeal.''

(b) *Adjudication of appeals.*

(1) The agency's Chief FOIA Officer or designee will adjudicate appeals.

(2) An appeal ordinarily will not be adjudicated if the request becomes a matter of FOIA litigation.

(c) *Decisions on appeals.* A decision on an appeal must be made in writing. A decision that upholds the initial determination will contain a statement that identifies the reasons for the affirmance, including any FOIA exemptions applied. The decision will provide the requester with notification of the statutory right to file a lawsuit and will inform the requester of the mediation services offered by the Office of Government Information Services of the National Archives and Records Administration as a non-exclusive alternative to litigation. If the initial decision is modified on appeal, the requester will be notified of that determination in writing. The FOIA office will thereafter further process the request in accordance with that appeal determination and respond directly to the requester.

(d) *Engaging in dispute resolution services provided by OGIS.* Mediation is a voluntary process. If the agency agrees to participate in the mediation services provided by the Office of Government Information Services, it will actively engage as a partner to the process in an attempt to resolve the dispute.

(e) *When appeal is required.* Before seeking review by a court of the agency's adverse determination, a requester generally must first submit a timely administrative appeal.

§ 1120.9 Preservation of records.

The agency shall preserve all correspondence pertaining to the requests that it receives under this subpart, as well as copies of all requested records, until disposition or destruction is authorized pursuant to title 44 of the United States Code or the General Records Schedule 14 of the National Archives and Records Administration. Records shall not be disposed of or destroyed while they are the subject of a pending request, appeal, or lawsuit under the FOIA.

§ 1120.10 Fees.

(a) *In general.* The Access Board shall charge for processing requests under the FOIA in accordance with the provisions of this section and with the OMB Guidelines. In order to resolve any fee issues that arise under this section, the FOIA office may contact a requester for additional information. The agency shall ensure that searches, review, and duplication are conducted in the most efficient and the least expensive manner. The Access Board ordinarily will collect all applicable fees before sending copies of records to a requester. Requesters must pay fees by check or money order made payable to the Treasury of the United States.

(b) *Definitions.* For purposes of this section:

(1) *Commercial use request* is a request that asks for information for a use or a purpose that furthers a commercial, trade, or profit interest, which can include furthering those interests through litigation. The agency's decision to place a requester in the commercial use category will be made on a case-by-case basis based on the requester's intended use of the information.

(2) *Direct costs* are those expenses that an agency incurs in searching for and duplicating (and, in the case of commercial use requests, reviewing) records in order to respond to a FOIA request. For example, direct costs include the salary of the employee performing the work (*i.e.,* the basic rate of pay for the employee, plus 16 percent of that rate to cover benefits) and the cost of operating computers and other

electronic equipment, such as photocopiers and scanners. Direct costs do not include overhead expenses such as the costs of space, and of heating or lighting a facility.

(3) *Duplication* is reproducing a copy of a record, or of the information contained in it, necessary to respond to a FOIA request. Copies can take the form of paper, audiovisual materials, or electronic records, among others.

(4) *Educational institution* is any school that operates a program of scholarly research. A requester in this fee category must show that the request is made in connection with the requester's role at the educational institution. The Access Board may seek assurance from the requester that the request is in furtherance of scholarly research and will advise requesters of their placement in this category.

Example 1.

A request from a professor of geology at a university for records relating to soil erosion, written on letterhead of the Department of Geology, would be presumed to be from an educational institution.

Example 2.

A request from the same professor of geology seeking drug information from the Food and Drug Administration in furtherance of a murder mystery he is writing would not be presumed to be an institutional request, regardless of whether it was written on institutional stationery.

Example 3.

A student who makes a request in furtherance of the student's coursework or other school-sponsored activities and provides a copy of a course syllabus or other reasonable documentation to indicate the research purpose for the request, would qualify as part of this fee category.

(5) *Noncommercial scientific institution* is an institution that is not operated on a ''commercial'' basis, as defined in paragraph (b)(1) of this section and that is operated solely for the purpose of conducting scientific research the results of which are not intended to promote any particular product or industry. A requester in this category must show that the request is authorized by and is made under the auspices of a qualifying institution and that the records are sought to further scientific research and are not for a commercial use.

(6) *Representative of the news media* is any person or entity that actively gathers information of potential interest to a segment of the public, uses its editorial skills to turn the raw materials into a distinct work, and distributes that work to an audience. The term ''news'' means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations that broadcast ''news'' to the public at large and publishers of periodicals that disseminate ''news'' and make their products available through a variety of means to the general public, including news organizations that disseminate solely on the internet. A request for records supporting the news-dissemination function of the requester shall not be considered to be for a commercial use. ''Freelance'' journalists who demonstrate a solid basis for expecting publication through a news media entity shall be considered as a representative of the news media. A publishing contract would provide the clearest evidence that publication is expected; however, the agency shall also consider a requester's past publication record in making this determination.

(7) *Review* is the examination of a record located in response to a request in order to determine whether any portion of it is exempt from disclosure. Review time includes processing any record for disclosure, such as doing all that is necessary to prepare the record for disclosure, including the process of redacting the record and marking the appropriate exemptions. Review costs are properly charged even if a record ultimately is not disclosed. Review time also includes time spent both obtaining and considering any formal objection to disclosure made by a confidential commercial information submitter under § 1120.7, but it does not include time spent resolving general legal or policy issues regarding the application of exemptions.

(8) *Search* is the process of looking for and retrieving records or information responsive to a request. Search time includes page-by-page or line-by-line identification of information within records and the reasonable efforts expended to locate and retrieve information from electronic records.

(c) *Charging fees.* In responding to FOIA requests, the Access Board will charge the following fees unless a waiver or reduction of fees has been granted under paragraph (k) of this section. The fee amounts provided below include the direct costs associated with a given fee type.

(1) *Search.*

(i) Requests made by educational institutions, noncommercial scientific institutions, or representatives of the news media are not subject to search fees. Search fees shall be charged for all other requesters, subject to the restrictions of paragraph (d) of this section. The agency may properly charge for time spent searching even if they do not locate any responsive records or if they determine that the records are entirely exempt from disclosure.

(ii) Search fees, including for electronic searches that do not require new programming, will be calculated based on the hourly rates (basic pay plus 16% for benefits) of the personnel conducting the search, rounded down to the nearest full hour, as follows:

(A) Searches by clerical personnel will be charged at a salary rate equivalent to a GS–9/step 5;

(B) Searches by professional/managerial personnel will be charged at a salary rate equivalent to a GS–14/step 5; and

(C) Searches by senior executive personnel and Board members will be charged at a salary rate equivalent to an EX-Level IV.

(iii) Requesters shall be charged the direct costs associated with conducting any search that requires the creation of a new computer program to locate the requested records. Requesters shall be notified of the costs associated with creating such a program and must agree to pay the associated costs before the costs may be incurred.

(iv) For requests that require the retrieval of records stored by the agency at a Federal records center operated by the National Archives and Records Administration (NARA), additional costs shall be charged in accordance with the Transactional Billing Rate Schedule established by NARA.

(2) *Duplication.* Duplication fees shall be charged to all requesters, subject to the restrictions of paragraph (d) of this section. The agency will honor a requester's preference for receiving a record in a particular form or format where it is readily reproducible by the agency in the form or format requested. Where photocopies are supplied, the agency will provide one copy per request at a cost of $0.20 per page. For copies of records produced on tapes, disks, or other media, the agency will charge the direct costs of producing the copy, including operator time. Where paper documents must be scanned in order to comply with a requester's preference to receive the records in an electronic format, the requester shall pay the direct costs associated with scanning those materials. For other forms of duplication, the agency will charge the direct costs.

(3) *Review.* Review fees shall be charged to requesters who make commercial use requests. Review fees shall be assessed in connection with the initial review of the record, *i.e.,* the

review conducted by the agency to determine whether an exemption applies to a particular record or portion of a record. No charge will be made for review at the administrative appeal stage of exemptions applied at the initial review stage. However, if a particular exemption is deemed to no longer apply, any costs associated with the re-review of the records in order to consider the use of other exemptions may be assessed as review fees. Review fees shall be charged at the same rates as those charged for a search under paragraph (c)(1)(ii) of this section.

(d) *Restrictions on charging fees.*

(1) No search fees will be charged for requests by educational institutions (unless the records are sought for a commercial use), noncommercial scientific institutions, or representatives of the news media.

(2) If the agency fails to comply with the FOIA's time limits in which to respond to a request, it may not charge search fees, or, in the instances of requests from requesters described in paragraph (d)(1) of this section, may not charge duplication fees, except as described in paragraphs (d)(2)(i) through (iii) of this section.

(i) If the agency has determined that unusual circumstances as defined by the FOIA apply and the agency provided timely written notice to the requester in accordance with the FOIA, a failure to comply with the time limit shall be excused for an additional 10 days.

(ii) If the agency has determined that unusual circumstances as defined by the FOIA apply, and more than 5,000 pages are necessary to respond to the request, the agency may charge search fees, or, in the case of requesters described in paragraph (d)(1) of this section, may charge duplication fees if the following steps are taken. The agency must have provided timely written notice of unusual circumstances to the requester in accordance with the FOIA and the agency must have discussed with the requester via written mail, email, or telephone (or made not less than three good-faith attempts to do so) how the requester could effectively limit the scope of the request in accordance with 5 U.S.C. 552(a)(6)(B)(ii). If this exception is satisfied, the agency may charge all applicable fees incurred in the processing of the request.

(iii) If a court has determined that exceptional circumstances exist as defined by the FOIA, a failure to comply with the time limits shall be excused for the length of time provided by the court order.

(3) Except for requesters seeking records for a commercial use, the agency will provide without charge:

(i) The first 100 pages of duplication (or the cost equivalent for other media); and

(ii) The first two hours of search.

(4) When, after first deducting the 100 free pages (or its cost equivalent) and the first two hours of search, a total fee calculated under paragraph (c) of this section is $25.00 or less for any request, no fee will be charged.

(5) No fees will be charged if the costs of routine collection and processing of the fee are likely to equal or exceed the amount of the fee.

(e) *Notice of anticipated fees in excess of $25.00.*

(1) When the agency determines or estimates that the fees to be assessed in accordance with this section will exceed $25.00, the agency will notify the requester of the actual or estimated amount of the fees, including a breakdown of the fees for search, review or duplication, unless the requester has indicated a willingness to pay fees as high as those anticipated. If only a portion of the fee can be estimated readily, the agency will advise the requester accordingly. If the requester is a noncommercial use requester, the notice will specify that the requester is entitled to the statutory entitlements of 100 pages of duplication at no charge and, if the requester is charged search fees, two hours of search time at no charge, and will advise the requester whether those entitlements have been provided.

(2) In cases in which a requester has been notified that the actual or estimated fees are in excess of $25.00, the request will not be considered received and further work will not be completed until the requester commits in writing to pay the actual or estimated total fee, or designates some amount of fees the requester is willing to pay, or in the case of a noncommercial use requester who has not yet been provided with the requester's statutory entitlements, designates that the requester seeks only that which can be provided by the statutory entitlements. The requester must provide the commitment or designation in writing, and must, when applicable, designate an exact dollar amount the requester is willing to pay. The agency is not required to accept payments in installments.

(3) If the requester has indicated a willingness to pay some designated amount of fees, but the agency estimates that the total fee will exceed that amount, the agency will toll the processing of the request when it notifies the requester of the estimated fees in excess of the amount the requester has indicated a willingness to pay. The agency will inquire whether the requester wishes to revise the amount of fees the requester is willing to pay or modify the request. Once the requester responds, the time to respond will resume from where it was at the date of the notification.

(4) The Access Board's FOIA officer and FOIA Public Liaison is available to assist any requester in reformulating a request to meet the requester's needs at a lower cost.

(f) *Charges for other services.* Although not required to provide special services, if the agency chooses to do so as a matter of administrative discretion, the direct costs of providing the service will be charged. Examples of such services include certifying that records are true copies, providing multiple copies of the same document, or sending records by means other than first class mail.

(g) *Charging interest.* The agency may charge interest on any unpaid bill starting on the 31st day following the date of billing the requester. Interest charges will be assessed at the rate provided in 31 U.S.C. 3717 and will accrue from the billing date until payment is received by the agency. The Access Board will follow the provisions of the Debt Collection Act of 1982 (Pub. L. 97–365, 96 Stat. 1749), as amended, and its administrative procedures, including the use of consumer reporting agencies, collection agencies, and offset.

(h) *Aggregating requests.* When the agency reasonably believes that a requester or a group of requesters acting in concert is attempting to divide a single request into a series of requests for the purpose of avoiding fees, the agency may aggregate those requests and charge accordingly. The agency may presume that multiple requests of this type made within a 30-day period have been made in order to avoid fees. For requests separated by a longer period, the agency will aggregate them only where there is a reasonable basis for determining that aggregation is warranted in view of all the circumstances involved. Multiple requests involving unrelated matters shall not be aggregated.

(i) *Advance payments.*

(1) For requests other than those described in paragraphs (i)(2) or (i)(3) of this section, the Access Board will not require the requester to make an advance payment before work commences or is continued on a request. Payment owed for work already completed (*i.e.,* payment before copies are sent to a requester) is not an advance payment.

(2) When the agency determines or estimates that a total fee to be charged

under this section will exceed $250.00, it may require that the requester make an advance payment up to the amount of the entire anticipated fee before beginning to process the request. The agency may elect to process the request prior to collecting fees when it receives a satisfactory assurance of full payment from a requester with a history of prompt payment.

(3) Where a requester has previously failed to pay a properly charged FOIA fee within 30 calendar days of the billing date, the agency may require that the requester pay the full amount due, plus any applicable interest on that prior request, and may require that the requester make an advance payment of the full amount of any anticipated fee before the agency begins to process a new request or continues to process a pending request or any pending appeal. Where the agency has a reasonable basis to believe that a requester has misrepresented the requester's identity in order to avoid paying outstanding fees, it may require that the requester provide proof of identity.

(4) In cases in which the agency requires advance payment, the request shall not be considered received and further work will not be completed until the required payment is received. If the requester does not pay the advance payment within 30 calendar days after the date of the agency's fee determination, the request will be closed.

(j) *Other statutes specifically providing for fees.* The fee schedule of this section does not apply to fees charged under any statute that specifically requires an agency to set and collect fees for particular types of records. In instances where records responsive to a request are subject to a statutorily-based fee schedule program, the agency shall inform the requester of the contact information for that program.

(k) *Requirements for waiver or reduction of fees.*

(1) Requesters may seek a waiver of fees by submitting a written application demonstrating how disclosure of the requested information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester.

(2) The agency will furnish records responsive to a request without charge or at a reduced rate when it determines, based on all available information, that disclosure of the requested information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester. In deciding whether this standard is satisfied, the agency will consider the factors described in paragraphs (k)(2)(i) through (iii) of this section:

(i) Disclosure of the requested information would shed light on the operations or activities of the government. The subject of the request must concern identifiable operations or activities of the Federal Government with a connection that is direct and clear, not remote or attenuated.

(ii) Disclosure of the requested information would be likely to contribute significantly to public understanding of those operations or activities. This factor is satisfied when the following criteria are met:

(A) Disclosure of the requested records must be meaningfully informative about government operations or activities. The disclosure of information that already is in the public domain, in either the same or a substantially identical form, would not be meaningfully informative if nothing new would be added to the public's understanding.

(B) The disclosure must contribute to the understanding of a reasonably broad audience of persons interested in the subject, as opposed to the individual understanding of the requester. A requester's expertise in the subject area as well as the requester's ability and intention to effectively convey information to the public must be considered. The agency will presume that a representative of the news media will satisfy this consideration.

(iii) The disclosure must not be primarily in the commercial interest of the requester. To determine whether disclosure of the requested information is primarily in the commercial interest of the requester, the agency will consider the following criteria:

(A) Whether the requester has any commercial interest that would be furthered by the requested disclosure. A commercial interest includes any commercial, trade, or profit interest. Requesters must be given an opportunity to provide explanatory information regarding this consideration.

(B) If there is an identified commercial interest, whether that is the primary interest furthered by the request. A waiver or reduction of fees is justified when the requirements of paragraphs (k)(2)(i) and (ii) of this section are satisfied and any commercial interest is not the primary interest furthered by the request. The agency ordinarily will presume that when a news media requester has satisfied the requirements of paragraphs (k)(2)(i) and (ii) of this section, the request is not primarily in the commercial interest of the requester. Disclosure to data brokers or others who merely compile and market government information for direct economic return will not be presumed to primarily serve the public interest.

(3) Where only some of the records to be released satisfy the requirements for a waiver of fees, a waiver shall be granted for those records.

(4) Requests for a waiver or reduction of fees should be made when the request is first submitted and should address the criteria referenced above. A requester may submit a fee waiver request at a later time so long as the underlying record request is pending or on administrative appeal. When a requester who has committed to pay fees subsequently asks for a waiver of those fees and that waiver is denied, the requester shall be required to pay any costs incurred up to the date the fee waiver request was received.

§ 1120.11 Other rights and services.

Nothing in this part shall be construed to entitle any person, as of right, to any service or to the disclosure of any record to which such person is not entitled under the FOIA.

BILLING CODE 8150–01–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571 and 585

[Docket No. NHTSA–2025–0051]

RIN 2127–AM74

Federal Motor Vehicle Safety Standards; Child Restraint Anchorage Systems; Child Restraint Systems

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking; response to petitions for reconsideration, technical corrections.

SUMMARY: This NPRM responds to petitions for reconsideration of the January 7, 2025 final rule amending Federal Motor Vehicle Safety Standard (FMVSS) No. 225. NHTSA proposes granting the requests to extend the 3-year phase-in period to a 4-year phase-in period to comply with updated requirements in FMVSS No. 225 and to

extend the lead time for small-volume manufacturers to comply fully with the updated requirements by the end of the proposed phase-in period. The agency also proposes granting the request to extend the sunset of the tether anchorage exemption for convertibles by two years. NHTSA proposes denying the request to allow tether routing over adjustable or removable head restraints to meet the tether anchorage location requirements. NHTSA is also proposing to make several technical corrections, and clarify certain test procedures.

DATES: Comments must be received by September 3, 2026.

Proposed Compliance Dates: NHTSA proposes adopting a 4-year phase-in period to comply with the updated requirements in FMVSS No. 225 and proposes extending the lead time for small-volume manufacturers to comply fully with the updated requirements by the end of the proposed phase-in period. The agency also proposes extending the sunset date of the tether anchorage exclusions for convertibles by two years. NHTSA proposes to permit early compliance.

ADDRESSES: You may submit comments to the docket number identified in the heading of this document by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Mail or Hand Delivery:* Docket Management, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Suite W58–213, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays. To be sure someone is there to help you, please call (202) 366–9826 or (202) 366–9317 before coming.
- *Fax:* 202–493–2251.

Regardless of how you submit your comments, please mention the docket number of this document.

Instructions: For detailed instructions on submitting comments and additional information on the rulemaking process, see the Public Participation heading of the **SUPPLEMENTARY INFORMATION** section of this document. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to *www.regulations.gov,* or the street address listed above. Follow the online instructions for accessing the dockets.

Confidential Business Information: If you claim that any of the information in your comment (including any additional documents or attachments) constitutes confidential business information within the meaning of 5 U.S.C. 552(b)(4) or is protected from disclosure pursuant to 18 U.S.C. 1905, please see the detailed instructions given under the Public Participation heading of the **SUPPLEMENTARY INFORMATION** section of this document.

Privacy Act: Please see the Privacy Act heading under the Regulatory Analyses section of this document.

FOR FURTHER INFORMATION CONTACT: For technical issues, you may contact Cristina Echemendia, Office of Crashworthiness Standards, at *cristina.echemendia@dot.gov.* For legal issues, you may contact John Piazza, Office of Chief Counsel, at *john.piazza@dot.gov.* You can reach these officials by phone at 202–366–1810. Address: National Highway Traffic Safety Administration, U.S. Department of Transportation, 1200 New Jersey Avenue, SE, West Building, Washington, DC 20590.

IV. Costs and Benefits
V. Proposed Compliance Dates
VI. Regulatory Analyses and Notices

I. Background

On January 7, 2025, NHTSA published a final rule (90 FR 1288) amending FMVSS No. 225, ''Child restraint anchorage systems,'' to improve ease-of-use of the lower and tether anchorages and improve correct use of child restraint systems in motor vehicles.

NHTSA's regulations allow any interested person to petition the Administrator for reconsideration of a rule.[1] Under NHTSA's regulations, petitions for reconsideration must provide an explanation why compliance with the rule is not practicable, is unreasonable, or is not in the public interest. Petitions must be received within 45 days of the publication of the final rule. The Administrator may, consistent with 5 U.S.C. 553, issue a final decision on reconsideration without further proceedings or may provide opportunity for comment.

NHTSA received petitions for reconsideration of the January 7, 2025 final rule from Alliance for Automotive Innovation (Alliance) and Mercedes-Benz Research & Development North America, Inc (Mercedes-Benz).[2]

In this notice of proposed rulemaking (NPRM), NHTSA proposes granting Mercedes-Benz's request to change the 3-year phase-in period to a 4-year phase-in period and granting Alliance's requests to amend the phase-in schedule for small volume manufacturers [3] and to extend the sunset of the tether anchorage exemption for convertibles by 2 years. NHTSA proposes denying Mercedes-Benz's requests to allow tether routing over adjustable or removable head restraints to meet the new tether location requirement and to extend the permissible vertical transverse plane measurement to locate lower anchorage markings. The agency is also proposing minor technical corrections to the regulatory text and is providing clarification on the use of the clearance angle tool requested by Mercedes-Benz.

NHTSA seeks comment on all aspects of this NPRM.

II. Petitions for Reconsideration and NHTSA's Response

a. Extend 3-Year Phase-In to 4-Year Phase-In

The January 7, 2025 final rule established a three-year phase-in

[1] 49 CFR 553.35, 553.37.

[2] Petitions are docketed at: *https://www.regulations.gov/docket/NHTSA-2024-0089/document.*

[3] Small Volume Manufacturers are those that produce fewer than 5,000 vehicles annually for sale in the United States.

schedule to comply with the updated FMVSS No. 225 requirements, as follows: 20 percent of applicable vehicles produced from September 1, 2028 to August 31, 2029, 50 percent from September 1, 2029 to August 31, 2030, and 100 percent beginning September 1, 2030. Mercedes-Benz petitioned the agency to change the three-year phase-in schedule to a four-year phase-in schedule to meet the updated requirements in FMVSS No. 225. In support of its petition, Mercedes-Benz stated that a four-year phase-in schedule ''would lessen the burden for manufacturers to redesign the body-in-white and seat structure for vehicles currently in mid-life cycle.'' [4]

Based on information provided by Mercedes-Benz, NHTSA tentatively concludes that to meet the updated FMVSS No. 225 requirements, several vehicle models would require structural redesign in mid-life cycle. This would involve an iterative process for redesigning structural components of the vehicle and seats, and the seat foam, and validating the design to the updated requirements. Changes to the structural and seat foam design would also necessitate changes to production tooling that could add to manufacturing delays. All of this involves non-trivial lead time, and this challenge is magnified when the changes occur off-cycle.

Accordingly, NHTSA proposes extending the phase-in schedule from a three-year phase-in to a four-year phase-in as requested by Mercedes-Benz. This extension would ease the burden of redesigning vehicles by reducing costs and providing additional time to plan and implement the necessary changes to the affected vehicles. This additional phase-in year would reduce potential tooling costs by allowing manufacturers the opportunity to make required changes to subject vehicles during their regular design update cycles. The proposed phase-in schedule to comply with the FMVSS No. 225 updated requirements, which is in accordance with the petitioner's request, is as follows:

- 20 percent of applicable vehicles produced from September 1, 2028 to August 31, 2029;
- 50 percent from September 1, 2029 to August 31, 2030;
- 75 percent from September 1, 2030 to August 31, 2031; and
- 100 percent of applicable vehicles on and after September 1, 2031.

NHTSA explained in the January 2025 final rule that the intent of the phase-in schedule was to provide sufficient time for vehicle manufacturers to accommodate significant vehicle system changes into manufacturers' normal course of vehicle redesign. Providing an additional year to the phase-in schedule would allow manufacturers to meet the requirements of this final rule with minimal cost impacts consistent with the intent of the January 2025 final rule.

b. Extend Lead Time and Phase-In for Small Volume Manufacturers

Alliance petitioned NHTSA to provide additional lead time for small volume manufacturers (SVM) [5] to comply with the updated requirements. Specifically, Alliance's petition asked that the phase-in schedule for SVMs be removed and replaced with 100% compliance by September 1, 2030 to minimize additional manufacturing costs.

Alliance stated the additional lead time is necessary to address the regulatory burden unique to SVMs, explaining that because of their small volume and unique product lifecycles, SVMs encounter more planning constraints and do not benefit from phase-in schedules like larger vehicle manufacturers may. In support of its petition, Alliance explained that modifications to the seating system, the overall vehicle architecture, or both will be necessary to meet the new requirements. Alliance stated that SVMs typically do not have a larger parent company that can benefit from base-vehicle platforms shared across multiple models or brands to spread overall development and manufacturing costs. Alliance added that given lower sales volumes, the relative investment to redesign SVM vehicles is often more substantial per model line compared to larger vehicle manufacturers. Further, Alliance stated that financial capital and human resource constraints for SVMs are often very different from those of large volume vehicle manufacturers.

NHTSA proposes granting Alliance's request to extend the lead time for SVMs. The agency understands that SVMs might need more time to make vehicle design changes and that such changes may trigger added costs due to SVMs' longer design cycles. Given the unique design cycles of SVMs, NHTSA is proposing to eliminate the phase-in period to meet the updated requirements in FMVSS No. 225 and instead require SVMs to comply by the proposed compliance date. The petitioner requested September 1, 2030 as the compliance date for SVMs, but because the agency is proposing to grant Mercedes-Benz's request and extend the phase-in period for non-SVMs by one year (to 2031), NHTSA is proposing September 1, 2031 as the compliance date for SVMs, with no phase-in.

This proposal is consistent with the general lead time concerns addressed in the January 7, 2025 final rule, which acknowledged that design changes such as body structure reinforcement and re-design, changes to the seat and anchorages, and in some cases development of new attachment schemes would be necessary for production vehicles to meet the updated requirements. Specifically, NHTSA extended the lead time in the final rule to provide sufficient time for vehicle manufacturers to accommodate any vehicle system changes into manufacturers' normal course of vehicle redesign while also mitigating cost impacts.

c. Extend the Sunset Date of Tether Anchorage Exemption for Convertible Vehicles

The FMVSS No. 225 standard established in 1999 excluded convertibles from having to provide tether anchorages in rear seating positions.[6] This exclusion was created in response to comments to the 1997 NPRM,[7] where GM and Mitsubishi stated that vehicle manufacturers have technical problems installing tether anchorages in convertibles because the vehicles have folding roofs, a stowage area behind the seat back for the top and its mechanism, and less rear seat space. NHTSA agreed that many convertibles could have design problems and determined that it could not at that time readily separate those convertibles from those without technical problems.

The 2015 NPRM requested comments on the feasibility of installing tether anchorages in convertibles because several convertible vehicle models in the market have demonstrated that they can accommodate tether anchorages.[8] Specifically, the agency found that among 35 convertible vehicle models from the 2013 vehicle fleet, 10 were equipped with lower anchorages and tether anchorage in two rear designated seating positions (DSPs), 14 were equipped with only the lower

[4] Mercedes-Benz used the term ''body-in-white'' in their petition. This is an automotive and manufacturing term that in general means the bare structural skeleton of a vehicle. More formally, Body-in-White (BIW) refers to the stage where a car's sheet metal components (like the frame, roof, and side panels) have been welded together but have not yet been painted or fitted with parts like the engine, suspension, seats, electronics, or bumpers.

[5] Per Alliance's description, SVMs sell fewer than 5,000 vehicles per year in the United States.

[6] 64 FR 10786 (Mar. 5, 1999).

[7] 62 FR 7858 (Feb. 20, 1997).

[8] 80 FR 3744 (Jan. 23, 2015).

anchorages at two rear DSPs, and 11 were not equipped with any anchorages. The 2025 final rule established that convertibles manufactured after September 1, 2031 would be required to be equipped with tether anchorages.

Alliance petitioned the agency to extend the sunset date of the tether anchorage exclusions for convertibles from September 1, 2031 to September 1, 2033. Alliance explained that the design changes for convertible vehicles often occur after the architecture for coupe models has been established, causing these models to follow a longer design cycle, and requiring additional time to minimize the burden of modifying an already developed vehicle architecture. Alliance added that the implementation of the top tether anchorage is challenging because of the unique design of convertible models, which is more complex than coupe variants because of the roof mechanism and the low clearance available to install the anchorage.

NHTSA proposes to grant Alliance's request to extend the sunset date of the tether anchorage exclusions to September 1, 2033. The agency understands that convertibles may present unique design challenges and that these models might follow longer design cycles. NHTSA tentatively concludes that extending the sunset date for the exemption for convertibles will help accomplish the final rule's intent of increasing tether availability while also minimizing costs. NHTSA requests comment on the proposal for a two-year extension of the sunset date of the exemption for convertibles from tether anchorage requirements.

NHTSA also proposes to extend the sunset date of the exception for lower anchorages in rear designated seating positions where interference with the transmission or suspension components prevent the location of the lower anchorages anywhere in the specified zones in S5.1(e) of FMVSS No. 225. This provision mostly affects convertible vehicles and aligning the sunset dates for the exception of both the tether anchorages and the lower anchorages in convertibles will help streamline the design development of child restraint anchorage systems in these vehicles.

d. Allow Tether Strap Routing Over Adjustable or Removable Head Restraints To Meet New Tether Anchor Location Requirement

The 2025 final rule adopted a new requirement for DSPs with either adjustable, removable, or no head restraint to locate the tether anchorage outside a specified zone. This zone is defined by a 325-millimeter (mm) radius sphere centered on the R-point [9] and horizontally truncated 230 mm below the sphere's center. This measurement was adopted to ensure sufficient space exists between the tether anchorage and the tether attachment on the child restraint for a caregiver to tighten the tether strap. The 2025 final rule excluded DSPs with fixed head restraints from the tether anchorage location requirements specified by the 325-mm sphere centered on the R-point. This exclusion was made because DSPs with fixed head restraints require the tether to be routed over the fixed head restraint. This extended tether routing length provides sufficient space to effectively tighten the tether strap. In addition, because there is no interference of fixed head restraints during tether routing and tightening, the zone where tether anchorages cannot be located, defined by the 325-mm radius sphere, is unnecessary for DSPs with fixed head restraints.

Mercedes-Benz petitioned NHTSA to allow for tether strap routing over adjustable or removable head restraints if such tether strap routing meets the required minimum wraparound distance of 325 mm from R-Point to the tether anchorage location.[10] Mercedes-Benz stated that the tether strap routing over adjustable or removable head restraints ''should be included and described in the Operator's Manual.'' Mercedes-Benz argued that this belt length is sufficient and allows for easy tether fixation but is not currently permitted in the final rule. In support of its request, Mercedes-Benz stated, in a meeting with NHTSA,[11] that NHTSA's own research indicates that routing the tether under or over an adjustable head restraint did not have an effect on head excursion. Mercedes-Benz added that to meet the new tether anchorage location requirements, Mercedes-Benz's body-in-white and seat structures must be redesigned to move the tether anchorage rearward by 75 mm.[12] Mercedes-Benz explained their current design includes structural reinforcements for this anchorage and that redesigning this area will incur significant time and development costs.

On July 25, 2025, NHTSA received a joint letter from Volkswagen Group of America (Volkswagen) and Porsche Cars North America (Porsche) in support of Mercedes-Benz's petition for reconsideration to allow tether strap routing over adjustable head restraints if such tether strap routing meets a required minimum wraparound distance of 325 millimeters from R-point to the tether anchor location.[13] Volkswagen and Porsche also requested that the 325-millimeter radius sphere, with its center at the R-point, that is used for establishing a zone where tether anchorages cannot be located, be truncated 155 millimeters below the sphere's center instead of the current 230 millimeters below the sphere's center. Volkswagen and Porsche noted that this modification to the final rule regulatory text would permit tether anchorage locations in current sport utility vehicles (SUVs) that otherwise would be prohibited by the January 7, 2025 final rule. Volkswagen and Porsche also noted that the tether anchorages at their current location in SUVs have not hindered attaching and tightening the tether.

NHTSA has tentatively decided to deny Mercedes-Benz's request to allow routing the tether strap over adjustable or removable head restraints. The January 7, 2025 final rule already considered and responded to comments raising concerns that relocating tether anchorages might require tooling and manufacturing changes. In response to these comments, the agency provided an extended lead time followed by a phase-in period to comply with the updated requirements so that those changes could be made during regular vehicle design updates to mitigate cost.

The NHTSA-funded research that Mercedes-Benz referred to in the July 23, 2025 meeting is a study conducted by the University of Michigan Transportation Research Institute (UMTRI).[14] The results of this study suggest that there is not a particular method of routing the tether that provides the greatest safety benefit in terms of reduced head excursion.

[9] R-point refers to the shoulder reference point, which is a location for evaluating occupant restraint systems, seat design, and compliance with safety standards. The ISO Standard 6549, titled ''Road vehicles—Procedure for H- and R-point determination'' specifies the use of a three-dimensional manikin, known as an H-point (hip point) machine, to physically measure several reference points in a vehicle seat.

[10] Mercedes provided an illustration in its petition (Figure 1). The petition can be found here: *https://www.regulations.gov/document/NHTSA-2024-0089-0007*.

[11] A memorandum summarizing NHTSA's July 23, 2025 meeting with Mercedes-Benz is in the docket, NHTSA–2025–0051 that can be accessed on *www.regulations.gov*.

[12] Mercedes provided illustration in their petition (Figure 2).

[13] Volkswagen and Porsche letter is in the docket for this final rule at NHTSA–2025–0051.

[14] Klinich, K.D., Manary, M.A., & Orton, N.R. (2017, December). Effect of tether routing and anchor location on child restraint kinematics (Report No. DOT HS 812 467) Washington, DC National Highway Traffic Safety Administration (*available at https://deepblue.lib.umich.edu/bitstream/handle/2027.42/149101/UMTRI-2013-27.pdf?sequence=1&isAllowed=y*).

Rather, the lowest head excursions were associated with routing and tether locations that involved the shortest amount of tether webbing between the tether anchor and the attachment point on the child restraint, provided the tether could be adequately tightened. UMTRI noted in another NHTSA-funded study, however, that tether routing over the head restraint could result in the tether slipping to the side of the head restraint in oblique and side impact crashes, resulting in greater head excursions.[15]

The current best practice followed by child passenger safety technicians is to route the tether strap under adjustable head restraints or to remove the head restraint for practical and safety considerations.[16] Most manufacturers, including Mercedes-Benz, Volkswagen, and Porsche, currently recommend in their owner's manual to route the tether under adjustable head restraint or to remove the head restraint.

The January 2025 final rule explained that because some head restraints that protrude or tilt to the front could interfere with the installation of some CRS models, it is typically advised to remove or move the head restraint to a higher position to eliminate this interference. If the vehicle was designed to meet the tether location requirement while routing the tether over the head restraint and the head restraint is removed because of CRS-head restraint interference, it is possible that the tether anchorage would not be at a sufficient distance from the back of the CRS that would permit tightening the tether. As explained in the final rule, NHTSA determined that because adjustable or removable head restraints are likely to be used with a tether routed under the head restraint, it is important to have the tether anchorage beyond the 325 mm truncated sphere from the R-point to ensure tethers can be tightened easily. Routing the tether over a head restraint placed in its highest position to avoid interference with a child restraint would increase the tether strap length resulting in higher head excursions and a greater risk of head injuries.

Another safety concern with routing the tether over a head restraint placed in a high position to avoid interference with a child restraint is that there are no strength requirements for the head restraint to withstand tether loads; therefore, the head restraint may not remain sufficiently fixed in position relative to the seat back. The head restraint might shift to a lower position or separate from the seat back, resulting in tether slack and higher head excursions.

For these reasons, which were discussed generally in the January 2025 final rule, NHTSA has decided tentatively to deny Mercedes-Benz's request to allow tether routing over adjustable/removable head restraints to meet the tether location requirement.

NHTSA also does not propose, as requested by Volkswagen and Porsche, to truncate the 325-millimeter sphere at 155 millimeters below the center of the sphere to continue to permit tether anchorage locations in the seatbacks of their current SUVs. Volkswagen and Porsche did not provide specific data showing that this allowance in the location of the tether anchorages would allow tightening the tether of child restraints in a variety of vehicle designs. In a NHTSA-funded study, UMTRI evaluated nine vehicle models with tether anchorages located on the seatback and found that seven of these vehicles (78 percent) met the January 2025 final rule specifications for tether anchorage location.[17] The remaining two vehicles needed only minor modifications (one to two centimeters) to the tether anchorage location on the seat back to meet the January 2025 final rule specifications. If the 325-millimeter sphere, truncated at 155 millimeters below the center of the sphere was applied to these two vehicles, and the tether anchorage was placed at the outside edge of this boundary, the tether anchorage would be too close to the head restraint (less than 165 mm) and would likely be difficult to tighten. Therefore, NHTSA concludes tentatively that Volkswagen and Porsche's requested modification to the allowable location zone for the tether anchorages would not ensure that the tether strap of child restraints can be sufficiently tightened in all vehicles.

The January 7, 2025 final rule specifications for allowable tether anchorage locations using the 325 millimeter sphere centered at the R-point of the seat and truncated 230 millimeters below the R-point harmonize with the requirements in the Australian Design Rule 34/02 ''Child Restraint Anchorages and Child Restraint Anchor Fittings.'' [18] The January 2025 final rule tether anchorage location requirements were designed to prevent possible conflicts with the June 2016 Insurance Institute for Highway Safety (IIHS) Vehicle LATCH Hardware Evaluation Rating Guidelines [19] such that tether anchorages located on the seatback that meet the January 2025 final rule requirements could also obtain higher IIHS scores.

Based on the diagrams presented in the Volkswagen-Porsche letter, the tether anchor location on the seatback would need only minor adjustments to meet the January 2025 final rule specifications for tether anchorage location. NHTSA concludes tentatively the additional one-year phase-in period would allow the manufacturers to make any needed vehicle changes within their normal design cycle to meet the tether anchorage location requirements specified in the January 7, 2025 final rule.

e. Extend Permissible Vertical Measurement To Locate Lower Anchorage Markings

Before the January 2025 final rule, FMVSS No. 225 required lower anchors that are not visible to be marked with a circle that is not less than 13 mm in diameter located on the seatback area at a vertical distance between 50 and 100 mm above the anchorage or on the seat cushion at a horizontal distance 100 ±25 mm forward of the anchorage. This is illustrated in figure 22 of FMVSS No. 225.

The January 2025 final rule updated the requirements for lower anchor markings and their location. The final rule required all lower anchorages to be marked, regardless of whether they are visible, with a circle not less than 13 mm in diameter displaying the International Standards Organization (ISO) lower anchorage symbol (figure 24 of FMVSS No. 225). The final rule also expanded the permissible location of the marking on the seat cushion to

accommodate seat contours where the marking can be visible when positioned behind the lower anchor. Specifically, the final rule specified that, if the manufacturer chooses to locate the marking on the seat cushion, it must be placed at a horizontal distance between 100 mm forward and 50 mm rearward of the horizontal centerline of the lower anchorage bar. The final rule did not change the location requirements for markings placed on the seatback. The final rule placed an illustration of the updated marking location requirements in Figure 19 of the standard.[20] The final rule placed the current requirements in S9.5.1 and the updated requirements in S9.5.2.

Mercedes-Benz requested that NHTSA extend the permissible Vertical Transverse Plane (the ''a'' measurement in Figure 19 of the standard, reproduced in Figure 1 below) to locate the lower anchorage marking symbol on the seat back of the vehicle from the specified 50 to 100 mm range to a range from negative 50 to 100 mm. Mercedes-Benz stated that this change would allow the markings to be located on the molded anchorage rod fixture while still being easily visible to CRS installers.[21]

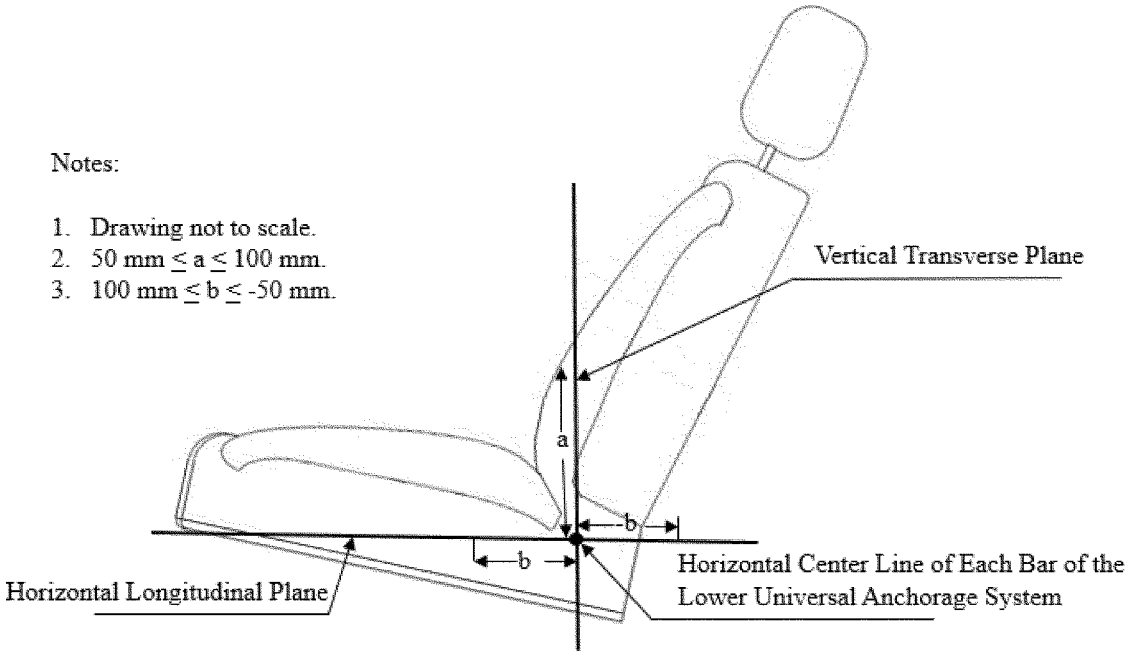

Figure 1. Placement of Symbol on the Seat Back and Seat Cushion of Vehicle (current Fig. 19 in FMVSS No. 225)

NHTSA is denying Mercedes' request as unnecessary. In the June 27, 2003 final rule that is the source of the current requirements in S9.5.1,[22] the agency changed the original requirement, which consisted of only a vertical placement distance for the marking (seat back), to one that also allowed a horizontal placement for the marking on the seat pan. The 2003 final rule implemented this change in response to comments from Mitsubishi and the Alliance, who asked where the ''seat back'' begins for the purpose of marking the lower anchorages on highly contoured seats. Specifically, Mitsubishi stated that the bottom cushion of some of its seats curves toward the vertical and supports a portion of an occupant's lower back before a separate seat back begins. To address this issue, the 2003 final rule adopted the location requirements from Transport Canada Regulation 210.2, ''Lower Universal Anchorage Systems for Restraint Systems and Booster Cushions,'' which had vertical (seat back) and horizontal (seat pan) allowable locations for the marking. In support of this decision, the agency explained that these location requirements provide greater clarity in relation to where the markings should be while also permitting the markings to be located either on the seat back or the seat cushion, and thus allowing more flexibility to manufacturers with atypical seat designs.

Though NHTSA changed some of the allowable distances for the markings in the January 7, 2025 final rule, the intent of the 2003 final rule was maintained. The 2025 final rule continues to permit markings to be placed on the seat back or the seat pan. The different allowable distances already provided by the final rule should provide flexibility to manufacturers with atypical seat designs in relation to where to place the lower anchorage markings. In the example Mercedes-Benz provided in its petition, the marking would be within the allowable seat pan ''b'' locations. Therefore, NHTSA denies Mercedes-

[20] Prior to the 2025 final rule, figure 19 contained an illustration of an optional tether anchorage test applicable for vehicles manufactured before 2004. This figure is no longer applicable to currently manufactured vehicles and was replaced with the illustration of the location of lower anchorage markings.

[21] Mercedes provided illustration in their petition (Figure 4). The petition can be found here: *https://www.regulations.gov/document/NHTSA-2024-0089-0007.*

[22] 68 FR 38208.

Benz's request to change the seat back ''a'' distance. In support of this decision, NHTSA notes that for atypical seats with an extra bolster in the seat bight region (the area where a seat cushion intersects with the seatback) that helps transition the seat pan to the seat back, the bolster may be considered as part of the seat back or seat pan location to locate the marking within the ''a'' or ''b'' locations illustrated in Figure 19 of FMVSS No. 225.

In light of the request from Mercedes, NHTSA proposes to modify the regulatory text for both the current requirements (S9.5.1(a)(3)) and the updated requirements (S9.5.2(a)(3)) to clarify the permissible marking locations. NHTSA is also proposing to amend Figure 19 to FMVSS No. 225 so that the ''b'' measurement is specified as a continuous interval (Figure 2) instead of broken into positive and negative segments (Figure 1).

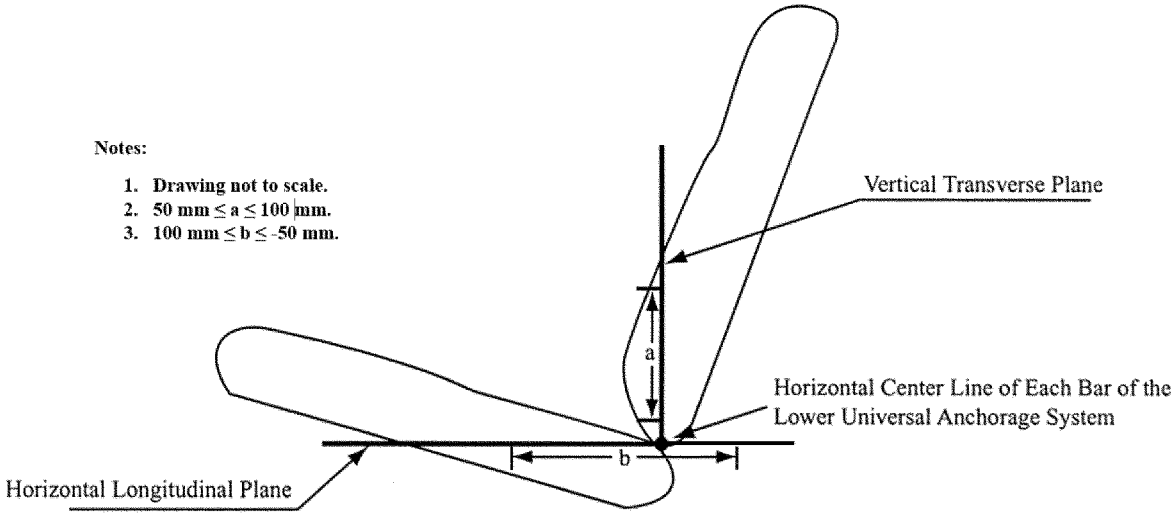

Figure 2. Corrected Placement of Symbol on the Seat Back and Seat Cushion of Vehicle (the proposed revision of Figure 19 in FMVSS No. 225)

f. Clarify Test Procedure to Position Clearance Angle Tool in Some Vehicles

A 2012 LATCH Usability study performed by UMTRI identified three vehicle lower anchorage hardware characteristics serving as predictors for correct CRS use, which include anchorage depth, anchorage attachment force, and anchorage clearance angle.[23] Anchorage depth refers to how deeply the lower anchorages are embedded in the vehicle seat (usually in the seat bight or seatback). Attachment force refers to the force needed to attach a child restraint's lower anchorage connector to a lower anchorage in a vehicle. Clearance angle refers to the clearance around a lower anchorage from parts that interfere with the ability to maneuver the CRS lower anchorage connector. UMTRI showed that subjects were 19 times more likely to install the CRS correctly if the vehicle met all three usability criteria than if none of the criteria were met.

Based on this study, NHTSA proposed in the 2015 NPRM[24] to adopt the three characteristics measured by three different tools per the following:

- *Attachment force:* Less than 178 N (40 lb).
- *Clearance Angle:* Greater than 54 degrees when applying a 66.7 N (15 lb) vertical force to the tool.
- *Anchorage Depth:* Less than 2 cm.

Commenters to the 2015 NPRM expressed concerns on the repeatability of the usability measurements. NHTSA conducted repeatability and reproducibility studies where the proposed tools were updated to ensure better repeatability. Results of the studies and tool updates showed that the clearance angle and anchorage depth measurements were repeatable, but the attachment force measurement was not repeatable. Therefore, the 2025 final rule adopted only the clearance angle and anchorage depth measurements into FMVSS No. 225.

One of the repeatability improvements developed for the 2025 final rule clearance angle tool was adding a pulley bridge to position a weight that would apply a constant 66.7 N (15 lb) vertical force, as commenters were concerned about the difficulty of applying manually and keeping a constant vertical force to make the clearance angle measurement.

Mercedes-Benz petitioned NHTSA to ''evaluate the Clearance Angle Tool (CAT) in a smaller two-door sport/coupe vehicle.'' Mercedes-Benz explained that it is not clear from the final rule how the ''pulley bridge'' should be placed in vehicles with integrated headrests on the front and rear seat.[25] In addition to its CAT concerns, Mercedes-Benz petitioned NHTSA to allow the use of the IIHS Clearance Angle Tool.

NHTSA acknowledges that the regulatory text in FMVSS No. 225 does not specify how to position the pulley bridge of the clearance angle tool on the vehicle. However, NHTSA's research test procedure[26] describes how to position the pulley bridge as follows:

[23] Klinich et al., ''LATCH Usability in Vehicles,'' UMTRI–2012–7, April 2012. Link: *https://deepblue.lib.umich.edu/handle/2027.42/90856.*

[24] 80 FR 3744 (Jan. 23, 2015).

[25] Mercedes provided an illustration in its petition (Figure 5).

[26] The VRTC Test Procedure can be found in Appendix D–1 of docketed technical report titled ''Evaluation of LATCH Usability Tools Update:''

Continued

Place the pulley bridge so it rests on the tops of the rear and front seatbacks above the lower anchor. Use the leveling feet to position the bridge so it is horizontal within ±5 degrees about its longitudinal axis. If necessary, change the front seatback angle to help level the pulley bridge.

In response to the concerns raised by Mercedes-Benz, NHTSA experimented with other vehicles in which there may be similar difficulty placing the pulley bridge on the rear and front seat backs. NHTSA found that placing a metal bar on the windowsill of the front row windows can help position the pulley bridge on those vehicles where it is not possible to place the pulley bridge on the front seat. This approach showed that, for vehicles with this configuration, the front seat can be moved, removed, or reclined in such a way so as not to interfere with the placement of the pulley bridge. In response to petitioner's concerns and to assist with future testing, NHTSA will docket an updated research test procedure [27] to include information explaining how other vehicle structures and other structures could be used to position the pulley bridge if the front and rear seats cannot be used.

NHTSA is not codifying this step in the regulatory text of FMVSS No. 225 because the agency believes it is more appropriate to include this detailed information in the test procedure to help entities understand how to position the pulley bridge in the required position to make the clearance angle measurement appropriately.

In addition, NHTSA denies Mercedes-Benz's request to align or allow use of the IIHS clearance angle tool for measuring the clearance angle in FMVSS No. 225. The 2015 NPRM proposed using a clearance angle tool based on the IIHS tool and NHTSA received comments expressing concerns about the repeatability and reproducibility of that tool's measurements. Specifically, General Motors stated that it was difficult to apply the vertical force due to interference with the seat back, and Fiat Chrysler Automobiles U.S.[28] commented that an operator would have difficulty maintaining 67 N (15 lbf) of vertical force to make the measurement. As explained in the January 2025 final rule, NHTSA added a pulley bridge (with adjustable feet to make it level) to apply a 67 N (15 lbf) force vertically to remove the difficulty of applying the specified load manually and address concerns raised by commenters.

III. Corrections and Clarifications to Regulatory Text

a. Figure Reference in S6.2.2 of FMVSS No. 225

Paragraph S6.2.2 of the January 7, 2025 final rule regulatory text referenced Figure 3 regarding the allowable tether anchorage zone under the vehicle seat, which is defined by a ''vertical plane 120 mm rearward of the H Point.'' However, Figure 3 in the standard shows the allowable tether anchorage location zone before the January 7, 2025 amendments and is not relevant to the updated allowable tether anchorage zone under the vehicle seat. The agency proposes to correct the figure reference in S6.2.2 to Figure 10, which shows the updated tether anchorage location zone and shows the new allowable tether zone under the vehicle seat.

b. Test Procedure to Position Anchorage Depth Tool in FMVSS No. 225

Paragraph S11(c) of FMVSS No. 225 describes the test procedure to measure the anchorage depth with the depth tool. However, this section lacks clarity on determining the view angles and positioning of the depth tool on the seat pan (see Figure 3). The research test procedure docketed [29] along with the 2025 final rule details the procedure with the desired clarity. Accordingly, NHTSA proposes to amend S11(c) of FMVSS No. 225 to align with this research test procedure.

Specifically, NHTSA proposes changing the sentence ''To measure the anchorage depth, subtract 30 degrees from the measured seat pan angle to calculate the view angle.'' to ''To measure the anchorage depth, the tool view angle is determined by subtracting the measured seat pan angle from 30 degrees.'' NHTSA also proposes changing the sentence ''Adjust the depth tool base to be within ±2 degrees of the view angle (30 degrees minus seat pan angle) to set the tool-parallel to the seat pan angle.'' to ''Adjust the depth tool base to be parallel with the seat pan angle (within ±2 degrees) while maintaining the established tool view angle (30 degrees minus seat pan angle).''

https://downloads.regulations.gov/NHTSA-2024-0089-0002/attachment_5.pdf.

[27] The research test procedures are used for research testing and inform the laboratory test procedure developed for compliance testing. To investigate whether specific vehicles or products comply with the FMVSS, NHTSA's Office of Vehicle Safety Compliance (OVSC) contracts with labs to conduct compliance testing. OVSC laboratory test procedures are prepared for the limited purpose of use by contracted independent laboratories conducting compliance tests for the OVSC. OVSC laboratory test procedures are based generally on the regulatory test procedures in specific FMVSS but are prepared by the agency to give contracted labs specific instructions on how to conduct a specific test. The OVSC laboratory test procedures are simply agency guidance for contracted labs and do not constitute official agency action (*e.g.,* a rule). Compliance test procedures may differ from the research test procedures.

[28] FCA merged with French PSA Group to form Stellantis in 2021.

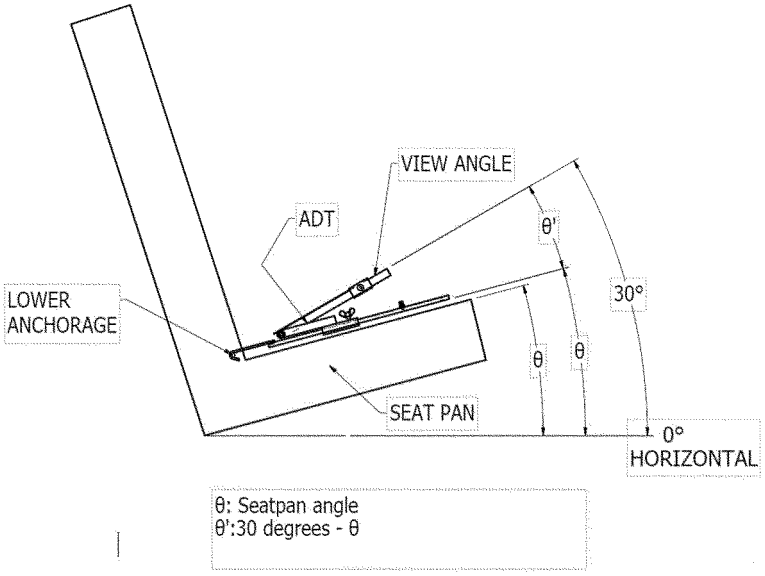

Figure 3. Anchorage Depth Angle Set Up

c. Compliance Date in S5.9(c) of FMVSS No. 213b

NHTSA proposes correcting the compliance date indicated in S5.9 (c) of FMVSS No. 213b. Currently the date for the new requirements for tether hardware assembly to have a maximum length indicates a compliance date of January 8, 2025. On March 3, 2025, the agency issued a final rule specifying a 3-year lead time for several requirements adopted in the January 7, 2025 final rule. However, this correction indicated a January 8, 2025 compliance date in S5.9(c) by mistake, when it should state January 8, 2028 to match the corrections made to other sections in FMVSS No. 213b. The agency is proposing to correct paragraph 5.9(c) to state a January 8, 2028 compliance date.

d. Location of Tether Marking for Flexible Tether Anchorages That Are Also Routing Devices

The 2025 final rule amended FMVSS No. 225 to require all vehicles to bear the ISO standardized marking near all tether anchorages provided in the vehicle to improve the ease with which consumers find lower anchorages and tether anchorages in the vehicle.

NHTSA also adopted requirements for the tether markings to be no more than 100 mm away from the tether anchorage. For vehicles with tether strap routing devices, NHTSA permits placing the required tether anchorage marking on a tag attached to the tether strap routing device.

The January 7, 2025 final rule specified location requirements for the tether anchorage markings such that they are aligned and within 100 mm from the tether anchorage (S6.4 of FMVSS No. 225). While S6.4 section offers the option of using tags to mark tether strap routing devices,[30] the regulatory text does not specify the location of the markings with respect to a flexible tether strap routing device that can be used as tether anchorages. The agency proposes correcting this omission by specifying the location of the marking with respect to the routing device that is consistent with the required location of the markings with respect to a rigid tether anchorage bar. The maximum distance of the marking from the routing device would remain the same as that from a rigid anchor (not more than 100 mm); however, the reference point on the routing device to measure the maximum distance of the marking is the intersection of the longitudinal [31] and lateral [32] centerline of the attachment of the routing device to the vehicle or vehicle seat in its nominal position,[33] as illustrated in Figure 4 of this preamble. In the case of routing devices that may have multiple attachment points, the center of those attachment points would be the reference to measure the distance to the marking.

[30] A tether routing device is a vehicle component, typically designed as a loop or guide, that redirects the tether strap of a child restraint system (CRS) toward a tether anchorage usually located on an adjacent designated seating position.

[31] Longitudinal means front to back with respect to the designated seating position.

[32] Lateral means side to side with respect to the designated seating position.

[33] By nominal position, is the position the anchorage naturally adopts when it is not being used, pulled, or pushed.

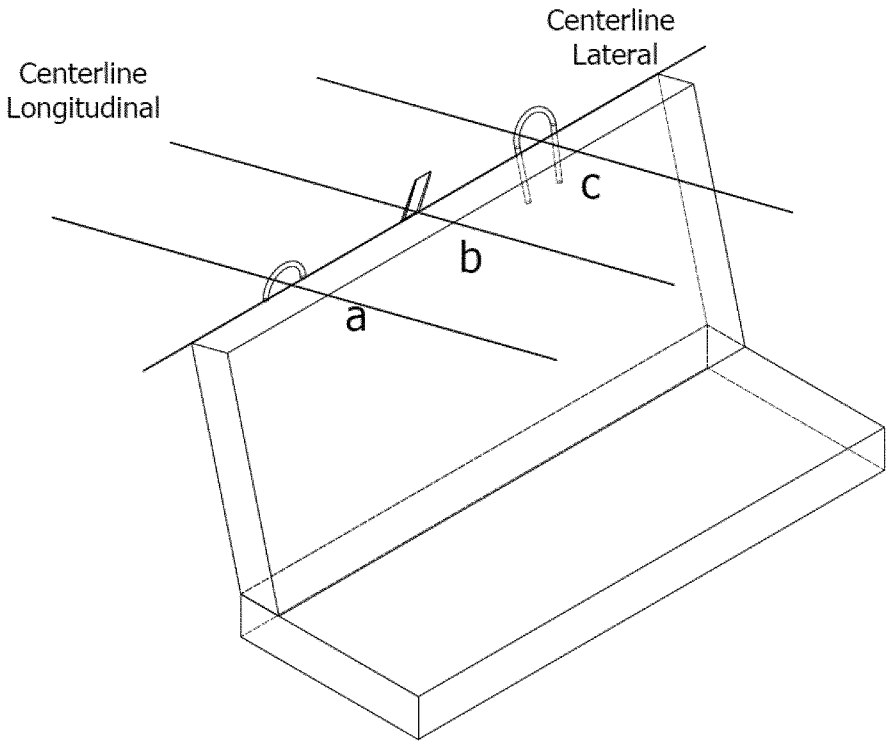

Figure 4. Longitudinal and Lateral Centerline Intersection of Routing Devices

e. Force Direction S11(a)(1) and (2)

Paragraphs S11(a)(1) and (2) of the regulatory text in the January 7, 2025 final rule specify the test procedure for applying forces to the lower anchorages to assess compliance with the strength requirements specified in S9.4.1(a) and (b), respectively. However, additional text introduced in the January 7, 2025 final rule is incorrect because it describes a horizontal preload force in S11(a)(1) and a preload perpendicular to the longitudinal centerline of the SFAD2 at point X of the test device in S11(a)(2). The preload force specified in S9.4.1(a) must be applied with an initial angle of 10 ± 5 degrees above the horizontal as described in S9.4.1.1. Also, the lateral load required in S9.4.1(b) is not perpendicular to the longitudinal plane but at a 75 ± 5 degree angle from the longitudinal plane. The agency proposes to correct the contradictory text in S11(a)(1) and (2) by deleting the added text.

f. 49 CFR 585.140 Reporting Requirements for Vehicles Produced by More Than One Manufacturer

Subpart O of 49 CFR 585 outlines the phase-in reporting requirements for FMVSS No. 225. Paragraph (b)(3) of § 585.140 addresses vehicles manufactured by more than one entity and currently references S13.2.1(c) of FMVSS No. 225. This reference is incorrect. The correct citation is S13.2.2. Accordingly, the agency proposes to amend § 585.140(b)(3) to replace the erroneous reference with the correct citation to S13.2.2.

g. Clarification on the Length Measurement of Tether Hardware Assemblies

NHTSA received a request for interpretation from Britax on October 27, 2025 [34] seeking confirmation of its understanding of the test procedure for evaluating compliance with S5.9(c) of FMVSS No. 213b, which specifies that the length of the child restraint tether hardware assembly (which consists of the tether hook and hardware to tighten and loosen the tether strap) shall not exceed 165 mm.

Britax noted that NHTSA's Laboratory Test Procedure does not specify a measurement method. Britax also noted that its V-shaped tether hardware assembly, which is common in its products, differs from the single-strap tether designs NHTSA studied primarily. Britax stated that because a single strap tether hardware assembly has the adjustment mechanism located along the tether webbing in a fixed location relative to the tether hook, determining compliance with S5.9(c) simply requires measuring the length from the far end of the adjustment mechanism to the end of the tether hook. On the other hand, Britax noted that its V-shaped tether hardware assembly, consisting of a tether hook, two permanent tether strap webbing attachment points on the back of the CRS and a mechanism designed to adjust the tether strap webbing, would not be able to comply with the requirement that the tether hardware assembly length be no more than 165 mm in all adjustment positions if the measurement is made from the adjustment mechanism to the tether hook.

Due to the unique nature of the V-shaped tether hardware assembly with varying distance between the adjustment mechanism and the tether hook, Britax stated that to determine compliance with S5.9(c), it measures the distance from the center of the CRS seat back to the end of the tether hook after the tether strap is tightened. Britax stated that this aligns with NHTSA's stated goal for the 165 mm limit, which

[34] Britax's letter can be found in the docket of this NPRM.

was to ensure all CRS tether straps can be tightened given the minimum tether anchorage distance from the seat back reference point, and that NHTSA was aware of and did not intend to outlaw the Britax design.

NHTSA is responding to Britax's request for interpretation in this NPRM. NHTSA disagrees with part of Britax's suggested measurement procedure—specifically, measuring the distance from the center of the CRS seat back to the end of the tether hook. This is not a correct interpretation of the requirement specified in the regulatory text. The regulatory text states that the length of the tether hardware assembly, which consists of a tether hook and a mechanism designed to tighten and loosen the tether strap, shall not exceed 165 mm. Because Britax's suggested measurement method does not include the adjustment mechanism, it does not conform to the regulatory text. NHTSA is therefore not proposing to include Britax's suggested measurement method in the regulation.

NHTSA, however, does agree with Britax's approach of tightening the tether strap prior to measuring the length of the hardware assembly. NHTSA acknowledges that the original regulatory text did not account clearly for an adjustable tether hardware assembly such as that in Britax's CRSs. NHTSA is therefore proposing two changes to the current regulatory text.

First, NHTSA is proposing to clarify in sections 5.9(b) and (c) of the FMVSS No. 213b what constitutes the tether hardware assembly. The current regulatory text indicates that the tether hardware assembly consists of ''a tether hook and a webbing tightening mechanism designed to tighten or loosen the tether strap.'' The agency is proposing to change this to ''a tether hook and a mechanism designed to tighten and loosen the tether strap, including any material between those components.'' This would more accurately describe the assembly because the CRS tether hardware sometimes has webbing or other materials attaching the tether hook to the tether adjustment mechanism.

Second, NHTSA is proposing to clarify that the length of an adjustable tether hardware assembly will be determined with the tether adjustment hardware as close to the tether hook as possible (''If the tether hardware assembly length is adjustable, its minimum adjusted length shall not exceed 165 mm'').

NHTSA notes that this proposed approach—tightening the tether strap prior to measuring the length of the tether hardware assembly—is the procedure NHTSA used in developing the January 2025 final rule. NHTSA documented in a technical report,[35] submitted to the docket with the January 7, 2025 final rule, the tether hardware measurements NHTSA conducted on several CRSs, including Britax models with V-shaped tethers.[36] All CRSs in that study except for the Britax CRSs had fixed-length tether hardware assemblies. To measure the length of the tether hardware assemblies for Britax's CRSs, NHTSA measured the V-shaped tether hardware assembly length with the tether strap pulled through the adjustment mechanism such that it resulted in the shortest distance possible between the tether hook and the adjustment mechanism, and the measurement was made from the end of the tether hook to the furthest point of the adjustment mechanism. The photographs in the technical report also illustrate the measurement method used for determining the length of the tether hardware assembly. This involved a fixture simulating a vehicle's tether anchorage, with a tape measure alongside it. The CRS tether hook is attached to the fixture's anchor to facilitate the measurement of the tether hardware against the tape measure. NHTSA's Office of Vehicle Safety Compliance is developing an updated laboratory test procedures manual, which may contain similar illustrations of the procedure.

NHTSA anticipates that Britax will be able to comply with the 165 mm requirement when evaluated using this procedure. All three Britax CRSs with V-shaped tether hardware assembly met the 165 mm requirement when evaluated by NHTSA using this method.[37] In addition, Britax, in its comments to the 2015 NPRM,[38] stated that its CRSs would be able to meet the 165 mm tether hardware length requirement.[39]

NHTSA seeks comment on these proposed amendments.

[35] Wietholder, K., & Smith, J. (2019, November). Evaluation of tether anchor zones for FMVSS No. 225 (Report No. DOT HS 812 842). Washington, DC: National Highway Traffic Safety Administration. Appendix B. (See docket NHTSA–2024–0089–0002 in *www.regulations.gov*).

[36] The three Britax child seats evaluated in the report ''Evaluation of Tether Anchor Zones for FMVSS No. 225'' (Boulevard E9LX615, Marathon E9LX11A, and Advocate E9BB9P8) all included a V-shaped tether.

[39] See Docket NHTSA–2014–0123–0012 in *www.regulations.gov* for Britax comments.

IV. Costs and Benefits

The proposed changes in compliance dates for FMVSS No. 225 would not result in additional costs; FMVSS No. 225 costs for these vehicles will simply be delayed.

NHTSA estimated the total cost of the updated requirements for anchorage markings and written instructions specified in the January 2025 final rule to be $1.73 million. This estimated cost would be delayed by the proposed changes in compliance dates. There may be additional cost savings associated with the proposed delay in the FMVSS No. 225 compliance dates because manufacturers have indicated to the agency that they may incur additional costs when making vehicle changes outside their planned design cycle and an extended compliance date would help reduce those costs.

NHTSA did not quantify benefits resulting from the January 2025 final rule. NHTSA stated only that if the updated requirements in the January 2025 final rule result in a 5 percent increase in correct installation using the lower anchorages and a 5 percent increase in tether use, it would save approximately 3 lives and prevent 6 moderate to higher severity injuries annually. Therefore, any benefits that could be delayed as a result of this proposal are speculative.

V. Proposed Compliance Dates

This NPRM proposes to amend the three-year phase-in period in the January 2025 final rule to a four-year phase in period to comply with the FMVSS No. 225 updated requirements. The proposed four-year phase-in for compliance with the FMVSS No. 225 updated requirements is as follows: 20 percent of applicable vehicles produced from September 1, 2028, to August 31, 2029, 50 percent from September 1, 2029, to August 31, 2030, 75 percent from September 1, 2030, to August 31, 2031 and 100 percent of applicable vehicles on and after September 1, 2031. This NPRM proposes amending the lead time for small-volume manufacturers to comply with the updated requirements in FMVSS No. 225 so that those manufacturers would now need to comply with the updated requirements starting on September 1, 2031.[40] This NPRM also proposes to extend the sunset date of the tether anchorage exclusions for convertibles to September 1, 2033. The rest of the proposed amendments and corrections would have a compliance date corresponding

[40] If the phase-in extension from a 3- to 4-year phase in is not adopted, the compliance date for SVM would be September 1, 2030.

to the compliance date of the section being amended.

VI. Regulatory Analyses and Notices

Executive Order 12866 and Executive Order 14192

NHTSA has considered the impact of this proposal under Executive Order (E.O.) 12866 and E.O. 14192. This rule has been determined to be not significant pursuant to E.O. 12866 and was not reviewed by the Office of Management and Budget (OMB) pursuant to that order.

The proposed update to FMVSS No. 225 is an E.O. 14192 deregulatory action.

Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.,* as amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996), whenever an agency is required to publish a notice of proposed rulemaking or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.,* small businesses, small organizations and small governmental jurisdictions), unless the head of an agency certifies the rule will not have a significant economic impact on a substantial number of small entities. Agencies must also provide a statement of the factual basis for this certification.

I certify that this rulemaking action would not have a significant economic impact on a substantial number of small entities. NHTSA estimates that there are three small light vehicle manufacturers in the U.S. The estimated annual vehicle sales for these three manufacturers range from 25 to 100 vehicles with a sales price range $24,000 to $750,000 and estimated annual revenue between $2 million and $4 million. This proposed rule reduces design and cost burden for these small volume manufacturers by extending the full compliance date to September 1, 2031 without any phase-in.

Federalism

NHTSA has examined this NPRM pursuant to E.O. 13132 (64 FR 43255, Aug. 10, 1999) and concluded that no additional consultation with States, local governments or their representatives is mandated beyond the rulemaking process. The agency has concluded that the rulemaking would not have sufficient federalism implications to warrant consultation with State and local officials or the preparation of a federalism summary impact statement. This proposed rule would not have ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.''

NHTSA rules can have preemptive effect in two ways. First, the National Traffic and Motor Vehicle Safety Act contains an express preemption provision stating that, if NHTSA has established a standard for an aspect of motor vehicle or motor vehicle equipment performance, a State may only prescribe or continue in effect a standard for that same aspect of performance if the State standard is identical to the Federal standard.[41] It is this statutory command by Congress that preempts any non-identical State legislative and administrative law addressing the same aspect of performance.

The express preemption provision described above is subject to a savings clause under which ''[c]ompliance with a motor vehicle safety standard prescribed under this chapter does not exempt a person from liability at common law.'' [42] Pursuant to this provision, State common law tort causes of action against motor vehicle manufacturers that might otherwise be preempted by the express preemption provision are generally preserved.

NHTSA rules can also preempt State law if complying with the FMVSS would render the motor vehicle manufacturers liable under State tort law. Because most NHTSA standards established by an FMVSS are minimum standards, a State common law tort cause of action that seeks to impose a higher standard on motor vehicle manufacturers will generally not be preempted. However, if and when such a conflict does exist—for example, when the standard at issue is both a minimum and a maximum standard—the State common law tort cause of action is impliedly preempted.[43]

Pursuant to E.O. 13132, NHTSA has considered whether this proposed rule could or should preempt State common law causes of action. The agency's ability to announce its conclusion regarding the preemptive effect of one of its rules reduces the likelihood that preemption will be an issue in any subsequent tort litigation. To this end, the agency has examined the nature (*e.g.,* the language and structure of the regulatory text) and objectives of this NPRM and finds that this proposed rule, like many NHTSA rules, prescribes only a minimum safety standard. Accordingly, NHTSA does not intend that this proposed rule preempt state tort law that would effectively impose a higher standard on motor vehicle manufacturers than that established by this proposed rule. Establishment of a higher standard by means of State tort law would not conflict with the minimum standard finalized in this document. Without any conflict, there could not be any implied preemption of a State common law tort cause of action.

National Environmental Policy Act

DOT has analyzed the environmental impacts of this notice of proposed rulemaking pursuant to the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*). NHTSA has determined that this proposed rule is categorically excluded pursuant to 23 CFR 771.118(c)(4). Categorical exclusions (CE) are categories of actions that the agency has determined normally do not significantly affect the quality of the human environment and therefore do not require either an environmental assessment (EA) or environmental impact statement (EIS).[44] In analyzing the applicability of a categorical exclusion, the agency must also consider whether extraordinary circumstances are present that would warrant the preparation of an EA or EIS.[45] The Department's Operating Administrations (OAs) may apply CEs established in another OA's procedures.[46] To do so, the Operating Administration ''must evaluate the action for extraordinary circumstances identified in the OA procedures in which the CE is established to determine if a normally excluded action may have a significant impact and coordinate with the originating OA to ensure that the CE is being applied correctly.'' [47] This proposed rule, which would amend certain requirements and compliance dates in FMVSS Nos. 213b and 225, is categorically excluded pursuant to 23 CFR 771.118(c)(4): ''Planning and administrative activities that do not involve or lead directly to construction, such as: Training, technical assistance and research; promulgation of rules, regulations, directives, or program guidance; approval of project concepts; engineering; and operating assistance to transit authorities to continue existing service or increase service to meet routine demand.'' NHTSA has

[46] *Id.* § 9(f).

[47] *Id.*

coordinated with the Federal Transit Administration (FTA) to ensure that this CE is being applied correctly. NHTSA does not anticipate any environmental impacts, and there are no extraordinary circumstances present in connection with this rulemaking.

Paperwork Reduction Act

Under the procedures established by the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501, *et seq.*), a Federal agency must request and receive approval from OMB before it collects certain information from the public and a person is not required to respond to a collection of information by a Federal agency unless the collection displays a valid OMB control number. This proposed rule would not have any requirements that are considered to be information collection requirements as defined by the OMB in 5 CFR part 1320.

Unfunded Mandates Reform Act (UMRA)

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) (UMRA) requires Federal agencies to assess the effects of regulatory actions that may result in the expenditure by a State, local, or Tribal government, in the aggregate, or by the private sector of $206 million (the value equivalent of $100 million in 1995, adjusted for inflation to 2025) or more in any one year. This proposed rule does not contain Federal mandates (under the regulatory provisions of Title II of the UMRA) for State, local and Tribal governments, or the private sector of $206 million or more in any one year. Thus, the analytical requirements of the UMRA do not apply to this action.

Executive Order 12778 (Civil Justice Reform)

With respect to the review of the promulgation of a new regulation, section 3(b) of Executive Order 12988, ''Civil Justice Reform'' (61 FR 4729, February 7, 1996) requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) specifies clearly the preemptive effect; (2) specifies clearly the effect on existing Federal law or regulation; (3) provides a clear legal standard for affected conduct, while promoting simplification and burden reduction; (4) specifies clearly the retroactive effect, if any; (5) defines key terms adequately; and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General. This document is consistent with that requirement.

NHTSA has reviewed this rulemaking and determined that this rulemaking action conforms to the applicable standards in sections 3(a) and 3(b)(2) of E.O. 12988, Civil Justice Reform. The issue of preemption is discussed above in connection with E.O. 13132. NHTSA notes further that there is no requirement that an individual submit a petition for reconsideration or pursue other administrative proceedings before they may file suit in court.

National Technology Transfer and Advancement Act

Under the National Technology Transfer and Advancement Act of 1995 (NTTAA) (Pub. L. 104–113), ''all Federal agencies and departments shall use technical standards that are developed or adopted by voluntary consensus standards bodies, using such technical standards as a means to carry out policy objectives or activities determined by the agencies and departments.'' Voluntary consensus standards are technical standards (*e.g.,* materials specifications, test methods, sampling procedures and business practices) that are developed or adopted by voluntary consensus standards bodies, such as the International Organization for Standardization (ISO) and the Society of Automotive Engineers (SAE). The NTTAA directs this agency to provide Congress, through OMB, explanations when we decide not to use available and applicable voluntary consensus standards. There are no voluntary consensus standards developed by voluntary consensus standards bodies pertaining to this proposed rule.

Promoting International Regulatory Cooperation

The policy statement in section 1 of E.O. 13609 provides that the regulatory approaches taken by foreign governments may differ from those taken by the United States to address similar issues, and that in some cases the differences between them might not be necessary and might impair the ability of American businesses to export and compete internationally. It further recognizes that in meeting shared challenges involving health, safety, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation and can reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

NHTSA has analyzed this rule under the policies and agency responsibilities of E.O. 13609 and has determined this rulemaking will have no effect on international regulatory cooperation.

Executive Order 13175

E.O. 13175 requires Federal agencies to consult and coordinate with Tribes on a government-to-government basis on policies that have Tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes. NHTSA has assessed the impact of this proposed rule on Indian tribes and determined that this rule would not have Tribal implications that require consultation under E.O. 13175.

E-Government Act Compliance

NHTSA is committed to complying with the E-Government Act, 2002 to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes. The E-Government Act of 2002 (Pub. L. 107–347, sec. 208, 116 Stat. 2899, 2921, Dec. 17, 2002), requires Federal agencies to conduct a privacy impact assessment for new or substantially changed technology that collects, maintains, or disseminates information in an identifiable form. No new or substantially changed technology would collect, maintain, or disseminate information as a result of this proposed rule. Accordingly, NHTSA has not conducted a privacy impact assessment.

Plain Language Requirement

E.O. 12866 and E.O. 13563 requires each agency to write all rules in plain language. Application of the principles of plain language includes consideration of the following questions:

- Have we organized the material to suit the public's needs?
- Are the requirements in the rule clearly stated?
- Does the rule contain technical language or jargon that isn't clear?
- Would a different format (grouping and order of sections, use of headings, paragraphing) make the rule easier to understand?
- Would more (but shorter) sections be better?
- Could we improve clarity by adding tables, lists, or diagrams?
- What else could we do to make the rule easier to understand?

NHTSA has considered these questions and attempted to use plain language in promulgating this proposed rule. Please inform the agency if you can suggest how NHTSA can improve its use of plain language.

Regulatory Identifier Number (RIN)

DOT assigns a regulation identifier number (RIN) to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading at the beginning of this notice may be used to find this action in the Unified Agenda.

Privacy Act

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, to *www.regulations.gov,* as described in the system of records notice, DOT/ALL–14 FDMS, accessible through *www.dot.gov/privacy.* In order to facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, or other entity). For information on DOT's compliance with the Privacy Act, see *https://www.transportation.gov/privacy.*

Public Participation

How do I prepare and submit comments?

Your comments must be written and in English. To ensure that your comments are correctly filed in the Docket, please include the docket number indicated in this document in your comments.

Your comments must not be more than 15 pages long. (49 CFR 553.21). We established this limit to encourage you to write your primary comments in a concise fashion. However, you may attach necessary additional documents to your comments. There is no limit on the length of the attachments.

If you are submitting comments electronically as a PDF (Adobe) file, NHTSA asks that the documents be submitted using the Optical Character Recognition (OCR) process, thus allowing NHTSA to search and copy certain portions of your submissions.

Please note that pursuant to the Data Quality Act, for substantive data to be relied upon and used by the agency, it must meet the information quality standards set forth in the OMB and DOT Data Quality Act guidelines. Accordingly, we encourage you to consult the guidelines in preparing your comments. OMB's guidelines may be accessed at *https://www.transportation.gov/regulations/dot-information-dissemination-quality-guidelines.*

How can I be sure that my comments were received?

If you wish the Docket to notify you upon its receipt of your comments, enclose a self-addressed, stamped postcard in the envelope containing your comments. Upon receiving your comments, the Docket will return the postcard by mail.

How do I submit confidential business information?

You should submit a redacted ''public version'' of your comment (including redacted versions of any additional documents or attachments) to the docket using any of the methods identified under **ADDRESSES**. This ''public version'' of your comment should contain only the portions for which no claim of confidential treatment is made and from which those portions for which confidential treatment is claimed has been redacted. See below for further instructions on how to do this.

You also need to submit a request for confidential treatment directly to the Office of Chief Counsel. Requests for confidential treatment are governed by 49 CFR part 512. Your request must set forth the information specified in part 512. This includes the materials for which confidentiality is being requested (as explained in more detail below); supporting information, pursuant to § 512.8; and a certificate, pursuant to § 512.4(b) and part 512, Appendix A.

You are required to submit to the Office of Chief Counsel one unredacted ''confidential version'' of the information for which you are seeking confidential treatment. Pursuant to § 512.6, the words ''ENTIRE PAGE CONFIDENTIAL BUSINESS INFORMATION'' or ''CONFIDENTIAL BUSINESS INFORMATION CONTAINED WITHIN BRACKETS'' (as applicable) must appear at the top of each page containing information claimed to be confidential. In the latter situation, where not all information on the page is claimed to be confidential, identify each item of information for which confidentiality is requested within brackets: ''[ ].''

You are also required to submit to the Office of Chief Counsel one redacted ''public version'' of the information for which you are seeking confidential treatment. Pursuant to § 512.5(a)(2), the redacted ''public version'' should include redactions of any information for which you are seeking confidential treatment (*i.e.,* the only information that should be unredacted is information for which you are not seeking confidential treatment).

NHTSA is currently treating electronic submission as an acceptable method for submitting confidential business information to the agency under part 512. Please do not send a hardcopy of a request for confidential treatment to NHTSA's headquarters. The request should be sent to Dan Rabinovitz in the Office of the Chief Counsel at *Daniel.Rabinovitz@dot.gov* or you may contact him for a secure file transfer link. Manufacturers or any companies that already have a Confidential Business Information (CBI) Portal account or an Enterprise Account with NHTSA should use the CBI Portal for their submission. If you submit a CBI request, please also email a courtesy copy of the request to John Piazza at *john.piazza@dot.gov.*

Will the agency consider late comments?

We will consider all comments received before the close of business on the comment closing date indicated above under **DATES**. To the extent possible, we will also consider comments that the docket receives after that date. If the docket receives a comment too late for us to consider in developing a final rule (assuming that one is issued), we will consider that comment as an informal suggestion for future rulemaking action.

How can I read the comments submitted by other people?

You may read the comments received by the docket at the address given above under **ADDRESSES**. The hours of the docket are indicated above in the same location. You may also see the comments on the internet. To read the comments on the internet, go to *https://www.regulations.gov.* Follow the online instructions for accessing the dockets.

Please note that even after the comment closing date, we will continue to file relevant information in the docket as it becomes available. Further, some people may submit late comments. Accordingly, we recommend that you periodically check the Docket for new material. You can arrange with the docket to be notified when others file comments in the docket. See *www.regulations.gov* for more information.

List of Subjects

49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles.

49 CFR Part 585

Reporting and recordkeeping requirements.

In consideration of the foregoing, NHTSA proposes to amend 49 CFR part 571 and 49 CFR part 585 as set forth below.

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

■ 1. The authority citation for part 571 of title 49 continues to read as follows:

Authority: 49 U.S.C. 322, 30111, 30115, 30117 and 30166; delegation of authority at 49 CFR 1.95.

■ 2. Amend § 571.213b by revising paragraphs S5.9 (b) and (c) to read as follows:

§ 571.213b Standard No. 213b; Child restraint systems; Mandatory applicability beginning December 5, 2026.

* * * * *

S5.9 * * *

(b) In the case of each child restraint system that has components for attaching the system to a tether anchorage, those components shall include a tether hook that conforms to the configuration and geometry specified in figure 11 to this section. For child restraints manufactured on or after January 8, 2028, the tether hook or the tether strap shall be permanently marked with either pictogram shown in figure 16 to this section. If the mark is on the tether strap or on a tag attached to the tether strap, the mark must be located within 25 mm of the tether hardware assembly (which consists of a tether hook and a mechanism designed to tighten and loosen the tether strap, including any material between those components).

(c) In the case of each child restraint system that has components, including belt webbing, for attaching the system to an anchorage of a child restraint anchorage system (lower anchorage or tether anchorage), the belt webbing shall be adjustable so that the child restraint can be tightly attached to the vehicle. For child restraints manufactured on or after January 8, 2028, the length of the tether hardware assembly, which consists of a tether hook and a mechanism designed to tighten and loosen the tether strap, including any material between those components, shall not exceed 165 mm. If the tether hardware assembly length is adjustable, its minimum adjusted length shall not exceed 165 mm.

* * * * *

■ 3. Amend § 571.225 by:
■ a. Revising the introductory text of paragraph S5;
■ b. Revising introductory text of S5.1 and S5.2;
■ c. Revising paragraphs S6.2.2, S6.4(a)(3), S9.5.1, S9.5.1(a)(2), S9.5.1(a)(3), S9.5.1(a)(4);
■ d. Adding paragraph S9.5.1(a)(5);
■ e. Revising paragraphs S9.5.2, S9.5.2(a)(2), S9.5.2(a)(3), S9.5.2(a)(4);
■ f. Adding paragraph S9.5.2(a)(5);
■ g. Revising paragraphs S11(a)(1), S11(a)(2), S11(c), the introductory text of paragraphs S13, S13.1, S13.1.2, S13.1.3, and S13.1.4;
■ h. Adding paragraphs S13.1.5, S13.3, S13.3.1, and S13.3.2; and
■ i. Revising Figure 19.

The amendments read as follows:

§ 571.225 Standard No. 225; Child restraint anchorage systems

* * * * *

S5 *General exceptions.* Vehicles manufactured before September 1, 2033, must meet the requirements of S5.1. Vehicles manufactured on or after September 1, 2033, must meet the requirements of S5.2.

S5.1 Vehicles manufactured before September 1, 2033.

* * * * *

S5.2 Vehicles manufactured on or after September 1, 2033.

* * * * *

S6.2.2 Subject to S6.2.2.2, the part of each tether anchorage to which a tether hook attaches must be located within the shaded zone shown in figures 3 through 7 to this section of the designated seating position for which it is installed. The zone is defined with reference to the seating reference point (*see* § 571.3). (For purposes of the figures, ''H Point'' means seating reference point.) A tether anchorage may be recessed in the seat back, provided that it is not in the strap wrap-around area at the top of the vehicle seat back. For the area under the vehicle seat, the forwardmost edge of the shaded zone is defined by a vertical plane 120 mm rearward of the ''H Point,'' as shown in figure 10 to this section.

* * * * *

S6.4 * * *

(a) * * *

(3) The nearest edge of the marking shall be located not more than 100 mm away from the tether anchorage bar as shown in figure 27 to this section or from the intersection of the longitudinal and lateral centerlines of the routing device, when the routing device is not in use and not pulled away from its attachment to the vehicle. No other attachment feature to secure occupant items (*i.e.,* cargo hooks or similar) shall be nearer to the marking than the distance from the marking to the tether anchorage. Vehicles with routing devices per S6.2.2.2 may use tags attached to the routing device.

* * * * *

S9.5.1 *Requirements for lower anchors.* Subject to the phase-in specified in S13, lower anchorages must meet the requirements in S9.5.1(a) or (b).

(a) * * *

(2) That is either solid or open, with or without words, symbols, or pictograms, provided that if words, symbols or pictograms are used, their meaning is explained to the consumer in writing, such as in the vehicle's owner's manual;

(3) That is located such that its center is in the vertical plane that passes through the center of the bar (±25 mm) and is parallel to the vehicle longitudinal centerline; and

(4) That is located such that its center is (as illustrated in figure 22 to this section):

(i) on the seat back between 50 and 100 mm above the horizontal longitudinal plane that intersects the horizontal centerline of the bar; or

(ii) on the seat cushion between 125 mm and 75 mm forward of the vertical transverse plane that intersects the horizontal centerline of the bar.

(5) The circle may be on a tag.

* * * * *

S9.5.2 *Requirements for lower anchors.* Subject to the phase-in specified in S13, lower anchorages must meet the requirements in S9.5.2(a) and (b), as applicable.

(a) * * *

(2) Contains the pictogram shown in figure 24 to this section;

(3) That is located such that its center is in the vertical plane that passes through the center of the bar (±25 mm) and is parallel to the vehicle longitudinal centerline; and

(4) That is located such that its center is (as illustrated in figure 19 to this section):

(i) on the seat back between 50 and 100 mm above the horizontal longitudinal plane that intersects the horizontal centerline of the bar; or

(ii) on the seat cushion between 100 mm forward of, and 50 mm rearward of, the vertical transverse plane that intersects the horizontal centerline of the bar.

(5) The symbol may be on a tag.

* * * * *

S11 * * *

(a) * * *

(1) *Forward force direction.* Place SFAD 2 in the vehicle seating position and attach it to the two lower anchorages of the child restraint anchorage system. Do not attach the tether anchorage. A rearward force of 135 ±15 N is applied to the center of the lower front crossbar of SFAD 2 to press the device against the seat back as the fore-aft position of the rearward extensions of the SFAD is adjusted to remove any slack or tension. Apply a preload force of 500 N at point X (illustrated in Figure 17 of this standard) of the test device. Increase the pull force as linearly as practicable to a full force application of 11,000 N in not less than 24 seconds and not more than 30 seconds and maintain at an 11,000 N level for 1 second.

(2) *Lateral force direction.* Place SFAD 2 in the vehicle seating position and attach it to the two lower anchorages of the child restraint anchorage system. Do not attach the tether anchorage. A rearward force of 135 ± 15 N is applied to the center of the lower front crossbar of SFAD 2 to press the device against the seat back as the fore-aft position of the rearward extensions of the SFAD is adjusted to remove any slack or tension. Apply a preload force of 500 N at point X of the test device. Increase the pull force as linearly as practicable to a full force application of 5,000 N in not less than 24 seconds and not more than 30 seconds and maintain at a 5,000 N level for 1 second.

* * * * *

(c) *Anchorage depth.* The seat back angle, if adjustable, is set at the manufacturer's nominal design seat back angle. If the position is not specified, set the seat back at the first detent rearward of 25° from the vertical. To measure the anchorage depth, the tool view angle is determined by subtracting the measured seat pan angle from 30 degrees. With the anchorage depth tool (*see* figure 28 to this section) on a flat surface, adjust the view bar to read the view angle. Slide the zeroing strip along the view bar so that it is barely touching the top of the depth tool hook. Move the view bar forward, so the end of the zeroing strip is aligned with the zero-scribe line. For hidden anchorages, slide the anchorage depth tool so that it reads 0 mm at the rear edge of the slider. For visible anchorages, align the depth gauge to 25 mm so that negative values can be read. Attach the depth tool centered to the lower anchorage. Adjust the depth tool base to be parallel with the seat pan angle (within ±2 degrees) while maintaining the established tool view angle (30 degrees minus seat pan angle). Move the entire slider bar forward until the zeroing strip contacts the vehicle seat back or any other vehicle part.

* * * * *

S13 *Phase-in schedule.* The S13 phase-in schedule details when listed requirements become inactive and are replaced by newer requirements. Requirements in Standard No. 225 (this section) not listed in S13 shall be in effect before, during, and after the S13 phase-in. Manufacturers producing fewer than 5,000 vehicles annually for sale in the United States are not subject to the S13.1 phase-in schedule and are instead subject to S13.3.

S13.1 *Vehicle certification information.* At any time during the production years ending August 31, 2029, August 31, 2030 and August 31, 2031, each manufacturer shall, upon request from the Office of Vehicle Safety Compliance, provide information identifying the vehicles (by make, model and vehicle identification number) that have been certified as complying with the child restraint anchorage usability requirements of this standard. Manufacturers shall specify the number of vehicles meeting each phase-in percentage. The manufacturer's designation of a vehicle as a certified vehicle is irrevocable.

* * * * *

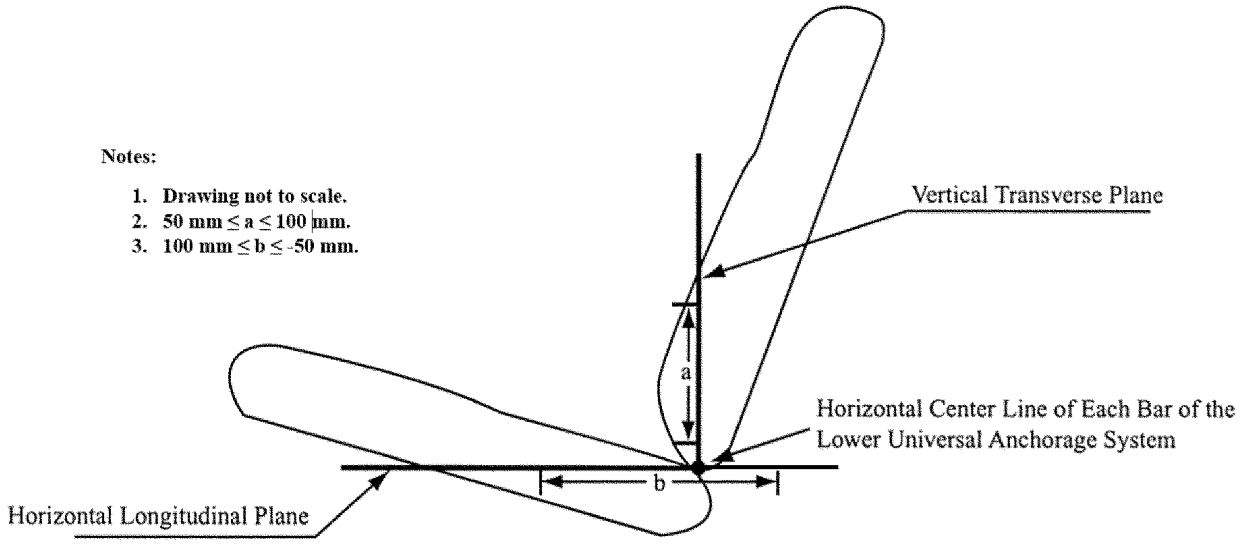
S13.1.2 *Phase-in year 1.* Vehicles manufactured on or after September 1, 2028, and before September 1, 2029. The total number of individual vehicles complying with S6.1.2, S6.2.2, S6.4, S9.2 (except for S9.2.2(a)), S9.5.2, and S12.2 of this standard shall be not less than 20 percent of a vehicle manufacturer's total production for this time period. The remainder of a vehicle manufacturer's total production for this time period is subject to S6.1.1, S6.2.1, S9.2.1, S9.2.2, S9.2.3, S9.5.1, and S12.1 of this standard.

S13.1.3 *Phase-in year 2.* Vehicles manufactured on or after September 1, 2029, and before September 1, 2030. The total number of individual vehicles complying with S6.1.2, S6.2.2, S6.4, S9.2 (except for S9.2.2(a)), S9.5.2, and S12.2 of this standard shall be not less than 50 percent of a vehicle manufacturer's total production for this time period. The remainder of a vehicle manufacturer's total production for this time period is subject to S6.1.1, S6.2.1, S9.2.1, S9.2.2, S9.2.3, S9.5.1, and S12.1 of this standard.

S13.1.4 *Phase-in year 3.* Vehicles manufactured on or after September 1, 2030 and before September 1, 2031. The total number of individual vehicles complying with S6.1.2, S6.2.2, S6.4, S9.2 (except for S9.2.2(a)), S9.5.2, and S12.2 of this standard shall be not less than 75 percent of a vehicle manufacturer's total production for this time period. The remainder of a vehicle manufacturer's total production for this time period is subject to S6.1.1, S6.2.1, S9.2.1, S9.2.2, S9.2.3, S9.5.1, and S12.1 of this standard.

S13.1.5 *Phase-in year 4 and beyond.* Vehicles manufactured on or after September 1, 2031. The total number of vehicles complying with S6.1.2, S6.2.2, S6.4, S9.2 (except for S9.2.2(a)), S9.5.2, and S12.2 shall be not less than 100 percent of a vehicle manufacturer's total production.

* * * * *



S13.3 *Manufacturers producing fewer than 5,000 vehicles annually for sale in the United States.*

S13.3.1 *Applicable unless vehicle is certified to S13.3.2.* Vehicles manufactured before September 1, 2031 are subject to S6.1.1, S6.2.1, S9.2.1, S9.2.2, S9.2.3, S9.5.1, and S12.1 of this standard.

S13.3.2 *Mandatory applicability beginning September 1, 2031.* Vehicles manufactured on or after September 1, 2031 are subject to S6.1.2, S6.2.2, S6.4, S9.2 (except for S9.2.2(a)), S9.5.2, and S12.2 of this standard.

* * * * *

Figure 19 to § 571.225. Placement of Symbol on the Seat Back and Seat Cushion of Vehicle

* * * * *

PART 585—PHASE-IN REPORTING REQUIREMENTS

■ 4. The authority citation for part 585 continues to read as follows:

Authority: 49 U.S.C. 322, 30111, 30115, 30117, and 30166; delegation of authority at 49 CFR 1.95.

■ 5. Amend § 585 subpart O by:

■ a. Revising paragraphs 585.140 (a), 585.140(b)(3), and 585.141.

The amendments read as follows:

* * * * *

§ 585.140 Reporting requirements.

(a) General reporting requirements. Within 60 days after the end of the production years ending August 31, 2029, August 31,2030 and August 31, 2031, each manufacturer shall submit a report to the National Highway Traffic Safety Administration concerning its compliance with the child restraint anchorage system requirements of Standard No. 225 (49 CFR 571.225) for applicable vehicles produced in that year. Each report shall:

* * * * *

(b) * * *

(3) *Vehicles produced by more than one manufacturer.* Each manufacturer whose reporting of information is affected by one or more of the express written contracts permitted by S13.2.2 of Standard No. 225 (49 CFR 571.225) must:

* * * * *

§ 585.141 Records.

Each manufacturer must maintain records of the Vehicle Identification Number for each vehicle for which information is reported under § 585.140 until December 31, 2033.

* * * * *

Issued in Washington, DC, under authority delegated in 49 CFR 1.95.

Jonathan Morrison,

Administrator.

Federal Register
Vol. 91, No. 148
Tuesday, August 4, 2026

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

National Agricultural Statistics Service

Notice of Intent To Request Revision and Extension of a Currently Approved Information Collection

AGENCY: National Agricultural Statistics Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the intention of the National Agricultural Statistics Service (NASS) to request feedback from the general public on the ''Generic Clearance for the Collection of Qualitative Feedback on Agency Programs''. This collection was developed as part of a Federal Government-wide effort to streamline the process for seeking feedback from the public on service delivery. This notice announces our intent to submit this collection to OMB for approval and solicits comments on specific aspects for the proposed information collection.

DATES: Comments on this notice must be received by October 5, 2026 to be assured of consideration.

ADDRESSES: You may submit comments, identified by docket number 0535–0261, by any of the following methods:

- *Email: omboffi cer@nass.usda.gov.* Include docket number above in the subject line of the message.
- *E-fax:* (855) 838–6382.
- *Mail:* Mail any paper, disk, or CD–ROM submissions to: NASS OMB Clearance Officer, U.S. Department of Agriculture, Room 5336 South Building, 1400 Independence Avenue SW, Washington, DC 20250–2024.
- *Hand Delivery/Courier:* Hand deliver to: NASS OMB Clearance Officer, U.S. Department of Agriculture, Room 5336 South Building, 1400 Independence Avenue SW, Washington, DC 20250–2024.

FOR FURTHER INFORMATION CONTACT: Jody R. McDaniel, Associate Administrator, National Agricultural Statistics Service, U.S. Department of Agriculture, (202) 720–2707. Copies of this information collection and related instructions can be obtained without charge from NASS OMB Clearance Officer, at (202) 720–2206 or at *omboffi cer@nass.usda.gov.*

SUPPLEMENTARY INFORMATION:

Title of Collection: Fast Track Generic Clearance for the Collection of Qualitative Feedback on Agency Programs.

OMB Control Number: 0535–0261.

Expiration Date of Current Approval: April 30, 2027.

Type of Request: Intent to revise and extend a currently approved information collection for a period of three years.

Abstract: The proposed information collection activities provides a means to obtain qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving the quality and timeliness of survey data and its analysis. The qualitative feedback will provide useful insights on perceptions and opinions but are not rigorous statistical surveys that yield quantitative results that can be generalized to the study population. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with data collection efforts, and focus attention on areas where communication, training or changes in operations might improve NASS surveys and publications. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders.

The information collections will target areas such as: timeliness, usefulness of summarized information, perceptions of products or services, accuracy of information, efficiency and ease of reporting data, and the ease and understandability of data collection instruments. Responses will be assessed to plan and inform efforts to improve or maintain the quality of data collected and reported to the public. If this information is not collected, vital feedback from customers and stakeholders on the Agency's services will be unavailable.

The Agency will only submit a collection for approval under this generic clearance if it meets the following conditions:

- The collections are voluntary;
- The collections are low-burden for respondents (based on considerations of total burden hours, total number of respondents, or burden-hours per respondent) and are low-cost for both the respondents and the Federal Government;
- The collections are non-controversial and do not raise issues of concern to other Federal agencies;
- Any collection is targeted to the solicitation of opinions from respondents who have experience with NASS surveys or data, or may reasonably be expected to have experience with the surveys or data in the near future;
- Information gathered will be used only internally for improving data collection efforts, products and services, and the summarization and publication of data, and is not intended for release outside of the agency;
- Information gathered will not be used for the purpose of substantially informing influential policy decisions; and
- Information gathered will yield qualitative information; the collections will not be designed or expected to yield statistically reliable results or used as though the results are generalizable to the study population.

This generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

As a general matter, information collections will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

Estimate of Burden:

Respondents: Farmers, ranchers, agri-businesses and data users.

Estimated Number of Respondents: 120,000.

Below we provide projected average estimates for the next three years:

Average Number of Responses per Respondent: 1.

Total Responses: 120,000 (30,000 completed responses and 90,000 refusals).

Frequency of Responses: Once per request.

Average Minutes per Response: 5 to 20 minutes, depending on the survey.

Total Estimated Burden Hours: 8,375.

Comments: Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, technological or other forms of information technology collection methods.

All responses to this notice will become a matter of public record and be summarized in the request for OMB approval.

Signed at Washington, DC, July 23, 2026.

Jody R. McDaniel,

Associate Administrator.

BILLING CODE 3410–20–P

DEPARTMENT OF AGRICULTURE

National Agricultural Statistics Service

Notice of Intent To Request Revision and Extension of a Currently Approved Information Collection

AGENCY: National Agricultural Statistics Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the intention of the National Agricultural Statistics Service (NASS) to request a revision and extension of a currently approved information collection titled ''NASS Data Security Requirements for Accessing Confidential Data.'' NASS plans to collect information from the public to fulfill its data security requirements when providing access to restricted use data for the purpose of evidence building. NASS's data security agreements and other paperwork along with the corresponding security protocols allow NASS to maintain careful controls on confidentiality and privacy, as required by law.

DATES: Comments on this notice must be received by October 5, 2026 to be assured of consideration.

ADDRESSES:

You may submit comments, identified by docket number 0535–0274, by any of the following methods:

- *Email: ombofficer@nass.usda.gov.* Include docket number above in the subject line of the message.
- *E–fax:* (855) 838–6382.
- *Mail:* Mail any paper, disk, or CD–ROM submissions to: NASS OMB Clearance Officer, U.S. Department of Agriculture, Room 5336 South Building, 1400 Independence Avenue SW, Washington, DC 20250–2024.
- *Hand Delivery/Courier:* Hand deliver to: NASS OMB Clearance Officer, U.S. Department of Agriculture, Room 5336 South Building, 1400 Independence Avenue SW, Washington, DC 20250–2024.

FOR FURTHER INFORMATION CONTACT:

Jody R. McDaniel, Associate Administrator, National Agricultural Statistics Service, U.S. Department of Agriculture, (202) 720–2707. Copies of this information collection and related instructions can be obtained without charge from NASS OMB Clearance Officer, at (202) 720–2206 or at *ombofficer@nass.usda.gov.*

SUPPLEMENTARY INFORMATION:

Title of collection: NASS Data Security Requirements for Accessing Confidential Data.

OMB Control Number: 0535–0274.

Expiration Date of Current Approval: April 30, 2027.

Type of Request: Intent to revise and extend a currently approved information collection for a period of three years.

Abstract: Title III of the Foundations for Evidence-Based Policymaking Act of 2018 (hereafter referred to as the Evidence Act) mandates that OMB establish a Standard Application Process (SAP) for requesting access to certain confidential data assets. Specifically, the Evidence Act requires OMB to establish a common application process through which agencies, the Congressional Budget Office, State, local, and Tribal governments, researchers, and other individuals, as appropriate, may apply for access to confidential data assets collected, accessed, or acquired by a statistical agency or unit. This new process will be implemented while maintaining stringent controls to protect confidentiality and privacy, as required by law.

Data collected, accessed, or acquired by statistical agencies and units is vital for developing evidence on conditions, characteristics, and behaviors of the public and on the operations and outcomes of public programs and policies. This evidence can benefit the stakeholders in the programs, the broader public, as well as policymakers and program managers at the local, State, Tribal, and National levels. The many benefits of access to data for evidence building notwithstanding, National Agricultural Statistics Service is required by law to maintain careful controls that allow it to minimize disclosure risk while protecting confidentiality and privacy.

The fulfillment of National Agricultural Statistics Service's data security requirements places a degree of burden on the public, which is outlined below.

The SAP Portal is a web-based application for the public to request access to confidential data assets from federal statistical agencies and units. The objective of the SAP Portal is to increase public access to confidential data for the purposes of evidence building and reduce the burden of applying for confidential data. Once an individual's application in the SAP Portal has received a positive determination, the data-owning agency(ies) or unit(s) will begin the process of collecting information to fulfill their data security requirements.

The paragraphs below outline the SAP Policy, the steps to complete an application through the SAP Portal, and the process for agencies to collect information fulfilling their data security requirements.

The SAP Policy

At the recommendation of the ICSP, the SAP Policy establishes the SAP to be implemented by statistical agencies and units and incorporates directives from the Evidence Act. The policy is intended to provide guidance as to the application and review processes using the SAP Portal, setting forth clear standards that enable statistical agencies and units to implement a common application form and a uniform review process. The SAP Policy renewal was submitted to the public for comment in June 2025 (90 FR 25380). The renewal policy was approved and has a current expiration date of 12–31–2028.

The SAP Portal

The SAP Portal is an application interface connecting applicants seeking data with a catalog of data assets owned by the federal statistical agencies and units. The SAP Portal is not a new data repository or warehouse; confidential data assets will continue to be stored in secure data access facilities owned and hosted by the federal statistical agencies and units. The SAP Portal will provide a streamlined application process across agencies, reducing redundancies in the application process. This single SAP Portal will improve the process for applicants, tracking and communicating the application process throughout its lifecycle. This reduces redundancies and burden on applicants that request access to data from multiple agencies. The SAP Portal will automate key tasks to save resources and time and will bring agencies into compliance with the Evidence Act statutory requirements.

Data Discovery

Individuals begin the process of accessing restricted use data by discovering confidential data assets through the SAP data catalog, maintained by federal statistical agencies at *www.sap.nsf.gov.* Potential applicants can search by agency, topic, or keyword to identify data of interest or relevance. Once they have identified data of interest, applicants can view metadata outlining the title, description or abstract, scope and coverage, and detailed methodology related to a specific data asset to determine its relevance to their research.

While statistical agencies and units shall endeavor to include metadata in the SAP data catalog on all confidential data assets for which they accept applications, it may not be feasible to include metadata for some data assets (*e.g.,* potential curated versions of administrative data). A statistical agency or unit may still accept an application even if the requested data asset is not listed in the SAP data catalog.

SAP Application Process

Individuals who have identified and wish to access confidential data assets will be able to apply for access through the SAP Portal. Applicants must create an account and follow all steps to complete the application. Applicants begin by entering their personal, contact, and institutional information, as well as the personal, contact, and institutional information of all individuals on their research team. Applicants proceed to provide summary information about their proposed project, to include project title, duration, funding, timeline, and other details including the data asset(s) they are requesting and any proposed linkages to data not listed in the SAP data catalog, including non-federal data sources. Applicants then proceed to enter detailed information regarding their proposed project, including a project abstract, research question(s), literature review, project scope, research methodology, project products, and anticipated output. Applicants must demonstrate a need for confidential data, outlining why their research question cannot be answered using publicly available information.

Submission for Review

Upon submission of their application, applicants will receive a notification that their application has been received and is under review by the data owning agency or agencies (in the event where data assets are requested from multiple agencies). At this point, applicants will also be notified that application approval does not alone grant access to confidential data, and that, if approved, applicants must comply with the data-owning agency's security requirements outside of the SAP Portal.

In accordance with the Evidence Act and the direction of the ICSP, agencies will approve or reject an application within a prompt timeframe. In some cases, agencies may determine that additional clarity, information, or modification is needed and request the applicant to ''revise and resubmit'' their application.

Data discovery, the SAP application process, and the submission for review are planned to take place within the web-based SAP Portal. As noted above, the renewal notice to collect information through the SAP Portal has been published separately (90 FR 25380).

Access to Restricted Use Data

In the event of a positive determination, the applicant will be notified that their proposal has been accepted. The positive or final adverse determination concludes the SAP Portal process. In the instance of a positive determination, the data-owning agency (or agencies) will contact the applicant to provide instructions on the agency's security requirements that must be completed to gain access to the confidential data. The completion and submission of the agency's security requirements will take place outside of the SAP Portal.

Collection of Information for Data Security Requirements

In the instance of a positive determination for an application requesting access to a National Agricultural Statistics Service (NASS) confidential data asset, NASS will contact the applicant(s) to initiate the process of collecting information to fulfill their security requirements. These include additional requirements necessary for the statistical agency or unit to place the applicant(s) in a trusted category that may include the applicant's successful completion of identity verification, confidentiality training, nondisclosure, inspection of the site the confidential data will be accessed, and data use agreements.

NASS's data security requirements include the collection of the following:

- *Security Briefing:* NASS personnel provide a Security Briefing to all applicants who were approved access to restricted data. The Briefing is provided prior to the applicant completing the three forms listed below and includes information on the Confidential Information Protection and Statistical Efficiency Act of 2018, Title III of Public Law 115–435, codified in 44 U.S.C. Ch. 35 and other applicable Federal laws that protect the restricted data.
- Completion of form *ADM–043, Certification and Restrictions on Use of Unpublished Data.* This form is required to be signed by researchers who have been approved to access unpublished NASS data (alternatively, some approved researchers complete on-line training in lieu of completing this form). The form contains excerpts of the various laws that apply to the unpublished data being provided to the researcher. The form explains the restrictions associated with the unpublished data and includes a place for the research to sign the form, thereby acknowledging the restrictions and agreeing to abide by them.
- Completion of *User Attestation Form.* Researchers approved to access unpublished NASS data are provided with the document *Handbook for Special Sworn Data Users of a NASS Data Lab* that explains the policies and procedures associated with accessing unpublished NASS data in a NASS Data Lab (including data enclaves). Each researcher approved to access unpublished NASS data is required to sign the *User Attestation Form* to acknowledge they were provided with the *Handbook for Special Sworn Data Users of a NASS Data Lab* and agree to abide by its provisions.

• Completion of *NASS Site Inspection Checklist.* Researchers approved to access unpublished NASS data do so using a secure data enclave environment accessible at their own location. A NASS employee performs a site inspection (either in-person or via a video call) of the researcher's location prior to the researcher being granted access to the unpublished data. During the site inspection, the NASS employee administers the form *NASS Site Inspection Checklist,* which asks questions pertaining to the suitability of the location for restricted data access and some of the policies associated with accessing the restricted data. The form also collects information about the computer the researcher will use to access the NASS data enclave.

Specifically, researchers will be required to complete the OF–306 (Declaration for Federal Employment) to support onboarding into USDA's human capital management system. This step is necessary to establish a formal relationship between NASS and the researcher and to ensure compliance with federal identity verification and personnel tracking requirements. The OF–306 collects administrative PII such as Social Security Number (SSN), date of birth, sex, and citizenship. This information will be submitted directly to REE Onboarding and will not be retained or processed by NASS. The collection and maintenance of this data are governed by USDA's Privacy Act System of Records Notice (SORN) OCFO/NFC–1—Systems for Personnel, Payroll, and Time & Attendance (89 FR 5481, January 29, 2024). The OF–306 is approved under OMB Control No. 3206–0182. As such, burden associated with completing the OF–306 is not included in this ICR.

In alignment with the Animal and Plant Health Inspection Service (APHIS) notice published on August 19, 2024 (89 FR 67058), the National Agricultural Statistics Service (NASS) has transitioned certain data collection activities previously conducted under OMB Control Number 0579–0500 to OMB Control Number 0535–0274. These activities involve co-owned data between NASS and the National Animal Health Monitoring System (NAHMS). This consolidation under a single control number is intended to streamline data collection processes, enhance data security protocols, and maintain compliance with confidentiality standards as outlined in the APHIS notice.

Estimate of Burden: The amount of time to complete the agreements and other paperwork, Security Briefing, and read the *Handbook for Special Sworn Data Users* that comprise NASS's security requirements will vary based on the confidential data assets requested and the access modality. To obtain access to NASS confidential data assets, it is estimated that the average time to complete and submit NASS's data security agreements and other paperwork, Security Briefing, and read the *Handbook for Special Sworn Data Users* is 145 minutes per applicant. This estimate does not include the time needed to complete and submit an application within the SAP Portal. All efforts related to SAP Portal applications occur prior to and separate from NASS's effort to collect information related to data security requirements.

The expected number of applications in the SAP Portal that receive a positive determination from NASS in a given year may vary. Overall, per year, NASS estimates it will collect data security information from 200 applicants that received a positive determination within the SAP Portal (note: an SAP Portal application may include access for more than one applicant) or other restricted use access approval. NASS estimates that the total burden for the collection of information for data security requirements over the course of the three-year OMB clearance will be about 1,452 hours and, as a result, an average annual burden of 484 hours.

Below we provide projected average estimates for the next three years:

Total Requests: 200.

Frequency of Request: Once per request.

Average Minutes per Request: 145 minutes.

Total Estimated Burden Hours: 484

Comments: Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, technological or other forms of information technology collection methods.

All responses to this notice will become a matter of public record and be summarized in the request for OMB approval.

Signed at Washington, DC, July 23, 2026

Jody R. McDaniel,

Associate Administrator.

Rural Utilities Service

[Docket No. RUS–26–ELECTRIC–0232]

Notice of Funding Opportunity for the Powering Affordable Reliable Technology (PART) Energy Program 2026

AGENCY: Rural Utilities Service, U.S. Department of Agriculture (USDA).

ACTION: Notice of funding opportunity.

SUMMARY: The Rural Utilities Service (RUS or the Agency), a Rural Development (RD) agency of the United States Department of Agriculture (USDA) is soliciting Letters of Interest (LOI) for loan Applications, announcing the Application process for those loans, and providing deadlines for Applications from eligible entities under the Powering Affordable Reliable Technology (PART) Energy Program for fiscal year (FY) 2026. In future years this funding opportunity will only be announced on the Agency website and *grants.gov*, without a **Federal Register** notice. Therefore, in future years, neither the funding opportunity nor reference to the funding opportunity in *grants.gov* will appear in the **Federal Register**. Please make note of this change in location of the funding announcement in your records.

DATES: August 4, 2026.

ADDRESSES: Full funding notice is available on *grants.gov.* Program guidance is available at *https://www.rd.usda.gov/programs-services/electric-programs.*

FOR FURTHER INFORMATION CONTACT: Christopher A. McLean, Assistant Administrator, Electric Program, RUS, RD, USDA, 1400 Independence Avenue SW, STOP 1568, Washington, DC 20250–1560; Telephone: 202–690–4492; Email: *SM.RD.RUS.PART-Questions@usda.gov.*

SUPPLEMENTARY INFORMATION: The full text of the Notice of Funding Opportunity (NOFO) is available on the Agency website and on *grants.gov* using Funding Opportunity Number RUS–PART–2026 or Assistance Listing Number 10.757.

(Authority: 7 U.S.C. 901.)

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–36–2025]

Foreign-Trade Zone (FTZ) 12; Authorization of Production Activity; Avant Technology, Inc.; (Solid-State Drives and Memory Modules); Pharr, Texas

On July 2, 2025, Avant Technology, Inc., submitted a notification of proposed production activity to the FTZ Board for its facility within FTZ 12, in Pharr, Texas.

The notification was processed in accordance with the regulations of the FTZ Board (15 CFR part 400), including notice in the **Federal Register** inviting public comment (90 FR 30048, July 8, 2025). On July 31, 2026, the applicant was notified of the FTZ Board's decision that the proposed activity has been authorized on a limited basis, subject to the FTZ Act and the Board's regulations, including section 400.14, and subject to a one-year time period.

Dated: July 31, 2026.

Elizabeth Whiteman,

Executive Secretary.

[FR Doc. 2026–15804 Filed 8–3–26; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–95–2026]

Foreign-Trade Zone (FTZ) 80, Notification of Proposed Production Activity; CGT US Ltd.; (Automotive Upholstery); New Braunfels, Texas

CGT US Ltd. submitted a notification of proposed production activity to the FTZ Board (the Board) for its facility in New Braunfels, Texas within Subzone 80E. The notification conforming to the requirements of the Board's regulations (15 CFR 400.22) was received on July 30, 2026.

Pursuant to 15 CFR 400.14(b), FTZ production activity would be limited to the specific foreign-status material(s)/component(s) and specific finished product(s) described in the submitted notification (summarized below) and subsequently authorized by the Board. The benefits that may stem from conducting production activity under FTZ procedures are explained in the background section of the Board's website—accessible via *www.trade.gov/ftz.* The proposed finished product and materials/components would be added to the production authority that the Board previously approved for the operation, as reflected on the Board's website.

The proposed finished product is Supported Upholstery Coated with Polyvinyl Chloride Coverstock (duty free).

The proposed foreign-status materials/components include: Zinc Borate; Zinc-Based PVC Stabilizers; and Color Paste (duty rate ranges from 3.7% to 6.5%).

The request indicates that certain materials/components are subject to duties under section 301 of the Trade Act of 1974 (section 301), depending on the country of origin. The applicable section 301 decision requires subject merchandise to be admitted to FTZs in privileged foreign status (19 CFR 146.41).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary and sent to: *ftz@trade.gov.* The closing period for their receipt is September 14, 2026.

A copy of the notification will be available for public inspection in the ''Online FTZ Information System'' section of the Board's website.

For further information, contact John Frye at *John.Frye@trade.gov.*

Dated: July 30, 2026.

Elizabeth Whiteman,

Executive Secretary.

Bureau of Industry and Security

[Docket No. 260731–0181]

XRIN 0694–XC159

Notice of Reduction of Tariffs on Patented Pharmaceuticals and Pharmaceutical Ingredients for Products of the United Kingdom Implemented by Presidential Proclamation 11020

AGENCY: Bureau of Industry and Security, Office of Strategic Industries and Economic Security, U.S. Department of Commerce.

ACTION: Notice.

SUMMARY: This notice revises the tariff rate on patented pharmaceuticals and associated pharmaceutical ingredients that are products of the United Kingdom from 10 percent to zero percent in accordance with Proclamation 11020 ''Adjusting Imports of Pharmaceuticals and Pharmaceutical Ingredients Into the United States.''

DATES: The duties set out in this notice are effective with respect to certain products that are entered for consumption, or withdrawn from warehouse for consumption, on or after 12:01 a.m. Eastern Time on July 31, 2026.

SUPPLEMENTARY INFORMATION:

Background

On April 2, 2026, The President issued Proclamation 11020 ''Adjusting Imports of Pharmaceuticals and Pharmaceutical Ingredients Into the United States,'' (Presidential Proclamation) on April 2, 2026, to adjust imports of patented pharmaceuticals and associated pharmaceutical ingredients, (Proclamation 11020 of April 2, 2026) (91 FR 18183).

The Presidential Proclamation directed the Secretary to publish a **Federal Register** Notice indicating that the tariff rate on patented pharmaceuticals and associated pharmaceutical ingredients that are products of the United Kingdom will be reduced to zero to the extent required by any future agreement between the United States and the United Kingdom on pharmaceutical pricing. On April 2, 2026, the United States and the United Kingdom announced the successful conclusion of the pharmaceutical pricing agreement as outlined in the ''Arrangement Between the Government of the United States of America and the Government of the United Kingdom of Great Britain and Northern Ireland on Pharmaceutical Pricing'' *https://ustr.gov/sites/default/files/files/Press/Releases/2026/U.S.-UK%20Pharma%20Pricing%20Arrangement%20-%204.2.2026.pdf.* Furthermore, the requirements of section IV.1.a of the Arrangement are currently being met. Therefore, the tariff rate for patented pharmaceuticals and associated pharmaceutical ingredients that are products of the United Kingdom is now zero.

Modifications to the Harmonized Tariff Schedule of the United States

Effective with respect to goods entered for consumption, or withdrawn for consumption, on or after 12:01 a.m. eastern time on July 31, 2026, heading 9903.04.63 of the Harmonized Tariff

Schedule of the United States is amended by deleting ''+10%'' in each place that it appears and inserting ''+0%'' in lieu thereof.

Jessica Curyto,

Deputy Assistant Secretary for Technology Security.

International Trade Administration

[A–122–875]

Van-Type Trailers and Subassemblies Thereof From Canada: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that van-type trailers and subassemblies thereof (van-type trailers) from Canada are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2024, through September 30, 2025. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable August 4, 2026.

FOR FURTHER INFORMATION CONTACT: Jun Jack Zhao or Maria Teresa Aymerich, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–1396 or (202) 482–0499, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on January 26, 2026.[1] On May 15, 2026, Commerce postponed the preliminary determination of this investigation until July 29, 2026.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/frnotices.*

Scope of the Investigation

The products covered by this investigation are van-type trailers from Canada. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the *Preamble* to Commerce's regulations,[4] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice.* For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Scope Decision Memorandum.[6] Commerce is preliminarily modifying the scope as it appeared in the *Initiation Notice* by adding an additional Harmonized Tariff Schedule of the United States (HTSUS) code. *See* the scope in Appendix I to this notice.

In the Preliminary Scope Decision Memorandum, Commerce established the deadline for parties to submit scope case and rebuttal briefs.[7] Commerce intends to issue a final scope decision with the final determinations of the LTFV and CVD investigations of van-type trailers from People's Republic of China (China).

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce has calculated constructed export prices in accordance with section 772(b) of the Act. Normal value is calculated in accordance with section 773 of the Act. Furthermore, pursuant to section 776(a) and (b) of the Act, Commerce has preliminarily relied upon facts otherwise available, with adverse inferences, with respect to Collins Manufacturing Company and GINCOR Werx. *See* ''Rate for Non-Responsive Companies,'' below.

Vanguard Refrigerated Trailer Co., Ltd.

Commerce selected Vanguard Refrigerated Trailer Co., Ltd. (Vanguard, or VRTC) as one of the mandatory respondents.[8] We preliminarily determine that Vanguard made no sales of subject merchandise with regard to the LTFV investigation of van-type trailers from Canada, as the record evidence indicates that the van-type trailers it shipped from Canada to the United States during the POI were comprised of Chinese-origin merchandise that falls within the scope of the ongoing LTFV and CVD investigations on van-type trailers from China. Accordingly, we have not calculated a company-specific dumping margin for Vanguard. For further discussion on this issue, *see* the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(ii) and 735(c)(5)(A) of the Act provide that in the preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

Commerce calculated an individual estimated weighted-average dumping margin for Manac Inc., the only individually examined exporter/producer in this investigation. Because the only individually calculated dumping margin is not zero, *de minimis,* or based entirely on facts otherwise available, the estimated

[8] *See* Memorandum, ''Respondent Selection,'' dated March 17, 2026.

weighted-average dumping margin calculated for Manac Inc. is the margin assigned to all other producers and exporters, pursuant to section 735(c)(5)(A) of the Act.

Rate for Non-Responsive Companies

The following two exporters and/or producers of van-type trailers from Canada did not respond to the quantity and value (Q&V) questionnaire: (1) Collins Manufacturing Company; and (2) GINCOR Werx (collectively, the non-responsive companies). We find that, by not responding to the Q&V questionnaire, these companies withheld necessary information that was requested of them, failed to provide information within the deadlines established and significantly impeded this proceeding. Thus, in reaching our preliminary determination, pursuant to sections 776(a)(1) and (2)(A)–(C) of the Act, we are basing the dumping rate for these two companies facts available.

In addition, we preliminary determine that an adverse inference is warranted, pursuant to section 776(b) of the Act. By failing to submit responses to Commerce's Q&V questionnaire, these two companies did not cooperate to the best of their ability in this investigation. Accordingly, we preliminarily find that an adverse inference is warranted to ensure that the non-responsive companies will not obtain a more favorable result than had they fully complied with our request for information. For more information on the application of adverse facts available (AFA), *see* ''Use of Facts Otherwise Available and Adverse Inferences'' in the Preliminary Decision Memorandum.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Weighted-average dumping margin (percent)
Manac Inc	4.29
Di-Mond Sales, Inc	4.29
Innovative Trailer Design Industries, Inc	4.29
Morgan Canada Corporation	4.29
Collins Manufacturing Company	*44.86
GINCOR Werx	*44.86
All Others	4.29

*Based on facts available with adverse inferences.

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) the cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin.

Additionally, because the scope of the LTFV investigation on van-type trailers from China includes Chinese van-type trailers and subassemblies processed in third countries,[9] Chinese subassemblies and/or van-type trailers containing Chinese subassemblies imported through third countries are subject to the suspension of liquidation and cash deposit requirements noted above.[10]

In the LTFV and CVD investigations of van-type trailers from China, and in the instant investigation, the petitioner has requested clarification that Chinese subassemblies and/or van-type trailers containing Chinese subassemblies imported from Canada are subject to China CVD duties.[11] Thus, in the LTFV and CVD investigations of van-type trailers from China, Commerce has established a Canadian third-country case number in the Automated Commercial Environment (ACE).[12] Accordingly, for Chinese subassemblies and/or van-type trailers containing Chinese subassemblies imported through Canada, importers should report such entries under third country case numbers C–122–218 and A–122–219. For van-type trailers containing Chinese subassemblies imported through Canada, only the Chinese subassembly portion of the merchandise is subject to China CVD duties. Importers, producers, or exporters of subject merchandise from other third countries should file a request through ACCESS for Commerce to establish a case number for that specific country in ACE. CBP may also submit a request, through the ACE AD/CVD Portal Inquiry System, for Commerce to establish specific third-country case numbers.

These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations performed to interested parties in this preliminary determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Consistent with 19 CFR 351.224(e), Commerce will analyze and, if appropriate, correct any timely allegations of significant ministerial errors by amending the preliminary determination. However, consistent with 19 CFR 351.224(d), Commerce will not consider incomplete allegations that do not address the significance standard under 19 CFR 351.224(g) following the preliminary determination. Instead, Commerce will address such allegations in the final determination together with issues raised in the case briefs or other written comments.

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

Non-scope case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation. A timeline for the submission of case briefs and written

comments will be notified to interested parties at a later date. Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[13] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[14]

As provided under 19 CFR 351.309(c)(2)(iii) and (d)(2)(iii), we request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[15] Further, we request that interested parties limit their executive summary of each issue to no more than 450 words, not including citations. We intend to use the executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[16]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants and whether any participant is a foreign national; and (3) a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On July 27, 2026, pursuant to 19 CFR 351.210(e), Manac requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[17] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporter accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination.

U.S. International Trade Commission (ITC) Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act, and 19 CFR 351.205(c).

Dated: July 29, 2026.

Christopher Abbott,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by this investigation consists of certain van-type trailers and subassemblies thereof, whether finished or unfinished, whether assembled or unassembled, regardless of the number of axles, for carriage of goods. Van-type trailers are typically, but not limited to, rectangular cuboid trailers with a fully enclosed cargo space consisting of a front nose (with or without a refrigeration unit), side walls (with or without doors), movable rear panels (whether roll-up doors, swing doors, or another configuration), a floor and subframe, an affixed or removable roof, a suspension and axle system, wheels and tires, brakes, a lighting and electrical system, landing gear, and coupling for towing behind a truck tractor or a connection system for training behind another van-type trailer. Covered van-type trailers are those with a gross vehicle weight rating of greater than 26,000 pounds.

Subject merchandise includes, but is not limited to, the following subassemblies:

- Van-type trailer subframes, or sections of van-type trailer frames, typically consisting of welded crossmembers and slider rails for attaching the running gear;
- Nose wall, side wall, and roof subassemblies, whether insulated or non insulated, and with or without top, bottom, or side rails;
- Rear door frame, whether for swing or roll-up doors, with or without installed doors, bumpers, bumper plates, or reinforcing plates for liftgate;
- Door assemblies, whether for rear swing doors, roll-up doors, side doors or any other configuration, with or without lockrods, handles, hinges, or hinge pins;
- Rear impact guard subassemblies, typically consisting of a fabricated horizontal structural component (such as a guard tube) and uprights for connection to the underside of the rear frame;
- Coupler assembly for connection to truck tractor's fifth wheel, typically consisting of main beams and cross members, support plates, and front nose wrap, and with or without kingpin installed;
- Running gear subassemblies or axle assemblies for connection to the subframe, which may or may not include suspension(s), wheel end components, slack adjusters, dressed axles, brake chambers, locking pins, wheels, and tires; and
- Landing gear subassemblies, typically consisting of two landing legs, a cross channel, braces, bracketing, a cross shaft, and a crank handle.

These subassemblies are subject to the investigation, whether entered alone or with other subassemblies and whether assembled or unassembled and whether finished or unfinished. The absence of any subassembly from an otherwise finished or unfinished van-type trailer does not remove the van-type trailer from coverage.

[13] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings,* 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Procedures*).

[14] *See* 19 CFR 351.309(c)(2) and (d)(2).

[15] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[16] *See APO and Service Procedures.*

[17] *See* Manac's Letter, ''Request for Postponement of Final Determination,'' dated July 27, 2026.

Subject merchandise also includes components entered with (*i.e.,* on the same bill of lading as) van-type trailers and subassemblies, such as, but not limited to: hub and drum assemblies, brake assemblies (either drum or disc), bare axles, brake chambers, suspensions and suspension components, wheel end components, landing gear legs, wheels, tires, brake control systems, electrical harnesses and lighting systems, lift gate systems, tire inflation systems, or refrigeration units (with or without evaporators or fuel tanks) whether assembled or unassembled, whether as part of a kit or not, and whether or not accompanied by additional components that constitute as part of an unfinished and/or unassembled van-type trailer and subassemblies thereof that are subject to the investigation.

Processing of finished and unfinished van-type trailers and subassemblies, such as trimming, cutting, grinding, notching, punching, drilling, painting, coating, staining, finishing, assembly, or any other processing either in the country of manufacture of the in-scope product or in a third country does not remove the product from the scope. Inclusion of other components not identified as comprising the finished or unfinished van-type trailer does not remove the product from the scope.

Specifically excluded are subassemblies covered by the scope of the antidumping and countervailing duty orders on certain chassis and subassemblies thereof from the People's Republic of China. *See Certain Chassis and Subassemblies Thereof from the People's Republic of China: Antidumping Duty Order,* 86 FR 36093 (July 8, 2021) and *Certain Chassis and Subassemblies Thereof from the People's Republic of China: Countervailing Duty Order and Amended Final Affirmative Countervailing Duty Determination,* 86 FR 24844 (May 10, 2021).

The finished and unfinished van-type trailers subject to the investigation are typically classified in the Harmonized Tariff Schedule of the United States (HTSUS) at subheadings: 8716.39.0040, 8716.39.0090 and 8716.90.5060. Imports of finished and unfinished subassemblies may also enter under HTSUS subheadings 7308.30.5050, 7308.90.9590, 7326.90.8688, 8708.29.1500, 8708.99.8180, 8716.90.5010. While the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise under investigation is dispositive.

Boltless Steel Shelving Units Prepackaged for Sale From the People's Republic of China: Final Results of the Expedited Second Sunset Review of the Countervailing Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) finds that revocation of the countervailing duty (CVD) order on boltless steel shelving units prepackaged for sale (boltless steel shelving) from the People's Republic of China (China) would be likely to lead to continuation or recurrence of countervailable subsidies at the levels indicated in the ''Final Results of Sunset Review'' section of this notice.

DATES: Applicable August 4, 2026.

FOR FURTHER INFORMATION CONTACT: Nathan James, AD/CVD, Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–5305.

SUPPLEMENTARY INFORMATION:

Background

On October 21, 2015, Commerce published in the **Federal Register** the CVD order on boltless steel shelving from China.[1] On April 1, 2026, Commerce published the notice of initiation of the second sunset review of the *Order,* pursuant to section 751(c) of the Act and 19 CFR 351.218(c).[2]

On April 14, 2026, Commerce received a notice of intent to participate in this review from the domestic interested party, within the deadline specified in 19 CFR 351.218(d)(1)(i).[3] The domestic interested party claims that it has interested party status within the meaning of section 771(9)(C) of the Act and 19 CFR 351.102(b)(29)(v) as a U.S. producer of the domestic like product.[4]

On April 30, 2026, Commerce received an adequate substantive response from the domestic interested party, within the 30-day deadline specified in 19 CFR 351.218(d)(3)(i).[5] Commerce did not receive a substantive response from either the Government of China or a respondent interested party to this proceeding. On May 20, 2026, Commerce notified the U.S. International Trade Commission (ITC) that it did not receive an adequate substantive response from respondent interested parties.[6] As a result, Commerce conducted an expedited (120-day) sunset review of the *Order,* pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(B)(2) and (C)(2).

Scope of the Order

The product covered by the *Order* is boltless steel shelving. For a full description of the scope, *see* the Issues and Decision Memorandum.[7]

Analysis of Comments Received

A complete discussion of all issues raised in this sunset review, including the likelihood of continuation or recurrence of subsidization and the countervailable subsidy rates likely to prevail if the *Order* were to be revoked, is contained in the accompanying Issues and Decision Memorandum.[8] A list of the topics discussed in the Issues and Decision Memorandum is attached as an appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS), which is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *https://access.trade.gov/frnotices.*

Final Results of Sunset Review

Pursuant to sections 751(c) and 752(b) of the Act, Commerce determines that revocation of the *Order* would be likely

Prestressed Concrete Steel Wire Strand From the People's Republic of China: Final Results of the Expedited Sunset Review of the Countervailing Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) finds that revocation of the countervailing duty (CVD) order on prestressed concrete steel wire strand (PC strand) from the People's Republic of China (China) would be likely to lead to continuation or recurrence of countervailable subsidies at the levels indicated in the ''Final Results of the Sunset Review'' section of this notice.

DATES: Applicable August 4, 2026.

FOR FURTHER INFORMATION CONTACT: Peter Zukowski, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0189.

SUPPLEMENTARY INFORMATION:

Background

On July 7, 2010, Commerce published the *Order* on PC strand from China.[1] On April 1, 2026, Commerce published the notice of initiation of the third sunset review of the *Order,* pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act) and 19 CFR 351.218(c)(2).[2] On April 16, 2026, Commerce received a notice of intent to participate from Insteel Wire Products Company, Sumiden Wire Products Corporation, and Wire Mesh Corp. (collectively, the domestic interested parties), within the deadline specified in 19 CFR 351.218(d)(1)(i).[3] The domestic interested party claimed interested party status under section 771(9)(C) of the Act and 19 CFR 351.102(b)(29)(v) as producers of the domestic like product.

On May 1, 2026, Commerce received an adequate substantive response from the domestic interested parties within the 30-day deadline specified in 19 CFR 351.218(d)(3)(i).[4] Commerce did not receive a substantive response from any government or respondent interested party to this proceeding. On May 20, 2026, Commerce notified the U.S. International Trade Commission that it did not receive an adequate substantive response from respondent interested parties.[5] As a result, Commerce conducted an expedited (120-day) sunset review of the *Order*, pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(B)(2) and (C)(2).

Scope of the Order

The product covered by this *Order* is PC strand from China. For a complete description of the scope of the *Order, see* the Issues and Decision Memorandum.[6]

Analysis of Comments Received

A complete discussion of all issues raised in this sunset review, including the likelihood of continuation or recurrence of subsidization and the countervailable subsidy rates likely to prevail if the *Order* were to be revoked, is provided in the Issues and Decision Memorandum. A list of the topics discussed in the Issues and Decision Memorandum is attached as an

Final Results of Sunset Review

Pursuant to sections 751(c) and 752(b) of the Act, we determine that revocation of the *Order* would be likely to lead to continuation or recurrence of countervailable subsidies at the following net countervailable subsidy rates:

Producers/Exporters	Net countervailable subsidy rate (percent *ad valorem*)
Fasten Group Corporation, Fasten Group Import & Export Co., Ltd., Jiangyin Hongsheng Co., Ltd., Jiangyin Fasten Steel Products Co., Ltd., Jiangyin Hongyu Metal Products Co., Ltd., and Jiangyin Walsin Steel Cable Co., Ltd. (collectively, the Fasten Companies)	9.42
Xinhua Metal Products Company, Xinyu Iron and Steel Joint Stock Limited Company, and Xingang Iron and Steel Joint Stock Limited Liability Company (collectively, the Xinhua Companies)	45.85
All Others	27.64

Administrative Protective Order (APO)

This notice also serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

Commerce is issuing and publishing these final results and this notice in accordance with sections 751(c), 752(b), and 777(i)(1) of the Act, and 19 CFR 351.218.

Dated: July 30, 2026.

Scot Fullerton,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review and Join Annual Inquiry Service List; Note Regarding Format of Review Requests

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

FOR FURTHER INFORMATION CONTACT: Brenda E. Brown, AD/CVD Operations, Customs Liaison Unit, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230, telephone: (202) 482–4735.

Background

Each year during the anniversary month of the publication of an antidumping duty (AD) or countervailing duty (CVD) order, finding, or suspended investigation, an interested party, as defined in section 771(9) of the Tariff Act of 1930, as amended (the Act), may request, in accordance with 19 CFR 351.213, that the U.S. Department of Commerce (Commerce) conduct an administrative review of that AD or CVD order, finding, or suspended investigation.

All deadlines for the submission of comments or actions by Commerce discussed below refer to the number of calendar days from the applicable starting date.

Commerce asks that requests for review of multiple companies include an appendix listing, in alphabetical order, the company names for which a review is requested. *See infra* for additional details regarding this request.

Respondent Selection

In the event Commerce limits the number of respondents for individual examination for administrative reviews initiated pursuant to requests made for the orders identified below, Commerce intends to select respondents based on U.S. Customs and Border Protection (CBP) data for U.S. imports during the period of review (POR). We intend to release the CBP data under administrative protective order (APO) to all parties having an APO within five days of publication of the initiation notice and to make our decision regarding respondent selection within 35 days of publication of the initiation **Federal Register** notice. Therefore, we encourage all parties interested in commenting on respondent selection to submit their APO applications on the date of publication of the initiation notice, or as soon thereafter as possible. Commerce invites comments regarding the CBP data and respondent selection within five days of placement of the CBP data on the record of the review.

In the event Commerce decides it is necessary to limit individual examination of respondents and conduct respondent selection under section 777A(c)(2) of the Act:

1. In general, Commerce finds that determinations concerning whether particular companies should be ''collapsed'' (*i.e.,* treated as a single entity for purposes of calculating AD rates) require a substantial amount of detailed information and analysis, which often require follow-up questions and analysis. Accordingly, Commerce will not conduct collapsing analyses at the respondent selection phase of a review and will not collapse companies at the respondent selection phase unless there has been a determination to collapse certain companies in a previous segment of this AD proceeding (*i.e.,* investigation, administrative review, new shipper review, or changed circumstances review).

2. For any company subject to a review, if Commerce determined, or continued to treat, that company as collapsed with others, Commerce will assume that such companies continue to operate in the same manner and will collapse them for respondent selection purposes. Otherwise, Commerce will not collapse companies for purposes of respondent selection.

3. Parties are requested to: (a) identify which companies subject to review previously were collapsed; and (b)

provide a citation to the proceeding in which they were collapsed.

4. Further, if companies are requested to complete a Quantity and Value Questionnaire for purposes of respondent selection, in general, each company must report volume and value data separately for itself. Parties should not include data for any other party, even if they believe they should be treated as a single entity with that other party. If a company was collapsed with another company or companies in the most recently completed segment of a proceeding where Commerce considered collapsing that entity, complete quantity and value data for that collapsed entity must be submitted.

Deadline for Withdrawal of Request for Administrative Review

Pursuant to 19 CFR 351.213(d)(1), a party that requests a review may withdraw that request within 90 days of the date of publication of the notice of initiation of the requested review. The regulation provides that Commerce may extend this time if it is reasonable to do so. Determinations by Commerce to extend the 90-day deadline will be made on a case-by-case basis.

Deadline for Particular Market Situation Allegation

Section 504 of the Trade Preferences Extension Act of 2015 amended the Act by adding the concept of particular market situation (PMS) for purposes of constructed value under section 773(e) of the Act.[1] Section 773(e) of the Act states that ''if a particular market situation exists such that the cost of materials and fabrication or other processing of any kind does not accurately reflect the cost of production in the ordinary course of trade, the administering authority may use another calculation methodology under this subtitle or any other calculation methodology.'' When an interested party submits a PMS allegation, pursuant to section 773(e) of the Act, Commerce will respond to such a submission consistent with 19 CFR 351.301(c)(2)(v). If Commerce finds that a PMS exists under section 773(e) of the Act, then it will modify its dumping calculations appropriately.

Neither section 773(e) of the Act nor 19 CFR 351.301(c)(2)(v) set a deadline for the submission of PMS allegations and supporting factual information. However, in order to administer section 773(e) of the Act, Commerce must receive PMS allegations and supporting factual information with enough time to consider the submission. Thus, should an interested party wish to submit a PMS allegation and supporting new factual information pursuant to section 773(e) of the Act, it must do so no later than 20 days after submission of initial Section D responses.

Opportunity to Request a Review: Not later than the last day of August 2026,[2] interested parties may request an administrative review of the following orders, findings, or suspended investigations, with anniversary dates in August for the following periods:

Antidumping Duty Proceedings	
CANADA: Utility Scale Wind Towers, A–122–867	8/1/25–7/31/26
GERMANY:	
Seamless Line and Pressure Pipe, A–428–820	8/1/25–7/31/26

Steel Propane Cylinders, C–570–087	1/1/25–12/31/25

Suspension Agreements

None.

In accordance with 19 CFR 351.213(b), an interested party as defined by section 771(9) of the Act may request in writing that Commerce conduct an administrative review. For both AD and CVD reviews, the interested party must specify the individual producers or exporters covered by an AD finding or an AD or CVD order or suspension agreement for which it is requesting a review. In addition, a domestic interested party or an interested party described in section 771(9)(B) of the Act must state why it desires Commerce to review those particular producers or exporters. If the interested party intends for Commerce to review sales of merchandise by an exporter (or a producer if that producer also exports merchandise from other suppliers) which was produced in more than one country of origin and each country of origin is subject to a separate order, then the interested party must state specifically, on an order-by-order basis, which exporter(s) the request is intended to cover.

Note that, for any party Commerce was unable to locate in prior segments, Commerce will not accept a request for an administrative review of that party absent new information as to the party's location. Moreover, if the interested party who files a request for review is unable to locate the producer or exporter for which it requested the review, the interested party must provide an explanation of the attempts it made to locate the producer or exporter at the same time it files its request for review, in order for Commerce to determine if the interested party's attempts were reasonable, pursuant to 19 CFR 351.303(f)(3)(ii).

[3] Commerce inadvertently did not include certain steel wheels from the People's Republic of China in the *Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review and Join Annual Inquiry Service List; Note Regarding Format of Review Requests,* 91 FR 23956 (May 4, 2026).

[4] Commerce inadvertently did not include certain steel wheels from the People's Republic of China in the *Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review and Join Annual Inquiry Service List; Note Regarding Format of Review Requests,* 91 FR 23956 (May 4, 2026).

Commerce is instituting a new formatting request. Specifically, Commerce asks that requests for review of multiple companies also include an appendix listing, in alphabetical order, the company names for which a review is requested. The list should be limited solely to company names and formatted as a single column, with each company name identified on a separate line, except in the case of companies that Commerce previously determined should be collapsed into a single entity or found to be cross-owned with other companies. Companies that Commerce previously determined should be collapsed or found to be cross-owned with one another should be listed together as a group, on one line—or more, as needed, for the group—with the company names within each group listed alphabetically and separated by semicolons.

As explained in *Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties,* 68 FR 23954 (June 6, 2003), and *Non-Market Economy Antidumping Proceedings: Assessment of Antidumping Duties,* 76 FR 65694 (October 24, 2011), Commerce clarified its practice with respect to the collection of final antidumping duties on imports of merchandise where intermediate firms are involved. The public should be aware of this clarification in determining whether to request an administrative review of merchandise subject to AD findings and orders.[5]

Commerce no longer considers the non-market economy (NME) entity as an exporter conditionally subject to an AD administrative review.[6] Accordingly, the NME entity will not be under review unless Commerce specifically receives a request for, or self-initiates, a review of the NME entity.[7] In administrative reviews of AD orders on merchandise from NME countries where a review of the NME entity has not been initiated, but where an individual exporter for which a review was initiated does not qualify for a separate rate, Commerce will issue a final decision indicating that the company in question is part of the NME entity. However, in that situation, because no review of the NME entity was conducted, the NME entity's entries were not subject to the review and the rate for the NME entity is not subject to change as a result of that review (although the rate for the individual exporter may change as a function of the finding that the exporter is part of the NME entity). Following initiation of an AD administrative review when there is no review requested of the NME entity, Commerce will instruct CBP to liquidate entries for all exporters not named in the initiation notice, including those that were suspended at the NME entity rate.

All requests must be filed electronically in Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS) on Enforcement and Compliance's ACCESS website at *https://access.trade.gov*.[8] Further, in accordance with 19 CFR 351.303(f)(l)(i), a copy of each request must be served on the petitioner and each exporter or producer specified in the request. Interested parties should note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[9]

Commerce will publish in the **Federal Register** a notice of ''Initiation of Administrative Review of Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation'' for requests received by the last day of August 2026. If Commerce does not receive, by the last day of August 2026, a request for review of entries covered by an order, finding, or suspended investigation listed in this notice and for the period identified above, Commerce will instruct CBP to assess antidumping or countervailing duties on those entries at a rate equal to the cash deposit of estimated antidumping or countervailing duties required on those entries at the time of entry, or withdrawal from warehouse, for consumption and to continue to collect the cash deposit previously ordered.

For the first administrative review of any order, there will be no assessment of antidumping or countervailing duties on entries of subject merchandise entered, or withdrawn from warehouse, for consumption during the relevant provisional-measures ''gap'' period of the order, if such a gap period is applicable to the period of review.

Establishment of and Updates to the Annual Inquiry Service List

On September 20, 2021, Commerce published the final rule titled ''*Regulations to Improve Administration and Enforcement of Antidumping and Countervailing Duty Laws*'' in the **Federal Register**.[10] On September 27, 2021, Commerce also published the notice entitled ''*Scope Ruling Application; Annual Inquiry Service List; and Informational Sessions*'' in the **Federal Register**.[11] The *Final Rule* and *Procedural Guidance* provide that Commerce will maintain an annual inquiry service list for each order or suspended investigation, and any interested party submitting a scope ruling application or request for circumvention inquiry shall serve a copy of the application or request on the persons on the annual inquiry service list for that order, as well as any companion order covering the same merchandise from the same country of origin.[12]

In accordance with the *Procedural Guidance,* for orders published in the **Federal Register** before November 4, 2021, Commerce created an annual inquiry service list segment for each order and suspended investigation. Interested parties who wished to be added to the annual inquiry service list for an order submitted an entry of appearance to the annual inquiry service list segment for the order in ACCESS and, on November 4, 2021, Commerce finalized the initial annual inquiry service lists for each order and suspended investigation. Each annual inquiry service list has been saved as a public service list in ACCESS, under each case number, and under a specific segment type called ''AISL-Annual Inquiry Service List.'' [13]

As mentioned in the *Procedural Guidance,* beginning in January 2022,

[5] *See* Enforcement and Compliance's website at *https://www.trade.gov/us-antidumping-and-countervailing-duties-home-page.*

[6] *See Antidumping Proceedings: Announcement of Change in Department Practice for Respondent Selection in Antidumping Duty Proceedings and Conditional Review of the Nonmarket Economy Entity in NME Antidumping Duty Proceedings,* 78 FR 65963 (November 4, 2013).

[7] In accordance with 19 CFR 351.213(b)(1), parties should specify that they are requesting a review of entries from exporters comprising the entity, and to the extent possible, include the names of such exporters in their request.

[8] *See Antidumping and Countervailing Duty Proceedings: Electronic Filing Procedures; Administrative Protective Order Procedures,* 76 FR 39263 (July 6, 2011).

[9] *See Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings; Final Rule,* 88 FR 67069 (September 29, 2023).

[10] *See Regulations to Improve Administration and Enforcement of Antidumping and Countervailing Duty Laws,* 86 FR 52300 (September 20, 2021) (*Final Rule*).

[11] *See Scope Ruling Application; Annual Inquiry Service List; and Informational Sessions,* 86 FR 53205 (September 27, 2021) (*Procedural Guidance*).

[12] *Id.*

[13] This segment has been combined with the ACCESS Segment Specific Information (SSI) field which will display the month in which the notice of the order or suspended investigation was published in the **Federal Register**, also known as the anniversary month. For example, for an order under case number A–000–000 that was published in the **Federal Register** in January, the relevant segment and SSI combination will appear in ACCESS as ''AISL-January Anniversary.'' Note that there will be only one annual inquiry service list segment per case number, and the anniversary month will be pre-populated in ACCESS.

Commerce will update these annual inquiry service lists on an annual basis when the *Opportunity Notice* for the anniversary month of the order or suspended investigation is published in the **Federal Register**.[14] Accordingly, Commerce will update the annual inquiry service lists for the above-listed AD and CVD proceedings. All interested parties wishing to appear on the updated annual inquiry service list must take one of the two following actions: (1) new interested parties who did not previously submit an entry of appearance must submit a new entry of appearance at this time; (2) interested parties who were included in the preceding annual inquiry service list must submit an amended entry of appearance to be included in the next year's annual inquiry service list. For these interested parties, Commerce will change the entry of appearance status from ''Active'' to ''Needs Amendment'' for the annual inquiry service lists corresponding to the above-listed proceedings. This will allow those interested parties to make any necessary amendments and resubmit their entries of appearance. If no amendments need to be made, the interested party should indicate in the area on the ACCESS form requesting an explanation for the amendment that it is resubmitting its entry of appearance for inclusion in the annual inquiry service list for the following year. As mentioned in the *Final Rule,*[15] once the petitioners and foreign governments have submitted an entry of appearance for the first time, they will automatically be added to the updated annual inquiry service list each year.

Interested parties have 30 days after the date of this notice to submit new or amended entries of appearance. Commerce will then finalize the annual inquiry service lists five business days thereafter. For ease of administration, please note that Commerce requests that law firms with more than one attorney representing interested parties in a proceeding designate a lead attorney to be included on the annual inquiry service list.

Commerce may update an annual inquiry service list at any time as needed based on interested parties' amendments to their entries of appearance to remove or otherwise modify their list of members and representatives, or to update contact information. Any changes or announcements pertaining to these procedures will be posted to the ACCESS website at *https://access.trade.gov.*

Special Instructions for Petitioners and Foreign Governments

In the *Final Rule,* Commerce stated that, ''after an initial request and placement on the annual inquiry service list, both petitioners and foreign governments will automatically be placed on the annual inquiry service list in the years that follow.'' [16] Accordingly, as stated above and pursuant to 19 CFR 351.225(n)(3), the petitioners and foreign governments will not need to resubmit their entries of appearance each year to continue to be included on the annual inquiry service list. However, the petitioners and foreign governments are responsible for making amendments to their entries of appearance during the annual update to the annual inquiry service list in accordance with the procedures described above.

Notification to Interested Parties

This notice is not required by statute but is published as a service to the international trading community.

Dated: July 30, 2026.

Scot Fullerton,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–201–867]

Van-Type Trailers and Subassemblies Thereof From Mexico: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that van-type trailers and subassemblies thereof (van-type trailers) from Mexico are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2024, through September 30, 2025. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable August 4, 2026.

FOR FURTHER INFORMATION CONTACT: Charles DeFilippo or Jacob Saude, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3797 or (202) 482–9081, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on January 26, 2026.[1] On May 20, 2026, Commerce postponed the preliminary determination of this investigation and the revised deadline is now July 29, 2026.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/frnotices.*

Scope of the Investigation

The products covered by this investigation are van-type trailers from Mexico. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the *Preamble* to Commerce's regulations,[4] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product

[1] *See Van-Type Trailers and Subassemblies Thereof from Canada, the People's Republic of China, and Mexico: Initiation of Less-Than-Fair-Value Investigations,* 91 FR 3104 (January 26, 2026) (*Initiation Notice*).

[2] *See Van-Type Trailers and Subassemblies Thereof from Canada and Mexico: Postponement of Preliminary Determinations in the Less-Than-Fair-Value Investigations,* 91 FR 29454 (May 20, 2026).

[3] *See* Memorandum, ''Decision Memorandum for the Preliminary Affirmative Determination in the Less-Than-Fair Value Investigation of Van-Type Trailers and Subassemblies Thereof from Mexico'' dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice.* For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Scope Decision Memorandum.[6] Commerce is preliminarily modifying the scope as it appeared in the *Initiation Notice* by adding an additional Harmonized Tariff Schedule of the United States (HTSUS) code. *See* the scope in Appendix I to this notice. In the Preliminary Scope Decision Memorandum, Commerce established the deadline for parties to submit scope case and rebuttal briefs.[7] Commerce intends to issue a final scope decision with the final determinations of the LTFV and CVD investigations of van-type trailers from People's Republic of China (China).

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce has calculated constructed export prices in accordance with section 772(b) of the Act. Normal value is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(ii) and 735(c)(5)(A) of the Act provide that in the preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

In this investigation, Commerce calculated estimated weighted-average dumping margins for Hyundai de Mexico S.A. de C.V. (HYMEX) and Utility Trailer Manufacturing de México, S. de R.L. de C.V. (Utility Mexico) that are not zero, *de minimis,* or based entirely on facts otherwise available. Commerce calculated the all-others rate using a weighted average of the estimated weighted-average dumping margins calculated for the examined respondents using each company's publicly-ranged values for the merchandise under consideration.[8]

Rate for Non-Responsive Companies

The following five exporters and/or producers of van-type trailers from Mexico did not respond to the quantity and value (Q&V) questionnaire: (1) Commercializadora Nimmka, S.A. de. C.V. d/b/a Atro Remolques y Carrociera (Commercializadora Nimmka); (2) BRD Trailers S.A. de C.V. d/b/a DeLucio (BRD Trailers); (3) Gallegos Trailers (Gallegos); (4) Industrias Kuzzy De Mexico S.A. de C.V. (Industrias Kuzzy); and (5) Manufacturas Industriales Gami S.A. de C.V. (Industriales Gami) (collectively, non-responsive companies). We find that, by not responding to the Q&V questionnaire, these companies withheld necessary information that Commerce requested of them, failed to provide information within the deadlines established and significantly impeded this proceeding. Thus, in reaching our preliminary determination, pursuant to sections 776(a)(1) and (2)(A)–(C) of the Act, we are basing the dumping rate for the non-responsive companies on facts available.

In addition, we preliminary determine that an adverse inference is warranted, pursuant to section 776(b) of the Act. By failing to submit responses to Commerce's Q&V questionnaire, the non-responsive companies did not cooperate to the best of their ability in this investigation. Accordingly, we preliminarily find that an adverse inference is warranted to ensure that the non-responsive companies will not obtain a more favorable result than had they fully complied with our request for information. For more information on the application of adverse facts available (AFA), *see* ''Application of Facts Available, Use of Adverse Inferences, and Corroboration'' in the Preliminary Decision Memorandum.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter Producer	Weighted-average dumping margin (percent)	Cash deposit rate (adjusted for subsidy offset(s)) (percent)
Hyundai de Mexico S.A. de C.V	10.19	[9] 8.35
Utility Trailer Manufacturing de México, S. de R.L. de C.V	3.21	[10] 2.43
Commercializadora Nimmka, S.A. de. C.V. d/b/a Atro Remolques y Carrociera	79.92 *	79.92
BRD Trailers S.A. de C.V. d/b/a DeLucio	79.92 *	79.92
Gallegos Trailers	79.92 *	79.92
Industrias Kuzzy De Mexico S.A. de C.V.	79.92 *	79.92
Manufacturas Industriales Gami S.A. de C.V.	79.92 *	79.92
All Others	8.72	[11] 7.10

* Rate is based on facts available with adverse inferences.

[5] *See Initiation Notice.*

[6] *See* Memorandum, ''Van-Type Trailers and Subassemblies Thereof from Canada, Mexico, and the People's Republic of China: Preliminary Scope Decision Memorandum,'' dated concurrently with this notice (Preliminary Scope Decision Memo).

[7] *Id.* at ''Public Comment'' section.

[8] With two respondents under examination, Commerce normally calculates: (A) a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents; (B) a simple average of the estimated weighted-average dumping margins calculated for the examined respondents; and (C) a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents using each company's publicly-ranged U.S. sales values for the merchandise under consideration. Commerce then compares (B) and (C) to (A) and selects the rate closest to (A) as the most appropriate rate for all other producers and exporters. *See, e.g., Ball Bearings and Parts Thereof from France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed-Circumstances Review, and Revocation of an Order in Part,* 75 FR 53661, 53662 (September 1, 2010), and accompanying Issues and Decision Memorandum at Comment1. As complete publicly ranged sales data were available, Commerce based the all-others rate on the publicly ranged sales data of the mandatory respondents. For a complete analysis of the data, *see* Memorandum, ''Preliminary Calculation of All-Others Rate,'' dated concurrently with this notice (All-Others Memorandum).

[9] The export subsidy rate for HYMEX is 1.84 percent and consists of the following programs: Program for the Manufacturing Industry, Maquiladora and Export Services Program (IMMEX); and Eighth Rule Permit. *See* Memorandum, ''Preliminary Determination Calculations for Hyundai de Mexico S.A. de C.V.,'' dated June 1, 2026.

[10] The export subsidy rate for Utility Mexico is 0.78 percent and consists of the following programs: Program for the Manufacturing Industry, Maquiladora and Export Services Program (IMMEX); and Eighth Rule Permit. *See* Memorandum, ''Preliminary Determination Calculations for Utility Trailer Manufacturing de Mexico, S. de R.L. de C.V.,'' dated June 1, 2026.

[11] *See* All-Others Memorandum.

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) The cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin.

Commerce normally adjusts cash deposits for estimated antidumping duties by the amount of export subsidies countervailed in a companion countervailing duty (CVD) proceeding, when CVD provisional measures are in effect. Accordingly, where Commerce preliminarily made an affirmative determination for countervailable export subsidies, Commerce has offset the estimated weighted-average dumping margin by the appropriate CVD rate. Any such adjusted cash deposit rate may be found in the ''Preliminary Determination'' section above. Should provisional measures in the companion CVD investigation expire prior to the expiration of provisional measures in this LTFV investigation, Commerce will direct CBP to begin collecting estimated antidumping duty cash deposits unadjusted for countervailed export subsidies at the time that the provisional CVD measures expire.

These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Consistent with 19 CFR 351.224(e), Commerce will analyze and, if appropriate, correct any timely allegations of significant ministerial errors by amending the preliminary determination. However, consistent with 19 CFR 351.224(d), Commerce will not consider incomplete allegations that do not address the significance standard under 19 CFR 351.224(g) following the preliminary determination. Instead, Commerce will address such allegations in the final determination together with issues raised in the case briefs or other written comments.

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

Non-scope case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation. Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[12] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[13]

As provided under 19 CFR 351.309(c)(2)(iii) and (d)(2)(iii), we request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[14] Further, we request that interested parties limit their executive summary of each issue to no more than 450 words, not including citations. We intend to use the executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[15]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants and whether any participant is a foreign national; and (3) a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On July 23, 2026, pursuant to 19 CFR 351.210(e), HYMEX requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[16] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporter accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will

[12] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings,* 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Procedures*).

[13] *See* 19 CFR 351.309(c)(2) and (d)(2).

[14] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[15] *See APO and Service Procedures.*

[16] *See* HYMEX's Letter, ''Request for Postponement of Final AD Determination,'' dated July 23, 2026.

make its final determination no later than 135 days after the date of publication of this preliminary determination.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: July 29, 2026.

Christopher Abbott,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by this investigation consists of certain van-type trailers and subassemblies thereof, whether finished or unfinished, whether assembled or unassembled, regardless of the number of axles, for carriage of goods. Van-type trailers are typically, but not limited to, rectangular cuboid trailers with a fully enclosed cargo space consisting of a front nose (with or without a refrigeration unit), side walls (with or without doors), movable rear panels (whether roll-up doors, swing doors, or another configuration), a floor and subframe, an affixed or removable roof, a suspension and axle system, wheels and tires, brakes, a lighting and electrical system, landing gear, and coupling for towing behind a truck tractor or a connection system for training behind another van-type trailer. Covered van-type trailers are those with a gross vehicle weight rating of greater than 26,000 pounds.

Subject merchandise includes, but is not limited to, the following subassemblies:

- Van-type trailer subframes, or sections of van-type trailer frames, typically consisting of welded crossmembers and slider rails for attaching the running gear;
- Nose wall, side wall, and roof subassemblies, whether insulated or non insulated, and with or without top, bottom, or side rails;
- Rear door frame, whether for swing or roll-up doors, with or without installed doors, bumpers, bumper plates, or reinforcing plates for liftgate;
- Door assemblies, whether for rear swing doors, roll-up doors, side doors or any other configuration, with or without lockrods, handles, hinges, or hinge pins;
- Rear impact guard subassemblies, typically consisting of a fabricated horizontal structural component (such as a guard tube) and uprights for connection to the underside of the rear frame;
- Coupler assembly for connection to truck tractor's fifth wheel, typically consisting of main beams and cross members, support plates, and front nose wrap, and with or without kingpin installed;
- Running gear subassemblies or axle assemblies for connection to the subframe, which may or may not include suspension(s), wheel end components, slack adjusters, dressed axles, brake chambers, locking pins, wheels, and tires; and
- Landing gear subassemblies, typically consisting of two landing legs, a cross channel, braces, bracketing, a cross shaft, and a crank handle.

These subassemblies are subject to the investigation, whether entered alone or with other subassemblies and whether assembled or unassembled and whether finished or unfinished. The absence of any subassembly from an otherwise finished or unfinished van-type trailer does not remove the van-type trailer from coverage.

Subject merchandise also includes components entered with (*i.e.,* on the same bill of lading as) van-type trailers and subassemblies, such as, but not limited to: hub and drum assemblies, brake assemblies (either drum or disc), bare axles, brake chambers, suspensions and suspension components, wheel end components, landing gear legs, wheels, tires, brake control systems, electrical harnesses and lighting systems, lift gate systems, tire inflation systems, or refrigeration units (with or without evaporators or fuel tanks) whether assembled or unassembled, whether as part of a kit or not, and whether or not accompanied by additional components that constitute as part of an unfinished and/or unassembled van-type trailer and subassemblies thereof that are subject to the investigation.

Processing of finished and unfinished van-type trailers and subassemblies, such as trimming, cutting, grinding, notching, punching, drilling, painting, coating, staining, finishing, assembly, or any other processing either in the country of manufacture of the in-scope product or in a third country does not remove the product from the scope. Inclusion of other components not identified as comprising the finished or unfinished van-type trailer does not remove the product from the scope.

Specifically excluded are subassemblies covered by the scope of the antidumping and countervailing duty orders on certain chassis and subassemblies thereof from the People's Republic of China. *See Certain Chassis and Subassemblies Thereof from the People's Republic of China: Antidumping Duty Order,* 86 FR 36093 (July 8, 2021) and *Certain Chassis and Subassemblies Thereof From the People's Republic of China: Countervailing Duty Order and Amended Final Affirmative Countervailing Duty Determination,* 86 FR 24844 (May 10, 2021).

The finished and unfinished van-type trailers subject to the investigation are typically classified in the Harmonized Tariff Schedule of the United States (HTSUS) at subheadings: 8716.39.0040, 8716.39.0090 and 8716.90.5060. Imports of finished and unfinished subassemblies may also enter under HTSUS subheadings 7308.30.5050, 7308.90.9590, 7326.90.8688, 8708.29.1500, 8708.99.8180, 8716.90.5010. While the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise under investigation is dispositive.

Large Diameter Welded Pipe From the Republic of Korea: Preliminary Results and Rescission, in Part, of Countervailing Duty Administrative Review; 2024

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that countervailable subsidies were provided to producers and exporters of large diameter welded pipe (welded pipe) from the Republic of Korea (Korea). The period of review (POR) is January 1, 2024, through December 31, 2024. In addition, Commerce is rescinding this review, in part, with respect to 16 companies. Interested parties are invited to comment on these preliminary results of review.

DATES: Applicable August 4, 2026.

FOR FURTHER INFORMATION CONTACT: Jonathan Schueler or Brandon James, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington,

DC 20230; telephone: (202) 482–9175 and (202) 482–7472.

SUPPLEMENTARY INFORMATION:

Background

On May 2, 2019, Commerce published a countervailing duty (CVD) order on LDWP from Korea.[1] On June 25, 2025, based on timely requests for review, in accordance with 19 CFR 351.221(c)(1)(i), Commerce initiated an administrative review of the *Order.*[2] On September 5, 2025, Commerce selected Hyundai Steel Pipe Co., Ltd. (HSP) and SeAH Steel Corporation (SeAH Steel) as the mandatory respondents in this review.[3]

Due to the lapse in appropriations and Federal Government shutdown, on November 14, 2025, Commerce tolled all deadlines in administrative proceedings by 47 days.[4] Additionally, due to a backlog of documents that were electronically filed via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS) during the Federal Government shutdown, on November 24, 2025, Commerce tolled all deadlines in administrative proceedings by an additional 21 days.[5] On February 18, 2026, Commerce extended the deadline for issuing these preliminary results by 90 days.[6] On June 10, 2026, Commerce extended the deadline for issuing these preliminary results by an additional 21 days, until June 29, 2026.[7]

For a complete description of the events that followed the initiation of this review, *see* the Preliminary Decision Memorandum.[8] A list of topics included in the Preliminary Decision Memorandum is provided in Appendix I. The Preliminary Decision Memorandum is a public document and is on file electronically via ACCESS. ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/frnotices.*

Scope of the Order

The product covered by the *Order* is welded pipe from Korea. For a complete description of the scope of the *Order, see* the Preliminary Decision Memorandum.

Rescission of Administrative Review, In Part

Pursuant to 19 CFR 351.213(d)(1), Commerce will rescind an administrative review, in whole or in part, if all parties that requested the review withdraw their requests within 90 days of the date of publication of the notice of initiation. As noted above, Commerce received timely-filed withdrawal requests with respect to the following companies, and no other parties requested a review of these companies: (1) Hansol Metal Co., Ltd.; (2) Il Jin Nts Co., Ltd.; (3) Iljin Nts Co. Ltd.; (4) Kem Solutions Co., Ltd.; and (5) POSCO International Corporation.[9] Therefore, we are rescinding this administrative review with respect to these companies, pursuant to 19 CFR 351.213(d)(1).

Pursuant to 19 CFR 351.213(d)(3), it is Commerce's practice to rescind an administrative review of a countervailing duty order where it concludes that there were no suspended entries of subject merchandise during the POR.[10] Normally, upon completion of an administrative review, the suspended entries are liquidated at the CVD assessment rate calculated for the POR.[11] Therefore, for an administrative review to be conducted, there must be a reviewable, suspended entry that Commerce can instruct U.S. Customs and Border Protection (CBP) to liquidate at the CVD assessment rate calculated for the POR.[12] Commerce notified all interested parties of its intent to rescind this administrative review regarding the companies listed in Appendix II.[13] No party commented on this memorandum. In the absence of any suspended entries of subject merchandise from these companies during the POR, we are rescinding this administrative review for the companies listed in Appendix II, in accordance with 19 CFR 351.213(d)(3).

Methodology

Commerce is conducting this administrative review in accordance with 751(a)(1)(A) of the Tariff Act of 1930, as amended (the Act). For each of the subsidy programs found countervailable, Commerce preliminarily determines that there is a subsidy, *i.e.,* a financial contribution by an ''authority'' that gives rise to a benefit to the recipient, and that the subsidy is specific.[14] For a full description of the methodology underlying our conclusions, *see* the Preliminary Decision Memorandum.

Rate for Non-Individually Examined Companies

There are nine companies for which a review was requested and Commerce does not intend to rescind review, which had reviewable entries, and which were not selected as mandatory respondents or found to be cross-owned with a mandatory respondent (*see* Appendix III). The Act does not address the establishment of a rate to apply to companies not selected for individual examination when Commerce limits its examination in an administrative review pursuant to section 777A(e)(2) of the Act. However, Commerce's regulation at 19 CFR 351.109(g) states that Commerce will determine the rate for non-selected companies by following the process set forth in 19 CFR 351.109(f)(1)–(2), which generally parallels the process for determining the all-others rate in an investigation under section 705(c)(5) of the Act. Section 705(c)(5)(A) of the Act

and 19 CFR 351.109(f) state that for companies not investigated, in general, we will determine an all-others rate by weight averaging the countervailable subsidy rates established for each of the companies individually investigated, excluding zero and *de minimis* rates or any rates based entirely on facts available.

Accordingly, to determine the rate for companies not selected for individual examination, Commerce's practice is to weight-average the net subsidy rates for the selected mandatory respondents, excluding rates that are zero, *de minimis,* or based entirely on facts available.[15] For these preliminary results, because the rate calculated for SeAH Steel is *de minimis*, we are preliminarily assigning to the companies under review that were not selected for individual examination a countervailable subsidy rate based on the rate calculated for HSP.

Preliminary Results of Review

In accordance with 19 CFR 351.221(b)(4)(i), we preliminarily determine the following net countervailable subsidy rates exist for the POR, January 1, 2024, through December 31, 2024:

Company	Subsidy rate (percent *ad valorem*)
Hyundai Steel Pipe Co., Ltd[16].	1.00.
SeAH Steel Corporation[17]	0.27 (*de minimis*).
Non-Selected Companies Receiving a Review-Specific Rate[18].	1.00.

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties for these preliminary results within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(3) of the Act, Commerce intends to verify the information relied upon in making its final results.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this review. Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[19] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[20] All briefs must be filed electronically using ACCESS. An electronically filed document must be received successfully in its entirety in ACCESS by 5:00 p.m. Eastern Time on the established deadline.

As provided under 19 CFR 351.309(c)(2)(iii) and (d)(2)(iii), we request that interested parties provide at the beginning of their briefs a public executive summary for each issue raised in their briefs.[21] Further, we request that interested parties limit their executive summary of each issue to no more than 450 words, not including citations. We intend to use the executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final results in this administrative review. We request that interested parties include footnotes for relevant citations in the executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[22]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via ACCESS by 5:00 p.m. Eastern Time within 30 days after the date of publication of this notice. Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants and whether any participant is a foreign national; and (3) a list of issues to be discussed. Oral presentations at the hearing will be limited to issues raised in the briefs. If a request for a hearing is made, Commerce will inform parties of the scheduled date for the hearing.[23]

Assessment Rates

Consistent with section 751(a)(1) of the Act and 19 CFR 351.212(b)(2), upon issuance of the final results, Commerce shall determine, and U.S. Customs and Border Protection (CBP) shall assess, countervailing duties on all appropriate entries covered by this review.

For the companies with respect to which the review is being rescinded, Commerce will instruct CBP to assess countervailing duties on all appropriate entries at a rate equal to the cash deposit of estimated countervailing duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). Commerce intends to issue rescission instructions to CBP no earlier than 35 days after the date of publication of this notice in the **Federal Register**.

Commerce intends to issue assessment instructions to CBP regarding HSP, SeAH Steel, and the companies listed in Appendix III no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

Pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.107(e), Commerce intends to instruct CBP to collect cash deposits of estimated countervailing duties with regard to shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this review, as follows: (1) the cash deposit rate for the companies listed above will be equal to the company-specific estimated individual countervailable subsidy rates determined in the final results of this review, except if the rate is less than 0.50 percent and, therefore, *de minimis* within the meaning of 19 CFR 351.106(c)(1), in which case the cash deposit rate will be zero; (2) if both the producer and exporter of the subject

[15] *See, e.g., Certain Pasta from Italy: Final Results of the 13th (2008) Countervailing Duty Administrative Review,* 75 FR 37386, 37387 (June 29, 2010).

[16] As discussed in the Preliminary Decision Memorandum, Commerce has found the following company to be cross-owned with HSP: Hyundai Steel Company.

[17] As discussed in the Preliminary Decision Memorandum, Commerce has found the following company to be cross-owned with SeAH Steel: SeAH Steel Holdings Corporation.

[18] *See* Appendix III for a list of the non-selected companies under review.

[19] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings,* 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Procedures*).

[20] *See* 19 CFR 351.309(c)(2) and (d)(2).

[21] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[22] *See APO and Service Procedures.*

[23] *See* 19 CFR 351.310(d).

merchandise have company-specific estimated subsidy rates assigned, and their rates differ, then the applicable cash deposit rate will be the higher of these two rates; (3) if either the producer or the exporter, but not both, of the subject merchandise has a company-specific estimated subsidy rate assigned, the applicable cash deposit rate will be that company's company-specific rate; and (4) the cash deposit rate for all other producers and exporters will be continue to be 9.29 percent, the all-others subsidy rate established in the investigation.[24] These cash deposit instructions, when imposed, shall remain in effect until further notice.

Final Results of Review

Unless the deadline is extended, Commerce intends to issue the final results of this administrative review, which will include the results of Commerce's analysis of the issues raised in the case briefs, within 120 days of publication of these preliminary results in the **Federal Register**, pursuant to section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(1).

Notification to Interested Parties

We are issuing and publishing these preliminary results in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(4).

Dated: July 29, 2026.

Christopher Abbott,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Non-Refillable Steel Cylinders From the People's Republic of China: Final Results of the Expedited Sunset Review of the Countervailing Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) finds that revocation of the countervailing duty (CVD) order on non-refillable steel cylinders (non-refillable cylinders) from the People's Republic of China (China) would be likely to lead to continuation or recurrence of countervailable subsidies at the levels indicated in the ''Final Results of the Sunset Review'' section of this notice.

DATES: Applicable August 4, 2026.

FOR FURTHER INFORMATION CONTACT: Peter Zukowski, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0189.

SUPPLEMENTARY INFORMATION:

Background

On May 11, 2021, Commerce published the *Order* on non-refillable cylinders from China.[1] On April 1, 2026, Commerce published the notice of initiation of the first sunset review of the *Order,* pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act) and 19 CFR 351.218(c)(2).[2] On April 15, 2026, Commerce received a notice of intent to participate from Worthington Enterprises, Inc. (the domestic interested party), within the deadline specified in 19 CFR 351.218(d)(1)(i).[3] The domestic interested party claimed interested party status under section 771(9)(C) of the Act and 19 CFR 351.102(b)(29)(v) as a U.S. producer of the domestic like product.

On May 1, 2026, Commerce received an adequate substantive response from the domestic interested party within the 30-day deadline specified in 19 CFR 351.218(d)(3)(i).[4] Commerce did not receive a substantive response from any government or respondent interested party to this proceeding. On May 20, 2026, Commerce notified the U.S. International Trade Commission that it did not receive an adequate substantive response from respondent interested parties.[5] As a result, Commerce conducted an expedited (120-day) sunset review of the *Order,* pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(B)(2) and (C)(2).

Scope of the Order

The product covered by this *Order* is non-refillable cylinders from China. For a complete description of the scope of the *Order, see* the Issues and Decision Memorandum.[6]

[1] *See Certain Non-Refillable Steel Cylinders from the People's Republic of China: Amended Final Antidumping Duty Determination and Antidumping and Countervailing Duty Orders,* 86 FR 25839 (May 11, 2021) (*Order*).

[2] *See Initiation of Five-Year (Sunset) Reviews,* 91 FR 16181 (April 1, 2026).

[3] *See* Domestic Interested Party's Letter, ''Petitioners Notice of Intent to Participate,'' dated April 15, 2026.

[4] *See* Domestic Interested Party's Letter, ''Petitioner's Substantive Response to the Notice of Initiation,'' dated May 1, 2026.

[5] *See* Commerce's Letter, ''Sunset Reviews Initiated on April 1, 2026,'' dated May 20, 2026.

[6] *See* Memorandum, ''Issues and Decision Memorandum for the Final Results of the Expedited First Sunset Review of the Countervailing Duty Order on Non-Refillable Steel Cylinders from the People's Republic of China,'' dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

Analysis of Comments Received

A complete discussion of all issues raised in this sunset review, including the likelihood of continuation or recurrence of subsidization and the countervailable subsidy rates likely to prevail if the *Order* were to be revoked, is provided in the Issues and Decision Memorandum. A list of the topics discussed in the Issues and Decision Memorandum is attached as an appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS), which is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed at *https://access.trade.gov/frnotices.*

Final Results of Sunset Review

Pursuant to sections 751(c) and 752(b) of the Act, we determine that revocation of the *Order* would be likely to lead to continuation or recurrence of countervailable subsidies at the following net countervailable subsidy rates:

Producers/Exporters	Net countervailable subsidy rate (percent *ad valorem*)
Ningbo Eagle Machinery & Technology Co., Ltd	25.91
Wuyi Xilinde Machinery Manufacture Co., Ltd	18.37
Jiangsu Kasidi Chemical Machinery Co., Ltd	186.18
Jinhua Sinoblue Machinery Manufacturing Co., Ltd	186.18
Ningbo Runkey CGA Cylinders Co., Ltd	186.18
Ninhua Group Co., Ltd	186.18
Shanghai Ronghua High-Pressure Vessel Co., Ltd	186.18
Zhejiang Ansheng Mechanical Manufacture Co., Ltd	186.18
Zhejiang Nof Chemical Co., Ltd	186.18
All Others	21.28

Administrative Protective Order (APO)

This notice also serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

Commerce is issuing and publishing these final results and this notice in accordance with sections 751(c), 752(b), and 777(i)(1) of the Act, and 19 CFR 351.218.

Dated: July 30, 2026.

Scot Fullerton,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Chassis and Subassemblies Thereof From the People's Republic of China: Final Results of the Expedited First Sunset Review of the Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) finds that revocation of the antidumping duty (AD) order on chassis and subassemblies thereof from the People's Republic of China (China) would be likely to lead to continuation or recurrence of dumping, at the levels indicated in the ''Final Results of Sunset Review'' section of this notice.

DATES: Applicable August 4, 2026.

FOR FURTHER INFORMATION CONTACT: Blair Hood, Operations Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: 202–482–832.

SUPPLEMENTARY INFORMATION:

Background

On July 8, 2021, Commerce published the *Order* in the **Federal Register**.[1] On April 1, 2026, Commerce published the notice of initiation of this first sunset review of the *Order,* pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).[2] On April 16, 2026, Commerce received a timely and complete notice of intent to participate in the sunset review for the domestic interested party[3] within the deadline specified in the 19 CFR 351.218(d)(1)(i).[4] The domestic interested party claimed interested party status within the meaning of section 771(9)(F) of the Act as a coalition of U.S. producers of the domestic like product.[5] On April 23, 2026, Commerce notified the U.S. International Trade Commission (ITC) that it had received a notice of intent to participate from the domestic interested party.[6]

On May 1, 2026, pursuant to 19 CFR 351.218(d)(3)(i), the domestic interested party filed a timely and adequate substantive response.[7] Commerce did not receive a substantive response from any respondent interested party. As a result, pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2), Commerce is conducting an expedited (120-day) sunset review of the *Order.*

Scope of the Order

The product covered by these *Order* is chassis and subassemblies thereof from China. For the full description of the scope of the *Order, see* the Issues and Decisions Memorandum.[8]

Analysis of Comments Received

A complete discussion of all issues raised in this sunset review, including

[1] *See Certain Chassis and Subassemblies Thereof from the People's Republic of China: Antidumping Duty Order,* 86 FR 36093 (July 8, 2021) *(Order).*

[2] *See Initiation of Five-Year (Sunset) Reviews,* 91 FR 16181 (April 1, 2026).

[3] The domestic interested party is the Coalition of American Chassis Manufacturers comprised of the following: Cheetah Chassis Corporation, Hercules Enterprises, LLC, Pitts Enterprises, Inc., Pratt Industries, Inc. and Stoughton Trailers, LLC.

[4] *See* Domestic Interested Party's Letter, ''Chassis and Subassemblies Thereof from the People's Republic of China: Notice of Intent to Participate in Sunset Review,'' dated April 6, 2026.

[5] *Id.* at 2.

[6] *See* Commerce's Letter, ''Sunset Reviews Initiated on April 1, 2026,'' dated April 23, 2026.

[7] *See* Domestic Interested Party's Letter, ''Chassis and Subassemblies Thereof from the People's Republic of China: Substantive Response to Notice of Initiation,'' dated May 1, 2026.

[8] *See* Memorandum, ''Issues and Decision Memorandum for the Final Results of the Expedited First Sunset Review of the Antidumping Duty Order on Chassis and Subassemblies Thereof from the People's Republic of China,'' dated concurrently with, and hereby adopted by, this notice.

the likelihood of continuation or recurrence of dumping in the event of revocation of the *Order* and the magnitude of the margins likely to prevail if the *Order* were to be revoked, is provided in the accompanying Issues and Decision Memorandum.[9] A list of the topics discussed in the Issues and Decision Memorandum can be found in the appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be directly accessed at *https://access.trade.gov/frnotices.*

Final Results of Sunset Review

Pursuant to sections 751(c)(1), 752(c)(1) and (3) of the Act, Commerce determines that revocation of the *Order* would be likely to lead to continuation or recurrence of dumping, and that the magnitude of the dumping margins likely to prevail would be weighted-average dumping margins up to 188.05 percent.

Notification Regarding Administrative Protective Orders

This notice also serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of the return or destruction of APO materials, or conversion to judicial protective, orders is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

We are issuing and publishing these final results in accordance with sections 751(c), 752(c), and 777(i)(1) of the Act, and 19 CFR 351.218 and 19 CFR 351.221(c)(5)(ii).

Dated: July 30, 2026.

Scot Fullerton,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to U.S. Army Corps of Engineers Bonneville Lock 1 Bridge Replacement Project on the Columbia River in Oregon

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of two incidental harassment authorizations.

SUMMARY: In accordance with regulations implementing the Marine Mammal Protection Act (MMPA) as amended, notification is hereby given that NMFS has issued two consecutive incidental harassment authorizations (IHAs) to U.S. Army Corps of Engineers for authorization to take marine mammals incidental to Year 1 and Year 2 of the Bonneville Lock 1 Bridge Replacement Project (BLBR Project) on the Columbia River in Oregon.

DATES: The Year 1 IHA is effective from December 1, 2027, through November 30, 2028. The Year 2 IHA is effective for 1 year from the date of notification by the IHA-holder, not to exceed 1 year from the date of expiration of the Year 1 IHA.

ADDRESSES: Electronic copies of the application and supporting documents, as well as a list of the references cited in this document, may be obtained online at: *https://www.fisheries.noaa.gov/action/incidental-take-authorization-us-army-corps-engineers-bonneville-lock-1-bridge-replacement.* In case of problems accessing these documents, please call the contact listed below.

FOR FURTHER INFORMATION CONTACT: Austin Demarest, Office of Protected Resources, NMFS, (301) 427–8401.

SUPPLEMENTARY INFORMATION:

MMPA Background and Determinations

The MMPA prohibits the ''take'' of marine mammals, with certain exceptions. Among the exceptions is section 101(a)(5)(D) of the MMPA (16 U.S.C. 1361 *et seq.*) which directs the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking by harassment of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and the public has an opportunity to comment on the proposed IHA.

Specifically, NMFS shall issue an IHA if it finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). Further, NMFS must prescribe the permissible methods of taking and other ''means of effecting the least [practicable] adverse impact'' on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stocks for taking for certain subsistence uses (referred to here as ''mitigation''). NMFS must also prescribe requirements pertaining to the monitoring and reporting of such takings. The definitions of key terms, such as ''take,'' ''harassment,'' and ''negligible impact,'' can be found in the MMPA and the NMFS' implementing regulations (see 16 U.S.C. 1362; 50 CFR 216.103).

On June 26, 2026, a notice of NMFS' proposal to issue two consecutive IHAs to the U.S. Army Corps of Engineers (USACE) for take of marine mammals incidental to the BLBR Project on the Columbia River in Oregon was published in the **Federal Register** (91 FR 38676). In that notice, NMFS indicated the estimated numbers, types, and methods of incidental take proposed for each species or stock, as well as the mitigation, monitoring, and reporting measures that would be required should the two IHAs be issued. The **Federal Register** notice also included analysis to support NMFS' preliminary conclusions and determinations that each IHA, if issued, would satisfy the requirements of section 101(a)(5)(D) of the MMPA for issuance of the IHAs. The **Federal Register** notice included web links to a draft IHAs for review, as well as other supporting documents.

No comments were received during the public comment period. There are no changes to the specified activity, the species taken, the proposed numbers, type, or methods of take, or the mitigation, monitoring, or reporting measures in the proposed IHA. No new information that would change any of the preliminary analyses, conclusions, or determinations in the proposed IHAs has become available since that notice was published, and therefore, the preliminary analyses, conclusions, and determinations included in the notice of proposed IHAs are considered final.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216–6A, NMFS must review our proposed action (*i.e.,* the issuance of an IHA) with respect to potential impacts on the human environment.

This action is consistent with categories of activities identified in Categorical Exclusion B4 (IHAs with no anticipated serious injury or mortality) of the Companion Manual for NAO 216–6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion. Accordingly, NMFS has determined that the issuance of these two consecutive IHAs qualifies for categorical exclusion from further NEPA review.

Endangered Species Act

Section 7(a)(2) of the Endangered Species Act of 1973 (ESA; 16 U.S.C. 1531 *et seq.*) requires that each Federal agency ensures that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally whenever we propose to authorize take of endangered or threatened species.

No incidental take of ESA-listed species is authorized or expected to result from these activities. Therefore, NMFS has determined that consultation under section 7 of the ESA is not required for this action.

Authorization

Accordingly, consistent with the requirements of section 101(a)(5)(D) of the MMPA, NMFS has issued two consecutive IHAs to USACE for authorization to take marine mammals incidental to the BLBR Project on the Columbia River in Oregon.

Dated: July 30, 2026.

[RTID 0648–XF905]

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public webinar of its Joint Herring Committee and Advisory Panel to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This webinar will be held on Tuesday, August 18, 2026, at 1:30 p.m. EDT. Webinar registration URL information: *https://nefmc-org.zoom.us/meeting/register/gYfhUTDqQWy0sc3ANOueQA.*

ADDRESSES: *Council address:* New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Cate O'Keefe, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Atlantic Herring Committee and Advisory Panel will meet jointly to discuss Atlantic herring specifications for 2027–2031. They will also make recommendations to the Committee or Council as appropriate. Other business will be discussed if necessary.

Although non-emergency issues not contained on the agenda may come before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Cate O'Keefe, Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date.

(Authority: 16 U.S.C. 1801 *et seq.*)

Dated: July 31, 2026.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Certificate of Alternate Compliance for the Landing Craft Utility Vessel 1710 Class (LCU 1710 Through LCU 1721)

AGENCY: Department of the Navy, Department of Defense.

ACTION: Notice of issuance of certificate of alternate compliance.

SUMMARY: The U.S. Navy hereby announces that a Certificate of Alternate Compliance has been issued for Landing Craft Utility Vessel 1710 Class (LCU 1710 through LCU 1721). Due to the special construction and purpose of each vessel of this class, the Admiralty Counsel of the Navy has determined that each vessel of this class is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with the navigation lights provisions of the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS) without interfering with its special function as a naval ship. The intended effect of this notice is to warn mariners in waters where 72 COLREGS apply.

DATES: This Certificate of Alternate Compliance is effective August 4, 2026 and is applicable beginning November 14, 2025.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Jeffrey M. Larson, JAGC, U.S. Navy, Office of the Judge Advocate General, Admiralty and

Claims Division (Code 15A), 1322 Patterson Ave. SE, Suite 3000, Washington Navy Yard, DC 20374–5066, 202–685–5040, or *admiralty@us.navy.mil.*

SUPPLEMENTARY INFORMATION:

Background and Purpose.

Executive Order (E.O.) 11964 (42 FR 4327; January 19, 1977) and 33 U.S.C. 1605 provide that the requirements of the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), as to the number, position, range, or arc of visibility of lights or shapes, as well as to the disposition and characteristics of sound-signaling appliances, shall not apply to a vessel or class of vessels of the Navy where the Secretary of the Navy shall find and certify that, by reason of special construction or purpose, it is not possible for such vessel(s) to comply fully with the provisions without interfering with the special function of the vessel(s). Notice of issuance of a Certificate of Alternate Compliance must be made in the **Federal Register**.

In accordance with 33 U.S.C. 1605, the Admiralty Counsel of the Navy, under authority delegated by the Secretary of the Navy, hereby finds and certifies that the LCU 1710 Class (LCU 1710—LCU 1721) are vessels of special construction or purpose, and that, with respect to the position of the following navigational lights, it is not possible to comply fully with the requirements of the provisions enumerated in the 72 COLREGS without interfering with the special function of the vessel:

Annex I, paragraph 2(a)(i), pertaining to the vertical position of the forward masthead light; Annex I, paragraph 2(a)(ii), pertaining to the vertical separation between forward and aft masthead lights; Annex I, paragraph 2(i)(iii), pertaining to equal spacing of vertically aligned lights; Annex I, paragraph 2(f), pertaining to the vertical positioning of all-round lights; Annex I, paragraph 2(i)(i), pertaining to the spacing and height of vertical light arrays; Annex I, paragraph 3(a), pertaining to the horizontal separation of masthead lights. The Admiralty Counsel of the Navy further finds and certifies that these navigational lights are in closest possible compliance with the applicable provisions of the 72 COLREGS.

(Authority: 33 U.S.C. 1605(c), E.O. 11964.)

Dated: July 31, 2026.

M.A. Tabach,

Lieutenant Commander, Judge Advocate General's Corps, U.S. Navy, Federal Register Liaison Officer.

[Docket No. CP26–536–000]

Texas Gas Transmission, LLC; Notice of Schedule for the Preparation of an Environmental Assessment for the Dearborn County Lateral Project

On May 29, 2026, Texas Gas Transmission, LLC (Texas Gas) filed an application in Docket No. CP26–536–000 requesting a Certificate of Public Convenience and Necessity pursuant to Section 7(c) of the Natural Gas Act to construct and operate certain natural gas pipeline facilities. The proposed project is known as the Dearborn County Lateral Project (Project) and would entail Texas Gas constructing and operating a new interstate natural gas pipeline and associated aboveground facilities in Indiana, Kentucky, and Ohio to deliver up to 265,000 dekatherms per day of firm natural gas transportation service to Vistra Corp.'s Miami Fort Power Plant in Hamilton County, Ohio, supporting the plant's planned conversion from coal-fueled to natural-gas-fueled generation.

On June 12, 2026, the Federal Energy Regulatory Commission (Commission or FERC) issued its Notice of Application for the Project. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization within 90 days of the date of issuance of the Commission staff's environmental document for the Project.

This notice identifies Commission staff's intention to prepare an environmental assessment (EA) for the Project and the planned schedule for the completion of the environmental review.[1] The EA will be issued for a 30-day comment period.

Schedule for Environmental Review

Issuance of EA, January 15, 2027.

90-day Federal Authorization Decision Deadline[2], April 15, 2027.

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the Project's progress.

Project Description

The Dearborn County Lateral Project would consist of the following new facilities:

- an approximately 11.8-mile-long, 20-inch-diameter natural gas pipeline beginning in Dearborn County, Indiana and terminating in Hamilton County, Ohio;
- tie-in piping, a pig launcher, and associated infrastructure to connect the new lateral to the existing Texas Gas 26-inch-diameter Mainline System in Dearborn County, Indiana;
- a new measurement and flow control station and associated infrastructure in Dearborn County, Indiana; and
- a new pig receiver and associated infrastructure at the terminus of the pipeline in Hamilton County, Ohio.

Background

On June 26, 2026, the Commission issued a *Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Dearborn County Lateral Project* (Notice of Scoping). The Notice of Scoping was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers. In response to the Notice of Scoping and the Commission's Notice of Application for the Project, the Commission received comments from county officials, state legislators, and some potentially affected landowners. The Boone County Fiscal Court expressed confusion regarding the rationale for routing the Project through Boone County, noting that the route appears circuitous and would require two crossings of the Ohio River, and requested that any construction within the county be conducted in the least impactful manner possible while stating its opposition to the use of eminent domain. The Commission also received letters of support for the Project from Ohio State Senator Louis W. Blessing III and Ohio State Representative Mike Odioso.

The primary issues raised by landowners relate to the routing of the Project across their private properties. Concerns include impacts on farming operations, maple syrup and honey production, woodland resources, groundwater and drinking-water springs, stocked ponds and outflow structures, farmland privacy, and property values. Commenters also raised concerns regarding the need for the Project; cumulative impacts; effects on soil, water, and vegetation resources; impacts on special-status species; the use of eminent domain; and the potential for increased trespassing along the right-of-way. All substantive environmental comments will be addressed in the EA.

Additional Information

In order to receive notification of the issuance of the EA and to keep track of formal issuances and submittals in specific dockets, the Commission offers a free service called eSubscription. This service provides automatic notification of filings made to subscribed dockets, document summaries, and direct links to the documents. Go to *https://www.ferc.gov/ferc-online/overview* to register for eSubscription.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502–6595 or *OPP@ferc.gov*.

Additional information about the Project is available from the FERC website (*www.ferc.gov*). Using the ''eLibrary'' link, select ''General Search'' from the eLibrary menu, enter the selected date range and ''Docket Number'' excluding the last three digits (*i.e.,* CP26–536), and follow the instructions. For assistance with access to eLibrary, the helpline can be reached at (866) 208–3676, TTY (202) 502–8659, or at *FERCOnlineSupport@ferc.gov.* The eLibrary link on the FERC website also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rule makings.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. AD26–7–000]

PJM Governance and Stakeholder Reforms; Notice Requesting Post-Conference Comment

On July 23, 2026, the Federal Energy Regulatory Commission (Commission) convened a Chairman and Commissioner-led technical conference to discuss PJM Interconnection, L.L.C.'s (PJM) governance and stakeholder processes, with a particular focus on identifying and evaluating concrete, actionable reforms to improve PJM's ability to address operational and market needs in a timely and efficient manner.

All interested persons are invited to file post-conference comments to address issues raised during the conference that they believe would benefit from further discussion. Parties are also invited to provide comments on the questions presented in the conference agenda.[1]

Commenters may reference material previously filed in this docket but are encouraged to avoid repetition or replication of previous material. In addition, commenters are encouraged, when possible, to provide examples and evidence in support of their answers. In addition, commenters are to fill out the issues list found in the appendix. We also encourage commenters to avoid discussing the merits of any contested, pending proceeding before the Commission.[2] Comments must be submitted on or before Friday, August 21, 2026.

A future notice will issue in this proceeding establishing a forum for an Alternative Dispute Resolution (ADR) process that will commence on September 1, 2026. That notice will provide additional details regarding ADR registration, participation logistics, and scope of issues and discussion topics informed by the record developed at the PJM technical conference.

Comments may be filed electronically via the internet.[3] Instructions are available on the Commission's website *http://www.ferc.gov/docs-filing/efiling.asp.* For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov* or toll free at 1–866–208–3676, or for TTY, (202) 502–8659. Although the Commission strongly encourages electronic filing, documents may also be paper-filed. To paper-file, submissions sent via the U.S. Postal Service must be addressed to: Federal Energy Regulatory Commission, Office of the Secretary, 888 First Street NE, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Federal Energy Regulatory Commission, Office of the Secretary, 12225 Wilkins Avenue, Rockville, MD 20852.

To stay apprised of issuances in this docket, there is an ''eSubscription'' link on the Commission's website that enables subscribers to receive email notification when a document is added to a subscribed docket(s). Information about this technical conference is available on the conference web page.[4]

For further information about this Notice, please contact:

Alandro Valdez, Office of Technical Reporting and Economics, (202) 502–8986, *Alandro.Valdez@ferc.gov.*

Emmett Barnes, Office of the General Counsel, (202) 502–8413, *Emmett.Barnes@ferc.gov.*

ADR Helpline, *ferc.adr@ferc.gov.*

(Authority: 16 U.S.C. 825h.)

Dated: July 30, 2026.

Debbie-Anne A. Reese,

Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–13503–01–OAR]

Administration of Cross-State Air Pollution Rule Trading Program Assurance Provisions for 2025 Control Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of data availability.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is providing notice of the availability of data on the administration of the assurance provisions of the Cross-State Air Pollution Rule (CSAPR) trading program for the 2025 control period. Virginia units participating in the CSAPR NO_X Ozone Season Group 2E Trading Program during the 2025 control period reported total nitrogen oxides (NO_X) emissions that exceeded the State's assurance level under the program. The EPA has posted on the Agency's website a spreadsheet that presents data demonstrating the exceedance and the Agency's preliminary calculations of the additional allowances that owners and operators of certain Virginia units must surrender. The EPA will consider timely objections to the data and calculations before making final determinations of the additional allowances that owners and operators of certain Virginia units must surrender.

DATES: The EPA must receive any objections to the information referenced

[1] *See Third Supplemental Notice of Commissioner-Led Technical Conference,* Docket No. AD26–7–000 (July 16, 2026).

[2] *See* 18 CFR 385.2201(b) (2025); *see also Third Supplemental Notice of Commissioner-Led Technical Conference,* Docket No. AD26–7–000 (July 16, 2026) (listing pending proceedings).

[3] *See* 18 CFR 385.2001(a)(1)(iii).

[4] *https://www.ferc.gov/news-events/events/PJM-Governance-Stakeholder-Reforms.*

in this notice on or before September 3, 2026.

ADDRESSES: Submit your objections via email to *CSAPR@epa.gov.* Include ''2025 CSAPR Assurance Provisions'' in the email subject line and include your name, title, affiliation, address, phone number, and email address in the body of the email.

FOR FURTHER INFORMATION CONTACT: For information about this notice, contact Lisa Thompson at telephone number: (919) 541–5158 or email address: *thompson.lisa@epa.gov.*

SUPPLEMENTARY INFORMATION: *Preamble acronyms and abbreviations.* Throughout this document, the use of ''we,'' ''us,'' or ''our'' refers to the EPA. The EPA uses multiple acronyms and terms in this preamble. While this list may not be exhaustive, to ease the reading of this preamble and for reference purposes, the EPA defines the following terms and acronyms here:

CFR Code of Federal Regulations
CSAPR Cross-State Air Pollution Rule
EPA Environmental Protection Agency
FR Federal Register
NODA Notice of data availability
NOX Nitrogen oxides

The regulations for each CSAPR trading program contain ''assurance provisions'' designed to ensure that the emission reductions required from each State covered by the program occur within the State. If total emissions from a State's affected units exceed the State's assurance level, the State must surrender two allowances for each ton of emissions exceeding the assurance level (in addition to the ordinary obligation to surrender one allowance for each ton of emissions). In the emissions reports covering the 2025 control period, Virginia units participating in the CSAPR NO_X Ozone Season Group 2E Trading Program reported emissions exceeding the State's assurance level under the program by 70 tons, resulting in a requirement to surrender 140 additional allowances.

When a State exceeds its assurance level, the EPA apportions the responsibility for surrendering the required additional allowances among groups of units in the State represented by ''common designated representatives'' based on the extent to which each group's emissions exceeded the group's share of the State's assurance level.[1] Applying the procedures in the regulations for the 2025 control period, the EPA completed preliminary calculations that indicate that the responsibility for surrendering 140 additional allowances in Virginia should be apportioned primarily to the group of units operated by Hopewell Power Generation, LLC and Dominion Generation, with smaller shares apportioned to the groups of units operated by Wolf Hills Energy, LLC and Calpine Operating Services Company, Inc.

In this notice, the EPA is providing notice of the data on which the Agency relied to determine the amounts of the exceedance of the Virginia assurance level and the notice of the preliminary calculations of the amounts of additional allowances that owners and operators of certain Virginia units must surrender as a result of the exceedance.[2] By October 1, 2026, the EPA will provide notice of the final calculations of the amounts of additional allowances that must be surrendered, incorporating any adjustments made in response to objections received.[3] Each set of owners and operators identified pursuant to the notice of the final calculations must hold the required additional allowances in an assurance account by November 1, 2026.

The data and preliminary calculations are available in an Excel spreadsheet titled ''2025_CSAPR_assurance_provision_calculations_prelim.xlsx'' at *https://www.epa.gov/Cross-State-Air-Pollution/csapr-assurance-provision-nodas.* The spreadsheet contains data for the 2025 control period showing, for each Virginia unit identified as affected under the CSAPR NO_X Ozone Season Group 2E Trading Program, the unit's reported amount of NO_X emissions and the amount of CSAPR NO_X Ozone Season Group 2E allowances allocated to the unit, including any allowances allocated from new unit set-asides. The spreadsheet also provides 2025 control period calculations showing the total reported NO_X emissions from all such units in Virginia and the amounts by which those total reported NO_X emissions exceeded the State's assurance level under the program. Finally, the spreadsheet includes calculations for the 2025 control period showing, for each common designated representative for a group of such units, the common designated representative's share of the total reported NO_X emissions, the common designated representative's share of the State's assurance level, and the amount of additional CSAPR NO_X Ozone Season Group 2E allowances that the owners and operators of the units in the group must surrender.

Objections should strictly be limited to whether the EPA identified the data and performed the calculations in the spreadsheet correctly in accordance with the regulations. Objections must include: (1) precise identification of the specific data or calculations the commenter believes are inaccurate, (2) new proposed data or calculations upon which the commenter believes the EPA should rely instead, and (3) the reasons why the EPA should rely on the commenter's proposed data or calculations and not the data and calculations referenced in this notice.

Abigale Tardif,

Principal Deputy Assistant Administrator, Office of Air and Radiation, U.S. Environmental Protection Agency.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1255; FR ID 360075]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice; request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it

displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before October 5, 2026. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–1255.

Title: Rules and Policies Regarding Calling Number Identification Service—Caller ID, CC Docket No. 91–281.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 46,291 respondents; 1,705 responses.

Estimated Time per Response: .083 hours (5 minutes).

Frequency of Response: Monthly and on-going reporting requirements.

Obligation to Respond: Required to obtain or retain benefit. The statutory authority for the information collection requirements is found at section 201(b) of the Communications Act of 1934, as amended, 47 U.S.C. 201(b), and section 222, 47 U.S.C. 222. The Commission's implementing rules are codified at 47 CFR 64.1600–01.

Total Annual Burden: 142 hours.

Total Annual Cost: No cost.

Needs and Uses: The Commission amended rules requiring that carriers honor privacy requests to state that § 64.1601(b) of the Commission's rules shall not apply when calling party number (CPN) delivery is made in connection with a threatening call. Upon report of such a threatening call by law enforcement on behalf of the threatened party, the carrier will provide any CPN of the calling party to law enforcement and, as directed by law enforcement, to security personnel for the called party for the purpose of identifying the party responsible for the threatening call. Carriers now have a recordkeeping requirement in order to quickly provide law enforcement with information relating to threatening calls.

The Commission also amended rules to allow non-public emergency services to receive the CPN of all incoming calls from blocked numbers requesting assistance. The Commission believes amending its rules to allow non-public emergency services access to blocked Caller ID promotes the public interest by ensuring timely provision of emergency services without undermining any countervailing privacy interests. Carriers now have a recordkeeping requirement in order to provide emergency serve providers with the information they need to assist callers.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0110.

Title: FCC Form 2100, Application for Renewal of Broadcast Station License, LMS Schedule 303–S.

Form Number: FCC Form 2100, LMS Schedule 303–S.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; Not for profit institutions; State, Local or Tribal Governments.

Number of Respondent and Responses: 4,738 respondents, 4,738 responses.

Estimated Time per Response: 0.075 hours—12 hours.

Frequency of Response: On occasion reporting requirement; Every eight-year reporting requirement; Third party disclosure requirement.

Total Annual Burden: 13,090 hours.

Total Annual Cost: $4,181,731.

Obligation of Respond: Required to obtain or retain benefits. The statutory authority for the collection is contained Sections 154(i), 303, 307 and 308 of the Communications Act of 1934, as amended, and Section 204 of the Telecommunications Act of 1996.

Needs and Uses: The Commission is requesting Office of Management and Budget (OMB) approval for an extension of an existing information collection.

The Licensing Management System (LMS) Schedule 303–S is used to apply for license renewals for commercial or noncommercial AM, FM, TV, FM translator, TV translator, Class A TV, or Low Power TV, and Low Power FM broadcast station licenses. Licensees of broadcast stations must apply for renewal of their licenses every eight years.

Schedule 303–S's On-Air and Online Notice (third party disclosure) Requirements: 47 CFR 73.3580, as amended in the Commission's *2020 Public Notice Second Report and Order,* requires local public notice of the filing of all applications to renew a broadcast

station license. Notice is given by an applicant for renewal of a full-service AM, FM, full-power TV, Class A TV, Low-Power FM (LPFM), or Low-Power TV (LPTV) station that locally originates programming, by making a total of six on-air announcements, at least one per week and no more than one per day or two per week, to be broadcast between 7:00 a.m. and 11:00 p.m. local time, Monday through Friday, beginning after the application is accepted for filing. Notice is given by an applicant for renewal of an FM or TV translator, an LPTV station that does not locally originate programming, or by a silent station, by posting notice online, either on the station website or a website affiliated with the station, its licensee, or its parent entity, or else by posting notice on a publicly accessible, locally targeted website, for 30 continuous days following acceptance of the application for filing.

Federal Communications Commission.

BILLING CODE;P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS–9172–N]

Healthcare Advisory Committee (HAC); Announcement of the HAC Meetings for Fiscal Year 2026–2027

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Notice of meetings.

SUMMARY: This meeting notice announces the virtual meeting public components of the Healthcare Advisory Committee (HAC or Committee) for the fiscal year 2026–2027. The purpose of the Committee is to advise the Secretary of HHS and the CMS Administrator on programs and policies that can improve the United States healthcare system consistent with the Executive Order Establishing the President's Make American Healthy Again Commission. The virtual meetings are open to the public.

DATES: The virtual meetings will take place on Monday, August 31, 2026; Monday, November 9, 2026; Monday, February 22, 2027; and Monday, May 10, 2027.

All meetings will take place from 8:00 a.m. to 5:00 p.m. Eastern Time (ET). The time listed in this notice is approximate. Consequently, the meeting may be longer or shorter than the times listed in this notice but will not begin before or end after the posted window of time. Please check the Committee's website for the most up-to-date information.

Deadline for comments: Comment letters must be received by 5:00 p.m. ET 2 weeks prior to the scheduled meeting date. Deadlines are therefore August 18, 2026 (for the August 31, 2026 meeting), October 26, 2026 (for the November 9, 2026 meeting), February 8, 2027 (for the February 22, 2027 meeting), and April 26, 2027 (for the May 10, 2027 meeting). Comment letters must be submitted via email as specified in the **ADDRESSES** section of this notice. Comment letters that are not received by the due date and time will be considered late or incomplete and may not be included in the agenda. Comment letters may not be revised once they are submitted. If a comment letter requires changes, a new submittal must be submitted by the scheduled due date.

Deadline for request for special accommodations: Requests for special accommodations must be received by 5:00 p.m. ET 2 weeks prior to the scheduled meeting dates. Deadlines are therefore August 17, 2026 (for the August 31, 2026 meeting), October 26, 2026 (for the November 9, 2026 meeting), February 8, 2027 (for the February 22, 2027 meeting), and April 26, 2027 (for the May 10, 2027 meeting).

ADDRESSES: *Virtual meetings location and webinar:* The meetings will be held virtually and participants do not have to register. Closed captioning will be available on the webinar. Webinar information will appear on the final meeting agendas, which will be posted on the Committee's website when available at *https://www.cms.gov/priorities/healthcare-advisory-committee/overview.*

Virtual meeting registration: There is no planned meeting registration required for participants who plan to view the Committee meetings via webinar or for those making a public comment during the meetings. If the webinar platform changes and registration is required information will be posted on the Committee's website, and registration will also be accessible through the Committee's website.

Requests for special accommodations: Requests for special accommodations

should be emailed to *HAC@cms.hhs.gov.*

FOR FURTHER INFORMATION CONTACT: For questions regarding the HAC meetings, please send an email to *HAC@cms.hhs.gov.*

SUPPLEMENTARY INFORMATION:

Background

The first HAC meeting was held on May 18, 2026, and the meeting transcript and summary can be found on the Committee's website at *https://www.cms.gov/priorities/healthcare-advisory-committee/overview.* Items and topics to be discussed during the next four meetings that will take place during the fiscal year 2026–2027 will expand on furthering the charge and introductions of the established Committee working groups, discussion of preliminary working group proposals for Committee consideration, and voting on Committee recommendations. A final and detailed agenda will be available approximately 1 week prior to the meeting dates on the Committee's website.

The Administrator of the Centers for Medicare & Medicaid Services (CMS), Mehmet Oz, having reviewed and approved this document, authorizes Evell J. Barco Holland, who is the Federal Register Liaison, to electronically sign this document for purposes of publication in the **Federal Register**.

Evell J. Barco Holland,

Federal Register Liaison, Centers for Medicare & Medicaid Services.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Library of Medicine; Notice of Partially Closed Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the Board of Regents of the National Library of Medicine.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting. The open session will be videocast and can be accessed from the NIH Videocasting and Podcasting website (*http://videocast.nih.gov/*).

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Board of Regents of the National Library of Medicine.

Date: September 15–16, 2026.

Closed: September 15, 2026, 11:20 a.m. to 12:00 p.m.

Agenda: To review and evaluate grant applications and/or proposals.

Address: National Institutes of Health, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Open: September 15, 2026, 1:00 p.m. to 4:00 p.m.

Agenda: Call to Order, Introductions, NLM Director's Report and Discussion.

Address: National Institutes of Health, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Open: September 16, 2026, 12:00 p.m. to 2:15 p.m.

Agenda: Call to Order, Concept Clearance and Open Discussions.

Address: National Institutes of Health, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Closed: September 16, 2026, 2:30 p.m. to 3:30 p.m.

Agenda: To review and evaluate breakout Closed—Strategic Plan Working Group.

Address: National Institutes of Health, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Stephen T. Sherry, Ph.D., Acting Director, National Library of Medicine, National Institutes of Health, U.S. Department of Health and Human Services, Bethesda, MD 20892, (301) 435–7799, *SHERRY@NIH.GOV.*

Registration is not required to attend the open portion of this meeting.

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

Information is also available on the Institute's/Center's home page: *www.nlm.nih.gov/od/bor/bor.html,* where an agenda and any additional information for the meeting will be posted when available.

BILLING CODE 4167–05–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

[OMB Control Number 1651–0109]

Agency Information Collection Activities; Revision; Guam-CNMI Visa Waiver Information (Form I–736)

AGENCY: U.S. Customs and Border Protection (CBP), Department of Homeland Security.

ACTION: 30-Day Notice and request for comments.

SUMMARY: The Department of Homeland Security, U.S. Customs and Border Protection (CBP) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). The information collection is published in the **Federal Register** to obtain comments from the public and affected agencies.

DATES: Comments are encouraged and must be submitted (no later than September 3, 2026) to be assured of consideration.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Please submit written comments and/or suggestions in English. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Requests for additional PRA information should be directed to Seth Renkema, Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection, Office of Trade, Regulations and Rulings, 90 K Street NE, 10th Floor, Washington, DC 20229–1177, Telephone number 202–325–0056 or via email *CBP_PRA@cbp.dhs.gov.* Please note that the contact information provided here is solely for questions regarding this notice. Individuals

seeking information about other CBP programs should contact the CBP National Customer Service Center at 877–227–5511, (TTY) 1–800–877–8339, or CBP website at *https://www.cbp.gov/.*

SUPPLEMENTARY INFORMATION: CBP invites the general public and other Federal agencies to comment on the proposed and/or continuing information collections pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). This proposed information collection was previously published in the **Federal Register** (89 FR 3299) on January 18, 2024, allowing for a 60-day comment period. This notice allows for an additional 30 days for public comments. This process is conducted in accordance with 5 CFR 1320.8. Written comments and suggestions from the public and affected agencies should address one or more of the following four points: (1) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) suggestions to enhance the quality, utility, and clarity of the information to be collected; and (4) suggestions to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. The comments that are submitted will be summarized and included in the request for approval. All comments will become a matter of public record.

Overview of This Information Collection

Title: Guam-CNMI Visa Waiver Information (Form I–736).
OMB Number: 1651–0109.
Form Number: I–736.
Current Actions: Revision.
Type of Review: Revision.
Affected Public: Individuals.
Abstract: Public Law 110–229 provides for certain aliens to be exempt from the nonimmigrant visa requirement if seeking entry into Guam or the Commonwealth of the Northern Mariana Islands (CNMI) as a visitor for a maximum stay of 45 days, provided that no potential threat exists to the welfare, safety, or security of the United States, or its territories, and other criteria are met. At the Secretary's discretion, passport holders of the People's Republic of China who are not in possession of a visitors' visa may be allowed to enter CNMI for up to 14 days under the discretionary parole authority. Upon arrival at the Guam or CNMI Ports-of-Entry, each applicant for admission presents a completed paper Form I–736 to CBP, which collects information about the applicant's identity and travel documents. CBP Form I–736 is provided for by 8 CFR 212.1(q).

Please note that certain items on the new version remains identical to those in the original version. However, updates are necessary to be able to transition to automating Form I–736, Guam-CNMI Visa Waiver Information that is used in compliance with the Guam-CNMI Visa Waiver Program. The automation will facilitate CBP to gather information on travelers from Guam-CNMI Visa Waiver Program countries to determine their admissibility to enter Guam or the CNMI. In addition, CBP intends to migrate from paper I–736 to a mandatory automated environment; therefore, the collection of a paper form will no longer be acceptable. However, after the regulation implementing mandatory automation is published, CBP will grant a transition period of three months to facilitate travelers adjusting to the new collection method. At the end of the transition period, the paper I–736 form will become obsolete and travelers must input and submit in advance their personal information and respond to the eligibility questions using the new electronic format. The travelers' information is pre-screened or vetted against law enforcement databases. Based on the results of the pre-screening, the application is approve or denied. The system generates a board or no board status message to the carrier indicating a denied or approved authorization to board before the flight. The applicant also receives a message with the application status: approved, denied, canceled or pending. All information will be saved in the newly created Guam-CNMI Visa Waiver Program database.

In a recent approval, several data elements were added to the Form I–736: the foreign passport type (mandatory), social media identifier (optional), valid email address (mandatory), and social media provider/platform (optional). Adding these data elements enhances the existing vetting process and provides CBP with additional information to determine travelers' admissibility to enter Guam or the CNMI under the Guam-CNMI Visa Waiver Program. CBP intends to migrate from the paper Form I–736 process to a mandatory automated process via rulemaking.

Proposed Changes

As part of the regulatory updates for the Interim Final Rule (IFR) which fully automates the collection of Form I–736 and requires that travelers under the G–CNMI VWP submit this information in advance of arrival. The rule also creates a new system, CNMI EVS–TAP, wherein travelers from the PRC to the CNMI can submit advance information to CBP so they may be vetted for a 14-day visa free admissibility period. These travelers will also need to complete an additional set of vetting questions.

Type of Information Collection: Form I–736.
Estimated Number of Respondents: 1,370,000.
Estimated Number of Annual Responses per Respondent: 1.
Estimated Number of Total Annual Responses: 1,370,000.
Estimated Time per Response: 21 minutes.
Estimated Total Annual Burden Hours: 479,500.
Type of Information Collection: CNMI EVS–TAP.
Estimated Number of Respondents: 230,000.
Estimated Number of Annual Responses per Respondent: 1.
Estimated Number of Total Annual Responses: 230,000.
Estimated Time per Response: 26 minutes.
Estimated Total Annual Burden Hours: 99,667.

Robert F. Altneu,
Director, Regulations and Disclosure Law Division, U.S. Customs and Border Protection.

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2026–0430; OMB No. 1660–0083]

Agency Information Collection Activities: Proposed Collection; Comment Request; Application for Community Disaster Loan (CDL) Program

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: 60-Day notice of revision and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public to take this opportunity to comment on an extension, with change, of a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning the Community Disaster Loan (CDL) Program. This collection allows the Federal Government to make loans to local governments that have suffered economic problems due to disasters.

DATES: Comments must be submitted on or before October 5, 2026.

ADDRESSES: To avoid duplicate submissions to the docket, please submit comments at *www.regulations.gov* under Docket ID FEMA–2026–0430. Follow the instructions for submitting comments.

All submissions received must include the agency name and Docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy and Security Notice that is available via a link on the homepage of *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Martha Castro, Section Chief, Program Support and Monitoring Branch, Public Assistance Division, 202–701–4023, or *Martha.Castro@fema.dhs.gov.* You may contact the Information Management Division for copies of the proposed collection of information at email address: *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: The information collection is required for Community Disaster Loan (CDL) Program eligibility determinations, CDL management, and compliance with other Federal laws and regulations. The CDL Program is authorized by Section 417 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Pub. L. 93–288, as amended, 88 Stat. 143 (42 U.S.C. 5184) and implementing regulations at 44 CFR part 206, subpart K. FEMA may make a CDL to any local government which has suffered a substantial loss of tax or other revenues as a result of a major disaster or emergency and which demonstrates a need for Federal financial assistance to perform its governmental functions.

The CDL must be justified on the basis of need and be based on the actual and projected expenses, as a result of the disaster, for the fiscal year in which the disaster occurred and the three succeeding fiscal years. FEMA has the authority to cancel repayment of all or part of these CDLs to the extent that a determination is made that revenues of the local government during the three fiscal years following the disaster are insufficient to meet the operating budget of that local government because of disaster related revenue losses and additional unreimbursed disaster-related municipal operating expenses.

The proposed information collection would revise FEMA Form–104–FY–22–224, Promissory Note to remove Part III—Schedule of Loan Increments to Be Disbursed to Borrower. FEMA has determined that the information was not sufficiently useful to reviewing the application and opted to eliminate the entire table titled ''Part III—Schedule of Loan Increments to Be Disbursed to Borrower'' from the form.

Collection of Information

Title: Application for Community Disaster Loan (CDL) Program.

Type of Information Collection: Extension, with minor change, of a currently approved information collection.

OMB Number: 1660–0083.

FEMA Forms: FEMA Form–104–FY–22–223 (formerly 090–0–1), Certification of Eligibility for Community Disaster Loans; FEMA Form–104–FY–22–224 (formerly 116–0–1), Promissory Note; FEMA Form-104–FY–22–225 (formerly 085–0–1), Local Government Resolution—Collateral Security; FEMA Form–104–FY–22–226 (formerly 112–0–3C), Certifications Regarding Lobbying, Debarment, Suspension and Other Responsibility Matters, and Drug-Free Workplace Requirements; FEMA Form–104–FY–22–227 (formerly 009–0–15), Application for Loan Cancellation.

Abstract: The loan package for the CDL Program provides local governments that have suffered substantial loss of tax or other revenues as a result of a major disaster, the opportunity to obtain financial assistance in order to perform their governmental functions. The loan must be justified on the basis of need and disaster-related expenses.

Affected Public: Local, U.S. Territory, or Tribal Government.

Estimated Number of Respondents: 260.

Estimated Number of Responses: 260.

Estimated Total Annual Burden Hours: 552.

Estimated Total Annual Respondent Cost: $29,990.

Estimated Respondents' Operation and Maintenance Costs: 0.

Estimated Respondents' Capital and Start-Up Costs: 0.

Estimated Total Annual Cost to the Federal Government: $80,961.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Nigel S. Allicock,

Records Management Branch Chief, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7107–N–18; OMB Control No.: 2577–0218]

30-Day Notice of Proposed Information Collection: Indian Housing Block Grants (IHBG) Formula and Competitive Programs

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comments from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 30 days of public comment.

DATES: *Comments Due Date:* September 3, 2026.

ADDRESSES: Interested persons are invited to submit comments regarding

this proposal. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Anna Guido, PRA Compliance Officer, Paperwork Reduction Act Division, PRAD, Department of Housing and Urban Development, 451 7th Street SW, Room 8210, Washington, DC 20410; email at *PaperworkReductionActOffice@hud.gov,* ATTN: Anna Guido, telephone (202) 402–5535. This is not a toll-free number. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.*

Copies of available documents submitted to OMB may be obtained from Ms. Guido.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A. The Federal Register notice that solicited public comment on the information collection for a period of 60 days was published on March 19, 2026 at 90 FR 13316.

A. Overview of Information Collection

Title of Information Collection: Indian Housing Block Grants (IHBG) Formula and Competitive Programs.

OMB Approval Number: 2577–0218.

Type of Request: Revision of a currently approved collection.

Form Number: HUD–4117, HUD–4117 A–D, HUD–4119, HUD–4119 A–D, HUD–4123, HUD–4125, HUD–52736–A, HUD–52736–B, HUD–52737 IHP–APR, HUD–52737 GEMS IHP/APR, HUD–53248 IHBG–COMP APR, HUD–426, HUD Form 2880, SF–424, SF–424B SF–424D, SF–425.

Description of the need for the information and proposed use: HUD's Office of Native American Programs (ONAP) will use the pre-award and post-award information collected to assess program feasibility and compliance, monitor program performance throughout the grant term, and to report annually to Congress. ONAP is responsible for managing the IHBG Formula and IHBG Competitive programs, as described below.

IHBG Formula Program: The Native American Housing Assistance and Self-Determination Reauthorization Act of 1996 (25 U.S.C. 4101 *et seq.*) (NAHASDA) authorizes the IHBG Formula program which supports the development, management, and operation of affordable homeownership and rental housing; infrastructure development; and other forms of housing assistance intended for low-income persons. Federally recognized Native American Tribes, Alaska Native Villages, tribally designated housing entities, and a limited number of State-recognized Tribes that were funded under the Indian Housing Program authorized by the U.S. Housing Act of 1937 are eligible to receive IHBG funds. Under the IHBG Formula Program, eligible recipients receive an equitable share of funds as appropriated by Congress based on housing stock and housing needs, and other funding criteria.

IHBG Competitive Program: Since 2018, Congress has appropriated additional funding under the IHBG Formula program for the IHBG Competitive Grant (IHBG–COMP). IHBG–COMP prioritizes projects that increase the availability of affordable housing in Tribal communities with consideration to the extent of need and administrative capacity. The regulations and requirements governing the IHBG Formula Program apply to the IHBG Competitive Program. The IHBG–COMP Notices of Funding Opportunities are published on *Grants.gov*, where applicants submit applications.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 2 of the Paperwork Reduction Act of 1995, 44 U.S.C. 3507.

Anna Guido,

Department PRA Compliance Officer, Office of Policy Development and Research, Chief Data Officer.

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7106–N–37]

Privacy Act of 1974; Matching Program

AGENCY: Office of Policy Development and Research, Department of Housing and Urban Development (HUD).

ACTION: Notice of a Re-established Matching Program.

SUMMARY: Pursuant to the Privacy Act of 1974, as amended, HUD is providing notice of its intent to re-establish a matching program with Department of Health and Human Services (HHS) for a recurring matching program with HUD's Office of Public and Indian Housing (PIH) and Multifamily Housing (MFH), involving comparisons of information pertaining to participants in authorized HUD rental housing assistance program with the independent sources of income information available through the National Directory of New Hires (NDNH) maintained by HHS. After verifying the comparison outcomes, HUD will upload the information into the Enterprise Income Verification (EIV) system of records, maintained by HUD, and make it available to: (1) Program administrators such as public housing agencies (PHAs) and private owners and management agents (O/As) (collectively referred to as POAs) to enable them to verify the accuracy of income reported by the tenants (participants) of HUD rental assistance programs and (2) contract administrators (CAs) overseeing and monitoring O/A operations as well as independent public auditors (IPAs) that audit both PHAs and O/As. The most recent renewal of the current matching agreement expires on September 8, 2026.

DATES: *Comment Due Date:* September 3, 2026. The period of this matching program is estimated to cover the 18-month period from September 9, 2026 through March 8, 2028. However, the computer matching agreement (CMA) will become applicable on the latter of the following two dates: September 9, 2026 or 30 days after publication of this notice in the **Federal Register**, provided no public comments are received that require modification to the notice and republication for an additional 30-day comment period. The matching program will continue for 18 months after the applicable date and may be extended for an additional 12 months if the respective agency Data Integrity Boards (DIBs) determine that the conditions specified in 5 U.S.C. 552a(o)(2)(D) have been met.

ADDRESSES: Interested persons are invited to submit comments regarding this notice at *www.regulations.gov* or to the Rules Docket Clerk, Office of General Counsel, Department of Housing and Urban Development, 451 Seventh Street, Room 10276, SW, Washington, DC 20410. Communications should refer to the above docket number A copy of each communication submitted will be available for public inspection and copying between 8:00 a.m. and 5:00 p.m. on weekdays at the above address.

FOR FURTHER INFORMATION CONTACT: Contact the Recipient Agency Priscilla W. Clark, Senior Agency Official for Privacy, Department of Housing and Urban Development, 451 7th Street SW, Room 6204, Washington, DC 20410, telephone number (202) 340–2978. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech and communication disabilities. To learn more about how to make an accessible telephone call, please visit: *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.*

SUPPLEMENTARY INFORMATION: Pursuant to the Privacy Act of 1974, as amended; OMB's guidance on this statute entitled, ''*Final Guidance Interpreting the Provisions of Public Law 100–503*''*;* OMB Circular No. A–108, ''*Federal Agency Responsibilities for Review, Reporting, and Publication under the Privacy Act;*'' and OMB Circular No. A–130, ''*Managing Information as a Strategic Resource;*'' HUD is providing the public with notice of a re-established computer matching agreement with the Department of Health and Human Services (HHS). The previous notice of this computer matching program between HUD and HHS was published at 89 FR 18776 (March 15, 2024). The first HUD–HHS computer matching program was

conducted in September 2005 with HUD's Office of Public and Indian Housing (PIH). The scope of the HUD–HHS computer matching program was expanded in December 2007 to include HUD's Office of Housing for certain Multifamily Housing (MFH) programs and was revised in January 2011 to include participants in HUD's Disaster Housing Assistance Program.

The matching program will be carried out only to the extent necessary to: (1) verify the employment and income of participants in certain rental assistance programs to correctly determine the amount of their rent and assistance, (2) identify, prevent, and recover improper payments made on behalf of tenants, and (3) after removal of personal identifiers, to conduct analyses of the employment and income reporting of individuals participating in any HUD authorized rental housing assistance program.

HUD will make the results of the computer matching program available to public housing agencies (PHAs), private housing owners and management agents (O/As) administering HUD rental assistance programs to enable them to verify employment and income and correctly determine the rent and assistance levels for individuals participating in those programs, and contract administrators (CAs) overseeing and monitoring O/A operations. This information also may be disclosed to the HUD Office of Inspector General (HUD/OIG) and the United States Attorney General in detecting and investigating potential cases of fraud, waste, and abuse within HUD rental assistance programs.

In addition to the above noted information disclosures, limited redisclosure of reports containing NDNH information may be redisclosed to the following persons and/or entities: (1) Independent auditors for the sole purpose of performing an audit of whether these HUD authorized entities verified tenants' employment and/or income and calculated the subsidy and rent correctly; and (2) entities and/or individuals associated with grievance procedures and judicial proceedings (*i.e.* lawyers, court personnel, agency personnel, grievance hearing officers, etc.) relating to independently verified unreported income identified through this matching program.

HUD will use this matching authority to provide and its third-party administrators (PHAs, O/As, and CAs) of eligible programs with information to identify, reduce or eliminate improper payments in HUD's rental housing assistance programs, while continuing to ensure that HUD rental housing assistance programs serve and are accessible by its intended program beneficiaries.

Participating Agencies

Department of Housing and Urban Development and the Department of Health and Human Services.

Authority for Conducting the Matching Program

This matching program is authorized by: Subsections 453(j)(7)(A), (C)(i), and (D)(i) of the Social Security Act (42 U.S.C. 653(j)(7)(A), (C)(i), and (D)(i)) provide the legal authority to conduct the matching program.

Section 453(j)(7) Information comparisons for housing assistance programs states:

(A) Furnishing of information by HUD. Subject to subparagraph (G), the Secretary of Housing and Urban Development shall furnish to the Secretary, on such periodic basis as determined by the Secretary of Housing and Urban Development in consultation with the Secretary, information in the custody of the Secretary of Housing and Urban Development for comparison with information in the National Directory of New Hires, in order to obtain information in such Directory with respect to individuals who are participating in any program under—

(i) the United States Housing Act of 1937 (42 U.S.C. 1437 *et seq.*);

(ii) section 202 of the Housing Act of 1959 (12 U.S.C. 1701q);

(iii) section 221(d)(3), 221(d)(5), or 236 of the National Housing Act (12 U.S.C. 1715l(d)(3), 1715l(d)(5) or 1715z–1);

(iv) section 811 of the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. 8013); or

(v) section 101 of the Housing and Urban Development Act of 1965 (12 U.S.C. 1701s).

* * * * *

(C) Duties of the Secretary

(i) Information disclosure—The Secretary, in cooperation with the Secretary of Housing and Urban Development, shall compare information in the National Directory of New Hires with information provided by the Secretary of Housing and Urban Development with respect to individuals described in subparagraph (A), and shall disclose information in such Directory regarding such individuals to the Secretary of Housing and Urban Development, in accordance with this paragraph, for the purposes specified in this paragraph.

* * * * *

(D) Use of information by HUD. The Secretary of Housing and Urban Development may use information resulting from a data match pursuant to this paragraph only—

(i) for the purpose of verifying the employment and income of individuals described in subparagraph (A); and (ii) after removal of personal identifiers, to conduct analyses of the employment and income reporting of individuals described in subparagraph (A).

42 U.S.C. 653(j)(7)(A), (C)(i), and (D). Subsection 453(j)(7)(D)(ii) of the Social Security Act provides legal authority to conduct analysis of employment and income reporting, ''after the removal of personal identifiers.''

42 U.S.C. 653(j)(7)(D)(ii). HUD does not currently use NDNH match information to conduct analysis of employment and income reporting; however, if HUD seeks to conduct such analyses in the future, HUD must first obtain OCSE approval by requesting authorization and providing OCSE with documentation of the proposed analyses. The documentation must include the specific purpose for the analyses, specific HUD users, procedures for the removal of personal identifiers, data storage location and safeguards, retention periods, and other information about the use of the results of the information comparison for analyses.

Purpose(s)

HUD's primary objective of the computer matching program is to verify the employment and income of participants in certain rental assistance programs to determine the appropriate level of rental assistance, and to detect, deter and correct fraud, waste, and abuse in rental housing assistance programs. In meeting these objectives, HUD also is carrying out a responsibility under 42 U.S.C. 1437f(K) to ensure that income data provided to PHAs, and O/As, by household members is complete and accurate. HUD's various rental housing assistance programs require that participants meet certain income and other criteria to be eligible for rental assistance. In addition, tenants generally are required to report and recertify the amounts and sources of their income at least annually. However, under the Quality Housing and Work Responsibility Act (QHWRA) of 1998, PHAs operating Public Housing programs may offer tenants the option to pay a flat rent, or an income-based rent. Those tenants who select a flat rent will be required to recertify income at least every three years. In addition, the changes to the Admissions and Occupancy final rule, published at 65 FR 16692 (March 29, 2000), specified that household composition must be

recertified annually for tenants who select a flat rent or income-based rent.

Categories of Individuals

Covered Programs

This notice of computer matching program applies to individuals receiving services from the following rental assistance programs:

A. Disaster Housing Assistance Program (DHAP)

B. Public Housing

C. Section 8 Housing Choice Vouchers (HCV)

D. Project-Based Vouchers

E. Section 8 Moderate Rehabilitation

F. Project-Based Section 8

1. New Construction

2. State Agency Financed

3. Substantial Rehabilitation

4. Sections 202/8

5. Rural Housing Services Section 515/8

6. Loan Management Set-Aside (LMSA)

7. Property Disposition Set-Aside (PDSA)

G. Section 101 Rent Supplement

H. Section 202/162 Project Assistance Contract (PAC)

I. Section 202 Project Rental Assistance Contract (PRAC)

J. Section 811 Project Rental Assistance Contract (PRAC)

K. Section 236 Rental Assistance Program

L. Section 221(d)(3) Below Market Interest Rate (BMIR)

Note: This notice does not apply to the Low-Income Housing Tax Credit (LIHTC) or the Rural Housing Services Section 515 without Section 8 programs.

Categories of Records

The following are the categories of record in this matching agreement:

HUD Input File

- First name
- Last name
- Date of birth
- Social Security number

HHS New Hire File

- New hire processed date
- Employee name
- Employee address
- Employee date of hire
- Employee state of hire
- Federal Employer Identification Number
- State Employer Identification Number
- Department of Defense status code
- Employer name
- Employer address
- Transmitter agency code
- Transmitter state code
- Transmitter state or agency name

HHS Quarterly Wage File

- Quarterly wage processed date
- Employee name
- Federal Employer Identification Number
- State Employer Identification Number
- Department of Defense code
- Employer name
- Employer address
- Employee wage amount
- Quarterly wage reporting period
- Transmitter agency code
- Transmitter state code
- Transmitter state or agency name

HHS Unemployment Insurance File

- Unemployment insurance processed date
- Claimant name
- Claimant address
- Claimant benefit amount
- Unemployment insurance reporting period
- Transmitter state code
- Transmitter state or agency name

System(s) of Records

The Office of Child Support Enforcement (OCSE) National Directory of New Hires (NDNH) contains new hire, quarterly wage, and unemployment insurance information furnished by state and federal agencies and is maintained by OCSE in the system of records ''OCSE National Directory of New Hires,'' System No. 09–80–0381, published at 89 FR 25625 (April 11, 2024). The disclosure of NDNH records by OCSE to HUD constitutes a routine use as defined by the Privacy Act, 5 U.S.C. 552a(b)(3). Routine Use (12) published in the NDNH SORN authorizes the disclosure of NDNH records to HUD.

The HUD records used in the information comparison are retrieved from, and the results of the information comparison are maintained within, the Enterprise Income Verification (EIV) System, HUD/PIH–05, as published in the applicable System of Records Notice. The applicable routine use in that SORN authorizes the disclosure of HUD records to OCSE for purposes of this matching program.

Kimberly Morton,

Acting Chief Privacy Officer, Office of Administration.

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7107–N–17; OMB Control No.: 2502–0178]

30-Day Notice of Proposed Information Collection: Management Review for Multifamily Housing Projects

AGENCY: Office of Policy Development and Research, Chief Data Officer, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comments from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 30 days of public comment.

DATES: Comments due September 3, 2026.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Anna Guido, PRA Compliance Officer, Paperwork Reduction Act Division, PRAD, Department of Housing and Urban Development, 451 7th Street SW, Room 8210, Washington, DC 20410; email at *PaperworkReductionActOffice@hud.gov,* ATTN: Anna Guido, telephone (202) 402–5535. This is not a toll-free number. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.* Copies of available documents submitted to OMB may be obtained from Ms. Guido.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A. The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on December 6, 2024 at 89 FR 97062.

A. Overview of Information Collection

Title of Information Collection: Management Review for Multifamily Housing Projects.

OMB Approval Number: 2502–0178.

Type of Request: Revision of a currently approved collection.

Form Number: HUD Form-9834, HUD Form-91067.

Description of the need for the information and proposed use: HUD Form-9834 Management Review for Multifamily Housing Projects is used by HUD staff, Mortgagees, and Contract Administrators (CAs) to evaluate project management; determine causes of project problems; devise corrective actions to stabilize projects and prevent defaults; and ensure that fraud, waste, and mismanagement are not occurring. The information collected also supports enforcement actions when corrective actions are not implemented.

HUD Form-91067 VAWA Lease Addendum for Multifamily Housing Programs informs tenants of statutory requirements under the Violence Against Women Act of 2013 (Pub. L. 113–4) and its 2022 reauthorization (Pub. L. 117–103). HUD developed HUD Form –91067 to incorporate VAWA protections into leases. 24 CFR 5.2005(a)(4). The lease addendum ensures tenants are informed of their rights under VAWA and owners/agents document compliance by retaining a signed lease addendum. Protections apply to all victims of domestic violence, dating violence, sexual assault, or stalking, regardless of sex, marital status, or age. The addendum is executed and retained in tenant files and may be reviewed by HUD during compliance monitoring or in response to tenant complaints.

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hours per response	Annual burden hours	Hourly cost per response* * ***	Total annual cost
HUD–9834	*27,127	**1	****27,127	8.33	225,968	$39.77	$8,986,744.00
HUD–91067	413,929	***1	413,929	.13	55,811	39.77	2,140,54.00
Totals	441,056	.....	441,056	.....	281,021	.....	11,126,798.00

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comments in response to these questions.

C. Authority

Section 2 of the Paperwork Reduction Act of 1995, 44 U.S.C. 3507.

Anna Guido,

Department PRA Compliance Officer Office of Policy Development and Research, Chief Data Officer.

BILLING CODE 4210–67–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1456]

Certain Mobile Cellular Communications Devices; Notice of a Commission Determination Not To Review an Initial Determination Terminating All Remaining Respondents From the Investigation; Termination of the Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review five initial determinations (''ID'') (Order Nos. 25–29) of the presiding administrative law judge (''ALJ'') terminating all remaining respondents from the investigation based on a consent order and settlement agreements and terminating the investigation in its entirety.

FOR FURTHER INFORMATION CONTACT: B. Rashmi Borah, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–2518. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal, telephone (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on August 7, 2025, based on a complaint filed by Pantech Corporation of the Republic of Korea (''Pantech''). 90 FR 38177 (Aug. 7, 2025). The complaint, as supplemented, alleges violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain mobile cellular communications devices by reason of the infringement of U.S. Patent Nos. 9,548,839; 11,659,503; 11,051,344; and 12,267,876. *Id.* The complaint further alleges that a domestic industry exists. *Id.*

The notice of investigation names the following respondents: (1) OnePlus Technology (Shenzhen) Co., Ltd. of Shenzhen City, Guangdong Province, China; (2) OnePlus USA Corp. of Irving, Texas; (3) Lenovo Group Ltd. of Beijing, China; (4) Lenovo (United States) Inc. of Morrisville, North Carolina; (5) Motorola Mobility LLC of Libertyville, Illinois; (6) TCL Industries Holdings Co., Ltd. of Huizhou City, Guangdong Province, China; (7) TCL Electronics Holdings Ltd. of Hong Kong; (8) TCL Communication Ltd. of Hong Kong; (9) TCL Communication Technology Holdings Ltd. of Huizhou City, Guangdong Province, China; (10) TCL Mobile International Ltd. of Hong Kong; (11) Huizhou TCL Mobile Communication Co., Ltd. of Huizhou City, Guangdong Province, China; (12) TCL Mobile Communication (HK) Company Ltd. of Hong Kong; (13) Tinno

USA, Inc. of Plano, Texas; (14) Shenzhen Tinno Mobile Technology Corp. of Shenzhen City, Guangdong Province, China; (15) HMD Global of Espoo, Finland; (16) HMD Global Oy of Espoo, Finland; and (17) HMD America, Inc. of Miami, Florida. *Id.* at 38177–78. The Office of Unfair Import Investigations (''OUII'') is also named as a party to this investigation. *Id.* at 38178.

On September 30, 2025, the Commission terminated the investigation with respect to respondent HMD Global. Order No. 7 (Sept. 10, 2025), *unreviewed by* Comm'n Notice (Sept. 30, 2025).

On May 22, 2026, respondents HMD Global Oy and HMD America, Inc. (collectively, ''HMD'') moved to terminate the investigation as to HMD based on a consent order stipulation and proposed consent order. Pantech did not oppose the motion. On June 2, 2026, OUII filed a response in support of HMD's motion.

On May 26, 2026, Pantech and respondents OnePlus Technology (Shenzhen) Co., Ltd., and OnePlus USA Corp. (collectively, ''OnePlus'') filed a joint motion to terminate the investigation as to OnePlus based on a settlement agreement. On June 4, 2026, OUII filed a response in support of the motion as to OnePlus.

On June 4, 2026, Pantech and respondents Lenovo Group Limited, Lenovo (United States) Inc., and Motorola Mobility LLC (collectively, ''Lenovo'') filed a joint motion to termination the investigation as to Lenovo based on a settlement agreement. On June 15, 2026, OUII filed a motion in support of the motion as to Lenovo.

On June 15, 2026, Pantech and respondents Tinno USA, Inc. and Shenzhen Tinno Mobioe Technology Corp. (collectively, ''Tinno'') filed a joint motion to terminate the investigation as to Tinno based on a settlement agreement. On June 25, 2026, OUII filed a response in support of the motion as to Tinno.

On June 22, 2026, Pantech and respondents TCL Industries Holdings Co., Ltd., TCL Electronics Holdings Ltd., TCL Communication Ltd., TCL Communication Technology Holdings Ltd., TCL Mobile International Ltd., Huizhou TCL Mobile Communication Co., Ltd., and TCL Mobile Communication (HK) Company Ltd., (collectively, ''TCL'') filed a joint motion to terminate the investigation as to TCL based on a settlement agreement. On June 25, 2026, OUII filed a response in support of the motion as to TCL.

On June 30, 2026, the ALJ issued the five subject IDs, terminating HMD, OnePlus, Lenovo, Tinno, and TCL from the investigation. Order No. 25 (as to HMD); Order No. 26 (as to OnePlus); Order No. 27 (as to Lenovo); Order No. 28 (as to Tinno), and Order No. 29 (as to TCL). Order No. 25 confirms that HMD's consent order stipulation and proposed consent orders satisfy the requirements of Commission Rules 210.2(c)(3) and (c)(4) (19 CFR 210.21(c)(3), (c)(4)). Order No. 25 also finds that termination of HMD would not be contrary to the public interest. Order Nos. 26, 27, 28, and 29 each find that the respective motions comply with the requirements of Commission Rule 210.21(b)(1) (19 CFR 210.21(b)(1)), and that the proposed settlements do not adversely affect the public interest in accordance with Commission Rule 210.50(b)(2) (19 CFR 210.50(b)(2)). As the five subject IDs terminate all remaining respondents, Order No. 29 also terminates the investigation in its entirety. No petitions for review of the subject IDs were filed.

The Commission has determined not to review the subject IDs. The Commission has issued consent orders to HMD Global Oy and HMD America, Inc. HMD, OnePlus, Lenovo, Tinno, and TCL are terminated from the investigation, and the investigation is terminated in its entirety.

The Commission vote for this determination took place on July 30, 2026.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.
Issued: July 30, 2026.

Sharon Bellamy,

Supervisory Hearings and Information Officer.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–802–804 and 731–TA–1799–1803 (Preliminary)]

Linear Hydraulic Cylinders From Canada, China, India, Mexico, and South Korea; Institution of Antidumping and Countervailing Duty Investigations and Scheduling of Preliminary Phase Investigations

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the institution of investigations and commencement of preliminary phase antidumping and countervailing duty investigation Nos. 701–TA–802–804 and 731–TA–1799–1803 (Preliminary) pursuant to the Tariff Act of 1930 to determine whether there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of linear hydraulic cylinders from Canada, China, India, Mexico, and South Korea, provided for in subheadings 8412.21.00 and 8412.90.90 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value and alleged to be subsidized by the Governments of China, India, and Mexico. Unless the Department of Commerce (''Commerce'') extends the time for initiation, the Commission must reach a preliminary determination in antidumping and countervailing duty investigations in 45 days, or in this case by September 14, 2026. The Commission's views must be transmitted to Commerce within five business days thereafter, or by September 21, 2026.

DATES: July 29, 2026.

FOR FURTHER INFORMATION CONTACT: Stamen Borisson ((202) 205–3125), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background.—These investigations are being instituted, pursuant to sections 703(a) and 733(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a) and 1673b(a)), in response to a petition filed on July 29, 2026, by the Hydraulic Cylinders Fair Trade Coalition and its individual members: Aggressive Hydraulics Inc., Cedar, Minnesota; Hol-Mac Corporation, Bay Springs, Mississippi; Ligon

Hydraulics, Tonawanda, New York; Prince Manufacturing Corporation, Lexington, South Carolina; PTC Alliance LLC, Wexford, Pennsylvania; Rosenboom Machine and Tool Inc., Sheldon, Iowa; Scot Industries Inc., Lone Star, Texas; Stillwell Inc., Burnsville, Minnesota; and Texas Hydraulics Inc., Temple, Texas.

For further information concerning the conduct of these investigations and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and B (19 CFR part 207).

Participation in the investigations and public service list.—Persons wishing to participate in the investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in §§ 201.11 and 207.10 of the Commission's rules, not later than seven days after publication of this notice in the **Federal Register**. Industrial users and (if the merchandise under investigation is sold at the retail level) representative consumer organizations have the right to appear as parties in Commission antidumping duty and countervailing duty investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to these investigations upon the expiration of the period for filing entries of appearance.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in these investigations available to authorized applicants representing interested parties (as defined in 19 U.S.C. 1677(9)) who are parties to the investigations under the APO issued in the investigations, provided that the application is made not later than seven days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Conference.—The Office of Investigations will hold a staff conference in connection with the preliminary phase of these investigations beginning at 9:30 a.m. on August 19, 2026. Requests to appear at the conference should be emailed to *preliminaryconferences@usitc.gov* (DO NOT FILE ON EDIS) on or before noon on August 17, 2026. Please provide an email address for each conference participant in the email. Information on conference procedures, format, and participation, including guidance for requests to appear as a witness via videoconference, will be available on the Commission's Public Calendar (Calendar (USITC) | United States International Trade Commission). A nonparty who has testimony that may aid the Commission's deliberations may request permission to participate by submitting a short statement.

Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov*). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

Written submissions.—As provided in §§ 201.8 and 207.15 of the Commission's rules, any person may submit to the Commission on or before 5:15 p.m. on August 24, 2026, a written brief containing information and arguments pertinent to the subject matter of the investigations. Parties shall file written testimony and supplementary material in connection with their presentation at the conference no later than 4:00 p.m. on August 18, 2026. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings.

In accordance with §§ 201.16(c) and 207.3 of the rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with these investigations must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that any information that it submits to the Commission during these investigations may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of these or related investigations or reviews, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.12 of the Commission's rules.

By order of the Commission.
Issued: July 30, 2026.

Sharon Bellamy,

Supervisory Hearings and Information Officer.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–975 (Rescission)]

Certain Computer Cables, Chargers, Adapters, Peripheral Devices and Packaging Containing the Same; Notice of Commission Determination To Institute a Rescission Proceeding; Rescind a Limited Exclusion Order; and Terminate the Rescission Proceeding

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission (''Commission'') has determined to institute a rescission proceeding and rescind the limited exclusion order (''LEO'') that was issued in the above-captioned investigation. The rescission proceeding is terminated.

FOR FURTHER INFORMATION CONTACT: Edward S. Jou, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–3316. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the

Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: On October 13, 2016, the Commission issued an LEO in the above-captioned investigation based on a complaint filed on behalf of Belkin International, Inc. of Playa Vista, California (''Complainant''), alleging violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337 (''section 337''), in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain computer cables, chargers, adapters, peripheral devices and packaging containing the same by reason of infringement of U.S. Trademark Nos. 2,339,459; 2,339,460; 4,168,379; and 4,538,212 (collectively, the ''Asserted Trademarks''). 81 FR 71765 (Oct. 18, 2016). The LEO was directed to respondents Dongguan Pinte Electronic Co., Ltd. and Dongguan Shijie Fresh Electronic Products Factory of Dongguan City, China.

The LEO included a requirement that Complainant make annual filings with the Commission stating whether it continued to use the Asserted Trademarks in commerce, but the Complainant has not made any such filings since the LEO issued.

On March 24, 2026, the Commission issued a notice requesting written submissions from the public, the parties to the investigation, and other interested parties, on whether the LEO should be modified or rescinded under 19 U.S.C. 1337(k) and 19 CFR 210.76, in whole or in part. 91 FR 14879–80 (Mar. 27, 2026). The Commission did not receive any submissions in response to this notice.

Based on the foregoing and the lack of any response to the Commission's notice, the Commission has determined to institute a rescission proceeding pursuant to Commission Rule 210.76, 19 CFR 210.76. In view of Complainant's failure to comply with the LEO's annual filing requirement to show continued use of the Asserted Trademarks, the Commission has determined that changed conditions of fact warrant rescission of the LEO under 19 U.S.C. 1337(k). Accordingly, the Commission has determined to rescind the LEO. The rescission proceeding is hereby terminated.

The Commission vote for this determination took place on July 31, 2026.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: July 31, 2026.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–563 (Modification)]

Certain Portable Power Stations and Packaging Therefor; Notice of Commission Determination To Institute a Modification Proceeding; Modify a Limited Exclusion Order; and Terminate the Modification Proceeding

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission (''Commission'') has determined to institute a modification proceeding and modify the limited exclusion order (''LEO'') that was issued in the above-captioned investigation. The modification proceeding is terminated.

FOR FURTHER INFORMATION CONTACT: Edward S. Jou, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–3316. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: On November 9, 2006, the Commission issued an LEO in the above-captioned investigation based on a complaint filed by Roadmaster (USA) Corporation (''Complainant'') alleging violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337 (''section 337''), in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain portable power stations and packaging therefor by reason of infringement of U.S. Design Patent No. D469,739 (''the D'739 patent''); U.S. Trademark Registration No. 2,594,538 (''the '538 mark''); and U.S. Copyright Registration No. VA–1–261–495 (' the '495 copyright''). 71 FR 66554 (Nov. 15, 2006). The LEO was directed to respondent Sinochem Ningbo, Ltd. of Ningbo, China. *Id.*

The LEO included a requirement that Complainant make annual filings with the Commission stating whether it continued to use the '538 mark in commerce, but the Complainant has not made any such filings since 2007. In addition, the D'739 patent has expired and the '538 mark has been canceled by the U.S. Patent and Trademark Office due to a failure to file a declaration of continued use. *See* U.S. Trademark Registration No. 2,594,538, Cancelled/Expired (USPTO Trademark Status & Document Retrieval, Feb. 22, 2013).

On March 24, 2026, the Commission issued a notice requesting written submissions from the public, the parties to the investigation, and other interested parties, on whether the LEO should be modified or rescinded under 19 U.S.C. 1337(k) and 19 CFR 210.76, in whole or in part. 91 FR 14879–80 (Mar. 27, 2026). The Commission did not receive any submissions in response to this notice.

Based on the foregoing and the lack of any response to the Commission's notice, the Commission has determined to institute a modification proceeding pursuant to Commission Rule 210.76, 19 CFR 210.76. In consideration of the expiration of the D'739 patent, the cancellation of the '538 mark, and Complainant's failure to comply with the LEO's annual filing requirement to show continued use of the '538 mark, the Commission has determined that changed conditions of fact warrant modification of the LEO under 19 U.S.C. 1337(k). Accordingly, the Commission has determined to modify the LEO to rescind the exclusions based on infringement of the D'739 patent and the '538 mark. The modification proceeding is hereby terminated.

The Commission vote for this determination took place on July 31, 2026.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: July 31, 2026.

Sharon Bellamy,

Supervisory Hearings and Information Officer.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–977 (Modification)]

Certain Arrowheads With Deploying Blades and Components Thereof; Notice of Commission Determination To Institute a Modification Proceeding; Modify a General Exclusion Order; and Terminate the Modification Proceeding

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission (''Commission'') has determined to institute a modification proceeding and modify the general exclusion order (''GEO'') that was issued in the above-captioned investigation. The modification proceeding is terminated.

FOR FURTHER INFORMATION CONTACT: Edward S. Jou, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–3316. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: On April 6, 2017, the Commission issued a GEO in the above-captioned investigation based on a complaint filed by FeraDyne Outdoors, LLC and Out RAGE, LLC of Cartersville, Georgia (collectively, ''Complainants'') alleging violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337 (''section 337''), in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain arrowheads with deploying blades and components thereof and packaging therefor by reason of infringement of certain claims of U.S. Patent Nos. RE44,144; 6,517,454; 7,771,298; 8,758,176; 8,986,141; 9,068,806; D710,962; and D711,489; and U.S. Trademark Registration No. 4,812,058 (''the '058 mark''). 82 FR 17689–90 (Apr. 12, 2017).

The GEO included a requirement that Complainants make annual filings with the Commission stating whether they continued to use the '058 mark in commerce, but the Complainants have not made any such filings since the issuance of the GEO.

On March 24, 2026, the Commission issued a notice requesting written submissions from the public, the parties to the investigation, and other interested parties, on whether the GEO should be modified or rescinded under 19 U.S.C. 1337(k) and 19 CFR 210.76, in whole or in part. 91 FR 14879–80 (Mar. 27, 2026). The Commission did not receive any submissions in response to this notice.

Based on the foregoing and the lack of any response to the Commission's notice, the Commission has determined to institute a modification proceeding pursuant to Commission Rule 210.76, 19 CFR 210.76. In consideration of Complainants' failure to comply with the GEO's annual filing requirement to show continued use of the '058 mark, the Commission has determined that changed conditions of fact warrant modification of the GEO under 19 U.S.C. 1337(k). Accordingly, the Commission has determined to modify the GEO to rescind the exclusion based on the '058 mark. The modification proceeding is hereby terminated.

The Commission vote for this determination took place on July 31, 2026.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: July 31, 2026.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1256 (Rescission)]

Certain Portable Battery Jump Starters and Components Thereof; Notice of Commission Determination to Institute a Rescission Proceeding; Rescind a Limited Exclusion Order; and Terminate the Rescission Proceeding

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission (''Commission'') has determined to institute a rescission proceeding and rescind the limited exclusion order (''LEO'') that was issued in the above-captioned investigation. The rescission proceeding is terminated.

FOR FURTHER INFORMATION CONTACT: Edward S. Jou, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–3316. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: On August 29, 2022, the Commission issued an LEO in the above-captioned investigation based on a complaint filed on behalf of The NOCO Company of Glenwillow, Ohio (''Complainant''), alleging violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337 (''section 337''), in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain portable battery jump starters and components thereof by reason of infringement of U.S. Trademark Nos. 4,811,656 and 4,811,749 (collectively, the ''Asserted Trademarks''). 87 FR 54260–61 (Sept. 2, 2022). The LEO was directed to respondents Zhejiang Quingyou Electronic Commerce Co., Ltd. of Hangzhou, China and Shenzhen Mediatek Tong Technology Co., Ltd. of Shenzhen, China.

The LEO included a requirement that Complainant make annual filings with

the Commission stating whether it continued to use the Asserted Trademarks in commerce, but the Complainant has not made any such filings since the LEO issued.

On March 24, 2026, the Commission issued a notice requesting written submissions from the public, the parties to the investigation, and other interested parties, on whether the LEO should be modified or rescinded under 19 U.S.C. 1337(k) and 19 CFR 210.76, in whole or in part. 91 FR 14879–80 (Mar. 27, 2026). The Commission did not receive any submissions in response to this notice.

Based on the foregoing and the lack of any response to the Commission's notice, the Commission has determined to institute a rescission proceeding pursuant to Commission Rule 210.76, 19 CFR 210.76. In view of Complainant's failure to comply with the LEO's annual filing requirement to show continued use of the Asserted Trademarks, the Commission has determined that changed conditions of fact warrant rescission of the LEO under 19 U.S.C. 1337(k). Accordingly, the Commission has determined to rescind the LEO. The rescission proceeding is hereby terminated.

The Commission vote for this determination took place on July 31, 2026.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: July 31, 2026.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–763 (Modification)]

Certain Radio Control Transmitters and Receivers and Products Containing Same; Notice of Commission Determination To Institute a Modification Proceeding; Modify a Limited Exclusion Order; and Terminate the Modification Proceeding

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission (''Commission'') has determined to institute a modification proceeding and modify the limited exclusion order (''LEO'') that was issued in the above-captioned investigation. The modification proceeding is terminated.

FOR FURTHER INFORMATION CONTACT: Edward S. Jou, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–3316. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: On September 27, 2011, the Commission issued an LEO in the above-captioned investigation based on a complaint filed by Horizon Hobby, Inc. of Champaign, Illinois (''Complainant'') alleging violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337 (''section 337''), in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain radio control hobby transmitters and receivers and products containing same by reason of infringement of certain claims of U.S. Patent No. 7,391,320; U.S. Copyright Reg. No. TX–7–226–001; and U.S. Trademark Registration No. 3,080,770 (''the '770 mark''). 76 FR 60872–73 (Sept. 30, 2011).

The LEO included a requirement that Complainant make annual filings with the Commission stating whether it continued to use the '770 mark in commerce, but the Complainant has not made any such filings since 2017.

On March 24, 2026, the Commission issued a notice requesting written submissions from the public, the parties to the investigation, and other interested parties, on whether the LEO should be modified or rescinded under 19 U.S.C. 1337(k) and 19 CFR 210.76, in whole or in part. 91 FR 14879–80 (Mar. 27, 2026). The Commission did not receive any submissions in response to this notice.

Based on the foregoing and the lack of any response to the Commission's notice, the Commission has determined to institute a modification proceeding pursuant to Commission Rule 210.76, 19 CFR 210.76. In consideration of Complainant's failure to comply with the LEO's annual filing requirement to show continued use of the '770 mark, the Commission has determined that changed conditions of fact warrant modification of the LEO under 19 U.S.C. 1337(k). Accordingly, the Commission has determined to modify the LEO to rescind the exclusion based on the '770 mark. The modification proceeding is hereby terminated.

The Commission vote for this determination took place on July 31, 2026.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: July 31, 2026.

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–778 and 731–TA–1764 (Final)]

Fresh Mushrooms From Canada; Scheduling of the Final Phase of Countervailing Duty and Antidumping Duty Investigations

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the scheduling of the final phase of antidumping and countervailing duty investigation Nos. 701–TA–778 and 731–TA–1764 (Final) pursuant to the Tariff Act of 1930 to determine whether an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of fresh mushrooms from Canada, provided for in subheading 0709.51.01 of the Harmonized Tariff Schedule of the United States, preliminarily determined by the Department of Commerce (''Commerce'') to be subsidized and sold at less-than-fair-value.

DATES: July 17, 2026.

FOR FURTHER INFORMATION CONTACT: Jordan Harriman ((202) 205–2610),

Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Scope.— For purposes of these investigations, Commerce has defined the subject merchandise as ''. . . fresh mushrooms of the genus *Agaricus* (fresh mushrooms). This includes, but is not limited to, fresh mushrooms of the species *Agaricus bisporus,* which are commonly referred to as button mushrooms, chestnut mushrooms, cremini or crimini mushrooms, baby bellas, portabella or portobello mushrooms, table mushrooms, or as white or browns. Fresh mushrooms include whole mushrooms, as well as mushrooms that have been sliced, diced, or separated into stems and pieces prior to importation. Fresh mushrooms may also be imported in bulk or loose form, or may be imported in individual containers packaged for retail sale. The scope of this investigation includes all fresh mushrooms of the genus *Agaricus,* whether or not organic, and irrespective of age, cut, color, size, species, or packaging. Subject merchandise may be cleaned, washed, inspected, subjected to metal detection, sliced, diced, or de-stemmed, and/or vacuum cooled prior to importation, but otherwise undergoes minimal further processing. The scope of this investigation covers fresh mushrooms of the genus *Agaricus* regardless of end use, including both mushrooms destined for the fresh market and mushrooms intended for food processing.'' Fresh mushrooms of the genus *Agaricus* are currently classifiable under Harmonized Tariff Schedule of the United States (HTSUS) subheading 0709.51.01. Although the HTSUS number is provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

Background.—The final phase of these investigations is being scheduled pursuant to sections 705(b) and 731(b) of the Tariff Act of 1930 (19 U.S.C. 1671d(b) and 1673d(b)), as a result of affirmative preliminary determinations by Commerce that certain benefits which constitute subsidies within the meaning of § 703 of the Act (19 U.S.C. 1671b) are being provided to manufacturers, producers, or exporters in Canada of fresh mushrooms, and that such products are being sold in the United States at less than fair value within the meaning of § 733 of the Act (19 U.S.C. 1673b). The investigations were requested in petitions filed on September 16, 2025, by the Fresh Mushrooms Fair Trade Coalition and its individual members.[1]

For further information concerning the conduct of this phase of the investigations, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

Participation in the investigations and public service list.—Persons, including industrial users of the subject merchandise and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the final phase of these investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's rules, no later than 21 days prior to the hearing date specified in this notice. A party that filed a notice of appearance during the preliminary phase of the investigations need not file an additional notice of appearance during this final phase. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigations.

Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov*). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in the final phase of these investigations available to authorized applicants under the APO issued in the investigations, provided that the application is made no later than 21 days prior to the hearing date specified in this notice. Authorized applicants must represent interested parties, as defined by 19 U.S.C. 1677(9), who are parties to the investigations. A party granted access to BPI in the preliminary phase of the investigations need not reapply for such access. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Staff report.—The prehearing staff report in the final phase of these investigations will be placed in the nonpublic record on November 5, 2026, and a public version will be issued thereafter, pursuant to § 207.22 of the Commission's rules.

Hearing.—The Commission will hold a hearing in connection with the final phase of these investigations beginning at 9:30 a.m. on Tuesday, November 17, 2026. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission on or before Friday, November 13, 2026. Any requests to appear as a witness via videoconference must be included with your request to appear. Requests to appear via videoconference must include a statement explaining why the witness cannot appear in person; the Chairman, or other person designated to conduct the investigation, may in their discretion for good cause shown, grant such a request. Requests to appear as remote witness due to illness or a positive COVID–19 test result may be submitted by 3:00 p.m. the business day prior to the hearing. Further information about participation in the hearing will be posted on the Commission's website at *https://www.usitc.gov/calendarpad/calendar.html.*

A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the hearing. All parties and nonparties desiring to appear at the hearing and make oral presentations should attend a prehearing conference, if deemed necessary, to be held at 9:30 a.m. on Monday, November 16, 2026. Parties shall file and serve written testimony and presentation slides in connection with their presentation at the hearing by no later than noon on November 16, 2026. Oral testimony and written materials to be submitted at the public hearing are governed by sections 201.6(b)(2), 201.13(f), and 207.24 of the Commission's rules. Parties must submit any request to present a portion of their hearing testimony *in camera* no later

[1] The individual members of the Fresh Mushrooms Fair Trade Coalition are: Giorgio Fresh Co. (including Donna Bella Farms LLC and Giorgi Mushroom Co.); J–M Farms LLC; Kennett Square Mushroom Operation LLC; Modern Mushroom Farms, Inc.; Needham's Mushroom Farms, Inc.; and Sher-Rockee Mushroom Farms.

than 7 business days prior to the date of the hearing.

Written submissions.—Each party who is an interested party shall submit a prehearing brief to the Commission. Prehearing briefs must conform with the provisions of § 207.23 of the Commission's rules; the deadline for filing is November 12, 2026. Parties shall also file written testimony in connection with their presentation at the hearing, and posthearing briefs, which must conform with the provisions of § 207.25 of the Commission's rules. The deadline for filing posthearing briefs is November 24, 2026. In addition, any person who has not entered an appearance as a party to the investigations may submit a written statement of information pertinent to the subject of the investigations, including statements of support or opposition to the petition, on or before November 24, 2026. On December 14, 2026, the Commission will make available to parties all information on which they have not had an opportunity to comment. Parties may submit final comments on this information on or before December 16, 2026, but such final comments must not contain new factual information and must otherwise comply with § 207.30 of the Commission's rules. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings.

Additional written submissions to the Commission, including requests pursuant to § 201.12 of the Commission's rules, shall not be accepted unless good cause is shown for accepting such submissions, or unless the submission is pursuant to a specific request by a Commissioner or Commission staff.

In accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.21 of the Commission's rules.

By order of the Commission.

Issued: July 30, 2026.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–1472 (Review)]

Difluoromethane (R–32) From China; Determination

On the basis of the record [1] developed in the subject five-year review, the United States International Trade Commission (''Commission'') determines, pursuant to the Tariff Act of 1930 (''the Act''), that revocation of the antidumping duty order on difluoromethane (R–32) from China would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.[2]

Background

The Commission instituted this review on February 2, 2026 (91 FR 4620, February 2, 2026) and determined on May 8, 2026 that it would conduct an expedited review (91 FR 30726, May 26, 2026).

The Commission made this determination pursuant to section 751(c) of the Act (19 U.S.C. 1675(c)). It completed and filed its determination in this review on July 31, 2026. The views of the Commission are contained in USITC Publication 5767 (July 2026), entitled *Difluoromethane (R–32) from China: Investigation No. 731–TA–1472 (Review).*

By order of the Commission.

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–638 and 731–TA–1473 (Review)]

Corrosion Inhibitors From China; Determinations

On the basis of the record [1] developed in the subject five-year reviews, the United States International Trade Commission (''Commission'') determines, pursuant to the Tariff Act of 1930 (''the Act''), that revocation of the antidumping and countervailing duty orders on corrosion inhibitors from China would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.

Background

The Commission instituted these reviews on February 2, 2026 (91 FR 4617), and determined on May 8, 2026, that it would conduct expedited reviews (91 FR 35267, June 10, 2026).

The Commission made these determinations pursuant to section 751(c) of the Act (19 U.S.C. 1675(c)). It completed and filed its determinations in these reviews on July 30, 2026. The views of the Commission are contained in USITC Publication 5769 (July 2026), entitled *Corrosion Inhibitors From China: Investigation Nos. 701–TA–638 and 731–TA–1473 (Review).*

BILLING CODE 7020–02–P

[1] The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

DEPARTMENT OF JUSTICE

[OMB Number 1105–0112]

Agency Information Collection Activities; Proposed eCollection, eComments Requested; Revision of a Previously Approved Collection; Title: Crime Victim's Rights Act Complain Form

AGENCY: Executive Office for United States Attorney, Department of Justice.

ACTION: 60-day notice.

SUMMARY: The Executive Office for United States Attorney (EOUSA), Department of Justice (DOJ), will be submitting the following information

collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until October 5, 2026.

FOR FURTHER INFORMATION CONTACT: If you have additional comments, especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Ellen M. FitzGerald, Victim's Rights Ombudsman, EOUSA, 950 Pennsylvania Avenue NW, Washington, DC 20530,*ellen.fitzgerald@usdoj.gov,* 202–252–1015.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the (component), including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Evaluate whether, and, if so, how the quality, utility, and clarity of the information to be collected can be enhanced; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of this information collection:

1. *Type of Information Collection:* Revision of a previously approved collection.

2. *The Title of the Form/Collection:* Crime Victim's Rights Act Complaint Form

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* not applicable

4. *Abstract:* The Crime Victims' Rights Act of 2004, 18 U.S.C. 3771(CVRA), sets forth the rights of a federal crime victim to file a complaint against any Department of Justice employee who violated or failed to provide rights established under the CVRA. The Department of Justice has created the Office of the Victims' Rights Ombudsman to receive and investigate complaints filed by Federal crime victims against its employees and has implemented ''Procedures to Promote Compliance with Crime Victims' Rights Obligations,'' 28 CFR 45.10. The complaint process is not designed for the correction of specific victims' rights violations but is instead used to request corrective or disciplinary action against Department of Justice employees who may have failed to provide rights to crime victims. The Department of Justice will investigate the allegations in the complaint to determine whether the employee used his or her ''best efforts'' to provide crime victim rights. The Office of the Crime Victims' Rights Ombudsman does not administer crime victim funds or provide services.

5. *Obligation to Respond:* The affected public are individuals. The obligation to respond is voluntary.

6. *Total Estimated Number of Respondents:* 100

7. *Estimated Time per Respondent:* 45 mins

8. *Frequency:* Once

9. *Total Estimated Annual Time Burden:* 75

10. *Total Estimated Annual Other Costs Burden:*

If additional information is required contact: Darwin Arceo, Department Clearance Officer, United States Department of Justice, Enterprise Portfolio Management, Two Constitution Square, 145 N Street NE, 4W–218, Washington, DC.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–BE–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree

In accordance with Departmental Policy, 28 CFR 50.7, notice is hereby given that a proposed Consent Decree in *United States and State of Alaska* v. *Duran Construction Co. LLC, Marciano Duran, and Josette Duran,* No. 1:22–cv–00091–ACP, was lodged with the United States District Court for the District of Alaska on July 30, 2026.

This proposed Consent Decree concerns a complaint filed by the United States against Duran Construction Co. LLC, Marciano Duran, and Josette Duran, pursuant to 33 U.S.C. 1319, to obtain injunctive relief from and impose civil penalties against the Defendants for violating the Clean Water Act by discharging pollutants without a permit into waters of the United States. The proposed Consent Decree resolves these allegations by requiring the Defendants to restore the impacted areas and/or perform mitigation and to pay a civil penalty.

The Department of Justice will accept written comments relating to this proposed Consent Decree for thirty (30) days from the date of publication of this Notice. Please address comments to Daniel Martin, United States Department of Justice, Environmental Defense Section, P.O. Box 7611, Washington, DC 20044–7611, or *pubcomment_eds.enrd@usdoj.gov* and refer to *United States, et al.* v. *Duran Construction Co. LLC, et al.,* DJ # 90–5–1–1–21970.

The proposed Consent Decree may be examined at the Clerk's Office, United States District Court for the District of Alaska, James M. Fitzgerald U.S. Courthouse and Federal Building, 222 W 7th Avenue, Anchorage, AK 99513. In addition, the proposed Consent Decree may be examined electronically at *http://www.justice.gov/enrd/consent-decrees.*

Charles Spear,

Assistant Chief, Environmental Defense Section, Environment and Natural Resources Division.

[FR Doc. 2026–15762 Filed 8–3–26; 8:45 am]

BILLING CODE P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice: (25–045)]

Privacy Act of 1974; System of Records

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice of a Modified System of Records, Correction

SUMMARY: In accordance with the requirements of the Privacy Act of 1974, the National Aeronautics and Space Administration is providing public notice of a modification to an existing system of records entitled NASA Core Financial Management Records (CFMR). Records in this system are used to process reimbursement payments to employees for travel, purchase of books or other miscellaneous items; and to process payments and collections in which an individual is reimbursing the Agency. The system of records is more

fully described in the **SUPPLEMENTARY INFORMATION** section of this notice.

DATES: Submit comments within 30 calendar days from the date of this publication. The proposed modification to this system will take effect at the end of that period if no significant adverse comments are received.

ADDRESSES: Submit comments to Stayce Hoult, Privacy Act Officer, Office of the Chief Information Officer, Mary W. Jackson, NASA Headquarters, Washington, DC 20546–0001, 757–864–3292, or *NASA-PAOfficer@nasa.gov.*

FOR FURTHER INFORMATION CONTACT: NASA Privacy Act Officer, Stayce Hoult, 256–544–7705, or *NASA-PAOfficer@nasa.gov.*

SUPPLEMENTARY INFORMATION: This system of records notice (SORN) is a correction to the Notice of a modified system of records; correction of February 3, 2026 FR Doc. 2026–02105, pages 4969–4970, the Routine Use section for additional coverage and extra clarity to the December 5, 2025, publication (90 FR 56183). It also updates the Privacy Act Officer and contact information. Finally, it also modifies the notice to make editorial changes.

In the **Federal Register** of December 5, 2025, in FR Doc. 2025–21971, on page 56184, in the second column, correct paragraph 2 in the ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES section to read:

To external entities (*e.g.,* organizers of symposiums, conferences and workshops), which have provided funds to NASA employees, to process payments and/or collections for activities undertaken in the performance of their duties (*e.g.,* attending conferences, travel, training, or other assignment for NASA).

Correct the citations in the HISTORY section to read:

- (91 FR 4969, pp. 4969–4970) Published: 2/3/2026.
- (90 FR 56183, pp. 56183–56185) Published: 12/05/2025.
- (88 FR 30171, pp. 30171–30173) Published: 05/10/2023.

Stayce Harris Hoult,

NASA Chief Privacy Officer.

SYSTEM NAME AND NUMBER

Core Financial Management Records, NASA 10CFMR.

SECURITY CLASSIFICATION

Unclassified.

SYSTEM LOCATION

George C. Marshall Space Flight Center, National Aeronautics and Space Administration, Marshall Space Flight Center, AL 35812

SYSTEM MANAGER(S)

- Director, Agency Financial Systems Office, Mary W. Jackson NASA Headquarters, National Aeronautics and Space Administration, Washington, DC 20546–0001
- IS90/Associate Chief Information Officer, Applications Division, George C. Marshall Space Flight Center, National Aeronautics and Space Administration, Marshall Space Flight Center, AL 35812

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES

Any disclosures of information will be compatible with the purpose for which the Agency collected the information. The following are routine uses:

1. To the U.S. Department of the Treasury for financial reimbursement of individual expenses, such as travel, books, and other miscellaneous items.

2. To external entities (*e.g.,* organizers of symposiums, conferences and workshops), which have provided funds to NASA employees, to process payments and/or collections for activities undertaken in the performance of their duties (*e.g.,* attending conferences, travel, training, or other assignment for NASA).

3. To the U.S. Department of the Treasury when disclosure of the information is relevant to review payment and award eligibility through the Do Not Pay Working System for the purposes of identifying, preventing, or recouping improper payments to an applicant for, or recipient of, Federal funds, including funds disbursed by a state (meaning a state of the United States, the District of Columbia, a territory or possession of the United States, or a federally recognized Indian tribe) in a state-administered, federally funded program.

In addition, information may be disclosed under the following NASA Standard Routine Uses:

1. *Law Enforcement*—When a record on its face, or in conjunction with other information, indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule, or order, disclosure may be made to the appropriate agency, whether Federal, foreign, State, local, or tribal, or other public authority responsible for enforcing, investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation, or order, if NASA determines by careful review that the records or information are both relevant and necessary to any enforcement, regulatory, investigative or prosecutive responsibility of the receiving entity.

2. *Certain Disclosures to Other Agencies*—A record from this system of records (SOR) may be disclosed to a Federal, State, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary, to obtain information relevant to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

3. *Certain Disclosures to Other Federal Agencies*—A record from this SOR may be disclosed to a Federal agency, in response to its request, for a matter concerning the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

4. *Department of Justice*—A record from this SOR may be disclosed to the Department of Justice when a) NASA, or any component thereof; or b) any employee of NASA in his or her official capacity; or c) any employee of NASA in his or her individual capacity where the Department of Justice has agreed to represent the employee; or d) the United States, where NASA determines that litigation is likely to affect NASA or any of its components, is a party to litigation or has an interest in such litigation, and by careful review, the use of such records by the Department of Justice is deemed by NASA to be relevant and necessary to the litigation.

5. *Courts*—A record from this SOR may be disclosed in an appropriate proceeding before a court, grand jury, or administrative or adjudicative body, when NASA determines that the records are relevant and necessary to the proceeding; or in an appropriate proceeding before an administrative or adjudicative body when the adjudicator determines the records to be relevant and necessary to the proceeding.

6. *Response to an Actual or Suspected Compromise or Breach of Personally Identifiable Information*—A record from

this SOR may be disclosed to appropriate agencies, entities, and persons when (1) NASA suspects or has confirmed that there has been a breach of the system of records; (2) NASA has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, NASA (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with NASA's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

7. *Contractors*—A record from this SOR may be disclosed to contractors (as defined in 5 U.S.C. 552a(m)), grantees, experts, consultants, students, volunteers, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for NASA, when necessary to accomplish a NASA function related to this SOR.

Contractors provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to NASA employees.

8. *Members of Congress*—A record from this SOR may be disclosed to a Member of Congress or to a Congressional staff member in response to an inquiry of the Congressional office made at the written request of the constituent about whom the record is maintained.

9. *Disclosures to Other Federal Agencies in Response to an Actual or Suspected Compromise or Breach of Personally Identifiable Information*—A record from this SOR may be disclosed to another Federal agency or Federal entity, when NASA determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

10. *National Archives and Records Administration*—A record from this SOR may be disclosed as a routine use to the officers and employees of the National Archives and Records Administration (NARA) pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

11. *Audit*—NASA may release records to the NASA OIG or GAO during an audit or investigation, as authorized by law, where the release of such information to the entity is necessary to perform the audit or its oversight function.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records in this system are maintained on paper and electronic media.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records are retrieved from the system by name or SSN (Tax ID).

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records are stored in the NASA Applications & Platform Services (APS) database and managed, retained and dispositioned in accordance with NASA Records Retention Schedules, Schedule 9, Items 11 and 16.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Electronic records are maintained on secure NASA servers and protected in accordance with all Federal standards and those established in NASA regulations at 14 CFR 1212.605. Additionally, server and data management environments employ infrastructure encryption technologies both in data transmission and at rest on servers. Electronic messages sent within and outside of the Agency that convey sensitive data are encrypted and transmitted by staff via pre-approved electronic encryption systems as required by NASA policy. Approved security plans are in place for information systems containing the records in accordance with the Federal Information Security Modernization Act of 2014 (FISMA) and OMB Circular No. A–130, Managing Information as a Strategic Resource. Only authorized personnel requiring information in the official discharge of their duties are authorized access to records through approved access or authentication methods. Access to electronic records is achieved only from workstations within the NASA Intranet or via a secure Virtual Private Network (VPN) connection that requires two-factor hardware token authentication or via employee Personal Identity Verification (PIV) badge authentication from NASA-issued computers. Non-electronic records are secured in locked rooms or locked file cabinets.

RECORD ACCESS PROCEDURES:

In accordance with 14 CFR part 1212, Privacy Act—NASA Regulations, information may be obtained by contacting in person or in writing the system or subsystem manager listed above at the location where the records are created and/or maintained. Requests must contain the identifying data concerning the requester, *e.g.,* first, middle and last name; date of birth; description and time periods of the records desired. NASA Regulations also address contesting contents and appealing initial determinations regarding records access.

CONTESTING RECORD PROCEDURES:

In accordance with 14 CFR part 1212, Privacy Act—NASA Regulations, information may be obtained by contacting in person or in writing the system or subsystem manager listed above at the location where the records are created and/or maintained. Requests must contain the identifying data concerning the requester, *e.g.,* first, middle and last name; date of birth; description and time periods of the records desired. NASA Regulations also address contesting contents and appealing initial determinations regarding records access.

NOTIFICATION PROCEDURES:

In accordance with 14 CFR part 1212, Privacy Act—NASA Regulations, information may be obtained by contacting in person or in writing the system or subsystem manager listed above at the location where the records are created and/or maintained. Requests must contain the identifying data concerning the requester, *e.g.,* first, middle and last name; date of birth; description and time periods of the records desired. NASA Regulations also address contesting contents and appealing initial determinations regarding records access.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

BILLING CODE 7510–13–P

NUCLEAR REGULATORY COMMISSION

[NRC–2026–0001]

Sunshine Act Meetings

TIME AND DATE: Week of August 3, 2026. The schedule for Commission meetings

is subject to change on short notice. The NRC Commission Meeting Schedule can be found on the internet at: *https://www.nrc.gov/public-involve/public-meetings/schedule.html.*

PLACE: Via Teleconference.

STATUS: Public.

Members of the public may request to receive the information in these notices electronically. If you would like to be added to the distribution, please contact the Nuclear Regulatory Commission, Office of the Secretary, Washington, DC 20555, at 301–415–1969, or by email at *Betty.Thweatt@nrc.gov* or *Samantha.Miklaszewski@nrc.gov.*

MATTERS TO BE CONSIDERED:

Week of August 3, 2026

Friday, August 7, 2026

2:00 p.m. Affirmation Session (Public Meeting) (Tentative)

Direct Final Rule [DFR–5]: NRC Modernization: Federal Advisory Committee Act Alignment, Access, and Security (RIN 3150–AL46) (Tentative)

(Contact: Wesley Held: 301–287–3591)

Additional Information: The public is invited to attend the Commission's meeting live; via teleconference. Details for joining the teleconference in listen only mode at *https://www.nrc.gov/pmns/mtg.*

CONTACT PERSON FOR MORE INFORMATION: For more information or to verify the status of meetings, contact Wesley Held at 301–287–3591 or via email at *Wesley.Held@nrc.gov.*

The NRC is holding the meetings under the authority of the Government in the Sunshine Act, 5 U.S.C. 552b.

Dated: July 31, 2026.

For the Nuclear Regulatory Commission.

Monika G. Coflin,

Technical Coordinator, Office of the Secretary.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2026–3697]

Biweekly Notice; Applications and Amendments to Facility Operating Licenses and Combined Licenses Involving No Significant Hazards Considerations

AGENCY: Nuclear Regulatory Commission.

ACTION: Biweekly notice.

SUMMARY: Pursuant to section 189a.(2) of the Atomic Energy Act of 1954, as amended (the Act), the U.S. Nuclear Regulatory Commission (NRC) is publishing this regular biweekly notice. The Act requires the Commission to publish notice of any amendments issued, or proposed to be issued, and grants the Commission the authority to issue and make immediately effective any amendment to an operating license or combined license, as applicable, upon a determination by the Commission that such amendment involves no significant hazards consideration (NSHC), notwithstanding the pendency before the Commission of a request for a hearing from any person.

DATES: Comments must be filed by September 3, 2026. A request for a hearing or petitions for leave to intervene must be filed by October 5, 2026. This biweekly notice includes all amendments issued, or proposed to be issued, from July 7, 2026, to July 20, 2026. The last biweekly notice was published on July 21, 2026.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website.

- *Federal rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2026–3697. Address questions about Docket IDs in *Regulations.gov* to Bridget Curran; telephone: 301–415–1003; email: *Bridget.Curran@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Office of Nuclear Material Safety and Safeguards, Mail Stop: TWFN–5–A85, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Paula Blechman, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2242; email: *Paula.Blechman@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2026–3697, facility name, unit number(s), docket number(s), application date, and subject when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2026–3697.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin ADAMS Public Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.
- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2026–3697, facility name, unit number(s), docket number(s), application date, and subject, in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Combined Licenses and Proposed No Significant Hazards Consideration Determination

For the facility-specific amendment requests shown in this notice, the Commission finds that the licensees' analyses provided, consistent with section 50.91 of title 10 of *the Code of Federal Regulations* (10 CFR) ''Notice for public comment; State consultation,'' are sufficient to support the proposed determinations that these amendment requests involve NSHC. Under the Commission's regulations in 10 CFR 50.92, operation of the facilities in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Commission is seeking public comments on these proposed determinations. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determinations.

Normally, the Commission will not issue the amendments until the expiration of 60 days after the date of publication of this notice. The Commission may issue any of these license amendments before expiration of the 60-day period provided that its final determination is that the amendment involves NSHC. In addition, the Commission may issue any of these amendments prior to the expiration of the 30-day comment period if circumstances change during the 30-day comment period such that failure to act in a timely way would result, for example in derating or shutdown of the facility. If the Commission takes action on any of these amendments prior to the expiration of either the comment period or the notice period, it will publish in the **Federal Register** a notice of issuance. If the Commission makes a final NSHC determination for any of these amendments, any hearing will take place after issuance. The Commission expects that the need to take action on any amendment before 60 days have elapsed will occur very infrequently.

A. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any person (petitioner) whose interest may be affected by any of these actions may file a request for a hearing and petition for leave to intervene (petition) with respect to that action. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult 10 CFR 2.309. If a petition is filed, the Commission or a presiding officer will rule on the petition and, if appropriate, a notice of a hearing will be issued.

Petitions must be filed no later than 60 days from the date of publication of this notice in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document. Petitions and motions for leave to file new or amended contentions that are filed after the deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii).

If a hearing is requested, and the Commission has not made a final determination on the issue of no significant hazards consideration, the Commission will make a final determination on the issue of no significant hazards consideration, which will serve to establish when the hearing is held. If the final determination is that the license amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing would take place after issuance of the amendment. If the final determination is that the license amendment request involves a significant hazards consideration, then any hearing held would take place before the issuance of the amendment unless the Commission finds an imminent danger to the health or safety of the public, in which case it will issue an appropriate order or rule under 10 CFR part 2.

A State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h) no later than 60 days from the date of publication of this notice. Alternatively, a State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof, may participate as a non-party under 10 CFR 2.315(c).

For information about filing a petition and about participation by a person not a party under 10 CFR 2.315, see ADAMS Accession No. ML20340A053 (*https://adamswebsearch2.nrc.gov/webSearch2/main.jsp?AccessionNumber=ML2034 0A053*) and the NRC's public website (*https://www.nrc.gov/about-nrc/regulatory/adjudicatory/hearing.html#participate*).

B. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings, including documents filed by an interested State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof that requests to participate under 10 CFR 2.315(c), must be filed in accordance with 10 CFR 2.302. The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases, to mail copies on electronic storage media, unless an exemption permitting an alternative filing method, as further discussed, is granted. Detailed guidance on electronic submissions is located in the ''Guidance for Electronic Submissions to the NRC'' (ADAMS Accession No. ML13031A056), and on the NRC's public website (*https://www.nrc.gov/site-help/e-submittals.html*).

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *Hearing.Docket@nrc.gov,* or by telephone at 301–415–1677, to: (1) request a digital identification (ID) certificate which allows the participant (or their counsel or representative) to digitally sign submissions and access the E-Filing system for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition or other adjudicatory document (even in instances in which the participant, or their counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public website (*https://www.nrc.gov/site-help/e-submittals/getting-started.html*). After a digital ID certificate is obtained and a docket is created, the participant must submit adjudicatory documents in the Portable Document Format. Guidance on submissions is available on the NRC's public website (*https://www.nrc.gov/site-help/electronic-sub-ref-mat.html*). A filing is considered complete at the time the document is submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59

p.m. ET on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email confirming receipt of the document. The E-Filing system also distributes an email that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed in order to obtain access to the documents via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC's Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public website (*https://www.nrc.gov/site-help/e-submittals.html*), by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., ET, Monday through Friday, except Federal holidays.

Participants who believe that they have good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted in accordance with 10 CFR 2.302(b)–(d). Participants filing adjudicatory documents in this manner are responsible for serving their documents on all other participants. Participants granted an exemption under 10 CFR 2.302(g)(2) must still meet the electronic formatting requirement in 10 CFR 2.302(g)(1), unless the participant also seeks and is granted an exemption from 10 CFR 2.302(g)(1).

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket, which is publicly available on the NRC's public website (*https://ehd.nrc.gov*), unless otherwise excluded pursuant to an order of the presiding officer. If you do not have an NRC-issued digital ID certificate as previously described, click ''cancel'' when the link requests certificates and you will be automatically directed to the NRC's electronic hearing docket where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal privacy information such as social security numbers, home addresses, or personal phone numbers in their filings unless an NRC regulation or other law requires submission of such information. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants should not include copyrighted materials in their submission.

The following table provides the plant name, docket number, date of application, ADAMS accession number, and location in the application of the licensees' proposed NSHC determinations. For further details with respect to these license amendment applications, see the applications for amendment, which are available for public inspection in ADAMS. For additional direction on accessing information related to this document, see the ''Obtaining Information and Submitting Comments'' section of this document.

LICENSE AMENDMENT REQUESTS

Dominion Energy South Carolina, Inc.; Virgil C. Summer Nuclear Station, Unit 1, Fairfield County, SC	
Docket No	50–395.
Application date	June 4, 2026.
ADAMS Accession No	ML26155A152.
Location in Application of NSHC	Page 28–30 of Attachment 1.
Brief Description of Amendment	The proposed amendment would address non-conservatisms in the Heat Flux Hot Channel Factor (F_Q) identified by Westinghouse Nuclear Safety Advisory Letter (NSAL) 09–5, Revision 1, and incorporate the NRC-approved Improved F_Q Methodology in WCAP–17661–P–A, as well as implement other improvements to V.C. Summer Technical Specifications as described in the submittal.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	W.S. Blair, Senior Counsel, Dominion Energy Services, Inc., 120 Tredegar St., RS–2, Richmond, VA 23219.
NRC Project Manager, Telephone Number	G. Ed Miller, 301–415–2481.

Energy Northwest; Columbia Generating Station; Benton County, WA	
Docket No	50–397.
Application date	June 24, 2026.
ADAMS Accession No	ML26175A269.
Location in Application of NSHC	Pages 1–3 of the Enclosure.
Brief Description of Amendment	The proposed amendment would revise the technical specifications (TSs) for Columbia Generating Station for adoption of Technical Specifications Task Force (TSTF) Traveler TSTF–591, ''Revise Risk Informed Completion Time (RICT) Program,'' which is an approved change to the Standard Technical Specifications. Traveler TSTF–591 revises TS Section 5.5.16, ''Risk Informed Completion Time Program,'' to reference Regulatory Guide 1.200, Revision 3, instead of Revision 2, and to make other changes. A new report will be added to TS Section 5.6, ''Reporting Requirements,'' to inform the NRC of newly developed methods used to calculate a RICT.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Ryan Lukson, Assistant General Counsel, Energy Northwest, MD 1020, P.O. Box 968, Richland, WA 99352.

LICENSE AMENDMENT REQUESTS—Continued

NRC Project Manager, Telephone Number	Mahesh Chawla, 301–415–8371.

Indiana Michigan Power Company; Donald C. Cook Nuclear Plant, Units 1 and 2; Berrien County, MI

Docket Nos	50–315, 50–316.
Application date	June 2, 2026.
ADAMS Accession No	ML26153A216.
Location in Application of NSHC	Pages 45–47 of Enclosure 2.
Brief Description of Amendments	The proposed amendments would revise the Emergency Plan to reflect the updates contained in NUREG–0654/FEMA–REP–1, ''Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants,'' Revision 2, dated December 2019.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Robert G. Garpenter, Assistant General Counsel, American Electric Power, 1 Riverside Plaza, 29, Columbus, OH 43215.
NRC Project Manager, Telephone Number	Scott Wall, 301–415–2855.

Northern States Power Company; Prairie Island Nuclear Generating Plant, Units 1 and 2; Goodhue County, MN

Docket Nos	50–282, 50–306.
Application date	June 4, 2026.
ADAMS Accession No	ML26155A281.
Location in Application of NSHC	Pages 5–7 of the Enclosure.
Brief Description of Amendments	The proposed amendments would adopt Technical Specifications (TS) Task Force (TSTF) Traveler TSTF–596, ''Expand the Applicability of the Surveillance Frequency Control Program (SFCP).'' TSTF–596 expands the applicability of the SFCP to include other periodic testing frequencies in TS. The proposed change would also revise the SFCP to reference additional regulatory mechanisms that may be used to control Surveillance Frequencies, such as 10 CFR 50.55a and 10 CFR 50.69. The proposed change revises Surveillance Requirements that reference the Inservice Testing Program to instead reference the SFCP.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Andrew Van Duzer, Assistant General Counsel, Xcel Energy, 701 Pennsylvania Ave. NW, Suite 250, Washington, DC 20004.
NRC Project Manager, Telephone Number	Ramon Gascot Lozada , 301–415–2004.

Susquehanna Nuclear, LLC and Allegheny Electric Cooperative, Inc.; Susquehanna Steam Electric Station, Units 1 and 2; Luzerne County, PA

Docket Nos	50–387, 50–388.
Application date	June 17, 2026.
ADAMS Accession No	ML26168A346.
Location in Application of NSHC	Pages 4–5 of the Enclosure.
Brief Description of Amendments	The proposed amendments would revise the Technical Specifications (TSs) at each facility based on Technical Specifications Task Force (TSTF) Traveler TSTF–596, ''Expand the Applicability of the Surveillance Frequency Control Program (SFCP),'' which is an approved change to the standard technical specifications. TSTF–596 expands the applicability of the SFCP to include other periodic testing frequencies in the TS. The licensee requested that the amendment be reviewed under the consolidated line item improvement process (CLIIP).
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Jason Usher, 600 Hamilton Street, Suite 600, Allentown, PA 18101.
NRC Project Manager, Telephone Number	Richard Guzman, 301–415–1030.

Tennessee Valley Authority; Browns Ferry Nuclear Plant, Units 1, 2, and 3; Limestone County, AL

Docket Nos	50–259, 50–260, 50–296.
Application date	June 15, 2026.
ADAMS Accession No	ML26166A227.
Location in Application of NSHC	Pages E10–E11 of the Enclosure.
Brief Description of Amendments	The proposed amendments would revise Browns Ferry Nuclear Plant, Units 1, 2, and 3, Technical Specification 3.3.8.2, ''Reactor Protection System (RPS) Electric Power Monitoring,'' to modify the limiting condition for operation to remove specificity of the power supply and Surveillance Requirement 3.3.8.2.2 to add a new calibration for over-frequency.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Edward C. Meade (Interim), Executive VP and General Counsel, Tennessee Valley Authority, 400 West Summit Hill Drive, WT 6A, Knoxville, TN 37902.

LICENSE AMENDMENT REQUESTS—Continued

NRC Project Manager, Telephone Number	Kimberly Green, 301–415–1627.

III. Notice of Issuance of Amendments to Facility Operating Licenses and Combined Licenses

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or combined license, as applicable, proposed NSHC determination, and opportunity for a hearing in connection with these actions, were published in the **Federal Register** as indicated in the safety evaluation for each amendment.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.22(b) and has made a determination based on that assessment, it is so indicated in the safety evaluation for the amendment.

For further details with respect to each action, see the amendment and associated documents such as the Commission's letter and safety evaluation, which may be obtained using the ADAMS accession numbers indicated in the following table. The safety evaluation will provide the ADAMS accession numbers for the application for amendment and the **Federal Register** citation for any environmental assessment. All of these items can be accessed as described in the ''Obtaining Information and Submitting Comments'' section of this document.

LICENSE AMENDMENT ISSUANCES

Constellation Energy Generation, LLC; Christopher M. Crane Clean Energy Center; Dauphin County, PA

Docket No	50–289.
Amendment Date	July 1, 2026.
ADAMS Accession No	ML26135A004.
Amendment No	307.
Brief Description of Amendment	The amendment revised the facility license to allow receipt and possession of new reactor fuel and new sealed neutron sources at the Christopher M. Crane Clean Energy Center.
Public Comments Received as to Proposed NSHC (Yes/No)	No.

NextEra Energy Duane Arnold, LLC; Duane Arnold Energy Center; Linn County, IA

Docket No	50–331.
Amendment Date	July 15, 2026.
ADAMS Accession No	ML26175A137 (Package).
Amendment No	319.
Brief Description of Amendment	The amendment revised the facility license to reflect completion of the direct transfer of Renewed Facility License No DPR–49 for the Duane Arnold Energy Center (DAEC) and the associated general license for the DAEC independent spent fuel storage installation (collectively, the facility), which consolidates Central Iowa Power Cooperative's 20-percent ownership interest and Corn Belt Power Cooperative's 10-percent ownership interest in the facility in NextEra Energy Duane Arnold, LLC.
Public Comments Received as to Proposed NSHC (Yes/No)	No.

PSEG Nuclear LLC; Hope Creek Generating Station; Salem County, NJ; PSEG Nuclear LLC; Salem Nuclear Generating Station, Unit Nos 1 and 2; Salem County, NJ

Docket Nos	50–272, 50–311, 50–354.
Amendment Date	July 16, 2026.
ADAMS Accession No	ML26188A116.
Amendment Nos	355, 337, 240.
Brief Description of Amendments	The amendments adopted Technical Specifications Task Force (TSTF) Traveler –585 (TSTF–585), ''Revise LCO [limiting condition for operation] 3.0.3 to Require Managing Risk.'' TSTF–585 revised LCO 3.0.3 to require assessing and managing plant risk whenever LCO 3.0.3 is entered. If the risk assessment determines that continuing plant operation is acceptable and other conditions are satisfied, 24-hours from entry into LCO 3.0.3 is permitted to initiate a shutdown. Otherwise, initiation of the shutdown is required immediately. The proposed amendments also revised or added Technical Specification Required Actions to direct other actions instead of entry into LCO 3.0.3.

LICENSE AMENDMENT ISSUANCES—Continued

Public Comments Received as to Proposed NSHC (Yes/No)	No.

Southern Nuclear Operating Company, Inc.; Edwin I. Hatch Nuclear Plant, Units 1 and 2; Appling County, GA

Docket Nos	50–321, 50–366.
Amendment Date	July 14, 2026.
ADAMS Accession No	ML26174A354.
Amendment Nos	332 (Unit 1), 277 (Unit 2).
Brief Description of Amendments	The amendments adopted Technical Specifications Task Force (TSTF) Traveler TSTF–585, ''Revise LCO [Limiting Condition for Operation] 3.0.3 to Require Managing Risk,'' and TSTF–597, ''Eliminate LCO 3.0.3 Mode 2 Requirements.''
Public Comments Received as to Proposed NSHC (Yes/No)	No.

Tennessee Valley Authority; Browns Ferry Nuclear Plant, Units 1, 2, and 3; Limestone County, AL; Tennessee Valley Authority; Sequoyah Nuclear Plant, Units 1 and 2; Hamilton County, TN; Tennessee Valley Authority; Watts Bar Nuclear Plant, Units 1 and 2; Rhea County, TN

Docket Nos	50–259, 50–260, 50–296, 50–327, 50–328, 50–390, 50–391.
Amendment Date	July 16, 2026.
ADAMS Accession No	ML26188A014.
Amendment Nos	342 (Browns Ferry, Unit 1), 365 (Browns Ferry, Unit 2), 325 (Browns Ferry, Unit 3), 376 (Sequoyah, Unit 1), 371 (Sequoyah, Unit 2), 182 (Watts Bar, Unit 1), and 87 (Watts Bar, Unit 2).
Brief Description of Amendments	The amendments revised the technical specifications (TSs) for Browns Ferry Nuclear Plant, Units 1, 2, and 3; Sequoyah Nuclear Plant, Units 1 and 2; and Watts Bar Nuclear Plant, Units 1 and 2, to adopt Technical Specifications Task Force (TSTF) Traveler TSTF–585, Revision 5, ''Revise LCO [Limiting Condition for Operation] 3.0.3 to Require Managing Risk.''
Public Comments Received as to Proposed NSHC (Yes/No)	No.

Vistra Operations Company LLC; Beaver Valley Power Station, Units 1 and 2; Beaver County, PA

Docket Nos	50–334, 50–412.
Amendment Date	July 14, 2026.
ADAMS Accession No	ML26155A388.
Amendment Nos	329 (Unit 1), 219 (Unit 2).
Brief Description of Amendments	The amendments adopted Technical Specifications Task Force (TSTF) Traveler TSTF–585, ''Revise LCO [Limiting Condition for Operation] 3.0.3 to Require Managing Risk.''
Public Comments Received as to Proposed NSHC (Yes/No)	No.

Vistra Operations Company LLC; Comanche Peak Nuclear Power Plant, Unit Nos 1 and 2; Somervell County, TX

Docket Nos	50–445, 50–446.
Amendment Date	July 6, 2026.
ADAMS Accession No	ML26155A181.
Amendment Nos	195 (Unit 1) and 195 (Unit 2).
Brief Description of Amendments	The amendments modified technical specification requirements to incorporate risk-informed requirements for selected Required Action end states. Specifically, the changes permit a Required Action end state of Mode 4 rather than an end state of Mode 5. These changes are consistent with NRC-approved Technical Specifications Task Force (TSTF) Traveler TSTF–432, ''Change in Technical Specifications End States (WCAP–16294).''
Public Comments Received as to Proposed NSHC (Yes/No)	No.

Vistra Operations Company LLC; Comanche Peak Nuclear Power Plant, Unit Nos 1 and 2; Somervell County, TX

Docket Nos	50–445, 50–446.
Amendment Date	July 14, 2026.
ADAMS Accession No	ML26148A199.
Amendment Nos	196 (Unit 1) and 196 (Unit 2).
Brief Description of Amendments	The amendments adopted Technical Specifications Task Force (TSTF) Traveler TSTF–585, ''Revise LCO [Limiting Condition for Operation] 3.0.3 to Require Managing Risk.''
Public Comments Received as to Proposed NSHC (Yes/No)	No.

Vistra Operations Company LLC; Perry Nuclear Power Plant, Unit 1; Lake County, OH

Docket No	50–440.
Amendment Date	July 14, 2026.
ADAMS Accession No	ML26181A169.
Amendment No	209.

LICENSE AMENDMENT ISSUANCES—Continued

Brief Description of Amendment	The amendment adopted Technical Specifications Task Force (TSTF) Traveler TSTF–585, ''Revise LCO [Limiting Condition for Operation] 3.0.3 to Require Managing Risk.''
Public Comments Received as to Proposed NSHC (Yes/No)	No.

(Authority: 42 U.S.C. 2011 *et seq.*)

Dated: July 27, 2026.

For the Nuclear Regulatory Commission.

Hipólito González,

Chief, Operating Reactor Licensing Branch 4, Division of Licensing Projects I, Office of Nuclear Reactor Regulation.

[FR Doc. 2026–15750 Filed 8–3–26; 8:45 am]

BILLING CODE 7590–01–P

OFFICE OF PERSONNEL MANAGEMENT

Submission for Review: Renewal of an Existing Information Collection, Optional Form 306, Declaration for Federal Employment

AGENCY: Office of Personnel Management.

ACTION: 30-Day notice and request for comments.

SUMMARY: The Office of Personnel Management (OPM), Suitability Executive Agent Programs, is notifying the general public and Federal agencies that OPM proposes to request the Office of Management and Budget (OMB) renew a previously approved information collection, Optional Form 306 (OF 306), Declaration for Federal Employment, without change.

DATES: Comments must be received on or before September 3, 2026.

ADDRESSES: You may submit comments on the Federal Rulemaking Portal: *http://www.regulations.gov.* Follow the instructions for submitting comments. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Joe Knouff, Director, Suitability Executive Agent Programs, U.S. Office of Personnel Management, P.O. Box 699, Slippery Rock, PA 16057, or by email at *SuitEA@opm.gov.*

SUPPLEMENTARY INFORMATION: The OF 306 is completed by applicants who are under consideration for Federal or Federal contract employment. The information collected on this form is mainly used to determine a person's acceptability for Federal and Federal contract employment, and that person's retirement status and life insurance enrollment. The information on this form may be used in conducting an investigation to determine a person's suitability or ability to hold a security clearance, and it may be disclosed to authorized officials making similar, subsequent determinations. The form asks for personal identifying data and information about violations of the law, past convictions, imprisonments, probations, parole, military court martial, delinquency on a Federal debt, Selective Service Registration, United States military service, Federal civilian or military retirement benefits received or applied for, and life insurance enrollment. The information collected can be obtained at the pre-appointment stage and may support preliminary eligibility and suitability screening; additional investigative forms may be required where appropriate.

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(a)(1)(D)), OPM has submitted to OMB for review a request for renewal of a currently approved information collection. OPM published a 60-day **Federal Register** notice for this information collection on May 14, 2026, at 91 FR 27379. OPM received two comments that resulted in no changes to the form.

One commenter recommended changing the estimated completion-time range from 5–30 minutes to 15–30 minutes. The commenter did not provide data, testing results, or other information demonstrating that respondents cannot complete the form in fewer than 15 minutes. Based on OPM's experience administering the collection and the differing circumstances of respondents, OPM is retaining the existing estimated range.

The same commenter recommended ''modernizing and revising'' the form to make it electronic. It is important to note that this form is primarily collected via USA Staffing. USA Staffing is the primary government-wide hiring and onboarding system used by more than 100 Federal agencies. A limited number of agencies may collect the information through other systems or through paper forms, and OPM will continue to provide agencies flexibility in how the form is collected.

One additional commenter suggested adding a field for ''email address[,]'' however, because this form is mainly collected via USAStaffing, which is an electronic system that requires the individual provide their email address for other communication purposes, it is not necessary to duplicate the collection of email address on this form.

OPM invites comments on:

1. Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. The accuracy of the agency's estimate of the burden of the proposed collection of information;

3. Ways to enhance the quality, utility, and clarity of the information to be collected; and

4. Ways to minimize the burden of the collection of information on respondents, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Analysis

Agency: Suitability Executive Agent Program, Office of Personnel Management.

Title: Optional Form 306 (OF 306), Declaration for Federal Employment.

OMB Control Number: 3206–0182.

Frequency: On occasion.

Affected Public: Individuals or households.

Number of Respondents: 217,102.

Estimated Time per Respondent: 15 minutes.

Total Burden Hours: 54,276.

Obligation To Respond: Required to obtain or retain a benefit.

Authority: 44 U.S.C. 3507(a)(1)(D).

Office of Personnel Management.

Jerson Matias,

Federal Register Liaison.

BILLING CODE 6325–66–P

POSTAL REGULATORY COMMISSION

[Docket Nos. MC2026–330 and K2026–325]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *https://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Public Proceeding(s)
III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). The Public Representative does not represent any individual person, entity or particular point of view, and, when Commission attorneys are appointed, no attorney-client relationship is established. Section II also establishes comment deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s) identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041. Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. *See* 39 CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR 3041.405(c)–(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests.

II. Public Proceeding(s)

None. *See* Section III for summary proceedings.

III. Summary Proceeding(s)

1. *Docket No(s).:* MC2026–330 and K2026–325; *Filing Title:* USPS Request to Add New Fulfillment Standardized Distinct Product, PM–GA Contract 1057, and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* July 30, 2026; *Filing Authority:* 39 U.S.C. 3642 and 3633, 39 CFR 3035.105, and 39 CFR 3041.325.

This Notice will be published in the **Federal Register**.

Danielle LeFlore,

Legal Assistant.

SECURITIES AND EXCHANGE COMMISSION

[OMB Control No. 3235–0268]

Agency Information Collection Activities; Proposed Collection; Comment Request; Extension: Rule 2a–7

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. § 3501 *et seq.*), the Securities and Exchange Commission (SEC or ''Commission'') is soliciting comments on the proposed collection of information described below.

Money market funds are open-end management investment companies that differ from other open-end management investment companies in that they seek to maintain a stable price per share, usually $1.00, or seek to minimize fluctuations in their price per share. Rule 2a–7 [17 CFR 270.2a–7] under the Investment Company Act of 1940 [15 U.S.C. 80a–1 *et seq.*] (the ''Act'') exempts certain money market funds from the valuation requirements of the Act, and, subject to certain risk-limiting conditions, permits these money market funds to use the ''amortized cost method'' of asset valuation or the ''penny-rounding method'' of share pricing.

Rule 2a–7 imposes certain recordkeeping obligations on money market funds, some of which vary based on the type of money market fund. For example, the board of directors of a government or retail money market fund, in supervising the fund's operations, must establish written procedures designed to stabilize the fund's net asset value (''NAV''). An institutional prime or institutional tax-exempt money market fund must have written guidelines established and reviewed by the board related to mandatory liquidity fees, while non-government money market funds similarly must have written guidelines related to discretionary liquidity fees. In addition, money market fund boards must adopt written procedures that provide for periodic stress testing (and reporting to the board) of the fund's ability to minimize principal volatility and maintain sufficient minimum liquidity under certain hypothetical events and to maintain policies and procedures that specifically address ongoing minimal credit risk monitoring. A money market fund's board must also adopt guidelines and procedures

relating to certain responsibilities it delegates to the fund's investment adviser. These procedures and guidelines typically address various aspects of the fund's operations. The fund must maintain and preserve for six years a written copy of both these procedures and guidelines. The fund also must maintain and preserve for six years a written record of the board's considerations and actions taken in connection with the discharge of its responsibilities, to be included in the board's minutes. In addition, the fund must maintain and preserve for three years written records of certain credit risk analyses, evaluations with respect to securities subject to demand features or guarantees, and determinations with respect to adjustable rate securities and asset backed securities.

Funds must also post monthly portfolio information and certain other information on their websites and maintain records of creditworthiness evaluations on counterparties to repurchase agreements that the fund intends to ''look through'' for purposes of rule 2a–7's diversification limitations. If a retail or government money market fund determines to use a share cancellation method to maintain a stable net asset value in a period with negative interest rates, it must provide certain disclosures to investors in advance of using share cancellation and when share cancellation is used. Compliance with rule 2a–7's information collection requirements is required to obtain or retain benefits.

We estimate that approximately 284 money market funds are subject to rule 2a–7. We estimate that each money market fund incurs an average of 700 hours per year to comply with the recordkeeping requirements of rule 2a–7 (relating to the establishment and maintenance of policies and procedures, records of credit risk analyses, certain notices or reports to the fund's board of directors, determinations made by the fund's board of directors, and other information collection requirements that do not involve third-party disclosures) and an average of 75 hours per year to comply with the third-party disclosure requirements of rule 2a–7 (including requirements to provide certain information on money market fund websites and requirements for certain funds to provide disclosures to investors related to share cancellation). We estimate the total annual burden of the collection of information requirements of rule 2a–7 to be 220,100 hours, with an aggregate external cost burden of $51,120,000.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number.

Written comments are invited on: (a) whether this proposed collection of information is necessary for the proper performance of the functions of the SEC, including whether the information will have practical utility; (b) the accuracy of the SEC's estimate of the burden imposed by the proposed collection of information, including the validity of the methodology and the assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated, electronic collection techniques or other forms of information technology.

Please direct your written comments on this 60-Day Collection Notice to Austin Gerig, Director/Chief Data Officer, Securities and Exchange Commission, c/o Tanya Ruttenberg via email to *PaperworkReductionAct@sec.gov* by October 5, 2026.

Dated: July 30, 2026.

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106014; File No. SR–MSRB–2026–04]

Self-Regulatory Organizations; Municipal Securities Rulemaking Board; Notice of Filing of a Proposed Rule Change To Amend MSRB Rule G–27 To Exclude Certain Public Finance Activities From Term ''Structuring of Public Offerings or Private Placements,'' Extend the Length of the Exclusion for Non-Primary Residences From Municipal Branch Office Designation, and Make a Technical Update to the Rule's Title

July 30, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'' or ''Exchange Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 27, 2026 the Municipal Securities Rulemaking Board (''MSRB'' or ''Board'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the MSRB. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The MSRB filed with the Commission a proposed rule change to (i) exclude certain public finance activities from the term ''structuring of public offerings or private placements'' as used within MSRB Rule G–27, (ii) extend the length of the exclusion for non-primary residences from municipal branch office designation, and (iii) make a technical update to the title of MSRB Rule G–27, as described herein (the ''proposed rule change'').

If the Commission approves the proposed rule change, the MSRB will announce the operative date of the proposed rule change in a regulatory notice to be published on the MSRB website no later than 30 days following Commission approval. The compliance date would be no earlier than 90 days and no later than 180 days following Commission approval.

The text of the proposed rule change is available on the MSRB's website at *https://msrb.org/2026-SEC-Filings* and at the MSRB's principal office.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the MSRB included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The MSRB has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

As part of the MSRB's broad retrospective rule review,[3] the MSRB continues to evaluate ways to modernize its rules to reflect how brokers, dealers, and municipal securities dealers (collectively,

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The MSRB regularly engages in retrospective reviews of its rules and associated interpretive guidance with the goal of ensuring that they achieve their intended purposes and take into account the current state of the municipal securities market. *See* MSRB Rulebook Modernization web page, available at *https://www.msrb.org/Rulebook-Modernization.*

''dealers'') operate today and will continue to evolve their businesses to operate in the future. Additionally, the MSRB recognizes that advancements in technology and compliance tools have enhanced dealers' ability to more effectively supervise the conduct of the municipal securities activities of the dealer and that of its associated persons in a decentralized environment due to hybrid work arrangements. The MSRB understands that certain surveillance and monitoring technology can provide a more real-time supervision of associated persons regardless of their physical location Thus, dealers have made strides in modernizing their workplace while also undertaking the necessity of putting proper safeguards in place to ensure compliance with MSRB rules and the applicable provisions of the Exchange Act and rules thereunder.

The proposed rule change is intended to provide greater flexibility to dealers and their associated persons with respect to hybrid work arrangements without modifying the office of municipal supervisory jurisdiction (''OMSJ'') and municipal branch office definitions within MSRB Rule G–27(g)(i) and MSRB Rule G–27(g)(ii), respectively. These provisions were originally adopted to harmonize with the supervisory requirements for broker-dealer members of FINRA (formerly NASD) under applicable supervisory rules (then NASD Rules 3010 and 3012, now FINRA Rules 3110 and 3120).[4] In the context of harmonizing the prior version of MSRB Rule G–27 to parallel the overall supervisory obligations established by FINRA for its member firms, the MSRB stated that it intends generally that the provisions of Rule G–27 be read consistently with the analogous NASD provisions, unless the MSRB specifically indicates otherwise. Thus, relevant NASD interpretations would be presumed to apply to the comparable MSRB provision, subject to the MSRB's right to make distinctions when necessary and appropriate.[5] The MSRB highlights that this presumption with respect to MSRB Rule G–27 and interpretations of analogous FINRA provisions only applies where there are no material differences between such comparable provisions and that any material differences in MSRB Rule G–27 from the provisions of otherwise comparable FINRA supervisory requirements cannot be ignored.

The proposed rule change would extend an exemption from municipal branch office designation under MSRB Rule G–27(g)(ii)(A)(3) for non-primary residences from less than 30 business days per year to up to 90 business days per year providing broader latitude to dealers designing their remote or hybrid work policies. The proposed rule change would also provide clarity to dealers attempting to interpret and comply with MSRB Rule G–27(g)(i) by providing guidance on the meaning of the term ''structuring of public offerings or private placements'', also commonly referred to as public finance banking activities. More specifically, the proposed rule change describes the types of activities that would be included or excluded from the meaning of ''structuring of public offerings or private placements'' under MSRB Rule G–27. The MSRB notes it has never publicly defined the scope of the term ''structuring of public offerings or private placements,''[6] which the MSRB understands has led to dealers designating some locations as an OMSJ out of an abundance of caution.[7] Thus, the MSRB believes defining the term would permit dealers to better evaluate such designations. Resultingly, a better understanding for the municipal securities market regarding how the term is interpreted would aid understanding of the required supervisory framework under MSRB Rule G–27. The proposed rule change would also make clarifying edits to the title of MSRB Rule G–27 to plainly state that the rule is applicable to brokers, dealers, and municipal securities dealers.

Background

MSRB Rule G–27(a), on obligation to supervise, requires each dealer to supervise the conduct of the municipal securities activities of the dealer and its associated persons to ensure compliance with MSRB rules, and the applicable provisions of the Exchange Act and rules thereunder. As such, MSRB Rule G–27(b)(iii) requires dealers to designate as an OMSJ any office at which any one or more of the enumerated activities under MSRB Rule G–27(g)(i) occurs at such office with respect to municipal securities. Locations that are not required to be designated as an OMSJ constitute either a municipal branch office or a non-branch location.[8]

Definition of Municipal Branch Office

Rule G–27(g)(ii)(A) defines a municipal branch office as any location where one or more associated persons of a dealer regularly conducts the business of effecting any transactions in, or inducing or attempting to induce the purchase or sale of any municipal security, or is held out as such, with certain exceptions.[9] The MSRB has not defined the phrase ''regularly conducts'' for purposes of MSRB Rule G–27(g)(ii)(A), on municipal branch office, but instead, has provided a measure of flexibility for dealers to define and interpret how the phrase ''regularly conducts'' fits within their respective business models, and what frequency would constitute regularly working from a particular location for purposes of MSRB Rule G–27(g)(ii)(A)'s definition of municipal branch office.[10] The exceptions from municipal branch office designation pursuant to MSRB Rule G–27(g)(ii) are applicable to locations that would not otherwise trigger designation as an OMSJ under the conditions outlined in MSRB Rule G–27(g)(i),[11] as an OMSJ designation for a particular office would trump the exceptions under the rule. One such exception from the municipal branch office definition, listed in Rule G–27(g)(ii)(A)(3), is for any location, other than a primary residence, that is used for municipal

[4] *See* Exchange Act Release No. 55792 (May 22, 2007), 72 FR 29564 (May 29, 2007) (File No. SR–MSRB–2006–10) (the ''2007 Supervisory Amendments'').

[5] *Id.,* 72 FR at 29564. Currently, FINRA publishes guidance with respect to its supervisory requirements on its website at *https://www.finra.org/rules-guidance/key-topics/supervision#guidance.*

[6] The MSRB notes that FINRA also has never defined the term ''structuring of public offerings or private placements.''

[7] The MSRB reviewed some data derived from the Uniform Branch Office Registration Form (Form BR), which is a form that firms use to register branch offices and offices of supervisory jurisdiction (''OSJs'') with FINRA and as required by the relevant state jurisdiction or other SROs. Form BR's Section 2 (Registration/Notice Filing/Type of Office/Activities) requires a firm to indicate whether a branch office is an OSJ. The MSRB notes that the designation of a branch office as an OMSJ, as defined under MSRB Rule G–27, is optional on Form BR, so while incomplete, the MSRB took note of the significant number of single-person OMSJ's, which was useful in the MSRB's analysis of current designation practices.

[8] FINRA similarly distinguishes among offices of supervisory jurisdiction and branch offices, which must be registered, and unregistered offices or non-branch locations in FINRA Rule 3110. *See also* Exchange Act Release No. 48897 (December 9, 2003), 68 FR 70059, 70061 (December 16, 2003) (File No. SR–NASD–2003–104) (Notice of Filing of Proposed Rule Change and Amendment Nos. 1 and 2 Related to Proposed New Uniform Definition of ''Branch Office'' Under NASD Rule 3010(g)(2)) (the ''2003 FINRA Notice of Filing'').

[9] *See* MSRB Rule G–27(g)(ii)(A)(1)–(7).

[10] FINRA has also publicly stated ''[t]he term ''regularly conducts'' in Rule 3110(f)(2)(A) historically has not been a defined term under the uniform branch office definition. As such, there is no defined threshold level of ''regular'' that would make a location a ''branch office'' under Rule 3110(f)(2)(A).'' *See* FINRA's Residential Supervisory Locations (RSLs) Frequently Asked Questions, Q.18 on meaning of ''regularly conducts'' under FINRA Rule 3110(f)(2), available at *https://www.finra.org/rules-guidance/key-topics/residential-supervisory-locations#faqs.*

[11] *See* MSRB Rule G–27(g)(i).

securities activities for less than 30 business days in any one calendar year, provided the dealer complies with the provisions of MSRB Rule G–27(g)(ii)(A)(2)(a) through (h).[12] The MSRB also points out that conduct that rises to the level of constituting regularly conducting the business of effecting transactions in municipal securities is conduct that could cause a primary residence to be designated as a municipal branch office.

Definition of Office of Municipal Supervisory Jurisdiction

Rule G–27(g)(i) defines the term OMSJ as any office of a dealer where one or more of the following functions take place:

(A) order execution and/or market making;

(B) structuring of public offerings or private placements;

(C) maintaining custody of customers' funds and/or municipal securities;

(D) final acceptance (approval) of new accounts on behalf of the dealer;

(E) review and endorsement of customer orders, pursuant to MSRB Rule G–27(c)(i)(G)(2);

(F) final approval of advertising for use by persons associated with the dealer, pursuant to MSRB Rule G–21(f); or

(G) responsibility for supervising the municipal securities activities of persons associated with the dealer at one or more other municipal branch offices of the dealer.

As aforementioned, the MSRB has never defined the phrase ''structuring of public offerings or private placements'' under MSRB Rule G–27(g)(i)(B). As such, it has been up to dealers to determine which public finance banking activities would fall under the umbrella of ''structuring of public offerings or private placements,'' and would therefore be required to be conducted at an OMSJ, and which activities would not fall under the umbrella and could potentially be conducted at other location types.

There are additional compliance and regulatory obligations for locations classified as an OMSJ or a municipal branch office. MSRB Rule G–27(d)(i)(A) requires dealers to inspect every OMSJ and supervisory municipal branch office at least annually.[13] MSRB Rule G–27(d)(i)(B) requires every non-supervisory municipal branch office to be inspected at least every three years.[14] MSRB Rule G–27(d)(i)(C) requires every non-branch location to be inspected on a regular periodic schedule.[15] Furthermore, an office that is designated as an OMSJ or a supervisory municipal branch office must have one or more appropriately registered principals on-site.[16] All municipal branch offices must have at least one or more appropriately registered representatives or principal.[17] The OMSJ and municipal branch office supervisory framework is currently harmonized with FINRA Rule 3110's definitions of an OSJ and branch office, respectively.[18] The proposed rule change is discussed in greater detail below.

Description of Proposed Rule Change

Extend the 30-Business Day Exclusion for Non-Primary Residences from Municipal Branch Office Designation

MSRB Rule G–27(g)(ii)(A)(3) currently allows for a non-primary residence where municipal securities business is conducted for less than 30 business days per calendar year to be excluded from municipal branch office designation, if the location meets the provisions of MSRB Rule G–27(g)(ii)(A)(2)(a) through (h), as described above.[19] The proposed rule change would increase this limit in MSRB Rule G–27(g)(ii)(A)(3) to up to 90 business days per calendar year without amending the conditions outlined in the rule.

The increase from less than 30 business days per calendar year to up to 90 business days per calendar year for an associated person to work from a non-primary residence without triggering municipal branch office designation would provide dealers greater latitude in permitting their associated persons to work at non-primary residential locations, such as a vacation home or the home of a partner or family member, or at another location. The MSRB believes that the proposed rule change would also provide dealers additional and reasonable flexibility in implementing hybrid work arrangements that acknowledge and account for advances in technology that could allow for effective remote supervision capabilities, while also appropriately limiting the municipal securities related work that could be done away from a municipal branch office. In addition to changing the annual business day limit from 30 to 90, the proposed rule change would also make minor technical edits to MSRB Rule G–27(g)(ii)(A)(3) to improve clarity of the rule by removing the term ''less than'' and adding the term ''or fewer'' into the text of the rule.

The MSRB notes that the current less than 30-business days per calendar year exclusion from municipal branch office designation for work performed at a non-primary residence, and the potential extension to up to 90 business days per calendar year under the proposed rule change, is an exclusion that would be allowed under MSRB Rule G–27. However, dealers would need to conduct their own risk analysis to determine if this type of remote work, and the 90-business day limit allowed under the proposed rule change, is appropriate for their business model,

[12] MSRB Rule G–27(g)(ii)(A)(2)(a) through (h) requires, as conditions for meeting the exception from municipal branch office designation, that: (a) only one associated person, or multiple associated persons who reside at that location and are members of the same immediate family, conduct business at the location; (b) the location is not held out to the public as an office and the associated person does not meet with customers at the location; (c) neither customer funds nor securities are handled at that location; (d) the associated person is assigned to a designated municipal branch office, and such designated municipal branch office is reflected on all business cards, stationery, advertisements and other communications to the public by such associated person; (e) the associated person's correspondence and communications with the public are subject to the dealer's supervision in accordance with MSRB Rule G–27; (f) electronic communications (*e.g.,* email) are made through the dealer's electronic system; (g) all orders are entered through the designated municipal branch office or an electronic system established by the dealer that is reviewable at the municipal branch office; and (h) written supervisory procedures pertaining to supervision of sales activities conducted at the residence are maintained by the dealer.

[13] Pursuant to MSRB Rule G–27(g)(ii)(B), notwithstanding the exclusions in MSRB Rule G–27(g)(ii)(A), any location that is responsible for supervising the municipal securities activities of persons associated with the dealer at one or more non-branch locations of the dealer is considered to be a municipal branch office. Moreover, this type of municipal branch office is known as a ''supervisory municipal branch office.'' *See, e.g.,* MSRB Rule G–27(d)(i)(B). *See also* FINRA Rule 3110 Describes Four Office Classifications available at: *https://www.finra.org/rules-guidance/key-topics/residential-supervisory-locations/office-clasifications* (the ''FINRA Office Classification Guidance'').

[14] A non-supervisory municipal branch office would generally be deemed a location that is not charged with supervising the municipal securities activities of persons associated with the dealer. *See generally* FINRA Office Classification Guidance (distinguishing supervisory branch office and non-supervisory branch office locations).

[15] While MSRB rules do not explicitly establish a specific timeframe for such regular periodic inspections, currently FINRA Rule 3110.13 sets out a general presumption that a non-branch location will be inspected at least every three years, even in the absence of any red flags, and if a FINRA-member dealer establishes a longer periodic inspection schedule, such member must document in its written supervisory and inspection procedures the factors used in determining that a longer periodic inspection cycle is appropriate. *See* FINRA Rule 3110.13.

[16] *See* MSRB Rule G–27(b)(iv).

[17] *Id.*

[19] *See supra* note 12.

supervisory structure and overarching supervisory system.

Structuring of Public Offering or Private Placements

The proposed rule change would add proposed new Supplementary Material .06, on Exemption of Excluded Public Finance Activities from Office of Municipal Supervisory Jurisdiction and Municipal Branch Office Designation, and .07, on Definition of Excluded Public Finance Activities to MSRB Rule G–27. Proposed new Supplementary Material .06 of MSRB Rule G–27 would state that a location would not meet the definition of an OMSJ under MSRB Rule G–27(g)(i) if associated persons at such location engage in excluded public finance activities, so long as that location does not engage in any other activities that would require designation as an OMSJ. The proposed supplementary material would also expressly state that these excluded public finance activities would not be deemed to constitute ''structuring of public offerings or private placements'' within the meaning of OMSJ under MSRB Rule G–27(g)(i)(B). Furthermore, under proposed new Supplementary Material .06 of MSRB Rule G–27, a primary residence that otherwise meets the exception from municipal branch office designation under MSRB Rule G–27(g)(ii)(A)(2), and from which an associated person engages in excluded public finance activities, would be deemed a non-branch location, as long as the associated person does not engage in any other activities that would require designation of such location as an OMSJ, under MSRB Rule G–27(g)(i). Dealers would need to look carefully at the activities of their non-branch locations to ensure that they are not considered by MSRB Rule G–27 to be a municipal branch office. In addition, the proposed rule change would add a reference to new Supplementary Materials .06 and .07.

Proposed new Supplementary Material .07 of MSRB Rule G–27 would define the term excluded public finance activities as activities that are associated with the structuring of public offerings or private placements, including but not limited to, debt modeling, financial analysis, number running and the solicitation of issuers or obligated persons for the dealer's investment banking services in connection with municipal securities (*e.g.* public finance banking services). However, this does not include final approval of a public offering or private placement transaction (*i.e.,* structuring) conducted by the dealer. Proposed new Supplementary Material .07 of MSRB Rule G–27 would also make clear that the activities described within the definition of excluded public finance activities are not an exhaustive list of excluded public finance activities, and other activities could fall within the definition if a dealer can demonstrate that such other activities do not include the final approval of a public offering or private placement transaction. The MSRB believes that activities such as preliminary data analysis and modeling, as well as running standard debt capacity or sensitivity analyses using established firm models controlled by senior personnel, which are much more specific than the broader enumerated list of excluded public finance activities, would be examples of activities that would be categorized as excluded public finance activities under proposed new Supplementary Material .07 of MSRB Rule G–27. The MSRB is intentionally leaving the definition of excluded public finance activities under proposed new Supplementary Material .07 as business model neutral, without listing an exhaustive list of activities that would qualify as excluded public finance activities, to account for the diversity in business models among dealers.

Proposed new Supplementary Material .07 of MSRB Rule G–27 would also expressly state that the final approval of a public offering or private placement transaction would be explicitly outside of the scope and definition of excluded public finance activities, since such final approval of a public offering or private placement transaction is deemed structuring for purposes of the OMSJ definition, pursuant to MSRB Rule G–27(g)(i). The MSRB recognizes that there are many individual supportive decisions made in the overall work to be done on a municipal securities public offering or private placement and, as a result, the MSRB is clarifying that it deems the final approval of a public offering or private placement transaction as constituting ''structuring of public offerings or private placements.'' The MSRB notes that such final approval of a public offering or private placement transaction should be conducted by a person in a principal-level capacity.[20]

The MSRB believes that proposed new Supplementary Material .06 and .07 of MSRB Rule G–27 would not alter the definition of OMSJ, but rather, would clarify that certain activities performed by municipal securities professionals in furtherance of the ''structuring of a public offering or private placements'' do not constitute structuring and therefore do not rise to the level of activities that need to take place at an OMSJ. Furthermore, by clarifying that the MSRB deems structuring as the final approval of a public offering or private placement transaction, dealers are better equipped, given varying business models, to evaluate their specific business model and make determinations as to where ultimate decision making and supervisory authority rest for purposes of designating such locations as an OMSJ.

The MSRB notes that the phrase ''final approval of a public offering or private placement transaction'' in proposed new Supplementary Material .07 would reference actions internal to the dealer relating to the decision to approve such transaction, the timing of which may vary depending on the specific transaction or the processes undertaken by a specific dealer. It is not the MSRB's intention for final approval to entail the act itself of executing a bond purchase agreement (which may occur at an issuer's location or at some other location away from the offices of the dealer) or submitting a bid in response to a notice of sale. Rather, this provision of the proposed rule change turns on dealers' actions that ultimately leads to the formality of executing the bond purchase agreement or submitting a bid. The MSRB notes that, while the proposed rule change takes a principles-based approach to the determination of what constitutes final approval of a public offering or private placement transaction, proposed new Supplementary Material .07 would require dealers to adopt compliance policies and procedures reasonably designed to make clear what action taken constitutes such final approval by the dealer. Proposed new Supplementary Material .07 would also require dealers to take into consideration all relevant factors in determining what action taken constitutes final approval of a public offering or private placement transaction to ensure dealers'

[20] Pursuant to MSRB Rule G–2, on standards of professional qualification, no dealer shall effect any transaction in, or induce or attempt to induce the purchase or sale of, any municipal security, unless such dealer and every natural person associated with such dealer is qualified in accordance with the rules of the MSRB. MSRB Rule G–3(b)(i) defines a municipal securities principal as a person, associated with a dealer, who is directly engaged in the management, direction or supervision of, among other things, underwriting, trading or sales of municipal securities, and MSRB Rule G–3(b)(ii) requires such individuals that meet the definition of a municipal securities principal to be appropriately qualified by taking and passing the Municipal Securities Principal Qualification Examination.

supervisory systems are reasonably designed to achieve compliance with applicable securities laws and regulations, and with applicable MSRB rules. The proposed rule change also prescribes that such compliance policies and procedures should support evidencing compliance to the appropriate examining authority.

Regulatory Need

The MSRB acknowledges that extending the exclusion for municipal securities work performed at a non-primary residence from municipal branch office designation from less than 30 business days per calendar year to up to 90 business days per calendar year under MSRB Rule G–27(g)(ii)(A)(3) would result in a move away from harmonization with FINRA Rule 3110, which contains a similar exclusion from branch office registration for work performed at a non-primary residence for less than 30 business days per year.[21] The MSRB also recognizes that defining ''structuring of public offerings or private placements,'' and resultingly potential changes in designations of office or locations may cause regulatory inconsistencies. Although harmonization allows dealers who are also FINRA members to more easily comply with the requirements under both rule sets regarding office classification and designation, it has been the MSRB's longstanding position that it would weigh rule harmonization in the context of the uniqueness of the municipal securities market.

The MSRB highlights that there are an estimated 50,000 issuers (and other issuing authorities) that rely on municipal bonds to fund local projects, which provide essential services to local communities.[22] In the last five years, the MSRB estimates that 22,000 issuers engaged in a public offering or private placement transaction. In addition, there are approximately one million unique municipal bonds outstanding, whereas by comparison the corporate bond market has about 6,600 different issuers and 60,000 unique bonds outstanding.[23] Given the broad geographical dispersion of municipal issuers across the entirety of the country in all 50 states, the District of Columbia, and U.S. territories in which offerings of municipal securities are conducted according to state and local laws and regional practices that vary considerably, it can be uniquely challenging for dealers in this market, as compared to other securities markets, to effectively engage with prospective issuer clients and service existing issuer clients.[24] It is the MSRB's understanding that many dealers may choose a business model that segments their issuer coverage by region to offer more tailored and more easily accessible service to such issuer clients. In addition, the MSRB estimates that a large segment of the issuer community is not geographically positioned in close proximity to larger metropolitan areas where financial services firms have historically operated the bulk of their activities. Resultingly, many dealers choose to have public finance bankers operate in a much more geographically dispersed manner as compared to other segments of their securities activities so as to meet the needs of their issuer clients in a more effective manner in light of the realities of the municipal securities market. Often, these geographically dispersed public finance bankers must operate under current MSRB Rule G–27 as a single-person OMSJ, meeting all of the requirements under MSRB Rule G–27 arising from being an OMSJ. The MSRB believes that the proposed rule change would support the competitiveness of the municipal securities market and would provide greater workplace flexibility while maintaining appropriate supervisory requirements for the activities conducted in the manner described above.

Rule Title Clarification

The proposed rule change would change the title of MSRB Rule G–27 from ''Supervision'' to ''Supervisory and Compliance Obligations of Brokers, Dealers and Municipal Securities Dealers.'' This non-substantive, technical change would clarify that MSRB Rule G–27 is applicable to dealers only, as well as standardize the title with MSRB Rule G–44, on Supervisory and Compliance Obligations of Municipal Advisors.

2. Statutory Basis

The MSRB believes that the proposed rule change is consistent with Section 15B(b)(2) of the Exchange Act,[25] which provides that the MSRB shall propose and adopt rules to effect the purposes of the Exchange Act with respect to, among other matters, transactions in municipal securities effected by dealers. Section 15B(b)(2)(C) of the Exchange Act[26] provides that the MSRB's rules shall be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in municipal securities and municipal financial products, to remove impediments to and perfect the mechanism of a free and open market in municipal securities and municipal financial products, and, in general, to protect investors, municipal entities, obligated persons, and the public interest.

The MSRB believes the proposed rule change is consistent with Section 15B(b)(2)(C) of the Exchange Act[27] because the proposed rule change would promote just and equitable principles of trade by interpreting and clarifying the meaning behind the term structuring of public offerings or private placements by way of excluding certain activities from the definition. The MSRB believes that clear guidance as to what work functions are included within the meaning of the term ''structuring'' for the municipal securities market would facilitate dealers' understanding and implementation of sound compliance policies and procedures when applying the principles of MSRB Rule G–27 to each dealer's business model. Furthermore, while differing from FINRA, the proposed rule change's definition of excluded public finance activities would remove impediments from a free and open market in municipal securities and municipal financial products. By clarifying the phrase, ''structuring of public offerings or private placements,'' that has not been defined by the MSRB and has been interpreted inconsistently by the dealer community, dealers are able to lessen resources spent on such compliance matters and focus on the functional work that facilitate a free and open market in municipal securities and municipal financial products.

In addition, the proposed rule change would remove an impediment to a free and open market by providing flexibility to firms implementing their hybrid work models. The MSRB believes that

[21] FINRA Rule 3110(f)(2)(A)(iii) contains an exception from branch office registration for any location, other than a primary residence, that is used for securities business for less than 30 business days in any one calendar year, provided certain conditions proscribed by FINRA Rule 3110 are met.

[22] *See* MSRB's 2026 Municipal Market Factsheet, January 2026, available at: *https://www.msrb.org/sites/default/files/2022-09/MSRB-Muni-Facts.pdf*.

[23] The MSRB used the Bloomberg Terminal to analyze and aggregate the data on the size of the corporate bond market and unique outstanding bonds.

[24] The MSRB notes that, based on Form A–12 filings, only 177 of the 926 MSRB-registered dealers identify municipal debt underwriting as a business activity.

[25] 15.U.S.C. 78*o*–4(b)(2).

[26] 15 U.S.C. 78*o*–4(b)(2)(C).

[27] *Id.*

allowing the additional flexibility of working remote from a non-primary residence for up to 90 business days per calendar year, and clarifying that excluded public finance activities can generally be conducted at a primary residence if the applicable conditions are met, in both cases without triggering municipal branch office designation would remove an impediment to dealers and their municipal securities professionals by allowing dealers more flexibility to craft their hybrid work models that reflect their own individual risk factors and technological capabilities. Furthermore, the MSRB does not believe that any changes to MSRB Rule G–27 under the proposed rule change would cause harm to investors, issuers, obligated persons or the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 15B(b)(2)(C) of the Exchange Act [28] requires that MSRB rules not be designed to impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act. The MSRB has considered the economic impact of the proposed rule change and believes that it would not impose any burden on competition, as the proposed rule change to MSRB Rule G–27 on dealer supervision would clarify the meaning of ''structuring of public offerings or private placements'' and increase the 30-business day per calendar year exclusion from the municipal branch office designation for locations that are not a primary residence to 90-business days per calendar year. The MSRB believes that the proposed rule change would provide reasonable flexibility for public finance activities without compromising the need for investor and issuer protection. In addition, the proposed rule change would be applicable to all dealers. Therefore, the MSRB believes the proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act.[29]

In determining whether the proposed rule change is necessary and appropriate, the MSRB was guided by the MSRB's Policy on the Use of Economic Analysis in MSRB Rulemaking.[30] In accordance with this policy, the MSRB evaluated the potential impacts of the proposed rule change relative to the baseline, which is the current MSRB Rule G–27. The proposed rule change to MSRB Rule G–27 is intended to foster greater flexibility for municipal market professionals in two separate ways. First, the proposed rule change seeks to outline, in proposed new Supplementary Material .07, a non-exhaustive list of excluded activities from the ''structuring of public offerings or private placements'' by drawing a distinction between the function of final approval of a public offering or private placement transaction from the functional work that supports the structuring of such a transaction and exclude these supporting activities from the definition of ''structuring of public offerings or private placements.'' Under the proposed rule change, these excluded public finance activities would not be required to be conducted at an OMSJ or, if conducted at a primary residence and the applicable conditions are met, at a municipal branch office. Second, the proposed rule change is intended to create flexibility for municipal market professionals by extending the exclusion for locations, other than a primary residence, that are used for municipal securities activities from less than 30 business days per calendar year to up to 90 business days per calendar year from municipal branch office designation.

Benefits

The MSRB believes that dealers would benefit from proposed new Supplementary Material .06 and .07 of MSRB Rule G–27 regarding public finance activities that are excluded from the definition of OMSJ. At present, any location with one or more persons engaging in activities that consist of structuring of public offerings or private placements should be classified by the dealer under MSRB Rule G–27(g)(i) as an OMSJ, and as a result, these locations must comply with MSRB Rule G–27's accompanying regulatory and compliance requirements for OMSJs. These requirements include the presence of an on-site supervisor qualified as a municipal securities principal and the annual inspection of the location.[31] The proposed rule change identifies a non-exhaustive list of excluded public finance activities that support the overall structuring process but would not necessarily need to be conducted from a location designated as an OMSJ. More specifically, performing these activities at a given location would not, by itself, qualify the office or location as an OMSJ if no other activities occurring at such location would necessitate OMSJ designation. Further, the proposed rule change would provide that performing such excluded public finance activities at an associated person's primary residence, if all other applicable conditions are met, would not necessitate municipal branch office designation. The MSRB expects that dealers would benefit from the proposed rule change with a reduction in expenses related to inspecting, licensing and supervising at OMSJs without harming issuer and investor protection.

In addition, the proposed rule change's extended 90-business day per calendar year exclusion from municipal branch office designation for locations, other than a primary residence, that are used for municipal securities activities would provide dealers' associated persons additional and reasonable flexibility to work from locations that are not their primary residence, such as a vacation or second home, without triggering a municipal branch office designation. The MSRB believes the extension would lessen the compliance burden for firms tracking the location of their employees by extending the number of days they are allowed to work at these locations each calendar year, without materially reducing the protections for investors and issuers given the widespread adoption of a culture of hybrid work environments, which the MSRB believes would help in recruiting and maintaining valuable personnel.

Costs [32]

The MSRB acknowledges that dealers would likely incur some higher compliance costs due to the proposed rule change, relative to the baseline state (current state). Dealers would be expected to incur one-time, upfront costs related to assessing the functions of OMSJs for purposes of re-designation, as applicable, and revising policies and procedures along with ongoing compliance costs with the proposed rule change. Table 1 shows that firms would incur one-time upfront costs of approximately $3,446. This includes the costs associated with compliance

[29] *Id.*

[30] *See* The MSRB's Policy on the Use of Economic Analysis in MSRB Rulemaking, available at *https://www.msrb.org/Policy-Use-Economic-Analysis-MSRB-Rulemaking.* In evaluating whether there was any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act, the MSRB was guided by its principles that required the MSRB to consider costs and benefits of a rule change, its impact on efficiency, capital formation and competition, and the main reasonable alternative regulatory approaches.

[31] *See* MSRB Rule G–27(b)(iv) and MSRB Rule G–27(d)(i)(A).

[32] Due to rounding, numbers presented throughout this document may not add up precisely to the totals provided.

personnel evaluating all current OMSJs and making a determination on whether certain locations should be re-designated based on functional work ($393 × 2 hours = $786) updating existing written supervisory procedures (WSPs) along with a review by an inhouse compliance counsel ($463 × 1 hour = $463) and outside legal counsel ($630 × 1 hour = $630) and the approvals conducted by the director of compliance ($610 × 1 hour = $610) and the chief compliance officer ($693 × 0.5 hours = $347).[33] The MSRB also estimates one hour of training and education conducted by the director of compliance ($610 × 1 hour = $610). In addition to the upfront costs, the MSRB also identified one area of incremental ongoing costs for a total of approximately $2,440 for the purpose of ensuring compliance, especially in light of different requirements between FINRA's Rule 3110 and MSRB's Rule G–27, which includes dealers undertaking a review of the policies on an annual basis to be conducted by the director of compliance ($610 × 4 hours = $2,440). On aggregate, the MSRB believes the upfront and ongoing costs are minor. The MSRB notes, while dealers would have initial upfront costs and may face higher ongoing compliance costs, brought on by having diverging regulatory requirements, the MSRB notes that the proposed rule change does not remove any of the current designations that are available under the baseline. Thus, the MSRB expects that dealers will assess and re-designate locations, as applicable, only if doing so is beneficial to their operations—recognizing that the cost of complying with the proposed rule change would presumably be a factor in dealers' decision-making process.[34]

TABLE 1—UPFRONT AND PARTIAL ONGOING COSTS FOR DEALERS[35]

Cost components	Hourly rate	Number of hours	Cost per firm
Upfront Costs.			
(a) Revision of Policies and Procedures:			
Compliance Manager	$393	2	$786
In-House Compliance Counsel	463	1	463
Outside Legal Counsel	630	1	630
Director of Compliance	610	1	610
Chief Compliance Officer (CCO)	693	0.5	347
			2,836
(b) Training and Education:			
Director of Compliance	610	1	610
			610
Total Upfront Costs			3,446
Ongoing Costs			
(a) Compliance Review.			
Director of Compliance	610	4	2,440
Total Ongoing Costs			2,440

It is the MSRB's belief that investors and issuers would not realize any material reduction in protections from the proposed rule change as the proposed 90-business days per calendar year exclusion would account for approximately one-third (35%) of the total business days in a year and the majority of municipal securities activities would be conducted at a municipal branch office location.[36] In addition, the final approval of a public offering or private placement transaction would continue to take place at OMSJs and all activities in the structuring process would continue to be subject to the same fair practice and supervisory obligations established under MSRB rules. In summary, the MSRB anticipates that the benefits, as described above, would outweigh the costs over time.

Effect on Competition, Efficiency, and Capital Formation

The MSRB believes that the proposed rule change would not impose a burden on competition nor hinder capital formation, as the changes are applicable to all dealers. The proposed rule change could improve the municipal securities market's operational efficiency and promote regulatory certainty by providing dealers with greater flexibility in achieving the regulatory obligations outlined in MSRB Rule G–27. At present, the MSRB is unable to quantitatively evaluate the magnitude of the efficiency gains or losses but believes the benefits of greater flexibility and a reduction in certain compliance burdens, including expenses related to annual office inspection requirements and the on-site principal requirement for OMSJs, if dealers choose to re-designate locations, are accumulated over time for all dealers and would outweigh the one-time upfront costs of revising policies and procedures as well as the incremental ongoing compliance and recordkeeping costs by dealers.

[33] The total cost to update policies and procedures is estimated as $2,836 ($786 + $463 + $630 + $610 + $347 = $2,836).

[34] The MSRB believes that dealers may find that some existing OMSJs become unnecessary in light of the proposed rule change, and thereby, are able to reduce their expenses attendant to those locations, including FINRA branch office registration fees.

[35] The hourly rates data is gathered from a previous Commission filing. *See* Exchange Act Release No. 94062 (January 26, 2022), 87 FR 15496, 15624 (March 18, 2022) (File No. S7–02–22). The Commission's economic analysis utilizes the Securities Industry and Financial Markets Association, Management & Professional Earnings in the Securities Industry—2013 Report for the hourly rates of various financial industry market professionals. To compensate for inflation, the data reflects the fourth quarter of 2025 hourly rate level after adjusting for the annual cumulative wage inflation rate of 47% between 2013 and 2025. *See* The Federal Reserve Bank of St. Louis Employment Cost Index: Wages and Salaries: Private Industry Workers, available at *https://fred.stlouisfed.org/series/ECIWAG.* The MSRB estimates the number of hours for each task based on the MSRB's consultation with regulated entities' compliance officers for a median-sized firm.

[36] The number of business days, as percentages, as used in this alternative assumes 250 business days per year.

Reasonable Regulatory Alternatives

The MSRB has identified several reasonable alternatives for the proposed rule change that were first presented in the request for comment.[37]

One alternative contemplated was to remove the activity of ''structuring of public offerings or private placements'' from MSRB Rule G–27(g)(i)'s definition of OMSJ. This alternative would reduce instances of designating a location as an OMSJ, as well as the burden associated with such designation because ''structuring of public offerings or private placements'' would no longer prompt a designation. This would further decrease compliance burdens associated with assigning an on-site supervisor qualified as a municipal securities principal, as well as remove the need to conduct an annual inspection of that location by the dealer. While this alternative calls for the removal of ''structuring of public offerings or private placements'' from MSRB Rule G–27(g)(i)'s definition of OMSJ, dealers may still be required to designate such locations as an OSJ under FINRA Rule 3110, which does not contain a similar provision excluding certain public finance activities from the definition of OSJ, and could lead to an increase in burdens and challenges due to inconsistencies in regulatory approach in complying with MSRB and FINRA rules. Additionally, there are interdependencies upon which the current office and location framework rests, for example, state security regulators utilize data collected by FINRA on OSJ and voluntary OMSJ designations. The result would be a patchwork of supervisory regulation that may introduce additional compliance burdens for dealers. For this reason, the MSRB believes the proposed rule change is superior to this alternative, although the MSRB believes that this alternative could be reconsidered in the future if, for example, other regulators were to revisit, in a holistic manner, the office designation requirements in their respective regulatory frameworks.

Another alternative the MSRB considered was to explicitly provide for a fully principle-based approach to defining the term ''structuring of public offerings or private placements.'' MSRB Rule G–27 does not currently differentiate between the various public finance activities that may be performed as part of the ''structuring of public offerings or private placements.'' A fully principles-based approach would allow dealers to make their own determination, with significantly less regulatory guidance, of what structuring means to each individual dealer, and subsequently which locations would require OMSJ designation. However, this alternative approach may introduce additional regulatory uncertainty into dealer supervision. A dealer may require all public finance activities to occur at an OMSJ out of an abundance of caution, which would not reduce any compliance burden. By comparison, the approach taken by the proposed rule change would provide a framework that would allow greater certainty for dealers regarding those activities that may constitute structuring and those that may be excluded. The proposed rule change would also maintain some degree of flexibility in determining whether any activities not explicitly outlined in the proposed rule change are best treated in one category or another, depending on a dealer's specific business model, practices and processes. It is for this reason that the MSRB determined this alternative is inferior to the proposed rule change.

Finally, an alternative to extending the 30-business day per calendar year exclusion from municipal branch office designation to 90-business days per calendar year for non-primary residences, would be to extend the 30-business day per calendar year exclusion to 120 business days per calendar year, or approximately 48% of the total business days in a year.[38] As noted above, the 90-business days per calendar year exclusion in the proposed rule change would account for approximately 35% of the total business days in a year. This alternative of 120 business days per calendar year would provide even more flexibility for associated persons and further reduce the burdens associated with designation of municipal branch offices, and accompanying office inspection requirements. However, the MSRB believes that approaching the threshold of one half of all business days of remote work from such locations without triggering municipal branch office designation for such locations could, under the current supervisory rule paradigm, incrementally raise risks to investor and issuer protection and could be inconsistent with the rule's intended use for such locations on a temporary basis, since these remote working locations are subject to a less stringent dealer inspection requirement than municipal branch offices. Therefore, the MSRB believes the proposed rule change offers a superior approach to this alternative.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The MSRB sought comment on the proposed rule change in a request for comment that was published on January 14, 2026 (the ''Request for Comment'').[39] The MSRB received 4 letters in response to the Request for Comment.[40] In addition to the proposed rule change, the Request for Comment sought comment on additional areas of MSRB Rule G–27 that the MSRB should consider amending through future rulemaking efforts. The four comment letters are summarized below as they pertain to the proposed rule change, with MSRB responses provided.[41]

Extend the 30-Business Day Exclusion for Non-Primary Residences From Municipal Branch Office Designation

The Request for Comment solicited comments on draft rule text that would extend MSRB Rule G–27(g)(ii)(A)(3)'s exclusion from municipal branch office designation for non-primary residences from less than 30 business days per calendar year to up to 60 business days per calendar year. Comment letters were generally in favor of the Request for Comment's proposed extension from 30 to 60 business days per calendar year. ASA stated that the proposed extension would better align with hybrid work patterns and ease administrative tracking of occasional remote work.[42] SIFMA encouraged the MSRB to adopt the increase to the 30-business day exclusion from municipal branch office designation for locations other than a

[37] *See* MSRB Notice 2026–01, Request for Comment on MSRB Rule G–27 on Dealer Supervision (January 14, 2026), at 12–13, available at *https://www.msrb.org/sites/default/files/2026-01/2026-01.pdf.*

[38] *See supra* note 36.

[39] *See* MSRB Notice 2026–01, Request for Comment on MSRB Rule G–27 on Dealer Supervision (January 14, 2026), available at *https://www.msrb.org/sites/default/files/2026-01/2026-01.pdf.*

[40] Comment letters were received from: American Securities Association (''ASA''): Letter from Jessica R. Giroux, Chief Legal Officer, dated March 16, 2026 (the ''ASA Letter''); Bond Dealers of America (''BDA''): Letter from Michael Decker, Senior Vice President, Research and Public Policy, dated March 16, 2026 (the ''BDA Letter''); Peg Henry LLC: Letter from Margaret C. (Peg) Henry, Sole Member, dated March 6, 2026 (the ''Henry Letter''); and Securities Industry and Financial Markets Association (''SIFMA''): Letter from Leslie M. Norwood, Managing Director and Associate General Counsel, Head of Municipal Securities, dated March 16, 2026 (the ''SIFMA Letter''). Comment letters are available at: *https://www.msrb.org/sites/default/files/2026-03/All-Comments-to-Notice-2026-01.pdf.*

[41] The MSRB will continue to consider separately the comments received on additional areas of MSRB Rule G–27 that the MSRB should potentially amend through future rulemaking efforts.

[42] *See* ASA Letter at 2.

primary residence to 60-business days per year.[43]

However, certain comment letters advocated for the MSRB to further extend MSRB Rule G–27(g)(ii)(A)(3)'s exclusion past the proposed 60 business days per calendar year limit in the proposed rule change. SIFMA suggested that the MSRB consider a 120 business day per year exclusion.[44] ASA encouraged the MSRB to consider additional flexibility tied to supervisory risk rather than fixed day counts, and to explicitly recognize that firms may rely on centralized electronic surveillance to manage remote work.[45] BDA suggested that the MSRB remove the distinction between primary residences or other locations and that the MSRB specify that employees subject to supervision can work and be supervised remotely for up to 60 business days per year regardless whether those days are spent at a primary residence or other location.[46]

The MSRB appreciates the views expressed in the comment letters requesting additional flexibility than provided for in the Request for Comment's proposal to extend the 30-business days per calendar exclusion from municipal branch office designation for non-primary residences to 60 business days per calendar year. The MSRB recognizes that providing 90 business days per calendar year would remain consistent with the objectives of the proposed rule change without reducing investor and issuer protections, as the proposed 90-business days per calendar year exclusion would only account for approximately one-third (35%) of the total 250 business days typically in a year—thus the majority of municipal securities activities would still be conducted at a municipal branch office location. As such, the proposed rule change would extend the exclusion from municipal branch office designation for non-primary residences to 90 business days per calendar year. The MSRB believes that an extension up to 90 business days per calendar year will provide the industry with additional and reasoned flexibility, while also maintaining an appropriate limit for registered persons to work from a non-primary residence location without triggering municipal branch office designation. The MSRB believes that an extension to the municipal branch office designation exclusion past 90 business days per calendar year at a particular location would no longer qualify such location as a temporary location (*i.e.,* as occasional work from a non-primary residence location) and instead could be considered regularly engaged in conduct under MSRB Rule G–27(g)(ii)(A)'s definition of municipal branch office. In addition, the MSRB will consider the suggestions to remove the distinctions among various types of offices and locations (including with respect to the treatment of primary residences), or the reliance on a centralized supervision model, at a later date.

Structuring of Public Offering or Private Placements

The Request for Comment solicited comments on potentially excluding certain public finance activities from MSRB Rule G–27(g)(i)'s definition of OMSJ by way of adding new supplementary material explaining the scope of excluded public finance activities that would not qualify as ''structuring of public offerings or private placements'' and would therefore not trigger OMSJ designation.

The comment letters were generally in favor of this draft amended rule text. ASA stated that they support the clarification of ''structuring of public offerings or private placements'' in the definition of an OMSJ and that clarification would reduce uncertainty about which public finance activities trigger OMSJ designation.[47] SIFMA stated that the proposed rule change is a significant and positive development which creates necessary added clarity and recognizes that some public finance activities commonly occur at a client site, while traveling, or otherwise away from an OMSJ.[48]

BDA pointed out that its member firms have interpreted the meaning of ''structuring of public offerings or private placements'' differently, and the confusion has led to a lack of consistency in how dealers are complying with the rule.[49] As a result, BDA welcomed the MSRB's proposed rule change to provide clarity and consistency and urged the MSRB to provide as much flexibility as possible around the specifics each firm might identify as their own process for final approval within the proposed rule change.[50]

Comment letters in support of the proposed rule change also provided suggestions as to how to amend the draft language of the definition of excluded public finance activities. SIFMA proposed removing references to bespoke recommendations, commitment of dealer capital or other formal action with respect to a public offering or private placement conducted by the dealer from proposed language in the Request for Comment's definition of excluded public finance activities.[51] SIFMA further stated that its members believe that the final approval of a transaction by the broker-dealer is what should be considered structuring.[52] BDA stated that it is important that the proposed rule change allow firms to define a single, clear moment or event that meets the criteria for structuring and not lead to a misinterpretation that multiple events within a transaction would trigger OMSJ registration.[53] The MSRB removed language referencing bespoke recommendations from the definition of excluded public finance activities in the Request for Comments in response to the comments received. As a result, the MSRB believes that the proposed rule change is business model neutral and acknowledges that dealers may have different business practices pertaining to the ''structuring of public offerings or private placements.''

One comment letter questioned whether the proposed rule change would allow a municipal securities principal to supervise excluded public finance activities from a private residence but may not engage in structuring from that residence.[54] The comment letter went on to question whether the municipal securities principal would therefore need to go to a dealer's office to sign a bond purchase agreement, and argued that there is no supervisory benefit to be gained by requiring a bond purchase agreement to be signed in the office of a dealer as opposed to a primary residence.[55]

As aforementioned, the final approval of a public offering or private placement transaction, as used in proposed new Supplementary Material .07, would reference actions internal to the dealer relating to the decision to approve such transaction. The timing of such decisive action may vary depending on the specific transaction or the processes undertaken by a specific dealer and may, for example, coincide with pricing and re-pricing, as necessary, in an effort to get to verbal award. As the MSRB previously noted, the physical act of signing a bond purchase agreement (*i.e.,* formal award) is distinct from the meaning of ''final approval'' as used

within the proposed rule change and for purposes of this rule. Therefore, final approval would not include the mere formality of executing a bond purchase agreement. Proposed new Supplementary Material .07 would require dealers to adopt compliance policies and procedures reasonably designed to make clear what action taken would constitute final approval of a public offering or private placement transaction conducted by the dealer. Proposed new Supplementary Material .07, would also require dealers to take into consideration all relevant factors in determining what action taken constitutes final approval of a public offering or private placement transaction to ensure dealers' supervisory systems are reasonably designed to achieve compliance with applicable securities laws and regulations, and with applicable Board rules.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period of up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve or disapprove such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–MSRB–2026–04 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to File Number SR–MSRB–2026–04. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the MSRB. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to File Number SR–MSRB–2026–04 and should be submitted on or before August 25, 2026.

For the Commission, pursuant to delegated authority.[56]

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2026–15736 Filed 8–3–26; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106017; File No. SR–NYSEAMER–2026–34]

Self-Regulatory Organizations; NYSE American LLC; Notice of Designation of a Longer Period for Commission Action on a Proposed Change To Amend Its Rules To Extend Trading Hours for Certain Eligible Equity Options

July 30, 2026.

On June 5, 2026, NYSE American LLC (''NYSE American'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission''), pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] a proposal to amend its rules to extend trading hours for certain eligible equity options and make related conforming changes. The proposed rule change was published for comment in the **Federal Register** on June 22, 2026.[4]

Section 19(b)(2) of the Act[5] provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is August 6, 2026. The Commission is extending this 45-day time period.

The Commission finds it appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider the proposed rule change and the issues raised therein. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[6] designates September 20, 2026, as the date by which the Commission shall either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR–NYSEAmer–2026–34).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[7]

Sherry R. Haywood,

Assistant Secretary.

19(b)(3)(A) of the Act.[3] The proposed rule change was published for comment in the **Federal Register** on February 2, 2026.[4] On March 20, 2026, the Commission temporarily suspended the proposed rule change and instituted proceedings to determine whether to approve or disapprove the proposed rule change.[5]

Section 19(b)(2) of the Act[6] provides that, after initiating proceedings, the Commission shall issue an order approving or disapproving the proposed rule change not later than 180 days after the date of publication of notice of filing of the proposed rule change. The Commission may extend the period for issuing an order approving or disapproving the proposed rule change, however, by not more than 60 days if the Commission determines that a longer period is appropriate and publishes reasons for such determination. The proposed rule change was published for notice and comment in the **Federal Register** on February 2, 2026.[7] The 180th day after publication of the proposed rule change is August 1, 2026. The Commission is extending the time period for approving or disapproving the proposed rule change for an additional 60 days.

The Commission finds it appropriate to designate a longer period within which to issue an order approving or disapproving the proposed rule change so that it has sufficient time to consider the proposed rule change and submitted comments, and the issues raised therein. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Exchange Act,[8] designates September 30, 2026, as the date by which the Commission shall either approve or disapprove the proposed rule change (File No. SR–CBOE–2026–008).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[9]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106015; File No. SR–ISE–2026–44]

Self-Regulatory Organizations; Nasdaq ISE, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend FLEX Options Listing Rules

July 30, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 29, 2026, Nasdaq ISE, LLC (''ISE'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its FLEX Options Trading Rules at Options 3A, Section 3, FLEX Option Listings.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/ise/rulefilings,* and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

ISE proposes to amend Options 3A, Section 3, FLEX Option Listings as it relates to FLEX Equity Options where the underlying security is an ETF that is eligible for cash settlement. Specifically, the proposed amendments would: (1) permit newly FLEX-eligible ETFs that satisfy heightened eligibility thresholds of $600 million average daily notional value and 5,616,000 shares ADV, based on the previous one-month period of trading statistics to be eligible for cash settlement as a contract term; (2) establish tiered criteria governing the treatment of cash-settled FLEX ETF Options where the underlying ETF ceases to satisfy the requirements of Options 3A, Section 3(c)(5)(A)(ii) at the time of the Exchange's bi-annual review; and (3) eliminate the existing provision limiting cash settlement as a contract term to no more than 50 underlying ETFs. This filing is identical to a rule proposal by Cboe.[3]

Background

Prior to the adoption of the rules described herein, FLEX Equity Options were generally required to be settled by physical delivery of the underlying security upon exercise. FLEX Index Options, by contrast, have long been settled by delivery in cash. Cash settlement was also available for customized equity options transacted in the over-the-counter (''OTC'') market, where settlement restrictions do not apply. The absence of a cash-settled exchange-traded alternative for equity-based FLEX Options created a gap between the exchange-traded and OTC markets that exchange-traded participants sought to bridge.

The Exchange previously submitted a filing with the Commission adopting cash settlement as an optional contract term for certain FLEX Equity Options where the underlying security is an ETF.[4] Specifically, Options 3A, Section 3(c)(5)(A)(ii) permits cash settlement for FLEX Equity Options where the underlying ETF has, measured over the prior six-month period, an average daily notional value of $500 million or more and a national average daily volume (''ADV'') of at least 4,680,000 shares.

The Exchange adopted these specific thresholds to limit cash-settled FLEX ETF Options to the most highly liquid and actively-traded ETFs, thereby mitigating concerns about susceptibility

[4] *See* Securities Exchange Act Release No. 101720 (November 22, 2024), 89 FR 94986 (November 29, 2024) (SR–ISE–2024–12) (Notice of Filing of Amendment No. 1 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 1, To Adopt Rules To List and Trade FLEX Options).

to manipulation at settlement. With respect to the notional value threshold, the Exchange determined that average daily notional value is an appropriate proxy for manipulation resistance because, as a general matter, the more expensive an underlying ETF's price, the less cost-effective manipulation becomes, and the more volume traded in an ETF, the more difficult manipulation of its price becomes. With respect to the ADV threshold, the Exchange determined that a requirement of 4,680,000 shares per day is appropriate because it represents average trading in the underlying ETF of approximately 200 shares per second, a level of continuous trading activity that the Exchange believes meaningfully limits the ability to influence the ETF's price for purposes of establishing a settlement value. The Exchange acknowledged that no security is immune from all manipulation, but determined that the combination of these two requirements would appropriately limit cash settlement of FLEX ETF Options to underlying securities that are less susceptible to manipulation.

Under this framework, the Exchange conducts a bi-annual review on January 1 and July 1 of each year to identify qualifying ETFs, with newly eligible ETFs permitted to list cash-settled FLEX options beginning on February 1 and August 1, respectively. The rule caps the number of eligible underlying ETFs at 50; if more than 50 ETFs satisfy the criteria, the Exchange selects the top 50 by highest ADV. This cap was designed to prevent the scope of cash-settled FLEX ETF Options from expanding considerably without a corresponding evaluation of whether the level of the requirements remains reasonable, while still providing flexibility to add ETFs given that the initial list of eligible ETFs numbered well below 50 at the time of adoption. In the event a previously eligible ETF fails to satisfy the criteria at the time of a bi-annual review, any new positions overlying that ETF must be physically settled and any existing open cash-settled positions may be traded only to close. This provision was designed to address how to wind down outstanding cash-settled positions in an ETF that no longer qualifies under the liquidity and volume criteria, thereby addressing manipulation concerns while still permitting market participants to exit existing positions.

In connection with the adoption of this framework, the Exchange committed to conducting a five-year review of cash-settled FLEX ETF Option trading activity and furnishing the Commission with five annual reports. Pursuant to this commitment, the Exchange has submitted one annual monitoring report to the Commission covering the first year of trading. The report assessed trading volume and open interest in cash-settled FLEX ETF options relative to physically settled options on the same underlying ETFs, market maker participation, position limit activity, and manipulation concerns. The Exchange had no recommendations for enhancements to the listing standards based on its review. The Exchange had no open investigation, inquiry, or enforcement matter relating to the manipulation of cash-settled FLEX ETF options or their underlying ETFs.

Cboe noted in SR–Cboe–2026–035 that it submitted two annual monitoring reports to the Commission covering the periods of August 1, 2023 through July 31, 2024 and August 1, 2024 through July 31, 2025, respectively.[5] The reports assessed trading volume and open interest in cash-settled FLEX ETF options relative to physically settled options on the same underlying ETFs, market maker participation, position limit activity, and manipulation concerns.[6] Cboe had no recommendations for enhancements to the listing standards based on either review.[7] Also, Cboe noted that in both review periods, neither Cboe nor any affiliated Cboe securities exchange had an open investigation, inquiry, or enforcement matter relating to the manipulation of cash-settled FLEX ETF options or their underlying ETFs.[8] Financial Industry Regulatory Authority (''FINRA''), acting as Cboe's regulatory services provider for position limit surveillance, confirmed the same finding for both periods.[9] While both of Cboe's reports note that certain regulatory matters arose during each period involving the applicable ETFs or related physically-settled options, Cboe's surveillance and investigatory staff confirmed in each instance that the activity did not appear to relate to manipulation of an ETF for the purpose of benefiting a cash-settled FLEX ETF option position.[10]

The review period reflects broad and stable market maker participation across the eligible underlying ETFs. Cboe, which has been trading FLEX for a longer period than ISE, stated in SR–Cboe–2026–035 that the highest levels of FLEX market maker participation were observed in SPY (9 to 12 per month), QQQ (6 to 10 per month), and IWM (3 to 15 per month).[11] Cboe noted that participation in less actively traded eligible ETFs was more limited but consistent across both periods, reflecting a well-supported and liquid product across the eligible universe.[12]

Proposal

The Exchange proposes to amend Options 3A, Section 3(c)(5)(A)(ii) to refine two aspects of the framework governing cash-settled FLEX ETF Options and to eliminate the 50–ETF cap. First, the Exchange proposes to permit newly FLEX-eligible ETFs to qualify for cash settlement as a contract term based on one month of trading statistics outside of the Exchange's regular bi-annual review cycle. Second, the Exchange proposes to replace the existing provision governing ETFs that cease to satisfy the eligibility criteria with a tiered framework that more precisely calibrates treatment to the actual state of open interest in cash-settled FLEX ETF Options overlying the affected ETF. Third, the Exchange proposes to eliminate the existing cap limiting cash settlement as a contract term to no more than 50 underlying ETFs.

One-Month Lookback for Newly Eligible ETFs

Under the current rule, the Exchange determines eligible underlying ETFs bi-annually, on January 1 and July 1 of each year, using six months of prior trading statistics, with newly eligible ETFs permitted to list cash-settled FLEX options beginning on February 1 and August 1, respectively. No mechanism currently exists to add newly FLEX-eligible ETFs to the eligible list between bi-annual reviews. As a result, an ETF that becomes FLEX-eligible after a bi-annual review has been conducted may not be considered for cash-settled FLEX ETF Option eligibility for up to six months, even if it otherwise satisfies the notional value and ADV requirements of Options 3A, Section 3(c)(5)(A)(ii). The Exchange proposes to address this gap by permitting, outside of the regular bi-annual review, the Exchange to determine that a newly FLEX-eligible ETF satisfies heightened notional value and trading volume requirements of $600 million average daily notional value and 5,616,000 shares ADV based on the previous one-month period of trading statistics. Any ETF satisfying such requirements on that basis shall be

[5] *See supra* note 3.
[6] *See id.*
[7] *See id.*
[8] *See id.*
[9] *See id.*
[10] *See id.*
[11] *See id.*
[12] *See id.*

eligible for cash settlement as a contract term.

The Exchange believes a one-month lookback is appropriate in this context because an ETF that has newly become FLEX-eligible and simultaneously satisfies both the $600 million average daily notional value threshold and the 5,616,000-share ADV requirement over the prior month has already demonstrated the degree of liquidity and trading activity that the eligibility criteria are designed to capture. These thresholds represent a 20% increase over the standard $500 million and 4,680,000-share thresholds that apply to the bi-annual review, reflecting the Exchange's determination that heightened criteria are appropriate for ETFs seeking to qualify based on a shorter lookback period. The Exchange believes Cboe's and its annual monitoring reports demonstrate that the existing criteria are an effective proxy for identifying ETFs that are not readily susceptible to manipulation. Requiring newly eligible ETFs to await the next bi-annual review before becoming eligible for cash settlement would delay investor access to the product.

Cboe's back-testing analysis of newly listed FLEX ETFs supports the appropriateness of the heightened thresholds.[13] Under the standard eligibility criteria ($500 million average daily notional value and 4,680,000 shares ADV), ten ETFs would have qualified based on one month of trading data. Under the 20% increased thresholds ($600 million average daily notional value and 5,616,000 shares ADV), only eight ETFs qualified. Cboe noted that the two ETFs excluded by the heightened thresholds did not qualify at their next six-month bi-annual review, demonstrating that the heightened thresholds effectively filter out ETFs whose initial trading activity may not be sustained.

The Exchange believes the heightened thresholds for the one-month lookback appropriately address the concern that a newly listed ETF may experience elevated trading activity in its initial period that is not representative of sustained liquidity. By requiring newly eligible ETFs to satisfy thresholds that are 20% above the standard bi-annual review criteria, the Exchange ensures that only those ETFs demonstrating a meaningfully higher level of liquidity and trading activity—beyond what may reflect initial market interest—are eligible for cash settlement based on the shorter lookback period.

Further, the Exchange represents that it will continue to monitor the one-month lookback criteria on an ongoing basis to assess the appropriateness of the threshold. As part of this ongoing monitoring, the Exchange will evaluate whether the heightened criteria continue to effectively identify ETFs with sustained liquidity and trading activity, and will propose adjustments to the threshold if warranted by the Exchange's review.

Tiered Criteria for ETFs Ceasing To Satisfy Eligibility Requirements

Under the current rule, if the Exchange determines at the time of a bi-annual review that an underlying ETF ceases to satisfy the eligibility criteria, any new position overlying that ETF must be physically settled and any existing open cash-settled positions may be traded only to close. While this provision addresses the wind-down of cash-settled activity in a straightforward manner, it does not distinguish between ETFs with active open interest and those with no meaningful cash-settled activity, nor does it account for the possibility that an ETF may temporarily fall below the eligibility thresholds and subsequently recover.

The Exchange proposes to replace this provision with a tiered framework that more precisely calibrates the treatment of an ineligible ETF to the actual state of the market for cash-settled FLEX ETF Options overlying that ETF. Under the proposed framework, if no open interest in cash-settled FLEX Equity Options overlying the ETF exists during the previous six-month period at the time of the bi-annual review determination, the existing treatment will apply: any new position must be physically settled and any open cash-settled positions may be traded only to close. Where open interest in cash-settled FLEX Equity Options overlying the ETF does exist during the previous six-month period, the Exchange will permit the opening of new cash-settled positions in that ETF for a period of one year from the date of the bi-annual review, after which any new position must be physically settled and any remaining open cash-settled positions may be traded only to close. This one-year continuation period is intended to provide market participants holding or seeking to manage existing cash-settled positions with a reasonable and predictable runway to do so, rather than abruptly restricting new position activity at the time of the bi-annual review determination.

The proposed framework also includes a recovery provision: if the underlying ETF satisfies the eligibility criteria at the time of either bi-annual review conducted during the one-year continuation period, that period will terminate and the ETF will resume full eligibility for cash settlement as a contract term. The Exchange believes this provision appropriately accounts for the possibility that an ETF's trading statistics may fluctuate around the eligibility thresholds and prevents an unnecessarily disruptive wind-down in cases where the ETF promptly returns to eligibility.

Elimination of the 50–ETF Cap

The Exchange also proposes to eliminate the existing provision limiting cash settlement as a contract term to no more than 50 underlying ETFs. The cap was adopted at the outset of the program to prevent the scope of cash-settled FLEX ETF Options from expanding considerably without a corresponding evaluation of whether the level of the eligibility requirements remained reasonable. While the number of ETFs satisfying the eligibility criteria remained well below 50 during the initial period of the program's operation, over the two-year period that Cboe monitored the market, the number of qualifying ETFs has grown to exceed that threshold (as of February 1, 2026, 60 ETFs were eligible), such that the cap now operates as an active constraint on the availability of cash-settled FLEX ETF Options on ETFs that otherwise satisfy the established eligibility criteria. The Exchange does not believe this result is consistent with the purpose of the cap, which was intended as a programmatic guardrail rather than a permanent numerical ceiling. As noted above, neither the Exchange nor Cboe identified manipulation concerns in their reviews. Given the same eligibility criteria and position and exercise limits would apply to any cash-settled FLEX ETF option, as would the Exchange's surveillance program, the Exchange believes the 50–ETF cap is no longer necessary. The Exchange believes these protections and the eligibility criteria themselves sufficiently mitigate any manipulation concerns associated with cash-settled FLEX ETF Options.

The Exchange also notes that, consistent with its commitment in the original proposal, it will continue to furnish the Commission with annual reports for the remainder of the five-year review period. The Exchange believes that the continued reporting commitment, together with the proposed amendments, appropriately positions the cash-settled FLEX ETF Option framework to address the operational gaps identified through the Exchange's review to date while preserving the monitoring mechanisms

[13] For purposes of the back-testing analysis, Cboe reviewed all newly listed FLEX-eligible ETFs from January 1, 2025 through April 6, 2026.

that allow the Exchange and the Commission to evaluate the ongoing impact of the program.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[14] in general, and furthers the objectives of Section 6(b)(5) of the Act,[15] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Exchange believes the proposed rule change is consistent with Section 6(b)(5) of the Act because each of the proposed amendments is designed to refine an existing, Commission-approved framework in a manner that is reasonably calibrated to address identified operational gaps while preserving and reinforcing the manipulation-mitigating features of that framework.

One-Month Lookback for Newly Eligible ETFs

The Exchange believes the proposed one-month lookback for newly FLEX-eligible ETFs is consistent with the Act because it removes an impediment to the offering of cash-settled FLEX ETF Options on ETFs that have already demonstrated the liquidity and trading activity that the eligibility criteria are designed to capture, without compromising the manipulation-resistant features of those criteria. Under the current rule, an ETF that becomes FLEX-eligible after a bi-annual review has been conducted must wait up to six months before it may be considered for cash-settled FLEX ETF Option eligibility, even if it satisfies both the $600 million average daily notional value threshold and the 5,616,000-share ADV requirement at the time it becomes FLEX-eligible. The Exchange believes this gap is not necessary to protect against manipulation.

An ETF that satisfies both heightened thresholds over the prior one-month period has demonstrated a degree of liquidity and breadth of trading activity exceeding that which the six-month bi-annual review is designed to identify as indicative of reduced susceptibility to manipulation. The heightened thresholds, which represent a 20% increase over the standard $500 million and 4,680,000-share thresholds applicable to the bi-annual review, are designed to account for the possibility that a newly listed ETF may experience elevated trading activity in its initial period that is not representative of sustained liquidity. As noted above, Cboe's and the Exchange's annual monitoring reports have demonstrated the existing eligibility criteria are an effective and reliable proxy for identifying ETFs that are not readily susceptible to manipulation, and neither Cboe nor the Exchange has identified any manipulation concerns in connection with cash-settled FLEX ETF Options or their underlying ETFs during that period. The Exchange therefore believes that permitting a one-month lookback for newly FLEX-eligible ETFs between bi-annual reviews, subject to the heightened thresholds, removes an impediment to and perfects the mechanism of a free and open market and protects investors and the public interest by providing timely investor access to a cash-settlement alternative on ETFs that satisfy the established eligibility criteria, while maintaining the protections afforded by those criteria.

Cboe's back-testing analysis further supports the consistency of the heightened thresholds with the Act's anti-manipulation objectives. Under the standard criteria, ten newly listed FLEX ETFs would have qualified based on one month of trading data, but under the 20% increased thresholds only 8 qualified. The two names excluded (AMDL and SIVR) did not qualify at their next six-month bi-annual review, confirming that the heightened thresholds effectively identify and exclude ETFs whose initial trading statistics do not reflect sustained market activity. The Exchange believes this empirical evidence demonstrates that the heightened thresholds are reasonably designed to prevent ETFs with potentially transient liquidity from qualifying for cash settlement based on the shorter lookback period.

Tiered Criteria for ETFs Ceasing To Satisfy Eligibility Requirements

The Exchange believes the proposed tiered framework for ETFs that cease to satisfy the eligibility criteria at the time of a bi-annual review is consistent with the Act because it is reasonably designed to prevent fraudulent and manipulative acts and practices while also promoting just and equitable principles of trade and protecting investors. The current rule applies a single, uniform wind-down treatment to any ETF that falls below the eligibility thresholds at bi-annual review, regardless of whether active open interest in cash-settled FLEX ETF Options overlying that ETF exists. The Exchange believes this one-size-fits-all approach does not adequately account for the legitimate interests of market participants that hold existing cash-settled positions or that need the ability to open new positions to manage existing risk exposure in an ETF that has temporarily fallen below the thresholds.

The proposed tiered framework addresses this concern in a manner consistent with the Act's investor protection and anti-manipulation objectives. Where no open interest in cash-settled FLEX ETF Options overlying the affected ETF has existed during the previous six-month period, the current treatment would continue to apply, because the Exchange believes an immediate restriction on new cash-settled positions would not disrupt market participants' activity. Where open interest does exist at the time of the bi-annual review, the proposed one-year continuation period provides market participants with a reasonable and predictable runway to manage existing positions, which the Exchange believes promotes just and equitable principles of trade. The Exchange further believes that the recovery provision, under which the continuation period terminates and full eligibility is restored if the ETF satisfies the criteria at either bi-annual review during the one-year period, is consistent with the Act because it prevents an unnecessarily disruptive wind-down where an ETF's trading statistics temporarily dip below the eligibility thresholds and then recover, and it reinforces the principle that the eligibility criteria, rather than arbitrary timing, are the appropriate determinant of cash-settlement eligibility. Taken together, the Exchange believes the tiered framework is a reasonable means to address manipulation concerns while not unduly burdening market participants with existing cash-settled positions, as it eliminates the current immediate disruption to their investment strategies.

Elimination of the 50–ETF Cap

The Exchange believes the elimination of the 50–ETF cap is consistent with the Act because the cap is no longer necessary to protect against the concerns it was designed to address and, as currently operative, functions as an impediment to the offering of cash-settled FLEX ETF Options on ETFs that otherwise satisfy the established eligibility criteria. The cap was adopted at the outset of the program to prevent the scope of cash-settled FLEX ETF Options from expanding considerably without a corresponding evaluation of

[14] 15 U.S.C. 78f(b).

[15] 15 U.S.C. 78f(b)(5).

whether the level of the eligibility requirements remained reasonable. While the number of qualifying ETFs remained well below 50 during the initial period of the program's operation, that number has more recently grown to exceed the cap, such that the cap now actively restricts the availability of cash-settled FLEX ETF Options on ETFs that fully satisfy the notional value and ADV requirements of Options 3A, Section 3(c)(5)(A)(ii). The Exchange believes that retaining this arbitrary restriction is inconsistent with the Act's objectives because Cboe's two-year monitoring record demonstrates that the eligibility criteria themselves limit the availability of cash settlement to FLEX ETF Options. The liquidity and trading activity requirements mitigate manipulation concerns for any ETF that satisfies those requirements, not just the top 50.

During the first two years that cash-settled FLEX ETF Options were available on Cboe, it identified (and its annual monitoring reports demonstrated) no manipulation concerns in connection with cash-settled FLEX ETF Options or their underlying ETFs. The Exchange did not identify any manipulation in its one year of monitoring. The Exchange believes the eligibility criteria, position and exercise limits, and surveillance program applicable to the 50 ETFs eligible for FLEX options with cash-settlement provide adequate protections against manipulation and market disruption to all ETFs that satisfy the criteria, regardless of the number of qualifying ETFs. The Exchange therefore believes that eliminating the cap removes an impediment to and perfects the mechanism of a free and open market, protects investors and the public interest, and is otherwise consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange does not believe the proposed rule change will impose any burden on intramarket competition. The proposed amendments apply uniformly to all market participants that trade cash-settled FLEX ETF Options on the Exchange. All newly FLEX-eligible ETFs would be eligible for the one-month lookback, subject to the same heightened eligibility thresholds ($600 million average daily notional volume and 5,616,000 shares ADV) and any ETF that satisfies those heightened criteria within that one-month lookback would be eligible for cash-settlement, and cash-settled FLEX options on such ETFs would be available to all market participants. The tiered framework for ETFs ceasing to satisfy the eligibility criteria applies in the same manner to all market participants holding or seeking to open positions in cash-settled FLEX ETF Options overlying the affected ETF, and the one-year continuation period and recovery provision provide all such participants with the same predictable and equitable treatment. The elimination of the 50–ETF cap permits any ETF that satisfies the eligibility criteria to be eligible for FLEX cash-settlement rather than arbitrarily restricting that product availability to 50 ETFs. The Exchange believes the proposed rule promotes competition, as it would treat all ETFs that satisfy the eligibility criteria for cash-settled FLEX Options in the same manner.

The Exchange does not believe the proposed rule change will impose any burden on intermarket competition. Cash-settled FLEX ETF Options with the same underlying ETF may be listed on multiple exchanges, and the proposed amendments do not restrict the ability of other exchanges to adopt similar or competing frameworks. This rule proposal is a competitive response to Cboe's proposal [16] and it would enhance competition among the options exchanges.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act [17] and subparagraph (f)(6) of Rule 19b–4 thereunder.[18]

A proposed rule change filed under Rule 19b–4(f)(6) [19] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[20] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange states that waiver of the operative delay would permit the Exchange to amend its FLEX rules consistent with Cboe [21] and competitively offer the same products on a cash-settled basis. For this reason, and because the proposed rule change raises no new or novel legal or regulatory issues, the Commission finds that waiver of the operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission waives the 30-day operative delay and designates the proposed rule change to be operative upon filing.[22]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–ISE–2026–44 on the subject line.

[16] *See supra* note 3.

[17] 15 U.S.C. 78s(b)(3)(A)(iii).

[18] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[19] 17 CFR 240.19b–4(f)(6).

[20] 17 CFR 240.19b–4(f)(6)(iii).

[21] *See supra* note 3.

[22] For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–ISE–2026–44. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–ISE–2026–44 and should be submitted on or before August 25, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[23]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[OMB Control No. 3235–0133]

Agency Information Collection Activities; Proposed Collection; Comment Request; Extension: Rule 17a–19 and Form X–17A–19

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (''PRA'') (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the existing collection of information provided for in Rule 17a–19 (17 CFR 240.17a–19) and Form X–17A–19 under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*). The Commission plans to submit this existing collection of information to the Office of Management and Budget (''OMB'') for extension and approval.

Rule 17a–19 requires every national securities exchange and registered national securities association to file a Form X–17A–19 with the Commission and the Securities Investor Protection Corporation (''SIPC'') within 5 business days of the initiation, suspension, or termination of any member and, when terminating the membership interest of any member, to notify that member of its obligation to file financial reports as required by Exchange Act Rule 17a–5(b) (17 CFR 240.17a–5(b)). There are currently a total of 30 national securities exchanges and registered national securities associations that are potential respondents under the rule.

Commission staff anticipates that the national securities exchanges and registered national securities associations collectively will make 206 total filings annually pursuant to Rule 17a–19 and that each filing will take approximately 15 minutes. The total reporting burden is estimated to be approximately 52 total annual hours.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number.

Written comments are invited on: (a) whether this proposed collection of information is necessary for the proper performance of the functions of the SEC, including whether the information will have practical utility; (b) the accuracy of the SEC's estimate of the burden imposed by the proposed collection of information, including the validity of the methodology and the assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated, electronic collection techniques or other forms of information technology.

Please direct your written comments on this 60-Day Collection Notice to Austin Gerig, Director/Chief Data Officer, Securities and Exchange Commission, c/o Tanya Ruttenberg via email to *PaperworkReductionAct@sec.gov* by October 5, 2026.

Dated: July 31, 2026.

SECURITIES AND EXCHANGE COMMISSION

[OMB Control No. 3235–0705]

Agency Information Collection Activities; Proposed Collection; Comment Request; Extension: Rule 30b1–8 and Form N–CR

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. § 3501 *et seq.*), the Securities and Exchange Commission (''SEC'' or ''Commission'') is soliciting comments on the proposed collection of information discussed below.

A money market fund is required to file Form N–CR if a portfolio security defaults, an affiliate provides financial support to the fund, or the fund experiences a significant decline in its shadow price.[1] In most cases, a money market fund is required to submit a brief summary filing on Form N–CR within one business day of the occurrence of the event, and a follow up filing within four business days that includes a more complete description and information. Compliance with rule 30b1–8 is mandatory for any fund that holds itself out as a money market fund in reliance on rule 2a 7. Responses to the disclosure requirements will not be kept confidential.

The Commission estimates that it will receive, in the aggregate, an average of 1 report per year filed on Form N–CR.[2] Taking into account a blend of legal and financial in-house professionals, as well as the additional burdens associated with the amendments,[3] we estimate that

[23] 17 CFR 200.30–3(a)(12).

[1] 17 CFR 270.30b1–8.

[2] The number of reports per year filed on Form N–CR, based on initial and follow-up amendment filings with the Commission in 2023–2025, was 0, 0, and 2 respectively.

[3] We have estimated the time costs for a financial manager to be $731 per hour, costs for lawyers to be $744 per hour, and costs for a computer programmer to be $416 per hour; to calculate the occupational hourly rates the Commission uses occupational mean hourly wage data from the Occupational Employment and Wage Statistics (OEWS) program of the Bureau of Labor Statistics (BLS) for [''Securities, Commodity Contracts, and Other Financial Investments and Related Activities'' (NAICS 523)][the private sector]; *see Occupational Employment and Wage Statistics,* U.S. Bureau of Labor Statistics, *https://www.bls.gov/oes/; see also Standard Occupational Classification,* U.S. Bureau of Labor Statistics, *https://www.bls.gov/soc/* (describing occupational classification system used by BLS); Exec. Off. of the President, Off. of Mgmt. & Budget, North American Industry Classification System (2022), *available at https://www.census.gov/naics/reference_files_tools/*

Continued

a fund will spend, on average, 10.5 burden hours [4] and time costs of approximately $7,104 [5] for one report. The Commission therefore estimates that the total annual burden for Form N–CR reporting will be 10.5 burden hours and the total annual time cost will be $7,104.[6]

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number.

Written comments are invited on: (a) whether this proposed collection of information is necessary for the proper performance of the functions of the SEC, including whether the information will have practical utility; (b) the accuracy of the SEC's estimate of the burden imposed by the proposed collection of information, including the validity of the methodology and the assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated, electronic collection techniques or other forms of information technology.

Please direct your written comments on this 60-Day Collection Notice to Austin Gerig, Director/Chief Data Officer, Securities and Exchange Commission, c/o Tanya Ruttenberg via email to *PaperworkReductionAct@sec.gov* by October 5, 2026.

Dated: July 30, 2026.

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2026–15727 Filed 8–3–26; 8:45 am]

BILLING CODE 8011–01–P

2022_NAICS_Manual.pdf (describing the industry classification system used by BLS and other agencies); the mean hourly wage for each occupation is adjusted for changes in the seasonally adjusted employment cost index for private wages and salaries between the data reference period and when the data are released by BLS; *see Employment Cost Index,* U.S. Bureau of Labor Statistics, *https://www.bls.gov/eci/;* the adjusted mean hourly wage is then multiplied by a factor that accounts for nonwage costs borne by employers, such as bonuses, benefits, and overhead; this factor is calculated as an average over the 10 most recently available years of data of the ratio of the Bureau of Economic Analysis's annual gross output data for [NAICS 523][the private sector] to total annual wages across all occupations for [NAICS 523][the private sector] in the OEWS data; *see Gross Output by Industry,* U.S. Bureau of Economic Analysis, *https://www.bea.gov/data/industries/gross-output-by-industry; Occupational Employment and Wage Statistics,* U.S. Bureau of Labor Statistics, *https://www.bls.gov/oes/;* the final product is the occupational hourly rate. *See generally* Updated Methodology for Calculating Occupational Hourly Rates (Dec. 19, 2025), *available at https://www.sec.gov/files/method-occupational-hourly-rates.pdf.*

[4] When filing a report, the Commission estimates that a fund will spend on average approximately 4.5 hours of lawyer time, 4 hours of financial manager time, and 2 hours of computer programmer time to prepare, review and submit a filing.

[5] This estimate is based on the following calculations: (4.5 hours × $744 per hour for a lawyer = $ 3,348) + (4 hours × $731 per hour for a financial manager = $2,924) + (2 hours × $416 per hour for a computer programmer) = $7,104.

[6] This estimate is based on the following calculation: 1 reports per year × 10.5 burden hours per report = 10.5 burden hours; 1 reports per year × $ 7,104 time cost per report = $7,104 in time costs.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106016; File No. SR–Phlx–2026–49]

Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend FLEX Electronic Options Listing Rules

July 30, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 29, 2026, Nasdaq PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its FLEX Options Trading Rules at Options 3A, Section 3, FLEX Option Listings.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/phlx/rulefilings,* and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Phlx proposes to amend Options 3A, Section 3, FLEX Option Listings as it relates to FLEX Equity Options where the underlying security is an ETF that is eligible for cash settlement. Specifically, the proposed amendments would: (1) permit newly FLEX-eligible ETFs that satisfy heightened eligibility thresholds of $600 million average daily notional value and 5,616,000 shares ADV, based on the previous one-month period of trading statistics to be eligible for cash settlement as a contract term; (2) establish tiered criteria governing the treatment of cash-settled FLEX ETF Options where the underlying ETF ceases to satisfy the requirements of Options 3A, Section 3(c)(5)(A)(ii) at the time of the Exchange's bi-annual review; and (3) eliminate the existing provision limiting cash settlement as a contract term to no more than 50 underlying ETFs. This filing is identical to a rule proposal by Cboe.[3]

Background

Prior to the adoption of the rules described herein, FLEX Equity Options were generally required to be settled by physical delivery of the underlying security upon exercise. FLEX Index Options, by contrast, have long been settled by delivery in cash. Cash settlement was also available for customized equity options transacted in the over-the-counter (''OTC'') market, where settlement restrictions do not apply. The absence of a cash-settled exchange-traded alternative for equity-based FLEX Options created a gap between the exchange-traded and OTC markets that exchange-traded participants sought to bridge.

The Exchange previously submitted a filing with the Commission adopting cash settlement as an optional contract term for certain FLEX Equity Options where the underlying security is an ETF.[4] Specifically, Options 3A, Section 3(c)(5)(A)(ii) permits cash settlement for FLEX Equity Options where the underlying ETF has, measured over the

[3] *See* Securities Exchange Act Release No. 105929 (July 16, 2026), 91 FR 45856 (July 21, 2026) (SR–Cboe–2026–035) (Notice of Filing of Amendment No. 1 and Order Approving a Proposed Rule Change, as Modified and Superseded by Amendment No. 1, To Amend Rule 4.21 (Series of FLEX Options).

[4] *See* Securities Exchange Act Release No. 103759 (August 21, 2025), 90 FR 41636 (August 26, 2025) (SR–Phlx–2025–38) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Adopt Electronic FLEX Options Rules).

prior six-month period, an average daily notional value of $500 million or more and a national average daily volume (''ADV'') of at least 4,680,000 shares.

The Exchange adopted these specific thresholds to limit cash-settled FLEX ETF Options to the most highly liquid and actively-traded ETFs, thereby mitigating concerns about susceptibility to manipulation at settlement. With respect to the notional value threshold, the Exchange determined that average daily notional value is an appropriate proxy for manipulation resistance because, as a general matter, the more expensive an underlying ETF's price, the less cost-effective manipulation becomes, and the more volume traded in an ETF, the more difficult manipulation of its price becomes. With respect to the ADV threshold, the Exchange determined that a requirement of 4,680,000 shares per day is appropriate because it represents average trading in the underlying ETF of approximately 200 shares per second, a level of continuous trading activity that the Exchange believes meaningfully limits the ability to influence the ETF's price for purposes of establishing a settlement value. The Exchange acknowledged that no security is immune from all manipulation, but determined that the combination of these two requirements would appropriately limit cash settlement of FLEX ETF Options to underlying securities that are less susceptible to manipulation.

Under this framework, the Exchange conducts a bi-annual review on January 1 and July 1 of each year to identify qualifying ETFs, with newly eligible ETFs permitted to list cash-settled FLEX options beginning on February 1 and August 1, respectively. The rule caps the number of eligible underlying ETFs at 50; if more than 50 ETFs satisfy the criteria, the Exchange selects the top 50 by highest ADV. This cap was designed to prevent the scope of cash-settled FLEX ETF Options from expanding considerably without a corresponding evaluation of whether the level of the requirements remains reasonable, while still providing flexibility to add ETFs given that the initial list of eligible ETFs numbered well below 50 at the time of adoption. In the event a previously eligible ETF fails to satisfy the criteria at the time of a bi-annual review, any new positions overlying that ETF must be physically settled and any existing open cash-settled positions may be traded only to close. This provision was designed to address how to wind down outstanding cash-settled positions in an ETF that no longer qualifies under the liquidity and volume criteria, thereby addressing manipulation concerns while still permitting market participants to exit existing positions.

In connection with the adoption of this framework, the Exchange committed to conducting a five-year review of cash-settled FLEX ETF Option trading activity and furnishing the Commission with five annual reports. Pursuant to this commitment, the Exchange has not submitted an annual monitoring report to the Commission covering the first year of trading as one year has not yet passed. The report will assess trading volume and open interest in cash-settled FLEX ETF options relative to physically settled options on the same underlying ETFs, market maker participation, position limit activity, and manipulation concerns when it is submitted after the first year of trading.

Cboe noted in SR–Cboe–2026–035 that it submitted two annual monitoring reports to the Commission covering the periods of August 1, 2023 through July 31, 2024 and August 1, 2024 through July 31, 2025, respectively.[5] The reports assessed trading volume and open interest in cash-settled FLEX ETF options relative to physically settled options on the same underlying ETFs, market maker participation, position limit activity, and manipulation concerns.[6] Cboe had no recommendations for enhancements to the listing standards based on either review.[7] Also, Cboe noted that in both review periods, neither Cboe nor any affiliated Cboe securities exchange had an open investigation, inquiry, or enforcement matter relating to the manipulation of cash-settled FLEX ETF options or their underlying ETFs.[8] Financial Industry Regulatory Authority (''FINRA''), acting as Cboe's regulatory services provider for position limit surveillance, confirmed the same finding for both periods.[9] While both of Cboe's reports noted that certain regulatory matters arose during each period involving the applicable ETFs or related physically-settled options, Cboe's surveillance and investigatory staff confirmed in each instance that the activity did not appear to relate to manipulation of an ETF for the purpose of benefiting a cash-settled FLEX ETF option position.[10]

Cboe's review period reflected broad and stable market maker participation across the eligible underlying ETFs. Cboe, which has been trading FLEX for a longer period than Phlx, stated in SR–Cboe–2026–035 that the highest levels of FLEX market maker participation were observed in SPY (9 to 12 per month), QQQ (6 to 10 per month), and IWM (3 to 15 per month).[11] Cboe noted that participation in less actively traded eligible ETFs was more limited but consistent across both periods, reflecting a well-supported and liquid product across the eligible universe.[12]

Proposal

The Exchange proposes to amend Options 3A, Section 3(c)(5)(A)(ii) to refine two aspects of the framework governing cash-settled FLEX ETF Options and to eliminate the 50–ETF cap. First, the Exchange proposes to permit newly FLEX-eligible ETFs to qualify for cash settlement as a contract term based on one month of trading statistics outside of the Exchange's regular bi-annual review cycle. Second, the Exchange proposes to replace the existing provision governing ETFs that cease to satisfy the eligibility criteria with a tiered framework that more precisely calibrates treatment to the actual state of open interest in cash-settled FLEX ETF Options overlying the affected ETF. Third, the Exchange proposes to eliminate the existing cap limiting cash settlement as a contract term to no more than 50 underlying ETFs.

One-Month Lookback for Newly Eligible ETFs

Under the current rule, the Exchange determines eligible underlying ETFs bi-annually, on January 1 and July 1 of each year, using six months of prior trading statistics, with newly eligible ETFs permitted to list cash-settled FLEX options beginning on February 1 and August 1, respectively. No mechanism currently exists to add newly FLEX-eligible ETFs to the eligible list between bi-annual reviews. As a result, an ETF that becomes FLEX-eligible after a bi-annual review has been conducted may not be considered for cash-settled FLEX ETF Option eligibility for up to six months, even if it otherwise satisfies the notional value and ADV requirements of Options 3A, Section 3(c)(5)(A)(ii). The Exchange proposes to address this gap by permitting, outside of the regular bi-annual review, the Exchange to determine that a newly FLEX-eligible ETF satisfies heightened notional value and trading volume requirements of $600 million average daily notional value and 5,616,000 shares ADV based

[5] *See supra* note 3.

[8] *See id.*
[9] *See id.*
[10] *See id.*
[11] *See id.*
[12] *See id.*

on the previous one-month period of trading statistics. Any ETF satisfying such requirements on that basis shall be eligible for cash settlement as a contract term.

The Exchange believes a one-month lookback is appropriate in this context because an ETF that has newly become FLEX-eligible and simultaneously satisfies both the $600 million average daily notional value threshold and the 5,616,000-share ADV requirement over the prior month has already demonstrated the degree of liquidity and trading activity that the eligibility criteria are designed to capture. These thresholds represent a 20% increase over the standard $500 million and 4,680,000-share thresholds that apply to the bi-annual review, reflecting the Exchange's determination that heightened criteria are appropriate for ETFs seeking to qualify based on a shorter lookback period. The Exchange believes that Cboe's annual monitoring reports demonstrate that the existing criteria are an effective proxy for identifying ETFs that are not readily susceptible to manipulation. Requiring newly eligible ETFs to await the next bi-annual review before becoming eligible for cash settlement would delay investor access to the product.

Cboe's back-testing analysis of newly listed FLEX ETFs supports the appropriateness of the heightened thresholds.[13] Under the standard eligibility criteria ($500 million average daily notional value and 4,680,000 shares ADV), ten ETFs would have qualified based on one month of trading data. Under the 20% increased thresholds ($600 million average daily notional value and 5,616,000 shares ADV), only eight ETFs qualified. Cboe noted that the two ETFs excluded by the heightened thresholds did not qualify at their next six-month bi-annual review, demonstrating that the heightened thresholds effectively filter out ETFs whose initial trading activity may not be sustained.

The Exchange believes the heightened thresholds for the one-month lookback appropriately address the concern that a newly listed ETF may experience elevated trading activity in its initial period that is not representative of sustained liquidity. By requiring newly eligible ETFs to satisfy thresholds that are 20% above the standard bi-annual review criteria, the Exchange ensures that only those ETFs demonstrating a meaningfully higher level of liquidity and trading activity—beyond what may reflect initial market interest—are eligible for cash settlement based on the shorter lookback period.

Further, the Exchange represents that it will continue to monitor the one-month lookback criteria on an ongoing basis to assess the appropriateness of the threshold. As part of this ongoing monitoring, the Exchange will evaluate whether the heightened criteria continue to effectively identify ETFs with sustained liquidity and trading activity, and will propose adjustments to the threshold if warranted by the Exchange's review.

Tiered Criteria for ETFs Ceasing To Satisfy Eligibility Requirements

Under the current rule, if the Exchange determines at the time of a bi-annual review that an underlying ETF ceases to satisfy the eligibility criteria, any new position overlying that ETF must be physically settled and any existing open cash-settled positions may be traded only to close. While this provision addresses the wind-down of cash-settled activity in a straightforward manner, it does not distinguish between ETFs with active open interest and those with no meaningful cash-settled activity, nor does it account for the possibility that an ETF may temporarily fall below the eligibility thresholds and subsequently recover.

The Exchange proposes to replace this provision with a tiered framework that more precisely calibrates the treatment of an ineligible ETF to the actual state of the market for cash-settled FLEX ETF Options overlying that ETF. Under the proposed framework, if no open interest in cash-settled FLEX Equity Options overlying the ETF exists during the previous six-month period at the time of the bi-annual review determination, the existing treatment will apply: any new position must be physically settled and any open cash-settled positions may be traded only to close. Where open interest in cash-settled FLEX Equity Options overlying the ETF does exist during the previous six-month period, the Exchange will permit the opening of new cash-settled positions in that ETF for a period of one year from the date of the bi-annual review, after which any new position must be physically settled and any remaining open cash-settled positions may be traded only to close. This one-year continuation period is intended to provide market participants holding or seeking to manage existing cash-settled positions with a reasonable and predictable runway to do so, rather than abruptly restricting new position activity at the time of the bi-annual review determination.

The proposed framework also includes a recovery provision: if the underlying ETF satisfies the eligibility criteria at the time of either bi-annual review conducted during the one-year continuation period, that period will terminate and the ETF will resume full eligibility for cash settlement as a contract term. The Exchange believes this provision appropriately accounts for the possibility that an ETF's trading statistics may fluctuate around the eligibility thresholds and prevents an unnecessarily disruptive wind-down in cases where the ETF promptly returns to eligibility.

Elimination of the 50–ETF Cap

The Exchange also proposes to eliminate the existing provision limiting cash settlement as a contract term to no more than 50 underlying ETFs. The cap was adopted at the outset of the program to prevent the scope of cash-settled FLEX ETF Options from expanding considerably without a corresponding evaluation of whether the level of the eligibility requirements remained reasonable. While the number of ETFs satisfying the eligibility criteria remained well below 50 during the initial period of the program's operation, over the two-year period that Cboe monitored the market, the number of qualifying ETFs has grown to exceed that threshold (as of February 1, 2026, 60 ETFs were eligible), such that the cap now operates as an active constraint on the availability of cash-settled FLEX ETF Options on ETFs that otherwise satisfy the established eligibility criteria. The Exchange does not believe this result is consistent with the purpose of the cap, which was intended as a programmatic guardrail rather than a permanent numerical ceiling. As noted above, Cboe did not identify manipulation concerns in its reviews. Given the same eligibility criteria and position and exercise limits would apply to any cash-settled FLEX ETF option, as would the Exchange's surveillance program, the Exchange believes the 50–ETF cap is no longer necessary. The Exchange believes these protections and the eligibility criteria themselves sufficiently mitigate any manipulation concerns associated with cash-settled FLEX ETF Options.

The Exchange also notes that, consistent with its commitment in the original proposal, it will continue to furnish the Commission with annual reports for the remainder of the five-year review period. The Exchange believes that the continued reporting commitment, together with the proposed amendments, appropriately positions the cash-settled FLEX ETF

[13] For purposes of the back-testing analysis, Cboe reviewed all newly listed FLEX-eligible ETFs from January 1, 2025 through April 6, 2026.

Option framework to address the operational gaps identified through the Exchange's review to date while preserving the monitoring mechanisms that allow the Exchange and the Commission to evaluate the ongoing impact of the program.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[14] in general, and furthers the objectives of Section 6(b)(5) of the Act,[15] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Exchange believes the proposed rule change is consistent with Section 6(b)(5) of the Act because each of the proposed amendments is designed to refine an existing, Commission-approved framework in a manner that is reasonably calibrated to address identified operational gaps while preserving and reinforcing the manipulation-mitigating features of that framework.

One-Month Lookback for Newly Eligible ETFs

The Exchange believes the proposed one-month lookback for newly FLEX-eligible ETFs is consistent with the Act because it removes an impediment to the offering of cash-settled FLEX ETF Options on ETFs that have already demonstrated the liquidity and trading activity that the eligibility criteria are designed to capture, without compromising the manipulation-resistant features of those criteria. Under the current rule, an ETF that becomes FLEX-eligible after a bi-annual review has been conducted must wait up to six months before it may be considered for cash-settled FLEX ETF Option eligibility, even if it satisfies both the $600 million average daily notional value threshold and the 5,616,000-share ADV requirement at the time it becomes FLEX-eligible. The Exchange believes this gap is not necessary to protect against manipulation.

An ETF that satisfies both heightened thresholds over the prior one-month period has demonstrated a degree of liquidity and breadth of trading activity exceeding that which the six-month bi-annual review is designed to identify as indicative of reduced susceptibility to manipulation. The heightened thresholds, which represent a 20% increase over the standard $500 million and 4,680,000-share thresholds applicable to the bi-annual review, are designed to account for the possibility that a newly listed ETF may experience elevated trading activity in its initial period that is not representative of sustained liquidity. As noted above, Cboe's annual monitoring reports demonstrated the existing eligibility criteria are an effective and reliable proxy for identifying ETFs that are not readily susceptible to manipulation, and did not identify any manipulation concerns in connection with cash-settled FLEX ETF Options or their underlying ETFs during that period. The Exchange therefore believes that permitting a one-month lookback for newly FLEX-eligible ETFs between bi-annual reviews, subject to the heightened thresholds, removes an impediment to and perfects the mechanism of a free and open market and protects investors and the public interest by providing timely investor access to a cash-settlement alternative on ETFs that satisfy the established eligibility criteria, while maintaining the protections afforded by those criteria.

Cboe's back-testing analysis further supports the consistency of the heightened thresholds with the Act's anti-manipulation objectives. Under the standard criteria, ten newly listed FLEX ETFs would have qualified based on one month of trading data, but under the 20% increased thresholds only 8 qualified. The two names excluded (AMDL and SIVR) did not qualify at their next six-month bi-annual review, confirming that the heightened thresholds effectively identify and exclude ETFs whose initial trading statistics do not reflect sustained market activity. The Exchange believes this empirical evidence demonstrates that the heightened thresholds are reasonably designed to prevent ETFs with potentially transient liquidity from qualifying for cash settlement based on the shorter lookback period.

Tiered Criteria for ETFs Ceasing To Satisfy Eligibility Requirements

The Exchange believes the proposed tiered framework for ETFs that cease to satisfy the eligibility criteria at the time of a bi-annual review is consistent with the Act because it is reasonably designed to prevent fraudulent and manipulative acts and practices while also promoting just and equitable principles of trade and protecting investors. The current rule applies a single, uniform wind-down treatment to any ETF that falls below the eligibility thresholds at bi-annual review, regardless of whether active open interest in cash-settled FLEX ETF Options overlying that ETF exists. The Exchange believes this one-size-fits-all approach does not adequately account for the legitimate interests of market participants that hold existing cash-settled positions or that need the ability to open new positions to manage existing risk exposure in an ETF that has temporarily fallen below the thresholds.

The proposed tiered framework addresses this concern in a manner consistent with the Act's investor protection and anti-manipulation objectives. Where no open interest in cash-settled FLEX ETF Options overlying the affected ETF has existed during the previous six-month period, the current treatment would continue to apply, because the Exchange believes an immediate restriction on new cash-settled positions would not disrupt market participants' activity. Where open interest does exist at the time of the bi-annual review, the proposed one-year continuation period provides market participants with a reasonable and predictable runway to manage existing positions, which the Exchange believes promotes just and equitable principles of trade. The Exchange further believes that the recovery provision, under which the continuation period terminates and full eligibility is restored if the ETF satisfies the criteria at either bi-annual review during the one-year period, is consistent with the Act because it prevents an unnecessarily disruptive wind-down where an ETF's trading statistics temporarily dip below the eligibility thresholds and then recover, and it reinforces the principle that the eligibility criteria, rather than arbitrary timing, are the appropriate determinant of cash-settlement eligibility. Taken together, the Exchange believes the tiered framework is a reasonable means to address manipulation concerns while not unduly burdening market participants with existing cash-settled positions, as it eliminates the current immediate disruption to their investment strategies.

Elimination of the 50–ETF Cap

The Exchange believes the elimination of the 50–ETF cap is consistent with the Act because the cap is no longer necessary to protect against the concerns it was designed to address and, as currently operative, functions as an impediment to the offering of cash-settled FLEX ETF Options on ETFs that otherwise satisfy the established eligibility criteria. The cap was adopted at the outset of the program to prevent

[14] 15 U.S.C. 78f(b).

[15] 15 U.S.C. 78f(b)(5).

the scope of cash-settled FLEX ETF Options from expanding considerably without a corresponding evaluation of whether the level of the eligibility requirements remained reasonable. While the number of qualifying ETFs remained well below 50 during the initial period of the program's operation, that number has more recently grown to exceed the cap, such that the cap now actively restricts the availability of cash-settled FLEX ETF Options on ETFs that fully satisfy the notional value and ADV requirements of Options 3A, Section 3(c)(5)(A)(ii). The Exchange believes that retaining this arbitrary restriction is inconsistent with the Act's objectives because Cboe's two-year monitoring record demonstrates that the eligibility criteria themselves limit the availability of cash settlement to FLEX ETF Options. The liquidity and trading activity requirements mitigate manipulation concerns for any ETF that satisfies those requirements, not just the top 50.

During the first two years that cash-settled FLEX ETF Options were available on Cboe, it identified (and its annual monitoring reports demonstrated) no manipulation concerns in connection with cash-settled FLEX ETF Options or their underlying ETFs. The Exchange believes the eligibility criteria, position and exercise limits, and surveillance program applicable to the 50 ETFs eligible for FLEX options with cash-settlement provide adequate protections against manipulation and market disruption to all ETFs that satisfy the criteria, regardless of the number of qualifying ETFs. The Exchange therefore believes that eliminating the cap removes an impediment to and perfects the mechanism of a free and open market, protects investors and the public interest, and is otherwise consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange does not believe the proposed rule change will impose any burden on intramarket competition. The proposed amendments apply uniformly to all market participants that trade cash-settled FLEX ETF Options on the Exchange. All newly FLEX-eligible ETFs would be eligible for the one-month lookback, subject to the same heightened eligibility thresholds ($600 million average daily notional volume and 5,616,000 shares ADV) and any ETF that satisfies those heightened criteria within that one-month lookback would be eligible for cash-settlement, and cash-settled FLEX options on such ETFs would be available to all market participants. The tiered framework for ETFs ceasing to satisfy the eligibility criteria applies in the same manner to all market participants holding or seeking to open positions in cash-settled FLEX ETF Options overlying the affected ETF, and the one-year continuation period and recovery provision provide all such participants with the same predictable and equitable treatment. The elimination of the 50–ETF cap permits any ETF that satisfies the eligibility criteria to be eligible for FLEX cash-settlement rather than arbitrarily restricting that product availability to 50 ETFs. The Exchange believes the proposed rule promotes competition, as it would treat all ETFs that satisfy the eligibility criteria for cash-settled FLEX Options in the same manner.

The Exchange does not believe the proposed rule change will impose any burden on intermarket competition. Cash-settled FLEX ETF Options with the same underlying ETF may be listed on multiple exchanges, and the proposed amendments do not restrict the ability of other exchanges to adopt similar or competing frameworks. This rule proposal is a competitive response to Cboe's proposal [16] and it would enhance competition among the options exchanges.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act [17] and subparagraph (f)(6) of Rule 19b–4 thereunder.[18]

A proposed rule change filed under Rule 19b–4(f)(6) [19] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[20] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange states that waiver of the operative delay would permit the Exchange to amend its FLEX rules consistent with Cboe [21] and competitively offer the same products on a cash-settled basis. For this reason, and because the proposed rule change raises no new or novel legal or regulatory issues, the Commission finds that waiver of the operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission waives the 30-day operative delay and designates the proposed rule change to be operative upon filing.[22]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–Phlx–2026–49 on the subject line.

[16] See supra

[17] 15 U.S.C. 78s(b)(3)(A)(iii).

[18] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[19] 17 CFR 240.19b–4(f)(6).

[20] 17 CFR 240.19b–4(f)(6)(iii).

[21] *See supra* note 3.

[22] For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–Phlx–2026–49. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml.* Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–Phlx–2026–49 and should be submitted on or before August 25, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[23]

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 36276; 812–15935]

Yorkville America Investment Trust and Yorkville America Equities, LLC

July 30, 2026.

AGENCY: Securities and Exchange Commission (''Commission'' or ''SEC'').

ACTION: Notice.

Notice of an application under section 6(c) of the Investment Company Act of 1940 (''Act'') for an exemption from section 15(a) of the Act, as well as from certain disclosure requirements in rule 20a–1 under the Act, Item 19(a)(3) of Form N–1A, Items 22(c)(1)(ii), 22(c)(1)(iii), 22(c)(8) and 22(c)(9) of Schedule 14A under the Securities Exchange Act of 1934, and sections 6–07(2)(a), (b), and (c) of Regulation S–X (''Disclosure Requirements'').

SUMMARY OF APPLICATION: The requested exemption would permit Applicants to enter into and materially amend subadvisory agreements with subadvisors without shareholder approval and would grant relief from the Disclosure Requirements as they relate to fees paid to the subadvisors.

APPLICANTS: Yorkville America Investment Trust and Yorkville America Equities, LLC.

FILING DATES: The application was filed on November 6, 2025, and amended on July 14, 2026.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at *Secretarys-Office@sec.gov* and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant Applicant below. The email should include the file number referenced above. Hearing requests should be received by the Commission by 5:30 p.m., Eastern time, on August 25, 2026, and should be accompanied by proof of service on the Applicants, in the form of an affidavit, or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary.

ADDRESSES: The Commission: *Secretarys-Office@sec.gov.* Applicants: Steve Neamtz, President, Yorkville America Equities, LLC, 1012 Springfield Avenue, Mountainside, New Jersey 07092; John H. Lively, Practus, LLP, 11300 Tomahawk Creek Parkway, Suite 310, Leawood, KS, 66211.

FOR FURTHER INFORMATION CONTACT: Asaf Barouk, Senior Counsel, or Matthew Cook, Branch Chief, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: For Applicants' representations, legal analysis, and conditions, please refer to Applicants' amended and restated application, dated July 14, 2026, which may be obtained via the Commission's website by searching for the file number at the top of this document, or for an Applicant using the Company name search field on the SEC's EDGAR system. The SEC's EDGAR system may be searched at *https://www.sec.gov/search-filings.* You may also call the SEC's Office of Investor Education and Assistance at (202) 551–8090.

For the Commission, by the Division of Investment Management, under delegated authority.

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

DEPARTMENT OF STATE

[Public Notice: 13090]

Imposition of Nonproliferation Measures Against Foreign Persons, Including a Ban on U.S. Government Procurement

ACTION: Notice.

SUMMARY: A determination has been made that a number of foreign persons have engaged in activities that warrant the imposition of measures pursuant to the Iran, North Korea, and Syria Nonproliferation Act (INKSNA).

DATES: These measures went into effect July 24, 2026.

FOR FURTHER INFORMATION CONTACT: On general issues: Pam Durham, Office of WMD and Missile Controls, Bureau of Arms Control and Nonproliferation, Department of State, Telephone (202) 647–4930. Email: *acn-wmc-sanctions@state.gov.* For U.S. Government procurement ban issues: Eric Moore, Office of the Procurement Executive, Department of State, Telephone: (703) 875–4079. Email: *mooreen@state.gov.*

SUPPLEMENTARY INFORMATION: The INKSNA provides for sanctions on foreign entities and individuals for the transfer to or acquisition from Iran since January 1, 1999; the transfer to or acquisition from Syria since January 1, 2005; or the transfer to or acquisition from the DPRK since January 1, 2006, of goods, services, or technology controlled under multilateral control lists (Australia Group, Chemical Weapons Convention, Missile Technology Control Regime, Nuclear Suppliers Group, and Wassenaar Arrangement) or otherwise having the potential to make a material contribution to the development of weapons of mass destruction (WMD) or cruise or ballistic missile systems.

On July 24, 2026, the U.S. Government applied the measures authorized in section 3 of the Iran, North Korea, and Syria Nonproliferation Act (Pub. L. 106–178) against the following foreign persons identified in the report submitted pursuant to section 2(a) of the Act:

1061st Material-Technical Support Center (MTSC) (Russia); and any

[23] 17 CFR 200.30–3(a)(12).

successor, sub-unit, or subsidiary thereof;

Abdullah Hammam bin Mustafar (Malaysia-national)

Aleksandr Ivanovich Prikhodko (Russian national)

Andrei Gusev (Russian national)

Andrey Vladimirovich Kosolapov (Russian national)

Ellengo Lori (Malaysia national)

Gedion Alpha Company LLC (Russia); and any successor, sub-unit, or subsidiary thereof;

Huang Chin Hsin (aka Huang Jinxing) (Taiwan national)

International Invest Company (IIC) (Russia); and any successor, sub-unit, or subsidiary thereof;

Kala Gozar Pars Shipping and Logistics Company (Iran); and any successor, sub-unit, or subsidiary thereof;

Kang T'ae-so'ng (aka Kang Thae Song) (DPRK national)

Mehdi Ghasemi (Malaysia national)

Mohammad Ejen (Malaysia national)

Morozik Vladislav Antonovich (Russian national)

NS Global Logistics (Malaysia); and any successor, sub-unit, or subsidiary thereof;

Rabi' Madkhanah (Syrian national)

Ruhollah Katebi (Iranian national)

Russian Ground Forces (RGF) (Russia); and any successor, sub-unit, or subsidiary thereof;

Russian Main Missile and Artillery Directorate (Russia); and any successor, sub-unit, or subsidiary thereof;

Russian Ministry of Defense Directorate for Advanced Inter-Service Research and Special Projects (UPMLiSP) (Russia); and any successor, sub-unit, or subsidiary thereof;

Sergey Nikolayevich Tsibarev (Russia)

Yixing Ruibang High Performance Carbon Fiber Products Co. Ltd (aka Yixing Ruibang) (China); and any successor, sub-unit, or subsidiary thereof;

Accordingly, pursuant to section 3 of the Act, the following measures are imposed on these persons:

1. No department or agency of the U.S. government may procure or enter into any contract for the procurement of any goods, technology, or services from these foreign persons, except to the extent that the Secretary of State otherwise may determine;

2. No department or agency of the U.S. government may provide any assistance to these foreign persons, and these persons shall not be eligible to participate in any assistance program of the U.S. government, except to the extent that the Secretary of State otherwise may determine;

3. No U.S. government sales to these foreign persons of any item on the United States Munitions List are permitted, and all sales to these persons of any defense articles, defense services, or design and construction services under the Arms Export Control Act are terminated; and

4. No new individual licenses shall be granted for the transfer to these foreign persons of items the export of which is controlled under the Export Control Reform Act of 2018 or the Export Administration Regulations, and any existing such licenses are suspended.

These measures shall be implemented by the responsible departments and agencies of the U.S. government and will remain in place for two years from the effective date, except to the extent that the Secretary of State may subsequently determine otherwise. These measures are independent of and in addition to any other sanctions imposed on such entities and/or individuals by other federal agencies under separate legal authorities.

Christopher T. Yeaw,

Assistant Secretary for Bureau of Arms Control and Nonproliferation, Department of State.

BILLING CODE 4710–27–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA–2026–9076]

Agency Information Collection Activities: Requests for Comments; Clearance of a Renewed Approval of Information Collection: National Air Tours Safety Standards

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. The collection involves requirements in FAA regulations that set safety and oversight rules for a broad variety of sightseeing and commercial air tour flights to improve the overall safety of commercial air tours by requiring all air tours to submit information.

DATES: Written comments should be submitted by October 5, 2026.

ADDRESSES: Please send written comments:

By Electronic Docket: www.regulations.gov (Enter docket number into search field).

By mail: Sandra Ray, Federal Aviation Administration, AFS–260, 1187 Thorn Run Road, Suite 200, Coraopolis, PA 15108.

By fax: 412–239–3063.

FOR FURTHER INFORMATION CONTACT: *Sandra.ray@faa.gov;* phone: 412–546–7344.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

OMB Control Number: 2120–0717.

Title: National Air Tours Safety Standards.

Form Numbers: None.

Type of Review: Renewal of an information collection.

Background: FAA regulations set safety and oversight rules for a broad variety of sightseeing and commercial air tour flights to improve the overall safety of commercial air tours by requiring all air tour operators to submit information. The FAA uses the information it collects and reviews to ensure compliance and adherence to regulations and, if necessary, take enforcement action on violators of the regulations.

Respondents: Commercial Air Tour Operators.

Frequency: Most Requirements are annual, One requirement is one time only.

Estimated Average Burden per Response: Burden varies per individual requirement. Average burden is 5 hours per response.

Estimated Total Annual Burden: 2,560 Hours.

Issued in Washington, DC on July 31, 2026.

Sandra L. Ray,

Aviation Safety Inspector, AFS–260.

[FR Doc. 2026–15771 Filed 8–3–26; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA–2026–3339]

Agency Information Collection Activities: Requests for Comments; Clearance of a Renewed Approval of Information Collection: Fueling Aviation's Sustainable Transition Grant (FAST) Program

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on April 23, 2026. The collection consists of reports from grant recipients documenting technical progress, schedule, risks, and costs for each already awarded FAST grant. The information to be collected will be used to monitor performance of these projects.

DATES: Written comments should be submitted by September 3, 2026.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Chris Dorbian by email at: *christopher.dorbian@faa.gov;* phone: 202–267–8156.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information.

OMB Control Number: 2120–0817.

Title: Fueling Aviation's Sustainable Transition Grant Program.

Form Numbers: N/A.

Type of Review: Renewal of an information collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on April 23, 2026 (91 FR 21860). The FAA will use this renewed collection to continue to monitor and evaluate the performance of awarded FAST grants. FAA is collecting information on technical progress, schedule, risks, and costs for each project. This information is collected via required performance reporting deliverables, including quarterly and publicly releasable annual reports and semi-annual review presentations. A team of subject matter experts in aircraft technology development and aviation fuels from the FAA and other government agencies review these deliverables. This collection is necessary to ensure proper oversight of the use of taxpayer funding and to provide transparency to the public in the form of public reports. The FAST Grant Program was established under Public Law 117–169.

Respondents: FAST grant recipients.

Frequency: Quarterly.

Estimated Average Burden per Response: 134 hours per grant recipient per year.

Estimated Total Annual Burden: 1876 hours.

Issued in Washington, DC on July 30, 2026.

Julie Marks,

Executive Director, Federal Aviation Administration—Office of Environment and Energy.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2026–0727]

Agency Information Collection Activities; Renewal of an Approved Information Collection Request: Commercial Driver's License Drug and Alcohol Clearinghouse

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FMCSA announces its plan to submit the Information Collection Request (ICR) described below to the Office of Management and Budget (OMB) for review and approval and invites public comment. The Agency's final rule titled ''Commercial Driver's License Drug and Alcohol Clearinghouse'' (Clearinghouse), published in the **Federal Register** on December 5, 2016, established the regulatory requirements for the Clearinghouse. The compliance date for the final rule was January 6, 2020. FMCSA began collecting data as authorized users began registering in the Clearinghouse in September 2019. This ICR revision is needed to support the continuation of the querying and reporting requirements to address the problem of commercial driver's license (CDL) and commercial learner's permit (CLP) holders who test positive for the use of controlled substances or the misuse of alcohol and then continue to perform safety sensitive functions, including driving a commercial motor vehicle (CMV), without completing the required return-to-duty (RTD) process.

DATES: Comments on this notice must be received on or before September 3, 2026.

ADDRESSES: Written comments and recommendations for the proposed information collection should be submitted within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Derrick Carrington, Drug and Alcohol Programs Division, DOT, FMCSA, 1200 New Jersey Avenue SE, Washington, DC 20590–0001; (202) 366–9394; *derrick.carrington@dot.gov.*

SUPPLEMENTARY INFORMATION:

Title: Commercial Driver's License Drug and Alcohol Clearinghouse.

OMB Control Number: 2126–0057.

Type of Request: Renewal of an approved ICR.

Respondents: Motor carriers (employers), drivers, MROs, SAPs, consortia/third-party administrators (C/TPAs), and SDLAs.

Estimated Number of Respondents: 9,834,949.

Estimated Time per Response: Varies; 10 to 20 minutes.

Expiration Date: August 31, 2026.

Frequency of Response: On occasion.

A user's role will determine the frequency of the response in the Clearinghouse.

- *Employers, or C/TPAs acting on behalf of an employer:* At a minimum, employers are required to query the Clearinghouse for each driver they currently employ at least once a year. Employers must query the Clearinghouse for all prospective employees, as needed. In addition, employers report to the Clearinghouse

alcohol confirmation tests with a concentration of 0.04 or higher, refusal to test (alcohol), refusal to test (drug) that is not determined by an MRO, and actual knowledge of violations, negative RTD testing, and completion of the follow-up testing plan. Employer reporting must be completed by the close of the third business day following the date they obtained the information on the driver.

- *MROs:* Verified positive, adulterated, or substituted drug test result and refusals to tests (drug) must be entered to the Clearinghouse on occasion, but no later than 2 business days after making a determination or verification.
- *SAPs:* Must enter the initial assessment date and the date the driver successfully complied with RTD requirements. SAPs are required to enter this information on occasion by the close of business day following the date of the initial assessment or completion of the RTD process.
- *SDLAs:* May query the Clearinghouse prior to specified licensing transactions to determine whether drivers are listed in the ''prohibited status.''
- *Drivers:* Provide general consent to employer queries outside of the Clearinghouse.
- *Drivers:* Must provide their specific consent to pre-employment queries electronically through the Clearinghouse.

Estimated Total Annual Burden: 1,653,032 hours.

Background

Agency regulations at 49 Code of Federal Regulations (CFR) part 382 apply to persons and employers of such persons who operate CMVs in commerce in the United States and who are subject to the CDL requirements in 49 CFR part 383 or the equivalent CDL requirements for Canadian and Mexican drivers operating in the United States (49 CFR 382.103(a)). Part 382 requires that employers conduct pre-employment drug testing; random, post-accident, and reasonable suspicion drug and alcohol testing; and RTD testing and follow-up testing for those drivers who test positive or otherwise violate DOT drug and alcohol program requirements. Motor carrier employers are prohibited from allowing an employee to perform safety-sensitive functions, which include operating a CMV, if the employee tests positive on a DOT drug or alcohol test, refuses to take the required test, or otherwise violates FMCSA's drug and alcohol testing regulations.

Section 32402 of the Moving Ahead for Progress in the 21st Century Act (Pub. L. 112–141, 126 Stat. 405 (2012)) required that the Secretary of Transportation (the Secretary) establish, operate, and maintain a national clearinghouse for records relating to alcohol and controlled substances testing of CMV operators to improve compliance with the DOT's alcohol and controlled substances testing program and to enhance the safety of our roadways by reducing crashes and injuries involving the misuse of alcohol or use of controlled substances by operators of CMVs. FMCSA published a final rule on December 5, 2016, with an effective date of January 4, 2017, and a compliance date of January 6, 2020, to implement the requirements of the Clearinghouse (81 FR 87686). In September 2019 FMCSA first began collecting data relating to authorized users' registration in the Clearinghouse. On January 6, 2020, FMCSA began collecting data related to drivers' drug and alcohol program violations and associated return to duty process, as well as allowing queries conducted by employers on CDL or CLP holders.

The Clearinghouse functions as a repository for records relating to the positive test results and test refusals of CMV operators and violations by such operators of prohibitions set forth in 49 CFR, part 382, subpart B. An employer utilizes the Clearinghouse to determine whether current and prospective employees have incurred a drug or alcohol program violation that would prohibit them from performing safety-sensitive functions, including operating a CMV.

The Clearinghouse provides FMCSA and employers with the necessary tools to identify drivers who are prohibited from operating a CMV and ensure that such drivers receive the required evaluation and treatment before resuming safety-sensitive functions. Specifically, information maintained in the Clearinghouse will ensure that drivers who commit a drug or alcohol program violation while working for one employer and attempt to find work with another employer can no longer conceal their drug and alcohol violations merely by moving on to the next job or the next State. Drug and alcohol violation records maintained in the Clearinghouse follow the driver regardless of how many times he or she changes employers, seeks employment, or applies for a CDL in a different State.

The information in the Clearinghouse is used by FMCSA and its State partners for enforcement purposes to:

- Ensure employers are meeting their pre-employment investigation and reporting requirements.
- Place drivers out of service if drivers are found to be operating a CMV without completing the RTD process; and
- Ensure medical review officers (MROs) and substance abuse professionals (SAPs) meet their reporting requirements.

Only authorized users, including employers and their service agents, Federal and State enforcement personnel, and State Driver Licensing Agencies (SDLAs) may register and access the Clearinghouse for designated purposes. State enforcement personnel may also receive the driver's eligibility status to operate a CMV, based on Clearinghouse information, when they check Query Central, the Commercial Driver's License Information System, or the National Law Enforcement Telecommunications System for driver information. FMCSA will share a driver's drug and alcohol violation information with the National Transportation Safety Board when it is investigating a crash involving that driver.

Drivers may access their own information, but not the information of other drivers. The Clearinghouse meets all relevant Federal security standards and FMCSA continuously monitors compliance with applicable security regulations.

Public Comments Received: A total of 88 comments were received with 71 by June 1, 2026, deadline. Information collection comments received suggested changes to the current regulation. Comments provided recommended changes to the underlying drug and alcohol regulations but did not directly address the published costs or burdens hours associated with the information collection. For example, it was widely suggested that SAPs have access to complete driver information and violation history. Associated comments included that SAPs should also be required to upload a copy of a driver's follow-up testing plan to the Clearinghouse. Additionally, recommendations of Clearinghouse SAP credentialing verification were received. In this renewal of the approval of information collection, FMCSA sought comments on burden and costs associated with the current rule. Suggested changes to the current rule would be facilitated through a notice of proposed rulemaking per 49 CFR 389.31.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1)

whether the proposed collection is necessary for the performance of FMCSA's functions; (2) the accuracy of the estimated burden; (3) ways for FMCSA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized without reducing the quality of the collected information.

Issued under the authority of 49 CFR 1.87.

Nicole S. Michel,

Acting Associate Administrator, Office of Research and Registration.

BILLING CODE 4910–EX–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Action

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the name of one person whose property and interests in property have been unblocked and who has been removed from the Specially Designated Nationals and Blocked Persons List (SDN List). OFAC is also publishing the names of one or more persons that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons are generally prohibited from engaging in transactions with them.

DATES: This action was issued on July 30, 2026. See **SUPPLEMENTARY INFORMATION** for relevant dates.

FOR FURTHER INFORMATION CONTACT: OFAC: Associate Director for Global Targeting, 202–622–2420; Assistant Director for Licensing, 202–622–2480; Assistant Director for Sanctions Compliance, 202–622–2490; or *https://ofac.treasury.gov/contact-ofac.*

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website: *https://ofac.treasury.gov.*

Notice of OFAC Actions

On July 30, 2026, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following person are unblocked under the relevant sanctions authority listed below.

Individual

1. DURANSOY, Cagri; DOB 04 Aug 1985; POB Kadikoy, Turkey; Passport TR–T 577847 (Turkey); alt. Passport 31/2857612/2007 (Turkey) (individual) [NPWMD] [IFSR].

Removed pursuant to Executive Order 13382 of June 28, 2005, ''Blocking Property of Weapons of Mass Destruction Proliferators and Their Supporters,'' 70 FR 38567, 3 CFR, 2005 Comp., p. 170 (E.O. 13382).

On July 30, 2026, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following persons are blocked under the relevant sanctions authorities listed below.

Individuals

1. TANG, Xin (a.k.a. ''TANG, Mike''), China; DOB 16 Dec 1969; nationality China; Gender Male; Secondary sanctions risk: section 1(b) of Executive Order 13224, as amended by Executive Order 13886; National ID No. 110105196912164113 (China) (individual) [SDGT] [IFSR] (Linked To: MAHAN AIR).

Designated pursuant to section 1(a)(iii)(C) of Executive Order 13224 of September 23, 2001, ''Blocking Property and Prohibiting Transactions With Persons Who Commit, Threaten To Commit, or Support Terrorism,'' (E.O. 13224), 66 FR 49079, as amended by Executive Order 13886 of September 9, 2019, ''Modernizing Sanctions To Combat Terrorism,'' 84 FR 48041, 3 CFR, 2019 Comp., p. 356 (E.O. 13224, as amended), for having materially assisted, sponsored, or provided financial, material, or technological support for, or goods or services to or in support of, MAHAN AIR, a person whose property and interests in property are blocked pursuant to E.O. 13224.

2. DURANSOY, Cagri, Turkey; DOB 04 Aug 1985; POB Kadikoy, Turkey; nationality Turkey; Additional Sanctions Information—Subject to Secondary Sanctions; Gender Male; Passport TR–T 577847 (Turkey); alt. Passport 31/2857612/2007 (Turkey) (individual) [NPWMD] [IFSR] (Linked To: JAFARI, Milad).

Designated pursuant to section 1(a)(iii) of E.O. 13382 for having provided, or attempted to provide, financial, material, technological or other support for, or goods or services in support of, JAFARI, Milad, a person whose property and interests in property are blocked pursuant to E.O. 13382.

Entities

1. AIR CARGO PRO LIMITED (a.k.a. AIRCARGOPRO LTD; a.k.a. LIMITED LIABILITY COMPANY AIRCARGOPRO), Moscow, Russia; Secondary sanctions risk: section 1(b) of Executive Order 13224, as amended by Executive Order 13886; Organization Established Date 26 May 2010; Tax ID No. 5047116112 (Russia) [SDGT] [IFSR] (Linked To: MAHAN AIR).

   Designated pursuant to section 1(a)(iii)(C) of E.O. 13224, as amended, for having materially assisted, sponsored, or provided financial, material, or technological support for, or goods or services to or in support of, MAHAN AIR, a person whose property and interests in property are blocked pursuant to E.O. 13224.

2. DADENEGAR STARTUP STUDIO, Fereydounkhani Street, South Dibaji, Tehran, Iran; Heravi Hossein Abad, Tehran, Iran; 6743 W 75th St, Al Fallujah, Al Anbar Governate 31002, Iraq; Scharmbarg 109, Assen 9407 EA, Netherlands; Website https://dadenegarco.com; Email Address dadenegarcompany@gmail.com; alt. Email Address dadenegarhr@gmail.com; alt. Email Address dn.bi.api@gmail.com; Organization Established Date 2021; Organization Type: Computer programming activities [SDGT].

   Designated pursuant to section 1(a)(iii)(C) of E.O. 13224, as amended, for having materially assisted, sponsored, or provided financial, material, or technological support for, or goods or services to or in support of, ISLAMIC REVOLUTIONARY GUARD CORPS, a person whose property and interests in property are blocked pursuant to E.O. 13224.

3. SHANGHAI ELITE INTERNATIONAL TRAVEL CO LTD (Chinese Simplified: 上海马汉国际旅行社有限公司) (a.k.a. SHANGHAI

MAHAN INTERNATIONAL TRAVEL SERVICE COMPANY LTD), Shanghai 200020, China; Website www.iranmahanair.com; Secondary sanctions risk: section 1(b) of Executive Order 13224, as amended by Executive Order 13886; Organization Established Date 24 Feb 2014; Tax ID No. 310104087826111 (China); Registration Number 310104000567670 (China); Unified Social Credit Code (USCC) 913101040878261110 (China) [SDGT] [IFSR] (Linked To: TANG, Xin).

Designated pursuant to section 1(a)(iii)(A) of E.O. 13224, as amended, for being owned, controlled, or directed by, or having acted or purported to act for or on behalf of, directly or indirectly, TANG, Xin, a person whose property and interests in property are blocked pursuant to E.O. 13224, as amended.

4. SHANGHAI WINGS INTERNATIONAL LOGISTICS CO (Chinese Simplified: 上海翼上国际货运有限公司) (a.k.a. SHANGHAI WINGS INTERNATIONAL FREIGHT CO LTD; a.k.a. SHANGHAI YISHANG INTERNATIONAL FREIGHT CO LTD), Shenzhen, Guangdong, China; Room 172, Building A, No. 888, Huanhu West, 2nd Road, Lingang New Area, Pilot Free Trade Zone, Shanghai 200120, China; Secondary sanctions risk: section 1(b) of Executive Order 13224, as amended by Executive Order 13886; Organization Established Date 15 Jan 2021; Trade License No. 310142000159721 (China); Unified Social Credit Code (USCC) 91310000MA1H3GWY6C (China) [SDGT] [IFSR] (Linked To: MAHAN AIR).

   Designated pursuant to section 1(a)(iii)(C) of E.O. 13224, as amended, for having materially assisted, sponsored, or provided financial, material, or technological support for, or goods or services to or in support of, MAHAN AIR, a person whose property and interests in property are blocked pursuant to E.O. 13224.

5. SKIEZ TRAVELS AND LOGISTICS PRIVATE LIMITED (a.k.a. SKIEZ TRAVELS AND LOGISTICS PVT LTD; a.k.a. "SKIEZ TRAVEL"), Srinagar, Jammu and Kashmir 190001, India; A-287, Second Floor, Defence Colony, New Delhi, Delhi, India; Website https://skiez.in; Secondary sanctions risk: section 1(b) of Executive Order 13224, as amended by Executive Order 13886; Organization Established Date 27 Nov 2020; Tax ID No. ABECS9772K (India); Identification Number U60210JK2020PTC011906 (India) [SDGT] [IFSR] (Linked To: MAHAN AIR).

   Designated pursuant to section 1(a)(iii)(C) of E.O. 13224, as amended, for having materially assisted, sponsored, or provided financial, material, or technological support for, or goods or services to or in support of, MAHAN AIR, a person whose property and interests in property are blocked pursuant to E.O. 13224.

(Authority: E.O. 13224, as amended; E.O. 13902; E.O. 13382.)

Bradley T. Smith,

Director, Office of Foreign Assets Control.

BILLING CODE 4810–AL–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Agency Information Collection Activities: Comment Request on the Burden Related to the Withholding and Information Reporting for Transfers of Partnership Interests

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of information collection and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the IRS is inviting comments on the information collection request outlined in this notice.

DATES: Written comments should be received on or before October 5, 2026 to be assured of consideration.

ADDRESSES: Direct all written comments and recommendations to Andrés Garcia, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224, or by email at *pra.comments@irs.gov.* Please include, ''OMB Number: 1545–2292—Public Comment Request Notice'' in the subject line of the message.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of this collection should be directed to Ronald J. Durbala, (202)–317–5746 or via email at *RJoseph.Durbala@irs.gov.*

SUPPLEMENTARY INFORMATION: The IRS, in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the IRS assess its impact and minimize the burden of its information collection requirements. Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record and be viewable on relevant websites. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information.

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Title: Withholding and Information Reporting for Transfers of Partnership Interests.

OMB Number: 1545–2292.

Project Number(s): TD 9926.

Abstract: This collection of information relates to regulations under Internal Revenue Code section 1446(f) governing withholding and information reporting for certain transfers of partnership interests. The regulations require certifications, notifications, partnership statements, and related recordkeeping by transferors, transferees, partnerships, brokers, and other affected parties. The information is used to administer the statutory withholding and reporting requirements, determine whether exceptions or adjustments to withholding apply, and ensure that the proper amount of tax is reported and collected.

Current Actions: There are no changes being made to the burden at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other for-profit organizations, and individuals.

Estimated Number of Respondents: 76,000.

Estimated Time per Respondent: 40 min.

Estimated Total Annual Burden Hours: 50,920.

Dated: July 31, 2026.

Ronald J. Durbala,

Tax Analyst.

FEDERAL REGISTER

Vol. 91 Tuesday,
No. 148 August 4, 2026

Part II

Federal Reserve System

12 Parts 217 and 239
Regulatory Modernization and Relief for Mutual Holding Companies; Proposed Rule

FEDERAL RESERVE SYSTEM

12 CFR Parts 217 and 239

[Regulations Q and MM; Docket No. R–1895]

RIN 7100–AH26

Regulatory Modernization and Relief for Mutual Holding Companies

AGENCY: Board of Governors of the Federal Reserve System (Board).

ACTION: Notice of proposed rulemaking.

SUMMARY: The Board invites comment on a notice of proposed rulemaking (proposal) to modernize the regulatory framework applicable to mutual holding companies (MHCs), primarily through proposed revisions to Regulation MM (12 CFR part 239), which governs the formation, operations, activities, and conversion of savings and loan holding companies in mutual form. The proposal would amend Regulation MM by, among other things, eliminating certain dividend waiver requirements, reducing burden associated with conversions from mutual-to-stock form, revising certain post-conversion restrictions, eliminating the requirement that subsidiary holding companies of MHCs obtain federal charters, and revising and clarifying other provisions of the regulation. The proposal also would amend the capital rule (12 CFR part 217) to clarify that certain mutual capital instruments may qualify as regulatory capital and to codify model term sheets for mutual capital certificates as appendices to the regulation.

DATES: Comments must be submitted by October 5, 2026.

ADDRESSES: You may submit comments, identified by Docket No. R–1895 and RIN 7100–AH26, by using any of the following methods:

- *Agency Website: https://www.federalreserve.gov/apps/proosals/.* Follow the instructions for submitting comments, including attachments. *Preferred Method.*
- *Mail:* Benjamin W. McDonough, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.
- *Hand Delivery/Courier:* Same as mailing address.
- *Other Means: publiccomments@frb.gov.* You must include the docket number in the subject line of the message.

Comments received are subject to public disclosure. In general, comments received will be made available on the Board's website at *https://www.federalreserve.gov/apps/proposals/* without change and will not be modified to remove personal or business information including confidential, contact, or other identifying information. Comments should not include any information such as confidential information that would not be appropriate for public disclosure. Public comments may also be viewed electronically or in person in Room M—4365A, 2001 C St. NW, Washington, DC 20551, between 9 a.m. and 5 p.m. during Federal business weekdays.

FOR FURTHER INFORMATION CONTACT: Lucy Chang, Assistant General Counsel, (202) 475–6331; Mark Buresh, Senior Special Counsel, (202) 452–5270; Victoria Szybillo, Senior Counsel, (202) 475–6325; Trevor Feigleson, Senior Counsel, (202) 452–3274; Jonah Kind, Senior Counsel, (202) 452–2045; Tara Hofbauer, Senior Attorney, (202) 680–2503; Sean KimKwon, Attorney, (240) 374–7747; Timothy Kelly, Attorney, (771) 210–6989, Legal Division; Anna Lee Hewko, Associate Director, (202) 250–1577, Jonathan Rono, Manager, (202) 603–9780, Missaka Nuwan Warusawitharana, Manager, (202) 452–3461, Helen Xu, Manager, (202) 603–1924, Division of Supervision and Regulation; Board of Governors of the Federal Reserve System, 20th and C Street NW, Washington, DC 20551. I. Background

On July 21, 2011, pursuant to section 312 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), the Board assumed responsibility for the supervision and regulation of savings and loan holding companies (SLHCs) from the former Office of Thrift Supervision (OTS).[1] This responsibility extended to SLHCs in mutual form (thrift MHCs) and involved all functions of the OTS and the Director of the OTS related to SLHCs, including rulemaking authority and authority to issue orders.[2]

Mutual banking organizations are a type of banking organization owned directly by those with deposit and lending relationships with the institution (members), rather than by shareholders. These institutions are arranged in mutual, rather than stock form, and their charters typically set forth how individuals can qualify for membership. Typically, customers gain membership in such an institution through deposits or through a lending relationship with the mutual organization (similar to credit unions). Depending on the institution's charter and relevant state law, as applicable, members may have the right to vote on matters affecting the mutual banking organization, as well as other rights and privileges.[3]

Because of their ownership by members (sometimes referred to as mutuality), mutual banking organizations focus uniquely on their members and their local communities and can prioritize long-term stability over near-term profits. Additionally, mutuality can support the safety and soundness of these banking organizations, as members (generally depositors and borrowers) have an additional incentive based on their ownership of the organization to support the organization's long-term health. Mutual banking organizations also support the safety and stability of the U.S. banking system by contributing to the diversity of institutions in the U.S. banking system. However,

[1] 12 U.S.C. 5412.

[2] *See id.*

[3] For example, members may have an interest in the proceeds of the institution in the event the institution liquidated (known as a liquidation interest).

mutuality also can result in mutual banking organizations facing issues that are not faced by stock-form banking organizations. For example, as discussed in section I.B., mutual banking organizations face additional challenges in raising capital due to their general inability to sell equity securities.

Mutual banking organizations can be arranged in three main structures. First, a mutual bank or mutual savings association can be a stand-alone entity that is owned directly by its members. Second, a mutual bank or mutual savings association may undergo a ''reorganization'', whereby a company is formed (the mutual holding company, or MHC) to control the subsidiary bank or savings association, which itself would become a stock-form entity that is wholly owned by the MHC.[4] This structure is primarily utilized by institutions that seek to retain 100 percent mutuality but seek the corporate flexibility provided by the holding company format. Finally, a mutual banking organization can be organized in a three-tier format with (i) a top-tier MHC, (ii) a stock-form holding company formed as a majority-owned subsidiary to the top-tier MHC (mid-tier holding company or subsidiary holding company);[5] and (iii) a stock-form bank or savings association that is wholly owned by the mid-tier holding company. In this structure, the top-tier MHC must own at least a majority of the mid-tier holding company in order to preserve mutuality for the top-tier MHC. This three-tier structure allows institutions to blend mutuality with stock ownership, as the mid-tier holding company has the ability to issue stock to outside shareholders, as long as a majority of its stock continues to be held by the top-tier MHC. MHCs and mid-tier holding companies within the two- or three-tier structure can be either an SLHC or a BHC, depending on the charter of the subsidiary depository institution.

In addition to having varying structures, the entities that make up mutual banking organizations—like stock-form institutions—also can have varying charter types. As mentioned, the Board is responsible for supervising and regulating thrift MHCs. In 2011, the Board adopted an interim final rule (IFR) that provided for the transfer of the OTS's regulations necessary for the Board to administer the statutes applicable to SLHCs, including the Home Owners' Loan Act (HOLA) and the Change in Bank Control Act of 1978, and to supervise SLHCs, including thrift MHCs.[6] The IFR established Regulation LL, which applies to all SLHCs, and Regulation MM, which applies to thrift MHCs and their subsidiary holding companies, and made certain technical amendments to existing Board regulations necessary to accommodate the transfer of supervisory authority for SLHCs from the OTS to the Board.[7] Regulation MM adopted, with minimal changes, the predecessor regulations of the OTS, which first finalized in 1993.[8] Regulation MM has not been amended since its adoption in 2011.

Bank MHCs are not subject to HOLA or Regulation MM by their terms, but are instead subject to the Board's supervision and regulation pursuant to the Bank Holding Company Act of 1956 (BHC Act).[9] As discussed in section II.D, bank MHCs are governed by relevant state law and generally have entered into commitments with the Federal Reserve to comply with certain provisions of Regulation MM. Banks and savings associations in mutual form that are not state member banks are not directly supervised or regulated by the Board. The Board has not issued regulations specifically relating to the mutuality of state member banks in mutual form.

A. Comments Received

In connection with this proposed rulemaking, the Board has taken into consideration comments received in response to its earlier IFR[10] and through outreach conducted pursuant to the Economic Growth and Regulatory Paperwork Reduction Act (EGRPRA),[11] as well as feedback received from regulated entities. These comments were taken into consideration in developing this proposed rulemaking (proposal).

Multiple comments focused on section 239.8(d) of Regulation MM, which sets forth provisions governing the waiver of dividends by a thrift MHC. These comments are discussed in more detail in section II.A.1. of this proposal, which addresses those provisions.

The Board received comments on other aspects of Regulation MM as well. For example, one commenter suggested that the Board's source of strength doctrine (as it applies to SLHCs) renders the proposed share repurchase provisions set forth at sections 239.8(c) and 239.63(c) and (d) of Regulation MM unnecessary.

The same commenter also suggested that the Board delete the 5 percent limit on repurchasing shares in the first year following conversion in section 239.63(c)(1)(i) and apply only a valid business purpose standard to such repurchases. This comment will be discussed in more detail in section II.A.3.iv. of the proposal, which addresses that provision.

Another commenter argued that the Board is not the primary federal regulator of MHCs, has no authority to issue MHC charters, and has usurped any authority it has from other Federal regulatory institutions or state regulators. This comment will be addressed in section II.A.2.i. of the proposal, which discusses the Board's authority and Regulation MM's provisions concerning thrift MHCs and their subsidiary holding companies. Meanwhile, a different commenter noted that certain provisions of Regulation MM relating to business activities and investments of mutual holding companies are unclear, including references throughout the regulation to ''non-controlling investments'' by thrift MHCs. The Board does not propose to make any changes to the specific Regulation MM provisions regarding ''non-controlling'' investments by thrift MHCs. However, the proposal in general strives to improve the general clarity of the regulation and to provide additional transparency for mutual banking organizations.

B. Board Experience as Primary Federal Regulator of MHCs

Mutual banking organizations tend to be uniquely community-oriented with straightforward business models. Their structure as member-owned institutions makes them durable, preserves their ability to remain independent, and allows them to be closely tied to the communities in which they operate.

[4] Under this structure, mutuality ''shifts up,'' such that the members of the bank or savings association instead become members of the MHC (since the bank or savings association becomes a stock-form entity wholly owned by the MHC) and any new customer of the bank or savings association would become members of the MHC upon establishing a deposit or loan account at the bank or savings association.

[5] Regulation MM uses the term ''subsidiary holding company,'' but such entities are often also referred to, both in practice and in this proposal, as mid-tier holding companies.

[6] 76 FR 56508 (September 13, 2011) (hereafter, the 2011 IFR).

[7] *See id.*

[8] 58 FR 44104 (August 19, 1993).

[9] 12 U.S.C. 1841 *et seq.*

[10] In 2011, the Board sought comment on all aspects of the IFR and received 49 comments in total referencing Regulation MM. The Board did not make any changes to the regulation in response to the comments received to the IFR.

[11] Public Law 104–208, Div. A, Title II, section 2222, 110 Stat. 3009–414, (1996) (codified at 12 U.S.C. 3311). *See also* Regulatory Publication and Review Under the Economic Growth and Regulatory Paperwork Reduction Act of 1996, 89 FR 8084 (February 6, 2024); Regulatory Publication and Review Under the Economic Growth and Regulatory Paperwork Reduction Act of 1996, 90 FR 35241 (July 25, 2025).

Mutual banking organizations confront many of the same issues facing other community banks, including high compliance and technology costs relative to asset size, challenges with succession planning, an older depositor base, and competition from credit unions. Rising compliance and technology costs have contributed to consolidation across the banking industry, especially as many smaller institutions, including mutual banking organizations, have pursued mergers and acquisitions to achieve economies of scale, improve operational efficiency, and support technology and compliance infrastructure. These institutions are challenged with maintaining relationship-based community banking models while needing to invest in advances in financial technologies to meet evolving consumer expectations.

In addition, mutual banking organizations face issues specific to their mutuality. First, mutual banking organizations face constraints with respect to their ability to raise capital because of their unique ownership structure. Since mutual banking organizations are owned by their members, they have limited available options for raising capital. Stock-form banking organizations, on the other hand, generally are permitted to issue a range of capital instruments under their charters and applicable law. As a result, mutual banking organizations tend to rely heavily on retained earnings to meet capital requirements. While thrift MHCs can raise capital by having a subsidiary stock holding company conduct a minority stock issuance, mutual banking organizations historically have struggled to raise capital quickly without diminishing or ceding their mutuality.

In addition, since the Board assumed the regulation and supervision of thrift MHCs, it has found the regulatory framework applicable to such institutions to be overly complicated and burdensome. In the Board's view, thrift MHCs would benefit greatly from updates, clarifications, and modernizations to Regulation MM that would appropriately reduce burden, consistent with those organizations' safe and sound operations. The Board believes that the changes outlined in section II would achieve this goal through a simplified regulatory framework applicable to thrift MHCs that would make them more competitive in the modern banking environment.

II. The Proposal

The Board proposes to make changes to Regulation MM based on the Board's supervisory experience and consideration of feedback received from regulated entities. The Board is also proposing targeted changes to its capital rule to clarify the treatment of capital instruments issued by mutual banking organizations. The Board invites comments generally on any of the proposed changes to the capital rule and Regulation MM, or with respect to any other revisions to the regulatory framework applicable to MHCs that commenters believe may be appropriate. In addition, the Board invites comment in response to the specific questions included throughout this notice.

A. Changes To Support Capital Raising

As noted in section I.B., due to their mutuality, mutual banking organizations may be constrained in their ability to raise capital, especially common equity tier 1 [12] and additional tier 1 capital.[13] MHCs cannot issue traditional equity instruments and often rely on retained earnings to meet capital requirements. A subsidiary holding company in stock form can raise capital through a minority stock issuance; however, the amount that can be raised is limited, as the top-tier MHC must remain the majority shareholder. These constraints on the ability of mutual banking organizations to raise capital limit their ability to grow and to increase the amount of products and services they provide to their communities. In addition, the reliance on retained earnings as a source of capital for mutual banking organizations makes it difficult to establish a de novo mutual banking organization, which, by definition, will not have retained any earnings.

The Board is proposing modifications to both Regulation MM and to its capital rule that are meant to clarify and support mutual banking organizations' ability to raise capital.

1. Dividend Waivers

Dividend waivers can be an important tool for thrift MHCs to raise capital while still retaining their mutual form of ownership. When a thrift MHC waives its right to receive a dividend declared by its subsidiary holding company, the dividend that would otherwise be allocated to the thrift MHC is instead distributed to the other shareholders of the thrift MHC's subsidiary holding company. This reallocation helps increase the value of the public stock of the mid-tier holding company, improving its ability to attract investors for future capital raises. In doing so, dividend waivers also enable thrift MHCs to continue to compete with other similar institutions effectively without losing their mutuality by converting fully to stock form.

As mentioned in section I.A., many of the comments that the Board received on the IFR concerned dividend waivers. Some of the comments related to the procedural requirements associated with dividend waivers, including the specific items that must be provided to the Board in connection with a thrift MHC's notice of its intent to waive dividends. Regulation MM currently includes overly prescriptive procedural requirements. These requirements were designed to mitigate potential conflicts of interest concerns. When a thrift MHC's directors approve a waiver of dividends, they may directly benefit from the MHC's waiver of dividends.[14] Some commenters suggested that no conflict of interest exists or that the conflict is perceived or potential in nature. Other commenters acknowledged the conflict of interest but suggested that, because thrift MHC directors often also serve as directors of the mid-tier holding company and savings association, it is difficult or impossible to segregate the fiduciary duties the directors owe to each organization.

HOLA guarantees the ability of certain thrift MHCs to waive dividends, even if waiving dividends may benefit insiders of the organization, as long as such institutions comply with the Board's procedural requirements.[15] Specifically, thrift MHCs that waived dividends prior to December 1, 2009 (legacy waiver MHCs), may continue to do so if a 30-day notice has been submitted to the Board pursuant to Regulation MM in advance of the institution waiving its right to receive dividends.[16] As part of the notice, the board of directors of the thrift MHC must determine expressly that the dividend waiver is consistent with their fiduciary duties to the members of the thrift MHC.[17] Additionally, the notice must affirm that

[12] Common equity tier 1 capital is the most loss-absorbing form of capital. It includes, among other things, retained earnings and common stock (plus any related surplus), net of treasury stock, that meet certain criteria. *See* 12 CFR 217.20(b).

[13] Additional tier 1 capital instruments are intended to be available to absorb losses on a going-concern basis and can have a broader range of terms than common equity tier 1 instruments. *See* 12 CFR 217.20(c).

[14] *See* 2011 IFR at 56508, 56512; Letter from William W. Wiles, Secretary of the Board, to Kevin M. Houlihan, Greater Delaware Valley Holding, MHC (May 28, 1997).

[15] 12 U.S.C. 1467a(o)(11)(D)(iii).

[16] 12 CFR 239.8(d)(1)(ii).

[17] 12 CFR 239.8(d)(3)(ii). The resolution containing this determination from the board of directors must include a description of the conflict of interest that exists because of an MHC director's ownership of stock in the mid-tier holding company that is declaring dividends.

a majority of members eligible to vote have approved the waiver within the last 12 months.[18] Many of the comments on the IFR concerned the member vote requirement.[19]

HOLA does not guarantee expressly the ability of thrift MHCs that did not waive dividends prior to December 1, 2009 (non-legacy waiver MHCs), to do so. Therefore, in addition to the requirements applicable to legacy waiver MHCs, the Board by regulation has restricted non-legacy waiver MHCs from waiving dividends and they may only waive dividends if either (i) a majority of the entire thrift MHC board of directors approves the waiver, with any directors who would benefit directly or indirectly from the waiver, abstaining from the vote; [20] or (ii) any thrift MHC insider who would benefit from the waiver waives the right to receive any dividend.[21]

Since Regulation MM's promulgation in 2011, the Board has received input from many legacy waiver MHCs—both via comments on the IFR and the EGRPRA process—regarding the burdens and costs associated with the procedural requirements for waiving dividends. Most of the burdens and costs arise as a result of the requirement to seek the approval of a majority of members on an annual basis. The Board understands that members typically do not have any concerns with the potential conflicts of interest associated with dividend waivers; therefore, this annual vote requirement often represents an unnecessary expenditure of resources on the part of the legacy waiver MHC. Likewise, the Board understands from non-legacy waiver MHCs that, given the fact that many of their other shareholders are insiders or related parties, they are effectively prevented from issuing dividend waivers due to the additional requirement that either (i) a majority of the entire thrift MHC board of directors approve the waiver, with any directors who would benefit directly or indirectly from the waiver, abstaining from the vote; or (ii) any thrift MHC insider who would benefit from the waiver waives the right to receive any dividend. As a result, non-legacy waiver MHCs effectively are prevented from using dividend waivers to increase the value of the shares of their mid-tier holding companies. These restrictions thereby constrain the ability of these MHCs to raise capital and retain their mutuality.

Based on the comments received that the annual member vote requirement is overly burdensome, costly, and unnecessary, the Board is proposing to eliminate the requirement that legacy waiver MHCs affirm that a majority of members eligible to vote have approved the waiver within the last 12 months. As indicated in the comments, most members of the legacy waiver MHCs do not appear concerned with dividend waivers, have consistently voted to approve such waivers, and institutions and their management must spend significant time and money to encourage members to participate in the necessary vote under the present regulation.

Notwithstanding some of the assertions by commenters, the Board observes that dividend waivers may still present potential for conflicts of interest concerns. However, in connection with a dividend waiver notice, HOLA requires that a thrift MHC's board of directors must already determine that the dividend waiver is consistent with their fiduciary duties to members.[22] The Board believes that this determination is sufficient to mitigate any potential conflicts of interest concerns. Additionally, to ensure members are aware of these potential conflicts of interest concerns, the Board would require legacy waiver MHCs to make appropriate disclosures regarding dividend waivers to new members at time of opening of a deposit account or loan relationship.

Additionally, to create a more level playing field across thrift MHCs and in response to the comments received, the Board is proposing to allow non-legacy waiver MHCs also to waive dividends without requiring that either (i) a majority of the entire thrift MHC board of directors approve the waiver, with any directors who would benefit directly or indirectly from the waiver, abstaining from the vote, or that (ii) any thrift MHC insider who would benefit from the waiver waive their right to receive any dividend. Instead, consistent with the statutory distinction between legacy waiver MHCs and non-legacy waiver MHCs,[23] the proposal would require that non-legacy waiver MHCs affirm to the Board that, in a vote held within the past ten years, members have approved the dividend waiver. However, to reduce the burden associated with proxy solicitation outlined in the comments to the IFR, non-legacy waiver MHCs would not be required to obtain the approval of a majority of members eligible to vote, instead just a majority of votes cast.

Finally, all dividend waivers would remain subject to safety and soundness and applicable limitations.[24]

The Board seeks comment on all aspects of its proposed changes to the dividend waiver framework, particularly:

Question 1: Is the determination by the thrift MHC board of directors that dividend waivers are consistent with their fiduciary duties to the institution's members sufficient to mitigate any potential conflict of interest concerns with dividend waivers? Should the Board consider any alternative requirements? If so, what would be the advantages and disadvantages of those alternatives?

Question 2: Should the Board continue to maintain a distinction between its treatment of legacy waiver MHCs and non-legacy waiver MHCs? If so, is the balance struck by the proposal appropriate? If not, why not, and what would be the advantages and disadvantages of an alternative balancing?

Question 3: Is the requirement that non-legacy waiver MHCs obtain the approval of members on a decennial basis appropriate? Should non-legacy waiver MHCs be required to obtain the approval of members on a more or less frequent basis (such as every three years or every five years)? If so, why?

Question 4: Should the Board consider any additional changes to the procedural requirements associated with dividend waivers to reduce burden? If so, what would be the advantages and disadvantages of such additional changes?

[18] 12 CFR 239.8(d)(2)(iv).

[19] Some commenters noted that most members did not understand dividend waivers, requiring costly outreach and education, or do not care about dividend waivers. Those commenters asserted that, as a result, the member vote requirement was unnecessary and overly burdensome. Commenters also stated that members are not harmed by dividend waivers. Certain commenters further argued that members' interests in the thrift MHC do not rise to the level of shareholders' interests, and, therefore, members are not entitled to a vote on corporate governance matters in the same way as shareholders in a stock-form company. In addition to these substantive issues, commenters also raised concerns about the burden associated with the member vote requirement. Commenters noted that the cost and burden on management of obtaining the approval of a majority of the members eligible to vote is substantially greater than gaining the approval of members by a majority of votes cast at a meeting. Commenters pointed out that large numbers of members typically do not vote without significant efforts by management and significant expenditures by the thrift MHCs. Some of the commenters further stated that the cost and burden of obtaining member approval is magnified because section 239.8(d) of Regulation MM permits consideration of only one year's worth of dividend waivers at a time.

2. Special Deposits and Mutual Capital Certificates

To further support mutual banking organizations' capital raising efforts, the Board proposes to amend sections 217.20(b)(1), (c)(1), and (d)(1) of its capital rule to clarify that special deposits and mutual capital certificates issued by a mutual banking organization can qualify as common equity tier 1, additional tier 1, or tier 2 capital,[25] respectively, if all of the qualifying criteria are satisfied. Special deposits are capital instruments issued by mutual banking organizations that may be especially useful as a means for newly formed organizations to raise capital. It is possible that the exact features and terms of special deposits may vary. However, a special deposit may be sold for a higher price; similar to equity stock, it could entitle holders to modest earnings based on bank profits, and may not be insured by the Federal Deposit Insurance Corporation. Mutual capital certificates are a form of instrument that mutual banking organizations can issue, to the extent authorized by their organizing documents and governing law, that can serve similar loss-absorbing functions as qualifying regulatory capital instruments. Mutual banking organizations may be able to issue additional forms of capital instruments beyond special deposits and mutual capital certificates. The goal of the proposal is to clarify that forms of capital instruments that the Board understands have been issued by mutual banking organization may qualify as regulatory capital and not to preclude any other form of instrument issued by mutual banking organizations from qualifying as regulatory capital.

There can be substantial variation in the form and terms of mutual capital certificates and special deposits. In order to qualify as common equity tier 1, additional tier 1, or tier 2 capital under the Board's capital rule, mutual capital certificates and special deposits must meet the qualifying criteria listed in section 217.20(b)(1)(i)–(xiii), section 217.20(c)(1)(i)–(xiv), or section 217.20(d)(1)(i)–(xi), respectively, of the rule. The proposed amendment would clarify that mutual capital certificates and special deposits are eligible for this treatment, as long as the qualifying criteria are met, giving increased certainty to issuing organizations.

The Board seeks comment on all aspects of its proposed changes to clarify the capital treatment of special deposits. In particular:

Question 5: What are the advantages and disadvantages of the Board's proposed changes to make clear that instruments that meet the definition of regulatory capital qualify as regulatory capital? Do the amendments to section 217.20(b)(1), 217.20(c)(1), and 217.20(d)(1) provide additional clarity regarding the treatment of special deposits in particular?

Question 6: What other steps, if any, should the Board take to enhance the ability of mutual banking organizations to raise qualifying capital? Are there any other changes that the Board could make to meaningfully broaden the market for these capital instruments, improving the ability for mutual banking organizations to raise qualifying capital?

3. Appendices to the Capital Rule

The second proposed modification to the capital rule concerns the treatment of mutual capital certificates, which are capital instruments issued by mutual banking organizations that may be eligible for treatment as common equity tier 1, additional tier 1, or tier 2 capital under the Board's capital rule, depending on their features. In October 2025, Board staff published on the Board's public website a set of frequently asked questions and two model term sheets to help clarify how mutual banking organizations may issue mutual capital certificates that qualify as regulatory capital, while maintaining mutuality.[26] One term sheet set out key terms for mutual capital certificates to be eligible to qualify as common equity tier 1 capital, while the other set out terms for qualification as additional tier 1 capital. Board staff requested public comment on the model term sheets by June 30, 2026.[27]

The Board has received some feedback on the model term sheets. A commenter recommended revisions to language in the term sheets that would clarify the permissibility of a disclosed target distribution rate and confirm that certificate holders are not considered members of the mutual banking organization solely by virtue of holding such certificates. In addition, the commenter recommended edits that would modify the provisions governing the seniority and subordination of mutual capital certificates relative to other capital instruments and liquidation claims, and that would prescribe the treatment of mutual capital certificates following corporate reorganizations or liquidation scenarios. Finally, the commenter suggested new sections to the term sheets: one addressing charter amendments and another discussing the permissibility and conditions under which depository institutions and their affiliates may invest in mutual capital certificates.

The Board now proposes to include these mutual capital certificate term sheets as appendices to the Board's capital rule, amended to reflect certain feedback received on the model term sheets published in October 2025. By adding these term sheets as appendices to the capital rule, the Board hopes to assist mutual banking organizations in developing capital instruments eligible for consideration under the rule. The term sheets are intended to serve as templates for mutual banking organizations to use as references when issuing capital instruments intended to qualify as common equity tier 1 or additional tier 1 capital.

In publishing these model term sheets as appendices to the Board's capital rule, the Board is incorporating certain changes recommended in the feedback received on the model term sheets. More specifically, the term sheets proposed as appendices to the capital rule in this proposal include revisions to clarify the permissibility of a disclosed nonbinding target distribution rate and to confirm that certificate holders are not considered members of the mutual banking organization solely by virtue of holding certificates. The Board believes these changes provide additional transparency to mutual banking organizations seeking to use the model term sheets.

The Board seeks comment on all aspects of the proposed appendices to the capital rule. In particular:

Question 7: What are the advantages and disadvantages of including the mutual capital certificate term sheets as appendices to the capital rule? Does incorporating the term sheets in the appendices to the capital rule limit in any way the flexibility mutual banking organizations have to craft their own instrument? Should the Board consider any changes to how it publishes or codifies the term sheets?

Question 8: Should the Board consider any additional changes to the provisions of the term sheets?

[25] Tier 2 capital instruments are the least loss-absorbing instruments permitted to be counted as regulatory capital. *See* 12 CFR 217.20(d).

[26] *See* ''Frequently Asked Questions about Regulation MM'' available at *www.federalreserve.gov/supervisionreg/legalinterpretations/reg-mm-frequently-asked-questions.htm.*

[27] Members of the public that seek to comment on the proposed model term sheets should review the proposed appendices included in this proposal and must submit comments in line with the procedures under this proposal.

4. Model Charter Amendments

In one of the frequently asked questions posted to the Board's public website, Board staff noted that a mutual banking organization must be legally authorized to issue mutual capital certificates and therefore should consult its charter and applicable law to determine whether it has the authority to issue such certificates. The frequently asked question noted that a Board-chartered mutual banking organization whose charter conforms to the Mutual Holding Company Model Charter provided at Appendix A to Regulation MM (Model Charter) would need to adopt a charter amendment in order to issue mutual capital certificates because the existing Model Charter states, ''The Mutual Holding Company shall have no capital stock.'' [28]

As outlined in section II.B.1.vi., the Board is proposing changes as part of this notice of proposed rulemaking that would eliminate the requirement that thrift MHCs' charters conform to the Model Charter. However, and as explained more fully in section II.B.1.vi., the Board intends to retain the Model Charter as an appendix to Regulation MM as an example document. To ensure the Model Charter remains a useful and up-to-date example, the Board is proposing to codify the staff guidance on mutual capital certificates, discussed in section II.A.4., by updating the Model Charter. Specifically, the Model Charter would be revised to include optional language authorizing the issuance of mutual capital certificates. Institutions need not amend their charters to incorporate this language if they do not wish to issue mutual capital certificates. However, if an institution seeks to issue mutual capital certificates, it should ensure that its charter allows such issuance and may wish to adopt the language in the revised Model Charter. Any mutual institution desiring to amend its charter must follow the procedures in section 239.14 of Regulation MM. Charter amendments consistent with the proposed amendment to the Model Charter generally would require only 30 days' prior notice, pursuant to section 239.14(a)(2)(ii) of Regulation MM, and not an application pursuant to section 239.14(a)(2)(i).

The Board seeks comment on all aspects of its proposed updates to the Model Charter, particularly:

Question 9: Should the Board consider any additional changes to the language included in the Model Charter to make clear that institutions may issue mutual capital certificates? What would be the advantages and disadvantages of any such changes?

B. Other Changes to Regulation MM

As discussed in section I.B., supervisory experience indicates that Regulation MM is overly complicated and burdensome for regulated entities. Because of the regulation's complexity, thrift MHCs are often required to obtain sophisticated and expensive legal counsel in order to ensure compliance with the rule. Such resources could be better utilized through re-investment in the mutual banking organization or in its local community. The Board believes the proposed changes would reduce the regulatory burden borne by these institutions.

1. Subpart B

Subpart B of Regulation MM governs the operations of thrift MHCs. It contains requirements regarding reorganization from a stand-alone mutual savings association structure into a thrift MHC structure. It also includes, among other things, requirements related to member rights, communications with members, and thrift MHC charters and bylaws. In addition, Subpart B outlines restrictions and requirements around acquisitions of other mutual savings associations, general operations and governance (including with respect to dividend waivers), and voluntary and involuntary liquidations of MHCs. The following section outlines the Board's proposed changes to Subpart B of Regulation MM.[29]

i. Reorganization Into the Multi-Tier Structure

Sections 239.3 and 239.4 of Regulation MM outline the procedural requirements associated with reorganization from a single-tier mutual savings association structure into a multi-tier MHC structure. Stand-alone mutual savings associations may seek to convert to a multi-tier structure for increased corporate flexibility and to be able to raise capital through a minority stock issuance. Such institutions must first develop a Reorganization Plan (Plan),[30] that contains all of the provisions outlined in section 239.6 of Regulation MM [31] and is approved by a majority of the savings association's board of directors.[32] The Plan also must be voted upon by the savings association's members and receive the approval of a majority of the total votes eligible to be cast at a meeting.[33] Additionally, the mutual savings association must submit a Reorganization Notice to the Board [34] and receive all necessary regulatory approvals.[35] Section 239.4 then outlines the grounds under which the Board may disapprove a proposed MHC reorganization.[36]

At this time, the Board does not propose to amend the requirements associated with a mutual savings association's reorganization into a multi-tier structure. However, the Board invites comment on whether it should amend the procedural requirements or disapproval standard in any way, including to reduce burden for reorganizing mutual savings associations.

Question 10: What changes, if any, should the Board consider making to the procedural requirements associated with MHC reorganizations under section 239.3 of Regulation MM? What would be the advantages and disadvantages of any such changes?

Question 11: What value, if any, is served by the member vote requirement, provided at section 239.3(a)(3), for reorganization into the MHC structure? Is the vote standard of approval by a majority of the total votes eligible to be cast appropriate and why? If not, what alternatives should the Board consider, and what would be the advantages and disadvantages of such alternatives?

Question 12: What changes, if any, should the Board consider making to the approval standard for reorganizations, provided at section 239.4 of Regulation MM? What would be the advantages and disadvantages of any such changes?

Question 13: What changes, if any, should the Board consider making to the contents and provisions that must be included in a Plan submitted under section 239.6 of Regulation MM? What would be the advantages and disadvantages of any such changes?

ii. Membership Rights

Section 239.5(a) of Regulation MM currently addresses membership rights of depositors and borrowers of resulting associations and target mutual savings associations. It provides that when a mutual savings association reorganizes into the thrift MHC structure, the members of the savings association must receive the same membership rights in the new thrift MHC as they had held in

[28] 12 CFR part 239, app. A.

[29] For proposed changes with respect to dividend waivers, *see* section II.A.1. above.

[30] 12 CFR 239.2(o); 12 CFR 239.3(a).

[31] 12 CFR 239.6.

[32] 12 CFR 239.3(a)(1).

[33] 12 CFR 239.3(a)(3).

[34] 12 CFR 239.2(n); 12 CFR 239.3(a)(2).

[35] 12 CFR 239.3(a)(4).

[36] 12 CFR 239.4.

the mutual savings association.[37] It also provides that, when a thrift MHC acquires a mutual savings association, the members of the target mutual savings association must receive membership rights in the acquiring thrift MHC.[38] However, section 239.5 of Regulation MM does not currently contemplate a thrift MHC's acquisition of another MHC, likely because that such transactions were rare when the OTS first issued the regulation.

The Board proposes to modify section 239.5(a) to add that the members of a target thrift MHC will receive the same membership rights in the acquiring MHC as those conferred upon the members of the acquiring thrift MHC. This change would help guarantee that the rights of the members of a target MHC remain equivalent to those of the acquiring MHC's members. It also would align section 239.5(a) of Regulation MM with existing practice, as thrift MHCs typically have granted membership rights to the members of target thrift MHCs upon consummation of the acquisition. Similarly, section 239.5(b) of Regulation MM would be amended to ensure that membership rights would be conferred upon target MHC members regardless of whether the thrift subsidiaries are merged into a single institution by the acquiring MHC or continue operations as stand-alone institutions.

Question 14: Are there additional advantages or disadvantages of the proposed change to the membership rights provisions that the Board should consider? If so, what?

Question 15: What additional changes, if any, should the Board consider in order to clarify the membership rights afforded to the members of a target thrift MHC? What would be the advantages and disadvantages of any such changes?

Question 16: What additional burden, if any, is imposed by the proposed change to the membership rights provisions? Are the Board's proposed amendments the most appropriate way to guarantee the membership rights of a target thrift MHC, or should the Board consider other changes? If so, what would be the advantages and disadvantages of any such changes?

iii. Acquisitions

Section 239.7 of Regulation MM outlines requirements and restrictions associated with the acquisition by a thrift MHC of a savings association, SLHC, or other corporation.[39] In particular, section 239.7(a)(3) provides that, with respect to a thrift MHC's acquisition of another thrift MHC, ''[t]he approval of the members of the mutual holding companies shall also be obtained if the Board advises the mutual holding companies in writing that such approval will be required.'' This language applies broadly to both an approval by the members of the acquiring institution and to an approval by the members of the institution to be acquired. Currently, Regulation MM does not include any information regarding the factors that the Board may consider in determining whether to require the approval of either institution's members. This lack of transparency can cause confusion for institutions and contribute to delays in the processing of applications.

The Board proposes to amend section 239.7(a) to codify factors that the Board or Reserve Bank would evaluate in considering whether to require approval by an institution's members. The proposed factors reflect facts that the Federal Reserve historically has considered when evaluating whether a member vote may be warranted. Specifically, the proposal would update section 239.7(a) to include four factors that the Board or Reserve Bank shall consider in determining whether approval by members will be required. These factors would include: (i) the corporate governance structure of the thrift MHC; (ii) the ability of members to vote on any future mutual-to-stock conversion of the resulting thrift MHC; (iii) the supervisory condition of the institution that would be acquired; and (iv) the burden and cost associated with obtaining the members' approval.

In considering the corporate governance factor, the Board would take into consideration members' opportunities for direct participation in corporate governance matters following consummation of the transaction. If, as a result of the transaction, the members of either institution would have fewer opportunities to participate in corporate governance, this proposed factor may suggest a member vote by the affected institution may be warranted. Likewise, if, as a result of the transaction, members of either institution would not have the ability to vote on any future mutual-to-stock conversion of the resulting institution, the second proposed factor may indicate a member vote by the affected institution may be warranted. Next, under the third proposed factor, the Board would weigh the supervisory condition of the target institution and whether potential delays associated with obtaining members' approval could exacerbate the institution's existing condition or delay its resolution. Under the fourth proposed factor, the Board would consider the cost and burden upon either institution associated with obtaining its members' approval. In situations where the cost of obtaining members' approval represents a significant expenditure, especially with respect to the institution's annual earnings, a member vote may not appear reasonable.

The Board invites comment on all aspects of its proposed changes to codify the factors it would consider in determining whether to require members' approval of an MHC's acquisition of another mutual banking organization, particularly with respect to the following:

Question 17: What are the advantages and disadvantages of the Board requiring thrift MHCs to obtain members' approval of an acquisition by or of another thrift MHC? Should the Board consider requiring this only in specific circumstances and, if so, what would be the appropriate circumstances?

Question 18: What are the advantages and disadvantages of the proposed factors for determining whether to require members' approval? Should the Board consider any other factors in determining whether to require thrift MHCs to obtain members' approval of an acquisition by or of another thrift MHC? If so, what other factors should the Board consider, and what would be the advantages and disadvantages of including those factors?

Question 19: Should the Board consider making any other changes to the requirements and restrictions associated with a thrift MHC's acquisition of a savings association, SLHC, or other corporation?

iv. Running Proxies

In the Board's experience, many thrift MHCs rely on ''running'' proxies as a corporate governance tool. Section 239.10(a)(4) provides that an MHC ''may make use of any proxy conferring general authority to vote on any and all matters at any meeting of members,'' although so-called ''running'' proxies ''may not be used to vote for a [thrift MHC] reorganization, mutual-to-stock conversion undertaken by a [thrift MHC], dividend waiver, or any other material transaction.'' [40] The Board does not propose to change its approach to running proxies. However, the Board invites comment on all aspects of its

[37] 12 CFR 239.5(a)(1); 12 CFR 239.5(a)(3).

[38] 12 CFR 239.5(a)(2); 12 CFR 239.5(a)(4).

[39] 12 CFR 239.7(a)(6).

[40] 12 CFR 239.10(a)(4).

rules related to running proxies, particularly:

Question 20: What are the advantages and disadvantages of the Board's existing limitations around the use of running proxies—specifically, that they cannot be used to vote for a thrift MHC reorganization, mutual-to-stock conversion, dividend waiver, or any other material transaction? Should the Board consider incorporating any additional limitations around the use of running proxies? Why or why not? What would be the advantages and disadvantages of any such additional limitations? Alternatively, should the Board consider allowing running proxies to be used to vote for a thrift MHC reorganization, mutual-to-stock conversion, dividend waiver, or any other material transaction? If so, why?

v. Postal Mail Requirements

As noted in section I., Regulation MM adopted with minimal changes the predecessor regulations of the OTS, which had first been finalized in 1993. At the time the OTS first implemented these predecessor regulations, email was not widely accessible and postal mail was the primary form of communication. As a result, Regulation MM contains numerous references to postal mail, requiring thrift MHCs to communicate with members almost exclusively via physical mail. For instance, section 239.12 of Regulation MM sets out the right of members to communicate with other members of the thrift MHC but provides solely for physical mail communication. Additionally, provisions regarding stock issuances by a mid-tier holding company and those with respect to conversion offerings exclusively refer to communications with members being ''mailed.''

The varying physical mail requirements throughout Regulation MM are out-of-date, costly, and unduly burdensome for institutions. Therefore, the proposal updates various provisions in subparts B, C, and E of Regulation MM, as well as in the Appendices to the regulation, to change references to ''mailing'' certain information or communications to ''sending'' certain information or communications. The Board intends through this change to allow institutions to use electronic mail or other available technology to notify its members instead of relying on physical, postal mail, consistent with all other federal and state law. The Board believes these changes will modernize Regulation MM, reduce expenses for thrift MHCs, and provide increased flexibility for both institutions and their members.

The Board seeks comment on all aspects of its proposed changes to allow institutions greater flexibility in its communications with members, particularly:

Question 21: Are there any communications that the Board should specifically require to be physically mailed to members? Are there any for which confirmation of receipt or some other notice of receipt should be required?

Question 22: What are the advantages and disadvantages of the Board's proposed changes to improve the flexibility of thrift MHCs options for communicating with members? Should the Board consider additional or alternative changes? If so, what would be the advantages and disadvantages of such changes?

Question 23: Given the continued advancement of communication technologies, is the term ''send'' sufficiently flexible enough to give thrift MHCs optionality in how they communicate with their members? Should the Board consider using a different term than ''send,'' such as ''provide,'' in order to ensure thrift MHCs have sufficient flexibility to adapt to new communication technologies? What would be the advantages and disadvantages of using a term other than ''send'' for describing how thrift MHCs must communicate with members?

vi. Charter and Bylaws

Regulation MM provides model charters and bylaws for thrift MHCs and their mid-tier holding companies in Appendices A through D.[41] Subparts B and C of Regulation MM contain numerous references to thrift MHCs and their subsidiary holding companies needing to comply with the provisions of the model charter and bylaws. For instance, section 239.6(a) of Regulation MM requires that the charter and bylaws of a mutual savings association reorganizing into a multi-tier structure ''read in the form of the charter and bylaws of a mutual holding company, and attach and incorporate such charter and bylaws.'' [42] Likewise, section 239.11(c) mandates that the charter and bylaws of a subsidiary holding company of a thrift MHC ''be in the form set forth in Appendices B and D, respectively.'' [43] The Board does not believe such prescriptions are necessary. Therefore, in order to promote corporate flexibility, the Board proposes to abolish the requirements that thrift MHCs and their subsidiary holding companies adopt the model charters and bylaws, although the Board would retain the authority to review proposed charters and bylaws as part of its review of the formation of thrift MHCs and their subsidiary holding companies.[44] Additionally, a thrift MHC seeking to make any changes to its charter would continue to be required to follow the procedures outlined in section 239.14 of Regulation MM.[45]

Although the Board proposes to remove the requirements that a thrift MHC and its subsidiary holding company adopt the model charters and bylaws, the Board would retain the model charters and bylaws as appendices to Regulation MM as examples and would retain provisions contained in subparts B and C of Regulation MM identifying terms that thrift MHCs and their subsidiary holding companies may include in their charters and bylaws. The Board believes that it may be helpful to thrift MHCs and their subsidiary holding companies to retain these as example documents, even though these institutions will no longer be required to adhere to them. Small institutions and institutions without sophisticated counsel may particularly benefit from the provision of example documents. Additionally, as described in section II.A.4., the Board is implementing changes to the Model Charter that institutions may implement should they wish to be able to issue mutual capital certificates.

The Board seeks comment on all aspects of its proposed changes to the model charters and bylaws provided in the appendices to Regulation MM, particularly:

Question 24: What are the advantages and disadvantages of the Board removing the requirements contained throughout Regulation MM that an MHC and its subsidiary holding company adhere to the model charters and bylaws provided in the appendices to Regulation MM? How could removal of these requirements improve corporate flexibility?

Question 25: Are the model charters and bylaws provided in the appendices to Regulation MM useful? What are the advantages and disadvantages of retaining these model charters and bylaws but not requiring adherence to them? Should the Board remove the

[41] *See* 12 CFR part 239, app. A, ''Mutual Holding Company Model Charter''; 12 CFR part 239, app. B, ''Subsidiary Holding Company of a Mutual Holding Company Model Charter''; 12 CFR part 239, app. C, ''Mutual Holding Company Model Bylaws''; 12 CFR part 239, app. D, ''Subsidiary Holding Company of a Mutual Holding Company Model Bylaws.''

[42] 12 CFR 239.6(a).

[45] 12 CFR 239.14.

model charters and bylaws from the appendices to Regulation MM?

Question 26: What are the advantages and disadvantages of retaining the provisions throughout subparts B and C of Regulation MM identifying the terms that MHCs and their subsidiary holding companies may include in their charters and bylaws? Would retaining these provisions contribute to the unnecessary complexity of the overall regulation? Should the Board instead remove these provisions?

vii. Voluntary Dissolution

Regulation MM permits a thrift MHC to propose a plan of voluntary dissolution.[46] In addressing voluntary dissolutions, section 239.16(b) of Regulation MM currently provides that the Board will approve a proposed dissolution plan if the plan is ''advisable'' and ''best for all concerned.'' Similarly, section 239.16(a)(2) provides that a thrift MHC's directors, when proposing a plan for dissolution, may propose a plan that provides for dissolution in a manner that the directors consider ''best for all concerned.'' [47] In the Board's experience, these standards are confusing for thrift MHCs seeking to dissolve back into the single-tier mutual savings association structure and contribute to unnecessary delays in applications processing. The Board proposes to amend section 239.16(b) to (i) remove the terms ''advisable'' and ''best for all concerned'' from its standard of review, (ii) clarify that the Board will consider impact of the dissolution on the thrift MHC's members and other relevant parties (such as, creditors), and (iii) state that the Board may approve the plan if dissolution is appropriate under the circumstances. This proposed amendment is consistent with the Federal Reserve's current approach to considering whether to approve a dissolution plan and provides clarity on the focus and scope of review. The Board believes that this change would reduce ambiguity for thrift MHCs seeking to dissolve into a single-tier mutual savings association structure and facilitate expeditious processing of applications for voluntary dissolution. Similarly, the Board proposes to amend section 239.16(a)(2) of Regulation MM to provide that directors may propose a plan of dissolution that provides for dissolution in a manner that appropriately takes into account the impact of the proposed dissolution on the thrift MHC's members and other relevant parties like creditors. A requirement that the plan be ''appropriate'' rather than ''consider[ed] best'' by the directors would better align with the Board's standard of review for assessing the plan, and the Board would have a better ability to assess compliance with the revised requirement.

The Board seeks feedback on all aspects of its proposed changes to the voluntary dissolution standard, particularly:

Question 27: What are the advantages and disadvantages of replacing the current ''advisable'' and ''best for all concerned'' standard for the Board's review of plans of voluntary dissolution with the proposed standard? Is the proposed standard sufficiently clear? What modifications to the proposed standard should the Board make in order to make it clearer or more appropriate for assessing plans of voluntary dissolution?

Question 28: Is the proposed standard for plans of dissolution proposed by directors sufficiently clear? Should the Board consider alternative approaches? If so, what would be the advantages or disadvantages of such alternatives?

2. Subpart C

Subpart C of Regulation MM governs the operations of mid-tier holding companies of MHCs. It contains requirements relating to the general governance of subsidiary holding companies of thrift MHCs, including with respect to their charter and bylaws. It also contains detailed provisions regarding issuances of stock by subsidiary holding companies of thrift MHCs. The following section outlines the Board's proposed changes to Subpart C of Regulation MM.

i. Chartering of Subsidiary Holding Companies of Thrift MHCs

Prior to the transfer of supervision of SLHCs to the Board in 2011, the OTS was the chartering authority for thrift MHCs and their subsidiary holding companies. When the Board took over supervision of SLHCs from the OTS in 2011, it became the chartering authority for thrift MHCs and their subsidiary holding companies.[48]

HOLA specifically requires the Board to charter thrift MHCs.[49] Regulation MM also requires subsidiary holding companies of thrift MHCs to be chartered by the Board.[50] However, although HOLA explicitly requires a thrift MHC to be chartered by the Board, it does not explicitly require a subsidiary holding company of a thrift MHC to be chartered by the Board. To allow for greater flexibility, including with respect to choice of corporate structure,[51] the Board proposes to eliminate the requirement that subsidiary holding companies of thrift MHCs have federal charters. This proposed change would allow subsidiary holding companies of thrift MHCs to obtain a validly issued charter from any state, as defined by section 238.2(nn) of Regulation LL.[52] A subsidiary holding company of a thrift MHC would not be required to obtain a charter from the state in which its main office is located or in which its MHC parent or subsidiary depository institution operates.[53] As a result of this change, subsidiary holding companies of MHCs would have increased flexibility to select the appropriate chartering entity while remaining subject to applicable provisions of Regulation MM (in particular sections 239.24 and 239.25 of Regulation MM, which govern issuances of stock by subsidiary holding companies).

The Board invites comment on its proposal to eliminate the requirement that subsidiary holding companies of MHCs be chartered by the Board, particularly:

Question 29: What are the advantages and disadvantages of allowing subsidiary holding companies of thrift MHCs to organize under state law rather than requiring they be chartered by the Board?

Question 30: What are the advantages and disadvantages of the proposal to allow a subsidiary holding company of a thrift MHC to organize in a state of its choosing? Should the Board instead require a subsidiary holding company of a thrift MHC to organize in the state in which its subsidiary depository institution operates or maintains its main office, or based on some other qualification or criteria? What would be

[46] 12 CFR 239.16(b).

[47] Alternatively, the plan may provide for ''[t]ransfer of all the mutual holding company's assets to another mutual holding company or home-financing institutions under Federal charter either for cash sufficient to pay all obligations of the mutual holding company and retire all outstanding accounts or in exchange for that mutual holding company's payment of all the mutual holding company's outstanding obligations and issuance of share accounts or other evidence of interest to the mutual holding company's members on a pro rata basis.'' 12 CFR 239.16(a)(1).

[48] 12 CFR 239.11(c) and 239.21.

[49] 12 U.S.C. 1467a(o)(7).

[50] 12 CFR 239.11(c).

[51] For example, organizing under state law may allow a subsidiary holding company of a thrift MHC to be organized as a corporation, LLC, or some other corporate form. Currently, subsidiary holding companies may organize only as Federal corporations.

[52] 12 CFR 238.2(nn).

[53] This is consistent with the flexibility available generally to bank holding companies concerning corporate form.

the advantages or disadvantages of those alternate criteria or requirements?

ii. Issuances of Stock by Subsidiary Holding Companies of MHCs

The Board is proposing a series of amendments to sections 239.24 and 239.25 of Regulation MM that concern stock issuances by mid-tier holding companies of thrift MHCs. These provisions are unnecessarily complex, creating an undue burden for the subject institutions. The Board's proposed changes are intended to simplify and streamline the applicable provisions and to reduce cross-references to other provisions within the regulation as much as possible so that the requirements are clearer. The proposed updates are intended to make the regulation easier to understand, reducing burden on institutions and allowing for expeditious processing of applications.

First, the Board proposes amendments to sections 239.24 and 239.25 of Regulation MM to clarify the provisions that apply to stock issuances solely to a stock benefit plan, employee stock ownership plan, stock option plan, or management recognition plan (collectively, a stock plan for employees). Currently, sections 239.24 and 239.25 of Regulation MM do not distinguish between stock issuances involving the public offering and sale of shares in the MHC's subsidiary holding company and stock issuances solely to a stock plan for employees. As a result, institutions can face uncertainty regarding the exact provisions of Regulation MM that apply to a particular proposed issuance. Some of the changes to sections 239.24 and 239.25 of Regulation MM are intended to address this unnecessary source of confusion by clarifying the provisions that do not apply to stock issuances solely to a stock plan for employees.

The Board proposes further to streamline the requirements related to stock issuances to a stock plan for employees under sections 239.24 and 239.25. Currently, section 239.25 includes many provisions regarding the size of a proposed issuance to a stock plan for employees. These requirements can be confusing and require the retention of sophisticated legal counsel. The Board proposes to streamline these requirements to make them both easier to understand and to simplify compliance. Rather than include many varied requirements regarding the size of each stock plan for employees, the Board proposes instead to require only (i) that all stock plans for employees not, at any given time, hold in the aggregate more than either 4.9 percent of the outstanding shares of the subsidiary holding company's common stock or 4.9 percent of the subsidiary holding company's stockholders' equity; and (ii) that at the close of the proposed issuance, the amount of stock authorized to be issued or acquired by all stock plans for employees may not exceed, in the aggregate, 25 percent of the outstanding shares of the subsidiary holding company's common stock or 25 percent of the subsidiary holding company's stockholders' equity. These requirements are intended to ensure that a stock plan for employees does not become an SLHC. The Board believes that these proposed changes are easier to understand and, therefore, less burdensome for regulated institutions.

In addition to changes intended to clarify the requirements applicable for stock issuances to stock plans for employees, the Board also proposes changes to sections 239.24 and 239.25 to clarify the applicability of certain requirements contained in subpart E of Regulation MM. Currently, sections 239.24 and 239.25 of Regulation MM include many confusing cross-references to subpart E of Regulation MM, which can be difficult for regulated entities to understand and require the retention of sophisticated counsel. The Board proposes changes to sections 239.24 and 239.25 to make clearer the interaction between these parts of the regulation. Specifically, the Board proposes changes to section 239.24(a) of Regulation MM to clarify the applicability of the convenience and needs standard to a proposed minority stock issuance. Additionally, the Board proposes changes to section 239.25(c) to indicate expressly the applicability of provisions of section 239.63(a)(1) of Regulation MM to minority stock issuances.

The Board invites comment on all aspects of its proposed changes to the rules regarding issuances of public stock by MHCs' subsidiary holding companies, particularly:

Question 31: Are the proposed changes sufficient to make clear which provisions of sections 239.24 and 239.25 apply to proposed stock issuances solely to a stock plan for employees? How could the Board better delineate the requirements applicable to stock issuances solely to a stock plan for employees?

Question 32: What are the advantages and disadvantages of the proposed changes regarding the size of a stock plan for employees? Do the proposed changes adequately simplify the size thresholds applicable to stock issuances to a stock plan for employees? What, if any, alternatives should the Board consider and why?

Question 33: Do the proposed changes to sections 239.24 and 239.25 of Regulation MM make clear which provisions of subpart E of Regulation MM are applicable to a stock issuance by a subsidiary holding company of a thrift MHC? What other clarifying changes should the Board consider making to sections 239.24 and 239.25 of Regulation MM to better indicate what provisions of subpart E are applicable to stock issuances by a subsidiary holding company of a thrift MHC?

Question 34: What other changes should the Board consider making to the requirements applicable to stock issuances by a subsidiary holding company of a thrift MHC? What would be the advantages and disadvantages of any such change?

3. Subpart E

Subpart E of Regulation MM governs how a thrift MHC may convert from the mutual-to-stock form of ownership. It includes numerous requirements related to the process of conversion and also contains limitations on certain actions of a converted stock holding company within the first few years of completion of the conversion. The Board is proposing several changes to subpart E of Regulation MM. These changes are intended to reduce the regulatory burden associated with mutual-to-stock conversions and to implement corrections to known drafting errors in the regulation.

i. Definition of Qualifying Deposits

Section 239.52 of Regulation MM sets forth definitions applicable to subpart E and the forms prescribed by it.[54] In particular, section 239.52(j) currently defines ''qualifying deposit'' to include ''the total balance in an account holder's savings accounts.'' [55] ''Savings account,'' in turn, is currently defined by section 239.2(r) of Regulation MM to mean ''any withdrawable account, except a demand account, a tax and loan account, a note account, a United States Treasury general account, or a United States Treasury time deposit-open account.'' [56] Because demand accounts are excluded from the definition of savings accounts, they also are excluded from the definition of ''qualifying deposits'', and as a result, demand deposit holders are currently not entitled to liquidation rights under Regulation MM. However, many thrift MHCs grant membership rights,

[54] 12 CFR 239.52.

[55] 12 CFR 239.52(j).

[56] 12 CFR 239.2(r).

including liquidation rights, to holders of demand accounts. Therefore, in order to be able to grant such individuals their promised membership rights, such institutions presently must request a waiver from the definition of qualifying deposits to ensure that demand deposit holders receive the liquidation rights associated with their membership. These waivers are unnecessarily burdensome on institutions seeking only to comply with the membership rights granted under the thrift MHC's organizational documents.

Therefore, the Board is proposing to amend the definition of ''savings account'' in section 239.2(r) of Regulation MM to include demand accounts. Because the definition of qualifying deposits provided at section 239.52(j) of Regulation MM uses the term ''savings account,'' this proposed change would have the effect of incorporating demand deposits into the definition of qualifying deposits for purposes of subpart E of Regulation MM. Additionally, to ensure that thrift MHCs are not required to grant liquidation rights to demand deposit holders, the definition of ''qualifying deposit'' in section 239.52(j) of Regulation MM would be amended to mean ''the total balance in an account holder's eligible savings account at the close of business on the eligibility or supplemental eligibility record date.'' As a result of this proposal, thrift MHCs that grant membership rights to demand deposit holders would no longer have to request a waiver of the definition of ''qualifying deposits'' in connection with their mutual-to-stock conversion, reducing burden for both the institutions and the Federal Reserve System. However, thrift MHCs would not be required to grant liquidation rights to such demand deposit holders.

Question 35: What are the advantages and disadvantages of the Board's proposed amendment to the definition of ''savings account,'' provided at section 239.2(r) of Regulation MM? Does the Board's proposed amendment to the definition of ''savings account'' ensure that demand deposit holders receive the liquidation rights associated with their membership? Should the Board consider alternative provisions and if so, what would be the advantages and disadvantages of such alternatives?

ii. Forms

Regulation MM includes requirements to file information in connection with certain proposals involving thrift MHCs, including the reorganization of a savings association into the MHC structure, stock issuances of subsidiary holding companies of thrift MHCs, and conversions of thrift MHCs to stock form. Among other reporting forms, applicants may be required to file a Proxy Statement (FR MM–PS or Form PS), Offering Circular (FR MM–OC or Form OC), or Order Form (FR MM–OF or Form OF). The Federal Reserve uses information submitted by an applicant or notificant on these forms to evaluate the aforementioned transactions with respect to the relevant statutory and regulatory factors.

a. FR MM–PS

The Form PS, otherwise known as the proxy statement, is used to provide members of the applicant mutual savings association or thrift MHC with information necessary to vote on a reorganization of the applicant to the thrift MHC structure, a conversion of the applicant from mutual-to-stock form, or other transactions. Information required by Regulation MM and Form PS includes, among other things, the notice of the members' meeting; description of the voting rights of the mutual members; the vote threshold required for approval of each matter presented for a vote; and presentation of business, financial, and managerial information of the organization. A proxy statement must be disclosed to all members prior to a member vote,[57] and must be submitted to the appropriate Reserve Bank in connection with a notice to reorganize into the MHC structure or an application to convert from mutual to stock form.[58] Subpart E of Regulation MM also contains certain additional procedural and informational requirements for proxy statements. Proxies requesting accountholder approval of an MHC reorganization or non-conforming minority stock issuance also must comply with the informational requirements of sections 239.10(a)(2) and 239.10(a)(3) of Regulation MM, respectively, as well as any other applicable federal and state laws and regulations.

b. FR MM–OC

A thrift MHC that files an application in connection with a stock issuance conducted as part of any transaction or proposal pursuant to HOLA and Regulation MM must file Form OC with the appropriate Reserve Bank.[59] An offering circular must accompany Form OC and such offering circular must be prepared in accordance with applicable state law and rules and regulations promulgated by the U.S. Securities and Exchange Commission (SEC).

c. FR MM–OF

A thrift MHC that applies for Board approval of its conversion from mutual-to-stock form must submit Form OF along with order forms to the Federal Reserve and distribute such order forms to all eligible account holders, supplemental eligible account holders, and other voting members to enable them to subscribe for the shares they are permitted under the proposed transaction. If applicable, order forms provided to the Board should comply with state law and be in the same format as any order forms that the applicant has provided to the SEC.

d. Elimination of Form OC and Form OF

In general, submission of these forms in connection with certain applications can create burden for thrift MHCs, especially given that much of the information contained in these forms is, in some manner, duplicative of information provided to the SEC. Therefore, in order to reduce burden, the Board proposes to eliminate the requirements in section 239.50 to submit the Form OC and Form OF to the Federal Reserve in connection with transactions involving thrift MHCs. Additionally, while the Board intends to retain the requirement that institutions submit Form PS, it proposes to streamline the form itself by removing many of the requirements contained within the General Instructions to the form.

With respect to Form OC and Form OF, the Board proposes to eliminate both the forms themselves and the references to them in sections 239.58 and 239.59, respectively, as well as their respective General Instructions. The General Instructions to Form OC state that offering circulars must be prepared in accordance with applicable state law and rules and regulations promulgated by the SEC. These instructions do not provide any specific guidance related to content necessary for Board review of Form OC. Likewise, Form OF's General Instructions state that order forms provided to the Board should comply with state law, as applicable, and be in the same format as any order forms that the applicant has provided to the SEC. Such instructions again do not provide any Board-specific guidance or request Board-specific information. Therefore, the Board may eliminate these unnecessary forms and reduce burden for thrift MHCs.

Question 36: What are the advantages and disadvantages of the Board retaining Form OC or Form OF and their

[57] 12 CFR 239.56(c).

[58] 12 CFR 239.10(a)(1) (notice to reorganize into mutual form); 12 CFR 239.55(b)(1)(iii) (application to convert from mutual-to-stock form).

[59] *See* 12 CFR 239.58.

respective General Instructions? Are there instances in which SEC rules and regulations regarding offering circulars and order forms would not apply to a given stock issuance (for instance, in situations where an institution does not meet Nasdaq or regional listing requirements)? If so, in the alternative, should the Board instead retain and update Form OC or Form OF?

e. Streamlining Form PS

With respect to Form PS, the Board intends to retain the form itself, but reduce many of the requirements contained in the form's General Instructions. While the SEC sets out rules and regulations regarding proxy soliciting materials, its requirements relate to securities issuances generally, without any specific requirements that may be appropriate for transactions applicable to mutual banking organizations and their members, such as conversions from mutual-to-stock form. The SEC's rules and regulations do not appear to specifically contemplate either the unique circumstances of a conversion or the appropriate disclosures to members in such instance. The Board's Form PS, though, contains disclosure requirements targeted to inform members of matters on which they will be asked to vote, including conversion transactions. These disclosures include the planned use of conversion proceeds and members' rights following consummation of the conversion. Therefore, the Board believes certain elements of the General Instructions to Form PS remain important to ensuring compliance by an MHC with its obligations to its members.

However, the Board believes many of the requirements contained in the General Instructions to Form PS are unnecessary and duplicative of the requirements of the SEC's Schedule 14A and applicable rules and regulations (SEC proxy regulations).[60] Accordingly, the proposal would eliminate the following items. First, the proposal would eliminate the requirements under Item 1 from the General Instructions to Form PS. The information contained in Item 1 regarding the member vote, its date, location, and the matters to be considered, is already required to be included in a proxy statement by the SEC proxy regulations. Therefore, the proposal would remove all of the requirements under the existing Item 1 from the General Instructions to Form PS.

The proposal would eliminate Item 3 regarding persons soliciting proxies from the General Instructions to Form PS as it is also duplicative of information required to be included in a proxy statement by the SEC proxy regulations. Additionally, existing Item 3(2) from the General Instructions to Form PS requires institutions to describe the method it will use to solicit proxies, unless it solicits by mail. This instruction has the effect of encouraging institutions to solicit proxies by mail. However, as discussed in section II.B.1.v., physical mail requirements are out-of-date, costly and unduly burdensome for institutions. Therefore, the proposal would remove Item 3 of the General Instructions to Form PS.

Next, the proposal would eliminate the existing Item 4(2) and (3) from the General Instructions to Form PS. These items require institutions to disclose the record date for individuals entitled to vote at the meeting and the vote required for approval of each matter to be considered at the meeting. This information must already be disclosed in connection with SEC proxy regulations. Therefore, the proposal would eliminate Item 4(2) and Item 4(3) from the General Instructions to Form PS.

The proposal would also eliminate Items 5 and 6 from the General Instructions to Form PS. Item 5 covers directors and executive officers of the institution, while Item 6 concerns management compensation. Both of these items include cross-references to requirements and forms promulgated by the SEC, and such information appears unnecessary to either the Board's review of the proxy statement and any associated filing or members' determination as to whether to furnish such proxy. The Board, therefore, proposes to remove the existing Items 5 and 6 from the General Instructions to Form PS.

Next, Item 7 of the General Instructions to Form PS requires institutions to furnish specific information concerning their business. Such information includes requirements concerning a description of the business, certain financial data, and management's views and analysis regarding the institution's operations. Most of the informational requirements outlined in Item 7 can be streamlined. The proposal would update Items 7(1), 7(2), and 7(3) to eliminate excessive detail. The proposal would also remove the existing Item 7(4) as duplicative of information already encompassed in Item 7. Finally, the proposal would eliminate Item 7(13), as it only includes cross-references to SEC requirements.

Finally, Items 8 through 13 of Form PS outline requirements applicable only in the case of a mutual-to-stock conversion. Generally, such requirements are unique to the context of thrift MHCs and would not be otherwise covered by the SEC's proxy regulations. Retaining such requirements is important to ensure members are sufficiently informed regarding the proposed conversion. The proposal would keep all of these items except for elements of Item 9. In general, Item 9 requires a description of the entity's stock. Items 9(1) and 9(2) are duplicative of requirements imposed by the SEC. Therefore, the proposal would eliminate Items 9(1) and 9(2), but otherwise retain Items 8 through 13 of Form PS. Following these revisions, Form PS would be markedly shorter and streamlined only to include necessary disclosures for members thrift MHCs.

The Board believes these proposed changes would reduce the regulatory burden borne by thrift MHCs. The Board invites comment on all aspects of its proposal, including:

Question 37: What are the advantages and disadvantages of the Board retaining Form PS and its General Instructions? What information from the General Instructions to Form PS should the Board retain? Is there any additional information (other than what is being proposed) that the General Instructions of Form PS currently require institutions to include in their proxy statements that the Board should remove or retain? For example, are there other Items (such as Item 2) in the General Instructions to Form PS that are duplicative of SEC proxy regulations and should be removed? What would be the advantages and disadvantages in removing or retaining additional requirements?

iii. Mathematical Error in Calculation of Liquidation Accounts

Section 239.62(b) sets forth how a thrift MHC should determine the initial balances of liquidation sub-accounts. Section 239.62(b)(1)(i) states a resulting stock holding company determines the initial sub-account balance for a savings account held by an eligible account holder by multiplying the initial balance of the liquidation account by a fraction that has as its numerator the qualifying deposits in the particular savings account expressed in dollars as of the eligibility record date and as its denominator the total qualifying deposits expressed in dollars of all eligible account holders on the eligibility record date. Section

[60] 12 CFR 240.14a–101. Schedule 14A sets out the information required to be in a proxy statement when a shareholder vote is being solicited.

239.62(b)(1)(ii) provides the same calculation for a savings account held by a supplemental eligible account holder, except that the eligibility record date is replaced with the supplemental eligible record date. Currently, the denominator used for the calculation of the initial sub-account balances for both eligible account holders and supplemental eligible account holders contains an error that results in both groups of account holders having a claim to 100 percent of all liquidation account funds rather than their appropriate portions of the liquidation account. The proposed amendments would correct this error, aligning the calculation with a similar OCC regulation, and make clear that the eligible account holders and supplemental eligible account holders would be allocated their proportionate shares of the liquidation account as defined in section 239.62(a). The proposed amendments also would clarify that, for savings accounts held on both the eligibility record date and the supplemental eligibility record date, the amount of the qualifying deposit for calculating a liquidation sub-account would be the higher account balance of the savings account on either the eligibility record date or the supplemental eligibility record date.

iv. Stock Repurchases

Regulation MM currently includes limitations that prevent recently converted institutions from repurchasing shares of stock within the first year of issuance. This limitation applies both to stock issuances by subsidiary holding companies of thrift MHCs, as well as to a stock issuance by resulting stock holding companies in connection with a mutual-to-stock conversion. With respect to stock issuances by a subsidiary holding company of a thrift MHC, section 239.8(c)(1) prohibits the subsidiary holding company from repurchasing shares of its stock within one year of issuance, except in certain narrow circumstances, some of which require providing prior notice to the Board. Additionally, section 239.8(c)(2) prohibits a thrift MHC from repurchasing shares of its subsidiary holding company within a year of the subsidiary holding company's issuance of stock. Meanwhile, with respect to mutual-to-stock conversions, section 239.53(b)(2) of Regulation MM prohibits a thrift MHC seeking to convert to stock form from including planned stock repurchases in the first year of its post-conversion business plan. Further, section 239.63(c) of Regulation MM prohibits resulting stock holding companies from repurchasing shares within the first year after the mutual-to-stock conversion, except in certain circumstances, some of which require written prior notice to the Board.

The purpose of these limitations is to support the ability of mutual banking organizations or former mutual banking organizations to raise capital without facing immediate pressure from investors to make capital distributions, as well as to reduce the likelihood of the issuing organization explicitly or implicitly promising to repurchase the stock soon after issuance, thereby reducing the quality of the capital. However, resulting stock holding companies or subsidiary holding companies of thrift MHCs may have valid reasons for repurchasing stock within the first year of issuance that do not fall within the existing exceptions to the general prohibition on repurchases in that period. For example, it may be in the interests of these companies to repurchase stock in order to provide price support for the company's share price, or the company may seek to distribute capital following a period of unexpectedly high profits.

The Board proposes to amend these provisions to allow repurchases of stock in the first year after the minority stock issuance or conversion issuance, if the stock issuance plan or business plan submitted in connection with the issuance or conversion contemplates such repurchases. In its review of a proposed minority stock issuance or conversion issuance, the Board would assess whether the contemplated stock repurchase is consistent with approval. With respect to minority stock issuances by a subsidiary holding company of a thrift MHC, repurchases of stock within the first year of the issuance would be permissible if the stock issuance plan issued in connection with the share issuance described the circumstances under which such repurchases would occur and the circumstances of the repurchase are consistent with those described in the plan. Share repurchases in the first year after issuance that were not contemplated in the stock issuance plan or which would be made outside of the circumstances discussed in the stock issuance plan, and which do not fall within an existing exception in the rule, would continue to require prior notice to the Board.

Likewise, with respect to conversion issuances, repurchases of stock within the first year after conversion would be permissible where such repurchases would be consistent with the company's strategy for deploying conversion proceeds under the business plan filed with the application to convert to stock form and where the business plan included projections to repurchase stock. The proposal also would amend section 239.53(b)(2) of Regulation MM to permit a conversion applicant to include such projections in its business plan and to plan for stock repurchases in the first year after conversion.[61]

These proposed amendments would give mutual banking organizations and former mutual banking organizations increased flexibility to deploy capital in the manner most appropriate to the organization's circumstances, while ensuring that the stock repurchase was appropriately planned by the institution and evaluated by the Board in connection with its review of the stock issuance proposal. These companies also would have increased certainty regarding the permissibility of their planned capital actions and would encounter less regulatory burden with respect to repurchases that are contemplated ahead of time. The proposed amendments also address concerns raised by commenters with respect to the limitations on repurchases of stock within the first year of issuance. Firms would be permitted to engage in stock repurchases that have a valid business purpose, without a particular regulatory limit, as long as the possibility of making repurchases was contemplated in the relevant filing reviewed by the Board and the circumstances of the repurchase are consistent with the discussion in the filing.

The Board invites comment on all aspects of its proposal to allow subsidiary holding companies and resulting stock holding companies to repurchase shares within the first year of a stock issuance or conversion issuance, particularly:

Question 38: Should the Board retain the limitations on repurchases but decrease the limitation period from one year to six months, or to some another amount of time? What would be the advantages and disadvantages of basing the restriction on an amount of time other than one year?

Question 39: As an alternative to the proposal, what would be the advantages and disadvantages of eliminating all restrictions on repurchases (i.e., including the requirement that the stock issuance plan or business plan contemplate the repurchase)?

Question 40: Should the Board consider retaining the existing limitations without amendment? What

[61] Conversion applicants would continue to be required to include in their business plans financial projections that do not include returns of capital or special dividends.

would be the advantages and disadvantages of doing so?

Question 41: Rather than the changes proposed, should the Board instead consider amending the current standard in section 239.63(c)(1)(i) of Regulation MM that allows for repurchasing shares in the first year after conversion in extraordinary circumstances? Should the Board consider providing further guidance as to what could constitute an extraordinary circumstance? If so, what definitions or factors should the Board consider and why? Should the Board consider providing further guidance as to what could constitute a compelling and valid business purpose for repurchasing (under section 239.63(d)(3)(iii) of Regulation MM)? If so, what definitions or factors should the Board consider and why?

Question 42: What are the advantages and disadvantages of continuing to require conversion applicants to include in their business plans financial projections that do not include returns of capital or special dividends? Should such a restriction apply for a more limited time period in the business plan (e.g., the first year)? If so, what would be the appropriate period and the advantages and disadvantages of adopting that period?

v. Pricing of Conversion Shares

Section 239.59(c) of Regulation MM sets forth certain requirements regarding the pricing of conversion shares.[62] Among other requirements, the maximum price of conversion shares must be between $5 and $50 per share, the maximum price must be no more than 15 percent above the midpoint of the estimated price range in the offering circular, and the minimum price must be no more than 15 percent below that midpoint. However, the Board may permit the maximum price of conversion shares sold to be increased to an amount no more than the otherwise applicable maximum price.

The Board is proposing to remove from Regulation MM the restrictions on conversion share pricing discussed in the previous paragraph. The regulation's requirements regarding the maximum price and the permissible pricing range of conversion shares impose unwarranted limitations on thrift MHCs' ability to convert to stock form, create additional burden for thrift MHCs and the Federal Reserve, and could lead to distortions in the functioning of the market for converting firms' stock. Although the Board recognizes the importance of appropriately pricing conversion shares, the restrictions that the Board proposes to eliminate are not necessary to further this goal. Regulation MM requires that an application for conversion include an appraisal by an independent appraiser, which the Board reviews in determining whether to approve the application.[63] Through its review of this independent appraisal, the Board can assess whether the conversion shares would be appropriately priced.

The Board proposes to retain the requirements that conversion shares be sold at a uniform price per share at a total price that equals the estimated pro forma market value of the shares after conversion and that the estimated price of conversion shares be included in any preliminary offering circular. The first of these requirements ensures that conversion shares are sold fairly and at an appropriate price, while the latter requirement ensures that prospective buyers are well-informed about the anticipated share price.

The restrictions on the maximum and minimum prices of conversion shares also apply, by cross-reference in Regulation MM, to minority issuances of stock by subsidiary holding companies of thrift MHCs.[64] Consistent with the removal of these requirements with regard to the pricing of conversion shares, and for the same reasons, the Board proposes to remove such restrictions as they apply to minority issuances of stock.

Question 43: What are the advantages and disadvantages of the Board's proposed changes to the pricing of conversion shares? Are the proposed changes likely to have an impact on the pricing of conversion shares, given that most converting thrift MHCs set the price of conversion shares at $10 per share?

vi. Offers and Sales of Stock

Section 239.59 of Regulation MM requires converting MHCs to give subscription rights to purchase conversion shares to all eligible account holders, supplemental eligible account holders, and other voting members who do not qualify as either an eligible account holder or supplemental eligible account holder.[65] In order to be able to offer its conversion shares to individuals, the MHC must either (i) list its shares on a national or regional securities exchange, such as the Nasdaq; or (ii) register its shares in each state in which an eligible account holder, supplemental eligible account holder, or other voting member is located.

The Board recognizes that converting MHCs that do not meet the standards to list their shares on a national or regional securities exchange face burdensome, costly, and varied state securities law requirements to register shares in each state where such individuals reside. These registration fees vary by state, and many states require an initial and annual fee. Additionally, MHCs are subject to a variety of filing and other miscellaneous costs that also vary by state. As a result of these varying requirements, converting MHCs often must retain sophisticated counsel to manage compliance with these burdensome provisions.

Therefore, the Board proposes to amend section 239.59 of Regulation MM to state that, notwithstanding the requirement to offer its shares to all eligible account holders, supplemental eligible account holders, and other voting members, MHCs that do not meet the standards to list their shares on a national or regional exchange need only register their conversion shares in states in which 5 percent or more depositors reside. The Board recognizes that the ability to participate in a conversion offering is an important benefit of membership, and notes that this change merely represents a regulatory floor, not a ceiling. MHCs that do not meet the standards to list their shares on a national or regional exchange may decide to register their conversion shares in states where fewer than 5 percent of depositors reside—for example, because they wish to ensure such depositors can participate in the offering, because they wish to ensure a broad distribution of the offering, because they wish to maximize the offering size, or for some other reason. However, such institutions would only be required under Regulation MM to register their shares in states where 5 percent or more of depositors reside. Additionally, this relief would not be available to institutions that qualify to list their shares on a national or regional securities exchange, as such listing does not impose the same burden as registration in individual states.

The Board invites comment on all aspects of its proposal to limit the burden of state securities registration requirements, particularly:

Question 44: Are the Board's proposed amendments the most appropriate way to balance a member's ability to participate in the offering with the burden associated with broad-based registration? Are there any other factors or alternative approaches the Board should consider? What would be the

[62] 12 CFR 239.59(c).

[63] 12 CFR 239.55(b)(1)(ii); 239.55(g)(2).

[64] 12 CFR 239.24(a)(9).

[65] 12 CFR 239.59(h); 12 CFR 239.59(j).

advantages or disadvantages of such other factors or alternative approaches?

Question 45: Under the proposal, MHCs that do not meet the standards for registering their shares on a national or regional exchange would only be required to offer their shares in states where 5 percent or more eligible account holders, supplemental eligible account holders, or other voting members reside. Should the Board consider a threshold other than 5 percent to ensure that most eligible account holders, supplemental eligible account holders, and other voting members would have the right to participate in conversion offerings where the converting MHC does not meet the listing standards for a national or regional exchange? What would be the advantages and disadvantages of adopting a different threshold or a fixed number of depositors?

vii. Loans to a Tax-Qualified Employee Stock Ownership Plan

Section 239.59(f)(2) of Regulation MM prohibits thrift MHCs from extending credit for the purchase of conversion shares. The Board did not change the loan restriction that the OTS originally imposed upon converting thrift MHCs when it adopted section 239.59(f)(2) in 2011. However, the OTS routinely permitted converting thrift MHCs to extend credit to a tax-qualified employee stock ownership plan (ESOP) established for the benefit of employees of the thrift MHC, resulting stock holding company, or subsidiary savings association. The Board similarly has permitted a resulting stock holding company and its subsidiary bank or thrift to make loans to tax-qualified ESOPs established for the benefit of employees of the thrift MHC, resulting stock holding company, or subsidiary savings association. Thus, the Board proposes to amend this section to permit thrift MHCs to extend credit to a tax-qualified ESOP established for the benefit of employees of the thrift MHC, resulting stock holding company, or subsidiary savings association, thereby bringing the regulation into conformation with current practice. This change also would be incorporated by reference into section 239.24(c)(6)(i) of Regulation MM to apply to extensions of credit made in connection with the issuance of stock by a subsidiary holding company.[66]

The Board invites comment on its proposal to amend section 239.59(f)(2) of Regulation MM, particularly:

Question 46: Should the Board impose any limits on the extension of credit to tax-qualified ESOPs for the purchase of conversion shares under Regulation MM for the protection of thrift MHCs? What would be the advantages or disadvantages of any such limits?

Question 47: What concerns might arise from exempting extensions of credit to tax-qualified ESOPs from the prohibition in section 239.59(f)(2)? Should the Board consider any alternative approaches that would allow such tax-qualified ESOPs to participate in such offerings? What would be the advantages and disadvantages of those alternative approaches?

viii. Benefit Plans

Section 239.63(a) of Regulation MM provides numerous requirements limiting the ability of an MHC to offer a stock plan for employees post-conversion. As mentioned in section II.B.2.ii. with respect to issuances by a subsidiary holding company, the provisions relating to implementation of a stock plan for resulting stock holding company employees can be confusing and may require the retention of sophisticated legal counsel. The complexity of these requirements is unnecessary. Therefore, the Board proposes to simplify and streamline them. Specifically, the proposal would remove the many, varied, and overlapping size limitations for stock plans for employees. Instead, section 239.63(a) would be amended to provide that, in the 12 months after the conversion, stock plans for employees cannot, in the aggregate, exceed 15 percent of the number of shares of the resulting stock holding company issued in the conversion. Additionally, to provide converting institutions added flexibility in the 12 months after the conversion, the proposal would allow such institutions to establish a stock option plan or management recognition plan in connection with the mutual-to-stock conversion.

The Board invites comment on its proposal to amend section 239.63(a) of Regulation MM, particularly:

Question 48: What are the advantages and disadvantages of the proposed changes regarding the size of a stock plan for employees? Do the proposed changes adequately simplify the size thresholds applicable to stock plans for employees? What are the advantages and disadvantages of the proposed 15 percent aggregate limit on stock held by stock plans for employees? Should it be increased or decreased and, if so, why? Additionally, should the Board retain the 12-month time limit for this ownership percentage limitation, or should the Board consider some other time frame (and if so, why)?

Question 49: Because the resulting stock holding company's disclosure of ownership interests by stock plans for employees is calculated and presented to the public on a pro forma basis in the proxy statement and offering circular, should the resulting stock holding company be required to notify its shareholders of the final ownership percentage held by stock plans for employees post-conversion? What would be the advantages and disadvantages of such a requirement?

Question 50: Is there any other language in section 239.63(a) that should be clarified or revised to help conversion applicants better understand the Board's expectations of stock plans for employees post-conversion? What would be the advantages and disadvantages of any such clarifications or revisions?

ix. Judicial Review

Section 239.55(h) of Regulation MM sets forth the availability of judicial review of a decision by the Board regarding an application for a conversion from mutual to stock form. Section 239.55(h) provides that any person aggrieved by the Board's final action on the application for conversion has the right to judicial review and outlines the procedures for such action. The Board is proposing to remove from Regulation MM the judicial review provision. The judicial review set forth by the regulation restates the availability of the judicial review set forth under 12 U.S.C. 1467a(j) that would apply to applications for conversion and therefore is duplicative and unnecessary.

C. Other Technical Amendments

In addition to the substantive changes outlined above, the Board also proposes to implement a number of technical amendments to Regulation MM to fix known typographical errors and to make

[66] Under section 11 of HOLA, savings associations generally must comply with sections 23A and 23B of the Federal Reserve Act in the same manner and to the same extent as if the savings association were a member bank. *See* 12 U.S.C. 1468(a); *see also* 12 CFR part 223 (the Board's regulation implementing sections 23A and 23B of the Federal Reserve Act). Both a thrift MHC parent and a tax-qualified ESOP established for the benefit of the employees of the thrift MHC, resulting stock holding company, or subsidiary savings association are affiliates of the subsidiary savings association for purposes of sections 23A and 23B; therefore, even with the proposed change to Regulation MM, any extension of credit by the savings association to an affiliate (including to the thrift MHC to permit it to lend to the ESOP) must comply with sections 23A and 23B. Section 23B also applies to discretionary contributions by the savings association to an affiliate (such as a tax-qualified ESOP).

other non-substantive changes. For example, the proposal would replace references to ''Savings and Loan Holding Company Act'' and ''Holding Company Act'' with ''Home Owners' Loan Act.'' The Home Owners' Loan Act or HOLA is the proper name for the statute that Regulation MM implements, not Savings and Loan Holding Company Act or Holding Company Act. In addition, in order to resolve a conflict between the model bylaws and the requirements of HOLA, the proposal would remove the requirement from the subsidiary holding company model bylaws that directors of the subsidiary holding company own at least 100 shares of the entity's stock. Finally, the proposal would remove other minor typographical errors.

Question 51: Are there any additional changes to Regulation MM that the Board should consider? What would be the advantages or disadvantages of any such changes?

D. Bank MHC Commitments

As discussed in Section I, Regulation MM applies to SLHCs in the mutual form and to their SLHC subsidiaries. It does not apply directly to bank holding companies organized in the mutual form or to their bank holding company subsidiaries. However, the Board generally has asked these institutions to provide the Board with commitments to comply with certain provisions of Regulation MM, including provisions regarding member rights, dividend waivers, conversion rules, and post-conversion operations (Regulation MM commitments).

Unlike thrift MHCs, bank MHCs are not chartered by the Board; instead, they are chartered under state law. Further, bank MHCs are not subject to HOLA, which is the source of authority for Regulation MM, but instead are subject to the BHC Act and to applicable state law, including with respect to their mutuality.

In order to reduce regulatory burden on bank MHCs, the Board proposes to change its general practice with respect to seeking Regulation MM commitments from bank MHCs. Going forward, the Board would not intend to obtain Regulation MM commitments from mutual BHCs in the ordinary course. Given the Board's authority to supervise bank MHCs pursuant to the BHC Act and chartering states' authority to govern the practices of bank MHCs, Regulation MM commitments generally would not be necessary to protect the rights of members or to assure the safe and sound operation of bank MHCs. The Board expects that it would continue to seek targeted commitments from bank MHCs on a case-by-case basis, where appropriate.

With respect to bank MHCs that have previously provided Regulation MM commitments to the Federal Reserve, these companies would be invited to contact the Board or the appropriate Federal Reserve Bank, following the issuance of a final rule, to seek relief from these commitments. Absent unusual circumstances, the Board expects to be receptive to such requests for relief. By not requiring bank MHCs to enter into the Regulation MM commitments or by releasing such institutions from previously entered into commitments, the Board would reduce regulatory burden for bank MHCs and return governance over these institutions to the states.

III. Economic Analysis

The proposal would modernize the regulatory framework applicable to MHCs. It would amend Regulation MM by, among other things, eliminating certain procedural requirements associated with dividend waivers, amending and reducing the burden associated with conversions from mutual to stock form, eliminating the requirement that subsidiary holding companies of MHCs obtain federal charters, and revising and clarifying other provisions of the regulation. The proposal also would amend the capital rule to clarify that certain mutual capital instruments may qualify as regulatory capital if applicable criteria are met and would provide model term sheets for mutual capital certificates.

The discussion below addresses the economic effects of the proposal, including likely costs and benefits.

A. Baseline

Mutual banking organizations are financial institutions owned by those with deposit and lending relationships with the banking organization rather than by shareholders. Their earnings may be retained as capital or returned to members in the form of higher interest rates on deposits, lower loan fees, and enhanced local services. They typically focus on traditional finance services: residential mortgages, personal loans, and small business lending.

Mutual banking organizations occupy a distinct corner of the U.S. banking system. They focus on specific local communities where they can build deep relationships with customers and build market share. According to recent data from the Federal Deposit Insurance Corporation (FDIC) as of March 31, 2026,[67] there are 4,287 FDIC-insured depository institutions active in the United States. Out of this total, there are 143 depository institutions that are subsidiaries of MHCs,[68] which corresponds to 3.3 percent of all depository institutions.

In terms of assets, depository institution subsidiaries of MHCs collectively hold around $244 billion in assets, which represents about 0.9 percent of those assets held by all depository institutions.

Turning to capital ratios, data from the Federal Financial Institutions Examination Council (FFIEC) for mutual banking organizations show that as of March 31, 2026, the average leverage ratio for depository institution subsidiaries of MHCs was 12.1 percent.[69] In comparison, the average leverage ratio for all FDIC-insured banks was 9.15 percent.[70] In terms of common equity tier 1 ratios, the average for depository institution subsidiaries of MHCs reporting common equity tier 1 [71] on March 31, 2026, was 11 percent, compared to an industry average of 13.86 percent.

Mutual banking organizations occupy a unique position in the financial services landscape. In their mission and structure, they closely resemble credit unions: both are member-owned institutions that prioritize their account holders over outside investors, and both focus on serving local communities. Nonetheless, credit unions operate under a not-for-profit cooperative charter and pay no federal income taxes.[72] Mutual banking organizations, on the other hand, are for-profit corporations that pay standard federal and state corporate taxes. Mutual banking organizations are also subject to more stringent regulatory requirements. This creates a competitive disadvantage when mutuals compete with credit unions for deposits and lending opportunities.

B. Affected Parties

Parties affected by the proposal include:

---

[67] *See https://banks.data.fdic.gov/bankfind-suite/financialreporting/report.*

[68] *See* FFIEC Consolidated Reports of Condition and Income Regulatory Reporting.

[69] The median leverage ratio for depository institution subsidiaries of MHCs was 10.94 percent. *See id.*

[70] *See https://www.fdic.gov/quarterly-banking-profile/quarterly-banking-profile-q1-2026.*

[71] Note that 137 mutual banks opt in to the Community Bank Leverage Ratio (CBLR) framework and thus do not report risk-based capital ratios.

[72] *See https://ncua.gov/regulation-supervision/legal-opinions/2001/not-profit-and-tax-exempt-status-federal-credit-unions.*

• *Mutual Savings and Loan Holding Companies (Thrift MHCs):* Holding companies organized in mutual form that own thrifts. As discussed in Section I, they are governed by HOLA and Regulation MM. Additionally, as discussed in section II.A.1., some thrift MHCs, known as legacy waiver MHCs, are allowed to waive dividends, subject to certain procedural requirements, including an annual member vote,[73] while others, known as non-legacy waiver MHCs, are effectively prevented from waiving dividends that benefit insiders.

• *Mutual Bank Holding Companies (Bank MHCs):* Holding companies organized in mutual form that own commercial banks. As discussed in section II.D., by their terms, they are not governed by HOLA or Regulation MM, but by the BHC Act and Regulation Y. They currently provide commitments to the Board to comply with Regulation MM.

• *De novo mutual banking organizations:* These are newly formed banks or thrifts (and, as applicable, their holding companies) in mutual form.

• *Public shareholders:* Owners of shares in mid-tier stock holding companies of MHCs.

• *Credit unions and community banking organizations:* Credit unions and community banking organizations are direct competitors of mutual banking organizations.

C. Broad Economic Considerations

The proposal would modernize Regulation MM, which hasn't been revised since it was introduced in 2011. The proposal would also make amendments to the Board's capital rule. The overall changes would address two problems: mutual banking organizations have fewer opportunities to raise equity compared to other banking organizations, and certain rules applicable to MHCs are unclear and thus burdensome to comply with.

As discussed in section II.A. above, due to their mutuality, mutual banking organizations may be constrained in their ability to raise capital. MHCs cannot issue traditional stock instruments and often primarily rely on retained earnings to meet capital requirements. These constraints can affect these institutions' ability to grow and increase the products and services they provide to their communities.

Additionally, the requirements set forth in Regulation MM are burdensome and complex to apply for small institutions. This creates two problems. First, it is costly to determine the actual regulatory requirement. When rules are vague or difficult to understand, institutions need to obtain costly expertise to understand the applicable rule or standard. These costs are particularly burdensome for smaller institutions, who lack economies of scale. Second, this complexity creates an incentive for consolidation, as larger institutions are better placed to absorb such costs. Such consolidation reduces competition and results in fewer locally owned mutual banking organizations that focus on serving their communities.

D. Costs and Benefits of the Proposal

1. Better Access to Capital

Currently, as discussed above, mutual banking organizations face limitations in their ability to raise capital compared to other banking organizations. The proposal addresses this in several ways. First, the proposal clarifies the circumstances under which certain instruments (like mutual capital certificates and special deposits)[74] qualify as regulatory capital. This change could increase investor confidence in these instruments, potentially increasing demand.

Additionally, the proposed changes would reduce the procedural requirements around dividend waivers. By waiving its right to a portion of the dividends declared by its mid-tier holding company and allowing that dividend to be redistributed to the other shareholders of the mid-tier holding company, an MHC can help make the public share of the mid-tier holding company more attractive to outside investors. Dividend waivers can be an important tool, as mutual banking organizations have fewer ways to raise capital than traditional banks. Finally, by clarifying rules around special deposits, the proposal could ease the formation of new mutual banking organizations, subsequently increasing competition in local banking markets. Altogether, enhancing the ability of mutual banking organizations to obtain capital facilitates their growth and enables them to better serve their communities.

2. Reduced Compliance Costs

The proposal would reduce the compliance burden of Regulation MM. In addition, it codifies certain current supervisory practices, which gives mutual banking organizations regulatory clarity and facilitates compliance. Likewise, the proposal would eliminate requirements to submit two forms to the Board in connection with certain transactions,[75] while streamlining another form.[76] These changes would reduce compliance costs.

In addition, the current process for converting from mutual to stock form involves navigating complex state and federal requirements. The proposal would clarify certain requirements, reducing the costs and regulatory burden associated with such conversions. Moreover, the proposal would list specific factors the Board considers when evaluating certain applications from mutual holding companies, reducing regulatory uncertainty. Lastly, Regulation MM currently prohibits institutions from extending credit for the purchase of conversion shares; however, the Board has routinely granted waivers from this provision for the extension of credit to tax-qualified ESOPs for the benefit of employees so that the ESOP can participate in conversion offerings. The proposal would clarify that loans to ESOPs are permissible, subject to existing regulatory requirements.

3. Potential for Conflicts of Interest and Reduced Accountability

The proposed changes to dividend waivers could create situations where management personally benefits from their choice to waive dividends. When an MHC waives its dividend rights, more money goes to stockholders, which often includes the same executives and directors making the waiver decision.

Furthermore, for the four legacy waiver MHCs that currently require annual member votes, the proposal would eliminate this requirement entirely and instead rely on a simple self-certification from the institution's board that it is acting in accordance with applicable law and its fiduciary duties. Finally, for non-legacy waiver MHCs,[77] the proposal would allow waivers that benefit insiders, for the first time since the Board assumed responsibility for supervision of thrift MHCs. For such institutions, member approval would only be required once every ten years. Since dividend waivers

[73] The four existing Legacy Waiver MHCs are First Federal MHC, Greene County Bancorp MHC, Greenville Federal MHC, Third Federal S&LA of Cleveland MHC.

[74] As explained in section II.A.2. (Special Deposits and Mutual Capital Certificates), special deposits are capital instruments issued by mutual banking organizations that may be especially useful as a means for newly formed organizations to raise capital.

[75] *See* section II.B.3.ii.d.

[76] *See* section II.B.3.ii.e.

[77] The different treatments afforded in the proposal to legacy and non-legacy waiver MHCs, with respect to dividend waivers, could also perpetuate a competitive imbalance between these two categories of thrift MHCs.

tend to persist over time, this change could result in a transfer of wealth to insiders who hold stock in a mid-tier holding company over time. These proposed changes would also reduce existing accountability mechanisms set forth under Regulation MM, as institutions would not be required to explain dividend waivers to their members on an annual basis.

Nevertheless, market forces and existing transparency requirements limit such conflicts of interest. The proposal maintains decennial member voting on dividend waivers by non-legacy waiver MHCs.

In addition, directors and officers of thrift MHCs also owe fiduciary duties of care and loyalty to the institutions they serve. These are legally enforceable obligations backed by potential personal liability. When directors vote to waive dividends or take other actions that involve potential conflicts of interest, they must reasonably believe such actions serve the institution's interests. HOLA requires that a thrift MHC's board of directors must determine that a dividend waiver is consistent with its fiduciary duty to members prior to approving a dividend waiver.[78] Furthermore, HOLA allows the Board to object to dividend waivers if the waiver would be detrimental to the safe and sound operation of the thrift, and any dividend from the thrift would be subject to the statutory limitations on dividends for all depository institutions.[79]

Finally, to mitigate the potential conflicts of interest stemming from the reduced requirements, the Board would require legacy waiver MHCs to make appropriate disclosures regarding dividend waivers to new members at time of opening of a deposit account or loan relationship. These disclosures should ensure that members, including new members, have clear information about potential conflicts and can make informed decisions about establishing and maintaining their membership.

Separate from the proposed changes to dividend waivers, the proposal would also make changes to other requirements around thrift MHC's required disclosures to and notification of members. For instance, the proposal would amend the requirements contained in Form PS to reduce the specific information that must be contained in a proxy solicitation to members. Proxy solicitations provide important disclosures to members and provide accountability to members, including regarding issues where management and directors have direct personal financial interests.

4. Adjustment Costs

While the proposal would reduce compliance costs over the long-term, institutions subject to Regulation MM would face short-term expenses as they learn and adapt to the new regulations. These institutions will need to review the updated rules, train staff, update internal policies and procedures, and potentially modify their compliance systems.

These costs will vary by institution, based on the size and experience of compliance staff; however, these are primarily one-time costs; once these institutions understand and implement the new framework, they would benefit from the overall reduction in compliance burdens.

E. Conclusion

The proposed amendments to Regulation MM and the capital rule modernize and clarify regulatory requirements for mutual banking organizations, reducing compliance burdens. They also would facilitate raising external equity by these entities, supporting their growth and enabling them to better serve their customers. The costs of the proposed changes are small. Overall, the analysis indicates that the benefits of the proposal justify the costs.

IV. Administrative Law Matters

A. Paperwork Reduction Act Analysis

Certain provisions of the proposal contain ''collection of information'' requirements within the meaning of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521) (PRA). In accordance with the requirements of the PRA, the Board may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The information collection affected by this rulemaking is the Reporting and Disclosure Requirements Associated with Regulation MM (FR MM; OMB No. 7100–0340). This Board proposes to extend this information collection for three years, with revision. The Board reviewed the proposal under the authority delegated to the Board by OMB.

Comments are invited on:

(a) Whether the collections of information are necessary for the proper performance of the Board's functions, including whether the information has practical utility;

(b) The accuracy of the Board's estimate of the burden of the information collections, including the validity of the methodology and assumptions used;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the information collections on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

All comments will become a matter of public record. Comments on aspects of this notice that may affect reporting, recordkeeping, or disclosure requirements and burden estimates should be sent to the addresses listed in the **ADDRESSES** section of this document. A copy of the comments may also be submitted to the OMB desk officer for the Board by mail to U.S. Office of Management and Budget, 725 17th Street NW, #10235, Washington, DC 20503; facsimile to (202) 395–6974; or email to *oira_submission@omb.eop.gov,* Attention, Federal Banking Agency Desk Officer.

Current Actions: The proposal would modify certain reporting and disclosure requirements currently included in Regulation MM and in related reporting forms. First, the proposal would eliminate two formal Board reporting forms and their associated instructions: the Offering Circulars (FR MM–OC) and the Order Forms (FR MM–OF). Currently, these documents must include information prescribed by their respective instructions, and must be submitted to the Federal Reserve and distributed to a thrift MHC's members in connection with certain transactions or events. The proposal would eliminate the FR MM–OC and FR MM–OF as individual reporting forms Firms would still be required to submit to the Federal Reserve and disclose to members copies of an offering circular or ordering form in the situations described in Regulation MM.[80]

[78] 12 U.S.C. 1467a(o)(11)(D)(ii); 12 CFR part 238, subpart K.

[79] 12 U.S.C. 1467a(o)(11)(D)(i).

[80] With regard to the offering circular, *see* 12 CFR 239.58 (submission to Federal Reserve in connection with a stock issuance conducted as part of any transaction or proposal pursuant to HOLA and Regulation MM); 12 CFR 239.58(b) (disclosure to members at the same time as or after mailing of proxy statement); and 12 CFR 239.58(c) and 239.60 (submission to Federal Reserve and disclosure to members of post-effective amendments in certain circumstances). With regard to the order form, *see* 12 CFR 239.59(d)(1) (disclosure to members in connection with certain transactions or proposals pursuant to HOLA and Regulation MM).

Second, the Board proposes to revise the Proxy Statement (FR MM–PS), as discussed in further detail in section II.B.3.ii of this Supplementary Information, to streamline the form by removing many of the requirements contained within the General Instructions to the form.

In addition to the proposed revisions to FR MM related to this rulemaking, the Board proposes to revise the FR MM information collection to account for certain reporting provisions in the current Regulation MM, in sections 239.8(d), 239.14(a), 239.16(b), 239.22(a), 239.50(c), and 239.63(d), that have not previously been cleared by the Board under the PRA. The proposal to recognize sections 239.14(a), 239.22(a), 239.50(c), and 239.63(d) as part of the FR MM information collection is meant to ensure compliance with the PRA, but would not substantively change the regulatory requirements to which thrift MHCs and their subsidiary holding companies are subject. Similarly, recognition of sections 239.8(d) and 239.16(b), which would be revised under the proposal to be clearer and less burdensome on thrift MHCs, would ensure that the provisions comply with the PRA.

Currently, under section 239.8(d) of Regulation MM, a thrift MHC that wishes to waive the right to receive a dividend declared by a subsidiary holding company must provide written notice to the Board of the intent of the thrift MHC to waive the right to receive dividends not later than 30 days before the date of the proposed date of payment of the dividend. The notice must include a copy of the resolution of the board of directors of the thrift MHC together with any supporting materials relied upon by the board of directors of the thrift MHC, concluding that the proposed dividend waiver is consistent with the fiduciary duties of the board of directors to the mutual members of the thrift MHC. The resolution must include certain information described in section 239.8(d)(2) of Regulation MM, including a description of (1) the conflict of interest that exists because of a thrift MHC director's ownership of stock in the subsidiary declaring dividends; (2) representations related to the fiduciary duties of the board of directors of the thrift MHC; and an affirmation that a majority of the mutual members of the thrift MHC eligible to vote have, within the 12 months preceding the declaration date of the dividend, approved a waiver of dividends by the thrift MHC. As discussed in section II.A.1. of this Supplementary Information, the proposal would modify the required contents of the written notice required under section 239.8(d).

Separately, under sections 239.14(a) and 239.22(a) of Regulation MM, in order to adopt a charter amendment, a thrift MHC or subsidiary holding company of a thrift MHC, respectively, must adopt a resolution of the board of directors proposing the charter amendment that states the text of such amendment, and either apply to the Board in order to adopt the charter amendment, or submit notice of the proposed charter amendment. If the proposed charter amendment would render more difficult or discourage a merger, proxy contest, the assumption of control by a mutual account holder of the MHC, or the removal of incumbent management, or involve a significant issue of law or policy, then the thrift MHC or subsidiary holding company of the thrift MHC must apply to the appropriate Reserve Bank for approval of the charter amendment. In all other cases, the entity must submit notice and a copy of the proposed amendment to the appropriate Reserve Bank at least 30 days prior to the effective date of the proposed charter amendment.

Under section 239.16(b) of Regulation MM, a thrift MHC or subsidiary holding company of a thrift MHC that proposes a voluntary dissolution must submit to the appropriate Reserve Bank its plan for dissolution (plan), as well as a statement of reasons for proposing dissolution and for proposing the plan. The required contents of the plan are set forth in section 239.16(a) of Regulation MM, which would be modified as discussed in section II.B.1.vii. of this Supplementary Information. When the plan is approved by the board of directors of the thrift MHC or its subsidiary holding company and by the Board, it must be submitted to the thrift MHC's members at a duly called meeting and, approved by a majority of votes cast at that meeting. After dissolution in accordance with the plan, a certificate evidencing dissolution, supported by such evidence as the Board may require, shall immediately be filed with the Board.

Next, section 239.50(c) of Regulation MM provides that the Board may waive any requirement under subpart E of Regulation MM or a provision in any prescribed form. To obtain a waiver, a thrift MHC must file a written request with the Board that specifies the requirement or provision that the thrift MHC wants the Board to waive; demonstrates that the waiver is equitable, is not detrimental to the thrift MHC, mutual members, or other MHCs or savings associations, and is not contrary to the public interest; and includes an opinion of counsel demonstrating that applicable law does not conflict with the waiver of the requirement or provision.

Finally, under 239.63(d), a resulting stock holding company that has converted from mutual form must file a written notice with the appropriate Reserve Bank in order to repurchase its own stock in the first year following conversion, in certain circumstances. The notice must include the proposed repurchase plan, information regarding the effect of the repurchases on the regulatory capital and other capital levels, a description of the purpose of the repurchases and, if applicable, an explanation of the extraordinary circumstances necessitating the repurchases. The notice must be filed at least thirty days before the repurchases commence. This prior notice requirement also applies in certain circumstances when a subsidiary holding company of a thrift MHC seeks to repurchase shares of its stock within one year of the issuance of such shares.[81]

Proposed Extension for Three Years, with Revision, of the Following Information Collection

Collection title: Reporting and Disclosure Requirements Associated with Regulation MM.

Collection identifier: FR MM.

OMB control number: 7100–0340.

General description of collection: The FR MM includes collections of information in the Board's Regulation MM—Mutual Holding Companies (12 CFR part 239) as well as six reporting forms:

- Notice of Mutual Holding Company Reorganization (FR MM–10(o)–1),
- Application for Approval of a Stock Issuance by a Subsidiary Holding Company of a Mutual Holding Company (FR MM–10(o)–2),
- Application for Conversion of a Mutual Holding Company to Stock Form (FR MM–AC),
- Proxy Statement (FR MM–PS),
- Offering Circular (FR MM–OC), and
- Order Forms (FR MM–OF).

The FR MM consists of information that must be filed in connection with certain proposals involving SLHCs that are organized in MHC form, including the reorganization of a savings association into MHC form, stock issuances of holding company subsidiaries of MHCs, and conversions of MHCs to stock form, as well as certain disclosures related to these filings. The Board requires the submission of these filings to allow the

[81] 12 CFR 239.8(c)(2).

Board to fulfill its obligations to review such transactions under section 10(o) of the HOLA, as amended and the Board's Regulation MM. The Board uses the information submitted by an applicant or notificant to evaluate these transactions with respect to the relevant statutory and regulatory factors.

Frequency: Event-generated.

Respondents: Mutual savings associations and SLHCs that are organized in mutual form.

Total estimated number of respondents: 13.

Estimated average hours per response:

Reporting
- FR MM–10(o)–1—66.59.
- FR MM–10(o)–2—33.56.
- FR MM–AC—66.56.
- FR MM–PS—25.
- Section 239.4(d)(4) Notice of reorganization—1.
- Section 239.8(d) Restrictions on waiver of dividends—20.
- Section 239.14(a) Charter amendments (mutual holding company)—22.
- Section 239.16(b) Voluntary dissolution—20.
- Section 239.22 Charter amendments (subsidiary holding company)—22.
- Section 239.50© Request for waivers—16.5.
- Section 239.58 Offering circular—0.56.
- Section 239.60 Completion of the offering—0.56.
- Section 239.60(b) Offering period extension—1.
- Section 239.63(d) Post conversion—20.
- Section 239.65(g) Voluntary supervisory conversion—1.

Disclosure
- FR MM–10(o)–1—1.
- FR MM–AC—1.
- FR MM–PS—1.
- Sections 239.3(a)(2) and 239.54(c)(1) Newspaper publication—1.
- Section 239.16(b) Voluntary dissolution—1.
- Section 239.58(b) Distribution of the offering circular—1.
- Section 239.59(d)(1) Selling conversion shares—1.

Total estimated annual burden hours: 1,407.

B. Regulatory Flexibility Act Analysis

The Board is providing an initial regulatory flexibility analysis with respect to this proposal. The Regulatory Flexibility Act (RFA)[82] requires an agency to consider whether the rule it proposes will have a significant economic impact on a substantial number of small entities.[83] In connection with a proposal, the RFA requires an agency to prepare and invite public comment on an initial regulatory flexibility analysis describing the impact of the rulemaking on small entities, unless the agency certifies that the proposed rule, if promulgated, would not have a significant economic impact on a substantial number of small entities. An initial regulatory flexibility analysis must contain (1) a description of the reasons why action by the agency is being considered; (2) a succinct statement of the objectives of, and legal basis for, the proposed rule; (3) a description of, and, where feasible, an estimate of the number of small entities to which the proposed rule will apply; (4) a description of the projected reporting, recordkeeping, and other compliance requirements of the proposed rule, including an estimate of the classes of small entities that will be subject to the requirement and the type of professional skills necessary for preparation of the report or record; (5) an identification, to the extent practicable, of all relevant Federal rules which may duplicate, overlap with, or conflict with the proposed rule; and (6) a description of any significant alternatives to the proposed rule which accomplish the stated objectives of applicable statutes and minimize any significant economic impact of the proposed rule on small entities.[84]

The Board has considered the potential impact of the proposal on small entities in accordance with the RFA. Based on its analysis and for the reasons stated here, the Board believes that this proposal will not have a significant economic impact on a substantial number of small entities. Nevertheless, the Board is publishing and inviting comment on this initial regulatory flexibility analysis.

As discussed in section II.B. of this Supplementary Information, the Board is proposing changes to Regulation MM that are intended to reduce the regulatory burden borne by thrift MHCs and their subsidiary holding companies. The proposal would, among other things, eliminate certain dividend waiver requirements, reduce burden associated with conversions from mutual-to-stock form, revise certain post-conversion restrictions, eliminate the requirement that subsidiary holding companies of MHCs obtain federal charters, and revise and clarify other provisions of the regulation. Pursuant to section 312 of the Dodd-Frank Act, the Board's responsibility for the supervision and regulation of SLHCs, including thrift MHCs and their subsidiary holding companies, involves all the former functions of OTS and its Director related to SLHCs, including rulemaking authority and the authority to issue orders.[85]

As discussed in section II.A. of this Supplementary Information, the Board is also proposing targeted changes to the capital rule to clarify the treatment of capital instruments issued by mutual banking organizations. First, the Board proposes to amend sections 217.20(b)(1), (c)(1), and (d)(1) of the capital rule to clarify that special deposits and mutual capital certificates issued by a mutual banking organization can qualify as common equity tier 1, additional tier 1, or tier 2 capital, respectively, if all of the qualifying criteria are satisfied. Second, the Board proposes to add two mutual capital certificate term sheets as appendices to the capital rule. The term sheets are intended to serve as templates for mutual banking organizations to use as a reference when issuing capital instruments intended to qualify as common equity tier 1 or additional tier 1 capital. Various statutory authorities provide the Board with broad authority to set capital requirements and standards for the institutions it regulates.[86]

The proposal would apply to mutual banking organizations supervised by the Board.[87] Based on regulatory report

[82] 5 U.S.C. 601 *et seq.*

[83] Under regulations issued by the U.S. Small Business Administration (SBA), a small entity includes a depository institution, bank holding company, or savings and loan holding company with total assets of $850 million or less. *See* 13 CFR 121.201. Consistent with the SBA's General Principles of Affiliation, the Board includes the assets of all domestic and foreign affiliates toward the size threshold when determining whether to classify a particular entity as a small entity. *See* 13 CFR 121.103. As of the fourth quarter of 2025, there were approximately 2,267 small BHCs and approximately 84 small SLHCs, and approximately 438 small state member banks.

[84] 5 U.S.C. 603(b)–(c).

[85] 12 U.S.C. 5412.

[86] *See, e.g.,* 12 U.S.C. 248(a), 321–338a, 481–486, 1462a, 1467a, 1818, 1828, 1831n, 1831o, 1831p–1, 1831w, 1835, 1844(b), 1851, 3904, 3906–3909, 4808, 5365, 5368, 5371, and 5371 note, and 15 U.S.C. 9050.

[87] As discussed in section I of this Supplementary Information, mutual banking organizations can have varying structures and charter types. HOLA and Regulation MM apply to thrift MHCs and their subsidiary holding companies. Although bank MHCs are not subject to HOLA or Regulation MM, they are subject to the Board's supervision and regulation pursuant to the BHC Act. Banks and savings associations in mutual form are not directly supervised or regulated by the Board, except for state member banks in mutual form. The Board generally uses the industry-specific size standards adopted by the SBA for purposes of estimating the number of small entities to which a proposal would apply. The SBA has adopted size standards that provide that mutual banking organizations with average assets of $850 million or less over the preceding year (based on the institution's four quarterly financial statements) are considered small

Continued

data, there are approximately 73 mutual banking organizations that have total domestic assets of $850 million or less and thus are considered small entities for purposes of the RFA.[88] The proposed amendments to Regulation MM would apply to thrift MHCs and their subsidiary holding companies. Although Regulation MM does not apply directly to bank MHCs, such institutions generally have provided the Federal Reserve with commitments to comply with certain provisions of Regulation MM. Therefore, these entities could be affected by the proposal to the extent the proposed changes would alter provisions of Regulation MM that are covered by the commitments. Additionally, small mutual banking organizations that are bank MHCs or thrift MHCs are generally subject to the Small Bank Holding Company and Saving and Loan Holding Company Policy Statement.[89]

As discussed in section III of this Supplementary Information, the proposal would modernize the regulatory framework applicable to MHCs, thereby reducing the compliance burdens borne by MHCs and supporting their ability to raise capital, grow, and better serve their communities. MHCs would face short-term expenses in adapting to the updated regulatory framework, such as expenses incurred by reviewing the updated rules, training staff, updating internal policies and procedures, and potentially modifying their compliance systems. However, these would primarily be one-time costs, the overall costs of the proposed changes are expected to be small, and MHCs would ultimately benefit from an overall reduction in compliance burdens. Further, as noted in section IV.A. of this Supplementary Information, the proposal would modify certain reporting and disclosure requirements currently included in Regulation MM and in related reporting forms, including by eliminating the FR MM–OC and FR MM–OF as individual reporting forms and streamlining the FR MM–PS. The proposal would not affect reporting, recordkeeping, and other compliance requirements under the capital rule. Therefore, there would be no reporting, recordkeeping, or other compliance requirements from this proposal that would impose a significant cost on small entities.

The Board is aware of no other federal rules that duplicate, overlap, or conflict with the proposal. The Board has not identified any significant alternatives to the proposal that would accomplish the stated objectives and minimize the economic impact of the proposal on small entities.

Therefore, the Board believes that the proposal will not have a significant economic impact on a substantial number of small entities supervised by the Board.

The Board welcomes comment on all aspects of its analysis. In particular, the Board requests that commenters describe the nature of any impact on small entities and provide empirical data to illustrate and support the extent of the impact.

C. Solicitation of Comments on the Use of Plain Language

Section 722 of the Gramm-Leach-Bliley Act (Pub. L. 106–102, 113 Stat.1338, 1471, 12 U.S.C. 4809) requires the Federal banking agencies to use plain language in all proposed and final rules published after January 1, 2000. The Board has sought to present the proposed amendments in a simple and straightforward manner and invites comment on the use of plain language.

D. Riegle Community Development and Regulatory Improvement Act of 1994

Pursuant to section 302(a) of the Riegle Community Development and Regulatory Improvement Act (RCDRIA),[90] in determining the effective date and administrative compliance requirements for new regulations that impose additional reporting, disclosure, or other requirements on insured depository institutions (IDIs), the Board must consider, consistent with principles of safety and soundness and the public interest, any administrative burdens that such regulations would place on depository institutions, including small depository institutions, and customers of depository institutions, as well as the benefits of such regulations. In addition, section 302(b) of RCDRIA requires new regulations and amendments to regulations that impose additional reporting, disclosures, or other new requirements on IDIs generally to take effect on the first day of a calendar quarter that begins on or after the date on which the regulations are published in final form, with certain exceptions.[91]

The Board notes that comment on these matters has been requested in other sections of this Supplementary Information, and that the requirements of RCDRIA will be considered as part of the overall rulemaking. The Board has determined that the proposed rule (1) would not impose any additional reporting, disclosures, or other new requirements on IDIs, and (2) places no new administrative burdens on depository institutions, including small depository institutions, and customers of depository institutions. Therefore, the requirements of RCDRIA do not apply. However, the Board invites comments that will further inform its consideration of RCDRIA.

E. Providing Accountability Through Transparency Act of 2023

The Providing Accountability Through Transparency Act of 2023 [92] requires that a notice of proposed rulemaking include the internet address of a summary of not more than 100 words in length of a proposed rule, in plain language, that shall be posted on the internet website under section 206(d) of the E-Government Act of 2002.[93]

In summary, the Board proposes to modernize the regulatory framework applicable to mutual holding companies (MHCs). The proposal would amend Regulation MM (12 CFR part 239), including by eliminating certain dividend waiver requirements, reducing burden associated with conversions from mutual-to-stock form, revising certain post-conversion restrictions, eliminating federal charter requirements for subsidiary holding companies of MHCs, and revising and clarifying other provisions. The proposal also would amend the capital rule (12 CFR part 217) to clarify that certain mutual capital instruments may qualify as regulatory capital and to codify model term sheets for mutual capital certificates as appendices to the regulation.

The proposal and summary can be found at *https://www.regulations.gov* and *https://www.federalreserve.gov/supervisionreg/reglisting.htm.*

Authority and Issuance

For the reasons set forth in the preamble, the Board of Governors of the Federal Reserve System proposes to amend chapter II of title 12 of the Code of Federal Regulations as follows:

PART 217—CAPITAL ADEQUACY OF BANK HOLDING COMPANIES, SAVINGS AND LOAN HOLDING COMPANIES, AND STATE MEMBER BANKS (REGULATION Q)

■ 1. The authority citation for part 217 is revised to read as follows:

Authority: 12 U.S.C. 248(a), 321–338a, 481–486, 1462a, 1467a, 1818, 1828, 1831n, 1831o, 1831p–1, 1831w, 1835, 1844(b), 1851, 3904, 3906–3909, 4808, 5365, 5368, 5371, and 5371 note, and 15 U.S.C. 9050.

Subpart C—Definition of Capital

■ 2. Amend 217.20 by revising the introductory text of paragraph (b)(1), the introductory text of paragraph (c)(1), and the introductory text of paragraph (d)(1) to read as follows:

§ 217.20 Capital components and eligibility criteria for regulatory capital instruments.

* * * * *

(b) * * *

(1) Any common stock instruments (plus any related surplus) issued by the Board-regulated institution, net of treasury stock, and any capital instruments issued by mutual banking organizations (such as mutual capital certificates or mutual special deposits), that meet all the following criteria:

* * * * *

(c) * * *

(1) Instruments (including any instruments issued by mutual banking organizations such as mutual capital certificates or mutual special deposits), plus any related surplus, that meet the following criteria:

* * * * *

(d) * * *

(1) Instruments (including any instruments issued by mutual banking organizations such as mutual capital certificates or mutual special deposits), plus any related surplus, that meet the following criteria:

* * * * *

■ 3. Appendix B to part 217 is added to read as follows:

Appendix B to Part 217—Key Terms for Mutual Capital Certificates Qualifying as Common Equity Tier 1 Capital

1. Background

This appendix sets out key terms for special instruments or capital certificates, issued by mutual banking organizations, eligible to qualify as common equity tier 1 capital, pursuant to section 217.20(b) of the Board's Regulation Q (12 CFR 217.20(b)). Banking organizations are encouraged to seek legal advice and consider additional legal requirements, such as state law or regulatory requirements, that may be applicable to the offering of mutual capital certificates. These key terms are offered as one method of complying with the requirements of section 217.20(b) for mutual-form banking organizations specifically. Banking organizations are encouraged to reach out to Federal Reserve staff if they have questions.

■ 2. *Key Terms*

(a) *Issuer.* Mutual-Form Bank Holding Company, Mutual-Form Savings and Loan Holding Company, or Mutual-Form State Member Bank (''Mutual Banking Organization'').

(b) *Certificates Offered.* Certificates are instruments, issued by the Mutual Banking Organization, representing paid-in capital, the paid-in amount of which shall be classified as equity under U.S. Generally Accepted Accounting Principles. Certificates constitute a claim in liquidation, receivership, insolvency, or similar proceeding, on the residual assets of the Mutual Banking Organization, after the payment in full of all depositors, general creditors, subordinated debt holders, or other senior claimants.

(c) *Ordinary Distributions.*

(1) The Mutual Banking Organization may make distributions on the Certificates only if declared by its board of directors (or a duly authorized committee of the board), to be paid out of the Mutual Banking Organization's net income, retained earnings, or surplus related to other common equity tier 1 instruments, after other legal obligations have been satisfied. The Mutual Banking Organization retains full discretion at all times to cancel distributions on the instrument without triggering an event of default, a requirement to make a payment-in-kind, or an imposition of other restrictions, except in relation to any distribution to holders of instruments that are on parity with the Certificates.

(2) Distributions on Certificates will not be cumulative, are not mandatory, and are not based on a specific distribution rate specified at issuance.[1] Issuers may disclose to investors target distribution rates, provided however, issuers also clearly disclose that such distribution target rates will not be cumulative or mandatory.

(d) *Maturity.* Certificates are perpetual and have no maturity date.

(e) *Redemption.* Certificates have no maturity date, and holders of Certificates do not have the right to require redemption. The Mutual Banking Organization may, in its discretion, redeem the Certificates with the prior approval of the Board of Governors of the Federal Reserve System (''Board'').

(f) *Ranking.* Certificates must be subordinated to all liabilities and other obligations, both with respect to payments and in a receivership, insolvency, liquidation, or similar proceeding. Certificates are not secured, nor covered by any guarantee of the Mutual Banking Organization or of an affiliate of the Mutual Banking Organization, and Certificates are not subject to any other arrangement that legally or economically enhances the seniority of the instrument.

(g) *Voting Rights.* Certificate holders can be granted voting rights to the extent permitted by the charter of the Mutual Banking Organization and applicable federal and state law. However, Certificate holders are not considered members of the Mutual banking Organization solely because they hold Certificates.

(h) *Conflicts of Interest and Financing.* The Mutual Banking Organization, or an entity that the Mutual Banking Organization controls, may not purchase or, directly or indirectly, fund the purchase of the Certificates.

(i) *Listing.* Not required. Certificates can be listed or not listed.

(j) *Reorganization, Recapitalization, and Merger.* Except in the event of insolvency, liquidation, or receivership, the Certificates may survive any reorganization, recapitalization, or merger in accordance with their terms.

Correspondence of Key Terms to Regulatory Requirements

[1] State member banks are subject to other legal restrictions on reductions in capital resulting from distributions, including out of the capital surplus account, under 12 U.S.C. 324 and 12 CFR 208.5.

TABLE 1 TO APPENDIX B

Citation to 12 CFR 217.20	Regulatory text requirement	Term
217.20(b)(1)(i)	The instrument is paid-in, issued directly by the Board- regulated institution, and represents the most subordinated claim in a receivership, insolvency, liquidation, or similar proceeding of the Board-regulated institution.	Certificates Offered; Ranking.
217.20(b)(1)(ii)	The holder of the instrument is entitled to a claim on the residual assets of the Board-regulated institution that is proportional with the holder's share of the Board-regulated institution's issued capital after all senior claims have been satisfied in a receivership, insolvency, liquidation, or similar proceeding.	Certificates Offered; Ranking.
217.20(b)(1)(iii)	The instrument has no maturity date, can only be redeemed via discretionary repurchases with the prior approval of the Board to the extent otherwise required by law or regulation, and does not contain any term or feature that creates an incentive to redeem.	Maturity; Redemption.
217.20(b)(1)(iv)	The Board-regulated institution did not create at issuance of the instrument through any action or communication an expectation that it will buy back, cancel, or redeem the instrument, and the instrument does not include any term or feature that might give rise to such an expectation.	Maturity; Redemption.
217.20(b)(1)(v)	Any cash dividend payments on the instrument are paid out of the Board-regulated institution's net income, retained earnings, or surplus related to common stock, and are not subject to a limit imposed by the contractual terms governing the instrument. State member banks are subject to other legal restrictions on reductions in capital resulting from cash dividends, including out of the capital surplus account, under 12 U.S.C. 324 and 12 CFR 208.5.	Distributions.
217.20(b)(1)(vi)	The Board-regulated institution has full discretion at all times to refrain from paying any dividends and making any other distributions on the instrument without triggering an event of default, a requirement to make a payment-in-kind, or an imposition of any other restrictions on the Board- regulated institution.	Distributions.
217.20(b)(1)(vii)	Dividend payments and any other distributions on the instrument may be paid only after all legal and contractual obligations of the Board-regulated institution have been satisfied, including payments due on more senior claims.	Distributions.
217.20(b)(1)(viii)	The holders of the instrument bear losses as they occur equally, proportionately, and simultaneously with the holders of all other common stock instruments before any losses are borne by holders of claims on the Board-regulated institution with greater priority in a receivership, insolvency, liquidation, or similar proceeding.	Distributions; Redemption.

■ 4. Appendix C to part 217 is added to read as follows:

Appendix C to Part 217—Key Terms for Mutual Capital Certificates Qualifying as Additional Tier 1 Capital

1. Background

This appendix sets out key terms for special instruments or capital certificates, issued by mutual banking organizations, eligible to qualify as additional tier 1 capital, pursuant to section 217.20(c) of the Board's Regulation Q (12 CFR 217.20(c)). Banking organizations are encouraged to seek legal advice and consider additional legal requirements, such as state law or regulatory requirements, that may be applicable to the offering of mutual capital certificates. These key terms are offered as one method of complying with the requirements of section 217.20(c) for mutual-form banking organizations specifically. Banking organizations are encouraged to reach out to Federal Reserve staff if they have questions.

2. Key Terms

(a) *Issuer.* Mutual-Form Bank Holding Company, Mutual-Form Savings and Loan Holding Company, or Mutual-Form State Member Bank (''Mutual Banking Organization'')

(b) *Certificates Offered.* Certificates are instruments, issued by the Mutual Banking Organization, representing paid-in capital, the paid-in amount of which shall be classified as equity under U.S. Generally Accepted Accounting Principles.

(c) *Ordinary Distributions.*

(1) The Mutual Banking Organization may make distributions on the Certificates only if declared by its board of directors (or a duly authorized committee of the board), to be paid out of the Mutual Banking Organization's net income, retained earnings, or surplus related to other additional tier 1 instruments. The Mutual Banking Organization retains full discretion at all times to cancel distributions on the instrument without triggering an event of default, a requirement to make a payment-in-kind, or an imposition of other restrictions, except in relation to any distribution to holders of instruments that are on parity with the Certificates.

(2) Distributions on Certificates will not be cumulative and are not mandatory. The Mutual Banking Organization has flexibility to choose and disclose to investors an appropriate target distribution rate, including rates that are adjusted periodically independent of a Mutual Banking Organization's credit quality, in relation to general market interest rates. However, distribution rates cannot reset based in whole or in part on the Mutual Banking Organization's credit quality, nor contain a ''step- up'' feature or other terms that create an incentive to redeem the instruments early.

(d) *Maturity.* Certificates are perpetual and have no maturity date.

(e) *Redemption.*

(1) Certificates do not have any maturity date, and holders of Certificates will not have the right to require redemption. The Mutual Banking Organization may, in its discretion, redeem the Certificates with the prior approval of the Board of Governors of the Federal Reserve System (''Board'').

(2) The Certificates may be callable by their terms, provided the Certificates may be called by the Mutual Banking Organization only after a minimum of five years following issuance, except that the Certificates may allow it to be called earlier than five years upon the occurrence of a regulatory event that precludes the instrument from being included in additional tier 1 capital, a tax event, or if the issuing entity is required to register as an investment company pursuant to the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*). The Mutual Banking Organization must receive prior approval from the Board to exercise any call option on the Certificates. Prior to exercising the call option, or immediately thereafter, the Mutual Banking Organization must either replace the Certificates to be called with an equal amount of instruments that satisfy the criteria under section 217.20(b) or (c), or demonstrate to the satisfaction of the Board that, following redemption, the Mutual Banking Organization will continue to hold capital commensurate with its risks.

(f) *Ranking.* Certificates must be subordinated to depositors, general creditors, and subordinated debt holders, both with respect to payments and in a receivership, insolvency, liquidation or similar

proceeding. The Certificates are not secured, nor covered by any guarantee of the Mutual Banking Organization or of an affiliate of the Mutual Banking Organization, and Certificates are not subject to any other arrangement that legally or economically enhances the seniority of the instrument. The Certificates can be senior to any rights based on membership in the Mutual Bank Organization.

(g) *Liquidation Rights.* In the event the Mutual Banking Organization voluntarily or involuntarily liquidates, dissolves, or winds up its affairs, holders of Certificates may be entitled to receive an amount per certificate, plus any ordinary distributions that have been declared but not paid prior to the date of payment of distributions to Certificate holders. Distributions can be made only to the extent the Mutual Banking Organization has assets that are available for distribution to Certificate holders, after payment or provision for payment of more senior obligations.

(h) *Voting Rights.* Certificate holders can be granted voting rights to the extent permitted by the charter of the Mutual Banking Organization and applicable federal and state law. However, Certificate holders are not considered members of the Mutual banking Organization solely because they hold Certificates.

(i) *Conflicts of Interest and Financing.* The Mutual Banking Organization, or an entity that the Mutual Banking Organization controls, may not purchase or, directly or indirectly, fund the purchase of the Certificates.

(j) *Preemptive Rights.* The Certificates do not have any features that would limit or discourage additional issuance of capital by the Mutual Banking Organization, such as provisions that require the Mutual Banking Organization to compensate holders of the Certificates if a new instrument is issued at a lower price during a specified time frame.

(k) *Listing.* Not required. Certificates can be listed or not listed.

(l) *Reorganization, Recapitalization, and Merger.* Except in the event of insolvency, liquidation, or receivership, the Certificates may survive any reorganization, recapitalization, or merger in accordance with their terms.

[1] State member banks are subject to other legal restrictions on reductions in capital resulting from distributions, including out of the capital surplus account, under 12 U.S.C. 324 and 12 CFR 208.5.

3. Correspondence of Key Terms to Regulatory Requirements

TABLE 1 TO APPENDIX C

Citation to 12 CFR 217.20	Regulatory text requirement	Term
217.20(c)(1)(i)	The instrument is issued and paid-in	Certificates Offered.
217.20(c)(1)(ii)	The instrument is subordinated to depositors, general creditors, and subordinated debt holders of the Board- regulated institution in a receivership, insolvency, liquidation, or similar proceeding.	Certificates Offered; Liquidation Rights; Ranking.
217.20(c)(1)(iii)	The instrument is not secured, not covered by a guarantee of the Board-regulated institution or of an affiliate of the Board-regulated institution, and not subject to any other arrangement that legally or economically enhances the seniority of the instrument.	Ranking.
217.20(c)(1)(iv)	The instrument has no maturity date and does not contain a dividend step-up or any other term or feature that creates an incentive to redeem.	Maturity; Ordinary Distributions; Redemption.
217.20(c)(1)(v)	If callable by its terms, the instrument may be called by the Board-regulated institution only after a minimum of five years following issuance, except that the terms of the instrument may allow it to be called earlier than five years upon the occurrence of a regulatory event that precludes the instrument from being included in additional tier 1 capital, a tax event, or if the issuing entity is required to register as an investment company pursuant to the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*). In addition: A. The Board-regulated institution must receive prior approval from the Board to exercise a call option on the instrument. B. The Board-regulated institution does not create at issuance of the instrument, through any action or communication, an expectation that the call option will be exercised. C. Prior to exercising the call option, or immediately thereafter, the Board-regulated institution must either: Replace the instrument to be called with an equal amount of instruments that meet the criteria under paragraph (b) of this section or this paragraph (c); or demonstrate to the satisfaction of the Board that following redemption, the Board-regulated institution will continue to hold capital commensurate with its risk.	Redemption.
217.20(c)(1)(vi)	Redemption or repurchase of the instrument requires prior approval from the Board	Redemption.

PART 239—MUTUAL HOLDING COMPANIES (REGULATION MM)

■ 5. The authority citation for part 239 continues to read as follows:

Authority: 12 U.S.C. 1462, 1462a, 1464, 1467a, 1828, and 2901.

Subpart A—General Provisions

■ 6. Amend § 239.2 by:

■ a. Redesignating paragraphs (b) through (cc) as paragraphs (c) through (dd);

■ b. Adding paragraph (b); and

■ c. Revising paragraphs (c) and (d), the introductory text of paragraph (f), paragraph (g), paragraphs (p) through (u), and the introductory text of paragraph (v).

The addition and revisions read as follows:

§ 239.2 Definitions.

* * * * *

(b) *Acquiree mutual holding company* means a mutual holding company that would be acquired or controlled by another mutual holding company as a result of a merger or acquisition.

* * * * *

(c) *Acting in concert* has the same meaning as in 12 CFR 238.31(b).

(d) *Affiliate* has the same meaning as in 12 CFR 238.2(a).

* * * * *

(f) *Company* means any corporation, partnership, trust, association, joint venture, pool, syndicate, unincorporated organization, joint-stock company or similar organization, as defined in this section; but a company does not include:

* * * * *

(g) *Control* has the same meaning as in 12 CFR 238.2(e).

* * * * *

(p) *Reorganization Plan* means a plan to reorganize into the mutual holding company form containing the information required by § 239.6.

(q) *Reorganizing association* means a mutual savings association that

proposes to reorganize to the mutual holding company form pursuant to this part.

(r) *Resulting association* means a savings association in the stock form that is organized as a subsidiary of a mutual holding company to receive the substantial part of the assets and liabilities (including all deposit accounts) of the reorganizing association upon consummation of the reorganization.

(s) *Savings account* means any withdrawable account, including a demand account, except this term does not mean a tax and loan account, a note account, a United States Treasury general account, or a United States Treasury time deposit-open account.

(t) *Savings association* has the same meaning as in 12 CFR 238.2(l).

(u) *Savings and loan holding company* has the same meaning as specified in section 10(a)(1) of the HOLA and 12 CFR 238.2(m).

(v) *Similar organization* for purposes of paragraph (f) of this section means a combination of parties with the potential for or practical likelihood of continuing rather than temporary existence, where the parties thereto have knowingly and voluntarily associated for a common purpose pursuant to identifiable and binding relationships which govern the parties with respect to either:

* * * * *

Subpart B—Mutual Holding Companies

■ 7. Amend § 239.3 by removing in paragraph (a)(2) the text ''§ 238.14 of this chapter'' and adding in its place the text ''12 CFR 238.14''.

■ 8. Amend § 239.4 by:

■ a. Revising paragraph (c)(1); and

■ b. Removing in paragraph (d) the text ''§ 238.14 of this chapter'' wherever it appears and adding in its place the text ''12 CFR 238.14''.

The revision reads as follows:

§ 239.4 Grounds for disapproval of reorganizations.

* * * * *

(c) * * *

(1) *Managerial resources.* The factors specified in 12 CFR 238.15(c)(1)(i) through (vi) shall give rise to a rebuttable presumption that the managerial resources test of paragraph (a)(2) of this section is not met. For this purpose, each place the term *acquiror* appears in 12 CFR 238.15(c)(1)(i) through (vi), it shall be read to mean the reorganizing association or any acquiree association, and the reference in 12 CFR 238.15(c)(1)(v) of this chapter to filings under this part shall be deemed to include filings under either 12 CFR part 238 or this part.

* * * * *

■ 9. Amend § 239.5 by:

■ a. Revising the introductory text of paragraph (a);

■ b. Adding paragraph (a)(5); and

■ c. Revising paragraph (b).

The revisions and addition read as follows:

§ 239.5 Membership rights.

(a) *Depositors and borrowers of resulting associations, acquiree associations, and associations in mutual or stock form when acquired.* The charter of a mutual holding company must:

* * * * *

(5) Confer upon the members of any acquiree mutual holding company the same membership rights in the acquiring mutual holding company as are conferred upon the members of the acquiring mutual holding company.

(b) *Depositors and borrowers of associations in the stock form when acquired.* A mutual holding company that acquires a savings association in the stock form, other than a resulting association or an acquiree association, shall not confer any membership rights upon the depositors and borrowers of such association, unless;

(1) such association is merged into an association from which the mutual holding company draws members, in which case the depositors of the stock association shall receive the same membership rights as other depositors of the association into which the stock association is merged; or

(2) such association is the subsidiary of another mutual holding company that, while in the mutual form, is acquired by the mutual holding company, and the acquiring mutual holding company chooses to operate the acquired savings association separately from its resulting association.

■ 10. Amend § 239.6 by revising paragraphs (a), (g), and (i) to read as follows:

§ 239.6 Contents of Reorganization Plans.

(a) Provide for amendment of the charter and bylaws of the reorganizing association, and attach and incorporate such charter and bylaws;

* * * * *

(g) Provide that each depositor in the reorganizing association or any acquiree association immediately prior to the reorganization shall upon consummation of the reorganization receive, without payment, an identical account in the resulting association or the acquiree association, as the case may be (with appropriate modifications made to this provision if savings associations are being merged as a part of the reorganization);

* * * * *

(i) Provide that the Reorganization Plan shall be terminated if not completed within a specified period of time (where the time period shall not be more than 24 months from the date upon which the members of the reorganizing association or the date upon which the members of any acquiree association, whichever is earlier, approve the Reorganization Plan and may not be extended by the reorganizing or acquiree association); and

* * * * *

■ 11. Amend § 239.7 by:

■ a. Removing in paragraph (a)(1) the text ''§ 238.11 of this chapter'' and adding in its place the text ''12 CFR 238.11'';

■ b. Revising paragraphs (a)(2)(iii), (a)(2)(iv), and (a)(3);

■ c. Removing in paragraph (a)(4) the text ''§ 238.11 of this chapter'' and adding in its place the text ''12 CFR 238.11''; and

■ d. Removing in paragraph (a)(5) the text ''§§ 238.41 and 238.11 of this chapter'' and adding in its place the text ''12 CFR 238.41 and 238.11''.

The revisions read as follows:

§ 239.7 Acquisition and disposition of savings associations, savings and loan holding companies, and other corporations by mutual holding companies.

(a) * * *

(2) * * *

(iii) The necessary approvals are obtained from the Board, including approval pursuant to 12 CFR 238.11, and any other approvals required to form an interim association, to amend the charter and bylaws of the association being acquired, or to amend the charter and bylaws of the mutual holding company consistent with § 239.6(a); and

(iv) The approval of the members of the mutual holding company is obtained, if the Board advises the mutual holding company in writing that such approval will be required. In determining whether members' approval will be required, the Board shall consider:

(A) The corporate governance structure of the mutual holding company;

(B) The ability of members to vote on any future mutual-to-stock conversion of the acquiring mutual holding company;

(C) The supervisory condition of the mutual savings association that would be acquired; and

(D) The burden and cost associated with obtaining the members' approval.

(3) *Mutual holding companies.*

(i) A mutual holding company that is not a subsidiary holding company may not acquire control of another mutual holding company, including a subsidiary holding company, by merging with or into such company, unless the necessary approvals are obtained from the Board, including approval pursuant to 12 CFR 238.11.

(ii) The approval of the members of one or both of the mutual holding companies shall also be obtained if the Board advises the mutual holding companies in writing that such approval will be required. In determining whether the members' approval will be required, the Board shall consider:

(A) The corporate governance structure of the mutual holding company;

(B) The ability of members to vote on any future mutual-to-stock conversion of the resulting mutual holding company;

(C) The supervisory condition of the acquiree mutual holding company; and

(D) The burden and cost associated with obtaining the members' approval.

* * * * *

■ 12. Amend § 239.8 by:

■ a. Removing in paragraph (a) the text ''§§ 238.53(c) or 238.54(b) of this chapter'' and adding in its place the text ''12 CFR 238.53(c) or 238.54(b)'';

■ b. Revising paragraph (c)(1)(i);

■ c. Removing in paragraph (c)(1)(iii) the word ''or'';

■ d. Revising paragraph (c)(1)(iv);

■ e. Adding paragraph (c)(1)(v);

■ f. Revising paragraphs (c)(2), (d)(2)(iv), and (d)(4)(iii);

■ g. Deleting paragraph (d)(4)(v);

■ h. Redesignating paragraphs (d)(4)(vi) through (d)(4)(ix) as (d)(4)(v) through (d)(4)(viii); and

■ i. Removing in paragraph (f) the text ''parts 207, 228, and 238 of this chapter'' and adding in its place the text ''12 CFR Parts 207, 228, and 238''.

The revisions and addition read as follows:

§ 239.8 Operating restrictions.

* * * * *

(c) * * *

(1) * * *

(i) Is in compliance with the requirements set forth in § 239.63(c)–(d) as if the share issuance had been a conversion;

* * * * *

(iv) Is purchased in the open market by a tax-qualified or non-tax-qualified employee stock benefit plan of the savings association (or of a subsidiary holding company) in an amount reasonable and appropriate to fund such plan; or

(v) Is conducted under circumstances consistent with the circumstances indicated in the subsidiary holding company's Stock Issuance Plan related to a proposed purchase of shares within one year of the date of issuance of the shares.

(2) No mutual holding company may purchase shares of its subsidiary savings association or subsidiary holding company within one year after a stock issuance, except if the purchase is conducted under circumstances consistent with the circumstances indicated in the subsidiary holding company's Stock Issuance Plan related to a proposed purchase of shares within one year of the date of issuance of the shares complies with § 239.63. For purposes of this section, the reference in § 239.63 to five percent refers to minority shareholders.

(d) * * *

(2) * * *

(iv) An affirmation that all mutual members of the mutual holding company received at some prior time disclosure containing a detailed description of dividend waivers by the mutual holding company and the reasons the board of directors waives the mutual holding company's right to receive dividends declared by a subsidiary of the mutual holding company.

* * * * *

(4) * * *

(iii) Within the ten years prior to the declaration date of the dividend by the subsidiary of the mutual holding company, the mutual members of the mutual holding company have approved the waiver of dividends by the mutual holding company by a majority of votes cast during a member vote. Any proxy statement used in connection with the member vote must contain—

(A) A detailed description of the proposed waiver of dividends by the mutual holding company and the reasons the board of directors requested the waiver of dividends; and

(B) The disclosure of any mutual holding company director's ownership of stock in the subsidiary declaring dividends and any actions the mutual holding company and board of directors have taken to eliminate the conflict of interest, such as the directors waiving their right to receive dividends;

* * * * *

■ 13. Amend § 239.9 by:

■ a. Revising paragraphs (b)(2) and (b)(3); and

■ b. Deleting paragraph (c).

The revisions read as follows:

§ 239.9 Conversion or liquidation of mutual holding companies.

* * * * *

(b) * * *

(2) Except as provided in paragraph (b)(3) of this section, the net proceeds of any liquidation of any mutual holding company shall be transferred to the members of the mutual holding company, in accordance with the charter of the mutual holding company, and, if applicable, the stock holders of the subsidiary holding company in accordance with the charter of the subsidiary holding company.

(3) If the FDIC incurs a loss as a result of the default of any subsidiary savings association of a mutual holding company and that mutual holding company is liquidated pursuant to paragraph (b)(1) of this section, the FDIC shall succeed to the membership interests of the members of the mutual holding company to the extent of the FDIC's loss.

■ 14. Amend § 239.10 by:

■ a. Removing in paragraph (b) the text ''§ 238.14 of this chapter'' wherever it appears and adding in its place the text ''12 CFR 238.14'';

■ b. Removing in paragraph (c)(2) the text ''§ 238.14 of this chapter'' and adding in its place the text ''12 CFR 238.14'';

■ c. Revising paragraph (c)(3);

■ d. Removing in paragraph (e) the text ''§ 238.14 of this chapter'' and adding in its place the text ''12 CFR 238.14'';

■ e. Removing in paragraph (e) the text ''§§ 238.14(f) and (g) of this chapter'' and adding in its place the text ''12 CFR 238.14(f) and (g)'';

■ f. Removing in paragraph (f) the text ''§ 238.14(b) of this chapter'' and adding in its place the text ''12 CFR 238.14(b)''; and

■ g. Removing in paragraph (f) the text ''§ 238.14 of this chapter'' and adding in its place the text ''12 CFR 238.14''.

The revision reads as follows:

§ 239.10 Procedural requirements.

* * * * *

(c) * * *

(3) *Public notice, public comment, and meetings.* Mutual holding company reorganizations are subject to applicable public notice, public comment, and meeting requirements under the Home Owners' Loan Act regulations at 12 CFR 238.11 and 12 CFR 238.14.

* * * * *

■ 15. Amend § 239.11 by revising paragraph (c) to read as follows:

§ 239.11 Subsidiary holding companies.

* * * * *

(c) *Charters and bylaws for subsidiary holding companies.* The charter and bylaws of a subsidiary holding company may be in the form set forth in Appendices B and D, respectively. A subsidiary holding company may be chartered by the Board or by any state, as defined by 12 CFR 238.2(nn).

■ 16. Amend § 239.12 by revising paragraph (b)(5), the introductory text of paragraph (b)(6), and the introductory text of paragraph (b)(7) to read as follows:

§ 239.12 Communication between members of a mutual holding company.

* * * * *

(b) * * *

(5) The reply shall provide either—

(i) The number of the mutual holding company's members and the estimated reasonable cost to the mutual holding company of sending to them the proposed communication; or

(ii) Notification that the mutual holding company has determined not to send the communication because it is ''improper'', as defined in paragraph (c) of this section;

(6) After receiving the amount of the estimated costs of sending and sufficient copies of the communication, the mutual holding company shall send the communication to all members, either—

* * * * *

(7) If the mutual holding company refuses to send the proposed communication, it shall return the requesting member's materials together with a written statement of the specific reasons for refusal, and shall simultaneously send to the appropriate Reserve Bank a copy of each of the requesting member's materials, the mutual holding company's written statement, and any other relevant material. The materials shall be sent within:

* * * * *

■ 17. Amend § 239.13 by revising paragraphs (a) and (b) to read as follows:

§ 239.13 Charters.

(a) *Charters.* The charter of a mutual holding company may be in the form set forth in appendix A of this part and may be amended pursuant to this paragraph.

(b) *Corporate title.* The corporate title of each mutual holding company shall include the term ''mutual'' or the abbreviation ''MHC'' or ''M.H.C.''

* * * * *

■ 18. Amend § 239.14 by:

■ a. Removing in paragraph (a)(2)(i) the text ''§ 238.14 of this chapter'' and adding in its place the text ''12 CFR 238.14''; and

■ b. Revising the introductory text of paragraph (b) and paragraph (b)(2).

The revisions read as follows:

§ 239.14 Charter amendments.

* * * * *

(b) *Approval.* Any charter amendment filed pursuant to paragraph (a)(2)(ii) of this section shall automatically be approved 30 days from the date of filing of such amendment with the appropriate Reserve Bank, provided that the mutual holding company follows the requirements of its charter in adopting such amendment, unless the Reserve Bank or the Board notifies the mutual holding company prior to the expiration of such 30-day period that such amendment is rejected or is deemed to be filed under the provisions of paragraph (a)(2)(i) of this section. Notwithstanding anything in paragraph (a) of this section to the contrary, the following charter amendments shall be effective and deemed approved at the time of adoption, if adopted without change and filed with Board, within 30 days after adoption, provided the mutual holding company follows the requirements of its charter in adopting such amendments.

* * * * *

(2) *Maximum number of votes.* A mutual holding company may amend the Capital Stock section of its charter by substituting the maximum number of votes per member to any number from 1 to 1000.

* * * * *

■ 19. Amend § 239.15 by:

■ a. Revising paragraph (b)(3);

■ b. Removing in paragraph (c)(ii) the text ''§ 238.14 of this chapter'' and adding in its place the text ''12 CFR 238.14''; and

■ c. Removing in paragraph (c)(iii) the sentence ''The Board may amend the model bylaws provided in appendix C to this part.''

The revision reads as follows:

§ 239.15 Bylaws.

* * * * *

(b) * * *

(3) *Notice of meeting of members.* Notice specifying the date, time, and place of the annual or any special meeting and adequately describing any business to be conducted shall be published for two successive weeks immediately prior to the week in which such meeting shall convene in a newspaper of general circulation in the city or county in which the principal place of business of the subsidiary savings association is located, or shall be sent to each of the members of record at least 15 days and not more than 45 days prior to the date on which such meeting shall convene. A similar notice shall be posted in a conspicuous place in each of the offices of the subsidiary savings association during the 14 days immediately preceding the date on which such meeting shall convene. The bylaws may permit a member to waive in writing any right to receive personal delivery of the notice. When any meeting is adjourned for 30 days or more, notice of the adjournment and reconvening of the meeting shall be given as in the case of the original meeting.

* * * * *

■ 20. Amend § 239.16 by revising paragraphs (a)(2) and (b) to read as follows:

§ 239.16 Voluntary dissolution.

(a) * * *

(2) Dissolution in a manner proposed by the directors that appropriately takes into account the impact of the proposed dissolution on the mutual holding company's members and other relevant parties.

(b) The plan, and a statement of reasons for proposing dissolution and for proposing the plan, shall be submitted to the appropriate Reserve Bank for approval. The Board will approve the plan if the Board believes dissolution is appropriate under the circumstances, taking into account the impact of the proposed dissolution on the mutual holding company's members and other relevant parties. If the Board considers the plan inappropriate, the Board may either make recommendations to the mutual holding company concerning the plan or disapprove it. When the plan is approved by the mutual holding company's board of directors and by the Board, it shall be submitted to the mutual holding company's members at a duly called meeting and, when approved by a majority of votes cast at that meeting, shall become effective. After dissolution in accordance with the plan, a certificate evidencing dissolution, supported by such evidence as the Board may require, shall immediately be filed with the Board. When the Board receives such evidence satisfactory to the Board, it will terminate the corporate existence of the dissolved mutual holding company and the mutual holding company's charter shall thereby be canceled.

Subpart C—Subsidiary Holding Companies

■ 21. Amend § 239.21 by:

■ a. Revising paragraph (a); and

■ b. Removing in paragraph (b)(2) the text ''§ 12 CFR 238.12(a)(7) of this chapter'' and adding in its place the text ''12 CFR 238.12(a)(6)''.

The revision reads as follows:

§ 239.21 Charters.

(a) *Charters.* The charter of a subsidiary holding company of a mutual holding company may be in the form set forth in appendix B of this part and may be amended pursuant to § 239.22.

* * * * *

■ 22. Amend § 239.22 by:
■ a. Revising the introductory text of paragraph (a) and paragraph (a)(2)(i);
■ b. Removing in paragraph (a)(2)(ii) the word ''mailed'' and adding in its place the word ''sent'';
■ c. Revising the introductory text of paragraph (b);
■ d. Removing in paragraph (b)(2) the text ''in section 2 of its charter'';
■ e. Removing in paragraph (b)(3) the text ''Section 5 of'';
■ f. Removing in paragraph (b)(4) the text ''by revising Section 5'' and the number ''5'' wherever it appears;
■ g. Revising paragraph (b)(5); and
■ h. Removing in paragraph (b)(6) the text ''Section 5'' and adding in its place the text ''the section on Capital Stock'';
■ i. Removing in paragraph (b)(8) the text ''section 8'' wherever it appears and adding in its place the text ''section'';
■ j. Removing in paragraph (b)(8) the text ''Section 8'' wherever it appears and adding in its place the text ''Section''; and
■ k. Revising paragraphs (c) and (d).

The revisions appear as follows:

§ 239.22 Charter amendments.

(a) *General.* In order to adopt a charter amendment, a subsidiary holding company that is chartered by the Board must comply with the following requirements:

* * * * *

(2) * * *

(i) *Application requirement.* If the proposed charter amendment would render more difficult or discourage a merger, tender offer, proxy contest, the assumption of control by a holder of a block of the subsidiary holding company's stock, or the removal of incumbent management, or would involve a significant issue of law or policy, the subsidiary holding company shall file the proposed amendment with and shall obtain the prior approval of the Board according to the procedures in 12 CFR 238.14; and

* * * * *

(b) *Approval.* Any charter amendment filed by a Board-chartered subsidiary holding company pursuant to paragraph (a)(2)(ii) of this section shall automatically be approved 30 days from the date of filing of such amendment, provided that the subsidiary holding company follows the requirements of its charter in adopting such amendment, unless the Board notifies the mutual holding company prior to the expiration of such 30-day period that such amendment is rejected or is deemed to be filed under the provisions of paragraph (a)(2)(i) of this section. In addition, the following charter amendments, including the adoption of the charter as set forth in appendix B of this part, shall be approved at the time of adoption, if adopted without change and filed with the Board within 30 days after adoption, provided the Board-chartered subsidiary holding company follows the requirements of its charter in adopting such amendments.

* * * * *

(5) *Limitations on subsequent issuances.* A subsidiary holding company may amend its charter to require shareholder approval of the issuance or reservation of common stock or securities convertible into common stock under circumstances which would require shareholder approval under the rules of the stock exchange on which its shares were listed.

* * * * *

(c) *Anti-takeover provisions.* The Board may grant approval to a charter amendment not listed in paragraph (b) of this section regarding the acquisition by any person or persons of its equity securities provided that the Board-chartered subsidiary holding company shall file as part of its application for approval an opinion, acceptable to the Board, of counsel independent from the subsidiary holding company that the proposed charter provision would be permitted to be adopted by a corporation chartered by the state in which the principal office of the subsidiary holding company is located. Any such provision must be consistent with applicable statutes, regulations, and Board policies. Further, any such provision that would have the effect of rendering more difficult a change in control of the Board-chartered subsidiary holding company and would require for any corporate action (other than the removal of directors) the affirmative vote of a larger percentage of shareholders than is required by this part, shall not be effective unless adopted by a percentage of shareholder vote at least equal to the highest percentage that would be required to take any action under such provision.

(d) *Reissuance of charter.* A Board-chartered subsidiary holding company that has amended its charter may apply to have its charter, including the amendments, reissued by the Board. Such requests for reissuance should be filed with the appropriate Reserve Bank, and contain signatures required by the charter in appendix B to this part, together with such supporting documents as needed to demonstrate that the amendments were properly adopted.

■ 23. Amend § 239.23 by removing in paragraph (b)(1)(ii) the text ''§ 12 CFR 238.14 of this chapter'' and add in its place the text ''12 CFR 238.14''.
■ 24. Amend § 239.24 by:
■ a. Revising the introductory text of paragraph (a) and paragraphs (a)(4) and (a)(7);
■ b. Deleting paragraph (a)(9); and
■ c. Revising paragraphs (c)(6)(i) and (c)(8).

The revisions read as follows:

§ 239.24 Issuances of stock by subsidiary holding companies of mutual holding companies.

(a) *Requirements.* No subsidiary holding company of a mutual holding company may issue stock to persons other than its mutual holding company parent in connection with a mutual holding company reorganization, or at any time subsequent to the subsidiary holding company's acquisition by the mutual holding company, unless the subsidiary holding company obtains advance approval of each such issuance from the Board. Approval of a mutual holding company reorganization filed pursuant to § 239.3(a) shall be deemed to constitute approval of any stock issuance specifically applied for pursuant to this section in connection with the reorganization, unless otherwise specified by the Board. The proposed issuance must meet each of the following criteria:

* * * * *

(4) The proposed price or price range of the stock to be issued is reasonable. The Board shall review the reasonableness of the proposed price or price range, if applicable. To the extent the proposed issuance is solely to a stock benefit plan, employee stock ownership plan, stock option plan, or management recognition plan, the Board will review the reasonableness of the terms of such plan.

* * * * *

(7) The Board will review the Stock Issuance Plan and the compliance record of the subsidiary holding company and its subsidiary savings association under the regulations applicable to those entities to determine how the stock issuance would affect the convenience and needs of its communities.

(i) Based on this review, the Board may approve the application, deny the application, or approve the application

on the condition that the subsidiary holding company will improve the Community Reinvestment Act (CRA) performance of its subsidiary savings association or will address the particular credit or lending needs of one of more of the communities that it serves.

(ii) The Board may deny the application if the Stock Issuance Plan does not demonstrate that the proposed stock issuance would help the subsidiary holding company meet the credit and lending needs of the communities that it serves.

* * * * *

(c) * * *

(6) * * *

(i) Comply with § 239.59 as if the stock issuance were being conducted as part of a conversion and, to the extent applicable, the form or forms specified by the Board; and

* * * * *

(8) As part of a reorganization, a reasonable amount of shares or proceeds may be contributed to a charitable organization that complies with §§ 239.64(b) to 239.64(f), provided such contribution does not result in any taxes on excess business holdings under section 4943 of the Internal Revenue Code of 1986, as amended (Internal Revenue Code) (26 U.S.C. 4943).

* * * * *

■ 25. Amend § 239.25 by:

■ a. Revising paragraphs (a)(1) through (a)(3);

■ b. Deleting paragraphs (a)(4) through (a)(7);

■ c. Adding paragraph (a)(4);

■ d. Redesignating paragraph (a)(8) as paragraph (a)(5);

■ e. Revising paragraph (a)(5);

■ f. Deleting paragraph (a)(9);

■ g. Redesignating paragraphs (a)(10) through (a)(22) as paragraphs (a)(6) through (a)(18); and

■ h. Revising paragraphs (a)(7), (a)(8), (a)(10), (a)(13), (a)(18), (b)(1), (b)(4), and (c).

The revisions and addition read as follows:

§ 239.25 Contents of Stock Issuance Plans.

(a) * * *

(1) Provide that, except with respect to a proposed issuance solely to a stock benefit plan, employee stock ownership plan, stock option plan, or management recognition plan, the stock shall be sold at a total price equal to the estimated *pro forma* market value of such stock, based upon an independent valuation;

(2) Provide that the aggregate amount of outstanding common stock of the subsidiary holding company owned or controlled by persons other than the subsidiary holding company's mutual holding company parent at the close of the proposed issuance shall be less than fifty percent of the subsidiary holding company's total outstanding common stock (although this provision may be omitted if the proposed issuance will be conducted by a subsidiary holding company that was in the stock form when acquired by its mutual holding company parent);

(3) Provide that all stock benefit plans, employee stock ownership plans, stock option plans, or management recognition plans may not, at any given time, hold in the aggregate more than either 4.9 percent of the outstanding shares of the subsidiary holding company's common stock or 4.9 percent of the subsidiary holding company's stockholders' equity;

(4) Provide that, following completion of the proposed issuance, the amount of stock authorized to be issued or acquired by all stock benefit plans, employee stock ownership plans, stock option plans, or management recognition plans may not exceed, in the aggregate, 25 percent of the outstanding shares of the subsidiary holding company's common stock or 25 percent of the subsidiary holding company's stockholders' equity.

(5)

(i) Provide that the aggregate amount of common stock that may be acquired by all insiders of the subsidiary holding company and subsidiary savings association and associates of insiders of the subsidiary holding company and subsidiary savings association, must not exceed the following percentages of common stock or stockholders' equity of the subsidiary holding company, held by persons other than the subsidiary holding company's mutual holding company parent at the close of the proposed issuance:

Institution size	Officer and director purchases (percent)
$ 50,000,000 or less	35
$ 50,000,001–100,000,000	34
$100,000,001–150,000,000	33
$150,000,001–200,000,000	32
$200,000,001–250,000,000	31
$250,000,001–300,000,000	30
$300,000,001–350,000,000	29
$350,000,001–400,000,000	28
$400,000,001–450,000,000	27
$450,000,001–500,000,000	26
Over $500,000,000	25

(ii) The percentage limitations contained in paragraph 5(i) of this section may be exceeded provided that all stock acquired by or awarded to insiders and associates of insiders in excess of those limitations is acquired in the secondary market.

(iii) In calculating the number of shares held by insiders and their associates under this provision, shares awarded but not delivered under a stock benefit plan, employee stock ownership plan, stock option plan, or management recognition plan that are attributable to such persons shall not be counted as being acquired by such persons.

* * * * *

(7) Provide that, except with respect to a proposed issuance solely to a stock benefit plan, employee stock ownership plan, stock option plan, or management recognition plan, the sales price of the shares of stock to be sold in the issuance shall be a uniform price determined in accordance with § 239.24;

(8) Provide that, if at the close of the stock issuance the subsidiary holding company has more than thirty-five shareholders of any class of stock, the subsidiary holding company shall promptly register that class of stock pursuant to the Securities Exchange Act of 1934 (15 U.S.C. 78a–78jj), and undertake not to deregister such stock for a period of three years thereafter;

* * * * *

(10) Provide that, for a period of three years following the proposed issuance, no insider of the subsidiary holding company or his or her associates shall purchase, without the prior written approval of the Board, any stock of the subsidiary holding company except from a broker or dealer registered with the U.S. Securities and Exchange Commission, except that the foregoing restriction shall not apply to:

(i) Negotiated transactions involving more than one percent of the outstanding stock in the class of stock; or

(ii) Purchases of stock made by and held by any stock benefit plan, employee stock ownership plan, stock option plan, or management recognition plan, even if such stock is attributable to insiders of the subsidiary holding company and subsidiary savings association or their associates;

* * * * *

(13) Provide that, except with respect to a proposed issuance to a stock benefit plan, employee stock ownership plan, stock option plan, or management recognition plan, the subsidiary holding company will not offer or sell any of the stock proposed to be issued to any person whose purchase would be financed by funds loaned, directly or indirectly, to the person by the subsidiary holding company;

* * * * *

(18) Provide that the subsidiary holding company may make scheduled discretionary contributions to a stock benefit plan, employee stock ownership plan, stock option plan, or management recognition plan provided such contributions do not cause the subsidiary holding company to fail to meet any of its regulatory capital requirements.

* * * * *

(b) * * *

(1) Provide that, in the event the proposed stock issuance is part of a Reorganization Plan, the stock offering may be commenced concurrently with or at any time after sending any proxy statement(s) to the members of the reorganizing association and any acquiree association. The offering may be closed before the required membership vote(s), provided the offer and sale of the stock shall be conditioned upon the approval of the Reorganization Plan and Stock Issuance Plan by the members of the reorganizing association and any acquiree association;

* * * * *

(4) Provide that, in connection with a reorganization, the subsidiary holding company may reserve shares representing up to ten percent of the proposed offering for issuance in connection with a stock benefit plan, employee stock ownership plan, stock option plan, or management recognition plan.

(c) *Applicability of provisions of § 239.63(a)(1) to minority stock issuances.* Notwithstanding § 239.24(d), § 239.63(a)(1)(ii) does not apply to minority stock issuances, because the permissible sizes of stock benefit plan, employee stock ownership plans, stock option plans, and management recognition plans are subject to the requirements set forth in paragraph (a) of this section. However, the other provisions of Section 239.63(a)(1) apply for one year after the subsidiary holding company engages in a minority stock issuance that is conducted in accordance with the purchase priorities set forth in subpart E of this part.

■ 26. Amend § 239.26 by revising paragraphs (b) and (d)(2) to read as follows:

§ 239.26 Shareholders.

* * * * *

(b) *Notice of shareholder meetings.* Written notice stating the place, day, and hour of the meeting and the purpose or purposes for which the meeting is called shall be sent not fewer than 20 nor more than 50 days before the date of the meeting, by or at the direction of the chairman of the board, the president, the secretary, or the directors, or other natural persons calling the meeting, to each shareholder of record entitled to vote at such meeting. If mailed, such notice shall be deemed to be sent when deposited in themail, addressed to the shareholder at the address appearing on the stock transfer books or records of the subsidiary holding company as of the record date prescribed in paragraph (c) of this section, with postage thereon prepaid. When any shareholders' meeting, either annual or special, is adjourned for 30 days or more, notice of the adjourned meeting shall be given as in the case of an original meeting. Notwithstanding anything in this section, however, a subsidiary holding company that is wholly owned shall not be subject to the shareholder notice requirement.

* * * * *

(d) * * *

(2) In lieu of making the shareholders list available for inspection by any shareholders as provided in paragraph (d)(1) of this section, the board of directors may perform such acts as required by paragraphs (a) and (b) of Rule 14a-7 of the General Rules and Regulations under the Securities Exchange Act of 1934 (17 CFR 240.14a-7) as may be duly requested in writing, with respect to any matter which may be properly considered at a meeting of shareholders, by any shareholder who is entitled to vote on such matter and who shall defray the reasonable expenses to be incurred by the subsidiary holding company in performance of the act or acts required.

* * * * *

■ 27. Amend § 239.27 by revising paragraph (j) to read as follows:

§ 239.27 Board of directors.

* * * * *

(j) *Presumption of assent.* A director of the subsidiary holding company who is present at a meeting of the board of directors at which action on any subsidiary holding company matter is taken shall be presumed to have assented to the action taken unless his or her dissent or abstention shall be entered in the minutes of the meeting or unless a written dissent to such action shall be filed with the individual acting as the secretary of the meeting before the adjournment thereof or shall be forwarded by electronic mail or registered mail to the secretary of the subsidiary holding company within five days after the date on which a copy of the minutes of the meeting is received. Such right to dissent shall not apply to a director who voted in favor of such action.

* * * * *

■ 28. Amend § 239.30 by revising paragraph (a) to read as follows:

§ 239.30 Annual reports; books and records.

(a) *Annual reports to stockholders.* A subsidiary holding company not wholly owned by a holding company shall, within 130 days after the end of its fiscal year, send to each of its stockholders entitled to vote at its annual meeting an annual report containing financial statements that satisfy the requirements of rule 14a-3 under the Securities Exchange Act of 1934. (17 CFR 240.14a-3). Concurrently with such transmission, a certification of such transmission signed by the chairman of the board, the president, or a vice president of the subsidiary holding company, together with a copy of the report, shall be sent by the subsidiary holding company to the appropriate Reserve Bank.

* * * * *

Subpart D—Indemnification; Employment Contracts

■ 29. Amend § 239.40 by revising paragraphs (b)(1), (c), and (d) to read as follows:

§ 239.40 Indemnification of directors, officers and employees.

* * * * *

(b) * * *

(1) Any amount for which that person becomes liable under a judgment in such action; and

* * * * *

(c) *Requirements.* Indemnification shall be made to such person under paragraph (b) of this section only if:

(1) Final judgment on the merits is in the person's favor; or

(2) In case of:

(i) Settlement,

(ii) Final judgment against the person, or

(iii) Final judgment in the person's favor, other than on the merits, if a majority of the disinterested directors of the mutual holding company determine that the person was acting in good faith within the scope of the person's employment or authority as the person could reasonably have perceived it under the circumstances and for a purpose the person could reasonably have believed under the circumstances was in the best interests of the mutual holding company or its members.

However, no indemnification shall be made unless the mutual holding company gives the Board at least 60

days' notice of its intention to make such indemnification. Such notice shall state the facts on which the action arose, the terms of any settlement, and any disposition of the action by a court. Such notice, a copy thereof, and a certified copy of the resolution containing the required determination by the board of directors shall be sent to the appropriate Reserve Bank, who shall promptly acknowledge receipt thereof. The notice period shall run from the date of such receipt. No such indemnification shall be made if the Board advises the mutual holding company in writing, within such notice period, of its objection to the indemnification.

(d) *Insurance.* A mutual holding company may obtain insurance to protect it and its directors, officers, and employees from potential losses arising from claims against any of them for alleged wrongful acts, or wrongful acts, committed in their capacity as directors, officers, or employees. However, no mutual holding company may obtain insurance which provides for payment of losses of any individual incurred as a consequence of the individual's willful or criminal misconduct.

* * * * *

■ 30. Amend § 239.41 by revising the introductory text of paragraph (b)(2) and paragraphs (b)(3), (b)(4), and (b)(6)(i) to read as follows:

§ 239.41 Employment contracts.

* * * * *

(b) * * *

(2) If the officer or employee is suspended or temporarily prohibited from participating in the conduct of the mutual holding company's affairs by a notice served under section 8 (e)(3) or (g)(1) of the Federal Deposit Insurance Act (12 U.S.C. 1818 (e)(3) and (g)(1)) the mutual holding company's obligations under the contract shall be suspended as of the date of service unless stayed by appropriate proceedings. If the charges in the notice are dismissed, the mutual holding company may in its discretion:

* * * * *

(3) If the officer or employee is removed or permanently prohibited from participating in the conduct of the mutual holding company's affairs by an order issued under section 8(e)(4) or (g)(1) of the Federal Deposit Insurance Act (12 U.S.C. 1818(e)(4) or (g)(1)), all obligations of the mutual holding company under the contract shall terminate as of the effective date of the order, but vested rights of the contracting parties shall not be affected.

(4) If the subsidiary savings association is in default (as defined in section 3(x)(1) of the Federal Deposit Insurance Act (12 U.S.C. 1813(x)(1))), all obligations under the contract shall terminate as of the date of default, but this paragraph (b) shall not affect any vested rights of the contracting parties: *Provided,* that this paragraph (b) need not be included in an employment contract if prior written approval is secured from the Board.

* * * * *

(6) * * *

(i) By the Board, at the time the Federal Deposit Insurance Corporation enters into an agreement to provide assistance to or on behalf of the subsidiary savings association under the authority contained in section 13(c) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)); or

* * * * *

Subpart E—Conversions From Mutual to Stock Form

■ 31. Amend § 239.50 by revising paragraph (b) to read as follows:

§ 239.50 Purpose and scope.

* * * * *

(b) *Prescribed forms.* A mutual holding company must use the forms prescribed under this subpart and provide such information as the Board may require under the form by regulation or otherwise. The forms required under this subpart include: Form AC (Application for Conversion) and Form PS (Proxy Statement).

* * * * *

■ 32. Amend § 239.52 by revising paragraphs (j) and (m) to read as follows:

§ 239.52 Definitions.

* * * * *

(j) *Qualifying deposit* is the total balance in an account holder's eligible savings accounts at the close of business on the eligibility or supplemental eligibility record date. The mutual holding company's plan of conversion may provide that only savings accounts with total deposit balances of $50 or more will qualify.

* * * * *

(m) *Solicitation* and *solicit* is a request for a proxy, whether or not accompanied by or included in a form of proxy; a request to execute, not execute, or revoke a proxy; or the furnishing of a form of proxy or other communication reasonably calculated to cause the members to procure, withhold, or revoke a proxy. Solicitation or solicit does not include providing a form of proxy at the unsolicited request of a member, the acts required to send communications to members, or ministerial acts performed on behalf of a person soliciting a proxy.

* * * * *

■ 33. Amend § 239.53 by:

■ a. Revising paragraph (b)(2); and

■ b. Removing in paragraph (d)(2) the text ''The mutual holding company must file its business plan as a confidential exhibit to the Form AC''.

The revision reads as follows:

§ 239.53 Prior to conversion.

* * * * *

(b) * * *

(2) The business plan must include projected financial statements that do not include returns of capital or special dividends in any part of the business plan. The business plan may include additional projections that include returns of capital, special dividends, or both.

* * * * *

■ 34. Amend § 239.54 by revising paragraphs (a) and (c)(1) to read as follows:

§ 239.54 Plan of conversion.

(a) *Adoption by the board of directors.* Prior to filing an application for conversion, the board of directors of the mutual holding company must adopt a plan of conversion that conforms to §§ 239.59 through 239.62 and 239.63(b). The board of directors must adopt the plan by at least a two-thirds vote.

* * * * *

(c) * * *

(1) *Notice.* The mutual holding company must promptly notify its members that the board of directors adopted a plan of conversion and that a copy of the plan is available for the members' inspection in the mutual holding company's home office and in each of the subsidiary savings association's branch offices. The mutual holding company must send a letter to each member or publish a notice in the local newspaper in every local community where the savings association has an office. The mutual holding company may also issue a press release. The Board may require broader publication, if necessary, to ensure adequate notice to the members.

* * * * *

■ 35. Amend § 239.55 by:

■ a. Revising paragraphs (a), (b)(1)(v), (b)(1)(vi), (c)(2), (d), (f)(1)(i), (f)(2), (g)(1)(iii), and (g)(3)(i); and

■ b. Deleting paragraph (h).

The revision reads as follows:

§ 239.55 Filing requirements.

(a) *Applications under this subpart.* Any filing with the Board required under this subpart must be filed in

accordance with 12 CFR 238.14. The Board will review any filing made under this subpart in accordance with 12 CFR 238.14.

* * * * *

(b) * * *

(1) * * *

(v) The documents and information required by Form AC.

(vi) Where indicated, written consents, signed and dated, of any accountant, attorney, investment banker, appraiser, or other professional who prepared, reviewed, passed upon, or certified any statement, report, or valuation for use.

* * * * *

(c) * * *

(2) Upon receipt of an application under this subpart, the Reserve Bank will promptly furnish notice and a copy of the application to the primary federal supervisor of any subsidiary savings association. The primary federal supervisor will have 30 calendar days from the date of the letter giving notice in which to submit its views and recommendations to the Board.

* * * * *

(d) *Confidential treatment of portions of an application for conversion.* The confidentiality of information submitted to the Board under this section and related materials shall be determined in accordance with applicable exemptions under the Freedom of Information Act (5 U.S.C. 552(b)) and the Board's Rules Regarding Availability of Information (12 CFR part 261).

* * * * *

(f) * * *

(1) * * *

(i) The mutual holding company must publish a public notice of the application for conversion in accordance with the procedures in 12 CFR 238.14. The mutual holding company must simultaneously prominently post the notice in its home office and in all of the branch offices of its subsidiary savings associations.

* * * * *

(2) *Public comments.* Commenters may submit comments on the application in accordance with the procedures in 12 CFR 238.14. A commenter must file any comments with the appropriate Reserve Bank.

* * * * *

(g) * * *

(1) * * *

(iii) The conversion will not result in a taxable reorganization under the Internal Revenue Code.

* * * * *

(3) * * *

(i) Based on this review, the Board may approve the application, deny the application, or approve the application on the condition that the resulting stock holding company will improve the CRA performance of its subsidiary savings association or will address the particular credit or lending needs of the communities that it will serve.

* * * * *

■ 36. Amend § 239.56 by redesignating paragraphs (c)(2) and (c)(3) as paragraphs (c)(1) and (c)(2).

■ 37. Amend § 239.57 by:

■ a. Revising paragraph (b)(8);

■ b. Removing the word ''mail'' wherever it appears and adding in its place the word ''send'';

■ c. Removing the word ''mailing'' wherever it appears and adding in its place the word ''sending'';

■ d. Removing in paragraph (f)(2) the text ''or otherwise furnish''; and

■ e. Revising paragraph (f)(3).

The revisions read as follows:

§ 239.57 Proxy solicitation.

* * * * *

(b) * * *

(8) A way for the member to specify by ballot whether the member whether he or she approves or disapproves of each matter that members will vote upon.

* * * * *

(f) * * *

(3) The mutual holding company must send proxy solicitation material to the designated members promptly after the member furnishes the materials and, if mail is to be used, any envelopes (or other containers) or postage (or payment for postage), to the mutual holding company.

* * * * *

■ 38. Amend § 239.58 by:

■ a. Removing in paragraph (a)(1) the text ''and Form OC. The mutual holding company may obtain Form OC from the Reserve Bank and the Board's website (*http://www.federalreserve.gov*)'';

■ b. Removing in paragraph (a)(3) the text ''Form OC'' and adding in its place the text ''offering circular'';

■ c. Removing in paragraph (b)(1) the word ''mails'' and adding in its place the word ''sends''; and

■ d. Revising paragraph (c)(2).

The revision read as follows:

§ 239.58 Offering circular.

* * * * *

(c) * * *

(2) After the U.S. Securities and Exchange Commission declares the post-effective amendment effective, the mutual holding company must immediately send the amendment to each person who subscribed for or ordered shares in the offering.

* * * * *

■ 39. Amend § 239.59 by:

■ a. Removing in paragraph (b)(1) the text ''Securities and Exchange Commission'' and adding in its place the text ''U.S. Securities and Exchange Commission'';

■ b. Deleting paragraphs (c)(2) through (c)(5);

■ c. Redesignating paragraph (c)(6) as paragraph (c)(2);

■ d. Removing in paragraph (d)(5) the text ''and Form OF. The mutual holding company may obtain Form OF from the Reserve Bank and from the Board's website (*www.federalreserve.gov*)'';

■ e. Removing in paragraph (e)(3)(ii) the text ''of the'';

■ f. Revising paragraphs (f)(1), (f)(2), (h)(2), and (i);

■ g. Deleting paragraph (m)(2);

■ h. Redesignating paragraphs (m)(3) and (m)(4) as paragraphs (m)(2) and (m)(3);

■ i. Revising paragraph (m)(3); and

■ j. Adding paragraph (q).

The revisions and addition read as follows:

§ 239.59 Offers and sales of stock.

* * * * *

(f) * * *

(1) A subscriber may purchase conversion shares with cash, by a withdrawal from a savings account, or by a withdrawal from a certificate of deposit. If a subscriber purchases conversion shares by a withdrawal from a certificate of deposit, the mutual holding company or its subsidiary savings association may not assess a penalty for the withdrawal.

(2) The mutual holding company may not extend credit to any person, other than a tax-qualified employee stock benefit plan of the mutual holding company or its subsidiary, to purchase the conversion shares, subject to all other regulatory requirements.

* * * * *

(h) * * *

(2) The mutual holding company must give subscription rights to purchase shares to each supplemental eligible account holder in the same amount as described in paragraph (h)(1) of this section, except that the mutual holding company must use the following fraction instead of the fraction described in paragraph (h)(1)(iii) of this section: the numerator is the total qualifying deposit of the supplemental eligible account holder, and the denominator is the total qualifying deposits of all supplemental eligible account holders.

(i) *Officers, directors, and their associates as eligible account holders.* The officers, directors, and their associates of the mutual holding

company and subsidiary savings association may be eligible account holders. However, if an officer, director, or an associate of an officer or director receives subscription rights based on increased deposits in the year before the eligibility record date, the mutual holding company must subordinate subscription rights for these deposits to subscription rights exercised by other eligible account holders.

* * * * *

(m) * * *

(3) The mutual holding company may include stock contributed to a charitable organization in the conversion in the calculation of the total offering of conversion shares under paragraph (m)(1) of this section, unless the Board objects on supervisory grounds.

* * * * *

(q) *Securities Registration Requirements.*

(1) Notwithstanding the requirements contained in paragraphs (d), (h), and (j) of this section, a mutual holding company that does not meet the standards to register its shares on a national or regional securities exchange need not offer and register its shares in a state, as defined in 12 CFR 238.2(nn), in which less than 5 percent of eligible account holders, supplemental eligible account holders, and other voting members eligible to purchase conversion shares reside. Nothing contained in this paragraph shall limit a mutual holding company from registering its shares in any state where less than 5 percent of eligible account holders, supplemental eligible account holders, and other voting members reside.

(2) Only a mutual holding company that does not meet the standards to register shares on a national or regional securities exchange may qualify for the treatment in paragraph (p)(1) of this section.

■ 40. Amend § 239.62 by revising paragraph (b)(1) to read as follows:

§ 239.62 Liquidation accounts.

* * * * *

(b) * * *

(1) * * *

(i) The resulting stock holding company determines the initial sub-account balance for a savings account held by an eligible account holder, for a savings account not held by the eligible account holder on the supplemental eligibility record date, by multiplying the initial balance of the liquidation account by the following fraction: The numerator is the qualifying deposit in the savings account expressed in dollars on the eligibility record date, and the denominator is the calculation in paragraph (b)(1)(iv) of this section.

(ii) The resulting stock holding company determines the initial sub-account balance for a savings account held by a supplemental eligible account holder, for a savings account not held by the supplemental eligible account holder on the eligibility record date, by multiplying the initial balance of the liquidation account by the following fraction: The numerator is the qualifying deposit in the savings account expressed in dollars on the supplemental eligibility record date, and the denominator is the calculation in paragraph (b)(1)(iv) of this section.

(iii) For a savings account held on both the eligibility record date and the supplemental eligibility record date, the amount of the qualifying deposits for purposes of calculating the initial liquidation sub-account is the higher account balance of the savings account on either the eligibility record date or the supplemental eligibility record date. The resulting stock holding company determines the initial sub-account balance for a savings account held on both the eligibility record date and the supplemental eligibility record date, by multiplying the initial balance of the liquidation account by the following fraction: The numerator is the higher amount of the qualifying deposit in the savings account on either the eligibility record date or the supplemental eligibility record date, expressed in dollars, and the denominator is the calculation in paragraph (b)(1)(iv) of this section.

(iv) The denominator for calculating the initial liquidation sub-account balance of each eligible and supplemental eligible account holder is the sum of the numerator calculations in paragraphs (b)(1)(i), (b)(1)(ii), and (b)(1)(iii) of this section.

(v) If an account holder holds a savings account on the eligibility record date and a separate savings account on the supplemental eligibility record date, the resulting stock holding company must compute separate sub-accounts for the qualifying deposits in the savings account on each record date.

* * * * *

■ 41. Amend § 239.63 by:

■ a. Revising the introductory text of paragraph (a) and paragraphs (a)(1), (a)(2), and (b)(1);

■ b. Removing in paragraph (b)(4) the text ''Securities and Exchange Commission'' and adding in its place the text ''U.S. Securities and Exchange Commission'';

■ c. Revising the introductory text of paragraph (c)(1) and paragraph (c)(1)(ii);

■ d. Removing in paragraph (c)(1)(iv) the text ''tax qualified'' and adding in its place the text ''tax-qualified'';

■ e. Adding paragraph (c)(1)(v);

■ f. Removing in the introductory text of paragraph (c)(3) the text ''.'' and adding in its place the text '':'';

■ g. Revising the introductory text of paragraph (d)(1) and paragraphs (f)(2), (f)(3)(iii), and (f)(3)(v);

■ h. Removing in paragraph (g)(1) the text '', as amended''; and

■ i. Revising paragraph (g)(3).

The revisions read as follows:

§ 239.63 Post-conversion.

(a) *Stock benefit plans, employee stock ownership plans, stock option plans, and management recognition plans.*

(1) During the 12 months after the conversion, the resulting stock holding company may implement a stock benefit plan, employee stock ownership plan, stock option plan, or management recognition plan, provided the resulting stock holding company meets all of the following requirements:

(i) The resulting stock holding company discloses the plans in the proxy statement and offering circular.

(ii) The aggregate holdings of any stock benefit plan, employee stock ownership plan, stock option plan, and management recognition plan do not exceed more than fifteen percent of the number of shares that the resulting stock holding company issued in the conversion.

(iii) No individual receives more than 25 percent of the shares or options under any plan.

(iv) The resulting stock holding company does not grant stock options at less than the market price at the time of grant.

(v) The resulting stock holding company does not fund the option plan or management recognition plan at the time of the conversion.

(vi) The plan does not begin to vest earlier than one year after the conversion and does not vest at a rate exceeding 20 percent per year.

(vii) The plan permits accelerated vesting only for disability or death, or if the resulting stock holding company undergoes a change of control.

(viii) The plan provides that the executive officers or directors must exercise or forfeit their options in the event the institution becomes critically undercapitalized under the applicable regulatory capital requirements, is subject to Board enforcement action, or receives a capital directive under § 263.83 of this chapter.

(2) The resulting stock holding company may provide dividend

equivalent rights or dividend adjustment rights to allow for stock splits or other adjustments to the stock in the stock benefit plan, employee stock ownership plan, stock option plan, or management recognition plan.

* * * * *

(b) * * *

(1) Directors and officers who purchase conversion shares may not sell the shares for one year after the date of purchase, except that, in the event of the death of the officer or director, the successor in interest may sell the shares.

* * * * *

(c) * * *

(1) The resulting stock holding company may not repurchase its shares in the first year after the conversion except under one of the following circumstances:

* * * * *

(ii) The resulting stock holding company may repurchase qualifying shares of a director or conduct a repurchase with the approval of the Board pursuant to an offer made to all shareholders of the stock holding company.

* * * * *

(v) The resulting stock holding company may repurchase its shares if such purchase would be consistent with the company's strategy for deploying conversion proceeds under the business plan filed with the application to convert to stock form and where that submitted business plan included projections to repurchase such stock.

* * * * *

(d) * * *

(1) To repurchase stock in the first year following conversion, other than repurchases under paragraphs (c)(1)(iii), (c)(1)(iv), or (c)(1)(v) of this section, the resulting stock holding company must file a written notice with the appropriate Reserve Bank. The resulting stock holding company must provide the following information:

* * * * *

(f) * * *

(2) A person acquires beneficial ownership of more than ten percent of a class of shares when he or she holds any combination of the stock or revocable or irrevocable proxies under circumstances that give rise to a conclusive control determination or rebuttable control determination under subpart C of 12 CFR 238. The Board will presume that a person has acquired shares if the acquiror entered into a binding written agreement for the transfer of shares. For purposes of this section, an offer is made when it is communicated. An offer does not include non-binding expressions of understanding or letters of intent regarding the terms of a potential acquisition.

* * * * *

(3) * * *

(iii) A corporation whose ownership is, or will be, substantially the same as the ownership of the resulting stock holding company may acquire or offer to acquire more than ten percent of the common stock, if it makes the offer or acquisition more than one year after the resulting stock holding company converts.

* * * * *

(v) An acquiror does not have to file a separate application to obtain Board approval under paragraph (f)(1) of this section, if the acquiror files an application under 12 CFR part 238 that specifically addresses the criteria listed under paragraph (f)(4) of this section and the resulting stock holding company does not oppose the proposed acquisition.

* * * * *

(g) * * *

(3) Use best efforts to list the shares on a national or regional securities exchange or on the National Association of Securities Dealers Automated Quotation system.

* * * * *

■ 42. Amend § 239.64 by:

■ a. Removing in paragraph (c) the text ''second step stock'';

■ b. Removing in paragraph (d) the text ''§ 238.62 of this chapter'' and adding in its place the text ''12 CFR 238.2'';

■ c. Revising the introductory text of paragraph (e) and paragraphs (e)(3) and (e)(4); and

■ d. Removing in paragraph (f)(1)(ii)(C) the text ''The mutual holding company may obtain Form AC from the appropriate Reserve Bank and the Board's website at *http://www.federalreserve.gov*.''

The revisions read as follows:

§ 239.64 Contributions to charitable organizations.

* * * * *

(e) *Charitable organization requirements.* The charter (or trust agreement) of a charitable organization formed by a mutual holding company converting to stock form and gift instrument must provide that:

* * * * *

(3) For at least five years after its organization, one seat on the charitable organization's board of directors (or board of trustees) is reserved for an independent director (or trustee) from the local community. This director may not be an officer, director, or employee of the mutual holding company or resulting stock holding company, or an officer, director, or employee of an affiliate of the mutual holding company or resulting stock holding company, and should have experience with local community charitable organizations and grant making; and

(4) For at least five years after its organization, one seat on the charitable organization's board of directors (or board of trustees) is reserved for a director from the board of directors or the board of directors of an acquiror or resulting institution in the event of a merger or acquisition of the mutual holding company or resulting stock holding company.

* * * * *

■ 43. Amend § 239.65 by:

■ a. Removing in paragraph (g)(4)(i) the text ''Thrift Financial Report'' and adding in its place the text ''relevant regulatory financial reports''; and

■ b. Revising paragraph (g)(7)(ii).

The revision reads as follows:

§ 239.65 Voluntary supervisory conversions.

* * * * *

(g) * * *

(7) * * *

(ii) Any required Home Owners' Loan Act application or Change in Bank Control Act of 1978 (12 U.S.C. 1817(j)) notice under 12 CFR part 238.

* * * * *

■ 44. Amend § 239.66 by removing in paragraph (b)(1) the text ''.'' and adding in its place the text '':''.

Appendix A to Part 239—Mutual Holding Company Model Charter

■ 45. Amend Appendix A by:

■ a. Revising section 4; and

■ b. Removing the text ''for calendar year 1989'' wherever it appears.

The revision reads as follows:

Appendix A to Part 239—Mutual Holding Company Model Charter

Federal Mutual Holding Company Charter

* * * * *

Section 4: Capital. The Mutual Holding Company shall have no capital stock. However, the Mutual Holding Company shall have the authority to issue mutual capital certificates, consistent with the Home Owners' Loan Act and all applicable state and federal law.

* * * * *

Appendix C to Part 239—Mutual Holding Company Model Bylaws

■ 46. Amend Appendix C by:

■ a. Removing in paragraph 3 the text ''mailed postage prepaid'' and adding in its place the word ''sent'';

■ b. Removing in paragraph 3 the text ''at the last address appearing on the

books of the mutual holding company''; and

■ c. Removing in paragraph 6 the text ''(Board)'' and adding in its place the text ''(''Board'')''.

Appendix D to Part 239—Subsidiary Holding Company of a Mutual Holding Company Model Bylaws

■ 47. Amend Appendix D by:

■ a. Removing in section 5 of article II the word ''delivered'' wherever it appears and adding in its place the word ''sent'';

■ b. Removing in section 5 of article II the text ''either personally or by mail,'';

■ c. Deleting section 4 of article III;

■ d. Redesignating section 5 of article III through section 14 of article III as section 4 of article III through section 13 of article III;

■ e. Deleting in section 5 of article III the text ''by telegram'' and adding in its place the text ''through electronic mail'';

■ f. Deleting in section 5 of article III the text ''when delivered to the telegraph company if sent by telegram,'';

■ g. Removing in section 12 of article III the text ''by registered mail'' and adding in its place the text ''by electronic mail or registered mail''; and

■ h. Deleting in section 1 of article IV the text ''Article IV'' and adding in its place the text ''article IV''.

By order of the Board of Governors of the Federal Reserve System.

Benjamin W. McDonough,

Secretary of the Board.

[FR Doc. 2026–15774 Filed 8–3–26; 8:45 am]

BILLING CODE 6201–01–P

FEDERAL REGISTER

Vol. 91 Tuesday,

No. 148 August 4, 2026

Part III

Federal Reserve System

12 Parts 215 and 225

Loans to Executive Officers, Directors, and Principal Shareholders of Member Banks; Bank Holding Companies; Proposed Rule

FEDERAL RESERVE SYSTEM

12 CFR Parts 215 and 225

[Regulations O and Y; Docket No. R–1896]

RIN 7100–AH27

Loans to Executive Officers, Directors, and Principal Shareholders of Member Banks; Bank Holding Companies

AGENCY: Board of Governors of the Federal Reserve System (Board).

ACTION: Notice of proposed rulemaking with request for public comment.

SUMMARY: The Board is inviting public comment on proposed amendments to Regulation O, which governs loans by member banks to their insiders and insiders of their affiliates. The proposed amendments would update and modernize the regulation, increase transparency by clarifying requirements and incorporating existing interpretations, and promote efficiency by reducing regulatory burden. The proposed amendments also would incorporate existing statutory requirements that are not currently reflected in the regulation. Moreover, the proposed amendments would update several outdated dollar-based thresholds in Regulation O and index these thresholds going forward. In addition, the proposed amendments would address the application of Regulation O to member banks that lend to companies that are presumed to be controlled by large asset management companies through passive investment funds. Finally, the proposed amendments would revise and reorganize the regulation to streamline the text and make it more accessible.

DATES: Comments must be submitted on or before October 5, 2026.

ADDRESSES: You may submit comments, identified by Docket No. R–1896 and RIN 7100–AH27, by any of the following methods:

- *Agency Website: https://www.federalreserve.gov/apps/proposals/.* Follow the instructions for submitting comments, including attachments. *Preferred Method.*
- *Mail:* Benjamin W. McDonough, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.
- *Hand Delivery/Courier:* Same as mailing address.
- *Other Means: publiccomments@frb.gov.* You must include the docket number in the subject line of the message.

Comments received are subject to public disclosure. In general, comments received will be made available on the Board's website at *https://www.federalreserve.gov/apps/proposals/* without change and will not be modified to remove personal or business information including confidential, contact, or other identifying information. Comments should not include any information such as confidential information that would not be appropriate for public disclosure. Public comments may also be viewed electronically or in person in Room M–4365A, 2001 C St. NW, Washington, DC 20551, between 9 a.m. and 5 p.m. during Federal business weekdays.

FOR FURTHER INFORMATION CONTACT: Jay Schwarz, Deputy Associate General Counsel, (202) 452–2970, Daniel Hickman, Senior Counsel, (202) 973–7432, Jasmin Keskinen, Counsel, (202) 853–7872, Legal Division; or Anna Lee Hewko, Associate Director, (202) 250–1577, Missaka Nuwan Warusawitharana, Manager, (202) 452–3461, Helen Xu, Manager, (202) 452–2555, Lesley Chao, Lead Financial Institution Policy Analyst, (202) 974–7063, Li Gu, Senior Economist, (202) 912–4655, Division of Supervision and Regulation; Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

12 CFR Part 215

I. Background

Section 22(h) of the Federal Reserve Act restricts the amount and terms of extensions of credit from a member bank to its executive officers, directors, and principal shareholders and to any company or any political or campaign committee controlled by these individuals or entities (collectively, insiders).[1] Section 22(g) of the Federal Reserve Act imposes additional limitations on extensions of credit made by member banks to their executive officers.[2] An ''extension of credit'' includes, among other things, the making or renewing of any loan, granting a line of credit, or entering into any similar transaction.[3]

[1] 12 U.S.C. 375b.

[2] 12 U.S.C. 375a.

[3] 12 U.S.C. 375b(9)(D)(i)(I); 12 CFR 215.3.

The Board's Regulation O[4] implements sections 22(g) and 22(h)[5] and requires, among other things, that:

- Extensions of credit to an insider be on substantially the same terms that the member bank would offer to a person not affiliated with the bank, not present more than normal risk to the bank, and be made based on underwriting standards that are not less stringent than those used for a person not affiliated with the bank;[6]
- A member bank's board of directors approve certain large extensions of credit to insiders;[7]
- The amount of all extensions of credit from a member bank to any one insider and the amount of extensions of credit to all insiders remain below a percentage of the bank's unimpaired capital and unimpaired surplus;[8] and
- Member banks maintain records to document compliance with all of these restrictions and make certain disclosures concerning extensions of credit subject to the rule.[9]

The statute and Regulation O also prohibit an insider from knowingly receiving an extension of credit that does not comply with the requirements of Regulation O.[10]

Sections 22(g) and 22(h), and Regulation O, apply to all banks that are members of the Federal Reserve System.[11] Other federal law subjects federally insured state non-member banks and insured savings associations to sections 22(g) and 22(h) in the same manner and to the same extent as if they were member banks.[12] Accordingly, these insured depository institutions generally are subject to Regulation O, as enforced by their appropriate Federal banking agency. For ease of reference in this **SUPPLEMENTARY INFORMATION**, the term bank is used to refer to all insured depository institutions subject to the rule.

II. Overview of Proposed Rule

Sections 22(g) and 22(h), and Regulation O, have been longstanding features of the banking regulatory framework.[13] These statutory provisions and the regulation are designed to protect banks against potential harm from the conflicts of interest of, and self-dealing by, insiders who are in a position to put their personal or business self-interest ahead of the interests of the banks.[14] Over the years, these statutory provisions and the regulation have been significantly revised and interpreted. This has increased the complexity of complying with the regulation. In addition, the passage of time and structural changes in the market have resulted in the need to update regulatory thresholds and modernize the framework consistent with the purpose of protecting banks against potential harm from self-dealing by insiders.

The Board previously stated that it would periodically review Regulation O and adopt any modifications to the regulation that are shown by experience to be necessary or appropriate to carry out the intent of Congress in this area or to prevent evasions of the statute.[15] The Board conducted a comprehensive review, including feedback received through Economic Growth and Regulatory Paperwork Reduction Act (EGRPRA) public notices and public outreach meetings.[16] This proposal (the proposed rule) includes several revisions that are responsive to that feedback, including proposals to update, modernize, increase the transparency of, and reduce unnecessary burden of the rule. The proposed rule would incorporate statutory revisions addressing insider transactions, provide greater clarity with respect to the application of certain requirements, incorporate certain longstanding interpretations,[17] and harmonize Regulation O with other regulations. In addition, the proposed rule would increase outdated dollar-based thresholds to account for economic growth and inflation and other market developments, as well as index these thresholds to economic growth going forward. The proposed rule also would improve the ability of banks to make extensions of credit to certain publicly traded companies (portfolio companies) in which companies that sponsor, advise, and manage investment funds (fund complexes) have accumulated significant holdings.[18] Finally, the proposed rule includes several technical amendments to Regulation O, including a reorganization to make it more user-friendly.

The Board has consulted with the Office of the Comptroller of the Currency (OCC) and the Federal Deposit Insurance Corporation (FDIC) (together with the Board, the Federal banking agencies) on the proposed rule.

In view of the extensive proposed changes and reorganization, the Board is restating Regulation O in its entirety as amended, rather than proposing revised regulation text only for the portions of Regulation O that would change.[19] The details of each proposed amendment are described below. The Board invites comments on all aspects of the proposed rule.

---

[4] 12 CFR part 215.

[5] The Board may prescribe such rules and regulations, including definitions of terms, as it determines to be necessary to effectuate the purposes and prevent evasions of sections 22(g) and 22(h). *See* 12 U.S.C. 375a(8) and 375b(10).

[6] 12 U.S.C. 375b(2)(A); 12 CFR 215.4(a). Section 22(h) and Regulation O also prohibit banks from paying overdrafts to executive officers and directors unless certain exceptions apply. 12 U.S.C. 375b(6); 12 CFR 215.4(e). The overdraft prohibition does not apply to principal shareholders, unless the principal shareholder is also an executive officer or director. The prohibition also does not apply to the related interests of an executive officer or director. The exceptions to the prohibition include an exception for inadvertent overdrafts, as defined in Regulation O. *See* 12 CFR 215.4(e).

[7] 12 U.S.C. 375b(3); 12 CFR 215.4(b).

[8] *See* 12 U.S.C. 375b(4)–(5); 12 CFR 215.4(c)–(d). The individual lending limit is based on the lending limits applicable to national banks in 12 U.S.C. 84 and is therefore 15 percent of the bank's unimpaired capital and unimpaired surplus in the case of loans that are not fully secured and an additional 10 percent of the bank's unimpaired capital and unimpaired surplus in the case of loans that are fully secured. 12 U.S.C. 375b(4); 12 CFR 215.2(i). In calculating this limit, all of the bank's loans to the insider and the insiders' related interests are aggregated. In general, the aggregate lending limit is 100 percent of the bank's unimpaired capital and unimpaired surplus. 12 U.S.C. 375b(5)(A); 12 CFR 215.4(d).

[9] 12 CFR 215.8–.10.

[10] 12 U.S.C. 375b(7); 12 CFR 215.6.

[11] 12 U.S.C. 375b(1) (''No member bank may . . .''); *id.* 375a (same); *see also* 12 CFR 215.4–.5.

[12] 12 U.S.C. 1828(j) (insured non-member banks); 12 U.S.C. 1468(b) (insured savings associations); 12 CFR 337.3 (insured state non-member banks and state savings associations); 12 CFR 31.2 (insured national banks and federal savings associations). *See also* 12 CFR 215.12 (insured savings associations).

[13] Congress adopted section 22(g) as part of the Banking Act of 1933. 48 Stat. 162, 182 (June 16, 1933); 21 FRB No. 12, 854 (Dec. 1935). Congress adopted section 22(h) as part of the Financial Institutions Regulatory and Interest Rate Control Act of 1978 (FIRA). Public Law 95–630, 92 Stat. 3641; 44 FR 12959, 12962 (Mar. 9, 1979).

[14] *See* Insider Lending Restrictions, J. Virgil Mattingly, 3 Ann. Rev. Banking L. 21, 26–28 (1984) (noting that section 22(h) was based on concerns about insufficient protections against self-dealing by bank insiders and providing discussion of the impetus behind the legislation and citations to relevant Congressional record).

[15] 44 FR 12959, 12963 (Mar. 9, 1979).

[16] Public Law 104–208, Div. A, Title II, section 2222, 110 Stat. 3009–414, (1996) (codified at 12 U.S.C. 3311). *See also* Regulatory Publication and Review Under the Economic Growth and Regulatory Paperwork Reduction Act of 1996, 89 FR 62679 (Aug. 1, 2024).

[17] Existing interpretations not incorporated into the regulation would continue to apply, unless they are inconsistent with the proposed rule.

[18] For purposes of the proposed rule, investment fund means an investment company registered under the Investment Company Act of 1940, such as mutual funds and exchange traded funds, as well as collective investment trusts, separately managed institutional accounts and other pooled investment vehicles.

[19] The proposed rule will result in a fairly significant renumbering and reordering of Regulation O sections and citations. The Regulation O citations used throughout this **SUPPLEMENTARY INFORMATION** are to the existing text of Regulation O.

III. Proposed Revisions To Modernize Regulation O

A. Updating Dollar-Based Thresholds in Regulation O

The Board last adjusted certain dollar-based thresholds in Regulation O in 1994, while apparently choosing not to adjust others.[20] The proposed rule would increase the dollar-based thresholds in Regulation O to adjust for economic growth and inflation since 1994 and provide a methodology for indexing these thresholds going forward.[21] In addition, the proposed rule would clarify that certain extensions of credit should be aggregated when determining whether a given threshold is met and would simplify the applicable thresholds.

1. One-Time Adjustment to Dollar-Based Thresholds

The proposed rule would increase the dollar-based limits in Regulation O. Specifically, the proposed rule would increase the limit:

- For the amount of certain credit card debt that is exempt from the definition of ''extension of credit,'' from $15,000 to $60,000.[22]
- For the amount of indebtedness arising from certain interest-bearing overdraft credit plans that are exempt from the definition of ''extension of credit,'' from $5,000 to $20,000.[23]
- For the inadvertent overdraft exception from the prohibition against paying an overdraft to an executive officer or director, from $1,000 to $4,000.[24]
- For the ''other purpose'' exception from the special prohibitions applicable to extensions of credit to an executive officer, from $100,000 to $400,000.[25]
- For the size of an extension of credit to an insider that requires prior approval by a bank's board of directors, from $500,000 to $2 million.[26]

These dollar-based thresholds in Regulation O have become obsolete, particularly in light of inflation and economic growth since the Board last revised them. The proposed increases reflect inflation and economic growth since 1994. As such, these updates would restore the thresholds to their originally intended level of stringency and would reduce unnecessary regulatory burden. Raising these thresholds is particularly important for community banks because the outdated limits may pose particular hardship in smaller communities and rural markets. In these communities, bank directors typically are active business persons whose businesses have credit requirements. Choosing to join a bank board can impose meaningful frictions in their access to credit, while simultaneously depriving the bank of creditworthy local customers. In addition, in these communities, a bank's insiders have fewer alternative credit sources, making it more likely that they will need to obtain credit from a direct local competitor of the bank.

To determine the new thresholds, Board staff adjusted the existing thresholds based on changes in seasonally adjusted U.S. nominal gross domestic product (nominal GDP), as calculated quarterly by the U.S. Bureau of Economic Analysis.[27] The Board adjusted each threshold using nominal GDP from the fourth quarter of 1994 to the fourth quarter of 2025. The fourth quarter of 1994 is used as the start date because 1994 is the most recent year in which the Board considered adjusting any of the thresholds.[28] The Board chose not to adjust several of the thresholds in 1994. This uniform start date is used for updating all the thresholds in order to maintain the relative relationship increase across the thresholds. To simplify compliance with the thresholds, as adjusted for nominal GDP, the proposed thresholds are rounded down to simple whole numbers that are multiples of the existing thresholds.

Threshold	Value in 1994	Proposed value
Credit card exception	$15,000	$60,000
Overdrafts with credit plan exception	5,000	20,000
Inadvertent overdrafts exception	1,000	4,000
Extensions of credit to executive officers not subject to another exception	100,000	400,000

[20] 59 FR 8831, 8835–36 (Feb. 24, 1994) (updating credit card threshold but declining to update an overdraft threshold and the ''other purpose'' exception for lending to executive officers).

[21] In response to the EGRPRA comment solicitation, commenters requested the Board update the outdated dollar-based thresholds in Regulation O.

[22] To qualify for the exemption, the indebtedness must arise from an arrangement whereby the member bank (i) acquires charge or time credit accounts, or (ii) makes payments to or on behalf of participants in a bank credit card plan, check credit plan, or similar open-end credit plan, provided that (A) the indebtedness does not involve prior individual clearance or approval by the bank other than for the purposes of determining authority to participate in the arrangement and compliance with any dollar limit under the arrangement; and (B) the indebtedness is incurred under terms that are not more favorable than those offered to the general public. 12 CFR 215.3(b)(5). The Board last revised this limit in 1994. 59 FR 8831, 8835 (Feb. 24, 1994).

[23] To qualify for the exemption, the indebtedness must arise by reason of a written, preauthorized, interest-bearing overdraft extension of credit plan that specifies a method of repayment or a written, preauthorized transfer of funds from another account of the account holder at the bank. 12 CFR 215.3(b)(6). The Board last revised this limit in 1979. 44 FR 12959, 12960, 12965–66 (Mar. 9, 1979). The Board chose not to revise this limit in 1994 when it revised the threshold for credit card debt. 59 FR 8831, 8835 (Feb. 24, 1994).

[24] Regulation O generally prohibits a member bank from paying an overdraft on the account of an executive officer or director. 12 CFR 215.4(e)(1). However, the prohibition does not apply to payment of inadvertent overdrafts on an account in an aggregate amount of $1,000 or less, provided that (i) the account is not overdrawn for more than 5 business days; and (ii) the member bank charges the executive officer or director the same fee charged any other customer of the bank in similar circumstances. 12 CFR 215.4(e)(2). The Board last revised this limit in 1979. 44 FR 12959, 12960, 12965–66 (Mar. 9, 1979).

[25] Regulation O generally prohibits a member bank from extending credit to any of its executive officers. 12 CFR 215.5(a). The Board last revised this limit in 1983. 48 FR 42804 (Sept. 20, 1983). The Board chose not to revise this limit in 1994 when it revised the threshold for credit card debt. 59 FR 8831, 8836 (Feb. 24, 1994). This limit is set by the Board, FDIC, and OCC separately for their supervised institutions. 12 U.S.C. 375a(4). One exception to this prohibition is for extensions of credit that do not qualify for another exception, if the aggregate amount of extensions of credit to the executive officer does not exceed the higher of 2.5 percent of the bank's unimpaired capital and unimpaired surplus or $25,000, but in no event more than $100,000. 12 CFR 215.5(c)(4). Extensions of credit not subject to this prohibition nevertheless are subject to the other requirements in Regulation O.

[26] Regulation O generally requires the board of directors of a member bank to approve an extension of credit to an insider that, together with all other extensions of credit to that insider, exceeds (i) the higher of $25,000 or 5 percent of the member bank's unimpaired capital and unimpaired surplus; or (ii) $500,000. Such an extension of credit must be approved by a majority of the entire board of directors, and the interested party must abstain from participating directly or indirectly in the voting. 12 CFR 215.4(b)(2). The Board last revised this limit in 1983. 48 FR 42804 (Sept. 20, 1983). This limit is set by the Board, FDIC, and OCC separately for their supervised institutions. 12 U.S.C. 375b(3). The proposed rule would also increase the identical threshold used for related public disclosure requirements in section 12 CFR 215.9(b) of Regulation O, from $500,000 to $2 million, pursuant to the authorization to issue reporting and disclosure related rules and regulations. 12 U.S.C. 1817(k). This limit is set by the Board, FDIC, and OCC separately for their supervised institutions. *Id.*

[27] U.S. Bureau of Economic Analysis, account code: A191RC, Gross Domestic Product [GDP], retrieved from FRED, Federal Reserve Bank of St. Louis; *https://fred.stlouisfed.org/series/GDP,* May 1, 2026.

[28] *See* 59 FR 8831, 8835 (Feb. 24, 1994) (updating credit card threshold but declining to update other thresholds).

Threshold	Value in 1994	Proposed value
Prior approval by board of directors	500,000	2,000,000
Public disclosure requirement	500,000	2,000,000

Question 1: What are the advantages and disadvantages of using a nominal GDP deflator calculation to adjust the dollar-based thresholds? What are the advantages and disadvantages of using an alternative methodology or source of data, such as using a deflator based on the Consumer Price Index published by the U.S. Bureau of Labor Statistics (CPI)? If available, provide data and proposed alternative methodology.

Question 2: What are the advantages and disadvantages of alternative approaches, such as not using absolute dollar thresholds and instead relying solely on thresholds set by a percentage of the bank's unimpaired capital and unimpaired surplus? What would be an appropriate percent to use for each threshold and why?

Question 3: To what extent should the Board consider easing certain requirements or increasing the thresholds even further for certain well capitalized and well managed community banks? If so, which requirements or thresholds should be revised and why?

Question 4: Would a date other than 1994 be appropriate as the baseline for indexing the thresholds? For example, the Board last revised the thresholds for loans to executive officers not otherwise specifically authorized under section 22(g) and to insiders requiring prior approval by the board of directors under section 22(h) in 1983. If so, what date would be more appropriate and why?

2. Periodic Indexing of Dollar-Based Thresholds by Nominal GDP

As discussed above, without periodic adjustments, dollar-based thresholds become obsolete and undermine the purpose of Regulation O by restricting more extensions of credit than Congress intended in light of inflation and real economic growth. To limit the need for future adjustments through rulemaking, the proposal would adopt a mechanism to automatically adjust the dollar-based thresholds periodically going forward.

Specifically, under the proposal, the Board would adjust the dollar-based thresholds of Regulation O every five years to reflect real economic growth and inflation. Notice of the new thresholds would be published in the **Federal Register**. The five-year time period was chosen to balance the compliance burden of firms implementing new thresholds against the potential for misalignment with the thresholds' objective over time. The periodic adjustment would be based on five years of cumulative growth of nominal GDP. Indexing under this approach would help ensure that changes in the dollar-based thresholds are reflective of inflation and the size of the U.S. economy. The proposed mechanism would not adjust the thresholds if the five-year cumulative growth of nominal GDP is negative. This approach would reduce the potential for procyclicality during a prolonged period of economic contraction.

To ensure an accurate and predictable measure of gross domestic product, the Board generally would use the most current estimate of nominal GDP for a given calendar year published by the Bureau of Economic Analysis on or before September 30 of the year of the publication of the scalar.[29] At the end of every consecutive five-year period, the Board would calculate the value for the GDP growth adjustment scalar as a ratio of the nominal GDP estimate for the calendar year preceding the year in which the scalar is published, divided by the nominal GDP for the calendar year preceding the effective date of any final rule for which estimates are available. For example, if the Board were to adopt a final rule with an effective date of 2027 for the updated dollar-based thresholds described above, the Board would calculate and publish the GDP growth adjustment scalar in 2032 by dividing the nominal GDP at end of calendar year 2031 by the nominal GDP at end of the calendar year 2026.[30] The Board would calculate and publish a GDP growth adjustment scalar, along with updated dollar-based thresholds, every five years. Additionally, thresholds adjusted under the proposed indexing methodology would be rounded based on the size of the threshold (*e.g.,* millions, thousands), generally, to the nearest two significant digits.[31]

The Board would expect the initial scalar to be 1 and to publish that in connection with the final rule.

Question 5: What are the advantages and disadvantages of indexing the dollar-based thresholds based on nominal GDP? What alternative approaches, for example indexing the dollar-based thresholds based on CPI, should the Board consider, and why?

Question 6: What are the advantages and disadvantages of the proposed approach to indexing the dollar-based thresholds so that they do not change to reflect a period of negative average nominal GDP growth? Under what circumstances, if any, should the update to a dollar-based threshold reflect negative average nominal GDP growth, and why?

Question 7: What, if any, operational challenges are associated with the proposed approach? What adjustments could the Board make to the proposed approach to address such challenges?

Question 8: What is the appropriate frequency for updating the dollar amounts (for example updated every 5 years)?

Question 9: What alternative rounding methodology, if any, should the Board adopt for the proposed ongoing adjustments to the dollar-based thresholds? For example, what would be the advantages or disadvantages of rounding different-sized thresholds in different ways (such as rounding thresholds in the millions to the nearest two significant digits and rounding thresholds in the thousands to the nearest significant digit)?

3. Clarification To Apply Certain Limits on an Aggregate Basis

Regulation O contains limited exceptions from the definition of ''extension of credit'' for certain charge or time credit accounts, credit card plans, check credit plans, or similar open-ended plans, and overdrafts up to a specified amount. Consistent with a longstanding interpretation, the proposed rule would clarify that the dollar-based limit for each exception applies to the aggregate of all such extensions of credit to the same insider.[32] For example, the proposed

[29] *See* Bureau of Economic Analysis, A191RC, Gross Domestic Product [GDP], retrieved from FRED, Federal Reserve Bank of St. Louis; *https://fred.stlouisfed.org/series/GDP.* The Board may elect to use a comparable value in instances such as where a nominal U.S. GDP growth estimate from the Bureau of Economic Analysis is unavailable.

[30] The proposal would include a definition of the GDP growth adjustment, which sets forth the way in which the adjustment would be calculated.

[31] For example, a threshold that otherwise would be calculated as $5.964 million would be rounded to $6.0 million, or the nearest $0.1 million.

[32] 12 CFR 215.3(b)(5)–(6). When it adopted these thresholds, the Board stated that they were meant to limit the aggregate amount of each category of extension of credit in the threshold. *See* 44 FR 12959, 12960, 12965–66 (Mar. 9, 1979).

rule would make explicit that, when determining whether extensions of credit arising by reason of an interest-bearing overdraft credit plan are excepted from the definition of ''extension of credit,'' a bank must aggregate all outstanding balances owed by an insider and compare that aggregate number to the dollar-based limit. The proposed rule would make the same change to the inadvertent overdraft exemption from the prohibition on paying overdrafts in section 215.4(e)(2) of Regulation O.

4. Streamlining Limits on Loans to Executive Officers and Prior Approval by Bank Boards of Directors for Certain Large Loans

The exception from section 215.5 for an extension of credit to an executive officer for purposes other than a home mortgage or a child's education is currently subject to three different limits.[33] To streamline the procedure for calculating the applicable limit, the proposed rule would condense the overlapping thresholds. The revised provision would allow for extensions of credit to executive officers for purposes other than a home mortgage or a child's education up to the lesser of 2.5 percent of the bank's unimpaired capital and unimpaired surplus or $400,000.[34]

Similarly, the requirement that a bank's board of directors provide prior approval for an extension of credit to an insider is currently subject to three different thresholds.[35] The proposed rule would consolidate and streamline the thresholds and require prior approval if an extension of credit, when aggregated with all extensions of credit to an insider, exceeds the lesser of 5 percent of the bank's unimpaired capital and unimpaired surplus, or $2,000,000.[36] These revisions to streamline the applicable thresholds will make the requirements of Regulation O easier to understand and administer.

B. Rebuttable Presumptions of Control

Section 22(h) and Regulation O restrict the amount and terms of extensions of credit from a bank to companies controlled by an executive officer, director, or principal shareholder of the bank (related interests).[37] The term ''control'' is defined in section 22(h) as directly or indirectly, or acting through or in concert with one or more persons: (i) owning, controlling, or having the power to vote 25 percent or more of any class of voting securities of the company or bank; (ii) controlling in any manner the election of a majority of the directors of the company or bank; or (iii) having the power to exercise a controlling influence over the management or policies of the company or bank.[38] Section 22(h) also defines a principal shareholder of a bank as ''any person that directly or indirectly, or acting through or in concert with one or more persons, owns, controls, or has the power to vote more than 10 percent of any class of voting securities of a member bank.'' [39] In addition, Regulation O presumes that a person is a related interest of a principal shareholder if the principal shareholder directly or indirectly owns, controls, or has the power to vote more than 10 percent of any class of voting securities of the company and no other person owns, controls, or has the power to vote a greater percentage of that class of voting securities (presumption of control).[40]

1. Exemption From Presumption of Control for Portfolio Companies of Fund Complexes That Meet Certain Criteria

Because of the increasing popularity of passive investing through index funds, fund complexes have acquired, or have approached acquiring, more than 10 percent of a class of voting securities of a wide range of public companies, including bank and non-bank companies. Upon acquiring more than 10 percent of a class of voting securities of a banking organization, a fund complex becomes a ''principal shareholder'' of the bank (principal shareholder fund complex).[41] This is not a presumption; it is a statutory definition. In addition, under Regulation O, any portfolio company in which a principal shareholder owns more than 10 percent of a class of voting securities would be presumed to be a ''related interest'' of the principal shareholder if the principal shareholder is the largest shareholder of the company because it would trigger the presumption of control.[42] In that event, the portfolio companies presumed to be controlled by the principal shareholder would be considered related interests of the principal shareholder of the bank under Regulation O. Accordingly, the bank's lending to such portfolio companies of the principal shareholder would be subject to the lending limits and other restrictions and standards of Regulation O.

As detailed below, it is highly unlikely that Congress foresaw or intended for section 22(h) to apply to extensions of credit to portfolio companies of passive fund complexes or the heavy compliance burden that this would create based on the presumption of control in Regulation O, which is not in the statute.[43] The relationship between the portfolio companies of passive fund complexes and a bank for which the passive fund complex is a principal shareholder generally does not give rise to the type of conflict of interest and self-dealing issues that section 22(h) and Regulation O were designed to address because the portfolio companies of these fund complexes have been accumulated largely as passive investments and the fund complexes are not actively engaged in the management of their portfolio companies. This stands in contrast to most related interests captured by Regulation O, which normally are closely held companies over which a principal shareholder of a bank exerts significant influence. If portfolio companies held by these fund complexes are deemed to be a bank's insiders, the bank would be required to develop extensive monitoring and recordkeeping systems to ensure that any extensions of credit to these portfolio companies comply with Regulation O, including adherence to applicable approvals and lending limits.

[33] Section 215.5(c)(4) of Regulation O states that exception ''* * * does not exceed at any one time the higher of 2.5 percent of the bank's unimpaired capital and unimpaired surplus or $25,000, but in no event more than $100,000.''

[34] The limit would be $400,000 rather than $100,000 because the proposed rule would raise the $100,000 threshold to $400,000, as discussed in section III.A.1 of this **SUPPLEMENTARY INFORMATION**.

[35] Section 215.4(b) of Regulation O states that prior approval is required if the aggregate extensions of credit to an insider ''exceed the higher of $25,000 or 5 percent of the member bank's unimpaired capital and unimpaired surplus [and] in no event may a member bank extend credit to any insider [that] exceeds $500,000 [without prior approval.]''

[36] The limit would be $2,000,000 rather than $500,000 because the proposed rule would raise the $500,000 threshold to $2,000,000, as discussed in section III.A.1 of this **SUPPLEMENTARY INFORMATION**. Conforming edits are being proposed to the related public disclosure requirements in section 12 CFR 215.9(b) of Regulation O.

[37] 12 CFR 215.2(n). Related interest also covers any political or campaign committee that is controlled by that person or the funds or services of which will benefit that person.

[41] 12 U.S.C. 375b(9)(F); 12 CFR 215.2(m). In the case of a fund complex, the shares of a bank held by different investment funds in the same group generally are treated as shares controlled by the fund complex. *See* Letter from Scott G. Alvarez, Board General Counsel, to Robert L. Tortoriello, Esq. (Sept. 29, 2006).

[42] 12 CFR 215.2(c)(2)(ii).

[43] In response to the EGRPRA comment solicitation, commenters highlighted this issue and recommended the Board carve out certain portfolio companies of passive investment funds from the rebuttable presumption of control in Regulation O.

Index funds make investment decisions to buy and sell shares of companies on behalf of investors to closely mirror the risk and return characteristics of underlying third-party indices. These index-based funds, unlike actively managed funds, are less likely to seek to influence the lending decisions of banks for which they are principal shareholders to make preferential extensions of credit to their other portfolio companies.[44] For this reason, the proposed rule would provide the exception only to fund complexes that overall exhibit passive investment qualities—that is, those fund complexes that hold investments primarily through investment funds with an investment objective of replicating the risk and return characteristics of a third-party index (passive fund complex).

In addition, the proposed rule would reduce unnecessary compliance burden. Passive fund complexes hold a wide array of portfolio companies at any given point in time and their ownership interests can fluctuate daily based on market dynamics. Banks often rely heavily on insiders to self-identify their related interests, particularly when a principal shareholder has a vast network of related interests.[45] Banks and fund complexes may be forced to rely on publicly available information to determine levels of third-party ownership in publicly traded companies.[46] Since this information may not be timely or complete, it can be particularly problematic for a bank to determine who is a related interest of a passive fund complex when applying the presumptions of control to portfolio companies, particularly the presumption of control based on whether the passive fund complex owner is the largest shareholder. As such, many banking organizations could be operating with an incomplete or outdated list of insiders. When a passive fund complex that is a principal shareholder of a bank has numerous related interests, establishing a framework that captures all of the related interests could take considerable time and effort. The proposed revision would mitigate the regulatory burden arising from this asymmetry of information by reducing the number of potential portfolio companies captured as related interests of principal shareholder fund complexes.

In December 2019, the federal banking agencies issued a joint statement acknowledging this issue and providing temporary relief to allow banks to continue to lend to portfolio companies presumed to be controlled by certain fund complexes while the Board considered whether to amend Regulation O.[47] Since then the Federal banking agencies have extended that temporary relief to allow additional time for regulatory changes addressing the underlying issue.[48]

The proposed rule would not apply the presumption of control in Regulation O to the portfolio companies of fund complexes if the fund complex meets certain requirements designed to ensure that the relationship between the fund complex and the bank is sufficiently passive (qualifying fund complex). The proposed rule would look to the status of the relationship between the fund complex and the bank to determine whether the portfolio companies of the fund complex should be presumed to be related interests of a principal shareholder fund complex for purposes of Regulation O. The Board has authority to define the scope of the presumption of control in Regulation O and is proposing to exempt the portfolio companies of qualifying fund complexes from the presumption of control. While the ability to qualify for the status of a qualifying fund complex is based on the relationship between the bank and the fund complex, the Board is only altering the presumption of control with respect to the relationship between the fund complex and its portfolio companies. This focus on the relationship between the fund complex and the bank is consistent with the purpose of Section 22(h), which is concerned with potential influence on bank lending decisions. The Board is not able to alter the threshold for when a fund complex is considered an insider of a bank because the definition of principal shareholder is statutory. Nevertheless, focus on the fund complex's ability to control the bank as a basis for the relief would allow Regulation O to discourage the principal shareholder fund complex from improperly influencing the bank's lending for the benefit of the principal shareholder's other portfolio companies. In particular, under the proposed rule, the presumption of control would not apply to determine whether a portfolio company is a related interest of a fund complex that is a principal shareholder of a bank if:

(1) The fund complex is not (and is not affiliated with) a depository institution or holding company supervised and regulated by the Board, FDIC, or OCC (regulated company);

(2) No individual investment fund in the fund complex owns or controls more than 10 percent of any class of voting securities of a regulated company;

(3) Investment funds in the fund complex that are not index funds[49] do not in the aggregate own or control more than 10 percent of any class of voting securities of a regulated company; and

(4) The fund complex does not meet any of the conditions that would give rise to a rebuttable presumption of control under the Board's Regulation Y control rule[50] with respect to a regulated company.

The effect of this proposed exception for qualifying fund complexes would be to permit lending relationships between banks and portfolio companies held by qualifying fund complexes to continue free from the limitations in Regulation O, because portfolio companies held by qualifying fund complexes would no longer be captured by the presumption of control. Pursuant to section 22(h) and

[44] Index funds typically include prospectus and investment objectives stating that the fund does not seek to acquire control over management decisions of companies held by the fund.

[45] For example, Regulation O permits a member bank to meet some of its recordkeeping requirements by issuing an annual survey to insiders to identify extensions of credit to the insider, including its related interests; or to rely on borrowers to identify themselves as insiders of the bank when receiving an extension of credit from the bank. *See* 12 CFR 215.8(c)(1)–(2).

[46] Fund complexes are subject to applicable federal securities laws which require, among other things, the public disclosure of beneficial ownership stakes under various conditions. These disclosure obligations may change based on several factors, including whether the fund complex is acquiring the securities with the purpose or effect of ''changing or influencing the control of the issuer.'' Fund complexes should consult the rules and guidance of the Securities and Exchange Commission (SEC) to determine their disclosure obligations given the facts and circumstances around whether an investor or group would be viewed as acquiring or holding the securities with the purpose or effect of changing or influencing the control of an issuer under the SEC's rules.

[47] *See* Status of Certain Investment Funds and Their Portfolio Investments for Purposes of Regulation O and Reporting Requirements under Part 363 of FDIC Regulations, SR 19–16 (Dec. 27, 2019). *See also* OCC Bulletin 2019–65 (Dec. 27, 2019); FDIC FIL 85–2019 (Dec. 27, 2019).

[48] *See* Status of Certain Investment Funds and Their Portfolio Investments for Purposes of Regulation O and Reporting Requirements under Part 363 of FDIC Regulations, SR 25–6 (Dec. 19, 2025). *See also* OCC Bulletin 2025–47 (Dec. 18, 2025); FDIC FIL–61–2025 (Dec. 18, 2025).

[49] For purposes of the proposed rule, an ''index fund'' is a fund that has an investment objective of tracking the risk and return characteristics of a previously specified third-party broad-based index by holding all, or a representative and preset sample of, the securities of the index in approximately the same proportions as their representation in the index and uses rules-based investing to track that broad-based market index in order to replicate the risk and return characteristics of the broad-based market index. A third-party broad-based market index provides investors with a performance indicator of the overall applicable securities market, is not focused on any specific industries or sectors, and is not published or managed by the investment fund, its investment advisor, or any of their respective affiliates.

[50] *See* 12 CFR 225.32.

the proposed rule, however, any portfolio company of a qualifying fund complex would continue to be a related interest of the fund complex if the complex directly, indirectly, or acting in concert owns or controls, or has the power to vote, 25 percent or more of any class of the portfolio company's voting securities; controls in any manner the election of a majority of the portfolio company's directors; or has the power to exercise a controlling influence over the management or policies of the portfolio company.[51]

If a qualifying fund complex attempts to influence the lending decisions of any bank in its portfolio in favor of its other portfolio companies, the Board could find that the portfolio company is a related interest of the fund complex because the fund complex no longer qualifies for the exemption from the presumption of control with respect to the portfolio company. All of the fund complex's portfolio companies would immediately become related interests of the fund complex and thus insiders of each bank of which the fund complex is a principal shareholder. In addition, any outstanding extensions of credit to the portfolio companies would count towards each bank's Regulation O lending limits and all future extensions of credit would be subject to all of the requirements in Regulation O. Each bank also would be required to maintain records of future extensions of credit to the portfolio companies, and the fund complex would be liable for knowingly permitting any of the portfolio companies to receive a future extension of credit from one of the banks.

This proposed exception is intended to align the proposed rule with the purpose of the insider lending restrictions and the nature of a qualifying fund complex's ownership of portfolio companies. The purpose of the insider lending restrictions is to protect banks against potential harm from self-dealing by insiders by providing safeguards aimed at mitigating the potential for conflicts of interest from individuals who may be in a position to influence a bank's lending decisions for personal advantage.[52] These concerns are not implicated when fund complexes offer investment funds that acquire ownership in a wide array of publicly traded companies (including banks) for investment purposes based primarily on tracking third-party broad-based market indices. While many fund complexes also offer actively managed funds, the popularity of index funds has been the primary source of the increasing ownership of publicly traded companies that has resulted in the application of Regulation O to these lending relationships.[53] This investment structure and market dynamic was not prevalent at the time that the statutory framework underpinning Regulation O was enacted or when the regulation was last amended. As such, the insider lending restrictions were not drafted with the purpose of governing lending relationships between banks and portfolio companies where a principal shareholder fund complex does not have an ability or intent to influence bank lending decisions for the benefit of portfolio companies.

The exception from the presumption of control for qualifying fund complexes would apply only for purposes of determining whether a qualifying fund complex controls another portfolio company. The exception would not apply for the purposes of determining whether a fund complex is a principal shareholder of a bank or whether a person controls a qualifying fund complex. Under the proposed rule, a person would continue to be presumed to control a qualifying fund complex if the person directly or indirectly owns, controls, or has the power to vote more than 10 percent of any class of voting securities of the qualified fund complex and no other person owns, controls, or has the power to vote a greater percentage of that class of voting securities.

Question 10: What are the advantages and disadvantages of using the Board's control rule for evaluating controlling influence by fund complexes over regulated companies? What would be the advantages and disadvantages of considering other specific factors, such as:

A fund complex may not, directly or indirectly, or acting in concert with one or more others:

(1) Have more than one director interlock with the regulated company (that is, one person serving as director for both the fund complex and regulated institution) or appoint more than one director of the regulated company as a representative of the fund complex;

(2) Have any officer or employee interlock with the regulated company;

(3) Propose a director or slate of directors in opposition to any nominee proposed by the management or board of directors of the regulated company;

(4) Attempt to influence the dividend policies; loan, credit, or investment decisions or policies; pricing of services; personnel decisions; operations activities (for example location of any offices or branches or hours of operation, etc.); or any similar activities or decisions of the regulated company or any of its subsidiaries;

(5) Enter into any agreement with the regulated company that substantially limits the discretion of the regulated company's management over major policies or decisions;

(6) Solicit or participate in soliciting proxies with respect to any matter presented to the shareholders of the regulated company or any of its subsidiaries; or

(7) Dispose or threaten to dispose (explicitly or implicitly) of equity interests of the regulated company or any of its subsidiaries as a condition or inducement of specific action or non-action by the regulated company or any of its subsidiaries.

Question 11: What alternative ways to address the application of Regulation O to portfolio companies of passive fund complexes should the Board consider? For example, (1) raising the presumption of control percentage threshold from 10 percent to a higher amount (for example 15, 20 or 25 percent), (2) eliminating the presumption of control (subject to certain passivity criteria such as no board representation or management agreements), or (3) adopting the control framework from Regulation Y? If available, provide data to support proposed alternative options.

Question 12: Would it be necessary and appropriate to extend the exception for a qualifying fund complex to the rebuttable presumption of control in section 215.2(c)(2)(i) of Regulation O? For example, is it possible for a qualifying fund complex to be an executive officer or director of a company or regulated company?

Question 13: Who is the appropriate party to maintain records to verify that a fund complex is a qualified fund complex? Is the principal shareholder that is a qualified fund complex the appropriate party to be responsible for asserting and supporting that it is a qualified fund complex? Should the rule require these principal shareholders to provide the supporting information to a bank in the principal shareholder's

[51] 12 U.S.C. 375b(9).

[52] *See e.g.,* House Hearing; Comm. on Banking; Sep/Oct 1977 hearings on H.R. 9086 (Part 3), at 1631, Testimony of Chairman St. Germain (noting that the provision is designed to remove the appearance of conflicts of interest and preferential treatment related to insider loans); Senate Hearing; Senate Banking Comm.; May 1977 (Part 1), Statement of George A. LeMaistre, Chairman, FDIC, at 40–41 (highlighting the issue of self-dealing by bank insiders and seeking more explicit statutory limitations to prevent banks from incurring undue risks by lending excessive amounts to insiders and related businesses).

[53] *See* section VI of this **SUPPLEMENTARY INFORMATION**.

portfolio and/or the Federal banking agencies?

Question 14: What would be the advantages or disadvantages of providing a grace period for application of the presumption of control when a principal shareholder temporarily trips the presumption of control with respect to a portfolio company due to events outside its control or that do not become known immediately? If a grace period were applied what would be an appropriate amount of time (for example 90 days)?

Question 15: Would it be necessary or appropriate to continue to require market terms for lending between banks and portfolio companies that are no longer subject to the presumption of control? For example, should the proposed rule prohibit banks from knowingly making an extension of credit to a portfolio company that would be covered by the existing presumption of control, unless the terms of such extension of credit are on substantially the same terms as those prevailing for comparable transactions with unaffiliated third parties and do not involve more than normal risk of repayment or present other unfavorable features?

2. Appropriate Federal Banking Agency Determination Regarding a Rebuttal of Presumptions of Control

The proposed rule would continue to permit insiders to rebut the presumptions of control.[54] While compliance with Regulation O is enforced by the individual Federal banking agencies, the underlying regulation is promulgated by the Board. This has caused some confusion and insiders have asked which Federal banking agency is the appropriate agency to make a determination regarding a rebuttal of a presumption. For purposes of determining a rebuttal of control, the appropriate Federal banking agency, as defined in 12 U.S.C. 1813(q), is the relevant Federal agency.[55] However, in light of the Board's statutory responsibility to issue regulations implementing sections 22(g) and (h), the other Federal banking agencies often consult with the Board when considering evidence presented in a rebuttal of a presumption of control. To facilitate coordination of the review of arguments presented to rebut presumptions and enhance consistency in interpretation of the presumptions of control, the proposed rule would note that the appropriate Federal banking agency should consult with the Board when making a determination regarding a rebuttal of a presumption of control.

This clarification is not intended to impact how the Federal banking agencies process rebuttals of a presumption of control, including any delegations of authority that the agencies may have made with respect to this provision of Regulation O. The change would note only that the party's appropriate Federal banking agency should consult with the Board. This change also would not undo any determinations regarding any rebuttals of presumptions of control in Regulation O issued prior to the finalization of the proposed rule.

Question 16: What are the advantages and disadvantages related to the clarification that the Board should be consulted regarding a rebuttal of a presumption of control?

C. Dodd-Frank Act and Updating Definition of ''Extension of Credit''

Section 614 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) amended the definition of ''extension of credit'' in section 22(h) to include ''having credit exposure to the person arising from a derivative transaction . . . , repurchase agreement, reverse repurchase agreement, securities lending transaction, or securities borrowing transaction between the [ ] bank and the person.'' [56] However, the Dodd-Frank Act did not define the term ''credit exposure'' or otherwise prescribe a methodology for the valuation of a credit exposure arising from these types of transactions. The proposed rule would set forth valuation methodologies for credit exposures arising from derivatives transactions and from securities borrowing or lending transactions, repurchase agreements, and reverse repurchase agreements (collectively, securities financing transactions). The Board invites comment on the proposed methodology for the valuation of credit exposures caused by derivatives transactions and securities financing transactions, and on possible alternatives discussed in greater detail below.

In Board staff's experience, banks and their insiders rarely engage in derivatives transactions or securities financing transactions. Nevertheless, for ease of reference, the proposed rule would set forth the valuation methodologies. The proposed rule also would eliminate paragraph (a)(1) of section 215.3 of Regulation O, which specifies that an extension of credit includes ''a purchase under repurchase agreement of securities, other assets, or obligations.'' [57] This paragraph no longer would be necessary because the proposal would set forth a new methodology for banks to value extensions of credit attributable to repurchase agreements.

The Dodd-Frank Act also amended section 23A of the Federal Reserve Act [58] so that credit exposures to an affiliate from derivatives transactions and securities financing transactions are similarly treated as extensions of credit for purposes of that section.[59] Section 22(h) and section 23A both apply to all insured depository institutions, regardless of size. Given the similarities in the amendments made by the Dodd-Frank Act to sections 22(h) and 23A, the Board is considering whether any valuation methodologies in the proposed rule for Regulation O should also be used to value those same credit exposures for purposes of section 23A and the Board's Regulation W.[60] The adoption of a methodology to value credit exposures for purposes of section 23A and Regulation W would occur in a separate rulemaking.

Question 17: What are the advantages and disadvantages of using the same methodology to value credit exposures from derivative transactions and securities financing transactions for purposes of Regulation O and Regulation W? What would be the reasons for these regulations to use different methods?

Question 18: To what extent do banks enter into derivative and securities financing transactions with their insiders or insiders of their affiliates (including the related interests of such insiders)?

1. Negative Credit Exposures

The proposed rule would value only credit exposures of a bank to its insider, and would not include credit exposures of an insider to the bank. Specifically,

[54] Regulation O permits a person to rebut a presumption by submitting to the appropriate Federal banking agency (as defined in 12 U.S.C. 1813(q)) written materials that, in the agency's judgment, demonstrate an absence of control. 12 CFR 215.2(c)(4).

[55] As discussed in section V.H. of this **SUPPLEMENTARY INFORMATION**, the proposed rule also would create a definition of ''appropriate Federal banking agency'' in the definition section.

[56] *See* Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111–203, 614, 124 Stat. 1376 (2010) (codified at 12 U.S.C. 375b(9)(D)(i)(II)).

[57] 12 CFR 215.3(a)(1).

[58] 12 U.S.C. 371c.

[59] Section 608 of the Dodd-Frank Act (codified at 12 U.S.C. 371c(b)(7)(G)). Because covered transactions under section 23A also are subject to section 23B of the Federal Reserve Act, credit exposures from derivatives and securities financing transactions also are subject to the requirements of section 23B. 12 U.S.C. 371c–1.

[60] 12 CFR part 223.

the proposed rule would not permit a credit exposure from an insider to the bank to count towards either the individual or aggregate lending limits of the bank. This would be consistent with the focus of the insider lending restrictions on credit risk to a bank from an insider, regardless of any credit risk the insider might have to the bank. For example, section 22(h) and Regulation O do not permit a bank to reduce the aggregate amount of extensions of credit to a single insider by accounting for extensions of credit made by the insider to the bank. This also would be consistent with the definition of ''extension of credit'' in section 22(h) and Regulation O, which includes an insider owing money or its equivalent to a bank; not the reverse.[61]

2. Credit Exposure From Derivative Transactions and Derivative Netting Sets

The proposed rule would allow banks to value the credit exposure arising from a derivative transaction using any method it is authorized to use under the Federal banking agencies' risk-based capital rule. Similarly, any credit exposure associated with a derivative netting set could be valued using any method a bank is permitted to use under the Federal banking agencies' risk-based capital rule. The proposed valuation methodology would leverage the significant consideration given to the valuation of derivative transactions generally for purposes of regulatory capital requirements by the Federal banking agencies, including with the benefit of public comment. This proposed methodology also would allow banks to rely on their existing systems and processes for calculating regulatory capital requirements to ensure compliance with Regulation O, minimizing cost to the banks.

The proposed rule also would permit a bank to offset any resulting credit exposure arising from a derivative or derivative netting set with the value of cash held in a segregated, earmarked deposit account with the member bank for the sole purpose of securing credit transactions between the member bank and the insider that is identified as such, and any obligations of, or fully guaranteed as to principal and interest by, the United States or its agencies, received by the bank from the insider as collateral for the derivative or derivative netting set. Limiting the types of collateral that can offset a credit exposure for derivatives to cash and U.S. obligations provides the greatest protection for a bank from credit risk it may face from a derivative with its insiders. This limitation also would be consistent with the preference in section 22(h) for cash and U.S. government obligations. Specifically, extensions of credit secured by this collateral are not subject to the individual lending limit.[62]

Consistent with section 22(h), the proposed rule would define derivative transaction to have the same meaning given in 12 U.S.C. 84(b).[63]

Question 19: What are the advantages and disadvantages of using methodologies in the Federal banking agencies' risk-based capital rules to measure credit exposures from derivative transactions and derivative netting sets? Would another methodology be more useful or accurate? For example, should the proposed rule value credit exposures at current exposure, which reflects a bank's present obligations under a derivative transaction?

Question 20: What would be the advantages and disadvantages to expanding the scope of collateral that can offset a credit exposure from a derivative transaction to include more than cash and U.S. government obligations?

Question 21: Are there other types of collateral that have sufficiently reliable value and liquidity that they should be permitted to offset a derivative exposure between a bank and an insider? For example, should a bank be able to offset an exposure for the assets that constitute ''eligible collateral'' as defined in the Board's Single Counterparty Credit Limit rule, 12 CFR 252, subparts H and Q, or ''financial collateral'' as defined in the Federal banking agencies' risk-based capital rules? Should convertible bonds that convert into publicly traded securities be included?

Question 22: Should cash that can be used to reduce a credit exposure be required to be held in a segregated earmarked deposit account at the bank? Would a bank's interest in cash that is used as collateral for a derivative transaction be sufficiently protected without these requirements or under alternate arrangements?

Question 23: What would be the benefit of limiting cash collateral that can be used to offset a credit exposure arising from a derivative transaction or securities financing transaction to certain currencies? For example, would it be beneficial to limit eligible cash collateral to U.S. dollars or a currency that matches the denomination of the asset being secured?

3. Valuation of Credit Derivative Transactions and Similar Derivative Transactions

Under the Board's Regulation W, certain credit derivatives in which a member bank provides credit protection to the nonaffiliate with respect to an obligation of an affiliate of the member bank are guarantees by the member bank on behalf of that affiliate.[64] Similarly, the proposed rule would treat certain credit derivatives as guarantees on behalf of an insider. Because of this treatment, the proposed rule would value these credit derivatives differently than other derivatives. Specifically, the proposed rule would value credit exposures arising from these derivatives at the greater of (i) the notional principal amount or (ii) the maximum potential loss to the member bank on the transaction.

The proposed rule also would include in the scope of derivatives that are treated as guarantees any equity derivative or total return swap (whether funded or unfunded) that is functionally similar to a guarantee. Equity derivative agreements under which a bank, in exchange for a fee, agrees to compensate a third-party for any depreciation in the value of the underlying equity securities issued by an insider of the bank effectively serve as a price guarantee for those underlying securities. Similarly, total return swaps can be structured to provide a similar guarantee on a funded or unfunded basis. Where the securities issued by a bank's insider(s) represent only a portion of the reference assets, the valuation would be limited to the amount of the guarantee provided by the bank with respect to the obligations of its insider(s).

The Board observes that credit derivatives in which a bank provides credit protection to an affiliate and similar equity derivatives or total return swaps (whether funded or unfunded) subject the bank to similar risk of loss as if the bank had purchased the reference asset itself. As a result, the proposed methodology would treat this synthetic asset purchase similarly to Regulation O's valuation of an asset purchase by a member bank from an affiliate by valuing the transaction at the greater of (i) the total notional exposure or (ii) the maximum potential loss to the member bank on the transaction.

[61] 12 U.S.C. 375b(9)(D)(i)(I); 12 CFR 215.3(a).

[62] 12 U.S.C. 375b(4); 12 CFR 215.4(c). The individual lending limit permits extensions of credit in amounts that are excepted from the lending limit in the National Bank Act. The National Bank Act lending limit excepts the entire amount of loans secured by certain cash and U.S. government obligations from the limit. 12 U.S.C. 84(c)(4)–(6).

[63] *See* 12 U.S.C. 375b(9)(D)(i)(II).

[64] 12 CFR 223.33(c).

Question 24: The Board invites comment on the proposed treatment of, and valuation for, equity derivatives and total return swaps. What alternative treatment for or additional clarifications should the Board consider?

4. Credit Exposure From Securities Financing Transactions

To value credit exposures from securities financing transactions, the proposed rule would seek to measure the risk of loss that a bank may face by entering into such a transaction with an insider. In general, this risk can be separated into two subcomponents. First, the risk that an insider is unable to give back to the bank what is owed, either in the form of cash or securities (credit risk). Second, where securities are involved, the risk that the value of securities fluctuates to the detriment of the bank (market risk).

To achieve this purpose, the proposed rule would allow a bank to use any methodology that it is authorized to use under the Federal banking agencies' risk-based capital rules to measure credit exposures arising from securities financing transactions. By relying on the Federal banking agencies' risk-based capital rules, this method inherently achieves the purpose of measuring a bank's credit and market risks given the sensitivity of the capital rules to these risks. This alignment also would minimize compliance burdens as banks already are familiar with the Federal banking agencies' risk-based capital rules. Further, the proposed valuation of credit exposure from securities financing transactions would be consistent with the treatment of derivatives.

This proposed approach for valuing credit exposures from a securities financing transaction may not be relevant for smaller banks that have elected to use the community bank leverage ratio framework to comply with their risk-based capital requirements. Accordingly, the proposed rule also would provide a simplified option to determine credit exposures arising from securities financing transactions. All banks would be permitted to use this simplified method, including those that have not elected to use the community bank leverage ratio framework. This simplified amount would equal the sum of cash and the fair market value of securities transferred by the bank to the insider, minus the sum of cash and the fair market value of U.S. government obligations transferred from the insider to the bank in connection with that transaction. This method has the benefit of being simpler than the amounts calculated by using the Federal banking agencies' risk-based capital rules and also provides a reasonable measure of the risk faced by a bank when entering into a securities financing transaction with an insider (that is, the dollar value of what the bank is owed less the dollar value of reliable collateral provided by the insider). This method also acknowledges the preference that Congress expressed for credit exposures collateralized by cash and U.S. government obligations.[65] Consistent with this intent, the proposed rule also would require that any cash collateral used by banks to offset its exposure to an insider be in a segregated deposit account with the bank over which the bank has a perfected security interest.

Q*uestion 25: Should the definition of* ''*securities financing transaction*'' *be revised or expanded to include any other transactions (e.g., margin loans)?*

Question 26: What would be the advantages and disadvantages of requiring all banks to use the same method to determine credit exposure from a securities financing transaction? For example, should all banks be required to determine the amount of a credit exposure from a securities financing transaction using the simplified method set forth in the proposed rule for banks that use the community bank leverage ratio framework, or should all banks be required to use the methods they are authorized to use under their applicable capital requirements?

Question 27: What would be the advantages and disadvantages of expanding or narrowing the scope of eligible collateral? For example, would it be better for eligible collateral to include all of the assets that are ''*financial collateral*'' *as defined in the Federal banking agencies' risk-based capital rules? Should convertible bonds that convert into publicly traded securities be included?*

Question 28: Are there any circumstances where securities issued by an insider or, more likely, an insider's related interest, should be permitted to qualify as eligible collateral?

Question 29: Should cash that can be used to reduce a credit exposure be required to be held in a segregated earmarked deposit account at the bank? Would a bank's interest in cash that is used as collateral for a derivative transaction be sufficiently protected without these requirements or under alternate arrangements?

Question 30: Should the proposed rule specify that securities issued by an insider (or, more likely, an insider's related interest) cannot be used to offset a credit exposure from a securities financing transaction? For example, should the proposed rule require a bank to assign a value of zero to any such securities when using the Federal banking agencies' risk-based capital rules to value the credit exposure?

D. Valuation Principles for Extensions of Credit

As discussed above, the proposed rule would include a method for determining the credit exposure of a derivative or securities financing transaction. To provide similar clarity on how banks should value other extensions of credit under Regulation O, the proposed rule would set forth valuation principles for various types of extensions of credit and purchases and sales of assets. In order to minimize compliance burdens with this change, the proposed rule would rely on the valuation principles currently in Regulation W, with which banks already are familiar.

1. Extensions of Credit Originated by a Bank

For extensions of credit, the proposed rule would set forth valuation methodologies for extensions of credit originated by a bank, purchased by a bank, and made through a bank's acquisition of a debt security of an insider. For extensions of credit originated by a bank, the proposed rule generally would value the transaction as the amount of funds provided by a bank to, or on behalf of, an insider plus any additional amounts that the bank could be required to provide to, or on behalf of the insider. Specifically, the proposed rule would value such a transaction at the greater of (i) the principal amount of the extension of credit; (ii) the amount owed by the insider to the bank under the extension of credit; or (iii) the sum of the amount provided by the bank to, or on behalf of, an insider plus any additional amount that the bank could be required to provide to, or on behalf of, the insider. Regulation W sets forth examples for using these methodologies.[66] Banks may look to these examples to help understand the

[65] Extensions of credit secured by certain cash and U.S. government obligations are not subject to the individual lending limit in section 22(h) or Regulation O. 12 U.S.C. 375b(4); 12 CFR 215.4(c). The individual lending limit permits extensions of credit in amounts that are excepted from the lending limit in the National Bank Act. The National Bank Act lending limit excepts the entire amount of loans secured by certain cash and U.S. government obligations from the limit. 12 U.S.C. 84(c)(4)–(6).

[66] 12 CFR 223.21(a)(4)(i)–(iv).

valuation methodologies in the proposed rule.

The first prong (''the principal amount of the extension of credit'') likely would determine the valuation of a transaction in which a bank purchases a zero-coupon note issued by an insider. Such an extension of credit should be valued at the amount the insider ultimately is obligated to pay to the bank, rather than the amount of funds initially advanced by the bank. For example, a bank that purchases from an insider for $50 a 10-year zero-coupon note issued by the insider with a face value of $100 would be required to value the extension of credit at $100.

The second prong (''the amount owed by the insider'') likely would determine the valuation of a transaction in which an insider fails to pay a bank when a fee is due to the bank. This second prong is not intended to include amounts not yet due to the bank, including accrued interest not yet due. This would ensure that the value of an extension of credit equals the full amount of the exposure from the bank to the insider.

The third prong (''the sum of the amount provided by the bank to, or on behalf of, an insider plus any additional amount that the bank could be required to provide to, or on behalf of, the insider'') likely will determine the value of most extensions of credit made by a bank to an insider. Under this prong, for example, a $100 term loan is a $100 extension of credit, a $300 revolving credit facility is a $300 extension of credit (regardless of the amount of the facility drawn down by the insider), and a guarantee backstopping a $500 debt issuance by an insider is a $500 extension of credit.

Question 31: How should guarantees provided by a bank to an insider when the bank acts as agent for the insider to engage in a trade with a clearinghouse be valued for purposes of Regulation O? When the trade is a derivative transaction and the bank guarantees performance of the insider on the derivative contract, what would be the advantages and disadvantages of valuing the guarantee as an extension of credit or as a derivative, in each case pursuant to the methods set forth in the proposed rule?

2. Extensions of Credit Acquired by a Bank

Banks may extend credit to insiders by acquiring an extension of credit to an insider that was made by a third-party. In these cases, the proposed rule would value the transaction as the price paid by the bank for the extension of credit plus any additional amount that the bank could be required to provide to, or on behalf of, the insider under the terms of the agreement governing the extension of credit. For example, if a bank pays a third-party $90 for a $100 term loan that the third-party made to an insider of the bank (for example, because the loan was at a fixed rate and had declined in value due to a rise in the general level of interest rates), the extension of credit amount is $90 rather than $100. This lower amount reflects the fact that the bank's maximum loss on the transaction is $90, rather than the original principal amount of the loan. By way of additional illustration, if a bank pays a third-party $70 for a $100 line of credit to an insider of which the insider had drawn $70, the amount of the extension of credit would be $100, which is the purchase price paid plus the remaining amount of the line of credit that the bank could be required to lend under the purchased credit line.

3. Extensions of Credit Through the Purchase of or Investment in a Debt Security

As discussed in section III.D.2 of this **SUPPLEMENTARY INFORMATION**, the proposed rule would include in the definition of ''extension of credit'' a bank's acquisition by purchase, discount, exchange, or otherwise of a note or other obligation, including commercial paper or other debt securities of an insider, upon which an insider is liable as maker, drawer, endorser, guarantor, or surety. For the purchase of or investment in the debt securities of an insider, the proposed rule would value this extension of credit as the greater of the bank's purchase price or the carrying value of the debt securities. Accordingly, a bank that paid no consideration in exchange for the debt securities of an insider would nevertheless be required to value the extension of credit at no less than the bank's carrying value of the securities. The carrying value of the security would be the amount at which the securities are carried on the GAAP financial statements of the bank. In addition, if the bank's carrying value of the securities increased or decreased after the bank's initial investment, the amount of the extension of credit would increase or decrease to reflect the bank's changing financial exposure to the insider. In no case could the amount of the extension of credit fall below the amount paid by the bank for the securities. Regulation W includes examples of this valuation principle, which banks may look to in order to understand the valuation principle in the proposed rule.[67]

Valuing the purchase of or investment in debt securities of an insider at the carrying value of the securities would be consistent with GAAP, which requires a bank to reflect its investment in securities issued by an insider at the carrying value throughout the life of the investment, even if the bank paid no consideration for the securities. As noted above, this approach also would be consistent with Regulation W, so banks would be able to rely on existing compliance systems to value extensions of credit for purposes of Regulation O. Lastly, this approach would be consistent with the purposes of section 22(h)—that is, limiting the financial exposure of banks to their insiders.

As noted, the proposed rule would set a floor for the value of an extension of credit resulting from the investment in or purchase of debt securities of an insider at the consideration paid by the bank for the securities. Although this approach would not be consistent with GAAP, it would ensure that the amount of the extension of credit never falls below the amount of funds actually transferred by the bank to the insider. The floor also would limit the ability of a bank to provide additional funding to an insider in circumstances where the insider approaches insolvency.

E. Other Revisions to the Definition of ''Extension of Credit''

Section 22(h) and Regulation O define ''extension of credit'' to mean the making or renewal of any loan, a granting of a line of credit, or entering into any similar transaction.[68] Regulation O also provides a non-exhaustive list of transactions that are extensions of credit, including ''[a]ny other similar transaction as a result of which a person becomes obligated to pay money (or its equivalent) to a bank, whether the obligation arises directly or indirectly, or because of an endorsement on an obligation or otherwise, or by any means whatsoever.'' [69] Over the years, the Board and Board staff have identified transactions that fall within the scope of this provision. The proposed rule would expand the non-exhaustive list of transactions that are extensions of credit to include these additional identified transactions, as described in this section.

A number of the proposed additions to the definition of extension of credit would use similar or identical language found in Regulation W. The Board would seek to interpret similar language between the proposed rule and

[67] 12 CFR 223.23(a)(2)(i).

[68] 12 U.S.C. 375b(9)(D); 12 CFR 215.3(a).

[69] 12 CFR 215.3(a).

Regulation W consistently where possible.

Question 32: What would be the advantages and disadvantages of using interpretations of language in Regulation W to interpret similar language in the proposed rule?

1. Leases That Are the Functional Equivalent of an Extension of Credit

The proposed rule would include as an extension of credit a lease that is the functional equivalent of an extension of credit. These leases involve money or its equivalent being owed to a bank, and, by definition, are substantially similar to a loan. This treatment would be a codification of an existing interpretation [70] and would be consistent with the definition of ''extension of credit'' in Regulation W.[71]

A lease that is the functional equivalent of an extension of credit also would include a full-payout net lease permissible for a national bank under 12 U.S.C. 24(Seventh) and 12 CFR part 23.[72] In most cases, a full-payout net lease results in the payment of rent and tax benefits to the lessor bank that return to the lessor bank the full initial value of the rented property plus some additional amount. This additional amount normally is comparable to an interest rate that would be charged on a traditional loan for the same property and with a maturity equal to the life of the non-operating lease.[73] This treatment also would be consistent with the Board's interpretation of ''leases that are the functional equivalent of an extension of credit'' for purposes of Regulation W.[74]

The Board would continue to assess, on a case-by-case basis, whether other leases also constitute extensions of credit. In other contexts, Board staff has noted that the following factors may contribute to a determination that a lease is an extension of credit: (1) the agreement contains a Uniform Commercial Code financing statement of the type normally filed in connection with a secured credit transaction, (2) many attributes of ownership of the equipment, such as responsibility for servicing, insuring, licensing and assumption of risk of loss, pass to the lessee, (3) the lessee has the right to purchase the equipment at the end of the lease period, and (4) the useful life of the equipment is of such a short duration that the lessor must look to the terms of the agreement, rather than to the equipment's resale value, as the primary source of recovery for the investment.[75] These and other relevant factors could contribute to an analysis of whether a lease is an ''extension of credit'' for purposes of the proposed rule.

Question 33: What are the advantages and disadvantages of the proposed factors that may be used to determine whether a lease is an extension of credit? What other factors may be relevant in considering whether a lease is an ''extension of credit''? For example, should the Board consider the accounting treatment of the lease under GAAP?

2. Investments in Debt Securities

The proposed rule would include as an extension of credit an investment in debt securities of an insider. When a bank invests in the debt securities issued by an insider that is not a natural person, the investment gives rise to an obligation by the insider to pay funds to the bank in satisfaction of the debt security. The bank therefore has credit exposure to the insider. The bank also has credit exposure to the insider because performance on the security would be reflected on the bank's balance sheet. Therefore, investments in debt securities of an insider are viewed as extensions of credit. This addition also would be consistent with Regulation W, which specifies that a purchase of or investment in debt securities issued by an affiliate constitutes an extension of credit.[76]

Question 34: What are the advantages and disadvantages of including an investment in debt securities issued by an insider as an extension of credit?

Question 35: Should an investment in securities other than debt securities issued by an insider constitute an extension of credit? Should the scope of securities be expanded or reduced?

3. Modifications to Existing Extensions of Credit

The proposed rule would expand the list of transactions that are extensions of credit to include an increase in the amount of, extension of maturity of, or adjustment to the interest rate term or other material term of, an existing extension of credit to an insider. This language comes from the definition of ''extension of credit'' in Regulation W, which also treats modifications as an extension of credit.[77] This revision would clarify when modifications made to an existing extension of credit would constitute a new extension of credit that must comply with the requirements of Regulation O. The proposed revision is intended to address significant modifications to an existing extension of credit that economically amount to a new extension of credit. A bank's credit risk could be materially altered if a bank and insider modify an extension of credit in one of these ways. Failure to treat these events as a new extension of credit also would create a significant opportunity for evasion of the insider lending restrictions. If such events did not constitute an extension of credit, an insider and bank seeking to grant the insider favorable treatment could approve an extension of credit that is compliant with the proposed rule, only to later revise the extension of credit in a manner inconsistent with the proposed rule. This revision would codify the Board's existing interpretation of treatment for these modifications as a new extension of credit. By using the same language that currently exists in Regulation W, the proposed rule also would create efficiencies for banks by using the same standard in both regulations.

The list of transactions that are extensions of credit in Regulation O already includes ''[a]n increase of an existing indebtedness.'' [78] Regulation O excepts increases of an existing indebtedness for certain accrued interest and incidental expenses from the definition of ''extension of credit.'' [79] Because the proposed rule would modify the definition of extension of credit to include an increase in the amount, extension of maturity, or adjustment to the interest rate term or other material term, of an extension of credit, the existing inclusion of ''[a]n increase of an existing indebtedness'' in the list of transactions that are extensions of credit would not be necessary. Accordingly, the proposed rule would eliminate this language from the list. However, the proposed rule would preserve the exception for certain

[70] *See* Staff Opinion, April 8, 1976, FRRS 3–1080.

[71] *See* 12 CFR 223.3(o)(3).

[72] The same treatment would apply for a full-payout net lease permissible for a federal savings association under 12 CFR 160.41.

[73] *See* Staff Opinion, April 8, 1976, FRRS 3–1080 (holding that full-payout nonoperating leases are extensions of credit).

[76] 12 CFR 223.3(o)(4) (defining ''extension of credit'' to include ''[a]n acquisition by purchase, discount, exchange, or otherwise of a note or other obligation, including commercial paper or other debt securities, of an affiliate'').

[77] *See* 12 CFR 223.3(o)(5).

[78] 12 CFR 215.3(a)(5) (An extension of credit includes ''[a]n increase of an existing indebtedness, but not if the additional funds are advanced by the bank for its own protection for: (i) [a]ccrued interest; or (ii) [t]axes, insurance, or other expenses incidental to the existing indebtedness'').

[79] *Id.*

accrued interest and incidental expenses by adding a new separate exception from the definition of extension of credit.

Question 36: What are the advantages and disadvantages to specifying that an extension of credit includes an increase in the amount, extension of maturity, or adjustment to the interest rate term or other material term, of an extension of credit?

4. Exception for Inadvertent Overdrafts

In 1968, the Board excepted certain inadvertent overdrafts that are promptly repaid from the definition of ''extension of credit.'' [80] The Board expanded this exception in 1979 to apply to the prohibition against overdrafts in section 22(h), noting that ''[t]he Board intends that this provision be used solely in the unusual case of an inadvertent overdraft.'' [81] Regulation O still contains this exception, provided that all inadvertent overdrafts to an insider do not amount in the aggregate to more than $1,000.[82] There is a separate broader exception with respect to indebtedness of $5,000 or less arising by reason of an interest-bearing overdraft credit plan.[83] Over the years, there has been confusion over the relationship between these two similar and overlapping exceptions.

To avoid confusion, the proposed rule would eliminate the exception for inadvertent overdrafts from the definition of ''extension of credit'' while retaining the broader exception for interest-bearing overdraft credit plans. This change would recognize that, since the exception was adopted in 1968, banking practices with respect to overdrafts have changed. Banks are more likely to have overdraft protection plans, and account holders often enter into arrangements with their banks that would prevent the bank from paying an overdraft that would not be automatically repaid. This change also would be consistent with Regulation W, which does not provide an exception for inadvertent overdrafts made by a bank's affiliates.

However, the proposed rule would not eliminate the separate exception for inadvertent overdrafts with respect to the prohibition against overdrafts to executive officers and directors.[84] This would permit banks to pay inadvertent overdrafts to executive officers and directors provided that they meet the requirements that apply to all extensions of credit and the terms of the exception (specifically, below the specified amount, not more than 5 business days, and third-party fees). Eliminating the inadvertent overdraft exception for executive officers and directors would be overly punitive because a bank would immediately be in violation of Regulation O for these overdrafts which, by definition, are small and unintentional. As noted above, the proposed rule would increase the inadvertent overdraft threshold to $4,000.

Question 37: What are the advantages and disadvantages of eliminating the exception for inadvertent overdrafts as part of the definition of ''extension of credit'' (section 215.3(b)(2) of Regulation O)?

Question 38: In the alternative, what would be the advantages and disadvantages of retaining but narrowing the exception to cover qualified custodial overdrafts (for example ordinary course of business in connection with payment transactions, settlement services, or futures, derivatives, and securities clearing)? If revised, what criteria would constitute appropriate limitations? For example, should these criteria include consideration of a repayment timeline (for example 5 business days), concerns about repayment, policies and procedures, or something else?

Question 39: What other clarifications, if any, should the Board consider for the treatment of inadvertent overdrafts?

5. Guarantees and Similar Transactions by a Bank on Behalf of an Insider

Section 215.3(a)(3) of Regulation O specifies that a standby letter of credit (or other similar arrangement regardless of name or description) or an ineligible acceptance are extensions of credit. The proposed rule would expand this provision to include additional similar transactions using the language from the definition of ''covered transaction'' in Regulation W. Specifically, the proposed rule would include the issuance of a guarantee, acceptance, or letter of credit, including an endorsement on behalf of an insider, and a confirmation of a letter of credit issued by an insider as extensions of credit.[85]

Like standby letters of credit or ineligible acceptances, these additional transactions expose a bank to the credit risk of an insider. These transactions also are the types of credit transactions for which an insider could be incentivized to exert undue influence over the decision to issue a guarantee, acceptance, or letter of credit because of the benefit provided by the transaction to the insider. In addition, harmonizing the scope of terminology with Regulation W would have the added benefit of decreasing compliance costs for banks because they already are familiar with and likely have developed policies for compliance with Regulation W.

Consistent with Regulation W, the proposed rule would clarify that a credit derivative between a bank and a third-party in which the bank provides credit protection to the third-party with respect to an obligation of an insider of the bank is a guarantee by a bank on behalf of an insider for purpose of Regulation O. The proposed rule would specify that credit derivatives would include: (i) an agreement under which the bank, in exchange for a fee, agrees to compensate the third-party for any default of the underlying obligation of the insider; (ii) an agreement under which the bank, in exchange for payments based on the total return of the underlying obligation of the insider, agrees to pay the third-party a spread over funding costs plus any depreciation in the value of the underlying obligation of the insider; (iii) an equity derivative under which the bank, in exchange for a fee, agrees to compensate a third-party for any depreciation in the value of an equity security of the insider; and (iv) a total return swap, whether funded or unfunded, under which the bank, in exchange for a fee, agrees to compensate a third-party for any loss or depreciation in the value of a security or debt obligation issued by an insider.

Question 40: What are the advantages and disadvantages of expanding the list of extensions of credit so that it includes the issuance of a guarantee, acceptance, or letter of credit, including an endorsement, on behalf of an insider, and a confirmation of a letter of credit issued by an insider, as extensions of credit?

Question 41: Should the Board consider adding any other items to the non-exhaustive list of examples of extensions of credit? If so, which items should be added?

6. Application of the Tangible Economic Benefit Rule to Spouses and Trusts and Estates

Section 215.3(f) of Regulation O includes the tangible economic benefit rule, which treats extensions of credit

[80] 33 FR 2837 (Feb. 10, 1968).

[81] 44 FR 12959, 12964 (Mar. 9, 1979).

[82] 12 CFR 215.3(b)(2).

[83] 12 CFR 215.3(b)(6).

[84] 12 CFR 215.4(e)(2).

[85] *See* 12 CFR 223.3(h)(5); *see also* 12 U.S.C. 371c(b)(7)(E). As noted in section III.C of this **SUPPLEMENTARY INFORMATION**, the definition also would include derivative transactions, cross-insider netting arrangements, and securities financing transactions.

made to a borrower as having been made to another person, to the extent that the proceeds are transferred to the person or are used for the tangible economic benefit of the person.[86] The proposed rule would codify the Board's longstanding practice of applying this rule so that extensions of credit to the spouse of an insider or to an estate or trust in which an insider has a substantial beneficial interest are treated as having been made to the insider.

i. Spouses of Insiders

The proposed rule would codify previous interpretations by treating extensions of credit to the spouse of an insider, or to the related interest of a spouse of the insider, as having been made to the insider, unless the extension of credit meets the conditions described below. Extensions of credit to the spouse of an insider or the related interest of a spouse of an insider typically indirectly inure to the insider's benefit given the sharing of financial resources that is common between spouses. This default treatment is aimed at preventing a significant source of potential evasion by ascribing extensions of credit to an insider when the extension of credit is made to the insider's spouse or the spouse's related interest. This treatment also would reduce the undue influence and conflict of interest concerns that the insider lending restrictions are meant to mitigate.

The proposed rule would not treat an extension of credit to an insider's spouse as having been made to the insider, however, if (i) the spouse is independently creditworthy, and (ii) repayment of the extension of credit is not predicated on the insider's income. An extension of credit to the related interest of an insider's spouse would not be treated as an extension of credit to the insider if, in addition to the two conditions in the preceding sentence, (i) the insider does not have a financial or ownership interest in the company, and (ii) the insider does not participate in management of the company. These conditions would help to mitigate the risk that a bank would be exposed to the credit risk of an insider arising indirectly through the insider's spouse. This exception also would ensure that Regulation O does not impede the ability of a spouse of an insider to obtain credit for the spouse's own business ventures independently of the insider. An extension of credit that meets these conditions could still be treated as an extension of credit to the insider if, for example, the proceeds of the extension of credit are transferred to or used for the tangible economic benefit of the insider-spouse, or if the business is a related interest of the insider.

If both spouses in a relationship are insiders of the same bank, an extension of credit by the bank to one insider would be treated as having been made separately to both insiders if the exception above does not apply to the extension of credit. Accordingly, the extension of credit would need to satisfy the requirements in Regulation O with respect to both insiders.

Question 42: What are the advantages and disadvantages of treating an extension of credit made to the spouse of an insider, or a related interest of a spouse of an insider, as an extension of credit to the insider?

Question 43: What are the advantages and disadvantages of the proposed factors? Are there any other conditions under which an extension of credit to the spouse of an insider, or a related interest of a spouse of an insider, should not be treated as having been made to the insider? For example, could a spouse provide some type of evidence showing that the proceeds of a loan would not be used for the tangible economic benefit of the insider?

ii. Beneficiaries of Trusts and Estates

The proposed rule would codify the Board's previous interpretation of the tangible economic benefit rule that renders some extensions of credit to a trust or estate to be deemed as having been made to a beneficiary of the trust or estate.[87] A beneficiary of a trust or an estate has an interest in the property of the trust or estate. When the trust or estate receives an extension of credit, the proceeds inure to the benefit of the beneficiary because they often are used to preserve or enhance the value of other assets held by the trust or estate. Specifically, the proposed rule would treat an extension of credit to a trust or estate in which an insider has a 25 percent or more present or contingent beneficial interest as being made to the insider because it is a sufficiently large interest in a trust or estate that it could give rise to a motivation for the beneficiary to attempt to exert undue influence on the decision of a bank to lend to the trust or estate.

In addition, use of the 25 percent threshold is consistent with other thresholds in banking statutes and regulations. For example, both section 22(h) and the BHC Act define control to include ownership of 25 percent or more of a class of voting securities.[88] Among other things, this statutory requirement implies that, when a company owns 25 percent or more of a class of voting securities of a bank, it is sufficiently interested in the performance of the bank that it should be subject to certain requirements with respect to the bank. Accordingly, a 25 percent or more present or contingent beneficial interest in an estate or trust could be viewed similarly as giving rise to a sufficient interest in the estate or trust for extensions of credit to be attributed to beneficiaries that are insiders.

In the alternative, the Board could set the threshold lower at 10 percent. A beneficial interest of 10 percent might give rise to sufficient motivation for the beneficiary to attempt to exert undue influence on the lending decisions of the bank. Section 22(h) and Regulation O already deem the 10 percent threshold sufficient to render a person an insider and, thus, subject to the prohibitions of the insider lending restrictions. The 10 percent threshold also is consistent with other statutory thresholds that the Board has deemed sufficient to trigger heightened scrutiny. For example, prior notice is required in certain circumstances where an individual acquires 10 percent or more of a bank or bank holding company,[89] and Regulation O sets forth presumptions of control when an individual owns more than 10 percent of a bank.[90]

Question 44: What are the advantages and disadvantages to this proposed clarification regarding when an extension of credit to a trust or an estate should be treated as having been made to a beneficiary of the trust or estate?

Question 45: Is the proposed 25 percent threshold appropriate or should the proposed beneficial interest threshold be set at a different level? For example, should the threshold be set at 10 percent, 33.3 percent, or some other value between 10 percent and 100 percent?

[86] 12 CFR 215.3(f).

[87] *See, e.g.,* FRRS 3–1062.1 (citing a letter from Neal L. Petersen, General Counsel of the Board, to John P. Amershadian (May 23, 1980), available at *https://www.federalreserve.gov/supervisionreg/legalinterpretations/letter-from-petersen-to-amershadian-may-23-1980.pdf*). In addition, as noted in section IV.B of this **SUPPLEMENTARY INFORMATION**, a trust can be a related interest of an insider if the insider controls the trust and the proposed rule will indicate that trustees are presumed to control a trust, and settlors, appointers, or beneficiaries can be presumed to control a trust under certain circumstances.

[88] 12 U.S.C. 375b(9)(B); 12 U.S.C. 1841(a)(2)(A).

[89] *See* 12 CFR 225.41(c)(2).

[90] *See* 12 CFR 215.2(c)(2). As discussed in sections III.B and IV.B of this **SUPPLEMENTARY INFORMATION**, the proposed rule would amend these presumptions.

F. Dodd-Frank Act and the Purchase or Sale of an Asset Between an Insider and a Bank

The proposed rule would include the requirements of section 615 of the Dodd-Frank Act, which added paragraph (z) to 12 U.S.C. 1828. Section 615 prohibits a depository institution from purchasing or selling an asset from or to an insider unless (i) the transaction is on ''market terms;'' and (ii) if the transaction represents more than 10 percent of the capital stock and surplus of the institution, the transaction has been approved in advance by a majority of the members of the board of directors of the institution ''who do not have an interest in the transaction.'' [91]

As required by 12 U.S.C. 1828(z), the Board has consulted with the OCC and FDIC regarding this portion of the proposed rule.

1. ''Market Terms''

The proposed rule would interpret market terms, as it is used in 12 U.S.C. 1828(z), to mean the terms described in section 23B of the Federal Reserve Act.[92] Section 23B requires that the terms of a transaction between a bank and its affiliates be ''the same, or at least as favorable to such bank or its subsidiary, as those prevailing at the time for comparable transactions with or involving other nonaffiliated companies.'' [93] In the event there are no such comparable transactions, section 23B requires that the proposed affiliate transaction be on terms that the bank would offer to nonaffiliates in good faith.[94]

The proposed rule would use the same standard as in section 23B but substitute insiders and non-insiders for affiliates and nonaffiliates, as appropriate. This standard is intended to ensure that the sale or purchase of an asset between a bank and an insider would not be disadvantageous to the bank relative to similar transactions between the banks and non-insiders. This standard also would create consistency between the market terms requirements in two of the Board's regulations governing transactions between banks and related parties, namely Regulation O and Regulation W. Using the same standard in Regulation O that already is in Regulation W should decrease compliance costs for banks because they already are familiar with and likely have developed policies for compliance with section 23B that could be modified for purposes of Regulation O more easily than developing policies for a new standard. Because the language used in the two regulations would be similar, the Board would seek to interpret the language consistently when possible.

Question 46: What are the advantages and disadvantages of interpreting ''market terms'' to mean the standard set forth in section 23B?

Question 47: What would be the advantages and disadvantages of requiring that a purchase or sale of assets strictly be on fair market terms? Should it be impermissible for a bank to sell or purchase an asset from an insider on terms that are more favorable to the bank than could be expected for a similar transaction with a noninsider?

Question 48: What would be the advantages and disadvantages of defining ''market terms'' to be consistent with the ''prevailing comparable transactions'' terms requirement in section 22(h) and section 215.4(a)(1) of Regulation O? [95]

Question 49: What alternative standard could the Board consider adopting to define ''market terms?''

Question 50: What would be the advantages and disadvantages of using interpretations of the market terms standard in section 23B to interpret the similar standard in the proposed rule?

2. Indirect Participation by an Interested Party

The proposed rule also would make clear that approval of a purchase or sale of an asset between an insider and a bank by a majority of directors cannot include an interested party's participation in the discussion or any attempt to influence the voting of the board of directors regarding the transaction. This requirement is the same as that imposed currently by Regulation O to implement the prior approval requirement in section 22(h).[96]

Absent this requirement, the purpose of the statute—to prevent an insider from participating in approval by the board of directors of a transaction that presents a conflict of interest for the insider—would not be discharged. This is because an interested party could exert undue influence on the approval of a transaction by a bank's board of directors other than by participating in the voting. For example, directors that are not interested parties could be less likely to speak openly in a meeting to discuss a proposed transaction that is attended by the interested party. An interested party also could encourage other directors to approve a proposed transaction or monopolize a conversation about the transaction, which could limit the amount of time that directors who are not interested in the transaction are able to discuss any concerns related to the transaction.

The Board proposes adopting the same standard to clarify participation in the voting for purposes of 12 U.S.C. 1828(z) as in section 22(h) to maintain consistency in the regulation, for simplicity, and also to avoid creating a new standard for banks to interpret.

While the proposed rule would seek to align the prior approval requirements in section 22(h) and 12 U.S.C. 1828(z) when possible, there is one notable statutory difference between them. Section 22(h) requires approval by a majority of a bank's ''*entire* board of directors'' whereas 12 U.S.C. 1828(z) requires approval by a majority of ''the members of the board of directors . . . *who do not have an interest in the transaction*.'' [97] For purposes of determining what number of directors constitutes a majority, section 22(h) does not exclude directors with an interest in the transaction. For example, if two directors out of seven have an interest in a transaction, section 22(h) would require four directors to vote in favor of the transaction (that is, a majority of the entire board of directors); whereas, 12 U.S.C. 1828(z) would require three (that is, a majority of the five uninterested directors).

3. ''Purchase of Asset'' Definition

For purposes of this section, the proposed rule would define the term ''purchase of asset'' generally in line with the term ''purchase of an asset'' in Regulation W.[98] Regulation W states that ''[p]urchase of an asset by a member bank from an affiliate means the acquisition by a member bank of an asset from an affiliate in exchange for cash or any other consideration, including an assumption of liabilities. The merger of an affiliate into a member bank is a purchase of assets by the member bank from an affiliate if the member bank assumes any liabilities of the affiliate or pays any other form of

[91] 12 U.S.C. 1828(z).

[92] 12 U.S.C. 371c–1.

[93] 12 U.S.C. 371c–1(1)(A).

[94] 12 U.S.C. 371c–1(1)(B).

[95] *See* 12 U.S.C. 375b(1)(a)(i); 12 CFR 215.4(a)(1). The ''prevailing comparable transactions'' terms requirement in Regulation O requires any extension of credit by a bank to an insider to be (i) ''made on substantially the same terms (including interest rates and collateral) as, and following credit underwriting procedures that are not less stringent than, those prevailing at the time for comparable transactions by the bank with other persons that are not covered by this part and who are not employed by the bank''; and (ii) ''not involve more than the normal risk of repayment or present other unfavorable features.'' 12 CFR 215.4(a)(1)(i) and (ii).

[96] 12 CFR 215.4(b)(4).

[97] *Compare* 12 U.S.C. 375b(3)(B) *with* 12 U.S.C. 1828(z)(1)(B) (emphasis added).

[98] 12 CFR 223.3(dd).

consideration in the transaction.'' For purposes of Regulation O, the proposal would use the term ''insured depository institution'' in place of ''member bank'' and the term ''insider'' in the place of ''affiliate.'' General alignment with the Regulation W definition in this manner would ensure consistent treatment of these concepts in the Regulation W and Regulation O contexts.

G. Modernizing Definition of ''Executive Officer''

Regulation O defines ''executive officer,'' in part, by providing a list of titles that, if held by a person, would presumptively render them an ''executive officer.'' [99] The proposed rule would revise this list to remove ''every vice president,'' ''the cashier,'' and ''the secretary.'' Accordingly, persons with these titles would no longer be presumed to be executive officers for purposes of Regulation O.[100] The proposed rule also would add to the list of titles the chief executive officer, chief financial officer, chief lending officer, and chief investment officer.

These changes would modernize this list, which has remained essentially unchanged since 1935.[101] Banking practices, including the responsibilities of persons with certain titles, have changed since that time. For example, the title of vice president has become widely used, particularly at large banking organizations, to cover a range of officials with limited policymaking responsibilities.[102] Similarly, the scope and use of the titles of the secretary and the cashier have changed significantly over time, and no longer reliably connote an individual who participates in major policymaking functions of a bank. For example, the role of a board secretary typically involves ministerial functions such as maintaining minutes from meetings and certifying passed resolutions. These functions do not constitute participation in major policymaking decisions of a bank. The titles that would be added to the proposed rule identify persons who typically participate in the policymaking decisions of a company.

These revisions should reduce regulatory burden by decreasing the number of individuals covered by the title presumption. Currently, a bank may overcome this presumption if the bank board adopts a resolution meeting certain requirements set forth in Regulation O.[103] The proposed rule would negate the need to complete this exercise for persons no longer included in the list. Although the proposed rule would add titles that are presumed to be executive officers, persons with these titles likely already are treated as executive officers under the existing standard and requirement.

The proposed rule otherwise would not change the definition, including the functional analysis portion of the definition specifying that anyone who in practice participates in major policymaking functions of the bank is an executive officer. Accordingly, a person could be an ''executive officer'' regardless of title if the nature of the person's duties and role concern major policymaking functions. A person also could be an ''executive officer'' regardless of whether a bank has adopted a resolution excluding the person from major policymaking functions if the person *in fact* participates in major policymaking functions of the bank or other company.

Question 51: Is elimination of the title of the cashier and the secretary appropriate? Are there any other titles that are outdated which should be removed or revised?

Question 52: Is elimination of the title of vice president appropriate? Should senior vice president or other similar title be added?

Question 53: Should any other titles be included? For example, should additional or all C-suite officers be presumed to be ''executive officers?''

Question 54: What would be the advantages or disadvantages of aligning the scope of titles that are presumed to be executive officers with definitions of ''executive officer'' in other Board regulations, including, for example, the definition in the Board's capital rule [104] *or the definition included in the proposed rule on incentive-based compensation arrangements?* [105] *How might it differ from this proposal?*

Question 55: What would be the advantages or disadvantages of aligning the scope of titles that are presumed to be executive officers with definition of ''senior executive officer'' in section 914 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA)? How might it differ from this proposal? In particular, how should the Board consider Congress's use of term ''senior executive officer'' in FIRREA versus ''executive officer'' in sections 22(g) and 22(h), as well as the statutory definition of ''executive officer'' in section 22(h)? [106]

Question 56: Do any other terms need to be clarified (for example ''authority to participate,'' ''other than in the capacity of a director''). If so, how?

H. Lending Limit and Collateralization Requirements for Undrawn Lines of Credit

The proposed rule would modify the collateralization requirements applicable to the undrawn portion of a line of credit. Lines of credit are extensions of credit subject to Regulation O and, thus, the entire amount (that is both the drawn and undrawn portions) of a line of credit counts towards the individual lending limit in section 215.4(c) of Regulation O.[107] When a bank grants a line of credit to an insider in an amount that, together with all extensions of credit to the insider, amounts to more than 15 percent of the bank's unimpaired capital and unimpaired surplus, Regulation O requires the bank to (i) count the entire amount of the line of credit when determining the amount of collateral that the insider must provide; and (ii) obtain collateral for the entire amount of all extensions of credit to the insider in excess of 15 percent, including undrawn portions of the line of credit.

For example, suppose a bank grants a line of credit (and no other extensions of credit) to an insider equal to 20 percent of the bank's unimpaired capital and unimpaired surplus. Regulation O would require the bank to collect qualifying collateral from the insider equal to 5 percent of the face amount of the line of credit, immediately upon granting the line of credit.[108] This is

[99] 12 CFR 215.2(e)(1) (''The chairman of the of the board, the president, every vice president, the cashier, the secretary, and the treasurer of a company or bank are considered executive officers. . .'').

[100] These persons could nevertheless be ''executive officers'' in practice because Regulation O defines the term to include any ''person who participates or has authority to participate (other than in the capacity of a director) in major policymaking functions of the company or bank, whether or not: the officer has an official title; the title designates the officer an assistant; or the officer is serving without salary or other compensation.'' 12 CFR 215.2(e)(1).

[101] The list of official titles that would be considered executive officers was first included in the definition of executive officer in 1935. The titles were switched to presumptions in 1938 and the definition was slightly updated in 1968 by among other things removing the title of trust officer. *See* 21 FRB No. 12, 854 (Dec. 1935); 25 FRB p. 636 (1939); 33 FR 2837 (Feb. 10, 1968).

[102] The Board previously highlighted this trend by acknowledging that resolutions to exclude officers from participation in major policymaking functions might be particularly appropriate for the many vice presidents of large banks. 33 FR 2837 (Feb. 10, 1968).

[103] 12 CFR 215.2(e)(1).

[104] 12 CFR 217.2.

[105] 81 FR 37670, 37808 (June 10, 2016) (proposed to be codified at 12 CFR 236.2(gg)).

[106] 12 U.S.C. 375b(9)(C).

[107] 12 CFR 215.4(c). The entire amount of a line of credit also counts against the aggregate lending limit. *Id.* 215.4(d).

[108] The lending limit for an insider equals 15 percent of a bank's unimpaired capital and

Continued

true regardless of whether the insider draws on the line of credit.

The proposed rule would provide a new exception to this requirement. Specifically, the proposed rule would not require a bank to collect collateral from an insider for the unused portion of a line of credit, if the bank does not have any legal obligation to advance funds under the line of credit until the insider has posted the required collateral. Under this condition, securing the unused portion of a line of credit would be unnecessary for the protection of the bank because the insider would be unable to require the bank to advance additional funds without posting the additional collateral required by section 22(h). This treatment also would be consistent with similar treatment provided for the unused portion of certain extensions of credit made by a bank to an affiliate in Regulation W.[109] The unused portion of a line of credit would continue to count towards the 15 percent limit for unsecured extensions of credit and the 25 percent limit for all extensions of credit in the proposed rule. A bank could not advance funds under a line of credit until it collects any collateral required by the proposed rule.

For example, suppose the aggregate amount of extensions of credit granted by a bank to an insider amounts to 15 percent of the bank's unimpaired capital and unimpaired surplus, and that none of these extensions of credit are a line of credit. Suppose further that the bank then grants a line of credit to the same insider equal to 10 percent of the bank's unimpaired capital and unimpaired surplus. So long as the line of credit remains undrawn and the bank does not have any legal obligation to advance additional funds under the line of credit until the insider has posted the required collateral, the proposed rule would not require the bank to collect collateral from the insider until the insider draws on the line of credit. However, the insider would be required to provide qualifying collateral for any drawn amount. Furthermore, the bank would be unable to make an additional extension of credit to the insider because the amount of extensions of credit to the insider, including the face amount of the line of credit, meet the limit set forth in section 22(h), or 25 percent of the bank's unimpaired capital and unimpaired surplus.

This exception would represent a change from the current requirement in Regulation O that the entire amount of a line of credit, whether drawn or undrawn, be collateralized. This is because the existing requirement may be unduly burdensome and unnecessary to protect the bank as it requires collateralization of a credit that has not been extended. The proposed exception would provide equivalent protection to a bank because a bank would not provide proceeds of a line of credit until the bank has collateral. Accordingly, the bank would not risk advancing funds to an insider on an uncollateralized basis. The proposed new approach to collateralization of lines of credit is appropriate because it would reduce burden and preserve the protection that Regulation O currently affords a bank.

Question 57: What are the advantages and disadvantages of this proposed treatment for collateralization of the unused portion of lines of credit?

J. Harmonizing Certain Definitions in Regulation O With Definitions in the Board's Regulation Y

The proposed rule would define two new terms that Regulation O uses but does not define. Specifically, the proposed rule would define the terms ''acting in concert'' and ''class of voting securities.'' Regulation O uses both terms in the definitions of ''control'' and ''principal shareholder.'' [110] The proposed rule would define these terms by using definitions of these terms from Regulation Y.[111] This change would provide a clearer standard for when two parties should aggregate their voting securities for purposes of determining control and principal shareholder status.

The proposed rule would define ''acting in concert'' to be the same as the definition in section 225.41(b)(2) of Regulation Y, which is used for the portion of Regulation Y implementing the Change in Bank Control Act.[112] The term also would incorporate the rebuttable presumptions of concerted action in section 225.41(d) of Regulation Y.[113] One of the presumptions concerns ''immediate family'', which is defined differently between Regulation O and Regulation Y.[114] The proposed rule would rely on the existing definition of ''immediate family'' set forth in Regulation O. Accordingly, when determining for purposes of Regulation O the scope of family members that are presumed to be acting in concert pursuant to section 225.41(d)(2) of Regulation Y, a person should look to the definition of ''immediate family'' in section 215.2 of Regulation O.

The proposed rule also would define ''class of voting securities'' by cross referencing to the definition of the same term in section 225.2 of Regulation Y.[115]

Historically, Board staff often has consulted the definition of ''acting in concert'' and the rebuttable presumptions for acting in concert in Regulation Y to determine when two parties could be considered to be acting through or in concert with one another for purposes of Regulation O.[116]

---

unimpaired surplus, in the case of uncollateralized extensions of credit. The limit can be as high as 25 percent of the bank's unimpaired capital and unimpaired surplus, but only if the insider provides collateral for any amount of an extension of credit above 15 percent. 12 CFR 215.2(i). Accordingly, in the example cited here, the insider must collateralize 20 − 15 = 5 percent.

[109] *See* 12 CFR 223.14(f)(2).

[110] *See* 12 CFR 215.2(c) and (m)(1).

[111] This approach is consistent with the legislative history of the underlying terms. Congress added the terms acting in concert and class of voting securities to both section 22(h) and the Change in Bank Control Act at the same time as part of the adoption of the FIRA in 1978. *See* Public Law 95–630, 92 Stat. 3641.

[112] 12 CFR 225.41(b)(2) (''Acting in concert includes knowing participation in a joint activity or parallel action towards a common goal of acquiring control of a state member bank or bank holding company whether or not pursuant to an express agreement.'').

[113] 12 CFR 225.41(d). As noted, the proposed rule, however, would not revise the definition of ''immediate family.'' 12 CFR 215.2(g).

[114] *Compare* 12 CFR 215.2(g) *with* 12 CFR 225.41(b)(3).

[115] 12 CFR 225.2(q)(1)–(3). The text of these paragraphs is as follows:

''(1) *Voting securities* means shares of common or preferred stock, general or limited partnership shares or interests, or similar interests if the shares or interest, by statute, charter, or in any manner, entitle the holder:

(i) To vote for or to select directors, trustees, or partners (or persons exercising similar functions of the issuing company); or

(ii) To vote on or to direct the conduct of the operations or other significant policies of the issuing company.

(2) *Nonvoting shares.* Preferred shares, limited partnership shares or interests, or similar interests are not voting securities if:

(i) Any voting rights associated with the shares or interest are limited solely to the type customarily provided by statute with regard to matters that would significantly and adversely affect the rights or preference of the security or other interest, such as the issuance of additional amounts or classes of senior securities, the modification of the terms of the security or interest, the dissolution of the issuing company, or the payment of dividends by the issuing company when preferred dividends are in arrears;

(ii) The shares or interest represent an essentially passive investment or financing device and do not otherwise provide the holder with control over the issuing company; and

(iii) The shares or interest do not entitle the holder, by statute, charter, or in any manner, to select or to vote for the selection of directors, trustees, or partners (or persons exercising similar functions) of the issuing company.

(3) *Class of voting shares.* Shares of stock issued by a single issuer are deemed to be the same class of voting shares, regardless of differences in dividend rights or liquidation preference, if the shares are voted together as a single class on all matters for which the shares have voting rights other than matters described in paragraph (o)(2)(i) of this section that affect solely the rights or preferences of the shares.''

[116] *See* 12 CFR 225.41(d).

Similarly, Board staff has used the definitions for ''voting securities,'' ''nonvoting securities,'' and ''class of voting securities'' in Regulation Y to evaluate the term ''class of voting securities'' in Regulation O. The proposed rule would reflect this approach, which would increase transparency by clarifying what ''acting in concert'' and ''class of voting securities'' mean for purposes of Regulation O. Using definitions already in Regulation Y also would simplify compliance with the proposed rule, given existing familiarity with the definitions in Regulation Y.

Question 58: What are the advantages and disadvantages of using of the definition and presumptions for acting in concert in Regulation Y? Does adopting these definitions and presumptions present any challenges? If so, how should they be addressed?

Question 59: Should the definition of immediate family in Regulation O be harmonized with the Regulation Y definition?[117]

Question 60: What are the advantages and disadvantages of using the Regulation Y definitions for class of voting securities? Does adopting the Regulation Y definitions present any challenges? If so, how should they be addressed?

Question 61: Should the definition of nonvoting shares in Regulation Y be included in Regulation O?

Question 62: Are there any other terms in Regulation O that need greater clarification? If so, would it be helpful to harmonize such terms with similar terms in Regulation Y?

K. Residence Exception to Limits for Extensions of Credit to Executive Officers of a Bank

Section 22(g) and section 215.5 of Regulation O generally prohibit a bank from making an extension of credit to an executive officer, with four exceptions.[118] One exception is for extensions of credit secured by a first lien on a single ''residence'' that is ''owned'' by the executive officer (home mortgage exception).[119] The proposed rule would revise the home mortgage exception to better ensure that the exception is used for a ''residence'' as required by the statute. The proposed revisions would not substantively alter the Board's current interpretation of the home mortgage exception, but rather incorporate in a transparent manner how the home mortgage exception has been interpreted and implemented.[120] The proposed rule also would make a technical revision to make more explicit that the exception is available only for one residence of the executive officer.

1. Whether a Property Is a ''Residence''

The proposed rule would add two conditions for the home mortgage exception that would further ensure the exception is used only for a residence.[121] First, an executive officer would be required to live in the property for at least three months each year. The legislative history for section 22(g) indicates that Congress intended the home mortgage exception to be used for an executive officer's ''home.'' [122] An officer must reside at a property for some period of time for it to qualify as a home. Read most permissively, a residence that is a home could mean a property that is distinguishable from a property used as a temporary shelter, like a hotel or other accommodation. A minimum period of one month each year could establish that an executive officer uses the property differently than a temporary shelter. Read more conservatively, a ''residence'' that is a home could mean the property where a person lives for a majority of the year, or at least six months.

The proposed rule would require that an executive officer live in a property for three months each year to use the home mortgage exception. This number falls in the middle of the range of reasonable values discussed above. The proposed rule would not use a lower value within this range in recognition of the apparent interest of Congress that the exception be used for a home, rather than a property that may be only an occasional place where an executive officer stays. The proposed rule would not use the highest value in the range to prevent the home mortgage exception from being unduly restrictive. This value also would be consistent with Board staff's interpretations of the home mortgage exception that it is available for a second home, but not a vacation property.[123]

An executive officer would not be required to live at the property for the three-month period consecutively. For example, an executive officer could satisfy the requirement by spending two months at the property and another month at a later time, provided all three months occur within the same 12-month period.[124]

Second, the proposed rule would require that the property not be a property for investment purposes, including renting or leasing out all, or a portion, of the property for income. This condition would prevent an insider from using the home mortgage exception for purposes not contemplated by section 22(g), which limits the exception to mortgage loans on properties used by an insider as a residence only.[125]

Question 63: What period of time living in a property is sufficient to indicate that the property is a ''residence'' of a person? What period between one and six months should be required to qualify for the home mortgage exception?

Question 64: What would be the advantages or disadvantages of interpreting ''residence'' to mean the place where an executive officer is most likely to be found or where he or she spends the majority of the year?

Question 65: What would be the advantages or disadvantages of interpreting residence to mean a place where an executive officer can be found for more than a de minimis amount of time each year, but a small fraction of the year? For example, could a residence include a place that a person lives for only one month each year?

Question 66: What would be the advantages and disadvantages to requiring an executive officer to live in a residence for three months of every calendar year, rather than three months during a rolling 12-month period?

Question 67: Are there other ways to determine whether a property is a residence, for example, reliance on tax rules? If so, what are the advantages and disadvantages of such an approach?

2. Mortgage Exception for Executive Officers Available Only for One Dwelling

Section 22(g) and section 215.5 of Regulation O state that the home mortgage exception is available for a residence. Board staff has received a significant number of inquiries from

[117] *See* 12 CFR 225.41(b)(3).

[118] *See* 12 U.S.C. 375a; 12 CFR 215.5(a).

[119] *See* 12 U.S.C. 375a(2); 12 CFR 215.5(c)(2).

[120] *See, e.g.,* 57 FR 22417, 22423 (May 28, 1992) (dropping term primary from residence exception). A second home, for example used for vacation, can count as a residence for purposes of section 215.5(c)(2) of Regulation O so long as the executive officer annually resides at the home for some period of time during the year.

[121] *See* 12 CFR 215.5(c)(2)(i)–(ii).

[122] *See e.g.,* S. Rep. No. 165 at 1 (Apr. 12, 1967) (discussing an exception to the lending restrictions for executive officers for ''a first mortgage loan on a *home*'') (emphasis added).

[123] Letter from Elisabeth L. Carmichael to Robert L. Jaynes (Oct. 11, 1967) (''The staff of the Board considers this authority to be limited to a loan to provide housing for an executive officer, and would not include a loan secured by a lien on a vacation home''); Letter from J. Virgil Mattingly to Charles R. Haley (Mar. 30, 1995).

[124] The first 12-month period would begin when a bank extends credit pursuant to the home mortgage exception.

[125] 12 U.S.C. 375a(2)(A).

banks and their executive officers about whether the bank may make extensions of credit pursuant to the home mortgage exception to the same executive officer for two different properties. Standing alone, section 22(g)(2)(A) is ambiguous because it refers to ''a dwelling,'' which could mean any dwelling. But section 22(g)(2)(B) resolves this ambiguity by limiting the exception to a single mortgage loan to an executive officer.[126] To resolve any residual ambiguity, the proposed rule would replace ''a residence'' in the home mortgage exception with ''a single residence.'' [127] The Board notes that the single residence restriction applies only to a mortgage loan made to an executive officer. The single residence restriction does not apply to a mortgage loan made to a director or principal shareholder, or to a related interest of a director, principal shareholder, or executive officer.

L. Regulation O Requirements for Extensions of Credit to Insiders of Correspondent and Respondent Banks

1. The Requirements in 12 U.S.C. 1972

The proposed rule would incorporate existing requirements for restrictions on extensions of credit from banks to the insiders [128] of correspondent banks and from correspondent banks to insiders of their respondent banks set forth in section 106(b)(2) of the Bank Holding Company Act Amendments of 1970 (BHC Act Amendments).[129] The correspondent lending restrictions generally require that extensions of credit by a bank to the insider of its respondent bank or correspondent bank (i) be made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons; and (ii) not involve more than the normal risk of repayment or present other unfavorable features.[130] The restrictions also prohibit a bank from opening a correspondent account at a second bank if either bank has any outstanding extensions of credit to insiders of the other that do not meet these same qualitative requirements. Congress adopted these restrictions in response to banks providing favorable loans to their insiders by allowing their correspondent bank to make the loan and taking the respondent bank's correspondent account as collateral.[131]

The proposed rule is intended to codify the correspondent lending requirements, including their scope of application, as set forth in the statute. Incorporating these restrictions in the proposed rule should benefit banks by consolidating requirements related to insider lending into one regulation.

For purposes of the requirements for extensions of credit involving correspondent banks, the proposed rule also would define ''bank'' and ''correspondent account.'' Consistent with section 106(b) of the BHC Act Amendments, the proposed rule would define ''bank'' to have the meaning given in the BHC Act and also to include a mutual savings bank, savings bank, and savings association, as each are defined in 12 U.S.C. 1813.[132] The term ''bank'' also would include a subsidiary of any of these entities, consistent with the definition of ''member bank'' applicable to other parts of Regulation O and with Board staff's past interpretations of the definition of ''bank'' in section 106.[133] The proposed rule would define ''correspondent account'' to mean an account maintained by a bank with another bank for the deposit or placement of funds. Consistent with the intent of Congress to prevent banks from using their correspondent accounts to circumvent the insider lending restrictions, this broad definition would capture most, if not all, accounts at a correspondent bank that banks could use to enhance an extension of credit made by the correspondent bank.

The proposed rule also would eliminate paragraph (b)(4) of section 215.1 of Regulation O. This paragraph, which states that banks are subject to the requirements of 12 U.S.C. 1972(2) would no longer be necessary in light of the proposed incorporation of the correspondent lending restrictions into Regulation O.

2. Recordkeeping Requirements for Correspondent Lending Restrictions

Because the correspondent lending restrictions would be codified in Regulation O, the Board is proposing to specify the applicable records maintenance expectations, as it does for other requirements in the regulation.[134] However, these relationships are fundamentally different that those addressed elsewhere in Regulation O, as there is an additional layer of separation between the lending bank and the insider because the relevant borrowers are insiders of an unaffiliated third—party. Taking this into consideration, the proposed rule would set forth two specific methods for banks to adequately maintain records for the correspondent lending restrictions. First, a bank could send an annual survey to its correspondent and respondent banks asking for a list of the relevant insiders of such banks (the ''survey method''). Second, a bank could require, as part of all extensions of credit that it makes, that the borrower indicate whether the borrower is an insider of the bank's respondent or correspondent bank (the ''borrower inquiry method''). These methods are similar to the methods set forth in Regulation O for a bank to maintain records to ensure compliance with Regulation O with regard to loans to insiders of the bank's affiliates.[135] As discussed in section IV.G of this

[126] 12 U.S.C. 375a(2) (''A member bank may make a loan to any executive officer of the bank if . . . it is secured by a first lien on *a dwelling* . . . *used by him as his residence* [and] ''*no other loan* by the bank to the officer under authority of this paragraph is outstanding.'') (emphasis added). This reading is also supported by legislative history suggesting that the provision was not meant to cover loans for multiple properties. H.R. Rep 90–262, 90th Cong. ., 1st Sess. 1967 (noting that a bank officer could not borrow, for example, $18,000 from his bank for a year-round residence and another $12,000 for a vacation residence.'').

[127] While section 22(g) and Regulation O limit, and the proposed rule would limit, the home mortgage exception to a single property, a person that serves as an executive officer at two different banks may receive one extension of credit from each bank pursuant to the home mortgage exception. The extensions of credit must otherwise comply with Regulation O and the conditions of the home mortgage exception. Generally, if two banks share an executive officer and contemplate merging, neither bank should make an extension of credit on the basis of the home mortgage exception if one of the banks already has made an extension of credit in reliance on the exception.

[128] The proposed rule would define ''insiders'' for purposes of the correspondent lending restrictions using the same definition of ''director'', ''executive officer'', and ''related interest'' as apply for the rest of Regulation O. However, the ''principal shareholder'' definition would not be included because the statute does not use the term ''principal shareholder'' and instead applies the restrictions to ''any person who directly or indirectly or acting through or in concert with one or more persons owns, controls, or has the power to vote more than 10 per centum of any class of voting securities of'' a bank. 12 U.S.C. 1972(2)(A)–(D).

[129] 12 U.S.C. 1972(2). These restrictions apply to banks that maintain a correspondent account for another bank and for banks that open and maintain a correspondent account at another bank. Section 106(b)(2) of the BHC Act Amendments applies by its terms to insured banks, mutual savings banks, savings banks, and savings associations. These restrictions have been interpreted to also apply to extensions of credit by subsidiaries of these entities. *See* Letter from J. Virgil Mattingly to James M. Mataya (Sept. 26, 1997).

[130] A bank may select any reasonably prudent method to ensure compliance with these restrictions. For example, a bank may establish policies and procedures to request additional information about a borrower's relationships with correspondent banks when the bank determines that a prospective extension of credit to the borrower will be on preferential terms. 72 FR 30470, 30472 (June 1, 2007).

[131] *See e.g.,* H. Rep. No. 95–1383 at 13 (July 20, 1978).

[132] 12 U.S.C. 1972(2)(G)(i).

[133] *See e.g.,* Letter from J. Virgil Mattingly to James M. Mataya (Sept. 26, 1997).

[134] *See* 12 CFR 215.8(a).

[135] *See* 12 CFR 215.8(c)(1) and (2).

SUPPLEMENTARY INFORMATION, a bank that uses either the survey method or borrower inquiry method will have discharged its responsibility with respect to the recordkeeping requirements for the correspondent lending restrictions.

3. Bankers' Banks

The correspondent lending restrictions apply by statute to bankers' banks (banks established by other financial institutions to provide services to the financial institutions that own them). Bankers' banks often maintain correspondent accounts for their bank-customers and make loans to the holding companies of their respondent banks. These holding companies would be treated as insiders of the respondent banks,[136] so loans by a bankers' bank to the holding company of a respondent bank are subject to the correspondent lending restrictions. Because bankers' banks generally serve only other financial institutions, a significant portion of their lending activity can be subject to the correspondent lending restrictions. This has led to questions about how a bankers' bank would comply with the requirement that loans subject to the restriction be on substantially the same terms, including interest rate and collateral, as those prevailing at the time for comparable transactions with other persons.

To comply with this requirement, a bankers' bank would have to demonstrate that the terms of a loan are substantially comparable to terms of loans it already has made to borrowers who are not subject to the correspondent lending requirement. It would not require identical terms and would not require all transactions to have the same terms. For bankers' banks, loans to insured depository institutions likely could be compared to loans to holding companies to determine compliance with this standard.[137] If a loan by a bankers' bank to the holding company of a respondent bank is on substantially the same terms, including interest rate and collateral, as a loan by the bankers' bank to similarly situated insured depository institutions and meets the other conditions of the correspondent lending restrictions, the loan generally would be compliant with these restrictions.

As reflected in the following questions, the Board is seeking input on the value of incorporating the restrictions of 12 U.S.C. 1972(2) into Regulation O. In particular, the Board is interested in feedback on the impact of the associated recordkeeping requirements on community banks.

Question 68: What are the advantages and disadvantages to incorporating the requirements of 12 U.S.C. 1972(2) into Regulation O?

Question 69: What are the advantages and disadvantages of the proposed definitions of ''bank'' and ''correspondent account?'' Should the definition of ''correspondent account'' be limited to accounts used for certain purposes, like payment or other transaction services with a third-party? Should the definition align with the definition used for anti-money laundering and anti-terrorist financing purposes?

Question 70: How do ''bankers' banks'' currently manage the correspondent bank requirements in 12 U.S.C. 1972? What are the potential risks and benefits of not applying these requirements to a loan by a correspondent bank to a company that owns the respondent bank, including any parent bank holding company?

Question 71: What other methods could a bank use to identify the insiders of its correspondent and respondent banks?

Question 72: What would be the advantages and disadvantages of exempting certain institutions from the recordkeeping requirements for the correspondent lending restrictions? At what point might the benefits of uniform recordkeeping requirements be outweighed by the burden of having to comply with those specific requirements?

M. Simplification of Certain Disclosure and Reporting Requirements

Regulation O requires a bank, in response to a written request from the public, to provide the names of each executive officer and principal shareholder that had extensions of credit outstanding from the bank, including extensions of credit made to the related interests of the executive officer or principal shareholder, if the total amount of such extensions of credit were a certain size as of the end of the latest previous quarter.[138] This requirement includes separate definitions for ''principal shareholder'' and ''related interest.'' The proposed rule would eliminate these separate definitions so that the requirement would instead rely on the definitions used in the rule's main definition section.

1. Principal Shareholder

Compared to the definition of ''principal shareholder'' applicable to most of Regulation O, the definition in the disclosure requirement notably does not exclude a company of which the bank is a subsidiary.[139] This appears to be because the Board adopted the disclosure requirement when the statutory source of authority for the requirement did not use the term ''principal shareholder'' from section 22(h) or otherwise provide an exclusion for a bank's holding company.[140] Congress later amended this authority to include the term ''principal shareholder'' and to permit the Federal banking agencies to define terms for reporting and public disclosure of information by a bank concerning extensions of credit to executive officers and principal shareholders of a bank.[141]

The definition of ''principal shareholder'' in the disclosure requirement also provides an explicit exception for foreign banks. When it adopted this exception, the Board stated that it did not believe that ''normal and routine interbank transactions were the type of transactions for which the reporting requirements were designed or which they can adequately accommodate.'' [142] At that time, the definition of ''principal shareholder'' in the disclosure requirement also was used for other more burdensome reporting requirements that no longer are required.[143]

The proposed rule would eliminate the special definition of ''principal shareholder'' in the disclosure requirement. This change would permit banks to exclude their holding companies from a disclosure mandated by the disclosure requirement. The benefit of simplifying the regulation by eliminating the special definition outweighs the benefit to the public of receiving confirmation that an extension

[136] Holding companies generally are treated as insiders for purposes of the correspondent lending restrictions. As discussed in section IV.D of this **SUPPLEMENTARY INFORMATION**, holding companies are not treated as insiders for purposes of the rest of Regulation O.

[137] A loan to an insured depository institution likely would not be subject to the correspondent lending restrictions because the institution likely is not an insider of a bank. The bank also would not be a ''related interest'' of an insider of the bank because a related interest must be a ''company'' and the correspondent lending restrictions exclude an insured depository institution from the definition of ''company.'' *See* 12 U.S.C. 1972(2)(G)(ii) and (iii).

[138] 12 CFR 215.9. As noted above, the proposed rule would raise the threshold from $500,000 to $2,000,000.

[139] *Compare* 12 CFR 215.2(m) *with* 12 CFR 215.9(a)(1).

[140] *See* FIRA, Public Law 95–630, 901, 92 Stat. 3641, 3693–94 (1978).

[141] *See* Garn-St. Germain Depository Institutions Act of 1982, Public Law 97–320, 429, 96 Stat 1469, 1527 (1982).

[142] Loans to Executive Officers, Directors, and Principal Shareholders of Member Banks, 44 FR 67973, 67976 (Nov. 28, 1979).

[143] *See* 12 CFR 215.10(b) (1980).

of credit exists between a bank and its holding company because the disclosure requirement may only be used rarely. Furthermore, extensions of credit between a bank and its holding company are sufficiently common that disclosing the existence of these extensions likely does not reveal new information in most circumstances.

The change also would eliminate the exception from disclosure requirement for foreign banks. The Board adopted the exception in the definition when the disclosure and reporting requirements were substantially more complicated and burdensome. Now that the requirements are limited to simple disclosure of the existence of extensions of credit by a bank to a foreign bank that is a principal shareholder, it no longer would be unduly burdensome to scope foreign banks into the requirement. In addition, a foreign bank that is the disclosing bank's holding company would not be subject to the requirement, as described above.

2. Related Interest

The Board excluded foreign banks from the special definition of ''related interest'' in the disclosure requirement for the same reason that foreign banks were excluded from the definition of ''principal shareholder'' in the requirement. That is, the Board was concerned that including transactions between a bank and any affiliated foreign bank in the disclosure requirements would be unduly burdensome.[144] Including foreign banks in the definition of ''related interest'' would no longer create undue hardship on banks because the only requirement that remains is the relatively simple disclosure requirement, not the complex reporting requirements that were required by Regulation O in 1980.

Question 73: What are the advantages and disadvantages of these proposed simplifications?

IV. Proposed Codifications of the Board's Application of Regulation O

A. Application of Regulation O to Extensions of Credit Made to a Noninsider That Later Becomes an Insider

The proposed rule would specify when the prohibitions in the proposed rule apply to extensions of credit made to a person that becomes an insider after the bank made the extension of credit (transition loans). Section 215.3(d) of Regulation O states that an extension of credit is considered to have been made ''at the time the bank enters into a binding commitment to make the extension of credit.'' [145] Board staff has received a significant number of questions related to this provision, particularly how it applies to transition loans. These revisions would codify existing interpretations of Regulation O.[146]

1. Transition Loan Treatment

The proposed rule would specify that (i) transition loans need not conform to Regulation O until such extensions are renewed, revised, or extended, at which time the extensions of credit would be treated as a new extension of credit, and that (ii) the amount of these transition loans must be included in the calculation of the individual and aggregate lending limits as soon as the borrower becomes an insider. For example, a person that is not an insider of a bank would not be required to modify or unwind loans from the bank if the person later becomes an insider and the loan does not meet a requirement in Regulation O. However, the bank would be required to count the amount of the loans towards all applicable quantitative limits in the rule, including, for example, the limit on extensions of credit to a single insider and the insider's related interests. If this amount, together with all other extensions of credit to the person, exceeds any quantitative limit in the rule, the bank would not be required to unwind the loans, but the insider would not be able to receive an additional extension of credit subject to that limit.

This treatment strikes a balance between not imposing undue burden on persons who become insiders and ensuring that a bank has limited credit exposure to its insiders. On the one hand, requiring insiders and banks to modify transition loans could be overly burdensome because it would require an insider and a bank to renegotiate the terms of any outstanding extensions of credit made to the insider at the time that the person becomes an insider. This burden could discourage qualified persons who have preexisting lending relationships with a bank from becoming an insider of the bank. This problem could be particularly acute in small communities, where local banks often provide credit to a large portion of the local business community, including many persons that could be helpful as directors or executive officers. On the other hand, one purpose of the insider lending restrictions is to limit a bank's credit exposure to its insiders. The proposed rule would accommodate both of these concerns by generally not requiring an insider or a bank to modify transition loans, and also by prohibiting the bank from extending additional credit to the insider if the amount of transition loans to the insider exceeds the individual or aggregate lending limits.

To prevent evasion of the proposed rule, this treatment would not be available for transition loans made by a bank in contemplation of a borrower becoming an insider.[147] Such extensions of credit would undermine the purpose of sections 22(h) and (g) and the proposed rule, because a person whose extensions of credit will become or could become subject to Regulation O may be able to exert undue influence on bank staff. For example, a loan officer may be inclined to offer favorable terms to a person that will become the loan officer's boss, or a director or significant shareholder of the bank.

Question 74: What are the advantages and disadvantages of the proposed application of requirements in the proposed rule to transition loans?

Question 75: What would be the advantages and disadvantages of providing a transition treatment for the requirements of Regulation O that apply only to certain types of insiders? For example, should loans made to an insider that is not an executive officer be immediately subject to the restrictions for executive officers as soon as the insider becomes an executive officer?

Question 76: What would be the advantages and disadvantages of requiring a bank to maintain records with respect to transition loans before they lose their transition loan status?

2. Lines of Credit

The proposed rule also would specify that transition loans that are lines of credit to an insider would be subject to the treatment set forth above, but for only 14 months after the date the borrower becomes an insider. At that time, the line of credit would need to comply with all requirements of the proposed rule.

In practice, this requirement already exists for most lines of credit and the proposed rule simply would make this result more explicit. Section 215.4(b)(3) of Regulation O requires prior approval for advances made pursuant to a line of

[144] Loans to Executive Officers, Directors, and Principal Shareholders of Member Banks, 44 FR 67973, 67977 (Nov. 28, 1979).

[145] 12 CFR 215.3(d).

[146] *See e.g.,* Loans to Executive Officers, Directors, and Principal Shareholders of Member Banks; Loans to Holding Companies and Affiliates, 62 FR 13294, 13296 fn. 11 (Mar. 20, 1997); FRRS 3–1036 (citing 1936 Fed. Res. Bull. 121).

[147] The Board has authority to write rules to prevent the evasion of sections 22(h) and 22(g). 12 U.S.C. 375a(8) and 375b(10).

credit, unless the line of credit has been approved by a bank's board of directors in the 14 months preceding the advance. In other words, an insider readily may draw on a line of credit only if the bank's board of directors approves the line of credit every 14 months. In each case, such approval would constitute a new extension of credit.[148] Accordingly, if a transition loan is a line of credit, the bank's board of directors generally must approve the line of credit within 14 months of the borrower becoming an insider, at which time the transition loan becomes a new extension of credit.

This treatment for lines of credit also addresses unique characteristics posed by lines of credit. Unlike other extensions of credit, lines of credit sometimes do not mature. Instead, many lines of credit persist until the lender or borrower terminates the line. This would create the possibility that a line of credit could remain a transition loan that would not need to conform to the requirements of the proposed rule in perpetuity. This result would be inconsistent with the purposes that the insider lending restrictions seek to address.

The proposed rule would apply this treatment to all transition loans that are lines of credit, not just the larger lines of credit which are subject to the prior approval requirement in section 215.4(b) of Regulation O. As noted above, without this requirement, an insider could have a line of credit that does not conform to the proposed rule in perpetuity. For example, such a line of credit would not be subject to the requirement that an extension of credit to an insider not be on favorable terms, present more than the normal risk of repayment, or have other unfavorable features. The proposed rule would use the 14-month benchmark to be consistent with the 14-month threshold for lines of credit subject to the prior approval requirement. This consistency should reduce the complexity of the rule and facilitate compliance. Fourteen months also should give a person who becomes an insider sufficient time to work with its bank to modify the line of credit, if necessary, to comply with the proposed rule.

Question 77: What are the advantages and disadvantages of requiring a transition loan that is a line of credit to comply with the requirements in the proposed rule no later than 14 months after a bank extends the line of credit?

Question 78: Should the proposed treatment for transition loans end no later than 14 months for extensions of credit other than lines of credit?

Question 79: What are the advantages or disadvantages of the 14 month reapproval for a line of credit (section 215.4(b)(3) of Regulation O)? Should it be replaced with an alternative process that is less burdensome, such as a notification requirement with certain criteria? If so, what criteria might be useful for obtaining the same consideration?

B. Application of Regulation O to Trusts and Estates

Over the years, the Board has issued interpretations in response to a significant number of inquiries concerning the application of Regulation O to trusts and estates. The proposed rule would codify some of these longstanding interpretations. This section IV.B of this **SUPPLEMENTARY INFORMATION** also restates existing interpretations regarding the current application of Regulation O that would continue to apply after adoption of the proposed rule.

1. When a Trust Is a Related Interest of an Insider

Section 22(h) and Regulation O explicitly define ''company'' to include business or other trusts. Accordingly, a trust can be a related interest of an insider, if the insider controls the trust. The proposed rule would set forth two rebuttable presumptions of control for when a person controls a trust.

First, the proposed rule would include a rebuttable presumption that a person controls a trust if the person is a trustee of the trust. This addition would be consistent with the Board's 2020 revisions to Regulation Y concerning presumptions of control. As part of those revisions, the Board included a rebuttable presumption that one company controls another if the first company enters into any agreement making the first company a trustee of the second.[149] The Board reasoned that trust agreements often grant to trustees the ability to direct or exercise significant influence over the management or operations of a company.[150] This change also would be consistent with the definition of ''control'' in section 10 of the Home Owners' Loan Act, which deems a person to control a trust if the person is a trustee of the trust.[151]

This revision to Regulation O would overturn an interpretation that Board staff issued in a 1980 letter stating that ''[a]n extension of credit by a [bank] to an estate or trust for which a director of the [bank] is executor or trustee . . . is not considered made directly to the director . . . solely by reason of the director's status as executor of the estate or trustee of the trust.'' [152] Since Board staff issued this specific interpretation, the Board's thinking about control of a trust has evolved, including with the changes to Regulation Y noted above. For the same reasons discussed in the rulemaking record for those revisions and for the reasons discussed above, the Board believes it is appropriate to presume that a person who is a trustee of a trust controls the trust.

Second, the proposed rule would create a new rebuttable presumption of control that a person that is a settlor, appointer, or beneficiary of a trust controls the trust if the person has the power to (i) remove or replace a trustee of the trust and (ii) limit a trustee's power to make, sell, change, or exchange any investment or asset of the trust. The ability to remove or replace trustees enables a person to exert influence over the trustees because a trustee may not act freely out of fear that the person will remove the trustee. The power to limit a trustee's power to make, sell, change, or exchange any investment or asset of the trust also is a significant power because, while it does not enable a person to take an affirmative action with respect to the investments or assets of a trust, it enables the person to prevent the trustee from doing so. This amounts to a power to veto important decisions of the trustee. Taken together, these powers amount to sufficient control for purposes of the insider lending restrictions. A person with these powers that also is an insider of a bank has sufficient control of the trust to raise conflict of interest concerns about the insider attempting to influence the bank to extend credit to the trust.

These presumptions of control would not comprehensively define the scope of circumstances under which a settlor, appointer, or beneficiary would control a trust. Consistent with its past practice, the Board would continue to evaluate the specific facts and circumstances of a case to determine whether a person controls a trust.

Question 80: What are the advantages and disadvantages of the proposed presumptions of control for when a person controls a trust?

Question 81: What would be the advantages and disadvantages of the

[148] *See* 12 CFR 215.3(a) (''[a]n extension of credit is a making or *renewal* . . .'') (emphasis added).

[149] 12 CFR 225.32(b).

proposed rule incorporating a portion of or the entire framework for presuming that a person controls a company set forth in the Board's control rule, section 225.32 of Regulation Y?

Question 82: Are there other circumstances where a person should be presumed to control a trust?

2. Application of Regulation O to Executors of Estates

The proposed rule would presume that a person controls any company or bank that is controlled by an estate for which the person serves as executor. The proposed rule also would clarify that a person owns, controls, or has the power to vote more than 10 percent of any class of voting securities of a bank or company when an estate for which the person serves as an executor owns, controls, or has the power to vote such shares. These presumptions would codify long-standing application of Regulation O.[153]

Companies controlled by an estate are indirectly controlled by the estate's executor because executors generally have the same authority over such companies as the estate itself. If an estate controls a company and an executor has authority over the estate and the estate's powers, the executor similarly has control over the companies controlled by the estate. For the same reasons, executors of an estate have sufficient control over shares controlled by the estate to also be considered to control the shares. As a result of this clarification, a person would be a principal shareholder of a bank if an estate for which the person serves as executor owns, controls, or has the power to vote more than 10 percent of any class of voting securities of the bank.

An estate generally would not be treated as a related interest of an insider because an estate often more closely resembles an individual than a company.[154] Accordingly, an estate normally would not meet the definition of ''related interest,'' which includes only certain ''companies'' and ''political or campaign committees.''

Question 83: What are the advantages and disadvantages of treating a company or shares of a company controlled by an estate as being controlled by an executor of the estate?

Question 84: Are there specific circumstances where an executor should not be treated as controlling a company or shares controlled by an estate because, for example, the agreements governing the estate limit the executor's or executors' authority?

C. Application of Additional Restrictions on Loans to Executive Officers to Certain Related Interests of Executive Officers

In general, the additional restrictions for extensions of credit made to executive officers set forth in section 22(g) and section 215.5 of Regulation O apply to extensions of credit made directly to executive officers and not their related interests. However, to prevent evasions of these requirements, the proposed rule would apply these restrictions to extensions of credit made to the related interest of an executive officer if the related interest is merely the alter ego of the executive officer and has no independent means to repay the extension of credit. Under these circumstances, there is a greater risk that an executive officer is using a related interest to evade the requirements of section 22(g).

Whether a related interest is considered an alter ego of an executive officer would be determined by the facts and circumstances of a particular case and generally with reference to general principles of corporate law setting forth when a company is the mere alter ego of another person. This analysis could consider, among other things, (i) the executive officer's ownership interest and management responsibilities with respect to the related interest, (ii) whether the related interest was created to perpetrate a fraud, (iii) whether the related interest is organized and operated as a mere tool or business conduit for the executive officer, (iv) whether the related interest appears to have been formed to evade legal obligations of the executive officer, (v) the capitalization of the related interest, (vi) the failure of the related interest or its management to observe corporate formalities, and (vii) the intermingling of funds of the executive officer and the related interest.

Similarly, whether a related interest has independent means to repay the extension of credit would be evaluated by the facts and circumstances of the case and would focus on whether the related interest has sources for funds other than the executive officer.

Question 85: What are the advantages and disadvantages of treating extensions of credit to certain related interests of an insider as subject to the requirements of section 22(g) as proposed?

Question 86: Are general principles of corporate law sufficient to determine when a related interest is an alter ego of an insider? Should other factors be included to ensure that an insider does not use a related interest to evade the requirements of section 22(g)?

Question 87: What factors should be used to establish whether a related interest has a means of repayment independent from an insider?

D. Clarifying the Scope of the Definition of ''Principal Shareholder''

The proposed rule would revise the definition of ''principal shareholder'' to clarify that a person is not a principal shareholder of a bank *or any affiliates* of the bank if the bank is a subsidiary of such person. This change would mean that a company that controls the bank would not be treated as a principal shareholder of any of the company's subsidiaries and, thus, extensions of credit by the bank to such subsidiaries would not be subject to the proposed rule.[155]

This change would result in a definition of ''principal shareholder'' in the proposed rule that better aligns with section 22(h).[156] This change also would be consistent with the Board's previous statements that it had intended to exclude from the definition of ''principal shareholders'' companies of which a bank is a subsidiary, as well as the related interests of such companies.[157]

Question 88: What are the advantages and disadvantages of revising the definition of ''principal shareholder'' as proposed?

Question 89: To what extent should transactions subject to Regulation W also be subject to Regulation O?

E. Treatment of Subsidiaries of Banks

The proposed rule would clarify that extensions of credit by a bank to its

[153] FRRS 3–1062.1 (citing the letter from Neal L. Petersen to John P. Amershadian (May 23, 1980)). Pursuant to the definition of ''extension of credit'' under Regulation O and the proposed rule, if an insider guarantees a loan or the proceeds of a loan are transferred to the insider, then the loan would be an extension of credit to the insider.

[154] While an estate is not listed in the definition of ''company'' in Regulation O, an estate can be treated as a company for purposes of section 22(h) and Regulation O if it takes on characteristics of a company or is part of an association.

[155] Regulation O specifies that a company of which a member bank is a subsidiary is not a principal shareholder, but only with respect to the member bank. 12 CFR 215.2(m)(2) (''A principal shareholder *of a member bank* does not include a company of which a member bank is a subsidiary.'') (emphasis added). Accordingly, the holding company of a bank could be treated as a principal shareholder of an affiliate of the bank, even if it is not treated as a principal shareholder of the bank itself, which would inadvertently subject extensions of credit to the holding company to Regulation O.

[156] 12 U.S.C. 375b(9)(F)(ii) (''Principal shareholder . . . does not include a company of which a member bank is a subsidiary.'').

[157] ''Loans to Executive Officers, Directors, and Principal Shareholders of Member Banks; Loans to Holding Companies and Affiliates,'' 57 FR 60979 (Dec. 23, 1992).

subsidiaries are not subject to the proposed rule, and that extensions of credit by the subsidiaries of banks would be treated as loans made by the bank itself. The proposed rule also would exempt extensions of credit made by a bank to insiders of an operating subsidiary of the bank from the proposed rule, and would treat extensions of credit to the insiders of a financial subsidiary the same as an extension of credit to an insider of an affiliate of the bank.

1. Extensions of Credit Made by and to Subsidiaries of a Bank

The proposed rule would modify the definition of ''subsidiary'' so that it does not exclude subsidiaries of banks. Section 22(h) and Regulation O define ''member bank'' to include any subsidiary of a member bank.[158] Accordingly, an extension of credit made by a subsidiary of a bank to an insider of the bank or its affiliates has been treated as subject to the requirements of Regulation O. However, there has been confusion about this treatment because the definition of ''subsidiary'' in Regulation O excludes subsidiaries of banks.[159] The proposed revision should resolve this ambiguity, and also would be consistent with the plain language of section 22(h).

The Board excluded the subsidiaries of a bank from the definition of ''subsidiary'' in 1979 to make clear that extensions of credit by a bank to its subsidiaries were not subject to Regulation O.[160] The Board reasoned that the regulation need not apply to transactions among these affiliates because Regulation W already provided restrictions for such transactions that are sufficient to protect the bank. To ensure that the proposed rule would continue to not inadvertently apply to extensions of credit by a bank to its subsidiaries, the proposed rule would revise the definition of ''principal shareholder'' to exclude member banks. This proposed change will prevent a bank from being treated as an insider.

2. Extensions of Credit to Insiders of a Subsidiary of a Bank

Because the proposed rule would amend the term ''subsidiary'' to no longer exclude the subsidiaries of a bank, such subsidiaries would meet the definition of ''affiliate'' in Regulation O. Accordingly, the restrictions in the proposed rule that apply to extensions of credit to insiders of affiliates would apply to extensions of credit made to insiders of subsidiaries of the bank. This would be an unintentional change to the Board's position of not applying Regulation O to extensions of credit made by a bank to the insider of an operating subsidiary. To maintain the Board's existing approach, the proposed rule would exclude operating subsidiaries of a bank from the definition of ''affiliate.'' The proposed rule would define ''operating subsidiary'' to mean a subsidiary that is not a ''financial subsidiary'' as that term is defined in section 223.3(p) of Regulation W.[161]

This treatment would be consistent with relief provided by the Board for operating subsidiaries in Regulation O, Regulation W,[162] and Regulation Y.[163] Compared to financial subsidiaries, operating subsidiaries are subordinate to their parent banks and often engage in only a subset of activities in which their parent banks may engage. An insider of such a subsidiary likely does not have sufficient influence over the lending decisions of the bank to warrant application of the proposed rule, absent other factors. By contrast, financial subsidiaries engage in activities in which banks themselves may not engage directly. These subsidiaries engage in separate business lines that are not a subset of the bank's activities. Insiders of these subsidiaries are more similar to insiders of affiliates of a bank that are not operating subsidiaries. Therefore, the proposed rule would apply to extensions of credit to insiders of financial subsidiaries in the same manner and to the same extent as it would apply to extensions of credit to insiders of affiliates of the bank that are not operating subsidiaries of the bank. If the insider of an operating subsidiary is an insider of the bank or another affiliate of the bank, extensions of credit to the insider would continue to be subject to the proposed rule.

The proposed rule would rely on the definition of ''financial subsidiary'' in Regulation W to identify operating subsidiaries. This definition identifies the scope of subsidiaries that engage in the activities in which a bank itself may not engage. Relying on a definition in another one of the Board's rules would create consistency and allow banks to leverage their existing systems for classifying operating and financial subsidiaries for purposes of the proposed rule.

Question 90: What are the advantages and disadvantages of revising the definitions of ''member bank,'' ''subsidiary,'' and ''principal shareholder'' as proposed? Are there consequences to these changes apart from the purposes discussed here?

Question 91: What would be the advantages and disadvantages of subjecting extensions of credit to insiders of certain subsidiaries of savings associations to Regulation O? For example, should extensions of credit to the insiders of subsidiaries of savings associations that engage in the activities of financial subsidiaries of national banks be subject to Regulation O?

F. Prior Approval Requirement and Abstention by All Interested Directors

Section 22(h) and 12 U.S.C. 1828(z) require a vote by a bank's board of directors before the bank may engage in certain transactions with the bank's insider. Both sections also require any director with an interest in the transaction to abstain from participating in the vote.[164]

Consistent with Board staff's longstanding interpretation, the proposed rule would clarify that, for both prior approval requirements, all directors that are interested parties must abstain from participating directly or indirectly in the approval vote. In the past, some banks have asked whether the prior approval requirement in Regulation O requires only one director with an interest in a transaction to abstain. Clarifying that all directors who are interested in a transaction must abstain from a prior approval vote would recognize that more than one insider could have an interest in the same extension of credit, and that all such insiders would be required to abstain from the required approval process for such transactions. To allow any directors with an interest in the transaction to participate in the vote would undermine the purpose of the requirement of excluding any persons with a conflict of interest from participating in a vote required by these sections.[165]

[158] 12 U.S.C. 375b(9)(E); 12 CFR 215.2(j).

[159] 12 CFR 215.2(o).

[160] *See* ''Loans to Executive Officers, Directors, and Principal Shareholders of Member Banks,'' 44 FR 12959, 12961–62 (Mar. 9, 1979).

[161] Regulation W provides that the definition of ''financial subsidiary'' does not apply to subsidiaries of savings associations. 12 CFR 223.72(b) (item 8). To maintain consistency with Regulation W, the proposed rule would not treat subsidiaries of savings associations as financial subsidiaries (that is, the proposed rule would treat them as operating subsidiaries).

[162] In general, transactions between a member bank and its operating subsidiary are not subject to the requirements of Regulation W. *See* 12 CFR part 223.

[163] In general, a bank holding company is not required to provide notice pursuant to section 4 of the BHC Act for the activities of an operating subsidiary. *See* 12 CFR 225.22(e).

[164] 12 U.S.C. 375b(3)(B) and 1828(z)(1)(B).

[165] As noted in section III.F.2 of this **SUPPLEMENTARY INFORMATION**, the proposed rule would seek to align the prior approval requirements in section 22(h) and 12 U.S.C. 1828(z) as much as

Continued

Question 92: What are the advantages and disadvantages of clarifying the prior approval requirements?

G. Safe Harbor for Affiliate and Correspondent Recordkeeping Requirements

In general, banks are required to maintain records necessary to ensure compliance with the requirements in Regulation O.[166] However, the Board has acknowledged that banks may not have easy access to the information concerning extensions of credit to persons that are not insiders of the bank.[167] To help banks meet their recordkeeping requirements for extensions of credit to the insiders of affiliates, the Board adopted in 1994 two specific methods for banks to maintain necessary records.[168] The Board also stated that an ''implicit safe harbor exists'' for banks that use one of these two recordkeeping options.[169] The proposed rule would codify this safe harbor for the recordkeeping requirements related to insiders of a bank's affiliates. The proposed rule also would extend this safe harbor to the new recordkeeping requirements for the correspondent lending restrictions discussed in section III.L of this **SUPPLEMENTARY INFORMATION** for banks that use one of the two recordkeeping requirements set forth in the proposed rule.

Compared to information related to insiders of a bank, information regarding insiders of other institutions, including the bank's affiliates and correspondent and respondent banks, is more difficult for a bank to obtain. A bank has greater access to information concerning its own insiders through shareholder and employment records because such information normally belongs to the bank. By contrast, a bank may not own information about the insiders of its affiliates or insiders of the bank's respondent or correspondent banks, and the burden of obtaining such information could, in some instances, outweigh the benefit of having the information. It also would be unreasonable in these circumstances to hold banks liable for recording information that is not entirely within their power to obtain.

Question 93: What are the advantages and disadvantages of providing such a safe harbor?

Question 94: Are there other circumstances where a safe harbor might be appropriate? If so, explain and provide examples.

V. Technical Revisions To Update and Streamline Regulation O

The proposed rule would include a series of technical amendments that are designed to streamline the regulation and make it more understandable and user-friendly. Among other things, these revisions and reorganizations would adopt language that would be more understandable and eliminate unnecessary cross-references and footnotes. The proposed rule also would include new subsections to reorganize the regulation. These technical revisions are not intended to have substantive effect. In view of the extensive proposed changes and reorganization, the Board would restate Regulation O in its entirety as amended, rather than proposing revised regulation text only for portions of Regulation O that would change.[170]

Question 95: Are the proposed technical revisions and reorganizations helpful?

Question 96: Are there any other ways that Regulation O could be made more understandable and user-friendly?

A. Separating the Requirements in Section 215.4 of Regulation O

The proposed rule would separate the five requirements in the general prohibitions section of Regulation O (12 CFR 215.4) into four new sections so that each requirement, with the exception of the individual and aggregate lending limits, would be stated in its own section. The proposed rule would state the individual and aggregate lending limits in one combined section.

The collection of these separate requirements in one section of Regulation O can be confusing. Some of these requirements are qualitative in nature, others are quantitative, and still others are procedural. Some of these requirements apply to all insiders, as in the case of the creditworthiness requirements, whereas others apply to only some insiders, as in the case of the overdraft prohibitions. The proposed revision would shorten section 215.4 of Regulation O and more intuitively categorize the requirements of the proposed rule.

B. Insiders of Affiliates Exempt From Sections 215.4, 215.6, and 215.8 of Regulation O

The proposed rule would define a new term ''exempt official'' for directors and officers that already are excluded from the definitions of director and officer in Regulation O for the purposes of sections 215.4, 215.6, and 215.8.[171] The proposed rule would use this term in sections 215.11–13, .21, .23, and .30, and eliminate the exclusion in the definitions of director and executive officer. The scope of application of the proposed rule to directors and executive officers would not be different from the scope of application in Regulation O as a result of these changes.

Regulation O excludes directors and executive officers of the affiliates of banks from the scope of the requirements in section 215.4, 215.6, and 215.8 if: (i) the director or executive officer is excluded by a resolution of the bank's board of directors from participating in the policymaking functions of the bank, (ii) the director or executive officer in fact does not participate in the policymaking functions of the bank, (iii) the affiliate does not control the bank, (iv) the assets of the affiliate do not cross a certain threshold, and (v) the director or executive officer is not otherwise subject to sections 215.4, 215.6, and 215.8 of Regulation O. The proposed definition of ''exempt official'' would use the same criteria. The revision would shorten Regulation O. The term ''exempt official'' would be included in the new section dedicated to the definition of the term ''insider,'' discussed in greater detail above.

C. Overdrafts

The Board also proposes to simplify the requirements in the proposed rule related to overdrafts. Section 215.4(e) of Regulation O prohibits banks from paying overdrafts to certain insiders. Various portions of Regulation O cross reference to certain portions of this prohibition. For example, the definition of ''extension of credit'' in Regulation O includes two exceptions for certain types of overdrafts. These exceptions

possible, but one statutory difference between them is worth noting. Section 22(h) requires approval by a majority of a bank's ''entire board of directors'' whereas 12 U.S.C. 1828(z) requires approval by a majority of ''the members of the board of directors . . . who do not have an interest in the transaction.'' For purposes of determining what number of directors constitutes a majority, section 22(h) does not exclude directors with an interest in the transaction. For example, if two directors out of seven have an interest in a transaction, section 22(h) would require four directors to vote in favor of the transaction (that is, a majority of the entire board of directors, or seven); whereas, 12 U.S.C. 1828(z) would require three (that is, a majority of uninterested directors, or five).

[166] 12 CFR 215.8(a).

[167] *See e.g.,* Loans to Executive Officers, Directors, and Principal Shareholders of Member Banks; Loans to Holding Companies and Affiliates, 59 FR 8831, 8833 (Feb. 24, 1994).

[168] *Id.*

[169] *Id.* at 8834.

[170] The proposed rule would result in a fairly significant renumbering and reordering of Regulation O sections and citations. The Regulation O citations used throughout this **SUPPLEMENTARY INFORMATION** are to the existing text of Regulation O.

[171] 12 CFR 215.2(d)(2) and (e)(2).

both refer to types of overdrafts ''described in section 215.4.'' To eliminate this cross reference, the proposed rule would replace the language directing a reader to look to section 215.4 with language describing the type of overdraft that is being referenced.

Some portions of Regulation O that refer to overdrafts use language that differs from the definition of ''pay an overdraft on an account'' in the regulation's definition section. The proposed rule also would amend these references to better align with the definition. This proposed revision is not intended to alter the substance of any portion of the proposed rule that refers to an ''overdraft.''

D. Definition of ''Unimpaired Capital and Unimpaired Surplus''

The proposed rule would create a new definition for the term ''capital stock and surplus'' and remove the definition of the term from the definition of ''lending limit.'' This reorganization would not substantively change the meaning of the terms ''lending limit'' or ''capital stock and surplus'' as they are used in Regulation O. Instead, the proposed reorganization would separate the two terms within the text of the regulation to improve the readability of the regulation and to make it easier to revise one definition without affecting the other, should such a revision be necessary in the future.

E. Disclosure Requirements for Extensions of Credit Secured by Shares of a Bank or Bank Holding Company

Section 306(o) of the Federal Deposit Insurance Corporation Improvement Act of 1991 requires that an executive officer or director of a bank and its holding company report annually to the board of directors of his or her institution the outstanding amount of any extensions of credit secured by shares of the bank and its holding company, if the shares of the institution are not publicly traded.[172] The Board previously codified portions of this requirement in section 215.10 of Regulation O for extensions of credit secured by stock of the bank, and in section 225.4(e) of Regulation Y for extensions of credit secured by stock of the bank holding company.[173] The proposed rule would consolidate these requirements in Regulation O. Consistent with section 306(o), the proposed rule also would make explicit that an executive officer or director of an insured depository institution must disclose the outstanding balance of an extension of credit if the extension of credit is secured by stock of the insured depository institution or such institution's holding company and that an executive officer or director of a holding company must disclose the outstanding balance of an extension of credit secured by stock of the holding company or the subsidiary lending bank. The Board also proposes to eliminate section 225.4(e) of Regulation Y, as that requirement would be incorporated into the proposed rule.

This revision would not substantively change the requirements of the proposed rule relative to Regulation O or Regulation Y, but would reorganize them for ease of reference and to more closely align this disclosure requirement in the proposed rule with section 306(o). Consistent with Regulation Y and Board staff's past interpretations for Regulation O, the proposed rule would specify that a company's shares are publicly traded if any class of equity securities of the company are registered securities under section 12 of the Securities Exchange Act of 1934 (15 U.S.C. 78*l*).[174]

The proposed rule also would clarify that disclosure is required for extensions of credit to an executive officer or director of a bank, when the extension of credit is secured by bank holding company shares that are not publicly traded.[175]

Question 97: Should Regulation O require that a director or executive officer of a bank or holding company disclose extensions of credit secured by shares of either the bank or holding company? Or, should Regulation O require that a director or executive officer of a bank disclose only extensions of credit secured by shares of the bank, and that a director or executive officer of a holding company disclose only extensions of credit secured by shares of the holding company?

F. Repeal of Existing Section 215.7 of Regulation O

Section 215.7 of Regulation O set forth a transition period for compliance with the regulation for extensions of credit made prior to March 10, 1979, that either matured on or after that same date. The relief expired on March 10, 1980, and, therefore, no longer applies to any extensions of credit. Accordingly, the proposed rule would eliminate this section to streamline and shorten the regulation.

G. Application of Regulation O to Insured Branches of Foreign Banking Organizations

The proposed rule would revise the definition of ''member bank'' to include the insured branches of foreign banks. Regulation O already applies to the insured branches of foreign banks by statute, but the existing definition of ''member bank'' has caused confusion about this application because it states that ''[t]he term does not include any foreign bank that maintains a branch in the United States, whether or not the branch is insured. . . .''[176] This language has been misread to specify the scope of application of Regulation O to foreign branches, rather than the foreign bank to which a branch belongs. To improve clarity, the proposed rule would be revised to reflect the relevant statutory language, which specifies that ''[t]he term does not include any foreign bank solely because the foreign bank has an insured branch, but the term does include an insured branch.''

H. Definition of ''Appropriate Federal Banking Agency''

Regulation O refers to ''appropriate Federal banking agency'' in several instances but does not separately define the term in the definition section of the rule. The proposed rule would add the term to the definition section and define it to mean, ''with respect to a member bank or company, [ ] the meaning given in 12 U.S.C. 1813.'' This change to the regulation text is not intended to impact the meaning of the term in the proposed rule.

12 U.S.C. 1813 provides that the appropriate Federal banking agency means:

The OCC, in the case of:

- Any national banking association;
- Any Federal branch or agency of a foreign bank; and
- Any Federal savings association;

The FDIC, in the case of:

- Any State nonmember insured bank;
- Any foreign bank having an insured branch; and
- Any State savings association; and

The Board, in the case of:

- Any State member bank;

[172] Section 306(o) Public Law 102–242 (1991), codified in a note to 12 U.S.C. 375b. While the statute uses the term reporting, that term is typically used for information provided to regulators. The proposed rule would change the term to disclosure to align with the label typically used when information is provided to third-parties such as the bank's board of directors.

[173] 12 CFR 215.10; 12 CFR 225.4(e).

[174] 15 U.S.C. 78*l*. *See also* 12 CFR 225.41(c)(2)(i).

[175] *See* Letter from J. Virgil Mattingly to C. Romain (Aug. 18, 1992).

[176] 12 CFR 215.2(j); 12 U.S.C. 1828(j)(3)(B) (noting that the requirements of 12 U.S.C. 375a and 375b ''shall not apply with respect to a foreign bank solely because the foreign bank has an insured branch, but shall apply with respect to the insured branch.''). *See also* FRRS 3–1085.5 (Apr. 21, 1993).

- Any branch or agency of a foreign bank with respect to any provision of the Federal Reserve Act which is made applicable under the International Banking Act of 1978;
- Any foreign bank which does not operate an insured branch;
- Any agency or commercial lending company other than a Federal agency;
- Supervisory or regulatory proceedings arising from the authority given to the Board of Governors under section 7(c)(1) of the International Banking Act of 1978, including such proceedings under the Financial Institutions Supervisory Act of 1966;
- Any bank holding company and any subsidiary (other than a depository institution) of a bank holding company; and
- Any savings and loan holding company and any subsidiary (other than a depository institution) of a savings and loan holding company.[177]

I. Other Revisions To Improve Readability

The proposed rule also would include various changes to simplify and modernize the language of Regulation O and to enhance its organization. For example, the proposed rule includes new subheadings and has replaced the term ''interest-bearing extension of credit plan'' in the section discussing the prohibition on overdrafts to certain insiders with ''interest bearing overdraft protection plan.''

VI. Economic Analysis

This section analyzes the potential economic impact of the proposed amendments to Regulation O. The economic analysis focuses on the effects of two key components of the proposal: (1) providing relief from the unintended application of insider lending restrictions to portfolio companies of qualifying fund complexes, and (2) adjusting dollar-based thresholds to account for inflation and economic growth, along with establishing an automatic indexing methodology. The analysis considers both the benefits and costs of these changes relative to the baseline. The proposal also provides clarifications and codifies existing interpretations of Regulation O, enhancing transparency and facilitating compliance by banks. The section does not further analyze these benefits.

The economic analysis is structured as follows. Section A provides an overview of the baseline, describing the current state of Regulation O and recent trends in fund complex ownership. Section B summarizes the proposed policy changes, with references to the detailed descriptions in Sections III.A and III.B of this **SUPPLEMENTARY INFORMATION**. Section C analyzes the economic impact of providing relief for qualifying fund complexes, and Section D analyzes the economic impact of adjusting and indexing dollar-based thresholds. Section E concludes.

Baseline

The baseline considers the current state of Regulation O, which imposes constraints on bank lending to insiders, including principal shareholders and related interests of principal shareholders, in order to mitigate potential for self-dealing. Under Regulation O, if a fund complex holds aggregate ownership of more than 10 percent in a bank, the fund complex becomes a principal shareholder of the bank directly subject to the insider lending limits and requirements. Additionally, any other company that a principal shareholder controls (holding at least 25 percent) or is presumed to control (holding more than 10 percent of and being the largest shareholder) becomes a ''related interest'' of the bank and is subject to these limits and requirements. In that event, the principal shareholder fund complex and its controlled portfolio companies would be considered insiders of the bank under Regulation O. Accordingly, the bank's lending to the principal shareholder fund complex and its fund-complex controlled portfolio companies would be subject to the lending limits and other restrictions and standards of Regulation O.

The rise in assets under management by index funds has significantly increased the number of firms subject to Regulation O, creating unintended regulatory consequences. As of April 2026, indexed mutual funds and exchange traded funds hold 63.6 percent of the total combined domestic equity held by the nation's long-term active and index mutual funds and exchange traded funds, representing nearly two-thirds of long-term fund assets in domestic equity and demonstrating the importance of passive investment strategies.[178] Despite this substantial share, index funds do not pose the risk of self-dealing that Regulation O was designed to mitigate. Passive investment strategies, by their nature, do not involve the type of active control or influence that would create conflicts of interest or opportunities for preferential treatment, yet index funds holding a significant share of market equity are subject to the same restrictions as active investors who may exert significant influence over portfolio companies.

To assess the magnitude of this trend and its impact on the application of Regulation O, the analysis relies on institutional ownership holding data from the S&P Global Capital IQ Ownership database.[179] The Board used this database to calculate the ownership of domestic banks and global non-bank portfolio companies for each fund group in aggregate.[180] [181]

As Table 1 shows, from the fourth quarter of 2004 to the fourth quarter of 2025, the number of banks of which fund groups hold more than 10% has increased sharply (by 247 percent). This growth is also observed for their holdings in non-banks (by 44 percent). Due to the data limitations noted above, these results may underestimate the number of entities potentially affected by Regulation O requirements. This trend suggests that the rapid growth of investment fund groups is at least partly responsible for the classification of fund complexes as principal shareholders of many banks.

[177] 12 U.S.C. 1813(q).

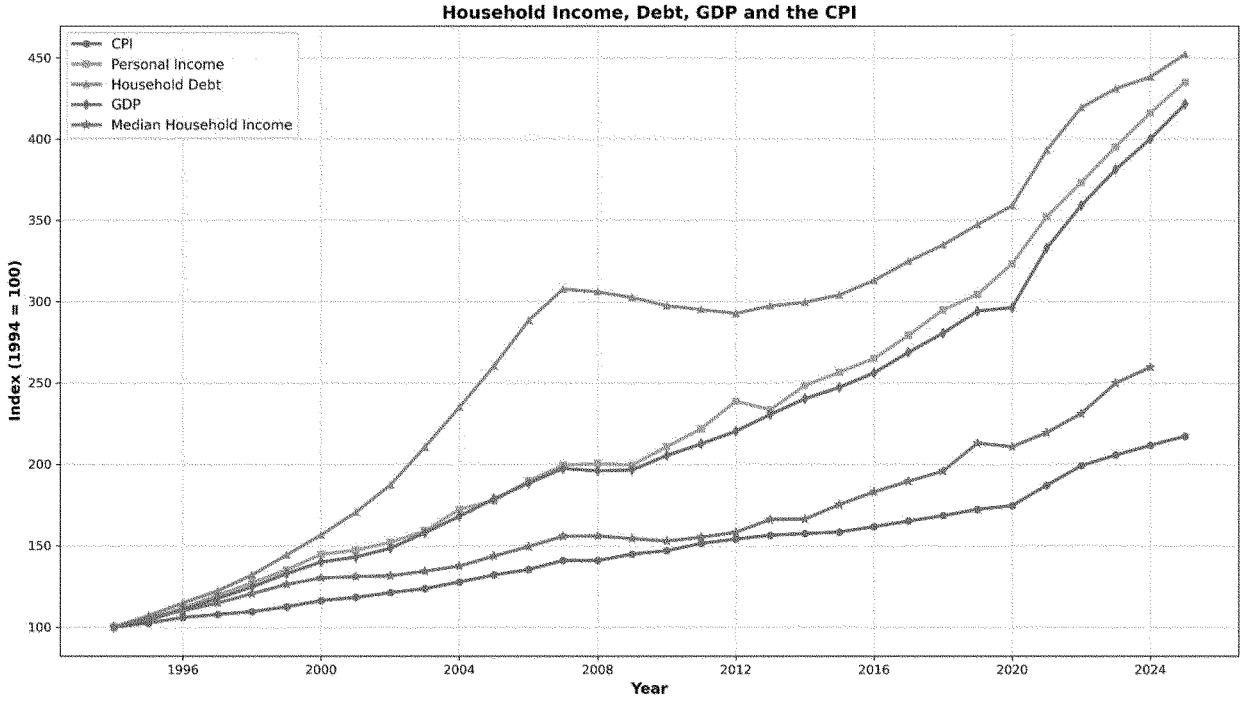
[178] Statistical report by the Investment Company Institute. *https://www.ici.org/research/stats/combined_active_index_0426#:~:text=Total%20Net%20Assets%20Long%2DTerm,53.4.*

[179] Note that the aggregation of holdings in all underlying subsidiary funds for a given fund manager may not match the holdings at the parent company level specified in S&P's database for a few reasons. Preliminarily, this disparity may be attributed to regulatory guidelines and governing bodies' mandates, which do not require all portfolio managers to report their holdings; therefore, S&P largely attributes this disparity to the discretion exercised by individual portfolio managers and mandated by regulatory thresholds. Furthermore, S&P omits fund-level holdings in the detailed view because institutional managers typically report total holdings on an issuer, encompassing fund holdings along with direct holdings. The presentation of parent-level holdings is based on specific logic considering relationships between entities within the same business line to prevent duplication. Additionally, variations arise due to different reporting dates, Principal Executive Officers, and filing sources.

[180] Following academic and regulatory research, the RSSD ID (assigned by the Federal Reserve's National Information Center as a universal identifier for financial institutions) is used to separate banks vs. non-banks. A financial institution is typically considered a ''bank'' if (i) it has an RSSD or (ii) it controls an institution with an RSSD and as a result the definition would include certain entities without an RSSD such as industrial loan companies, trust companies, and credit card banks. There are data limitations due to difficulties in identifying entities that meet the second criteria (ii) but the impact is likely small. Using one quarter report of total number of controlled banks provided by one fund complex, the discrepancy of missing entities that meet the second criteria (ii) is 9%.

[181] 9-character CUSIP (Committee on Uniform Securities Identification Procedures) identifiers are used to identify domestic companies.

TABLE 1—GROWTH OF FUND GROUP OWNERSHIP OF BANKS AND NON-BANK COMPANIES



Sample period	Number of banks held by fund groups >= 10%	Number of non-bank companies held by fund groups >=10% [182]
2004Q4	19	1,423
2025Q4	66	2047
Increase/(Decrease), No.	47	624
Increase/(Decrease), %	247%	44%

As described above, there are lending limits that apply to insiders and the companies they are presumed to control.[183] In light of the sharp rise in assets under management at these investment fund groups, if lending to all of these non-bank companies is counted against these lending limits it is possible that a bank may exceed the lending limits. Recognizing this issue, in December 2019, the Federal banking agencies issued a joint statement providing temporary relief to allow banks to continue to lend to certain fund complex-controlled portfolio companies, and this temporary relief has been extended through 2026. The proposal would provide permanent relief from this unintended consequence of Regulation O.

Next, the baseline analysis considers the fixed nominal thresholds that apply to certain loans and transactions with insiders. These thresholds have been unchanged since the Board last considered Regulation O in 1994.

Over time, increase in loan demand occurs due to both inflation, which drives up the cost, and economic activity, which increases the quantity of goods and services produced. For determining the appropriate indexed levels for the Regulation O dollar-based thresholds, staff considered data on household debt (need to borrow) and household income (ability to pay), relative to a number of different macroeconomic indicators such as GDP and the consumer price index (CPI).

The figure below depicts the evolution of five series: Personal Income, household debt, median household income, nominal GDP, and the CPI. All series are normalized to 100 as of 1994. The source data for these series are various U.S. statistical agencies, and the data are accessed via the St. Louis Fed's FRED® database.[184]

This figure shows that household debt has grown at a faster rate than nominal GDP over this period. In the early part of the period, one observes a rapid runup in household borrowing prior to the financial crisis. Personal Income tends to closely track GDP over this period, reflecting that the former is the largest single component of Gross Domestic Income. Median household income has grown at a somewhat slower pace than GDP over this period,[185] due to the accumulation of economic gains by high-income individuals and because GDP includes population growth effects while median household income is measured per household. Nonetheless, these series demonstrate significantly

[182] The data did not allow for determination of whether a specific fund complex is the largest shareholder so the number of non-banks subject to the presumption of control may be smaller than the amounts provided in the table.

[183] In particular, the individual lending limit, which allows for up to 15 percent of bank capital and surplus for unsecured lending and an additional 10 for secured lending, applies to a principal shareholder and *all* of its related interests.

[184] The specific series obtained from the FRED® database are PI, CMDEBT, MEHOINUSA646N, GDP, and CPIAUCSL, respectively.

[185] Data on median household income are available only up to 2024.

more growth over this period than the price level, with the CPI only growing by a factor just above 2 from 1994 to 2025. An examination of the indexed values for aggregate income, debt, and GDP at the end of 2025 indicate that, for a given nominal threshold, demand for loan products that exceed that threshold may have increased by a factor of 4 or more from 1994 to 2025, demonstrating the need for revising these thresholds.

Proposed Policy Changes

The proposal includes two major policy changes that are analyzed in this economic analysis.

First, as discussed in Section III.B, the proposal would provide relief from the unintended application of Regulation O to qualifying fund complexes by exempting their portfolio companies from the presumption of control. A qualifying fund complex must meet specific criteria designed to ensure that the relationship between the fund complex and the bank is sufficiently passive such that section 22(h) and Regulation O conflict of interest concerns are minimized. These criteria include requirements that the fund complex not be affiliated with a bank, that no individual fund hold more than 10 percent of any bank, that non-index funds not aggregately hold more than 10 percent of any bank, and that the fund complex not trigger any of the control presumptions under the Board's Regulation Y.

Second, as discussed in Section III.A, the proposal would increase various dollar-based thresholds in Regulation O to adjust for economic growth and inflation since the regulation was last updated. The proposal would also establish a methodology for automatically indexing these thresholds every five years going forward based on nominal GDP growth. This indexing mechanism would reduce unnecessary regulatory burden while retaining safeguards against self-dealing and conflicts of interest.

Effects of Proposed Approach To Address Ownership by Fund Complexes

This section analyzes the economic effects of the qualifying fund complex exemption described in Section III.B of this **SUPPLEMENTARY INFORMATION**. The primary benefits include maintaining access to conventional banking relationships for portfolio companies, reducing credit rationing, improving capital allocation efficiency, and substantially lowering compliance costs for both banks and fund complexes that would otherwise face burdensome monitoring, information collection, and procedural requirements. The costs are expected to be minimal, consisting primarily of regulatory arbitrage risks that are substantially mitigated by the proposal's multiple qualifying criteria. Overall, the proposal generates significant net benefits by refocusing Regulation O on its core purpose of mitigating potential for self-dealing while eliminating unnecessary restrictions on genuinely passive investors that are seeking exposure to a broad-based stock index.

Benefits

The proposed changes would address the unintended consequences of the regulatory presumption of control on lending to companies held by fund groups.

As a result of the proposal, portfolio companies of qualifying fund complexes would retain access to conventional banking relationships that would have been unnecessarily restricted by the insider lending requirements, maintaining their ability to secure financing for ordinary business operations. Many of these portfolio companies are large, publicly traded firms with substantial credit needs and banks naturally seek to lend to creditworthy borrowers in their markets. Such relationships could become curtailed due to the unintended application of Regulation O constraints. As shown in Table 1, the proposal would directly affect a substantial volume of potential lending relationships. As of Q4 2025, fund complexes are principal shareholders of approximately 66 banks, and fund complexes might be presumed to control approximately 2047 portfolio companies. Each of the 66 affected banks could potentially have lending relationships with any of the 2047 affected portfolio companies, representing up to 135,102 (66 multiplied by 2047) possible bank-borrower pairs subject to Regulation O restrictions. While not all potential relationships would be covered or materialize into actual loans, the analysis suggests that a meaningful number of lending relationships could be affected by the current regulatory structure. Even if a small fraction of these potential relationships represent actual or desired lending relationships, the proposal could exempt a significant number of relationships between banks and portfolio companies that are otherwise affected by the requirements of Regulation O.

Facilitating lending relationships between the banks and portfolio companies currently subject to unintended Regulation O requirements will eliminate an unintended constraint on lending relationships across portfolio companies and improve economic efficiency. In the case that banks cannot lend freely to creditworthy portfolio companies due to Regulation O constraints, both banks and borrowers face costs. Banks lose profitable lending opportunities with creditworthy borrowers while portfolio companies may face reduced access to bank credit, forcing them to use more expensive alternative financing. Such unintended restrictions on lending could prevent efficient capital allocation and some companies may forego productive investments or face delays in financing.

Reducing unnecessary barriers to lending will allow capital to flow more efficiently to productive uses, supporting business growth and economic activity. The improved capital allocation could potentially lead to more sustainable economic activity and support competitive banking markets.

Reduced Compliance Costs

Banks and fund complexes would also benefit from the reduced administrative costs associated with monitoring and managing related interest restrictions. All banks with principal shareholder fund complexes exempted from the Regulation O constraints under the proposal would benefit by avoiding costs associated with continuously monitoring ownership changes, obtaining prior board approvals for certain large loans, and collecting information about related interests across potentially thousands of portfolio companies. While the Board does not have sufficient information to quantify all aspects of these savings, the proposal would likely generate significant compliance cost reductions, as discussed below.

Banks and fund complexes would face significant costs in attempting to determine whether specific portfolio companies qualify as related interests under Regulation O's existing presumptions of control. This determination requires banks to assess whether a fund complex is the largest shareholder of a portfolio company, obtain real-time ownership levels across multiple funds and portfolio companies, and monitor whether ownership changes have created or eliminated ''related interest'' relationships. Banks must also maintain complex systems to aggregate exposures across numerous related interests and coordinate with fund complexes to obtain timely ownership information. The proposal would reduce these monitoring burdens and information collection costs by eliminating the need for banks to make ongoing determinations about whether

portfolio companies of qualifying fund complexes trigger the presumption of control. Banks will no longer need to continuously monitor whether a qualifying fund complex remains the largest shareholder of each portfolio company or track ownership percentage changes under 25 percent.

Under current Regulation O, large extensions of credit to insiders require approval by a majority of the bank's board of directors, with interested parties required to abstain from voting. Each board approval requires preparation of materials describing the proposed extension of credit, board member time to review and vote on the transaction, and documentation of the approval process. For banks with numerous fund complex-controlled portfolio companies that are classified as related interests, compliance with this requirement could involve many such board approvals annually. The proposal would provide benefits to banks with principal shareholder fund complexes by essentially eliminating this procedural requirement for all portfolio companies where the fund complex holds less than 25 percent of voting securities. These portfolio companies would no longer be classified as related interests subject to the prior approval requirement. This reduced procedural requirement could result in meaningful cost savings.

As noted above, based on Table 1, as of the first quarter of 2025, fund complexes are principal shareholders of 66 banks and these fund complexes might be presumed to control 2047 portfolio companies. This suggests that a meaningful number of banks would benefit from the proposed compliance cost reductions.

Costs

The proposed exception for qualifying fund complexes is expected to impose minimal costs relative to the substantial benefits described above. The primary costs arise from regulatory arbitrage risks that the exception could inadvertently permit some forms of preferential treatment or conflict of interest, though the proposal includes safeguards designed to prevent such outcomes.

The proposal creates a theoretical risk that fund complexes could restructure their operations or organizational forms to qualify for the exception while maintaining some degree of influence over bank lending decisions. Fund complexes might restructure voting arrangements, modify fund structures, or adjust ownership levels across individual funds in ways designed to meet the qualifying criteria while preserving elements of control or coordination that the exception is intended to exclude. However, the proposal includes multiple qualifying criteria designed to ensure that fund complexes benefiting from the exception are genuinely passive investors. Specifically, the proposal requires that no individual fund hold more than 10 percent of any bank, that non-index funds not aggregately hold more than 10 percent of any bank, and that the fund complex not be presumed to control the bank pursuant to the Board's existing control rule Regulation Y. These multiple, overlapping criteria substantially reduce the opportunity for fund complexes to restructure in ways that would qualify for the exception while maintaining meaningful control, and the Board expects that the probability of regulatory arbitrage is low. In addition, the proposal does not impact the Board's authority to determine that a fund complex has ''the power to exercise a controlling influence'' over a portfolio company even if the fund complex does not meet the rebuttable presumptions of control,[186] which provides an additional safeguard against attempts to exercise control through subtle or indirect means.

Effects of Proposed Adjustment of Thresholds

This section analyzes the economic effects of the threshold adjustments and indexing methodology described in Section III.A of the **SUPPLEMENTARY INFORMATION**. The primary benefits include a meaningful reduction in administrative burden for banks by decreasing the frequency with which routine transactions trigger regulatory requirements, such as approvals from a bank's board of directors, as well as ongoing benefits from automatic indexing that would maintain appropriate threshold values as the economy grows. Banks of all sizes would benefit from the reduced compliance costs, and insiders would maintain appropriate access to banking services without unnecessary regulatory restrictions on certain transactions. The costs include potential increase in the risks related to insider lending. However, safeguards remain in place to mitigate potential risks from higher thresholds, including requirements that all extensions of credit to insiders be made on substantially the same terms as to non-insiders and subject to individual and aggregate lending limits.

[186] *See* 12 U.S.C. 375b(9)(B)(iii).

Benefits

Banks would benefit from raising the dollar thresholds that have not kept pace with inflation and economic growth since 1994. The proposal would reduce administrative burden by decreasing the frequency with which certain transactions with insiders trigger regulatory requirements and would establish automatic indexing to maintain appropriate threshold values as the economy grows.

As the economy has grown, the dollar size of typical banking transactions has increased, causing the outdated thresholds to apply to more routine transactions than originally intended. The proposed threshold increases would address this problem by updating the values to be more reflective of current economic conditions, thereby reducing the administrative burden associated with regulatory requirements that have become unnecessarily restrictive. For example, the proposed increase in the prior approval threshold from $500,000 to $2 million would substantially reduce the number of insider transactions requiring heightened review. Each board approval requires preparation of materials describing the proposed extension, scheduling of board meetings or obtaining written consents, board member time to review and vote on the transaction, documentation of the approval process, and associated recordkeeping. Banks' current processes to ensure timely board review could be simplified for transactions falling between the current and proposed thresholds. The savings would be particularly significant for banks with existing insider lending relationships, as these banks could experience significant reductions in the number of board approvals required annually.

Beyond addressing the immediate burden created by outdated thresholds, the proposal would establish a methodology for indexing Regulation O thresholds based on changes in nominal GDP, which would provide ongoing benefits by automatically adjusting thresholds to reflect economic activity over time. This indexing methodology would prevent the erosion of threshold values that has occurred over the past several decades when thresholds remained fixed in nominal terms. By linking thresholds to nominal GDP growth, the proposal would eliminate the need for periodic rulemakings to update threshold values as economic activity and thus transactions over a given amount increase. Without indexing, banks would face a gradually increasing number of transactions

triggering regulatory requirements solely because nominal transaction sizes grow with the economy while thresholds remain fixed. The proposed indexing would prevent this inadvertent tightening of regulatory standards.

The proposed threshold adjustments are expected to benefit member banks of all sizes, though the distribution of benefits would vary based on the scale and nature of each bank's insider lending relationships. The proposal would also benefit insiders of banks by maintaining their access to banking services at their own bank without unnecessary regulatory restrictions on routine transactions. Executive officers and directors would be able to obtain credit cards with higher limits, maintain overdraft protection plans with higher limits, and access more business credit without triggering prior approval requirements for transactions that fall within the updated thresholds. This would be particularly beneficial in small and rural markets where alternative banking relationships may be limited and where insiders' business credit needs have grown substantially with the economy over the decades since the thresholds were last updated. Moreover, one bank may be reluctant to lend to an insider of another bank, as they could potentially worry about an adverse selection problem. As such, the proposal removes an impediment to these banks attracting and retaining skilled executive officers and directors.

Costs

The proposed threshold increases are designed to maintain the original calibration of regulatory requirements by adjusting for nominal GDP growth since the thresholds were last updated, thereby restoring them to approximately the same value relative to the economy as when they were originally established. However, the nominal increases could create potential risks that banks could extend larger amounts of credit to insiders without board approval or other safeguards that apply above the current thresholds. The proposal increases multiple thresholds, all by approximately fourfold to reflect nominal GDP growth since they were last updated. Most notably, under the proposal, a bank could extend $2 million to an insider without board approval, compared to $500,000 under current requirements. Additionally, executive officers could obtain extensions of credit for purposes other than home mortgages or education loans up to $400,000 (from $100,000), credit card debt up to $60,000 (from $15,000) would be exempt from the definition of ''extension of credit,'' and inadvertent overdrafts up to $4,000 (from $1,000) would be permitted. These increased thresholds could potentially allow for larger transactions that present conflicts of interest or self-dealing concerns to occur without the board oversight or other safeguards that the current requirements are designed to provide.

These potential risks are mitigated by several factors that ensure the threshold adjustments do not create meaningful new opportunities for self-dealing or conflicts of interest. First, the thresholds account for the increase in economic activity from the fourth quarter of 1994 to the fourth quarter of 2025, meaning that transactions requiring board approval today represent the same relative size and risk profile as transactions requiring board approval when the thresholds were last considered. Thus, the proposed thresholds are specifically calibrated to maintain the original value and the original regulatory requirements rather than creating new opportunities for larger transactions relative to typical bank capital levels and commercial lending activity in the economy. Second, all extensions of credit to insiders remain subject to the fundamental requirement that they be made on substantially the same terms as extensions to non-insiders and not involve more than normal risk of repayment, regardless of the size of the extension. Third, extensions of credit remain subject to the individual and aggregate lending limits in Regulation O, which constrain the total amount of credit that can be extended to any insider regardless of whether board approval is required. These continuing requirements ensure that the threshold adjustments do not create meaningful new risks of self-dealing or conflicts of interest.

In addition, the ongoing indexing of thresholds would create compliance costs by requiring banks to update their systems and procedures every five years to reflect adjusted threshold amounts based on changes in nominal GDP. However, this cost is expected to be marginal.

Conclusion

The proposed amendments to Regulation O are expected to generate substantial benefits by addressing two significant issues with the current regulatory framework. First, the exemption for portfolio companies of qualifying fund complexes from the presumptions of control would maintain access to conventional banking relationships for portfolio companies, improve capital allocation efficiency, and substantially reduce compliance costs for both banks and fund complexes, while preserving Regulation O's core purpose of preventing self-dealing through multiple qualifying criteria and safeguards. Second, the adjustment of dollar-based thresholds to reflect nominal GDP growth from the fourth quarter of 1994 to the fourth quarter of 2025 would reduce administrative burden for banks by making thresholds more reflective of current economic conditions. The establishment of ongoing indexing based on nominal GDP growth would prevent future erosion through a transparent, predetermined method.

The proposed threshold adjustments are designed to maintain the original calibration of regulatory requirements by restoring thresholds to approximately the same value relative to the economy in 1994, thereby preserving prudential safeguards against self-dealing and conflicts of interest. In addition to updating the calibration, the proposal preserves important safeguards by requiring that all extensions of credit to insiders be made on substantially the same terms as to non-insiders and remain subject to individual and aggregate lending limits.

Overall, the analysis demonstrates that the benefits of the proposal justify the costs, as the proposal refocuses Regulation O on transactions that genuinely present conflicts of interest while reducing unnecessary restrictions on passive investors and routine transactions that have grown with the economy.

VII. Regulatory Analysis

A. Paperwork Reduction Act

Certain provisions of the proposal contain ''collection of information'' requirements within the meaning of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521) (PRA). In accordance with the requirements of the PRA, the Board may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The information collection affected by this rulemaking is the Recordkeeping and Disclosure Requirements Associated with Regulation O (FR O; OMB No. 7100–0382). This Board proposes to extend this information collection for three years, with revision. The Board reviewed the proposal under the authority delegated to the Board by OMB.

Comments are invited on:

a. Whether the collections of information are necessary for the proper

performance of the Board's functions, including whether the information has practical utility;

b. The accuracy of the Board's estimate of the burden of the information collections, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of the information collections on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

All comments will become a matter of public record. Comments on aspects of this notice that may affect reporting, recordkeeping, or disclosure requirements and burden estimates should be sent to the addresses listed in the **ADDRESSES** section of this document. A copy of the comments may also be submitted to the OMB desk officer for the Board by mail to U.S. Office of Management and Budget, 725 17th Street NW, #10235, Washington, DC 20503; facsimile to (202) 395–6974; or email to *oira_submission@omb.eop.gov,* Attention, Federal Banking Agency Desk Officer.

Current Actions

The proposed rule would modify the disclosure requirement currently codified in section 215.9 of Regulation O. This section requires a bank, in response to a written request from a member of the public, to identify the executive officers and principal shareholders of the bank (and the related interests of such persons) that have outstanding extensions of credit in an amount equal to the lower of 5 percent of the bank's capital and unimpaired surplus or $500,000 as of the end of the latest previous quarter. No disclosure is required if the amount of the extensions of credit to a person and the person's related interests does not exceed $25,000.[187]

The proposed rule, restated at 215.31, would amend the threshold in this section for the amount of extensions of credit to be the lesser of 5 percent of the bank's unimpaired capital and unimpaired surplus and $2.0 million. The proposed rule would continue not to require disclosure when the amount of extensions of credit to an executive officer or principal shareholder, or to their related interests, does not exceed $25,000. The proposed rule also would amend the definition of ''principal shareholder'' for purposes of the disclosure requirement. Specifically, a bank's holding company no longer would be a principal shareholder. In addition, a foreign bank no longer would be excluded from the definition of principal shareholder. Taken together, the list of persons that must be disclosed by banks subject to Regulation O likely will be smaller under the proposed rule than under Regulation O as it currently is written.

The proposed rule also would create recordkeeping and disclosure requirements to ensure compliance by banks with the correspondent lending restrictions in 12 U.S.C. 1972. Under the proposal, member banks would be required to maintain records of extensions of credit to insiders of the member bank's correspondent or respondent bank. The proposed rule would permit banks with correspondent or respondent banks to use one of two methods prescribed by the rule to procure the information necessary to satisfy these recordkeeping requirements, or to propose an alternative to the bank's appropriate federal banking agency. The two methods set forth by the proposed rule are the survey method, whereby a bank sends an annual survey to each of its correspondent or respondent banks to identify their insiders; or the borrower inquiry method, whereby a bank asks all persons seeking an extension of credit to identify whether they are insiders of the bank's respondent or correspondent banks. Each of these methods would require the member bank to request the disclosure by third-parties of certain information to the bank.

The proposed amendments also relate to certain existing data items collected in the Federal Financial Institutions Examination Council (FFIEC) Reports of Condition and Income (Call Reports; FFIEC 031, 041, and 051). Any amendments to the Call Reports would be proposed separately by the FFIEC.

Proposed Extension for Three Years, With Revision, of the Following Information Collection

Collection title: Recordkeeping and Disclosure Requirements Associated with Regulation O.

Collection identifier: FR O.

OMB control number: 7100–0382.

General description of collection: The Board's Regulation O—Loans to Executive Officers, Directors, and Principal Shareholders of Member Banks (12 CFR part 215) governs any extension of credit made by a member bank to an executive officer, director, or principal shareholder of the member bank and any related interests of such persons or entities (insiders). Regulation O prohibits such extensions of credit to insiders unless they are made on substantially the same terms (including interest rates and collateral) as those prevailing at the time for comparable transactions by the bank with other persons who are not employed by the bank and do not involve more than the normal risk of repayment or present other unfavorable features. In addition, Regulation O limits extensions of credit by a member bank to individual insiders and to all insiders, requires a member bank's board of directors to approve certain large extensions of credit, and sets forth recordkeeping and disclosure requirements.

Pursuant to section 215.8 of the current Regulation O, respondents must maintain records necessary for compliance with the regulation. Under section 215.9 of the current Regulation O, upon receipt of a written request from the public, a respondent must make available certain information regarding extensions of credit that exceed a certain threshold. These two provisions are restated at 215.30 and .31.

Frequency: Event-generated.

Respondents: Insured depository institutions and uninsured member banks.

Total estimated number of respondents:

Recordkeeping

Section 215.30—4,464.
Section 215.31—608.

Disclosure

Section 215.31—608.

Estimated average hours per response:

Recordkeeping

Section 215.30—3.
Section 215.31—1.

Disclosure

Section 215.31—2.

Total estimated annual burden hours: 15,216.

B. Regulatory Flexibility Act

The Board is providing an initial regulatory flexibility analysis with respect to this proposed rule. The Regulatory Flexibility Act[188] (RFA), requires an agency to consider whether the rules it proposes will have a significant economic impact on a substantial number of small entities.[189]

[187] 12 CFR 215.9.

[188] 5 U.S.C. 601 *et seq.*

[189] Under regulations issued by the U.S. Small Business Administration (SBA), a small entity

Continued

In connection with a proposed rule, the RFA generally requires an agency to prepare and invite comment on an initial regulatory flexibility analysis describing the impact of the rule on small entities, unless the agency certifies that the proposed rule, if promulgated, would not have a significant economic impact on a substantial number of small entities. An initial regulatory flexibility analysis must contain (1) a description of the reasons why action by the agency is being considered; (2) a succinct statement of the objectives of, and legal basis for, the proposed rule; (3) a description of, and, where feasible, an estimate of the number of small entities to which the proposed rule will apply; (4) a description of the projected reporting, recordkeeping, and other compliance requirements of the proposed rule, including an estimate of the classes of small entities that will be subject to the requirement and the type of professional skills necessary for preparation of the report or record; (5) an identification, to the extent practicable, of all relevant Federal rules which may duplicate, overlap with, or conflict with the proposed rule; and (6) a description of any significant alternatives to the proposed rule which accomplish its stated objectives and minimize any significant economic impact of the proposed rule on small entities.[190]

The Board has considered the potential impact of the proposed rule on small entities in accordance with the RFA. Based on its analysis and for the reasons stated below, the Board believes that this proposed rule will not have a significant economic impact on a substantial number of small entities. Nevertheless, the Board is publishing and inviting comment on this initial regulatory flexibility analysis.

As discussed in this **SUPPLEMENTARY INFORMATION**, the proposed rule would amend Regulation O to incorporate existing statutory requirements that are not currently reflected in the regulation and would clarify certain definitions, exemptions, and other matters to reflect longstanding interpretations and to harmonize Regulation O with other Board regulations. The proposed amendments also would update several outdated dollar-based thresholds in Regulation O and index these thresholds going forward. In addition, the proposed amendments would address the application of Regulation O to member banks that lend to companies that are presumed to be controlled by large asset management companies through passive investment funds. Finally, the proposed amendments would revise and reorganize the regulation to streamline the text and make it more accessible. Some of these changes may require changes to reporting forms that would occur separately from this rulemaking.

The Board has broad authority under sections 22(g) and 22(h) to establish regulations restricting extensions of credit from a bank to its insiders, consistent with statutory requirements. The Board has codified these restrictions into its Regulation O. However, subsequent interpretations and statutory updates have clarified and expanded restrictions on bank extensions of credit. The proposed regulatory amendments would conform Regulation O to existing statutes and interpretations and, therefore, would provide necessary clarity to banks regarding their obligations.

Regulation O applies, by its terms, to all member banks, regardless of their size. The regulation affects all insured depository institutions, however, because other Federal law subjects insured nonmember banks and insured savings associations to sections 22(g) and 22(h) as if they were member banks. The rule also applies indirectly to the ''insiders'' of insured depository institutions, which, for RFA purposes, includes only insiders that are either (1) small business concerns; (2) small organizations, which are not-for-profit enterprises that are independently owned and operated and not dominant in their field; or (3) small governmental jurisdictions. The number of small entities affected by Regulation O is estimated to include 3,134 depository institutions.[191] The Board does not collect data on all insiders of depository institutions at this time. Accordingly, the exact number of small entities affected by the rule would require additional surveys or reports, which would increase the burden on the public and are not necessary for implementation of the rule. However, as discussed in more detail in section VII.A. of this **SUPPLEMENTARY INFORMATION**, the proposal would not include additional reporting requirements imposing any measurable burden. Any changes to reporting requirements would be limited to codifying existing statutory requirements, simplifying definitions applicable to disclosure requirements in Regulation O, scoping foreign banks into disclosure requirements as a result of Regulation O simplification, and consolidating certain disclosure requirements codified in Regulation O and Regulation Y into Regulation O. Although there is an additional recordkeeping requirement resulting from the codification of statutory correspondent lending restrictions, these methods are nearly identical to the methods set forth in Regulation O for a bank to maintain records to ensure compliance with Regulation O of loans to insiders of the bank's affiliates.

The Board is aware of no other Federal rules that duplicate, overlap, or conflict with the proposed changes to Regulation O. In addition, as indicated above, the proposal would not include additional reporting requirements imposing any measurable burden and, with respect to the proposed amendments to exempt portfolio companies of qualifying fund complexes from the presumptions of control and to adjust and index the dollar-based thresholds to account for economic growth and inflation, the proposal would provide relief and reduce regulatory burden. Accordingly, the Board is aware of no significant alternatives to the proposed rule that would reduce economic impact on small entities supervised by the Board.

For these reasons, the proposed rule is not expected to have a significant economic impact on a substantial number of small entities.

The Board welcomes written comments regarding this initial regulatory flexibility analysis, and requests that commenters describe the nature of any impact on small entities and provide empirical data to illustrate and support the extent of the impact.

C. Riegle Community Development and Regulatory Improvement Act of 1994

Pursuant to section 302(a) of the Riegle Community Development and Regulatory Improvement Act (RCDRIA),[192] in determining the effective date and administrative compliance requirements for new regulations that impose additional reporting, disclosure, or other requirements on insured depository institutions (IDIs), the federal banking agencies must consider, consistent with the principle of safety and soundness and the public interest, any

includes a depository institution with total assets of $850 million or less. *See* 13 CFR 121.201. Consistent with the SBA's General Principles of Affiliation, the Board includes the assets of all domestic and foreign affiliates toward the applicable size threshold when determining whether to classify a particular entity as a small entity. *See* 13 CFR 121.103. As of the first quarter of 2026, there were approximately 3,134 small state member banks, based on Call Report data as of March 31, 2026.

[190] 5 U.S.C. 603(b)–(c).

[191] Small entity information is from Call Report data as of March 31, 2026.

[192] 12 U.S.C. 4802(a).

administrative burdens that such regulations would place on depository institutions, including small depository institutions, and customers of depository institutions, as well as the benefits of such regulations. In addition, section 302(b) of RCDRIA requires new regulations and amendments to regulations that impose additional reporting, disclosures, or other new requirements on IDIs generally to take effect on the first day of a calendar quarter that begins on or after the date on which the regulations are published in final form, with certain exceptions, including for good cause.[193]

The proposed rule would modify the disclosure requirements related to extensions of credit by banks to their principal shareholders and executive officers, and any related interests of such persons, as discussed in section VII.A of this **SUPPLEMENTARY INFORMATION**. This modification likely will decrease the amount of information that most banks must disclose under the rule. The proposed rule otherwise does not include additional reporting requirements.

The proposed amendments relate to certain existing data items collected in the Federal Financial Institutions Examination Council (FFIEC) Reports of Condition and Income (Call Reports; FFIEC 031, 041, and 051). Any amendments to the Call Reports would be proposed separately by the FFIEC.

The Board invites comment on all aspects of the proposed rule and analysis related to RCDRIA.

D. Solicitation of Comments on the Use of Plain Language

Section 722 of the GLB Act requires the federal banking agencies to use plain language in proposed and final rulemakings published after January 1, 2000.[194] The Board has sought to present the proposed rule in a simple and straightforward manner and invites comment on the use of plain language in this proposal.

Question 98: Has the Board organized the proposal in a clear way? If not, how could the proposal organized more clearly?

Question 99: Are the requirements of the proposed rule clearly stated? If not, how could they be stated more clearly?

Question 100: Does the proposal contain unclear technical language or jargon? If so, which language requires clarification?

Question 101: Would a different format (such as a different grouping and ordering of sections, a different use of section headings, or a different organization of paragraphs) make the regulation easier to understand? If so, what changes would make the proposal clearer?

Question 102: What else could the Board do to make the proposal clearer and easier to understand?

E. Providing Accountability Through Transparency Act of 2023

The Providing Accountability Through Transparency Act of 2023 (*5 U.S.C. 553(b)(4)*) requires that a NPR include the internet address of a summary of not more than 100 words in length of the proposed rule, in plain language, that shall be posted on the internet website under section 206(d) of the E-Government Act of 2002 (*44 U.S.C. 3501 note*).

In summary, the Board proposes to amend its Regulation O (Loans To Executive Officers, Directors, And Principal Shareholders Of Member Banks) to update and modernize the regulation, clarify requirements and incorporate existing interpretations, and reduce regulatory burden. The proposal also would incorporate existing statutory requirements; update, and index going forward, several outdated dollar-based thresholds in Regulation O; and address the application of Regulation O to member banks that lend to companies presumed to be controlled by large asset management companies through passive investment funds. Finally, the proposal would revise and reorganize the regulation to make it more accessible.

The proposal and such a summary can be found at *https://www.regulations.gov* and *https://www.federalreserve.gov/supervisionreg/reglisting.htm.*

List of Subjects in 12 CFR Part 215

Administrative practice and procedure, Banks, Banking, Credit, Federal Reserve System, Holding Companies, Investments, Penalties, Reporting and recordkeeping requirements, and Securities.

Authority and Issuance

For the reasons stated in the **SUPPLEMENTARY INFORMATION**, the Board of Governors of the Federal Reserve System proposes to amend 12 CFR chapter II as follows:

■ 1. Revise Part 215 to read as follows:

PART 215—LOANS TO EXECUTIVE OFFICERS, DIRECTORS, AND PRINCIPAL SHAREHOLDERS OF MEMBER BANKS (REGULATION O)

Sec.

Subpart A—General Provisions

§ 215.1 Authority, purpose, and scope.
§ 215.2 Definitions.
§ 215.3 Extension of credit.
§ 215.4 Timing of application of requirements.
§ 215.5 Valuation principles.

Subpart B—Requirements for Extensions of Credit to All Insiders

§ 215.11 Terms and creditworthiness.
§ 215.12 Prior approval.
§ 215.13 Lending limits.
§ 215.14 Prohibition on knowingly receiving an unauthorized extension of credit.

Subpart C—Requirements for Extensions of Credit and Other Transactions With Certain Insiders

§ 215.20 Additional restrictions on extensions of credit to executive officers of a member bank.
§ 215.21 Additional restrictions on paying overdrafts on accounts of directors and executive officers of a member bank and its affiliates.
§ 215.22 Additional restrictions for extensions of credit related to existing and potential correspondent accounts.
§ 215.23 Prohibitions on asset purchases and sales between an insured depository institution and an insider.

Subpart D—Recordkeeping and Disclosure Requirements

§ 215.30 Records of member banks.
§ 215.31 Disclosure of credit from member banks to executive officers and principal shareholders.
§ 215.32 Disclosure requirement for credit secured by certain bank and holding company stock.

Subpart E—Civil Penalties

§ 215.40 Civil penalties.

Authority: 12 U.S.C. 248(a), 375a(10), 375b(9) and (10), 1468, 1817(k), 1828(z), 1972(2), and 5412; Pub. L. 102–242, 105 Stat. 2236 (1991) (12 U.S.C. 1811 note).

Subpart A—General Provisions

§ 215.1 Authority, purpose, and scope.

(a) *Authority.* This part is issued pursuant to sections 11(a), 22(g), and 22(h) of the Federal Reserve Act (12 U.S.C. 248(a), 375a, and 375b), 12 U.S.C. 1817(k), section 306 of the Federal Deposit Insurance Corporation Improvement Act of 1991 (Pub. L. 102–242, 105 Stat. 2236 (1991)), section 11 of the Home Owners' Loan Act (12 U.S.C. 1468), section 106 of the Bank Holding Company Act Amendments of 1970 (12 U.S.C. 1972), and sections 312(b)(2)(A) and 615(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (12 U.S.C. 1828(z)(2) and 5412).

(b) *Purpose and scope*—(1) This part governs:

(i) Any extension of credit by a member bank to an executive officer,

[193] 12 U.S.C. 4802.

[194] 12 U.S.C. 4809(a).

director, or principal shareholder of the member bank or of any affiliate of the member bank;

(ii) Any extension of credit by a member bank to a company controlled by such a person, or to a political or campaign committee that benefits or is controlled by such a person;

(iii) Asset purchases and sales between an insured depository institution and an insider of the insured depository institution described in paragraph (b)(1) or (2) of this section; and

(iv) Extensions of credit by a depository institution to an executive officer, director, or principal shareholder of another depository institution (or to a related interest of such person), if either institution maintains or seeks to maintain a correspondent account with the other institution.

(2) The Federal Deposit Insurance Act (12 U.S.C. 1828(j)) applies sections 22(g) and 22(h) of the Federal Reserve Act to insured State nonmember banks and insured branches of foreign banks in the same manner and to the same extent as if they were member banks, and the Home Owners' Loan Act (12 U.S.C. 1468(b)) applies sections 22(g) and 22(h) to insured savings associations in the same manner and to the same extent as if they were member banks.

(3) This part also implements the reporting and disclosure requirements of 12 U.S.C. 1817(k) concerning extensions of credit by a member bank to its executive officers or principal shareholders (or to the related interests of such persons).

§ 215.2 Definitions.

For purposes of this part, the following definitions apply unless otherwise specified:

Acting in concert has the meaning given in § 225.41(b)(2) of this chapter. For purposes of this part, the persons set forth in § 225.41(d)(1)–(6) of this chapter are presumed to be acting in concert, except that, for purposes of § 225.41(d)(2) of this chapter, the term ''immediate family'' has the meaning given in this section.

Affiliate means any company of which a member bank is a subsidiary or any other subsidiary of that company, but does not include a subsidiary of the member bank that is not a financial subsidiary (as defined in § 223.3 of this chapter).

Appropriate Federal banking agency with respect to a member bank or company has the meaning given in 12 U.S.C. 1813.

Board means the Board of Governors of the Federal Reserve System.

Carrying value with respect to a security means (unless otherwise provided) the value of the security on the financial statements of the member bank, determined in accordance with GAAP.

Class of voting securities has the meaning given in § 225.2 of this chapter.

Company means any corporation, limited liability company, partnership, trust (business or otherwise), association, joint venture, pool syndicate, sole proprietorship, unincorporated organization, or any other form of business entity not specifically listed herein. However, the term does not include:

(1) An insured depository institution; or

(2) A corporation, the majority of the shares of which are owned by the United States or by any State.

Control of a company or bank (1) means that a person directly or indirectly, or acting through or in concert with one or more persons:

(i) Owns, controls, or has the power to vote 25 percent or more of any class of voting securities of the company or bank;

(ii) Controls in any manner the election of a majority of the directors of the company or bank; or

(iii) Has the power to exercise a controlling influence over the management or policies of the company or bank.

(2) A person is presumed to have control, including the power to exercise a controlling influence over the management or policies, of a company or bank if:

(i) (A) The person is an executive officer or director of the company or bank; and

(B) The person directly or indirectly owns, controls, or has the power to vote more than 10 percent of any class of voting securities of the company or bank; or

(ii) (A) The person directly or indirectly owns, controls, or has the power to vote more than 10 percent of any class of voting securities of the company or bank; and

(B) No other person owns, controls, or has the power to vote a greater percentage of that class of voting securities;

(iii) In the case of a company or bank that is a trust:

(A) The person is a trustee of the trust; or

(B) The person is a settlor, appointer, or beneficiary of the trust, and has the power to:

(*1*) Remove or replace a trustee of the trust; and

(*2*) Limit the power of a trustee of the trust to purchase, sell, or exchange any investment or asset of the trust; and

(iv) The company or bank is controlled by an estate for which the person serves as executor.

(3) The presumptions of control in paragraph (2) of this definition do not apply for the purpose of determining whether a qualified fund complex controls a company through one or more investment funds for purposes of determining whether the company is a related interest of the qualified fund complex that is a principal shareholder of a member bank.

(4) An individual is not considered to have control, including the power to exercise a controlling influence over the management or policies, of a company or bank solely by virtue of the individual's position as an officer or director of the company or bank.

(5) A person may rebut a presumption established by paragraph (2) of this definition by submitting to the appropriate Federal banking agency written materials that, in the agency's judgment, demonstrate an absence of control. The appropriate Federal banking agency should consult with the Board in considering such a request.

Derivative transaction has the meaning given in 12 U.S.C. 84(b).

Derivative netting set means all derivative transactions with an individual counterparty that are governed by a qualifying master netting agreement (as defined in § 217.2 of this chapter).

Director of a company or bank means any director of the company or bank, whether or not receiving compensation. An advisory director is not considered a director if the advisory director:

(1) Is not elected by the shareholders of the company or bank;

(2) Is not authorized to vote on matters before the board of directors; and

(3) Provides solely general policy advice to the board of directors.

(4) Notwithstanding the definition of ''member bank'' in this section, a person is not a director of a member bank solely because the person is a director of a subsidiary of the member bank.

Executive officer of a company or bank (1) means a person who participates or has authority to participate (other than in the capacity of a director) in major policymaking functions of the company or bank, whether or not the officer has an official title, the title designates the officer an assistant, or the officer is serving without salary or other compensation.

(2) The chair of the board, president, treasurer, chief executive officer, chief

financial officer, chief lending officer, and chief investment officer of a company or bank are considered executive officers, unless the officer is excluded, by resolution of the board of directors or by the bylaws of the company or bank, from participation (other than in the capacity of a director) in major policymaking functions of the company or bank, and the officer does not actually participate therein.

(3) Executive officer of a company or bank does not include persons who may have official titles and may exercise a certain measure of discretion in the performance of their duties, including discretion in the making of loans, but who do not participate in the determination of major policies of the company or bank and whose decisions are limited by policy standards fixed by the senior management of the company or bank.

(4) Executive officer of a company or bank does not include a manager or assistant manager of a branch of the company or bank unless that individual participates, or is authorized to participate, in major policymaking functions of the bank or company.

(5) Notwithstanding the definition of ''member bank'' in this section, a person is not an executive officer of a member bank solely because the person is an executive officer of a subsidiary of the member bank.

Exempt official (1) means a person that:

(i) Is a director or executive officer of an affiliate of a member bank;

(ii) Is not a director or executive officer of the member bank; and

(iii) With respect to all positions as director or executive officer of an affiliate of a member bank:

(A) The director or executive officer is excluded, by resolution of the board of directors or by the bylaws of the member bank, from participation in major policymaking functions of the member bank, and the director or executive officer does not actually participate in such functions;

(B) The affiliate does not control the member bank; and

(C) As determined annually, the assets of the affiliate do not constitute more than 10 percent of the consolidated assets of the company that:

(*1*) Controls the member bank; and

(*2*) Is not controlled by any other company.

(2) For purposes of paragraph (1)(iii)(A) of this definition, a resolution of the board of directors or a corporate bylaw may:

(i) Include the director (by name or by title) in a list of persons excluded from participation in such functions; or

(ii) Not include the director in a list of persons authorized (by name or by title) to participate in such functions.

Foreign bank has the meaning given in 12 U.S.C. 3101(7).

GAAP means generally accepted accounting principles as used in the United States.

GDP growth adjustment means the most recent scalar published by the Board equal to the ratio of:

(1) The nominal United States gross domestic product in the 4th quarter of the calendar year prior to publication of the scalar, as reflected by the most current estimates published by the Bureau of Economic Analysis on or before September 30th of the year of the publication of the scalar, or a comparable value; to

(2) The nominal United States gross domestic product in the 4th quarter of the calendar year prior to [the effective date of a final rule], as reflected by the most current estimates published by the Bureau of Economic Analysis.

Immediate family means the spouse of an individual, the individual's minor children, and any of the individual's children (including adults) residing in the individual's home.

Insider of a member bank or company means:

(1) An executive officer or director of the member bank or company (other than an exempt official);

(2) A principal shareholder of the member bank or company; and

(3) Any related interest of a person described in paragraphs (1) or (2) of this definition.

Insured depository institution has the meaning given in 12 U.S.C. 1813.

Investment fund means an investment company registered under the Investment Company Act of 1940, as well as collective investment trusts, separately managed institutional accounts, and other pooled investment vehicles.

Member bank means any banking institution that is a member of the Federal Reserve System and includes any subsidiary of such banking institution. The term includes insured branches of foreign banks, as defined by 12 U.S.C. 1813(s), but does not otherwise include a foreign bank that maintains a branch in the United States.

Non-index fund (1) means an investment fund that does not:

(i) Have an investment objective of tracking the risk and return characteristics of a previously specified third-party broad-based market index by holding all, or a representative and preset sample of, the securities of the index in approximately the same proportions as their representation in the index; and

(ii) Use rules-based investing to track that broad-based market index by holding all of its constituent assets or an automatically selected representative sample of those assets in order to replicate the risk and return characteristics of the index.

(2) A third-party broad-based market index provides investors with a performance indicator of the overall applicable securities market, is not focused on any specific industries or sectors, and is not published or managed by the investment fund, its investment advisor, or any of their respective affiliates;

Pay an overdraft on an account means to pay an amount upon the order of an account holder in excess of funds on deposit in the account.

Person means an individual or a company.

Principal shareholder (1) means a person that directly or indirectly, or acting through or in concert with one or more persons, owns, controls, or has the power to vote more than 10 percent of any class of voting securities of a member bank or company. For clarification, shares owned or controlled by a member of an individual's immediate family are considered to be owned or controlled by the individual.

(2) A principal shareholder of a member bank or company does not include:

(i) A company of which the member bank is a subsidiary; or

(ii) The member bank.

Qualified fund complex (1) means a company that:

(i) Sponsors, manages, or advises investment funds that invest in voting securities of a regulated company;

(ii) Is not, and is not affiliated with, a bank holding company (as defined in § 225.2 of this chapter) or savings and loan holding company (as defined in § 238.2 of this chapter);

(iii) Does not meet any of the conditions that would give rise to a rebuttable presumption of control over a regulated company under § 225.32 of this chapter;

(iv) Does not sponsor, manage, or advise any investment fund that owns or controls more than 10 percent of any class of voting securities of a regulated company; and

(v) Does not sponsor, manage, or advise non-index funds that in the aggregate own or control more than 10 percent of any class of voting securities of a regulated company.

(2) For purposes of paragraph (1)(iv) of this definition, investment funds that share the same or substantially the same

investment objective and asset composition are treated as a single investment fund.

Regulated company means an insured depository institution, a bank holding company (as defined in § 225.2 of this chapter), or a savings and loan holding company (as defined in § 238.2 of this chapter).

Related interest of a person means:

(1) A company that is controlled by that person; or

(2) A political or campaign committee that is controlled by that person or the funds or services of which will benefit that person.

Securities financing transaction means any repurchase agreement, reverse repurchase agreement, securities borrowing transaction, or securities lending transaction, including a transaction in which a member bank acts as agent for a customer and indemnifies the customer against loss caused by the default of the bank's counterparty.

Subsidiary has the meaning given in 12 U.S.C. 1841(d).

Unimpaired capital and unimpaired surplus of a member bank equals the sum of:

(1) The bank's tier 1 and tier 2 capital included in the bank's risk-based capital under the capital rule of the appropriate Federal banking agency, based on the bank's most recent consolidated report of condition filed under 12 U.S.C. 1817(a)(3); and

(2) The balance of the bank's allowance for loan and lease losses or adjusted allowance for credit losses, as applicable, not included in the bank's tier 2 capital for purposes of the calculation of risk-based capital by the appropriate Federal banking agency, based on the bank's most recent consolidated report of condition filed under 12 U.S.C. 1817(a)(3).

(3) For a bank that is subject to the community bank leverage ratio framework (as defined in the capital rule of the appropriate Federal banking agency), unimpaired capital and unimpaired surplus means the bank's tier 1 capital (as defined in the capital rule of the appropriate Federal banking agency and as calculated in accordance with the community bank leverage ratio framework of the appropriate Federal banking agency) plus allowance for loan and lease losses or adjusted allowance for credit losses, as applicable.

§ 215.3 Extension of credit.

(a) An extension of credit to an insider is a making or renewal of any loan to an insider, a granting of a line of credit to an insider, or an extending of credit in any manner whatsoever to an insider, and includes:

(1) An advance to an insider by means of paying an overdraft on an account, cash item, or otherwise;

(2) Issuance of a guarantee, acceptance (including an ineligible acceptance as defined in § 208.24 of this chapter), or letter of credit, including an endorsement or standby letter of credit (as defined in § 208.24 of this chapter), on behalf of an insider, or a confirmation of a letter of credit issued by an insider;

(3) An advance to an insider of unearned salary or other unearned compensation for a period in excess of 30 days;

(4) A lease to an insider that is the functional equivalent of an extension of credit;

(5) An acquisition by purchase, discount, exchange, or otherwise of a note or other obligation, including commercial paper or debt securities, upon which an insider is liable as maker, drawer, endorser, guarantor, or surety;

(6) Any increase in the amount of, extension of maturity of, or adjustment to the interest rate term or other material term of, an extension of credit to an insider;

(7) A derivative transaction, derivative netting set, or securities financing transaction with an insider, the value of which (as calculated pursuant to § 215.5) is greater than zero; and

(8) Any other similar transaction as a result of which an insider becomes obligated to pay money (or its equivalent) to the member bank, whether the obligation arises directly or indirectly, or because of an endorsement on an obligation or otherwise, or by any means whatsoever.

(b) An extension of credit does not include:

(1) An advance to an insider against accrued salary or other accrued compensation, or an advance to an insider for the payment of authorized travel or other expenses incurred or to be incurred on behalf of the bank;

(2) A receipt by a bank of a check deposited in or delivered to the bank in the usual course of business, unless it results in the carrying of a cash item for an insider or the paying of an overdraft on an account to an insider;

(3) An acquisition of a note, draft, bill of exchange, or other evidence of indebtedness of an insider through:

(i) A merger or consolidation of banks or a similar transaction by which a bank acquires assets and assumes liabilities of another bank or similar organization; or

(ii) Foreclosure on collateral or similar proceeding for the protection of the bank, provided that such indebtedness is not held for a period of more than three years from the date of the acquisition, subject to extension by the appropriate Federal banking agency for good cause;

(4) (i) An endorsement or guarantee by an insider for the protection of a bank of any loan or other asset previously acquired by the bank in good faith; or

(ii) Any indebtedness of the insider to a bank for the purpose of protecting the bank against loss or of giving financial assistance to it;

(5) Aggregate indebtedness of an insider of $60,000, multiplied by the GDP growth adjustment, or less arising by reason of any general arrangement by which a bank:

(i) Acquires charge or time credit accounts; or

(ii) Makes payments to or on behalf of participants in a bank credit card plan, check credit plan, or similar open-end credit plan, provided:

(A) The indebtedness does not involve prior individual clearance or approval by the bank other than for the purposes of determining authority to participate in the arrangement and compliance with any dollar limit under the arrangement; and

(B) The indebtedness is incurred under terms that are not more favorable than those offered to the general public;

(6) Aggregate indebtedness of an insider of $20,000, multiplied by the GDP growth adjustment, or less arising by reason of a written, preauthorized, interest-bearing overdraft protection plan that specifies a method of repayment;

(7) A discount of promissory notes, bills of exchange, conditional sales contracts, or similar paper owned by an insider, without recourse to the insider; or

(8) An advance of funds that increases an existing indebtedness of an insider, if the additional funds are advanced by the bank for its own protection for:

(i) Accrued interest; or

(ii) Taxes, insurance, or other expenses incidental to the existing indebtedness.

(9) Except for purposes of § 215.20 of this part, a loan:

(i) Made pursuant to the ''Paycheck Protection Program'' in which the participation by the Small Business Administration on a deferred basis is 100 percent;

(ii) For which material terms, including the maturity and the interest rate, are set by the Small Business Administration;

(iii) That is made during the ''covered period,'' as that term is defined in 15 U.S.C. 636(a)(36)(A)(iii), but in no case later than March 31, 2022; and

(iv) That would not be prohibited by 13 CFR 120.110(o) or rules or interpretations thereof issued by the Small Business Administration.

(c) Non-interest-bearing deposits to the credit of a bank are not considered loans, advances, or extensions of credit to the bank of deposit; nor is the giving of immediate credit to a bank upon uncollected items received in the ordinary course of business considered to be a loan, advance or extension of credit to the depositing bank.

(d) A participation without recourse is considered to be an extension of credit by the participating bank, not by the originating bank.

(e) *Tangible economic benefit rule*—(1) *In general.* An extension of credit is considered made to an insider to the extent that the proceeds are transferred to the insider or are used for the tangible economic benefit of the insider.

(2) *Beneficiaries of trusts and estates.* For purposes of this part, the proceeds of an extension of credit to a trust or estate are treated as being transferred to an insider or used for the tangible economic benefit of the insider if the insider has a 25 percent or more present or contingent beneficial interest in the trust or estate.

(3) *Spouse of an insider.* For purposes of this part, the proceeds of an extension of credit to a spouse of an insider or to the related interest of such spouse are treated as being transferred to the insider or used for the tangible economic benefit of the insider, unless:

(i) The spouse or related interest is independently creditworthy;

(ii) Repayment of the extension of credit is not predicated on the insider's income or assets; and

(iii) In the case of an extension of credit to a related interest of the spouse of an insider, the insider does not have a financial or ownership interest in, or participate in the management of, the related interest.

(4) *Exception.* An extension of credit is not considered made to an insider under paragraph (e) of this section if:

(i) The credit is extended on terms that would satisfy the standard set forth in § 215.11(a) for extensions of credit to insiders; and

(ii) The proceeds of the extension of credit are used in a bona fide transaction to acquire property, goods, or services from the insider.

§ 215.4 Timing of application of requirements.

(a) *Timing of an extension of credit.* An extension of credit to an insider by a member bank is considered to have been made at the time the bank enters into a binding commitment to make the extension of credit.

(b) *Extensions of credit to noninsiders that later become insiders.* An extension of credit by a member bank to a noninsider that later becomes an insider is not subject to this part if:

(1) The member bank includes the amount of the extension of credit towards any quantitative limit in this part for purposes of determining whether a future extension of credit to the insider would comply with the quantitative limit; and

(2) The member bank did not enter into the transaction in contemplation of the noninsider becoming an insider.

(c) *Lines of credit.* Paragraph (b) of this section ceases to apply to a line of credit beginning 14 months after the date that the noninsider becomes an insider.

§ 215.5 Valuation principles.

(a) *Extensions of credit.* (1) Except as provided in paragraphs (a)(2), (a)(3), (b), or (c) of this section, an extension of credit to an insider must be valued at the greater of:

(i) The principal amount of the extension of credit;

(ii) The amount owed by the insider to the member bank under the transaction; or

(iii) The sum of:

(A) The amount provided to, or on behalf of, the insider in the transaction; and

(B) Any additional amount that the member bank could be required to provide to, or on behalf of, the insider under the terms of the transaction.

(2) If a member bank acquires an extension of credit to an insider, the extension of credit must be valued at the sum of:

(i) The total amount of consideration given (including liabilities assumed) by the member bank in exchange for the extension of credit; and

(ii) Any additional amount that the member bank could be required to provide to, or on behalf of, the insider under the terms of the transaction.

(3) A member bank's purchase of or investment in a debt security issued by an insider must be valued at the greater of:

(i) The total amount of consideration given (including liabilities assumed) by the member bank in exchange for the security, reduced to reflect amortization of the security to the extent consistent with GAAP; or

(ii) The carrying value of the security.

(b) *Derivative transaction or derivative netting set.*

(1) Except as provided in paragraph paragraphs (b)(2) of this section, a credit exposure from a derivative transaction or derivative netting set with an insider must be valued using any of the methods that the member bank is authorized to use under the capital rule issued by the member bank's appropriate Federal banking agency;

(2) A credit derivative between a member bank and a third-party in which the member bank provides credit protection to the third-party with respect to an obligation of an insider of the member bank is a guarantee by a member bank on behalf of an insider for purposes of this regulation. A credit exposure from a transaction in such credit derivatives would be valued at the greater of (i) the notional principal amount or (ii) the maximum potential loss to the member bank on the transaction. Such derivatives would include:

(i) An agreement under which the member bank, in exchange for a fee, agrees to compensate the third-party for any default of the underlying obligation of the insider;

(ii) An agreement under which the member bank, in exchange for payments based on the total return of the underlying obligation of the insider, agrees to pay the third-party a spread over funding costs plus any depreciation in the value of the underlying obligation of the insider;

(iii) An equity derivative under which the member bank, in exchange for a fee, agrees to compensate a third-party for any depreciation in the value of an equity security of the insider; and

(iv) A total return swap, whether funded or unfunded, under which the member bank, in exchange for a fee, agrees to compensate a third-party for any loss or depreciation in the value of a security or debt obligation issued by an insider.

(c) *Securities financing transaction.* A securities financing transaction with an insider must be valued using:

(1) Any of the methods that the member bank is authorized to use under the capital rule issued by the member bank's appropriate Federal banking agency; [195] or

(2) The simplified amount calculated pursuant to paragraph (d) of this section.

(d) *Simplified amount.* The simplified amount for a securities financing transaction equals:

(1) The market value of cash and securities transferred by the member

[195] 12 CFR part 3 (Office of the Comptroller of the Currency); 12 CFR part 208 (Board); 12 CFR part 324 (Federal Deposit Insurance Corporation).

bank to the insider as part of the transaction; *less*

(2) The market value of cash in a segregated deposit account with the member bank in which the bank has a perfected security interest and any obligations of, or fully guaranteed as to principal and interest by, the United States or its agencies, transferred by the insider to the member bank as part of the transaction.

§ 215.6 Indexing dollar-based thresholds.

(a) *In general.* The Board will publish a GDP growth adjustment and adjusted thresholds every five years starting with [the effective date of a final rule].

(b) *Rounding.* When adjusting thresholds under paragraph (a) of this section, each threshold shall be rounded based on the size of the threshold (*e.g.,* thousands, millions) to the nearest number with two significant digits, such that:

(1) Each threshold in the thousands shall be rounded to the nearest number with one significant digit; and

(2) Each threshold in the millions shall be rounded to the nearest number with two significant digits.

(c) *Exception.* Notwithstanding paragraph (a) of this section, the Board will not publish an updated GDP growth adjustment if the five-year cumulative growth of nominal U.S. GDP is negative.

Subpart B—Requirements for Extensions of Credit to All Insiders

§ 215.11 Terms and creditworthiness.

(a) *In general.* A member bank must not extend credit to any insider of the bank or insider of its affiliates unless the extension of credit:

(1) Is made on substantially the same terms (including interest rates and collateral) as, and following credit underwriting procedures that are not less stringent than, those prevailing at the time for comparable transactions by the bank with other persons that are not covered by this part and who are not employed by the bank; and

(2) Does not involve more than the normal risk of repayment or present other unfavorable features.

(b) *Exception.* Nothing in this section or § 215.21(b)(3)(ii) shall prohibit any extension of credit made pursuant to a benefit or compensation program—

(1) That is widely available to employees of the member bank and, in the case of extensions of credit to an insider of its affiliates, is widely available to employees of the affiliates at which that person is an insider; and

(2) That does not give preference to any insider of the member bank over other employees of the member bank and, in the case of extensions of credit to an insider of its affiliates, does not give preference to any insider of its affiliates over other employees of the affiliates at which that person is an insider.

§ 215.12 Prior approval.

(a) A member bank must not extend credit (which term includes granting a line of credit) to any insider of the bank or insider of its affiliates in an amount that, when aggregated with the amount of all other extensions of credit to that person and to all related interests of that person, exceeds the lower of 5 percent of the member bank's unimpaired capital and unimpaired surplus, or $2,000,000, multiplied by the GDP growth adjustment, unless:

(1) The extension of credit has been approved in advance by a majority of the entire board of directors of that bank; and

(2) Any interested party has abstained from participating directly or indirectly in the voting.

(b) Approval by the board of directors under paragraph (a) of this section is not required for an extension of credit that is made pursuant to a line of credit that was approved under paragraph (a) of this section within 14 months of the date of the extension of credit. The extension of credit must also be in compliance with the requirements of § 215.11.

(c) Participation in the discussion, or any attempt to influence the voting, by the board of directors regarding an extension of credit constitutes indirect participation in the voting by the board of directors on an extension of credit.

§ 215.13 Lending limits.

(a) *Individual lending limit*—(1) *In general.* A member bank must not extend credit to an insider of the bank or insider of its affiliates if the amount of the extension of credit, when aggregated with the amount of all other extensions of credit by the bank to that person and to all related interests of that person would exceed:

(i) The limit of loans to a single borrower established by 12 U.S.C. 84(a), which is 15 percent of the bank's unimpaired capital and unimpaired surplus in the case of loans that are not fully secured, and an additional 10 percent of the bank's unimpaired capital and unimpaired surplus in the case of loans that are fully secured by readily marketable collateral having a market value, as determined by reliable and continuously available price quotations, at least equal to the amount of the loan. This limit also includes any higher amounts that are permitted by 12 U.S.C. 84(c) and (d) for the types of obligations listed therein as exceptions to the limit established by 12 U.S.C. 84(a).

(ii) In the case of a State member bank, any lending limit set forth by State law applicable to the bank.

(2) *Line of credit.* For purposes of paragraph (a)(1) of this section, the unused portion of a line of credit will be deemed to have been collateralized if the member bank that makes the line of credit does not have any legal obligation to advance funds pursuant to the line of credit until the insider provides the amount of collateral required by paragraph (a)(1) of this section with respect to the entire used portion (including the amount of the requested draw) of the line of credit.

(b) *Aggregate lending limit*—(1) *General limit.* A member bank must not extend credit to any insider of the bank or insider of its affiliates unless the extension of credit is in an amount that, when aggregated with the amount of all outstanding extensions of credit by that bank to all such insiders, does not exceed the bank's unimpaired capital and unimpaired surplus.

(2) *Member banks with deposits of less than $100,000,000.* (i) A member bank with deposits of less than $100,000,000 may by an annual resolution of its board of directors increase the general limit specified in paragraph (b)(1) of this section to a level not to exceed two times the bank's unimpaired capital and unimpaired surplus, if:

(A) The board of directors determines that such higher limit is consistent with prudent, safe, and sound banking practices in light of the bank's experience in lending to its insiders and is necessary to attract or retain directors or to prevent restricting the availability of credit in small communities;

(B) The resolution sets forth the facts and reasoning on which the board of directors bases the finding, including the amount of the bank's lending to its insiders as a percentage of the bank's unimpaired capital and unimpaired surplus as of the date of the resolution;

(C) The bank meets or exceeds, on a fully-phased in basis, all applicable capital requirements established by the appropriate Federal banking agency; and

(D) The bank received a satisfactory composite rating in its most recent report of examination.

(ii) If a member bank has adopted a resolution authorizing a higher limit pursuant to paragraph (b)(2)(i) of this section and subsequently fails to meet the requirements of paragraph (b)(2)(i)(C) or (b)(2)(i)(D) of this section, the member bank must not extend any

additional credit (including a renewal of any existing extension of credit) to any insider of the bank or its affiliates unless such extension is consistent with the general limit in paragraph (b)(1) of this section.

(3) *Exceptions.* (i) The general limit specified in paragraph (b)(1) of this section does not apply to the following:

(A) Extensions of credit secured by a perfected security interest in bonds, notes, certificates of indebtedness, or Treasury bills of the United States or in other such obligations fully guaranteed as to principal and interest by the United States;

(B) Extensions of credit to or secured by unconditional takeout commitments or guarantees of any department, agency, bureau, board, commission or establishment of the United States or any corporation wholly owned directly or indirectly by the United States;

(C) Extensions of credit secured by a perfected security interest in a segregated deposit account in the lending bank; or

(D) Extensions of credit arising from the discount of negotiable or nonnegotiable installment consumer paper that is acquired from an insider and carries a full or partial recourse endorsement or guarantee by the insider, provided that:

(1) The financial condition of each maker of such consumer paper is reasonably documented in the bank's files or known to its officers;

(2) An officer of the bank designated for that purpose by the board of directors of the bank certifies in writing that the bank is relying primarily upon the responsibility of each maker for payment of the obligation and not upon any endorsement or guarantee by the insider; and

(3) The maker of the instrument is not an insider.

(ii) The exceptions in paragraphs (b)(3)(i)(A) through (b)(3)(i)(C) of this section apply only to the amounts of such extensions of credit that are secured in the manner described therein.

§ 215.14 Prohibition on knowingly receiving an unauthorized extension of credit.

An executive officer, director, or principal shareholder of a member bank or any of its affiliates (other than an exempt official) must not knowingly receive (or knowingly permit any of that person's related interests to receive) from a member bank, directly or indirectly, any extension of credit not authorized under this part.

Subpart C—Requirements for Extensions of Credit and Other Transactions With Certain Insiders

§ 215.20 Additional restrictions on extensions of credit to executive officers of a member bank.

(a) *Scope.* The restrictions in this section on extensions of credit by a member bank to any of its executive officers apply in addition to any restrictions on extensions of credit by a member bank to its insiders or insiders of its affiliates set forth elsewhere in this part. The restrictions of this section apply only to executive officers of the member bank and not to executive officers of its affiliates or to related interests of executive officers of the member bank. For purposes of this section, however, an extension of credit by a member bank to a related interest of an executive officer must be treated as having been made to the executive officer, if the related interest:

(1) Is the alter ego of the executive officer; and

(2) Has no independent means to repay the extension of credit.

(b) A member bank must not extend credit to any of its executive officers, and an executive officer of a member bank must not borrow from or otherwise become indebted to the bank, except in the amounts, for the purposes, and upon the conditions specified in paragraphs (d) and (e) of this section.

(c) A member bank must not extend credit in an aggregate amount greater than the amount permitted in paragraph (d)(4) of this section to a partnership in which one or more of the bank's executive officers are partners and, either individually or together, hold a majority interest. For the purposes of paragraph (d)(4) of this section, the total amount of credit extended by a member bank to such partnership is considered to be extended to each executive officer of the member bank who is a member of the partnership.

(d) A member bank is authorized to extend credit to any executive officer of the bank:

(1) In any amount to finance the education of the executive officer's children;

(2) In any amount to finance or refinance the purchase, construction, maintenance, or improvement of a single residence of the executive officer, provided:

(i) The extension of credit is secured by a first lien on the residence and the residence is owned (or expected to be owned after the extension of credit) by the executive officer;

(ii) The property is not used for investment purposes, including renting or leasing out any portion of the property for income;

(iii) The executive officer lives at the property for at least three months each year; and

(iv) In the case of a refinancing, that only the amount thereof used to repay the original extension of credit, together with the closing costs of the refinancing, and any additional amount thereof used for any of the purposes enumerated in this paragraph (d)(2), are included within this category of credit;

(3) In any amount, if the extension of credit is secured in a manner described in § 215.13(b)(3)(i)(A)–(C); and

(4) For any other purpose not specified in paragraphs (d)(1)–(3) of this section, if the aggregate amount of extensions of credit to that executive officer under this paragraph (d)(4) does not exceed at any one time the lower of 2.5 percent of the member bank's unimpaired capital and unimpaired surplus or $400,000, multiplied by the GDP growth adjustment.

(e) Any extension of credit by a member bank to any of its executive officers must be:

(1) Promptly reported to the member bank's board of directors;

(2) In compliance with the requirements of § 215.11;

(3) Preceded by the submission of a detailed current financial statement of the executive officer; and

(4) Made subject to the condition in writing that the extension of credit will, at the option of the member bank, become due and payable at any time that the officer is indebted to any other bank or banks in an aggregate amount greater than the amount specified for a category of credit in paragraph (d) of this section.

§ 215.21 Additional restrictions on paying overdrafts on accounts of directors and executive officers of a member bank and its affiliates.

(a) *Scope.* This section applies to payments of overdrafts by a member bank on an account of an executive officer or director of the member bank, or on an account of an executive officer or director of its affiliates that is not an exempt official. This section does not apply to payments of overdrafts on an account of a related interest of such an executive officer or director.

(b) A member bank must not pay an overdraft on an account of an executive officer or director of the member bank, or executive officer or director of its affiliates that is not an exempt official, unless the payment is made:

(1) Pursuant to a written, preauthorized, interest-bearing overdraft protection plan that specifies a method of repayment;

(2) Pursuant to a written, preauthorized transfer of funds from another account of the account holder at the member bank; or

(3) Inadvertently, if:

(i) The account is not overdrawn for more than five business days;

(ii) The member bank charges the executive officer or director the same fee charged any other customer of the bank in similar circumstances; and

(iii) The aggregate amount of all payments of overdrafts on an account of the account holder pursuant to paragraph (b)(3) of this section does not exceed $4,000, multiplied by the GDP growth adjustment.

§ 215.22 Additional restrictions for extensions of credit related to existing and potential correspondent accounts.

(a) For purposes of this section:

(1) The term ''bank'' has the meaning given in 12 U.S.C. 1841(c) and includes a mutual savings bank, a savings bank, a savings association (as those terms are defined in 12 U.S.C. 1813), and any subsidiary of the foregoing;

(2) The term ''correspondent account'' means an account that is maintained by a bank with another bank for the deposit or placement of funds; and

(3) The term ''insider'' of a bank means:

(i) An executive officer or director of the bank;

(ii) (A) A person that directly or indirectly, or acting through or in concert with one or more persons, owns, controls, or has the power to vote more than 10 percent of any class of voting securities of the bank;

(B) Shares owned or controlled by a member of an individual's immediate family are considered to be owned or controlled by the individual; and

(iii) Any related interest of a person described in paragraphs (a)(3)(i) and (a)(3)(ii) of this section.

(b) A bank must not extend credit to the insider of a second bank if the bank maintains a correspondent account in the name of the second bank, or the second bank maintains a correspondent account in the name of the bank, unless the extension of credit is made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons and does not involve more than the normal risk of repayment or present other unfavorable features; and

(c) A bank must not open a correspondent account at a second bank if the bank has an outstanding extension of credit to an insider of the second bank or the second bank has an outstanding extension of credit to an insider of the bank, unless the extension of credit is made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons and does not involve more than the normal risk of repayment or present other unfavorable features.

§ 215.23 Prohibitions on asset purchases and sales between an insured depository institution and an insider.

(a) For purposes of this section the term ''purchase an asset'' means the acquisition by an insured depository institution of an asset from an insider in exchange for cash or any other consideration, including an assumption of liabilities. The merger of an insider into an insured depository institution is a purchase of assets by the insured depository institution from an insider if the insured depository institution assumes any liabilities of the insider or pays any other form of consideration in the transaction.

(b) An insured depository institution must not purchase an asset from, or sell an asset to, an insider of the institution unless:

(1) The purchase or sale:

(i) Is on terms and under circumstances that are substantially the same, or at least as favorable to the insured depository institution, as those prevailing at the time for comparable transactions with or involving persons that are not insiders of the insured depository institution; or

(ii) In the absence of comparable transactions, is on terms and under circumstances that in good faith would be offered to, or would apply to, persons that are not insiders of the insured depository institution; and

(2) The transaction has been approved in advance by a majority of the members of the board of directors of the insured depository institution who are not an interested party with respect to the transaction, if the amount of the purchase or sale represents more than 10 percent of the unimpaired capital and unimpaired surplus of the insured depository institution.

(c) Participation in the discussion, or any attempt to influence the voting, by the board of directors regarding a purchase or sale of assets subject to this section constitutes indirect participation in the voting by the board of directors on the purchase or sale of assets.

Subpart D—Recordkeeping and Disclosure Requirements

§ 215.30 Records.

(a) *In general.* A member bank must maintain records necessary for compliance with the requirements of this part.

(b) *Safe harbors.*

(1) A member bank that uses one of the methods set forth in paragraphs (d)(1) or (d)(2) of this section satisfies the requirements of paragraph (d) of this section.

(2) A member bank that uses one of the methods set forth in paragraphs (e)(1) or (e)(2) of this section satisfies the requirements of paragraph (e) of this section.

(c) *Recordkeeping for insiders of the member bank.* Any recordkeeping method adopted by a member bank must:

(1) Identify, through an annual survey, all insiders of the bank itself; and

(2) Maintain records of all extensions of credit to insiders of the bank itself, including the amount and terms of each such extension of credit.

(d) *Recordkeeping for insiders of the member bank's affiliates.* Any recordkeeping method adopted by a member bank must maintain records of extensions of credit to insiders of the member bank's affiliates by:

(1) *Survey method.* (i) Identifying, through an annual survey, each insider of the member bank's affiliates; and

(ii) Maintaining records of the amount and terms of each extension of credit by the member bank to such insiders; or

(2) *Borrower inquiry method.* (i) Requiring as part of each extension of credit that the borrower indicate whether the borrower is an insider of an affiliate of the member bank; and

(ii) Maintaining records that identify the amount and terms of each extension of credit by the member bank to borrowers so identifying themselves.

(3) *Alternative recordkeeping methods for insiders of affiliates.* A member bank may employ a recordkeeping method other than those identified in paragraphs (d)(1) and (d)(2) of this section if the appropriate Federal banking agency determines that the bank's method is at least as effective as the identified methods.

(e) *Recordkeeping for insiders of a correspondent or respondent bank.* For purposes of this paragraph (e), the term insider has the meaning set forth in § 215.22(a)(3). Any recordkeeping method adopted by a member bank must maintain records of extensions of credit to insiders of the member bank's correspondent or respondent bank by:

(1) *Survey method.* (i) Identifying, through an annual survey of each correspondent or respondent bank of the member bank, each insider of the member bank's correspondent or respondent bank; and

(ii) Maintaining records of the amount and terms of each extension of credit by the member bank to such insiders; or

(2) *Borrower inquiry method.* (i) Requiring as part of each extension of credit that the borrower indicate whether the borrower is an insider of the member bank's correspondent or respondent bank; and

(ii) Maintaining records that identify the amount and terms of each extension of credit by the member bank to borrowers so identifying themselves.

(3) *Alternative recordkeeping methods.* A member bank may employ a recordkeeping method other than those identified in paragraphs (e)(1) and (e)(2) of this section if the appropriate Federal banking agency determines that the bank's method is at least as effective as the identified methods.

(f) *Special rule for non-commercial lenders.* A member bank that is prohibited by law or by an express resolution of the board of directors of the bank from making an extension of credit to any company or other entity that is covered by this part as a company is not required to maintain any records of the related interests of the insiders of the bank or its affiliates or to inquire of borrowers whether they are related interests of the insiders of the bank or its affiliates.

§ 215.31 Disclosure of credit from member banks to executive officers and principal shareholders.

(a) *Public disclosure.* (1) Upon receipt of a written request from the public, a member bank must make available the names of each of its executive officers and each of its principal shareholders to whom, or to whose related interests, the member bank had outstanding as of the end of the latest previous quarter of the year, an extension of credit that, when aggregated with all other outstanding extensions of credit at such time from the member bank to such person and to all related interests of such person, equaled or exceeded 5 percent of the member bank's unimpaired capital and unimpaired surplus or $2,000,000, multiplied by the GDP growth adjustment, whichever amount is less. No disclosure under this paragraph is required if the aggregate amount of all extensions of credit outstanding at such time from the member bank to the executive officer or principal shareholder of the member bank and to all related interests of such a person does not exceed $25,000.

(2) A member bank is not required to disclose the specific amounts of individual extensions of credit.

(b) *Maintaining records.* Each member bank must maintain records of all requests for the information described in paragraph (a) of this section and the disposition of such requests. These records may be disposed of after two years from the date of the request.

§ 215.32 Disclosure requirement for credit secured by certain bank and holding company stock.

(a) *Bank stock.* Each executive officer or director of a member bank that does not have any class of equity securities registered under section 12 of the Securities Exchange Act of 1934 (15 U.S.C. 78*l*) must disclose annually to the board of directors of the member bank the outstanding amount of any extension of credit to the executive officer or director that is secured by shares of the member bank or by shares of a company of which the member bank is a subsidiary.

(b) *Holding company stock.* Each executive officer or director of a company of which the member bank is a subsidiary and that does not have any class of equity securities registered under section 12 of the Securities Exchange Act of 1934 (15 U.S.C. 78*l*) must disclose annually to the board of directors of the company the outstanding amount of any extension of credit to the executive officer or director that is secured by shares of the company or by shares of the subsidiary member bank. In addition, each executive officer or director of a member bank must disclose annually to the board of directors of the member bank the outstanding amount of any extension of credit to the executive officer or director that is secured by shares of the holding company, if the holding company does not have any class of equity securities registered under section 12 of the Securities Exchange Act of 1934 (15 U.S.C. 78*l*).

Subpart E—Civil Penalties

§ 215.40 Civil penalties.

Any member bank, or any officer, director, employee, agent, or other person participating in the conduct of the affairs of the bank, that violates any provision of this part (other than § 215.31) is subject to civil penalties as specified in section 29 of the Federal Reserve Act (12 U.S.C. 504).

PART 225—BANK HOLDING COMPANIES AND CHANGE IN BANK CONTROL (REGULATION Y)

■ 2. The authority citation for part 225 continues to read as follows:

12 U.S.C. 1817(j)(13), 1818, 1828(o), 1831i, 1831p–1, 1843(c)(8), 1844(b), 1972(1), 3106, 3108, 3310, 3331–3351, 3906, 3907, and 3909; 15 U.S.C. 1681s, 1681w, 6801 and 6805.

§ 225.4 Corporate practices. (Amended)

■ 3. In § 225.4, remove and reserve § 225.4(e).

Nomenclature Changes

PART 207—(AMENDED)

■ 4. The authority citation for Part 207 continues to read as follows:

Authority: 12 U.S.C. 1831y.

§ 207.11 (Amended)

■ 5. In § 207.11(e), remove ''§ 215.2(e)(1)'' and add ''§ 215.2'' in its place.

PART 208—(AMENDED)

■ 6. The authority citation for Part 208 continues to read as follows:

Authority: 12 U.S.C. 24, 36, 92a, 93a, 248(a), 248(c), 321–338a, 371d, 461, 481–486, 601, 611, 1814, 1816, 1817(a)(3), 1817(a)(12), 1818, 1820(d)(9), 1833(j), 1828(o), 1831, 1831o, 1831p–1, 1831r–1, 1831w, 1831x, 1835a, 1882, 2901–2907, 3105, 3310, 3331–3351, 3905–3909, 5371, and 5371 note; 15 U.S.C. 78b, 78I(b), 78l(i), 780–4(c)(5), 78q, 78q–1, 78w, 1681s, 1681w, 6801, and 6805; 31 U.S.C. 5318; 42 U.S.C. 4012a, 4104a, 4104b, 4106, and 4128.

PART 208—(AMENDED)

■ 7. In the table below, for each part or section indicated in the left column, remove the current section referenced in the middle column from wherever it appears, and add ''§ 215.2'' as indicated in the right column:

Part or section	Remove	Add
§ 207.11(e)	§ 215.2(e)(1)	§ 215.2
Part 208—Appendix D–1(B)(4)	§ 215.2(c)	§ 215.2
Part 208—Appendix D–1(B)(5)	§ 215.2(d)	§ 215.2
Part 208—Appendix D–1(B)(6)	§ 215.2(d)(1)	§ 215.2
Part 208—Appendix D–1(6)	§ 215.2(l)	§ 215.2

PART 238—(AMENDED)

■ 8. The authority citation for Part 238 continues to read as follows:

Authority: 5 U.S.C. 552, 559; 12 U.S.C. 1462, 1462a, 1463, 1464, 1467, 1467a, 1468, 5365; 1813, 1817, 1829e, 1831i, 1972, 15 U.S.C. 78 *l.*

§§ 238.119, 122 (Amended)

■ 9. In the table below, for each part or section indicated in the left column, remove the current section referenced in the middle column from wherever it appears, and add ''§ 215.2'' as indicated in the right column:

Section	Remove	Add
§ 238.119(a)(4)(ii)(B)	§ 215.2(e)(1)	§ 215.2
§ 238.122(a)(4)(ii)(B)	§ 215.2(e)	§ 215.2

PART 248—PROPRIETARY TRADING AND CERTAIN INTERESTS IN AND RELATIONSHIPS WITH COVERED FUNDS (REGULATION VV)

■ 10. The authority citation for Part 248 continues to read as follows:

Authority: 12 U.S.C. 1851, 12 U.S.C. 221 *et seq.,* 12 U.S.C. 1818, 12 U.S.C. 1841 *et seq.,* and 12 U.S.C. 3103 *et seq.*

§ 248.10 (Amended)

■ 11. In § 248.10(d)(3), remove ''§ 215.2(e)'' and add ''§ 215.2'' in its place.

PART 252—ENHANCED PRUDENTIAL STANDARDS (REGULATION YY)

■ 12. The authority citation for Part 252 continues to read as follows:

Authority: 12 U.S.C. 321–338a, 481–486, 1467a, 1818, 1828, 1831n, 1831o, 1831p–1, 1831w, 1835, 1844(b), 1844(c), 3101 *et seq.,* 3101 note, 3904, 3906–3909, 4808, 5361, 5362, 5365, 5366, 5367, 5368, 5371.

§§ 252.22, 252.33, 252.144, 252.147, 252.153, 252.155 (Amended)

■ 13. In the table below, for each part or section indicated in the left column, remove the current section referenced in the middle column from wherever it appears, and add ''§ 215.2'' as indicated in the right column:

Section	Remove	Add
§ 252.22(a)(4)(ii)(B)	§ 215.2(e)(1)	§ 215.2
§ 252.33(a)(4)(ii)(B)	.....	.....
§ 252.144(b)(1)(v)(B)(*2*)	.....	.....
§ 252.147(e)(2)(iv)(B)(*2*)	§ 215.2(e)	§ 215.2
§ 252.155(a)(5)(ii)(B)	.....	.....
§ 252.153(e)(3)(iv)(B)(*2*)	§ 215.2(e)(1)	§ 215.2

By order of the Board of Governors of the Federal Reserve System.

Benjamin W. McDonough,

Secretary of the Board.

AGENCY: Centers for Medicare & Medicaid Services (CMS) and Office of the National Coordinator for Health Information Technology (ONC), Department of Health and Human Services (HHS).

ACTION: Final rule.

SUMMARY: This final rule will revise the Medicare hospital inpatient prospective payment systems (IPPS) for operating and capital-related costs of acute care hospitals; make changes relating to Medicare graduate medical education (GME) for teaching hospitals; update the payment policies and the annual payment rates for the Medicare prospective payment system (PPS) for inpatient hospital services provided by long-term care hospitals (LTCHs); update and make changes to requirements for certain quality programs; and make other policy-related changes. ONC also adopts certain health information technology (health IT) standards and specifications on behalf of HHS.

DATES: These regulations are effective on October 1, 2026. The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of October 1, 2026. The incorporation of reference of certain other material listed in the rule was approved by the Director of the Federal Register as of October 1, 2025.

SUPPLEMENTARY INFORMATION:

Tables Available on the CMS Website

The IPPS tables for this fiscal year (FY) 2027 final rule are available on the CMS website at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html.* Click on the link on the left side of the screen titled ''FY 2027 IPPS Final Rule Home Page'' or ''Acute Inpatient—Files for Download.'' The LTCH PPS tables for this FY 2027 final rule are available on the CMS website at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/LongTermCareHospitalPPS/index.html* under the list item for Regulation Number CMS–1849–F. For further details on the contents of the tables referenced in this final rule, we refer readers to section VI. of the Addendum to this FY 2027 IPPS/LTCH PPS final rule. Readers who experience any problems accessing any of the tables that are posted on the CMS websites, as previously identified, should contact Michael Treitel, *DAC@cms.hhs.gov.*

I. Executive Summary and Background

A. Executive Summary

1. Purpose and Legal Authority

This FY 2027 IPPS/LTCH PPS final rule will make payment and policy changes under the Medicare inpatient prospective payment system (IPPS) for operating and capital-related costs of acute care hospitals as well as for certain hospitals and hospital units excluded from the IPPS. In addition, it will make payment and policy changes for inpatient hospital services provided by long-term care hospitals (LTCHs) under the long-term care hospital prospective payment system (LTCH PPS). This final rule also will make policy changes to programs associated with Medicare IPPS hospitals, IPPS-excluded hospitals, and LTCHs. We are

also making changes relating to Medicare graduate medical education (GME) and nursing and allied health (NAH) education payments.

We are finalizing the adoption of the Advance Care Planning electronic clinical quality measure (eCQM) in the Hospital Inpatient Quality Reporting and Medicare Promoting Interoperability Programs and finalizing the adoption of the Advance Care Planning eCQM, with a modification, in the PPS-Exempt Cancer Hospital (PCH) Quality Reporting Program. We are finalizing the proposal to adopt five modified claims-based, risk-standardized mortality measures in the Hospital Inpatient Quality Reporting Program as a step towards subsequently modifying these measures in the Hospital Value-Based Purchasing Program.

Other than these cross-program proposals, we did not propose any updates for the Hospital Value-Based Purchasing Program or the Hospital Acquired-Conditions Reduction Program.

In the Hospital Readmissions Reduction Program, we are finalizing the adoption of the Hospital 30-Day, All-Cause, Risk-Standardized Readmission Rate Following Sepsis Hospitalization measure with modifications.

In addition to the cross-program proposals previously listed, in the Hospital Inpatient Quality Reporting Program, we are finalizing the adoption of two new quality measures, removal of three measures, and modification of three current measures. We are also finalizing modifications of data reporting and submission requirements for electronic clinical quality measures (eCQMs) and the Maternal Morbidity structural measure.

In addition to the cross-program proposal previously listed in the PCH Quality Reporting Program, we are finalizing the adoption of an additional new measure, with a modification, and finalizing the removal of one measure. We are also finalizing the adoption of data reporting and submission requirements for eCQMs.

In addition to the cross-program proposal previously listed, in the Medicare Promoting Interoperability Program, we are finalizing the removal of two measures and two attestations; adoption of a measure; modification of one measure; adoption of one additional eCQM in alignment with the Hospital Inpatient Quality Reporting Program; and removal of three eCQMs in alignment with the Hospital Inpatient Quality Reporting Program.

In the LTCH Quality Reporting Program (QRP), we are finalizing removal of two measures, beginning with the FY 2028 LTCH QRP. We also finalize a revision of the LTCH QRP Data Submission Deadlines beginning with the FY 2029 LTCH QRP. Finally, we summarize public comments received on one Request for Information (RFI) on future measure concepts for the LTCH QRP.

The Transforming Episode Accountability Model (TEAM), a mandatory alternative payment model that was finalized in the FY 2025 IPPS/LTCH PPS final rule (89 FR 68986), aims to improve beneficiary care through financial accountability for episodes categories that begin with one of the following procedures: coronary artery bypass graft (CABG), lower extremity joint replacement (LEJR), major bowel procedure, surgical hip/femur fracture treatment (SHFFT), and spinal fusion. TEAM tests whether financial accountability for these episode categories reduces Medicare expenditures while preserving or enhancing the quality of care for Medicare beneficiaries. In this final rule, we are finalizing updates to TEAM that will modify policies affecting episode category triggers, quality measure assessment, and the construction of target prices. We also discuss the public comments received from a Request for Information (RFI) about voluntary opt-in opportunity for hospitals with physician ownership (POHs) and our policy intent for future rulemaking.

The Comprehensive Care for Joint Replacement CJR Expanded (CJR–X) Model builds upon the CJR Model test that ran from April 1, 2016 to December 31, 2024. Based on the strength of evidence from the CJR Model, the CMS Innovation Center is expanding the model nationally, including U.S. Territories starting January 1, 2028. The model will focus on improving care and reducing spending for Medicare beneficiaries undergoing lower extremity joint replacement (LEJR) procedures. Participating hospitals will be held accountable for spending and quality of care during an inpatient stay or hospital outpatient procedure and for the 90 days following hospital discharge. The CJR–X Model will be mandatory for acute care hospitals, except for those participating in TEAM, and acute care hospitals located in Maryland. CJR–X includes some modifications to the CJR Model. Some quality measures and payment methodology policies have been updated in response to CJR Model evaluation results, stakeholder feedback, and changes to national care delivery patterns among both CJR and non-CJR hospitals.

Under various statutory authorities, we either discuss continued program implementation or changes to the Medicare IPPS, the LTCH PPS, other related payment methodologies and programs for FY 2027 and subsequent fiscal years, and other policies and provisions included in this final rule. These statutory authorities include, but are not limited to, the following:

- Section 1886(d) of the Social Security Act (the Act), which sets forth a system of payment for the operating costs of acute care hospital inpatient stays under Medicare Part A (Hospital Insurance) based on prospectively set rates. Section 1886(g) of the Act requires that, instead of paying for capital-related costs of inpatient hospital services on a reasonable cost basis, the Secretary use a prospective payment system (PPS).
- Section 1886(d)(1)(B) of the Act, which specifies that certain hospitals and hospital units are excluded from the IPPS. These hospitals and units are: rehabilitation hospitals and units; LTCHs; psychiatric hospitals and units; children's hospitals; cancer hospitals; extended neoplastic disease care hospitals; and hospitals located outside the 50 States, the District of Columbia, and Puerto Rico (that is, hospitals located in the U.S. Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa). Religious nonmedical health care institutions (RNHCIs) are also excluded from the IPPS.
- Sections 123(a) and (c) of the Balanced Budget Refinement Act of 1999 (BBRA) (Public Law (Pub. L.) 106–113) and section 307(b)(1) of the Benefits Improvement and Protection Act of 2000 (BIPA) (Pub. L. 106–554) (as codified under section 1886(m)(1) of the Act), which provide for the development and implementation of a prospective payment system for payment for inpatient hospital services of LTCHs described in section 1886(d)(1)(B)(iv) of the Act.
- Section 1814(l)(4) of the Act requires, beginning with FY 2015, that CAHs that do not successfully demonstrate meaningful use of certified electronic health record technology (CEHRT) for an EHR reporting period for a cost reporting period shall be paid 100 percent of reasonable costs rather than 101 percent of reasonable costs.
- Section 1886(a)(4) of the Act, which specifies that costs of approved educational activities are excluded from the operating costs of inpatient hospital services. Hospitals with approved graduate medical education (GME) programs are paid for the direct costs of

GME in accordance with section 1886(h) of the Act. Hospitals paid under the IPPS with approved GME programs are paid for the indirect costs of training residents in accordance with section 1886(d)(5)(B) of the Act.

- Section 1886(d)(5)(F) of the Act provides for additional Medicare IPPS payments to subsection (d) hospitals that serve a significantly disproportionate number of low-income patients (DSH hospitals, or DSH-eligible hospitals). These payments are known as the Medicare disproportionate share hospital (DSH) adjustment, or DSH payment. Section 1886(d)(5)(F) of the Act specifies the methods under which a hospital may qualify for the DSH payment.
- Section 1886(r) of the Act, as added by section 3133 of the Affordable Care Act, provides for a reduction to DSH payments under section 1886(d)(5)(F) of the Act and for an additional uncompensated care payment to eligible hospitals. Specifically, section 1886(r) of the Act requires that, for fiscal year 2014 and each subsequent fiscal year, subsection (d) hospitals that would otherwise receive a DSH payment made under section 1886(d)(5)(F) of the Act will receive two separate payments: (1) 25 percent of the amount they previously would have received under the statutory formula for Medicare DSH payments in section 1886(d)(5)(F) of the Act if subsection (r) did not apply (''the empirically justified amount''); and (2) an additional payment for the DSH hospital's proportion of uncompensated care, determined as the product of three factors. These three factors are: (1) 75 percent of the payments that would otherwise be made under section 1886(d)(5)(F) of the Act, in the absence of section 1886(r) of the Act; (2) 1 minus the percent change in the percent of individuals who are uninsured; and (3) the hospital's uncompensated care amount relative to the uncompensated care amount of all DSH hospitals expressed as a percentage.
- Section 1886(m)(6) of the Act, as added by section 1206(a)(1) of the Pathway for Sustainable Growth Rate (SGR) Reform Act of 2013 (Pub. L. 113–67) and amended by section 51005(a) of the Bipartisan Budget Act of 2018 (Pub. L. 115–123), which provided for the establishment of site neutral payment rate criteria under the LTCH PPS, with implementation beginning in FY 2016. Section 51005(b) of the Bipartisan Budget Act of 2018 amended section 1886(m)(6)(B) by adding new clause (iv), which specifies that the IPPS comparable amount defined in clause (ii)(I) shall be reduced by 4.6 percent for FYs 2018 through 2027.
- Section 1899B of the Act, which provides for the establishment of standardized data reporting for certain post-acute care providers, including LTCHs.
- Section 1886(b)(3)(B)(viii) of the Act, which establishes the Hospital Inpatient Quality Reporting Program, requires the Secretary to reduce the applicable percentage increase that would otherwise apply to the standardized amount applicable to a subsection (d) hospital for discharges occurring in a fiscal year if the hospital does not submit data on measures in a form and manner, and at a time, specified by the Secretary.
- Section 1886(b)(3)(B)(ix) of the Act, which establishes payment adjustments under the Medicare Promoting Interoperability Program by requiring downward adjustments to the applicable percentage increase, beginning with FY 2015 (and beginning with FY 2022 for subsection (d) Puerto Rico hospitals), for eligible hospitals that do not successfully demonstrate meaningful use of CEHRT for an EHR reporting period for a payment adjustment year. Additionally, Section 1886(n) of the Act establishes the requirements for an eligible hospital to be treated as a meaningful EHR user of CEHRT for an EHR reporting period for a payment adjustment year or, for purposes of subsection (b)(3)(B)(ix) of the Act, for a fiscal year.
- Section 1866(k) of the Act, which provides for the establishment of a quality reporting program for hospitals described in section 1886(d)(1)(B)(v) of the Act, referred to as ''PPS-exempt cancer hospitals.''
- Section 1886(o) of the Act, which requires the Secretary to establish a Hospital Value-Based Purchasing (VBP) Program, under which value-based incentive payments are made in a fiscal year to hospitals based on their performance on measures established for a performance period for such fiscal year.
- Section 1886(p) of the Act, which establishes a Hospital-Acquired Condition (HAC) Reduction Program, under which payments to applicable hospitals are adjusted to provide an incentive to reduce hospital-acquired conditions.
