

FEDERAL REGISTER

Vol. 91

Friday,

No. 180

September 18, 2026

Pages 59047–59694

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.federalregister.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.govinfo.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$860 plus postage, or \$929, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 91 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register
Vol. 91, No. 180
Friday, September 18, 2026

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1000

[Doc. No. AMS–DA–23–0031]

Milk in the Northeast and Other Marketing Areas; Uniform Pricing Formula Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule; correcting amendment.

SUMMARY: The Agricultural Marketing Service’s (AMS) Dairy Program published a final rule in the **Federal Register** on January 17, 2025, amending the pricing provisions in the 11 Federal Milk Marketing Orders (FMMOs). This document corrects the Class I differential in Morgan County, Ohio, and removes Shannon County, South Dakota, from the Class I Differential table.

DATES: Effective September 18, 2026.

FOR FURTHER INFORMATION CONTACT: Erin Taylor, USDA/AMS/Dairy Programs, Order Formulation and Enforcement Division, STOP 0231-Room 2530, 1400 Independence Avenue SW, Washington, DC 20250–0231, (202) 720–7311; email: *Erin.Taylor@usda.gov*.

SUPPLEMENTARY INFORMATION: AMS announced changes made to the pricing provisions of the 11 FMMOs through a final rule published on January 17, 2025 (90 FR 6600). AMS now makes the following technical corrections to the differentials table in the final rule: amending the entry for Morgan County, OH, from “3.90” to “3.80” and removing the table entry for Shannon County, SD, in its entirety.

The recommended decision published July 15, 2024 (89 FR 57580), proposed the Class I differential for Morgan County, Ohio, be \$4.00. Commenters to the recommended decision requested this county and four other Ohio counties be amended to \$3.80 rather than \$4.00. USDA agreed in its final decision published December 2, 2024 (89 FR 95466), that the differential for all five counties be set at \$3.80. The four other Ohio counties were changed correctly. USDA inadvertently changed Morgan County, Ohio, to \$3.90 instead of \$3.80 in the final decision and final rule. This final rule corrects that error by amending the value shown on the table for Morgan County to read as “3.80.”

After Class I differentials were implemented during Order Reform on

September 1, 1999 (64 FR 47898), the state of South Dakota renamed Shannon County to Oglala Lakota County. To show there was a change in the differential in the geographic county, USDA left Shannon County in the table and zeroed out the differential. The differential is now listed under Oglala Lakota County. As the previous Shannon County and differential are now listed as Oglala Lakota County, USDA is removing Shannon County from the differential table.

List of Subjects in 7 CFR Part 1000

Milk marketing orders, Reporting and recordkeeping requirements.

Accordingly, 7 CFR part 1000 is amended by making the following correcting amendments:

- PART 1000—GENERAL PROVISIONS OF FEDERAL MILK MARKETING ORDERS**
- 1. The authority citation for part 1000 continues to read as follows:
Authority: 7 U.S.C. 601–674, and 7253.
 - 2. In § 1000.52 amend the table “Class I differential adjusted for location” by revising the entry for Morgan County, OH, and removing the entry for “Shannon County, SD” to read as follows:
§ 1000.52 Adjusted Class I differentials.
* * * * *

County/parish/city	State	FIPS code	Class I differential adjusted for location
* * * * *			
MORGAN	OH	39115	3.80
* * * * *			

Erin Morris,
Administrator, Agricultural Marketing Service.

BILLING CODE P

DEPARTMENT OF ENERGY

10 CFR Part 460

[EERE–2009–BT–BC–0021]

RIN 1904–AC11

Energy Conservation Program: Energy Conservation Standards for Manufactured Housing

AGENCY: Office of Critical Minerals and Energy Innovation (formerly Energy Efficiency and Renewable Energy), Department of Energy.

ACTION: Notification of legal effect.

SUMMARY: In this notification, the U.S. Department of Energy (“DOE” or “the Department”) is providing notice that the Department’s Energy Conservation Standards for Manufactured Housing final rule published in the **Federal Register** on May 31, 2022, has no legal effect in light of the enactment of the 21st Century ROAD to Housing Act (“ROAD Act”).

DATES: The information contained in this notification will be applicable on September 18, 2026 and will remain in effect until further notice.

FOR FURTHER INFORMATION CONTACT: Mr. Jeremy Williams, U.S. Department of Energy, Office of Critical Minerals and Energy Innovation, Building Technologies Office, CM–5B, 1000 Independence Avenue SW, Washington, DC 20585–0121. Email: BuildingEnergyCodes@doe.gov.

Mr. Pete Cochran, U.S. Department of Energy, Office of the General Counsel, GC–33, 1000 Independence Avenue SW, Washington, DC 20585–0121. Telephone: (202) 586–4798. Email: Peter.Cochran@hq.doe.gov.

SUPPLEMENTARY INFORMATION: On May 31, 2022, DOE published in the **Federal Register** a final rule to establish energy conservation standards for manufactured housing pursuant to the Energy Independence and Security Act of 2007, 87 FR 32728. On July 11, 2026, the 21st Century ROAD to Housing Act (Pub. L. 119–101) (“ROAD Act”) was enacted. Section 301(d)(2)(B) of the ROAD Act specifies that “[n]o energy efficiency standards for manufactured homes developed by any Federal agency shall have legal effect unless and until adopted by the Department of Housing and Urban Development pursuant to the consensus standards and regulatory development process described in . . . 42 U.S.C. 5403(a)(2)).” Section 301(d)(2)(C) of the ROAD Act requires the Department of Housing and Urban Development (“HUD”) to “adopt minimum energy efficiency standards for manufactured homes” within one

year of enactment, and to update those standards every three years.

As of the date of this notification, no minimum energy efficiency standards meeting the requirements under section 301(d) of the ROAD Act have been adopted by HUD. Therefore, it is DOE’s position that the final rule published in the **Federal Register** on May 31, 2022, establishing energy conservation standards for manufactured housing has no legal effect pursuant to section 301(d)(2)(B) of the ROAD Act.

The Department intends to initiate a rulemaking to conform DOE’s regulations for manufactured housing to account for the statutory changes adopted by the ROAD Act, and further notes that DOE will not enforce its energy conservation standards for manufactured housing as they have no legal effect under the ROAD Act.

Signing Authority

This document of the Department of Energy was signed on September 16, 2026, by Audrey Robertson, Assistant Secretary (EERE) for Critical Minerals and Energy Innovation, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on September 16, 2026.

Jennifer Hartzell,

*Alternate Federal Register Liaison Officer,
U.S. Department of Energy.*

[FR Doc. 2026–19154 Filed 9–17–26; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2026–8815; Project Identifier MCAI–2026–00951–E; Amendment 39–23468; AD 2026–18–52]

RIN 2120–AA64

Airworthiness Directives; Rolls-Royce Deutschland Ltd. & Co. KG Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all Rolls-Royce Deutschland Ltd. & Co. KG (RRD) Model RB211–Trent 875–17, 877–17, 884–17, 884B–17, 892–17, 892B–17, and 895–17 engines. The FAA previously sent this AD as an emergency AD to all known U.S. owners and operators of these engines. This AD was prompted by reports of non-conformances leading to low oil pressure events on low life oil pumps. This AD requires de-pairing of engines on airplanes with two affected engines installed to ensure no more than one affected oil pump is installed on twin-engine airplanes. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective September 21, 2026. Emergency AD 2026–18–52, issued on September 5, 2026, which contains the requirements of this amendment, was effective with actual notice.

The Director of the Federal Register approved the incorporation by reference of a certain publication identified in this AD as of September 21, 2026.

The FAA must receive comments on this AD by November 2, 2026.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- **Federal eRulemaking Portal:** Go to [regulations.gov](https://www.regulations.gov). Follow the instructions for submitting comments.

- **Fax:** (202) 493–2251.

- **Mail:** U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- **Hand Delivery:** Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2026–8815; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For European Union Aviation Safety Agency (EASA) material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: ADS@easa.europa.eu. You

may find this material on the EASA website at ad.easa.europa.eu.

- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222-5110. It is also available at regulations.gov under Docket No. FAA-2026-8815.

FOR FURTHER INFORMATION CONTACT:

Alexis Whitaker, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; phone: (516) 228-7309; email: alexis.j.whitaker@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written data, views, or arguments about this final rule. Send your comments using a method listed under the **ADDRESSES** section. Include “Docket No. FAA-2026-8815; Project Identifier MCAI-2026-00951-E” at the beginning of your comments. The most helpful comments reference a specific portion of the final rule, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this final rule because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to regulations.gov, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this final rule.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this AD contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this AD, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this AD. Submissions containing CBI should be sent to Alexis Whitaker,

Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued Emergency AD 2026-18-52, dated September 5, 2026 (the emergency AD), to address an unsafe condition on all RRD Model RB211-Trent 875-17, 877-17, 884-17, 884B-17, 892-17, 892B-17, and 895-17 engines. The FAA sent the emergency AD to all known U.S. owners and operators of these engines. The emergency AD requires de-pairing of engines on airplanes with two affected engines installed to ensure no more than one affected oil pump is installed on twin-engine airplanes.

The emergency AD was prompted by EASA Emergency AD 2026-0173-E, dated September 4, 2026 (EASA Emergency AD 2026-0173-E) (also referred to as the MCAI), issued by EASA, which is the Technical Agent for the Member States of the European Union, to correct an unsafe condition on all RRD Model RB211-Trent 875-17, 877-17, 884-17, 884B-17, 892-17, 892B-17, and 895-17 engines. The MCAI states that occurrences have been reported of non-conformances leading to low oil pressure events on low life oil pumps. Subsequent investigation identified a potential failure mode affecting the oil pump input coupling shear neck. This condition, if not addressed, could lead to a dual in-flight shutdown on airplanes equipped with two affected engines, resulting in reduced control of the airplane. The FAA is issuing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at regulations.gov under Docket No. FAA-2026-8815.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed EASA Emergency AD 2026-0173-E. This material specifies procedures for de-pairing of engines on airplanes with two affected engines installed to ensure no more than one affected oil pump is installed on twin-engine airplanes. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA’s Determination

These products have been approved by the civil aviation authority (CAA) of another country and are approved for

operation in the United States. Pursuant to the FAA’s bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this AD after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

AD Requirements

This AD requires accomplishing the actions specified in EASA Emergency AD 2026-0173-E, described previously, except for any differences identified as exceptions in the regulatory text of this AD.

Interim Action

The FAA considers that this AD is an interim action. If final action is later identified, the FAA might consider additional rulemaking.

Explanation of Required Compliance Information

In the FAA’s ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some CAA ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, EASA Emergency AD 2026-0173-E is incorporated by reference in this AD. This AD requires compliance with EASA Emergency AD 2026-0173-E in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this AD. Material required by EASA Emergency AD 2026-0173-E for compliance will be available at regulations.gov under Docket No. FAA-2026-8815 after this AD is published.

Justification for Immediate Adoption and Determination of the Effective Date

Section 553(b) of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*) authorizes agencies to dispense with notice and comment procedures for rules when the agency, for “good cause,” finds that those procedures are “impracticable, unnecessary, or contrary to the public interest.” Under this section, an agency, upon finding good cause, may issue a final rule without providing notice and seeking comment prior to issuance. Further, section 553(d) of the APA authorizes agencies to make rules effective in less than thirty days, upon a finding of good cause.

An unsafe condition exists that required the immediate adoption of Emergency AD 2026-18-52, issued on

September 5, 2026, to all known U.S. owners and operators of these engines. The FAA found that the risk to the flying public justified forgoing notice and comment prior to adoption of this rule because the oil pump can fail prematurely due to cracking of the internal rotor. This condition could lead to a dual in-flight shutdown on airplanes equipped with two affected engines, resulting in reduced control of the airplane. These conditions still exist; therefore, notice and opportunity

for prior public comment are impracticable and contrary to the public interest pursuant to 5 U.S.C. 553(b).

In addition, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment effective in less than 30 days, for the same reasons the FAA found good cause to forego notice and comment.

Regulatory Flexibility Act

The requirements of the Regulatory Flexibility Act (RFA) do not apply when an agency finds good cause pursuant to

5 U.S.C. 553 to adopt a rule without prior notice and comment. Because the FAA has determined that it has good cause to adopt this rule without prior notice and comment, RFA analysis is not required.

Costs of Compliance

The FAA estimates that this AD affects 154 engines installed on airplanes of U.S. registry.

The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Records check	1 work-hour × \$85 per hour = \$85	\$0	\$85	\$13,090

The FAA estimates the following costs to do any necessary repair or replacement that would be required

based on the results of the records check. The agency has no way of

determining the number of engines that might need this repair or replacement:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Repair or replace oil pump	Up to 16 work-hours × \$85 per hour = \$1,360	Up to \$237,070	Up to \$238,430.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866, and
- (2) Will not affect intrastate aviation in Alaska.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2026–18–52 Rolls-Royce Deutschland Ltd. & Co. KG: Amendment 39–23468; Docket No. FAA–2026–8815; Project Identifier MCAI–2026–00951–E.

(a) Effective Date

The FAA issued Emergency Airworthiness Directive (AD) 2026–18–52 on September 5, 2026 (also referred to as the emergency AD), directly to affected owners and operators. As a result of such actual notice, the emergency AD was effective for those owners and operators on the date it was received. This AD contains the same requirements as the emergency AD and, for those who did not receive actual notice, is effective on September 21, 2026.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all Rolls-Royce Deutschland Ltd. & Co. KG Model RB211-Trent 875–17, 877–17, 884–17, 884B–17, 892–17, 892B–17, and 895–17 engines.

(d) Subject

Joint Aircraft System Component (JASC) Code 7261, Turbine Engine Oil System.

(e) Unsafe Condition

This AD was prompted by reports of non-conformances leading to low oil pressure events on low life oil pumps due to a failure mode affecting the oil pump input coupling shear neck. The FAA is issuing this AD to address a failure mode affecting the oil pump input coupling shear neck. The unsafe condition, if not addressed, could lead to a dual in-flight shutdown on airplanes equipped with two affected engines, resulting in reduced control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) Emergency AD 2026–0173–E, dated September 4, 2026 (EASA Emergency AD 2026–0173–E).

(h) Exceptions to EASA Emergency AD 2026–0173–E

(1) Where EASA Emergency AD 2026–0173–E refers to its effective date, this AD requires using the effective date of this AD.

(2) This AD does not adopt the “Remarks” section of EASA Emergency AD 2026–0173–E.

(i) Special Flight Permits

Special flight permits, as described in 14 CFR 21.197 and 21.199, are not allowed.

(j) Additional AD Provisions

The following provisions also apply to this AD.

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, AIR–520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the AIR–520, Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (k) of this AD or email to: AMOC@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, AIR–520, Continued Operational Safety Branch, FAA; or EASA; or Rolls-Royce Deutschland Ltd. & Co. KG’s EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(k) Additional Information

For more information about this AD, contact Alexis Whitaker, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; phone: (516) 228–7309; email: alexis.j.whitaker@faa.gov.

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) Emergency AD 2026–0173–E, dated September 4, 2026.

(ii) [Reserved]

(3) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: ADs@easa.europa.eu. You may find this material on the EASA website at ad.easa.europa.eu.

(4) You may view this material at FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

Issued on September 15, 2026.

Brian Knaup,

Acting Deputy Director, Integrated Certificate Management Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 39**

[Docket No. FAA–2026–8814; Project Identifier MCAI–2026–00950–E; Amendment 39–23467; AD 2026–18–51]

RIN 2120–AA64

Airworthiness Directives; Rolls-Royce Deutschland Ltd. & Co. KG Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all Rolls-Royce Deutschland Ltd. & Co. KG (RRD) Model RB211 Trent 768–60, 772–60, and 772B–60 engines. The FAA previously sent this AD as an emergency AD to all known U.S. owners and operators of these engines. This AD was prompted by reports of non-conformances leading to low oil pressure events on low life oil pumps. This AD requires de-pairing of engines on airplanes with two affected engines installed to ensure no more than one affected oil pump is installed on twin-engine airplanes. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective September 21, 2026. Emergency AD 2026–18–51, issued on September 5, 2026, which contains the requirements of this amendment, was effective with actual notice.

The Director of the Federal Register approved the incorporation by reference of a certain publication identified in this AD as of September 21, 2026.

The FAA must receive comments on this AD by November 2, 2026.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to regulations.gov. Follow the instructions for submitting comments.

- *Fax:* (202) 493–2251.

- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at regulations.gov under Docket No. FAA–2026–8814; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For European Union Aviation Safety Agency (EASA) material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: ADs@easa.europa.eu. You may find this material on the EASA website at ad.easa.europa.eu.

- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222–5110. It is also available at regulations.gov under Docket No. FAA–2026–8814.

FOR FURTHER INFORMATION CONTACT:

Alexis Whitaker, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; phone: (516) 228–7309; email: alexis.j.whitaker@faa.gov.

SUPPLEMENTARY INFORMATION:**Comments Invited**

The FAA invites you to send any written data, views, or arguments about this final rule. Send your comments using a method listed under the **ADDRESSES** section. Include “Docket No. FAA–2026–8814; Project Identifier MCAI–2026–00950–E” at the beginning

of your comments. The most helpful comments reference a specific portion of the final rule, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this final rule because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to [regulations.gov](https://www.regulations.gov), including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this final rule.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this AD contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this AD, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as "PROPIN." The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this AD. Submissions containing CBI should be sent to Alexis Whitaker, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued Emergency AD 2026–18–51, dated September 5, 2026 (the emergency AD), to address an unsafe condition on all RRD Model RB211 Trent 768–60, 772–60, and 772B–60 engines. The FAA sent the emergency AD to all known U.S. owners and operators of these engines. The emergency AD requires de-pairing of engines on airplanes with two affected engines installed to ensure no more than one affected oil pump is installed on twin-engine airplanes.

The emergency AD was prompted by EASA Emergency AD 2026–0172–E, dated September 4, 2026 (EASA Emergency AD 2026–0172–E) (also referred to as the MCAI), issued by EASA, which is the Technical Agent for the Member States of the European

Union, to correct an unsafe condition on all RRD Model RB211 Trent 768–60, 772–60, 772B–60, and 772C–60 engines. Model RB211 Trent 772C–60 engines are not certificated by the FAA and are not included on the U.S. type certificate data sheet; this AD therefore does not include those engines in the applicability. The MCAI states that occurrences have been reported of non-conformances leading to low oil pressure events on low life oil pumps. Subsequent investigation identified a potential failure mode affecting the oil pump input coupling shear neck. This condition, if not addressed, could lead to a dual in-flight shutdown on airplanes equipped with two affected engines, resulting in reduced control of the airplane. The FAA is issuing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2026–8814.

Correction of Typographical Error

This AD corrects an error in the citation of the EASA AD in the emergency AD. Paragraph (g) of the emergency AD incorrectly referenced the wrong EASA AD number in the parenthetical short cite. That EASA AD number has been corrected in this AD to read EASA Emergency AD 2026–0172–E.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed EASA Emergency AD 2026–0172–E. This material specifies procedures for de-pairing of engines on airplanes with two affected engines installed to ensure no more than one affected oil pump is installed on twin-engine airplanes. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

FAA's Determination

These products have been approved by the civil aviation authority (CAA) of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this AD after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

AD Requirements

This AD requires accomplishing the actions specified in EASA Emergency AD 2026–0172–E, described previously, except for any differences identified as exceptions in the regulatory text of this AD.

Interim Action

The FAA considers that this AD is an interim action. If final action is later identified, the FAA might consider additional rulemaking.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some CAA ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, EASA Emergency AD 2026–0172–E is incorporated by reference in this AD. This AD requires compliance with EASA Emergency AD 2026–0172–E in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this AD. Material required by EASA Emergency AD 2026–0172–E for compliance will be available at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2026–8814 after this AD is published.

Justification for Immediate Adoption and Determination of the Effective Date

Section 553(b) of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*) authorizes agencies to dispense with notice and comment procedures for rules when the agency, for "good cause," finds that those procedures are "impracticable, unnecessary, or contrary to the public interest." Under this section, an agency, upon finding good cause, may issue a final rule without providing notice and seeking comment prior to issuance. Further, section 553(d) of the APA authorizes agencies to make rules effective in less than thirty days, upon a finding of good cause.

An unsafe condition exists that required the immediate adoption of Emergency AD 2026–18–51, issued on September 5, 2026, to all known U.S. owners and operators of these engines. The FAA found that the risk to the flying public justified forgoing notice and comment prior to adoption of this rule because the oil pump can fail prematurely due to cracking of the internal rotor. This condition could lead to a dual in-flight shutdown on airplanes equipped with two affected engines, resulting in reduced control of

the airplane. These conditions still exist; therefore, notice and opportunity for prior public comment are impracticable and contrary to the public interest pursuant to 5 U.S.C. 553(b).

In addition, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment effective in less than 30 days, for the same reasons

the FAA found good cause to forego notice and comment.

Regulatory Flexibility Act

The requirements of the Regulatory Flexibility Act (RFA) do not apply when an agency finds good cause pursuant to 5 U.S.C. 553 to adopt a rule without prior notice and comment. Because the FAA has determined that it has good

cause to adopt this rule without prior notice and comment, RFA analysis is not required.

Costs of Compliance

The FAA estimates that this AD affects 132 engines installed on airplanes of U.S. registry.

The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Records check	1 work-hour × \$85 per hour = \$85	\$0	\$85	\$11,220

The FAA estimates the following costs to do any necessary repair or replacement that would be required

based on the results of the records check. The agency has no way of

determining the number of engines that might need this repair or replacement:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Repair or replace oil pump	Up to 16 work-hours × \$85 per hour = \$1,360	Up to \$237,070	Up to \$238,430.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a “significant regulatory action” under Executive Order 12866, and

(2) Will not affect intrastate aviation in Alaska.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2026–18–51 Rolls-Royce Deutschland Ltd. & Co. KG: Amendment 39–23467; Docket No. FAA–2026–8814; Project Identifier MCAI–2026–00950–E.

(a) Effective Date

The FAA issued Emergency Airworthiness Directive (AD) 2026–18–51 on September 5, 2026 (also referred to as the emergency AD), directly to affected owners and operators. As a result of such actual notice, the emergency AD was effective for those owners and operators on the date it was received. This

AD contains the same requirements as the emergency AD and, for those who did not receive actual notice, is effective on September 21, 2026.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all Rolls-Royce Deutschland Ltd. & Co. KG Model RB211 Trent 768–60, 772–60, and 772B–60 engines.

(d) Subject

Joint Aircraft System Component (JASC) Code 7261, Turbine Engine Oil System.

(e) Unsafe Condition

This AD was prompted by reports of non-conformances leading to low oil pressure events on low life oil pumps due to a failure mode affecting the oil pump input coupling shear neck. The FAA is issuing this AD to address a failure mode affecting the oil pump input coupling shear neck. The unsafe condition, if not addressed, could lead to a dual in-flight shutdown on airplanes equipped with two affected engines, resulting in reduced control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) Emergency AD 2026–0172–E, dated September 4, 2026 (EASA Emergency AD 2026–0172–E).

(h) Exceptions to EASA Emergency AD 2026–0172–E

(1) Where EASA Emergency AD 2026–0172–E refers to its effective date, this AD requires using the effective date of this AD.

(2) This AD does not adopt the “Remarks” section of EASA Emergency AD 2026–0172–E.

(i) Special Flight Permits

Special flight permits, as described in 14 CFR 21.197 and 21.199, are not allowed.

(j) Additional AD Provisions

The following provisions also apply to this AD.

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, AIR–520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the AIR–520, Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (k) of this AD or email to: AMOC@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, AIR–520, Continued Operational Safety Branch, FAA; or the EASA; or Rolls-Royce Deutschland Ltd. & Co. KG’s EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(k) Additional Information

For more information about this AD, contact Alexis Whitaker, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; phone: (516) 228–7309; email: alexis.j.whitaker@faa.gov.

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) Emergency AD 2026–0172–E, dated September 4, 2026.

(ii) [Reserved]

(3) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: ADs@easa.europa.eu. You may find this material on the EASA website at ad.easa.europa.eu.

(4) You may view this material at FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this material at the National Archives and Records

Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

Issued on September 15, 2026.

Brian Knaup,

Acting Deputy Director, Integrated Certificate Management Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 71**

[Docket No. FAA–2026–7756; Airspace Docket No. 26–AGL–14]

RIN 2120–AA66

Amendment of Class E Airspace; Alma, MI

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends the Class E airspace at Alma, MI. This action is due to an airspace review conducted due to the decommissioning of the Mount Pleasant very high frequency omnidirectional range (VOR) as part of the VOR Minimum Operational Network (MON) Program. This action brings the airspace into compliance with FAA orders and supports instrument flight rule (IFR) procedures and operations.

DATES: Effective 0901 UTC, December 24, 2026. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order JO 7400.11 and publication of conforming amendments.

ADDRESSES: A copy of the notice of proposed rulemaking (NPRM), all comments received, this final rule, and all background material may be viewed online at www.regulations.gov using the FAA Docket number. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365 days each year. An electronic copy of this document may also be downloaded from www.federalregister.gov.

FAA Order JO 7400.11M, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at www.faa.gov/air_traffic/publications/. You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence

Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT:

Jeffrey Claypool, Federal Aviation Administration, Operations Support Group, Central Service Center, 10101 Hillwood Parkway, Fort Worth, TX 76177; telephone (817) 222–5711.

SUPPLEMENTARY INFORMATION:**Authority for This Rulemaking**

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends the Class E airspace at the affected airport to support IFR operations.

History

The FAA published an NPRM for Docket No. FAA–2026–7756 in the **Federal Register** (91 FR 42682; July 10, 2026) proposing to amend the Class E airspace at Alma, MI, and published an NPRM Correction (91 FR 46759; July 24, 2026) to correct the title of the NPRM. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. Two (2) comments were received.

The first comment received supported the FAA’s correction of the NPRM. The FAA acknowledges the comment and appreciates the support.

The second comment received stated that due to the error in the title of the initial NPRM published on July 10, 2026, that the FAA did not provide the required 45-days for the public to comment in accordance with the Administrative Procedure Act (APA). However, with the publication of the NPRM correction, the comment period was restarted and extended for the 45-day period following the July 24, 2026, publication of the NPRM correction. As a result, the NPRM comment period was a total of 59 days. The commenter stated, however, that the correction may have failed to trigger certain notification algorithms, depriving certain commenters of the full comment period. However, the APA provides no distinct requirement to extend comment periods

through re-issued NPRMs to ensure triggering notification algorithms. Moreover, the submission of the detailed comment itself demonstrates that the commenter received actual notice, algorithms notwithstanding. Therefore, the FAA declines to adopt the commenter's suggestion or otherwise extend the comment period further. The commenter did not provide any substantive feedback related to the proposal.

Incorporation by Reference

Class E airspace designations are published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the current version of that order, FAA Order JO 7400.11M, dated July 30, 2026, and effective September 15, 2026. These amendments will be published in the next update to FAA Order JO 7400.11. FAA Order JO 7400.11M, which lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points, is publicly available as listed in the **ADDRESSES** section of this document.

The Rule

This action amends 14 CFR part 71 by modifying the Class E airspace extending upward from 700 ft. above the surface at Alma, Michigan due to an airspace review conducted as part of the decommissioning of the Mount Pleasant VOR as part of the VOR MON Program.

For the Gratiot Community Airport, Alma, MI, Class E airspace extending upward from 700 ft. above the surface, this action: (1) increases the radius from 6.5 to 7.4 miles; (2) amends the extension west of the airport to within 2 miles each side of the 270° bearing from the airport extending from the 7.4-mile (previously 6.5-mile) radius to 10.7 (increased from 10.1) miles west of the airport; (3) removes the Mount Pleasant VOR/DME and associated extension from the airspace legal description; and (4) removes the city associated with the airport from the header of the airspace legal description to comply with changes to FAA Order JO 7400.2R, Procedures for Handling Airspace Matters.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a

“significant rule” under DOT Order 2100.6B, “Policies and Procedures for Rulemakings” (March 10, 2025); and (3) is expected to result in, at most, de minimis costs from compliance with applicable operating requirements or minor flight rerouting for operators choosing to navigate around the controlled airspace. Since these amendments are routine and the expected impact to operators is de minimis, the FAA certifies that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1G, “FAA National Environmental Policy Act Implementing Procedures,” Paragraph B–2.5(a). This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

Lists of Subjects in 14 CFR 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11M, Airspace Designations and Reporting Points, dated July 30, 2026, and effective September 15, 2026, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

AGL MI E5 Alma, MI [Amended]

Gratiot Community Airport, MI
(Lat 43°19'20" N, long 084°41'17" W)

That airspace extending upward from 700 feet above the surface within a 7.4-mile

radius of Gratiot Community Airport; and within 2 miles either side of a 270° bearing from the airport extending from the 7.4-mile radius to 10.7 miles west of the airport.

* * * * *

Issued in Fort Worth, Texas, on September 16, 2026.

Docket No. 25–ANM–158]

RIN 2120–AA66

Establishment of United States Area Navigation Route T–581 in the Vicinity of Missoula, Montana

AGENCY: Federal Aviation
Administration (FAA), DOT.

ACTION: Final rule; correction.

SUMMARY: This action corrects a final rule published by the FAA in the **Federal Register** on August 3, 2026, establishing United States Area Navigation (RNAV) Route T–581 in the vicinity of Missoula, Montana. Specifically, this action corrects the description of the route in the regulatory text of the final rule.

DATES: The effective date of the final rule published in the **Federal Register** on August 3, 2026, remains 0901 UTC, October 29, 2026. The Director of the Federal Register approves this incorporation by reference action under 14 CFR part 71, subject to the annual revision of FAA Order JO 7400.11 and publication of conforming amendments.

ADDRESSES: FAA Order JO 7400.11M, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at www.faa.gov/air-traffic/publications/. You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Steven Roff, Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

History

The FAA published a final rule in the **Federal Register** for Docket No. FAA–2025–3288 (91 FR 48756; August 3, 2026), establishing RNAV Route T–581. The legal description in that final rule for T–581 contains two route points that should not be listed in the description

due to them being a turn of less than one degree. This action corrects these errors.

Correction to the Final Rule

Accordingly, pursuant to the authority delegated to me, the final rule for Docket No. FAA–2025–3288, as

published in the **Federal Register** on August 3, 2026 (91 FR 48756; FR Doc. 2026–15675), is corrected as follows:

■ On page 48757, in the third column, under the heading “Paragraph 6011 United States Area Navigation Routes,” revise the table across all three columns to read as follows:

T–581 Missoula, MT (MSO) TO Kalispell, MT (FCA) [NEW]		
Missoula, MT (MSO)	VOR/DME	(Lat. 46°54′28.68″ N, long. 114°05′01.15″ W)
Kalispell, MT (FCA)	VOR/DME	(Lat. 48°12′50.77″ N, long. 114°10′33.21″ W)

Issued in Washington, DC, on September 16, 2026.

Alex W. Nelson,

Manager, Rules and Regulations Group.

[FR Doc. 2026–19173 Filed 9–17–26; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 97

[Docket No. 31684; Amdt. No. 4236]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule amends, suspends, or removes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure Procedures for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide for the safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective September 18, 2026. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of September 18, 2026.

ADDRESSES: Availability of matter incorporated by reference in the amendment is as follows:

For Examination

1. U.S. Department of Transportation, Docket Ops–M30, 1200 New Jersey Avenue SE, West Bldg., Ground Floor, Washington, D.C., 20590–0001;

2. The FAA Air Traffic Organization Service Area in which the affected airport is located;

3. The office of Aeronautical Information Services, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or,

4. The National Archives and Records Administration (NARA).

For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

Availability

All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit the National Flight Data Center online at nfdc.faa.gov to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from the FAA Air Traffic Organization Service Area in which the affected airport is located.

FOR FURTHER INFORMATION CONTACT:

Rune Duke, Manager, Standards Section, Flight Procedures and Airspace Group, Aviation Safety, Federal Aviation Administration. Mailing Address: FAA Mike Monroney Aeronautical Center, Flight Procedures and Airspace Group, 6500 South MacArthur Blvd., STB Annex, Bldg 26, Room 217, Oklahoma City, OK 73099. Telephone (405) 954–1139.

SUPPLEMENTARY INFORMATION: This rule amends 14 CFR part 97 by amending the referenced SIAPs. The complete regulatory description of each SIAP is listed on the appropriate FAA Form 8260, as modified by the National Flight Data Center (NFDC)/Permanent Notice to Airmen (P–NOTAM), and is incorporated by reference under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR 97.20. The large number of SIAPs, their complex nature, and the need for a special format make their verbatim

publication in the **Federal Register** expensive and impractical. Further, pilots do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained on FAA form documents is unnecessary. This amendment provides the affected CFR sections, and specifies the SIAPs and Takeoff Minimums and ODPs with their applicable effective dates. This amendment also identifies the airport and its location, the procedure and the amendment number.

Availability and Summary of Material Incorporated by Reference

The material incorporated by reference is publicly available as listed in the **ADDRESSES** section.

The material incorporated by reference describes SIAPs, Takeoff Minimums and ODPs as identified in the amendatory language for part 97 of this final rule.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP and Takeoff Minimums and ODP as amended in the transmittal. For safety and timeliness of change considerations, this amendment incorporates only specific changes contained for each SIAP and Takeoff Minimums and ODP as modified by FDC permanent NOTAMs.

The SIAPs and Takeoff Minimums and ODPs, as modified by FDC permanent NOTAM, and contained in this amendment are based on criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these changes to SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied only to specific conditions existing at the affected airports. All SIAP amendments in this rule have been previously issued by the FAA in a FDC NOTAM as an emergency action of

immediate flight safety relating directly to published aeronautical charts.

The circumstances that created the need for these SIAP and Takeoff Minimums and ODP amendments require making them effective in less than 30 days.

Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C. 553(d), good cause exists for making these SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT regulatory

Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, Navigation (air).

Issued in Washington, DC, September 11, 2026.

Rune Duke,

Manager, Standards Section, Flight Procedures and Airspace Group, Flight Technologies & Procedures Division, Federal Aviation Administration.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, 14 CFR part 97 is amended by amending Standard

Instrument Approach Procedures and Takeoff Minimums and ODPs, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

■ 2. Part 97 is amended to read as follows:

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, Identified as follows:

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 97

[Docket No. 31683; Amdt. No. 4235]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule establishes, amends, suspends, or removes Standard

Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure Procedures (ODPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective September 18, 2026. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory

provisions. The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of September 18, 2026.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination

1. U.S. Department of Transportation, Docket Ops–M30. 1200 New Jersey Avenue SE, West Bldg., Ground Floor, Washington, DC 20590–0001.

2. The FAA Air Traffic Organization Service Area in which the affected airport is located;

3. The office of Aeronautical Information Services, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or,

4. The National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

Availability

All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit the National Flight Data Center at nfdc.faa.gov to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from the FAA Air Traffic Organization Service Area in which the affected airport is located.

FOR FURTHER INFORMATION CONTACT:

Rune Duke, Manager, Standards Section, Flight Procedures and Airspace Group, Aviation Safety, Federal Aviation Administration. Mailing Address: FAA Mike Monroney Aeronautical Center, Flight Procedures and Airspace Group, 6500 South MacArthur Blvd., STB Annex, Bldg 26, Room 217, Oklahoma City, OK 73099. Telephone (405) 954-1139.

SUPPLEMENTARY INFORMATION: This rule amends 14 CFR part 97 by establishing, amending, suspending, or removes SIAPs, Takeoff Minimums and/or ODPs. The complete regulatory description of each SIAP and its associated Takeoff Minimums or ODP for an identified airport is listed on FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR 97.20. The applicable FAA Forms are 8260-3, 8260-4, 8260-5, 8260-15A, 8260-15B, when required by an entry on 8260-15A, and 8260-15C.

The large number of SIAPs, Takeoff Minimums and ODPs, their complex nature, and the need for a special format make publication in the **Federal Register** expensive and impractical. Further, pilots do not use the regulatory text of the SIAPs, Takeoff Minimums or ODPs, but instead refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP, Takeoff Minimums and ODP listed on FAA form documents is unnecessary. This amendment provides the affected CFR sections and specifies the types of SIAPs, Takeoff Minimums and ODPs with their applicable effective dates. This amendment also identifies the airport and its location, the procedure, and the amendment number.

Availability and Summary of Material Incorporated by Reference

The material incorporated by reference is publicly available as listed in the **ADDRESSES** section.

The material incorporated by reference describes SIAPs, Takeoff Minimums and/or ODPs as identified in the amendatory language for part 97 of this final rule.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP, Takeoff Minimums and ODP as amended in the transmittal. Some SIAP and Takeoff Minimums and textual ODP amendments may have been issued previously by the FAA in a Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flights safety relating directly to published aeronautical charts.

The circumstances that created the need for some SIAP and Takeoff Minimums and ODP amendments may require making them effective in less than 30 days. For the remaining SIAPs and Takeoff Minimums and ODPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs and Takeoff Minimums and ODPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C. 553(d), good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial

number of small entities under the criteria of the Regulatory Flexibility Act.

Lists of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, Navigation (air).

Issued in Washington, DC, on September 11, 2026.

Rune Duke,

Manager, Standards Section, Flight Procedures and Airspace Group, Flight Technologies & Procedures Division, Federal Aviation Administration.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, 14 CFR part 97 is amended by establishing, amending, suspending, or removing Standard Instrument Approach Procedures and/or Takeoff Minimums and Obstacle Departure Procedures effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

DEPARTMENT OF STATE

22 CFR Part 120, 123, 125, and 126

[Public Notice: 13121]

RIN 1400–AG31

International Traffic in Arms Regulations: Clarifying Policies of Denial, Updating the Major Non-NATO Ally List, and Minor Corrections

AGENCY: Department of State.

ACTION: Final rule.

SUMMARY: The Department of State is amending the International Traffic in Arms Regulations (ITAR) to clarify certain policy-of-denial provisions, update country policies for Ethiopia and Somalia, add Saudi Arabia and Peru to the list of major non-NATO allies, and make other miscellaneous corrections.

DATES: This rule is effective on September 18, 2026.

FOR FURTHER INFORMATION CONTACT: Mr. Ryan Haddad, Foreign Affairs Officer, Office of Defense Trade Controls Policy, U.S. Department of State, telephone 771–204–7878; email

DDTCCustomerService@state.gov.

ATTN: Regulatory Change, ITAR Section 126.1 Clarification.

SUPPLEMENTARY INFORMATION: It is the policy of the United States to deny licenses or other approvals for exports and imports destined for, or originating in, certain countries. That policy is codified in the ITAR in § 126.1(a), and countries subject to it are identified in paragraph (d). Within that paragraph, the Department distinguishes between countries subject to a comprehensive policy of denial and those subject to qualified policies of denial. Countries subject to a comprehensive policy of denial are identified in § 126.1(d)(1). Meanwhile, qualified policies of denial are described in § 126.1(d)(2). To improve clarity regarding the scope of these prohibitions, and to make additional changes to implement recent policy actions and correct minor typographical errors, the Department is amending parts 120, 123, 125, and 126 of the ITAR. The changes are as follows:

Improving the Organization and Readability of § 126.1

- The text of § 126.1(a) is modified to specify that its prohibitions apply to “exports, reexports, retransfers, and temporary imports of defense articles and defense services destined for, or originating in, certain countries.” This revision more specifically states which controlled events are subject to a policy of denial, and similar changes are made in this rule to other paragraphs for the

same reason. Additionally, a revision is made to further emphasize that the ITAR’s prohibitions on brokering activities involving countries identified in § 126.1 can be found in § 129.7.

- *Identification.* To better introduce the topic of paragraph (c) and to conform with the structure and style of paragraphs in the section, the Department is adding the paragraph heading “*Identification in this section.*” to paragraph (c).

- The general policy descriptions in paragraphs (d)(1) and (2) are revised by clarifying that “exports, reexports, retransfers, and temporary imports” of defense articles and defense services are affected by these prohibitions.

Clarifying Policy of Denial-Related Prohibitions

- *§ 120.15 Exemptions.* The prohibition on exemption usage described in § 120.15(c) is revised to specify that it applies to exports, reexports, retransfers, and temporary imports of defense articles and defense services.

- *§ 123.16 Exemptions of general applicability (defense articles).* The license exemption described in § 123.16 is revised to specify that the exemptions may not be used for defense article and defense service exports, reexports, or retransfers to, or temporary imports from, any proscribed countries, areas, or persons identified in § 126.1 of this subchapter, except as provided in § 126.1.

- *§ 125.4 Exemptions of general applicability (technical data and classified defense articles).*

- In § 125.4(a), the text is revised to specify that the exemptions in the paragraph may not be used for defense article and defense service exports, reexports, retransfers to, or temporary imports from, any proscribed countries, areas, or persons identified in § 126.1 of this subchapter, except as provided in § 126.1. The paragraph is also revised to specify that the exemptions in the paragraph may not be used for transfers “to or for”—rather than just “for”—persons ineligible under § 120.16. This change confirms that such persons may not participate in any ITAR-controlled activities under these exemptions. A minor typographical correction is also made to capitalize the word “Controls.”

- The § 125.4(b)(10) exemption text is revised to replace the term “Disclosures” with the ITAR term “Releases.” A minor typographical correction is also made to hyphenate “full-time.”

Updating § 126.1 Country Policies

- The entry for Ethiopia in paragraph (n) is removed and the paragraph is reserved, implementing a February 5, 2026 policy determination by the Secretary of State terminating the policy of denial for licenses or other approvals for exports of defense articles or defense services destined to or for the armed forces, police, intelligence, or other internal security forces of Ethiopia.

- The entry for Libya in paragraph (k) is revised to make several minor clarifications and typographical corrections:

- Paragraph (3) is revised to use the ITAR phrase “defense services” instead of “technical assistance or training.”

- Paragraph (6) is revised to replace the phrase “arms and related material” with “defense articles” and to replace “provision of assistance or personnel” with “defense services.” It also replaces the phrase “Committee of the Security Council concerning Libya” with the more specific “committee of the United Nations Security Council concerned with Libya,” which is the ITAR’s standard formulation and reflects that the committee is not named with a proper noun.

- Paragraph (8) is revised to add the phrase “provided by the United States Government” after “Defense services,” which was mistakenly omitted in a prior rule. The word “associated” is removed from the phrase “associated temporary exports of defense articles” to clarify that those temporary exports do not need to be specifically associated with the defense services in question to qualify for this exclusion.

- Paragraph (9) is revised to remove the superfluous “s” after “United Nations.”

- The entry for Somalia in paragraph (m) is revised to remove a comma from the existing text clarify the text of the exclusion from the policy of denial. This change affirms that the supply of weapons, ammunition, or military equipment may be authorized through case-by-case licensing review if intended solely for the support of, or use by, European Union training and support activities, Turkey, the United Kingdom, and the United States; it equally applies in the same circumstances for other United Nations Member States that have concluded a Status of Forces Agreement with Somalia, provided those Member States pre-notify the committee of the United Nations Security Council concerned with Somalia. The Department will consider applications for such activities on a case-by-case basis.

- The entry for South Sudan in paragraph (w) is revised to clarify that

the policy of denial generally applies to both exports and imports of defense articles and defense services. A stylistic change is also made in paragraph (2) to use the standardized phrase “committee of the United Nations Security Council concerned with South Sudan.”

Correcting Technical Errors in the § 126.5 Canadian Exemptions

- The Canadian exemption for temporary and permanent export at § 126.5(b) is revised to remove a requirement that contradicts the text of § 123.10. The current § 126.5(b) text states that exporters must obtain a Nontransfer and Use Certificate (Form DSP-83) for all significant military equipment transferred under the § 126.5(b) exemptions. Section 123.10 states that such assurances are not required when using the § 126.5 exemptions. This revision aligns the two paragraphs and clarifies that such certificates are not needed when using the § 126.5(b) Canadian exemption.

- A similar correction is made to § 126.5(d) to specify that the paragraph’s reexport/retransfer exemption requirements do not include the need to obtain Nontransfer and Use Certificates, notwithstanding the cross reference to § 123.9(c) and the requirement to include the information required by that paragraph, which in turn references § 123.1, and the need to include all documentation required of a permanent export license.

Updating the Major Non-NATO Allies List

- In § 120.23, the list of “major non-NATO allies” is revised to add Saudi Arabia (91 FR 3017, January 13, 2026) and Peru (91 FR 3019, January 14, 2026.)

Regulatory Analysis and Notices

Administrative Procedure Act

This rulemaking is exempt from the rulemaking requirements of the Administrative Procedure Act (APA) pursuant to 5 U.S.C. 553(a)(1) as a military or foreign affairs function of the United States. As the provisions of section 553 do not apply to this rulemaking, the Department is publishing this rule with an immediate effective date and without a request for public comment.

Regulatory Flexibility Act

Since this rule is exempt from the notice-and-comment rulemaking provisions of 5 U.S.C. 553, the rule does not require analysis under the Regulatory Flexibility Act.

Unfunded Mandates Reform Act of 1995

This rulemaking does not involve a mandate that will result in the expenditure by State, local, and tribal governments, in the aggregate or by the private sector, of \$100 million or more in any year, and it will not significantly or uniquely affect small governments. Therefore, no actions are deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

Congressional Review Act

The Office of Information and Regulatory Affairs has found that this rulemaking is not a major rule within the criteria of 5 U.S.C. 804(2). This rule will not increase costs or prices and should have no adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic and export markets. The Department does not expect this change to have an annual effect on the economy of \$100 million or more.

Executive Orders 12372 and 13132

This rulemaking does not have sufficient federalism implications to require consultations or warrant the preparation of a federalism summary impact statement. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities do not apply to this rulemaking.

Executive Orders 12866 and 13563

Executive Order 12866, as amended by Executive Order 13563, directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, and safety effects). As a result of this change, certain restrictions on defense trade activities will be clarified. Other changes modestly expand the scope of permissible defense trade activities. Because this rule, on balance, removes regulatory requirements and obligations, the Department believes costs associated with this rule will be minimal. This rule has been designated a “significant regulatory action” by the Office of Information and Regulatory Affairs under Executive Order 12866.

Executive Order 12988

The Department of State has reviewed this rulemaking in light of Executive Order 12988 to eliminate ambiguity,

minimize litigation, establish clear legal standards, and reduce burden.

Executive Order 13175

The Department of State determined that this rulemaking will not have tribal implications, will not impose substantial direct compliance costs on Indian tribal governments, and will not preempt tribal law. Accordingly, Executive Order 13175 does not apply to this rulemaking.

Executive Order 14192

This rule is exempt from the requirements of Executive Order 14192 because it relates to a foreign affairs or national security function of the United States.

Paperwork Reduction Act

This rulemaking does not impose or revise any information collections subject to 44 U.S.C. Chapter 35.

List of Subjects

22 CFR Part 120

Arms and munitions, Classified information, Exports.

22 CFR Part 123

Arms and munitions, Exports, Reporting and recordkeeping requirements.

22 CFR Part 125

Arms and munitions, Classified information, Exports.

22 CFR Part 126

Arms and munitions, Exports, Reporting and recordkeeping requirements, Technical assistance.

PART 120—PURPOSE AND DEFINITIONS

- 1. The authority citation for part 120 continues to read as follows:

Authority: 22 U.S.C. 2651a, 2752, 2753, 2776, 2778, 2779, 2779a, 2785, 2794, 2797; E.O. 13637, 78 FR 16129, 3 CFR, 2013 Comp., p. 223.

- 2. Amend § 120.15 by revising paragraph (c) to read as follows:

§ 120.15 Exemptions.

* * * * *

(c) Exemptions provided in this subchapter do not apply to defense article and defense service exports, reexports, or retransfers to, or temporary imports originating from, any proscribed countries, areas, or persons identified in § 126.1 of this subchapter, except as provided in § 126.1.

* * * * *

- 3. Amend § 120.23 by revising paragraph (b)(2) to read as follows:

§ 120.23 Organizations and arrangements.

* * * * *

(b) * * *

(2) The following countries have been designated as major non-NATO allies: Argentina, Australia, Bahrain, Brazil, Colombia, Egypt, Israel, Japan, Jordan, Kenya, Kuwait, Morocco, New Zealand, Pakistan, Peru, the Philippines, Qatar, the Republic of Korea, Saudi Arabia, Thailand, and Tunisia. Taiwan shall be treated as though it were designated a major non-NATO ally.

* * * * *

PART 123—LICENSES FOR THE EXPORT AND TEMPORARY IMPORT OF DEFENSE ARTICLES

- 4. The authority citation for part 123 continues to read as follows:

Authority: Secs. 2, 38, and 71, Pub. L. 90–629, 90 Stat. 744 (22 U.S.C. 2752, 2778, 2797); 22 U.S.C. 2753; 22 U.S.C. 2651a; 22 U.S.C. 2776; Pub. L. 105–261, 112 Stat. 1920; Sec. 1205(a), Pub. L. 107–228; Sec. 520, Pub. L. 112–55; Section 1261, Pub. L. 112–239; E.O. 13637, 78 FR 16129.

- 5. Amend § 123.16 by revising paragraph (a) to read as follows:

§ 123.16 Exemptions of general applicability.

(a) The following exemptions apply to exports, reexports, retransfers, or temporary imports of unclassified defense articles for which no approval is needed from the Directorate of Defense Trade Controls. These exemptions do not apply to: Proscribed destinations under § 126.1 of this subchapter; exports for which Congressional notification is required (see § 123.15 and § 124.11 of this subchapter); defense articles designated as Significant Military Equipment (SME) or on the Missile Technology Control Regime (MT) Annex; and may not be used by persons who are generally ineligible as described in § 120.16 of this subchapter. All shipments of defense articles, including but not limited to those to Australia, Canada, and the United Kingdom, require an Electronic Export Information (EEI) filing or notification letter. If the export of a defense article is exempt from licensing, the EEI filing must cite the exemption. Refer to § 123.22 for EEI filing and letter notification requirements.

* * * * *

PART 125—LICENSES FOR THE EXPORT OF TECHNICAL DATA AND CLASSIFIED DEFENSE ARTICLES

- 6. The authority citation for part 125 continues to read as follows:

Authority: Secs. 2 and 38, Pub. L. 90–629, 90 Stat. 744 (22 U.S.C. 2752, 2778); 22 U.S.C. 2651a; E.O. 13637, 78 FR 16129.

- 7. Amend § 125.4 by revising paragraphs (a) and (b)(10) to read as follows:

§ 125.4 Exemptions of general applicability.

(a) The following exemptions apply to exports of technical data for which approval is not needed from the Directorate of Defense Trade Controls. The exemptions, except for paragraph (b)(13) of this section, do not apply to defense article and defense service exports, reexports, or retransfers to, or temporary imports from, proscribed destinations under § 126.1 of this subchapter or for persons considered generally ineligible under § 120.16 of this subchapter. The exemptions are also not applicable for purposes of establishing offshore procurement arrangements or producing defense articles offshore (see § 124.13), except as authorized under paragraph (c) of this section. Transmission of classified information must comply with the requirements of the Department of Defense National Industrial Security Program Operating Manual (unless such requirements are in direct conflict with guidance provided by the Directorate of Defense Trade Controls, in which case the latter guidance must be followed) and the exporter must certify to the transmittal authority that the technical data does not exceed the technical limitation of the authorized export.

(b) * * *

(10) Releases of unclassified technical data in the U.S. by U.S. institutions of higher learning to foreign persons who are their bona fide and full-time regular employees. This exemption is available only if:

* * * * *

PART 126—GENERAL POLICIES AND PROVISIONS

- 8. The authority citation for part 126 continues to read as follows:

Authority: 22 U.S.C. 287c, 2651a, 2752, 2753, 2776, 2778, 2779, 2779a, 2780, 2791, 2797, 10423; sec. 1225, Pub. L. 108–375, 118 Stat. 2091; sec. 7045, Pub. L. 112–74, 125 Stat. 1232; sec. 1250A, Pub. L. 116–92, 133 Stat. 1665; sec. 205, Pub. L. 116–94, 133 Stat. 3052; and E.O. 13637, 78 FR 16129, 3 CFR, 2013 Comp., p. 223.

- 9. Amend § 126.1 by:
- a. Revising paragraph (a);
 - b. In paragraph (c), adding a paragraph heading;
 - c. Revising paragraphs (d), (i) introductory text and (i)(5), (k) introductory text, (k)(3), (6), (8) and (9), (m) introductory text and (m)(2)(iii);

- d. Removing and reserving paragraph (n); and
- e. Revising paragraphs (w) introductory text and (w)(2).

The revisions read as follows:

§ 126.1 Prohibited exports, imports, and sales to or from certain countries.

(a) *General.* It is the policy of the United States to deny licenses and other approvals for exports, reexports, retransfers, and temporary imports of defense articles and defense services destined for, or originating in, certain

countries. (For brokering activities, see § 129.7 of this subchapter, which imposes restrictions similar to those contained in this section.) No transfer of defense articles or defense services may be made pursuant to an exemption provided in this subchapter to or from any proscribed countries, areas, or persons as described in this section, except as follows:

(1) Transfers pursuant to § 123.17, § 125.4(b)(13), § 126.6, or § 126.18(e) of this subchapter;

(c) *Identification in this section.*

(d) *Countries subject to certain prohibitions.* (1) For exports, reexports, retransfers, and temporary imports of defense articles and defense services, the following countries are subject to a policy of denial:

TABLE 1 TO PARAGRAPH (d)(1)

Country
Belarus
Burma
China
Cuba
Iran
North Korea
Syria
Venezuela

(2) For exports, reexports, retransfers, and temporary imports of defense

articles and defense services, a policy of denial applies as specified in the

associated paragraphs in the following table:

TABLE 2 TO PARAGRAPH (d)(2)

Country	Country specific paragraph location
Afghanistan	See also paragraph (g) of this section.
Central African Republic	See also paragraph (u) of this section.
Cyprus	See also paragraph (r) of this section.
Democratic Republic of the Congo	See also paragraph (i) of this section.
Eritrea	See also paragraph (h) of this section.
Haiti	See also paragraph (j) of this section.
Iraq	See also paragraph (f) of this section.
Lebanon	See also paragraph (t) of this section.

* * * * *

(i) *Democratic Republic of the Congo.* It is the policy of the United States to deny licenses or other approvals for exports or imports of defense articles and defense services destined for or originating in the Democratic Republic of the Congo, except that a license or other approval may be issued, on a case-by-case basis, for:

* * * * *

(5) Defense articles and defense services as approved by the committee of the United Nations Security Council concerned with the Democratic Republic of the Congo.

* * * * *

(k) *Libya.* It is the policy of the United States to deny licenses or other approvals for exports or imports of defense articles and defense services destined for or originating in Libya, except that a license or other approval may be issued, on a case-by-case basis, for:

* * * * *

(3) The provision of defense services when intended solely for security or disarmament assistance to the Libyan government;

* * * * *

(6) Other sales or supply of defense articles or defense services, as approved in advance by the committee of the

United Nations Security Council concerned with Libya;

* * * * *

(8) Defense services provided by the United States Government to Libyan security forces intended solely to promote the process of reunification of Libyan military and security institutions, as well as temporary exports of defense articles intended solely for use by the non-Libyan providers of those defense services for delivery of those defense services and their protective use, as notified in advance to the committee of the United Nations Security Council concerned with Libya; or

(9) Military aircraft or naval vessels temporarily exported by the United States Government into the territory of Libya solely to deliver items or facilitate activities otherwise exempted or not covered by the United Nations arms embargo on Libya, including humanitarian assistance, as well as defense articles for defensive purposes that remain at all times aboard the vessel or aircraft while temporarily in Libya or on the person of any non-Libyan personnel temporarily disembarked from such vessel or aircraft.

* * * * *

(m) *Somalia*. It is the policy of the United States to deny licenses or other approvals for exports or imports of defense articles and defense services destined for Somalia, except that a license or other approval may be issued, on a case-by-case basis, for:

* * * * *

(2) * * *

(iii) European Union training and support activities, Turkey, the United Kingdom, or the United States, or any other Member State forces with a status of forces agreement or a memorandum of understanding with the Government of the Federal Republic of Somalia, provided that they inform the committee of the United Nations Security Council concerned with Somalia, for information purposes only, about the existence of such agreements;

* * * * *

(w) *South Sudan*. It is the policy of the United States to deny licenses or other approvals for exports or imports of defense articles and defense services destined for South Sudan, except that a license or other approval may be issued, on a case-by-case basis, for:

* * * * *

(2) Non-lethal defense articles intended solely for humanitarian or protective use, and related defense services as notified in advance to the committee of the United Nations Security Council concerned with South Sudan;

* * * * *

■ 10. Amend § 126.5 by revising paragraphs (b) and (d) introductory text to read as follows:

§ 126.5 Canadian exemptions.

* * * * *

(b) *Permanent and temporary export of defense articles*. Except as provided in Supplement No. 1 to part 126 of this subchapter and for exports that transit third countries, Port Directors of U.S. Customs and Border Protection and postmasters shall permit, when for end-use in Canada by Canadian Federal or

Provincial governmental authorities acting in an official capacity or by a Canadian-registered person, or for return to the United States, the permanent and temporary export to Canada without a license of unclassified defense articles and defense services identified on the U.S. Munitions List (22 CFR 121.1). The exceptions are subject to meeting the requirements of this subchapter, to include §§ 120.15(d) and 120.16, parts 122 and 123 (except insofar as exemption from licensing requirements is herein authorized) and § 126.1. For purposes of this section, “Canadian-registered person” is any Canadian national (including Canadian business entities organized under the laws of Canada), dual citizen of Canada and a third country other than a country listed in § 126.1, and permanent resident registered in Canada in accordance with the Canadian Defense Production Act, and such other Canadian Crown Corporations identified by the Department of State in a list of such persons publicly available through the internet website of the Directorate of Defense Trade Controls and by other means.

* * * * *

(d) *Reexports/retransfer*. Reexport/retransfer in Canada to another end-user or end-use or from Canada to another destination, except the United States, must in all instances have the prior approval of the Directorate of Defense Trade Controls. Unless otherwise exempt in this subchapter, the original exporter is responsible, upon request from a Canadian-registered person, for obtaining or providing reexport/retransfer approval. In any instance when the U.S. exporter is no longer available to the Canadian end-user the request for reexport/retransfer may be made directly to the Directorate of Defense Trade Controls. All requests must include the information in § 123.9(c) of this subchapter, except that as provided in § 123.10 of this subchapter a Nontransfer and Use Certificate is not required. Reexport/retransfer approval is acquired by:

* * * * *

Thomas G. DiNanno,

Under Secretary, Arms Control and International Security, Department of State.

[FR Doc. 2026–19161 Filed 9–17–26; 8:45 am]

BILLING CODE 4710–25–P

DEPARTMENT OF STATE

22 CFR Part 121

[Public Notice: 13120]

RIN 1400–AG35

International Traffic in Arms Regulations: Modification of U.S. Munitions List Category XX(a)

AGENCY: Department of State.

ACTION: Interim final rule.

SUMMARY: The Department of State (the Department) amends the International Traffic in Arms Regulations (ITAR) to remove from the U.S. Munitions List (USML) certain uncrewed underwater vehicles (UUVs) and make conforming changes to related controls. The Department also requests comments to assist in further refining ITAR controls on UUVs and to identify possible enhancements to the license exemption for certain UUV-related activities.

DATES:

Effective date: This rule is effective October 19, 2026.

Comment due date: Send comments on or before October 19, 2026.

ADDRESSES: Interested parties may submit comments to the Department of State by any of the following methods:

- Visit the *Regulations.gov* website at: <https://www.regulations.gov> and search for the docket number DOS–2026–0958.

- *Email:* DDTCPublicComments@state.gov. Commenting parties must include RIN 1400–AG35 in the subject line of the email message.

See **SUPPLEMENTARY INFORMATION** for other information about electronic filing.

FOR FURTHER INFORMATION CONTACT: Mr. Chris Weil, Office of Defense Trade Controls Policy, Department of State, email DDTCCustomerService@state.gov SUBJECT: U.S. Munitions List Category XX(a)—RIN 1400–AG35.

SUPPLEMENTARY INFORMATION: The Department of State’s Directorate of Defense Trade Controls (DDTC) administers the ITAR (22 CFR parts 120 through 130) to, among other things, regulate the export, reexport, retransfer, and temporary import of defense articles and defense services described on the USML at ITAR § 121.1. Items not subject to the ITAR or to the exclusive licensing jurisdiction of certain other departments or agencies of the U.S. Government are subject to the Export Administration Regulations (EAR) (15 CFR parts 730 through 774), which include the Commerce Control List (CCL) in Supplement No. 1 to part 774. The EAR is administered by the Department of

Commerce, Bureau of Industry and Security (BIS). This rule does not modify the list of defense articles and defense services controlled for purposes of permanent import by the Attorney General, as enumerated on the U.S. Munitions Import List (USML) at 27 CFR 447.21.

Section 38 of the Arms Export Control Act (AECA) (22 U.S.C. 2778) requires periodic review of the USML to determine which articles and services, if any, no longer warrant designation. In maintaining the USML, DDTC identifies articles and services for potential addition to or removal from the USML, or for clarification on how they are described on the USML, through a variety of methods. This can include public feedback and interagency consultations, commodity jurisdiction reviews, advisory opinions, and technology monitoring. The Department maintains the USML such that it comprises those defense articles or defense services that provide a critical military or intelligence advantage. The Department, informed by consultations with its interagency partners, and with the concurrence of the Department of Defense, has determined that those articles and services this rule removes from the USML no longer warrant ITAR control.

USML Category XX(a)(10) describes certain vessels with a gross weight rating exceeding 3,000 pounds that are designed to operate without human interaction for longer than 24 hours or for more than 70 nautical miles. The license exemption at ITAR § 126.9(u) authorizes certain transfers of vessels described in USML Category XX(a)(10).

The Department, with the concurrence of the Department of Defense, now assesses that vessels described in USML Category XX(a)(10) with a gross weight rating up to 8,000 pounds only provide a critical military or intelligence advantage when they are described elsewhere on the USML or when they are specially designed to possess certain navigation capabilities. Based on this assessment, the Department is revising paragraph (a)(10) to continue describing vessels at or under 8,000 pounds only if they are specially designed to have navigation capabilities beyond the ability to (1) follow fixed waypoints and (2) perform collision avoidance maneuvers that adhere to the see-and-avoid principles of navigation regulations. The Department is also revising paragraph (a)(10) to use the term “specially designed,” which is defined in § 120.41, to improve the clarity of the control text. The Department is also adding a new paragraph (a)(11) and moving vessels

with a gross weight rating exceeding 8,000 pounds that are specially designed to operate without human interaction for longer than 24 hours or for more than 70 nautical miles, to paragraph (11) from the current paragraph (10). This rule does not modify the license exemption at § 126.9(u); the provisions in that exemption remain available for vessels described in USML Category XX(a)(10). The Department also makes conforming changes to paragraph (a)(9) in this rule. The Department also notes its intent to review the ITAR controls on autonomous capabilities, including the maritime navigation systems described in USML Category VI.

Request for Comments

Specific Comments Requested

The Department encourages the public to provide comments related to this rule, as well as comments specifically responsive to the questions described in this section. To facilitate timely review and assessment, comments should be provided in a concise sentence or paragraph, followed by supporting explanatory paragraphs and examples, with each distinct comment treated separately as opposed to multiple comments in one paragraph or section. The Department encourages commenters to include supporting facts, research, and evidence in their comments. When doing so, commenters are encouraged to provide citations to any published materials referenced.

1. Are there other navigation capabilities the Department should consider in order to refine the updated navigation system criteria in the new USML Category XX(a)(10)?

2. Section § 126.9 includes a licensing exemption for certain activities using UAVs described in USML Category XX(a)(10).

a. What challenges, if any, have operators of vessels described in the new USML Category XX(a)(10) encountered in using the exemption? How could the Department revise the exemption to mitigate those challenges while continuing to protect U.S. national security interests?

b. Are there additional activities the Department should consider adding to the list of authorized purposes in § 126.9(u)(2)(iii)?

Comment Submission Instructions

Include the Regulatory Information Number (RIN) (1400–AG35) for all submissions related to this rule and follow the submission instructions contained in the **ADDRESSES** section above. Parties who wish to comment

anonymously may do so by submitting their comments via www.regulations.gov, leaving the fields that would identify the commenter blank and including no identifying information in the comment itself. Commenters are cautioned not to include proprietary, export-controlled, personal, or other sensitive information in their comments that they would not want to be made public. If such information would provide useful insight to the comment: (1) assemble that information in a separate document with relevant markings; (2) include “[Proprietary] supplement on file with: [provide POC]” as the first line in the body of the email submission; (3) submit the public portion of the comment via email; and (4) call DDTC at (202) 663–1282 to coordinate submission of the proprietary supplement.

Regulatory Analysis and Notices

Administrative Procedure Act

This rulemaking is exempt from the rulemaking requirements of the Administrative Procedure Act (APA) pursuant to 5 U.S.C. 553(a)(1) as it involves a military or foreign affairs function of the United States. Nevertheless, and without prejudice to this determination, the Department seeks public comments in this rule.

Regulatory Flexibility Act

Since this rule is exempt from the notice-and-comment rulemaking provisions of 5 U.S.C. 553, it does not require analysis under the Regulatory Flexibility Act.

Unfunded Mandates Reform Act of 1995

This rulemaking does not involve a mandate that will result in the expenditure by state, local, and tribal governments, in the aggregate, or by the private sector of \$100 million or more in any year and it will not significantly or uniquely affect small governments. Therefore, no actions are deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

Congressional Review Act

The Office of Information and Regulatory Affairs has found that this rule is not a major rule under the criteria of 5 U.S.C. 804(2).

Executive Orders 12372 and 13132

This rulemaking does not have sufficient federalism implications to require consultations or warrant the preparation of a federalism summary impact statement. The regulations implementing Executive Order 12372

regarding intergovernmental consultation on Federal programs and activities do not apply to this rulemaking.

Executive Orders 12866 and 13563

Executive Order 12866, as supplemented and affirmed by Executive Order 13563, directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributed impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. After review by the Office of Management and Budget (OMB), this rule has been deemed to be a “significant regulatory action” under section 3(f) of Executive Order 12866.

This rule was undertaken pursuant to a statutory directive to periodically review the items on the USML. The Department generally determines which items warrant addition to, or removal from, the USML by assessing whether each provides a critical military or intelligence advantage based on national security and foreign policy considerations. Because the costs and benefits of changing what is controlled focus on the effect or utility of the item or service, rather than its market prevalence or economic value, quantitative analyses cannot be usefully estimated and are not available, particularly since the global prevalence or availability of the item or service are not known. Qualitatively, the rule was assessed for costs and benefits. These revisions are also informed by confidential requests for commodity jurisdiction determinations and advisory opinions, submitted by industry. The Department takes into account common questions and strives to streamline and simplify USML paragraphs based on how it understands industry experience with certain parts of the USML.

This rule removes the designation of certain defense articles by revising USML Category XX(a). Vessels removed from the scope of USML Category XX(a)(10), that are not described elsewhere on the USML, will become subject to the EAR. This action reduces the regulatory requirements associated with the removed vessels. The Department assesses the vessels removed by this rule do not warrant control under the ITAR. The Department assesses the benefits of this

rulemaking outweigh any costs, that modifying the USML in this manner is the most cost-effective method to achieve the Department’s regulatory objectives on this matter, and that doing so will result in a net reduction of the burden on the regulated community.

The alternative to this rule was inaction or delay. The Department could have waited to amend larger parts of the USML at once or continued to gather data to evaluate the controls affected by this rule. These alternatives were rejected. Statutory requirements, including section 38(f) of the Arms Export Control Act (22 U.S.C. 2778(f)), and section 1345 of the National Defense Authorization Act for Fiscal Year 2024, require a periodic review of the USML for edits like those made by this rule. While the Department continuously reviews the entire USML, it aims to implement most revisions through rules that are focused on specific items or subsets of the USML.

Executive Order 14192

This rule is exempt from Executive Order 14192 as it is a regulation issued with respect to a foreign affairs or national security function of the United States.

Executive Order 12988

The Department of State has reviewed this rulemaking in light of sections 3(a) and 3(b)(2) of Executive Order 12988 to eliminate ambiguity, minimize litigation, establish clear legal standards, and reduce burden.

Executive Order 13175

The Department of State has determined that this rulemaking will not have tribal implications, will not impose substantial direct compliance costs on Indian tribal governments, and will not preempt tribal law. Accordingly, the requirements of Executive Order 13175 do not apply to this rulemaking.

Paperwork Reduction Act

This rulemaking does not impose or revise any information collections subject to 44 U.S.C. chapter 35.

List of Subjects in 22 CFR Part 121

Arms and munitions, Classified information, Exports.

For the reasons set forth in the preamble, the Department of State amends 22 CFR part 121, the United States Munitions List, as follows:

PART 121—THE UNITED STATES MUNITIONS LIST

■ 1. The authority citation for part 121 continues to read as follows:

Authority: 22 U.S.C. 2752, 2778, 2797; 22 U.S.C. 2651a; Sec. 1514, Pub. L. 105–261, 112 Stat. 2175; E.O. 13637, 78 FR 16129, 3 CFR, 2013 Comp., p. 223.

■ 2. Amend § 121.1, in Category XX, by revising paragraphs (a)(9) and (10), adding note 1 to paragraph (a)(10)(ii), and adding paragraph (a)(11), to read as follows:

§ 121.1 The United States Munitions List.

* * * * *

Category XX—Submersible Vessels and Related Articles

(a) * * *
* * * * *

(9) Uncrewed, untethered vessels that have an anti-recovery (e.g., scuttle or self-destruct) feature;

(10) Uncrewed, untethered vessels with a gross weight rating exceeding three thousand pounds (3,000 lb) and not exceeding eight thousand pounds (8,000 lb), specially designed to both:

(i) Operate without human interaction for longer than 24 hours or for more than seventy nautical miles (70 nmi); and

(ii) Have capabilities for deviating from, determining, or planning a navigation route, other than: activating and following pre-planned routes using fixed waypoints, station-keeping, or performing collision avoidance maneuvers that adhere to the see-and-avoid principles of navigation regulations; or

Note 1 to paragraph (a)(10)(ii): An example of “see-and-avoid principles of navigation regulations” are those that implement relevant sections of the International Regulations for Preventing Collisions at Sea (COLREGs) such as Rules 5 (look-out), 8 (action to avoid collision), and 13 through 18 (various actions and responsibilities between vessels).

(11) Uncrewed, untethered vessels with a gross weight rating exceeding eight thousand pounds (8,000 lb), specially designed to operate without human interaction for longer than 24 hours or for more than seventy nautical miles (70 nmi).

RIN 1601–AB15

Homeland Security Acquisition Regulation, Make Personal Protective Equipment in America Act Restrictions on Foreign Acquisition (HSAR Case 2024–003)

AGENCY: Office of the Chief Procurement Officer (OCPO), Department of Homeland Security (DHS).

ACTION: Final rule.

SUMMARY: DHS is issuing a final rule to amend the Homeland Security Acquisition Regulation (HSAR) codifying how DHS complies with the requirements of the Make Personal Protective Equipment (PPE) in America Act. These changes are intended to ensure the sustainment and expansion of domestic manufacturing for certain types of PPE critical to the United States' national response to a public health crisis.

DATES: The final rule is effective October 19, 2026.

FOR FURTHER INFORMATION CONTACT: Shaundra Ford, Department of Homeland Security, Office of the Chief Procurement Officer, Acquisition Policy and Legislation, at (202) 282–8000 or email at HSAR@hq.dhs.gov. Include HSAR Case 2024–003 in the subject line.

I. Background

In a Notice of Proposed Rulemaking (NPRM), published in the **Federal Register** on October 1, 2024, the Department of Homeland Security (DHS) proposed to amend the Homeland Security Acquisition Regulation (HSAR) to codify how DHS complies with the requirements of the Make Personal Protective Equipment (PPE) in America Act.¹

¹ See 89 FR 79851, Homeland Security Acquisition Regulation, Make Personal Protective Equipment in America Act Restrictions on Foreign Acquisition (HSAR Case 2024–003) (Oct. 1, 2024).

As explained in the NPRM, the Infrastructure Investment and Jobs Act was signed into law on November 15, 2021.² Subtitle C of title IX of Division G of the Infrastructure Investment and Jobs Act is the Make PPE in America Act (“MPAA” or “the Act”).³ The Act requires the DHS, Department of Veterans Affairs (VA), and the U.S. Department of Health and Human Services (HHS) to take certain actions to ensure the sustainment and expansion of domestic manufacturing for certain types of PPE critical to the United States' national response to a public health crisis.⁴

The Act defines PPE as surgical masks, respirator masks and powered air purifying respirators and required filters, face shields and protective eyewear, gloves, disposable and reusable surgical and isolation gowns, head and foot coverings, and other gear or clothing used to protect an individual from the transmission of disease.⁵ The Act requires that any contracts for the procurement of PPE entered into by DHS, HHS, or VA be for PPE, including the materials and components thereof, that is domestically grown, reprocessed, reused, or produced.⁶ The Act also requires that these contracts with DHS, HHS, or VA for PPE last at least two years in duration plus all option periods necessary, to incentivize investment in the domestic production of PPE and the materials and components thereof.⁷ The Act allows for alternatives to domestic production under certain conditions (*i.e.*, where PPE assembled outside of the United States (U.S.) contains only materials and components grown, reprocessed, reused or produced in the U.S.).⁸ When using alternatives to domestic production, DHS, HHS, or VA, as applicable, must certify every 120 days that alternatives to domestic production are necessary to procure PPE due to the immediate needs of a public health emergency.⁹ The Act further recognizes certain exceptions to the domestic production of PPE, such as due to nonavailability, or where the PPE cannot be procured at U.S. market prices.¹⁰ Where DHS, HHS, or VA respectively grants an exception, that

² Infrastructure Investment and Jobs Act, Public Law 117–58, 135 Stat. 429 (2021).

³ Make PPE in America Act, Public Law 117–58, div. G, title IX, subtitle C, sections 70951–70953, 135 Stat. 1312–1316. The Make PPE in America Act is codified in 41 U.S.C. 8301 note.

⁴ Public Law 117–58, 135 Stat. 1312.

⁵ Public Law 117–58, 135 Stat. 1313.

⁷ Public Law 117–58, 135 Stat. 1314.

⁸ *Id.*

⁹ *Id.*

¹⁰ *Id.*

Secretary would also need to certify that implementing these exceptions are necessary to meet the immediate needs of a public health emergency.¹¹

As discussed in the NPRM, the DHS Chief Procurement Officer can issue HSAR deviations when necessary to allow Components to deviate from the HSAR.¹² On October 17, 2022, DHS issued a deviation regarding how DHS would comply with the Make PPE in America Act requirements (Deviation 23–01).¹³

II. Discussion of Public Comments

Interested parties were given until December 2, 2024, to comment on the NPRM. DHS reviewed the public comments in the development of the final rule. DHS received 23 public comments. A certain number of the comments received were outside the scope of the rule. A discussion of the comments within the scope of the rule is provided, as follows:

1. Definitions

Comment: Several commenters asked DHS to modify its definition of “component,” “domestic personal protective equipment,” “foreign-assembled domestic personal protective equipment,” and “foreign personal protective equipment.” Commenters suggested including the availability exception in the Act for nonavailable articles listed in FAR 25.104(a) to these definitions and, for the “foreign-assembled domestic personal protective equipment,” and “foreign personal protective equipment” definitions, limiting the applicability of FAR 25.104(a) to components used in American manufacturing facilities.

Commenters noted the MPAA includes a nonavailability exception that permits agencies to acquire covered PPE from foreign sources when compliant domestic products are not available in sufficient quantity or quality to meet agency requirements or are included in the nonavailable articles listing in FAR 25.104(a). The commenters further stated that nitrile butadiene rubber (NBR), a key raw material used to manufacture nitrile gloves, is a synthetic latex rubber and therefore falls within definition of “rubber, crude, and latex” which is currently identified as nonavailable in the listing. The commenters assert that

¹¹ *Id.*

¹² See HSAR Deviations, available at: <https://www.dhs.gov/publication/current-hsar-deviations>.

¹³ See HSAR 3001.4 and HSAR Class Deviation 23–01 Implementation of the Make PPE in America Act at <https://www.dhs.gov/sites/default/files/2022-10/HSARClassDeviation23-01ImplementationofMakePPEinAmericaAct-508Final.pdf>.

inclusion of an express reference to FAR 25.104(a) in the “component” definition will limit waivers from the Act’s requirements that allow DHS to acquire foreign-sourced nitrile gloves.

Additionally, the commenters stated that the existing definitions of “foreign-assembled domestic personal protective equipment,” and “foreign personal protective equipment” circumvent the intent of the Act, allowing for the offshore of manufactured items to be identified as domestic and providing foreign manufacturers an advantage over American manufacturers.

Response: DHS declines to adopt the commenters’ suggestions to revise the definitions to incorporate FAR 25.104(a); to otherwise address the domestic nonavailability status of NBR; and to include language limiting the applicability of FAR 25.104(a) to components used in American manufacturing facilities.

First, the nonavailable articles list at FAR 25.104(a) is subject to periodic review and amendment. Incorporating specific references to articles identified as nonavailable under FAR 25.104(a) into the HSAR could create inconsistencies if future revisions are made to the FAR. DHS therefore believes it is more appropriate to rely on the existing statutory and regulatory framework rather than codify specific nonavailability determinations in the HSAR.

Second, DHS disagrees with the commenters’ assertion that the nonavailability exception in section 70953(d) of the MPAA applies only to domestic manufacturing facilities. Section 70953(d)(1) expressly provides that the requirements of sections (b) and (c) do not apply to an item of personal protective equipment, or component or material thereof, that is, or that includes, a material listed in FAR 25.104. Accordingly, the statute expressly contemplates application of the nonavailability exception to covered PPE, components, and materials, including those acquired under the alternative domestic production authority. Limiting the exception as suggested would be inconsistent with the plain language of the Act.

Third, DHS does not believe that revisions to the definitions are necessary to address NBR nonavailability under the Act. Since implementing the MPAA in October 2022, DHS has relied on nonavailability waivers to acquire nitrile gloves for a variety of reasons, including limited domestic manufacturing capacity to meet DHS specifications and quantity requirements; limited availability of domestic nitrile gloves capable of

successfully passing Transportation Security Administration (TSA) testing requirements; and the lack of domestic production of NBR. Prior to January 2026, DHS sourced nitrile gloves from both domestic and foreign manufacturers. However, as domestic manufacturing capacity expanded, DHS transitioned to sourcing all nitrile glove requirements from domestic manufacturers.¹⁴ Although domestic manufacturers continue to rely on foreign-sourced NBR due to the current absence of domestic NBR production, DHS has demonstrated that it can achieve its domestic sourcing objectives without modifying the definitions as suggested.

Moreover, whether NBR may be categorized as “rubber, crude, and latex” under FAR 25.104(a) is not dispositive for the purposes of this rule. Because NBR is not currently produced domestically, agencies acquiring covered PPE that contains NBR have historically relied on the MPAA’s nonavailability exception and associated waiver processes to support the domestic nonavailability status of NBR. DHS therefore does not believe revising the definitions is necessary to address the domestic nonavailability of NBR. Accordingly, DHS declines to incorporate specific references to FAR 25.104(a) or NBR in the regulatory definition of “component.”

2. Expand “Restrictions” Section To Include Additional Language

Comment: Multiple commenters requested that DHS revise HSAR 3025.7102–1, Restrictions, to emphasize that the MPAA prioritizes PPE manufactured in the U.S. by American workers. These commenters also recommended narrowing the application of waivers and exceptions to ensure DHS gives preference to wholly domestic PPE supply chains and manufacturing facilities. The commenters assert that DHS’s proposed implementation of the MPAA relies too heavily on broad waivers and exceptions, which could undermine the Act’s purpose of strengthening domestic PPE manufacturing.

The commenters argued that continued reliance on foreign-manufactured gloves and reseller-based supply chains discourages private investment in U.S. manufacturing capacity, weakens domestic supply chain resilience, and places American jobs at a competitive disadvantage. The

commenters requested that DHS include new paragraphs (c) and (d) to the restrictions listed in 3025.7102–1 as follows: “(c) The intent of the law and priority is given to American Manufacturers of domestic personal protective equipment to include narrow waivers focused on United States based manufacturing facilities and exceptions identified herein to promote national security, support American manufacturing facilities in the United States, and American workers in an effort to reshore and sustain critical American manufacturing capability in the United States. (d) All contract for personal protective equipment, per the purpose of the, as identified in Section 70951 of the Make PPE in America Act which purpose is for the United States to ensure a robust, secure, and wholly domestic PPE supply chain to safeguard public health and national security; to further this effort it provides DHS with flexibility on procurement sources as it does not incorporate any requirement to use a quasi-government mandatory source and thus DHS will use Small Business Sources and encourage our contracting officer to actively seek out and consider small businesses for contracts and American based manufacturing facilities that can manufacture in the United States as priority options.”

Finally, some commenters contended that the Act’s requirements should apply to “quasi-governmental” procurement programs and recommended DHS exhaust domestic manufacturing sources before relying on resellers or nonmanufacturer arrangements.

Response: DHS declines to add the suggested language to the regulatory text in section 3025.7102–1. It is unnecessary to include the purpose and intent of the statute and intent of the law in the regulatory text as the regulations do not change this. Such language may also cause confusion as similar language is not typically included in acquisition regulations.

DHS also disagrees with the commenters’ characterization of DHS’s use of waivers and exceptions under the MPAA. The Act expressly contemplates the use of exceptions and waivers in specified circumstances, including when compliant domestic products, components, or materials are unavailable. Accordingly, DHS’s use of waivers is consistent with the MPAA which provides for exceptions where domestic industrial capacity is not sufficient to meet agency requirements.

DHS further notes that the MPAA establishes domestic sourcing requirements for covered PPE but does

¹⁴ See, e.g., DHS waiver for nitrile butadiene rubber available at <https://www.madeinamerica.gov/waivers/nonavailability/6994cfd16e70851109b4247> (last visited Sep. 8, 2026).

not create separate procurement preferences based on workforce composition, ownership structure, or the nationality of a manufacturer's employees. Therefore, DHS declines to adopt the commenters' proposed references to "American workers" and "American manufacturers" in the regulatory text.

Finally, DHS declines to adopt the commenters' recommendation that contracting officers be required to exhaust domestic manufacturers before considering authorized distributors, resellers, or other permissible acquisition channels. The MPAA establishes sourcing requirements for covered PPE but does not prescribe particular distribution channels or acquisition methodologies. Accordingly, DHS does not believe such a requirement would be appropriate for inclusion in the HSAR. Such inclusion could inadvertently result in noncompliance with statutes governing competition in contracts which do not allow blanket preference of manufacturers over distributors and resellers.

To the extent the commenters' references to "quasi-government" agency program contracts are directed at the AbilityOne Program and Procurement List requirements applicable to nitrile gloves, DHS notes that the AbilityOne Program operates pursuant to the Javits-Wagner-O'Day (JWOD) Act, codified at 41 U.S.C. chapter 85, which establishes a mandatory source program for certain products and services furnished by qualified nonprofit agencies employing people who are blind or have significant disabilities. The Committee for Purchase From People Who Are Blind or Severely Disabled (operating as the AbilityOne Commission) administers the program and maintains the Procurement List, accessible at www.abilityone.gov, identifying mandatory source products and services. Federal agencies are generally required to procure listed items through the designated AbilityOne nonprofit agency (NPA) or its authorized distribution channels in accordance with FAR subpart 8.7 Acquisition from Nonprofit Agencies Employing People Who Are Blind or Severely Disabled of the Federal Acquisition Regulation. Accordingly, DHS is required to buy Procurement List¹⁵ products or services from the organization designated on the Procurement List or from an authorized AbilityOne distributor until: (1) the

government no longer has requirements for that item, or (2) an NPA employing people who are blind or have significant disabilities can no longer furnish that item. This requirement remains unchanged by the MPAA.

It appears some commenters incorrectly believe DHS is using the fact that nitrile gloves are a Procurement List item to circumvent the requirements of the MPAA. Upon implementation of the Act, DHS immediately extended the requirements of the MPAA to nitrile glove purchases from AbilityOne. DHS's reliance on waivers to acquire nitrile gloves had nothing to do with the fact that these items are sourced through AbilityOne. DHS used waivers to acquire nitrile gloves for a variety of reasons, including limited domestic manufacturing capacity to meet DHS specifications and quantity requirements, limited availability of domestic nitrile gloves capable of successfully passing TSA testing requirements, and the lack of domestic production of NBR. Prior to January 2026, DHS sourced nitrile gloves from both domestic and foreign manufacturers. However, as domestic manufacturing capacity expanded, DHS transitioned to sourcing all nitrile glove requirements from domestic manufacturers. The transition to sourcing 100 percent of DHS's nitrile gloves to domestic manufacturers is largely attributable to the partnership between DHS and our AbilityOne NPA. Accordingly, DHS declines to adopt the suggestion as it is not needed to achieve its domestic sourcing objectives.

3. Exceptions Language

Comment: Several commenters asserted that section 70953(d)(1)(A) of the MPAA expressly incorporates the nonavailability determinations contained in FAR 25.104(a) and therefore excludes covered PPE component and materials identified on that list from the Act's domestic sourcing requirements. The commenters argued that DHS should revise HSAR 3025.7102–2 to clarify that materials such as NBR are automatically exempt from the Act when used in PPE manufactured in the United States and that no additional nonavailability determination or waiver should be required.

Response: DHS declines the commenters' request to modify section 3025.7102–2 to include reference to FAR 25.104 or otherwise address the domestic nonavailability status of NBR. The nonavailable articles list at FAR 25.104 is subject to periodic review and amendment. Incorporating specific references to articles identified as

nonavailable under FAR 25.104 into the HSAR could create inconsistencies if future revisions are made to the FAR. DHS therefore believes it is more appropriate to rely on the existing statutory and regulatory framework rather than codify specific nonavailability determinations in the HSAR. DHS also disagrees with the commenters' assertion that the inclusion of a material, component, or supply on the FAR 25.104 nonavailability list automatically eliminates the need for agencies to comply with the Act's exception procedures. While section 70953(d)(1)(A) references articles, materials, and supplies identified in FAR 25.104, DHS does not believe it is necessary or appropriate to incorporate those determinations directly into HSAR. The existing statutory and regulatory framework provides sufficient flexibility to address nonavailable materials and components without creating separate regulatory provisions for specific items in FAR 25.104. Additionally, because NBR is not currently produced domestically, agencies acquiring covered PPE that contains NBR have historically relied on the MPAA's nonavailability exception and associated waiver processes to address the lack of a domestic source. DHS therefore does not believe inclusion of the requested language is necessary to address the current domestic nonavailability of NBR.

4. HSAR 3052.225–7X Make PPE in America

Comment: Multiple commenters requested DHS revise 3025.7102–2(b) to clarify treatment of components and materials identified as nonavailable under FAR 25.104. The commenters' asserted that PPE manufactured in the United States should remain compliant with the MPAA when it contains components or materials listed in FAR 25.104, including NBR. The commenters also proposed revising the paragraph to expressly recognize component-specific waivers and nonavailability determinations when evaluating compliance with the Act's domestic sourcing requirements as follows: "(b) The Contractor shall deliver only domestic personal protective equipment except the domestic manufactured products include component items except under the FAR 25.104 or the agency provides a specific component waiver for domestic manufactured personal protective equipment or to the extent that it specified delivery of foreign-assembled domestic personal protective equipment in the provision of the solicitation entitled "Make PPE in America Certificate."

¹⁵ See 41 U.S.C. chapter 85, FAR subpart 8.7, and the Procurement List at https://www.abilityone.gov/procurement_list/index.html.

Response: Although the commenter cited HSAR 3025.7102–2(b), DHS understands the comment as requesting revisions to the clause at HSAR 3052.225–7X based on the proposed clause language provided. Notwithstanding this, DHS declines to make this change to the clause. The regulatory text at 3025.7102–2 makes clear the applicability of the exception at FAR 25.104. Therefore, including a reference to the nonavailable articles listing in FAR 25.104 in the clause text is unnecessary and redundant.

DHS also declines to incorporate references to specific nonavailable materials, component-specific waivers, or component-level nonavailability determinations into the clause. The purpose of the clause is to implement the contractor's obligation to provide covered PPE that complies with statutory and regulatory requirements applicable to the acquisition. The clause is not intended to restate all exceptions, waiver authorities, and nonavailability determination that may apply under the Act or related regulations. Those matters are addressed elsewhere in the statutory and regulatory framework, including HSAR 3025.7102–2. Accordingly, DHS believes the existing clause adequately implements the Act without the proposed revisions.

5. AbilityOne and Similar Network Providers

Comment: One commenter requested creation of a specific category to clarify the status of PPE repackaging operations under programs like AbilityOne, ensuring transparency and alignment with domestic manufacturing priorities. The commenter asserts this refinement would ensure alignment with industry practices and the intent of the Act.

The commenter also recommended DHS explicitly address AbilityOne exceptions within the order of precedence framework, stating that the Department's current model allows for foreign-produced PPE to receive preference through AbilityOne repackaging operations, undermining the intent of the MPAA. The commenter further stated this is particularly relevant for nitrile gloves, where certain providers import bulk products from Malaysia for domestic repackaging. To prevent this from happening, the commenter stated waiver usage should be narrowly tailored to support U.S. manufacturers utilizing TAA-compliant components rather than allowing broad allowances that benefit foreign producers.

Response: DHS declines the commenter's recommendation to create a specific category for repackaging

operations under programs like AbilityOne. DHS also declines to explicitly identify AbilityOne in the order of preference framework and disagrees that the current model allows for foreign-produced PPE to receive preference through AbilityOne repackaging operations.

The AbilityOne Program operates pursuant to the JWOD Act, codified at 41 U.S.C. chapter 85, which establishes a mandatory source program for certain products and services furnished by qualified nonprofit agencies employing people who are blind or have significant disabilities. The Committee for Purchase From People Who Are Blind or Severely Disabled (operating as the AbilityOne Commission) administers the program and maintains the Procurement List, accessible at www.abilityone.gov, identifying mandatory source products and services. Federal agencies are generally required to procure listed items through the designated AbilityOne NPA or its authorized distribution channels in accordance with FAR subpart 8.7 Acquisition from Nonprofit Agencies Employing People Who Are Blind or Severely Disabled of the Federal Acquisition Regulation.

Nitrile gloves are a Procurement List item for the Department. DHS is required to buy Procurement List products or services from the organization designated on the Procurement List or from an authorized AbilityOne distributor until: (1) the government no longer has requirements for that item, or (2) an NPA employing people who are blind or have significant disabilities can no longer furnish that item. This requirement remains unchanged by the MPAA.

As previously stated, it appears some commenters incorrectly believe DHS is using the fact that nitrile gloves are a Procurement List item to circumvent the requirements of the MPAA. Upon implementation of the Act, DHS immediately extended the requirements of the MPAA to nitrile glove purchases from AbilityOne. DHS's reliance on waivers to acquire nitrile gloves was unrelated to the items being sourced through AbilityOne. DHS used waivers to acquire nitrile gloves for a variety of reasons, including limited domestic manufacturing capacity to meet DHS specifications and quantity requirements, limited availability of domestic nitrile gloves capable of successfully passing TSA testing requirements, and the lack of domestic production of NBR. Prior to January 2026, DHS sourced nitrile gloves from both domestic and foreign manufacturers. However, as domestic manufacturing capacity expanded, DHS

transitioned to sourcing all nitrile glove requirements from domestic manufacturers. The transition to sourcing 100 percent of DHS's nitrile gloves to domestic manufacturers is largely attributable to the partnership between DHS and our AbilityOne NPA. Accordingly, DHS declines to adopt the suggestions as they are not needed to achieve its domestic sourcing objectives.

6. Domestic PPE Categories

Comment: One commenter asked DHS to split “domestic personal protective equipment” into two distinct categories, *i.e.*, “wholly domestic PPE” for items manufactured entirely in the United States and “domestically manufactured PPE” for items like nitrile gloves that currently require some imported raw materials. The commenter requested that the “domestically manufactured PPE” category explicitly recognize FAR 25.104(a) exceptions for materials like NBR, allowing sourcing from Trade Agreements Act (TAA)-compliant countries without penalty while maintaining domestic manufacturing status.

Response: DHS declines to create sub-categories for domestic personal protective equipment. For the purposes of the MPAA, PPE is either domestic, foreign-assembled domestic, or foreign. These definitions were established for consistency with the MPAA which requires purchase of domestic PPE and use of alternative domestic sources when domestic PPE is not available. An additional defined category of PPE is not necessary to implement the availability exception regarding FAR 25.104. Notwithstanding this, the nonavailable articles list at FAR 25.104 is subject to periodic review and amendment.

Incorporating specific references to articles identified as nonavailable under FAR 25.104 into the HSAR could create inconsistencies if future revisions are made to the FAR. DHS therefore believes it is more appropriate to rely on the existing statutory and regulatory framework rather than codify specific nonavailability determinations in the HSAR.

7. Exception Criteria for Nonavailability and Unreasonable Cost

Comment: One commenter requested DHS provide additional guidance regarding the applicability of the nonavailability and unreasonable cost exceptions. Specifically, the commenter recommended: (1) establishing objective quality standards and qualification benchmarks for evaluating nonavailability determinations; (2) adopting defined methodologies and

thresholds for determining when costs are unreasonable, including consideration of total cost of ownership and reliability factors; and (3) clarifying materials and components identified as nonavailable under FAR 25.104, including NBR, are exempt from the Act's domestic sourcing requirements when incorporated into PPE manufactured in the United States.

Response: DHS declines the commenter's recommendation to identify specific quality standards under the exception criteria for nonavailability and unreasonable cost. First, the MPAA provides explicit instruction on the use of the nonavailability exception. Second, DHS does not perform subjective quality assessments and instead relies on established PPE specifications. DHS PPE specifications are based on standards promulgated by either the American National Standards Institute (ANSI), American Society for Testing and Materials (ASTM), or National Institute for Occupational Safety and Health (NIOSH), and regarding nitrile gloves, TSA-specific testing for interference with explosives detection equipment/machines before use. DHS specifications for PPE have been shared with industry multiple times via industry meetings and postings to *SAM.gov*. As such, it is clear DHS does not rely on subjective quality standards.

Regarding identification of a specific methodology for determining whether an item is being provided at an unreasonable cost, DHS declines the commenter's recommendation. DHS intentionally refrained from identifying a specific calculation methodology to allow more flexibility for DHS and to minimize unfavorable impacts to industry. This flexibility is needed due to fluctuating market conditions that could result in the use of unreasonable cost determinations too frequently. Additionally, given DHS acquires these items on a firm fixed price basis, we would not review the individual cost elements associated with the final price of the item. Notwithstanding this, to date DHS has not used the unreasonable cost exception to acquire personal protective equipment covered under this rulemaking.

DHS declines to further identify that the requirements of the MPAA do not apply to PPE, or a component or material thereof, that is or includes a material on the nonavailable articles listing in FAR 25.104(a) or limit the applicability of the exception to U.S.-based manufacturing facilities. The nonavailability exception is already addressed in the regulatory text. Specifically, section 3025.7102-2(b)(1)

states that the purchase restrictions of the MPAA do not apply to PPE, or component thereof, "that is, or that includes, a material listed in FAR 25.104 as one for which a nonavailability determination has been made." Accordingly, DHS concludes the proposed revisions are unnecessary because the existing regulatory text already implements the statutory nonavailability exception and appropriately addresses materials identified in FAR 25.104.

8. Implementation Timeline

Comment: One commenter stated that the proposed implementation timeline appears workable provided DHS maintains clear communication with industry and allows reasonable adjustment periods for manufacturers to scale production. The commenter recommended: (1) a phased approach to domestic content requirements, particularly for items requiring development of domestic raw material sources; (2) ongoing engagement with manufacturers to address implementation challenges and refine guidance as needed; and (3) clear instructions regarding certification and compliance documentation to minimize administrative burdens.

Response: DHS appreciates the commenter's support for the proposed implementation timeline and agrees that continued communication with industry and clear compliance guidance are important to successful implementation of the Act. The MPAA directs agencies to implement the contract requirements beginning 90 days after the enactment of the Act. Accordingly, DHS lacks authority to phase in domestic sourcing requirements beyond the implementation framework established by Congress. As such, a phased approach to domestic content requirements is not possible. However, the Act authorizes the use of exceptions and waivers when covered PPE is unavailable from domestic sources or available only at an unreasonable cost, providing flexibility where domestic industrial capacity cannot meet requirements.

DHS has established forums for ongoing engagement with industry on a variety of procurement topics, including the MPAA. Additionally, DHS waivers under the MPAA are publicly posted at *MadeinAmerica.gov*. DHS intends to continue engaging with industry and other stakeholders regarding implementation of the Act and related acquisition requirements.

The provision at 3052.225-7Y Make PPE in America Certificate clearly

articulates how contractors must certify compliance with MPAA requirements, including requesting identification of the line item for the covered PPE item(s) identifies and the country of assembly. DHS believes the existing certification provision, together with publicly available solicitation and contract documentation, provides sufficient guidance regarding compliance with the Act and does not require further revision as part of this rulemaking.

9. Tiered Sourcing Hierarchy

Comment: One commenter urged DHS to adopt a tiered sourcing hierarchy that prioritizes domestic PPE manufacturing to the greatest extent possible before allowing waivers under the MPAA. Specifically the commenter recommends DHS: (1) give first priority to PPE manufactured in the United States using domestically sourced components; (2) allow U.S.-manufactured PPE using TAA-country components when required components are not available domestically, without requiring a waiver; (3) allow U.S.-manufactured PPE using non-TAA foreign components when domestic or TAA-sourced components are unavailable, without requiring a waiver; (4) permit waivers for foreign-manufactured PPE from TAA countries only after domestic manufacturing options have been exhausted; and (5) permit waivers for non-TAA foreign-manufactured PPE only as a last resort when no domestic or TAA-country sources are available. The commenter argues this approach would better advance the MPAA's objective of strengthening domestic PPE manufacturing by prioritizing U.S.-based production and employment while recognizing the practical reality that certain components, such as NBR, may not be available from domestic sources.

Response: DHS declines to adopt the commenter's proposed restrictions on when a waiver may be used or establish the proposed sourcing hierarchy. The circumstances under which an exception may be used are defined in the MPAA. The Act requires agencies to prioritize the acquisition of covered PPE manufactured in the United States and authorizes the use of exceptions when covered PPE is unavailable or available only at an unreasonable cost. Nothing in the Act directs agencies to create additional tiers of preference among otherwise permissible sources or exhaust particular categories of suppliers before relying on a statutory exception.

DHS has nevertheless taken an additional step beyond the requirements

of the MPAA by requiring procurement of either Buy American statute compliant or TAA-compliant PPE, depending on the dollar value of the procurement, when MPAA compliant PPE is not available. This approach ensures domestically manufactured PPE receives first consideration and that Buy American statute compliant or TAA-compliant PPE is acquired when MPAA compliant PPE cannot be obtained due to nonavailability or unreasonable cost.

DHS also declines to adopt the proposed hierarchy because it does not account for all circumstances in which the Act authorizes use of an exception, including situations involving either nonavailability or unreasonable cost. Further, the proposed hierarchy does not account for agency-specific performance requirements that may affect the availability of compliant PPE, such as the TSA testing requirements applicable to nitrile gloves.

Notwithstanding this, DHS has only used the nonavailability exception when sourcing nitrile gloves and only when necessary to meet mission requirements. To date, DHS has relied on the nonavailability exception to cover a portion of DHS's nitrile glove demand. Prior to January 2026, DHS sourced nitrile gloves from both domestic and foreign manufacturers. However, as domestic manufacturing capacity expanded, DHS transitioned to sourcing all nitrile glove requirements from domestic manufacturers.

Accordingly, DHS declines to adopt the proposed sourcing hierarchy and believes the final rule appropriately implements the statutory framework established by Congress while preserving the flexibility necessary to address nonavailability, unreasonable cost, agency mission requirements, and changing market conditions.

10. Prioritization

Comment: One commenter asked DHS to prioritize American-made products in government procurement decisions and carefully consider prioritizing products fully manufactured in the United States, but that might use certain raw materials unavailable domestically, from Trade Act compliant nations.

Response: DHS already prioritizes wholly domestically manufactured PPE. When these items are not available, either due to nonavailability or unreasonable cost, DHS seeks to acquire either a Buy American statute compliant or TAA-compliant item.

11. Out of Scope

Comment: Some commenters requested that DHS revise the regulatory text to encourage contracting officers to

seek out domestic manufacturers, including small businesses, when acquiring covered PPE.

Response: These suggestions are beyond the scope of this rule. This rule is about implementing the MPAA. The MPAA does not include provisions regarding small business participation and the NPRM did not propose requirements involving small business participation.

III. Final Rule

This final rule amends the HSAR at 48 CFR part 3025, Foreign Acquisition, and at 48 CFR part 3052, Solicitation Provisions and Contract Clauses. The rule adds a new HSAR subpart, an HSAR clause, and an HSAR provision which codifies how DHS complies with the Act. These changes also codify the requirements from Deviation 23–01. Each of these amendments are described in detail in the following paragraphs.

This final rule adds new subpart 3025.71, Make PPE in America Act Restrictions on Foreign Acquisition, to the HSAR, codifying the restrictions in Deviation 23–01 applicable to the acquisition of certain PPE consistent with the Act. These restrictions include minimum time periods for contract duration, content requirements for certain PPE, alternatives to domestic production when conforming PPE is not available, and exceptions when conforming PPE is either nonavailable or cannot be procured at U.S. market prices (or in other words, only available at an unreasonable cost).

This rule also codifies the definitions of terms used in Deviation 23–01.¹⁶ These terms are “component,” “domestic personal protective equipment,” “foreign-assembled domestic personal protective equipment,” “foreign personal protective equipment,” “personal protective equipment,” and “United States.”

Additionally, this rule applies to all types of actions, orders, option exercises, and contracts awarded and administered by DHS. It requires contracting officers to purchase domestic PPE except for when certain exceptions, specified in HSAR 3025.7102–2, apply and also requires that any contract for PPE has a base period of performance of at least two years, plus option periods.

HSAR 3025.7102–2 codifies the conditions under which acquisitions of PPE, or component thereof, are excepted from the requirements of HSAR 3025.7102–1 (*i.e.*, alternatives to domestic production, nonavailability,

and unreasonable cost) consistent with Deviation 23–01.

This final rule further codifies the clauses and provisions that apply when an exception due to nonavailability or unreasonable cost is used, as listed in Deviation 23–01.¹⁷ Additionally, this final rule codifies HSAR 3025.7103, HSAR clause 3052.225–7X, Make PPE in America, and HSAR provision HSAR 3052.225–7Y, Make PPE in America Certificate. The final rule makes a technical edit to consistently use the term “DHS Chief Procurement Officer” where applicable. Otherwise, DHS adopts the NPRM as final, amending 48 CFR part 3025, Foreign Acquisitions, and 48 CFR part 3052, Solicitation Provisions and Contract Clauses.

IV. Regulatory Analyses

A. Executive Orders 12866, 13563, and 14192

Executive Orders 12866 (Regulatory Planning and Review) and 13563 (Improving Regulation and Regulatory Review) direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. Executive Order 14192 (Unleashing Prosperity Through Deregulation) directs agencies to significantly reduce the private expenditures required to comply with Federal regulations and provides that “any new incremental costs associated with new regulations shall, to the extent permitted by law, be offset by the elimination of existing costs associated with at least 10 prior regulations.”

The Office of Management and Budget (OMB) has not designated this rule a significant regulatory action under section 3(f) of Executive Order 12866. Accordingly, OMB has not reviewed this regulatory action. This rule is not an Executive Order 14192 regulatory action because this rule is not significant under Executive Order 12866. *See* OMB Memorandum M–25–20, “Guidance Implementing Section 3 of Executive Order 14192, titled ‘Unleashing Prosperity Through Deregulation’” (Mar. 26, 2025).

Need for the Rule

This final rule codifies the requirements as set forth in the Act and Deviation 23–01. DHS is updating the Homeland Security Acquisition

¹⁶ See 48 CFR 3025.7101.

¹⁷ See 48 CFR 3025.7102–3.

Regulation (HSAR) to align with current DHS practice in Deviation 23–01. This rule provides for consistency between the Act and the HSAR.

Benefits and Costs of the Final Rule

The benefits and costs of a regulation are generally measured against a no-action baseline, which is a reasonable forecast of the way the world would look absent the regulatory action being assessed.¹⁸ As the final rule aligns the regulations with DHS current practice, it does not result in additional costs for the Federal Government. The rule codifies the requirement for contractors to submit a Make PPE in America Certificate, only in the situation when the contractor is proposing foreign-assembled domestic PPE. DHS already included this contractor requirement to certify compliance in Deviation 23–01. Because DHS contractors already comply with Deviation 23–01, they would not incur new costs due to this rule.

However, Deviation 23–01, which is how DHS complies with the requirements of the Act, may cause DHS to incur additional costs in the form of higher prices for domestically produced PPE compared to foreign-produced PPE. Future DHS procurement price differences between domestic and foreign-sourced PPE are difficult to accurately estimate. External factors (outside of the Act's requirement) may influence prices. For example, U.S. Government investments in domestic PPE production could factor into domestic production costs and prices. There is uncertainty on foreign governments investment in foreign PPE production which would impact foreign prices. An analysis of PPE would have to be conducted by type of PPE, such as the domestic and foreign prices of masks, protective eyewear, or gloves. Further, DHS has specific requirements in certain procurements such as gloves (*i.e.*, testing for interference with explosive equipment and protection against Fentanyl exposure) that would need to be considered in any price comparisons.¹⁹ Another factor that would be difficult to address in direct price comparisons is product differences. There are no internationally agreed upon guidelines or standards of what specific products make up PPE

categories, complicating product comparisons.²⁰

Consequently, due to the lack of specific data, complexity of various factors, and uncertainty of external price influences, DHS is not able to estimate the long-run additional DHS cost of an increased shift to domestic PPE procurements due to the requirements of the Act. Importantly, DHS has already complied with the requirements of the Act through Deviation 23–01 and subsequent contract changes.

Congress recognized the need for the United States to have a robust, secure, and wholly domestic PPE supply chain to safeguard public health and national security.²¹ This final rule codifies the statutory requirements that support the sustainment of the U.S. PPE supply chain. This final rule would provide the clarification benefit of consistency and transparency for contractors and DHS contracting officers.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601 *et seq.*, as amended by the Small Business Regulatory Enforcement Fairness Act of 1996, Public Law 104–121 (Mar. 29, 1996), requires Federal agencies engaged in rulemaking to consider the economic impacts of their rules on small entities. A small entity may be a small business (defined as any independently owned and operated business not dominant in its field that qualifies as a small business per the Small Business Act); a small not-for-profit organization; or a small governmental jurisdiction (locality with fewer than 50,000 people). This final rule will provide clarity and consistency between the HSAR and existing DHS practice as set forth in Deviation 23–01. Contractors currently provide the Make PPE in America Certificate in compliance with Deviation 23–01. The Make PPE in America Certificate is required only if the offeror is proposing foreign-assembled domestic PPE. DHS estimates the contractor burden based on experience from subject matter experts familiar with Deviation 23–01. DHS estimates it will take a contractor 15 minutes to

identify any foreign-assembled domestic PPE items it is offering and complete the Make PPE in America Certificate. DHS assumes an estimated hourly compensation rate of \$57.95 for the time burden.²² The time burden cost per certificate would be \$14.49 (15 minutes × \$57.95).

Based on the estimated cost of \$14.49 per certificate, DHS assumes this cost would not be a significant economic impact on a small entity affected by the final rule. DHS also believes that contractors generally pass along the cost of complying with DHS contracting requirements to DHS. Therefore, DHS certifies under 5 U.S.C. 605(b) that this final rule would not have a significant economic impact on a substantial number of small entities.

C. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501 *et seq.*) requires that DHS consider the impact of paperwork and other information collection burdens imposed on the public and, under the provisions of 44 U.S.C. 3507(d), obtain approval from the OMB for each collection of information it conducts, sponsors, or requires through regulations. This final rule contains information collection requirements. Accordingly, DHS is updating OMB No. 1600–0005, Solicitation of Proposal Information for Award of Public Contracts.

The collection requirements for this final rule are nominal and based on the new provision, 3052.225–7Y, Make PPE in America Certificate.

Overview of Information Collection

(1) *Type of Information Collection:* Modification to Existing Collection.

(2) *Title of the Form/Collection:* Solicitation of Proposal Information for Award of Public Contracts.

(3) *Agency form number, if any, and the applicable component of DHS sponsoring the collection:* No form; OCPO.

(4) *Affected public who will be asked or required to respond; as well as a brief abstract:* The affected public is business or other for-profit institutions. DHS needs the information required by provision 3052.225–72 to assess contractor compliance with the Make PPE in America Act. Responses are required for respondents to obtain or retain benefits.

¹⁸ See OMB Circular A–4, p. 15 (September 17, 2003) (accessible at <https://www.whitehouse.gov/wp-content/uploads/2025/08/CircularA-4.pdf>).

¹⁹ DHS, *White Paper: Current State of Personal Protective Equipment Procurement by Make PPE in America Act Covered Agencies*. 3–4 (March 13, 2024).

²⁰ “For example, KN95 respirator masks- China made analogues to domestically regulated N–95 respirators- are generally not authorized as medical PPE in the United States. KN95 are authorized in many countries abroad and received temporary (and limited) Emergency Use Authorization from the [U.S. Food and Drug Administration] FDA.” FDA, *Certain Filtering Facepiece Respirators from China May Not Provide Adequate Respiratory Protection—Letter to Health Care Providers*, October 15, 2020, at <https://www.fda.gov/medical-devices/letters-health-care-providers/certain-filtering-facepiece-respirators-china-may-not-provide-adequate-respiratory-protection-letter>.

²¹ Public Law 117–58, 135 Stat. 1313.

²² The average hourly earnings are based upon the U.S. Department of Labor, Bureau of Labor Statistics’ website (www.bls.gov). The wage rate category selected is for Business and Financial Operations Occupations (13–0000), May 2022. The rate is estimated to be \$57.95 (\$41.39 × 1.4), which includes the wage rate multiplier.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated number of respondents for reporting is 0.08. This number is nominal because a response to this provision is required only if the offeror is proposing foreign-assembled domestic PPE. Such response should be rare, because the offeror of such products is unlikely to receive an award, unless no offers for domestic PPE are received. In Fiscal Year (FY) 2022, DHS awarded 8 contracts for domestic PPE. DHS estimates it will receive ten offers per solicitation. Using the number of contracts awarded in FY 2022, DHS estimates it received 80 offers. DHS estimates 0.2 percent of offers, or 0.16 responses, will include foreign-assembled domestic protective equipment. The average number of responses per respondent is two or 0.08 respondents. DHS estimates it will take each respondent 15 minutes to complete the certificate. These numbers are not unusual given that DHS awarded a mandatory for use, Departmentwide contract for domestic PPE in March of 2022 and the requirements of provision 3052.225–72 Make PPE in America Certificate were satisfied at the contract level. Standalone contracts are awarded only when the domestic PPE needed is not available under the Departmentwide contract.

(6) *An estimate of the total public burden (in hours) associated with the information collection:* The total estimated annual hour burden associated with this collection is 0.033 hours or 2 minutes.

(7) *An estimate of the total public burden (in cost) associated with the information collection:* The estimated total annual cost burden associated with this collection of information is \$2.32.

D. National Environmental Policy Act

DHS and its components analyze regulatory actions to determine whether the National Environmental Policy Act (NEPA), 42 U.S.C. 4321 *et seq.*, applies to them and, if so, what degree of analysis is required. DHS Directive 023–01 Rev. 01 “Implementing the National Environmental Policy Act” (Dir. 023–01 Rev. 01) and Instruction Manual 023–01–001–01 Rev. 01 (Instruction Manual)²³ establish the policies and procedures that DHS and its components use to comply with NEPA.

NEPA allows Federal agencies to establish, in their NEPA implementing

procedures, categories of actions (“categorical exclusions”) that experience has shown do not, individually or cumulatively, have a significant effect on the human environment and, therefore, do not require an environmental assessment or environmental impact statement. *See* 42 U.S.C. 4336(a)(2), 4336e(1). The Instruction Manual, Appendix A lists the DHS Categorical Exclusions.²⁴

Under DHS NEPA implementing procedures, for an action to be categorically excluded, it must satisfy each of the following three conditions: (1) the entire action clearly fits within one or more of the categorical exclusions; (2) the action is not a piece of a larger action; and (3) no extraordinary circumstances exist that create the potential for a significant environmental effect.²⁵

The final rule amends the HSAR to better clarify how DHS complies with the Make PPE in America Act, and codifies Deviation 23–01 that is currently in effect. DHS is not aware of any significant impact on the environment, or any change in environmental effect that will result from this final rule.

DHS has reviewed this final rule and finds that no significant impact on the environment, or any change in environmental effect will result from the amendments being promulgated in this final rule. Accordingly, DHS finds that the promulgation of this final rule clearly fits within categorical exclusion A3, established in the DHS’s NEPA implementing procedures as an administrative change with no change in environmental effect, is not part of a larger Federal action, and does not present extraordinary circumstances that create the potential for a significant environmental effect. Therefore, this final rule is categorically excluded from further NEPA review.

List of Subjects in 48 CFR Parts 3025 and 3052

Government procurement.

Accordingly, for the reasons set forth in the preamble, DHS amends 48 CFR parts 3025 and 3052 as follows:

PART 3025—FOREIGN ACQUISITION

■ 1. The authority citation for part 3025 is revised to read as follows:

Authority: 5 U.S.C. 301–302, 41 U.S.C. 1303, 41 U.S.C. 1707, 41 U.S.C. 1702, 41 U.S.C. 8301 note, 48 CFR part 1, subpart 1.3, DHS Delegation No. 00701, Revision No. 03.2, paragraphs (III)(H), and DHS Delegation

No. 00702, Revision No. 01.2, paragraphs (III)(M).

■ 2. Add subpart 3025.71 to read as follows:

Subpart 3025.71—Make PPE in America Act Restrictions on Foreign Acquisition

Sec.

3025.7100 Scope of subpart.

3025.7101 Definitions.

3025.7102 Restrictions on certain personal protective equipment.

3025.7102–1 Restrictions.

3025.7102–2 Exceptions.

3025.7102–3 Specific application of the Buy American statute and Trade Agreements Act.

3025.7103 Solicitation provisions and contract clauses.

3025.7100 Scope of subpart.

This subpart contains restrictions on the acquisition of certain personal protective equipment (PPE) imposed by the Make PPE in America Act (Pub. L. 117–58), and they apply to all types of actions, orders, option exercises, and contracts entered into on or after February 14, 2022.

3025.7101 Definitions.

As used in this subpart—

(a) *Component*, as applied to an item described in 3025.7102–1, means an article, material, or supply incorporated directly into an item of personal protective equipment.

(b) *Domestic personal protective equipment*, as applied to an item described in 3025.7102–1, means personal protective equipment, including the materials and components thereof, that is grown, reprocessed, reused, or produced in the United States.

(c) *Foreign-assembled domestic personal protective equipment*, as applied to an item described in 3025.7102–2, means personal protective equipment that is assembled outside the United States containing only materials and components that are grown, reprocessed, reused, or produced in the United States.

(d) *Foreign personal protective equipment* means personal protective equipment other than domestic personal protective equipment or foreign-assembled domestic personal protective equipment.

(e) *Personal protective equipment*, as applied to an item described in 3025.7102–1, means surgical masks, respirator masks and powered air purifying respirators and required filters, face shields and protective eyewear, gloves, disposable and reusable surgical and isolation gowns, head and foot coverings, and other gear

²³ The Instruction Manual, which contains DHS’s procedures for implementing NEPA, was issued on November 6, 2014, and is available at <https://www.dhs.gov/ocrso/eed/epb/NEPA> (last modified July 29, 2025).

²⁴ *See* Appendix A, Table 1.

²⁵ *Instruction Manual 023–01 at V.B(2)(a)–(c).*

or clothing used to protect an individual from the transmission of disease.

(f) *United States*, as applied to an item described in 3025.7102–1, means the 50 States, the District of Columbia, and the possessions of the United States.

3025.7102 Restrictions on certain personal protective equipment.

3025.7102–1 Restrictions.

The following restrictions implement section 70953 of the Make PPE in America Act, and they apply to all types of actions, orders, option exercises, and contracts.

(a) Except as provided in 3025.7102–2, contracting officers shall purchase domestic personal protective equipment.

(b) Any contract for personal protective equipment shall have a base period of performance of at least 2 years, plus all option periods.

3025.7102–2 Exceptions.

Acquisitions in the following categories are not subject to the restrictions in 3025.7102–1:

(a) Acquisitions of an item of personal protective equipment, or component thereof, otherwise covered by 3025.7102–1 when the DHS Chief Procurement Officer:

(1) Maximizes sources for foreign-assembled domestic personal protective equipment; and

(2) Certifies every 120 days that it is necessary to procure personal protective equipment under alternative procedures to respond to the immediate needs of a public health emergency.

(b) Acquisitions of an item of personal protective equipment, or component thereof, including those described in paragraph (a) of this section—

(1) That is, or that includes, a material listed in FAR 25.104 as one for which a nonavailability determination has been made; or

(2) As to which the DHS Chief Procurement Officer determines that a sufficient quantity of a satisfactory quality that is grown, reprocessed, reused, or produced in the United States cannot be procured as, and when, needed at United States market prices; and

(3) The DHS Chief Procurement Officer certifies every 120 days that it is necessary to procure personal protective equipment to respond to the immediate needs of a public health emergency.

(c) When either of the exceptions in paragraph (a) or (b) of this section are used:

(1) Only the DHS Chief Procurement Officer is authorized to make the certification in paragraphs (a)(2) and (b)(3) of this section or the

nonavailability or unreasonable cost determination in paragraph (b) of this section.

(2) The supporting documentation for the DHS Chief Procurement Officer shall be prepared by the DHS Component(s) and:

(i) For the certification in paragraphs (a)(2) and (b)(3) of this section:

(A) Include a written justification documenting the immediate public health emergency requiring use of alternative procedures; and

(B) Be concurred on by the Head of the Contracting Activity before submission to the DHS Chief Procurement Officer.

(ii) For the nonavailability or unreasonable cost determination in paragraph (b) of this section:

(A) Include a written justification documenting why a nonavailability or unreasonable cost exception is required; and

(B) Be concurred on by the Head of the Contracting Activity before submission to the DHS Chief Procurement Officer.

3025.7102–3 Specific application of the Buy American statute and Trade Agreements Act.

In the event the DHS Chief Procurement Officer determines neither domestic personal protective equipment nor foreign-assembled domestic personal protective equipment is available due to nonavailability or unreasonable cost, contracting officers shall apply one of the following:

(a) The clause at FAR 52.225–1, Buy American—Supplies, and the provision at FAR 52.225–2, Buy American Certificate; or

(b) The clause at FAR 52.225–3, Buy American—Free Trade Agreements—Israeli Trade Act, and the provision at FAR 52.225–4, Buy American—Free Trade Agreements—Israeli Trade Act Certificate; or

(c) The clause at FAR 52.225–5, Trade Agreements, and the provision at FAR 52.225–6, Trade Agreements Certificate, as applicable.

3025.7103 Solicitation provisions and contract clauses.

(a) Insert the clause at 3052.225–71, Make PPE in America, in solicitations and contracts, regardless of dollar value, when procuring any item covered under 3025.7102–1(a).

(b) Insert the provision at 3052.225–72, Make PPE in America Certificate, in solicitations containing the clause at 3052.225–71.

PART 3052—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

■ 3. The authority citation for part 3052 is revised to read as follows:

Authority: 5 U.S.C. 301–302, 41 U.S.C. 1303, 41 U.S.C. 1707, 41 U.S.C. 1702, 41 U.S.C. 8301 note, 48 CFR part 1, subpart 1.3, DHS Delegation No. 00701, Revision No. 03.2, paragraphs (III)(H), and DHS Delegation No. 00702, Revision No. 01.2, paragraphs (III)(M).

■ 4. Add section 3052.225–71 to read as follows:

3052.225–71 Make PPE in America.

As prescribed in 3025.7103(a), insert the following clause:

Make PPE in America (Oct. 2026)

(a) *Definitions.* As used in this clause—
Component, as applied to an item described in paragraph (b) of this clause, means an article, material, or supply incorporated directly into personal protective equipment.

Domestic personal protective equipment, as applied to an item described in paragraph (b) of this clause, means personal protective equipment, including the materials and components thereof, that is grown, reprocessed, reused, or produced in the United States.

Foreign-assembled domestic personal protective equipment, as applied to an item described in paragraph (b) of this clause, means personal protective equipment that is assembled outside the United States containing only materials and components that are grown, reprocessed, reused, or produced in the United States.

Foreign personal protective equipment means personal protective equipment other than domestic personal protective equipment or foreign-assembled domestic personal protective equipment.

Personal protective equipment, as applied to an item described in paragraph (b) of this clause, means surgical masks, respirator masks and powered air purifying respirators and required filters, face shields and protective eyewear, gloves, disposable and reusable surgical and isolation gowns, head and foot coverings, and other gear or clothing used to protect an individual from the transmission of disease.

United States, as applied to an item described in paragraph (b) of this clause, means the 50 States, the District of Columbia, and the possessions of the United States.

(b) The Contractor shall deliver only domestic personal protective equipment except to the extent that it specified delivery of foreign-assembled domestic personal protective equipment in the provision of the solicitation entitled “Make PPE in America Certificate.”

(c) *Order of Precedence.* In the event the Department of Homeland Security determines neither domestic personal protective equipment nor foreign-assembled domestic personal protective equipment are available due to nonavailability or

unreasonable cost, the Contractor shall comply with the clauses at Federal Acquisition Regulation (FAR) 52.225–1 Buy American—Supplies or 52.225–3 Buy American—Free Trade Agreements—Israeli Trade Act and the provisions at FAR 52.225–2 Buy American Certificate or 52.225–4 Buy American—Free Trade Agreements—Israeli Trade Act Certificate or the clause at FAR 52.225–5 Trade Agreements and the provision at FAR 52.225–6 Trade Agreements Certificate, as applicable.

(End of clause)

■ 5. Add section 3052.225–72 to read as follows:

3052.225–72 Make PPE in America Certificate.

As prescribed in 3052.7103(b), insert the following provision:

Make PPE in America Certificate (Oct. 2026)

(a)(1) The Offeror certifies that each item of personal protective equipment, except

those listed in paragraph (b) of this provision, is domestic personal protective equipment.

(2) The Offeror shall list foreign-assembled domestic personal protective equipment items.

(3) The terms “domestic personal protective equipment,” “foreign-assembled domestic personal protective equipment,” “foreign personal protective equipment,” and “personal protective equipment,” are defined in the clause of this solicitation entitled “Make PPE in America.”

(b) Foreign-assembled Domestic Personal Protective Equipment:

Line item No.	Country of assembly

[List as Necessary]

(c) In the event the Department of Homeland Security determines both domestic personal protective equipment and foreign-assembled domestic personal protective equipment are not available due to nonavailability or unreasonable cost, the Contractor shall comply with the clauses at Federal Acquisition Regulation (FAR) 52.225–1 Buy American—Supplies or

52.225–3 Buy American—Free Trade Agreements—Israeli Trade Act and the provisions at FAR 52.225–2 Buy American Certificate or 52.225–4 Buy American—Free Trade Agreements—Israeli Trade Act Certificate or the clause at FAR 52.225–5 Trade Agreements and the provision at FAR 52.225–6 Trade Agreements Certificate, as applicable. The contracting officer will notify offerors if a nonavailability or unreasonable cost determination is made.

(End of Provision)

Paul Courtney,

Chief Procurement Officer, U.S. Department of Homeland Security.

BILLING CODE 9112–FE–P

Proposed Rules

Federal Register

Vol. 91, No. 180

Friday, September 18, 2026

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Parts 213, 302, 317, 359, 362, 432, 550, 731, 920, and 930

[Docket ID: OPM–2026–0166]

RIN 3206–AO92

Employment in the Excepted Service

AGENCY: Office of Personnel Management.

ACTION: Proposed rule.

SUMMARY: The Office of Personnel Management (OPM) proposes to amend its regulations governing the excepted service, Pathways Programs, and administrative law judge (ALJ) appointments. The proposed rule would conform OPM regulations to current excepted-service schedules, including Schedules E, Policy/Career, and G; modernize part 302 procedures while preserving veterans' preference, compensable-injury restoration rights, and other priority placement rights; authorize and clarify Pathways conversions to Schedule Policy/Career; and make related conforming amendments.

DATES: Comments must be received on or before November 17, 2026.

ADDRESSES: You may submit comments by using the Federal eRulemaking Portal: <https://www.regulations.gov>. Follow the instructions for submitting comments.

All submissions must include the agency name and docket number or RIN for this **Federal Register** document. Please arrange and identify your comments about the regulatory text by subpart and section number. If your comments relate to the supplementary information, please refer to the heading and page number in the supplementary section. All comments must be received by the end of the comment period for them to be considered. All comments and other submissions received generally will be posted on the internet at <https://www.regulations.gov> as they

are received, without change, including any personal information provided. However, OPM retains discretion to redact personal or sensitive information, including but not limited to personal or sensitive information pertaining to third parties. As required by 5 U.S.C. 553(b)(4), a summary of this rule may be found in the docket for this rulemaking at <https://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Ms. Katika Floyd at (202) 606–9531 or by email at employ@opm.gov.

SUPPLEMENTARY INFORMATION:

I. Background

OPM proposes to revise several civil service regulations to conform them to current excepted service schedules, recent Executive orders, and the statutory framework governing excepted service appointment procedures. These amendments are intended to modernize excepted service hiring rules, remove obsolete or unnecessarily complex procedures, preserve statutory veterans' preference and restoration rights, update regulations governing Pathways Programs and ALJ appointments, and simplify the priority reemployment list provisions. This proposal to overhaul excepted service employment is supplemented by another OPM regulation—Shared Certificates and Pooled Hiring Actions—that includes additional enhancements to 5 CFR part 302 (Employment in the Excepted Service) that align with changes being made to the regulations governing recruitment and hiring in the competitive service. 91 FR 58347; Sept. 15, 2026.

A. Excepted Service Appointments and 5 U.S.C. 3320

Section 3320 of title 5, United States Code, provides that the nominating or appointing authority must select for each excepted service vacancy from qualified applicants “in the same manner and under the same conditions” required for the competitive service by the veterans' preference and related provisions referenced in that section, and excludes appointments requiring Senate confirmation or advice and consent. OPM's regulations in part 302 have long implemented this requirement for positions in the excepted service. Current part 302 contains detailed procedures for accepting applications, examining

applicants, maintaining employment lists, applying orders of consideration, and making selections.

OPM now proposes to simplify part 302 while preserving the statutory core of the rule: veterans' preference, job-related qualification requirements, and legally required priority consideration. The proposed rule would remove the legacy structure of priority reemployment lists, reemployment lists, regular employment lists, Orders A, B, and C, professional orders, and unranked orders. In place of that structure, the rule would require agencies to identify and consider qualified and available priority candidates before selecting non-priority candidates, subject to any available and lawful exception. The rule also would retain and clarify restoration and priority-placement protections for employees recovering from compensable injuries under 5 U.S.C. 8151.

B. Recent Executive Orders Affecting Excepted Service Schedules

Several recent Executive orders require conforming amendments to part 213 and related civil service regulations.

First, Executive Order (E.O.) 13843 of July 10, 2018, “Excepting Administrative Law Judges From the Competitive Service,” (83 FR 32755) directed that appointments of ALJs under 5 U.S.C. 3105 be made under Schedule E of the excepted service. The order amended Civil Service Rule VI to create Schedule E and stated that appointment to an ALJ position is not subject to part 302 examination and rating requirements, though agencies must follow the principle of veterans' preference as far as administratively feasible.

Second, E.O. 13957 of October 21, 2020, “Creating Schedule F in the Excepted Service,” (85 FR 67631) created Schedule F in the excepted service for career positions of a confidential, policy-determining, policy-making, or policy-advocating character. E.O. 14171 of January 20, 2025, “Restoring Accountability to Policy-Influencing Positions Within the Federal Workforce,” (90 FR 8625) reinstated and amended E.O. 13957, including by replacing Schedule F terminology with Schedule Policy/Career.

Third, E.O. 14317 of July 17, 2025, “Creating Schedule G in the Excepted

Service,” (90 FR 34753) created Schedule G for noncareer positions of a policy-making or policy-advocating character normally subject to change as a result of a Presidential transition. The order also revised Civil Service Rule VI to identify Schedules A, B, C, D, E, Policy/Career, and G, and distinguished Schedule G from Schedule C and Schedule Policy/Career.

Fourth, E.O. 14410 of June 3, 2026, “Implementing Schedule Policy/Career in the Excepted Service,” (91 FR 34893) further implemented Schedule Policy/Career by placing identified positions in Schedule Policy/Career and amending the Civil Service Rules and prior Executive orders. Among other things, the order:

- Amended Civil Service Rule I to clarify retention of competitive status when an employee’s competitive service position is first listed under Schedule A, B, C, Policy/Career, or G;
- Amended Civil Service Rule III to recognize a basis for appointment without competitive examination for an employee whose initial appointment was to a Pathways Program position in Schedule D and who was later converted to Schedule Policy/Career without a break in service of 1 day;
- Amended Civil Service Rule VI to require at least annual publication of excepted-service schedules;
- Provided for acquisition of competitive status by certain employees serving probationary periods when their positions are first placed in Schedule Policy/Career;
- Amended Civil Service Rule XI to provide that individuals appointed to positions in Schedule C, Schedule E, Schedule Policy/Career, and Schedule G are not subject to trial periods; and
- Amended E.O. 13562 (75 FR 82585, Dec. 30, 2010) to provide that Pathways career appointments may include positions in Schedule Policy/Career, subject to OPM review.

Together, these Executive orders require conforming amendments to several parts of OPM’s regulations to ensure that the Code of Federal Regulations (CFR) accurately reflects the current structure of the excepted service and the legal consequences of appointments under Schedules C, E, Policy/Career, and G.

C. Purpose of This Proposed Rule

The proposed rule has four principal purposes.

First, it would conform part 213 to the current excepted service schedule structure by adding express regulatory text for Schedule E ALJ appointments and Schedule G appointments, and by conforming provisions governing

publication, temporary and time-limited appointments, unique identifiers, and certain Schedule A authorities. It would also make conforming amendments to parts 317, 359, 432, 550, 731, and 920 to account for the creation of Schedule G.

Second, it would modernize part 302 by replacing outdated and difficult-to-administer list and order-of-consideration procedures with a simpler framework centered on veterans’ preference, qualification requirements, job-related evaluation methods, and priority consideration for employees with legally required restoration or reemployment rights.

Third, it would implement conforming changes to Pathways and Schedule Policy/Career regulations so that eligible Pathways Participants may be converted to permanent Schedule Policy/Career appointments where authorized.

Fourth, it would conform ALJ regulations in part 930 to Schedule E by removing obsolete competitive-examination and list-of-eligibles terminology for new ALJ appointments, while preserving applicable statutory protections for ALJs, including 5 U.S.C. 3105 and 7521. It would also update the part 930 regulations relating to reductions in force (RIFs) involving ALJs, conforming those regulations to the status of ALJs appointed after July 10, 2018 as excepted service employees.

OPM previously proposed amendments to its ALJ regulations to implement E.O. 13843 and conform the regulations governing ALJ appointment and employment to the creation of Schedule E. See *Administrative Law Judges*, 85 FR 59207 (Sept. 21, 2020). On April 2, 2026, OPM withdrew that proposed rule, explaining that the comments received in response to the 2020 proposal were more than five years old, that agencies had already implemented E.O. 13843, and that OPM intended to propose Schedule E regulatory changes as part of a broader excepted-service rulemaking under RIN 3206–AO92. See *Administrative Law Judges; Withdrawal*, 91 FR 16584 (Apr. 2, 2026). Consistent with that withdrawal notice, this proposed rule now addresses Schedule E as part of the broader overhaul of OPM’s excepted service regulations.

II. Proposed Changes

A. Part 213—Excepted Service

OPM proposes to revise part 213 to reflect the current schedules in the excepted service: Schedules A, B, C, D, E, Policy/Career, and G.

Proposed amendments to § 213.102 would update the heading and conform the provision governing OPM placement of positions into excepted service schedules.

OPM proposes to revise § 213.103 to eliminate the requirement that OPM publish a monthly **Federal Register** notice identifying each establishment or revocation of an agency-specific Schedule A, B, C, Policy/Career, or G authority. Current § 213.103 requires governmentwide excepted-service authorities to be published as regulations in the **Federal Register** and the CFR, requires monthly notice of agency-specific Schedule A, B, C, and Policy/Career authorities, and requires an annual consolidated listing of all such agency-specific authorities current as of June 30. The proposed rule would retain publication of governmentwide authorities in the **Federal Register** and CFR and would retain an annual consolidated **Federal Register** notice for agency-specific authorities, but would remove the monthly notice requirement.

OPM has tentatively determined that monthly publication is no longer necessary to provide meaningful transparency or oversight, or effective administration of agency-specific excepted-service authorities. Agency-specific authorities do not have general applicability across the Government and historically have not been codified in the CFR. OPM has instead used notices to inform the public of the existence and status of these authorities. The annual consolidated notice is a more complete and useful transparency mechanism because it provides a single authoritative listing of agency-specific authorities, with assigned authority numbers or other unique identifiers, rather than requiring agencies, applicants, employees, and the public to reconstruct the current state of agency-specific authorities from a series of monthly notices. OPM’s annual consolidated notices have historically served this function by identifying the agency-specific authorities current as of a specified date and explaining that governmentwide authorities are codified in the CFR while agency-specific authorities are not.

OPM believes that the annual consolidated **Federal Register** notice satisfies Civil Service Rule VI because Rule VI requires **Federal Register** publication of notice of OPM’s decision granting authority to make excepted-service appointments, but does not prescribe monthly publication. Further, proposed § 213.103(b) would continue to provide public **Federal Register** notice of all current agency-specific authorities in a single consolidated

annual notice, with additional notices available when OPM determines they would promote sound administration or public transparency.

OPM notes that removing the monthly publication requirement does not reduce OPM's substantive oversight of agency-specific authorities. OPM will continue to approve, deny, limit, condition, modify, or revoke agency-specific authorities as appropriate under Civil Service Rule VI, part 213, and applicable Executive orders. Agencies must continue to use the proper authority number or unique identifier when documenting appointments, and OPM will continue to maintain internal records of current agency-specific authorities. In addition, OPM is proposing that it may publish additional notices concerning agency-specific authorities when OPM determines that additional notice would promote sound administration or public transparency.

Proposed § 213.104 would update terminology for temporary, time-limited, intermittent, or seasonal appointments and clarify applicable service limits for appointments in Schedules A, B, C, D, and G. OPM also is not including Schedule E or Schedule Policy/Career in the operative § 213.104 amendments because these appointments are not intended to be temporary, time-limited, intermittent, or seasonal.

OPM also proposes targeted amendments to § 213.3102. Proposed § 213.3102(i)(1) would modernize the Schedule A authority for positions in remote or isolated locations where examination is impracticable. Proposed § 213.3102(u) would update the Schedule A authority for individuals with intellectual disabilities, severe physical disabilities, or psychiatric disabilities, including by revising the structure of the provision and proof-of-disability language.

The proposed rule would amend § 213.3301 to replace the reference to a Schedule C "number" with the phrase "unique identifier." This change is intended to modernize appointment-record terminology while preserving OPM's position-specific authorization process for Schedule C.

The proposed rule would revise § 213.3402(b) to raise the default Recent Graduates appointment ceiling to GS-11 or equivalent, while preserving a GS-12 exception for certain scientific and professional research positions requiring a directly related Ph.D. or equivalent degree. This revision would conform to the changes made in the Pathways Programs final regulation published at 89 FR 25751 (Apr. 12, 2024).

The proposed rule would add a new Schedule E heading and new § 213.3501 for ALJ positions appointed under 5 U.S.C. 3105. Proposed § 213.3501 would provide that new ALJ appointments made on or after July 10, 2018, must be made under Schedule E; would preserve the competitive-service status of incumbents whose status is preserved under § 6.8(d); would exempt Schedule E appointments from part 302 appointment procedures, including examination and rating; would require agencies to follow veterans' preference as far as administratively feasible; would cross-reference the professional license requirement in Civil Service Rule VI and applicable ALJ statutory and regulatory requirements; and would provide that Schedule E ALJs are not subject to a trial period under part 11.

Proposed § 213.3601 would revise the Schedule Policy/Career regulation. Proposed § 213.3601 would revise paragraphs (b) and (c) to clarify the procedures for making appointments under Schedule Policy/Career. The language formerly found in paragraph (d) of this section will be incorporated into paragraph (b). Paragraphs (e) and (f) of this section will be redesignated as paragraphs (d) and (e) of this section.

Proposed § 213.3601 would revise the newly designated paragraph (e) to make clear that Schedule Policy/Career appointments are not subject to a trial period, in alignment with E.O. 14410's revision to Civil Service Rule XI. Revised paragraph (e) also would restate that an individual appointed under § 213.3601(b) in the same manner as an appointment in the competitive service acquires competitive status after completing 2 years of continuing service in the same or similar positions, and would preserve the retention of competitive status under § 1.3(d) and the acquisition of competitive status under § 3.1(a)(5) or § 6.8(e).

Proposed § 213.3601(f) would address positions in statutory personnel systems outside title 5 that may be designated as Schedule Policy/Career. The proposed paragraph would provide that, to the extent permitted by the statute governing the position and any applicable E.O., such a position may be designated as Schedule Policy/Career if the position is of a confidential, policy-determining, policy-making, or policy-advocating character. For positions otherwise covered by chapters 23, 43, or 75 of title 5, designation in Schedule Policy/Career would affect coverage under those chapters to the extent provided by 5 U.S.C. 2302(a)(2)(B)(i), 4301(2)(G), 4303(e)(3), and 7511(b)(2), and applicable implementing regulations. The designation would not

otherwise alter the governing statutory personnel system unless expressly provided by statute, E.O., or regulation.

Finally, the proposed rule would add a new Schedule G heading and new § 213.3701 for noncareer positions of a policy-making or policy-advocating character normally subject to change as a result of a Presidential transition. Section 213.3701 would retain OPM's position-specific authorization process and would require a unique identifier for positions authorized under Schedule G.

B. Part 302—Employment in the Excepted Service

OPM proposes to revise part 302 extensively. Proposed part 302 would replace the current employment-list and order-of-consideration structure with a simpler framework that preserves the substantive requirements of 5 U.S.C. 3320. Section 3320 requires excepted service selections to be made from qualified applicants "in the same manner and under the same conditions" required for the competitive service by 5 U.S.C. 3308 through 3319, but it does not require OPM to retain the specific legacy labels and procedures in current part 302, such as regular employment lists or Orders A, B, and C. Although section 3320 incorporates the competitive-service requirements of 5 U.S.C. 3308 through 3319, current § 302.302(b)(2) also permits category rating consistent with the principles of 5 U.S.C. 3319, and proposed §§ 302.201(b), 302.302(d), and 302.401(c) would continue to permit category rating, applied with the pass-over protections of 5 U.S.C. 3319(c)(6).

Section 3315(a) of title 5, United States Code, provides that a preference eligible who has been separated or furloughed without delinquency or misconduct is entitled, upon request, to have the individual's name placed on appropriate registers and employment lists for every position for which the individual's qualifications have been established, in the order prescribed by 5 U.S.C. 3313. Section 3320 applies that requirement to covered appointments in the excepted service by requiring selection from qualified applicants in the same manner and under the same conditions required by 5 U.S.C. 3308 through 3319.

OPM therefore interprets sections 3315 and 3320 as requiring agencies to preserve the reemployment-priority rights established by those provisions. OPM does not interpret those statutes, however, as requiring agencies to retain the particular list architecture or terminology prescribed by current § 302.303. Current § 302.303

implements the statutory requirements through three separately denominated categories: a priority reemployment list, a discretionary reemployment list, and a regular employment list. Those categories are an administrative means of implementing the statute; the terms themselves do not appear in 5 U.S.C. 3315. Section 3315 also does not prescribe a particular paper or electronic format, database structure, or personnel-management system through which an agency must maintain the required information. Section 1302(c) directs OPM to prescribe regulations administering veterans' preference in the excepted service and therefore permits OPM to modernize the administrative mechanism used to carry out the statutory entitlement, provided that the revised mechanism does not diminish that entitlement.

In subpart A, proposed § 302.101 would restate the coverage of part 302 for purposes of veterans' preference and compensable-injury restoration rights, clarify that Senate-confirmed or advice-and-consent appointments are not covered, and update the list of positions exempt from part 302 appointment procedures. OPM proposes to add law clerk trainee positions filled under 5 CFR 213.3102(e) to the list of positions exempt from the appointment procedures of 5 CFR part 302. Section 213.3102(e) authorizes time-limited appointments of law clerk trainees for law school graduates or persons with equivalent experience pending admission to the bar, while § 213.3102(d) covers attorney positions. Current § 302.101(c) already exempts attorney positions from the appointment procedures of part 302, but it does not expressly identify law clerk trainee positions. Law clerk trainee appointments are closely related to attorney hiring and often serve as a temporary, pre-bar status before an individual may be appointed to an attorney position. OPM therefore proposes to expressly exempt law clerk trainee positions filled under § 213.3102(e) to provide additional flexibility in hiring for these positions and to promote consistency with attorney hiring procedures.

OPM proposes to amend 5 CFR 302.101(c) to add three other categories of positions to the list exempt from the appointment procedures of part 302: positions in remote or isolated locations filled under 5 CFR 213.3102(i)(1), positions in Schedule G, and ALJ positions in Schedule E. These additions would promote clarity and consistency by aligning part 302 with appointing authorities and excepted-service schedules where the application

of ordinary part 302 examining, rating, and selection procedures is impracticable, unnecessary, or inconsistent with the nature of the position. Remote or isolated location appointments are expressly limited to circumstances where examination is impracticable; Schedule G positions are policy-making or policy-advocating positions normally subject to change as a result of a Presidential transition; and Schedule E ALJ appointments are already treated under 5 CFR part 6 as not subject to part 302 appointment procedures. In addition, proposed § 302.101(c)(12) would revise the reemployment exemption in current § 302.101(c)(9) to remove the redundant requirement limiting the exemption, which is already reflected in the introductory text to paragraph (c).

OPM proposes to amend 5 CFR 302.101(c)(6) to make clear the circumstances under which OPM, in consultation with the agency involved, determines the applicability of part 302 procedures on an agency-specific exception to the competitive service. Over the years, this paragraph has had several interpretations. A final rule was published in October 2020, 85 FR 63191, to clarify the intent of the provision. However, agencies continue to seek clarification on the types of positions under paragraph (c)(6) that are exempt from the appointment procedures of part 302. Rather than identify the positions by a specific Schedule, OPM proposes to use its general authority to except positions from the competitive service under Civil Service Rule VI (5 CFR 6.1) to identify the positions for which an exemption may be warranted. This amendment will be reflected in this rule under a newly designated paragraph (c)(8).

The proposed exemptions would not relieve agencies of any obligation under § 302.101(c) to follow the principle of veterans' preference as far as administratively feasible or to honor applicable priority consideration rights.

Proposed § 302.103 would revise the definition of "person entitled to priority consideration," which currently is limited to certain individuals recovering from compensable injury who apply for reappointment within 30 days of the date of cessation of compensation, to cover any individual entitled to priority consideration under 5 U.S.C. 8151, part 353, §§ 302.303 and 302.304, a final order, or other applicable statute, regulation, or binding legal authority. Proposed § 302.104 would clarify when agencies must apply the provisions of part 302 to accord veterans' preference and priority consideration. Proposed § 302.105 would replace the existing

special agency plan provision with a broader alternative-procedures rule, allowing agencies to use written alternative procedures that are applied uniformly, are consistent with merit system principles, and provide preference eligibles and person entitled to priority consideration at least as much advantage as the default procedures in part 302.

Proposed § 302.105(e) would authorize OPM to establish procedures, consistent with 5 U.S.C. 3317(b), 5 U.S.C. 3318, 5 U.S.C. 3319, 5 U.S.C. 3320, and part 302, for rating, ranking, and selection of eligible candidates by participating agencies in OPM-administered cross-government shared hiring actions, including OPM-led pooled hiring actions under § 302.601. OPM increasingly uses shared hiring actions to help agencies fill common mission-critical positions across the Government. The proposed provision would support those actions by permitting OPM to establish documentation and administration procedures suited to multi-agency certificates while preserving veterans' preference, pass-over requirements, and other applicable statutory protections.

Proposed § 302.106 would retain the requirement in current § 302.106 that an excepted service vacancy announcement include a reasonable accommodation statement that complies with part 330, subpart A. Proposed § 302.106 also would clarify that part 302 does not itself require an agency to issue a public vacancy announcement unless public notice is required by statute, regulation, the applicable appointing authority, or agency policy, and would require an announcement for a position covered by part 302 to include, as applicable, instructions for claiming veterans' preference and priority consideration.

In subpart B, proposed § 302.201 would modernize the treatment of veterans' preference under numerical rating, category rating, and alternative procedures. Proposed § 302.202 would revise qualification requirements, including by retaining the statutory limitation on minimum educational requirements for scientific, technical, or professional positions whose duties cannot be performed without prescribed education. Proposed § 302.201 would not retain the separate unranked-referral preference notations in current § 302.201(b) because unranked referral would no longer be a default evaluation method under proposed § 302.302; an agency could adopt a comparable approach only through an alternative procedure under proposed § 302.105 that provides preference eligibles and

persons entitled to priority consideration at least as much advantage as the default procedures of part 302.

In subpart C, proposed §§ 302.301 through 302.304 would replace the various employment lists and order-of-consideration framework with a simplified model. Proposed § 302.303 eliminates the requirement for agencies to establish priority reemployment lists, by geographic area, consisting of priority candidates who had been rated eligible for positions being filled. Instead, priority candidates would apply for consideration for vacancies on a case-by-case basis similar to the requirements for receiving consideration under the career transition programs in part 330 of this chapter. Proposed § 302.303 also includes a requirement that each agency maintain documented priority-consideration procedures and records sufficient to demonstrate compliance with proposed §§ 302.303 and 302.304. Proposed § 302.303 would continue to require agencies to provide priority consideration for specified current or former employees, including preference-eligible employees furloughed or separated from continuing excepted service appointments by RIF or similar workforce reduction action, and current or former employees entitled to priority consideration because of recovery from compensable injury or disability. In addition, the proposal would include any other individual entitled to reemployment priority under statute, regulation, final order, or other binding legal authority.

Under proposed § 302.303(a), an agency would be required to maintain documented procedures sufficient to identify, notify, evaluate, and consider priority candidates for positions covered by part 302. Although an agency would no longer be required to maintain separate records designated as a priority reemployment list, reemployment list, or regular employment list, it would be required to maintain records sufficient to document compliance with §§ 302.303 and 302.304. Under proposed § 302.303(f), each agency's written procedures would be required to address, at a minimum: how individuals, including preference eligibles covered by 5 U.S.C. 3315, may apply for priority consideration for specific vacancies; how individuals may update their availability, location, qualification, grade, pay level, work schedule, and other placement information; how the agency will determine whether an individual is a priority candidate for a specific vacancy; how the agency will evaluate and rank priority candidates and apply

veterans' preference among them; and how the agency will notify priority candidates of the outcome of consideration. An agency could administer these requirements through a standing electronic registry, an automated vacancy-matching system, vacancy-specific rosters, or another documented mechanism, provided that the mechanism satisfies §§ 302.303 and 302.304.

For purposes of 5 U.S.C. 3315, the records an agency maintains under proposed § 302.303(a) and (f)—which must be sufficient to identify each individual entitled to priority consideration and to determine, for each vacancy, whether the individual is qualified, available, and within the scope of consideration—would perform the function of the appropriate registers and employment lists required by section 3315. When 5 U.S.C. 3318(d) applies, the registered preference eligibles whom the agency has determined under proposed §§ 302.303 and 302.304 to be qualified, available, and within the scope of consideration for a particular vacancy would constitute the reemployment list appropriate for the position to be filled. Agencies would remain required to order and consider covered individuals in accordance with 5 U.S.C. 3313 and 3318, as applicable, and the implementing requirements of part 302, including the requirements in proposed § 302.303(f)(5) and (6) that the agency establish how priority candidates will be evaluated and ranked and how veterans' preference will be applied among them, and the requirements in proposed § 302.304(b) governing selection among priority candidates.

The proposed rule would also preserve the operative consequences of placement on the statutory register or employment list. Before making a covered appointment, proposed § 302.304 would require an agency to determine whether a qualified and available priority candidate is within the scope of consideration for the vacancy. If one priority candidate is available, the agency ordinarily would be required to select that candidate before selecting another applicant. If more than one priority candidate is available, the agency would be required to apply the evaluation method established for the vacancy and applicable veterans' preference requirements, and to select from among the priority candidates before considering non-priority candidates. An agency could depart from those requirements only when an exception authorized by statute, regulation, or other applicable law applies and the

agency documents the basis for the exception.

The proposal therefore does not replace the statutory list entitlement with generalized or discretionary consideration. Proposed § 302.303(f) would require each agency to establish its priority-consideration procedures in advance, including the means by which individuals may apply for priority consideration and keep their placement information current; proposed § 302.301(d) would require the agency, when filling a covered position, to provide a means for individuals claiming priority consideration to identify their eligibility and submit the information necessary for the agency to determine whether they are priority candidates; and proposed § 302.304(a) would require the agency to determine whether a priority candidate exists before making any covered appointment and, under proposed § 302.304(f), to document that determination. Maintaining records only after a selection has been made would not satisfy proposed §§ 302.303 and 302.304 or 5 U.S.C. 3315.

OPM recognizes that 5 U.S.C. 3320 does not permit OPM to substitute materially lesser protections for procedures that Congress has made applicable to the excepted service. In *Gingery v. Department of Defense*, 550 F.3d 1347, 1352–54 (Fed. Cir. 2008), the Federal Circuit held that an OPM regulation could not replace the pass-over protections prescribed by 5 U.S.C. 3318 with lesser protections for an excepted-service applicant when the statutory procedures could be applied. The proposed rule follows that principle. It does not rely on a determination that compliance with 5 U.S.C. 3315 is administratively infeasible, and it does not reduce the registration, ordering, referral, selection, or pass-over protections required by 5 U.S.C. 3315, 3318, and 3320. It changes only the administrative form in which agencies maintain and use the information necessary to provide those protections.

The proposed approach is also consistent with the flexibility recognized in current § 302.105, under which an agency may use a system that does not conform to every procedural requirement of part 302 only if eligible applicants entitled to veterans' preference or priority consideration receive at least as much advantage as they would receive under the default procedures. Proposed § 302.105 would retain that limiting principle and would additionally make clear that an alternative procedure may not waive any statutory requirement.

The requirement in current § 302.303 that all other applicants be entered on a regular employment list presents a different issue. Section 3315 establishes a specific entitlement for covered preference eligibles who have been separated or furloughed; it does not independently require an agency to maintain a separately denominated regular employment list containing every other applicant. Agencies would remain required to evaluate, arrange, refer, and select other applicants in accordance with the applicable provisions of 5 U.S.C. 3308 through 3319 and part 302, but they would not be required to preserve the current “regular employment list” as a separate administrative artifact. Proposed § 302.304 would require agencies to consider and select qualified and available priority candidates before non-priority candidates unless a lawful exception applies.

In subpart D, proposed § 302.401 would set out simplified rules for selection and appointment after priority consideration has been satisfied. The proposed rule would replace the existing § 302.401 with a simpler selection rule organized around priority consideration, the evaluation and referral method used for the vacancy, veterans’ preference and pass-over protections, discontinuance of consideration, documentation, and special conditions for OPM-led pooled hiring actions, as set out in proposed § 302.401(a) through (h).

First, proposed § 302.401(a) would require agencies to satisfy the priority-consideration requirements in proposed §§ 302.303 and 302.304 before making any appointment to a position covered by part 302. This makes priority consideration the first step in the selection process.

Second, proposed § 302.401(b) would govern selections when an agency uses numerical rating. Agencies could refer candidates using a method established before applications are solicited and documented in the recruitment file. The referral method could include a cut-off score, a set number of the highest-ranked eligible candidates, a set percentage of the highest-ranked eligible candidates, or another job-related method consistent with § 302.105. Selecting officials could select any referred eligible candidate but could not pass over a higher-standing preference eligible to select a lower-standing nonpreference eligible unless the agency satisfies the pass-over requirements in § 302.401(e).

Third, proposed § 302.401(c) would govern selections when an agency uses category rating. Agencies could select

from the highest quality category. If fewer than three candidates are in the highest category, the agency could merge the highest and second-highest quality categories and select from the merged category. Preference eligibles must be listed ahead of nonpreference eligibles within each category or merged category, and agencies may not select a nonpreference eligible over a preference eligible in the same category unless the pass-over requirements are satisfied.

Fourth, proposed § 302.401(d) would expressly allow agencies to make selections under alternative procedures authorized by § 302.105. Those procedures must provide preference eligibles and persons entitled to priority consideration at least as much advantage in consideration, referral, and selection as they would receive under the default part 302 procedures.

Fifth, proposed § 302.401(e) would consolidate the rule for passing over preference eligibles. Agencies proposing to select a nonpreference eligible over a preference eligible must comply with applicable requirements in 5 U.S.C. 3318(c), 5 U.S.C. 3319(c)(6), and OPM instructions.

Sixth, proposed § 302.401(f) would address discontinuing consideration of an eligible candidate as authorized by 5 U.S.C. 3318(e), § 302.105(e), or other applicable law, in accordance with the procedures set forth in § 332.405, which implements the three-consideration rule of 5 U.S.C. 3318(e).

Seventh, proposed § 302.401(g) would add a documentation requirement. Agencies must document the selection method used, the application of veterans’ preference, the application of priority consideration, any pass-over decision, and the basis for selection. The documentation must be sufficient to permit reconstruction or third-party review.

Eighth, proposed § 302.401(h) would establish special conditions for OPM-led pooled hiring actions, including when OPM may discontinue the consideration of a candidate from a shared certificate after documented bona fide consideration for three separate appointments for the same position. Nothing in those provisions would authorize passing over a preference eligible except as permitted by § 302.401(e) and applicable law. These conditions would apply to OPM-led pooled hiring actions under § 302.601, as added by OPM’s interim rule on shared certificates and OPM-led pooled hiring actions (91 FR 58347), and would supplement, not displace, the three-consideration provisions of §§ 302.502(b), 302.603(d), and 302.604(e).

The proposed rule would also revise § 302.402 to preserve a streamlined reappointment option while making clear that it cannot be used to bypass the new priority-consideration framework. Proposed § 302.402(a) would allow an agency, subject to §§ 302.303 and 302.304, to reappoint a current or former nontemporary executive-branch employee who is a preference eligible to a covered position without applying the examination, rating, ranking, and referral procedures of part 302.

Proposed § 302.402(b) would clarify that this reappointment authority does not permit an agency to bypass a qualified and available person entitled to priority consideration unless a lawful exception under § 302.304 applies. Proposed § 302.402(c) would further clarify that any reappointment must still be consistent with statute, regulation, the applicable appointing authority, and agency reemployment policy.

Proposed §§ 302.201, 302.302, and 302.401 would continue to apply the same statutory veterans’ preference protections through the rating method used for the vacancy: preference points would be added when numerical rating is used; preference eligibles would receive the statutory ordering and placement advantages when category rating is used; and any alternative procedure would have to provide preference eligibles and persons entitled to priority consideration at least as much advantage in evaluation, referral, and selection as the default procedures in part 302. The proposed rule also would preserve applicable pass-over requirements before an agency may select a nonpreference eligible over a preference eligible. Accordingly, OPM views the proposed framework as a modernization of the mechanics for accepting, evaluating, referring, and selecting applicants, not a reduction in the veterans’ preference and related protections required by 5 U.S.C. 3320.

Proposed § 302.701 would update the appeals provision for individuals asserting compensable-injury restoration rights. The proposed amendment would clarify that the relevant restoration or priority-consideration entitlement may arise under 5 U.S.C. 8151, part 353, or part 302, while preserving the existing limitation that an appeal must involve an alleged violation of restoration rights and factual information showing that the individual was denied restoration or priority consideration because another person was employed. Proposed § 302.701 also would clarify that a preference eligible or person entitled to priority consideration may appeal an action taken under part 302 only to the extent an appeal right is provided by

statute, Merit Systems Protection Board (MSPB) regulation, or other applicable law, and that part 302 does not create an appeal right not otherwise provided by law.

OPM's interim rule on shared certificates and OPM-led pooled hiring actions redesignated subpart E of part 302 (Appeals) as subpart G and added new subparts E and F governing shared excepted service certificates and OPM-led pooled hiring actions. The references in this proposed rule reflect that redesignation, and, apart from the conforming cross-reference amendments described below, nothing in this proposed rule would alter the new subparts E and F. This proposal would correct the authority citation for part 302 to include 5 U.S.C. 1104 and the section-specific authority for subparts E and F, which were inadvertently not included in the interim rule.

Consistent with the paragraph designations proposed for §§ 302.302 and 302.401, OPM proposes conforming amendments to the cross-references in subparts E and F. Proposed §§ 302.502(b), 302.603(d), and 302.604(e) would replace the references to § 302.302(b)(1) and § 302.302(b)(2) with references to § 302.302(c) and § 302.302(d), respectively, and proposed §§ 302.603(e) and 302.604(f) would replace the reference to § 302.401(b) with a reference to § 302.401(e). These conforming amendments would align the cross-references with the redesignated paragraphs proposed in this rule and would not alter the three-consideration or pass-over requirements those provisions impose.

OPM is not proposing changes to §§ 302.102, 302.107, 302.108, 302.203, or 302.403. Those provisions address related but distinct requirements that remain necessary under the proposed part 302 framework.

C. Part 317—Employment in the Senior Executive Service

In part 317, OPM proposes to amend provisions governing conversion to the Senior Executive Service (SES), Qualifications Review Board certification, and SES reassignments. The proposed amendments would clarify that Schedule G service would be treated consistently with Schedule C service when identifying noncareer-type or transition-linked service.

Specifically, OPM proposes to amend §§ 317.304 and 317.305 to include Schedule G in the provisions governing conversion of certain appointees to SES appointments; § 317.502 to include Schedule G appointees within the category of “noncareer-type” employees whose conversion to career SES

appointment would not be forwarded to a Qualifications Review Board; and § 317.901 to include Schedule G appointees in the definition of noncareer appointee for purposes of the 120-day restriction on involuntary reassignment of career SES appointees.

D. Part 359—Removal From the Senior Executive Service; Guaranteed Placement in Other Personnel Systems

In part 359, OPM proposes to amend §§ 359.406 and 359.503 to include Schedule G appointees in the definition of noncareer appointee for purposes of restrictions on certain SES removals following the appointment of a new agency head or certain noncareer supervisors. OPM also proposes to amend § 359.701 to clarify that service in a Schedule G position, or in a position meeting the same criteria as a Schedule G position, would not constitute an appointment of equivalent tenure for purposes of guaranteed placement rights following certain removals from the SES.

E. Part 362—Pathways Programs

OPM proposes to revise part 362 to permit eligible Pathways Participants to be converted to permanent positions in Schedule Policy/Career. OPM also proposes to eliminate the definition of “advanced degree” in § 362.102 because the phrase is no longer used in part 362.

Proposed § 362.107 would be revised to describe conversion to the competitive service or Schedule Policy/Career. It would authorize noncompetitive conversion of an eligible Pathways Participant to a term or permanent position in the competitive service, or to a permanent position in Schedule Policy/Career if the position is a career position described in § 213.3601(a) and the conversion is authorized by part 362 and applicable OPM policy or guidance. The proposed section would distinguish direct conversion to a competitive-service position from conversion to Schedule Policy/Career. It would clarify that conversion to Schedule Policy/Career does not itself confer competitive status, career tenure, or a career or career-conditional appointment and that pre-conversion Pathways service does not count toward the 2 years of continuing Schedule Policy/Career service required for acquisition of competitive status under § 213.3601(e).

Proposed § 362.107 also would address career-transition programs, probationary periods, trial periods, and no-entitlement principles. Pathways Participants converted to career or career-conditional appointments under § 315.713 would be subject to applicable

probationary-period requirements under part 11 and would acquire competitive status upon completion of those requirements. Pathways Participants converted to permanent Schedule Policy/Career appointments would not be required to serve a trial period under part 11 and would obtain competitive status after 2 years of continuing service in the Schedule Policy/Career position, but that conversion would not itself confer competitive status. Competitive status could be retained or acquired only as provided in § 213.3601(e), § 362.107(f), § 3.1(a)(5), § 6.8(e), part 315, or another applicable statute, E.O., civil service rule, or OPM regulation.

The proposed rule also would revise Pathways reporting requirements to capture the number of Pathways Participants converted to Schedule Policy/Career and separated and would add § 362.110 to authorize OPM to develop and administer a governmentwide Pathways Leadership Development Program under the Recent Graduates Program authority. That program may include formal training, career development, and rotational assignments across participating agencies, and would be administered consistent with part 362 and applicable OPM implementing instructions.

F. Part 432—Performance Based Reduction in Grade and Removal Actions

OPM proposes to amend § 432.102(f)(11), as redesignated by OPM's final rule on probationary and trial period appeals (91 FR 49072, Aug. 3, 2026), to add employees occupying positions in Schedule G to the categories of employees excluded from coverage under part 432. Part 432 implements the procedures governing performance-based reductions in grade and removals under 5 U.S.C. chapter 43. Section 432.102(f)(11) currently excludes employees occupying positions in Schedule C or Schedule Policy/Career, as authorized under part 213 of this chapter. This amendment would add Schedule G to that same exclusion.

This change is a conforming amendment to reflect the establishment of Schedule G in the excepted service. E.O. 14317 created Schedule G for positions of a policy-making or policy-advocating character that are normally subject to change as a result of a Presidential transition and directed OPM to adopt implementing regulations, with particular attention to amendments to 5 CFR part 213. E.O. 14317 also amended Civil Service Rule VI to provide that, except as required by statute, the Civil Service Rules and

Regulations do not apply to removals from positions listed in Schedule G.

Consistent with that framework, OPM proposes that employees occupying Schedule G positions should be treated in the same manner as employees occupying Schedule C and Schedule Policy/Career positions for purposes of part 432 coverage. The amendment would clarify that the performance-based reduction in grade and removal procedures in part 432 do not apply to employees occupying positions in Schedule G. The amendment would not otherwise alter the coverage of part 432, and employees not expressly excluded under § 432.102(f) would remain covered in accordance with that section.

G. Part 550—Pay Administration (General)

In part 550, OPM is proposing to amend the definition of “nonqualifying appointment” in § 550.703 to include an excepted appointment under Schedule G. This change would align the definition of “nonqualifying appointment” with the existing definition of “qualifying appointment,” which excludes excepted appointments without time limitation under Schedule C or Schedule G.

H. Part 731 (Suitability and Fitness) and Part 920 (Timing of Criminal History Inquiries)

In parts 731 and 920, OPM proposes to amend the definition of “political appointment” to include appointments under Schedule G. These changes would ensure that Schedule G appointees are treated consistently with other political appointees for purposes of suitability and fitness regulations in part 731 and the timing of criminal history inquiries in part 920.

I. Part 930—Administrative Law Judge Program

OPM proposes to amend part 930, subpart B, to conform the Administrative Law Judge Program regulations to Schedule E. Current part 930, subpart B, retains provisions tied to competitive examination, lists of eligibles, and career appointments. The proposed amendments would revise those provisions to recognize that new ALJ appointments are made under Schedule E, remove or reserve the rule on cost of competitive examination, revise appointment provisions, update incumbent and reappointment provisions, revise promotion provisions, and remove references to positions being filled through competitive examination. The proposed amendments would preserve applicable

ALJ statutory protections, including those under 5 U.S.C. 3105 and 7521.

OPM proposes to revise § 930.210 to conform the ALJ RIF regulation to the current status of ALJ positions. Effective July 10, 2018, ALJ positions appointed under 5 U.S.C. 3105 were placed in Schedule E of the excepted service, while incumbents who were in the competitive service on that date retain competitive-service status so long as they remain in their current positions. Current § 930.210 was written against the prior competitive-service ALJ framework and provides ALJs both agency RPL placement assistance and placement on OPM’s ALJ priority referral list. The proposed revision would distinguish between legacy competitive-service ALJs whose status is preserved under § 6.8(d) and ALJs appointed in Schedule E after July 10, 2018.

Under proposed § 930.210(a), ALJs would remain subject to the RIF regulations in part 351, except as modified by § 930.210. Schedule E ALJs would compete as excepted-service employees if otherwise covered by part 351, while ALJs whose competitive-service status is preserved under § 6.8(d) would continue to be treated as competitive-service employees for RIF purposes. This distinction reflects the current legal structure of ALJ appointments and avoids treating post-July 10, 2018 Schedule E ALJs as if they remained in the competitive service.

Proposed § 930.210(b) would also update the rule for determining ALJ retention standing. Because agencies may not rate the job performance of ALJs under § 930.206, agencies may not prepare, assign, or use an ALJ performance rating for RIF purposes. The proposed rule would instead require agencies to determine ALJ performance credit in accordance with the rules in part 351 governing employees who do not have ratings of record. This approach preserves the prohibition on ALJ performance ratings while allowing ALJs to be placed on retention registers under the RIF framework. Section 3502 requires OPM to prescribe RIF regulations that give due effect to tenure, military preference, length of service, and efficiency or performance ratings; the proposed rule applies that framework to ALJs without requiring agencies to create ALJ ratings where another regulation prohibits them.

Proposed § 930.210(c) would clarify assignment rights. Competitive-service employees receive assignment rights under § 351.701, but excepted-service assignment rights are discretionary under § 351.705 and may be provided

only under agency procedures that are consistent with part 351 and uniformly applied in the RIF. Accordingly, proposed § 930.210(c) would provide that Schedule E ALJs do not have mandatory assignment rights under § 351.701. An agency may, in its discretion, provide Schedule E ALJs assignment rights under § 351.705, but if the agency does not do so, it may release a Schedule E ALJ from the competitive level in accordance with the order of release under part 351 without offering assignment to another position. By contrast, an ALJ whose competitive-service status is preserved under § 6.8(d) would remain subject to the competitive-service assignment-right provisions in § 351.701 while that status remains preserved.

Proposed § 930.210(d) would revise ALJ placement-assistance provisions. Under current 5 CFR part 330, the RPL is a required placement program for current and former competitive-service employees who will be or were separated by RIF or who recovered from compensable injury after more than one year. Accordingly, proposed § 930.210(d)(1) would provide that an ALJ in the competitive service whose status is preserved under § 6.8(d) remains eligible for RPL placement assistance under part 330 if reached in a RIF and issued a separation notice.

For Schedule E ALJs, proposed § 930.210(d)(2) would clarify that a Schedule E ALJ who is separated, furloughed, or demoted by RIF does not, solely by virtue of service in a Schedule E ALJ position or appointment under 5 U.S.C. 3105, have a statutory entitlement to priority consideration, priority referral, or reemployment as an ALJ. This treatment aligns Schedule E ALJs with other excepted-service employees separated by RIF. Under current OPM regulations, excepted service employees separated or furloughed from continuing appointments generally do not have a mandatory priority reemployment entitlement. Current § 302.303 requires a priority reemployment list for certain categories, including preference-eligible former employees separated or furloughed from continuing appointments without delinquency or misconduct and certain compensable-injury cases, while agency priority consideration for nonpreference eligibles separated or furloughed from continuing appointments is discretionary.

Thus, the proposed rule would treat Schedule E ALJs like similarly situated excepted-service employees: a Schedule E ALJ would not receive a mandatory priority reemployment list or priority-

referral entitlement merely because the position is an ALJ position, but the individual would retain any priority, restoration, or placement right that arises from another source of law. Proposed § 930.210(d)(3) would expressly preserve rights under 5 U.S.C. 8151, part 353, 5 U.S.C. 3315, 5 U.S.C. 3320, the Uniformed Services Employment and Reemployment Rights Act (USERRA), a final order, or another applicable statute, regulation, or binding legal authority. This savings clause is intended to ensure, for example, that a preference-eligible Schedule E ALJ or an ALJ with compensable-injury restoration rights receives any priority consideration required by the applicable authority.

OPM also proposes to remove the current mandatory ALJ-specific OPM priority referral list as a regulatory entitlement for Schedule E ALJs. OPM has determined that this special list is no longer necessary as a mandatory rule for employees appointed under Schedule E, particularly because Schedule E ALJs are now part of the excepted service and because current law does not provide an ALJ-specific statutory reemployment entitlement after a RIF. Section 7521 provides special good-cause protections for certain actions against ALJs, but expressly excludes RIF actions under 5 U.S.C. 3502 from those procedures. RIF actions involving ALJs are therefore governed by part 351 and § 930.210, not by the good-cause procedures applicable to disciplinary or adverse actions against ALJs. As a conforming change, OPM also proposes to remove § 930.201(e)(9), which describes OPM's authority to maintain and administer the ALJ priority referral program under § 930.210(c) and to redesignate the remaining paragraphs of § 930.201(e) accordingly.

Finally, proposed § 930.210(d)(4) would preserve flexibility for OPM or agencies to establish discretionary placement-assistance procedures for ALJs separated, furloughed, or demoted by RIF. Any such discretionary procedure would have to be in writing and identify its coverage, duration, order of consideration, geographic scope, qualification requirements, and termination conditions. The proposed rule would also clarify that discretionary placement assistance does not create a statutory entitlement to priority consideration, priority referral, or reemployment. This approach preserves agency and OPM flexibility to provide additional assistance where appropriate, while aligning mandatory reemployment-priority rights for Schedule E ALJs with the treatment of

other excepted-service employees under current OPM regulations.

Proposed § 930.211(c)(3) would conform the ALJ adverse-action regulation by clarifying that § 930.211 does not apply to RIF actions taken under 5 U.S.C. 3502, part 351, and § 930.210. This change preserves the distinction between ALJ disciplinary or adverse actions governed by 5 U.S.C. 7521 and RIF actions governed by 5 U.S.C. 3502, part 351, and § 930.210.

III. Requests for Comment

OPM requests comment on all aspects of this proposed rule. OPM is especially interested in comments on the following issues.

A. Governmentwide Schedule A and Schedule B Authorities That May Be Obsolete, Duplicative, or Better Handled Differently

OPM requests comment on whether the following governmentwide Schedule A authorities in § 213.3102 remain necessary; whether any should be removed, reserved, consolidated with another authority, or converted to agency-specific Schedule A authorities; and whether agencies currently rely on these authorities for mission-critical hiring:

§ 213.3102(l)—temporary or intermittent professional, scientific, or technical experts for consultation purposes;

§ 213.3102(n)—local physicians, surgeons, or dentists employed under contract or on a part-time or fee basis;

§ 213.3102(o)—scientific, professional, or analytical positions filled by bona fide faculty members of accredited colleges or universities with special qualifications, with employment limited to 130 working days per year;

§ 213.3102(x)—positions filled by inmates of penal or correctional institutions under work-release programs where a local recruiting shortage exists;

§ 213.3102(aa)—temporary scientific and professional research associate positions at GS-11 and above filled through the National Research Council post-doctoral research associate program; and

§ 213.3102(ff)—not more than 24 positions filled under an agreement between OPM and the Department of Justice (DOJ) by persons in programs administered by the Attorney General under Public Law 91-452 and related statutes.

Current § 213.3102 includes these authorities, including the expert/consultant, local physician/surgeon/dentist, faculty, work-release, National Research Council associate, and DOJ

program authorities. OPM also requests comment on whether any of these authorities overlap with other statutory or regulatory hiring authorities, whether agencies continue to use them, and whether any program-specific authority should be narrowed, modernized, or moved from a governmentwide authority to an agency-specific authority.

OPM also requests comment on whether the governmentwide Schedule B authority in § 213.3202(n) remains necessary. That provision applies to positions filled by preference eligibles or veterans separated under honorable conditions after three or more years of continuous active military service who applied under merit-promotion procedures when applications were accepted from outside the agency's own workforce; the regulation states that no new appointments may be made under this authority after November 30, 1999. OPM requests comment on whether this authority should be removed and reserved, retained only for legacy status purposes, revised, or addressed through another regulatory mechanism.

OPM may, in a final rule, remove, reserve, consolidate, or narrow any of the identified authorities based on comments received, and interested parties should comment now if they rely on any of these authorities and would be affected by such action. Also, OPM requests that agencies identify any current employees, mission-critical hiring pipelines, workforce-planning needs, or legal obligations that would be affected if any of these authorities were removed, reserved, consolidated, narrowed, or converted to agency-specific authority.

B. Additional Schedule A Authorities That May Warrant Exemption From Part 302 Appointment Procedures

Proposed § 302.101(c) would update the list of positions exempt from the appointment procedures of part 302 while preserving the principle of veterans' preference as far as administratively feasible and preserving legally required restoration and priority-consideration rights. OPM requests comment on whether additional governmentwide Schedule A appointing authorities should be exempt from part 302 appointment procedures.

C. Priority Consideration Framework in Part 302/Reliance Interests

OPM requests comment on whether the proposed priority-consideration framework in §§ 302.303 and 302.304 adequately preserves rights of employees who are furloughed, separated by RIF or similar workforce

reduction action, or entitled to restoration or priority consideration because of recovery from compensable injury. OPM also requests comment on whether the proposed framework provides sufficient flexibility for agencies while preserving veterans' preference and legally required restoration and priority-placement rights.

OPM requests comment on whether the proposed rule, if finalized, should apply only to vacancies announced on or after the effective date, and how agencies should treat pending recruitment actions, existing employment lists, certificates, priority reemployment lists, and agency plans established under current part 302.

OPM further requests comment on any reliance interests implicated by the proposed rule and will address them with particularity in any final rule that it issues.

IV. Expected Impact of This Proposed Rule

A. Statement of Need

OPM is issuing this proposed rule to modernize and clarify the regulations governing appointments in the excepted service while preserving the statutory protections required by 5 U.S.C. 3320. Current part 302 relies on legacy employment-list and order-of-consideration procedures that are more complex than necessary to implement the veterans' preference, rating, ranking, referral, and pass-over requirements incorporated by 5 U.S.C. 3320. This proposed rule would replace those procedures with a simpler, more transparent framework that allows agencies to use numerical rating, category rating, or other job-related procedures consistent with 5 U.S.C. 3308 through 3319, while continuing to protect veterans' preference, compensable-injury restoration rights, and other legally required priority-placement rights. The rule is also needed to conform OPM's regulations to current excepted-service schedules and related Executive orders, including provisions governing Schedule E, Schedule G, Schedule Policy/Career, Pathways conversions, career-transition exceptions, merit-promotion rules, and ALJ appointments.

B. Impact

This proposed rule would primarily affect Federal agencies and Federal applicants or employees subject to the covered excepted service appointment authorities. OPM expects the rule to reduce administrative burden by simplifying part 302 appointment

procedures and eliminating legacy employment-list and order-of-consideration structures. Agencies would retain responsibility for applying veterans' preference, establishing job-related qualification requirements, identifying and clearing priority candidates, documenting selection decisions, and complying with restoration rights and other applicable law.

OPM expects the conforming amendments to part 213, part 317, part 359, part 362, part 432, part 550, part 731, part 920, and part 930 to improve regulatory clarity by aligning the CFR with current Executive orders, Pathways conversion policy, Schedule Policy/Career implementation, Schedule G, and Schedule E ALJ appointments. OPM requests comment on the expected implementation costs and benefits of these changes, including any costs associated with revising agency excepted service hiring procedures, updating human resources (HR) systems and personnel-action coding, training HR staff and selecting officials, and documenting priority-consideration and veterans' preference determinations.

C. Regulatory Alternatives

OPM considered retaining the current part 302 framework but rejected that approach because the existing procedures are more complex than necessary to implement the statutory requirements governing veterans' preference and excepted service appointments. OPM also considered preserving the employment-list and order-of-consideration terminology while simplifying specific provisions, but concluded that a more direct priority-consideration model would be clearer for agencies and applicants and would better align part 302 with modern hiring practices.

OPM further considered whether to address Schedule E, Schedule G, Schedule Policy/Career, Pathways conversions, and ALJ conforming amendments in separate rulemakings. OPM proposes to address them together because the provisions interact across parts 213, 302, 317, 359, 362, 432, 550, 731, 920, and 930. Addressing them in a single rulemaking promotes consistency and reduces the risk of conflicting regulatory text.

D. Costs

This proposed rule, once finalized, will affect the operations of approximately 80 Federal agencies—ranging from cabinet-level departments to small independent agencies. OPM will provide guidance on implementing this proposed rule in the form of a fact

sheet or frequently asked questions. OPM estimates that this rulemaking will require individuals employed by these agencies to modify policies and procedures to implement the rulemaking and train HR practitioners and hiring managers on its use. For this cost analysis, OPM assumed an average salary rate of Federal employees performing this work using the rate in 2025 for GS-14, step 5, from the Washington, DC, locality pay table (\$161,486 annual locality rate and \$77.38 hourly locality rate). We assumed that the total dollar value of labor, which includes wages, benefits, and overhead, is equal to 200 percent of the wage rate, resulting in an assumed labor cost of \$154.76 per hour. To comply with the regulatory changes in the proposed rule, affected agencies will need to review the rule and update their policies and procedures. We estimate that, in the first year following publication of any final rule, doing so will require an average of 100 hours of work by employees per agency with an average hourly cost of \$154.76. This work would result in estimated costs in that first year of implementation of about \$15,476 per agency, and about \$1,238,080 in total governmentwide. Some agencies may incur additional costs because they have to establish excepted service employment policies where none have existed. We do not believe this rulemaking will substantially increase the ongoing administrative costs to agencies (including the administrative costs of using these new procedures and training new staff) because the rulemaking is streamlining existing procedures and processes.

E. Benefits

OPM expects this proposed rule to improve the clarity, consistency, and administrability of excepted service hiring regulations. The proposal would replace legacy employment-list and order-of-consideration procedures in part 302 with a more direct framework for identifying qualified applicants, applying veterans' preference, clearing priority candidates, documenting selection decisions, and preserving restoration and other legally required placement rights. This simplified structure should reduce agency burden, make excepted-service hiring procedures easier for HR staff and selecting officials to apply, and improve transparency for applicants and employees. The proposed amendments to parts 213, 317, 359, 362, 432, 550, 731, 920, and 930 would also align OPM's regulations with current excepted-service schedules, Pathways

conversion rules, Schedule Policy/ Career implementation, Schedule G, and Schedule E ALJ appointments, reducing ambiguity and the risk of inconsistent agency application. Overall, OPM expects the rule to support faster and more reliable hiring administration while preserving the statutory protections that apply to excepted service appointments.

F. Severability

If any provision of this rule is held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, OPM intends that it shall be severable from its respective section(s) and shall not affect the remainder thereof or the application of the provision to other persons not similarly situated or to other dissimilar circumstances, unless such holding is that the provision is invalid and unenforceable in all circumstances, in which event the provision shall be severable from the remainder of this part and shall not affect the remainder thereof. Should provisions related to one of the sections be held to be invalid we believe that the other sections should be severable and would not be impacted.

V. Regulatory Compliance

1. Regulatory Review

OPM has examined the impact of this rule as required by E.O.s 12866 and 13563, which direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public, health, and safety effects, distributive impacts, and equity). A regulatory impact analysis must be prepared for rules that have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities. This rulemaking does not reach that threshold but has otherwise been designated as a “significant regulatory action” under section 3(f) of E.O. 12866, as supplemented by E.O. 13563. This rulemaking is not expected to be considered an E.O. 14192 regulatory action because it imposes no more than *de minimis* costs.

2. Regulatory Flexibility Act

The Director of the Office of Personnel Management certifies that this regulation will not have a

significant impact on a substantial number of small entities because it applies only to Federal agencies and employees.

3. Federalism

OPM has examined this proposed rule under E.O. 13132 and has determined that it will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.

4. Civil Justice Reform

This rule meets the applicable standard set forth in section 3(a) and (b)(2) of E.O. 12988.

5. Unfunded Mandates Reform Act of 1995

Section 202 of the Unfunded Mandates Reform Act of 1995 requires that agencies assess anticipated costs and benefits before issuing any rule that would impose spending costs on State, local, or tribal governments in the aggregate, or on the private sector, in any 1 year of \$100 million in 1995 dollars, updated annually for inflation. That threshold is currently approximately \$193 million. This rulemaking will not result in the expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, in excess of the threshold. Thus, no written assessment of unfunded mandates is required.

6. Congressional Review Act

OPM will submit the final rule, if issued, to Congress and the Comptroller General under 5 U.S.C. 801. OPM has preliminarily determined that this proposed rule would not be a “major rule” as defined in 5 U.S.C. 804(2).

7. Paperwork Reduction Act (PRA)

This proposed rule does not impose a new collection of information from the public within the meaning of the Paperwork Reduction Act of 1995, as amended (44 U.S.C. 3501 *et seq.*). The proposed rule primarily governs internal Federal agency personnel procedures, documentation, and administration. Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA unless that collection of information displays a currently valid Office of Management and Budget (OMB) Control Number.

List of Subjects

5 CFR Part 213

Government employees, Reporting and recordkeeping requirements.

5 CFR Part 302

Administrative practice and procedure, Authority delegations (Government agencies), Government contracts, Government employees, Investigations.

5 CFR Part 317

Administrative practice and procedure, Government employees.

5 CFR Part 359

Government employees.

5 CFR Part 362

Administrative practice and procedure, Colleges and universities, Government employees.

5 CFR Part 432

Government employees.

5 CFR Part 731

Administrative practice and procedure, Authority delegations (Government agencies), Government contracts, Government employees, Investigations.

5 CFR Part 920

Administrative practice and procedure, Government employees.

5 CFR Part 930

Administrative practice and procedure, Computer technology, Government employees, Motor vehicles.

Office of Personnel Management.

Alexys Stanley,

Federal Register Liaison.

Accordingly, for the reasons stated in the preamble, OPM proposes to amend 5 CFR parts 213, 302, 317, 359, 362, 432, 550, 731, 920, and 930 as follows:

PART 213—EXCEPTED SERVICE

■ 1. The authority citation for part 213 is revised to read as follows:

Authority: 5 U.S.C. 3161, 3301, and 3302; 38 U.S.C. 4301 *et seq.*; E.O. 10577, 19 FR 7521, 3 CFR, 1954–1958 Comp., p. 218; E.O. 13843, 83 FR 32755; E.O. 14171, 90 FR 8625; E.O. 14317, 90 FR 34753; E.O. 14410, 91 FR 34893.

Sec. 213.101 also issued under 5 U.S.C. 2103.

Sec. 213.3102 also issued under 5 U.S.C. 3307, 8337(h), and 8456; 38 U.S.C. 4301 *et*

seq.; E.O. 12125, 44 FR 16879, 3 CFR, 1979 Comp., p. 375; E.O. 13124, 64 FR 31103, 3 CFR, 1999 Comp., p. 192; E.O. 13562, 75 FR 82585, 3 CFR, 2010 Comp., p. 291; E.O. 14217, 90 FR 10577; and Presidential Memorandum of May 11, 2010, 75 FR 27157, 3 CFR, 2010 Comp., p. 327.

Sec. 213.3202 also issued under 5 U.S.C. 3304.

Subpart A—General Provisions

■ 2. Amend § 213.102 by revising the section heading and paragraph (b)(3)(i) to read as follows:

§ 213.102 Identification of positions in Schedules A, B, C, D, or G.

* * * * *

(b) * * *

(3) * * *

(i) Upon determining that any position or group of positions, as defined in paragraph (c) of this section, should be excepted indefinitely or temporarily from the competitive service, the Office of Personnel Management will authorize placement of the position or group of positions into Schedule A, B, C, D, or G, as applicable. Unless otherwise specified in a particular appointing authority, an agency may make Schedule A, B, C, D, or G appointments on either a permanent or nonpermanent basis, with any appropriate work schedule (*i.e.*, full-time, part-time, seasonal, on-call, or intermittent).

* * * * *

■ 3. Revise § 213.103 to read as follows:

§ 213.103 Publication of excepted appointing authorities in Schedules A, B, C, D, E, Policy/Career, and G.

(a) Schedule A, B, C, D, E, Policy/Career, and G appointing authorities available for use by all agencies will be published as regulations in the **Federal Register** and the Code of Federal Regulations.

(b) OPM will publish annually, as a notice in the **Federal Register**, a consolidated listing of all agency-specific Schedule A, B, C, Policy/Career, and G authorities current as of June 30 of each year, with assigned authority numbers or other unique identifiers. The annual notice will also identify agency-specific authorities established, modified, or revoked during the preceding reporting period. OPM may publish additional notices concerning agency-specific authorities when OPM determines that additional notice would promote sound administration or public transparency.

■ 4. Amend § 213.104 by revising the section heading and paragraphs (a) introductory text, (a)(1), (a)(2), (b)(1), and (b)(3)(iii) to read as follows:

§ 213.104 Special provisions for temporary, time-limited, intermittent, or seasonal appointments in Schedule A, B, C, D, or G.

(a) When OPM specifies that appointments under a particular Schedule A, B, C, D, or G authority must be temporary, intermittent, or seasonal, or when agencies elect to make temporary, intermittent, or seasonal appointments in Schedule A, B, C, D, or G, those terms have the following meaning:

(1) *Temporary appointments*, unless otherwise specified in a particular Schedule A, B, C, D, or G exception, are made for a specified period not to exceed 1 year and are subject to the time limits in paragraph (b) of this section. Time-limited appointments made for more than 1 year are not considered to be temporary appointments and are not subject to these time limits.

(2) *Intermittent positions* are positions without a regular tour of duty.

* * * * *

(b) * * *

(1) *Service limits*. Agencies may make temporary appointments for a period not to exceed 1 year, unless the applicable Schedule A, B, C, D, or G authority specifies a shorter period. Except as provided in paragraph (b)(3) of this section, agencies may extend temporary appointments for no more than 1 additional year (24 months of total service). Appointment to a successor position (*i.e.*, a position that replaces and absorbs the original position) is considered to be an extension of the original appointment. Appointment to a position involving the same basic duties, in the same major subdivision of the agency, and in the same local commuting area is also considered to be an extension of the original appointment.

* * * * *

(3) * * *

(iii) OPM may approve extension of specific temporary appointments beyond 2 years (24 months total service) for specific positions, projects or other unusual circumstances.

Subpart C—Excepted Schedules

Schedule A

■ 5. Amend § 213.3102 by revising paragraphs (i)(1) and (u) to read as follows:

§ 213.3102 Entire executive civil service.

* * * * *

(i) * * *

(1) Positions in remote/isolated locations where examination is impracticable. A remote/isolated location is outside the local commuting

area of a population center from which an employee can reasonably be expected to travel on short notice under adverse weather or road conditions that are normal for the area. For this purpose, a population center is a town with housing, schools, health care, stores and other businesses in which the government can reasonably expect to attract applicants. An individual appointed under this authority may not be employed in the same agency under a combination of this and any other appointment to positions involving related duties and requiring the same qualifications for more than 1,040 working hours in a service year. Temporary appointments under this authority may be extended in 1-year increments, with no limit on the number of such extensions, as an exception to the service limits in § 213.104.

* * * * *

(u) *Appointment of persons with intellectual disabilities, severe physical disabilities, or psychiatric disabilities*—

(1) *Purpose*. An agency may appoint, on a permanent, time-limited, or temporary basis, a person with an intellectual disability, a severe physical disability, or a psychiatric disability according to the provisions described below.

(2) *Proof of disability*.

(i) An agency must require proof of an applicant's intellectual disability, severe physical disability, or psychiatric disability prior to making an appointment under this section.

(ii) An agency may accept, as proof of disability, appropriate documentation (*e.g.*, records, statements, or other appropriate information) issued by a licensed medical professional (*e.g.*, a physician or other medical professional duly certified by a State, the District of Columbia, or a U.S. territory, to practice medicine); a licensed vocational rehabilitation specialist (State or private); or any Federal agency, State agency, or an agency of the District of Columbia or a U.S. territory that issues or provides disability benefits.

(3) *Permanent or time-limited employment options*. An agency may make permanent or time-limited appointments under this paragraph (u)(3) where an applicant supplies proof of disability as described in paragraph (u)(2) of this section and the agency determines that the individual is likely to succeed in performing the duties of the position for which he or she is applying. In determining whether the individual is likely to succeed in performing the duties of the position, the agency may rely upon the

applicant's employment, educational, or other relevant experience, including but not limited to service under another type of appointment in the competitive or excepted services.

(4) *Temporary employment options.* An agency may make a temporary appointment when:

(i) The agency determines that it is necessary to observe the applicant on the job to determine whether the applicant is able or ready to perform the duties of the position. When an agency uses this option to determine an individual's job readiness, the hiring agency may convert the individual to a permanent appointment in the excepted service whenever the agency determines the individual is able to perform the duties of the position; or

(ii) The work is of a temporary nature.

(5) *Noncompetitive conversion to the competitive service.*

(i) An agency may noncompetitively convert to the competitive service an employee who has completed 2 years of satisfactory service under this authority in accordance with the provisions of Executive Order 12125, as amended by Executive Order 13124, and § 315.709 of this chapter, except as provided in paragraph (u)(5)(ii) of this section.

(ii) Time spent on a temporary appointment specified in paragraph (u)(4)(ii) of this section does not count towards the 2-year requirement.

* * * * *

§ 213.3301 [Amended]

■ 6. Amend § 213.3301 by removing the phrase “number from 213.3302 through 213.3399, or other appropriate number,” in paragraph (a) and adding in its place the phrase “unique identifier”.

■ 7. Amend § 213.3402 by revising paragraph (b) to read as follows:

§ 213.3402 Entire executive civil service; Pathways Programs.

* * * * *

(b) *Recent Graduates Program; Positions in the Recent Graduates Program.*

(1) Except as provided in paragraph (b)(2) of this section, initial appointments of Recent Graduates may be made at any grade level, not to exceed GS-11 (or equivalent level under another pay and classification system, including the Federal Wage System (FWS)), depending on the candidates' qualifications.

(2) Initial appointments may be made to scientific and professional research positions at the GS-12 level for which the classification and qualification criteria for research positions apply, if the candidate possesses a Ph.D. or

equivalent degree directly related to the position the agency is seeking to fill.

(3) Appointments must be made in accordance with the provisions of subpart C of part 362 of this chapter.

■ 8. Add a new undesignated center heading after § 213.3402 to read as follows:

SCHEDULE E

■ 9. Add new § 213.3501 below the undesignated heading SCHEDULE E to read as follows:

§ 213.3501 Positions of administrative law judge appointed under 5 U.S.C. 3105.

(a) An agency may appoint an individual under this section only to an administrative law judge position appointed under 5 U.S.C. 3105. Positions filled under this section are excepted from the competitive service and constitute Schedule E.

(b) A new appointment to an administrative law judge position made on or after July 10, 2018, must be made under Schedule E. This section does not alter the status of an incumbent administrative law judge whose competitive-service status is preserved under § 6.8(d) of this chapter.

(c) An appointment under this section is not subject to the appointment procedures of part 302 of this chapter, including examination and rating procedures. Each agency shall follow the principle of veterans' preference as far as administratively feasible.

(d) Appointments under this section must comply with § 6.3(b) of this chapter. At the time of application and any new appointment, an individual, other than an incumbent administrative law judge, must possess a professional license to practice law and be authorized to practice law under the laws of a State, the District of Columbia, the Commonwealth of Puerto Rico, or a territorial court established under the Constitution of the United States, subject to the license-status provisions in § 6.3(b) of this chapter.

(e) Appointments and personnel actions under this section remain subject to applicable statutory and regulatory requirements governing administrative law judges, including 5 U.S.C. 3105, 5 U.S.C. 7521, and subpart B of part 930 of this chapter.

(f) An individual appointed under this section is not subject to a trial period under part 11 of this chapter.

■ 10. Amend § 213.3601 by:

■ a. Revising paragraphs (b) and (c);

■ b. Removing paragraph (d) and redesignating paragraphs (e) and (f) as paragraphs (d) and (e), respectively; and

■ c. Revising newly redesignated paragraph (e) and adding paragraph (f) to read as follows:

§ 213.3601 Career positions of a confidential, policy-determining, policy-making, or policy-advocating character.

* * * * *

(b)(1) Except as provided in paragraph (c) of this section, agencies must make appointments to positions in Schedule Policy/Career of the excepted service in the same manner as to positions in the competitive service, to include:

(i) Public notification of job opportunities;

(ii) Applicant evaluation based on valid, job-related assessments; and

(iii) Selections of highly qualified individuals based on merit.

(2) In making appointments under paragraph (b)(1) of this section, agencies must follow the principles of veterans' preference as far as administratively feasible based on the rating, ranking, and selection processes used for making appointments. Where numerical ratings are used in the evaluation and referral of candidates, agencies shall follow the regulations related to veterans' preference in part 302 and subpart A of part 337 of this chapter, as applicable. When category rating is used, agencies shall follow the procedures related to veterans' preference in part 302 and subpart C of part 337 of this chapter. Where another process is used in accordance with § 302.105 of this chapter, veteran status must be considered a positive factor.

(c) Agencies must make appointments to positions in Schedule Policy/Career of the excepted service that, but for their placement in Schedule Policy/Career, would be listed in another excepted service schedule pursuant to the rules applicable to such positions in the corresponding schedule, including the application of veterans' preference as far as administratively feasible.

* * * * *

(e) Individuals appointed to positions in Schedule Policy/Career are not subject to trial periods under part 11 of this chapter. An individual appointed under paragraph (b) of this section in the same manner as an appointment in the competitive service acquires competitive status after completing 2 years of continuing service in the same or similar positions. Nothing in this paragraph limits the retention of competitive status under § 1.3(d) of this chapter or the acquisition of competitive status under § 3.1(a)(5) or § 6.8(e) of this chapter.

(f) To the extent permitted by the statute governing the position and any applicable Executive order, a position in a statutory personnel system outside title 5, United States Code, may be designated as Schedule Policy/Career if the position is of a confidential, policy-

determining, policy-making, or policy-advocating character. For a position described in this paragraph that is otherwise covered by chapters 23, 43, or 75 of title 5, designation in Schedule Policy/Career affects coverage under those chapters to the extent provided by 5 U.S.C. 2302(a)(2)(B)(i), 4301(2)(G), 4303(e)(3), and 7511(b)(2), and applicable implementing regulations. Such designation does not otherwise alter the governing statutory personnel system unless expressly provided by statute, Executive order, or regulation.

■ 11. Add a new undesignated center heading after § 213.3601 to read as follows:

SCHEDULE G

■ 12. Add new § 213.3701 below the undesignated heading SCHEDULE G to read as follows:

§ 213.3701 Positions of a policy-making or policy-advocating character normally subject to change as a result of a Presidential transition.

Upon specific authorization by OPM, agencies may make appointments under this section to noncareer positions that are of a policy-making or policy-advocating character and are normally subject to change as a result of a Presidential transition. Positions filled under this authority are excepted from the competitive service and constitute Schedule G. Each position will be assigned a unique identifier to be used by the agency in recording appointments made under that authorization.

PART 302—EMPLOYMENT IN THE EXCEPTED SERVICE

■ 13. The authority citation for part 302 is revised to read as follows:

Authority: 5 U.S.C. 1103, 1104, 1302, 3301, 3302, 3308, 3309, 3313, 3315, 3317, 3318, 3319, 3320, and 8151; E.O. 10577, 19 FR 7521, 3 CFR, 1954–1958 Comp., p. 218; E.O. 14171, 90 FR 8625.

Sec. 302.105 also issued under 5 U.S.C. 1104 and sec. 3(5), Pub. L. 95–454, 92 Stat. 1112.

Sec. 302.107 also issued under 5 U.S.C. 9201–9206 and sec. 1122(b)(1), Pub. L. 116–92, 133 Stat. 1605.

Secs. 302.108 and 302.203 also issued under E.O. 13764, 82 FR 8115, 3 CFR, 2017 Comp., p. 243.

Subparts E and F also issued under 5 U.S.C. 3318(c), 3319(c), and 3320; sec. 2(d), Pub. L. 114–137, 130 Stat. 312 (5 U.S.C. 3318 note).

Sec. 302.701 also issued under 5 U.S.C. chapter 77.

Subpart A—General Provisions

■ 14. Revise § 302.101 to read as follows:

§ 302.101 Positions covered by regulations.

(a) *Positions covered.* With respect to the application of veterans' preference, this part applies to each position in the executive branch of the Federal Government that is not in the competitive service and that is subject to title 5, United States Code, or subject to a statutory requirement to follow the veterans' preference provisions of title 5. With respect to restoration rights due to compensable injury and appeals therefrom, this part applies to positions covered by 5 U.S.C. 8101(1) that are not in the competitive service.

(b) *Positions not covered.* This part does not apply to a position or appointment that is required by the Congress to be confirmed by, or made with the advice and consent of, the Senate.

(c) *Positions exempt from appointment procedures.* An agency is not required to apply the examination, rating, ranking, referral, and selection procedures of this part to the following positions or appointments. Each agency shall, however, follow the principle of veterans' preference as far as administratively feasible and, upon request of a qualified and available preference eligible, shall provide the reasons for the individual's nonselection. Nothing in this paragraph relieves an agency of any restoration, reemployment, or priority consideration obligation required by 5 U.S.C. 8151, part 353 of this chapter, this part, a final order, or other applicable law.

(1) Positions filled by persons appointed without pay or at pay of \$1 a year.

(2) Positions outside the continental United States and outside the State of Hawaii and the Commonwealth of Puerto Rico when filled by persons resident in the locality, and positions in the State of Hawaii and the Commonwealth of Puerto Rico when paid in accordance with prevailing wage rates.

(3) Positions that the exigencies of the national defense program require to be filled immediately before qualified applicants can be identified or considered, provided that appointments under this paragraph are temporary and may not exceed 1 year, with not more than 1 additional year of extension.

(4) Positions filled by appointees serving on an irregular or occasional basis whose hours or days of work are not based on a prearranged schedule and who are paid only for the time actually employed or for services actually performed.

(5) Positions paid on a fee basis.

(6) Attorney positions.

(7) Law clerk trainee positions filled under § 213.3102(e) of this chapter.

(8) Positions OPM excepts from the competitive service under § 6.1 of this chapter when OPM agrees with the agency that the positions should be included hereunder and provides in writing that an agency is not required to fill positions according to the procedures in this part.

(9) Positions included in Schedule C and Schedule G.

(10) Administrative law judge positions in Schedule E.

(11) Confidential, policy-determining, policy-making, or policy-advocating positions filled under Schedule Policy/Career. Appointments under this authority must be made in accordance with the provisions of § 213.3601 of this chapter.

(12) Positions filled by reemployment of an individual in the same agency, at the same or lower grade or pay level, and under the same appointing authority as the position last held.

(13) Positions in remote or isolated locations when filled under § 213.3102(i)(1) of this chapter.

(14) Positions for which a critical hiring need exists when filled under § 213.3102(i)(2) of this chapter.

(15) Positions filled under § 213.3102(u) of this chapter by persons with intellectual disabilities, severe physical disabilities, or psychiatric disabilities.

■ 15. Revise § 302.103 to read as follows:

§ 302.103 Definitions.

For purposes of this part:

Person entitled to priority consideration means an individual who is entitled to priority consideration for appointment under 5 U.S.C. 8151, part 353 of this chapter, §§ 302.303 and 302.304, a final order, or other applicable statute, regulation, or binding legal authority.

■ 16. Revise § 302.104 to read as follows:

§ 302.104 Applicability of regulations to applicants and employees.

Except as otherwise authorized in this chapter, an agency must apply the provisions of this part necessary to accord veterans' preference and priority consideration whenever a qualified preference eligible or a person entitled to priority consideration applies for appointment to a position covered by this part. When no qualified preference eligible or person entitled to priority consideration applies, the agency may use any lawful appointing procedure consistent with the applicable excepted service authority.

■ 17. Revise § 302.105 to read as follows:

§ 302.105 Alternative procedures.

(a) *General.* An agency may use an alternative procedure for accepting, evaluating, referring, or selecting applicants for positions subject to this part if the procedure is in writing, is applied uniformly, is consistent with merit system principles, and provides preference eligibles and persons entitled to priority consideration at least as much advantage in consideration, referral, and selection as they would receive under the procedures otherwise set forth in this part.

(b) *Contents.* An alternative procedure must describe—

- (1) The positions or appointing authorities covered;
- (2) The method for accepting applications or expressions of interest;
- (3) The method for determining qualifications and evaluating applicants;
- (4) The method for applying veterans' preference;

(5) The method for identifying and considering persons entitled to priority consideration;

(6) The documentation the agency will maintain; and

(7) The circumstances under which the agency may use an exception to selection of a person entitled to priority consideration or pass over a preference eligible.

(c) *OPM review.* OPM may require an agency to submit an alternative procedure for review and may require the agency to modify or discontinue any procedure that does not satisfy this section.

(d) *No waiver of law.* An alternative procedure may not waive any statutory requirement, including any requirement concerning veterans' preference, pass-over of preference eligibles, restoration rights, priority consideration, suitability, fitness, or prohibited personnel practices.

(e) *OPM-led pooled hiring actions.* When OPM administers an OPM-led pooled hiring action under subpart F of this part, OPM may establish procedures, consistent with 5 U.S.C. 3317(b), 5 U.S.C. 3318, 5 U.S.C. 3319, 5 U.S.C. 3320, and this part, for the rating, ranking, and selection of eligible candidates by participating agencies.

■ 18. Revise § 302.106 to read as follows:

§ 302.106 Vacancy announcements.

(a) This section does not require an agency to issue a public vacancy announcement unless public notice is required by statute, regulation, the applicable appointing authority, or agency policy.

(b) When an agency announces a vacancy for a position covered by this part, the announcement must also provide, as applicable, instructions for claiming veterans' preference and priority consideration.

(c) When an agency announces a vacancy in the excepted service, the announcement must include a reasonable accommodation statement that complies with part 330, subpart A of this chapter.

Subpart B—Eligibility Standards

■ 19. Revise § 302.201 to read as follows:

§ 302.201 Persons entitled to veterans' preference.

In actions subject to this part, each agency shall grant veterans' preference as follows:

(a) *Numerical rating.* When numerical scores are used in evaluation and referral, the agency shall grant 5 additional points to preference eligibles under 5 U.S.C. 2108(3)(A) and (B), and 10 additional points to preference eligibles under 5 U.S.C. 2108(3)(C) through (G), consistent with 5 U.S.C. 3309.

(b) *Category rating.* When quality categories are used in evaluation and referral, preference eligibles do not receive additional points. The agency must apply veterans' preference consistent with 5 U.S.C. 3319(b) and (c)(6). Within each quality category, preference eligibles must be listed ahead of individuals who are not preference eligibles. For positions other than scientific and professional positions at the GS-9 level or equivalent or higher, qualified preference eligibles with a compensable service-connected disability of 10 percent or more must be listed in the highest quality category.

(c) *Alternative procedures.* When an agency uses an alternative procedure under § 302.105, the agency must provide preference eligibles at least as much advantage in evaluation, referral, and selection as they would receive under the procedures otherwise set forth in this part.

■ 20. Revise § 302.202 to read as follows:

§ 302.202 Qualification requirements.

(a) *General.* Before making an appointment to a position covered by this part, each agency must establish qualification requirements that are job-related and consistent with the duties to be performed. Qualification requirements may include requirements relating to experience, training, competencies, knowledge, skills, abilities, citizenship, minimum age,

physical condition, or other lawful job-related factors.

(b) *Documentation and uniform application.* Each agency must make its qualification requirements a matter of record, include the requirements in any vacancy announcement for the position, apply the requirements uniformly to all applicants, and furnish information concerning the requirements to an applicant upon request.

(c) *Minimum education.* An agency may not include a minimum educational requirement in qualification requirements unless the position is scientific, technical, or professional and the agency determines that the duties of the position cannot be performed by a person who does not have the prescribed minimum education.

(d) *Maximum age.* An agency may not establish a maximum age requirement for a position unless the requirement is authorized by statute or OPM regulation.

(e) *Waiver for preference eligibles.* Qualification requirements must include—

(1) A provision for waiver by the agency of requirements as to age, height, and weight for each preference eligible when the requirements are not essential to performance of the duties of the position; and

(2) A provision for waiver by the agency of physical requirements for each preference eligible when the agency, after giving due consideration to the recommendation of an accredited physician, finds that the applicant is physically able to discharge the duties of the position.

Subpart C—Accepting, Rating, and Arranging Applications

■ 21. Revise § 302.301 to read as follows:

§ 302.301 Receipt of applications.

(a) Each agency shall determine the methods it will use to provide information concerning opportunities to apply for positions covered by this part. The agency shall provide applicants with information on how to apply, a description of the duties of the position, the applicable qualification requirements, and any other job-related information the agency determines is necessary.

(b) Each agency shall establish definite policies and procedures regarding the acceptance of applications for positions covered by this part and shall make those policies and procedures a matter of record.

(c) Each agency shall apply its application policies and procedures

uniformly to all applicants being considered for employment and shall furnish information concerning those policies and procedures to an applicant upon request.

(d) When an agency fills a position covered by this part and priority consideration under § 302.303 may apply, the agency shall provide a means for individuals claiming priority consideration to identify their eligibility and submit the information necessary for the agency to determine whether they are priority candidates for the vacancy.

■ 22. Revise § 302.302 to read as follows:

§ 302.302 Examination and evaluation of applicants.

(a) *General.* An agency may evaluate the qualifications of applicants for positions covered by this part at any time before an appointment is made. The evaluation must be job-related and may be conducted using numerical rating, category rating, or an alternative evaluation method authorized under § 302.105, unless otherwise exempt from the procedures of this part under § 302.101.

(b) *Record of evaluation method.* The agency shall make the evaluation method used to rate and rank applicants a matter of record and shall make information concerning that method available to an applicant upon request.

(c) *Numerical rating.* When an agency uses numerical rating, scores must be assigned on a scale of 100. An applicant must meet the qualification requirements established under § 302.202 and receive an eligible rating of 70 or more to be eligible for appointment. Candidates with eligible ratings must receive additional points for veterans' preference as provided in § 302.201.

(d) *Category rating.* When an agency uses category rating, the agency must establish and define at least two quality categories before accepting applications. The quality categories must reflect the requirements to perform the job successfully and must distinguish differences in the quality of candidates' job-related competencies, knowledge, skills, and abilities. An agency may not establish a "not qualified" category. Only qualified applicants may be placed in a quality category. Veterans' preference must be applied as provided in § 302.201 and 5 U.S.C. 3319.

(e) *Alternative evaluation methods.* When an agency uses an alternative evaluation method authorized under § 302.105, the agency must apply the method in accordance with its written alternative procedure and must ensure

that preference eligibles and persons entitled to priority consideration receive at least as much advantage in referral or selection as they would receive under the procedures otherwise set forth in this part.

(f) *Nonpreference applicants for certain positions.* An agency may not consider or rate an application for the position of elevator operator, messenger, guard, or custodian submitted by a nonpreference eligible as long as at least three qualified preference eligibles are available for the position.

(g) *Evaluating experience.* When experience is a factor in determining eligibility, an agency shall credit a preference eligible —

(1) With time spent in the military service of the United States if the position for which the preference eligible is applying is similar to the position the preference eligible held immediately before entering military service; and

(2) With all valuable experience, including experience gained in religious, civic, welfare, service, and organizational activities, regardless of whether pay was received therefor.

■ 23. Revise § 302.303 to read as follows:

§ 302.303 Priority consideration.

(a) *General.* An agency shall maintain documented procedures sufficient to identify, notify, evaluate, and consider priority candidates for positions covered by this part. In addition, an agency shall maintain sufficient records to document compliance with this section and § 302.304. An agency is not required to maintain separate records designated as a priority reemployment list, reemployment list, or regular employment list.

(b) *Priority candidate.* For purposes of this subpart, a priority candidate is an individual described in paragraph (c) of this section who has applied for priority consideration under the agency's procedures, is within the scope of priority consideration established under this section, is qualified for the vacancy under § 302.202, and is available for appointment.

(c) *Mandatory priority consideration.* Subject to any available and lawful exception, an agency shall provide priority consideration to the following individuals before appointing any other candidate to a position covered by this part:

(1) A current or former employee of the agency who is a preference eligible, who is serving or served under a continuing excepted service appointment, who has been or will be furloughed or separated by reduction in

force or other workforce reduction action not based on delinquency or misconduct, and who applies or registers for reemployment under the agency's procedures;

(2) A current or former employee who is entitled to restoration or priority consideration because of recovery from compensable injury under 5 U.S.C. 8151, part 353 of this chapter, or other applicable law; and

(3) Any other individual to whom the agency is required to provide reemployment priority under statute, regulation, final order, or other binding legal authority.

(d) *Scope of priority consideration.*

(1) Except as otherwise required by statute, regulation, final order, or other binding legal authority, priority consideration under paragraph (c)(1) of this section applies to positions in the agency in the local commuting area from which the individual was or will be furloughed or separated, at the same or lower grade or pay level, with no greater promotion potential, and with a work schedule no broader than the work schedule of the position from which the individual was or will be furloughed or separated.

(2) Priority consideration under paragraph (c)(2) of this section applies in accordance with 5 U.S.C. 8151, part 353 of this chapter, and other applicable law. Nothing in this section limits an employee's right to immediate and unconditional restoration where such restoration is required by law or regulation.

(3) An agency may provide broader priority consideration than the minimum required by this section, including broader geographic consideration, additional grades or pay levels, different work schedules, or longer eligibility periods, if the agency establishes the broader consideration in written policy and applies it uniformly to similarly situated individuals.

(e) *Duration of priority consideration.*

(1) Priority consideration under paragraph (c)(1) of this section expires 2 years after the effective date of the furlough or separation, unless a longer period is required by statute, regulation, final order, or other binding legal authority, or the agency establishes a longer period in written policy.

(2) Priority consideration and restoration rights under paragraph (c)(2) of this section are governed exclusively by 5 U.S.C. 8151, part 353 of this chapter, and other applicable law, and continue for the period, and on the terms, established by that statute and those regulations. Nothing in this section imposes a 2-year or other durational limit on an entitlement

arising under 5 U.S.C. 8151 or part 353 of this chapter, and nothing in this section shall be construed to shorten, condition, or otherwise diminish the restoration or priority-consideration rights provided by that statute and those regulations.

(3) Priority consideration under paragraph (c)(3) of this section continues for the period required by the applicable statute, regulation, final order, or other binding legal authority.

(f) *Agency procedures.* Each agency shall establish written procedures for administering priority consideration under this section. The procedures must address, at a minimum—

(1) How individuals may apply for priority consideration for specific vacancies;

(2) How the agency will determine the qualifications of individuals who may be eligible for priority consideration;

(3) How individuals may update availability, location, qualification, grade, pay level, work schedule, and other placement information;

(4) How the agency will determine whether an individual is a priority candidate for a specific vacancy;

(5) How the agency will evaluate and rank priority candidates, if more than one priority candidate is available for the same vacancy;

(6) How the agency will apply veterans' preference among priority candidates; and

(7) How the agency will notify priority candidates of the outcome of consideration.

■ 24. Revise § 302.304 to read as follows:

§ 302.304 Applying priority consideration and considering other candidates.

(a) *Priority consideration before other candidates.* Before appointing any individual to a position covered by this part, an agency must determine whether there is a priority candidate under § 302.303 for the vacancy. Except as provided in paragraph (d) of this section, an agency may not appoint a non-priority candidate if a priority candidate is qualified, available, within the scope of priority consideration, and eligible for selection for the vacancy.

(b) *Selection among priority candidates.*

(1) If there is one priority candidate for a vacancy, the agency must select that candidate before selecting any other candidate, unless an exception under paragraph (d) of this section applies.

(2) If there is more than one priority candidate for a vacancy, the agency shall evaluate the priority candidates using the method established for the vacancy under § 302.302 or § 302.105

and shall apply veterans' preference under § 302.201. The agency shall select from among the priority candidates before selecting any non-priority candidate, unless an exception under paragraph (d) of this section applies.

(3) An agency may not pass over a preference eligible to select a nonpreference eligible from the same group of priority candidates unless the applicable pass-over requirements of this part, 5 U.S.C. 3318, 5 U.S.C. 3319, or other applicable authority are satisfied.

(c) *Consideration of non-priority candidates.* After an agency has satisfied the priority consideration requirements of this section or has documented that no priority candidate is available and qualified for the vacancy, the agency may consider other qualified applicants using the evaluation method established for the vacancy under § 302.302 or § 302.105. The agency must apply veterans' preference under § 302.201.

(d) *Exceptions.* An agency may appoint an individual other than a priority candidate only when an available and lawful exception applies. Such exceptions include—

(1) A position or appointment exempt from the appointment procedures of this part under § 302.101(c), provided that the exemption does not relieve the agency of any restoration or priority-placement obligation required by 5 U.S.C. 8151, part 353 of this chapter, this part, or other applicable law;

(2) An action required to satisfy an individual's superior statutory or regulatory restoration, reemployment, or placement right, including immediate restoration under part 353 of this chapter, restoration following military service, or compliance with a final order of the Merit Systems Protection Board, a court, or other competent authority;

(3) A determination, documented by the agency, that no priority candidate is qualified, available, or within the scope of priority consideration for the vacancy;

(4) A determination, documented by the agency, that the duties of the position cannot be taken over without undue interruption by any available priority candidate;

(5) A priority candidate's declination of an offer, failure to respond to a written inquiry regarding availability, or failure to appear for a scheduled interview, when the agency's written inquiry or notice advised the candidate of the consequence of nonresponse or nonappearance;

(6) A conversion, extension, reappointment, or other personnel action that is expressly excepted from

priority consideration by statute, regulation, this chapter, OPM-approved plan, or the terms of the applicable appointing authority; or

(7) Any other exception authorized in writing by OPM or otherwise required by law.

(e) *Notice to affected priority candidates.* When an agency uses an exception under paragraph (d) of this section to appoint an individual other than a priority candidate, the agency shall notify each adversely affected priority candidate of the reason for the exception. The agency shall notify the individual of any appeal rights provided by subpart G of this part, part 1201 of this title, part 353 of this chapter, or other applicable law.

(f) *Documentation.* An agency shall maintain documentation showing—

(1) The vacancy or personnel action filled;

(2) Whether priority consideration applied;

(3) The identity of each priority candidate considered;

(4) The agency's qualification and availability determination for each priority candidate;

(5) The evaluation method used;

(6) The application of veterans' preference, if applicable;

(7) The selection or nonselection decision; and

(8) The basis for any exception used under paragraph (d) of this section.

Subpart D—Selection and Appointment; Reappointment; and Qualifications for Promotion

■ 25. Revise § 302.401 to read as follows:

§ 302.401 Selection and appointment.

(a) *Priority consideration first.* Before making an appointment to a position covered by this part, an agency must satisfy the priority consideration requirements in §§ 302.303 and 302.304.

(b) *Numerical rating.* When an agency uses numerical rating, the agency may refer candidates for selection using a method established before applications are solicited and documented in the recruitment file. The method may include a cut-off score, a set number of the highest-ranked eligible candidates, a set percentage of the highest-ranked eligible candidates, or another job-related method consistent with § 302.105. A selecting official may select any referred eligible candidate, except that the selecting official may not pass over a higher-standing preference eligible to select a lower-standing nonpreference eligible unless the agency satisfies paragraph (e) of this section.

(c) *Category rating.* When an agency uses category rating, the agency may select any eligible candidate in the highest quality category. If fewer than three candidates are in the highest quality category, the agency may merge the highest and second-highest quality categories and make selections from the merged category. Preference eligibles must be listed ahead of nonpreference eligibles within each category or merged category. A selecting official may not select a nonpreference eligible over a preference eligible in the same category unless the agency satisfies paragraph (e) of this section.

(d) *Alternative procedures.* When an agency uses an alternative procedure under § 302.105, selection must be made in accordance with that procedure. The procedure must provide preference eligibles and persons entitled to priority consideration at least as much advantage in consideration, referral, and selection as they would receive under the procedures otherwise set forth in this part.

(e) *Passing over a preference eligible.* When an agency proposes to pass over a preference eligible to select a nonpreference eligible, the agency must comply with the applicable requirements of 5 U.S.C. 3318(c), 5 U.S.C. 3319(c)(6), and OPM instructions.

(f) *Discontinuing consideration.* An agency may discontinue consideration of an eligible candidate only as authorized by 5 U.S.C. 3318(e), § 302.105(e), or other applicable law, consistent with the requirements in § 332.405 of this chapter. Nothing in this paragraph authorizes passing over a preference eligible except as permitted by paragraph (e) of this section and applicable law.

(g) *Documentation.* The agency must document the selection method used, the application of veterans' preference, the application of priority consideration, any pass-over decision, and the basis for the selection. The documentation must be sufficient to permit reconstruction or third-party review.

(h) *Special conditions for OPM-led pooled hiring actions.*

(1) When OPM administers an OPM-led pooled hiring action under subpart F of this part, and determines, based on written documentation, that an eligible candidate has received bona fide consideration for three separate appointments from the same shared certificate for the same position, OPM may discontinue further referral of that candidate from that certificate for that position. For purposes of this paragraph, "the same position" means a position in

the same occupational series, at the same grade or equivalent pay level, and involving substantially equivalent duties, qualification requirements, competencies, and, as applicable, duty location or other lawful position requirements. OPM's authority under this paragraph supplements, and does not limit, agency authority under §§ 302.502(b), 302.603(d), and 302.604(e).

(2) Before discontinuing referral under this paragraph, OPM must document the basis for the determination. The documentation must show that the candidate's application material was reviewed and considered, that the candidate received bona fide consideration for three separate appointments, and that discontinuing further referral is supported by a job-related skill, competency, location, availability, or other lawful requirement relevant to the position being filled. OPM must maintain documentation sufficient to reconstruct the action and must provide written notification to a candidate whose referral is discontinued under this paragraph upon request by the candidate.

(3) Nothing in this paragraph authorizes passing over a preference eligible except as permitted by § 302.401(e) and applicable law.

■ 26. Revise § 302.402 to read as follows:

§ 302.402 Reappointment.

(a) Subject to §§ 302.303 and 302.304, an agency may reappoint a current or former nontemporary employee of the executive branch of the Federal Government who is a preference eligible to a position covered by this part without applying the examination, rating, ranking, and referral procedures of this part.

(b) This section does not authorize an agency to bypass a qualified and available person entitled to priority consideration unless a lawful exception under § 302.304 applies.

(c) A reappointment under this section must be otherwise consistent with statute, regulation, the applicable appointing authority, and any agency policy governing reemployment.

Subpart E—Shared Use of Excepted Service Certificates

§ 302.502 [Amended]

■ 27. Amend § 302.502 in paragraph (b) by:

- a. Removing the phrase "§ 302.302(b)(1)" and adding in its place the phrase "§ 302.302(c)"; and
- b. Removing the phrase "§ 302.302(b)(2)" and adding in its place the phrase "§ 302.302(d)".

Subpart F—OPM-Led Pooled Hiring Actions

§ 302.603 [Amended]

■ 28. Amend § 302.603 by:

- a. In paragraph (d), removing the phrase "§ 302.302(b)(1)" and adding in its place the phrase "§ 302.302(c)", and removing the phrase "§ 302.302(b)(2)" and adding in its place the phrase "§ 302.302(d)"; and
- b. In paragraph (e), removing the phrase "§ 302.401(b)" and adding in its place the phrase "§ 302.401(e)".

§ 302.604 [Amended]

■ 29. Amend § 302.604 by:

- a. In paragraph (e), removing the phrase "§ 302.302(b)(1)" and adding in its place the phrase "§ 302.302(c)", and removing the phrase "§ 302.302(b)(2)" and adding in its place the phrase "§ 302.302(d)"; and
- b. In paragraph (f), removing the phrase "§ 302.401(b)" and adding in its place the phrase "§ 302.401(e)".

Subpart G—Appeals

■ 30. Revise § 302.701 to read as follows:

§ 302.701 Entitlement.

(a) *Restoration-rights appeals.* An individual who is covered by 5 U.S.C. 8101(1) and who is entitled to restoration or priority consideration under 5 U.S.C. 8151, part 353 of this chapter, or this part may appeal an alleged violation of restoration rights to the Merit Systems Protection Board under the Board's regulations by presenting factual information that the individual was denied restoration or priority consideration because of the employment of another person.

(b) *Other appeals.* A preference eligible or person entitled to priority consideration may appeal an action taken under this part only to the extent an appeal right is provided by statute, MSPB regulation, or other applicable law. Nothing in this part creates an appeal right not otherwise provided by statute, regulation, or other applicable law.

PART 317—EMPLOYMENT IN THE SENIOR EXECUTIVE SERVICE

■ 31. The authority citation for part 317 is revised to read as follows:

Authority: 5 U.S.C. 3392, 3393, 3395, 3397, 3592, 3593, 3595, 3596, 8414, and 8421; E.O. 14317, 90 FR 34753. Section 317.202 also issued under 5 U.S.C. 9201–9206 and Pub. L. 116–92, sec. 1122(b)(1).

■ 32. Amend § 317.304 by revising paragraphs (a)(2)(i) and (iii) to read as follows:

§ 317.304 Conversion of career and career-type appointees.

- (a) * * *
- (2) * * *

(i) To a Schedule C or Schedule G position established under part 213 of this chapter;

* * * * *

(iii) To a position which meets the same criteria as a Schedule C or Schedule G position or a position authorized to be filled by non-career executive assignment; or

* * * * *

■ 33. Amend § 317.305 by revising paragraph (a)(1) to read as follows:

§ 317.305 Conversion of excepted appointees.

- (a) * * *

(1) In Schedule C or Schedule G of subpart C of part 213 of this chapter;

* * * * *

■ 34. Amend § 317.502 by revising paragraph (e) to read as follows:

§ 317.502 Qualifications Review Board certification.

* * * * *

(e) An action to convert a “noncareer-type” employee to a career SES appointment in the employee’s current position or a successor to that position will not be forwarded to a QRB. A “noncareer-type” employee includes a noncareer SES appointee, a Schedule C appointee, a Schedule G appointee, or equivalent.

* * * * *

■ 35. Amend § 317.901 by revising paragraph (c)(1)(ii) to read as follows:

§ 317.901 Reassignments.

* * * * *

- (c) * * *

- (1) * * *

(ii) Noncareer appointee includes an SES noncareer or limited appointee, an appointee in a position filled under Schedule C or Schedule G, or an appointee in an Executive Schedule or equivalent position that is not required to be filled competitively.

* * * * *

PART 359—REMOVAL FROM THE SENIOR EXECUTIVE SERVICE; GUARANTEED PLACEMENT IN OTHER PERSONNEL SYSTEMS

■ 36. The authority citation for part 359 is revised to read as follows:

Authority: 5 U.S.C. 1302, 3302, and 3596, unless otherwise noted; E.O. 14317, 90 FR 34753.

■ 37. Amend § 359.406 by revising paragraph (b) to read as follows:

§ 359.406 Restrictions.

* * * * *

(b) For purposes of this section, a noncareer appointee includes an SES noncareer or limited appointee, an appointee in a position filled under Schedule C or Schedule G, or an appointee in an Executive Schedule or equivalent position other than a career Executive Schedule or equivalent position.

* * * * *

■ 38. Amend § 359.503 by revising paragraph (b) to read as follows:

§ 359.503 Restrictions.

* * * * *

(b) For purposes of this section, a noncareer appointee includes an SES noncareer or limited appointee, an appointee in a position filled under Schedule C or Schedule G, or an appointee in an Executive Schedule or equivalent position other than a career Executive Schedule or equivalent position.

* * * * *

■ 39. Amend § 359.701 by revising paragraphs (a)(1) and (2) to read as follows:

§ 359.701 Coverage.

* * * * *

- (a) * * *

(1) To a Schedule C or Schedule G position established under part 213 of this chapter;

(2) To a position that meets the same criteria as a Schedule C or Schedule G position; or

* * * * *

PART 362—PATHWAYS PROGRAMS

■ 40. The authority citation for part 362 is revised to read as follows:

Authority: E.O. 13562, 75 FR 82585, 3 CFR, 2010 Comp., p. 291, as amended by E.O. 14217, 90 FR 10577; and E.O. 14410, 91 FR 34893.

Subpart A—General Provisions**§ 362.102 [Amended]**

■ 41. Amend § 362.102 by removing the definition of “Advanced degree.”

■ 42. Amend § 362.104 by revising paragraph (a)(8) to read as follows:

§ 362.104 Agency requirements.

- (a) * * *

(8) Prescribe criteria and procedures on how the agency will determine whether it has the resources available to convert a Pathways Participant to a term or permanent position in the competitive service or, when authorized under § 362.107, to a permanent Schedule Policy/Career position. These procedures must specify the timeline for making the determination, which must include informing the Pathways

Participant no later than 60 calendar days prior to the end of the appointment about whether the agency is able to convert them. If an agency is unable to convert a Pathways Participant, its procedures may include the actions it will take to assist a Participant in pursuing conversion at another agency, when appropriate.

* * * * *

■ 43. Amend § 362.105 by revising paragraph (e)(2) to read as follows:

§ 362.105 Filling positions.

* * * * *

- (e) * * *

(2) A Pathways Participant must be a United States citizen to be eligible for noncompetitive conversion to term or permanent employment in the competitive service or to permanent employment in Schedule Policy/Career.

* * * * *

■ 44. Amend § 362.106 by revising paragraph (h) to read as follows:

§ 362.106 Participant Agreement.

* * * * *

(h) Minimum eligibility requirements for noncompetitive conversion to term or permanent competitive service employment, or to permanent Schedule Policy/Career employment when authorized under § 362.107, according to the requirements of the applicable Pathways Program.

■ 45. Revise § 362.107 to read as follows:

§ 362.107 Conversion to the competitive service or Schedule Policy/Career.

(a) *General conversion authority.* Subject to any limits on conversion imposed by the Director, and in accordance with the provisions of each Pathways Program, an agency may noncompetitively convert an eligible Pathways Participant to:

(1) A term or permanent position in the competitive service; or

(2) A permanent position in Schedule Policy/Career, if the position is a career position described in § 213.3601(a) of this chapter and the conversion is authorized under this part and any applicable OPM policy or guidance. A noncompetitive conversion to a permanent position is subject to review by OPM.

(b) *Competitive service term appointment.* A Pathways Participant who is noncompetitively converted to a competitive service term appointment may be subsequently converted noncompetitively to a permanent competitive service position.

- (c) *Noncompetitive conversion.*

(1) An Intern may be converted to a position within the employing agency or

any other agency within the Federal Government.

(2) A Recent Graduate may be converted to a position within the employing agency or any other agency within the Federal Government. Conversion to a position at a different agency is subject to § 362.305(c).

(d) *Reemployment-priority and career-transition programs.* The provisions of subparts B, F, and G of part 330 of this chapter do not apply to conversions made under this part.

(e) *Career tenure.* Time spent serving as a Pathways Participant counts toward career tenure when the individual is noncompetitively converted to a permanent position in the competitive service upon completion of the Pathways Program, with or without an intervening term appointment, and without a break in service of 1 day, as provided in § 315.201 of this chapter.

(f) *Competitive status, probationary periods, and trial periods.*

(1) A Pathways Participant converted to a career or career-conditional appointment in the competitive service under § 315.713 of this chapter acquires competitive status upon completion of the probationary period requirements in part 11 of this chapter.

(2) A Pathways Participant converted to a Schedule Policy/Career position under paragraph (a)(2) of this section is not required to serve a trial period under part 11 of this chapter and obtains competitive status after 2 years of continuing service in the Schedule Policy/Career position.

(g) *No entitlement.* Service in a Pathways Program confers no right to further employment in either the competitive or excepted service. An agency wishing to convert a Pathways Participant must execute the required actions to do so. Nothing in this section confers a right to conversion to Schedule Policy/Career, conversion to the competitive service, competitive status, career tenure, a career or career-conditional appointment, or future appointment to the competitive service.

■ 46. Amend § 362.109 by revising paragraph (c)(4) and adding paragraph (c)(5) to read as follows:

§ 362.109 Reporting requirements.

* * * * *

(c) * * *

(4) The number of Pathways Participants, per Program, converted to Schedule Policy/Career in the excepted service; and

(5) The number of Pathways Participants, per Program, who were separated.

■ 47. Add § 362.110 to read as follows:

§ 362.110 Governmentwide Pathways Leadership Development Program.

OPM may develop and administer a governmentwide Pathways Leadership Development Program under the Recent Graduates Program authority. The program may include formal training, career development, and rotational assignments across participating agencies. The program must be administered consistent with this part, including the eligibility, appointment, participant agreement, performance, completion, and conversion requirements applicable to Recent Graduates. Responsibilities assigned to participants shall be consistent with the participant's qualifications, skills, competencies, career interests, agency needs, and the broader leadership development purpose of the program. OPM may issue implementing instructions governing the number of participants, participant selection, agency participation, training, rotations, certification of completion, and conversion review. Program Participants may be hired by agencies using the excepted service appointing authority provided by § 213.3402(b) of this chapter.

Subpart B—Internship Program

■ 48. Amend § 362.203 by revising paragraph (g)(4) to read as follows:

§ 362.203 Filling positions.

* * * * *

(g) * * *

(4) Requirements for noncompetitive conversion to a term or permanent position in the competitive service, or to a permanent Schedule Policy/Career position when authorized under § 362.107, are understood by all parties.

* * * * *

■ 49. Amend § 362.204 by revising the section heading and paragraphs (a), (b)(4), and (b)(5) to read as follows:

§ 362.204 Conversion to the competitive service or Schedule Policy/Career.

(a) An agency may noncompetitively convert an Intern who is a U.S. citizen to a term or permanent appointment in the competitive service or to a permanent appointment in Schedule Policy/Career under § 362.107.

(b) * * *

(4) Met the qualification standards for the position to which the Intern will be converted; and

(5) Met agency-specific requirements as specified in the agency's Participant Agreement with the Intern.

* * * * *

Subpart C—Recent Graduates Program

■ 50. Amend § 362.303 by revising paragraphs (b)(3)(i) through (iii) to read as follows:

§ 362.303 Filling positions.

* * * * *

(b) * * *

(3) * * *

(i) An agency may make an initial appointment of a Recent Graduate to any position filled under the authority in this section for which the Recent Graduate qualifies, up to the GS-11 level (or equivalent under another pay and classification system, such as the Federal Wage System), except as provided in paragraph (b)(3)(ii) of this section.

(ii) Initial appointments may be made to scientific and professional research positions at the GS-12 level for which the classification and qualification criteria for research positions apply, if the candidate possesses a Ph.D. or equivalent degree directly related to the position the agency is seeking to fill.

(iii) Positions must have progressively more responsible duties that provide career advancement opportunities (*i.e.*, positions must provide for career ladder advancement).

* * * * *

■ 51. Amend § 362.304 by revising paragraphs (d) and (e) to read as follows:

§ 362.304 Movement between agencies.

* * * * *

(d) Time served under the previous agency's Recent Graduates Program is credited toward the Program requirements for noncompetitive conversion eligibility to the competitive service or, when authorized under § 362.107, to Schedule Policy/Career. Because there is no break in service, the Recent Graduate does not begin a new period in the Program upon moving to the new agency.

(e) The new employing agency's plan must identify requirements for Program completion and eligibility for noncompetitive conversion to the competitive service or, when authorized under § 362.107, to Schedule Policy/Career.

■ 52. Revise § 362.305 to read as follows:

§ 362.305 Conversion to the competitive service or Schedule Policy/Career.

(a) An agency may noncompetitively convert a Recent Graduate who is a U.S. citizen to a competitive service term or permanent position or to a permanent Schedule Policy/Career position under § 362.107 when the Recent Graduate has:

(1) Successfully completed at least 1 year of continuous service in addition to all the requirements of the Recent Graduates Program;

(2) Demonstrated successful job performance consistent with the applicable performance appraisal program established under the agency's approved performance appraisal system that results in a rating of record (or summary rating) of at least fully successful or equivalent and a recommendation for conversion by the first-level supervisor (or in the case of a participant in an OPM-administered governmentwide Pathways Leadership Development Program under § 362.110, has been certified as successfully completing the Program by both OPM and the employing agency's Executive Resources Board); and

(3) Met the OPM Qualification Standard for the position to which the Recent Graduate will be converted.

(b) An agency must make the noncompetitive conversion effective on the date the service requirement is met, or at the end of an agency-approved extension, if applicable.

(c) A Recent Graduate may be converted to a permanent or term position in the competitive service, or to a permanent Schedule Policy/Career position when authorized under § 362.107, at a different agency when the following conditions are met:

(1) The employing (or losing) agency is unable to convert the Recent Graduate to a term or permanent position in the competitive service or a permanent position in the excepted service under Schedule Policy/Career in the current organizational unit of the employing agency or another component within the same Department or agency. The reasons for conversion at another agency may include unforeseen budgetary constraints; reorganizations; abolishment of positions; completion of cohort-based Pathways programs; or other appropriate reasons. Such a conversion to another agency may not be due to issues related to misconduct, poor performance, or suitability;

(2) Conversion must occur on or before the end of the prescribed Program period, plus any agency-approved extension; and

(3) The position at the new agency must have a full performance level that is equivalent to or lower than the position to which the Recent Graduate would have been converted at the prior agency.

PART 432—PERFORMANCE BASED REDUCTION IN GRADE AND REMOVAL ACTIONS

■ 53. The authority citation for part 432 is revised to read as follows:

Authority: 5 U.S.C. 4303, 4305; E.O. 14284, 90 FR 17729; E.O. 14317, 90 FR 34753.

■ 54. Amend § 432.102 by revising paragraph (f)(11) to read as follows:

§ 432.102 Coverage.

* * * * *

(f) * * *

(11) An employee occupying a position in Schedule C, Schedule G, or Schedule Policy/Career as authorized under part 213 of this chapter;

* * * * *

PART 550—PAY ADMINISTRATION (GENERAL)

Subpart G—Severance Pay

■ 55. The authority citation for subpart G of part 550 is revised to read as follows:

Authority: 5 U.S.C. 5595; E.O. 11257, 30 FR 14353, 3 CFR, 1964–1965 Comp., p. 357; E.O. 14317, 90 FR 34753; E.O. 14410, 91 FR 34893.

■ 56. Amend the definition of “Nonqualifying appointment” in § 550.703 by revising paragraph (e) to read as follows:

§ 550.703 Definitions.

* * * * *

Nonqualifying appointment * * *

(e) An excepted appointment under Schedule C or Schedule G; a noncareer appointment in the Senior Executive Service, as defined in 5 U.S.C. 3132(a); or an equivalent appointment made for similar purposes; and

* * * * *

PART 731—SUITABILITY AND FITNESS

■ 57. The authority citation for part 731 is revised to read as follows:

Authority: 5 U.S.C. 1103, 1302, 2301, 2302, 3301, 7301. E.O. 10577, 19 FR 7521, 3 CFR, 1954–1958 Comp., p. 218, as amended. E.O. 13467, 73 FR 38103, 3 CFR, 2009 Comp., p. 198, as amended. E.O. 13488, 74 FR 4111, 3 CFR, 2010 Comp., p. 189, as amended. E.O. 13764, 82 FR 8115, 3 CFR, 2017 Comp., p. 243. E.O. 14210, 90 FR 9669. Presidential Memorandum of January 31, 2014, 3 CFR, 2014 Comp., p. 340. Presidential Memorandum of March 20, 2025, 90 FR 13683. E.O. 14317, 90 FR 34753. 5 CFR parts 1, 2, 5, and 6.

■ 58. Amend § 731.101 by revising the definition of “Political appointment” in paragraph (a) to read as follows:

§ 731.101 Purpose.

(a) * * *

Political appointment means an appointment by Presidential nomination for confirmation by the Senate, an appointment by the President without Senate confirmation (except those appointed under 5 CFR 213.3102(c)); an appointment to a position compensated under the Executive Schedule (5 U.S.C. 5312 through 5316); an appointment of a White House Fellow to be assigned as an assistant to a top-level Federal officer (5 CFR 213.3102(z)); a Schedule C appointment (5 CFR 213.3301 and 213.3302); a Schedule G appointment (5 CFR 213.3701); a noncareer, limited term, or limited emergency Senior Executive Service appointment (5 CFR part 317, subpart F); an appointee to serve in a political capacity under agency-specific authority; and a provisional political appointment.

* * * * *

PART 920—TIMING OF CRIMINAL HISTORY INQUIRIES

■ 59. The authority citation for part 920 is revised to read as follows:

Authority: 5 U.S.C. 1103(a)(5)(A), 9201–9206; Pub. L. 116–92, sec. 1122(b)(1) (5 U.S.C. 9201 note); E.O. 14317, 90 FR 34753.

■ 60. Amend § 920.101 by revising the definition of “Political appointment” to read as follows:

§ 920.101 Definitions.

* * * * *

Political appointment means an appointment by the President without Senate confirmation (except those appointed under 5 CFR 213.3102(c)); an appointment to a position compensated under the Executive Schedule (5 U.S.C. 5312 through 5316); an appointment of a White House Fellow to be assigned as an assistant to a top-level Federal officer (5 CFR 213.3102(z)); a Schedule C appointment (5 CFR 213.3301, 213.3302); a Schedule G appointment (5 CFR 213.3701); a noncareer, limited term, or limited emergency Senior Executive Service appointment (5 CFR part 317, subpart F); an appointee to serve in a political capacity under agency-specific authority; and a provisional political appointment.

* * * * *

PART 930—PROGRAMS FOR SPECIFIC POSITIONS AND EXAMINATIONS (MISCELLANEOUS)

Subpart B—Administrative Law Judge Program

■ 61. The authority citation for subpart B is revised to read as follows:

Authority: 5 U.S.C. 1104(a), 1302(a), 1305, 3105, 3301, 3304, 3323(b), 3344, 4301(2)(D), 5372, and 7521; E.O. 10577, 19 FR 7521, 3 CFR, 1954–1958 Comp., p. 218; E.O. 13843, 83 FR 32755, 3 CFR, 2018 Comp., p. 844; E.O. 14410, 91 FR 34893.

■ 62. Amend § 930.201 by revising paragraphs (b), (d), and (e)(1), removing paragraph (e)(9), and redesignating paragraphs (e)(10) and (e)(11) as paragraphs (e)(9) and (e)(10), respectively. The revisions read as follows:

§ 930.201 Coverage.

* * * * *

(b) Administrative law judge positions appointed under 5 U.S.C. 3105 are in Schedule E of the excepted service, except that an administrative law judge whose competitive-service status is preserved under § 6.8(d) of this chapter remains in the competitive service for as long as that status is preserved under that section. Except as otherwise stated in this subpart or other applicable law or regulation, the rules and regulations applicable to administrative law judge positions apply without regard to whether the position is in Schedule E or whether the incumbent retains preserved competitive-service status.

* * * * *

(d) OPM may prescribe qualification, assessment, documentation, or other requirements for appointment to administrative law judge positions as necessary to administer this subpart, § 213.3501 of this chapter, and applicable statutes and Executive orders. OPM is not required to administer a competitive examination or to prescribe a competitive examination methodology for appointments to administrative law judge positions made under Schedule E.

(e) * * *

(1) Establish qualification standards, assessment requirements, documentation requirements, and other appointment-related requirements for administrative law judge positions under 5 U.S.C. 3105, § 213.3501 of this chapter, and this subpart B, including any requirements necessary to determine whether an individual meets the minimum appointment requirements for an administrative law judge position;

* * * * *

■ 63. Remove and reserve § 930.203.

§ 930.203 [Reserved]

■ 64. Amend § 930.204 by revising paragraphs (a), (c), (e), and (g) to read as follows:

§ 930.204 Appointments and conditions of employment.

(a) *Appointment.* An agency may appoint an individual to an administrative law judge position only under Schedule E in accordance with § 213.3501 of this chapter, this subpart, and any applicable OPM policy or guidance. An appointment under this paragraph is subject to investigation, and an administrative law judge is subject to the suitability requirements in part 731 of this chapter, as applicable. An individual appointed to an administrative law judge position under Schedule E is not subject to a trial period under part 11 of this chapter.

* * * * *

(c) *Appointment of incumbents of newly classified administrative law judge positions.* An agency may appoint an incumbent employee to an administrative law judge position under Schedule E if the employee is serving in the position when it is classified as an administrative law judge position on the basis of legislation, Executive order, or a decision of a court and if—

(1) The employee is serving under a permanent appointment in the competitive service or excepted service;

(2) The employee is serving in the position on the day the legislation, Executive order, or decision of the court on which the classification of the position is based becomes effective;

(3) OPM receives a recommendation for the employee's appointment from the agency concerned; and

(4) OPM determines the employee meets the qualification requirements and minimum appointment requirements for an administrative law judge position, including the professional license requirement in paragraph (b) of this section and § 6.3(b) of this chapter.

* * * * *

(e) *Promotion.*

(1) Part 335 of this chapter does not apply to the promotion of administrative law judges appointed under Schedule E. Promotion of an administrative law judge appointed under Schedule E is governed by this subpart, § 213.3501 of this chapter, and applicable OPM policy or guidance.

(2) To reclassify an administrative law judge position at a higher level, the agency must submit a request to OPM. When OPM approves the higher-level classification, OPM will direct the promotion of the administrative law judge occupying the position prior to the reclassification.

(3) For an administrative law judge whose competitive-service status is preserved under § 6.8(d) of this chapter,

promotion remains subject to this subpart and applicable OPM direction. Part 335 of this chapter applies only to the extent OPM determines it remains applicable to the preserved competitive-service status and is not inconsistent with this subpart, § 213.3501 of this chapter, or applicable Executive orders.

* * * * *

(g) *Reinstatement or reappointment.* Subject to OPM approval, an agency may reinstate or reappoint a former administrative law judge who served under 5 U.S.C. 3105 if the individual meets the qualification requirements and minimum appointment requirements for an administrative law judge position, including the professional license requirement in paragraph (b) of this section and § 6.3(b) of this chapter. A reinstatement or reappointment under this paragraph must be made under Schedule E unless the individual is otherwise entitled by law or regulation to preserved competitive-service status.

* * * * *

■ 65. Amend § 930.205 by revising paragraph (b) to read as follows:

§ 930.205 Administrative law judge pay system.

* * * * *

(b) Pay level AL–3 is the basic pay level for administrative law judge positions, except for positions placed at pay levels AL–2 or AL–1 with OPM approval under paragraph (c) of this section.

* * * * *

■ 66. Revise § 930.210 to read as follows:

§ 930.210 Reduction in force.

(a) *Application of reduction in force regulations.*

(1) Except as modified by this section, the reduction in force regulations in part 351 of this chapter apply to administrative law judges.

(2) An administrative law judge appointed under Schedule E on or after July 10, 2018, is in the excepted service and, if otherwise covered by part 351 of this chapter, is a competing employee in the excepted service tenure group.

(3) An administrative law judge whose competitive-service status is preserved under § 6.8(d) of this chapter remains in the competitive service for reduction in force purposes for as long as that status is preserved under § 6.8(d).

(b) *Determination of retention standing.*

(1) An agency must determine the retention standing of administrative law judges in accordance with part 351 of this chapter, as modified by this section.

(2) Administrative law judges in the competitive service under § 6.8(d) of this chapter must be listed on a competitive-service retention register. Administrative law judges in Schedule E must be listed on an excepted-service retention register.

(3) Because an agency may not rate the job performance of an administrative law judge under § 930.206, an agency may not assign, prepare, or use an administrative law judge performance rating for reduction in force purposes. The agency must determine the administrative law judge's performance credit in accordance with the rules in part 351 of this chapter governing employees who do not have ratings of record.

(c) Assignment rights.

(1) An agency may, in its discretion, provide assignment rights to administrative law judges in Schedule E in accordance with § 351.705 of this chapter, under written agency procedures that are uniformly and consistently applied in the reduction in force.

(2) If an agency adopts assignment rights for Schedule E administrative law judges under § 351.705 of this chapter, any assignment right must be limited to positions under the same appointing authority and must otherwise comply with part 351 of this chapter and this subpart.

(3) If an agency does not adopt assignment rights for Schedule E administrative law judges under § 351.705 of this chapter, the agency may release a Schedule E administrative law judge from the competitive level in accordance with the order of release under part 351 of this chapter without offering assignment to another position.

(4) An administrative law judge whose competitive-service status is preserved under § 6.8(d) of this chapter is subject to the competitive-service assignment right provisions in § 351.701 of this chapter while that competitive-service status remains preserved. Nothing in this section requires an agency to assign a competitive-service administrative law judge to a Schedule E position or to preserve competitive-service status in a position where such status is not preserved under § 6.8(d) of this chapter.

(d) Placement assistance.

(1) An administrative law judge in the competitive service who is reached in an agency's reduction in force and receives a notification of separation is eligible for placement assistance under the agency's reemployment priority list established and maintained in accordance with subpart B of part 330 of this chapter.

(2) A Schedule E administrative law judge who is separated, furloughed, or demoted by reduction in force does not, solely by virtue of service in a Schedule E administrative law judge position or appointment under 5 U.S.C. 3105, have a statutory entitlement to priority consideration, priority referral, or reemployment as an administrative law judge.

(3) Nothing in this section limits any restoration, reemployment, placement, or priority-consideration right that an individual may have under 5 U.S.C. 8151, part 353 of this chapter, 5 U.S.C. 3315, 5 U.S.C. 3320, the Uniformed Services Employment and Reemployment Rights Act, a final order, or another applicable statute, regulation, or binding legal authority.

(4) OPM or an agency may establish discretionary placement-assistance procedures for administrative law judges separated, furloughed, or demoted by reduction in force. Any discretionary placement-assistance procedure must be in writing and must state its coverage, duration, order of consideration, geographic scope, qualification requirements, and any conditions for termination of eligibility. A discretionary placement-assistance procedure does not create a statutory entitlement to priority consideration, priority referral, or reemployment.

■ 67. Amend § 930.211 by revising paragraph (c) introductory text and paragraph (c)(3) to read as follows:

§ 930.211 Actions against administrative law judges.

* * * * *

(c) Exceptions from procedures. This section does not apply—

* * * * *

(3) To reduction in force actions taken under 5 U.S.C. 3502, part 351 of this chapter, and § 930.210; or

* * * * *

BILLING CODE 6325–39–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

RIN 0648–BN92

Coral, Coral Reefs, and Live/ Hardbottom Habitats of the South Atlantic and the Shrimp Fishery of the South Atlantic Region; Amendments 11/12

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and

Atmospheric Administration (NOAA), Commerce.

ACTION: Announcement of availability of fishery management plan amendments; request for comments.

SUMMARY: The South Atlantic Fishery Management Council (Council) has submitted Amendment 11 to the Fishery Management Plan for Coral, Coral Reefs, and Live/Hardbottom Habitats of the South Atlantic (Coral FMP) and Amendment 12 to the Fishery Management Plan for the Shrimp Fishery of the South Atlantic Region (Shrimp FMP; jointly Amendments 11/12) for review, approval, and implementation by NMFS. If approved, Amendments 11/12 would establish a shrimp fishery access area (SFAA) along the eastern boundary of the northern extension of the Oculina Bank Habitat Area of Particular Concern (OHAPC) where trawling for rock shrimp is currently prohibited. The purpose of Amendments 11/12 is to reinstate access to historic rock shrimp fishing grounds, achieve optimum yield (OY) in the rock shrimp fishery, while minimizing impacts to deep-water corals in the OHAPC.

DATES: Written comments on Amendments 11/12 must be received on or before November 17, 2026.

ADDRESSES: A plain language summary of Amendments 11/12 is available at <https://www.regulations.gov/docket/NOAA-NMFS-2026-1750>. You may submit comments on this document, identified by NOAA–NMFS–2026–1750, by either of the following methods:

- **Electronic Submission:** Submit comments electronically via the Federal e-Rulemaking Portal. Visit <https://www.regulations.gov> and type NOAA–NMFS–2026–1750 in the Search box. Click on the “Comment” icon, complete the required fields, and enter or attach your comments.

- **Mail:** Send written comments to Rick DeVactor, NMFS Southeast Regional Office, 263 13th Avenue South, St. Petersburg, FL 33701.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period may not be considered by NMFS. All comments received are part of the public record and will generally be posted for public viewing on <https://www.regulations.gov> without change. All personal identifying information (e.g., name, address) confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments; enter “N/

A" in the required fields if you wish to remain anonymous.

An electronic copy of Amendments 11/12 is available from <https://www.regulations.gov> or from the Southeast Regional Office website at: <https://www.fisheries.noaa.gov/action/coral-amendment-11-shrimp-amendment-12-establish-shrimp-fishery-access-area>. Amendments 11/12 include an environmental assessment, a Regulatory Flexibility Act analysis, regulatory impact review, and fishery impact statement.

FOR FURTHER INFORMATION CONTACT:

Karla Gore, NMFS Southeast Regional Office, 727-824-5305, or Karla.Gore@noaa.gov.

SUPPLEMENTARY INFORMATION: NMFS manages the coral and shrimp fisheries in Federal waters of the U.S. South Atlantic. The shrimp fishery in the South Atlantic region is managed under the Shrimp FMP. Coral, coral reefs, and live/hardbottom habitats of the South Atlantic region are managed under the Coral FMP. These FMPs were prepared by NMFS and the Council, and are implemented by NMFS through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The Magnuson-Stevens Act requires each regional fishery management council to submit any FMP or FMP amendment to the Secretary for review and approval, partial approval, or disapproval. The Magnuson-Stevens Act also requires that NMFS, upon receiving an FMP or FMP amendment, publish an announcement in the **Federal Register** notifying the public that the FMP or amendment is available for review and comment.

Background

In 1984, NMFS published the final rule to implement the designation of a 92-square-nautical-mile (NM²) portion of the Oculina Bank as the OHAPC (49 FR 29607, July 23, 1984) to protect a unique coral reef ecosystem of *Oculina varicosa* (ivory tree coral) found off the east coast of Florida (49 FR 29607, July 23, 1984). A habitat area of particular concern (HAPC) is a subset of Essential Fish Habitat (EFH) that is prioritized for conservation and management because it is ecologically important, particularly susceptible to human-induced environmental degradation, or rare. The OHAPC meets these HAPC criteria due to its high biodiversity by supporting over 70 species of fish and hundreds of species of invertebrates as well as the presence of slow-growing coral pinnacles. As part of the OHAPC

designation there is a prohibition on the use of bottom trawls, bottom longlines, dredges, traps, and pots within the OHAPC to mitigate the risk of damage by fishing gear to *Oculina* coral. Additionally, anchoring by all fishing vessels is prohibited within the area to prevent physical impact to the coral structures.

In 2000, the size of the OHAPC was expanded through Amendment 4 to the Coral FMP (65 FR 37292, June 14, 2000). In 2014, the OHAPC boundary was extended northward through Amendment 8 to the Coral FMP (Coral Amendment 8; 80 FR 42423, July 17, 2015). The proposed SFAA in Amendments 11/12 is located within the OHAPC area that was implemented through Coral Amendment 8.

Amendment 5 to the Shrimp FMP first required the use of vessel monitoring system (VMS) by vessels allowed to fish for rock shrimp in the commercial rock shrimp limited-access permit program (68 FR 2188, January 16, 2003). In addition, Amendment 8 to the Coral FMP allowed fishermen to transit the OHAPC, with an increased VMS ping rate of 1 ping per five minutes during the transit time (80 FR 42423, July 17, 2015). Current regulations require the use of a NMFS-approved VMS for an owner or operator with a commercial vessel permit for South Atlantic rock shrimp in South Atlantic Federal waters.

During the development of Amendment 8, some participants within the rock shrimp industry noted to the Council that a narrow portion of the expanded OHAPC along the eastern boundary was a historically important rock shrimp fishing ground. Although the use of this area by the rock shrimp fleet is variable and depends on environmental conditions, industry representatives maintained that access to this narrow strip is critical for the economic viability of the fleet during periods when rock shrimp follow the Gulf Stream to the offshore side of the reef. Rock shrimp fishermen requested adjustment of the proposed OHAPC boundary expansion in Amendment 8 and provided coordinates for their important fishing grounds in the area proposed for the expansion of the OHAPC. Because this request from industry happened late in the development of Coral Amendment 8, the Council determined that it did not have sufficient time to evaluate the request, given concerns that included verification of the provided coordinates, as well as data on effort and yield of historic rock shrimp fishing in the proposed area. Therefore, it was decided not to change the proposed expansion of

the OHAPC boundary contained in Coral Amendment 8, but instead to consider the fishermen's request of a possible OHAPC boundary adjustment through a new amendment to the Coral FMP.

In June 2020, the Council recommended the development of Amendment 10 to the Coral FMP (Coral Amendment 10) to consider options to create a SFAA in the OHAPC that would allow rock shrimp access to a historical fishing area. That action aligned with the Presidential Executive Order (E.O.) on Seafood Competitiveness and Economic Growth to "reduce burdens on domestic fishing and to increase production within sustainable fisheries" for commercial fishermen who have lost access to areas that had been traditionally fished (E.O. 13921; 85 FR 28471, May 12, 2020). As discussed in Coral Amendment 10, the rock shrimp portion of the shrimp fishery has been consistently operating well below OY and maximum sustainable yield levels. The purpose of Coral Amendment 10 was to increase the economic and social benefits to rock shrimp fishermen by allowing access to historic rock shrimp fishing grounds.

The Council recommended approval of Coral Amendment 10 at its September 2021 meeting and submitted it to NMFS for Secretarial review in December 2021. On July 28, 2022, NMFS, on behalf of the Secretary of Commerce, disapproved Coral Amendment 10. Specifically, NMFS determined that Coral Amendment 10 and supporting analyses did not adequately demonstrate how the proposed action was consistent with section 303(a)(7) of the Magnuson-Stevens Act, which requires FMPs to minimize to the extent practicable, the adverse effects of fishing on EFH, and the goals and objectives of the Coral FMP, specifically in regard to protection of EFH. Additionally, NMFS determined that Coral Amendment 10 did not demonstrate consistency with section 301(a)(9) of the Magnuson-Stevens Act, which requires fishery conservation and management measures to minimize bycatch to the extent practicable and, to the extent bycatch cannot be avoided, minimize the mortality of such bycatch. The Magnuson-Stevens Act allows a Council to submit a revised amendment that addresses any identified deficiencies.

The Council developed Amendments 11/12 to address the deficiencies identified in Coral Amendment 10. Amendments 11/12 incorporate updated scientific data and analysis as well as amending the Shrimp FMP to address the need to achieve OY in the rock shrimp fishery.

While Coral Amendment 10 originally proposed changes only to the Coral FMP, Amendments 11/12 amend the Shrimp FMP as well to properly manage the rock shrimp fishery's access to the proposed SFAA and to ensure that fishery specific objectives, such as optimizing yield and protecting the interests of traditional users in the rock shrimp fishery. Furthermore, amending both the Coral and the Shrimp FMPs ensures that the action to create an SFAA remains consistent with the objectives of the Coral FMP to optimize the benefits generated from coral resources while conserving the coral and minimizing adverse human impacts on sensitive habitat.

The Council's Deep-water Shrimp Advisory Panel (AP) supported the creation of an SFAA noting that shrimpers are experienced professionals who use high-resolution navigation and VMS to avoid sensitive habitat. The Deep-water Shrimp AP also noted that the area of the proposed SFAA has a history of trawling for rock shrimp and that the industry relies on a healthy reef ecosystem to support the shrimp population. However, the Coral AP and the Habitat and Ecosystem AP both expressed concern with the proposed SFAA and noted the risk of indirect damage of rock shrimp trawling within the OHAPC from sedimentation plumes, stating that fine particles stirred up by trawling can travel considerable distances and potentially smother coral polyps or larvae.

During the development of Amendments 11/12, these conflicting AP viewpoints on Amendment 10 were considered by the Council because the coordinates for the SFAA proposed by Amendment 10 and Amendments 11/12 are identical. The Council ultimately recommended the implementation of the SFAA, which is supported by new survey data and ongoing VMS monitoring, finding that it provides the best balance between historical rock shrimp fishing access and habitat protection. The boundary of the proposed SFAA also includes a buffer between it and known *Oculina* coral pinnacles to aid in decreasing potential sedimentation impacts from bottom trawling. Amendments 11/12 address the deficiencies of Coral Amendment 10 through inclusion of recent scientific surveys in the OHAPC and analysis on EFH, bycatch and habitat impacts as well as how the proposed action meet the objectives of the FMPs. Two new surveys are incorporated into the record in Amendments 11/12. In 2022, a NMFS Southeast Fisheries Science Center visual survey using a towed camera system covered approximately 35

kilometers over an area that included the proposed SFAA and found no evidence of live, dead, or rubble *Oculina* coral within the proposed SFAA. Additionally, in April 2025, the NOAA Ship Nancy Foster completed a high-resolution acoustic mapping expedition that included the area of the proposed SFAA. This mapping data confirms that the proposed SFAA consists of low-relief sandy and muddy bottoms, lacking the high-relief mounds required to support *Oculina* colonies.

As part of Amendments 11/12, a bycatch practicability analysis (BPA) was developed to identify bycatch and habitat impacts that were not described in Coral Amendment 10. The BPA reviews rock shrimp fishery observer data from 2018 through 2022 and documents that bycatch in the rock shrimp fishery is primarily composed of non-managed invertebrates. The occurrence of South Atlantic snapper-grouper species managed by the Council and NMFS is negligible in any bycatch from the rock shrimp fishery. The BPA also addresses the risk of sedimentation on deep-water coral pinnacles. Based on the location of the proposed SFAA which is approximately 360 to 1,580 meters away from known coral pinnacles and the oceanographic currents in the area, this buffer is expected to minimize the risk of sedimentation plumes impacts to habitat to the extent practicable. The BPA also concludes the use of specialized gear (Turtle Excluder Devices and Bycatch Reduction Devices), which combined with the sandy and muddy-bottom location of the SFAA, effectively minimizes bycatch mortality.

Action Contained in Amendments 11/12

Amendments 11/12 would establish an approximately 14.10 NM² SFAA along the eastern boundary of the northern extension of the OHAPC, in an area where fishing for rock shrimp is currently prohibited. Within the proposed SFAA, a shrimp vessel with a valid Federal limited access commercial vessel permit for rock shrimp would be allowed to bottom trawl for rock shrimp. All other existing restrictions in the OHAPC, including the prohibitions on anchoring and the use of bottom longline, dredge, pot, or trap gear, would continue to apply in the proposed SFAA (50 CFR 622.224(b)(1)(i)). Current regulations which require the use of a NMFS-approved VMS on a vessel for an owner or operator with a limited access endorsement for South Atlantic rock shrimp or a commercial vessel permit for rock shrimp in the South Atlantic

Federal waters would remain unchanged in the OHAPC and the proposed SFAA. Vessels are required to maintain a VMS transmission rate of 1 position per 5 minutes when transiting through both area or fishing in the SFAA (50 CFR 622.205 and 50 CFR 622.224(b)(1)(i)(C)). The current transmission rate is considered effective in monitoring fishing activity within and near the OHAPC. Amendments 11/12 would also not change the current transit provisions for rock shrimp vessels within the OHAPC. Under these provisions, transit means a direct and non-stop continuous course through the area, maintaining a minimum speed of 5 knots as determined by an operating VMS and a VMS minimum ping rate of one ping per 5 minutes; fishing gear appropriately stowed means that doors and nets are out of the water (50 CFR 622.224(b)(1)(i)(C)).

Proposed Rule for Amendments 11/12

A proposed rule to implement Amendments 11/12 has been drafted. In accordance with the Magnuson-Stevens Act, NMFS is evaluating the proposed rule to determine whether it is consistent with the FMPs, the Magnuson-Stevens Act, and other applicable law. If that determination is affirmative, NMFS will publish the proposed rule in the **Federal Register** for public review and comment.

Consideration of Public Comments

The Council submitted Amendments 11/12 for review, approval, and implementation by the Secretary. Comments on Amendments 11/12 must be received no later than November 17, 2026. Comments received during the respective comment periods, whether specifically directed to Amendments 11/12 or the proposed rule, will be considered by NMFS in the decision to approve, partially approve, or disapprove, Amendments 11/12. Comments received after the comment periods will not be considered by NMFS in this decision. All comments received by NMFS on Amendments 11/12 or the proposed rule during their respective comment periods will be addressed in the final rule.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 15, 2026.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Doc. No. AMS–SC–26–1255]

Oranges, Grapefruit, Tangerines, and Pummelos Grown in Florida; Continuance Referendum

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Referendum order.

SUMMARY: This document directs that a referendum be conducted among eligible Florida citrus producers to determine whether they favor continuance of the marketing order regulating the handling of oranges, grapefruit, tangerines, and pummelos produced in Florida.

DATES: The referendum will be conducted from October 19 through November 9, 2026. Only current Florida citrus producers within the production area that produced oranges, grapefruit, tangerines, or pummelos for the fresh market during the period of August 1, 2025, through July 31, 2026, are eligible to vote in this referendum. Ballots delivered to AMS via U.S. mail or electronic ballot must show proof of delivery by no later than 11:59 p.m. Eastern Time on November 9, 2026, to be included in the vote tabulation.

ADDRESSES: Copies of the marketing order may be obtained from the office of the referendum agents at Southeast Region Branch, Market Development Division, Specialty Crops Program, AMS, USDA, 1124 1st Street South, Winter Haven, FL 33880; telephone: (863) 324–3375; or from the Docket Clerk, Market Development Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW, STOP 0237, Washington, DC 20250–0237; telephone (202) 720–8085; or on the internet: <https://www.ecfr.gov/current/title-7/subtitle-B/chapter-IX/part-905>.

FOR FURTHER INFORMATION CONTACT:

Jennie M. Varela, Marketing Specialist, or Christian D. Nissen, Branch Chief, Southeast Region Branch, Market Development Division, Specialty Crops Program, AMS, USDA, 1124 1st Street South, Winter Haven, FL 33880; telephone: (863) 324–3375; or email: Jennie.Varela@usda.gov or Christian.Nissen@usda.gov.

SUPPLEMENTARY INFORMATION: Pursuant to Marketing Order No. 905, as amended (7 CFR part 905; the Order), and the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674) (the Act), it is hereby directed that a referendum be conducted to ascertain whether continuance of the Order is favored by fresh citrus producers. The referendum will be conducted from October 19 through November 9, 2026, among Florida fresh citrus producers in the Order's production area. Only current Florida citrus producers engaged in the production of oranges, grapefruit, tangerines, or pummelos for the fresh market during the period of August 1, 2025, through July 31, 2026, may participate in the continuance referendum.

USDA has determined that continuance referenda are an effective means for determining whether producers favor the continuation of marketing order programs. In accordance with § 905.83(c), USDA must conduct a referendum every six years. USDA would consider termination of the Order if less than two-thirds of the producers voting in the referendum, and less than two-thirds of the citrus volume represented in the referendum, vote in favor of continuance. In evaluating the merits of continuance versus termination, USDA will not exclusively consider the results of the continuance referendum. USDA will also consider all other relevant information concerning the operation of the Order and relative benefits and costs to producers, handlers, and consumers to determine whether continued operation of the Order would tend to effectuate the declared policy of the Act.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the ballot materials used in the referendum have been approved by the Office of Management and Budget (OMB) and have been assigned OMB No. 0581–0189, Fruit Crops. It has been

estimated it will take an average of 20 minutes for each of the approximately 200 citrus producers to cast a ballot. Participation is voluntary. Ballots delivered to AMS via U.S. mail or electronic ballot must show proof of delivery by no later than 11:59 p.m. Eastern Time on November 9, 2026, to be included in the vote tabulation.

Delaney Fuhrmeister, Rebecca Geller, Steven Kauffman, Christian Nissen, and Jennie Varela of the Southeast Region Branch, Market Development Division, Specialty Crops Program, AMS, USDA, are hereby designated as the referendum agents of the Secretary of Agriculture to conduct this referendum. The procedure applicable to the referendum shall be the "Procedure for the Conduct of Referenda in Connection with Marketing Orders for Fruits, Vegetables, and Nuts Pursuant to the Agricultural Marketing Agreement Act of 1937, as Amended" (7 CFR part 900.400 *et seq.*).

Ballots and voting instructions will be sent by U.S. mail or through electronic mail to all Florida citrus producers of record and may also be obtained from the referendum agents or their appointees.

(Authority: 7 U.S.C. 601–674.)

Erin Morris

Administrator, Agricultural Marketing Service.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to

respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by October 19, 2026 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Animal Plant and Health Inspection Service

Title: Emergency Management Response System (EMRS).

OMB Control Number: 0579–0071.

Summary of Collection: The Animal Health Protection Act (AHPA) of 2002 is the primary Federal law governing the protection of animal health. The law gives the Secretary of Agriculture broad authority to detect, control, or eradicate pests or diseases of livestock or poultry. The Secretary may also prohibit or restrict import or export of any animal or related material if necessary to prevent the spread of any livestock or poultry pest or disease. Through the Foreign Animal Disease Surveillance Program, the Animal and Plant Health Inspection Service (APHIS) Veterinary Services compiles essential epidemiological and diagnostic data that are used to define foreign animal diseases (FAD) and their risk factors. The data is compiled through the Veterinary Services Emergency Management Response System, a web-based database for reporting investigations of suspected FAD occurrences.

Need and Use of the Information: APHIS collects information such as the purpose of the diagnostician’s visit to the site, the name and address of the owner/manager and the site, the type of operation being investigated, the number of and type of animals on the premises, vaccination information on the animals in the herd or flock, biosecurity practices at the site, whether

any animals have been moved to or from the premises and when this movement occurred, number of sick or dead animals, the results of physical examinations of the affected animals, the results of postmortem examinations, and the number and kinds of samples taken, and the name of the suspected disease.

APHIS uses the collected information to effectively prevent FAD occurrences and protect the health of the United States. Without the information, APHIS has no way to detect and monitor FAD outbreaks in the United States.

Description of Respondents: Businesses; and State, Local or Tribal Governments.

Number of Respondents: 158.

Frequency of Responses: Reporting, on occasion.

Total Burden Hours: 24,703.

Rachelle Ragland-Greene,
Departmental Information Collection
Clearance Officer.

Steel Concrete Reinforcing Bar From the Socialist Republic of Vietnam and Egypt: Countervailing Duty Orders

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: Based on affirmative final determinations by the U.S. Department of Commerce (Commerce) and the U.S. International Trade Commission (ITC), Commerce is issuing countervailing duty (CVD) orders on steel concrete reinforcing bar (rebar) from the Socialist Republic of Vietnam (Vietnam) and Egypt.

DATES: Applicable September 18, 2026

FOR FURTHER INFORMATION CONTACT: Erin Howard (Vietnam), at (202) 482–3453 and Lingjun Wang (Egypt) at (202) 482–2316, AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

In accordance with sections 705(d) and 777(i) of the Tariff Act of 1930 as amended (the Act) on July 30, 2026, Commerce published in the **Federal Register** its affirmative final

determinations in the countervailing duty investigations of rebar from Vietnam and Egypt.¹ On September 11, 2026, the ITC notified Commerce of its final affirmative determinations pursuant to sections 705(b)(1)(A)(i) and 705(d) of the Act, that an industry in the United States is materially injured by reason of subsidized imports of rebar from Vietnam and Egypt.²

Scope of the Orders

The product covered by these orders is rebar from Vietnam and Egypt. For a complete description of the scope of these orders, *see* the appendix to this notice.

Countervailing Duty Orders

Based on the above-referenced affirmative final determinations by the ITC that an industry in the United States is materially injured by reason of subsidized imports of rebar from Vietnam and Egypt, in accordance with sections 705(c)(2) and 706(a) of the Act, Commerce is issuing these CVD orders. Because the ITC determined that imports of rebar from Vietnam and Egypt are materially injuring a U.S. industry, unliquidated entries of such merchandise entered, or withdrawn from warehouse, for consumption, are subject to the assessment of countervailing duties.

Therefore, in accordance with section 706(a)(1) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to assess, upon further instruction by Commerce, countervailing duties on unliquidated entries of rebar from Vietnam and Egypt. With the exception of entries occurring after the expiration of the provisional measures period and before the publication of the ITC’s final affirmative injury determinations, as further described below, countervailing duties will be assessed on unliquidated entries of rebar from Vietnam and Egypt entered, or withdrawn from warehouse, for consumption on or after January 13, 2026, the date of publication of the *Preliminary Determinations* in the **Federal Register**.³

¹ *See Steel Concrete Reinforcing Bar from the Socialist Republic of Vietnam: Final Affirmative Countervailing Duty Determination*, 91 FR 48074 (July 30, 2026), and *Steel Concrete Reinforcing Bar from Egypt: Final Affirmative Countervailing Duty Determination*, 91 FR 48068 (July 30, 2026).

² *See* ITC’s Letter, “Notification of the ITC Final Determinations,” dated September 11, 2026.

³ *See Steel Concrete Reinforcing Bar from the Socialist Republic of Vietnam: Preliminary Affirmative Countervailing Duty Determination and Alignment of Final Determination with Final Antidumping Duty Determination*, 91 FR 1265 (January 13, 2026); and *Steel Concrete Reinforcing Bar from Egypt: Preliminary Affirmative Countervailing Duty Determination, and Alignment*

Suspension of Liquidation and Cash Deposits

In accordance with section 706 of the Act, Commerce will instruct CBP to reinstitute the suspension of liquidation of rebar from Vietnam and Egypt, effective on the date of publication of the ITC's notice of final affirmative injury determination in the **Federal Register**, and to assess, upon further

instruction by Commerce, pursuant to section 706(a)(1) of the Act, countervailing duties on each entry of subject merchandise in an amount based on the net countervailable subsidy rates below. On or after the date of publication of the ITC's final injury determinations in the **Federal Register**, CBP must require, at the same time as importers would normally deposit estimated duties on this merchandise, a

cash deposit equal to the rates noted below. These instructions suspending liquidation will remain in effect until further notice.

Estimated Countervailable Subsidy Rates

The estimated countervailable subsidy rates are as follows; all-others rate applies to all producers or exporters not specifically listed below.

VIETNAM

Company	Subsidy rate (percent <i>ad valorem</i>)
Hoa Phat Group Joint Stock Company ⁴	6.80
All Others	6.80

EGYPT

Company	Subsidy rate (percent <i>ad valorem</i>)
Al-Ezz Dekheila Steel Alexandria Company (SAE); Ezz Steel Company S.A.E.; Ezz Rolling Mills Company (SAE); Al-Ezz Flat Steel Company (SAE); Contra Steel Co.; and Al-Ezz Group Holding Company for Industry & Investment (collectively, Ezz Group)	23.27
All Others	23.27

Provisional Measures

Section 703(d) of the Act states that the suspension of liquidation pursuant to an affirmative preliminary determination may not remain in effect for more than four months. In the underlying investigations, Commerce published the *Preliminary Determinations* on January 13, 2026.⁵ Therefore, entries of certain rebar from Vietnam and Egypt made on or after May 12, 2026, and prior to the date of publication of the ITC's final determinations in the **Federal Register**, are not subject to the assessment of countervailing duties due to Commerce's discontinuation of the suspension of liquidation.

In accordance with section 703(d) of the Act, Commerce instructed CBP to discontinue the suspension of liquidation of entries concerning these investigations effective May 13, 2026 (the date on which the provisional CVD measures expired), and intend to instruct CBP to liquidate, without regard

to countervailing duties, unliquidated entries concerning these investigations, or withdrawn from warehouse, for consumption on or after May 13, 2026, through the day preceding the date of publication of the ITC's affirmative final injury determinations in the **Federal Register**. Suspension of liquidation and the collection of cash deposits will resume on the date of publication of the ITC's affirmative final injury determinations in the **Federal Register**.

Establishment of the Annual Inquiry Service Lists

On September 20, 2021, Commerce published the *Final Rule* in the **Federal Register**.⁶ On September 27, 2021, Commerce also published the *Procedural Guidance* in the **Federal Register**.⁷ The *Final Rule* and *Procedural Guidance* provide that Commerce will maintain an annual inquiry service list for each order or suspended investigation, and any interested party submitting a scope

ruling application or request for circumvention inquiry shall serve a copy of the application or request on the persons on the annual inquiry service list for that order, as well as any companion order covering the same merchandise from the same country of origin.⁸

In accordance with the *Procedural Guidance*,⁹ for orders published in the **Federal Register** after November 4, 2021, Commerce will create an annual inquiry service list segment in Commerce's online e-filing and document management system, Antidumping and Countervailing Duty Electronic Service System (ACCESS), available at <https://access.trade.gov>, within five business days of publication of the notice of the order. Each annual inquiry service list will be saved in ACCESS, under each case number, and under a specific segment type called "AISL-Annual Inquiry Service List."¹⁰

Interested parties who wish to be added to the annual inquiry service list

⁴ of Final Determination with Final Antidumping Duty Determination, 91 FR 1263 (January 13, 2026), (collectively, *Preliminary Determinations*).

⁵ Commerce continues to find the following companies to be cross-owned with Hoa Phat Group Joint Stock Company: Hoa Phat Dung Quat Steel Joint Stock Company, Hoa Phat Hai Duong Steel Joint Stock Company, Hoa Phat Hung Yen Steel Limited Liability Company, Hoa Phat Energy Joint Stock Company, An Thong Mineral Investment Joint Stock Company, Hoa Phat Iron and Steel Joint Stock Company, Hoa Phat Metal Producing Company Limited, Hoa Phat Prestressed Concrete

One Member Limited Liability Company, and Hoa Phat Steel Products Joint Stock Company.

⁶ See *Preliminary Determinations*.

⁷ See *Regulations to Improve Administration and Enforcement of Antidumping and Countervailing Duty Laws*, 86 FR 52300 (September 20, 2021) (*Final Rule*).

⁸ See *Scope Ruling Application; Annual Inquiry Service List; and Informational Sessions*, 86 FR 53205 (September 27, 2021) (*Procedural Guidance*).

⁹ *Id.*

¹⁰ *Id.* at 53206.

¹⁰ This segment will be combined with the ACCESS Segment Specific Information (SSI) field which will display the month in which the notice of the order or suspended investigation was published in the **Federal Register**, also known as the anniversary month. For example, for an order under case number A-000-000 that was published in the **Federal Register** in January, the relevant segment and SSI combination will appear in ACCESS as "AISL-January Anniversary." Note that there will be only one annual inquiry service list segment per case number, and the anniversary month will be pre-populated in ACCESS.

for an order must submit an entry of appearance to the annual inquiry service list segment for the order in ACCESS within 30 days after the date of publication of the order. For ease of administration, Commerce requests that law firms with more than one attorney representing interested parties in an order designate a lead attorney to be included on the annual inquiry service list. Commerce will finalize the annual inquiry service list within five business days thereafter. As mentioned in the *Procedural Guidance*, the new annual inquiry service list will be in place until the following year, when the *Opportunity Notice* for the anniversary month of the order is published.

Commerce may update an annual inquiry service list at any time as needed based on interested parties' amendments to their entries of appearance to remove or otherwise modify their list of members and representatives, or to update contact information. Any changes or announcements pertaining to these procedures will be posted to the ACCESS website.

Special Instructions for Petitioners and Foreign Governments

In the *Final Rule*, Commerce stated that, "after an initial request and placement on the annual inquiry service list, both petitioners and foreign governments will automatically be placed on the annual inquiry service list in the years that follow."¹¹ Accordingly, as stated above, the petitioners and the Governments of Vietnam and Egypt should submit their initial entries of appearance after publication of this notice in order to appear in the first annual inquiry service list for those orders for which they qualify as an interested party. Pursuant to 19 CFR 351.225(n)(3), the petitioners and the Governments of Vietnam and Egypt will not need to resubmit their entries of appearance each year to continue to be included on the annual inquiry service list. However, the petitioners and the Governments of Vietnam and Egypt are responsible for making amendments to their entries of appearance during the annual update to the annual inquiry service list in accordance with the procedures described above.

Notification to Interested Parties

This notice constitutes the CVD orders with respect to rebar from Vietnam and Egypt. Pursuant to section 706(a) of the Act. Interested parties can find a list of CVD orders currently in

effect at <https://www.trade.gov/data-visualization/adcvd-proceedings>.

These CVD orders are published in accordance with section 706(a) of the Act and 19 CFR 351.211(b).

Dated: September 14, 2026.

Christopher Abbott,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix

Scope of the Orders

The merchandise subject to these orders is steel concrete reinforcing bar imported in either straight length or coil form (rebar) regardless of metallurgy, length, diameter, or grade or lack thereof.

The subject merchandise includes rebar that has been further processed in the subject countries or a third country, including but not limited to cutting, grinding, galvanizing, painting, coating, or any other processing that would not otherwise remove the merchandise from the scope of these orders if performed in the country of manufacture of the rebar.

Specifically excluded are plain rounds (*i.e.*, nondeformed or smooth rebar).

The subject merchandise is classifiable in the Harmonized Tariff Schedule of the United States (HTSUS) primarily under item numbers 7213.10.0000, 7214.20.0000, and 7228.30.8010. The subject merchandise may also enter under other HTSUS numbers including 7221.00.0017, 7221.00.0018, 7221.00.0030, 7221.00.0045, 7222.11.0001, 7222.11.0057, 7222.11.0059, 7222.30.0001, 7227.20.0080, 7227.90.6030, 7227.90.6035, 7227.90.6040, 7228.20.1000, and 7228.60.6000. HTSUS numbers are provided for convenience and customs purposes; however, the written description of the scope remains dispositive.

Steel Concrete Reinforcing Bar From Bulgaria, Egypt, and the Socialist Republic of Vietnam: Antidumping Duty Orders

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: Based on affirmative final determinations by the U.S. Department of Commerce (Commerce) and the U.S. International Trade Commission (ITC), Commerce is issuing the antidumping duty (AD) orders on steel concrete reinforcing bar (rebar) from Bulgaria, Egypt, and the Socialist Republic of Vietnam (Vietnam).

DATES: Applicable September 18, 2026.

FOR FURTHER INFORMATION CONTACT:

Hermes Pinilla (Bulgaria) at (202) 482–3477; Kate Fracke (Vietnam) at (202) 482–3299; or Anne Entz (Egypt) at (202) 482–3845, AD/CVD Operations, Offices I, III, and IX, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

On July 30, 2026, Commerce published its affirmative final determinations in the less-than-fair-value investigations of rebar from Bulgaria, Egypt, and Vietnam, in accordance with sections 735(d) and 777(i) of the Tariff Act of 1930, as amended (the Act).¹ On September 11, 2026, pursuant to section 735(d) of the Act, the ITC notified Commerce of its final affirmative determinations that an industry in the United States is materially injured within the meaning of section 735(b)(1)(A)(i) of the Act by reason of dumped imports of rebar from Bulgaria, Egypt, and Vietnam.²

Scope of the Orders

The products covered by these orders are rebar from Bulgaria, Egypt, and Vietnam. For a complete description of the scope of the orders, *see* the appendix to this notice.

AD Orders

Based on the above-referenced affirmative final determinations by the ITC, in accordance with sections 735(c)(2) and 736 of the Act, Commerce is issuing these AD orders. Because the ITC determined that an industry in the United States is materially injured by reason of imports of rebar from Bulgaria, Egypt, and Vietnam, unliquidated entries of such merchandise from the countries, entered or withdrawn from warehouse for consumption, are subject to the assessment of antidumping duties.

Therefore, in accordance with section 736(a)(1) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to assess, upon further instruction by Commerce, antidumping

¹ *See Steel Concrete Reinforcing Bar from Bulgaria: Final Affirmative Determination of Sales at Less Than Fair Value*, 91 FR 48084 (July 30, 2026); *see also Steel Concrete Reinforcing Bar From Egypt: Final Affirmative Determination of Sales at Less Than Fair Value*, 91 FR 48066 (July 30, 2026); and *Steel Concrete Reinforcing Bar From the Socialist Republic of Vietnam: Final Affirmative Determination of Sales at Less Than Fair Value*, 91 FR 48063 (July 30, 2026).

² *See* ITC's Letter, "Notification of ITC Final Determination," dated September 11, 2026.

¹¹ *See Final Rule*, 86 FR at 52335.

duties equal to the amount by which the normal value of the merchandise exceeds the export price (or constructed export price) of the merchandise on all relevant entries of rebar from Bulgaria, Egypt, and Vietnam. Antidumping duties will be assessed on unliquidated entries of rebar from Bulgaria, Egypt, and Vietnam entered, or withdrawn from warehouse, for consumption on or after March 13, 2026, the date of publication of the *Preliminary Determinations*,³ but will not include entries occurring after the expiration of the provisional measures period and before publication of the ITC's final injury determination under section 735(b) of the Act, as further described in

the "Provisional Measures" section of this notice below.

Continuation of Suspension of Liquidation and Cash Deposits

Except as noted in the "Provisional Measures" section of this notice, in accordance with sections 735(c)(1)(B) and 736 of the Act, Commerce intends to instruct CBP to continue to the suspend liquidation on all relevant entries of rebar from Bulgaria, Egypt, and Vietnam. These instructions suspending liquidation will remain in effect until further notice.

Commerce also intends to instruct CBP to require cash deposits equal to the estimated weighted-average dumping margins indicated in the tables

below, adjusted by the relevant export subsidy offsets for Vietnam.⁴ Effective on the date of publication in the **Federal Register** of the notice of the ITC's final affirmative injury determination, CBP will require, at the same time as importers would normally deposit estimated customs duties on subject merchandise, a cash deposit equal to the rates listed in the tables below. The all-others rates apply to all producers or exporters not specifically listed, as appropriate.

Estimated Weighted-Average Dumping Margins

The estimated weighted-average dumping margins are as follows:

BULGARIA

Exporter/producer	Weighted-average dumping margin (percent)
Promet Steel JSC	53.27
All Others	53.27

EGYPT

Exporter/producer	Weighted-average dumping margin (percent)
Al-Ezz Dekheila Steel Alexandria Company S.A.E.; Ezz Steel Company S.A.E.; Ezz Rolling Mills Company S.A.E.; and Al-Ezz Flat Steel Company S.A.E	34.20
El Marakby Steel	* 52.73
Suez Steel Company	* 52.73
All Others	34.20

* Rate based on facts available with adverse inferences.

VIETNAM

Producer	Exporter	Weighted-average dumping margin (percent)	Cash deposit rate (adjusted for subsidy offsets (percent))
Hoa Phat Dung Quat Steel Joint Stock Company; Hoa Phat Hai Duong Steel Joint Stock Company; Hoa Phat Hung Yen Steel Limited Liability Company; and Hoa Phat Prestressed Concrete Company Limited.	Hoa Phat Dung Quat Steel Joint Stock Company; Hoa Phat Hai Duong Steel Joint Stock Company.	128.53	123.49
Vietnam-Wide Entity		* 136.57	131.53

* Rate based on facts available with adverse inferences.

Provisional Measures

Section 733(d) of the Act states that suspension of liquidation pursuant to an affirmative preliminary determination may not remain in effect for more than

four months, except where exporters representing a significant proportion of exports of the subject merchandise request that Commerce extend the four-month period to no more than six

months. At the request of exporters that account for a significant proportion of rebar from Bulgaria, Egypt, and Vietnam, Commerce extended the four-

³ See *Steel Concrete Reinforcing Bar from Bulgaria: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures*, 91 FR 12351 (March 13, 2026); see also *Steel Concrete Reinforcing Bar from Egypt: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final*

Determination, and Extension of Provisional Measures, 91 FR 12347 (March 13, 2026); and *Steel Concrete Reinforcing Bar from the Socialist Republic of Vietnam: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination and Extension of Provisional Measures*, 91 FR 12359

(March 13, 2026) (collectively, *Preliminary Determinations*).

⁴ We note that we are not making an export subsidy offset for either Bulgaria or Egypt because: (1) there is no companion CVD investigation on rebar from Bulgaria; and (2) we found no countervailable export subsidies in the companion CVD investigation of rebar from Egypt.

month period to six months in each of these investigations.⁵

The extended provisional measures period began on the date of the publication of the *Preliminary Determinations*, i.e., March 13, 2026, and ended on September 8, 2026. As a result, entries of rebar from Bulgaria, Egypt, and Vietnam made on or after September 9, 2026, and before the date of publication of the ITC's final injury determination in the **Federal Register** are not subject to the assessment of antidumping duties. Therefore, in accordance with section 736(a)(1) of the Act and its practice, Commerce will instruct CBP to terminate the suspension of liquidation and to liquidate, without regard to antidumping duties, unliquidated entries of rebar from Bulgaria, Egypt, and Vietnam entered, or withdrawn from warehouse, for consumption on or after September 9, 2026, the first day provisional measures were no longer in effect, until and through the day preceding the date of publication of the ITC's final injury determination in the **Federal Register**. Suspension of liquidation and the collection of cash deposits will resume on the date of publication of the ITC's final determination in the **Federal Register**.

Establishment of the Annual Inquiry Service Lists

On September 20, 2021, Commerce published the *Final Rule* in the **Federal Register**.⁶ On September 27, 2021, Commerce also published the *Procedural Guidance* in the **Federal Register**.⁷ The *Final Rule* and *Procedural Guidance* provide that Commerce will maintain an annual inquiry service list for each order or suspended investigation, and any interested party submitting a scope ruling application or request for circumvention inquiry shall serve a copy of the application or request on the persons on the annual inquiry service list for that order, as well as any companion order covering the same merchandise from the same country of origin.

In accordance with the *Procedural Guidance*, for orders published in the **Federal Register** after November 21, 2021, Commerce will create an annual inquiry service list segment in Commerce's online e-filing and

document management system, Antidumping and Countervailing Duty Electronic Service System (ACCESS), available at <https://access.trade.gov>, within five business days of publication of the notice of the order. Each annual inquiry service list will be saved in ACCESS, under each case number, and under a specific segment type called "AISL-Annual Inquiry Service List."⁸

Interested parties who wish to be added to the annual inquiry service list for an order must submit an entry of appearance to the annual inquiry service list segment for the order in ACCESS within 30 days after the date of publication of the order. For ease of administration, Commerce requests that law firms with more than one attorney representing interested parties in an order designate a lead attorney to be included on the annual inquiry service list. Commerce will finalize the annual inquiry service list within five business days thereafter. As mentioned in the *Procedural Guidance*,⁹ the new annual inquiry service list will be in place until the following year, when the *Opportunity Notice* for the anniversary month of the order is published.

Commerce may update an annual inquiry service list at any time as needed based on interested parties' amendments to their entries of appearance to remove or otherwise modify their list of members and representatives, or to update contact information. Any changes or announcements pertaining to these procedures will be posted to the ACCESS website at <https://access.trade.gov>.

Special Instructions for the Petitioner and Foreign Governments

In the *Final Rule*, Commerce stated that, "after an initial request and placement on the annual inquiry service list, both petitioners and foreign governments will automatically be placed on the annual inquiry service list in the years that follow."¹⁰ Accordingly, as stated above, the petitioner and foreign governments should submit their initial entries of

appearance after publication of this notice in order to appear in the first annual inquiry service lists for these orders. Pursuant to 19 CFR 351.225(n)(3), the petitioner and foreign governments will not need to resubmit their entries of appearance each year to continue to be included on the annual inquiry service list. However, the petitioner and foreign governments are responsible for making amendments to their entries of appearance during the annual update to the annual inquiry service list in accordance with the procedures described above.

Notification to Interested Parties

This notice constitutes the AD orders with respect to rebar from Bulgaria, Egypt, and Vietnam, pursuant to section 736(a) of the Act. Interested parties can find a list of AD and countervailing duty orders currently in effect at <https://www.trade.gov/data-visualization/adcvd-proceedings>.

These AD orders are published in accordance with section 736(a) of the Act and 19 CFR 351.211(b).

Dated: September 14, 2026.

Christopher Abbott,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix

Scope of the Orders

The merchandise subject to these orders is steel concrete reinforcing bar imported in either straight length or coil form (rebar) regardless of metallurgy, length, diameter, or grade or lack thereof.

The subject merchandise includes rebar that has been further processed in the subject country or a third country, including but not limited to cutting, grinding, galvanizing, painting, coating, or any other processing that would not otherwise remove the merchandise from the scope of these orders if performed in the country of manufacture of the rebar.

Specifically excluded are plain rounds (i.e., nondeformed or smooth rebar).

The subject merchandise is classifiable in the Harmonized Tariff Schedule of the United States (HTSUS) primarily under item numbers 7213.10.0000, 7214.20.0000, and 7228.30.8010. The subject merchandise may also enter under other HTSUS numbers including 7221.00.0017, 7221.00.0018, 7221.00.0030, 7221.00.0045, 7222.11.0001, 7222.11.0057, 7222.11.0059, 7222.30.0001, 7227.20.0080, 7227.90.6030, 7227.90.6035, 7227.90.6040, 7228.20.1000, and 7228.60.6000. HTSUS numbers are provided for convenience and customs purposes; however, the written description of the scope remains dispositive.

DEPARTMENT OF COMMERCE**International Trade Administration**

[C-721-003]

Carbon and Alloy Steel Wire Rod From Algeria: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that countervailable subsidies are being provided to producers and exporters of carbon and alloy steel wire rod (wire rod) from Algeria. The period of investigation (POI) is January 1, 2025, through December 31, 2025. In addition, Commerce is issuing the countervailing duty (CVD) order on wire rod from Algeria.

DATES: Applicable September 18, 2026.

FOR FURTHER INFORMATION CONTACT: Jonathan Schueler or Joshua Nixon, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-9175 and (202) 482-8361, respectively.

SUPPLEMENTARY INFORMATION:**Background**

On July 8, 2026, Commerce published in the **Federal Register** the *Preliminary Determination* in this investigation and invited interested parties to comment.¹ Because no comments were submitted by interested parties, we have adopted our *Preliminary Determination* for purposes of this final determination. Accordingly, no decision memorandum accompanies this **Federal Register** notice.

Scope of the Order

The product covered by this investigation is wire rod from Algeria. For a complete description of the scope of this order, *see* the appendix to this notice.

Scope Comments

No interested party commented on the scope of the investigation as it appeared in the *Preliminary Determination*.² Therefore, we made no changes to the scope of the investigation from that

published in the *Preliminary Determination*.

Methodology

Commerce conducted this investigation in accordance with section 701 of the Tariff Act of 1930, as amended (the Act). For each of the subsidy programs found to be countervailable, Commerce determines that there is a subsidy, *i.e.*, a financial contribution by an “authority” that gives rise to a benefit to the recipient, and that the subsidy is specific.³ In making this final determination, Commerce relied on facts available, including with an adverse inference, pursuant to sections 776(a) and (b) of the Act.⁴

Verification

Because the sole respondent, SPA Algerian Qatar Steel, did not participate in this investigation and because the Government of Algeria did not provide information Commerce requested, Commerce did not conduct a verification in this investigation.⁵

All-Others Rate

Sections 703(d) and 705(c)(5)(A) of the Act provide that Commerce shall determine an estimated all-others rate for companies not individually examined. Pursuant to section 705(c)(5)(A)(ii) of the Act, if the individual estimated countervailable subsidy rates established for all exporters and producers individually examined are zero, *de minimis*, or determined based entirely on section 776 of the Act, Commerce may use any reasonable method to establish the estimated subsidy rate for all other producers or exporters. In this investigation, Commerce has determined the estimated subsidy rate for the individually examined respondent under section 776 of the Act. This is the only rate available in this proceeding for deriving the all-others rate. Consequently, pursuant to sections 703(d) and 705(c)(5)(A)(ii) of the Act, Commerce established the all-others rate by applying the countervailable subsidy rate assigned to the non-responsive company listed below. For a full description of the methodology underlying Commerce’s

analysis, *see* the *Preliminary Determination*.⁶

Final Determination and Estimated Countervailable Subsidy Rates

Commerce determines that the following estimated countervailable subsidy rates exist:

Company	Subsidy rate (percent <i>ad valorem</i>)
SPA Algerian Qatar Steel	* 73.33
All Others	73.33

*Rate is based on facts available with adverse inferences.

Disclosure

Normally, Commerce discloses to interested parties the calculations performed in a final determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of the final determination in the **Federal Register**, in accordance with 19 CFR 351.224(b). However, because the program rates assigned in the *Preliminary Determination* are unchanged, there are no new calculations to disclose.

Countervailing Duty Order

No material injury determination is necessary in this countervailing duty investigation, pursuant to section 701(c)(1) of the Act, because the United States Trade Representative has determined that Algeria is not a “Subsidies Agreement country” within the meaning of section 701(b) of the Act.⁷ Therefore, in accordance with section 705(c)(2) of the Act, Commerce is issuing this CVD order.

Continuation of Suspension of Liquidation and Cash Deposits

In accordance with section 706 of the Act, Commerce intends to instruct CBP to continue the suspension of liquidation of wire rod from Algeria, as described in Appendix I to this notice, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**, and to assess, upon further instruction by Commerce, pursuant to section 706(a)(1) of the Act, countervailing duties on each entry of subject merchandise in an amount based on the net countervailable subsidy rates above. These instructions suspending liquidation will remain in effect until further notice. Commerce also intends, pursuant to section 706(a)(1) of the Act,

¹ *See Carbon and Alloy Steel Wire Rod from Algeria: Preliminary Affirmative Countervailing Duty Determination*, 91 FR 42178 (July 8, 2026) (*Preliminary Determination*), and accompanying Preliminary Decision Memorandum (PDM).

² *See Preliminary Determination*, 91 FR at 42178.

³ *See* sections 771(5)(B) and (D) of the Act regarding financial contribution; section 771(5)(E) of the Act regarding benefit; and section 771(5A) of the Act regarding specificity.

⁴ *See Preliminary Determination* PDM at the section “Use of Facts Otherwise Available and Application of Adverse Inferences.”

⁵ *See Preliminary Determination*, 91 FR at 42178.

⁶ *Id.*, 91 FR at 42178–42179.

⁷ *See Status of Algeria Under the Tariff of 1930, as Amended*, 90 FR 34334 (July 21, 2025).

to instruct CBP to require cash deposits equal to the amounts as indicated above. Accordingly, effective on the date of publication of this notice in the **Federal Register**, CBP will require, at the same time as importers would normally deposit estimated customs duties on the subject merchandise, a cash deposit for each entry of subject merchandise equal to the subsidy rates listed above. The all-others rate applies to all producers or exporters not specifically listed, as appropriate.

ITC Notification

As noted above, no material injury determination is necessary in this countervailing duty investigation, pursuant to section 701(c)(1) of the Act, because the United States Trade Representative has determined that Algeria is not a “Subsidies Agreement country” within the meaning of section 701(b) of the Act.⁸ Should it later be determined that the ITC requires information related to this determination, we will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information either publicly or under administrative protective order, without the written consent of the Assistant Secretary for Enforcement and Compliance.

Administrative Protective Order

This notice will serve as the only reminder to parties subject to the APO of their responsibility concerning the destruction of proprietary information disclosed under APO, in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Establishment of the Annual Inquiry Service Lists

On September 20, 2021, Commerce published the *Final Rule* in the **Federal Register**.⁹ On September 27, 2021, Commerce also published the *Procedural Guidance* in the **Federal Register**.¹⁰ The *Final Rule* and *Procedural Guidance* provide that Commerce will maintain an annual

inquiry service list for each order or suspended investigation, and any interested party submitting a scope ruling application or request for circumvention inquiry shall serve a copy of the application or request on the persons on the annual inquiry service list for that order, as well as any companion order covering the same merchandise from the same country of origin.

In accordance with the *Procedural Guidance*, for orders published in the **Federal Register** after November 4, 2021, Commerce will create an annual inquiry service list segment in Commerce’s online e-filing and document management system, Antidumping and Countervailing Duty Electronic Service System (ACCESS), available at <https://access.trade.gov>, within five business days of publication of the notice of the order. Each annual inquiry service list will be saved in ACCESS, under each case number, and under a specific segment type called “AISL-Annual Inquiry Service List.”¹¹

Interested parties who wish to be added to the annual inquiry service list for an order must submit an entry of appearance to the annual inquiry service list segment for the order in ACCESS within 30 days after the date of publication of the order. For ease of administration, Commerce requests that law firms with more than one attorney representing interested parties in an order designate a lead attorney to be included on the annual inquiry service list. Commerce will finalize the annual inquiry service list within five business days thereafter. As mentioned in the *Procedural Guidance*,¹² the new annual inquiry service list will be in place until the following year, when the *Opportunity Notice* for the anniversary month of the order is published.

Commerce may update an annual inquiry service list at any time as needed based on interested parties’ amendments to their entries of appearance to remove or otherwise modify their list of members and representatives, or to update contact information. Any changes or announcements pertaining to these

procedures will be posted to the ACCESS website at <https://access.trade.gov>.

Special Instructions for the Petitioner and Foreign Governments

In the *Final Rule*, Commerce stated that, “after an initial request and placement on the annual inquiry service list, both petitioners and foreign governments will automatically be placed on the annual inquiry service list in the years that follow.”¹³ Accordingly, as stated above, the petitioner and foreign governments should submit their initial entries of appearance after publication of this notice in order to appear in the first annual inquiry service lists for this order. Pursuant to 19 CFR 351.225(n)(3), the petitioner and foreign governments will not need to resubmit their entries of appearance each year to continue to be included on the annual inquiry service list. However, the petitioner and foreign governments are responsible for making amendments to their entries of appearance during the annual update to the annual inquiry service list in accordance with the procedures described above.

Notification to Interested Parties

This determination is issued and published pursuant to sections 705(d) and 777(i) of the Act, and 19 CFR 351.210(c).

In addition, this notice constitutes the CVD order with respect to wire rod from Algeria, pursuant to section 706(a) of the Act. Interested parties can find a list of antidumping duty and CVD orders currently in effect at <https://www.trade.gov/data-visualization/adcvd-orders-and-suspension-agreements>.

This CVD order is issued and published in accordance with section 706(a) of the Act and 19 CFR 351.211(b).

Dated: September 14, 2026.

Christopher Abbott,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix

Scope of the Order

The merchandise subject to this order covers certain hot-rolled products of carbon steel and alloy steel, in coils, of approximately circular cross section, less than 19.00 mm in actual solid cross-sectional diameter. Specifically excluded are steel products possessing the above-noted physical characteristics and meeting the Harmonized Tariff Schedule of the United States (HTSUS)

⁸ *Id.*

⁹ See *Regulations to Improve Administration and Enforcement of Antidumping and Countervailing Duty Laws*, 86 FR 52300 (September 20, 2021) (*Final Rule*).

¹⁰ See *Scope Ruling Application; Annual Inquiry Service List; and Informational Sessions*, 86 FR 53205 (September 27, 2021) (*Procedural Guidance*).

¹¹ This segment will be combined with the ACCESS Segment Specific Information (SSI) field which will display the month in which the notice of the order or suspended investigation was published in the **Federal Register**, also known as the anniversary month. For example, for an order under case number A-000-000 that was published in the **Federal Register** in January, the relevant segment and SSI combination will appear in ACCESS as “AISL-January Anniversary.” Note that there will be only one annual inquiry service list segment per case number, and the anniversary month will be pre-populated in ACCESS.

¹² See *Procedural Guidance*, 86 FR at 53206.

¹³ See *Final Rule*, 86 FR at 52335.

definitions for (a) stainless steel; (b) tool steel; (c) high nickel steel; (d) ball bearing steel; or (e) concrete reinforcing bars and rods. Also excluded are free cutting steel (also known as free machining steel) products (*i.e.*, products that contain by weight one or more of the following elements: 0.1 percent or more of lead, 0.05 percent or more of bismuth, 0.08 percent or more of sulfur, more than 0.04 percent of phosphorus, more than 0.05 percent of selenium, or more than 0.01 percent of tellurium). All products meeting the physical description of subject merchandise that are not specifically excluded are included in this scope.

The products subject to this order are currently classifiable under subheadings 7213.91.3011, 7213.91.3015, 7213.91.3020, 7213.91.3093, 7213.91.4500, 7213.91.6000, 7213.99.0030, 7227.20.0030, 7227.20.0080, 7227.90.6010, 7227.90.6020, 7227.90.6030, and 7227.90.6035 of the HTSUS. Products entered under subheadings 7213.90.0090 and 7227.90.6090 of HTSUS also may be included in this scope if they meet the physical description of subject merchandise above. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this order is dispositive.

International Trade Administration

[A–588–861, A–570–879]

Polyvinyl Alcohol From Japan and the People's Republic of China: Continuation of Antidumping Duty Orders

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of the determinations by the U.S. Department of Commerce (Commerce) and the U.S. International Trade Commission (ITC) that revocation of the antidumping duty (AD) orders on polyvinyl alcohol from Japan and the People's Republic of China (China) would likely lead to the continuation or recurrence of dumping and material injury to an industry in the United States, Commerce is publishing a notice of continuation of these AD orders.

DATES: Applicable September 11, 2026.

FOR FURTHER INFORMATION CONTACT: Nathan Araya, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3401.

SUPPLEMENTARY INFORMATION:

Background

On July 2 and October 1, 2003, Commerce published in the **Federal Register** the AD orders on polyvinyl alcohol from Japan and China, respectively.¹ On March 2, 2026, the ITC instituted,² and Commerce initiated,³ the fourth sunset reviews of the *Orders*, pursuant to section 751(c) and 752(a) of the Tariff Act of 1930, as amended (the Act). As a result of its reviews, Commerce determined that revocation of the *Orders* would likely lead to the continuation or recurrence of dumping, and therefore, notified the ITC of the magnitude of the margins of dumping likely to prevail should the *Orders* be revoked.⁴

On September 11, 2026, the ITC published its determination, pursuant to sections 751(c) and 752(a) of the Act, that revocation of the *Orders* would likely lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.⁵

Scope of the Orders

The merchandise covered by these *Orders* is PVA. This product consists of all PVA hydrolyzed in excess of 80 percent, whether or not mixed or diluted with commercial levels of defoamer or boric acid, except as noted below.

The following products are specifically excluded from the scope of these *Orders*:

- (1) PVA in fiber form.
- (2) PVA with hydrolysis less than 83 mole percent and certified not for use in the production of textiles.
- (3) PVA with hydrolysis greater than 85 percent and viscosity greater than or equal to 90 cps.
- (4) PVA with a hydrolysis greater than 85 percent, viscosity greater than or equal to 80 cps but less than 90 cps, certified for use in an ink jet application.
- (5) PVA for use in the manufacture of an excipient or as an excipient in the

manufacture of film coating systems which are components of a drug or dietary supplement and accompanied by an end-use certification.

(6) PVA covalently bonded with cationic monomer uniformly present on all polymer chains in a concentration equal to or greater than one mole percent.

(7) PVA covalently bonded with carboxylic acid uniformly present on all polymer chains in a concentration equal to or greater than two mole percent, certified for use in a paper application.

(8) PVA covalently bonded with thiol uniformly present on all polymer chains, certified for use in emulsion polymerization of non-vinyl acetic material.

(9) PVA covalently bonded with paraffin uniformly present on all polymer chains in a concentration equal to or greater than one mole percent.

(10) PVA covalently bonded with silan uniformly present on all polymer chains certified for use in paper coating applications.

(11) PVA covalently bonded with sulfonic acid uniformly present on all polymer chains in a concentration level equal to or greater than one mole percent.

(12) PVA covalently bonded with acetoacetylate uniformly present on all polymer chains in a concentration level equal to or greater than one mole percent.

(13) PVA covalently bonded with polyethylene oxide uniformly present on all polymer chains in a concentration level equal to or greater than one mole percent.

(14) PVA covalently bonded with quaternary amine uniformly present on all polymer chains in a concentration level equal to or greater than one mole percent.

(15) PVA covalently bonded with diacetoneacrylamide uniformly present on all polymer chains in a concentration level greater than three mole percent, certified for use in a paper application.

The merchandise subject to these *Orders* is currently classifiable under subheading 3905.30.00 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheading is provided for convenience and customs purposes, the written description of the scope of this proceeding is dispositive.

Continuation of the Orders

As a result of the determinations by Commerce and the ITC that revocation of the *Orders* would likely lead to continuation or recurrence of dumping and material injury to an industry in the United States, pursuant to section

751(d)(2) of the Act, Commerce hereby orders the continuation of the *Orders*. U.S. Customs and Border Protection will continue to collect AD cash deposits at the rates in effect at the time of entry for all imports of subject merchandise.

The effective date of the continuation of the *Orders* will be September 11, 2026.⁶ Pursuant to section 751(c)(2) of the Act and 19 CFR 351.218(c)(2), Commerce intends to initiate the next five-year reviews of the *Orders* not later than 30 days prior to fifth anniversary of the date of the last determination by the ITC.

Administrative Protective Order (APO)

This notice also serves as a final reminder to parties subject to an APO of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

These five-year (sunset) reviews and this notice are in accordance with sections 751(c) and 751(d)(2) of the Act and published in accordance with section 777(i) of the Act, and 19 CFR 351.218(f)(4).

Dated: September 15, 2026.

Scot Fullerton,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

International Trade Administration

[A–570–121]

Difluoromethane (R–32) From the People's Republic of China: Rescission of Antidumping Duty Administrative Review; 2025–2026

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) is rescinding the administrative review of the antidumping duty (AD) order on difluoromethane (R–32) from the

People's Republic of China (China) covering the period of review (POR) is March 1, 2025, through February 28, 2026, because, as explained below, there are no reviewable suspended entries for the companies subject to this review.

DATES: Applicable September 18, 2026.

FOR FURTHER INFORMATION CONTACT: Ajay Menon, AD/CVD Operations, Office IX, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0208.

SUPPLEMENTARY INFORMATION:

Background

On May 4, 2026, in accordance with section 751(a) of the Tariff Act of 1930, as amended, (the Act) and 19 CFR 351.221(c)(1)(i), based on a timely request for review from Arkema, Inc. (the petitioner),¹ Commerce published the initiation notice in the **Federal Register**.² On May 7, 2026, we notified interested parties that information from U.S. Customs and Border Protection (CBP) indicated that there were no entries of the subject merchandise during the POR.³ On May 21, 2026, the petitioner submitted comments regarding Commerce's May 7, 2026, memorandum and respondent selection.⁴ Further, on July 27, 2026, we notified interested parties of our intent to rescind this administrative review due to a lack of suspended entries.⁵ We also received comments from the petitioner regarding our intent to rescind.⁶

Rescission of Review

Pursuant to 19 CFR 351.213(d)(3), it is Commerce's practice to rescind an administrative review of an AD order where it concludes that there were no entries of subject merchandise during the POR for which liquidation is suspended.⁷ Normally, upon

completion of an administrative review, the suspended entries are liquidated at the AD rates calculated for the review period.⁸ Therefore, for an administrative review to be conducted, there must be a reviewable, suspended entry that Commerce can instruct CBP to liquidate at the calculated AD rates for the review period.⁹

As noted above, Commerce notified all interested parties of its intent to rescind the review because there were no reviewable, suspended entries of subject merchandise during the POR and invited interested parties to comment.¹⁰ We received comments from the petitioner, arguing that Commerce should not rescind its review of Sam Gas (Thailand) Co., Ltd. (Sam Gas) because, according to the petitioner, information suggests that Sam Gas made imports of subject merchandise that were transshipped¹¹ through Thailand during the POR.¹² However, as noted above, CBP data shows there were no suspended entries of R–32 from China during the POR. Therefore, consistent with our practice,¹³ in the absence of any suspended entries of subject merchandise during the POR, we are rescinding this administrative review, in accordance with 19 CFR 351.213(d)(3).

Cash Deposit Requirements

As Commerce has proceeded to a final rescission of this administrative review, no cash deposit rates will change. Accordingly, the current cash deposit requirements shall remain in effect until further notice.

Assessment Rates

Commerce will instruct CBP to assess antidumping duties on all appropriate entries. Antidumping duties shall be assessed at rates equal to the cash deposit rate of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

[Docket Number: 260909–0004]

Request for Information (RFI) on Future Needs for Medical Metrology and Standards for Medical Imaging, Devices, Diagnostics and Therapy

AGENCY: Physical Measurement Laboratory (PML), National Institute of Standards and Technology (NIST), U.S. Department of Commerce.

ACTION: Notice of public meeting; request for information (RFI).

SUMMARY: The National Institute of Standards and Technology (NIST) and the National Institute of Biomedical Imaging and Bioengineering (NIBIB), a part of the National Institutes of Health (NIH), are requesting input from stakeholders in order to gain a better understanding of the future needs for medical metrology and standards around medical imaging, devices, and diagnostics. This request for information is coordinated with a NIST/NIBIB Symposium on Medical Metrology and

Standards for American Healthcare and Commerce Medical Imaging, Devices, Diagnostics at the joint NIST/University of Maryland Institute (UMI) for Bioscience and Biotechnology Research (IBBR). The input received will inform a joint NIST and NIBIB medical metrology and standards roadmap, a document that will identify future needs for medical metrology and standards, identify major stakeholders, and provide guidance for future government programs.

DATES:

Symposium

The *NIST/NIBIB Symposium on Medical Metrology and Standards for American Healthcare and Commerce Medical Imaging, Devices, Diagnostics, and Therapy* will be held on Thursday, September 24, 2026, from 8:45 a.m. to 5:30 p.m. Requests to participate must be submitted via the symposium website at <https://www.nist.gov/news-events/events/2026/09/nistnibib-symposium-medical-metrology-and-standards-american-healthcare> no later than 5:00 p.m. Eastern Time on Friday, September 11, 2026 for in-person attendance, and 5:00 p.m. Eastern Time on Tuesday, September 22, 2026 for virtual attendance. To request to participate, go to the symposium website, click on “Register Here” button, and follow the instructions listed.

Comments in Response to Request for Information

Comments in response to this notice must be received on or before November 30, 2026, at 11:59 p.m. Eastern Time. Written comments in response to this notice should be submitted in accordance with the instructions in the **ADDRESSES** and **SUPPLEMENTARY INFORMATION** sections below. Submissions received after this date may not be considered.

ADDRESSES:

Symposium

Details about attending the NIST–NIBIB Symposium on Medical Metrology and Standards on September 24, 2026, can be found on the Symposium website at <https://www.nist.gov/news-events/events/2026/09/nistnibib-symposium-medical-metrology-and-standards-american-healthcare>. To register, go to the event website, click on “Register Here” button, and follow the instructions listed. Registrants will need to provide their full name, affiliation, email address, and whether they are attending virtually or in person. They will need to

indicate if they are an invited speaker, want to present a poster (and give a title of presentation), or need a display table. Optional emergency information and special needs can be specified.

Comments in Response To Request for Information

Comments can be submitted at www.regulations.gov following the instructions below:

Interested parties can submit electronic public comments via the Federal e-Rulemaking Portal.

1. Go to www.regulations.gov and enter NIST–2026–0133 in the search field;

2. Click the “Comment Now!” icon, complete the required fields, including the relevant docket number and title in the subject field; and

3. Enter or attach your comments.

Additional information on the use of regulations.gov, including instructions for accessing agency documents, submitting comments, and viewing the docket is available at www.regulations.gov/faq. If you require an accommodation or cannot otherwise submit your comments via regulations.gov, please contact NIST using the information in the **FOR FURTHER INFORMATION CONTACT** section below.

NIST will not accept comments for this notice by postal mail, email, or fax. To ensure that NIST does not receive duplicate copies, please submit your comments only once. Comments containing references, studies, research, and other empirical data that are not widely published should include copies of the reference materials.

NIST will also not accept comments accompanied by a request that part or all the material be treated confidentially because of its business proprietary nature or for any other reason. Therefore, do not submit confidential business information or otherwise sensitive, protected, or personal information, such as account numbers, Social Security numbers, or names of other individuals.

All submissions, including comments, attachments and other supporting materials, will become part of the public record and subject to public disclosure. All relevant comments received by the deadline will be posted at: <https://www.regulations.gov> under docket number NIST–2026–0133 without change or redaction.

FOR FURTHER INFORMATION CONTACT:

Stephen Russek, Project Leader:
Magnetic Imaging, 325 Broadway,
Boulder, CO; email: stephen.russek@nist.gov; phone: 303–497–5097. Direct

media inquiries to NIST's Office of Public Affairs at (301) 975-2762.

Users of telecommunication devices for the deaf, or a text telephone may call the Federal Relay Service toll free at 1-800-877-8339. NIST will make the RFI available in alternate formats, such as Braille or large print, upon request by persons with disabilities.

SUPPLEMENTARY INFORMATION:

Background

Healthcare accounts for 18% of the GDP in the US and is projected to increase to 20.6% by 2034.¹ It is one of the most socially and commercially important sectors in our economy. Critical components of the healthcare infrastructure are the underlying measurements that are required for accurate screening and diagnostic evaluations and subsequent therapeutic planning and application. Metrology refers to the science of establishing precise reproducible measurements with well-defined uncertainties. A variety of measurement standards exist to ensure measurements are accurate, precise, comparable across all involved sites, and durable over time. Most of the standards are consensus standards established by a large body of stakeholders including professional societies and standards organizations. Government agencies, such as NIST, assist where primary traceability and validation are required.

To help ensure that future medical measurements and standards are developed appropriately and efficiently, a NIST/NIBIB Symposium on Medical Metrology and Standards for American Healthcare and Commerce Medical Imaging, Devices, Diagnostics will be held on September 24, 2026 at the joint NIST/UMD Institute for Bioscience and Biotechnology Research (IBBR), 9600 Gudelsky Dr, Rockville, MD 20850.

NIST, along with other government agencies, have hosted workshops in the past on different aspects of medical metrology resulting in highly cited documents.² With the advent of rapidly

advancing medical technology and artificial intelligence (AI), the future requirements for medical metrology and standards may change considerably. Agility and evolving standards may be required to address a rapidly changing US healthcare system. Better medical metrology and standards are expected to be an important component of the healthcare infrastructure allowing for improved and cost-effective healthcare.

Symposium

The NIST/NIBIB Symposium on Medical Metrology and Standards for American Healthcare and Commerce Medical Imaging, Devices, Diagnostics will be held as indicated in the **DATES** and **ADDRESSES** section. Requests to participate must be received via the symposium website at <https://www.nist.gov/news-events/events/2026/09/nistnibib-symposium-medical-metrology-and-standards-american-healthcare> no later than 5:00 p.m. Eastern Time on Friday, September 11, 2026 for in person attendance, and 5:00 p.m. Eastern Time on Tuesday, September 22, 2026 for virtual attendance. The symposium will be recorded and transcribed for internal NIST use only.

The NIST/NIBIB symposium is meant to be a general meeting with a wide selection of stakeholders. There will be invited speakers who have a very broad range of expertise and will include representatives from clinical sites, government, industry, professional societies, and academia. The goal of the speakers is to highlight the role of medical metrology and standards in their work, discuss future directions and challenges, and potentially show how their work overlaps with the broader medical metrology and standards framework needed for the US healthcare system. At the end of each session, there will be panel discussions where the speakers can address questions and discuss common themes. Between sessions, there will be a break and poster presentations from researchers, standards organizations, and companies providing medical metrology and standards.

The final agenda will be posted on the Symposium website <https://www.nist.gov/news-events/events/2026/09/nistnibib-symposium-medical-metrology-and-standards-american-healthcare> in a downloadable pdf file, along with directions to the IBBR site and suggested local accommodations. Information regarding the virtual

attendance link and parking vouchers will be sent to registrants after registration is completed.

All visitors attending the Symposium on the joint NIST/University of Maryland Institute (UMD) for Bioscience and Biotechnology Research (IBBR) site are required to pre-register to be admitted. Presentation of ID, driver's license or passport will be required to pick up badge and enter. Limited space is available on a first-come, first-served basis for anyone who wishes to attend in person. For detailed information please visit: <https://www.ibbr.umd.edu/events/visiting-ibbr>.

NIST provides reasonable accommodation to individuals with disabilities where appropriate. If you are a person who requires a reasonable accommodation, please make requests in advance for sign language interpretation, assistive listening devices, or other reasonable accommodation to Sabina Mohan, Conference Program Specialist, sabina.mohan@nist.gov, no later than 5:00 p.m. Eastern Time on September 11, 2026, so appropriate arrangements can be made. Determinations for reasonable accommodation will be made on a case-by-case basis.

Request for Information

In this notice, NIST and NIBIB seek information from organizations, companies, and individuals who are impacted by medical metrology and standards in the areas of Medical Imaging, Devices, Diagnostics and Therapy as well as any other interested stakeholders.

Respondents need not address all topic areas described in this notice, though all responses should specify which statements are being responded to. All relevant responses that comply with the requirements listed in the **DATES** and **ADDRESSES** sections of this RFI will be considered.

NIST and NIBIB seek information on the following topic areas, including but not limited to:

- Areas where there is a need for improved medical measurements relating to medical imaging, devices, diagnostics and therapy and how we can provide the needed standards and validation of these measurements.
- Identification of future medical standards efforts for new measurement areas that may not be currently addressed.

- Suggested changes to the medical metrology and standards process to allow improved and cost-effective healthcare in a time of rapidly changing technology and incorporation of AI.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XG062]

South Atlantic Fishery Management Council—Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Meeting of the South Atlantic Fishery Management Council's Snapper Grouper Advisory Panel.

SUMMARY: The South Atlantic Fishery Management Council (Council) will hold a meeting of the Snapper Grouper Advisory Panel (AP) October 6–8, 2026.

DATES: The Snapper Grouper AP will meet from 1 p.m. on October 6, 2026, until 12 p.m. on October 8, 2026.

ADDRESSES:

Meeting address: The meeting will be held at the Drury Plaza Hotel North Charleston, 2934 West Montague, North Charleston, SC 29418; phone (843) 938–1503. *Council address:* South Atlantic Fishery Management Council, 4055 Faber Place Drive, Suite 201, N Charleston, SC 29405. The meeting will also be available via webinar. See **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT:

Michael Schmidtke, Fishery Scientist, SAFMC; phone (843) 302–8433 or toll free (866) SAFMC–10; FAX (843) 769–4520; email: mike.schmidtke@safmc.net.

SUPPLEMENTARY INFORMATION: Meeting information, including the agenda, overview, briefing book materials, and an online public comment form will be posted on the Council's website at: <https://safmc.net/advisory-panel-meetings/> 2 weeks prior to the meeting. The meeting is open to the public and available via webinar as it occurs. The webinar registration link will be available from the Council's website. Public comment will also be taken during the meeting.

The agenda for the Snapper Grouper AP meeting includes discussions of

developing amendments to the Fishery Management Plan (FMP) for the Snapper Grouper Fishery of the South Atlantic Region: Amendment 60 (commercial permit and trip efficiency), Amendment 44 (yellowtail snapper and mutton snapper), and Regulatory Amendment 38 (headboat vessel limits). The AP will provide input and recommendations on these amendments for the Council's consideration.

The AP will also develop a fishery performance report and evaluate the stock risk rating for red grouper. The AP will also receive updates on other ongoing Council projects and initiatives and address other items as needed.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for auxiliary aids should be directed to the Council office (see **ADDRESSES**) 5 days prior to the meeting.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 16, 2026.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XG025]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Pacific Fishery Management Council's (Pacific Council) Ad Hoc Marine Planning Committee (MPC) will hold an online public meeting.

DATES: The online meeting will be held Friday, October 2, 2026, from 9 a.m. to 5 p.m. Pacific Time, or until business for the day has been completed.

ADDRESSES: This meeting will be held online. Specific meeting information, including a proposed agenda and directions on how to attend the meeting and system requirements, will be provided in the meeting announcement on the Pacific Council's website (see <https://www.pcouncil.org>).

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, Oregon 97220–1384.

FOR FURTHER INFORMATION CONTACT: For general inquiries: Kerry Griffin, Staff Officer, Pacific Council, (503) 820–2409.

For technical assistance in accessing the meeting: Mr. Hayden York, hayden.york@pcouncil.org, 503–820–2424.

SUPPLEMENTARY INFORMATION: The purpose of this online meeting is for the MPC to consider current marine planning issues, including oil and gas leasing, NOAA Aquaculture Opportunity Areas, deep-sea mineral mining, and other ocean development or planning activities that may impact commercial or recreational fishing and West Coast fishing dependent communities. The MPC will provide a report in the Advanced Briefing Book for the Pacific Council's November 2026 meeting.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Hayden York (see **FOR FURTHER INFORMATION CONTACT**) at least 10 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 16, 2026.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and

Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council (Council) will hold public meetings.

DATES: The meetings will be held Tuesday, October 6, 2026, through Thursday, October 8, 2026. For agenda details, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES:

Meeting address: This will be an in-person meeting with a virtual option. Council members, other meeting participants, and members of the public will have the option to participate in person at The Sanderling (1461 Duck Road, Duck, NC 27949) or virtually via Webex webinar. Webinar connection instructions and briefing materials will be available at: <https://www.mafmc.org/briefing/october-2026>.

Council address: Mid-Atlantic Fishery Management Council, 800 N State St., Suite 201, Dover, DE 19901; telephone: (302) 674-2331; <https://www.mafmc.org>. The Council's website, <https://www.mafmc.org>, also has details on the meeting location, proposed agenda, webinar listen-in access, and briefing materials.

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D. Executive Director, Mid-Atlantic Fishery Management Council; telephone: (302) 526-5255.

SUPPLEMENTARY INFORMATION: The following items are on the agenda, although agenda items may be addressed out of order (changes will be noted on the Council's website when possible).

Tuesday, October 6, 2026

Executive Committee (Closed Session)

—Review 2026 Ricks E Savage Award nominations

Executive Committee (Open Session)

—Review draft deliverables for the 2027 Implementation Plan

LUNCH

Evaluation of Vessel Baseline Restrictions

—Review and consider initiating management action

Scup Gear Restricted Areas (GRAs) Project

—Review scup GRAs, previous analysis, and summary of IRA project results
—Consider potential management action

Wednesday, October 7, 2026

2027 Illex Specifications

—Review recommendations from the Scientific and Statistical Committee (SSC), Monitoring Committee, Advisory Panel, and staff
—Review previously adopted 2027 specifications, including commercial measures, and revise as necessary

Northwest Atlantic Fisheries Organization (NAFO) Illex Quota Issues

—Review staff and SSC input
—Decide on next steps

2027 Atlantic Mackerel Specifications

—Review recommendations from the SSC, Monitoring Committee, Advisory Panel, and staff
—Review previously adopted 2027 specifications, including commercial and recreational measures, and revise as necessary

LUNCH

Longfin Squid Research Track Assessment

—Overview of recently completed Research Track stock assessment results

2027 Spiny Dogfish Specifications

—Review recommendations from the SSC, Monitoring Committee, Advisory Panel, and staff
—Review previously adopted 2027 specifications, including commercial measures, and revise as necessary

Joint MAFMC and SAFMC Blueline Tilefish Subcommittee Update

—Review recommendations from the Subcommittee and consider next steps

Habitat Activities Update—Greater Atlantic Regional Fisheries Office (GARFO) Habitat and Ecosystem Services Division

—Presentation on draft design of regional fisheries compensatory fund administration and public comment opportunities

Regional Offshore Wind Fisheries Compensatory Mitigation Fund Update—Deirdre Boelke, Fisheries Insight Network

—Presentation on draft design of regional fisheries compensatory fund administration and public comment opportunities

Atlantic Large Whale Take Reduction Plan (ALWTRP) Scoping Presentation—Corie Grewal, NOAA Fisheries

—Review information on the scoping process for potential future ALWTRP modifications

Thursday, October 8, 2026

Business Session

Committee Reports (SSC); Executive Director's Report; Organization Reports; and Liaison Reports

Other Business and General Public Comment

Although non-emergency issues not contained in this agenda may come before this group for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), those issues may not be the subject of formal action during these meetings. Actions will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under Section 305(c).

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aid should be directed to Shelley Spedden, (302) 526-5251, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 16, 2026.

Key Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[FR Doc. 2026-19183 Filed 9-17-26; 8:45 am]

BILLING CODE 3510-22-P

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Limitations of Duty-Free Imports of Apparel Articles Assembled in Beneficiary Sub-Saharan African Countries From Regional and Third-Country Fabric

AGENCY: Committee for the Implementation of Textile Agreements (CITA)

ACTION: Publishing the New Quantitative Limit on Duty-Free Benefits for Certain Apparel Assembled in Sub-Saharan Africa

DATES: The new limitations became effective October 1, 2026.

FOR FURTHER INFORMATION CONTACT: Thomas Newberg, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482-7578.

SUPPLEMENTARY INFORMATION:

Authority: Title I, Section 112(b)(3) of the Trade and Development Act of 2000

(TDA 2000), Public Law (Pub. L.) 106–200, as amended by Division B, Title XXI, section 3108 of the Trade Act of 2002, Public Law 107–210; Section 7(b)(2) of the AGOA Acceleration Act of 2004, Public Law 108–274; Division D, Title VI, section 6002 of the Tax Relief and Health Care Act of 2006 (TRHCA 2006), Public Law 109–432, and section 1 of The African Growth and Opportunity Amendments (Pub. L. 112–163), August 10, 2012; Presidential Proclamation 7350 of October 2, 2000 (65 FR 59321); Presidential Proclamation 7626 of November 13, 2002 (67 FR 69459); Title I, Section 103(b)(2) and (3) of the Trade Preferences Extension Act of 2015, Public Law 114–27, June 29, 2015; Division I, Section 5019 of the Consolidated Appropriations Act, 2026 (Pub. L. 119–75); and Division B, Section 2008 of the Continuing Appropriations and Extensions Act, 2027 (Pub. L. 119–103).

Title I of TDA 2000 provides for duty-free treatment for certain textile and apparel articles imported from designated beneficiary sub-Saharan African countries. Section 112(b)(3) of TDA 2000 provides duty-free treatment for apparel articles wholly assembled in one or more beneficiary sub-Saharan African countries from fabric wholly formed in one or more beneficiary sub-Saharan African countries from yarn originating in the United States or one or more beneficiary sub-Saharan African countries or former beneficiary sub-Saharan African countries, subject to quantitative limitations. This preferential treatment is also available for apparel articles assembled in one or more lesser-developed beneficiary sub-Saharan African countries, regardless of the country of origin of the fabric used to make such articles, subject to quantitative limitation. Public Law 119–103 extended preferential treatment under these programs through December 31, 2028.

The AGOA Acceleration Act of 2004 provides that the quantitative limitation will be an amount not to exceed seven percent of the aggregate square meter equivalents of all apparel articles imported into the United States in the preceding 12-month period for which data are available. *See* Section 112(b)(3)(A)(ii)(I) of TDA 2000, as amended by Section 2008(b)(2) of the Continuing Appropriations and Extensions Act, 2027. Of this overall amount, apparel imported during the same period under the special rule for lesser-developed countries is limited to an amount not to exceed 3.5 percent of all apparel articles imported into the United States in the preceding 12-month

period for which data are available. *See* Section 112(b)(3)(B)(ii)(II) of TDA 2000, as amended by Section 2008(b)(3) of the Continuing Appropriations and Extensions Act, 2027. Presidential Proclamation 7350 of October 2, 2000 directed CITA to publish the aggregate quantity of imports allowed during each 12-month period in the **Federal Register**.

For the period beginning on October 1, 2026, and extending through September 30, 2027, the aggregate quantity of imports eligible for preferential treatment under these provisions is 1,690,799,016 square meters equivalent. Of this amount, 845,399,508 square meters equivalent is available to apparel articles imported under the special rule for lesser-developed countries. Apparel articles entered in excess of these quantities will be subject to otherwise applicable tariffs.

These quantities are calculated using the aggregate square meter equivalents of all apparel articles imported into the United States, derived from the set of Harmonized System lines listed in the Annex to the World Trade Organization Agreement on Textiles and Clothing (ATC), and the conversion factors for units of measure into square meter equivalents used by the United States in implementing the ATC.

Joshua Kroon,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 2026–19191 Filed 9–17–26; 8:45 am]

BILLING CODE 3510–DR–P

DEPARTMENT OF DEFENSE

Office of the Secretary

TRICARE: Notice of TRICARE Plan Program Changes for Calendar Year (CY) 2027

AGENCY: Office of the Secretary of Defense, Department of Defense (DoD).

ACTION: ACTION: Notice; TRICARE Plan Program changes for CY 2027.

SUMMARY: This notice provides information regarding TRICARE Plan Program Changes for CY 2027.

DATES: TRICARE Health Plan information in this notice is valid for services during CY 2027 (January 1–December 31, 2027).

ADDRESSES: Defense Health Agency, TRICARE Health Plan Division, 7700 Arlington Boulevard, Suite 5101, Falls Church, Virginia 22042–5101.

FOR FURTHER INFORMATION CONTACT: Ms. Debra Fisher, 703–275–6224,

dha.ncr.healthcare-ops.mbx.thp-policy-and-programs-branch@health.mil.

SUPPLEMENTARY INFORMATION: A final rule published in the **Federal Register** (FR) on February 15, 2019 (84 FR 4326–4333) established the requirement for the Director, Defense Health Agency (DHA), to provide notice of TRICARE program changes to Military Health System (MHS) beneficiaries each CY in connection with the annual open season enrollment period. The following changes or improvements to the TRICARE program benefits apply for CY 2027.

Open Season Announcement

Open Season is an annual period when beneficiaries may enroll in a health plan or make changes to their health care, dental, and/or vision coverage for the next CY.

During the TRICARE Open Season running from November 9 through December 8, 2026, qualified MHS beneficiaries may enroll in or change their TRICARE Prime or TRICARE Select plan.

During the Federal Employee Dental and Vision Insurance Program (FEDVIP) Open Season running from November 9 through December 7, 2026, qualified MHS beneficiaries, including TRICARE For Life beneficiaries, may enroll in or make changes to their dental and/or vision plans. FEDVIP is operated by the U.S. Office of Personnel Management.

Any changes MHS beneficiaries make during Open Season will take effect on January 1, 2027. If a beneficiary remains eligible and does not make any changes during Open Season, then his/her coverage will remain the same for 2027. TRICARE enrollees can ensure they receive important health plan information by promptly entering any change in mailing address, email address, and other information in the Defense Enrollment Eligibility Reporting System (DEERS) and verifying their preference for receipt of information digitally or by paper mailings with their respective regional contractors. TRICARE enrollees can avoid any health care coverage gaps by ensuring changes in their payment information are also updated with their regional contractors. *See* <https://tricare.mil/Plans/Eligibility/DEERS> as a guide for when to update information in DEERS throughout the year.

Annual Announcements

The following TRICARE program features are subject to a year-to-year determination and are announced each year prior to the annual TRICARE Open Season:

Urgent Care Visits: The number of urgent care visits remains unlimited without referrals for TRICARE Prime enrollees for Plan CY 2027. Beneficiaries may receive urgent care from TRICARE-authorized urgent care centers (UCCs) and convenience clinics (CCs), either network or non-network, without a referral. They may also receive urgent care from any TRICARE network provider (*i.e.*, family medicine; internal medicine-general practice; pediatricians). In situations when a TRICARE Prime enrollee seeks care from a non-network TRICARE authorized provider (outside of a TRICARE-authorized UCC or CC), the usual TRICARE Prime Point of Service deductible and cost-shares will apply. Private sector care for active duty Service members is subject to different rules. Covered beneficiaries in the U.S. who want assistance with decisions on whether to seek urgent care, except those enrolled in the Uniformed Services Family Health Plan (USFHP) or in a plan under the Competitive Plans Demonstration (CPD), may call the MHS Nurse Advice Line (NAL) at 1-800-874-2273 for health care guidance from a specially trained registered nurse. The NAL is available 24/7 to eligible TRICARE beneficiaries. USFHP and CPD enrollees should contact their contractor's designated nurse advice line. Beneficiaries residing overseas can call the NAL for health care advice when traveling in the U.S. but must coordinate care with their Overseas Regional Call Center. For additional information, call the servicing TRICARE contractor or visit <https://www.tricare.mil/ContactUs> and click on "MHS Nurse Advice Line."

Prime Service Area (PSA) Changes: PSAs are geographic areas around military medical treatment facilities and Base Realignment and Closure sites where TRICARE Prime is available. PSAs support the medical readiness of active-duty members of the Uniformed Services by adding to the capability and capacity of military hospitals and clinics. There are no changes to the existing PSAs for CY 2027.

What's New

The following changes or improvements to TRICARE program benefits apply to CY 2027 (although some changes were implemented in 2026):

Prescription Copay Waiver for Certain Dependents Enrolled in TRICARE Prime Remote: Active-duty family members enrolled in TRICARE Prime Remote in the United States and who live more than 50 miles or a one-hour drive from a military medical treatment facility

pharmacy will no longer pay copayments for covered prescription medications filled at retail network pharmacies, effective February 28, 2026. Eligible families will see the copayment waiver applied automatically at the pharmacy.

Demonstrations

Competitive Plans Demonstration: Again for 2027, TRICARE-eligible active duty family members, retirees, and retiree family members who reside within certain ZIP Codes in metro Atlanta, Georgia, and metro Tampa, Florida, have additional options for their TRICARE coverage. Eligible individuals in these areas may opt to voluntarily enroll in a Competitive Plans Demonstration health plan, also known as TRICARE Prime Demo, regardless of whether they are currently enrolled in TRICARE Prime or TRICARE Select. See <https://tricare.mil/Plans/HealthPlans/TRICARE-Prime-Demo> for more information. Details are available in an April 28, 2025, **Federal Register** notice at <https://www.federalregister.gov/documents/2025/04/28/2025-07258/tricare-tricare-competitive-plans-demonstration-cpd>.

Childbirth and Breastfeeding Support Demonstration (CBSD): The CBSD was extended for five years and will now end on December 31, 2031. Until the CBSD ends, beneficiaries may access the services of certified labor doulas, certified lactation consultants, and certified lactation counselors. The CBSD is available to beneficiaries in the United States and overseas. Details are available at <https://tricare.mil/cbsd>.

Pre-Hospital Blood Transfusions (PHBT) Demonstration: Beginning January 1, 2027, a five-year nationwide demonstration will be used to evaluate an alternative payment method for PHBT. This demonstration will evaluate whether providing a supplementary reimbursement for PHBT will improve beneficiary access to this life-saving care, enhance clinical outcomes for patients in hemorrhagic shock, and prove to be administratively feasible. Details are available in a July 6, 2026, **Federal Register** notice at: <https://www.federalregister.gov/documents/2026/07/06/2026-13515/tricare-demonstration-project-for-tricare-ambulance-add-on-reimbursement-for-pre-hospital-blood>.

Benefit Improvements

Ambulatory Blood Pressure Monitoring: TRICARE expanded coverage for ambulatory blood pressure monitoring to include diagnosis of masked hypertension in children and adults; diagnosis of abnormal nocturnal

blood pressure in children; and management of certain conditions as recommended by the American Academy of Pediatrics or American Heart Association.

Optune™ Tumor Treating Fields (TTF) Device: Optune TTF device for treatment of adult beneficiaries, 22 years of age or older, with newly diagnosed glioblastoma multiforme, following surgery and radiation is covered.

Ablative Fractional Laser (e.g., Carbon Dioxide and Erbium Yag): Ablative fractional laser for the treatment of symptomatic scars resulting from burns and other trauma is covered. Care must be preauthorized, including subsequent sessions following the first treatment to ensure ongoing therapy is medically necessary and appropriate for the treatment of symptomatic scars. This treatment was previously provided under Provisional Coverage and was converted to a permanent benefit effective February 24, 2026.

Autologous Hematopoietic Stem Cell Transplantation: Benefits may be cost-shared for a single event of myeloablative or non-myeloablative therapy with autologous hematopoietic stem cell transplant for the treatment of multiple sclerosis when criteria are met.

Stereotactic Laser Amygdalohippocampectomy (SLAH): SLAH including magnetic resonance imaging guided laser interstitial thermal therapy may be covered for the treatment of mesial temporal lobe epilepsy when performed in accordance with American Society for Stereotactic and Functional Neurosurgery recommendations.

Liver Transplant for Metastatic Colorectal Cancer: Liver transplantation for colorectal cancer with liver metastasis is covered for beneficiaries who meet specified inclusion requirements and do not meet exclusion criteria, with prior authorization and tumor board approval.

Peripheral Nerve Stimulation: Peripheral nerve stimulation, a non-opioid, and minimally invasive pain treatment, for the treatment of chronic pain, including chronic post-operative pain, chronic post-amputation pain, chronic phantom limb pain, and chronic migraine and headache conditions, is covered. Additionally, peripheral nerve stimulation for the treatment of acute post-operative and acute post-amputation pain for up to 60 days following surgery using temporary peripheral nerve stimulations, such as SPRINT®, is covered.

New Provisional Coverage

Vertebral Body Tethering: Vertebral body tethering, a minimally invasive

alternative to spinal fusion therapy, is covered under the Provisional Coverage Program for certain adolescents with adolescent idiopathic scoliosis.

Benefit Changes

Transcutaneous Electrical Nerve Stimulation (TENS): Effective July 1, 2026, TENS devices and supplies are excluded for all conditions except acute post-operative pain.

Appendix A

Certain TRICARE enrollee out-of-pocket costs (enrollment fees, premiums, catastrophic caps, deductibles, and copayments) are

adjusted annually by Federal law and regulations based on the annual Cost of Living Adjustment (COLA) applied to Uniformed Service member retired pay. A difference in copayments remains between those who entered Uniformed Service before January 1, 2018 (Group A), and those who entered on or after that date (Group B).

The retiree COLA is typically announced after the Federal fiscal year begins in October. Beneficiary out-of-pocket expenses impacted by the 2026 COLA will be posted to the *tricare.mil/changes* web page before the start of TRICARE Open Season, November 10, 2026.

Premium Based Plans

The CY 2027 monthly premiums for TRICARE Reserve Select, TRICARE Retired Reserve, and TRICARE Young Adult and the quarterly premiums for the Continued Health Care Benefit Program will be posted to the *tricare.mil/changes* web page once announced.

Pharmacy Out-of-Pocket Expenses for CY 2027

TRICARE Pharmacy copayments are unchanged for January 1, 2027:

PHARMACY COPAYMENTS FOR CALENDAR YEAR 2027 *

Year	Retail network generic formulary 30-day supply	Retail network brand-name formulary 30-day supply	Retail network non-formulary 30-day supply	Mail order generic formulary 90-day supply	Mail order brand-name formulary 90-day supply	Mail order non-formulary 90-day supply
2027	\$16	\$48	**\$85	\$14	\$44	\$85

* Active duty Service members (ADSMs) and Active duty family members enrolled in TRICARE Prime Remote enjoy a \$0 copay for covered drugs at any pharmacy.

** For all beneficiaries except ADSMs, select brand-name maintenance medications (taken for long-term conditions) may only be filled twice at retail and then must be filled through home delivery or military pharmacy.

Dated: September 15, 2026.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF DEFENSE

Office of the Secretary

U.S. Strategic Command Strategic Advisory Group; Notice of Federal Advisory Committee Closed Meeting; Republication

AGENCY: Office of the Chairman of the Joint Chiefs of Staff, Department of Defense (DoD).

ACTION: Notice of Federal Advisory Committee closed meeting; republication.

SUMMARY: The DoD (referred to herein as “Department of War” or “DoW”) is publishing this notice to announce that the following Federal Advisory Committee meeting of the U.S. Strategic Command Strategic Advisory Group will take place.

DATES:

Day 1—Closed to the public Monday, September 21, 2026.

Day 2—Closed to the public Tuesday, September 22, 2026.

ADDRESSES: 900 SAC Boulevard, Offutt AFB, Nebraska 68113.

FOR FURTHER INFORMATION CONTACT: Mr. Derrick J. Besse, Designated Federal Officer (DFO), (402) 912–0322 (Voice), *derrick.j.besse.civ@mail.mil* (Email). Mailing address is 900 SAC Boulevard, Suite N3.170, Offutt AFB, Nebraska 68113.

SUPPLEMENTARY INFORMATION: This notice originally published in the **Federal Register** on September 16, 2026 (91 FR 58663). The necessary waiver language was missing from the **SUPPLEMENTARY INFORMATION** section. The notice is being reprinted in its entirety to include the waiver language.

Due to circumstances beyond the control of the DFO, the U.S. Strategic Command Strategic Advisory Group was unable to provide public notification required by 41 CFR 102–3.150(a) concerning its September 21–22, 2026 meeting. Accordingly, the Advisory Committee Management Officer for the Department of War, pursuant to 41 CFR 102–3.150(b), waives the 7-calendar day notification requirement.

This meeting is being held under the provisions of chapter 10 of the United States Code (U.S.C.) (commonly known as the Federal Advisory Committee Act or FACA), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102–3.140.

Purpose of the Meeting: The purpose of the meeting is to provide advice and recommendations on scientific, technical, intelligence, nuclear, and

policy-related issues to the Commander, U.S. Strategic Command.

Agenda: Topics include: Annual Stockpile Assessment, Strategic Landscape and Threats, Strategy and Policy Development, Readiness and Current Operations, Sustainment/Modernization and Transition Risk, Risk and Hard Problems, Developing Technologies Impact on the Strategic Environment.

Meeting Accessibility: Pursuant to 5 U.S.C. 552b, and 41 CFR 102–3.155, the DoW has determined that the meeting shall be closed to the public. Per delegated authority by the Chairman, Joint Chiefs of Staff, Admiral Richard A. Correll, Commander, U.S. Strategic Command, in consultation with his legal advisor, has determined in writing that the public interest requires that all sessions of this meeting be closed to the public because they will be concerned with matters listed in 5 U.S.C. 552b(c)(1).

Written Statements: Pursuant to 41 CFR 102–3.140(c), the public or interested organizations may submit written statements to the membership of the Strategic Advisory Group at any time or in response to the stated agenda of a planned meeting. Written statements should be submitted to the Strategic Advisory Group’s DFO; the DFO’s contact information can be obtained from the GSA’s FACA Database—<http://www.facadatabase.gov/>. Written

statements that do not pertain to a scheduled meeting of the Strategic Advisory Group may be submitted at any time. However, if individual comments pertain to a specific topic being discussed at a planned meeting, then these statements must be submitted no later than five business days prior to the meeting in question. The DFO will review all submitted written statements and provide copies to all the committee members.

Dated: September 16, 2026.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison
Officer, Department of Defense.

BILLING CODE 6001-FR-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2861-056]

Pontook Operating Limited Partnership & New Hampshire Department of Environmental Services; Notice of Intent To File License Application, Filing of Pre-Application Document (Pad), Commencement of Pre-Filing Process, and Scoping; Request for Comments on the Pad and Scoping Document, and Identification of Issues and Associated Study Requests

a. *Type of Filing:* Notice of Intent to File License Application for a New License and Commencing Pre-filing Process.

b. *Project No.:* 2861-056.

c. *Date Filed:* July 17, 2026.

d. *Submitted By:* Pontook Operating Limited Partnership (Pontook Partnership).

e. *Name of Project:* Pontook Hydroelectric Project.

f. *Location:* The project is located on the Androscoggin River, in the Town of Dummer, Coos County, New Hampshire.

g. *Filed Pursuant to:* 18 CFR part 5 of the Commission's Regulations.

h. *Potential Applicant Contact:* Sean McDermott, Licensing Manager, Pontook Limited Operating Partnership, 472 Main St., Berlin, NH 03570.

i. *FERC Contact:* Tamika Ali-Yerima at (202) 502-6391; or email tamika.ali-yerima@ferc.gov.

j. *Cooperating agencies:* Federal, state, local, and Tribal agencies with jurisdiction and/or special expertise with respect to environmental issues that wish to cooperate in the preparation of the environmental document should follow the instructions for filing such requests

described in item (o) below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of the environmental document cannot also intervene. See 94 FERC ¶ 61,076 (2001).

k. *With this notice, we are initiating informal consultation with:* (a) the U.S. Fish and Wildlife Service and/or NOAA Fisheries under section 7 of the Endangered Species Act and the joint agency regulations thereunder at 50 CFR, Part 402 and (b) the State Historic Preservation Officer, as required by section 106, National Historic Preservation Act, and the implementing regulations of the Advisory Council on Historic Preservation at 36 CFR 800.2.

l. With this notice, we are designating Pontook Partnership as the Commission's non-federal representative for carrying out informal consultation, pursuant to section 7 of the Endangered Species Act and section 106 of the National Historic Preservation Act.

m. Pontook Partnership filed with the Commission a Pre-Application Document (PAD; including a proposed process plan and schedule), pursuant to 18 CFR 5.6 of the Commission's regulations.

n. A copy of the PAD is available for review on the Commission's website (<http://www.ferc.gov>), using the "eLibrary" link. Enter the docket number, excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at fercolinesupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). A copy is also available via the contact in item (h) above.

Register online at <http://www.ferc.gov/docs-filing/esubscription.asp> to be notified via email of new filing and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

o. With this notice, we are soliciting comments on the PAD and Commission's staff Scoping Document 1 (SD1), as well as study requests. All comments on the PAD and SD1, and study requests, should be sent to the address above in item (h). In addition, all comments on the PAD and SD1, study requests, requests for cooperating agency status, and all communications to and from Commission staff related to the merits of the potential application must be filed with the Commission.

The Commission strongly encourages electronic filing. Please file all documents using the Commission's eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can

submit brief comments up to 10,000 characters, without prior registration, using the eComment system at <https://ferconline.ferc.gov/FERCONline.aspx>. For assistance, please contact FERC Online Support at FERCONlineSupport@ferc.gov. In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, M.D. 20852. The first page of any filing must clearly identify the project name and docket number: Pontook Hydroelectric Project (P-2861-056).

All filings with the Commission must bear the appropriate heading: "Comments on Pre-Application Document," "Study Requests," "Comments on Scoping Document 1," "Request for Cooperating Agency Status," or "Communications to and from Commission Staff." Any individual or entity interested in submitting study requests, commenting on the PAD or SD1, and any agency requesting cooperating status must do so on or before 5:00 p.m. Eastern Time on November 16, 2026.

p. *Scoping Process*

In accordance with the National Environmental Policy Act (NEPA), Commission staff will prepare either an environmental assessment (EA) or an environmental impact statement (EIS) (collectively referred to as the "NEPA document"). The primary goal of the scoping process is to identify the specific environmental issues and concerns that should be considered in the NEPA document. The Commission's scoping process will help determine the required level of analysis and satisfy NEPA scoping requirements, irrespective of whether the Commission prepares an EA or EIS.

Scoping Sessions

Commission staff will hold two scoping sessions in the vicinity of the project. We invite all interested agencies, Indian Tribes, non-governmental organizations (NGOs), and individuals to attend one or both of the meetings and assist staff in defining and clarifying the issues to be addressed. The dates, times, and locations of the scoping sessions will be provided in a future notice.

Scoping Document 1 (SD1), which outlines the subject areas to be

addressed in the NEPA document, was mailed to the individuals and entities on the Commission's mailing list and Pontook Partnership's PAD distribution list. Scoping session participants should come prepared to describe their issues and/or concerns. Please review the PAD and SD1 in preparation for the scoping sessions. Copies of SD1 will be available at the scoping meetings, or may be viewed on the web at <http://www.ferc.gov>, using the "eLibrary" link. Directions on how to obtain a copy of the PAD and SD1 are included above in item (n).

Based on all oral and written comments, a Scoping Document 2 (SD2) may be issued. SD2 may include a revised process plan and schedule, as well as a list of issues, identified through the scoping process.

Meeting Procedures

The scoping sessions will begin promptly at their respective start times listed above. There will not be a formal presentation by Commission staff when the session opens, and you may arrive any time after the scheduled start time. Individual oral comments will be taken on a one-on-one basis with a court reporter. This format is designed to receive the maximum number of oral comments in a convenient way during the timeframe allotted. If you wish to speak, Commission staff will hand out numbers in the order of your arrival. If a significant number of people are interested in providing oral comments in the one-on-one setting, a time limit may be implemented for each commentor. If all individuals who wish to provide comments have had an opportunity to do so, staff may conclude the session half an hour earlier than the scheduled time.

Your oral comments will be recorded by the court reporter and become part of the public record for this proceeding. Transcripts will be publicly available on FERC's eLibrary system [see item (n) above for instructions on using eLibrary].

Although there will not be a formal presentation, Commission staff will be available throughout the scoping session to answer your questions about the environmental review process. Representatives from Pontook Partnership will also be present to answer project-specific questions.

Proper conduct will help the sessions maintain a respectful atmosphere for attendees to provide comments effectively. Loudspeakers, lighting, oversized visual aids, other visual or audible disturbances, and disruptive video and photographic equipment are not permitted. Recorded interviews are

also not permitted within the session space. FERC reserves the right to end the session if disruptions interfere with the opportunity for individuals to provide oral comments or if there is a safety or security risk. Please see Appendix C of the SD1 for additional information on the session format and conduct.

It is important to note that the Commission provides equal consideration to all comments received, whether filed in written form or provided orally at a scoping session.

q. *Environmental Site Review:* The applicant and Commission staff will conduct an environmental site review of the project. The date, time, and location of the environmental site review will be provided in a future notice.

r. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502-6595 or OPP@ferc.gov.

(Authority: 18 CFR 2.1)

Dated: September 15, 2026.

Debbie-Anne A. Reese,
Secretary.

[FR Doc. 2026-19198 Filed 9-17-26; 8:45 am]

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2911-046]

Southeast Alaska Power Agency; Notice of Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* Amendment of license to modify project boundary and delete transmission line from license.

b. *Project No.:* 2911-046.

c. *Date Filed:* May 26, 2026, as supplemented August 13, 2026.

d. *Applicant:* Southeast Alaska Power Agency.

e. *Name of Project:* Swan Lake Project.

f. *Location:* The project is located on Falls Creek in Ketchikan Gateway Borough, Alaska.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. *Applicant Contact:* Mr. Robert Siedman, CEO, Southeast Alaska Power Agency, 55 Don Finney Lane, Ketchikan, AK 99901, (907) 228-2281, rsiedman@seapahydro.org.

i. *FERC Contact:* Mr. Steven Sachs, (202) 502-8666, Steven.Sachs@ferc.gov.

j. *Deadline for filing comments, motions to intervene, and protests:* October 15, 2026, 5:00 p.m. Eastern Time.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The first page of any filing should include the docket number P-2911-046. Comments emailed to Commission staff are not part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Request:* The applicant proposes to amend the project to delete the 30.5-mile-long Swan to Bailey transmission line from the project license. The applicant states that with the construction of the connected Swan-Tyee Intertie, the Swan to Bailey line is no longer a primary transmission line for the Swan Lake Hydroelectric Project and is not part of the licensed project. The applicant does not propose any changes to the line beyond administratively removing it from the license, and would continue to operate and maintain the line as it has done in the past. Jurisdiction over the transmission line right-of-way would convert to the current landowners.

l. *Locations of the application:* This filing may be viewed on the

Commission's website at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at <http://www.ferc.gov/docs-filing/esubscription.asp> to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1-866-208-3676 or email FERCOnlineSupport@ferc.gov, for TTY, call (202) 502-8659.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

n. *Comments, Protests, or Motions to Intervene*: Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. *Filing and Service of Documents*: Any filing must: (1) bear in all capital letters the title "COMMENTS", "PROTEST", or "MOTION TO INTERVENE" as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

p. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502-6595 or OPP@ferc.gov.

(Authority: 18 CFR 2.1)

Dated: September 15, 2026.

Debbie-Anne A. Reese,
Secretary.

[FR Doc. 2026-19197 Filed 9-17-26; 8:45 am]

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP26-560-000]

Dauphin Island Gathering Partners; Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Dauphin Island Gathering Partners Abandonment Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental document that will discuss the environmental impacts of the Dauphin Island Gathering Partners Abandonment Project involving construction and operation of facilities by Dauphin Island Gathering Partners (DIGP) in Mobile County, Alabama, Alabama state waters, and Mobile and Main Pass Blocks of federal offshore waters. The Commission will use this environmental document in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies regarding the project. As part of the National Environmental Policy Act (NEPA) review process, the Commission takes into account concerns the public may have about proposals and the environmental impacts that could result from its action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. This gathering of public input is referred to as "scoping." The main goal of the scoping process is to focus the analysis in the environmental document on the important environmental issues. Additional information about the Commission's NEPA process is described below in the *NEPA Process and Environmental Document* section of this notice.

By this notice, the Commission requests public comments on the scope of issues to address in the environmental document. To ensure that your comments are timely and properly recorded, please submit your comments so that the Commission receives them in Washington, DC on or before 5:00 p.m. Eastern Time on October 15, 2026. Comments may be submitted in written form. Further details on how to submit comments are provided in the *Public Participation* section of this notice.

Your comments should focus on the potential environmental effects,

reasonable alternatives, and measures to avoid or lessen environmental impacts. Your input will help the Commission staff determine what issues they need to evaluate in the environmental document. Commission staff will consider all written comments during the preparation of the environmental document.

If you submitted comments on this project to the Commission before the opening of this docket on July 31, 2026, you will need to file those comments in Docket No. CP26-560-000 to ensure they are considered as part of this proceeding.

This notice is being sent to the Commission's current environmental mailing list for this project. State and local government representatives should notify their constituents of this proposed project and encourage them to comment on their areas of concern.

DIGP provided landowners with a fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" which addresses typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. This fact sheet along with other landowner topics of interest are available for viewing on the FERC website (www.ferc.gov) under the Natural Gas, Landowner Topics link.

Public Participation

There are three methods you can use to submit your comments to the Commission. Please carefully follow these instructions so that your comments are properly recorded. The Commission encourages electronic filing of comments and has staff available to assist you at (866) 208-3676 or FERCOnlineSupport@ferc.gov.

(1) You can file your comments electronically using the eComment feature, which is located on the Commission's website (www.ferc.gov) under the link to FERC Online. Using eComment is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically by using the eFiling feature, which is located on the Commission's website (www.ferc.gov) under the link to FERC Online. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on "eRegister." You will be asked to select the type of filing you are making; a comment on a particular project is considered a "Comment on a Filing"; or

(3) You can file a paper copy of your comments by mailing them to the Commission. Be sure to reference the project docket number (CP26–560–000) on your letter. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Additionally, the Commission offers a free service called eSubscription which makes it easy to stay informed of all issuances and submittals regarding the dockets/projects to which you subscribe. These instant email notifications are the fastest way to receive notification and provide a link to the document files which can reduce the amount of time you spend researching proceedings. Go to <https://www.ferc.gov/ferc-online/overview> to register for eSubscription.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502–6595 or OPP@ferc.gov.

Summary of the Proposed Project

DIGP proposes to abandon about 119.3 miles of existing natural gas pipelines and related appurtenances in Mobile County, Alabama, Alabama state waters, and Mobile and Main Pass Blocks of federal offshore waters, known as the Dauphin Island Gathering Partners Abandonment Project. DIGP proposes to abandon its system given that is no longer economically feasible due to the depletion of attached reserves and the lack of new lease activity in the vicinity. DIGP also states that abandonment is needed to eliminate environmental and safety risks due to aging energy infrastructure and harsh offshore environment conditions.

The Dauphin Island Gathering Partners Abandonment Project would consist of the following facilities:

- abandonment in place and by removal 3.88 and 0.04 miles, respectively, of onshore 20-inch-diameter pipeline on Line 70 in Mobile County, Alabama;
- abandonment in place and by removal 3.43 and 0.05, respectively, of onshore 24-inch-diameter pipeline on Line 71 in Mobile County, Alabama;
- abandonment in place 8.65 and 8.62 miles of existing line 70 and Line 71, respectively, in Alabama state waters;

- abandonment in place 47.25 miles of offshore 24-inch-diameter pipeline on the Line 11355 in Alabama state waters and federal offshore waters, including disconnecting from the base of the riser at MP–225 Platform;

- abandonment by removal 17.75 miles of Line 11355 within the Significant Sediment Resource Area in federal offshore waters;

- abandonment in place 29.66 miles of offshore 20-inch-diameter pipeline on Line 10824, including a disconnection from the subsea spool tie-in location at the MP–164 subsea valve tie-in and a disconnection from the riser base subsea spool at the MP–225 Platform in federal offshore waters; and

- abandonment of risers by removal at the AST–73 Platform, including abandonment by removal 0.04 mile of piping associated with the tin-in to the riser and subsea spool sections of the AST–73 Platform in Alabama state waters.

The general location of the project facilities is shown in appendix 1.¹

Land Requirements for Construction

Abandonment of the proposed facilities would affect 31.4 acres of land onshore and 650.8 acres of land offshore, including 1.4 acres of state waters and 649.5 acres of federal waters. Onshore abandonment activities would be associated with portions of Line 70 and Line 71 pipelines, the Coden Valve Yard, the Mobile Bay Gas Processing Plant, and a third-party facility directly south of and adjacent to the Coden Valve Yard. Offshore abandonment activities would be associated with portions of Line 70 and Line 71, Line 11355, and Line 10824.

NEPA Process and the Environmental Document

Any environmental document issued by the Commission will discuss impacts that could occur as a result of the construction and operation of the proposed project under the relevant general resource areas:

- geology and soils;
- water resources and wetlands;
- vegetation and wildlife;
- threatened and endangered species;
- cultural resources;
- land use;
- air quality and noise; and
- reliability and safety.

¹ The appendices referenced in this notice will not appear in the **Federal Register**. Copies of the appendices were sent to all those receiving this notice in the mail and are available at www.ferc.gov using the link called “eLibrary.” For instructions on connecting to eLibrary, refer to the last page of this notice. For assistance, contact FERC at FERCOnlineSupport@ferc.gov or call toll free, (886) 208–3676 or TTY (202) 502–8659.

Commission staff will also evaluate reasonable alternatives to the proposed project or portions of the project and make recommendations on how to lessen or avoid impacts on the various resource areas. Your comments will help Commission staff identify and focus on the issues that might have an effect on the human environment and potentially eliminate others from further study and discussion in the environmental document.

Following this scoping period, Commission staff will determine whether to prepare an Environmental Assessment (EA) or an Environmental Impact Statement (EIS). The EA or the EIS will present Commission staff's independent analysis of the issues. If Commission staff prepares an EA, a *Notice of Schedule for the Preparation of an Environmental Assessment* will be issued. The EA may be issued for an allotted public comment period. The Commission would consider timely comments on the EA before making its decision regarding the proposed project. If Commission staff prepares an EIS, a *Notice of Intent to Prepare an EIS/ Notice of Schedule* will be issued, which will open up an additional comment period. Staff will then prepare a draft EIS which will be issued for public comment. Commission staff will consider all timely comments received during the comment period on the draft EIS and revise the document, as necessary, before issuing a final EIS. Any EA or draft and final EIS will be available in electronic format in the public record through eLibrary² and the Commission's natural gas environmental documents web page (<https://www.ferc.gov/industries-data/natural-gas/environment/environmental-documents>). If eSubscribed, you will receive instant email notification when the environmental document is issued.

With this notice, the Commission is asking agencies with jurisdiction by law and/or special expertise with respect to the environmental issues of this project to formally cooperate in the preparation of the environmental document.³ Agencies that would like to request cooperating agency status should follow the instructions for filing comments provided under the *Public Participation* section of this notice.

² For instructions on connecting to eLibrary, refer to the last page of this notice.

³ Cooperating agency responsibilities are addressed in Section 107(a)(3) of NEPA (42 U.S.C. 4336(a)(3)).

Consultation Under Section 106 of the National Historic Preservation Act

In accordance with the Advisory Council on Historic Preservation's implementing regulations for section 106 of the National Historic Preservation Act, the Commission is using this notice to initiate consultation with the applicable State Historic Preservation Office(s), and to solicit their views and those of other government agencies, interested Indian tribes, and the public on the project's potential effects on historic properties.⁴ The environmental document for this project will document findings on the impacts on historic properties and summarize the status of consultations under section 106.

Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; Native American Tribes; environmental and public interest groups; other interested parties; and local libraries and media outlets. This list also includes all affected landowners (as defined in the Commission's regulations) who are potential right-of-way grantors, whose property may be used temporarily for project purposes, or who own homes within certain distances of aboveground facilities, and anyone who submits comments on the project and includes a mailing address with their comments. Commission staff will update the environmental mailing list as the analysis proceeds to ensure that Commission notices related to this environmental review are sent to all individuals, organizations, and government entities interested in and/or potentially affected by the proposed project.

If you need to make changes to your name/address, or if you would like to remove your name from the mailing list, please complete one of the following steps:

(1) Send an email to GasProjectAddressChange@ferc.gov stating your request. You must include the docket number CP26-560-000 in your request. If you are requesting a change to your address, please be sure to include your name and the correct address. If you are requesting to delete your address from the mailing list, please include your name and address

⁴ The Advisory Council on Historic Preservation's regulations are at Title 36, Code of Federal Regulations, Part 800. Those regulations define historic properties as any prehistoric or historic district, site, building, structure, or object included in or eligible for inclusion in the National Register of Historic Places.

as it appeared on this notice. This email address is unable to accept comments.

OR

(2) Return the attached "Mailing List Update Form" (appendix 2).

Additional Information

Additional information about the project is available from the FERC website at www.ferc.gov using the eLibrary link. Click on the eLibrary link, click on "General Search" and enter the docket number in the "Docket Number" field. Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov or (866) 208-3676, or for TTY, contact (202) 502-8659. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

Public sessions or site visits will be posted on the Commission's calendar located at <https://www.ferc.gov/news-events/events> along with other related information.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings

Take notice that the Commission received the following Natural Gas Pipeline Rate and Refund Report filings:

Filings Instituting Proceedings

Docket Numbers: RP26-1253-000.

Applicants: Gulf South Pipeline Company, LLC.

Description: Compliance filing: Compliance Tariff Filing to Docket No. CP25-547-000, et al. to be effective 10/1/2026.

Filed Date: 9/14/26.

Accession Number: 20260914-5249.

Comment Date: 5 p.m. 9/28/26.

Docket Numbers: RP26-1255-000.

Applicants: Texas Gas Transmission, LLC.

Description: Compliance filing: Compliance Tariff Filing to Docket No. CP25-549-000, et al. to be effective 10/1/2026.

Filed Date: 9/14/26.

Accession Number: 20260914-5262.

Comment Date: 5 p.m. 9/28/26.

Docket Numbers: RP26-1256-000.

Applicants: Just Energy Solutions Inc., IGS Energy.

Description: Joint Petition for Limited Waiver of Capacity Release Regulations, et al. of IGS Energy, et al.

Filed Date: 9/14/26.

Accession Number: 20260914-5279.

Comment Date: 5 p.m. 9/28/26.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

Filings in Existing Proceedings

Docket Numbers: RP25-858-006.

Applicants: ANR Pipeline Company.

Description: Compliance filing: Compliance to Stipulation and Agreement of Settlement—RP25-858 to be effective 11/1/2025.

Filed Date: 9/15/26.

Accession Number: 20260915-5091.

Comment Date: 5 p.m. 9/28/26.

Docket Numbers: RP26-1109-001.

Applicants: Vector Pipeline L.P.

Description: Compliance filing: Amendment/Substitute Record to be effective 1/1/2027.

Filed Date: 9/14/26.

Accession Number: 20260914-5159.

Comment Date: 5 p.m. 9/28/26.

Any person desiring to protest in any of the above proceedings must file in accordance with Rule 211 of the Commission's Regulations (18 CFR 385.211) on or before 5:00 p.m. Eastern time on the specified comment date.

The filings are accessible in the Commission's eLibrary system (<https://elibrary.ferc.gov/idmws/search/fercgensearch.asp>) by querying the docket number.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: <http://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. For other information, call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502-6595 or OPP@ferc.gov.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission**

[Docket No. IC26–36–000]

Commission Information Collection Activities (Ferc–521); Comment Request; Extension**AGENCY:** Federal Energy Regulatory Commission.**ACTION:** Notice of information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995 (PRA), the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on FERC–521: Payments for Benefits from Headwater Improvements (OMB Control No 1902–0087) which will be submitted to the Office of Management and Budget (OMB) for a review of the information collection requirements. There are no proposed changes to the reporting requirements. No comments were received in the 60-day comment period.

DATES: Comments on the collection of information are due October 19, 2026.

ADDRESSES: Send written comments on FERC–521 to OMB through https://www.reginfo.gov/public/do/PRA/icrPublicCommentRequest?ref_nbr=202607-1902-007. You can also visit <https://www.reginfo.gov/public/do/>

PRAMain and use the drop-down under “Currently under Review” to select the “Federal Energy Regulatory Commission” where you can see the open opportunities to provide comments. Comments should be sent within 30 days of publication of this notice.

Please submit a copy of your comments to the Commission via email to DataClearance@FERC.gov. You must specify the docket No. (IC26–36–000) and the FERC Information Collection number (FERC–521) in your email. If you are unable to file electronically, comments may be filed by USPS mail or by hand (including courier) delivery:

- *Mail via U.S. Postal Service Only:* Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.

- *All other delivery methods:* Federal Energy Regulatory Commission, Secretary of the Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Docket: To view comments and issuances in this docket, please visit <https://elibrary.ferc.gov/eLibrary/search>.

FOR FURTHER INFORMATION CONTACT:

Kayla Williams, (202) 502–6468.
DataClearance@FERC.gov

SUPPLEMENTARY INFORMATION:

Title: FERC–521, Payments for Benefits from Headwater Improvements
OMB Control No.: 1902–0087

Type of Request: Three-year extension of the FERC–521 information collection

requirements with no changes to the reporting requirements.

Abstract: The purpose of FERC–521 is to implement information collections pursuant to Section 10(f) of the Federal Power Act (FPA). Section 10(f) of the FPA requires hydropower licensees to reimburse upstream headwater project owners for an equitable portion of the benefits it receives as a result of construction work related to headwater improvements. These benefits, referred to as headwater benefits, are the additional energy production possible at a downstream hydropower project resulting from the regulation of river flows by an upstream storage reservoir. The Commission requires federal agencies and owners of non-federal hydropower projects to file data for determining headwater benefits as outlined in 18 Code of Federal Regulations (CFR) Part 11.

Type of Respondents: There are two types of entities that respond, Federal and Non-Federal storage and hydropower project owners. The Federal entities that typically respond include the U.S. Army Corps of Engineers and the U.S. Department of Interior Bureau of Reclamation. The Non-Federal entities may consist of any Municipal or Non-Municipal hydropower project owner.

Estimate of Annual Burden¹ and cost:² The Commission estimates the total Public Reporting Burden for this information collection as:

	Number of respondents	Annual number of responses per respondent	Total number of responses	Average burden & cost per response	Total annual burden hours & total annual cost	Cost per respondent (\$)
	(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1)
Federal and Non-Federal project owners.	3	1	3	40 hrs.; \$4,080	120 hrs.; \$12,240	\$4,080

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency’s estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those

who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: September 15, 2026.

Debbie-Anne A. Reese,

Secretary.

[FR Doc. 2026–19200 Filed 9–17–26; 8:45 am]

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission**

[Project No. 10441–020]

City of Aspen, Colorado; Notice of Application Accepted for Filing and Soliciting Motions To Intervene and Protests

Take notice that the following hydroelectric application has been filed

¹ Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further

explanation of what is included in the information collection burden, refer to 5 Code of Federal Regulations 1320.3.

² FERC estimates that industry hourly costs are similar to the Commission FY 2026 average salary plus benefits of \$213,003 per year (or \$102/hour).

with the Commission and is available for public inspection.

a. *Type of Application*: Subsequent Minor License.

b. *Project No.*: 10441–020.

c. *Date filed*: April 8, 2025.

d. *Applicant*: City of Aspen, Colorado.

e. *Name of Project*: Maroon Creek Hydroelectric Project.

f. *Location*: The existing project is located on Maroon Creek near the city of Aspen in Pitkin County, Colorado. The project occupies 0.575 acres of land managed by the U.S. Forest Service in the White River National Forest.

g. *Filed Pursuant to*: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact*: Mr. Phil Overeynder, Utility Director, 427 Rio Grande Place, Aspen, CO 81611 (970) 920–5000, phil.overeynder@aspen.gov.

i. *FERC Contact*: Jane Dalglish, Coordinator, West Branch, Division of Hydropower Licensing; (503) 552–2718; jane.dalglish@ferc.gov.

j. *Deadline for filing motions to intervene and protests*: By 5:00 p.m. Eastern Time on November 16, 2026.

The Commission strongly encourages electronic filing. Please file motions to intervene and protests and requests for cooperating agency status using the Commission's eFiling system at <https://ferconline.ferc.gov/FEROnline.aspx>. Commenters can submit brief comments up to 10,000 characters, without prior registration, using the eComment system at <https://ferconline.ferc.gov/QuickComment.aspx>. For assistance, please contact FERC Online Support at, (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, please send a paper copy via U.S. Postal Service to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. All filings must clearly identify the project name and docket number on the first page: Maroon Creek Hydroelectric Project P–10441–020.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. This application has been accepted but is not ready for environmental analysis at this time.

l. *Project Description*: The existing project works consist of (a) a 10-foot-high, 40-foot-long reinforced concrete dam with a crest elevation of 8,245.75 feet (the Maroon Creek diversion dam); (b) a small impoundment; (c) an intake structure at the dam; (d) a 39-inch-diameter, 5,563-foot-long buried reinforced concrete penstock; (e) a 27-inch-diameter, 1,317-foot-long buried reinforced concrete penstock together with a 110-foot section of steel penstock at the plant site; (f) a powerhouse with a 450 kW turbine-generator unit; (g) a 200-foot-long trapezoidal open channel tailrace, returning the water to Maroon Creek; (h) 0.48 kV generator leads to a three-phase, 0.48/24.9 kV step-up transformer; (i) an approximately 400-foot-long, 24.9 kV overhead power line tap connection to the Aspen Highlands circuit operated by Holy Cross Energy; and (j) appurtenant facilities.

The application describes the addition of up to 50 kW of generating capacity through two new small turbines, with two new attached generators placed at the existing diversion dam. These new units would generate power from the bypass flows released from the diversion dam without changing the time or the amount of those releases. Flows utilized by new generation equipment would be returned to the same location on the stream immediately below the dam and headgate.

m. A copy of the application can be viewed on the Commission's website at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket

number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at FEROnlineSupport@ferc.gov or call toll-free, (866) 208–3676 or (202) 502–8659 (TTY).

You may also register online at <https://ferconline.ferc.gov/FEROnline.aspx> to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

n. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502–6595 or OPP@ferc.gov.

o. Anyone may submit a protest or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, 385.211, and 385.214. In determining the appropriate action to take, the Commission will consider all protests filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any protests or motions to intervene must be received on or before the specified deadline date for the particular application.

All filings must (1) bear in all capital letters the title "PROTEST" or "MOTION TO INTERVENE"; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name of the person submitting the filing; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. Agencies may obtain copies of the application directly from the applicant. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application.

p. *Procedural schedule*: The application will be processed according to the following schedule. Revisions to the schedule will be made as appropriate

Milestone	Date
Issue Scoping Notice	October 2026.
Scoping Comments Due	November 2026.
Issue Notice of Ready for Environmental Analysis	January 2027.

(Authority: 18 CFR 2.1.)

Dated: September 15, 2026.

Carlos D. Clay,

Deputy Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 3015-023]

Southeast Alaska Power Agency; Notice of Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* Amendment of license to modify project boundary and delete transmission line from license.

b. *Project No.:* 3015-023.

c. *Date Filed:* June 29, 2026.

d. *Applicant:* Southeast Alaska Power Agency.

e. *Name of Project:* Tyee Lake Project.

f. *Location:* The project is located on Tyee Creek in Wrangell Borough, Alaska.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. *Applicant Contact:* Mr. Robert Siedman, CEO, Southeast Alaska Power

Agency, 55 Don Finney Lane, Ketchikan, AK 99901, (907) 228-2281, rsiedman@seapahydro.org.

i. *FERC Contact:* Mr. Steven Sachs, (202) 502-8666, Steven.Sachs@ferc.gov.

j. *Deadline for filing comments, motions to intervene, and protests:* October 15, 2026, 5:00 p.m. Eastern Time.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include the docket number P-3015-023. Comments emailed to Commission staff are not part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Request:* The applicant proposes to amend the project to delete the 79.5-mile-long Tyee-Petersburg transmission line from the project license. The applicant states that with the construction of the connected Swan-Tyee Intertie, the Tyee-Petersburg line is no longer a primary transmission line for the Tyee Lake Hydroelectric Project and is not part of the licensed project. The applicant does not propose any changes to the line beyond administratively removing it from the license, and would continue to operate and maintain the line as it has done in the past. Jurisdiction over the

transmission line right-of-way would convert to the current landowners.

l. *Locations of the application:* This filing may be viewed on the Commission's website at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at <http://www.ferc.gov/docs-filing/esubscription.asp> to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1-866-208-3676 or email FERCOnlineSupport@ferc.gov, for TTY, call (202) 502-8659.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

n. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. *Filing and Service of Documents:* Any filing must: (1) bear in all capital letters the title "COMMENTS", "PROTEST", or "MOTION TO INTERVENE" as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

p. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502-6595 or OPP@ferc.gov.

(Authority: 18 CFR 2.1)

Dated: September 15, 2026.

Debbie-Anne A. Reese,
Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP26–572–000]

Southern Star Central Gas Pipeline, Inc.; Notice of Application and Establishing Intervention Deadline

Take notice that on August 31, 2026, Southern Star Central Gas Pipeline, Inc. (Southern Star), 4700 State Route 56, Owensboro, Kentucky 42301, filed an application under section 7(c) of the Natural Gas Act (NGA) and Part 157 of the Commission's regulations requesting authorization for its Everyg McNew Power Plant Delivery Project (Project). Southern Star proposes to (1) construct approximately 1.6 miles of 30-inch-diameter pipeline, (2) construct the new Hutchinson Compressor Station (CS) comprised of three new compressor units totaling 5,700 horsepower, and (3) construct one new meter station, all located in Reno County, Kansas. The project also includes ancillary modifications to Southern Star's existing Hesston CS in Harvey County, Kansas and Stafford CS in Stafford County, Kansas. The Project is designed to provide approximately 123,000 dekatherms per day of firm natural gas transportation to the Everyg McNew Power Plant in Reno County, Kansas. Southern Star estimates the total cost of the Project to be \$75.5 million, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from

FERC Online Support at (202) 502–6652 (toll free at 1–866–208–3676) or email at ferconlinesupport@ferc.gov, or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at public.reference.room@ferc.gov.

Any questions regarding the proposed project should be directed to Will Wathen, Director, Rates & Regulatory, Southern Star Central Gas Pipeline, Inc., 4700 State Route 56, Owensboro, Kentucky 42301, by phone at (270) 925–1969, or by email at will.wathen@southernstar.com.

Pursuant to section 157.9 of the Commission's Rules of Practice and Procedure,¹ within 90 days of this Notice the Commission staff will either: complete its environmental review and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or environmental assessment (EA) for this proposal. The filing of an EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file comments on the project, you can protest the filing, and you can file a motion to intervene in the proceeding. There is no fee or cost for filing comments or intervening. The deadline for filing a motion to intervene is 5:00 p.m. Eastern Time on October 6, 2026. How to file protests, motions to intervene, and comments is explained below.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation (OPP) at (202) 502–6595 or OPP@ferc.gov.

Comments

Any person wishing to comment on the project may do so. Comments may include statements of support or objections, to the project as a whole or

specific aspects of the project. The more specific your comments, the more useful they will be.

Protests

Pursuant to sections 157.10(a)(4)² and 385.211³ of the Commission's regulations under the NGA, any person⁴ may file a protest to the application. Protests must comply with the requirements specified in section 385.2001⁵ of the Commission's regulations. A protest may also serve as a motion to intervene so long as the protestor states it also seeks to be an intervenor.

To ensure that your comments or protests are timely and properly recorded, please submit your comments on or before 5:00 p.m. Eastern Time on October 6, 2026.

There are three methods you can use to submit your comments or protests to the Commission. In all instances, please reference the Project docket number CP26–572–000 in your submission.

(1) You may file your comments electronically by using the eComment feature, which is located on the Commission's website at www.ferc.gov under the link to Documents and Filings. Using eComment is an easy method for interested persons to submit brief, text-only comments on a project;

(2) You may file your comments or protests electronically by using the eFiling feature, which is located on the Commission's website (www.ferc.gov) under the link to Documents and Filings. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on "eRegister." You will be asked to select the type of filing you are making; first select "General" and then select "Comment on a Filing"; or

(3) You can file a paper copy of your comments or protests by mailing them to the following address below. Your written comments must reference the Project docket number (CP26–572–000).

To file via USPS: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other courier: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

² 18 CFR 157.10(a)(4).

³ 18 CFR 385.211.

⁴ Persons include individuals, organizations, businesses, municipalities, and other entities. 18 CFR 385.102(d).

⁵ 18 CFR 385.2001.

¹ 18 CFR 157.9.

The Commission encourages electronic filing of comments (options 1 and 2 above) and has eFiling staff available to assist you at (202) 502–8258 or FercOnlineSupport@ferc.gov.

Persons who comment on the environmental review of this project will be placed on the Commission's environmental mailing list, and will receive notification when the environmental documents (EA or EIS) are issued for this project and will be notified of meetings associated with the Commission's environmental review process.

The Commission considers all comments received about the project in determining the appropriate action to be taken. However, the filing of a comment alone will not serve to make the filer a party to the proceeding. To become a party, you must intervene in the proceeding. For instructions on how to intervene, see below.

Interventions

Any person, which includes individuals, organizations, businesses, municipalities, and other entities,⁶ has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders issued in this proceeding and to subsequently challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and Procedure⁷ and the regulations under the NGA⁸ by the intervention deadline for the project, which is 5:00 p.m. Eastern Time on October 6, 2026. As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as your interest in the proceeding. For an individual, this could include your status as a landowner, ratepayer, resident of an impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at <https://www.ferc.gov/resources/guides/how-to/intervene.asp>.

There are two ways to submit your motion to intervene. In both instances, please reference the Project docket number CP26–572–000 in your submission.

(1) You may file your motion to intervene by using the Commission's

eFiling feature, which is located on the Commission's website (www.ferc.gov) under the link to Documents and Filings. New eFiling users must first create an account by clicking on "eRegister." You will be asked to select the type of filing you are making; first select "General" and then select "Intervention." The eFiling feature includes a document-less intervention option; for more information, visit <https://www.ferc.gov/docs-filing/efiling/document-less-intervention.pdf>; or

(2) You can file a paper copy of your motion to intervene, along with three copies, by mailing the documents to the address below. Your motion to intervene must reference the Project docket number CP26–572–000.

To file via USPS: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other courier: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission encourages electronic filing of motions to intervene (option 1 above) and has eFiling staff available to assist you at (202) 502–8258 or FercOnlineSupport@ferc.gov.

Protests and motions to intervene must be served on the applicant either by mail at: Will Wathen, Director, Rates & Regulatory, Southern Star Central Gas Pipeline, Inc., 4700 State Route 56, Owensboro, Kentucky 42301, or by email (with a link to the document) at will.wathen@southernstar.com. Any subsequent submissions by an intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online. Service can be via email with a link to the document.

All timely, unopposed⁹ motions to intervene are automatically granted by operation of Rule 214(c)(1).¹⁰ Motions to intervene that are filed after the intervention deadline are untimely, and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations.¹¹ A person obtaining party status will be placed on the service list maintained by

the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from OPP at (202) 502–6595 or on the FERC website at www.ferc.gov using the "eLibrary" link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to www.ferc.gov/docs-filing/esubscription.asp.

Intervention Deadline: 5:00 p.m. Eastern Time on October 6, 2026.

(Authority: 18 CFR 2.1)

Dated: September 15, 2026.

Debbie-Anne A. Reese,
Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 1267–136]

Greenwood County, South Carolina; Notice of Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* Amendment of license to modify emergency spillway, add flood protection berm, and raise bulkheads.

b. *Project No.:* 1267–136.

c. *Date Filed:* August 11, 2026.

d. *Applicant:* Greenwood County, South Carolina.

e. *Name of Project:* Buzzards Roost Project.

f. *Location:* The project is located on the Saluda River in Greenwood, Laurens, and Newberry counties, South Carolina.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

⁶ 18 CFR 385.102(d).

⁷ 18 CFR 385.214.

⁸ 18 CFR 157.10.

⁹ The applicant has 15 days from the submittal of a motion to intervene to file a written objection to the intervention.

¹⁰ 18 CFR 385.214(c)(1).

¹¹ 18 CFR 385.214(b)(3) and (d).

h. *Applicant Contact*: Mr. Toby Chappell, County Manager, Park Plaza, Suite 102, 600 Monument Street, Box P-103, Greenwood, SC 29646, (864) 942-8507, tchappell@greenwoodsc.gov.

i. *FERC Contact*: Mr. Steven Sachs, (202) 502-8666, Steven.Sachs@ferc.gov.

j. *Cooperating agencies*: With this notice, the Commission is inviting federal, state, local, and Tribal agencies with jurisdiction and/or special expertise with respect to environmental issues affected by the proposal, that wish to cooperate in the preparation of any environmental document, if applicable, to follow the instructions for filing such requests described in item k. below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of any environmental document cannot also intervene. See 94 FERC ¶ 61,076 (2001).

k. *Deadline for filing comments, motions to intervene, and protests*: October 15, 2026, 5:00 p.m. Eastern Time.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include the docket number P-1267-136. Comments emailed to Commission staff are not part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must

also serve a copy of the document on that resource agency.

l. *Description of Request*: The applicant requests an amendment of license to improve the project's ability to safely pass large floods. The applicant intends to construct a new concrete emergency spillway downstream of the existing earthen emergency spillway, reconstruct the existing earthen emergency spillway to ensure controlled releases at prescribed flood elevations, excavate the emergency spillway channel to expand flow capacity, construct a new berm in a topographic saddle 500 to 1,000 feet east of the emergency spillway to retain the reservoir during a flood, and raise concrete bulkhead walls at the powerhouse and service spillway to prevent overtopping. Construction is expected to last approximately 12 months, beginning in April 2027. The applicant is proposing no changes to normal operation or generation facilities.

m. *Locations of the application*: This filing may be viewed on the Commission's website at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at <http://www.ferc.gov/docs-filing/esubscription.asp> to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1-866-208-3676 or email FERCOnlineSupport@ferc.gov, for TTY, call (202) 502-8659.

n. *Individuals desiring to be included on the Commission's mailing list* should so indicate by writing to the Secretary of the Commission.

o. *Comments, Protests, or Motions to Intervene*: Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

p. *Filing and Service of Documents*: Any filing must: (1) bear in all capital letters the title "COMMENTS", "PROTEST", or "MOTION TO INTERVENE" as applicable; (2) set forth in the heading the name of the applicant and the project number of the

application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

q. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502-6595 or OPP@ferc.gov.

(Authority: 18 CFR 2.1)

Dated: September 15, 2026.

BILLING CODE 6560-50-P

FEDERAL HOUSING FINANCE AGENCY

[No. 2026-N-12]

Proposed Collection; Comment Request

AGENCY: Federal Housing Finance Agency.

ACTION: Federal Home Loan Bank Capital Stock—60-Day notice of submission of information collection for approval from Office of Management and Budget.

SUMMARY: In accordance with the requirements of the Paperwork Reduction Act of 1995 (PRA), the Federal Housing Finance Agency (FHFA) is seeking public comment concerning an information collection known as “Federal Home Loan Bank Capital Stock,” which has been assigned control number 2590-0002 by the Office of Management and Budget (OMB). FHFA intends to submit the information collection to OMB for review and approval of a three-year extension of the control number, which is due to expire on November 30, 2026.

DATES: Interested persons may submit comments on or before November 17, 2026.

ADDRESSES: Submit comments to FHFA, identified by “Proposed Collection; Comment Request: ‘Federal Home Loan Bank Capital Stock, (No. 2026-N-12)’ ” by any of the following methods:

- **Agency Website:** <https://www.fhfa.gov/regulation/federal-register?comments=open>.

- **Email:** RegComments@fhfa.gov. Include “Proposed Collection; Comment Request: ‘Federal Home Loan Bank Capital Stock, (No. 2026-N-12)’ in the subject line of the message.

- **Mail/Hand Delivery:** Federal Housing Finance Agency, Fourth Floor, 400 Seventh Street SW, Washington, DC 20219, ATTENTION: Proposed Collection; Comment Request: “Federal Home Loan Bank Capital Stock, (No. 2026-N-12).” Please note that all mail sent to FHFA via U.S. Mail is routed through a national irradiation facility, a process that may delay delivery by approximately two weeks. For any time-sensitive correspondence, please plan accordingly.

FHFA invites comments on all aspects of the proposed rule and will take all comments into consideration before issuing a final rule. Comments, including any personally identifiable information such as name and contact information, will be posted to the electronic rulemaking docket on the FHFA public website at <https://www.fhfa.gov>, except as described below. Commenters should submit only information that the commenter wishes to make available publicly. FHFA will not redact personally identifiable information once it is submitted. Commenters who do not wish to be identified by their comments may submit their comments anonymously. FHFA may post only a single representative example of identical or substantially identical comments, and in such cases will generally identify the number of identical or substantially identical comments represented by the posted example. FHFA may, in its discretion, redact or refrain from posting all or any portion of any comment that contains content that is obscene, vulgar, profane, or threatens harm. All comments, including those that are redacted or not posted, will be retained in their original form in FHFA’s internal rulemaking file and will be considered as required by all applicable laws. Commenters who would like FHFA to consider any portion of their comment exempt from disclosure on the basis that it contains trade secrets, or financial, confidential or proprietary data or information, should follow the procedures in section IV.D. of FHFA’s *Policy on Communications with Outside Parties in Connection with FHFA Rulemakings*, see <https://www.fhfa.gov/document/policy-on-communications-with-outside-parties-in-connection-with-fhfa-rulemakings>. FHFA cannot guarantee that such data or information will remain confidential if disclosure is sought pursuant to an applicable statute or regulation. See 12 CFR 1202.8, 12

CFR 1214.2, and FHFA’s FOIA *Reference Guide* at <https://www.fhfa.gov/about/foia-reference-guide> for additional information.

FOR FURTHER INFORMATION CONTACT: Eric Raudenbush, Associate General Counsel, Eric.Raudenbush@fhfa.gov, (202) 649-3084 or Angela Supervielle, Assistant Counsel, Angela.Supervielle@fhfa.gov, (202) 649-3973 (these are not toll-free numbers). For TTY/TRS users with hearing and speech disabilities, dial 711 and ask to be connected to any of the contact numbers above.

SUPPLEMENTARY INFORMATION:

A. Paperwork Reduction Act

Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from OMB for each collection of information they conduct or sponsor. “Collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) to include agency requests or requirements that ten or more persons submit information to a third party.

Section 3506(c)(2)(A) of title 44 and 5 CFR 1320.8(d) requires Federal agencies to provide a 60-day notice¹ in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection of information to OMB for approval. FHFA’s collection of information set forth in this document is titled “Federal Home Loan Bank Capital Stock” (assigned control number 2590-0002 by OMB). To comply with the PRA requirement, FHFA is publishing notice of a proposed three-year extension of this collection of information and renewal of the control number, which is due to expire on November 30, 2026.

B. Background

The Federal Home Loan Bank System consists of eleven regional Federal Home Loan Banks (Banks) and the Office of Finance (a joint office of the Banks that issues and services the Banks’ debt securities). The Banks are wholesale financial institutions, organized under the authority of the Federal Home Loan Bank Act (Bank Act) to serve the public interest by enhancing the availability of residential housing finance and community lending credit through their member institutions and, to a limited extent, through certain eligible nonmembers. Each Bank is structured as a regional cooperative that is owned and controlled by member

¹ Following the close of this notice’s 60-day comment period, FHFA will publish a second notice with a 30-day comment period as required by 44 U.S.C. 3507(b) and 5 CFR 1320.10(a).

institutions located within its district, which are also its primary customers. An institution that is eligible for membership in a particular Bank must purchase and hold a prescribed minimum amount of the Bank's capital stock in order to become and remain a member of that Bank. With limited exceptions, only an institution that is a member of a Bank may obtain access to low cost secured loans, known as advances, or other products provided by that Bank.

Section 6 of the Bank Act establishes capital requirements for the Banks and requires FHFA to issue regulations prescribing uniform capital standards applicable to all of the Banks.² Section 6 also establishes parameters relating to the Banks' capital structures and requires that each Bank adopt a "capital structure plan" (capital plan) to establish, within those statutory parameters, its own capital structure and to establish requirements for, and govern transactions in, the Bank's capital stock.³ FHFA's regulations on Bank Capital Requirements, Capital Stock, and Capital Plans are located at 12 CFR part 1277.

C. Need For and Use of the Information Collection

Both the Bank Act and FHFA's regulations state that a Bank's capital plan must require its members to maintain a minimum investment in the Bank's capital stock, but both permit each Bank to determine for itself what that minimum investment is and how each member's required minimum investment is to be calculated.⁴ Although each Bank's capital plan establishes a slightly different method for calculating the required minimum stock investment for its members, each Bank's method is tied to some degree to both the level of assets held by the member institution (typically referred to as a "membership stock purchase requirement") and the amount of advances or other business engaged in between the member and the Bank (typically referred to as an "activity-based stock purchase requirement").

A Bank must collect information from its members to determine the minimum capital stock investment each member is required to maintain at any point in time. Although the information needed to calculate a member's required minimum investment and the precise method through which it is collected differ somewhat from Bank to Bank, the

Banks typically collect two types of information. First, in order to calculate and monitor compliance with its membership stock purchase requirement, a Bank typically requires each member to provide and/or confirm an annual report on the amount and types of assets held by that institution. Second, each time a Bank engages in a business transaction with a member, the Bank typically confirms with the member the amount of additional Bank capital stock, if any, the member must acquire in order to satisfy the Bank's activity-based stock purchase requirement and the method through which the member will acquire that stock.

D. Burden Estimate

FHFA has analyzed the time burden imposed on respondents by the two collections under this control number and estimates that the average total annual hour burden imposed on all respondents over the next three years will be 19,898 hours. This estimate is derived from the following calculations:

1. Membership Stock Purchase Requirement Submissions

FHFA estimates that the average annual number of current and former members and applicants for membership required to report information needed to calculate a membership stock purchase requirement will be 6,425, and that each institution will submit one report per year, resulting in an estimated total of 6,425 submissions annually. The estimate for the average time required to prepare, review, and submit each report is 0.7 hours. Accordingly, the estimate for the annual hour burden associated with membership stock purchase requirement submissions is (6,425 reports $\times$ 0.7 hours per report) = 4,498 hours.

2. Activity-Based Stock Purchase Requirement Submissions

FHFA estimates that the average number of daily transactions between Banks and members that will require the exchange of information to confirm the member's activity-based stock purchase requirement will be 295, and that there will be an average of 261 working days per year, resulting in an estimated 76,995 submissions annually. The estimate for the average preparation time per submission is 0.1 hours. Accordingly, the estimate for the annual hour burden associated with activity-based stock purchase requirement submissions is (76,995 submissions $\times$ 0.2 hours per submission) = 15,400 hours.

E. Comment Request

FHFA requests written comments on the following: (1) Whether the collection of information is necessary for the proper performance of FHFA functions, including whether the information has practical utility; (2) the accuracy of FHFA's estimates of the burdens of the collection of information; (3) ways to enhance the quality, utility, and clarity of the information collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

BILLING CODE 8070-01-P

FEDERAL HOUSING FINANCE AGENCY

[No. 2026-N-11]

Proposed Collection; Comment Request

AGENCY: Federal Housing Finance Agency.

ACTION: 60-Day notice of submission of information collection for approval from Office of Management and Budget.

SUMMARY: In accordance with the requirements of the Paperwork Reduction Act of 1995 (PRA), the Federal Housing Finance Agency (FHFA) is seeking public comments concerning an information collection known as "Members of the Banks," which has been assigned control number 2590-0003 by the Office of Management and Budget (OMB). FHFA intends to submit the information collection to OMB for review and approval of a three-year extension of the control number, which is due to expire on November 30, 2026.

DATES: Interested persons may submit comments on or before November 17, 2026.

ADDRESSES: Submit comments to FHFA, identified by "Proposed Collection; Comment Request: 'Members of the Banks, (No. 2026-N-11)'" by any of the following methods:

- *Agency Website:* <https://www.fhfa.gov/regulation/federal-register?comments=open>.

- *Email:* RegComments@fhfa.gov. Include "Proposed Collection; Comment Request: 'Members of the Banks, (No. 2026-N-11)'" in the subject line of the message.

² See 12 U.S.C. 1426(a).

³ See 12 U.S.C. 1426(b), (c).

⁴ See 12 U.S.C. 1426(c)(1); 12 CFR 1277.22, 1277.28(a).

• *Mail/Hand Delivery:* Federal Housing Finance Agency, Fourth Floor, 400 Seventh Street SW, Washington, DC 20219, ATTENTION: Proposed Collection; Comment Request: “Members of the Banks, (No. 2026–N–11).” Please note that all mail sent to FHFA via U.S. Mail is routed through a national irradiation facility, a process that may delay delivery by approximately two weeks. For any time-sensitive correspondence, please plan accordingly.

FHFA invites comments on all aspects of the proposed rule and will take all comments into consideration before issuing a final rule. Comments, including any personally identifiable information such as name and contact information, will be posted to the electronic rulemaking docket on the FHFA public website at <https://www.fhfa.gov>, except as described below. Commenters should submit only information that the commenter wishes to make available publicly. FHFA will not redact personally identifiable information once it is submitted. Commenters who do not wish to be identified by their comments may submit their comments anonymously. FHFA may post only a single representative example of identical or substantially identical comments, and in such cases will generally identify the number of identical or substantially identical comments represented by the posted example. FHFA may, in its discretion, redact or refrain from posting all or any portion of any comment that contains content that is obscene, vulgar, profane, or threatens harm. All comments, including those that are redacted or not posted, will be retained in their original form in FHFA’s internal rulemaking file and will be considered as required by all applicable laws. Commenters who would like FHFA to consider any portion of their comment exempt from disclosure on the basis that it contains trade secrets, or financial, confidential or proprietary data or information, should follow the procedures in section IV.D. of FHFA’s *Policy on Communications with Outside Parties in Connection with FHFA Rulemakings*, see <https://www.fhfa.gov/document/policy-on-communications-with-outside-parties-in-connection-with-fhfa-rulemakings>. FHFA cannot guarantee that such data or information will remain confidential if disclosure is sought pursuant to an applicable statute or regulation. See 12 CFR 1202.8, 12 CFR 1214.2, and FHFA’s *FOIA Reference Guide* at <https://www.fhfa.gov/about/foia-reference-guide> for additional information.

FOR FURTHER INFORMATION CONTACT: Eric Raudenbush, Associate General Counsel, Eric.Raudenbush@fhfa.gov, (202) 649–3084 or Angela Supervielle, Assistant Counsel, Angela.Supervielle@fhfa.gov, (202) 649–3973 (these are not toll-free numbers). For TTY/TRS users with hearing and speech disabilities, dial 711 and ask to be connected to any of the contact numbers above.

SUPPLEMENTARY INFORMATION:

A. Paperwork Reduction Act

Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from OMB for each collection of information they conduct or sponsor. “Collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) to include agency requests or requirements that ten or more persons submit information to a third party.

Section 3506(c)(2)(A) of title 44 and 5 CFR 1320.8(d) requires Federal agencies to provide a 60-day notice¹ in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection of information to OMB for approval. FHFA’s collection of information set forth in this document is titled “Members of the Banks” (assigned control number 2590–0003 by OMB). To comply with the PRA requirement, FHFA is publishing notice of a proposed three-year extension of this collection of information and renewal of the control number, which is due to expire on November 30, 2026.

B. Background

The Federal Home Loan Bank System consists of eleven regional Federal Home Loan Banks (Banks) and the Office of Finance (a joint office of the Banks that issues and services the Banks’ debt securities). The Banks are wholesale financial institutions, organized under the authority of the Federal Home Loan Bank Act (Bank Act) to serve the public interest by enhancing the availability of residential housing finance and community lending credit through their member institutions and, to a limited extent, through certain eligible nonmembers. Each Bank is structured as a regional cooperative that is owned and controlled by member institutions located within its district, which are also its primary customers. The Banks carry out their public policy functions primarily by providing low-

cost loans, known as advances, to their members. With limited exceptions, an institution may obtain advances and access other products and services provided by a Bank only if it is a member of that Bank.

The Bank Act limits membership in any Bank to specific types of financial institutions located within the Bank’s district that meet specific eligibility requirements. Section 4 of the Bank Act specifies the types of institutions that may be eligible for membership and establishes eligibility requirements that each type of applicant must meet in order to become a Bank member.² That provision also specifies that (with limited exceptions) an eligible institution may become a member only of the Bank of the district in which the institution’s “principal place of business” is located.³ With respect to the termination of Bank membership, section 6(d) of the Bank Act sets forth requirements pursuant to which an institution may voluntarily withdraw from membership or a Bank may terminate an institution’s membership for cause.⁴

C. Need For and Use of the Information Collection

FHFA’s “Members of the Banks” regulation, set forth at 12 CFR part 1263, implements those statutory provisions on Bank membership and otherwise establishes substantive and procedural requirements relating to the initiation and termination of Bank membership. Many of the provisions in the membership regulation require that an institution submit information to a Bank or to FHFA, in most cases to demonstrate compliance with statutory or regulatory requirements or to request action by the Bank or FHFA.

There are four types of information collections that may occur under part 1263. First, the regulation provides that (with limited exceptions) no institution may become a member of a Bank unless it has submitted to that Bank an application that documents the applicant’s compliance with the statutory and regulatory membership eligibility requirements and that otherwise includes all required information and materials.⁵ Second, the regulation provides applicants that have been denied membership by a Bank the option of appealing the decision to FHFA. To file such an appeal, an applicant must submit to FHFA a copy

² See 12 U.S.C. 1424(a).

³ See 12 U.S.C. 1424(b).

⁴ See 12 U.S.C. 1426(d).

⁵ See 12 CFR 1263.2(a), 1263.6–1263.9, 1263.11–1263.18.

¹ Following the close of this notice’s 60-day comment period, FHFA will publish a second notice with a 30-day comment period as required by 44 U.S.C. 3507(b) and 5 CFR 1320.10(a).

of the Bank's decision resolution denying its membership application and a statement of the basis for the appeal containing sufficient facts, information, and analysis to support the applicant's position.⁶ Third, the regulation provides that, in order to initiate a voluntary withdrawal from Bank membership, a member must submit to its Bank a written notice of intent to withdraw.⁷ Fourth, under certain circumstances, the regulation permits a member of one Bank to transfer its membership to a second Bank "automatically" without either initiating a voluntary withdrawal from the first Bank or submitting a membership application to the second Bank. Despite the regulatory reference to such a transfer as being "automatic," a member meeting the criteria for an automatic transfer must initiate the transfer process by filing a request with its current Bank, which will then arrange the details of the transfer with the second Bank.⁸

The Banks use most of the information collected under part 1263 to determine whether an applicant satisfies the statutory and regulatory requirements for Bank membership and should be approved as a Bank member. The Banks may use some of the information collected under part 1263 as a means of learning that a member wishes to withdraw or to transfer its membership to a different Bank so that the Bank can begin to process those requests. FHFA may also use the collected information to determine whether an institution that has been denied membership by a Bank should be permitted to become a member of that Bank.

D. Burden Estimate

FHFA has analyzed the time burden imposed on respondents by the four collections under this control number and estimates that the average total annual hour burden imposed on all respondents by those collections over the next three years will be 1,637 hours. This estimate is derived from the following calculations:

1. Membership Applications

FHFA estimates that the average number of applications for Bank membership submitted annually will be 105 and that the average time to prepare and submit an application and supporting materials will be 15 hours. Accordingly, the estimate for the annual hour burden associated with preparation and submission of

applications for Bank membership is (105 applications × 15 hours per application) = 1,575 hours.

2. Appeals of Membership Denials

FHFA estimates that the average number of applicants that have been denied membership by a Bank that will appeal such a denial to FHFA will be 1 and that the average time to prepare and submit an application for appeal will be 50 hours. Accordingly, the estimate for the annual hour burden associated with the preparation and submission of membership appeals is (1 appellants × 50 hours per application) = 50 hours.

3. Notices of Intent To Withdraw From Membership

FHFA estimates that the average number of Bank members submitting a notice of intent to withdraw from membership annually will be 4 and that the average time to prepare and submit a notice will be 1.5 hours. Accordingly, the estimate for the annual hour burden associated with preparation and submission of notices of intent to withdraw is (4 withdrawing members × 1.5 hours per application) = 6 hours.

4. Requests for Transfer of Membership to Another Bank District

FHFA estimates that the average number of Bank members submitting a request for transfer to another Bank will be 3 and that the average time to prepare and submit a request will be 2 hours. Accordingly, the estimate for the annual hour burden associated with preparation and submission of requests for automatic transfer is (3 transferring members × 2 hours per request) = 6 hours.

E. Comment Request

FHFA requests written comments on the following: (1) Whether the collection of information is necessary for the proper performance of FHFA functions, including whether the information has practical utility; (2) the accuracy of FHFA's estimates of the burdens of the collection of information; (3) ways to enhance the quality, utility, and clarity of the information collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

BILLING CODE P

FEDERAL TRADE COMMISSION

[File No. 261 0091]

Beretta and Ruger; Analysis of Proposed Agreement Containing Consent Order To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement; request for comment.

SUMMARY: The consent agreement in this matter settles alleged violations of Federal law prohibiting unfair methods of competition. The attached Analysis of Proposed Agreement Containing Consent Order to Aid Public Comment describes both the allegations in the complaint and the terms of the consent order—embodied in the consent agreement—that would settle these allegations.

DATES: Comments must be received on or before October 19, 2026.

ADDRESSES: Interested parties may file comments online or on paper by following the instructions in the Request for Comment part of the **SUPPLEMENTARY INFORMATION** section below. Please write "Beretta and Ruger; File No. 261 0091" on your comment and file your comment online at <https://www.regulations.gov> by following the instructions on the web-based form. If you prefer to file your comment on paper, please mail your comment to: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Ave. NW, Mail Stop H-144 (Annex G), Washington, DC 20580.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 15 U.S.C. 46(f), and FTC Rule 2.34, 16 CFR 2.34, notice is hereby given that the above-captioned consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of 30 days. The following Analysis to Aid Public Comment describes the terms of the consent agreement and the

allegations in the complaint. An electronic copy of the full text of the consent agreement package can be obtained at <https://www.ftc.gov/news-events/commission-actions>.

You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before October 19, 2026. Write “Beretta and Ruger: File No. 261 0091” on your comment. Your comment—including your name and your State—will be placed on the public record of this proceeding, including, to the extent practicable, on the <https://www.regulations.gov> website.

We encourage you to submit comments through the <https://www.regulations.gov> website. Postal mail addressed to the Commission will be subject to delay because of heightened security screening. If you prefer to file your comment on paper, write “Beretta and Ruger: File No. 261 0091” on your comment and on the envelope, and send it via overnight service to: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Mail Stop H-144 (Annex G), Washington, DC 20580.

Because your comment will be placed on the publicly accessible website at <https://www.regulations.gov>, you are solely responsible for making sure your comment does not include any sensitive or confidential information. In particular, your comment should not include sensitive personal information, such as your or anyone else’s Social Security number; date of birth; driver’s license number or other State identification number, or foreign country equivalent; passport number; financial account number; or credit or debit card number. You are also solely responsible for making sure your comment does not include sensitive health information, such as medical records or other individually identifiable health information. In addition, your comment should not include any “trade secret or any commercial or financial information which . . . is privileged or confidential”—as provided by section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2)—including competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

Comments containing material for which confidential treatment is requested must be filed in paper form, must be clearly labeled “Confidential,” and must comply with FTC Rule 4.9(c). In particular, the written request for

confidential treatment that accompanies the comment must include the factual and legal basis for the request and must identify the specific portions of the comment to be withheld from the public record. See FTC Rule 4.9(c). Your comment will be kept confidential only if the General Counsel grants your request in accordance with the law and the public interest. Once your comment has been posted on the <https://www.regulations.gov> website—as legally required by FTC Rule 4.9(b)—we cannot redact or remove your comment from that website, unless you submit a confidentiality request that meets the requirements for such treatment under FTC Rule 4.9(c), and the General Counsel grants that request.

Visit <https://www.ftc.gov> to read this document and the news release describing the proposed settlement. The FTC Act and other laws the Commission administers permit the collection of public comments to consider and use in this proceeding, as appropriate. The Commission will consider all responsive public comments it receives on or before October 19, 2026. For information on the Commission’s privacy policy, including routine uses permitted by the Privacy Act, see <https://www.ftc.gov/site-information/privacy-policy>.

Analysis of Agreement Containing Consent Orders To Aid Public Comment

I. Introduction

The Federal Trade Commission (“Commission”) has accepted, subject to final approval, an Agreement Containing Consent Order (“Consent Agreement”) from Beretta Holding S.A. (“Respondent”), a subsidiary of Upifra S.A. Pursuant to a Cooperation Agreement dated May 2, 2026, Beretta may acquire up to 25% of the outstanding shares of Sturm, Ruger & Company, Inc. (“Ruger”) for \$44.80 per share, for a total transaction value of approximately \$167 million (“Proposed Transaction”). In addition to this consideration, Beretta gained the right to “source” two members to be appointed and thereafter nominated to Ruger’s Board of Directors. The Consent Agreement is designed to be a prophylactic safeguard against any anticompetitive effects that may result from Beretta’s agreement with its direct competitor, Ruger. The Commission alleges in its Complaint that the Proposed Transaction, if consummated, would violate section 8 of the Clayton Act, as amended, 15 U.S.C. 19, and section 5 of the Federal Trade Commission Act, as amended, 15 U.S.C. 45.

The Proposed Transaction raises section 8 concerns. Specifically, Ruger’s obligation to facilitate the appointment of two Beretta-sourced directors to Ruger’s board raises concerns that Beretta could have access to Ruger’s competitively significant, nonpublic information and could participate in, or have influence over, competitive decision-making at Ruger. The agreement expressly provides that the parties could waive any restrictions on Beretta officers, employees, agents, representatives, or directors from serving as Ruger directors. Under section 8 of the Clayton Act, it is illegal for directors and officers to serve, whether directly or indirectly, on the boards of competitors (subject to limited safe harbors), as would occur here because of Beretta’s right to source two of its designees to the board of its competitor, Ruger.

The Consent Agreement is designed to remedy allegations in the Commission’s Complaint that Beretta’s proposed acquisition would provide the right to source two Beretta designees to appoint and nominate for a seat on the Ruger Board of Directors. This would result in an illegal interlocking directorate in violation of section 8 of the Clayton Act, 15 U.S.C. 19, and an unfair method of competition in violation of section 5 of the Federal Trade Commission Act, 15 U.S.C. 45 due to the potential exchange of confidential, competitively sensitive information.

The proposed settlement provides significant relief for this concern. The Consent Agreement and proposed Decision and Order (“D&O”) prohibit Beretta from appointing, sourcing, nominating, or occupying any director position on Ruger’s Board unless that director is independent of Beretta.

The proposed D&O imposes effective relief, while continuing to set important Commission precedent on the application of section 8 of the Clayton Act and section 5 of the FTC Act. By restricting future opportunities for the parties to engage in conduct that would result in section 8 violations, the proposed D&O signals the antitrust risks of excessive influence and anticompetitive information exchange.

The Commission has placed the Consent Agreement on the public record for 30 days to solicit comments from interested persons. Comments received during this period will become part of the public record. After 30 days, the Commission will review the comments received and decide whether it should withdraw, modify, or make the proposed Order final.

II. The Respondent

Respondent Beretta is the largest firearms manufacturer in the world. Beretta's headquarters are in Luxembourg, and its primary corporate offices in the United States are in Accokeek, Maryland.

III. The Cooperation Agreement

On May 2, 2026, Beretta and Ruger entered into a Cooperation Agreement, under which Beretta seeks to acquire up to 25% of Ruger's outstanding shares at \$44.80 per share, for a total transaction value of approximately \$167 million. Beretta already owns 9.96% of Ruger's shares. The Proposed Transaction would make Beretta one of Ruger's largest shareholders. Additionally, the Ruger Board of Directors "shall" "take such actions as are necessary to appoint two directors sourced by Beretta Holding" and renominate the Beretta directors at the 2027 and 2028 annual board meetings. The Cooperation Agreement refers to these appointments as the "Beretta Holding Director Appointments" and the directors are the "Beretta Holding Directors."

The Commission's Complaint alleges that the Proposed Transaction, as structured, would violate section 8 of the Clayton Act, 15 U.S.C. 19, as an illegal interlocking directorate, and that the Proposed Transaction constitutes an unfair method of competition in violation of section 5 of the Federal Trade Commission Act, 15 U.S.C. 45, due to the risk of the exchange of competitively sensitive, nonpublic information.

IV. Line of Commerce

The production and sale of firearms, including pistols, shotguns, and rifles, are the relevant lines of commerce. Firearms serve a wide range of uses in the United States, including personal protection, sport shooting, hunting, law enforcement, and collecting. Buyers of firearms typically cannot substitute other products for these purposes without significant compromises in functionality.

The firearms market is characterized by a large set of established manufacturers. Major competitors include companies such as Smith & Wesson, SIG Sauer, Glock, Springfield Armory, and Browning Arms Company, among others, with each offering broad portfolios of firearms across price points and performance categories. Beretta is recognized as a premium, globally established manufacturer, with particular historical strength in shotguns and semiautomatic pistols, while Ruger is known as a purely U.S.

manufacturer with significant share in rifles and handguns. Both companies sell to overlapping customer groups, including recreational shooters, hunters, sports shooters, and law-enforcement agencies.

V. Effects of the Agreement

The Commission's Complaint addresses the theory of harm that interlocking directorates can present opportunities or temptations for anticompetitive conduct. Beretta's placement of a director or officer on Ruger's board—in violation of section 8 of the Clayton Act—would make Beretta a direct participant in Ruger's corporate governance. This interlocking directorate arrangement would provide Beretta with the ability to sway or influence Ruger's competitive decision-making and to access Ruger's competitively sensitive information. As an interlocked director or officer, Beretta's representative would have the opportunity to communicate directly within Ruger's highest levels of leadership and could discuss confidential business information or direct or otherwise influence Ruger's competitive actions or strategies. Knowledge gained via this prohibited interlocking relationship could also influence Beretta's own competitive decisions or development of new businesses involved in the production and sale of firearms.

VI. The Proposed Order

The proposed Order imposes several obligations designed to address the competitive concerns arising from Beretta's proposed acquisition of voting securities of Ruger and the potential for interlocking directorates or improper access to competitively sensitive information.

First, the proposed Order limits Beretta's ability to place representatives or agents on Ruger's board of directors. Beretta may not, directly or indirectly, including through its parent, appoint, nominate, or otherwise cause any person to serve on Ruger's board unless that person qualifies as independent from Beretta, *i.e.*, an "Independent Director" as defined in the Order. The proposed Order defines an Independent Director as a person who is not affiliated with Beretta, Upifra, or their controlled entities; has not recently served as an employee, officer, director, representative, or agent of a relevant person; has not recently received compensation from a relevant person; and does not have a material relationship that would reasonably be expected to impair the objectivity of the

director's judgment when serving on Ruger's board.

Second, the proposed Order requires Beretta to provide the Commission with advance written notice at least 15 days before appointing, designating, nominating, electing, or otherwise causing any person to become a member of Ruger's board of directors.

Third, the proposed Order restricts Beretta's relationships with any Independent Director it nominates to Ruger's board. Beretta may not, directly or indirectly, including through its parent, hire or enter into any financial or other relationship with such Independent Director that would involve violating the Independent Director's fiduciary duties or involve the exchange of Ruger's nonpublic information with Beretta, Upifra, or their affiliates. These restrictions remain in place until one year after the Independent Director has ceased serving on Ruger's board.

Fourth, the proposed Order prohibits Beretta from directly or indirectly seeking, receiving, or attempting to receive Ruger's nonpublic information from any Independent Director appointed pursuant to the Order. The Order defines nonpublic information broadly to include information not in the public domain, such as customer lists, price lists, strategic plans, contracts, expansion projects, cost information, marketing methods, competitively sensitive data or information, and other nonpublic information.

Fifth, the proposed Order requires Beretta to distribute the Order to each of its respective board members, officers, and directors, and to design, maintain, and operate an antitrust compliance program.

The purpose of this analysis is to facilitate public comment on the Consent Agreement and proposed Order to aid the Commission in determining whether it should make the proposed Order final. This analysis is not an official interpretation of the proposed Order and does not modify its terms in any way.

By direction of the Commission.

Joel Christie,

Acting Secretary.

BILLING CODE 6750-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30Day–26–1072]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled “STI Surveillance Network (SSuN)” to the Office of Management and Budget (OMB) for review and approval. CDC previously published a “Proposed Data Collection Submitted for Public Comment and Recommendations” notice on December 5, 2025, to obtain comments from the public and affected agencies. CDC received three public comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

- (a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (c) Enhance the quality, utility, and clarity of the information to be collected;
- (d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and
- (e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open

for Public Comments” or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

The STI Surveillance Network (SSuN) (OMB Control No. 0920–1072, Exp. 09/30/2026)—Revision—National Center for HIV, Viral Hepatitis, STD, TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention (CDC) is requesting a Revision of a currently approved information collection request (ICR) titled The STI Surveillance Network (SSuN) and approval for an additional period of three years. The Revision submitted for this ICR reflects changes to: (1) the title of the currently approved ICR; (2) the inclusion of Doxycycline Post-exposure Prophylaxis (Doxy PEP) data elements; (3) the deletion of multiple data elements no longer required; and (4) an updated anonymous patient clinic survey. The estimated burden hours for this revised collection decreases from the previously approved 7,510 to 7,237 due to decreases in the number of participating clinical sites and expected number of interviews conducted by funded jurisdictions, a result of declines in reported gonorrhea cases.

The purpose of the STI Surveillance Network (SSuN) is to enhance national capacity for STI surveillance. While U.S. jurisdictions voluntarily report STI cases to the CDC via the National Notifiable Diseases Surveillance System (NNDSS), these reports often lack essential patient demographics and detailed information on risk behaviors, treatment, co-infections, preventive services, and sexual networks.

SSuN enhances CDC’s STI surveillance efforts by:

1. Providing comprehensive behavioral and demographic data on STI cases not available from standard case-based surveillance;
2. Monitoring trends in STI and HIV co-infection, screening, prevention interventions, and healthcare access among patients with gonorrhea or other STIs;
3. Providing an additional sentinel monitoring system for emerging health threats like mpox;

These data help public health authorities better understand STI trends, assess disease burden inequalities, and monitor treatment outcomes and adverse health effects among STI patients. Data will be transmitted through CDC’s Secure Access Management System (SAMS) by the 15 state and local health jurisdictions (eight jurisdictions funded for both Strategy A and B, four Strategy A only jurisdictions, and three Strategy B only jurisdictions) funded to conduct SSuN activities. The revised project, SSuN Cycle 5 (2024–2029), comprises 15 US local/state health departments. SSuN recipients are funded to conduct either or both of the two core SSuN Strategies: Sentinel surveillance in specialty sexual health clinics (Strategy A) and enhanced population-based surveillance for persons diagnosed with gonorrhea and adult syphilis (Strategy B).

In Strategy A, data is abstracted from existing electronic medical records at 16 participating STI clinics across 12 funded jurisdictions (several sites utilize >1 clinical facility), utilizing information already collected during routine clinical care. This reflects a total of 384 burden hours (16 STI clinic respondents across 12 funded jurisdictions × six data transmissions × four hours per data transmission). These data are sent to the 12 funded health jurisdictions, where they are formatted and deduplicated by data managers into standardized formats. Records are also matched with the jurisdiction’s HIV surveillance registry, providing data on HIV co-infection not available from other multi-jurisdictional sources. All patient records are fully de-identified and securely transmitted to the CDC six times a year. Data managers at each of the 16 clinical facilities across 12 jurisdictions receiving funding are responsible for transmitting validated datasets for these activities to CDC every other month. This reflects 2,880 burden hours for Strategy A health department data management (12 health jurisdiction respondents × six data transmissions × 40 hours per data transmission). Participating Strategy A clinics are also required to administer a one-time brief (~five minute) clinic patient survey between years 2–5 of the cycle. Clinic patient surveys will be conducted with approximately 3,000 patients across all funded sites for a total of five minutes each, resulting in 250 burden hours.

The second core data collection activity, Strategy B, includes: (1) abstraction, recoding, and reporting of all gonorrhea and syphilis cases in the collaborating jurisdiction; (2) enhanced investigations of a random sample of diagnosed individuals; and (3) health

department abstraction and registry matching for a complete census of reported cases. Enhanced investigations include clinical data abstraction from providers, registry matching, and brief demographic and behavioral interviews. SSuN recipients implement data collection protocols that provide uniformly coded data on demographics, risk factors, clinical care, laboratory data, and healthcare-seeking behaviors, which are compiled into a national dataset after quality assurance at the

CDC. For Activity 1, data managers at participating health jurisdictions are responsible for transmitting validated datasets case datasets to CDC every other month, resulting in 2,640 burden hours (11 jurisdictions × six data transmissions × 40 hours per data transmission). In 2023, there were 187,833 cases of gonorrhea diagnosed and reported across the 11 Strategy B SSuN jurisdictions. Approximately 7%, or 13,148 gonorrhea cases were randomly sampled for enhanced

investigation. Over past cycles, approximately 50% of patients contacted for investigation responded; we estimate this will result in 1,083 burden hours for patients with gonorrhea.

The total estimated annual burden hours are 7,237. Respondents will not receive federal funds to participate in this project. There are no additional costs to respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average hours per response
Data managers at sentinel STI clinics General Public—Adults (persons diagnosed with gonorrhea).	Electronic Clinical Record Abstraction Patient interviews for a random sample of gonorrhea cases.	16 6,500	6 1	4 10/60
Data Managers: local/state health departments (Strategy A).	Data cleaning/validation, HIV registry matching and data transmissions for all activity components.	12	6	40
Data Managers: local/state health departments (Strategy B).	Data cleaning/validation, HIV registry matching and data transmissions for all activity components.	11	6	40
General Public—Adults (persons presenting for care in STI Clinics).	Clinic patient surveys	3,000	1	5/60

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2026–D–9429]

Electronic Submission Template for Medical Device Premarket Approval Applications (PMAs); Draft Guidance for Industry and Food and Drug Administration Staff; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of the draft guidance entitled “Electronic Submission Template for Medical Device Premarket Approval Applications (PMAs).” FDA is issuing this draft guidance for submitters of certain PMAs to the Center for Devices and Radiological Health (CDRH) and Center for Biologics Evaluation and Research (CBER). It introduces those submitters to the current publicly available resources and associated content developed to support electronic submissions of certain PMAs and PMA

supplements to FDA. This draft guidance, when finalized, is intended to represent one of several steps in meeting FDA’s commitment to the development of electronic submission templates to serve as guided submission preparation tools for industry to improve submission consistency and enhance efficiency in the review process. This draft guidance is not final nor is it for implementation at this time.

DATES: Submit either electronic or written comments on the draft guidance by November 17, 2026 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact

information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2026–D–9429 for “Electronic Submission Template for Medical Device Premarket Approval Applications (PMAs).” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

• **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

An electronic copy of the guidance document is available for download from the internet. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the guidance. Submit written requests for a single hard copy of the draft guidance document entitled “Electronic Submission Template for Medical Device Premarket Approval Applications (PMAs)” to the Office of Policy, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5441, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your request.

FOR FURTHER INFORMATION CONTACT: Erica Takai, Center for Devices and Radiological Health, Food and Drug Administration, 301-796-6353; or Phillip Kurs, Center for Biologics Evaluation and Research, Food and Drug Administration, 240-402-7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is issuing this draft guidance document to introduce submitters of certain PMAs to CDRH and CBER to the current resources and associated content developed and made publicly available to support electronic submissions of certain PMAs/PMA supplements to FDA. These include Original PMAs, Panel-Track Supplements, 180-day Supplements, Real Time Supplements, and 30-Day Notices/135-Day Supplements. This draft guidance is intended to represent one of several steps in meeting FDA’s commitment to the development of electronic submission templates to serve as guided submission preparation tools for industry to improve submission consistency and enhance efficiency in the review process. When finalized, this guidance will also facilitate the implementation of the FDA’s mandate under section 745A(b) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 379k-1(b)), amended by section 207 of the FDA Reauthorization Act of 2017 (FDARA) (Pub. L. 115-52), to provide further standards for the submission by electronic format, a timetable for establishment of these further standards, and criteria for waivers of and exemptions from the requirements.

FDA’s final guidance document published on July 15, 2020 (85 FR 42864): “Providing Regulatory Submissions for Medical Devices in Electronic Format—Submissions Under Section 745A(b) of the Federal Food, Drug, and Cosmetic Act” (hereafter referred to as the “745A(b) device parent guidance”) provides a process for the development of templates to facilitate the preparation, submission, and review of regulatory submissions for medical devices solely in electronic format. As described in the 745A(b) device parent guidance, FDA plans to implement the requirements of section 745A(b)(3) of the FD&C Act with individual guidances specifying the formats for specific submissions and corresponding timetables for implementation. When finalized, this guidance will provide such information for electronic submissions of certain PMAs/PMA supplements solely in electronic format.

In section 745A(b) of the FD&C Act, Congress granted explicit statutory authorization to FDA to specify in guidance the statutory requirement for electronic submissions solely in electronic format by providing standards, a timetable, and criteria for waivers and exemptions. To the extent that this draft guidance provides such requirements under section 745A(b)(3) of the FD&C Act (*i.e.*, standards, timetable, criteria for waivers of and exemptions), indicated by the use of the mandatory words, such as must or required, this document is not subject to the usual restrictions in FDA’s good guidance practice regulations, such as the requirement that guidances not establish legally enforceable responsibilities (see § 10.115(d)). To the extent that this draft guidance describes recommendations that are not standards, timetable, criteria for waivers of, or exemptions under section 745A(b)(3) of the FD&C Act, it is being issued consistent with FDA’s good guidance practices regulation (§ 10.115).

The draft guidance, when finalized, will represent the current thinking of FDA on Electronic Submission Template for PMAs/PMA supplements. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

As we develop final guidance on this topic, FDA will consider comments on costs or cost savings the guidance may generate, relevant for Executive Order 14192.

II. Electronic Access

Persons interested in obtaining a copy of the draft guidance may do so by downloading an electronic copy from the internet. A search capability for all Center for Devices and Radiological Health guidance documents is available at <https://www.fda.gov/medical-devices/device-advice-comprehensive-regulatory-assistance/guidance-documents-medical-devices-and-radiation-emitting-products>. This guidance document is also available at <https://www.regulations.gov>, <https://www.fda.gov/regulatory-information/search-fda-guidance-documents>, or <https://www.fda.gov/vaccines-blood-biologics/guidance-compliance-regulatory-information-biologics>. Persons unable to download an electronic copy of “Electronic Submission Template for Medical Device Premarket Approval Applications (PMAs)” may send an email request to CDRH-Guidance@fda.hhs.gov to receive an electronic

copy of the document. Please use the document number GUI00007079 and complete title to identify the guidance you are requesting.

III. Paperwork Reduction Act of 1995

While this guidance contains no new collection of information, it does refer to previously approved FDA collections of information. The previously approved collections of information are subject to

review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521). The collections of information in the following table have been approved by OMB:

21 CFR part	Topic	OMB control No.
814, subparts A through E	Premarket approval	0910–0231
800, 801, 809, and 830	Medical Device Labeling Regulations; Unique Device Identification	0910–0485
820	Current Good Manufacturing Practice (CGMP); Quality Management System Regulation (QMSR).	0910–0073

Grace R. Graham,

Deputy Commissioner for Policy, Legislation, and International Affairs.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2025–N–2787]

Biosimilar User Fee Act III Future Needs in the Development of Interchangeable Products Post-Workshop; Draft Strategy Document

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the publication of a draft strategy document titled “BsUFA III Future Needs in the Development of Interchangeable Products Post-Workshop Strategy Document” (Strategy Document). This draft Strategy Document is intended to summarize the discussion that occurred at the FDA public workshop, “Advancing the Development of Interchangeable Products: Identifying Future Needs,” held on September 19, 2025, and to describe FDA’s future directions to support interchangeable biosimilar products. FDA is issuing this draft Strategy Document to fulfill a commitment FDA made in the Biosimilar User Fee Act (BsUFA) reauthorization commitment letter for fiscal years 2023 through 2027 (BsUFA III) to publish a post-workshop draft strategy document for public comment. **DATES:** Submit either electronic or written comments on this draft Strategy Document by November 17, 2026 to ensure that the Agency considers your comment on this draft Strategy Document before it begins work on the final version of the Strategy Document.

ADDRESSES: You may submit either electronic or written comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2025–N–2787 for “Biosimilar User Fee

Act III Future Needs in the Development of Interchangeable Products Post-Workshop; Draft Strategy Document.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions:** To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the

heading of this document, into the "Search" box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

FOR FURTHER INFORMATION CONTACT:

Sarah Ikenberry, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Rm. 1128, Silver Spring, MD 20993-0002, 301-796-6893, *CDER-BiologicsBiosimilarsInquiries@fda.hhs.gov*.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of the draft Strategy Document titled "BsUFA III Future Needs in the Development of Interchangeable Products Post-Workshop Strategy Document." In section II.D.3 of the BsUFA III commitment letter (available at <https://www.fda.gov/media/152279/download?attachment>), FDA agreed to hold a public scientific workshop on the development of interchangeable biosimilar products to help identify future needs (e.g., guidance, research). FDA also agreed to issue a draft strategy document for public comment outlining the specific actions FDA will take to facilitate interchangeable biosimilar product development within 12 months following the public workshop. The public workshop was held on September 19, 2025 (90 FR 39395), with both virtual and in-person attendance, and representatives from trade associations (Association for Accessible Medicines (AAM), Pharmaceutical Research and Manufacturers of America (PhRMA), and Biosimilars Forum) provided their perspectives on future needs for development and adoption of interchangeable biosimilar products. FDA speakers from the Center for Drug Evaluation and Research discussed scientific topics related to analytical data considerations, user interface and human factors considerations, and other considerations to facilitate development of interchangeable biosimilar products. The draft Strategy Document summarizes the discussion that occurred during the workshop as well as comments received in the public docket. The major themes identified during the workshop and in comments submitted to the docket included timely communication of new scientific and policy developments, challenges with user interface development and human factors analyses, and approaches to interchangeability that follow the evolving science. Over the last 5 years, the development and approval of

interchangeable biosimilar products have advanced considerably. FDA's future efforts will focus on continuing to follow the evolving science, providing educational resources for healthcare providers and patients, and helping to ensure that stakeholders have confidence in the safety and effectiveness of interchangeable biosimilar products.

II. Electronic Access

The draft Strategy Document is available on the FDA web page for the public workshop at <https://www.fda.gov/industry/fda-public-workshop-future-needs-development-interchangeable-products-09192025#event-information>.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2026-D-7233]

Target Animal Safety Evaluation for Veterinary Monoclonal Antibody Products; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry (GFI) #298 (VICH GL62) titled "Target Animal Safety Evaluation for Veterinary Monoclonal Antibody Products." This draft guidance has been developed for veterinary use by the International Cooperation on Harmonisation of Technical Requirements for Registration of Veterinary Medicinal Products (VICH). This draft guidance contributes to the international harmonization of methods used for the target animal safety (TAS) evaluation of veterinary monoclonal antibody products (VMAPs) and aids in preparing and conducting VMAP TAS studies under laboratory and field conditions. A harmonized standard is intended to aid in development of mutually acceptable VMAP TAS programs.

DATES: Submit either electronic or written comments on the draft guidance by November 17, 2026 to ensure that the Agency considers your comment on this

draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2026-D-7233 for "Target Animal Safety Evaluation for Veterinary Monoclonal Antibody Products; Draft Guidance for Industry; Availability." Received comments will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your

comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the guidance to the Policy and Regulations Staff, Center for Veterinary Medicine, Food and Drug Administration, 5001 Campus Drive, College Park, MD 20740. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Joy Rachel Ganchingco, Center for Veterinary Medicine, Food and Drug Administration, 5001 Campus Drive, College Park, MD 20740, 301-837-7327, joyrachel.ganchingco@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft GFI #298 (VICH GL62) titled

"Target Animal Safety Evaluation for Veterinary Monoclonal Antibody Products."

Currently, no VICH GL specifically supports marketing applications for VMAPs in the regions participating in the VICH. The VICH GLs available for TAS (*i.e.*, VICH GL43 for pharmaceutical products and VICH GL44 for vaccines) do not fully address the TAS evaluation for a VMAP. Furthermore, International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH) S6 (R1) for the preclinical safety evaluation of biotechnology-derived pharmaceuticals is not fully applicable to VMAPs. Hence, there is a need for specific guidance on the TAS evaluation of a VMAP. Therefore, this guideline summarizes scientifically acceptable general principles for the TAS evaluation of a VMAP and should be used in conjunction with VICH GL43.

This guideline is for VMAPs intended for use in companion animals and livestock animals. The active ingredient of a VMAP is a monoclonal antibody (mAb) or a mAb fragment, which could be engineered to be specific for a target animal and target(s). When needed, advice should be sought from the relevant regulatory authority for specific guidance on the design of the TAS study(ies) prior to their initiation or if the applicant determines an alternative approach to the TAS evaluation of a VMAP may be more appropriate.

FDA has participated in efforts to enhance harmonization and is committed to seeking scientifically based harmonized technical procedures for pharmaceutical development. One of the goals of harmonization is to identify, and then reduce, differences in technical requirements for drug development among regulatory agencies in different countries. FDA has actively participated in the International Conference on Harmonization of Technical Requirements for Approval of Pharmaceuticals for Human Use to develop harmonized technical requirements for the approval of human pharmaceutical and biological products among the European Union, Japan, and the United States. The VICH is a parallel initiative for veterinary medicinal products. The goal of the VICH is to develop harmonized technical requirements for the approval of veterinary medicinal products in the European Union, Japan, and the United States, and receives input from both regulatory and industry representatives.

The VICH Steering Committee is composed of founding member representatives from the European

Commission and European Medicines Agency; AnimalhealthEurope; FDA's Center for Veterinary Medicine; U.S. Department of Agriculture's Center for Veterinary Biologics; the U.S. Animal Health Institute; the Japanese Ministry of Agriculture, Forestry and Fisheries; and the Japanese Veterinary Products Association. There are 10 standing members to the VICH Steering Committee: 1 representative from government and 1 representative from industry of Australia, New Zealand, Canada, South Africa, and the United Kingdom. The World Organisation for Animal Health is an associate member of the VICH. The VICH Secretariat, which coordinates the preparation of documentation, is provided by HealthforAnimals.

This level 1 draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on "Target Animal Safety Evaluation for Veterinary Monoclonal Antibody Products." It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

As we develop final guidance on this topic, FDA will consider comments on costs or cost savings the guidance may generate, relevant for Executive Order 14192.

II. Paperwork Reduction Act of 1995

While this guidance contains no collection of information, it does refer to previously approved FDA collections of information. The previously approved collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3521). The collections of information in section 512(n)(1) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(n)(1)) and in 21 CFR part 514 have been approved under OMB control number 0910-0032. The collections of information in 21 CFR part 511 have been approved under OMB control number 0910-0117.

III. Electronic Access

Persons with access to the internet may obtain the draft guidance at <https://www.fda.gov/AnimalVeterinary/GuidanceComplianceEnforcement/GuidanceforIndustry/default.htm>, <https://www.fda.gov/regulatory-information/search-fda-guidance->

documents, or <https://www.regulations.gov>.

Grace R. Graham,

Deputy Commissioner for Policy, Legislation, and International Affairs.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Notice of Supplemental Funding; Rural Residency Planning and Development Technical Assistance Program

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice of supplemental funding.

SUMMARY: HRSA will provide additional award funds to the Rural Residency Planning and Development Technical Assistance (RRPD–TA) Program recipient, the University of North Carolina at Chapel Hill, to provide additional technical assistance on rural

graduate medical education and support the improvement of health care in rural areas.

FOR FURTHER INFORMATION CONTACT:

Jason Steele, Public Health Analyst, Federal Office of Rural Health Policy, HRSA, at ruralresidency@hrsa.gov and (301) 443–2203.

SUPPLEMENTARY INFORMATION:

Intended Recipient of the Award: The University of North Carolina at Chapel Hill.

Amount of Non-Competitive Award: One supplemental award for \$800,000.

Project Period: September 30, 2025, to September 29, 2030.

Assistance Listing Number: 93.746.

Award Instrument: Cooperative Agreement Supplement for Services.

Authority: Section 711 of the Social Security Act (42 U.S.C. 912).

TABLE 1—RECIPIENT AND AWARD AMOUNT

Grant number	Award recipient name	City, state	Supplemental award amount
UK6RH32513	University of North Carolina at Chapel Hill	Chapel Hill, NC	\$800,000

Justification: This funding will provide a one-time supplement to the University of North Carolina at Chapel Hill through the RRPD–TA Cooperative Agreement with a budget period of September 30, 2026, through September 29, 2027. This supplement will allow the University of North Carolina at Chapel Hill to build on past and ongoing projects supported by HRSA to support health care in rural areas by advancing the knowledge base regarding the unique considerations and barriers facing rural providers developing graduate medical education programs. The University of North Carolina at Chapel Hill is the recipient of the only award under the RRPD–TA program and has established relationships with rural stakeholders and has longstanding experience developing resources related to rural graduate medical education. The supplement to the RRPD–TA Cooperative Agreement will allow the University of North Carolina at Chapel Hill to provide additional technical assistance and develop additional resources to promote rural graduate

medical education development and sustainability.

Thomas J. Engels,
Administrator.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Infant-Toddler Court Program—National Resource Center

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice of supplemental awards to the Infant-Toddler Court Program National Resource Center award recipient.

SUMMARY: HRSA is providing supplemental award funds of \$2,750,000 in federal fiscal year (FY) 2026 to ZERO TO THREE National Center for Infant, Toddler and Families, Inc., the current recipient of the Infant-Toddler Court Program (ITCP)—National Resource Center (NRC) cooperative agreement (HRSA–22–074).

These funds will support the activities that strengthen child welfare and early childhood systems and advance early developmental health and well-being through the Infant-Toddler Court (ITC) approach. Supplemental funding will provide financial and technical support to local infant-toddler court sites, support increased expansion of the ITC approach into new sites and states, and expand technical assistance needed to sustain and expand state award activities funded under HRSA–22–073/074.

FOR FURTHER INFORMATION CONTACT:

Ekaterina Zoubak, Early Childhood Systems Analyst, Division of Home Visiting and Early Childhood Systems, HRSA, at ezoubak@hrsa.gov and 240–475–8014.

SUPPLEMENTARY INFORMATION:

Intended Recipient of the Award: ZERO TO THREE National Center for Infant, Toddler and Families, Inc.

Amount of Award: \$2,750,000.

Project Period: September 30, 2026, to September 29, 2027.

Assistance Listing Number: 93.110.

Award Instrument: Non-competitive supplemental funding to the existing Cooperative Agreement.

Authority: 42 U.S.C. 701(a)(2) (Title V, § 501(a)(2) of the Social Security Act).

TABLE 1—RECIPIENTS AND AWARD AMOUNTS

Grant No.	Award recipient name	City, state	Award amount
U2DMC32394	ZERO TO THREE National Center for Infant, Toddler and Families, Inc.	Washington, DC	\$2,750,000

Justification: In FY 2022, under the authority for Special Projects of Regional and National Significance (SPRANS) (42 U.S.C. 701(a)(2) (Title V, § 501(a)(2) of the Social Security Act)), HRSA awarded the ITCP NRC to ZERO TO THREE National Center for Infant, Toddler and Families, Inc (HRSA–22–074). This award included expectations for the recipient to provide technical assistance to the ITCP (HRSA–22–073) state recipients and support the nationwide implementation and sustainability of the evidence-based ITC approach.

A Congressional Report accompanying the Further Consolidated Appropriations Act, 2024 (Pub. L. 118–47) included funding for this program to “continue and expand research-based Infant-Toddler Court Teams to change child welfare practices to improve wellbeing for infants, toddlers, and their families” (Senate Report 118–84). In addition, the Joint Explanatory Statement accompanying the FY 2024 appropriations act directed HRSA to “allocate funding to ensure continuation of existing grantees, technical assistance, and other activities.” In FY 2024, HRSA provided a supplement of \$1,750,000 in SPRANS to the NRC Program recipient to continue work initiated in FY 2023 with an increased SPRANS appropriation, to expand technical assistance to ITC teams, provide financial and technical support to local infant-toddler court sites that previously received funding under HRSA–18–123, and advance national-level reach and impact of the program.

In addition, a Congressional Report accompanying the FY 2025 appropriations act directed HRSA to “allocate funding to ensure continuation of existing grantees, technical assistance, and support other expansion activities,” (House Report 118–585). In response to the congressional intent, HRSA provided a supplement of \$1,750,000 to the NRC Program recipient in FY 2025 to continue work initiated in prior years to expand technical assistance to ITC teams, provide financial and technical support to local infant-toddler court sites that previously received funding under HRSA–18–123, and advance national-level reach and impact of the program.

A Congressional Report accompanying the Consolidated Appropriations Act, 2026 (Pub. L. 119–75) included an additional \$2,000,000, for a total of \$20,000,000 in funding “for research-based Infant-Toddler Court Teams to change child welfare practices to improve well-being for infants, toddlers, and their families,” (House Report 119–271). The Report also included a directive to “allocate funding to ensure continuation of existing grantees, technical assistance, and support other expansion activities,” (House Report 119–271).

Consistent with congressional intent, HRSA, through its Maternal and Child Health Bureau, will provide a supplement of \$2,750,000 in SPRANS funding to the ITCP NRC Program recipient. This funding will continue the number of ITC teams funded through subawards and continue to provide technical assistance to ITC teams, increase the number of ITC teams funded through subawards to new ITC teams, expand technical assistance to ITC teams funded under HRSA–22–073/074, and advance the national reach and impact of the program.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

National Vaccine Injury Compensation Program; List of Petitions Received

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: HRSA is publishing this notice of petitions received under the National Vaccine Injury Compensation Program (the Program), as required by the Public Health Service (PHS) Act, as amended. While the Secretary of HHS is named as the respondent in all proceedings brought by the filing of petitions for compensation under the Program, the United States Court of

Federal Claims is charged by statute with responsibility for considering and acting upon the petitions.

FOR FURTHER INFORMATION CONTACT: For information about requirements for filing petitions, and the Program in general, contact Lisa L. Reyes, Clerk of Court, United States Court of Federal Claims, 717 Madison Place NW, Washington, DC 20005, (202) 357–6400. For information on HRSA’s role in the Program, contact the Director, Division of Injury Compensation Programs, 5600 Fishers Lane, Room 14W–17, Rockville, Maryland 20857; 1–800–338–2382, or visit our website at: <https://www.hrsa.gov/vaccine-compensation>.

SUPPLEMENTARY INFORMATION: The Program provides a system of no-fault compensation for certain individuals who have been injured by specified childhood vaccines. Subtitle 2 of Title XXI of the PHS Act, 42 U.S.C. 300aa–10 *et seq.*, provides that those seeking compensation are to file a petition with the United States Court of Federal Claims and to serve a copy of the petition to the Secretary of HHS, who is named as the respondent in each proceeding. The Secretary has delegated this responsibility under the Program to HRSA. The Court is directed by statute to appoint special masters who take evidence, conduct hearings as appropriate, and make initial decisions as to eligibility for, and amount of, compensation.

A petition may be filed with respect to injuries, disabilities, illnesses, conditions, and deaths resulting from vaccines described in the Vaccine Injury Table (the Table) set forth at 42 CFR 100.3. This Table lists for each covered childhood vaccine the conditions that may lead to compensation and, for each condition, the time period for occurrence of the first symptom or manifestation of onset or of significant aggravation after vaccine administration. Compensation may also be awarded for conditions not listed in the Table and for conditions that are manifested outside the time periods specified in the Table, but only if the petitioner shows that the condition was caused by one of the listed vaccines.

Section 2112(b)(2) of the PHS Act, 42 U.S.C. 300aa–12(b)(2), requires that “[w]ithin 30 days after the Secretary

receives service of any petition filed under section 2111 the Secretary shall publish notice of such petition in the **Federal Register**.” Set forth below is a list of petitions received by HRSA on August 1, 2026, through August 31, 2026. This list provides the name of the petitioner, city, and state of vaccination (if unknown then the city and state of the person or attorney filing the claim), and case number. In cases where the Court has redacted the name of a petitioner and/or the case number, the list reflects such redaction.

Section 2112(b)(2) also provides that the special master “shall afford all interested persons an opportunity to submit relevant, written information” relating to the following:

1. The existence of evidence “that there is not a preponderance of the evidence that the illness, disability, injury, condition, or death described in the petition is due to factors unrelated to the administration of the vaccine described in the petition,” and

2. Any allegation in a petition that the petitioner either:

a. “[S]ustained, or had significantly aggravated, any illness, disability, injury, or condition not set forth in the Vaccine Injury Table but which was caused by one of the vaccines referred to in the Table, or

b. “[S]ustained, or had significantly aggravated, any illness, disability, injury, or condition set forth in the Vaccine Injury Table the first symptom or manifestation of the onset or significant aggravation of which did not occur within the time period set forth in the Table but which was caused by a vaccine” referred to in the Table.

In accordance with Section 2112(b)(2), all interested persons may submit written information relevant to the issues described above in the case of the petitions listed below. Any person choosing to do so should file an original and three copies of the information with the Clerk of the United States Court of Federal Claims at the address listed above (under the heading “For Further Information Contact”), with a copy to HRSA addressed to Director, Division of Injury Compensation Programs, Health Systems Bureau, 5600 Fishers Lane, 14W-17, Rockville, Maryland 20857. The Court’s caption (*Petitioner’s Name v. Secretary of HHS*) and the docket number assigned to the petition should be used as the caption for the written submission. Chapter 35 of Title 44, United States Code, related to paperwork reduction, does not apply to

information required for purposes of carrying out the Program.

Thomas J. Engels,
Administrator.

List of Petitions Filed

1. Aida Caron, Clermont, Florida, Court of Federal Claims No: 26–1103V
2. Anissa McClaron-Newkirk on behalf of Ursula Miller, San Diego, California, Court of Federal Claims No: 26–1106V

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Healthy Start Self-Measured Blood Pressure Monitoring

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice of supplemental funding.

SUMMARY: Through the Supporting Healthy Start Performance Project cooperative agreement (HRSA–24–038), HRSA provides funding to the National Institute for Children's Health Quality (NICHQ) to provide technical assistance and support to Healthy Start Initiative (Healthy Start) award recipients. HRSA will provide supplemental award funds to NICHQ in Fiscal Year (FY) 2026 to support the implementation of the Healthy Start Self-Measured Blood Pressure Monitoring initiative for Healthy Start award recipients.

FOR FURTHER INFORMATION CONTACT: Mabatemije Otubu, RN, MPH, Public Health Analyst, Division of Healthy Start and Perinatal Services, Maternal and Child Health Bureau, HRSA, at motubu@hrsa.gov and (301) 594–4462.

SUPPLEMENTARY INFORMATION: *Intended Recipient(s) of the Award:* The National Institute for Children's Health Quality. *Amount of Non-Competitive Award:* \$500,000.

Project Period: June 1, 2026, to May 31, 2027.

Assistance Listing Number: 93.926.

Award Instrument: Cooperative agreement.

Authority: 42 U.S.C. 254c–8 (Title III, § 330H of the Public Health Service Act).

TABLE 1—RECIPIENT(S) AND AWARD AMOUNT(S)

Grant No.	Award recipient name	City, state	Award amount
UF5MC32750	National Institute for Children's Health Quality	Boston, MA	\$500,000

Justification: NICHQ, as the current Healthy Start Technical Assistance and Support Center (TASC), provides national technical assistance and support to all HRSA-funded Healthy Start award recipients. Supplemental funds will support the expansion of a self-measured blood pressure (SMBP) monitoring initiative within Healthy Start communities to promote earlier identification of preeclampsia and other hypertensive disorders of pregnancy. Hypertensive disorders of pregnancy are a leading cause of maternal morbidity and mortality in the United States and disproportionately affect the types of populations served by Healthy Start. Preeclampsia, a life-threatening hypertensive disorder of pregnancy, affects as many as one in 12 pregnancies and can be effectively monitored through regular blood pressure measurement.

HRSA supplemented NICHQ's award with \$175,000 in FY 2023 and \$214,000 in FY 2024 (\$389,000 total) to support a successful SMBP monitoring pilot previously implemented across 15 Healthy Start sites in 12 states. In FY 2026, Congress directed HRSA to expand this effort by providing no less than \$250,000 to increase the number of states and Healthy Start sites able to benefit from the SMBP monitoring initiative. Specifically, the Explanatory Statement accompanying the Consolidated Appropriations Act, 2026 (Pub. L. 119–75) included “no less than \$250,000 for the Healthy Start blood pressure monitoring pilot, as described

in Senate Report 119–55.” In Senate Report 119–55, the Committee provided “no less than \$250,000 for more States to benefit from this pilot, and to the Healthy Start program to continue to support the self-measured blood pressure monitoring pilot, which works to identify preeclampsia during pregnancy at an earlier stage in high-risk communities by distributing blood pressure cuffs and patient information.”

As the Healthy Start TASC, NICHQ is well-positioned to support expanded implementation of the SMBP monitoring initiative among Healthy Start sites. Through this supplemental funding, NICHQ, as the Healthy Start TASC, will support Healthy Start award recipients in at least 15 states to expand access to SMBP monitoring for pregnant and postpartum women. This initiative will provide training, technical assistance, implementation guidance, and resources to selected Healthy Start sites in partnership with a subject matter expert in hypertensive disorders of pregnancy. This effort builds on lessons learned from the previous SMBP monitoring pilot and is intended to broaden participation beyond the original pilot sites so that additional Healthy Start communities may benefit. Further information on Healthy Start is available at: <https://www.hrsa.gov/services/healthy-start>.

Thomas J. Engels,
Administrator.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Notice of Supplemental Funding, National Rural Health Information Clearinghouse Program

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice of supplemental funding.

SUMMARY: HRSA will provide additional award funds to the National Rural Health Information Clearinghouse Program recipient under HRSA–25–009, the University of North Dakota, to provide information, data, and tools related to rural health to support improving health care in rural areas.

FOR FURTHER INFORMATION CONTACT: Sarah Scott, Federal Office of Rural Health Policy, HRSA, at sscott2@hrsa.gov and (301) 287–2619.

SUPPLEMENTARY INFORMATION: *Intended Recipient of the Award:* The University of North Dakota.

Amount of Non-Competitive Award: One supplemental award for \$835,000.

Project Period: June 1, 2025, to May 31, 2030.

Assistance Listing Number: 93.223.

Award Instrument: Cooperative Agreement Supplement for Services.

Authority: Social Security Act § 711(b) (42 U.S.C. 912(b)).

TABLE 1—RECIPIENT AND AWARD AMOUNT

Grant number	Award recipient name	City, State	Supplemental award amount
U56RH05539	University of North Dakota	Grand Forks, ND	\$835,000

Justification: This funding provided a one-time supplement to the University of North Dakota via the National Rural Health Information Clearinghouse Program with a budget period of June 2026 through May 2027. This supplement allows the University of North Dakota to build on past and ongoing projects supported by the Federal Office of Rural Health Policy to improve health care in rural areas by

advancing the knowledge base regarding strategies to support and enhance rural community health. The University of North Dakota is the recipient of the only award under the program and has longstanding experience identifying, developing and disseminating resources like toolkits and webinars to support a broad range of rural health topics. The supplement will allow the University of North Dakota to create new tools and

resources on important topics related to rural community health and health care.

Margaret M. Bush,
Deputy Administrator.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES**Health Resources and Services Administration****Notice of Supplemental Funding, Delta Region Community Health Systems Development Program**

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice of supplemental funding.

SUMMARY: HRSA is awarding supplemental funding under the Delta

Region Community Health Systems Development Program to one award recipient in fiscal year (FY) 2026 to provide technical assistance (TA) to rural health care organizations in the Delta region. This supplemental funding will support hospitals and clinics that previously completed program TA and need additional support to sustain improvements in financial and operational performance, quality of care, and access to essential health care services.

FOR FURTHER INFORMATION CONTACT: Sheena Johnson, Deputy Division Director, Hospital State Division,

Federal Office of Rural Health Policy, HRSA, at sjohnson@hrsa.gov and 872–271–6370.

SUPPLEMENTARY INFORMATION:

Intended Recipient of the Award: Rural Health Resource Center.

Amount of Non-competitive award: \$486,745.

Project Period: September 1, 2026, to August 31, 2027.

Assistance Listing Number: 93.912.

Award Instrument: Cooperative Agreement.

Authority: Section 711(b) of the Social Security Act (42 U.S.C. 912(b)).

TABLE 1—RECIPIENT AND AWARD AMOUNT

Grant No.	Award recipient name	City, state	Award amount
U65RH31261	Rural Health Resource Center	Duluth, MN	\$486,745

Justification: The Delta Region Community Health Systems Development Program provides comprehensive, multi-year TA to rural health care organizations in rural counties and parishes of the Delta region to strengthen health care delivery by improving financial and operational performance and quality of care. This funding will provide a one-time supplement to the Rural Health Resource Center to provide sustainability TA to hospitals and clinics that have previously completed program TA. This support may include targeted consultations, assessment of ongoing financial and operational challenges, review of progress on quality and performance improvement activities, and assistance with sustaining service delivery improvements.

This supplemental funding is consistent with the program's focus on helping rural health care organizations implement best practice recommendations, sustain the impacts

of TA, and respond to additional TA needs related to innovation, adaptability, and sustainability in rural health care organizations located in the Delta region.

Thomas J. Engels,
Administrator.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES**Health Resources and Services Administration****Notice of Supplemental Funding, National Rural Health Policy, Community, and Collaboration Program**

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice of supplemental funding.

SUMMARY: HRSA will provide additional award funds to the National Rural Health Policy, Community, and Collaboration Program recipient, the National Rural Health Association, to identify, engage, educate, and collaborate with rural stakeholders on national rural health issues and promising practices to improve health care in rural areas nationwide.

FOR FURTHER INFORMATION CONTACT: Alexa Ofori, Senior Advisor, Federal Office of Rural Health Policy, HRSA, at aofori@hrsa.gov and 301–945–3986.

SUPPLEMENTARY INFORMATION:

Intended Recipient of the Award: The National Rural Health Association.

Amount of Non-Competitive Award: One supplemental award for \$660,000.

Project Period: August 1, 2024, to July 31, 2029.

Assistance Listing Number: 93.692.

Award Instrument: Cooperative Agreement Supplement for Services.

Authority: Section 711 of the Social Security Act (42 U.S.C. 912).

TABLE 1—RECIPIENT AND AWARD AMOUNT

Grant number	Award recipient name	City, State	Supplemental award amount
U16RH03702	National Rural Health Association	Leawood, KS	\$660,000

Justification: This funding will provide a one-time supplement to the National Rural Health Association through National Rural Health Policy, Community, and Collaboration Program with a budget period of August 1, 2026, through July 31, 2027. This supplement will allow the National Rural Health Association to identify, engage, educate,

and collaborate with rural stakeholders on national rural health issues and promising practices to improve health care in rural areas nationwide. These activities build on past and ongoing National Rural Health Association projects supported by HRSA and align with the goals of the program to educate rural stakeholders and facilitate

collaboration with key stakeholders to improve the exchange of information and promising practices that support rural health.

National Institutes of Health

National Library of Medicine; Notice of Partially Closed Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the Board of Scientific Counselors, National Library of Medicine.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting. The meeting can be accessed from the NIH Videocast at the following link: <https://videocast.nih.gov/>.

The meeting will be closed to the public as indicated below in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended for the review, discussion, and evaluation of individual intramural programs and projects conducted by the National Library of Medicine, including consideration of personnel qualifications and performance, and the competence of individual investigators, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Board of Scientific Counselors, National Library of Medicine
Date: October 22, 2026.

Open: 9:00 a.m. to 10:20 a.m.

Agenda: Program Discussion and Investigator Report.

Closed: 10:20 a.m. to 11:05 a.m.

Agenda: To review and evaluate personnel qualifications and performance, and competence of individual investigators.

Open: 11:20 a.m. to 12:05 p.m.

Agenda: Program Discussion and Investigator Report.

Closed: 12:05 p.m. to 12:35 p.m.

Agenda: To review and evaluate personnel qualifications and performance, and competence of individual investigators.

Open: 12:35 p.m. to 1:05 p.m.

Agenda: Break.

Open: 1:05 p.m. to 1:35 p.m.

Agenda: Poster Session.

Open: 1:35 p.m. to 2:20 p.m.

Agenda: Program Discussion and Investigator Report.

Closed: 2:20 p.m. to 2:50 p.m.

Agenda: To review and evaluate personnel qualifications and performance, and competence of individual investigators.

Closed: 2:50 p.m. to 3:50 p.m.

Agenda: To review and evaluate personnel qualifications and performance, and competence of individual investigators.

Open: 4:00 p.m. to 5:00 p.m.

Agenda: Presentation: 2028–2032 NLM Strategic Plan Listening Session.

Address: National Library of Medicine Building 38A 8600 Rockville Pike Bethesda 20892 In Person and Virtual Meeting.

Meeting Format: In Person and Virtual Meeting.

Contact Person: David Landsman, Ph.D., Senior Investigator, National Library of Medicine, National Institutes of Health, 8600 Rockville Pike, Bethesda, MD 20894, 301–435–5981 landsman@nih.gov.

Registration is not required to attend the open portion of this meeting.

Any interested person may file written comments no later than 15 days in advance of the meeting by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Proposed Collection; 60-Day Comment Request; Post-Award Reporting Requirements Including Research Performance Progress Report (OD)

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995 to provide opportunity for public comments on proposed data collection projects, the National Institutes of Health will publish periodic summaries of proposed

projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

DATES: Comments regarding this information collection are best assured of having their full effect if received by November 17, 2026.

FOR FURTHER INFORMATION CONTACT: To obtain a copy of the data collection plans and instruments, submit comments in writing, or request more information on the proposed project, contact: Ms. Mikia P. Currie, Program Analyst, Office of Policy for Extramural Research Administration, 6705 Rockledge Drive, Suite 350, Bethesda, Maryland, 20892 or call non-toll-free number (301) 435-0941 or Email your request, including your address to: ProjectClearanceBranch@mail.nih.gov. Formal requests for additional plans and instruments must be requested in writing.

SUPPLEMENTARY INFORMATION: Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires: written comments and/or suggestions from the public and affected agencies are invited to address one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the

methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Proposed Collection Title: Public Health Service (PHS) Post-award Reporting Requirements Revision, OMB 0925-0002, Expiration Date 11/30/2027, Revision, Office of the Director, National Institutes of Health (NIH).

Need and Use of Information Collection: In Fiscal Year 2025, OMB approved through information collections 0925-0001 and 0925-0002, NIH's request to address progress on data management and sharing of NIH-funded research using the Research Performance and Progress Report (RPPR). The DMS Plan format contains six (6) Elements for applicants and recipients to submit free-text narratives explaining how scientific data will be managed and shared for NIH-funded research. Current public reporting burden for the DMS Plan as part of the RPPR information collection is an estimated 2 hours per response, including the time for reviewing instructions, gathering and maintaining the data, and reviewing the collection of information. After several years of implementation experience, NIH is

updating the DMS Plan Elements to provide a structured, simplified format to reduce burden and promote consistent information collection. Effective Fiscal Year 2026, NIH will require applicable recipients to use the updated DMS Plan format when reporting on data management and sharing progress. The updated plan format consists of "Yes, No, or Not Applicable" questions. Narrative text is required only for "No" and "Not Applicable" responses and the narrative response is limited to 300 words. This updated format continues building on trans-NIH initiatives to reduce the public reporting burden and promote consistency across all NIH. The RPPR is required to be used by all NIH, Food and Drug Administration (FDA), Centers for Disease Control and Prevention, and Agency for Healthcare Research and Quality (AHRQ) recipients. Interim progress reports are required to continue support of a PHS grant for each budget year within a competitive segment. Closeout of an award requires a Final Invention Statement (HHS 568) and Final Progress Report. Pre-award reporting requirements are simultaneously consolidated under 0925-0001 and the changes to the collection here are related.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 24,270.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Number of respondents	Number of responses per respondent	Average time per response (in hours)	Total annual burden hour
Reporting				
Data Management and Sharing Plan (Part of RPPR)	15,649	1	1	15,649
Data Management and Sharing Plan (Part of Final RPPR)	8,621	1	1	8,621
Total	24,270	1	1	24,270

The Deputy Director for Extramural Research, Jon Lorsch, having reviewed and approved this document, authorizes Alycia Booth, who is the Federal Register Liaison, to electronically sign this document for purposes of publication in the **Federal Register**.

Dated: September 16, 2026.
Alycia Booth,

DEPARTMENT OF HEALTH AND HUMAN SERVICES**National Institutes of Health****Proposed Collection; 60-Day Comment Request; PHS Applications and Pre-Award Reporting Requirements (OD)**

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995 to provide opportunity for public comments on proposed data collection projects, the National Institutes of Health (NIH) will publish periodic summaries of proposed projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

DATES: Comments regarding this information collection are best assured of having their full effect if received by November 17, 2026.

FOR FURTHER INFORMATION CONTACT: To obtain a copy of the data collection plans and instruments, submit comments in writing, or request more information on the proposed project, contact: Ms. Mikia P. Currie, Program Analyst, Office of Policy for Extramural Research Administration, 6705 Rockledge Drive, Suite 350, Bethesda, Maryland, 20892 or call non-toll-free number (301) 435-0941 or Email your request, including your address to: ProjectClearanceBranch@mail.nih.gov. Formal requests for additional plans and instruments must be requested in writing.

SUPPLEMENTARY INFORMATION: Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires: written comments and/or suggestions from the public and affected agencies are invited to address one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Proposed Collection Title: Public Health Service (PHS) Applications and Pre-Award Reporting Requirements, Revision, OMB 0925-0001 Expiration Date 12/31/2027, Revision, Office of the Director, National Institutes of Health (NIH).

Need and Use of Information Collection: Effective for due dates on or after May 25, 2026, NIH will be implementing a structured, simplified Data Management and Sharing (DMS) Plan format. With the release of the 2023 Data Management and Sharing (DMS) Policy, NIH issued supplemental information outlining desired elements of a DMS Plan. The NIH DMS Plan format contains six (6) Elements for

applicants and recipients to submit free-text narratives explaining how scientific data will be managed and shared. Current public reporting burden for the DMS Plan information collection is an estimated two (2) hours per response, including the time for reviewing instructions, searching for existing data sources, gathering, and maintaining the data needed and reviewing the collection of information. DMS Plans are provided to NIH through OMB approved information collections 0925-0001 and 0925-0002. After several years of implementation experience, NIH is updating the DMS Plan Elements to provide a structured, simplified format to reduce burden and promote consistent information collection. Effective Fiscal Year 2026, NIH will require applicable recipients to use the updated DMS Plan format containing "Yes, No, or Not Applicable" questions. A narrative response will be required only for "No" responses and the narrative response is limited to 300 words. This updated format continues building on trans-NIH initiatives to reduce the public reporting burden and promote consistency across all NIH. The application forms and associated instructions will be updated to align with these new requirements. The Data Management and Sharing (DMS) Plan form expires on 12/31/2027. Post-award reporting requirements are simultaneously consolidated under 0925-0002 and include the Research Performance Progress Report (RPPR).

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 73,117.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Number of respondents	Number of responses per respondent	Average time per response (in hours)	Total annual burden hour
Data Management and Sharing Plan	73,117	1	1	73,117
Total	73,117	1	1	73,117

The Deputy Director for Extramural Research, Jon Lorsch, having reviewed and approved this document, authorizes Alycia Booth, who is the Federal Register Liaison, to electronically sign this document for purposes of publication in the **Federal Register**.

Dated: September 16, 2026.

Alycia Booth,

Federal Register Liaison, National Institutes of Health.

BILLING CODE 4140-01-P

ADVISORY COUNCIL ON HISTORIC PRESERVATION**Adoption of Categorical Exclusion Pursuant to the National Environmental Policy Act**

AGENCY: Advisory Council on Historic Preservation.

ACTION: Notice.

SUMMARY: The Advisory Council on Historic Preservation (ACHP) is notifying the public and documenting

its adoption of the Department of the Interior (DOI) categorical exclusion (CE) for policies, directives, regulations, and guidelines, under section 109 of the National Environmental Policy Act (NEPA). This notice identifies the types of actions to which the ACHP will apply the CE, the considerations that the ACHP will use in determining the applicability of the CE, and the consultation between the agencies on the use of the CE, including application of extraordinary circumstance.

DATES: The adoption is effective on September 18, 2026.

FOR FURTHER INFORMATION CONTACT: Kelly Fanizzo, General Counsel, Advisory Council on Historic Preservation, (202) 517-0193, kfanizzo@achp.gov.

SUPPLEMENTARY INFORMATION:

I. Background

The National Environmental Policy Act, 42 U.S.C. 4321–4347 (NEPA), requires all Federal agencies to consider the environmental impacts of their proposed actions before deciding whether and how to proceed. 42 U.S.C. 4321, 4332. Congress enacted NEPA to encourage productive and enjoyable harmony between humans and the environment, recognizing the profound impact of human activity and the critical importance of restoring and maintaining environmental quality to the overall welfare of humankind. 42 U.S.C. 4321, 4331. NEPA's aims are to ensure agencies consider the potential environmental effects of their proposed actions in their decision-making processes and inform and involve the public in that process. 42 U.S.C. 4332.

Under NEPA, a Federal agency may establish categorical exclusions (CE)—categories of actions that the agency has determined normally do not significantly affect the quality of the human environment, individually or in the aggregate, and, therefore, do not require preparation of an environmental assessment (EA) or an environmental impact statement (EIS)—in its agency NEPA procedures. 42 U.S.C. 4336e(1). If an agency determines that a CE covers a proposed action, the agency then evaluates the proposed action for any extraordinary circumstances in which a normally excluded action may have a significant effect. If no extraordinary circumstances are present, the agency may rely on the CE to approve the proposed action without preparing an EA or EIS. 42 U.S.C. 4336(a)(2). If extraordinary circumstances are present, and the proposed action has the potential to result in significant effects,

the agency is required to prepare an EA or EIS.

Section 109 of NEPA, 42 U.S.C. 4336c, provides that an agency may adopt a CE listed in another agency's NEPA procedures for a category of proposed agency actions. To adopt another agency's CE, the adopting agency must (1) identify the CE listed in the other agency's ("establishing agency") NEPA procedures that covers a category of proposed actions or related actions, (2) consult with the establishing agency to ensure the proposed adoption of the CE for a category of proposed actions is appropriate, (3) identify to the public the CE the agency plans to use for its proposed actions, and (4) document adoption of the CE. 42 U.S.C. 4336c.

The ACHP does not have any agency-specific NEPA regulations or procedures. The ACHP will maintain a list of CEs available to the ACHP at www.achp.gov/ACHP_NEPA_Compliance.

II. Identification of the Categorical Exclusion

The ACHP has identified the following CE established by the DOI at 43 CFR 46.210(i) for adoption.

Policies, directives, regulations, and guidelines: that are of an administrative, financial, legal, technical, or procedural nature; or whose environmental effects are too broad, speculative, or conjectural to lend themselves to meaningful analysis and will later be subject to the NEPA process, either collectively or case-by-case.

The ACHP intends to use this CE to cover its promulgation of policies, directives, regulations, and guidelines as described in the CE.

III. Consideration of Extraordinary Circumstances

The ACHP does not have an agency-specific list of extraordinary circumstances. To ensure the ACHP's application of the CE is consistent with how the DOI applies the CE, the ACHP will evaluate proposed actions for whether there are any extraordinary circumstances using the DOI's list of extraordinary circumstances at 43 CFR 46.215. The DOI's list of extraordinary circumstances include, in part, consideration of impacts on public health and safety; natural resources; unique geographic characteristics; historic or cultural resources; park, recreation, or refuge lands; wilderness areas; wild or scenic rivers; national natural landmarks; sole or principal drinking water aquifers; prime farmlands; wetlands; floodplains; national monuments; migratory birds;

other ecologically significant or critical areas; unresolved conflicts concerning alternative uses of available resources; unique or unknown environmental risks; precedent for future decision-making; historic properties; listed species or critical habitat; access by Indian religious practitioners to, and for ceremonial use of, Indian sacred sites and the physical integrity of those sites; and contribution to the introduction, continued existence, or spread of invasive weeds or non-native invasive species. The responsible official will assess whether an extraordinary circumstance is present. If the responsible official cannot rely on the CE to support a decision to authorize or take a particular proposed action due to extraordinary circumstances, the responsible official will prepare an EA or EIS before doing so.

IV. Consultation With Department of the Interior

In July 2026, the ACHP consulted with the DOI on the appropriateness of the ACHP's adoption of the CE. The consultation included a review of the DOI's experience in establishing and applying the CE, as well as the ACHP's intended uses for the CE. Based on the consultation, the ACHP has determined that the types of actions the ACHP proposes to authorize are substantially similar to the actions for which the DOI has applied the CE. Accordingly, the impacts of the ACHP's actions would be substantially similar to the impacts of the DOI's actions, which are not significant, absent the existence of extraordinary circumstances. Therefore, the ACHP has determined that its adoption of the CE, as described within this notice, is appropriate.

V. Notice to the Public and Documentation of Adoption

This notice identifies to the public and documents the ACHP's adoption of the DOI CE at 43 CFR 46.210(i) for the promulgation of policies, directives, regulations, and guidelines as described in the CE. The notice identifies the category of actions to which the ACHP would apply the CE, as well as the considerations that the ACHP would use in determining whether an action is within the scope of the CE. Documentation of the adoption will also be available at www.achp.gov/ACHP_NEPA_Compliance. The CE is available for use by the ACHP, effective immediately.

Dated: September 16, 2026.

Reid Nelson,

Executive Director.

BILLING CODE 4310–K6–P

DEPARTMENT OF HOMELAND SECURITY

Transportation Security Administration

Intent To Request Reinstatement With Revision From OMB of One Previous Public Collection of Information: Law Enforcement Officer (LEO) Reimbursement Request

AGENCY: Transportation Security Administration, DHS.

ACTION: 60-Day notice.

SUMMARY: The Transportation Security Administration (TSA) invites public comment on one previously approved Information Collection Request (ICR), Office of Management and Budget (OMB) control number 1652–0063, abstracted below that we will submit to OMB for a reinstatement with revision in compliance with the Paperwork Reduction Act. The ICR describes the nature of the information collection and its expected burden. The collection involves the reimbursement of expenses incurred by airport operators for the provision of law enforcement officers (LEOs) to support airport checkpoint screening.

DATES: Send your comments by November 17, 2026.

ADDRESSES: Comments may be emailed to TSAPRA@tsa.dhs.gov or delivered to the TSA PRA Officer, Information Technology, TSA–11, Transportation Security Administration, 6595 Springfield Center Drive, Springfield, VA 20598–6011.

FOR FURTHER INFORMATION CONTACT: Christina A. Walsh at the above address, or by telephone (571) 227–2062.

SUPPLEMENTARY INFORMATION:

Comments Invited

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The ICR documentation will be available at <https://www.reginfo.gov> upon its submission to OMB. Therefore, in preparation for OMB review and approval of the following information collection, TSA is soliciting comments to—

(1) Evaluate whether the proposed information requirement is necessary for

the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Information Collection Requirement

OMB Control Number 1652–0063; Law Enforcement Officer (LEO) Reimbursement Request. TSA has authority to enter into agreements with airport operators to reimburse them for expenses incurred in the provision of LEOs to support screening at airport checkpoints. *See* 49 U.S.C. 106(l) and (m) and 114(m). Consistent with these authorities, TSA created the LEO Reimbursement Program.

TSA requires participants in the LEO Reimbursement Program to record the details of all reimbursements sought. In order to provide for the orderly tracking of reimbursements, the LEO Reimbursement Program uses TSA Form 3503, *LEO Reimbursement Request Invoice*. The information collected includes, but is not limited to, information regarding the invoice, invoicing point of contact, banking and checkpoint log worksheet.

In 2024, TSA requested discontinuation of this collection due to the unavailability of funding to continue the LEO Reimbursement Program. *See* ICR Reference Number 202109–1652–0005. On April 30, 2026, however, Congress approved funding for the LEO Reimbursement Program as part of the Homeland Security and Further Additional Continuing Appropriations Act, 2026 (Pub. L. 119–86; 140 Stat. 773). TSA is now requesting the reinstatement of the collection, along with a revision.

The TSA Form 3503, *LEO Reimbursement Request Invoice*, is provided to participants upon the start of the agreement and is also available via request. Upon completion, participants submit the LEO Reimbursement Request form directly to the LEO Reimbursement Program via email, mail, or in person. Upon receipt, TSA reviews all request for reimbursement forms. The revision involves changes to Section I of the form, where TSA is replacing “DUNS”

with “UEI,¹” and in Section IV, where TSA will update links and contact numbers.

TSA estimates that there will be an average of 260 participant responses monthly, or 3,120 yearly. TSA estimates each respondent will spend approximately 1 hour to complete the request for reimbursement form, for a total annual hour burden of 3,120 hours.

Dated: September 16, 2026.

Christina A. Walsh,

Paperwork Reduction Act Officer, Information Technology, Transportation Security Administration.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NRNHL–DTS#–43735; PPWOCRADIO, PCU00RP14.R50000]

National Register of Historic Places; Notification of Pending Nominations and Related Actions

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service is soliciting electronic comments on the significance of properties nominated before September 5, 2026, for listing or related actions in the National Register of Historic Places.

DATES: Comments should be submitted by October 5, 2026.

ADDRESSES: Comments are encouraged to be submitted electronically to *National_Register_Submissions@nps.gov* with the subject line “Public Comment on <property or proposed district name, (County) State>.” If you have no access to email, you may send them via U.S. Postal Service and all other carriers to the National Register of Historic Places, National Park Service, 1849 C Street NW, MS 2013, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Sherry A. Frear, Chief, National Register of Historic Places/National Historic Landmarks Program, 1849 C Street NW, MS 2013, Washington, DC 20240, *sherry_frear@nps.gov*, 202–913–3763.

SUPPLEMENTARY INFORMATION: The properties listed in this notice are being considered for listing or related actions in the National Register of Historic Places. Nominations for their consideration were received by the National Park Service before September 5, 2026. Pursuant to 36 CFR 60.13, comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Agency Information Collection

Activities: Gathering of Certain Plants or Plant Parts by Federally Recognized Indian Tribes for Traditional Purposes

AGENCY: National Park Service, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, we, the National Park Service (NPS) are requesting an extension of a currently approved information collection.

DATES: Interested persons are invited to submit comments on or before October 19, 2026.

ADDRESSES: Send written comments on this information collection request (ICR) to Phadrea Ponds, Information Collection Clearance Officer, National Park Service, 13461 Sunrise Valley Drive, (MS–263) Reston, VA 20191 (mail) or *phadrea_ponds@ios.doi.gov* (email). Please refer to OMB Control Number 1024–0271 in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT:

Alisha Hall, Tribal Relations Specialist in the Washington Support Office, by email at *Alisha_Hall@nps.gov*, or by telephone at (202) 641–0748. Please reference OMB Control Number 1024–

0271 in the subject line of your comments. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point of contact in the United States. You may also view the ICR at <http://www.reginfo.gov/public/do/PRAMain>.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995, (PRA, 44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), all information collections require approval under the PRA. We may not conduct, or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on June 11, 2026, (91 FR 35550). No comments were received.

We are especially interested in public comments addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility.

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used.

(3) Ways to enhance the quality, utility, and clarity of the information to be collected.

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronic submission of response).

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personally identifiable information in your comment, you should be aware that your entire comment—including your personally identifiable information—may be made publicly available at any time. While you can ask us in your comment to withhold your personally identifiable information from public review, we cannot guarantee that we will be able to do so.

Abstract: In most cases, people are not allowed to collect plants in national parks. However, federal law and certain regulations (36 CFR 2.1(c)) allow exceptions, including situations where a federally recognized Tribe has the legal right to gather plants for traditional purposes.

Under 36 CFR 2.6, members of federally recognized Tribes may gather plants or plant parts in a park if their Tribe has a gathering agreement with the National Park Service (NPS). These agreements honor Tribal sovereignty, support government-to-government relationships, and ensure that NPS applies the rules consistently across parks.

Section 2.6(f) of the regulations explains how NPS and a Tribe work together to create a plant-gathering agreement. After an agreement is completed, NPS issues a permit that authorizes Tribal members to gather specific plants. Only enrolled Tribal members who are designated by the tribe to gather and whose Tribe has a long-standing, historical connection to the park—and whose connection existed before the park was created—may gather plants. The gathering must be for traditional cultural purposes, must be sustainable, and cannot be for commercial use. The information collection covered by these rules includes:

- A Tribe's request to enter into a plant-gathering agreement.
- Information needed to develop the agreement, such as the Tribe's traditional connection to the park, the cultural purpose for gathering, and details about the types and amounts of plants to be gathered.
- Information submitted if a Tribe appeals an NPS decision denying a request, such as documentation of the Tribe's historical connection to the park, traditional practices, or potential effects on park resources.

Title of Collection: Gathering of Certain Plants or Plant Parts by Federally Recognized Indian Tribes for Traditional Purposes.

OMB Control Number: 1024–0271.

Form Number: None.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: Indian Tribes.

Total Estimated Number of Annual Responses: 30.

Estimated Completion Time per Response: Varies from 4 to 80 hrs. (times vary depending upon the activity).

Total Estimated Number of Annual Burden Hours: 530 hrs.

Respondent's Obligation: Required to obtain or retain a benefit.

Frequency of Collection: On occasion.

Total Estimated Annual Non Hour

Burden Cost: None.

An agency may not conduct, or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Phadrea Ponds,

*Information Collection Clearance Officer,
National Park Service.*

DEPARTMENT OF THE INTERIOR

Bureau of Safety and Environmental Enforcement

[Docket ID BSEE–2025–0332;
EEEE500000—256E1700D2—
ET1SF0000.EAQ000 OMB Control Number
1014–0002]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Oil and Gas Production Measurement Surface Commingling, and Security

AGENCY: Bureau of Safety and Environmental Enforcement, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Bureau of Safety and Environmental Enforcement (BSEE) proposes to renew an information collection.

DATES: Interested persons are invited to submit comments on or before October 19, 2026.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Please provide a copy of your comments to Kelly Odom, Acting BSEE ICCO, 45600 Woodland Road, Sterling, VA 20166; or by email to Kelly.Odom@bsee.gov. Please reference OMB Control Number 1014–0002 in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about

this ICR, contact Kelly Odom by email at Kelly.Odom@bsee.gov, or by telephone at (703) 787-1775. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. You may also view the ICR at <http://www.reginfo.gov/public/do/PRAMain>.

SUPPLEMENTARY INFORMATION: In accordance with the PRA and 5 CFR 1320.8(d)(1), we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on June 17, 2026 [91 FR 36607]. No comments were received.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other Federal agencies on the proposed ICR that is described below. We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: The regulations at 30 CFR 250, subpart L, Oil and Gas Production Measurement, Surface Commingling, and Security, are the subject of this collection. This request also covers the related Notices to Lessees and Operators (NTLs) that BSEE issues to clarify, supplement, or provide additional guidance on some aspects of our regulations. BSEE uses the information collected under subpart L to ensure that the volumes of hydrocarbons produced are measured accurately, and royalties are paid on the proper volumes. Specifically, BSEE needs the information to:

Liquid Hydrocarbon Measurement

- Determine if measurement equipment is properly installed, provides accurate measurement of production on which royalty is due, and is operating properly;
- Ascertain if all removals of oil and condensate from the lease are reported;
- Obtain rates of production measured at royalty meters, which can be examined during field inspections;

Gas Measurement

- Ensure that the sales location is secure and production cannot be removed without the volumes being recorded;

Surface Commingling

- Review gas volume statements and compare them with the Oil and Gas Operations Reports to verify accuracy.

Miscellaneous & Recordkeeping

- Review proving reports to verify that data on run tickets are calculated and reported accurately.

Title of Collection: 30 CFR 250, Subpart L, Oil and Gas Production Measurement Surface Commingling, and Security.

OMB Control Number: 1014-0002.

Form Number: None.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: Potential respondents include Federal OCS oil, gas, and sulfur lessees and/or operators and holders of pipeline rights-of-way.

Total Estimated Number of Annual Respondents: Currently there are approximately 550 Federal OCS oil, gas, and sulfur lessees and holders of pipeline rights-of-way. Not all the potential respondents will submit information in any given year, and some may submit multiple times.

Total Estimated Number of Annual Responses: 3,548.

Estimated Completion Time per Response: Varies from 10 minutes to 35 hours, depending on activity.

Total Estimated Number of Annual Burden Hours: 1,621.

Respondent's Obligation: Responses are mandatory, while others are required to obtain or retain benefits, or are voluntary.

Frequency of Collection: Submissions are generally on occasion and monthly.

Total Estimated Annual Nonhour Burden Cost: \$54,270.

BILLING CODE 4310-VH-P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1488]

Certain Gyro-Stabilized Electric Unicycles and Components Thereof and Products Containing the Same; Notice of a Commission Determination Not To Review an Initial Determination Granting Complainants' Unopposed Motion To Amend the Complaint and Notice of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review the presiding administrative law judge's ("ALJ") initial determination ("ID") (Order No. 18), granting complainants' unopposed motion to amend the complaint and notice of investigation to add Guangzhou Coyote Intelligent Equipment Co., Ltd. d/b/a LeaperKim ("LeaperKim Coyote") as a respondent.

FOR FURTHER INFORMATION CONTACT:

Cathy Chen, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone 202–205–2392. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>. For help accessing EDIS, please email EDIS3Help@usitc.gov. General information concerning the Commission may also be obtained by accessing its internet server at <https://www.usitc.gov>. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on March 5, 2026, based on a complaint

filed on behalf of Inventist, Inc. of Camas, WA and Alien Technology Group, Inc. d/b/a Alien Rides. of San Francisco, CA (collectively, "Complainants"). 91 FR 10,827 (Mar. 5, 2026). The complaint, as amended, alleged violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain gyro-stabilized electric unicycles and components thereof and products containing the same by reason of the infringement of certain claims of U.S. Patent No. 8,807,250 and the claim of U.S. Patent No. D729,698. *Id.* The complaint, as amended, further alleged that an industry in the United States exists or is in the process of being established as required by the applicable Federal Statute. *Id.* The Commission's notice of investigation named the following respondents: Immotion Technologies Co., Ltd. d/b/a Immotion ("Immotion"); Guangzhou Veteran Intelligent Technology Co., Ltd. d/b/a LeaperKim; Dong Guan BECODE Intelligent Technology Co., Ltd. d/b/a BECODE; Shenzhen King Song Intelligence Technology Co., Ltd. d/b/a Kingsong; Guangzhou JiDongTai Intelligent Equipment Co., Ltd. d/b/a Nosfet, all of Guangdong, China. *Id.* The Office of Unfair Import Investigations ("OUII") was also named as a party in this investigation. *Id.*

Respondent Immotion has been terminated from the investigation based on a settlement agreement. Order No. 11 (May 21, 2026), *unreviewed by Comm'n* Notice (Jun. 18, 2026).

On August 7, 2026, Complainants filed a motion to amend the complaint and notice of investigation to add LeaperKim Coyote as a respondent pursuant to Commission Rule 210.14(b). OUII filed a response in support of the motion.

On August 18, 2026, the ALJ issued the subject ID (Order No. 18), granting the motion to amend the complaint and notice of investigation to add LeaperKim Coyote as a respondent. The ID found Complainants demonstrated good cause to grant the motion. Order No. 18 at 2 (Aug. 18, 2026). Specifically, the ID observed that good cause exists to grant the motion because Complainants recently "learned through LeaperKim Coyote's former *pro se* representative [] that the originally named LeaperKim respondent, Guangzhou Veteran Intelligent Technology Co., Ltd. d/b/a LeaperKim [], is allegedly defunct, and that LeaperKim Coyote is allegedly a separate legal entity that currently owns

the LeaperKim trademark." *Id.* (quoting Mot. at 1, Doc. ID No. 890866 (Aug. 7, 2026)). The ID noted that Complainants argued that "[g]ranteeing the requested amendment will not prejudice any party or the public interest." *Id.* (quoting Mot. at 1). No petitions for review were filed.

The Commission has determined not to review the subject ID. Respondent LeaperKim Coyote is added as a respondent in this investigation.

The Commission vote for this determination took place on September 15, 2026.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, and in Part 210 of the Commission's Rules of Practice and Procedure, 19 CFR part 210.

By order of the Commission.

Issued: September 16, 2026.

Lisa Barton,

Secretary to the Commission.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1480]

Certain Wireless Communication Devices and Components Thereof; Notice of a Commission Determination Not To Review an Initial Determination Terminating the Investigation as to Certain Respondents; Termination of the Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission ("Commission") has determined not to review an initial determination ("ID") (Order No. 32) of the presiding administrative law judge ("ALJ") granting the unopposed motion to terminate certain respondents from the above-captioned investigation based on settlement and terminate the investigation. The investigation is terminated.

FOR FURTHER INFORMATION CONTACT:

Jonathan D. Link, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–3103. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>. For help accessing EDIS, please email

EDIS3Help@usitc.gov. General information concerning the Commission may also be obtained by accessing its internet server at <https://www.usitc.gov>. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205-1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on January 21, 2026, based on a complaint filed by Active Wireless Technologies LLC ("AWT") of Marshall, Texas. 91 FR 2559-560 (Jan. 21, 2026). The complaint, as supplemented, alleges violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain wireless communication devices and components thereof by reason of infringement of certain claims of U.S. Patent No. 10,531,443; U.S. Patent No. 10,601,566; U.S. Patent No. 10,785,764; U.S. Patent No. 10,805,955; U.S. Patent No. 10,855,432; and U.S. Patent No. 11,019,557. *Id.* The complaint further alleges that a domestic industry exists. *Id.* The Commission's notice of investigation named as respondents BLU Products, Inc. ("BLU") of Doral, Florida; Coosea USA Technologies, Inc. ("Coosea") of San Diego, California; Qualcomm Technologies, Inc. ("Qualcomm") of San Diego, California; DISH Wireless LLC ("DISH") of Englewood, Colorado; EchoStar Corporation ("EcoStar") of Englewood, Colorado; HTC Corporation ("HTC") of New Taipei City, Taiwan; LG Electronics Inc. ("LGE") of Seoul, Korea; OnePlus Technology (Shenzhen) Co., Ltd. ("OnePLUS") of Shenzhen, China; TCL Communication Ltd. of Hong Kong and TTE Technology, Inc. d/b/a TCL North America of Irvine, California and TCL Technology Group Corporation of Huizhou City, China (collectively "TCL"); and T-Mobile USA, Inc. ("T-Mobile") of Bellevue, Washington. *Id.* The Office of Unfair Import Investigations is not participating in the investigation. *Id.*

On April 28, 2026, the Commission terminated the investigation as to DISH, EchoStar, HTC, and OnePlus based on withdrawal of the investigation. *See* Order No. 16 (Apr. 8, 2026), *unreviewed by* Comm'n Notice (Apr. 28, 2026). On May 1, 2026, the Commission terminated the investigation as to Qualcomm based on settlement. *See* Order No. 17 (Apr. 19, 2026), *unreviewed by* Comm'n Notice (May 1, 2026). On June 16, 2026, the

Commission terminated the investigation as to LGE based on settlement. *See* Order No. 25 (May 15, 2026), *unreviewed by* Comm'n Notice (June 16, 2026). On June 16, 2026, the Commission terminated the investigation as to Coosea based on settlement. *See* Order No. 27 (May 27, 2026), *unreviewed by* Comm'n Notice (June 24, 2026). On September 3, 2026, the Commission terminated the investigation as to BLU based on settlement. *See* Order No. 31 (Aug. 5, 2026), *unreviewed by* Comm'n Notice (Sept. 3, 2026).

On July 31, 2026, AWT filed an unopposed motion to terminate TCL and T-Mobile from the investigation on the basis of settlement. AWT certified that the motion is unopposed. On August 10, 2026, T-Mobile filed a response to the motion identifying an additional agreement between AWT and T-Mobile.

On August 14, 2026, the ALJ issued the subject ID (Order No. 32), granting the motion to terminate the investigation as to TCL and T-Mobile, the last remaining respondents, and terminating the investigation in its entirety. The subject ID finds that the motion meets the requirements of Commission Rules 210.21(b)(1) and 210.50(b)(2) (19 CFR 210.21(b)(1), 210.50(b)(2)), and that there are no extraordinary circumstances that would prevent the requested termination of the investigation. No petition for review of the ID was filed.

The Commission has determined not to review the subject ID. Accordingly, the Commission terminates the last remaining respondents TCL and T-Mobile from the investigation and thus terminates the investigation in its entirety.

The Commission vote for this determination took place on September 15, 2026.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR Part 210).

By order of the Commission.

Issued: September 15, 2026.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020-02-P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-1521]

Certain Electronic Devices With Certain Audio Technologies; Notice of Institution of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on August 14, 2026, under section 337 of the Tariff Act of 1930, as amended, on behalf of BoomCloud 360 Inc. of Encinitas, California. A supplement was filed on August 31, 2026. The complaint, as supplemented, alleges violations of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain electronic devices with certain audio technologies by reason of the infringement of certain claims of U.S. Patent No. 10,524,078 ("the '078 patent"); U.S. Patent 11,533,560 ("the '560 patent"); and U.S. Patent 11,051,121 ("the '121 patent"). The complaint, as supplemented, further alleges that an industry in the United States exists as required by the applicable Federal Statute.

The complainant requests that the Commission institute an investigation and, after the investigation, issue a limited exclusion order and cease and desist orders.

ADDRESSES: The complaint, except for any confidential information contained therein, may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>. For help accessing EDIS, please email EDIS3Help@usitc.gov. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at (202) 205-2000. General information concerning the Commission may also be obtained by accessing its internet server at <https://www.usitc.gov>.

FOR FURTHER INFORMATION CONTACT: Pathenia M. Proctor, The Office of Unfair Import Investigations, U.S. International Trade Commission, telephone (202) 205-2560.

SUPPLEMENTARY INFORMATION:

Authority: The authority for institution of this investigation is

contained in section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, and in section 210.10 of the Commission's Rules of Practice and Procedure, 19 CFR 210.10 (2025).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission, on September 15, 2026, ordered that—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain products identified in paragraph (2) by reason of infringement of one or more of claims 1–23 of the '078 patent; claims 1–43 of the '560 patent; and claims 1–30 of the '121 patent, and whether an industry in the United States exists as required by subsection (a)(2) of section 337;

(2) Pursuant to section 210.10(b)(1) of the Commission's Rules of Practice and Procedure, 19 CFR 210.10(b)(1), the plain language description of the accused products or category of accused products, which defines the scope of the investigation, is “electronic devices with certain audio technologies, such as mobile phones, tablets, and products containing certain audio features such as spatial enhancement for stereo speakers using gain adjustment of spatial and nonspatial components together with adjustments for asymmetries between left and right speakers; dynamic audio enhancement that applies enhancements based on rendering system information and metadata indicative of an audio consumption software application; and/or spatial audio enhancement using crosstalk processing together with compensation for spectral defects caused by the crosstalk processing”;

(3) Pursuant to Commission Rule 210.50(b)(1), 19 CFR 210.50(b)(1), the presiding administrative law judge shall take evidence or other information and hear arguments from the parties or other interested persons with respect to the public interest in this investigation, as appropriate, and provide the Commission with findings of fact and a recommended determination on this issue, which shall be limited to the statutory public interest factors set forth in 19 U.S.C. 1337(d)(1), (f)(1), (g)(1);

(4) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is:

BoomCloud 360 Inc., 687 S Coast Hwy
101 Ste 239, Encinitas, CA 92024

(b) The respondents are the following entities alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Apple, Inc., One Apple Park Way,
Cupertino, CA 95014

Samsung Electronics Co., Ltd., 129
Samsung-Ro, Yeongtong-gu, Suwon-
si, Gyeonggi-do, 443–742, South
Korea

Samsung Electronics America, Inc., 85
Challenger Rd., Ridgefield Park, NJ
07660

Google LLC, 1600 Amphitheatre
Parkway, Mountain View, CA 94043

(b) The Office of Unfair Import
Investigations, U.S. International Trade
Commission, 500 E Street SW, Suite
401, Washington, DC 20436; and

(5) For the investigation so instituted, the Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding Administrative Law Judge.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with section 210.13 of the Commission's Rules of Practice and Procedure, 19 CFR 210.13. Pursuant to 19 CFR 201.16(e) and 210.13(a), such responses will be considered by the Commission if received not later than 20 days after the date of service by the Commission of the complaint and the notice of investigation. Extensions of time for submitting responses to the complaint and the notice of investigation will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter an initial determination and a final determination containing such findings, and may result in the issuance of an exclusion order or a cease and desist order or both directed against the respondent.

By order of the Commission.

Issued: September 16, 2026.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2026–19175 Filed 9–17–26; 8:45 am]

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

[OMB Number 1110–0088]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Extension of a Previously Approved Collection; Title—Lawful Access Data Collection (LADC)

AGENCY: Federal Bureau of Investigation (FBI), Department of Justice (DOJ).

ACTION: 60-Day notice.

SUMMARY: The Criminal Justice Information Services (CJIS) Division, FBI, DOJ, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until November 16, 2026.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Matthew Fancher, Unit Chief, Crime and Law Enforcement Statistics Unit, FBI, CJIS Division, 1000 Custer Hollow Road, Clarksburg, West Virginia 26306, 304.625.4830, email ucr@fbi.gov.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the FBI, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g.,

permitting electronic submission of responses.

Abstract: The LADC will act as the collection tool for tracking the volume of investigations that are impacted by device and software encryption and provide valuable data to decision makers to help mitigate these lawful access impacts.

Overview of This Information Collection

1. *Type of Information Collection:* Extension of previously approved collection.

2. *The Title of the Form/Collection:* Lawful Access Data Collection.

3. *The agency number, if any, and the applicable component of the Department sponsoring the collection:* The sponsor is the CJIS Division, FBI, DOJ.

4. *Affected public who will be asked or required to respond, as well as the obligation to respond:* Affected Public federal, state, county, city, tribal, and territorial law enforcement agencies. The obligation to respond is voluntary and at the discretion of the contributing agency.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* Due to limited participation

and limited data reported, the number of respondents for the LADC is based on estimates from initial usability testing.

The estimated time per response is 3 minutes, 12 seconds to complete a LADC submission.

CIV estimates that 950,000 respondents will take 3 minutes and 12 seconds to complete the form.

6. *An estimate of the total annual burden (in hours) associated with the collection:* The total annual burden hours for this collection is 50,667 hours.

CIV estimates total 50,667 burden hours (950000 × 192 seconds)/60/60 = 50,667).

Activity	Number of respondents	Frequency (annually)	Total annual responses	Time per response	Total annual burden (hours)
Ex: Survey (individuals or households)	950,000	50	950,000	3 min. 12 sec	50,667
Unduplicated Totals	950,000		950,000		50,667

7. *An estimate of the total annual cost burden associated with the collection, if applicable:* According to the cost model provided by the FBI's CJIS Division, Resources Management Section, Fee

Programs Unit (FPU), the following are projections based upon prior collection activity. The cost module does not separate the costs between the two methods of collecting UCR data. The

FPU cannot provide an itemized breakdown of separate UCR collections, so provided is a total cost of the FBI's UCR Program and its collection activities.

DATA COLLECTION AND PROCESSING COSTS

Activity	Cost	Full-Time equivalent
CJIS Systems Agency/Officer Development and Support	\$4,805.07	0.03
Collaborate with Law Enforcement and Critical Incident Management Services	8,479.06	0.06
Conduct Field Office, Office of Partner Engagement, and Legal Attache Engagement Activities	18,456.52	0.15
Conduct Liaison, Education, and Promotion	530,655.46	4.03
Conduct Other Crime Data Services Activities	392,300.68	2.81
Conduct Other Partner Engagement Activities	41,822.65	0.27

BILLING CODE 4410-02-P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice: 26-053]

Aerospace Safety Advisory Panel; Meeting

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, the National Aeronautics and Space Administration announces a forthcoming meeting of the Aerospace Safety Advisory Panel (ASAP).

DATES: Thursday, October 22, 2026, 1:30 p.m. to 3:00 p.m., eastern time.

ADDRESSES: Public attendance will be virtual only. See dial in information below under **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Ms. Marcia Guignard, Committee Management Specialist, NASA Headquarters, Washington, DC 20546, marcia.guignard@nasa.gov.

SUPPLEMENTARY INFORMATION: The Aerospace Safety Advisory Panel

(ASAP) will hold its Fourth Quarterly Meeting for 2026. This discussion is pursuant to carrying out its statutory duties for which the Panel reviews, identifies, evaluates, and advises on those program activities, systems, procedures, and management activities that can contribute to program risk. Priority is given to those programs that involve the safety of human flight. The agenda will include:

- Updates on the International Space Station Program
- Updates on the Commercial Crew Program
- Update on Commercial LEO Development Programs
- Updates on Artemis Programs

This meeting is only available telephonically. Any interested person may call the USA toll free conference call number 800-369-3107; passcode 3116192 and then the # sign. At the beginning of the meeting, members of the public may make a verbal presentation to the Panel on the subject of safety in NASA, not to exceed 5 minutes in length. To do so, members of the public must contact Ms. Marcia Guignard, at marcia.guignard@nasa.gov at least 48 hours in advance. Any member of the public is permitted to file a written statement with the Panel via electronic submission to Ms. Guignard at the email address previously noted. Verbal presentations and written statements should be limited to the subject of safety in NASA. It is imperative that the meeting be held on this date to accommodate the

scheduling priorities of the key participants.

Jamie M. Krauk,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-106369; File No. SR-CboeBYX-2026-032]

Self-Regulatory Organizations; Cboe BYX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Introduce a Data Vendor Program

September 15, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on September 8, 2026, Cboe BYX Exchange, Inc. (the “Exchange” or “BYX”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Cboe BYX Exchange, Inc. (the “Exchange” or “BYX”) proposes to introduce a Data Vendor Program,

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

which includes introducing a new defined term of Data Vendor, along with other clarifying changes. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Commission's website (<https://www.sec.gov/rules/sro.shtml>), the Exchange's website (https://www.cboe.com/us/equities/regulation/rule_filings/byx/), and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this proposed rule change is to (i) introduce a definition of Data Vendor; (ii) codify the existing definition (as defined in the Exchange's applicable North American Market Data Policies) of Extranet Service Provider; (iii) codify an existing practice that permits an External Distributor of both Cboe One Summary and Cboe One Premium to be liable only for the External Distribution Fee for Cboe One Premium; and (iv) create a program for Data Vendors in order to incentivize Data Vendors to build out the applicable feeds and make them commercially available to subscribers.³ The proposed program will provide fee waivers (as described below) for External Distribution Fees for Data Vendors for the Cboe One Summary Feed and Cboe One Premium Feed.

Proposed Definitions

In connection with this proposed program, the Exchange first proposes to adopt a definition for a specific category of participants. Specifically, the Exchange proposes to establish the term

"Data Vendor" to mean "an External Distributor that (i) is actively engaged, as part of its primary business objective, in the solicitation of unaffiliated third-party Distributors to redistribute a transformed Market Data Product; (ii) does not maintain a brokerage relationship with Users in connection with the receipt or use of the applicable Market Data Product; and (iii) is not an Extranet Service Provider." As part of this new definition, and as further described below, the Exchange proposes to codify the existing definition of Extranet Service Provider within the Cboe Global North American Market Data Policies to be within its Fee Schedule.

The Exchange has also established objective, verifiable criteria for determining eligibility as a Data Vendor. The following criteria, which will be reflected in the Exchange's Fee Schedule, must be satisfied: (1) the External Distributor must identify itself as a Data Vendor in publicly available marketing materials; (2) the External Distributor must transform the applicable Market Data Product before redistribution, which may include aggregation across multiple data sources, normalization into a consistent format, enrichment with reference data or analytics, or repackaging into a proprietary delivery mechanism (e.g., terminal, API, or proprietary feed); (3) the External Distributor must redistribute the applicable transformed Market Data Product to downstream Distributors as part of a paid commercial offering; (4) the External Distributor must not maintain a brokerage relationship with any User to whom it distributes the applicable Market Data Product; (5) the External Distributor must not be an Extranet Service Provider; and (6) the External Distributor must be actively engaged in the solicitation of unaffiliated third-party Distributors to subscribe to and redistribute the applicable transformed Market Data Product. Upon request, the External Distributor must provide a written attestation certifying compliance with the foregoing criteria. The Exchange may request supporting documentation, including but not limited to Distributor subscriber lists, revenue breakdowns by recipient type, and descriptions of the transformations applied to the Market Data Product. These objective eligibility criteria ensure that the Data Vendor Program is equitably applied to all similarly situated market participants.

External Distributor

To begin, "Data Vendor" is intended to only encompass External Distributors

and not Internal Distributors. An External Distributor is defined as a Distributor that receives the Exchange Market Data product and then distributes that data to a third party or one or more Users outside the Distributor's own entity.⁴ The Exchange seeks to adopt this program in order to encourage broader redistribution of this data. As such, the Exchange limits this to External Distributors as the intent of this program is to have data distributed outside one's own entity.

Primary Business Is To Redistribute to Distributors

To be eligible as a Data Vendor, an External Distributor must be taking in data for the primary business purpose of selling access to the applicable feed as a service in its own right, not merely redistributing data in incidental support of broader business functions such as trade execution, account management, or brokerage services. The Exchange notes that, as part of its business, a Data Vendor may redistribute a market data product to Users, but the primary purpose must be to redistribute data to Distributors. The Exchange will assess whether an External Distributor's primary business purpose satisfies this criterion based on the External Distributor's publicly available marketing materials. If the Exchange were to modify this requirement to permit a primary business purpose of redistribution to either Distributors or Users, it would unintentionally include firms that may redistribute only to Users and that are not traditionally considered data vendors (e.g., a media outlet or a bank).

Transformed Market Data Product

To be eligible, the Exchange requires that the Data Vendor not simply pass through data in its original form. Transformation may include aggregation across multiple sources, normalization into a consistent format, enrichment with derived analytics, repackaging into a proprietary delivery mechanism (e.g., terminal, API, feed), or any other value-added processing that distinguishes the output from the original source data.

No Brokerage Relationship With Users

Next, the Exchange proposes that the definition of Data Vendor include a stipulation that a Data Vendor must not maintain a brokerage relationship with Users who receive the market data product. The Exchange already has programs aimed at retail brokers, for example, both the Small Retail Broker Program and the Small Retail Broker

³ The Exchange initially submitted the proposed rule change on July 1, 2026 (SR-CboeBYX-2026-027). On July 15, 2026, the Exchange withdrew that filing and submitted SR-CboeBYX-2026-028. On September 8, 2026, the Exchange withdrew that filing and submitted this filing.

⁴ See BYX Equities Fee Schedule.

Hosted Solutions Program.⁵ This proposed program is intended to encourage Data Vendors specifically to take in the applicable feeds and distribute them. A Data Vendor's service model is different from a retail broker's, as a Data Vendor's business model is built around providing data to firms and Users alike, whereas a retail broker's business model is focused on connecting Users to markets in order to trade and may include providing market data as part of its offering to its Users. As the Exchange already has programs specifically for retail brokers, the Exchange does not believe it would be appropriate to include retail brokers here. The Exchange notes that if a Data Vendor that is currently receiving a fee waiver under this Program subsequently commences a brokerage relationship with its Users, it will no longer satisfy the definition of Data Vendor and will cease to be eligible for the Program. In such case, the External Distributor would be assessed the standard External Distribution Fee for the applicable feed as of the date it no longer satisfies the definition of Data Vendor.

Not an Extranet Service Provider

As noted above, the Exchange proposes also to define Extranet Service Provider when it introduces the definition of Data Vendor into its Fee Schedule. Today, this term already exists in the Cboe Global Markets North American Data Policies.⁶ The Exchange proposes to codify this definition in its Fee Schedule because the proposed definition of Data Vendor directly references this defined term. Specifically, the Exchange proposes to codify that an Extranet Service Provider is "an entity that has entered into a Cboe Global Markets Global Data Agreement and Transmits an Exchange Market Data Product, via an extranet operated by such entity, to data recipients. 'Transmit' means to direct an Exchange Market Data Product to one or more data recipients without modification of the content, format, or other characteristics of the Exchange Market Data Product." An Extranet Service Provider is not authorized to use or process an Exchange Market Data Product for any purpose.

Applicable Data Feeds

By way of background, the Exchange offers the Cboe One Premium Data Feed, which is a data feed that disseminates, on a real-time basis, the aggregate best bid and offer ("BBO") of all displayed orders for securities traded on the

Exchange and its affiliated equities exchanges and enables recipients to receive aggregated two-sided quotations from BYX and its affiliated equities exchanges for up to twelve (12) price levels (and, for a limited time, up to five (5) price levels).⁷ The Cboe One Premium Data Feed is created using the data from the Exchange and each of its affiliated equities exchanges' Summary Depth data feeds (allowing for up to 48 total price levels).

The Exchange also offers the Cboe One Summary Data Feed, which disseminates, on a real-time basis, the aggregate BBO of all displayed orders for securities traded on BYX and its affiliated equities exchanges and also contains individual last sale information for BYX and its affiliated equities exchanges.⁸

External Distribution Fees for Cboe One Premium and Cboe One Summary

The proposed rule change also clarifies that External Distributors of both Cboe One Summary and Cboe One Premium shall only be responsible for paying the External Distribution Fee for Cboe One Premium. The current fee schedule provides that "Cboe One Summary User Fees can be applied to Cboe One Summary and Cboe One Premium External Distribution Fees." Under the Exchange's existing application of this provision, an External Distributor receiving both Cboe One Summary and Cboe One Premium is assessed only the Cboe One Premium External Distribution Fee⁹, and User

⁷ BYX filed to increase the levels of the Cboe One Premium Data Feed from five (5) levels to twelve (12) levels. To help in this transition, it is currently supporting both the five and twelve level feeds; however, as stated in its rule, BYX shall sunset the five (5) level feed of Cboe One Premium by December 31, 2026 (with the date to be announced via Exchange Notice). See Rule 11.22(i).

⁸ The Cboe One Summary Feed is distinguishable from the Cboe One Premium Feed in that it does not provide depth of book data. In contrast, the Cboe One Premium Feed contains all the available data in the Cboe One Summary Feed and also provides depth of book data.

⁹ To better illustrate this concept, consider the following examples. Example 1: If a firm subscribes to only Cboe One Summary, its User costs will be used to offset the External Distribution Fee for Cboe One Summary. In the event the firm's User costs total \$2,000, the firm will pay \$2,000 in User fees and \$3,000 (\$5,000 – \$2,000) for its External Distribution Fee. Example 2: If a firm subscribes only to Cboe One Premium, its User costs will be used to offset the External Distribution Fee for Cboe One Premium. In the event a firm's User costs total \$10,000, the firm will pay \$10,000 in User fees and \$2,500 (\$12,500 – \$10,000) for its External Distribution Fee. Example 3: If a firm subscribes to both Cboe One Summary and Cboe One Premium, only the External Distribution Fee for Cboe One Premium is assessed and this fee may be offset by both Cboe One Summary and Cboe One Premium User fees. In the event a firm's User costs are \$2,000 for Cboe One Summary and \$10,000 for Cboe One

Fees for both Cboe One Summary and Cboe One Premium may be applied to offset that fee.

The Exchange is now proposing to make this treatment explicit by adding clarifying language to the fee schedule stating that External Distributors of both feeds are only responsible for paying the External Distribution Fee for Cboe One Premium. This amendment does not alter the economic substance of the Exchange's existing fee structure, nor does it impose any new or increased fees on market participants. Rather, it reduces potential ambiguity by expressly codifying the Exchange's existing application of the user fee offset provisions. The Exchange believes this clarification will promote transparency and reduce confusion among External Distributors regarding their fee obligations under the Cboe One market data product offerings.

Impact of Proposed Program

As noted above, the proposed program would waive External Distribution Fees for Data Vendors of the Cboe One Summary Feed and the Cboe One Premium Feed (each, an "Applicable Feed") that satisfy certain eligibility requirements. A Data Vendor must not have received the Applicable Feed for which it seeks the waiver during the 18 months¹⁰ preceding the waiver application date, and must integrate, or be actively in the process of integrating, the Applicable Feed and making it commercially available to its subscribers. The Data Vendor need not have fully integrated the Applicable Feed or made it commercially available before the waiver begins. For a qualifying Data Vendor, the applicable waiver commences on the date it first receives the Applicable Feed, and, if that date occurs mid-month, that partial month counts as the first month of the waiver period. Specifically, the Exchange proposes to waive the External Distribution Fee of \$5,000 per month for Cboe One Summary for 12 months (the "Summary Waiver Period"), except that a Data Vendor is not eligible for a Summary Waiver Period if it is receiving Cboe One Premium because Cboe One Summary is included in the Cboe One Premium External Distribution Fee as noted herein. To clarify, because a Data Vendor receiving Cboe One Premium pays only the Cboe One Premium

Premium, the firm will pay a total of \$12,000 in User fees (\$10,000 + \$2,000) and it will pay \$500 for its External Distribution Fee (\$12,500 – (\$10,000 + \$2,000)).

¹⁰ The Exchange notes that this same 18-month requirement is the standard for its other fee waiver programs. See BYX Fee Schedule.

⁵ See BYX Equities Fee Schedule.

⁶ See Market_Data_Policies.pdf.

External Distribution Fee (and no separate fee is assessed for Cboe One Summary), there is no separate Cboe One Summary External Distribution Fee to waive for such a firm.¹¹ The Exchange proposes to waive the External Distribution Fee of \$12,500 per month for Cboe One Premium for 24 months (the “Premium Waiver Period”).

If an eligible Data Vendor already receives Cboe One Summary, it may still receive the Premium Waiver Period if it has not received Cboe One Premium during the 18 months preceding the waiver application date and satisfies the integration and commercial availability requirement with respect to Cboe One Premium. During the Premium Waiver Period, the Data Vendor’s Cboe One Summary subscription would be covered under the Premium Waiver, and no separate External Distribution Fee would be assessed for Cboe One Summary. Similarly, an eligible Data Vendor that builds out both feeds simultaneously would receive only the Premium Waiver Period.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the “Act”) and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.¹² Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹³ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹⁴ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes the proposed rule change promotes just

and equitable principles of trade by establishing a clear, objective, and transparent definition of “Data Vendor” that properly captures the characteristics distinguishing Data Vendors from other categories of External Distributors. The proposed definition sets forth specific, verifiable criteria—namely, that a Data Vendor must (i) be an External Distributor; (ii) be actively engaged, as part of its primary business objective, in the solicitation of unaffiliated third-party Distributors to redistribute a transformed Market Data Product; (iii) not maintain a brokerage relationship with Users; and (iv) not be an Extranet Service Provider. By establishing objective eligibility criteria, the proposed rule change ensures that similarly situated market participants are treated consistently and that the benefits of the Data Vendor Program are available to all External Distributors that meet the defined qualifications.

The Exchange further believes that the codification of the existing Extranet Service Provider definition within the Fee Schedule promotes just and equitable principles of trade. Because the proposed Data Vendor definition directly references the term “Extranet Service Provider,” market participants seeking to understand their eligibility for the Program should not be required to consult the Cboe Global Markets North American Data Policies to determine how that term applies. By incorporating both defined terms into the Fee Schedule itself, the Exchange ensures that participants have access to the complete framework.

The Exchange further believes that the proposed rule change removes impediments to and perfects the mechanism of a free and open market and a national market system. The Data Vendor Program is designed to incentivize Data Vendors to integrate the Applicable Feeds, make them commercially available to subscribers, and redistribute them by providing fee waivers for External Distribution Fees for the Cboe One Summary Feed and Cboe One Premium Feed. By waiving the External Distribution Fee of \$5,000 per month for Cboe One Summary for the Summary Waiver Period and waiving the External Distribution Fee of \$12,500 per month for Cboe One Premium for the Premium Waiver Period, the Exchange encourages broader redistribution of its market data products. Broader distribution of market data enhances price transparency and supports informed decision-making across the national market system, which in turn perfects the mechanism of a free and open market by ensuring that

market participants have access to comprehensive, competitive data offerings.

By allowing the waiver to begin while an eligible Data Vendor is actively integrating the Applicable Feed and working to make it commercially available, the Program lowers barriers to entry during the build-out period and incentivizes a broader set of market participants to enter the Cboe One distribution chain, thereby expanding the availability of consolidated multi-exchange market data throughout the national market system.

The proposed rule change also protects investors and the public interest. By encouraging Data Vendors to take in, transform, and redistribute market data feeds, the proposed program promotes greater availability of enriched market data products to downstream Distributors and Users. The transformation requirement—which may include aggregation across multiple sources, normalization into a consistent format, enrichment with derived analytics, or repackaging into a proprietary delivery mechanism such as a terminal, API, or feed—is a key element of qualifying as a Data Vendor and ensures that meaningful value is added to the data before redistributing it, thereby increasing the utility and accessibility of market information. To the extent the Program achieves its purpose and results in more widespread redistribution of the Cboe One feeds, market participants may benefit from enhanced access to consolidated, real-time price and last sale information through the distribution channels developed by Data Vendors.

Additionally, the codification of the existing Extranet Service Provider definition within the Fee Schedule provides additional clarity on the program requirements and codifies the definition that exists already in the Cboe Global Markets North American Market Data Policies. Furthermore, the clarification that External Distributors of both Cboe One Summary and Cboe One Premium are only responsible for paying the External Distribution Fee for Cboe One Premium promotes transparency by expressly codifying a practice that is already reflected in the Exchange’s existing application of the fee provision. This reduces potential confusion among market participants regarding their fee obligations.

Not Unfairly Discriminatory

The Exchange believes that the proposed Data Vendor Program is consistent with and complementary to its existing programs for other categories of market participants, and that offering

¹¹ As noted above, a firm that subscribes to both Cboe One Premium and Cboe One Summary is only charged the External Distribution Fee for Cboe One Premium. Accordingly, an eligible Data Vendor that builds out both feeds simultaneously receives only the Premium Waiver Period.

¹² 15 U.S.C. 78f(b).

¹³ 15 U.S.C. 78f(b)(5).

¹⁴ *Id.*

a targeted fee waiver program specifically for Data Vendors does not constitute unfair discrimination. The Exchange has a history of establishing differentiated programs that recognize the distinct roles of different market participants. For example, the Small Retail Broker Distribution Program provides discounted Distribution Fees and Data Consolidation Fees for eligible broker-dealers distributing the applicable feeds to Non-Professional Data Users with whom the broker-dealer has a brokerage relationship.¹⁵ This program is designed to address the specific characteristics and economic needs of small retail broker-dealers. Similarly, the Small Retail Broker Hosted Solutions Program provides fee waivers for eligible Small Retail Brokers that provide the applicable feeds to other Small Retail Brokers via hosted solutions.¹⁶ This program recognizes that smaller retail brokers face unique integration challenges and cost constraints when building out hosted data solutions. In addition, the New Internal Distributor Waiver for the BYX Depth Data Feed waives Internal Distribution Fees for three months for Internal Distributors that have not received the BYX Depth Data Feed during the prior 18 months.¹⁷ This program incentivizes new Internal Distributors to integrate the depth-of-book feed into their systems. Lastly, the Exchange's affiliated options exchange, Cboe Exchange, Inc., introduced a 24-month waiver for qualifying retail brokers for its Complex Order Book Feed.¹⁸

The proposed Data Vendor Program is consistent with the Exchange's practice of creating a distinct program to serve a specific use case. Data Vendors occupy a distinct role in the market data distribution ecosystem. Unlike retail brokers, whose primary business is providing trade execution and account management services to Users (with market data distribution as an ancillary feature), Data Vendors are primarily engaged in the business of transforming and redistributing market data to other Distributors. This fundamental difference in business model justifies a distinct program with tailored eligibility criteria and waiver periods. The waiver periods under the proposed Data Vendor Program—12 months for Cboe One Summary and 24 months for Cboe One Premium—are designed to reflect

the relative complexity of integrating each feed. Depth-of-book products such as Cboe One Premium typically require more extensive technical build-out, including handling of larger data volumes, more complex display and aggregation logic, and more rigorous quality assurance processes. Additionally, Cboe One Premium is more expensive relative to the top of book feed. This means that Data Vendors require additional interest from clients in these products before they can even break even. Accordingly, the Exchange believes a 24-month waiver period for this product is appropriate to provide sufficient time for Data Vendors to complete their build-out. Top-of-book and summary products, in contrast, are generally less complex to integrate, and the Exchange believes a 12-month waiver period is appropriate for Cboe One Summary.

Data Vendors' cost and investment trade-offs further support this distinction. A Data Vendor's primary commercial objective is to transform market data and make the resulting product available to unaffiliated downstream Distributors, rather than to provide market data only incidentally in support of another business (in comparison to retail brokers). Because a single Data Vendor can make a Cboe data product available through its platform to multiple downstream Distributors, the waiver is targeted to participants capable of materially expanding the product's distribution footprint. Like any business operator, a Data Vendor evaluates whether to add an Applicable Feed based on expected return on investment, weighing expected revenue against the upfront costs of connectivity, programming, technical integration, and sales and marketing, as well as the ongoing exchange market data fees associated with making the product available to subscribers. In many cases, a Data Vendor may need to add three to five new downstream Distributors merely to offset the ongoing External Distribution Fee. These costs are typically incremental: Data Vendors may already offer one or more equity feeds to clients and add an Applicable Feed only where it is expected to provide return on investment beyond their current offerings. A retail broker's determination is different. A retail broker will often migrate or swap from a competitor's product, and may be able to implement the change through a Data Vendor API into its front-end with a simple entitlement change, without bearing the same upfront connectivity and technical build-out costs.

The waiver periods under the proposed Data Vendor Program are longer than certain other Exchange programs because they support more than initial feed access or recruitment of a first User.¹⁹ A qualifying Data Vendor must complete significant technical and commercial build-out before it can distribute the product and begin recovering its upfront costs. Its downstream Distributors may then have their own evaluation, contracting, and integration cycles, further extending the path to meaningful adoption; as noted above, a Data Vendor may need to add three to five new downstream Distributors to offset the ongoing External Distribution Fee.

The Exchange does not maintain comparable fee waiver programs for larger broker-dealers that distribute market data to their brokerage customers. The Exchange believes this distinction is appropriate. The Small Retail Broker programs are specifically designed to address the cost constraints faced by smaller broker-dealers in building out market data distribution capabilities. Larger broker-dealers typically have established data infrastructure and greater resources to absorb market data distribution costs as part of their overall brokerage operations, and, as such, their cost per user is meaningfully lower. Data distribution by large broker-dealers is typically an ancillary component of brokerage services offered. In contrast, a Data Vendor must incur incremental buildout fees and ongoing External Distribution Fees to establish and support a new external redistribution channel. The relevant distinction is therefore the nature of the service and the associated barriers to distribution, not the size or identity of the participant.

The Data Vendor Program is intended to address a different need: incentivizing specialized data redistribution firms to build out the Applicable Feeds and bring on additional downstream Distributors. By encouraging Data Vendors to invest in the transformation and redistribution of the Exchange's market data products, the Program expands the reach and availability of this data throughout the national market system, benefiting end users and promoting competition. The Exchange therefore believes that creating a targeted program for Data Vendors, in addition to its existing programs for Small Retail Brokers and Internal Distributors, among others, is

¹⁵ See BYX Equities Fee Schedule.

¹⁸ See Securities Exchange Act Release No. 105198 (April 10, 2026), 91 FR 20204 (April 15, 2026) (SR-CBOE-2026-033).

¹⁹ However, as noted above, Cboe Exchange, Inc., offers a 24-month waiver for qualifying retail brokers for its Complex Order Book Feed.

consistent with Section 6(b)(5) of the Act and does not constitute unfair discrimination.

The Exchange also believes the proposed rule change is consistent with Section 6(b)(5) of the Act in that it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Data Vendor Program is available to all External Distributors that satisfy the objective criteria set forth in the proposed definition of Data Vendor and, for waiver eligibility, the additional objective criteria regarding the 18-month lookback for prior receipt of the Applicable Feed and integration or active integration of the Applicable Feed for commercial availability. The distinctions drawn by the definition—(i) requiring that a Data Vendor's primary business objective be the solicitation of unaffiliated third-party Distributors, (ii) that it not maintain a brokerage relationship with Users, and (iii) that it not be an Extranet Service Provider—reflect meaningful differences in business models and market functions.

External Distributors

The Exchange believes that limiting the Data Vendor Program to External Distributors is not unfairly discriminatory. Internal Distributors and External Distributors occupy fundamentally different roles in the market data distribution ecosystem and are not similarly situated participants. An Internal Distributor receives a market data product and distributes it solely within its own entity, whereas an External Distributor redistributes data outside its entity to Users or other Distributors—and a Data Vendor, as a specialized category of External Distributor, further serves the specific function of soliciting unaffiliated third-party Distributors to redistribute a transformed market data product. The Data Vendor Program is designed precisely to incentivize and expand this type of external redistribution, a purpose that has no meaningful application to Internal Distributors who, by definition, cannot advance the proposed program's goal of broadening the reach of the Exchange's market data to downstream Distributors and end-user investors. Furthermore, the Exchange already offers programs for its Internal Distributors that it does not offer for External Distributors.²⁰

Primary Business Is To Redistribute to Distributors

To be eligible as a Data Vendor, an External Distributor must be taking in data for the primary business purpose of selling access to the applicable feed as a service in its own right—not merely redistributing data in incidental support of broader business functions such as trade execution, account management, or brokerage services. The Exchange notes that as part of its business, a Data Vendor may redistribute a market data product to Users, but the primary purpose must be the redistribution of data to Distributors. The Exchange will assess whether an External Distributor's primary business purpose satisfies this criterion based on the External Distributor's publicly available marketing materials. This requirement is not unfairly discriminatory because it is directly tied to the purpose of the Program: encouraging entities whose core commercial activity is the transformation and redistribution of market data to build out the Cboe One feeds and bring on additional downstream Distributors, thereby expanding the reach and availability of the Exchange's data products. An entity that distributes market data only incidentally—as an ancillary feature of a brokerage, execution, or account management business—does not serve this purpose.

Transformed Market Data Product

The Exchange believes it is not unfairly discriminatory to require that a Data Vendor transform market data as a condition of eligibility, as transformation is a definitional characteristic that goes to the core of what distinguishes a Data Vendor from other categories of External Distributors and is directly tied to the Program's purpose of incentivizing participants that create new, differentiated distribution channels for the Exchange's consolidated market data. This reasoning is directly analogous to the rationale for excluding Extranet Service Providers—entities that transmit data without modification and therefore cannot create the type of value-added products, whether delivered via terminal, API, or proprietary feed, that the Program is designed to incentivize. Because the transformation requirement ensures that the Program's fee incentives are directed only at entities whose business is built around adding that value, the Exchange believes this criterion is reasonable and does not constitute unfair discrimination.

No Brokerage Relationship With Users

The Exchange believes it is not unfairly discriminatory to require that Data Vendors not maintain a brokerage relationship with Users. The Exchange already maintains separate programs specifically for qualifying broker-dealers that distribute market data to their brokerage customers. Specifically, the Exchange offers the Small Retail Broker Distribution Program, which provides discounted Distribution Fees and Data Consolidation Fees for eligible broker-dealers distributing the applicable feeds to Non-Professional Data Users with whom the broker-dealer has a brokerage relationship. The Exchange also offers the Small Retail Broker Hosted Solutions Program, which provides fee waivers and lower data costs for Small Retail Brokers that provide the applicable feeds to other Small Retail Brokers via hosted solutions. These existing programs are specifically designed to encourage retail brokers to distribute market data, and the eligibility criteria for those programs reflect the characteristics of the retail brokerage business model.

The proposed Data Vendor Program does not displace or reduce the benefits available to retail brokers under those existing programs. Rather, it creates a parallel and complementary framework for a distinct category of participants—Data Vendors—that do not maintain brokerage relationships with Users, and whose primary business purpose is categorically different from that of a retail broker. Just as it would not be appropriate to extend the Small Retail Broker Program to Data Vendors, it is similarly appropriate—and not unfairly discriminatory—not to extend the Data Vendor Program to retail brokers or other participants that maintain brokerage relationships with their Users, whose needs are separately addressed by the Exchange's existing programs.

Not an Extranet Service Provider

The Exchange also believes it is not unfairly discriminatory to exclude Extranet Service Providers from the Data Vendor Program. An Extranet Service Provider, as defined, is an entity that transmits a market data product to data recipients without modification of the content, format, or other characteristics of the product. Extranet Service Providers do not transform, enrich, or add value to the data they transmit—they serve as conduits, passing data through in its original form. This is fundamentally distinct from the function of a Data Vendor, which, by definition, must transform the Market

²⁰ See, e.g., BYX Equities Fee Schedule that describes the New Internal Distributor Waiver for BYX Depth Data Feed.

Data Product as part of its service offering.

The Data Vendor Program is specifically premised on the value that transformation adds to the data distribution ecosystem. By enabling Data Vendors to create differentiated products—delivered via a terminal, API, proprietary feed, or other value-added mechanism—that appeal to a broader range of downstream Distributors, the Program advances the Exchange's goal of maximizing the reach and utility of its consolidated market data throughout the national market system. Extending the Program to Extranet Service Providers, which do not perform this transformative function, would undermine the Program's core purpose and would not serve the policy goal of broadening distribution of market data products in readily accessible, value-added formats.

The Exchange has created programs to address the distinct needs and business models of different categories of market participants, and the proposed Data Vendor Program is a natural extension of this approach. In addition to the Small Retail Broker programs described above, the Exchange also offers fee waivers for eligible Internal Distributors of the BYX Depth Data Feed, which are intended to incentivize new Internal Distributors to integrate data feeds into their systems. The differentiation between Data Vendors and other categories of market participants reflects the distinct roles these entities play and the distinct incentive structures appropriate to each and does not constitute unfair discrimination.

18-Month and Integration Requirements

The Exchange further believes it is not unfairly discriminatory to limit the Program to Data Vendors that have not received the Applicable Feed for which they seek a waiver during the 18 months preceding the waiver application date, and that have integrated, or are actively in the process of integrating,²¹ the Applicable Feed and making it commercially available to subscribers. The 18-month limitation is designed to ensure that the fee waivers serve their intended purpose of reducing the upfront cost barriers for new market participants. This approach is directly consistent with the analogous frameworks the Exchange has adopted in prior programs—including the Internal Distributor Waiver for the BYX Depth Data Feed, which similarly limits fee relief to distributors that have not

received the relevant feed in the prior 18 months. The integration and commercial availability requirement is likewise reasonable because it ensures that the waiver is directed to Data Vendors that are undertaking the build-out necessary to distribute the Applicable Feed to subscribers, while not requiring full integration or commercial availability before the waiver begins. The Exchange therefore believes that these objective limitations are reasonable and appropriate, prevent the Program from operating as a permanent subsidy for established distributors, and are not unfairly discriminatory.

The Exchange also believes the proposed rule change is consistent with Section 6(b)(4) of the Act,²² which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Trading Permit Holders and other persons using its facilities. The proposed fee waivers represent a reasonable and equitable allocation of charges. The fee waivers for External Distribution Fees are limited in duration—the Summary Waiver Period for Cboe One Summary and the Premium Waiver Period for Cboe One Premium—and are available only to Data Vendors that have not received the Applicable Feed for which they seek a waiver during the 18 months preceding the waiver application date and that have integrated, or are actively in the process of integrating, the Applicable Feed and making it commercially available to subscribers. This time-limited structure ensures that the waivers serve their intended purpose of incentivizing new market entry and build-out of data feeds. The 18-month lookback requirement further ensures the equitable allocation of fees by limiting the Program to new feeds for Data Vendors, and the integration and commercial availability requirement ensures that the waiver is tied to actual build-out and distribution activity. The Exchange notes that this same 18-month standard is consistent with the requirements applied in its other fee waiver programs.

The clarification that External Distributors of both Cboe One Summary and Cboe One Premium shall only be responsible for paying the External Distribution Fee for Cboe One Premium does not alter the economic substance of the Exchange's existing fee structure and does not impose any new or increased fees on market participants. Rather, it expressly codifies the Exchange's existing application of the

user fee offset provisions—under which an External Distributor disseminating both products is assessed only the Cboe One Premium External Distribution Fee—thereby ensuring that all market participants have a clear and equitable understanding of their fee obligations. The Exchange therefore believes the proposed rule change provides for the equitable allocation of reasonable fees among persons using its facilities.

Lastly, the Exchange believes that the limitations regarding the waiver structure for both Cboe One Premium and Cboe One Summary equitably allocate fees. With respect to the Cboe One Summary waiver, only Data Vendors that (i) have not received Cboe One Summary during the 18 months preceding the waiver application date, (ii) are integrating or actively in the process of integrating Cboe One Summary and making it commercially available to subscribers, and (iii) are not receiving Cboe One Premium are eligible for the Summary Waiver Period. The Exchange believes that this is reasonable, as a firm that subscribes to Cboe One Premium already may elect to receive (without incurring an additional External Distribution Fee) Cboe One Summary Feed. For this reason, there is no need to provide a separate Summary Waiver Period while a firm receives Cboe One Premium, because that firm may receive the Cboe One Summary Feed without paying an additional External Distribution Fee that the proposed program seeks to waive.

Next, the Exchange notes that if a Data Vendor currently receives Cboe One Summary and elects to receive Cboe One Premium under the proposed program, so long as the Data Vendor has not received the Cboe One Premium Feed during the 18 months preceding the waiver application date and satisfies the integration and commercial availability requirement with respect to Cboe One Premium, the Data Vendor may receive the Premium Waiver Period. During that period, the Data Vendor's existing Cboe One Summary²³ subscription will be covered under the Premium Waiver, and no separate External Distribution Fee will be assessed for Cboe One Summary. This is because the Cboe One Summary External Distribution Fee is subsumed

²¹ The Exchange notes that no specific step is required for this, only that Data Vendor is working to integrate the Applicable Feed into its system.

²² 15 U.S.C. 78f(b)(4).

²³ For example, if a Data Vendor currently subscribes to Cboe One Summary Feed and is eligible for the proposed program for the Cboe One Premium Feed, no separate External Distribution Fee would be assessed for Cboe One Summary during the Premium Waiver Period because Cboe One Summary is included in the Cboe One Premium subscription. The Data Vendor would receive the Premium Waiver Period and would not receive a separate Summary Waiver Period during that time.

within the Cboe One Premium External Distribution Fee—accordingly, there is no separate Cboe One Summary fee to waive for a firm receiving Cboe One Premium. The Exchange believes this treatment is reasonable because it avoids providing overlapping or duplicative waiver relief while still incentivizing an existing Summary subscriber to build out Cboe One Premium.

Lastly, if a Data Vendor has not received either Applicable Feed during the 18 months preceding the waiver application date and elects to build out to both simultaneously, the Data Vendor will not receive separate Summary and Premium waivers. Instead, because the Cboe One Summary External Distribution Fee is subsumed within the Cboe One Premium External Distribution Fee, the Data Vendor will receive only the Premium Waiver Period, and no separate Summary Waiver Period will apply while it receives Cboe One Premium.

For all of the foregoing reasons, the Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder, including, in particular, the requirements of Sections 6(b)(4)²⁴ and 6(b)(5)²⁵ of the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe the proposed rule change imposes any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed Data Vendor Program is available to all External Distributors that satisfy the objective, clearly defined criteria set forth in the proposed definition of “Data Vendor” and the Program’s waiver eligibility standards. Any External Distributor that, as part of its primary business objective, solicits unaffiliated third-party Distributors to redistribute a transformed Market Data Product, does not maintain a brokerage relationship with Users in connection with the applicable Market Data Product, is not an Extranet Service Provider, has not received the Applicable Feed for which it seeks a waiver during the 18 months preceding the waiver application date, and has integrated or is actively integrating the Applicable Feed and making it

commercially available to subscribers may qualify for the Program on equal terms. Because eligibility is determined by objective, verifiable criteria rather than by subjective or discretionary determinations, no External Distributor is advantaged or disadvantaged relative to any other similarly situated participant.

To the extent that certain External Distributors—such as retail broker-dealers or Extranet Service Providers—do not qualify for the Data Vendor Program, this does not impose a burden on intramarket competition. As described above, retail broker-dealers and Extranet Service Providers are not similarly situated to Data Vendors. Retail broker-dealers distribute market data to their own brokerage customers as an ancillary feature of their core business of providing trade execution and account management services, and their data distribution needs are more appropriately addressed by the Exchange’s existing Small Retail Broker Distribution Program and Small Retail Broker Hosted Solutions Program. Extranet Service Providers, by contrast, transmit data in its original form without transformation, and therefore do not serve the same function in the data distribution ecosystem as Data Vendors, which aggregate, transform, and redistribute data to downstream Distributors. Designing a fee program specifically targeted to Data Vendors, rather than applying it uniformly across all categories of External Distributors, does not burden intramarket competition—it reflects the materially different roles, business models, and barriers of these distinct categories of participants.

Similarly, limiting the Data Vendor Program to External Distributors and not extending it to Internal Distributors does not impose a burden on intramarket competition. Internal Distributors receive and use market data solely within their own legal entities and do not redistribute data to third parties outside their organizations. They are therefore not participants in the same competitive market for external data redistribution that the Program is designed to promote, and their needs are separately addressed through the Exchange’s existing Internal Distributor programs—including the New Internal Distributor Waiver for the BYX Depth Data Feed. The proposed Program is specifically designed to incentivize external redistribution of the Cboe One feeds, a purpose that has no meaningful application to Internal Distributors and that creates no competitive disadvantage for them.

The Exchange does not believe the proposed rule change imposes any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the Exchange believes the proposed rule change will enhance intermarket competition by incentivizing a broader class of market participants to subscribe to and redistribute the Exchange’s market data products, thereby increasing the Exchange’s ability to compete with other national securities exchanges and data vendors for the business of Data Vendors and their downstream Distributor clients.

The market for equity market data is highly competitive. Numerous national securities exchanges offer products that compete directly with the Cboe One Summary Feed and Cboe One Premium Feed. Market participants can obtain comprehensive market data from numerous sources, including competing exchanges (such as NYSE and Nasdaq), the consolidated tape (SIP), and alternative trading systems. Prospective Data Vendors evaluating whether to build out the Cboe One feeds must weigh the upfront costs of connectivity, software development, integration, and commercial launch against the commercial opportunity presented by the Exchange’s data products. The Data Vendor Program is designed to make the Exchange’s market data offering competitively priced relative to alternative options, encouraging Data Vendors to enter the Cboe One distribution chain and thereby expanding the availability and reach of the Exchange’s consolidated multi-exchange market data throughout the national market system.

Far from burdening intermarket competition, the proposed rule change is a direct response to competitive market forces. The Exchange’s decision to offer targeted fee waivers to new Data Vendors reflects its recognition that it must compete aggressively for the participation of data redistribution firms, and that reducing the upfront cost of entry is a legitimate and necessary competitive tool in the market for exchange data products. The Commission has recognized that exchanges operate in a competitive environment with respect to market data, and that exchange fee programs designed to attract new participants and expand market data distribution are consistent with the Act’s goals of promoting competition and efficiency in the national market system.

The proposed clarification that External Distributors of both Cboe One Summary and Cboe One Premium are

²⁴ 15 U.S.C. 78f(b)(4).

²⁵ 15 U.S.C. 78f(b)(5).

only responsible for paying the External Distribution Fee for Cboe One Premium similarly does not impose any burden on intermarket competition. This change does not alter the economic substance of the Exchange's existing fee structure and does not impose any new fees on any market participant. It simply makes explicit the Exchange's existing application of the user fee offset provisions, reducing potential confusion and ensuring that all market participants have a clear and consistent understanding of their fee obligations. Regulatory clarity of this nature promotes, rather than burdens, competition by enabling market participants to make fully informed decisions about their participation in the Exchange's market data programs.

With respect to the Cboe One Summary and Cboe One Premium feeds specifically, the Exchange notes that the proposed Data Vendor Program does not impose any burden on competition arising from differential pricing between Cboe One and the applicable underlying equities feeds.²⁶ The Exchange notes that historically, its pricing for Cboe One products has been based on the sum of the External Distribution Fees for the four underlying equities feeds.²⁷ As an initial matter, not all underlying equities feeds are offered under this Program. The proposed Data Vendor Program applies only to the following feeds: EDGX Top, EDGX Summary Depth, BZX Summary Depth, Cboe One Premium, and Cboe One Summary. A Data Vendor may choose to receive a waiver for Cboe One Summary or Cboe One Premium, or for EDGX Top, or for EDGX Summary Depth, or for BZX Summary Depth, or any combination thereof, subject to the applicable eligibility requirements. However, the proposed Program does not offer fee

waivers for BZX Top, BYX Top, or EDGA Top data feeds, nor does it offer fee waivers for BYX Summary Depth or EDGA Summary Depth. Accordingly, the applicable underlying equities feeds do not "sum" to the applicable Cboe One feed under this proposed Program.²⁸

The Exchange has selected the products covered by the Program based on where it sees the greatest opportunity to expand distribution and align Data Vendor coverage with downstream end-user demand. This product-specific focus is not unfairly discriminatory. All qualifying Data Vendors are subject to the same product-specific eligibility requirements, and offering waivers for some, rather than all four, of the underlying feeds does not result in unequal treatment among similarly situated participants.

Even setting aside the foregoing, the Exchange does not believe that pricing the Cboe One Summary or Cboe One Premium feeds differently from the underlying equities feeds imposes any burden on competition. To date, the Exchange is not aware of any distributor that purchases the underlying equities feeds (either the Top or Summary Depth Feeds) for the purpose of creating its own consolidated product comparable to Cboe One Summary or Cboe One Premium. This demonstrates that the practical market concern underlying any perceived burden—that distributors might be disadvantaged by differential pricing on Cboe One that is not extended to the underlying feeds—does not correspond to actual market behavior.

Moreover, Cboe One Summary and Cboe One Premium are distinct, independent data products—they are not merely consolidations of data from the four underlying equities feeds. In addition to consolidating data from BZX, BYX, EDGX, and EDGA, Cboe One includes supplementary data elements not found in the individual underlying feeds, including data derived from the Securities Information Processor ("SIP") containing information on the national cumulative volume. This additional content makes Cboe One a distinct product with independent utility. Market participants subscribe to the underlying equities feeds and Cboe One for fundamentally different purposes. For example, a subscriber may be interested only in top-of-book data from a single exchange, such as EDGX, for

trading, routing or compliance purposes. Such a subscriber has no need for a consolidated product. Conversely, subscribers seeking a comprehensive, cross-exchange view of Cboe liquidity choose Cboe One precisely because it offers consolidated data with additional enhancements. These distinct use cases support differentiated pricing treatment.

Data Vendors may, in theory, choose to purchase each of the four underlying equities feeds and create their own consolidated product. However, the \$1,000 monthly Data Consolidation Fee associated with purchasing Cboe One (and the primary pricing differential) provides access to a production-ready, supported consolidated product, and a vendor seeking to create a comparable offering independently would bear not only the applicable source-feed, but also the costs of developing and maintaining multiple feed handlers, normalizing the data, applying aggregation logic, performing quality assurance, supporting specification changes, and monitoring production feed health. Clients also generally prefer an official exchange product, such as Cboe One, over a vendor-derived consolidated product that requires reporting across multiple exchange products. From a user-experience perspective, the exchange-provided Cboe One is therefore a better solution. A simple combination of the four underlying feeds also would not recreate all Cboe One content, including supplementary SIP-derived information. The Exchange therefore believes that the \$1,000 monthly Data Consolidation Fee is less than the full economic cost of independently creating and maintaining a comparable product, particularly for a vendor that does not already operate the required infrastructure.

Section 6(b)(8) of the Exchange Act requires that exchange rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Cboe One Summary, Cboe One Premium, and the applicable underlying equities feeds are separate products serving different market needs. Just as the Commission has permitted exchanges to offer different fees for depth-of-book data versus top-of-book data, the Exchange should have discretion to price its consolidated summary product differently from its component feeds.

Finally, the proposed Data Vendor Program is pro-competitive. By reducing the cost of consolidated and top-of-book data products for qualifying Data Vendors, the Exchange enables broader distribution of comprehensive market information to downstream distributors and, ultimately, to retail and

²⁶ For Cboe One Summary, the four equities feeds are BZX Top, BYX Top, EDGA Top, and EDGX Top. For Cboe One Premium, the four equities feeds are BZX Summary Depth, BYX Summary Depth, EDGA Summary Depth, and EDGX Summary Depth.

²⁷ For example, under the Small Retail Broker Distribution Program, the discounted External Distribution Fee for Cboe One Summary is \$3,500 per month, which equals the sum of the External Distribution Fees for the four underlying Top feeds: BZX Top (\$2,500), BYX Top (\$250), EDGA Top (\$0), and EDGX Top (\$750). See Cboe BZX, BYX, EDGA, and EDGX U.S. Equities Exchange Fee Schedules. Because the proposed Data Vendor Program does not offer fee waivers for BZX Top, BYX Top, EDGA Top, BYX Summary Depth, or EDGA Summary Depth, the External Distribution Fee for each of those feeds would remain in effect for any Data Vendor receiving those feeds, while the External Distribution Fee for Cboe One Summary (\$0 during the Summary Waiver Period) or Cboe One Premium (\$0 during the Premium Waiver Period) would be waived. This results in a pricing differential between the sum of the underlying equities feeds and the Cboe One feeds under this Program.

²⁸ For example, the External Distribution Fee is \$0 for Cboe One Summary under the proposed Program, but the sum of the four underlying equities feeds under the proposed Program is \$2,750 (\$0 EDGX Top + \$2,500 BZX Top + \$250 BYX Top + \$0 EDGA Top).

institutional investors. Wider access to market data promotes informed investment decisions, enhances market efficiency, and supports the Exchange Act's goals of investor protection and fair and efficient markets. The Exchange does not view external distributors as competitors for its real-time feed offerings; rather, distributors serve as essential conduits that expand delivery of Cboe real-time market data to end users who do not have the technical capability or commercial need to connect directly to Cboe's individual market data feeds. This is particularly important for the retail community, as retail investors typically access market data through vendors rather than purchasing it directly from exchanges. By offering the proposed Data Vendor Program, the Exchange enables distributors to deliver competitively priced, comprehensive market data to a broader audience, thereby enhancing—not burdening—competition in the market data landscape.

For the foregoing reasons, the Exchange does not believe that the proposed rule change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act²⁹ and paragraph (f) of Rule 19b-4³⁰ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing,

including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeBYX-2026-032 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-CboeBYX-2026-032. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeBYX-2026-032 and should be submitted on or before October 9, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.³¹

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-106377; File No. SR-NYSENAT-2026-25]

Self-Regulatory Organizations; NYSE National, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 7.12 Concerning the Resumption of Trading Following a Level 3 Market-Wide Circuit Breaker Halt in Connection With the Industry's Expansion of Trading Hours to 23 Hours Per Day, 5 Days Per Week

September 15, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² notice is hereby given that, on September 4, 2026, NYSE National, Inc. ("NYSE National" or the "Exchange") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 7.12 ("Trading Halts Due to Extraordinary Market Volatility") concerning the resumption of trading following a Level 3 market-wide circuit breaker halt in connection with the industry's expansion of trading hours to 23 hours per day, 5 days per week. The proposed rule change is available on the Exchange's website at www.nyse.com and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

²⁹ 15 U.S.C. 78s(b)(3)(A).

³⁰ 17 CFR 240.19b-4(f).

³¹ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

NYSE National, Inc. ("NYSE National" or the "Exchange") proposes to amend Rule 7.12 ("Trading Halts Due to Extraordinary Market Volatility") concerning the resumption of trading following a Level 3 market-wide circuit breaker ("MWCB") halt ("Level 3 Market Decline") in connection with the industry's expansion of trading hours to 23 hours per day, 5 days per week ("23/5 Trading"). Some exchanges, including the Exchange's affiliate exchange, NYSE Arca, Inc. ("NYSE Arca"), are planning to offer overnight trading,³ and as a result, the uniform Level 3 Market Decline rules of each exchange are being modified, as explained further below.

Background

The MWCB mechanism under Rule 7.12 provides an important, automatic mechanism that is invoked to promote stability and investor confidence during a period of significant stress when U.S. securities markets experience extreme broad-based declines. All U.S. equity exchanges and FINRA (collectively, the self-regulatory organizations or "SROs") adopted uniform rules relating to the MWCB mechanism in 2012, which are designed to slow the effects of extreme price movement through coordinated trading halts across U.S. securities markets when severe price declines reach levels that may exhaust market liquidity.⁴ Such market-wide circuit breakers provide for trading halts in all U.S. cash equity and equities options markets during a severe market decline as measured by a single-day decline in the S&P 500 Index during regular trading hours.

Pursuant to Rule 7.12, a market-wide trading halt will be triggered if the S&P 500 Index declines in price by specified percentages from the prior day's closing price of that index. Currently, the triggers are set at three circuit breaker thresholds: 7% (Level 1), 13% (Level 2), and 20% (Level 3). A market decline

that triggers a Level 1 or Level 2 halt after 9:30 a.m. ET and before 3:25 p.m. ET would halt market-wide trading for 15 minutes, while a similar market decline at or after 3:25 p.m. ET would not halt market-wide trading. If a Level 3 Market Decline occurs at any time during the trading day, trading in all stocks will halt on the Exchange for the remainder of the trading day, and will resume the following trading day at 7:00 a.m. ET.

Proposal

The Exchange now proposes to amend Rule 7.12 to reflect extended trading hours under 23/5 Trading. On December 6, 2026, several exchanges, including NYSE Arca, intend to offer new overnight trading sessions that would be available from 9:00 p.m. ET to 4:00 a.m. ET, significantly increasing their hours of operation in response to customer demand.

As discussed, consistent with the uniform rules in place across all SROs, current Rule 7.12(b)(ii) provides that if a Level 3 Market Decline occurs at any time during the trading day, the Exchange shall halt trading in all stocks on the Exchange for the remainder of the trading day. Currently, that means that the earliest that any exchange would re-open trading after a Level 3 Market Decline is 4:00 a.m. ET the following day, since no SROs are open for trading before 4:00 a.m. ET.

Unless amended, when 23/5 Trading is launched, the current rule's reference to halting "for the remainder of the trading day"⁵ would require SROs participating in 23/5 Trading to re-open trading at an earlier time, *i.e.*, 9:00 p.m. ET on the same calendar day, when those SROs' systems would generally become available for overnight trading. The Exchange does not believe that this is an expected or desired result and is therefore amending this rule in coordination with the other SROs such that trading on any SRO will not resume until 4:00 a.m. ET or later on the following trading day, consistent with current market practice. This proposed rule change is therefore not intended to make any substantive changes to the MWCB mechanism. Rather, the proposed rule change would preserve the current resumption time following a Level 3 Market Decline.

To effect this change, the Exchange proposes to delete the language in Rule 7.12(b)(ii) that provides that trading in all stocks will halt on the Exchange "for the remainder of the trading day" if a Level 3 Market Decline occurs at any time during the trading day, and replace

it with new language that explicitly provides that trading in all stocks would halt on the Exchange until 4:00 a.m. ET or later on the following trading day.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁶ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁷ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The MWCB mechanism described in Rule 7.12 is an important, automatic mechanism that is invoked to promote stability and investor confidence during periods of significant stress when U.S. securities markets experience extreme broad-based declines. The proposed rule change, when applied uniformly by all SROs, would ensure that the current 4:00 a.m. ET resumption time following a Level 3 halt continues to apply under 23/5 Trading, notwithstanding current rule text implying that the resumption time would coincide with the start of overnight trading on SROs operating an overnight session.

Rather than leave the rule in place as is, which would result in an earlier resumption time than originally contemplated when the rule was adopted, the Exchange, the other U.S. equity exchanges, and FINRA met alongside industry representatives to determine the appropriate resumption time. Following those discussions, the collective decision was made to retain the 4:00 a.m. ET resumption time, notwithstanding the fact that an earlier resumption time would be possible with the introduction of 23/5 Trading. The proposed rule change codifies this decision into the Exchange's rules. The Exchange understands that the other SROs will also be filing similar proposed rule changes. As a result, the market as a whole, including on- and off-exchange, will continue to be subject to harmonized rules for the resumption of trading following a Level 3 Market Decline.

While the SROs had previously decided to tie the resumption time following a Level 3 halt to the earliest SRO opening time, the upcoming transition to 23/5 Trading raises various concerns that warrant a change from the current approach.

First, the Exchange notes that the MWCB mechanism was designed to

³ See, e.g., Securities Exchange Act Release No. 105532 (May 21, 2026), 91 FR 31509 (May 27, 2026) (SR-NYSEARCA-2026-53) ("NYSE Arca 23/5 Trading Notice"). The Exchange does not intend to implement 23/5 Trading at this time.

⁴ See Securities Exchange Act Release No. 67090 (May 31, 2012), 77 FR 33531 (June 6, 2012) (SR-BATS-2011-038; SR-BYX-2011-025; SR-BX-2011-068; SR-CBOE-2011-087; SR-C2-2011-024; SR-CHX-2011-30; SR-EDGA-2011-31; SR-EDGX-2011-30; SR-FINRA-2011-054; SR-ISE-2011-61; SR-NASDAQ-2011-131; SR-NSX-2011-11; SR-NYSE-2011-48; SR-NYSEAmex-2011-73; SR-NYSEArca-2011-68; SR-Phlx-2011-129) ("MWCB Approval Order").

⁵ See Rule 7.12(b)(ii).

⁶ 15 U.S.C. 78f(b).

⁷ 15 U.S.C. 78f(b)(5).

provide a cooling-off period where market participants would be provided with additional time to evaluate the market events that led to the decline before determining how to position their trading activity for the next day. With the introduction of 23/5 Trading and the start of overnight trading on some SROs at 9:00 p.m. ET, however, this cooling-off period could be materially shortened, reducing one of the key benefits that the MWCB mechanism was designed to provide in the first place. Rather than shorten the cooling-off period and risk this benefit, the Exchange believes the market would be better served by a change to the length of the associated trading halt that mirrors current market practice. Under the proposed rule, as is the case today, after a Level 3 halt, all SROs would reopen trading at 4:00 a.m. ET or later, and no SRO would offer an overnight trading session starting on the day of a Level 3 halt.

Second, overnight trading may be subject to different liquidity and participation considerations than the current pre-market sessions that start at or after 4:00 a.m. ET. Notably, while retail investors have expressed interest in overnight trading, the Exchange expects that institutional investors will take more time to transition to a round-the-clock model. However, such institutional participation may be of heightened importance following a Level 3 halt, as these investors are likely to have views on the underlying market events that led to the Level 3 Market Decline in the first place. The Exchange is concerned that opening during hours that such participants do not normally trade may impact the quality of price discovery at a time of significant market volatility. Waiting until 4:00 a.m. ET to resume trading would facilitate broader participation and therefore price discovery.

Finally, the Exchange notes that the Commission recently approved an amendment to the Plan to Address Extraordinary Market Volatility (“LULD Plan”) that would establish new price protections from 9:00 p.m. ET to 4:00 a.m. ET.⁸ While these price bands would help to assure a fair and orderly market during normal market conditions, it is possible that they would instead prevent normal price discovery following a Level 3 Market Decline. Rather than allowing trading to

resume with such price bands in effect, which would represent a change from the current trading reopening following a Level 3 Market Decline, the Exchange believes that requiring SROs to wait until 4:00 a.m. ET or later to resume trading would ensure that price discovery can occur unimpeded during pre-market trading, as it does today, which may further inform prices going into the opening auction and regular market hours trading following a Level 3 halt.

Given the factors discussed above, the Exchange believes that trading in all securities on the Exchange should not resume before 4:00 a.m. ET on the trading day after a Level 3 halt. This decision, which the Exchange understands will also be reflected in the rules of the other SROs, would promote a fair and orderly market at a time of significant market volatility, and thereby protect investors and the public interest. In addition, while the actual Level 3 resumption time would not be changing in practice—as proposed, the current resumption time and future resumption time would both be 4:00 a.m. ET at the earliest—the Exchange believes that it is appropriate to amend its rules to ensure that its rules reflect the upcoming changes due to 23/5 Trading. Without this change, market participants may mistakenly believe that the Exchange intends for trading to reopen on overnight trading exchanges at 9:00 p.m. ET following a Level 3 halt. The proposed rule change would therefore facilitate operational transparency while providing for a fair and orderly market.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act because the proposal would ensure the continued, uninterrupted operation of a consistent mechanism to halt trading across U.S. securities markets. Further, the Exchange understands that the other SROs intend to file proposed rule changes to ensure a consistent resumption time at 4:00 a.m. or later ET across markets. Thus, the proposed rule change will help to ensure consistency across market centers without implicating any competitive issues.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act⁹ and subparagraph (f)(6) of Rule 19b–4 thereunder.¹⁰

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR–NYSENAT–2026–25 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

⁹ 15 U.S.C. 78s(b)(3)(A)(iii).

¹⁰ 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

⁸ See Securities Exchange Act Release No. 106042 (August 5, 2026), 91 FR 51515 (August 10, 2026) (Order Granting Approval of the Twenty-Seventh Amendment to the National Market System Plan to Address Extraordinary Market Volatility to Establish Temporary Price Band Protections in Overnight Trading).

All submissions should refer to file number SR-NYSENAT-2026-25. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NYSENAT-2026-25 and should be submitted on or before October 9, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹¹

Sherry R. Haywood,
Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-106373; File No. SR-CboeEDGA-2026-028]

Self-Regulatory Organizations; Cboe EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Introduce a Data Vendor Program

September 15, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on September 8, 2026, Cboe EDGA Exchange, Inc. (the "Exchange" or "EDGA") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGA Exchange, Inc. (the "Exchange" or "EDGA") proposes to

introduce a Data Vendor Program, which includes introducing a new defined term of Data Vendor, along with other clarifying changes. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Commission's website (<https://www.sec.gov/rules/sro.shtml>), the Exchange's website (https://www.cboe.com/us/equities/regulation/rule_filings/edga/), and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this proposed rule change is to (i) introduce a definition of Data Vendor; (ii) codify the existing definition (as defined in the Exchange's applicable North American Market Data Policies) of Extranet Service Provider; (iii) codify an existing practice that permits an External Distributor of both Cboe One Summary and Cboe One Premium to be liable only for the External Distribution Fee for Cboe One Premium; and (iv) create a program for Data Vendors in order to incentivize Data Vendors to build out the applicable feeds and make them commercially available to subscribers.³ The proposed program will provide fee waivers (as described below) for External Distribution Fees for Data Vendors for the Cboe One Summary Feed and Cboe One Premium Feed.

Proposed Definitions

In connection with this proposed program, the Exchange first proposes to adopt a definition for a specific category of participants. Specifically, the

Exchange proposes to establish the term "Data Vendor" to mean "an External Distributor that (i) is actively engaged, as part of its primary business objective, in the solicitation of unaffiliated third-party Distributors to redistribute a transformed Market Data Product; (ii) does not maintain a brokerage relationship with Users in connection with the receipt or use of the applicable Market Data Product; and (iii) is not an Extranet Service Provider." As part of this new definition, and as further described below, the Exchange proposes to codify the existing definition of Extranet Service Provider within the Cboe Global North American Market Data Policies to be within its Fee Schedule.

The Exchange has also established objective, verifiable criteria for determining eligibility as a Data Vendor. The following criteria, which will be reflected in the Exchange's Fee Schedule, must be satisfied: (1) the External Distributor must identify itself as a Data Vendor in publicly available marketing materials; (2) the External Distributor must transform the applicable Market Data Product before redistribution, which may include aggregation across multiple data sources, normalization into a consistent format, enrichment with reference data or analytics, or repackaging into a proprietary delivery mechanism (e.g., terminal, API, or proprietary feed); (3) the External Distributor must redistribute the applicable transformed Market Data Product to downstream Distributors as part of a paid commercial offering; (4) the External Distributor must not maintain a brokerage relationship with any User to whom it distributes the applicable Market Data Product; (5) the External Distributor must not be an Extranet Service Provider; and (6) the External Distributor must be actively engaged in the solicitation of unaffiliated third-party Distributors to subscribe to and redistribute the applicable transformed Market Data Product. Upon request, the External Distributor must provide a written attestation certifying compliance with the foregoing criteria. The Exchange may request supporting documentation, including but not limited to Distributor subscriber lists, revenue breakdowns by recipient type, and descriptions of the transformations applied to the Market Data Product. These objective eligibility criteria ensure that the Data Vendor Program is equitably applied to all similarly situated market participants.

¹¹ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ The Exchange initially submitted the proposed rule change on July 1, 2026 (SR-CboeEDGA-2026-023). On July 15, 2026, the Exchange withdrew that filing and submitted SR-CboeEDGA-2026-024. On September 8, 2026, the Exchange withdrew that filing and submitted this filing.

External Distributor

To begin, “Data Vendor” is intended to only encompass External Distributors and not Internal Distributors. An External Distributor is defined as a Distributor that receives the Exchange Market Data product and then distributes that data to a third party or one or more Users outside the Distributor’s own entity.⁴ The Exchange seeks to adopt this program in order to encourage broader redistribution of this data. As such, the Exchange limits this to External Distributors as the intent of this program is to have data distributed outside one’s own entity.

Primary Business Is To Redistribute to Distributors

To be eligible as a Data Vendor, an External Distributor must be taking in data for the primary business purpose of selling access to the applicable feed as a service in its own right, not merely redistributing data in incidental support of broader business functions such as trade execution, account management, or brokerage services. The Exchange notes that, as part of its business, a Data Vendor may redistribute a market data product to Users, but the primary purpose must be to redistribute data to Distributors. The Exchange will assess whether an External Distributor’s primary business purpose satisfies this criterion based on the External Distributor’s publicly available marketing materials. If the Exchange were to modify this requirement to permit a primary business purpose of redistribution to either Distributors or Users, it would unintentionally include firms that may redistribute only to Users and that are not traditionally considered data vendors (e.g., a media outlet or a bank).

Transformed Market Data Product

To be eligible, the Exchange requires that the Data Vendor not simply pass through data in its original form. Transformation may include aggregation across multiple sources, normalization into a consistent format, enrichment with derived analytics, or repackaging into a proprietary delivery mechanism (e.g., terminal, API, feed), or any other value-added processing that distinguishes the output from the original source data.

No Brokerage Relationship with Users

Next, the Exchange proposes that the definition of Data Vendor include a stipulation that a Data Vendor must not maintain a brokerage relationship with Users who receive the market data

product. The Exchange already has programs aimed at retail brokers, for example, both the Small Retail Broker Program and the Small Retail Broker Hosted Solutions Program.⁵ This proposed program is intended to encourage Data Vendors specifically to take in the applicable feeds and distribute them. A Data Vendor’s service model is different from a retail broker’s, as a Data Vendor’s business model is built around providing data to firms and Users alike, whereas a retail broker’s business model is focused on connecting Users to markets in order to trade and may include providing market data as part of its offering to its Users. As the Exchange already has programs specifically for retail brokers, the Exchange does not believe it would be appropriate to include retail brokers here. The Exchange notes that if a Data Vendor that is currently receiving a fee waiver under this Program subsequently commences a brokerage relationship with its Users, it will no longer satisfy the definition of Data Vendor and will cease to be eligible for the Program. In such case, the External Distributor would be assessed the standard External Distribution Fee for the applicable feed as of the date it no longer satisfies the definition of Data Vendor.

Not an Extranet Service Provider

As noted above, the Exchange proposes also to define Extranet Service Provider when it introduces the definition of Data Vendor into its Fee Schedule. Today, this term already exists in the Cboe Global Markets North American Data Policies.⁶ The Exchange proposes to codify this definition in its Fee Schedule because the proposed definition of Data Vendor directly references this defined term. Specifically, the Exchange proposes to codify that an Extranet Service Provider is “an entity that has entered into a Cboe Global Markets Global Data Agreement and Transmits an Exchange Market Data Product, via an extranet operated by such entity, to data recipients. ‘Transmit’ means to direct an Exchange Market Data Product to one or more data recipients without modification of the content, format, or other characteristics of the Exchange Market Data Product.” An Extranet Service Provider is not authorized to use or process an Exchange Market Data Product for any purpose.

Applicable Data Feeds

By way of background, the Exchange offers the Cboe One Premium Data Feed,

which is a data feed that disseminates, on a real-time basis, the aggregate best bid and offer (“BBO”) of all displayed orders for securities traded on the Exchange and its affiliated equities exchanges and enables recipients to receive aggregated two-sided quotations from EDGA and its affiliated equities exchanges for up to twelve (12) price levels (and, for a limited time, up to five (5) price levels).⁷ The Cboe One Premium Data Feed is created using the data from the Exchange and each of its affiliated equities exchanges’ Summary Depth data feeds (allowing for up to 48 total price levels).

The Exchange also offers the Cboe One Summary Data Feed, which disseminates, on a real-time basis, the aggregate BBO of all displayed orders for securities traded on EDGA and its affiliated equities exchanges and also contains individual last sale information for EDGA and its affiliated equities exchanges.⁸

External Distribution Fees for Cboe One Premium and Cboe One Summary

The proposed rule change also clarifies that External Distributors of both Cboe One Summary and Cboe One Premium shall only be responsible for paying the External Distribution Fee for Cboe One Premium. The current fee schedule provides that “Cboe One Summary User Fees can be applied to Cboe One Summary and Cboe One Premium External Distribution Fees.” Under the Exchange’s existing application of this provision, an External Distributor receiving both Cboe One Summary and Cboe One Premium is assessed only the Cboe One Premium External Distribution Fee⁹, and User

⁷ EDGA filed to increase the levels of the Cboe One Premium Data Feed from five (5) levels to twelve (12) levels. To help in this transition, it is currently supporting both the five and twelve level feeds; however, as stated in its rule, EDGA shall sunset the five (5) level feed of Cboe One Premium by December 31, 2026 (with the date to be announced via Exchange Notice). See Rule 13.8(b)(i).

⁸ The Cboe One Summary Feed is distinguishable from the Cboe One Premium Feed in that it does not provide depth of book data. In contrast, the Cboe One Premium Feed contains all the available data in the Cboe One Summary Feed and also provides depth of book data.

⁹ To better illustrate this concept, consider the following examples. Example 1: If a firm subscribes to only Cboe One Summary, its User costs will be used to offset the External Distribution Fee for Cboe One Summary. In the event the firm’s User costs total \$2,000, the firm will pay \$2,000 in User fees and \$3,000 (\$5,000 – \$2,000) for its External Distribution Fee. Example 2: If a firm subscribes only to Cboe One Premium, its User costs will be used to offset the External Distribution Fee for Cboe One Premium. In the event a firm’s User costs total \$10,000, the firm will pay \$10,000 in User fees and \$2,500 (\$12,500 – \$10,000) for its External

⁴ See EDGA Equities Fee Schedule.

⁵ See EDGA Equities Fee Schedule.

⁶ See Market Data Policies.pdf.

Fees for both Cboe One Summary and Cboe One Premium may be applied to offset that fee.

The Exchange is now proposing to make this treatment explicit by adding clarifying language to the fee schedule stating that External Distributors of both feeds are only responsible for paying the External Distribution Fee for Cboe One Premium. This amendment does not alter the economic substance of the Exchange's existing fee structure, nor does it impose any new or increased fees on market participants. Rather, it reduces potential ambiguity by expressly codifying the Exchange's existing application of the user fee offset provisions. The Exchange believes this clarification will promote transparency and reduce confusion among External Distributors regarding their fee obligations under the Cboe One market data product offerings.

Impact of Proposed Program

As noted above, the proposed program would waive External Distribution Fees for Data Vendors of the Cboe One Summary Feed and the Cboe One Premium Feed (each, an "Applicable Feed") that satisfy certain eligibility requirements. A Data Vendor must not have received the Applicable Feed for which it seeks the waiver during the 18 months¹⁰ preceding the waiver application date, and must integrate, or be actively in the process of integrating, the Applicable Feed and making it commercially available to its subscribers. The Data Vendor need not have fully integrated the Applicable Feed or made it commercially available before the waiver begins. For a qualifying Data Vendor, the applicable waiver commences on the date it first receives the Applicable Feed, and, if that date occurs mid-month, that partial month counts as the first month of the waiver period. Specifically, the Exchange proposes to waive the External Distribution Fee of \$5,000 per month for Cboe One Summary for 12 months (the "Summary Waiver Period"), except that a Data Vendor is not eligible for a Summary Waiver Period if it is receiving Cboe One

Premium because Cboe One Summary is included in the Cboe One Premium External Distribution Fee as noted herein. To clarify, because a Data Vendor receiving Cboe One Premium pays only the Cboe One Premium External Distribution Fee (and no separate fee is assessed for Cboe One Summary), there is no separate Cboe One Summary External Distribution Fee to waive for such a firm.¹¹ The Exchange proposes to waive the External Distribution Fee of \$12,500 per month for Cboe One Premium for 24 months (the "Premium Waiver Period").

If an eligible Data Vendor already receives Cboe One Summary, it may still receive the Premium Waiver Period if it has not received Cboe One Premium during the 18 months preceding the waiver application date and satisfies the integration and commercial availability requirement with respect to Cboe One Premium. During the Premium Waiver Period, the Data Vendor's Cboe One Summary subscription would be covered under the Premium Waiver, and no separate External Distribution Fee would be assessed for Cboe One Summary. Similarly, an eligible Data Vendor that builds out both feeds simultaneously would receive only the Premium Waiver Period.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.¹² Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹³ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with

the Section 6(b)(5)¹⁴ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes the proposed rule change promotes just and equitable principles of trade by establishing a clear, objective, and transparent definition of "Data Vendor" that properly captures the characteristics distinguishing Data Vendors from other categories of External Distributors. The proposed definition sets forth specific, verifiable criteria—namely, that a Data Vendor must (i) be an External Distributor; (ii) be actively engaged, as part of its primary business objective, in the solicitation of unaffiliated third-party Distributors to redistribute a transformed Market Data Product; (iii) not maintain a brokerage relationship with Users; and (iv) not be an Extranet Service Provider. By establishing objective eligibility criteria, the proposed rule change ensures that similarly situated market participants are treated consistently and that the benefits of the Data Vendor Program are available to all External Distributors that meet the defined qualifications.

The Exchange further believes that the codification of the existing Extranet Service Provider definition within the Fee Schedule promotes just and equitable principles of trade. Because the proposed Data Vendor definition directly references the term "Extranet Service Provider," market participants seeking to understand their eligibility for the Program should not be required to consult the Cboe Global Markets North American Data Policies to determine how that term applies. By incorporating both defined terms into the Fee Schedule itself, the Exchange ensures that participants have access to the complete framework.

The Exchange further believes that the proposed rule change removes impediments to and perfects the mechanism of a free and open market and a national market system. The Data Vendor Program is designed to incentivize Data Vendors to integrate the Applicable Feeds, make them commercially available to subscribers, and redistribute them by providing fee waivers for External Distribution Fees for the Cboe One Summary Feed and Cboe One Premium Feed. By waiving the External Distribution Fee of \$5,000 per month for Cboe One Summary for the Summary Waiver Period and waiving the External Distribution Fee of \$12,500 per month for Cboe One Premium for the Premium Waiver

Distribution Fee. Example 3: If a firm subscribes to both Cboe One Summary and Cboe One Premium, only the External Distribution Fee for Cboe One Premium is assessed and this fee may be offset by both Cboe One Summary and Cboe One Premium User fees. In the event a firm's User costs are \$2,000 for Cboe One Summary and \$10,000 for Cboe One Premium, the firm will pay a total of \$12,000 in User fees (\$10,000 + \$2,000) and it will pay \$500 for its External Distribution Fee (\$12,500 – (\$10,000 + \$2,000)).

¹⁰ The Exchange notes that this same 18-month requirement is the standard for its other fee waiver programs. See EDGA Equities Fee Schedule.

¹¹ As noted above, a firm that subscribes to both Cboe One Premium and Cboe One Summary is only charged the External Distribution Fee for Cboe One Premium. Accordingly, an eligible Data Vendor that builds out both feeds simultaneously receives only the Premium Waiver Period.

¹² 15 U.S.C. 78f(b).

¹³ 15 U.S.C. 78f(b)(5).

¹⁴ *Id.*

Period, the Exchange encourages broader redistribution of its market data products. Broader distribution of market data enhances price transparency and supports informed decision-making across the national market system, which in turn perfects the mechanism of a free and open market by ensuring that market participants have access to comprehensive, competitive data offerings.

By allowing the waiver to begin while an eligible Data Vendor is actively integrating the Applicable Feed and working to make it commercially available, the Program lowers barriers to entry during the build-out period and incentivizes a broader set of market participants to enter the Cboe One distribution chain, thereby expanding the availability of consolidated multi-exchange market data throughout the national market system.

The proposed rule change also protects investors and the public interest. By encouraging Data Vendors to take in, transform, and redistribute market data feeds, the proposed program promotes greater availability of enriched market data products to downstream Distributors and Users. The transformation requirement—which may include aggregation across multiple sources, normalization into a consistent format, enrichment with derived analytics, or repackaging into a proprietary delivery mechanism such as a terminal, API, or feed—is a key element of qualifying as a Data Vendor and ensures that meaningful value is added to the data before redistributing it, thereby increasing the utility and accessibility of market information. To the extent the Program achieves its purpose and results in more widespread redistribution of the Cboe One feeds, market participants may benefit from enhanced access to consolidated, real-time price and last sale information through the distribution channels developed by Data Vendors.

Additionally, the codification of the existing Extranet Service Provider definition within the Fee Schedule provides additional clarity on the program requirements and codifies the definition that exists already in the Cboe Global Markets North American Market Data Policies. Furthermore, the clarification that External Distributors of both Cboe One Summary and Cboe One Premium are only responsible for paying the External Distribution Fee for Cboe One Premium promotes transparency by expressly codifying a practice that is already reflected in the Exchange's existing application of the fee provision. This reduces potential

confusion among market participants regarding their fee obligations.

Not Unfairly Discriminatory

The Exchange believes that the proposed Data Vendor Program is consistent with and complementary to its existing programs for other categories of market participants, and that offering a targeted fee waiver program specifically for Data Vendors does not constitute unfair discrimination. The Exchange has a history of establishing differentiated programs that recognize the distinct roles of different market participants. For example, the Small Retail Broker Distribution Program provides discounted Distribution Fees and Data Consolidation Fees for eligible broker-dealers distributing the applicable feeds to Non-Professional Data Users with whom the broker-dealer has a brokerage relationship.¹⁵ This program is designed to address the specific characteristics and economic needs of small retail broker-dealers. Similarly, the Small Retail Broker Hosted Solutions Program provides fee waivers for eligible Small Retail Brokers that provide the applicable feeds to other Small Retail Brokers via hosted solutions.¹⁶ This program recognizes that smaller retail brokers face unique integration challenges and cost constraints when building out hosted data solutions. In addition, the New Internal Distributor Waiver for the EDGA Depth Data Feed waives Internal Distribution Fees for three months for Internal Distributors that have not received the EDGA Depth Data Feed during the prior 18 months.¹⁷ This program incentivizes new Internal Distributors to integrate the depth-of-book feed into their systems. Lastly, the Exchange's affiliated options exchange, Cboe Exchange, Inc., introduced a 24-month waiver for qualifying retail brokers for its Complex Order Book Feed.¹⁸

The proposed Data Vendor Program is consistent with the Exchange's practice of creating a distinct program to serve a specific use case. Data Vendors occupy a distinct role in the market data distribution ecosystem. Unlike retail brokers, whose primary business is providing trade execution and account management services to Users (with market data distribution as an ancillary feature), Data Vendors are primarily engaged in the business of transforming and redistributing market data to other

Distributors. This fundamental difference in business model justifies a distinct program with tailored eligibility criteria and waiver periods. The waiver periods under the proposed Data Vendor Program—12 months for Cboe One Summary and 24 months for Cboe One Premium—are designed to reflect the relative complexity of integrating each feed. Depth-of-book products such as Cboe One Premium typically require more extensive technical build-out, including handling of larger data volumes, more complex display and aggregation logic, and more rigorous quality assurance processes. Additionally, Cboe One Premium is more expensive relative to the top of book feed. This means that Data Vendors require additional interest from clients in these products before they can even break even. Accordingly, the Exchange believes a 24-month waiver period for this product is appropriate to provide sufficient time for Data Vendors to complete their build-out. Top-of-book and summary products, in contrast, are generally less complex to integrate, and the Exchange believes a 12-month waiver period is appropriate for Cboe One Summary.

Data Vendors' cost and investment trade-offs further support this distinction. A Data Vendor's primary commercial objective is to transform market data and make the resulting product available to unaffiliated downstream Distributors, rather than to provide market data only incidentally in support of another business (in comparison to retail brokers). Because a single Data Vendor can make a Cboe data product available through its platform to multiple downstream Distributors, the waiver is targeted to participants capable of materially expanding the product's distribution footprint. Like any business operator, a Data Vendor evaluates whether to add an Applicable Feed based on expected return on investment, weighing expected revenue against the upfront costs of connectivity, programming, technical integration, and sales and marketing, as well as the ongoing exchange market data fees associated with making the product available to subscribers. In many cases, a Data Vendor may need to add three to five new downstream Distributors merely to offset the ongoing External Distribution Fee. These costs are typically incremental: Data Vendors may already offer one or more equity feeds to clients and add an Applicable Feed only where it is expected to provide return on investment beyond their current offerings. A retail broker's

¹⁵ See EDGA Equities Fee Schedule.

¹⁸ See Securities Exchange Act Release No. 105198 (April 10, 2026), 91 FR 20204 (April 15, 2026) (SR-CBOE-2026-033).

determination is different. A retail broker will often migrate or swap from a competitor's product, and may be able to implement the change through a Data Vendor API into its front-end with a simple entitlement change, without bearing the same upfront connectivity and technical build-out costs.

The waiver periods under the proposed Data Vendor Program are longer than certain other Exchange programs because they support more than initial feed access or recruitment of a first User.¹⁹ A qualifying Data Vendor must complete significant technical and commercial build-out before it can distribute the product and begin recovering its upfront costs. Its downstream Distributors may then have their own evaluation, contracting, and integration cycles, further extending the path to meaningful adoption; as noted above, a Data Vendor may need to add three to five new downstream Distributors to offset the ongoing External Distribution Fee.

The Exchange does not maintain comparable fee waiver programs for larger broker-dealers that distribute market data to their brokerage customers. The Exchange believes this distinction is appropriate. The Small Retail Broker programs are specifically designed to address the cost constraints faced by smaller broker-dealers in building out market data distribution capabilities. Larger broker-dealers typically have established data infrastructure and greater resources to absorb market data distribution costs as part of their overall brokerage operations, and, as such, their cost per user is meaningfully lower. Data distribution by large broker-dealers is typically an ancillary component of brokerage services offered. In contrast, a Data Vendor must incur incremental buildout fees and ongoing External Distribution Fees to establish and support a new external redistribution channel. The relevant distinction is therefore the nature of the service and the associated barriers to distribution, not the size or identity of the participant.

The Data Vendor Program is intended to address a different need: incentivizing specialized data redistribution firms to build out the Applicable Feeds and bring on additional downstream Distributors. By encouraging Data Vendors to invest in the transformation and redistribution of the Exchange's market data products, the Program expands the reach and

availability of this data throughout the national market system, benefiting end users and promoting competition. The Exchange therefore believes that creating a targeted program for Data Vendors, in addition to its existing programs for Small Retail Brokers and Internal Distributors, among others, is consistent with Section 6(b)(5) of the Act and does not constitute unfair discrimination.

The Exchange also believes the proposed rule change is consistent with Section 6(b)(5) of the Act in that it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Data Vendor Program is available to all External Distributors that satisfy the objective criteria set forth in the proposed definition of Data Vendor and, for waiver eligibility, the additional objective criteria regarding the 18-month lookback for prior receipt of the Applicable Feed and integration or active integration of the Applicable Feed for commercial availability. The distinctions drawn by the definition—(i) requiring that a Data Vendor's primary business objective be the solicitation of unaffiliated third-party Distributors, (ii) that it not maintain a brokerage relationship with Users, and (iii) that it not be an Extranet Service Provider—reflect meaningful differences in business models and market functions.

External Distributors

The Exchange believes that limiting the Data Vendor Program to External Distributors is not unfairly discriminatory. Internal Distributors and External Distributors occupy fundamentally different roles in the market data distribution ecosystem and are not similarly situated participants. An Internal Distributor receives a market data product and distributes it solely within its own entity, whereas an External Distributor redistributes data outside its entity to Users or other Distributors—and a Data Vendor, as a specialized category of External Distributor, further serves the specific function of soliciting unaffiliated third-party Distributors to redistribute a transformed market data product. The Data Vendor Program is designed precisely to incentivize and expand this type of external redistribution, a purpose that has no meaningful application to Internal Distributors who, by definition, cannot advance the proposed program's goal of broadening the reach of the Exchange's market data to downstream Distributors and end-user investors. Furthermore, the Exchange already offers programs for its

Internal Distributors that it does not offer for External Distributors.²⁰

Primary Business Is To Redistribute to Distributors

To be eligible as a Data Vendor, an External Distributor must be taking in data for the primary business purpose of selling access to the applicable feed as a service in its own right—not merely redistributing data in incidental support of broader business functions such as trade execution, account management, or brokerage services. The Exchange notes that as part of its business, a Data Vendor may redistribute a market data product to Users, but the primary purpose must be the redistribution of data to Distributors. The Exchange will assess whether an External Distributor's primary business purpose satisfies this criterion based on the External Distributor's publicly available marketing materials. This requirement is not unfairly discriminatory because it is directly tied to the purpose of the Program: encouraging entities whose core commercial activity is the transformation and redistribution of market data to build out the Cboe One feeds and bring on additional downstream Distributors, thereby expanding the reach and availability of the Exchange's data products. An entity that distributes market data only incidentally—as an ancillary feature of a brokerage, execution, or account management business—does not serve this purpose.

Transformed Market Data Product

The Exchange believes it is not unfairly discriminatory to require that a Data Vendor transform market data as a condition of eligibility, as transformation is a definitional characteristic that goes to the core of what distinguishes a Data Vendor from other categories of External Distributors and is directly tied to the Program's purpose of incentivizing participants that create new, differentiated distribution channels for the Exchange's consolidated market data. This reasoning is directly analogous to the rationale for excluding Extranet Service Providers—entities that transmit data without modification and therefore cannot create the type of value-added products, whether delivered via terminal, API, or proprietary feed, that the Program is designed to incentivize. Because the transformation requirement ensures that the Program's fee incentives are directed only at entities

¹⁹ However, as noted above, Cboe Exchange, Inc., offers a 24-month waiver for qualifying retail brokers for its Complex Order Book Feed.

²⁰ See, e.g., EDGA Equities Fee Schedule that describes the New Internal Distributor Waiver for EDGA Depth Data Feed.

whose business is built around adding that value, the Exchange believes this criterion is reasonable and does not constitute unfair discrimination.

No Brokerage Relationship With Users

The Exchange believes it is not unfairly discriminatory to require that Data Vendors not maintain a brokerage relationship with Users. The Exchange already maintains separate programs specifically for qualifying broker-dealers that distribute market data to their brokerage customers. Specifically, the Exchange offers the Small Retail Broker Distribution Program, which provides discounted Distribution Fees and Data Consolidation Fees for eligible broker-dealers distributing the applicable feeds to Non-Professional Data Users with whom the broker-dealer has a brokerage relationship. The Exchange also offers the Small Retail Broker Hosted Solutions Program, which provides fee waivers and lower data costs for Small Retail Brokers that provide the applicable feeds to other Small Retail Brokers via hosted solutions. These existing programs are specifically designed to encourage retail brokers to distribute market data, and the eligibility criteria for those programs reflect the characteristics of the retail brokerage business model.

The proposed Data Vendor Program does not displace or reduce the benefits available to retail brokers under those existing programs. Rather, it creates a parallel and complementary framework for a distinct category of participants—Data Vendors—that do not maintain brokerage relationships with Users, and whose primary business purpose is categorically different from that of a retail broker. Just as it would not be appropriate to extend the Small Retail Broker Program to Data Vendors, it is similarly appropriate—and not unfairly discriminatory—not to extend the Data Vendor Program to retail brokers or other participants that maintain brokerage relationships with their Users, whose needs are separately addressed by the Exchange's existing programs.

Not an Extranet Service Provider

The Exchange also believes it is not unfairly discriminatory to exclude Extranet Service Providers from the Data Vendor Program. An Extranet Service Provider, as defined, is an entity that transmits a market data product to data recipients without modification of the content, format, or other characteristics of the product. Extranet Service Providers do not transform, enrich, or add value to the data they transmit—they serve as conduits, passing data through in its original form. This is

fundamentally distinct from the function of a Data Vendor, which, by definition, must transform the Market Data Product as part of its service offering.

The Data Vendor Program is specifically premised on the value that transformation adds to the data distribution ecosystem. By enabling Data Vendors to create differentiated products—delivered via a terminal, API, proprietary feed, or other value-added mechanism—that appeal to a broader range of downstream Distributors, the Program advances the Exchange's goal of maximizing the reach and utility of its consolidated market data throughout the national market system. Extending the Program to Extranet Service Providers, which do not perform this transformative function, would undermine the Program's core purpose and would not serve the policy goal of broadening distribution of market data products in readily accessible, value-added formats.

The Exchange has created programs to address the distinct needs and business models of different categories of market participants, and the proposed Data Vendor Program is a natural extension of this approach. In addition to the Small Retail Broker programs described above, the Exchange also offers fee waivers for eligible Internal Distributors of the EDGA Depth Data Feed, which are intended to incentivize new Internal Distributors to integrate data feeds into their systems. The differentiation between Data Vendors and other categories of market participants reflects the distinct roles these entities play and the distinct incentive structures appropriate to each and does not constitute unfair discrimination.

18-Month and Integration Requirements

The Exchange further believes it is not unfairly discriminatory to limit the Program to Data Vendors that have not received the Applicable Feed for which they seek a waiver during the 18 months preceding the waiver application date, and that have integrated, or are actively in the process of integrating,²¹ the Applicable Feed and making it commercially available to subscribers. The 18-month limitation is designed to ensure that the fee waivers serve their intended purpose of reducing the upfront cost barriers for new market participants. This approach is directly consistent with the analogous frameworks the Exchange has adopted in prior programs—including the

Internal Distributor Waiver for the EDGA Depth Data Feed, which similarly limits fee relief to distributors that have not received the relevant feed in the prior 18 months. The integration and commercial availability requirement is likewise reasonable because it ensures that the waiver is directed to Data Vendors that are undertaking the build-out necessary to distribute the Applicable Feed to subscribers, while not requiring full integration or commercial availability before the waiver begins. The Exchange therefore believes that these objective limitations are reasonable and appropriate, prevent the Program from operating as a permanent subsidy for established distributors, and are not unfairly discriminatory.

The Exchange also believes the proposed rule change is consistent with Section 6(b)(4) of the Act,²² which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Trading Permit Holders and other persons using its facilities. The proposed fee waivers represent a reasonable and equitable allocation of charges. The fee waivers for External Distribution Fees are limited in duration—the Summary Waiver Period for Cboe One Summary and the Premium Waiver Period for Cboe One Premium—and are available only to Data Vendors that have not received the Applicable Feed for which they seek a waiver during the 18 months preceding the waiver application date and that have integrated, or are actively in the process of integrating, the Applicable Feed and making it commercially available to subscribers. This time-limited structure ensures that the waivers serve their intended purpose of incentivizing new market entry and build-out of data feeds. The 18-month lookback requirement further ensures the equitable allocation of fees by limiting the Program to new feeds for Data Vendors, and the integration and commercial availability requirement ensures that the waiver is tied to actual build-out and distribution activity. The Exchange notes that this same 18-month standard is consistent with the requirements applied in its other fee waiver programs.

The clarification that External Distributors of both Cboe One Summary and Cboe One Premium shall only be responsible for paying the External Distribution Fee for Cboe One Premium does not alter the economic substance of the Exchange's existing fee structure and does not impose any new or

²¹ The Exchange notes that no specific step is required for this, only that Data Vendor is working to integrate the Applicable Feed into its system.

²² 15 U.S.C. 78f(b)(4).

increased fees on market participants. Rather, it expressly codifies the Exchange's existing application of the user fee offset provisions—under which an External Distributor disseminating both products is assessed only the Cboe One Premium External Distribution Fee—thereby ensuring that all market participants have a clear and equitable understanding of their fee obligations. The Exchange therefore believes the proposed rule change provides for the equitable allocation of reasonable fees among persons using its facilities.

Lastly, the Exchange believes that the limitations regarding the waiver structure for both Cboe One Premium and Cboe One Summary equitably allocate fees. With respect to the Cboe One Summary waiver, only Data Vendors that (i) have not received Cboe One Summary during the 18 months preceding the waiver application date, (ii) are integrating or actively in the process of integrating Cboe One Summary and making it commercially available to subscribers, and (iii) are not receiving Cboe One Premium are eligible for the Summary Waiver Period. The Exchange believes that this is reasonable, as a firm that subscribes to Cboe One Premium already may elect to receive (without incurring an additional External Distribution Fee) Cboe One Summary Feed. For this reason, there is no need to provide a separate Summary Waiver Period while a firm receives Cboe One Premium, because that firm may receive the Cboe One Summary Feed without paying an additional External Distribution Fee that the proposed program seeks to waive.

Next, the Exchange notes that if a Data Vendor currently receives Cboe One Summary and elects to receive Cboe One Premium under the proposed program, so long as the Data Vendor has not received the Cboe One Premium Feed during the 18 months preceding the waiver application date and satisfies the integration and commercial availability requirement with respect to Cboe One Premium, the Data Vendor may receive the Premium Waiver Period. During that period, the Data Vendor's existing Cboe One Summary²³ subscription will be covered under the Premium Waiver, and no separate External Distribution Fee will be

assessed for Cboe One Summary. This is because the Cboe One Summary External Distribution Fee is subsumed within the Cboe One Premium External Distribution Fee—accordingly, there is no separate Cboe One Summary fee to waive for a firm receiving Cboe One Premium. The Exchange believes this treatment is reasonable because it avoids providing overlapping or duplicative waiver relief while still incentivizing an existing Summary subscriber to build out Cboe One Premium.

Lastly, if a Data Vendor has not received either Applicable Feed during the 18 months preceding the waiver application date and elects to build out to both simultaneously, the Data Vendor will not receive separate Summary and Premium waivers. Instead, because the Cboe One Summary External Distribution Fee is subsumed within the Cboe One Premium External Distribution Fee, the Data Vendor will receive only the Premium Waiver Period, and no separate Summary Waiver Period will apply while it receives Cboe One Premium.

For all of the foregoing reasons, the Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder, including, in particular, the requirements of Sections 6(b)(4)²⁴ and 6(b)(5)²⁵ of the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe the proposed rule change imposes any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed Data Vendor Program is available to all External Distributors that satisfy the objective, clearly defined criteria set forth in the proposed definition of "Data Vendor" and the Program's waiver eligibility standards. Any External Distributor that, as part of its primary business objective, solicits unaffiliated third-party Distributors to redistribute a transformed Market Data Product, does not maintain a brokerage relationship with Users in connection with the applicable Market Data Product, is not an Extranet Service Provider, has not received the Applicable Feed for which it seeks a waiver during the 18 months preceding

the waiver application date, and has integrated or is actively integrating the Applicable Feed and making it commercially available to subscribers may qualify for the Program on equal terms. Because eligibility is determined by objective, verifiable criteria rather than by subjective or discretionary determinations, no External Distributor is advantaged or disadvantaged relative to any other similarly situated participant.

To the extent that certain External Distributors—such as retail broker-dealers or Extranet Service Providers—do not qualify for the Data Vendor Program, this does not impose a burden on intramarket competition. As described above, retail broker-dealers and Extranet Service Providers are not similarly situated to Data Vendors. Retail broker-dealers distribute market data to their own brokerage customers as an ancillary feature of their core business of providing trade execution and account management services, and their data distribution needs are more appropriately addressed by the Exchange's existing Small Retail Broker Distribution Program and Small Retail Broker Hosted Solutions Program. Extranet Service Providers, by contrast, transmit data in its original form without transformation, and therefore do not serve the same function in the data distribution ecosystem as Data Vendors, which aggregate, transform, and redistribute data to downstream Distributors. Designing a fee program specifically targeted to Data Vendors, rather than applying it uniformly across all categories of External Distributors, does not burden intramarket competition—it reflects the materially different roles, business models, and barriers of these distinct categories of participants.

Similarly, limiting the Data Vendor Program to External Distributors and not extending it to Internal Distributors does not impose a burden on intramarket competition. Internal Distributors receive and use market data solely within their own legal entities and do not redistribute data to third parties outside their organizations. They are therefore not participants in the same competitive market for external data redistribution that the Program is designed to promote, and their needs are separately addressed through the Exchange's existing Internal Distributor programs—including the New Internal Distributor Waiver for the EDGA Depth Data Feed. The proposed Program is specifically designed to incentivize external redistribution of the Cboe One feeds, a purpose that has no meaningful application to Internal Distributors and

²³ For example, if a Data Vendor currently subscribes to Cboe One Summary Feed and is eligible for the proposed program for the Cboe One Premium Feed, no separate External Distribution Fee would be assessed for Cboe One Summary during the Premium Waiver Period because Cboe One Summary is included in the Cboe One Premium subscription. The Data Vendor would receive the Premium Waiver Period and would not receive a separate Summary Waiver Period during that time.

²⁴ 15 U.S.C. 78f(b)(4).

²⁵ 15 U.S.C. 78f(b)(5).

that creates no competitive disadvantage for them.

The Exchange does not believe the proposed rule change imposes any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the Exchange believes the proposed rule change will enhance intermarket competition by incentivizing a broader class of market participants to subscribe to and redistribute the Exchange's market data products, thereby increasing the Exchange's ability to compete with other national securities exchanges and data vendors for the business of Data Vendors and their downstream Distributor clients.

The market for equity market data is highly competitive. Numerous national securities exchanges offer products that compete directly with the Cboe One Summary Feed and Cboe One Premium Feed. Market participants can obtain comprehensive market data from numerous sources, including competing exchanges (such as NYSE and Nasdaq), the consolidated tape (SIP), and alternative trading systems. Prospective Data Vendors evaluating whether to build out the Cboe One feeds must weigh the upfront costs of connectivity, software development, integration, and commercial launch against the commercial opportunity presented by the Exchange's data products. The Data Vendor Program is designed to make the Exchange's market data offering competitively priced relative to alternative options, encouraging Data Vendors to enter the Cboe One distribution chain and thereby expanding the availability and reach of the Exchange's consolidated multi-exchange market data throughout the national market system.

Far from burdening intermarket competition, the proposed rule change is a direct response to competitive market forces. The Exchange's decision to offer targeted fee waivers to new Data Vendors reflects its recognition that it must compete aggressively for the participation of data redistribution firms, and that reducing the upfront cost of entry is a legitimate and necessary competitive tool in the market for exchange data products. The Commission has recognized that exchanges operate in a competitive environment with respect to market data, and that exchange fee programs designed to attract new participants and expand market data distribution are consistent with the Act's goals of promoting competition and efficiency in the national market system.

The proposed clarification that External Distributors of both Cboe One Summary and Cboe One Premium are only responsible for paying the External Distribution Fee for Cboe One Premium similarly does not impose any burden on intermarket competition. This change does not alter the economic substance of the Exchange's existing fee structure and does not impose any new fees on any market participant. It simply makes explicit the Exchange's existing application of the user fee offset provisions, reducing potential confusion and ensuring that all market participants have a clear and consistent understanding of their fee obligations. Regulatory clarity of this nature promotes, rather than burdens, competition by enabling market participants to make fully informed decisions about their participation in the Exchange's market data programs.

With respect to the Cboe One Summary and Cboe One Premium feeds specifically, the Exchange notes that the proposed Data Vendor Program does not impose any burden on competition arising from differential pricing between Cboe One and the applicable underlying equities feeds.²⁶ The Exchange notes that historically, its pricing for Cboe One products has been based on the sum of the External Distribution Fees for the four underlying equities feeds.²⁷ As an initial matter, not all underlying equities feeds are offered under this Program. The proposed Data Vendor Program applies only to the following feeds: EDGX Top, EDGX Summary Depth, BZX Summary Depth, Cboe One Premium, and Cboe One Summary. A Data Vendor may choose to receive a waiver for Cboe One Summary or Cboe One Premium, or for EDGX Top, or for EDGX Summary Depth, or for BZX Summary Depth, or any combination

thereof, subject to the applicable eligibility requirements. However, the proposed Program does not offer fee waivers for BZX Top, BYX Top, or EDGA Top data feeds, nor does it offer fee waivers for BYX Summary Depth or EDGA Summary Depth. Accordingly, the applicable underlying equities feeds do not "sum" to the applicable Cboe One feed under this proposed Program.²⁸

The Exchange has selected the products covered by the Program based on where it sees the greatest opportunity to expand distribution and align Data Vendor coverage with downstream end-user demand. This product-specific focus is not unfairly discriminatory. All qualifying Data Vendors are subject to the same product-specific eligibility requirements, and offering waivers for some, rather than all four, of the underlying feeds does not result in unequal treatment among similarly situated participants.

Even setting aside the foregoing, the Exchange does not believe that pricing the Cboe One Summary or Cboe One Premium feeds differently from the underlying equities feeds imposes any burden on competition. To date, the Exchange is not aware of any distributor that purchases the underlying equities feeds (either the Top or Summary Depth Feeds) for the purpose of creating its own consolidated product comparable to Cboe One Summary or Cboe One Premium. This demonstrates that the practical market concern underlying any perceived burden—that distributors might be disadvantaged by differential pricing on Cboe One that is not extended to the underlying feeds—does not correspond to actual market behavior.

Moreover, Cboe One Summary and Cboe One Premium are distinct, independent data products—they are not merely consolidations of data from the four underlying equities feeds. In addition to consolidating data from BZX, BYX, EDGX, and EDGA, Cboe One Summary includes supplementary data elements not found in the individual underlying feeds, including data derived from the Securities Information Processor ("SIP") containing information on the national cumulative volume. This additional content makes Cboe One a distinct product with independent utility. Market participants subscribe to the underlying equities feeds and Cboe One for fundamentally

²⁶ For Cboe One Summary, the four equities feeds are BZX Top, BYX Top, EDGA Top, and EDGX Top. For Cboe One Premium, the four equities feeds are BZX Summary Depth, BYX Summary Depth, EDGA Summary Depth, and EDGX Summary Depth.

²⁷ For example, under the Small Retail Broker Distribution Program, the discounted External Distribution Fee for Cboe One Summary is \$3,500 per month, which equals the sum of the External Distribution Fees for the four underlying Top feeds: BZX Top (\$2,500), BYX Top (\$250), EDGA Top (\$0), and EDGX Top (\$750). See Cboe BZX, BYX, EDGA, and EDGX U.S. Equities Exchange Fee Schedules. Because the proposed Data Vendor Program does not offer fee waivers for BZX Top, BYX Top, EDGA Top, BYX Summary Depth, or EDGA Summary Depth, the External Distribution Fee for each of those feeds would remain in effect for any Data Vendor receiving those feeds, while the External Distribution Fee for Cboe One Summary (\$0 during the Summary Waiver Period) or Cboe One Premium (\$0 during the Premium Waiver Period) would be waived. This results in a pricing differential between the sum of the underlying equities feeds and the Cboe One feeds under this Program.

²⁸ For example, the External Distribution Fee is \$0 for Cboe One Summary under the proposed Program, but the sum of the four underlying equities feeds under the proposed Program is \$2,750 (\$0 EDGX Top + \$2,500 BZX Top + \$250 BYX Top + \$0 EDGA Top).

different purposes. For example, a subscriber may be interested only in top-of-book data from a single exchange, such as EDGX, for trading, routing or compliance purposes. Such a subscriber has no need for a consolidated product. Conversely, subscribers seeking a comprehensive, cross-exchange view of Cboe liquidity choose Cboe One precisely because it offers consolidated data with additional enhancements. These distinct use cases support differentiated pricing treatment.

Data Vendors may, in theory, choose to purchase each of the four underlying equities feeds and create their own consolidated product. However, the \$1,000 monthly Data Consolidation Fee associated with purchasing Cboe One (and the primary pricing differential) provides access to a production-ready, supported consolidated product, and a vendor seeking to create a comparable offering independently would bear not only the applicable source-feed, but also the costs of developing and maintaining multiple feed handlers, normalizing the data, applying aggregation logic, performing quality assurance, supporting specification changes, and monitoring production feed health. Clients also generally prefer an official exchange product, such as Cboe One, over a vendor-derived consolidated product that requires reporting across multiple exchange products. From a user-experience perspective, the exchange-provided Cboe One is therefore a better solution. A simple combination of the four underlying feeds also would not recreate all Cboe One content, including supplementary SIP-derived information. The Exchange therefore believes that the \$1,000 monthly Data Consolidation Fee is less than the full economic cost of independently creating and maintaining a comparable product, particularly for a vendor that does not already operate the required infrastructure.

Section 6(b)(8) of the Exchange Act requires that exchange rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Cboe One Summary, Cboe One Premium, and the applicable underlying equities feeds are separate products serving different market needs. Just as the Commission has permitted exchanges to offer different fees for depth-of-book data versus top-of-book data, the Exchange should have discretion to price its consolidated summary product differently from its component feeds.

Finally, the proposed Data Vendor Program is pro-competitive. By reducing the cost of consolidated and top-of-book data products for qualifying Data

Vendors, the Exchange enables broader distribution of comprehensive market information to downstream distributors and, ultimately, to retail and institutional investors. Wider access to market data promotes informed investment decisions, enhances market efficiency, and supports the Exchange Act's goals of investor protection and fair and efficient markets. The Exchange does not view external distributors as competitors for its real-time feed offerings; rather, distributors serve as essential conduits that expand delivery of Cboe real-time market data to end users who do not have the technical capability or commercial need to connect directly to Cboe's individual market data feeds. This is particularly important for the retail community, as retail investors typically access market data through vendors rather than purchasing it directly from exchanges. By offering the proposed Data Vendor Program, the Exchange enables distributors to deliver competitively priced, comprehensive market data to a broader audience, thereby enhancing—not burdening—competition in the market data landscape.

For the foregoing reasons, the Exchange does not believe that the proposed rule change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act²⁹ and paragraph (f) of Rule 19b-4³⁰ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

²⁹ 15 U.S.C. 78s(b)(3)(A).

³⁰ 17 CFR 240.19b-4(f).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeEDGA-2026-028 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-CboeEDGA-2026-028. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection.

All submissions should refer to file number SR-CboeEDGA-2026-028 and should be submitted on or before October 9, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.³¹

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106382; File No. SR–CboeEDGX–2026–060]

Self-Regulatory Organizations; Cboe EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Introduce a Data Vendor Program

September 15, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b–4 thereunder,² notice is hereby given that on September 8, 2026, Cboe EDGX Exchange, Inc. (the “Exchange” or “EDGX”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGX Exchange, Inc. (the “Exchange” or “EDGX”) proposes to introduce a Data Vendor Program, which includes introducing a new defined term of Data Vendor, along with other clarifying changes. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Commission’s website (<https://www.sec.gov/rules/sro.shtml>), the Exchange’s website (https://www.cboe.com/us/equities/regulation/rule_filings/edgx/), and at the principal office of the Exchange.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this proposed rule change is to (i) introduce a definition of Data Vendor; (ii) codify the existing definition (as defined in the Exchange’s applicable North American Market Data Policies) of Extranet Service Provider; (iii) codify an existing practice that permits an External Distributor of both Cboe One Summary and Cboe One Premium to be liable only for the External Distribution Fee for Cboe One Premium; and (iv) create a program for Data Vendors in order to incentivize Data Vendors to build out the applicable feeds and make them commercially available to subscribers.³ The proposed program will provide fee waivers (as described below) for External Distribution Fees for Data Vendors for the Cboe One Summary Feed, Cboe One Premium Feed, EDGX Summary Depth Data Feed, and EDGX Top Data Feed.

Proposed Definitions

In connection with this proposed program, the Exchange first proposes to adopt a definition for a specific category of participants. Specifically, the Exchange proposes to establish the term “Data Vendor” to mean “an External Distributor that (i) is actively engaged, as part of its primary business objective, in the solicitation of unaffiliated third-party Distributors to redistribute a transformed Market Data Product; (ii) does not maintain a brokerage relationship with Users in connection with the receipt or use of the applicable Market Data Product; and (iii) is not an Extranet Service Provider.” As part of this new definition, and as further described below, the Exchange proposes to codify the existing definition of Extranet Service Provider within the Cboe Global North American Market Data Policies to be within its Fee Schedule.

The Exchange has also established objective, verifiable criteria for determining eligibility as a Data Vendor. The following criteria, which will be reflected in the Exchange’s Fee Schedule, must be satisfied: (1) the External Distributor must identify itself as a Data Vendor in publicly available marketing materials; (2) the External Distributor must transform the

applicable Market Data Product before redistribution, which may include aggregation across multiple data sources, normalization into a consistent format, enrichment with reference data or analytics, or repackaging into a proprietary delivery mechanism (e.g., terminal, API, or proprietary feed); (3) the External Distributor must redistribute the applicable transformed Market Data Product to downstream Distributors as part of a paid commercial offering; (4) the External Distributor must not maintain a brokerage relationship with any User to whom it distributes the applicable Market Data Product; (5) the External Distributor must not be an Extranet Service Provider; and (6) the External Distributor must be actively engaged in the solicitation of unaffiliated third-party Distributors to subscribe to and redistribute the applicable transformed Market Data Product. Upon request, the External Distributor must provide a written attestation certifying compliance with the foregoing criteria. The Exchange may request supporting documentation, including but not limited to Distributor subscriber lists, revenue breakdowns by recipient type, and descriptions of the transformations applied to the Market Data Product. These objective eligibility criteria ensure that the Data Vendor Program is equitably applied to all similarly situated market participants.

External Distributor

To begin, “Data Vendor” is intended to only encompass External Distributors and not Internal Distributors. An External Distributor is defined as a Distributor that receives the Exchange Market Data product and then distributes that data to a third party or one or more Users outside the Distributor’s own entity.⁴ The Exchange seeks to adopt this program in order to encourage broader redistribution of this data. As such, the Exchange limits this to External Distributors as the intent of this program is to have data distributed outside one’s own entity.

Primary Business Is To Redistribute to Distributors

To be eligible as a Data Vendor, an External Distributor must be taking in data for the primary business purpose of selling access to the applicable feed as a service in its own right, not merely redistributing data in incidental support of broader business functions such as trade execution, account management, or brokerage services. The Exchange notes that, as part of its business, a Data

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

³ The Exchange initially submitted the proposed rule change on July 1, 2026 (SR–CboeEDGX–2026–048). On July 15, 2026, the Exchange withdrew that filing and submitted SR–CboeEDGX–2026–049. On September 8, 2026, the Exchange withdrew that filing and submitted this filing.

⁴ See EDGX Equities Fee Schedule.

Vendor may redistribute a market data product to Users, but the primary purpose must be to redistribute data to Distributors. The Exchange will assess whether an External Distributor's primary business purpose satisfies this criterion based on the External Distributor's publicly available marketing materials. If the Exchange were to modify this requirement to permit a primary business purpose of redistribution to either Distributors or Users, it would unintentionally include firms that may redistribute only to Users and that are not traditionally considered data vendors (e.g., a media outlet or a bank).

Transformed Market Data Product

To be eligible, the Exchange requires that the Data Vendor not simply pass through data in its original form. Transformation may include aggregation across multiple sources, normalization into a consistent format, enrichment with derived analytics, or repackaging into a proprietary delivery mechanism (e.g., terminal, API, feed), or any other value-added processing that distinguishes the output from the original source data.

No Brokerage Relationship With Users

Next, the Exchange proposes that the definition of Data Vendor include a stipulation that a Data Vendor must not maintain a brokerage relationship with Users who receive the market data product. The Exchange already has programs aimed at retail brokers, for example, both the Small Retail Broker Program and the Small Retail Broker Hosted Solutions Program.⁵ This proposed program is intended to encourage Data Vendors specifically to take in the applicable feeds and distribute them. A Data Vendor's service model is different from a retail broker's, as a Data Vendor's business model is built around providing data to firms and Users alike, whereas a retail broker's business model is focused on connecting Users to markets in order to trade and may include providing market data as part of its offering to its Users. As the Exchange already has programs specifically for retail brokers, the Exchange does not believe it would be appropriate to include retail brokers here. The Exchange notes that if a Data Vendor that is currently receiving a fee waiver under this Program subsequently commences a brokerage relationship with its Users, it will no longer satisfy the definition of Data Vendor and will cease to be eligible for the Program. In such case, the External Distributor

would be assessed the standard External Distribution Fee for the applicable feed as of the date it no longer satisfies the definition of Data Vendor.

Not an Extranet Service Provider

As noted above, the Exchange proposes also to define Extranet Service Provider when it introduces the definition of Data Vendor into its Fee Schedule. Today, this term already exists in the Cboe Global Markets North American Data Policies.⁶ The Exchange proposes to codify this definition in its Fee Schedule because the proposed definition of Data Vendor directly references this defined term. Specifically, the Exchange proposes to codify that an Extranet Service Provider is "an entity that has entered into a Cboe Global Markets Global Data Agreement and Transmits an Exchange Market Data Product, via an extranet operated by such entity, to data recipients. 'Transmit' means to direct an Exchange Market Data Product to one or more data recipients without modification of the content, format, or other characteristics of the Exchange Market Data Product." An Extranet Service Provider is not authorized to use or process an Exchange Market Data Product for any purpose.

Applicable Data Feeds

By way of background, the Exchange offers the Cboe One Premium Data Feed, which is a data feed that disseminates, on a real-time basis, the aggregate best bid and offer ("BBO") of all displayed orders for securities traded on the Exchange and its affiliated equities exchanges and enables recipients to receive aggregated two-sided quotations from EDGX and its affiliated equities exchanges for up to twelve (12) price levels (and, for a limited time, up to five (5) price levels).⁷ The Cboe One Premium Data Feed is created using the data from the Exchange and each of its affiliated equities exchanges' Summary Depth data feeds (allowing for up to 48 total price levels).

The Exchange also offers the Cboe One Summary Data Feed, which disseminates, on a real-time basis, the aggregate BBO of all displayed orders for securities traded on EDGX and its affiliated equities exchanges and also contains individual last sale information

for EDGX and its affiliated equities exchanges.⁸

The Exchange offers the EDGX Summary Depth Data Feed, which is a data feed that offers aggregated two-sided quotations up to twelve price levels for all displayed orders entered into the System, and the EDGX Top Data Feed, which is a data feed that offers top-of-book quotations and last sale information based on orders entered into the Exchange's System.

External Distribution Fees for Cboe One Premium and Cboe One Summary

The proposed rule change also clarifies that External Distributors of both Cboe One Summary and Cboe One Premium shall only be responsible for paying the External Distribution Fee for Cboe One Premium. The current fee schedule provides that "Cboe One Summary User Fees can be applied to Cboe One Summary and Cboe One Premium External Distribution Fees." Under the Exchange's existing application of this provision, an External Distributor receiving both Cboe One Summary and Cboe One Premium is assessed only the Cboe One Premium External Distribution Fee⁹, and User Fees for both Cboe One Summary and Cboe One Premium may be applied to offset that fee.

The Exchange is now proposing to make this treatment explicit by adding clarifying language to the fee schedule stating that External Distributors of both feeds are only responsible for paying the External Distribution Fee for Cboe One Premium. This amendment does not alter the economic substance of the Exchange's existing fee structure, nor does it impose any new or increased

⁸ The Cboe One Summary Feed is distinguishable from the Cboe One Premium Feed in that it does not provide depth of book data. In contrast, the Cboe One Premium Feed contains all the available data in the Cboe One Summary Feed and also provides depth of book data.

⁹ To better illustrate this concept, consider the following examples. Example 1: If a firm subscribes to only Cboe One Summary, its User costs will be used to offset the External Distribution Fee for Cboe One Summary. In the event the firm's User costs total \$2,000, the firm will pay \$2,000 in User fees and \$3,000 (\$5,000 – \$2,000) for its External Distribution Fee. Example 2: If a firm subscribes only to Cboe One Premium, its User costs will be used to offset the External Distribution Fee for Cboe One Premium. In the event a firm's User costs total \$10,000, the firm will pay \$10,000 in User fees and \$2,500 (\$12,500 – \$10,000) for its External Distribution Fee. Example 3: If a firm subscribes to both Cboe One Summary and Cboe One Premium, only the External Distribution Fee for Cboe One Premium is assessed and this fee may be offset by both Cboe One Summary and Cboe One Premium User fees. In the event a firm's User costs are \$2,000 for Cboe One Summary and \$10,000 for Cboe One Premium, the firm will pay a total of \$12,000 in User fees (\$10,000 + \$2,000) and it will pay \$500 for its External Distribution Fee (\$12,500 – (\$10,000 + \$2,000)).

⁶ See Market Data Policies.pdf

⁷ EDGX filed to increase the levels of the Cboe One Premium Data Feed from five (5) levels to twelve (12) levels. To help in this transition, it is currently supporting both the five and twelve level feeds; however, as stated in its rule, EDGX shall sunset the five (5) level feed of Cboe One Premium by December 31, 2026 (with the date to be announced via Exchange Notice). See Rule 13.8(b)(i).

⁵ See EDGX Equities Fee Schedule.

fees on market participants. Rather, it reduces potential ambiguity by expressly codifying the Exchange's existing application of the user fee offset provisions. The Exchange believes this clarification will promote transparency and reduce confusion among External Distributors regarding their fee obligations under the Cboe One market data product offerings.

Impact of Proposed Program

As noted above, the proposed program would waive External Distribution Fees for Data Vendors of the Cboe One Summary Feed, Cboe One Premium Feed, EDGX Summary Depth Data Feed, and EDGX Top Data Feed (each, an "Applicable Feed") that satisfy certain eligibility requirements. A Data Vendor must not have received the Applicable Feed for which it seeks the waiver during the 18 months¹⁰ preceding the waiver application date, and must integrate, or be actively in the process of integrating, the Applicable Feed and making it commercially available to its subscribers. The Data Vendor need not have fully integrated the Applicable Feed or made it commercially available before the waiver begins. For a qualifying Data Vendor, the applicable waiver commences on the date it first receives the Applicable Feed, and, if that date occurs mid-month, that partial month counts as the first month of the waiver period. Specifically, the Exchange proposes to waive the External Distribution Fee of \$5,000 per month for Cboe One Summary for 12 months (the "Summary Waiver Period"), except that a Data Vendor is not eligible for a Summary Waiver Period if it is receiving Cboe One Premium because Cboe One Summary is included in the Cboe One Premium External Distribution Fee as noted herein. To clarify, because a Data Vendor receiving Cboe One Premium pays only the Cboe One Premium External Distribution Fee (and no separate fee is assessed for Cboe One Summary), there is no separate Cboe One Summary External Distribution Fee to waive for such a firm.¹¹ The Exchange proposes to waive the External Distribution Fee of \$12,500 per month for Cboe One Premium for 24 months (the "Premium Waiver Period").

If an eligible Data Vendor already receives Cboe One Summary, it may still receive the Premium Waiver Period if it has not received Cboe One Premium during the 18 months preceding the waiver application date and satisfies the integration and commercial availability requirement with respect to Cboe One Premium. During the Premium Waiver Period, the Data Vendor's Cboe One Summary subscription would be covered under the Premium Waiver, and no separate External Distribution Fee would be assessed for Cboe One Summary. Similarly, an eligible Data Vendor that builds out both Cboe One feeds simultaneously would receive only the Premium Waiver Period.

Lastly, for eligible Data Vendors, the Exchange also proposes to waive the External Distribution Fee of \$2,500 per month for EDGX Summary Depth for 24 months (the "Summary Depth Waiver Period") and the External Distribution Fee for EDGX Top of \$2,250 for 12 months (the "Top Waiver Period").

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.¹² Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹³ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹⁴ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes the proposed rule change promotes just and equitable principles of trade by establishing a clear, objective, and transparent definition of "Data Vendor" that properly captures the characteristics distinguishing Data Vendors from other categories of

External Distributors. The proposed definition sets forth specific, verifiable criteria—namely, that a Data Vendor must (i) be an External Distributor; (ii) be actively engaged, as part of its primary business objective, in the solicitation of unaffiliated third-party Distributors to redistribute a transformed Market Data Product; (iii) not maintain a brokerage relationship with Users; and (iv) not be an Extranet Service Provider. By establishing objective eligibility criteria, the proposed rule change ensures that similarly situated market participants are treated consistently and that the benefits of the Data Vendor Program are available to all External Distributors that meet the defined qualifications.

The Exchange further believes that the codification of the existing Extranet Service Provider definition within the Fee Schedule promotes just and equitable principles of trade. Because the proposed Data Vendor definition directly references the term "Extranet Service Provider," market participants seeking to understand their eligibility for the Program should not be required to consult the Cboe Global Markets North American Data Policies to determine how that term applies. By incorporating both defined terms into the Fee Schedule itself, the Exchange ensures that participants have access to the complete framework.

The Exchange further believes that the proposed rule change removes impediments to and perfects the mechanism of a free and open market and a national market system. The Data Vendor Program is designed to incentivize Data Vendors to integrate the Applicable Feeds, make them commercially available to subscribers, and redistribute them by providing fee waivers for External Distribution Fees for the Cboe One Summary Feed, Cboe One Premium Feed, EDGX Summary Depth Data Feed, and EDGX Top Data Feed. By waiving the External Distribution Fee for Cboe One Summary for 12 months, Cboe One Premium for 24 months, EDGX Summary Depth for 24 months, and EDGX Top for 12 months, the Exchange encourages broader redistribution of its market data products. Broader distribution of market data enhances price transparency and supports informed decision-making across the national market system, which in turn perfects the mechanism of a free and open market by ensuring that market participants have access to comprehensive, competitive data offerings.

By allowing the waiver to begin while an eligible Data Vendor is actively integrating the Applicable Feed and

¹⁰ The Exchange notes that this same 18-month requirement is the standard for its other fee waiver programs. See EDGX Equities Fee Schedule.

¹¹ As noted above, a firm that subscribes to both Cboe One Premium and Cboe One Summary is only charged the External Distribution Fee for Cboe One Premium. Accordingly, an eligible Data Vendor that builds out both feeds simultaneously receives only the Premium Waiver Period.

¹² 15 U.S.C. 78f(b).

¹³ 15 U.S.C. 78f(b)(5).

¹⁴ *Id.*

working to make it commercially available, the Program lowers barriers to entry during the build-out period and incentivizes a broader set of market participants to enter the Exchange's data distribution chain, thereby expanding the availability of market data throughout the national market system.

The proposed rule change also protects investors and the public interest. By encouraging Data Vendors to take in, transform, and redistribute market data feeds, the proposed program promotes greater availability of enriched market data products to downstream Distributors and Users. The transformation requirement—which may include aggregation across multiple sources, normalization into a consistent format, enrichment with derived analytics, or repackaging into a proprietary delivery mechanism such as a terminal, API, or feed—is a key element of qualifying as a Data Vendor and ensures that meaningful value is added to the data before redistributing it, thereby increasing the utility and accessibility of market information. To the extent the Program achieves its purpose and results in more widespread redistribution of the Applicable Feeds, market participants may benefit from enhanced access to consolidated real-time price, depth-of-book, top-of-book, and last sale information through the distribution channels developed by Data Vendors.

Additionally, the codification of the existing Extranet Service Provider definition within the Fee Schedule provides additional clarity on the program requirements and codifies the definition that exists already in the Cboe Global Markets North American Market Data Policies. Furthermore, the clarification that External Distributors of both Cboe One Summary and Cboe One Premium are only responsible for paying the External Distribution Fee for Cboe One Premium promotes transparency by expressly codifying a practice that is already reflected in the Exchange's existing application of the fee provision. This reduces potential confusion among market participants regarding their fee obligations.

Not Unfairly Discriminatory

The Exchange believes that the proposed Data Vendor Program is consistent with and complementary to its existing programs for other categories of market participants, and that offering a targeted fee waiver program specifically for Data Vendors does not constitute unfair discrimination. The Exchange has a history of establishing differentiated programs that recognize the distinct roles of different market

participants. For example, the Small Retail Broker Distribution Program provides discounted Distribution Fees and Data Consolidation Fees for eligible broker-dealers distributing the applicable feeds to Non-Professional Data Users with whom the broker-dealer has a brokerage relationship.¹⁵ This program is designed to address the specific characteristics and economic needs of small retail broker-dealers. Similarly, the Small Retail Broker Hosted Solutions Program provides fee waivers for eligible Small Retail Brokers that provide the applicable feeds to other Small Retail Brokers via hosted solutions.¹⁶ This program recognizes that smaller retail brokers face unique integration challenges and cost constraints when building out hosted data solutions. In addition, the New Internal Distributor Waiver for the EDGX Depth Data Feed waives Internal Distribution Fees for three months for Internal Distributors that have not received the EDGX Depth Data Feed during the prior 18 months.¹⁷ This program incentivizes new Internal Distributors to integrate the depth-of-book feed into their systems. Lastly, the Exchange's affiliated options exchange, Cboe Exchange, Inc., introduced a 24-month waiver for qualifying retail brokers for its Complex Order Book Feed.¹⁸

The proposed Data Vendor Program is consistent with the Exchange's practice of creating a distinct program to serve a specific use case. Data Vendors occupy a distinct role in the market data distribution ecosystem. Unlike retail brokers, whose primary business is providing trade execution and account management services to Users (with market data distribution as an ancillary feature), Data Vendors are primarily engaged in the business of transforming and redistributing market data to other Distributors. This fundamental difference in business model justifies a distinct program with tailored eligibility criteria and waiver periods. The waiver periods under the proposed Data Vendor Program—12 months for Cboe One Summary and EDGX Top, and 24 months for Cboe One Premium and EDGX Summary Depth—are designed to reflect the relative complexity of integrating each feed. Depth-of-book products such as Cboe One Premium and EDGX Summary Depth typically require more extensive technical build-

out, including handling of larger data volumes, more complex display and aggregation logic, and more rigorous quality assurance processes. Additionally, EDGX Summary Depth and Cboe One Premium are more expensive relative to the top-of-book feeds. This means that Data Vendors require additional interest from clients in these products before they can even break even. Accordingly, the Exchange believes a 24-month waiver period for these products is appropriate to provide sufficient time for Data Vendors to complete their build-out. Top-of-book and summary products, in contrast, are generally less complex to integrate, and the Exchange believes a 12-month waiver period is appropriate for these feeds.

Data Vendors' cost and investment trade-offs further support this distinction. A Data Vendor's primary commercial objective is to transform market data and make the resulting product available to unaffiliated downstream Distributors, rather than to provide market data only incidentally in support of another business (in comparison to retail brokers). Because a single Data Vendor can make a Cboe data product available through its platform to multiple downstream Distributors, the waiver is targeted to participants capable of materially expanding the product's distribution footprint. Like any business operator, a Data Vendor evaluates whether to add an Applicable Feed based on expected return on investment, weighing expected revenue against the upfront costs of connectivity, programming, technical integration, and sales and marketing, as well as the ongoing exchange market data fees associated with making the product available to subscribers. In many cases, a Data Vendor may need to add three to five new downstream Distributors merely to offset the ongoing External Distribution Fee. These costs are typically incremental: Data Vendors may already offer one or more equity feeds to clients and add an Applicable Feed only where it is expected to provide return on investment beyond their current offerings. A retail broker's determination is different. A retail broker will often migrate or swap from a competitor's product, and may be able to implement the change through a Data Vendor API into its front-end with a simple entitlement change, without bearing the same upfront connectivity and technical build-out costs.

The waiver periods under the proposed Data Vendor Program are longer than certain other Exchange programs because they support more

¹⁵ See EDGX Equities Fee Schedule.

¹⁶ See EDGX Equities Fee Schedule.

¹⁷ *Id.*

¹⁸ See Securities Exchange Act Release No. 105198 (April 10, 2026), 91 FR 20204 (April 15, 2026) (SR-CBOE-2026-033).

than initial feed access or recruitment of a first User.¹⁹ A qualifying Data Vendor must complete significant technical and commercial build-out before it can distribute the product and begin recovering its upfront costs. Its downstream Distributors may then have their own evaluation, contracting, and integration cycles, further extending the path to meaningful adoption; as noted above, a Data Vendor may need to add three to five new downstream Distributors to offset the ongoing External Distribution Fee.

The Exchange does not maintain comparable fee waiver programs for larger broker-dealers that distribute market data to their brokerage customers. The Exchange believes this distinction is appropriate. The Small Retail Broker programs are specifically designed to address the cost constraints faced by smaller broker-dealers in building out market data distribution capabilities. Larger broker-dealers typically have established data infrastructure and greater resources to absorb market data distribution costs as part of their overall brokerage operations, and, as such, their cost per user is meaningfully lower. Data distribution by large broker-dealers is typically an ancillary component of brokerage services offered. In contrast, a Data Vendor must incur incremental buildout fees and ongoing External Distribution Fees to establish and support a new external redistribution channel. The relevant distinction is therefore the nature of the service and the associated barriers to distribution, not the size or identity of the participant.

The Data Vendor Program is intended to address a different need: incentivizing specialized data redistribution firms to build out the Applicable Feeds and bring on additional downstream Distributors. By encouraging Data Vendors to invest in the transformation and redistribution of the Exchange's market data products, the Program expands the reach and availability of this data throughout the national market system, benefiting end users and promoting competition. The Exchange therefore believes that creating a targeted program for Data Vendors, in addition to its existing programs for Small Retail Brokers and Internal Distributors, among others, is consistent with Section 6(b)(5) of the Act and does not constitute unfair discrimination.

The Exchange also believes the proposed rule change is consistent with Section 6(b)(5) of the Act in that it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Data Vendor Program is available to all External Distributors that satisfy the objective criteria set forth in the proposed definition of Data Vendor and, for waiver eligibility, the additional objective criteria regarding the 18-month lookback for prior receipt of the Applicable Feed and integration or active integration of the Applicable Feed for commercial availability. The distinctions drawn by the definition—(i) requiring that a Data Vendor's primary business objective be the solicitation of unaffiliated third-party Distributors, (ii) that it not maintain a brokerage relationship with Users, and (iii) that it not be an Extranet Service Provider—reflect meaningful differences in business models and market functions.

External Distributors

The Exchange believes that limiting the Data Vendor Program to External Distributors is not unfairly discriminatory. Internal Distributors and External Distributors occupy fundamentally different roles in the market data distribution ecosystem and are not similarly situated participants. An Internal Distributor receives a market data product and distributes it solely within its own entity, whereas an External Distributor redistributes data outside its entity to Users or other Distributors—and a Data Vendor, as a specialized category of External Distributor, further serves the specific function of soliciting unaffiliated third-party Distributors to redistribute a transformed market data product. The Data Vendor Program is designed precisely to incentivize and expand this type of external redistribution, a purpose that has no meaningful application to Internal Distributors who, by definition, cannot advance the proposed program's goal of broadening the reach of the Exchange's market data to downstream Distributors and end-user investors. Furthermore, the Exchange already offers programs for its Internal Distributors that it does not offer for External Distributors.²⁰

Primary Business Is To Redistribute to Distributors

To be eligible as a Data Vendor, an External Distributor must be taking in data for the primary business purpose of

selling access to the applicable feed as a service in its own right—not merely redistributing data in incidental support of broader business functions such as trade execution, account management, or brokerage services. The Exchange notes that as part of its business, a Data Vendor may redistribute a market data product to Users, but the primary purpose must be the redistribution of data to Distributors. The Exchange will assess whether an External Distributor's primary business purpose satisfies this criterion based on the External Distributor's publicly available marketing materials. This requirement is not unfairly discriminatory because it is directly tied to the purpose of the Program: encouraging entities whose core commercial activity is the transformation and redistribution of market data to build out the Applicable Feeds and bring on additional downstream Distributors, thereby expanding the reach and availability of the Exchange's data products. An entity that distributes market data only incidentally—as an ancillary feature of a brokerage, execution, or account management business—does not serve this purpose.

Transformed Market Data Product

The Exchange believes it is not unfairly discriminatory to require that a Data Vendor transform market data as a condition of eligibility, as transformation is a definitional characteristic that goes to the core of what distinguishes a Data Vendor from other categories of External Distributors and is directly tied to the Program's purpose of incentivizing participants that create new, differentiated distribution channels for the Exchange's consolidated market data. This reasoning is directly analogous to the rationale for excluding Extranet Service Providers—entities that transmit data without modification and therefore cannot create the type of value-added products, whether delivered via terminal, API, or proprietary feed, that the Program is designed to incentivize. Because the transformation requirement ensures that the Program's fee incentives are directed only at entities whose business is built around adding that value, the Exchange believes this criterion is reasonable and does not constitute unfair discrimination.

No Brokerage Relationship With Users

The Exchange believes it is not unfairly discriminatory to require that Data Vendors not maintain a brokerage relationship with Users. The Exchange already maintains separate programs specifically for qualifying broker-dealers

¹⁹ However, as noted above, Cboe Exchange, Inc., offers a 24-month waiver for qualifying retail brokers for its Complex Order Book Feed.

²⁰ See, e.g., EDGX Equities Fee Schedule that describes the New Internal Distributor Waiver for EDGX Depth Data Feed.

that distribute market data to their brokerage customers. Specifically, the Exchange offers the Small Retail Broker Distribution Program, which provides discounted Distribution Fees and Data Consolidation Fees for eligible broker-dealers distributing the applicable feeds to Non-Professional Data Users with whom the broker-dealer has a brokerage relationship. The Exchange also offers the Small Retail Broker Hosted Solutions Program, which provides fee waivers and lower data costs for Small Retail Brokers that provide the applicable feeds to other Small Retail Brokers via hosted solutions. These existing programs are specifically designed to encourage retail brokers to distribute market data, and the eligibility criteria for those programs reflect the characteristics of the retail brokerage business model.

The proposed Data Vendor Program does not displace or reduce the benefits available to retail brokers under those existing programs. Rather, it creates a parallel and complementary framework for a distinct category of participants—Data Vendors—that do not maintain brokerage relationships with Users, and whose primary business purpose is categorically different from that of a retail broker. Just as it would not be appropriate to extend the Small Retail Broker Program to Data Vendors, it is similarly appropriate—and not unfairly discriminatory—not to extend the Data Vendor Program to retail brokers or other participants that maintain brokerage relationships with their Users, whose needs are separately addressed by the Exchange's existing programs.

Not an Extranet Service Provider

The Exchange also believes it is not unfairly discriminatory to exclude Extranet Service Providers from the Data Vendor Program. An Extranet Service Provider, as defined, is an entity that transmits a market data product to data recipients without modification of the content, format, or other characteristics of the product. Extranet Service Providers do not transform, enrich, or add value to the data they transmit—they serve as conduits, passing data through in its original form. This is fundamentally distinct from the function of a Data Vendor, which, by definition, must transform the Market Data Product as part of its service offering.

The Data Vendor Program is specifically premised on the value that transformation adds to the data distribution ecosystem. By enabling Data Vendors to create differentiated products—delivered via a terminal, API, proprietary feed, or other value-added

mechanism—that appeal to a broader range of downstream Distributors, the Program advances the Exchange's goal of maximizing the reach and utility of its consolidated market data throughout the national market system. Extending the Program to Extranet Service Providers, which do not perform this transformative function, would undermine the Program's core purpose and would not serve the policy goal of broadening distribution of market data products in readily accessible, value-added formats.

The Exchange has created programs to address the distinct needs and business models of different categories of market participants, and the proposed Data Vendor Program is a natural extension of this approach. In addition to the Small Retail Broker programs described above, the Exchange also offers fee waivers for eligible Internal Distributors of the EDGX Depth Data Feed, which are intended to incentivize new Internal Distributors to integrate data feeds into their systems. The differentiation between Data Vendors and other categories of market participants reflects the distinct roles these entities play and the distinct incentive structures appropriate to each and does not constitute unfair discrimination.

18-Month and Integration Requirements

The Exchange further believes it is not unfairly discriminatory to limit the Program to Data Vendors that have not received the Applicable Feed for which they seek a waiver during the 18 months preceding the waiver application date, and that have integrated, or are actively in the process of integrating,²¹ the Applicable Feed and making it commercially available to subscribers. The 18-month limitation is designed to ensure that the fee waivers serve their intended purpose of reducing the upfront cost barriers for new market participants. This approach is directly consistent with the analogous frameworks the Exchange has adopted in prior programs—including the Internal Distributor Waiver for the EDGX Depth Data Feed, which similarly limits fee relief to distributors that have not received the relevant feed in the prior 18 months. The integration and commercial availability requirement is likewise reasonable because it ensures that the waiver is directed to Data Vendors that are undertaking the build-out necessary to distribute the Applicable Feed to subscribers, while not requiring full integration or

commercial availability before the waiver begins. The Exchange therefore believes that these objective limitations are reasonable and appropriate, prevent the Program from operating as a permanent subsidy for established distributors, and are not unfairly discriminatory.

The Exchange also believes the proposed rule change is consistent with Section 6(b)(4) of the Act,²² which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Trading Permit Holders and other persons using its facilities. The proposed fee waivers represent a reasonable and equitable allocation of charges. The fee waivers for External Distribution Fees are limited in duration—12 months for Cboe One Summary, 24 months for Cboe One Premium, 24 months for EDGX Summary Depth, and 12 months for EDGX Top—and are available only to Data Vendors that have not received the Applicable Feed for which they seek a waiver during the 18 months preceding the waiver application date and that have integrated, or are actively in the process of integrating, the Applicable Feed and making it commercially available to subscribers. This time-limited structure ensures that the waivers serve their intended purpose of incentivizing new market entry and build-out of data feeds. The 18-month lookback requirement further ensures the equitable allocation of fees by limiting the Program to new feeds for Data Vendors, and the integration and commercial availability requirement ensures that the waiver is tied to actual build-out and distribution activity. The Exchange notes that this same 18-month standard is consistent with the requirements applied in its other fee waiver programs.

The clarification that External Distributors of both Cboe One Summary and Cboe One Premium shall only be responsible for paying the External Distribution Fee for Cboe One Premium does not alter the economic substance of the Exchange's existing fee structure and does not impose any new or increased fees on market participants. Rather, it expressly codifies the Exchange's existing application of the user fee offset provisions—under which an External Distributor disseminating both products is assessed only the Cboe One Premium External Distribution Fee—thereby ensuring that all market participants have a clear and equitable understanding of their fee obligations. The Exchange therefore believes the

²¹ The Exchange notes that no specific step is required for this, only that Data Vendor is working to integrate the Applicable Feed into its system.

²² 15 U.S.C. 78f(b)(4).

proposed rule change provides for the equitable allocation of reasonable fees among persons using its facilities.

Lastly, the Exchange believes that the limitations regarding the waiver structure for both Cboe One Premium and Cboe One Summary equitably allocate fees. With respect to the Cboe One Summary waiver, only Data Vendors that (i) have not received Cboe One Summary during the 18 months preceding the waiver application date, (ii) are integrating or actively in the process of integrating Cboe One Summary and making it commercially available to subscribers, and (iii) are not receiving Cboe One Premium are eligible for the Summary Waiver Period. The Exchange believes that this is reasonable, as a firm that subscribes to Cboe One Premium already may elect to receive (without incurring an additional External Distribution Fee) Cboe One Summary Feed. For this reason, there is no need to provide a separate Summary Waiver Period while a firm receives Cboe One Premium, because that firm may receive the Cboe One Summary Feed without paying an additional External Distribution Fee that the proposed program seeks to waive.

Next, the Exchange notes that if a Data Vendor currently receives Cboe One Summary and elects to receive Cboe One Premium under the proposed program, so long as the Data Vendor has not received the Cboe One Premium Feed during the 18 months preceding the waiver application date and satisfies the integration and commercial availability requirement with respect to Cboe One Premium, the Data Vendor may receive the Premium Waiver Period. During that period, the Data Vendor's existing Cboe One Summary²³ subscription will be covered under the Premium Waiver, and no separate External Distribution Fee will be assessed for Cboe One Summary. This is because the Cboe One Summary External Distribution Fee is subsumed within the Cboe One Premium External Distribution Fee—accordingly, there is no separate Cboe One Summary fee to waive for a firm receiving Cboe One Premium. The Exchange believes this treatment is reasonable because it avoids providing overlapping or duplicative waiver relief while still

incentivizing an existing Summary subscriber to build out Cboe One Premium.

Lastly, if a Data Vendor has not received either Cboe One Summary or Cboe One Premium during the 18 months preceding the waiver application date and elects to build out both Cboe One feeds simultaneously, the Data Vendor will not receive separate Summary and Premium waivers. Instead, because the Cboe One Summary External Distribution Fee is subsumed within the Cboe One Premium External Distribution Fee, the Data Vendor will receive only the Premium Waiver Period, and no separate Summary Waiver Period will apply while it receives Cboe One Premium.

With respect to EDGX Summary Depth and EDGX Top, the Exchange believes that the applicable waiver periods also equitably allocate fees. The 24-month Summary Depth Waiver Period is reasonable because integrating a depth-of-book product may require a more substantial build-out by a Data Vendor, while the 12-month Top Waiver Period is reasonable because EDGX Top provides top-of-book and last sale information and generally should require a less extensive integration effort. In each case, the waiver is available only if the Data Vendor satisfies the 18-month lookback and integration or active-integration requirements for the applicable feed.

For all of the foregoing reasons, the Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder, including, in particular, the requirements of Sections 6(b)(4)²⁴ and 6(b)(5)²⁵ of the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe the proposed rule change imposes any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed Data Vendor Program is available to all External Distributors that satisfy the objective, clearly defined criteria set forth in the proposed definition of "Data Vendor" and the Program's waiver eligibility standards. Any External Distributor that, as part of its primary business objective, solicits

unaffiliated third-party Distributors to redistribute a transformed Market Data Product, does not maintain a brokerage relationship with Users in connection with the applicable Market Data Product, is not an Extranet Service Provider, has not received the Applicable Feed for which it seeks a waiver during the 18 months preceding the waiver application date, and has integrated or is actively integrating the Applicable Feed and making it commercially available to subscribers may qualify for the Program on equal terms. Because eligibility is determined by objective, verifiable criteria rather than by subjective or discretionary determinations, no External Distributor is advantaged or disadvantaged relative to any other similarly situated participant.

To the extent that certain External Distributors—such as retail broker-dealers or Extranet Service Providers—do not qualify for the Data Vendor Program, this does not impose a burden on intramarket competition. As described above, retail broker-dealers and Extranet Service Providers are not similarly situated to Data Vendors. Retail broker-dealers distribute market data to their own brokerage customers as an ancillary feature of their core business of providing trade execution and account management services, and their data distribution needs are more appropriately addressed by the Exchange's existing Small Retail Broker Distribution Program and Small Retail Broker Hosted Solutions Program. Extranet Service Providers, by contrast, transmit data in its original form without transformation, and therefore do not serve the same function in the data distribution ecosystem as Data Vendors, which aggregate, transform, and redistribute data to downstream Distributors. Designing a fee program specifically targeted to Data Vendors, rather than applying it uniformly across all categories of External Distributors, does not burden intramarket competition—it reflects the materially different roles, business models, and barriers of these distinct categories of participants.

Similarly, limiting the Data Vendor Program to External Distributors and not extending it to Internal Distributors does not impose a burden on intramarket competition. Internal Distributors receive and use market data solely within their own legal entities and do not redistribute data to third parties outside their organizations. They are therefore not participants in the same competitive market for external data redistribution that the Program is designed to promote, and their needs

²³ For example, if a Data Vendor currently subscribes to Cboe One Summary Feed and is eligible for the proposed program for the Cboe One Premium Feed, no separate External Distribution Fee would be assessed for Cboe One Summary during the Premium Waiver Period because Cboe One Summary is included in the Cboe One Premium subscription. The Data Vendor would receive the Premium Waiver Period and would not receive a separate Summary Waiver Period during that time.

²⁴ 15 U.S.C. 78f(b)(4).

²⁵ 15 U.S.C. 78f(b)(5).

are separately addressed through the Exchange's existing Internal Distributor programs—including the New Internal Distributor Waiver for the EDGX Depth Data Feed. The proposed Program is specifically designed to incentivize external redistribution of the Applicable Feeds, a purpose that has no meaningful application to Internal Distributors and that creates no competitive disadvantage for them.

The Exchange does not believe the proposed rule change imposes any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the Exchange believes the proposed rule change will enhance intermarket competition by incentivizing a broader class of market participants to subscribe to and redistribute the Exchange's market data products, thereby increasing the Exchange's ability to compete with other national securities exchanges and data vendors for the business of Data Vendors and their downstream Distributor clients.

The market for equity market data is highly competitive. Numerous national securities exchanges offer products that compete directly with the Cboe One Summary Feed, Cboe One Premium Feed, EDGX Summary Depth Data Feed, and EDGX Top Data Feed. Market participants can obtain comprehensive market data from numerous sources, including competing exchanges (such as NYSE and Nasdaq), the consolidated tape (SIP), and alternative trading systems. Prospective Data Vendors evaluating whether to build out the Applicable Feeds must weigh the upfront costs of connectivity, software development, integration, and commercial launch against the commercial opportunity presented by the Exchange's data products. The Data Vendor Program is designed to make the Exchange's market data offering competitively priced relative to alternative options, encouraging Data Vendors to enter the Exchange's data distribution chain and thereby expanding the availability and reach of the Exchange's market data throughout the national market system.

Far from burdening intermarket competition, the proposed rule change is a direct response to competitive market forces. The Exchange's decision to offer targeted fee waivers to new Data Vendors reflects its recognition that it must compete aggressively for the participation of data redistribution firms, and that reducing the upfront cost of entry is a legitimate and necessary competitive tool in the market for exchange data products. The

Commission has recognized that exchanges operate in a competitive environment with respect to market data, and that exchange fee programs designed to attract new participants and expand market data distribution are consistent with the Act's goals of promoting competition and efficiency in the national market system.

The proposed clarification that External Distributors of both Cboe One Summary and Cboe One Premium are only responsible for paying the External Distribution Fee for Cboe One Premium similarly does not impose any burden on intermarket competition. This change does not alter the economic substance of the Exchange's existing fee structure and does not impose any new fees on any market participant. It simply makes explicit the Exchange's existing application of the user fee offset provisions, reducing potential confusion and ensuring that all market participants have a clear and consistent understanding of their fee obligations. Regulatory clarity of this nature promotes, rather than burdens, competition by enabling market participants to make fully informed decisions about their participation in the Exchange's market data programs.

With respect to the Cboe One Summary and Cboe One Premium feeds specifically, the Exchange notes that the proposed Data Vendor Program does not impose any burden on competition arising from differential pricing between Cboe One and the applicable underlying equities feeds.²⁶ The Exchange notes that historically, its pricing for Cboe One products has been based on the sum of the External Distribution Fees for the four underlying equities feeds.²⁷ As an initial matter, not all underlying equities feeds are offered under this Program. The proposed Data Vendor

²⁶ For Cboe One Summary, the four equities feeds are BZX Top, BYX Top, EDGA Top, and EDGX Top. For Cboe One Premium, the four equities feeds are BZX Summary Depth, BYX Summary Depth, EDGA Summary Depth, and EDGX Summary Depth.

²⁷ For example, under the Small Retail Broker Distribution Program, the discounted External Distribution Fee for Cboe One Summary is \$3,500 per month, which equals the sum of the External Distribution Fees for the four underlying Top feeds: BZX Top (\$2,500), BYX Top (\$250), EDGA Top (\$0), and EDGX Top (\$750). See Cboe BZX, BYX, EDGA, and EDGX U.S. Equities Exchange Fee Schedules. Because the proposed Data Vendor Program does not offer fee waivers for BZX Top, BYX Top, EDGA Top, BYX Summary Depth, or EDGA Summary Depth, the External Distribution Fee for each of those feeds would remain in effect for any Data Vendor receiving those feeds, while the External Distribution Fee for Cboe One Summary (\$0 during the Summary Waiver Period) or Cboe One Premium (\$0 during the Premium Waiver Period) would be waived. This results in a pricing differential between the sum of the underlying equities feeds and the Cboe One feeds under this Program.

Program applies only to the following feeds: EDGX Top, EDGX Summary Depth, BZX Summary Depth, Cboe One Premium, and Cboe One Summary. A Data Vendor may choose to receive a waiver for Cboe One Summary or Cboe One Premium, or for EDGX Top, or for EDGX Summary Depth, or for BZX Summary Depth, or any combination thereof, subject to the applicable eligibility requirements. However, the proposed Program does not offer fee waivers for BZX Top, BYX Top, or EDGA Top data feeds, nor does it offer fee waivers for BYX Summary Depth or EDGA Summary Depth. Accordingly, the applicable underlying equities feeds do not "sum" to the applicable Cboe One feed under this proposed Program.²⁸

The Exchange has selected the products covered by the Program based on where it sees the greatest opportunity to expand distribution and align Data Vendor coverage with downstream end-user demand. This product-specific focus is not unfairly discriminatory. All qualifying Data Vendors are subject to the same product-specific eligibility requirements, and offering waivers for some, rather than all four, of the underlying feeds does not result in unequal treatment among similarly situated participants.

Even setting aside the foregoing, the Exchange does not believe that pricing the Cboe One Summary or Cboe One Premium feeds differently from the underlying equities feeds imposes any burden on competition. To date, the Exchange is not aware of any distributor that purchases the underlying equities feeds (either the Top or Summary Depth Feeds) for the purpose of creating its own consolidated product comparable to Cboe One Summary or Cboe One Premium. This demonstrates that the practical market concern underlying any perceived burden—that distributors might be disadvantaged by differential pricing on Cboe One that is not extended to the underlying feeds—does not correspond to actual market behavior.

Moreover, Cboe One Summary and Cboe One Premium are distinct, independent data products—they are not merely consolidations of data from the four underlying equities feeds. In addition to consolidating data from BZX, BYX, EDGX, and EDGA, Cboe One Summary includes supplementary data elements not found in the individual

²⁸ For example, the External Distribution Fee is \$0 for Cboe One Summary under the proposed Program, but the sum of the four underlying equities feeds under the proposed Program is \$2,750 (\$0 EDGX Top + \$2,500 BZX Top + \$250 BYX Top + \$0 EDGA Top).

underlying feeds, including data derived from the Securities Information Processor (“SIP”) containing information on the national cumulative volume. This additional content makes Cboe One a distinct product with independent utility. Market participants subscribe to the underlying equities feeds and Cboe One for fundamentally different purposes. For example, a subscriber may be interested only in top-of-book data from a single exchange, such as EDGX, for trading, routing or compliance purposes. Such a subscriber has no need for a consolidated product. Conversely, subscribers seeking a comprehensive, cross-exchange view of Cboe liquidity choose Cboe One precisely because it offers consolidated data with additional enhancements. These distinct use cases support differentiated pricing treatment.

Data Vendors may, in theory, choose to purchase each of the four underlying equities feeds and create their own consolidated product. However, the \$1,000 monthly Data Consolidation Fee associated with purchasing Cboe One (and the primary pricing differential) provides access to a production-ready, supported consolidated product, and a vendor seeking to create a comparable offering independently would bear not only the applicable source-feed, but also the costs of developing and maintaining multiple feed handlers, normalizing the data, applying aggregation logic, performing quality assurance, supporting specification changes, and monitoring production feed health. Clients also generally prefer an official exchange product, such as Cboe One, over a vendor-derived consolidated product that requires reporting across multiple exchange products. From a user-experience perspective, the exchange-provided Cboe One is therefore a better solution. A simple combination of the four underlying feeds also would not recreate all Cboe One content, including supplementary SIP-derived information. The Exchange therefore believes that the \$1,000 monthly Data Consolidation Fee is less than the full economic cost of independently creating and maintaining a comparable product, particularly for a vendor that does not already operate the required infrastructure.

Section 6(b)(8) of the Exchange Act requires that exchange rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Cboe One Summary, Cboe One Premium, and the applicable underlying equities feeds are separate products serving different market needs. Just as the Commission has permitted exchanges to offer

different fees for depth-of-book data versus top-of-book data, the Exchange should have discretion to price its consolidated summary product differently from its component feeds.

Finally, the proposed Data Vendor Program is pro-competitive. By reducing the cost of consolidated and top-of-book data products for qualifying Data Vendors, the Exchange enables broader distribution of comprehensive market information to downstream distributors and, ultimately, to retail and institutional investors. Wider access to market data promotes informed investment decisions, enhances market efficiency, and supports the Exchange Act’s goals of investor protection and fair and efficient markets. The Exchange does not view external distributors as competitors for its real-time feed offerings; rather, distributors serve as essential conduits that expand delivery of Cboe real-time market data to end users who do not have the technical capability or commercial need to connect directly to Cboe’s individual market data feeds. This is particularly important for the retail community, as retail investors typically access market data through vendors rather than purchasing it directly from exchanges. By offering the proposed Data Vendor Program, the Exchange enables distributors to deliver competitively priced, comprehensive market data to a broader audience, thereby enhancing—not burdening—competition in the market data landscape.

For the foregoing reasons, the Exchange does not believe that the proposed rule change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act²⁹ and paragraph (f) of Rule 19b-4³⁰ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the

public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeEDGX-2026-060 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-CboeEDGX-2026-060. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeEDGX-2026-060 and should be submitted on or before October 9, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.³¹

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-106371; File No. SR-MX2-2026-05]

Self-Regulatory Organizations; MX2 LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt the Framework of the Exchange's Initial Fee Schedule and Establish an Options Regulatory Fee ("ORF")

September 15, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on September 9, 2026, MX2 LLC ("MX2" or the "Exchange") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing with the Commission a proposed rule change to adopt the framework of the Exchange's initial fee schedule applicable to Members³ and Non-Members of the Exchange pursuant to Exchange Rules 15.1(a) and (c) and to establish an Options Regulatory Fee ("ORF"). The text of the proposed rule change is provided in Exhibit 5.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

In preparation for the launch of the Exchange's options market ("MX2 Options"),⁴ the Exchange proposes to adopt the framework of the Exchange's initial fee schedule (the "Options Fee Schedule")⁵ applicable to the use of the Exchange and establish an ORF in the amount of \$0.0200 per contract side. The Exchange will commence operations as a national securities exchange on September 14, 2026, and thus, proposes the ORF to be effective on that date.

The amount of the proposed fee is based on historical industry volume, projected volumes on the Exchange, and projected Exchange regulatory costs. The Exchange's proposed ORF should balance the Exchange's regulatory revenue against the anticipated regulatory costs.

The Exchange will assess ORF for options transactions cleared by the Options Clearing Corporation ("OCC") in the "customer" range by Exchange Members that occur on the Exchange ("On Exchange ORF"). Specifically, the ORF would be collected by OCC on behalf of the Exchange from Members and Non-Members for all customer transactions executed on MEMX Options. ORF would be assessed and

⁴ On September 30, 2025, the Commission approved SR-MX2-2025-01, which proposed rules for the trading of options on the Exchange. See Securities Exchange Act Release No. 104152 (September 30, 2025), 90 FR 47867 (October 2, 2025) (SR-MX2-2025-01). The Exchange plans to launch MEMX Options in September of 2026.

⁵ Given that this is the first fee filing for MX2 Options, the Exchange wishes to establish the overall framework for the Options Fee Schedule applicable to Members and non-Members of MX2 Options by including headings for the other anticipated sections of the Fee Schedule, including Transaction Fees, Market Data Fees, and Other Fees. It is proposing to leave these sections blank, and it will file separately to adopt those specific fees at a later date.

⁶ The ORF is assessed by MX2 Options and collected via OCC on executions for the account of Public Customers, including Professionals, and Broker-Dealers including Foreign Broker-Dealers. These market participants clear in the "C" range at OCC. On the Exchange, a "Public Customer" means a person that is not a broker or dealer in securities and includes both Priority Customers and Professionals. A "Priority Customer" means a person or entity that is a Public Customer and is not a Professional. A "Professional" is any person or entity that (a) is not a broker or dealer in securities, and (b) places more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s). Executions for the account of an OCC clearing member firm proprietary account, joint back office account clearing in the Firm range, or account of a market maker clearing in the Market Maker range will not be charged an ORF.

collected on all ultimately cleared customer contracts, taking into account adjustments for Clearing Member Trade Assignment ("CMTA") that were provided to the Exchange on the same day as the trade. Further, the Exchange would bill ORF according to the clearing instructions provided on the execution. More specifically, the Exchange proposes to assess ORF based on the clearing instruction provided on the execution on the trade date and would not take into consideration CMTA changes or transfers that occur at OCC.⁷

The following scenarios reflect how the On Exchange ORF will be assessed and collected:

1. If a Member is the executing clearing firm on a transaction that occurred on the Exchange, the fee would be assessed to and collected from that Member by OCC on behalf of the Exchange.

2. If a Member is the executing clearing firm and the transaction is "given up" to a clearing give-up (the "clearing firm"), the On-Exchange ORF is assessed to the executing clearing firm, (the On-Exchange ORF remains the obligation of the executing clearing firm under the proposal), but the On-Exchange ORF will be collected from the clearing firm, regardless of whether that clearing firm is a Member of the Exchange.

The Exchange expects to provide Members sufficient information in connection with their invoice in order to reconcile charges associated with ORF. In addition, the proposed method for collecting On-Exchange ORF will only consider CMTAs reported to the Exchange and not those reported directly to OCC. The Exchange understands that a CMTA may be added at order entry, via post-trade edit on the Exchange, or post-trade at OCC. CMTA transfers that occur at OCC do not necessarily contain reliable information regarding the Exchange on which the original transaction occurred. Without specific information as to where the original transaction occurred, the Exchange would not be able to accurately account for CMTA transfers that occur at OCC. Therefore, the Exchange will only account for CMTAs that occur on the Exchange (which may be a non-Member) and exclude CMTAs occurring at OCC.

The ORF is designed to recover a material portion of the costs to the Exchange of the supervision and regulation of Members' customer

⁷ As noted previously, the Exchange will take into account CMTA transfers that were made the same day as the trade on MEMX Options.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ See Exchange Rule 1.5(p).

options business, including performing routine surveillances and investigations, as well as policy, rulemaking, interpretive and enforcement activities. The Exchange believes that revenue generated from the ORF, when combined with all of the Exchange's other regulatory fees and fines, will cover a material portion, but not all, of the Exchange's regulatory costs. Regulatory costs include direct regulatory expenses and certain indirect expenses for work allocated in support of the regulatory function. The direct expenses include in-house and third-party service provider costs to support the day-to-day regulatory work such as surveillance, investigations and examinations. The indirect expenses include support from personnel in such areas as human resources, legal, information technology, facilities and accounting as well as shared costs necessary to operate the Exchange and to carry out its regulatory function, such as hardware, data center costs and connectivity. The Exchange acknowledges that these indirect expenses are also allocated towards other business operations, such as providing connectivity and market data services, for which the Exchange has also conducted a cost-based analysis. As such, when analyzing the indirect expenses associated with its regulatory program, the Exchange did not double-count any expenses, but instead, allocated a portion of the cost not already allocated to other fees imposed by the Exchange. Indirect expenses are anticipated to be approximately 20% of the total regulatory costs for 2026. Thus, direct expenses are anticipated to be approximately 80% of the total regulatory costs for 2026. The Exchange notes that its regulatory responsibilities with respect to Member compliance with options sales practice rules have been allocated to the Financial Industry Regulatory Authority ("FINRA") under a 17d-2 Agreement. The ORF is not designed to cover the cost of options sales practice regulation. Finally, the Exchange notes that it takes into account all regulatory sources of funding, including fines collected by the Exchange in connection with disciplinary matters, when determining the appropriate ORF rate.

The Exchange will monitor the amount of revenue collected from the ORF to ensure that it, in combination with its other regulatory fees and fines, does not exceed the Exchange's total regulatory costs. More specifically, the Exchange will ensure that revenue generated from ORF not exceed 75% of total annual regulatory costs. The

Exchange will monitor regulatory costs and revenues at a minimum on a semi-annual basis. If the Exchange determines regulatory revenues exceed or are insufficient to cover a material portion of its regulatory costs, the Exchange will adjust the ORF by submitting a fee change filing to the Commission. Going forward, the Exchange will notify Members of adjustments to the ORF via Regulatory Notice at least 30 calendar days prior to the effective date of the change and is proposing to codify this practice in the Options Fee Schedule.

The Exchange notes that other exchanges currently impose an On Exchange ORF, and most of the options exchanges launched over the last 15 years have implemented an ORF on the day of launch or shortly thereafter in order to properly fund their regulatory programs.⁸

The Exchange notified current and future Members via a Regulatory Circular of the proposed ORF prior to the proposed operative date, on August 18, 2026.⁹ The Exchange believes that the prior notification to future market participants will ensure that the future market participants are prepared to configure their systems to properly account for the proposed ORF.

2. Statutory Basis

The Exchange believes that its proposal to amend its Fee Schedule is consistent with Section 6(b) of the Act¹⁰ in general, and furthers the objectives of Section 6(b)(4) of the Act¹¹ in particular, in that it is an equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities. The Exchange also believes the proposal furthers the objectives of Section 6(b)(5) of the Act¹² in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest and is not designed to permit unfair discrimination between customers, issuers, brokers and dealers.

The Exchange believes that establishing an ORF in the amount of

\$0.0200 is reasonable because the Exchange's collection of ORF needs to be balanced against the amount of projected regulatory costs incurred by the Exchange. The Exchange believes that the amount proposed herein will serve to balance the Exchange's regulatory revenue against the anticipated regulatory costs. Moreover, the proposed amount is lower than the amount of ORF assessed on other exchanges.¹³

The Exchange believes the proposed ORF is equitable and not unfairly discriminatory because it is objectively allocated to Members in that it is charged to all Members on all their transactions on MX2 Options that clear as customer at the OCC. Moreover, the Exchange believes the ORF ensures fairness by assessing fees to those Members that are directly based on the amount of customer options business they conduct. Regulating customer trading activity is much more labor intensive and requires greater expenditure of human and technical resources than regulating non-customer trading activity, which tends to be more automated and less labor-intensive. As a result, the costs associated with administering the customer component of the Exchange's overall regulatory program are materially higher than the costs associated with administering the non-customer component (e.g., Member proprietary transactions) of its regulatory program.

The ORF is designed to recover a material portion of the costs of supervising and regulating Members' customer options business including performing routine surveillances and investigations, as well as policy, rulemaking, interpretive, and enforcement activities. The Exchange will monitor the amount of revenue collected from the ORF to ensure that it, in combination with its other regulatory fees and fines, does not exceed the Exchange's total regulatory costs. The Exchange has designed the ORF to generate revenues that, when combined with all of the Exchange's other regulatory fees, will be less than 75% of the Exchange's regulatory costs, which is consistent with the Exchange's by-laws that state in Section 17.4(b): "[a]ny Regulatory Funds shall not be used for non-regulatory purposes or distributed,

⁸ MEMX Options—effective 9/27/23, launch same; MIAx Options—effective 1/2/13, launch 12/7/12; ISE Topaz—effective 8/5/13, launch same; MIAx Pearl—effective 2/6/17, launch same; MIAx Emerald—effective 3/1/19, launch same.

⁹ See MX2 Options Regulatory Notice 26–10, <https://www.memxtrading.com/alerts-and-notices/regulatory-notice-26-10-mx2-options-regulatory-fee>.

¹⁰ 15 U.S.C. 78f(b).

¹¹ 15 U.S.C. 78f(b)(4).

¹² 15 U.S.C. 78f(b)(5).

¹³ See, e.g., the BOX Options Fee Schedule Section II(C), which provides an ORF rate of \$0.0220 per contract. See also the MIAx Pearl Fee Schedule, Section 2(b), which provides an ORF rate of \$0.0240 per contract, the MIAx Emerald Fee Schedule, Section 2(b), which provides an ORF rate of \$0.0220 per contract, and the MIAx Sapphire Fee Schedule, Section 2(b), which provides an ORF rate of \$0.0220 per contract.

advanced or allocated to any Company Member, but rather, shall be applied to fund regulatory operations of the Company (including surveillance and enforcement activities). . . .¹⁴ In this regard, the Exchange believes that the amount of the fee is reasonable.

The Exchange believes that the proposal to provide at least 30 days advance notice to any change in the ORF is reasonable because it will give participants certainty on the timing of changes, if any, and better enable them to properly account for ORF charges among their customers.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. This proposal will not create an unnecessary or inappropriate intra-market burden on competition because the ORF will apply to all customer activity on the Exchange, and is designed to enable the Exchange to recover a material portion of the Exchange's cost related to its regulatory activities. This proposal will not create an unnecessary or inappropriate inter-market burden on competition because it will be a regulatory fee that supports regulation and customer protection in furtherance of the purposes of the Act. The Exchange is obligated to ensure that the amount of regulatory revenue collected from the ORF, in combination with its other regulatory fees and fines, does not exceed regulatory costs. Unilateral action by the Exchange in establishing fees for services provided to its Members and others using its facilities will not have an impact on competition. The Exchange's proposed ORF, as described herein, is lower than or comparable to fees charged by other options exchanges.

The Exchange notes that while it does not believe that its proposed ORF will impose any burden on inter-market competition, the Exchange not charging an ORF or being precluded from charging an ORF would, in fact, represent a significant burden on competition. As noted above, the Exchange is a new entrant in the highly competitive environment for equity options trading. As also noted above, all seventeen (17) [sic] registered options exchanges currently impose ORF on their members, and, similar to the Exchange, the majority of the options exchanges launched over the last decade have implemented an ORF on the day

of launch or shortly thereafter.¹⁵ The Exchange believes that in order to compete with these existing options exchanges, it must, in fact, impose an ORF on its Members, and that the inability to do so would result in an unfair competitive disadvantage to the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act¹⁶ and paragraph (f) of Rule 19b-4¹⁷ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-MX2-2026-05 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to file number SR-MX2-2026-05. This file number should be included on the subject line if email is used. To help the Commission process and review your

comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-MX2-2026-05 and should be submitted on or before October 9, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁸

Sherry R. Haywood,
Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-106376; File No. SR-NYSETEX-2026-34]

Self-Regulatory Organizations; NYSE Texas, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 7.12 Concerning the Resumption of Trading Following a Level 3 Market-Wide Circuit Breaker Halt in Connection With the Industry's Expansion of Trading Hours to 23 Hours per Day, 5 Days per Week

September 15, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² notice is hereby given that, on September 4, 2026, NYSE Texas, Inc. ("NYSE Texas" or the "Exchange") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 7.12 ("Trading Halts Due to

Extraordinary Market Volatility”) concerning the resumption of trading following a Level 3 market-wide circuit breaker halt in connection with the industry’s expansion of trading hours to 23 hours per day, 5 days per week. The proposed rule change is available on the Exchange’s website at www.nyse.com and at the principal office of the Exchange.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

NYSE Texas, Inc. (“NYSE Texas” or the “Exchange”) proposes to amend Rule 7.12 (“Trading Halts Due to Extraordinary Market Volatility”) concerning the resumption of trading following a Level 3 market-wide circuit breaker (“MWCB”) halt (“Level 3 Market Decline”) in connection with the industry’s expansion of trading hours to 23 hours per day, 5 days per week (“23/5 Trading”). Some exchanges, including the Exchange’s affiliate exchange, NYSE Arca, Inc. (“NYSE Arca”), are planning to offer overnight trading,³ and as a result, the uniform Level 3 Market Decline rules of each exchange are being modified, as explained further below.

Background

The MWCB mechanism under Rule 7.12 provides an important, automatic mechanism that is invoked to promote stability and investor confidence during a period of significant stress when U.S. securities markets experience extreme broad-based declines. All U.S. equity exchanges and FINRA (collectively, the self-regulatory organizations or “SROs”) adopted uniform rules relating to the MWCB mechanism in 2012, which are

designed to slow the effects of extreme price movement through coordinated trading halts across U.S. securities markets when severe price declines reach levels that may exhaust market liquidity.⁴ Such market-wide circuit breakers provide for trading halts in all U.S. cash equity and equities options markets during a severe market decline as measured by a single-day decline in the S&P 500 Index during regular trading hours.

Pursuant to Rule 7.12, a market-wide trading halt will be triggered if the S&P 500 Index declines in price by specified percentages from the prior day’s closing price of that index. Currently, the triggers are set at three circuit breaker thresholds: 7% (Level 1), 13% (Level 2), and 20% (Level 3). A market decline that triggers a Level 1 or Level 2 halt after 9:30 a.m. ET and before 3:25 p.m. ET would halt market-wide trading for 15 minutes, while a similar market decline at or after 3:25 p.m. ET would not halt market-wide trading. If a Level 3 Market Decline occurs at any time during the trading day, trading in all stocks will halt on the Exchange for the remainder of the trading day, and will resume the following trading day at 7:00 a.m. ET.

Proposal

The Exchange now proposes to amend Rule 7.12 to reflect extended trading hours under 23/5 Trading. On December 6, 2026, several exchanges, including NYSE Arca, intend to offer new overnight trading sessions that would be available from 9:00 p.m. ET to 4:00 a.m. ET, significantly increasing their hours of operation in response to customer demand.

As discussed, consistent with the uniform rules in place across all SROs, current Rule 7.12(b)(ii) provides that if a Level 3 Market Decline occurs at any time during the trading day, the Exchange shall halt trading in all stocks on the Exchange for the remainder of the trading day. Currently, that means that the earliest that any exchange would re-open trading after a Level 3 Market Decline is 4:00 a.m. ET the following day, since no SROs are open for trading before 4:00 a.m. ET.

Unless amended, when 23/5 Trading is launched, the current rule’s reference to halting “for the remainder of the

trading day”⁵ would require SROs participating in 23/5 Trading to re-open trading at an earlier time, *i.e.*, 9:00 p.m. ET on the same calendar day, when those SROs’ systems would generally become available for overnight trading. The Exchange does not believe that this is an expected or desired result and is therefore amending this rule in coordination with the other SROs such that trading on any SRO will not resume until 4:00 a.m. ET or later on the following trading day, consistent with current market practice. This proposed rule change is therefore not intended to make any substantive changes to the MWCB mechanism. Rather, the proposed rule change would preserve the current resumption time following a Level 3 Market Decline.

To effect this change, the Exchange proposes to delete the language in Rule 7.12(b)(ii) that provides that trading in all stocks will halt on the Exchange “for the remainder of the trading day” if a Level 3 Market Decline occurs at any time during the trading day, and replace it with new language that explicitly provides that trading in all stocks would halt on the Exchange until 4:00 a.m. ET or later on the following trading day.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁶ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁷ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The MWCB mechanism described in Rule 7.12 is an important, automatic mechanism that is invoked to promote stability and investor confidence during periods of significant stress when U.S. securities markets experience extreme broad-based declines. The proposed rule change, when applied uniformly by all SROs, would ensure that the current 4:00 a.m. ET resumption time following a Level 3 halt continues to apply under 23/5 Trading, notwithstanding current rule text implying that the resumption time would coincide with the start of overnight trading on SROs operating an overnight session.

Rather than leave the rule in place as is, which would result in an earlier resumption time than originally contemplated when the rule was adopted, the Exchange, the other U.S.

³ See, *e.g.*, Securities Exchange Act Release No. 105532 (May 21, 2026), 91 FR 31509 (May 27, 2026) (SR-NYSEARCA-2026-53) (“NYSE Arca 23/5 Trading Notice”). The Exchange does not intend to implement 23/5 Trading at this time.

⁴ See Securities Exchange Act Release No. 67090 (May 31, 2012), 77 FR 33531 (June 6, 2012) (SR-BATS-2011-038; SR-BYX-2011-025; SR-BX-2011-068; SR-CBOE-2011-087; SR-C2-2011-024; SR-CHX-2011-30; SR-EDGA-2011-31; SR-EDGX-2011-30; SR-FINRA-2011-054; SR-ISE-2011-61; SR-NASDAQ-2011-131; SR-NSX-2011-11; SR-NYSE-2011-48; SR-NYSEAmex-2011-73; SR-NYSEArca-2011-68; SR-Phlx-2011-129) (“MWCB Approval Order”).

⁵ See Rule 7.12(b)(ii).

⁶ 15 U.S.C. 78f(b).

⁷ 15 U.S.C. 78f(b)(5).

equity exchanges, and FINRA met alongside industry representatives to determine the appropriate resumption time. Following those discussions, the collective decision was made to retain the 4:00 a.m. ET resumption time, notwithstanding the fact that an earlier resumption time would be possible with the introduction of 23/5 Trading. The proposed rule change codifies this decision into the Exchange's rules. The Exchange understands that the other SROs will also be filing similar proposed rule changes. As a result, the market as a whole, including on- and off-exchange, will continue to be subject to harmonized rules for the resumption of trading following a Level 3 Market Decline.

While the SROs had previously decided to tie the resumption time following a Level 3 halt to the earliest SRO opening time, the upcoming transition to 23/5 Trading raises various concerns that warrant a change from the current approach.

First, the Exchange notes that the MWCB mechanism was designed to provide a cooling-off period where market participants would be provided with additional time to evaluate the market events that led to the decline before determining how to position their trading activity for the next day. With the introduction of 23/5 Trading and the start of overnight trading on some SROs at 9:00 p.m. ET, however, this cooling-off period could be materially shortened, reducing one of the key benefits that the MWCB mechanism was designed to provide in the first place. Rather than shorten the cooling-off period and risk this benefit, the Exchange believes the market would be better served by a change to the length of the associated trading halt that mirrors current market practice. Under the proposed rule, as is the case today, after a Level 3 halt, all SROs would re-open trading at 4:00 a.m. ET or later, and no SRO would offer an overnight trading session starting on the day of a Level 3 halt.

Second, overnight trading may be subject to different liquidity and participation considerations than the current pre-market sessions that start at or after 4:00 a.m. ET. Notably, while retail investors have expressed interest in overnight trading, the Exchange expects that institutional investors will take more time to transition to a round-the-clock model. However, such institutional participation may be of heightened importance following a Level 3 halt, as these investors are likely to have views on the underlying market events that led to the Level 3 Market Decline in the first place. The Exchange

is concerned that opening during hours that such participants do not normally trade may impact the quality of price discovery at a time of significant market volatility. Waiting until 4:00 a.m. ET to resume trading would facilitate broader participation and therefore price discovery.

Finally, the Exchange notes that the Commission recently approved an amendment to the Plan to Address Extraordinary Market Volatility ("LULD Plan") that would establish new price protections from 9:00 p.m. ET to 4:00 a.m. ET.⁸ While these price bands would help to assure a fair and orderly market during normal market conditions, it is possible that they would instead prevent normal price discovery following a Level 3 Market Decline. Rather than allowing trading to resume with such price bands in effect, which would represent a change from the current trading reopening following a Level 3 Market Decline, the Exchange believes that requiring SROs to wait until 4:00 a.m. ET or later to resume trading would ensure that price discovery can occur unimpeded during pre-market trading, as it does today, which may further inform prices going into the opening auction and regular market hours trading following a Level 3 halt.

Given the factors discussed above, the Exchange believes that trading in all securities on the Exchange should not resume before 4:00 a.m. ET on the trading day after a Level 3 halt. This decision, which the Exchange understands will also be reflected in the rules of the other SROs, would promote a fair and orderly market at a time of significant market volatility, and thereby protect investors and the public interest. In addition, while the actual Level 3 resumption time would not be changing in practice—as proposed, the current resumption time and future resumption time would both be 4:00 a.m. ET at the earliest—the Exchange believes that it is appropriate to amend its rules to ensure that its rules reflect the upcoming changes due to 23/5 Trading. Without this change, market participants may mistakenly believe that the Exchange intends for trading to re-open on overnight trading exchanges at 9:00 p.m. ET following a Level 3 halt. The proposed rule change would therefore facilitate operational

transparency while providing for a fair and orderly market.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act because the proposal would ensure the continued, uninterrupted operation of a consistent mechanism to halt trading across U.S. securities markets. Further, the Exchange understands that the other SROs intend to file proposed rule changes to ensure a consistent resumption time at 4:00 a.m. or later ET across markets. Thus, the proposed rule change will help to ensure consistency across market centers without implicating any competitive issues.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act⁹ and subparagraph (f)(6) of Rule 19b-4 thereunder.¹⁰

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

⁹ 15 U.S.C. 78s(b)(3)(A)(iii).

⁸ See Securities Exchange Act Release No. 106042 (August 5, 2026), 91 FR 51515 (August 10, 2026) (Order Granting Approval of the Twenty-Seventh Amendment to the National Market System Plan to Address Extraordinary Market Volatility to Establish Temporary Price Band Protections in Overnight Trading).

¹⁰ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NYSETEX-2026-34 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to file number SR-NYSETEX-2026-34. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NYSETEX-2026-34 and should be submitted on or before October 9, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹¹

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 36331; File No. 812-15825]

OneAscent Capital Opportunities Fund, et al.

September 15, 2026.

AGENCY: Securities and Exchange Commission ("Commission" or "SEC").

ACTION: Notice.

Notice of application for an order under sections 17(d) and 57(i) of the Investment Company Act of 1940 (the "Act") and rule 17d-1 under the Act to permit certain joint transactions otherwise prohibited by sections 17(d) and 57(a)(4) of the Act and rule 17d-1 under the Act.

SUMMARY OF APPLICATION: Applicants request an order to permit certain business development companies ("BDCs"), closed-end management investment companies, and open-end management investment companies to co-invest in portfolio companies with each other and with certain affiliated investment entities.

APPLICANTS: OneAscent Capital Opportunities Fund, OneAscent Capital LLC, OAC Evergreen I, LLC and OneAscent Capital Impact Fund I, LP.

FILING DATES: The application was filed on June 2, 2025, and amended on June 11, 2025, September 12, 2025, June 16, 2026, July 28, 2026 and September 8, 2026.

HEARING OR NOTIFICATION OF HEARING:

An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at Secretaries-Office@sec.gov and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant Applicant below. The email should include the file number referenced above. Hearing requests should be received by the Commission by 5:30 p.m., Eastern time, on October 13, 2026, and should be accompanied by proof of service on the Applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0-5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary at Secretaries-Office@sec.gov.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-106370; File No. SR-NYSEARCA-2026-93]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing of a Proposed Rule Change To Permit the Listing of Binary KPI Options

September 15, 2026.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 ("Act"),² and Rule 19b-4 thereunder,³ notice is hereby given that on September 3, 2026, NYSE Arca, Inc. ("NYSE Arca" or the "Exchange") filed with the Securities and Exchange Commission ("Commission") a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its Rules to permit the listing of binary options overlying key performance indicators ("KPIs") reported by certain issuers of stock ("binary KPI options"). The proposed rule change is available on the Exchange's website at

¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

¹¹ 17 CFR 200.30-3(a)(12).

www.nyse.com and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Rules to permit the listing of binary options overlying KPIs reported by certain issuers of stock ("binary KPI options").⁴

Binary options are based on the same framework as traditional, standardized options traded on the Exchange, except the payout of a binary option is an amount contingent upon the occurrence of the option being in- or at-the-money rather than the degree to which the option is in-the-money. As a result, payout at expiration of a binary option is an all-or-nothing occurrence.

Under current Exchange Rules, the Exchange may list binary return derivatives ("ByRDS").⁵ The Exchange proposes to amend its Rules to permit the listing of binary KPI options. Binary KPI options are European-style, cash-settled options contracts listed on an underlying KPI of an issuer whose exercise settlement value is determined not by the market price of the issuer's stock, but by whether a specific financial or operating metric reported by

the issuer in an earnings-related filing submitted to the U.S. Securities and Exchange Commission (the "Commission") meets or exceeds a pre-specified strike level.

First, similar to ByRDS and NYSE American Options Broad-Based Index Binary Options, the Exchange proposes to adopt Section 9 (Binary KPI Options) to describe binary KPI options. The Rules in proposed Section 9 apply only to binary KPI options. All other Rules apply to the trading of binary KPI options, except as otherwise provided or the context otherwise requires.

Specifically, the Exchange proposes to adopt Rule 5.96–O (Applicability, Definitions). Like other standardized options, binary KPI options have standardized terms that are established by the Exchange. Standardized terms for binary KPI options include the exercise criteria that is the condition or criteria of a binary KPI option, the exercise settlement amount (*i.e.*, payout amount), strike prices, expiration dates, settlement type as A.M.-settlement or P.M.-settlement, the settlement style (as European), and the requirements used to determine if the KPI condition or criteria of a binary KPI option has been met (the "payout determination requirement"). The Exchange proposes to establish these terms in new Rule 5.96–O and additional provisions in proposed 5.96–O(b), as described below.

The Exchange proposes to define a "binary KPI option" in new Rule 5.96–O(b) as a cash-settled option contract listed on an underlying KPI of an issuer with an exercise settlement amount that is established at the creation of the option and with a settlement value that is determined by whether a specific KPI disclosed by the issuer in an earnings-related filing submitted to the Commission meets or exceeds its exercise price. Binary KPI options are paid out if the reported value of the applicable KPI (1) equals or is greater than (as the payout determination requirement) the exercise price for a call binary KPI option or (2) is less than (as the payout determination requirement) the exercise price for a put binary KPI option. The Exchange also proposes to provide that unless the context dictates otherwise, the terms underlying security, equity, or index, or any variations of these terms, in the Rules mean KPI for purposes of binary KPI options.

The Exchange proposes to define a "call binary KPI option" as an option contract that returns an exercise settlement amount if the settlement value of the underlying KPI is at or

above the exercise price at expiration (*i.e.*, in- or at-the-money).⁶

The term "Clearing Corporation" would mean the registered clearing agency designated by the Exchange to clear binary KPI options.⁷

The Exchange proposes to define "exercise price" (also referred to as "strike price") as the value⁸ to which the settlement value of the underlying KPI is compared to the exercise settlement amount. For binary KPI options, the exercise price is the exercise threshold of an option contract that establishes a number, value, or measure that is compared against the price of the settlement value of the underlying index or the KPI to determine if the cash payout amount (*i.e.*, the exercise settlement amount) will be paid out. In other words, binary options will have a threshold number as the exercise price that will be used to determine if the exercise criteria of the binary option has been met and the option will be exercised (and if holders will receive the cash payout amount). For binary KPI options, the exercise threshold will be a number that reflects or is compared to the underlying KPI of the binary option.

The Exchange proposes to define the term KPI (or "key performance indicator") as a key financial or operating metric disclosed by an issuer in its earnings-related filings submitted to the Commission (*i.e.*, Form 8–K, Form 10–Q, or Form 10–K, as applicable).⁹

The Exchange proposes to define "put binary KPI option" as an option contract that returns an exercise settlement amount if the settlement value of the underlying KPI is below the exercise price at expiration (*i.e.*, in-the-money).¹⁰

The Exchange proposes to define "settlement value" as the value of the underlying KPI that is used to determine whether a binary KPI option is in-, at-, or out-of-the-money.¹¹ The proposed

⁶ See proposed Rule 5.96–O(b)(2).

⁷ See proposed Rule 5.96–O(b)(3). The definition of Clearing Corporation reflects that the Exchange may designate the Options Clearing Corporation ("OCC") or another registered clearing agency to clear binary KPI options. References in this filing to the Clearing Corporation therefore are intended to be clearing agency-neutral. The proposed definition does not alter the requirement that clearing and settlement occur through a registered clearing agency subject to the applicable provisions of the Act and the rules and oversight applicable to that clearing agency.

⁸ See proposed Rule 5.96–O(b)(4). The value of an exercise price is measured in the applicable units of the KPI. For example, some KPIs are measured in U.S. dollars while others may be measured in percentages or numbers.

⁹ See proposed Rule 5.96–O(b)(6).

¹⁰ See proposed Rule 5.96–O(b)(7).

¹¹ See proposed Rule 5.96–O(b)(8).

⁴ The Exchange's proposal is similar to recent proposals filed by Cboe Exchange, Inc. ("Cboe") and MEMX LLC ("MEMX"). See Securities Exchange Act Release No. 105877 (July 10, 2026), 91 FR 43418 (July 15, 2026) (SR-CBOE-2026-061) ("Notice of Filing of a Proposed Rule Change to Amend its Rules to Permit the Listing of Binary Options Overlying Key Performance Indicators ("KPIs") Reported by Certain Issuers of Stock ("Binary KPI Options")) and Securities Exchange Act Release No. 106182 (August 24, 2026) (SR-MEMX-2026-25). In addition, the Exchange notes that the proposal is similar to the trading of Broad-Based Index Binary Options approved on its related options exchange NYSE American (see NYSE American Rules 18 (Broad-Based Index Binary Optionssm)).

⁵ See NYSE ARCA Rules Section 8 (Binary Return Derivativessm).

definition specifies that the “settlement value” is the value of the applicable KPI as disclosed in the applicable issuer’s earnings-related filing submitted to, the Commission on applicable expiration date (for both A.M.-settled and P.M.-settled binary KPI options).¹² The Exchange designates the applicable KPI and the relevant reporting period (for example, a calendar quarter) at the time of listing a binary KPI option. Proposed paragraph (b) of the settlement value definition provides if the applicable KPI is not reported or otherwise unavailable

on the expiration date (and will not be reported), settlement (including any payout of the exercise settlement amount) will occur in accordance with the Rules of the Clearing Corporation.

Additionally, proposed paragraph (c) of the settlement value definition states if an applicable KPI is restated after the expiration date and settlement of a binary KPI option, the settlement value (and the exercise settlement amount) of the binary KPI option does not change. In other words, the value of the applicable KPI as reported by the issuer on the applicable expiration date is

final, and the amount paid (or not paid) at settlement will not change, regardless of whether it is later restated by the issuer.

The Exchange proposes to adopt Rule 5.97–O(a) (Designation of Binary KPI Option Contracts) to identify the binary KPI options that may be listed for trading on the Exchange. Pursuant to proposed Rule 5.97–O(a), the Exchange may from time to time approve for listing and trading on the Exchange any of the following binary KPI options contracts for the following issuers:

Company	KPI (each financial metric is measured in \$ unless otherwise specified)
Apple, Inc	Earnings per share: diluted. Total net sales. Net sales by category: iPhone. Net sales by category: Services. Net sales by reportable segment: Americas. Net sales by reportable segment: Greater China.
Advanced Micro Devices, Inc	GAAP Diluted earnings per share. GAAP Revenue. Net Revenue: Data Center Segment. Net Revenue: Client and Gaming Segment.
Alphabet Inc	GAAP Operating Margin (%) Diluted net income per share. Revenues. YouTube ads Revenues. Google Cloud Revenues
Amazon.com, Inc	Diluted earnings per share. Total Net sales. AWS: Net sales. North America: Net sales. International: Net sales. Net Sales: Advertising services
Bank of America Corporation	Diluted earnings per share. Total Revenue, net of interest expense. Net Interest Income. Provision for credit losses. Net Income
Citigroup Inc	Diluted earnings per share. Total Revenue, net of interest expense. Net Interest Income. Total Provision for credit losses. Net Income
Coinbase Global, Inc	Net income per share—Diluted. Total Revenue. Transaction Revenue. Total Trading Volume.
Ford Motor Company	Subscription and Services Revenue GAAP Earnings per share—Diluted. Total Revenues. Ford Pro Segment: Revenue. Ford Model e Segment: Revenue. Ford Blue Segment: Revenue
Intel Corporation	GAAP Earnings per share attributable to Intel—diluted. Net revenue. Revenue: Client Computing Group (CCG). Revenue: Data Center and AI (DCAI). Revenue: Intel Foundry. GAAP operating margin (%)

¹² While the timing of an issuer’s official announcement informs whether the Exchange will establish a binary KPI option as A.M.-settled or P.M.-settled (as further discussed below), the

Exchange will use the KPI value included in an issuer’s report submitted to the Commission (and not the press release announcing earnings results, for example) as the settlement value. The Exchange

understands, however, these values are generally the same.

Company	KPI (each financial metric is measured in \$ unless otherwise specified)
JPMorgan Chase & Co	Earnings per share—diluted. Net revenue—reported. Net Interest Income. Provision for credit losses. Net Income
Marathon Digital Holdings, Inc	Earnings (Net loss) per share of common stock—diluted. Revenues. Number of Blocks Won (# Bitcoin (BTC)). Energized Hashrate (EH) (# EH/s). Total Bitcoin Holdings (# BTC). BTC Produced (# BTC). BTC Purchased (# BTC)
Meta Platforms, Inc	Earnings per share: Diluted. Revenue. Family Daily Active People (DAP) (#). Revenue: Advertising. Operating Margin (%)
Microsoft Corporation	Diluted Earnings per Share. Revenue. Intelligent Cloud: Revenue. Microsoft Cloud revenue. More Personal Computing: Revenue
Netflix, Inc	Earnings per share: Diluted. Revenues. United States and Canada (UCAN): Revenue. Europe, Middle East, and Africa (EMEA): Revenue
NVIDIA Corporation	Operating Margin (%) GAAP Diluted earnings per share. Revenue. Data Center Revenue. Edge Computing Revenue. Automotive Revenue
Palantir Technologies Inc	Earnings per share attributable to common stockholders, diluted. Revenue. Net Income. Closed Deals of at Least \$1 Million (#)
Robinhood Markets, Inc	Net income attributable to Robinhood common stockholders: Diluted. Total net revenues. Funded Customers (#). Average Revenue Per User (“ARPU”). Robinhood Gold Subscribers (#)
SoFi Technologies, Inc	Earnings per share attributable to common stockholders—diluted. Total net revenue. Total net revenue—Technology Platform. Total net revenue—Financial Services. Total net revenue—Lending
Space Exploration Technologies Corp	Earnings per share: Diluted. Total Revenues
Super Micro Computer, Inc	Net income per common share: Diluted. Net sales. Gross Margin (%). Cash flow used in operations. Net Income
Target Corporation	Diluted earnings per share. Net sales. Food & Beverage Net sales. Apparel & Accessories Net sales. Operating income: Rate (%)
Tesla, Inc	Net Income per share of common stocks attributable to common stockholders: diluted. Total Revenues. Total Automotive Revenue. Model 3/Y Production (#). Supercharger Connectors (#). Free Cash Flow
The Walt Disney Company	Diluted earnings per share. Revenues. Entertainment Subscription Video On Demand (SVOD) Operating Income. Revenues: Experiences. Segment operating income: Sports

The Exchange proposes to add Rule 5.97–O(b) to clarify that binary KPI options are a separate class from other options overlying the stock of the issuer and are a separate class from other binary KPI options with differently underlying KPIs for the same issuer. The Exchange believes this is reasonable given that an individual KPI is the specific underlying of binary KPI options, and generally options with different underlyings (*e.g.*, different underlying security or index) are different option classes.

Next, the Exchange proposes to adopt Rule 5.98–O (Terms of Binary KPI Option Contracts) to describe the permissible terms of binary KPI option series. Proposed Rule 5.98–O provides that binary KPI options listed and traded on the Exchange are designated as to expiration date, exercise price, settlement type, settlement style, exercise settlement amount, contract multiplier, and underlying KPI. After approving a particular binary KPI option class for listing and trading on the Exchange, the Exchange from time to time may open for trading series of options in that binary KPI option class.

Proposed Rule 5.98–O(a) states binary KPI options have European-style settlement. Proposed Rule 5.98–O(a) further provides that the Exchange may designate the settlement type for binary KPI options as A.M.-settled or P.M.-settled. Binary KPI options for issuers¹³ that disclose their earnings results before the open of the Core Trading Session on a given trading day are designated as A.M.-settled binary KPI options, and binary KPI options for issuers that disclose their earnings results after the close of RTH on a given trading day are designated as P.M.-settled binary KPI options. The Exchange notes that the proposed concepts of A.M.-settlement and P.M.-settlement for binary KPI options differ compared to traditional options, for which “P.M.-settled” generally means that the expiration of an option so designated will settle to the closing price of the underlying security or index value and “A.M.-settled” generally means that the expiration of an option so designated will settle to the opening price of the underlying. While different than how these terms apply to standard and binary index options, the Exchange believes the proposed description of A.M.-settlement and P.M.-settlement appropriately reflect the earnings disclosure practices of issuers.

¹³ The Exchange determines whether an issuer discloses its earnings results before or after the close of the Core trading hours on a given trading day based on publicly available information regarding the issuer’s disclosure practice.

Additionally, while the timing of the event that will determine whether the Exchange designates a binary KPI option as A.M.-settled or P.M.-settled is different than that for traditional options and binary index options, the trading hours on expiration dates for each of A.M.-settled and P.M.-settled binary KPI options are consistent with those of A.M.-settled and P.M.-settled index options (traditional and binary) today.

Proposed Rule 5.98–O(b) describes permissible expirations for binary KPI options. Specifically, the proposed rule change will permit the Exchange to list series that expire on the date the issuer announces its earnings results for the applicable reporting period (such as calendar quarter). The expiration date for a binary KPI option will be the date on which an issuer discloses the applicable KPI in its earnings results (for example, the date on which it issues an earnings results press release) for the specified reporting period (with the specific expiration date to be finalized when an issuer announces the date on which it will disclose its earnings results for that reporting period).¹⁴ If that date is a Tuesday, Wednesday, Thursday, or Friday and the Exchange is not open for business on that date, the expiration date will be the first business day immediately prior to that day. If that date is a Monday and the Exchange is not open for business on that date, the expiration date will be the first business day immediately following that Monday. The disclosed KPIs relate to a specific reporting period (such as a calendar quarter), which KPIs an issuer publicly announces on a date following the end of that reporting period.

While an expiration date for a binary KPI option will be a specific date, as is the case for traditional options, the Exchange’s proposed designation of expiration dates for binary KPI options will differ to reflect standard issuer disclosure practices. In some instances, an issuer might not establish the specific date on which it will announce its earnings results for a reporting period until weeks prior to the release date. Consequently, unlike standard

¹⁴ For example, for a binary KPI option series, the Exchange may designate the reporting period for a series to be the fourth quarter of 2026. The expiration date for that series would be the date on which the applicable issuer establishes as the date it will announce earnings results for that quarter. The Exchange will issue a Trader Update when the specific expiration date for a binary KPI option is finalized. Additionally, the Exchange will maintain a reference data file for each issuer KPI on which the Exchange lists binary KPI options (as will be described in the Exchange’s technical specifications available on its public website), and that reference data file will be updated with the specific expiration date for a binary KPI option once known.

equity and index options that have an exact expiration date when strikes are first listed, a binary KPI option will be listed for trading with a placeholder expiration date if the date the KPI information will be released by the issuer is not publicly known. If a placeholder expiration date is required, it will be set as the first trading day that is three months following the date of the prior quarterly release date for a KPI (for KPIs announced quarterly) and six months following the date of the prior semiannual release date for a KPI (for KPIs announced semiannually, if the Commission approves proposed rules that would permit such reporting). Once the KPI issuer announces the release date of the KPI information, the expiration date will be updated as the finalized expiration date of the option contract. Ultimately, however, the expiration date for a binary KPI option is an issuer’s earnings release date at the time the series is listed (even if the exact date is unknown) until expiration.

The Exchange may designate binary KPI option series to expire up to 12 months from the time they are listed and may list up to two expirations at one time for a binary KPI option (per KPI per issuer). The Exchange may open for trading a series of binary KPI options at least one business week prior to the expiration date of a binary KPI option. First, the proposed rule change permits the Exchange to list binary KPI options to expire up to 12 months from the time they are listed. The proposed rule change also limits the Exchange to list up to two expirations at one time for binary KPI options.

The proposal to list expirations at least one business week prior to the expiration date of binary KPI option (as well as the proposed language regarding shifting an expiration date to the immediately business day before or after an expiration date that falls on a day the Exchange is not open for business) is substantially similar to current Exchange rules applicable to binary equity options,¹⁵ as well as the rules of another options exchange applicable to short term equity options series.¹⁶ The Exchange believes it is appropriate to permit listing of binary KPI options that expire up to 12 months from the time they are listed to accommodate different issuer reporting periods (including semiannual reporting if the Commission approves recently proposed rules to permit such reporting), as well as to permit the Exchange to list expirations for consecutive calendar quarter periods or for a calendar quarter and annual

¹⁵ See Rule 5.85–O(b).

¹⁶ See Cboe Rule 4.5(d).

reporting period at the same time. As discussed above, issuers disclose KPIs in their periodic reports submitted to the Commission.

Proposed Rule 5.98–O(c) describes the automatic exercise feature of binary KPI options. Specifically, the proposed rule states that binary KPI options will be automatically exercised at expiration if the settlement value of the underlying KPI is equal to or greater than the exercise price of a call binary KPI option or less than the exercise price in the case of a put binary KPI option.

Proposed Rule 5.98–O(d) describes the permissible exercise prices (or strike prices) the Exchange may designate for series of binary KPI options. Proposed Rule 5.98–O(c)(1) describes how the value of exercise prices of binary KPI options are measured. Specifically, the exercise price of each binary KPI option series will be fixed at an amount equal to a value of the underlying KPI. Because the value of certain KPIs may be very large (e.g., billions of dollars), the Exchange proposes that the exercise price value of the underlying KPI will be divided by a scaling factor based on the value of the KPI in the issuer's most recent earnings-related disclosure as of the time a binary KPI option class is listed) as follows:

- if the most recently disclosed KPI value is greater than or equal to one trillion, the exercise price equals that value divided by one trillion (e.g., for such KPIs, an exercise price of 27.00 is equivalent to a KPI value of 27,000,000,000,000.00);
- if the most recently disclosed KPI value is greater than or equal to one billion but less than one trillion, the exercise price equals that value divided by one billion (e.g., for such KPIs, an exercise price of 112.00 is equivalent to a KPI value of 112,000,000,000.00);
- if the most recently disclosed KPI value is greater than or equal to one million but less than one billion, the exercise price equals that value divided by one million (e.g., for such KPIs, an exercise price of 900.00 is equivalent to a KPI value of 900,000,000.00);
- if the most recently disclosed KPI value is greater than or equal to one thousand but less than one million, the exercise price equals that value divided by one thousand (e.g., for such KPIs, an exercise price of 42.00 is equivalent to a KPI value of 42,000.00); and
- if the most recently disclosed KPI value is less than one thousand, the exercise price equals that value and is not divided by a scaling factor (e.g., for

such KPIs, an exercise price of 774.00 is equivalent to a KPI value of 774.00).¹⁷

The Exchange will apply a different scaling factor to newly listed binary KPI option series for a new expiration only after the value of the KPI in the issuer's earnings-related disclosures has a value in a different scaling tier for four consecutive reporting periods or if the Exchange deems it necessary in the interests of a fair and orderly market. Application of a different scaling factor will not affect the exercise prices of any series of the binary KPI options previously opened. For example, if the Exchange begins listing a new class of binary KPI options and the most recently disclosed KPI value for the issuer at the time of that listing was for the third quarter of 2026 and was \$892,000, the exercise prices for that class of binary KPI options will be scaled by 1,000, and thus exercise prices of 895, 995, and 1005, would represent \$895,000, \$995,000, and \$1,005,000, respectively. If the issuer discloses a KPI value of \$1,020,000 in its fourth quarter 2026 earnings disclosure, the Exchange will continue to list exercise prices scaled by 1,000. If the issuer then discloses KPI values of \$1,112,000, \$1,237,000, and \$1,064,000 for the first, second, and third quarters, respectively, of 2027, the Exchange will begin scaling the exercise prices by 1,000,000 for the fourth quarter 2027 expirations (or for the first quarter 2028 expirations if the Exchange had already listed fourth quarter 2027 expirations prior to the disclosure of the third quarter 2027 KPI value). The Exchange believes this will permit consistency for listing scaled KPI values while allowing the Exchange to update strike prices to reflect long-term changes to an issuer's KPI values.

The Exchange will announce via Trader Update if the scaling factor applied to a binary KPI options changes (for example, the KPIs will be scaled in billions rather than in millions). Additionally, the Exchange will update this information in the Exchange's technical specifications regarding binary KPI options and reference data file that describes the terms of binary KPI options, both of which will be available on the Exchange's website (customers receive notifications of such updates). This is consistent with how the Exchange provides information regarding product information (including updates) for all options the Exchange lists for trading.

¹⁷ When applying the scaling factor, the Exchange will not round the scaled KPI value and instead will truncate the value so the scaled strike price value fits within standard strike listing format.

It is possible for a KPI to have a negative value, such as earnings per share (which is equivalent to a loss per share). Proposed Rule 5.98–O(c)(1)(B) provides the Exchange may list binary KPI options series with exercise prices representing negative KPI values. For these series, the exercise price will equal the absolute value of the KPI and will be scaled as described above. For example, if an issuer's earnings per share in the last reporting period was –\$3.52 (and thus was a loss per share), a binary KPI option for such issuer with a strike of 3.58 will reflect an expected loss of \$3.58 per share. The Exchange will incorporate into symbology for binary KPI options whether the value of the strike price is positive or negative, including if the Exchange lists binary KPI option series with both positive and negative strike prices. Whether a symbol reflects a positive or negative value will be available on contract specifications as well as the reference data file for the specific binary KPI option on the Exchange's public website.

Proposed Rule 5.98–O(d)(2) provides the minimum interval between strike prices for binary KPI options series is:

- 0.01 where the strike price is less than 10;
- 0.10 where the strike price is 10 or greater but less than 100;
- 1.00 where the strike price is 100 or greater but less than 1,000;
- 10.00 where the strike price is 1,000 or greater but less than 10,000; and
- 100.00 where the strike price is 10,000 or greater.

As discussed above, while KPI values above 1,000 are generally scaled, there may be circumstances in which the Exchange lists strikes above 1,000 or even 10,000 given the Exchange's proposal to maintain a lower scale level until a KPI value is consistently above a certain level (e.g., above one billion for four consecutive quarters). This may occur when a KPI value is near the top of a scaling range; for continuity, the Exchange will continue listing strike prices using the lower scaling factor and not change to a higher scaling factor until the KPI value is regularly within that higher range. Suppose a KPI value is 995,000,000; in this case, strike prices will be scaled by 1,000,000. Thus, the Exchange may list binary KPI options above and below 995 (995,000,000 divided by 1,000,000). However, there is potential that the KPI may increase to above 1,000,000,000. As proposed, the Exchange may list strike prices, for example, of 1,000 (representing 1,000,000,000) and above, for expirations until the KPI value is above 1,000,000,000 for four consecutive reporting periods. To reduce confusion,

the Exchange would not scale strike prices using different scaling factors within a single expiration (and would not change the scale until the KPI value is consistently at the higher level). Therefore, it is possible the Exchange may list strikes greater than 1,000. Similarly, while strikes above 10,000 may be rare, given the Exchange proposes to maintain a lower scale level until a KPI value is consistently above a certain level (e.g., above one billion for four consecutive quarters, as proposed), depending on market factors and demand, it is possible (although unlikely) the Exchange may determine it is appropriate to list strikes above 10,000 if market factors or expectations signify a significant increase of the KPI value. The proposed strike intervals accommodate the listing of binary KPI options in these circumstances before the Exchange shifts the strike prices for an issuer's KPI to a different scaling level.

The proposed strike intervals are generally consistent with current Exchange Rules for other options, which provide for larger strike intervals as the values of strike prices increase. Given the scaling factor for larger KPI values, it may appear the proposed rule change will permit smaller strike intervals for larger KPI values if those intervals are considered solely on a nominal basis. However, that is not the case if the actual values of the strike intervals are considered. The corresponding actual value of the strike interval for a strike price that was subject to a larger scale value is higher than the actual value of the strike interval for a strike price that was subject to a smaller scale value. For example, suppose a strike price of 950 represents \$950 million. The proposed rule change would permit strike intervals of \$1.00. However, that \$1.00 corresponds to \$1,000,000. In other words, if the Exchange listed strikes of 950, 951, and 952, the difference in values of those strikes are \$1 million, not \$1 (i.e., the strikes represent values of \$950,000,000, \$951,000,000, and \$952,000,000). Similarly, suppose a strike price of 3 represents \$3,000,000,000. The proposed rule change would permit strike intervals of \$0.01. However, that corresponds to \$10,000,000. If the Exchange listed strikes of 3.00, 3.01, and 3.02, the difference in values of those strikes are \$10,000,000, not \$0.01 (i.e., the strikes represent values of \$3,000,000,000, \$3,010,000,000, and \$3,020,000,000, respectively). As a result, the permissible strike intervals for strike prices representing values in the billions are actually larger than the

permissible strike intervals for strike prices representing values in the millions. This is consistent with the general premise underlying current strike intervals that larger strike intervals apply to larger strike values.

Proposed Rule 5.98–O(e) describes the automatic exercise feature of binary KPI options. Specifically, the proposed rule states that binary KPI options will be automatically exercised at expiration if the settlement value of the underlying KPI is equal to or greater than the exercise price of a call binary KPI option or less than the exercise price in the case of a put binary KPI option.

Proposed Rule 5.98–O(f) describes the initial series of a binary KPI option the Exchange may open for trading. Specifically, the Exchange may open for trading one or more binary KPI option series with a fixed KPI value as the strike price, with approximately the same number of strike prices being opened above and below the at-the-money KPI value (i.e., the value of the KPI in the issuer's most recent earnings-related disclosure) at the time the binary KPI options are opened. The Exchange will list strike prices for binary KPI option series that are reasonably close to the at-the-money KPI value at the time of listing. A strike is “reasonably close” to the at-the-money KPI value if (1) for KPIs less than or equal to 10, it is no more than 100% above or below the at-the-money KPI value; and (2) for KPIs greater than 10, it is no more than 30% above or below the at-the-money KPI value. The Exchange may also open binary KPI option series that are more than 30% above or below the at-the-money KPI value (if the KPI is greater than 10) provided demonstrated customer interest exists for such series, as expressed by institutional, corporate or individual customers or their brokers.

The Exchange may add new series of binary KPI options series when the Exchange deems it necessary to maintain a fair and orderly market or to meet customer demand. To the extent the Exchange lists binary KPI options series for an expiration before then-currently listed binary KPI options expire (and thus before the applicable issuer has disclosed the KPI value for the reporting period immediately preceding the reporting period for these newly listed options), the Exchange may list additional series after the KPI value for the immediately preceding reporting period is disclosed using that disclosed KPI value as the at-the-money KPI. For example, before expiration of a binary KPI options series set to expire on the date of an issuer's disclosure of its third quarter earnings results, the Exchange lists series of that binary KPI option to

expire on the date of an issuer's disclosure of its fourth quarter earnings results (using the KPI from the second quarter earnings results as the at-the-money KPI value). After the issuer discloses its third quarter earnings results, including the applicable KPI, the Exchange may list additional series for the fourth quarter binary KPI options using the third quarter KPI result as the at-the-money KPI value. Any additional strike prices the Exchange lists will be reasonably close (as defined above) to the at-the-money KPI value at the time of listing.

Continuing the above example, suppose the Exchange lists binary KPI options for the fourth quarter before the binary KPI options for the third quarter have expired. As proposed, the Exchange would list strikes above and below the at-the-money strike, which at the time of listing would be the settlement value KPI from the issuer's second quarter earnings results disclosure, as that is the most recently available KPI. If the KPI for the option was net sales, and the second quarter value was \$45.093 billion, the at-the-money strike would be 45.10, and the Exchange could list strikes within 50% of that value, and additional series based on customer demand or market changes. After the Exchange lists those series, the issuer announces its third quarter earnings results, including net sales of \$57.241 billion. As proposed, after that announcement, the Exchange may list additional strikes within 50% of \$57.24 to reflect the change in value of the underlying (as well as additional series based on customer demand or market changes).

This proposed framework for listing and adding series is similar to the framework in current Rules for listing and adding series of equity options. While the proposed strike intervals are narrower than these rules, the permissible ranges are also narrower. The Exchange acknowledges the proposed framework would still permit the Exchange to list a large number of strikes per KPI per expiration. However, the Exchange intends to apply its standard strike listing practices to binary KPI options. Specifically, the Exchange generally lists strikes at wider intervals as they move farther away from the at-the-money value, while listing more granular intervals for strikes closer to the at-the-money value. The Exchange also generally delists granular strikes that are deep out-of-the-money if the Exchange determines they are sufficiently covered by wider strike intervals that are close in value.

These proposed provisions regarding the listing of binary KPI option series

are similar to provisions regarding permissible series of other options. The Exchange believes it is reasonable to list binary KPI options for a new reporting period prior to the expiration of then-listed binary KPI options for the immediately preceding reporting period (e.g., listing binary KPI options for the fourth quarter before expiration of binary KPI options for the third quarter), and thus before the settlement value of the applicable KPI is known for the immediately preceding reporting period for these options, to permit investors to roll positions from one expiration to the next. As proposed, once the settlement value for the immediately preceding reporting period is known (the third quarter in this example), the Exchange may list additional series of the binary KPI options that reflect that KPI value. This is consistent with current practice if there is a change (including a substantial change) in the price of underlying security or value of an underlying index. For example, Rule 6.4–O(a) provides that the Exchange may open additional series of a short-term option series overlying a security when the market price of the underlying security moves substantially from the exercise price or prices of the series already opened, subject to the “reasonably close” parameters set forth in that rule. Disclosure of, as an example, the third quarter KPI value after the fourth quarter binary KPI options series were listed based on the second quarter KPI value (if the third quarter KPI value differs from the second quarter KPI value) is similar to the move in the price of an underlying security, which may result in the Exchange listing additional series based on the updated price of the underlying security. Similarly consistent with current practice for other options (as set forth in Rule 6.4–O, Commentary .07(d), for example), opening of binary KPI options based on this later-disclosed KPI value will not affect any other series of options of the same binary KPI options class previously opened.

Proposed Rule 5.98–O(f) provides that the contract multiplier for each class of binary KPI options is one.

The Exchange proposes to add new Rule 5.99–O (Determination of Settlement Value) to establish that binary KPI options that are “at-the-money,” “in-the-money,” or “out-of-the-money” are a function of the settlement value of the underlying KPI in relation to the type of binary KPI option (*i.e.*, put or call) and the exercise price. As described above, the settlement value for a binary KPI option is the value of the KPI as disclosed in the applicable issuer’s earnings related filing. While

the timing of an announcement of a KPI value factor into the determination of whether the Exchange lists a binary KPI option as A.M.-settled or P.M.-settled, the Exchange will source the settlement value from the filing the issuers submits to the Commission. Generally, companies issue press releases that contain earnings results and near contemporaneously submit a Form 8–K to the Commission with the press release as an exhibit. Therefore, it is unlikely the value of the KPI in the Commission filing will differ from the value in the initial announcement; however, the value in the Commission filing will be the ultimate settlement value.

Proposed Rule 5.100–O (Adjustment) provides that binary KPI option contracts are subject to adjustment only in accordance with and to the extent specified in the Rules of the Clearing Corporation. When any such adjustment has been determined, the Exchange will announce this adjustment via Trader Update, which will become effective as of the time specified in that announcement.

As described above, binary KPI options would be cleared by the Clearing Corporation, which would serve as the central counterparty to each transaction and facilitate standardized clearing, settlement, and contract administration processes pursuant to its Rules. Consistent with this centralized clearing framework, proposed Rule 5.100–O provides that binary KPI options would be subject to adjustment only in accordance with and to the extent specified in the Rules of the Clearing Corporation. When any such adjustment has been determined, the Exchange will announce this adjustment via Trader Update, which will become effective at the time specified in that announcement. The Exchange believes that limiting contract adjustments to those provided under the Rules of the Clearing Corporation provides a clear and transparent framework under which any adjustments to binary KPI options would be administered. A registered clearing agency designated to clear binary KPI options would be subject to Commission oversight and would possess expertise in the clearance and settlement of financial products. Because binary KPI options represent a novel product type, the Exchange anticipates that the Clearing Corporation would develop adjustment procedures designed to address the unique characteristics of these contracts and the types of events that may require adjustment. To the extent the Clearing Corporation adopts new adjustment procedures for binary KPI options, those

procedures would be subject to the applicable regulatory process, including review and approval by the Commission, as applicable, before the Exchange commences trading in the product.

Next, the Exchange proposes to Rule 5.101–O to provide that binary KPI options, may be traded on the Exchange from 9:30 a.m. to 4:00 p.m.¹⁸ Further, the last day of trading for P.M.-settled binary KPI options is the day of expiration, and the last day of trading for A.M.-settled binary KPI options is the trading day prior to expiration.

The Exchange recognizes it is possible, although unusual and unlikely, that KPI information may become available at unexpected times. The proposed rules address the impact on trading and expiration that such disclosure may have. First, the proposed rule change provides if the Exchange confirms an issuer discloses the KPI prior to the expiration date, trading in the applicable binary KPI options series will cease, and the expiration date for the option accelerates to a date on or shortly after the date of that disclosure in accordance with the Rules of the OCC.¹⁹ This may occur if, for example, the applicable issuer releases the KPI information in advance of the expiration date of the option. If the issuer releases KPI information after the expiration date, which may be the case if, for example, the issuer’s earnings are delayed, trading in the option will not be impacted and will cease as of the expiration date. While the expiration date will not change, expiration processing of such options will be delayed until the KPI information becomes available, in accordance with the rules of the Clearing Corporation. Additionally, the proposed rule change provides if there is an unofficial disclosure of the KPI prior to the expiration date, the Exchange may determine to halt (and resume) trading in the applicable binary KPI options series in accordance with Rule 953NY. In certain circumstances, the expiration date for the option may accelerate in accordance with the Clearing Corporation rules; if this occurs, trading in the binary KPI will cease. This proposed provision addresses the unlikely event that KPI information becomes available through sources other than the issuer in advance of the expiration date. If the Exchange

¹⁸ Unless otherwise specified, all times in this proposal are Eastern Time.

¹⁹ The proposed acceleration of binary KPI options is similar to the existing acceleration process for equity options when the underlying security of such options has been converted entirely to cash. See OCC Rule 807.

determines the KPI information reported from the unofficial source is unreliable, trading in the binary KPI option may resume until it expires.

The Exchange believes proposed Rule 5.101–O(d), which provides that for binary KPI options, the System initiates the opening rotation at 9:30 a.m., is consistent with the opening auction framework already applicable to other index options listed on the Exchange and ensures that binary KPI options open for trading in an orderly and transparent manner.

The Exchange proposes to amend Rule 6.72–O to establish the minimum increment for bids and offers on orders for binary KPI options, which may not be less than \$0.01.

The Exchange proposes to adopt Rule 5.102–O (Position Limits for Binary KPI Options) to set forth position limit requirements for binary KPI options. The Exchange proposes to adopt Rule 5.102–O to provide that in determining compliance with Rule 6.8 (Position Limits), the position limit for binary KPI options is the same as the applicable position limit for the stock of the issuer per expiration and 100 binary KPI option contracts equal one standard option contract.

Per proposed rule 5.102–O(b), positions in binary KPI options on the same KPI that have different expiration dates are not aggregated, and positions in binary KPI options for the same issuer with different underlying KPIs are not aggregated. In addition, the Exchange proposes to adopt Rule 5.102(c) to provide that Binary KPI options are not aggregated with non-binary options contracts overlying the stock of the issuer. Finally, per Rule 5.102–O, with respect to binary KPI options, a binary KPI option short position coupled with a binary KPI option short call position, regardless of the KPI option strike, shall be exempt from the established position limits proscribed in Rule 6.8–O.

The Exchange also proposes to adopt Rule 5.103–O (Reporting of Positions) Positions in binary KPI options shall be reported pursuant to Rule 6.6–O, except, in computing reportable binary KPI options thereunder, aggregation of positions shall be in accordance with Rule 5.102–O. The proposed Rule 5–103–O further provides that for purposes of this report, 100 binary KPI option contracts equal one standard option contract. The Exchange believes this is reasonable given that binary KPI options have a multiplier of 1 while standard equity option contracts have a multiplier of 100.

Except as otherwise described above, all binary KPI options will be listed and

traded on the Exchange in a substantially similar manner as standard equity and index options and binary index options are permitted to be listed and traded under current Rules. The Rules that apply to the listing and trading of non-binary options on the Exchange, including those related to customer accounts, margin requirements and trading halt procedures,²⁰ which are designed to prevent fraudulent and manipulative acts and practices, will apply to the listing and trading of binary KPI options. The Exchange has analyzed its capacity and represents that it believes the Exchange has the necessary systems capacity to handle any potential additional message traffic associated with the listing of binary KPI options.

The Exchange will support electronic trading, floor trading, and complex orders. Trading in Flexible Execution (“FLEX”) options will not be offered. The Exchange may determine to support particular order types, order instructions, or times-in-force on a class-by-class basis. Consistent with current practice, if the Exchange modifies the applicability of any functionality or order instructions for binary KPI options, it will notify ATP Holders via Trader Update.

The Exchange will send quotation and transaction price information for binary KPI options to The Options Price Reporting Authority (“OPRA”) in the same manner it sends this information to OPRA for all other options the Exchange lists. Additionally, the Exchange understands from OPRA that it will disseminate information regarding binary KPI options in the same manner it does for all other options the Exchange lists. The Exchange intends to follow OPRA’s standard capacity monitoring process for binary KPI options (in accordance with OPRA instructions), which includes submission of quarterly capacity projections (the Exchange will include its projected binary KPI option volume in the applicable submission). Further, the Exchange understands from OPRA that no technical changes are required to accommodate the reporting to OPRA of quotation and transaction information regarding binary KPI options (the Exchange represents, if later required by OPRA, it will adhere to any new technical requirements

²⁰ Binary KPI options will not be tied to the trading state of the underlying issuer stock and thus, trading in binary KPI options will not be affected by halts in the underlying issuer stock. The binary KPI options will halt in accordance with Rule 6.65–O

OPRA deems necessary to accommodate binary KPI options).²¹

The Exchange does not believe Option Trade Permit (“OTP”) Holders and OTP Firms will experience any capacity issues as a result of this proposal and represents that it will monitor the trading volume associated with binary options and the effect (if any) of binary options on market fragmentation and the capacity of the Exchange’s automated system.

The Exchange represents that the same surveillance procedures applicable to all other options currently listed and traded on the Exchange will apply to binary KPI options, and that it has the necessary systems capacity to support the option series. The Exchange’s existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior and other improper trading. In addition, the Exchange has a Regulatory Services Agreement with the Financial Industry Regulatory Authority, Inc. (“FINRA”). Pursuant to a multi-party 17d–2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillances.²² The Exchange is also a member of the Intermarket Surveillance Group (“ISG”) under the ISG Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. Further, the Exchange will implement any new surveillance procedures it deems necessary to effectively monitor the trading of binary KPI options.

The Exchange will report any information regarding binary KPI options required to be reported to the Consolidated Audit Trail (“CAT”) in the same manner it reports this information to CAT for all other options the

²¹ The Exchange understands OPRA may need to update how it disseminates open interest information for binary KPI options, as its current process incorporates information from OCC and references in this filing are clearing agency-neutral.

²² Section 19(g)(1) of the Act, among other things, requires every self-regulatory organization (“SRO”) registered as a national securities exchange or national securities association to comply with the Act, the rules and regulations thereunder, and the SRO’s own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. See 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d–2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO. Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

Exchange lists.²³ The Exchange represents, if later required by FINRA CAT, it will adhere to any new technical requirements FINRA CAT deems necessary to accommodate binary KPI options).

Pursuant to the Options Order Protection and Locked/Crossed Market Plan ("Linkage Plan"),²⁴ participant exchanges to the Linkage Plan established a framework to provide order protection. The Linkage Plan (and Exchange Rules 6.92–O through 6.96–O regarding intermarket linkage) applies during all trading sessions during which multiply listed options trade. Rule 6.96–O addresses order routing away from the Exchange to promote compliance with the Linkage Plan. If the proposed binary KPI options become multiply listed options, Users may designate an order for routing (or not available for routing), and the Exchange System is designed to, at all times, prevent trade-throughs and avoid displaying locked/crossed markets in accordance with the Linkage Plan (and Exchange Rules 6.94–O through 6.96–O regarding intermarket linkage).

Upon launch, binary KPI options will clear through the Clearing Corporation as that term is defined in proposed Rule 5.96–O. In doing so, the proposal would bring these securities products within the established regulatory infrastructure applicable to listed options, including exchange trading and surveillance, standardized disclosure, and centralized clearance and settlement through a registered clearing agency, as further described below. Additionally, binary KPI Options would be cleared through a registered clearing agency, which would serve as the central counterparty to each transaction and facilitate risk mitigation through established clearing, settlement, contract adjustment, and other standardized operational processes.

The Options Listings Procedure Plan (the "OLPP") sets forth procedures to facilitate the listing and trading of

standardized options. This plan currently describes procedures with respect to options issued by and cleared at the OCC. If the Exchange ultimately does not designate the OCC as the Clearing Corporation for the purposes of the definition set forth in proposed Rule 5.96–O, the Exchange will take steps necessary and within its authority to amend the OLPP to reflect listing procedures applicable to binary KPI Options to the extent not cleared by the OCC.

The Exchange represents it will not list for trading binary KPI options until the registered clearing agency designated as the Clearing Corporation is authorized and operationally ready to clear the options and until all applicable filings and documents of the Clearing Corporation related to securities event contracts being cleared through the Clearing Corporation are approved by the Commission or effective after review by the Commission, as applicable.

As discussed in further detail below, the Exchange intends for binary KPI options to be treated as listed standardized options. Rule 9b–1 under the Act establishes a disclosure framework for standardized options pursuant to which investors receive a disclosure document describing the terms, characteristics, and risks of the product before trading. Depending on which registered clearing agency is designated as the Clearing Corporation, the applicable Rule 9b–1 disclosure document may be based on an existing options disclosure document utilized by that clearing agency, as modified or supplemented, as appropriate, or another comparable disclosure document prepared in connection with the clearance of securities event contracts. In either case, the disclosure document would contain substantially similar information regarding the terms, characteristics, risks, settlement mechanics, and other material features of securities event contracts and would be tailored, as necessary, to address the product's unique features and distinctions from traditional listed options. The Exchange believes that disclosure through the Rule 9b–1 framework would better serve the informational needs of investors than a traditional prospectus because securities event contracts are standardized options for which the principal investor considerations relate to the contract's terms, payout structure, settlement mechanics, and trading characteristics rather than the disclosure typically provided in connection with an offering of a corporate issuer's securities.

The Exchange will not commence listing and trading of securities event

contracts until a registered clearing agency is authorized and operationally ready to clear the contracts; the applicable disclosure document under Rule 9b–1 is in place; any necessary changes relating to CAT, FINRA, OPRA, the Linkage Plan, and OLPP have been completed; and the Exchange has issued an implementation notice to Members.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,²⁵ in general, and furthers the objectives of Section 6(b)(5) of the Act,²⁶ in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. In addition, the Exchange believes that the proposed rule change is consistent with the Section 6(b)(5)²⁷ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

Binary KPI Options Are Securities and Standardized Options

As an initial matter, the Exchange's proposal is identical to the proposal made by the Cboe to list binary KPI options.²⁸ The Exchange believes that the binary KPI options proposed herein would be "securities" under the Act.²⁹ Section 3(a)(10) of the Act³⁰ defines the term "security" to include, among other instruments, "any . . . option . . . on any security . . . including any interest therein or based on the value thereof."³¹

Standardized options are generally offered based on the price of the underlying security or index and include puts, calls, and other complex instruments whose value is based on the price of the underlying security or securities. The binary KPI options will

²⁷ 15 U.S.C. 78f(b)(5).

²⁸ See Securities Exchange Act Release No. 105877 (July 10, 2026) (SR–CBOE–2026–061) ("Notice of Filing of a Proposed Rule Change to Amend its Rules to Permit the Listing of Binary Options Overlying Key Performance Indicators ("KPIs") Reported by Certain Issuers of Stock ("Binary KPI Options"))

²⁹ The Exchange also believes that binary KPI options are also "securities" under the Securities Act of 1933, as amended (the "Securities Act"). See 15 U.S.C. 77b(a)(1).

³⁰ 15 U.S.C. 78c(a)(10).

³¹ *Id.*

²³ CAT reporting requirements will apply to broker-dealers with respect to binary KPI options in the same manner as they apply to any other options the Exchange lists. The Exchange understands from FINRA CAT there will be no changes to the reporting specifications for broker-dealers to accommodate the reporting of information regarding binary KPI options to CAT.

²⁴ The Linkage Plan requires U.S. options exchanges to establish a framework for providing order protection and addressing locked and crossed markets in eligible options classes. The Linkage Plan is a national market system plan approved by the Commission pursuant to Section 11A of the Act and Rule 608 thereunder. The full text of the Linkage Plan is available at https://www.theocc.com/getcontentasset/7fc629d9-4e54-4b99-9f11-c0e4db1a2266/dfc3d011-8f63-43f6-9ed8-4b444333a1d0/options_order_protection_plan.pdf.

operate in substantially the same manner as these binary options but with a different underlying. The Exchange's proposal would expand the universe of listed options to include contracts based on proposed KPIs, including net income, net sales, net interest income, provision for credit losses, and specified expense metrics, that relate to the valuation of the issuer's stock. Such options contracts would reference financial metrics that are material to the value of the underlying security and are therefore included in the issuer's financial reports submitted to the Commission, including Form 8-K, Form 10-K and Form 10-Q filings.

In addition, the Exchange believes that trading such instruments as binary KPI options would promote a fair and orderly market and facilitate new investment and hedging opportunities on a Commission-regulated exchange. In certain cases, financial instruments may contain features similar to both options contracts and security-based swaps. As compared to characterizing an instrument as a security-based swap, which would typically be traded bilaterally in the over-the-counter ("OTC") market, categorizing an instrument as an options contract comes with a more robust set of regulatory requirements and market practices that the Exchange believes would aid in the development of such binary KPI options. To the extent there is uncertainty regarding how best to characterize these contracts under the statute, the Exchange believes that the best interpretation is the one that promotes innovation and competition while providing robust investor protection guardrails on a regulated exchange.

As discussed above, the Exchange is proposing to list and trade binary KPI options. The Exchange currently trades standardized options (puts and calls) based on the price of an underlying NMS stock. Binary KPI options would be different from these contracts in primarily two respects: (1) binary KPI options contracts would have a fixed or "binary" payout at expiration, regardless of the magnitude of the difference between the option's exercise price and the settlement value for the underlying; and (2) the price of such contracts would be based on the issuer achieving financial metrics that are material to the price of the underlying stock rather than the stock's share price itself. The Exchange does not believe that either of those differences is germane to whether this product is an options contract as defined in the Act.

The Exchange notes that options as defined in Section 3(a)(10) encompass

not only options on a security but further include options on any interest in a security or based on the value thereof. This broad statutory language is sufficient to support the trading of binary KPI options on a Commission-regulated options exchange, including contracts that reference an issuer's earnings, revenues, sales, or other financial metrics on which investors traditionally base investment decisions. Such options contracts would reference financial metrics that are material to the value of the underlying security and are therefore included in the issuer's financial reports submitted to the Commission, including Form 8-K, Form 10-K and Form 10-Q filings.

This is consistent with the Commission's own interpretation of the statute when analyzing its application to similar products offered by another national securities exchange. Consider the Commission's approval of proposals by Cboe to list and trade: (1) credit default options;³² and (2) credit default basket options.³³ As the Commission explained in its order approving credit default options for trading on Cboe, "credit default options . . . are binary options that are automatically exercised upon the occurrence of specified credit events or expire worthless."³⁴ While such products were therefore different in certain important respects from existing options contracts, "[a]fter careful analysis, the Commission [found] that credit default options are options based on the value of a security or securities"³⁵ and also "options on an interest in, or based on the value of an interest in, a security or securities." The Commission made a similar finding when it later approved Cboe's proposal to introduce credit default basket options.

All of this would also be true of the proposed binary KPI options. Similar to Cboe's credit default options and credit default basket options, the proposed binary KPI options are "binary options that are automatically exercised upon the occurrence of specified . . . events or expire worthless."³⁶ The Commission has repeatedly found that contracts with a binary payout structure may nevertheless be properly classified as options contracts under the Act and, while most options contracts have historically had a variable payment

structure, such a structure is not required by the Act, which does not specify a particular payment structure. In addition, while in some cases binary options offered by other securities exchanges have referenced the price of some underlying security or index, such binary options also encompass contracts like the ones discussed above.

The Commodity Exchange Act's ("CEA") lends further support to the classification of binary KPI options as securities. Specifically, pursuant to Section 3(a)(68) of the Act,³⁷ a "security-based swap"³⁸ is a "swap"³⁹ as defined in the Commodity Exchange Act that is based on: (1) "an index that is a narrow-based security index, including any interest therein or on the value thereof;"⁴⁰ (2) "a single security or loan, including any interest therein or on the value thereof;"⁴¹ or (3) "the occurrence, nonoccurrence, or extent of the occurrence of an event relating to a single issuer of a security or the issuers of securities in a narrow-based security index, provided that such event directly affects the financial statements, financial condition, or financial obligations of the issuer."⁴² In turn, the Commodity Exchange Act defines "swap" to include "any agreement, contract, or transaction . . . that is a put, call, cap floor, collar, or similar option of any kind that is for the purchase or sale, or based on the value, of 1 or more . . . securities."⁴³

This is also the case with the binary KPI options identified in the proposal. The KPIs selected are "material to the value" of a particular security, and payouts of binary KPI options are conditioned on those terms. Indeed, the nexus between the proposed KPIs and the value of the underlying security is, if anything, more direct than in the case of CD options. Whereas CD options reference a credit event (a contingency that may or may not affect the market value of the reference security depending on recovery rates and market conditions), binary KPI options reference the issuer's actual reported financial or operating performance and are the metrics investors consider when determining the value of a stock. Unlike an external event that merely holds the potential to trigger potential financial consequence for a security, each of the proposed KPIs (whether measured at the consolidated or segment level)

⁴³ 15 U.S.C. 78c(a)(68)(A)(ii)(III).

ultimately constitutes a material component of the issuer's financial results that itself forms the basis for investors' measurements of a company's (and its stock's) intrinsic value.

Each binary KPI option proposed herein provides a cash payout based on the disclosed KPI, some of which are directly tied to a pecuniary interest in a security, such as earnings per share and others of which are indirectly tied to the pecuniary interest of a security, such as the issuer's net revenue and income, which determine the issuer's capacity to generate returns for security holders. A stockholder's pecuniary interest in a security is not limited to contractual payment rights (such as declared dividends) but encompasses the right to benefit from the issuer's earnings capacity, as reflected in the market price of the security. Binary KPI options based on earnings metrics therefore reference a core component of the stockholder's pecuniary interest.

Classifying binary KPI options as securities options under the Act is consistent with the Commission's established regulatory framework for binary options, including investor protection objectives, and preserves the integrity of antimanipulation restrictions, insider trading prohibitions, and material nonpublic information controls. More specifically, because these contracts are tied to Commission disclosure rules and regulations and material nonpublic information ("MNPI") risks that are substantially identical to those present in traditional securities trading, aligning binary KPI options with the securities regulatory framework preserves the integrity of insider trading prohibitions and the Commission's disclosure regime. Listing binary KPI options on a registered national securities exchange subjects trading activity to SRO and Commission surveillance for, among other things, manipulative trading and insider trading, affording investors the full protections of the federal securities laws. Further, classifying binary KPI options as security options under the Act allows these contracts to be offered by the same liquidity providers that offer listed options today, all of whom are Commission-registered and regulated broker-dealers who are also subject to FINRA and exchange SRO oversight, and allows such contracts to be traded by the same retail customer base that trade binary options (and KPI-related contracts) today.

For these reasons, the Exchange believes that binary KPI options, as proposed, are appropriately classified as binary options eligible to trade on a registered national securities exchange

and as standardized options subject to the disclosure framework established by Rule 9b-1. This classification reflects the economic substance and standardized structure of the product, is consistent with the Act and the Commission's prior interpretations, and is designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, foster regulatory and clearing coordination, and protect investors and the public interest consistent with Section 6(b)(5) of the Act.⁴⁴

Proposal

The Exchange believes the proposal is consistent with Section 6(b) of the Act, in general, and furthers the objectives of Section 6(b)(5) of the Act,⁴⁵ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

Specifically, the Exchange believes the proposed rule change will remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest because it establishes a clear and transparent framework for a new category of listed options (binary KPI options) that are tied to financial and operating metrics of issuers that are publicly disclosed in required Commission reports. Currently, investors wishing to position their investment strategies around earnings announcements must rely primarily on equity options, whose pricing is affected by a wide range of variables beyond the reported financial or operating measure of interest (e.g., implied volatility, delta, time value, and general market movement). Binary KPI options allow investors to take a targeted, defined-risk position directly on a specific financial or operating measure (i.e., a KPI) for a particular reporting period. The Exchange believes this additional investment tool will protect investors and the public interest because it will promote market efficiency, enable more precise price discovery around earnings events, allow investors to hedge against potential idiosyncratic risks, and remove a gap in current national

securities exchange-listed products available to market participants.

The Exchange believes the proposed list of issuers and KPIs on which the Exchange may list binary KPI options will prevent fraudulent and manipulative acts and practices, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest. First, as noted above, the Exchange is proposing to list binary KPI contracts based on specific financial and operating metrics reported by the following issuers in their earnings-related disclosures submitted to the Commission: Apple, Inc.; Advanced Micro Devices, Inc.; Alphabet Inc.; Amazon.com, Inc.; Bank of America Corporation; Citigroup Inc.; Coinbase Global, Inc.; Ford Motor Company; Intel Corporation; JPMorgan Chase & Co.; Marathon Digital Holdings, Inc.; Meta Platforms, Inc.; Microsoft Corporation; Netflix, Inc.; NVIDIA Corporation; Palantir Technologies Inc.; SoFi Technologies, Inc.; Space Exploration Technologies Corp.; Super Micro Computer, Inc.; Target Corporation; Tesla, Inc.; and The Walt Disney Company. The Exchange believes offering investors an additional investment tool on a national securities exchange related to some of the most actively traded stocks and options will perfect the mechanism of a free and open market and benefit investors by allowing them to further refine their investment strategies, including using these options to hedge idiosyncratic, even-specific risk embedded in the specific KPIs (as further discussed below), for these actively traded companies.

The Exchange believes the proposed universe of issuers will prevent fraudulent and manipulative acts and practices, because the proposed issuers are large, well-capitalized, and widely followed issuers with highly liquid underlying securities and options markets. As noted in its filing to amend its rules to permit the listing of binary KPI options,⁴⁶ Cboe noted that during May 2026, each of the issuers exceeded \$3 billion in market capitalization and ranked among the top 200 U.S. companies by average daily options or stock volume, with the exception of Space Exploration Technologies Corp (commonly referred to as SpaceX),

⁴⁴ 15 U.S.C. 78f(b).

⁴⁵ 15 U.S.C. 78f(b).

⁴⁶ See Securities Exchange Act Release No. 105877 (July 10, 2026), 91 FR 43418 (July 15, 2026) (SR-CBOE-2026-061) ("Notice of Filing of a Proposed Rule Change to Amend its Rules to Permit the Listing of Binary Options Overlaying Key Performance Indicators ("KPIs") Reported by Certain Issuers of Stock ("Binary KPI Options")).

which had not been trading for a full calendar month but which the Exchange believes will satisfy these measures with its first month of trading results based on its volumes since it began trading.⁴⁷

Securities with high market capitalizations and liquid markets are generally less susceptible to manipulation because of the substantial capital required to artificially influence prices of those securities. The depth and breadth of trading activity for securities with significant market capitalizations, such as the stocks of the proposed issuers, make it unlikely that a single market participant would be able to exert undue influence on the price of such a stock, as large volumes of buyers and sellers are what ultimately continuously reflect the true market value of the stock. The Exchange believes the KPIs of issuers with high market capitalizations proposed to underlie binary KPI options are similarly less susceptible to manipulation because any attempt to distort a financial metric of such an issuer would require an enormous and economically impractical deployment of capital, which would likely exceed the fixed payout of a binary KPI option. Therefore, like stocks of large-cap issuers, KPIs of large-cap issuers are less susceptible to manipulation due to the structural barriers that would make manipulating KPI values operationally difficult and financially irrational (in addition to the rigorous financial oversight to which these issuers are subject, as further discussed below).

In addition to the proposed issuers being highly capitalized and having actively traded stocks and options on such stocks, the Exchange also believes the proposed limited universe of issuers for binary KPI options to those proposed will prevent fraudulent and manipulative acts and practices because each issuer is subject to periodic reporting requirements under the Act. Therefore, each of the proposed issuers must file annual reports on Form 10-K, quarterly reports on Form 10-Q, and current reports on Form 8-K with the Commission, which as discussed above disclose information the issuer believes is necessary for an investor to understand its financial condition, changes in financial condition and results of operations, which can include KPIs. Further, each issuer maintains audited financial statements prepared in accordance with U.S. Generally Accepted Accounting Principles

(“GAAP”) and is subject to executive certification requirements under the Sarbanes-Oxley Act. As a result, the settlement-determining KPI values for each eligible issuer are produced within the Commission’s supervisory jurisdiction, are publicly verifiable from a Commission-regulated source and are subject to relevant anti-fraud provisions under the Act, which the Exchange believes will reduce the potential for manipulation of the underlying KPIs as well as the applicable issuer’s stock.

Further, the Exchange believes the proposed limited universe of issuers will introduce binary KPI options in a well-developed, well-understood, and transparent Commission-regulated market environment. Each issuer is among the most widely followed, actively traded, and extensively analyzed issuer in its respective sector, with deep and liquid equity and derivatives markets and a broad institutional and retail investor base. The depth of existing market activity surrounding these issuers supports fair and orderly pricing by ensuring that binary KPI options are listed in markets where price discovery is well-established, liquidity is readily available, and participants have broad access to the information necessary to form and express informed views on KPI outcomes. The Exchange believes the continuous public scrutiny to which these issuers are subject substantially reduces the likelihood that any market participant could obtain or maintain an informational advantage sufficient to manipulate the settlement value of the binary KPI options.

The Exchange believes the proposed KPI metrics will similarly prevent fraudulent and manipulative acts and practices, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest. The Exchange’s proposal limits eligible KPIs to GAAP and non-GAAP measures and other statistics related to an issuer’s financial condition and operational results, all of which the proposed issuers disclose in their earnings-related filings (*i.e.*, Forms 8-K, 10-Q, and 10-K) submitted to the Commission. As such, the settlement values of the proposed binary KPI options are derived exclusively from information that issuers deem as material information required to be disclosed in reports submitted to the Commission. These metrics are routinely referenced and tracked in the investment community and are figures that the market recognizes as a meaningful and central indicator of issuer performance. The

Exchange believes that the inclusion of well-established metrics as eligible KPIs expands the value of binary KPI options for investors without compromising the integrity of trading processes, including the settlement process.

The proposed KPI metrics are among the most widely followed and extensively analyzed measures for the proposed issuers. Specifically, the Exchange proposes to be able to list a binary KPI option on earnings per share (prepared in accordance with GAAP) for each proposed issuer. This metric is among the most widely followed and extensively analyzed figures in public company financial disclosure and is disclosed in each issuer’s periodic Commission filings. Similarly, the Exchange proposes to list binary KPI options on revenue, prepared in accordance with the applicable GAAP, for each issuer. As is the case for earnings per share, revenue is a widely followed financial metric for publicly reporting companies and is the subject of extensive analyst coverage.

The Exchange proposes KPIs representing revenues broken out by applicable reportable segment, business unit, or product category, including cloud and artificial intelligence infrastructure revenues, streaming and geographic subscription revenues, automotive segment revenues, financial services segment revenues, consumer product category revenues, and digital asset exchange transaction and subscription revenues, among others, for several of the proposed issuers. Each such metric is a GAAP-defined figure required to be disclosed in the issuer’s periodic Commission filings. The Exchange understands these metrics enable market participants to express views on specific high-profile business lines that are extensively covered by analysts and subject to a high volume of publicly available forecasts.

The Exchange proposes KPIs for the proposed financial institution issuers that are specific to financial institution income statement presentation, including net interest income, provision for credit losses, and net income. Each such metric reflects the distinct GAAP reporting framework applicable to banking institutions and is subject to the same periodic disclosures as other proposed KPIs.

The proposed rule change also includes operating margin, gross margin, or cash flow from operations KPIs for several issuers, each of which is computed directly from GAAP financial statement line items disclosed in the issuer’s periodic Commission filings. These metrics provide market participants with insight into issuer

⁴⁷ As noted by Cboe, the ADV of SpaceX stock between June 12 and June 22, 2026 was approximately 290,009,963 shares. The market capitalization of SpaceX as of June 22, 2026 was \$2.145 trillion.

profitability and capital generation and complement other revenue and earnings figures when market participants are evaluating the value of an issuer and its stock.

The Exchange also proposes several non-financial operational KPIs that issuers disclosed in their periodic Commission filings, including relevant production volumes, network and infrastructure counts, user engagement metrics, deal counts, digital asset trading volume, and digital asset mining and holdings metrics. Each designated non-financial operational metric is closely tied to the core economic activity of the respective issuer's business and is a figure that the issuer has affirmatively chosen to disclose to the public as a key indicator of business performance. Issuers typically designate and disclose such metrics precisely because they are understood by the market to be among the most meaningful measures of their business activities. As discussed above, this is consistent with Commission guidance that an issuer should include KPIs in these report that the issuer believes an investor needs to gain understanding of its financial condition, changes in financial condition and results of operations, as such KPIs present the "pulse" of the issuer's business. The market significance of these metrics is further reflected in the extensive analyst coverage and investor attention, particularly near each reporting date. Each metric is subject to executive certification as part of the periodic report in which it appears and is widely tracked by financial data services and equity research analysts.

Overall, the Exchange believes that the proposed well-established, publicly reported metrics as eligible KPIs will expand the value of binary KPI options for investors without compromising the integrity of trading processes, including the settlement process. As a result, the Exchange believes the proposed KPIs will protect investors and the public interest as it will permit the Exchange to offer investors additional investment and hedging tools on the Exchange that investors can incorporate into their investment strategies regarding the proposed issuers.

The Exchange believes the proposed contract terms for binary KPI options will promote just and equitable principles of trade, remove impediments to and perfect a free and open market and national market system, and protect investors. As discussed above, the Exchange believes the proposed contract terms for binary KPI options are standardized option terms. Like standard option contracts

and binary index option contracts currently listed for trading on the Exchange, each proposed binary KPI option will be a call or a put, will have an underlying, exercise price, an expiration date, a settlement type, a settlement style, and a multiplier. As is the case for binary index options, each proposed binary KPI option will have an exercise settlement amount paid depending on how the settlement value of the underlying compares to the exercise price.

The proposed binary KPI options will function in a substantially similar manner to binary index options, with the proposed contract terms substantially similar to the contract terms of binary index options. The proposed definitions of binary KPI option, call binary KPI option, exercise price, and put binary KPI option are the same as those terms for binary index options (as previously approved by the Commission), differing only in reference to the underlying (KPI v. index).

The proposed definition of settlement value for binary KPI options is generally similar to the definition for binary index options (as previously approved by the Commission), with certain differences necessary to be addressed due to the different nature of a KPI as the underlying. The Exchange believes the proposed \$1 exercise settlement amount is reasonable given the retail nature of the proposed binary KPI options and merely adds specificity to the Rules for binary KPI options. The Exchange notes binary KPI options differ from standardized index options (which are also cash-settled) in that the exercise settlement amount is \$1.00 rather than the cash difference amount between the settlement value of the index and the strike price of an option. Since the \$1.00 exercise settlement amount will be paid out to the option holder if the criteria of the binary KPI option have been met, binary KPI options utilize a fixed exercise settlement amount.

The Exchange proposes new Rule 5.96–O to list the specific binary KPI contracts with the KPI criteria for each option contract. Such KPI criteria are established as the set KPI events that will be used to determine an option contract should be exercised by comparing the strike price of the binary KPI option to the KPI value. The Exchange believes these proposed contracts (including the issuers and KPIs) are consistent with the Act for the reasons set forth above.

The Exchange believes the proposed expirations for binary KPI options will remove impediments to and perfect the mechanism of a free and open market and a national market system because

they will align with the reporting periods for which the proposed issuers disclose earnings results and submit corresponding reports to the Commission. These expirations will, therefore, permit investors to incorporate binary KPI options into their investment strategies that correspond to issuers' earnings results. Further, as discussed above, the Exchange believes aligning expirations with Commission-regulated sources will reduce the potential for manipulation of the underlying KPIs, which will ultimately protect investors and the public interest.

The proposed rule establishes a strike regime for binary KPI options similar to that for traditional options. As is the case for traditional options and binary index options, the proposed rule change establishes permissible strike intervals, the amounts of which increase as the value of the strike increases. Additionally, the Exchange proposes to list initial and additional series pursuant to a similar framework as traditional equity options. The differences in the proposed strike regime compared to that of standard equity and index options are necessary and appropriate to reflect the static nature of KPIs (unlike underlying equities and indexes, the values of which change throughout the trading day) and the timing of their disclosure. As noted above, the Exchange intends to list binary KPI options aligned with the cadence of the KPI announcements as their expiration cycle (generally quarterly). The Exchange intends to list for trading binary KPI options with expirations for the then-current reporting period (e.g., third quarter) as well as the following period (e.g., fourth quarter) prior to the expiration of the binary KPI options for the then-current reporting period.

As the Exchange does for standard options, the Exchange lists strikes (subject to its Rules) based on relevant market information—including the then-current value of the underlying—and customer demand. As described above, the Exchange intends to do the same for binary KPI options by listing strikes relative to the then current value of the underlying KPI. The Exchange believes it is consistent with just and equitable principles of trade to permit the Exchange to list strikes for a new expiration based on the most recently disclosed KPI value, which may not be for the immediately preceding reporting period, and then add strikes based on the disclosed KPI for the immediately preceding reporting period (which would be the settlement value for binary KPI options that expire in the prior

reporting period). This will enable the Exchange to respond to changes in market conditions in the same manner it is able to do today to respond to changes in values of (and market conditions related to) other underlyings. The Exchange believes this flexibility is appropriate for binary KPI options because the value of a KPI changes only when an issuer discloses that KPI, which generally happens every three months, unlike other underlyings that change every trading day. While this proposed strike listing regime differs from that of other options, the concept is the same, which is to permit the Exchange to list strikes reflective of the then-current value of the underlying. It is possible the changed value of an underlying KPI may be more sudden and pronounced than changes in the value of an underlying equity or index (which are susceptible to sudden value changes); however, like the listing rules for equity and index options, the proposed rules permit the Exchange to list strikes to reflect potentially significant changes in the value of the underlying.

The Exchange believes the proposed scaling of strike prices is reasonable and will protect investors, as it will permit the Exchange to list strike values in amounts similar to current strike values for other options. As noted above, values of certain KPIs may be large (e.g., in the billions). The proposed scaling will permit the Exchange, for example, to list a strike of 27 rather than 27,000,000,000, which the Exchange believes will be simpler for investors to understand (as it will be made clear that 27 will reflect billions in this example) and consistent with current strike levels. The proposed scaling also permits the strike prices for binary KPI options to fit within current system capabilities regarding strike price values. The Exchange believes scaling rather than modifying its systems (and potentially causing investors to modify their systems) will benefit investors by allowing them to trade binary KPI options in the same manner as they trade other options today.

The Exchange believes the proposed strike intervals promote just and equitable principles of trade because it will permit the Exchange to list commercially meaningful strikes that will permit investors to tailor their trading strategies with precision. The Exchange acknowledges the proposed strike intervals are smaller than those in current Rules for other types of options. However, the Exchange believes the precision is appropriate and necessary given the nature of KPIs and the proposed options. The purpose of

binary KPI options is to permit investors to take discrete and precise positions on KPIs. Therefore, the Exchange needs the ability to list strikes with the precision necessary to permit investors to take these positions. For example, earnings per share is generally a relatively small number (under \$10). While strike intervals for other options are limited to \$0.50 intervals, that would not be meaningful in the context of binary KPI options when investors are looking to take positions for a specific KPI, which will be measured in penny intervals. Therefore, the Exchange believes smaller strike intervals will benefit investors because they will allow the Exchange to list binary KPI options that will enable investors to use these options in the precise nature for which they are intended and provide sufficient flexibility for the Exchange to list series to respond to changes in market conditions and customer demand, while other rules will place bounds around the strikes the Exchange may list.

Further, as discussed above, the proposed strike intervals are consistent with current rules for other options, which provide for larger strike intervals as the value of strike prices increases. Given the scaling factor for larger KPI values, while it may appear the proposed rule change will permit smaller strike intervals for larger KPI values, that may be true on a nominal basis but is not the case if the actual value of the strike intervals is considered. The corresponding actual value of the strike interval for a strike price that was subject to a larger scale value is higher than the actual value of the strike interval for a strike price that was subject to a smaller scale value. As a result, the permissible strike intervals for strike prices representing higher KPI values are actually larger than the permissible strike intervals for strike prices representing lower KPI values. This is consistent with general premise underlying current strike intervals that larger strike intervals apply to larger strike values and, therefore, the Exchange believes the proposed rule change will promote just and equitable principles of trade.

The Exchange believes this proposed rule change clearly describes the proposed terms of binary KPI options, such as with respect to expirations (including the Exchange's announcement of the specific expiration date after binary KPI options series for that expiration are listed) and exercise prices (including the scaling factor, negative values, and potential changes to that scaling factor for a binary KPI option class) for all investors. As discussed above, these terms and

changes to such terms will be described in Exchange notices, technical specifications (including binary KPI option reference data files), and contract specifications (all of which are posted on the Exchange's public website and thus available to all investors). Exchange ATP Holders and retail brokerage firms are highly sophisticated investors that intake information regarding other Exchange-listed options (including changes) in the same manner that the Exchange plans to release this information for binary KPI options. Therefore, the Exchange expects retail customers to have access to all relevant information regarding the terms of binary KPI options they choose to trade, including changes to expiration dates and exercise price values as announced by the Exchange.

The proposed rule change specifies a multiplier of one for binary KPI options rather than require the Exchange to designate a multiplier of at least one as the rules for binary index options do. This proposed multiplier is consistent with the definition of contract multiplier for binary index options (as that requires a multiplier of at least one) and merely adds specificity to the Rules.

The Exchange believes proposed Rule 5.101-O, which establishes Regular Trading Hours for binary KPI options is consistent with the Act, protects investors, and prevents fraudulent and manipulative practices. The Exchange believes the proposed structure ensures that trading in binary KPI options ceases before the earnings announcement that determines settlement. The distinction between A.M.- and P.M.-settled contracts mirrors the settlement terms already applicable to binary index options, as well as other Exchange products.

The Exchange believes proposed Rule 6.71-O(d), which addresses bid and offer conventions for binary options with multipliers other than 100, will provide clarity and consistency in market quotations relative to the notional size of the option, promotes investor understanding of the cost and value of binary KPI option contracts. Therefore, the Exchange believes the proposed rule change is consistent with just and equitable principles of trade because it creates a pricing structure that reflects the notional value of an option based on its multiplier.

The Exchange believes proposed Rule 5.101-O(e), which provides that for binary KPI options, the System initiates the opening rotation at 9:30 a.m., removes impediments to a free and open market by applying the same proven opening process to binary KPI options that governs other listed options classes

on the Exchange. Additionally, unlike equity options, for which the underlying opens for trading and can trigger the opening rotation, KPIs do not trade, so triggering the opening rotation based on a set time is reasonable for binary KPI options.

The Exchange believes excluding binary KPI options from the obvious error provisions in Rule 6.85–O is consistent with the Act and promotes just and equitable principles of trade because the standard obvious error framework, which evaluates whether an execution price deviates from a “theoretical value” by a prescribed amount, is incompatible with the structure of binary KPI options. Binary KPI options have no continuously observable theoretical value (unlike equity and index options) prior to the date of the earnings-related disclosure. Rather, their exercise settlement amount is fixed at either a pre-specified dollar amount or zero, depending entirely on whether the reported KPI satisfies the exercise condition, which itself is based on a single, publicly verifiable metric, disclosed in Commission filings. Applying an obvious error framework premised on theoretical value calculations to a product with a binary, fixed payout would be technically inapplicable and could produce unjust or arbitrary results. Moreover, because settlement of binary KPI options is determined by issuer-reported metrics disclosed through Commission filings (*i.e.*, figures produced pursuant to established accounting standards, subject to independent audit, and certified under the Sarbanes-Oxley Act), the settlement process is itself governed by a comprehensive external regulatory framework. The Exchange believes that establishing any alternative dispute mechanism in this context would be not only unnecessary, but potentially disruptive to market integrity, as it may introduce an element of post-hoc discretion into a settlement process that is expressly designed to be objective, verifiable, and rule-bound.

The Exchange believes the proposed amendments related to position limits for binary KPI options are consistent with the Act because they establish a rational position limit framework for binary KPI options that protects against manipulation while facilitating legitimate trading activity in a novel product. The Exchange believes that setting the position limit for binary KPI options as the same as the applicable position limit for the stock of the issuer, with 100 binary KPI option contracts equaling one standard option contract, is appropriate. As proposed, binary KPI options with a multiplier of one will

count toward applicable limits on a proportional basis relative to standard equity options on the issuer’s stock, which carry a multiplier of 100.

The Exchange further believes the proposal is reasonable given the nature of binary KPI options and their relationship to the underlying issuer. Because binary KPI options have a fixed maximum notional value and settle on an all-or-nothing basis based on a KPI of the issuer rather than the price of the issuer’s stock as with a standard equity option, the Exchange believes the proposed position limits appropriately reflects the distinct structure of these contracts and limits the potential for any single market participant to exert undue influence over binary KPI option settlement. With respect to binary KPI options, the economic risk of a position is binary, in that the contract either settles in-the-money at \$1.00 or out-of-the money at \$0.00. Additionally, with respect to binary KPI options, the maximum notional exposure per contract is fixed in advance; it cannot exceed \$1.00 multiplied by the contract multiplier. Moreover, unlike stock prices or index values, binary KPI option positions would not influence a company’s financial or operational outcomes; the number of option contracts outstanding or trading volume, for instance, has no effect on revenue or operational metrics.

Further, the Exchange’s proposal to provide that positions in binary KPI options on the same KPI with different expiration dates and positions in binary KPI options for the same issuer with different underlying KPIs are not aggregated reflects the distinct structure of binary KPI options. Each binary KPI option expiration corresponds to a separate event tied to a specific issuer reporting period. Thus, the Exchange believes aggregating positions across different expiration dates would not accurately reflect the risk profile of these positions and would impose an unnecessary burden on market participants seeking exposure to company KPI events across different reporting periods. In determining that position limits should not be aggregated across all binary KPI options referencing a single issuer, the Exchange analyzed the degree to which KPIs of a given issuer are correlated with one another.

Similarly, the Exchange believes it is reasonable to provide that binary KPI options are not aggregated with non-binary options contracts overlying the stock of the issuer. Because binary KPI options and equity options overlying the same issuer have different risk profile (*i.e.*, binary KPI options settle based on a KPI of the issuer rather than its stock

price), the Exchange believes it would be inappropriate and misleading to require aggregation of these positions for purposes of position limits. As noted above, binary KPI options are based solely on whether a single, specified-issuer KPI meets a discrete threshold at a defined future date, and their value reflects the market’s probability assessment of that singular outcome. Standard equity options, on the other hand, reflect a broad array of factors bearing on the price of the underlying security, including macroeconomic conditions and sector dynamics, of which any individual KPI is only one component. Because the two products are not priced off of a common reference and do not represent economically equivalent or fungible exposures, aggregating positions across them would not meaningfully advance the prevention of manipulative practices with respect to the underlying security.

The Exchange further notes that this proposed non-aggregation framework is not unprecedented. Rule 5.86–O(b) provides that positions in binary return derivatives shall not be aggregated with options contracts on the same or similar underlying security. The Exchange believes that there was no need to aggregate positions across the two product types to prevent manipulative practices involving the underlying.

Finally, the Exchange believes the amendments to the hedge exemption provision in proposed Rule 5.102–O(d) is consistent with the Act because it facilitates legitimate hedging activity in binary KPI options. Because a market participant simultaneously holding a short put and short call position in binary KPI options has taken opposing sides of the potential binary outcome (*i.e.*, the short call is at risk if the KPI is met and the short put is at risk if the KPI is not met), the Exchange believes such a position represents a defined, bounded risk profile that does not present the same potential for manipulation or market disruption that position limits are designed to prevent. The Exchange therefore believes the hedge exemption as proposed will encourage market-making activity and liquidity provision in binary KPI options while protecting investors and the public.

The Exchange also believes the proposed adoption of Rule 5.103–O consistent with the Act. By establishing tailored reporting requirements for binary KPI options, the Exchange will be able to monitor ATP Holder positions effectively and detect any accumulation of positions that may approach or exceed applicable limits, to the benefit of investors. The Exchange believes it is

consistent with just and equitable principles of trade for 100 binary KPI option contracts to equal one standard option contract for purposes of determining whether the report in proposed Rule 5.103–O is required given the size of binary KPI contracts. As discussed above, proposed binary KPI options have a multiplier of one, while standard option contracts have a multiplier of 100. Therefore, the notional value of a binary KPI option is significantly less than the notional value of standard option contracts. For example, 200 contracts with a value of \$1.00 with a multiplier of 100 would equate to \$20,000 notional value, while 200 binary KPI option contracts with a value of \$1.00 (which is the fixed maximum value of a binary KPI option contract) with a multiplier of one would equate to \$200 notional value. Counting 100 binary KPI contracts as one standard option contract for purposes of this report effectively calibrates the reporting requirement so that investors are required to submit the report for an economically equivalent number of contracts, which promotes just and equitable principles of trade.

The Exchange believes the proposal will provide the Exchange and regulators with visibility into large position concentrations in binary KPI options, preserving the ability to identify unusual activity and respond to any unforeseen concerns, while calibrating the threshold to a metric that is meaningful for this contract given its smaller multiplier relative to that of standard equity options. The Exchange believes this reporting framework, coupled with the position limits amendments, provides a fully adequate regulatory framework for these instruments.

Further, as noted above, the Exchange believes it has an adequate surveillance program in place to detect potentially manipulative trading in binary KPI options. The Exchange notes that manipulation of the reported KPI would constitute securities fraud and expose the issuer to liability under federal securities law, separate and apart from any exchange-related violation.

The Exchange believes the proposed binary KPI options will serve as a vehicle to hedge idiosyncratic, event-specific risk embedded in the specific KPIs. Standard equity options are calibrated to the price of the underlying security and capture a full spectrum of factors or risks which may affect issue value, such as macroeconomic conditions or sector dynamics. Because equity option pricing incorporates this full spectrum, a participant seeking to hedge exposure to a single, discrete KPI

outcome cannot do so precisely using standard equity options. Because settlement of a binary KPI option is determined solely by whether a specified-issuer KPI meets a defined threshold, the contract effectively isolates certain individual risks an investor may seek to manage. For example, consider an investor holding a long-term position in a particular issuer stock, who believes the issuer's quarterly revenue will fall short of expectations (for reasons unrelated to the issuer's long-term prospects). The investor may utilize the binary KPI option to hedge precisely against the near-term risk without disruption to the underlying equity position. This targeted hedging utility represents a distinct and additive function relative to existing listed products, which the Exchange believes will serve the interests of investors and provide an efficient mechanism for managing event-specific, KPI-driven risk.

The Exchange believes the proposed rule change will facilitate transactions in securities, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest, because it will provide investors with a securities exchange-listed investment choice for these instruments, offering price transparency and the regulatory protections of a national securities exchange. The Exchange believes the proposed rule change will permit investors to manage their risk exposures and carry out their investment objectives on a securities exchange with more flexibility and broader applicability. The Exchange also believes the proposed rule change will promote competition, as it will meet demands of investors that currently may trade products structured in substantively the same manner as the proposed binary KPI options in other markets (as further discussed below). Binary KPI options would provide investors with a straightforward means of expressing a directional view on key financial and operating metrics. The Exchange further believes the proposed rule change is consistent with the protection of investors and the public interest, as binary KPI options would be subject to the Exchange's existing rules governing the listing and trading of options. The Exchange believes expanding the universe of binary options will benefit investors, particularly retail investors and other investors who prefer simplicity, as a complementary offering to current exchange-traded options.

The proposed rule change will permit the Exchange to list binary KPI options on a national securities exchange as alternatives to products that are structured in substantially the same manner as binary options currently available in the OTC market and on other platforms. The Exchange understands investors have traded binary options similar to the proposed binary options in OTC markets for many years but may prefer to trade such options in a listed environment to receive the benefits of trading listing options. These benefits include: (1) enhanced efficiency in initiating and closing out positions; (2) increased market transparency; and (3) heightened contra-party creditworthiness. The Exchange believes the proposed rule change may encourage liquidity to shift from the OTC market onto the Exchange, which the Exchange believes would increase market transparency as well as enhance the process of price discovery conducted on the Exchange through increased order flow. The proposed rule change is intended to provide a market for binary KPI options as a standardized product without the credit risk of an individual issuer. By providing a listed and standardized market for more classes of binary options, the Exchange seeks to attract investors who desire the simplicity of a binary option with the certainty and safeguards of a regulated and standardized marketplace. Additionally, unlike an OTC binary option, counterparty credit risk for Exchange-listed binary KPI options is significantly reduced through the issuance and guarantee of the contracts by a registered clearing agency. Further, as an exchange-traded option, binary options will have the advantage of liquidity provided by Market-Makers, which the Exchange believes may lead to tighter spreads than those in the OTC market. The Exchange also believes that standardization will enable more interested parties to become market participants.

In addition to the OTC market, various market platforms that are not registered as national securities exchanges currently offer products structured in substantively the same manner as binary options that the Exchange may list pursuant to current Rules and as proposed. These platforms offer binary option products overlying securities indexes, which may be settled at varying points of the day (not just at the open and close of the trading day). However, as these venues are not national securities exchanges, they do not offer investors the benefits of

centralized liquidity, market transparency, or securities regulations intended to protect investors. The Exchange believes listing competitive products on a national securities exchange would create a centralized and standardized marketplace for these products, which promotes price discovery and transparency, within an established regulatory framework designed to afford investors in securities with important protections. In other words, the Exchange believes its proposal offers a more transparent platform than the OTC market or other market platforms offer. It would contribute to leveling the playing field with these alternative markets and provide investors with safeguards associated with Commission and SRO oversight of the trading activity in these exchange-listed binary KPI options.

Ultimately, the Exchange believes the proposed rule change will provide investors with greater trading tools and opportunities and flexibility, resulting in investors having additional means to carry out their investment objectives and manage their risk exposures through products listed and traded on a national securities exchange. The Exchange believes the proposed rule change will offer market participants a simplified, transparent, and limited risk investment choice overlying securities and securities indexes, which may be more aligned with their specific timing needs and investment and hedging strategies and risk tolerances. The Exchange believes it benefits the investing public to continue to enhance its listed product offerings to respond to continuously changing needs of investors and to a continuously changing competitive environment.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act, because binary KPI options will be available to all market participants who wish to trade such options on the same terms and in the same manner (including with respect to the payout terms and amount). All market participants will be subject to the same rules applicable to binary KPI options, as described in this proposed rule change. Except as set forth in the proposed rule change, binary KPI

options will trade in the same manner as other options, including binary index options, on the Exchange.

The Exchange does not believe the proposed rule change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act, because other options exchanges may propose similar products. Additionally, as noted above, substantively similar products to binary KPI options, as proposed, are available in the OTC market and various other markets.

The Exchange notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues who offer similar products. The Exchange believes the proposed rule change will provide investors with a comparable alternative to the OTC market and other venues. The Exchange believes it may be a more attractive alternative to the OTC market and these other venues, as market participants will benefit from being able to trade these options in an exchange environment, which provides, among other things: (1) enhanced efficiency in initiating and closing out positions; (2) increased market transparency; and (3) heightened counterparty creditworthiness. As a result, the Exchange believes that the proposed rule change may relieve any burden on, or otherwise promote, competition, as it will allow the Exchange to offer a securities exchange-listed alternative to the products currently available in these other markets.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission will:

- A. by order approve or disapprove such proposed rule change, or
- B. institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NYSEARCA-2026-93 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-NYSEARCA-2026-93. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NYSEARCA-2026-93 and should be submitted on or before October 9, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁴⁸

Sherry R. Haywood,
Assistant Secretary.

⁴⁸ 17 CFR 200.30-3(a)(12).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106367; File No. SR–NYSEAMER–2026–82]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing of a Proposed Rule Change To Permit the Listing of Binary KPI Options

September 15, 2026.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 (“Act”),² and Rule 19b–4 thereunder,³ notice is hereby given that on September 3, 2026, NYSE American LLC (“NYSE American” or the “Exchange”) filed with the Securities and Exchange Commission (“Commission”) a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its Rules to permit the listing of binary options overlying key performance indicators (“KPIs”) reported by certain issuers of stock (“binary KPI options”). The proposed rule change is available on the Exchange’s website at www.nyse.com and at the principal office of the Exchange.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Rules to permit the listing of binary options overlying KPIs reported by

certain issuers of stock (“binary KPI options”).⁴

Binary options are based on the same framework as traditional, standardized options traded on the Exchange, except the payout of a binary option is an amount contingent upon the occurrence of the option being in- or at-the-money rather than the degree to which the option is in-the-money. As a result, payout at expiration of a binary option is an all-or-nothing occurrence.

Under current Exchange Rules, the Exchange may list binary return derivatives (“ByRDS”) and binary options on broad-based indexes.⁵ The Exchange proposes to amend its Rules to permit the listing of binary KPI options. Binary KPI options are European-style, cash-settled options contracts listed on an underlying KPI of an issuer whose exercise settlement value is determined not by the market price of the issuer’s stock, but by whether a specific financial or operating metric reported by the issuer in an earnings-related filing submitted to the U.S. Securities and Exchange Commission (the “Commission”) meets or exceeds a pre-specified strike level.

First, similar to ByRDS and Broad-Based Index Binary Options, the Exchange proposes to adopt Section 20 (Binary KPI Options) to describe binary KPI options. The Rules in proposed Section 20 apply only to binary KPI options. All other Rules apply to the trading of binary KPI options, except as otherwise provided or the context otherwise requires.

Specifically, the Exchange proposes to adopt 900KPI (Applicability, Definitions). Like other standardized options, binary KPI options have standardized terms that are established by the Exchange. Standardized terms for binary KPI options include the exercise criteria that is the condition or criteria of a binary KPI option, the exercise settlement amount (*i.e.*, payout amount), strike prices, expiration dates, settlement type as A.M.-settlement or P.M.-settlement, the settlement style (as European), and the requirements used to determine if the KPI condition or

criteria of a binary KPI option has been met (the “payout determination requirement”). The Exchange proposes to establish these terms in new Rule 900KPI and additional provisions in proposed Rule 900KPI(b), as described below.

The Exchange proposes to define a “binary KPI option” in new Rule 900KPI(b) as a cash-settled option contract listed on an underlying KPI of an issuer with an exercise settlement amount that is established at the creation of the option and with a settlement value that is determined by whether a specific KPI disclosed by the issuer in an earnings-related filing submitted to the Commission meets or exceeds its exercise price. Binary KPI options are paid out if the reported value of the applicable KPI (1) equals or is greater than (as the payout determination requirement) the exercise price for a call binary KPI option or (2) is less than (as the payout determination requirement) the exercise price for a put binary KPI option. The Exchange also proposes to provide that unless the context dictates otherwise, the terms underlying security, equity, or index, or any variations of these terms, in the Rules mean KPI for purposes of binary KPI options.

The Exchange proposes to define a “call binary KPI option” as an option contract that returns an exercise settlement amount if the settlement value of the underlying KPI is at or above the exercise price at expiration (*i.e.*, in- or at-the-money).⁶

The term “Clearing Corporation” would mean the registered clearing agency designated by the Exchange to clear binary KPI options.⁷

The Exchange proposes to define “exercise price” (also referred to as “strike price”) as the value⁸ to which the settlement value of the underlying KPI is compared to the exercise settlement amount. For binary KPI options, the exercise price is the exercise threshold of an option contract that establishes a number, value, or

⁶ See proposed Rule 900KPI(b)(2).

⁷ See proposed Rule 900KPI(b)(3). The definition of Clearing Corporation reflects that the Exchange may designate the Options Clearing Corporation (“OCC”) or another registered clearing agency to clear binary KPI options. References in this filing to the Clearing Corporation therefore are intended to be clearing agency-neutral. The proposed definition does not alter the requirement that clearing and settlement occur through a registered clearing agency subject to the applicable provisions of the Act and the rules and oversight applicable to that clearing agency.

⁸ See proposed Rule 900KPI(b)(4). The value of an exercise price is measured in the applicable units of the KPI. For example, some KPIs are measured in U.S. dollars while others may be measured in percentages or numbers.

¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b–4.

⁴ The Exchange’s proposal is similar to recent proposals filed by Cboe Exchange, Inc. (“Cboe”) and MEMX LLC (“MEMX”). See Securities Exchange Act Release No. 105877 (July 10, 2026), 91 FR 43418 (July 15, 2026) (SR–CBOE–2026–061) (“Notice of Filing of a Proposed Rule Change to Amend its Rules to Permit the Listing of Binary Options Overlying Key Performance Indicators (“KPIs”) Reported by Certain Issuers of Stock (“Binary KPI Options”)”) and Securities Exchange Act Release No. 106182 (August 24, 2026) (SR–MEMX–2026–25).

⁵ See NYSE American Rules Section 17 (Binary Return Derivativessm) and Section 18 (Broad-Based Index Binary Optionssm).

measure that is compared against the price of the settlement value of the underlying index or the KPI to determine if the cash payout amount (*i.e.*, the exercise settlement amount) will be paid out. In other words, binary options will have a threshold number as the exercise price that will be used to determine if the exercise criteria of the binary option has been met and the option will be exercised (and if holders will receive the cash payout amount). For binary KPI options, the exercise threshold will be a number that reflects or is compared to the underlying KPI of the binary option.

The Exchange proposes to define the term KPI (or “key performance indicator”) as a key financial or operating metric disclosed by an issuer in its earnings-related filings submitted to the Commission (*i.e.*, Form 8-K, Form 10-Q, or Form 10-K, as applicable).⁹

The Exchange proposes to define “put binary KPI option” as an option contract

that returns an exercise settlement amount if the settlement value of the underlying KPI is below the exercise price at expiration (*i.e.*, in-the-money).¹⁰

The Exchange proposes to define “settlement value” as the value of the underlying KPI that is used to determine whether a binary KPI option is in-, at-, or out-of-the-money.¹¹ The proposed definition specifies that the “settlement value” is the value of the applicable KPI as disclosed in the applicable issuer’s earnings-related filing submitted to, the Commission on applicable expiration date (for both A.M.-settled and P.M.-settled binary KPI options). The Exchange designates the applicable KPI and the relevant reporting period (for example, a calendar quarter) at the time of listing a binary KPI option. Proposed paragraph (b) of the settlement value definition provides if the applicable KPI is not reported or otherwise unavailable on the expiration date (and will not be reported), settlement (including any payout of the exercise settlement

amount) will occur in accordance with the Rules of the Clearing Corporation.

Additionally, proposed paragraph (c) of the settlement value definition states if an applicable KPI is restated after the expiration date and settlement of a binary KPI option, the settlement value (and the exercise settlement amount) of the binary KPI option does not change. In other words, the value of the applicable KPI as reported by the issuer on the applicable expiration date is final, and the amount paid (or not paid) at settlement will not change, regardless of whether it is later restated by the issuer.

The Exchange proposes to adopt Rule 901KPI(a) (Designation of Binary KPI Option Contracts) to identify the binary KPI options that may be listed for trading on the Exchange. Pursuant to proposed Rule 901KPI(a), the Exchange may from time to time approve for listing and trading on the Exchange any of the following binary KPI options contracts for the following issuers:

Company	KPI (each financial metric is measured in \$ unless otherwise specified)
Apple, Inc	Earnings per share: diluted. Total net sales. Net sales by category: iPhone. Net sales by category: Services. Net sales by reportable segment: Americas. Net sales by reportable segment: Greater China
Advanced Micro Devices, Inc	GAAP Diluted earnings per share. GAAP Revenue. Net Revenue: Data Center Segment. Net Revenue: Client and Gaming Segment. GAAP Operating Margin (%)
Alphabet Inc	Diluted net income per share. Revenues. YouTube ads Revenues. Google Cloud Revenues
Amazon.com, Inc	Diluted earnings per share. Total Net sales. AWS: Net sales. North America: Net sales. International: Net sales. Net Sales: Advertising services.
Bank of America Corporation	Diluted earnings per share. Total Revenue, net of interest expense. Net Interest Income. Provision for credit losses. Net Income.
Citigroup Inc	Diluted earnings per share. Total Revenue, net of interest expense. Net Interest Income. Total Provision for credit losses. Net Income.
Coinbase Global, Inc	Net income per share—Diluted. Total Revenue. Transaction Revenue. Total Trading Volume. Subscription and Services Revenue.

⁹ See proposed Rule 900KPI(b)(6).

¹⁰ See proposed Rule 900KPI(b)(7).

¹¹ See proposed Rule 900KPI(b)(8).

Company	KPI (each financial metric is measured in \$ unless otherwise specified)
Ford Motor Company	GAAP Earnings per share—Diluted. Total Revenues. Ford Pro Segment: Revenue. Ford Model e Segment: Revenue. Ford Blue Segment: Revenue.
Intel Corporation	GAAP Earnings per share attributable to Intel—diluted. Net revenue. Revenue: Client Computing Group (CCG). Revenue: Data Center and AI (DCAI). Revenue: Intel Foundry. GAAP operating margin (%).
JPMorgan Chase & Co	Earnings per share—diluted. Net revenue—reported. Net Interest Income. Provision for credit losses. Net Income.
Marathon Digital Holdings, Inc	Earnings (Net loss) per share of common stock—diluted. Revenues. Number of Blocks Won (# Bitcoin (BTC)). Energized Hashrate (EH) (# EH/s). Total Bitcoin Holdings (# BTC). BTC Produced (# BTC). BTC Purchased (# BTC).
Meta Platforms, Inc	Earnings per share: Diluted. Revenue. Family Daily Active People (DAP) (#). Revenue: Advertising. Operating Margin (%).
Microsoft Corporation	Diluted Earnings per Share. Revenue. Intelligent Cloud: Revenue. Microsoft Cloud revenue. More Personal Computing: Revenue.
Netflix, Inc	Earnings per share: Diluted. Revenues. United States and Canada (UCAN): Revenue. Europe, Middle East, and Africa (EMEA): Revenue Operating Margin (%).
NVIDIA Corporation	GAAP Diluted earnings per share. Revenue. Data Center Revenue. Edge Computing Revenue. Automotive Revenue.
Palantir Technologies Inc	Earnings per share attributable to common stockholders, diluted. Revenue. Net Income. Closed Deals of at Least \$1 Million (#).
Robinhood Markets, Inc	Net income attributable to Robinhood common stockholders: Diluted. Total net revenues. Funded Customers (#). Average Revenue Per User (“ARPU”). Robinhood Gold Subscribers (#).
SoFi Technologies, Inc	Earnings per share attributable to common stockholders—diluted. Total net revenue. Total net revenue—Technology Platform. Total net revenue—Financial Services. Total net revenue—Lending.
Space Exploration Technologies Corp	Earnings per share: Diluted. Total Revenues.
Super Micro Computer, Inc	Net income per common share: Diluted. Net sales. Gross Margin (%). Cash flow used in operations. Net Income.
Target Corporation	Diluted earnings per share. Net sales. Food & Beverage Net sales. Apparel & Accessories Net sales. Operating income: Rate (%).

Company	KPI (each financial metric is measured in \$ unless otherwise specified)
Tesla, Inc	Net Income per share of common stocks attributable to common stockholders: diluted. Total Revenues. Total Automotive Revenue. Model 3/Y Production (#). Supercharger Connectors (#). Free Cash Flow.
The Walt Disney Company	Diluted earnings per share. Revenues. Entertainment Subscription Video On Demand (SVOD) Operating Income. Revenues: Experiences. Segment operating income: Sports.

The Exchange proposes to add Rule 901KPI(b) to clarify that binary KPI options are a separate class from other options overlying the stock of the issuer and are a separate class from other binary KPI options with differently underlying KPIs for the same issuer. The Exchange believes this is reasonable given that an individual KPI is the specific underlying of binary KPI options, and generally options with different underlyings (e.g., different underlying security or index) are different option classes.

Next, the Exchange proposes to adopt Rule 902KPI (Terms of Binary KPI Option Contracts) to describe the permissible terms of binary KPI option series. Proposed Rule 902KPI provides that binary KPI options listed and traded on the Exchange are designated as to expiration date, exercise price, settlement type, settlement style, exercise settlement amount, contract multiplier, and underlying KPI. After approving a particular binary KPI option class for listing and trading on the Exchange, the Exchange from time to time may open for trading series of options in that binary KPI option class.

Proposed Rule 902KPI(a) states binary KPI options have European-style settlement, which is consistent with the rules regarding binary index options, as noted above. Proposed Rule 902KPI(a) further provides that the Exchange may designate the settlement type for binary KPI options as A.M.-settled or P.M.-settled. Binary KPI options for issuers¹² that disclose their earnings results before the open of the Core Trading Session on a given trading day are designated as A.M.-settled binary KPI options, and binary KPI options for issuers that disclose their earnings results after the close of the Core Trading Session on a given trading day are designated as P.M.-settled binary

KPI options. The Exchange notes that the proposed concepts of A.M.-settlement and P.M.-settlement for binary KPI options differ compared to traditional options, for which “P.M.-settled” generally means that the expiration of an option so designated will settle to the closing price of the underlying security or index value and “A.M.-settled” generally means that the expiration of an option so designated will settle to the opening price of the underlying. While different than how these terms apply to standard and binary index options, the Exchange believes the proposed description of A.M.-settlement and P.M.-settlement appropriately reflect the earnings disclosure practices of issuers. Additionally, while the timing of the event that will determine whether the Exchange designates a binary KPI option as A.M.-settled or P.M.-settled is different than that for traditional options and binary index options, the trading hours on expiration dates for each of A.M.-settled and P.M.-settled binary KPI options are consistent with those of A.M.-settled and P.M.-settled index options (traditional and binary) today.

Proposed Rule 902KPI(b) describes permissible expirations for binary KPI options. Specifically, the proposed rule change will permit the Exchange to list series that expire on the date the issuer announces its earnings results for the applicable reporting period (such as calendar quarter). The expiration date for a binary KPI option will be the date on which an issuer discloses the applicable KPI in its earnings results (for example, the date on which it issues an earnings results press release) for the specified reporting period (with the specific expiration date to be finalized when an issuer announces the date on which it will disclose its earnings results for that reporting period).¹³ If

that date is a Tuesday, Wednesday, Thursday, or Friday and the Exchange is not open for business on that date, the expiration date will be the first business day immediately prior to that day. If that date is a Monday and the Exchange is not open for business on that date, the expiration date will be the first business day immediately following that Monday. The disclosed KPIs relate to a specific reporting period (such as a calendar quarter), which KPIs an issuer publicly announces on a date following the end of that reporting period.

While an expiration date for a binary KPI option will be a specific date, as is the case for traditional options and binary index options, the Exchange’s proposed designation of expiration dates for binary KPI options will differ to reflect standard issuer disclosure practices. In some instances, an issuer might not establish the specific date on which it will announce its earnings results for a reporting period until weeks prior to the release date. Consequently, unlike standard equity and index options that have an exact expiration date when strikes are first listed, a binary KPI option will be listed for trading with a placeholder expiration date if the date the KPI information will be released by the issuer is not publicly known. If a placeholder expiration date is required, it will be set as the first trading day that is three months following the date of the prior quarterly release date for a KPI (for KPIs announced quarterly) and six months following the date of the prior semiannual release date for a KPI (for KPIs announced semiannually, if the Commission approves proposed rules that would permit such reporting). Once

which the applicable issuer establishes as the date it will announce earnings results for that quarter. The Exchange will issue a Trader Update when the specific expiration date for a binary KPI option is finalized. Additionally, the Exchange will maintain a reference data file for each issuer KPI on which the Exchange lists binary KPI options (as will be described in the Exchange’s technical specifications available on its public website), and that reference data file will be updated with the specific expiration date for a binary KPI option once known.

¹² The Exchange determines whether an issuer discloses its earnings results before or after the close of the Core Trading Session on a given trading day based on publicly available information regarding the issuer’s disclosure practice.

¹³ For example, for a binary KPI option series, the Exchange may designate the reporting period for a series to be the fourth quarter of 2026. The expiration date for that series would be the date on

the KPI issuer announces the release date of the KPI information, the expiration date will be updated as the finalized expiration date of the option contract. Ultimately, however, the expiration date for a binary KPI option is an issuer's earnings release date at the time the series is listed (even if the exact date is unknown) until expiration.

The Exchange may designate binary KPI option series to expire up to 12 months from the time they are listed and may list up to two expirations at one time for a binary KPI option (per KPI per issuer). The Exchange may open for trading a series of binary KPI options at least one business week prior to the expiration date of a binary KPI option. The proposed permissible expirations for binary KPI options are similar to current Rules. First, the proposed rule change permits the Exchange to list binary KPI options to expire up to 12 months from the time they are listed. Current rules regarding binary index options permit these expirations, in addition to expirations out more than 12 months up to 36 months from the time they are listed.¹⁴ The proposed rule change also limits the Exchange to list up to two expirations at one time for binary KPI options. Therefore, the proposed scope of permissible expirations for binary KPI options is narrower than that permitted for binary index options under current Rules (as previously approved by the Commission).

The proposal to list expirations at least one business week prior to the expiration date of binary KPI option (as well as the proposed language regarding shifting an expiration date to the immediately business day before or after an expiration date that falls on a day the Exchange is not open for business) is substantially similar to current Exchange rules applicable to binary equity options,¹⁵ as well as the rules of another options exchange applicable to short term equity options series.¹⁶ The Exchange believes it is appropriate to permit listing of binary KPI options that expire up to 12 months from the time they are listed to accommodate different issuer reporting periods (including semiannual reporting if the Commission approves recently proposed rules to permit such reporting), as well as to permit the Exchange to list expirations for consecutive calendar quarter periods or for a calendar quarter and annual reporting period at the same time. As discussed above, issuers disclose KPIs

in their periodic reports submitted to the Commission.

Proposed Rule 902KPI(c) describes the automatic exercise feature of binary KPI options. Specifically, the proposed rule states that binary KPI options will be automatically exercised at expiration if the settlement value of the underlying KPI is equal to or greater than the exercise price of a call binary KPI option or less than the exercise price in the case of a put binary KPI option.

Proposed Rule 902KPI(d) describes the permissible exercise prices (or strike prices) the Exchange may designate for series of binary KPI options. Proposed Rule 902KPI(d)(1) describes how the value of exercise prices of binary KPI options are measured. Specifically, the exercise price of each binary KPI option series will be fixed at an amount equal to a value of the underlying KPI. Because the value of certain KPIs may be very large (e.g., billions of dollars), the Exchange proposes that the exercise price value of the underlying KPI will be divided by a scaling factor based on the value of the KPI in the issuer's most recent earnings-related disclosure as of the time a binary KPI option class is listed) as follows:

- if the most recently disclosed KPI value is greater than or equal to one trillion, the exercise price equals that value divided by one trillion (e.g., for such KPIs, an exercise price of 27.00 is equivalent to a KPI value of 27,000,000,000,000.00);
- if the most recently disclosed KPI value is greater than or equal to one billion but less than one trillion, the exercise price equals that value divided by one billion (e.g., for such KPIs, an exercise price of 112.00 is equivalent to a KPI value of 112,000,000,000.00);
- if the most recently disclosed KPI value is greater than or equal to one million but less than one billion, the exercise price equals that value divided by one million (e.g., for such KPIs, an exercise price of 900.00 is equivalent to a KPI value of 900,000,000.00);
- if the most recently disclosed KPI value is greater than or equal to one thousand but less than one million, the exercise price equals that value divided by one thousand (e.g., for such KPIs, an exercise price of 42.00 is equivalent to a KPI value of 42,000.00); and
- if the most recently disclosed KPI value is less than one thousand, the exercise price equals that value and is not divided by a scaling factor (e.g., for such KPIs, an exercise price of 774.00 is equivalent to a KPI value of 774.00).¹⁷

The Exchange will apply a different scaling factor to newly listed binary KPI option series for a new expiration only after the value of the KPI in the issuer's earnings-related disclosures has a value in a different scaling tier for four consecutive reporting periods or if the Exchange deems it necessary in the interests of a fair and orderly market. Application of a different scaling factor will not affect the exercise prices of any series of the binary KPI options previously opened. For example, if the Exchange begins listing a new class of binary KPI options and the most recently disclosed KPI value for the issuer at the time of that listing was for the third quarter of 2026 and was \$892,000, the exercise prices for that class of binary KPI options will be scaled by 1,000, and thus exercise prices of 895, 995, and 1005, would represent \$895,000, \$995,000, and \$1,005,000, respectively. If the issuer discloses a KPI value of \$1,020,000 in its fourth quarter 2026 earnings disclosure, the Exchange will continue to list exercise prices scaled by 1,000. If the issuer then discloses KPI values of \$1,112,000, \$1,237,000, and \$1,064,000 for the first, second, and third quarters, respectively, of 2027, the Exchange will begin scaling the exercise prices by 1,000,000 for the fourth quarter 2027 expirations (or for the first quarter 2028 expirations if the Exchange had already listed fourth quarter 2027 expirations prior to the disclosure of the third quarter 2027 KPI value). The Exchange believes this will permit consistency for listing scaled KPI values while allowing the Exchange to update strike prices to reflect long-term changes to an issuer's KPI values.

The Exchange will announce via Trader Update if the scaling factor applied to a binary KPI options changes (for example, the KPIs will be scaled in billions rather than in millions). Additionally, the Exchange will update this information in the Exchange's technical specifications regarding binary KPI options and reference data file that describes the terms of binary KPI options, both of which will be available on the Exchange's website (customers receive notifications of such updates). This is consistent with how the Exchange provides information regarding product information (including updates) for all options the Exchange lists for trading.

It is possible for a KPI to have a negative value, such as earnings per share (which is equivalent to a loss per share). Proposed Rule 902KPI(d)(1)(B) provides the Exchange may list binary KPI options series with exercise prices representing negative KPI values. For these series, the exercise price will

¹⁴ See Rule 901BIN(c).

¹⁵ See Rule 903ByRDS(b).

¹⁶ See Cboe Rule 4.5(d).

¹⁷ When applying the scaling factor, the Exchange will not round the scaled KPI value and instead will truncate the value so the scaled strike price value fits within standard strike listing format.

equal the absolute value of the KPI and will be scaled as described above. For example, if an issuer's earnings per share in the last reporting period was $-\$3.52$ (and thus was a loss per share), a binary KPI option for such issuer with a strike of 3.58 will reflect an expected loss of $\$3.58$ per share. The Exchange will incorporate into symbology for binary KPI options whether the value of the strike price is positive or negative, including if the Exchange lists binary KPI option series with both positive and negative strike prices. Whether a symbol reflects a positive or negative value will be available on contract specifications as well as the reference data file for the specific binary KPI option on the Exchange's public website.

Proposed Rule 902KPI(d)(2) provides the minimum interval between strike prices for binary KPI options series is:

- 0.01 where the strike price is less than 10;
- 0.10 where the strike price is 10 or greater but less than 100;
- 1.00 where the strike price is 100 or greater but less than 1,000;
- 10.00 where the strike price is 1,000 or greater but less than 10,000; and
- 100.00 where the strike price is 10,000 or greater.

As discussed above, while KPI values above 1,000 are generally scaled, there may be circumstances in which the Exchange lists strikes above 1,000 or even 10,000 given the Exchange's proposal to maintain a lower scale level until a KPI value is consistently above a certain level (e.g., above one billion for four consecutive quarters). This may occur when a KPI value is near the top of a scaling range; for continuity, the Exchange will continue listing strike prices using the lower scaling factor and not change to a higher scaling factor until the KPI value is regularly within that higher range. Suppose a KPI value is 995,000,000; in this case, strike prices will be scaled by 1,000,000. Thus, the Exchange may list binary KPI options above and below 995 (995,000,000 divided by 1,000,000). However, there is potential that the KPI may increase to above 1,000,000,000. As proposed, the Exchange may list strike prices, for example, of 1,000 (representing 1,000,000,000) and above, for expirations until the KPI value is above 1,000,000,000 for four consecutive reporting periods. To reduce confusion, the Exchange would not scale strike prices using different scaling factors within a single expiration (and would not change the scale until the KPI value is consistently at the higher level). Therefore, it is possible the Exchange may list strikes greater than 1,000. Similarly, while strikes above 10,000

may be rare, given the Exchange proposes to maintain a lower scale level until a KPI value is consistently above a certain level (e.g., above one billion for four consecutive quarters, as proposed), depending on market factors and demand, it is possible (although unlikely) the Exchange may determine it is appropriate to list strikes above 10,000 if market factors or expectations signify a significant increase of the KPI value. The proposed strike intervals accommodate the listing of binary KPI options in these circumstances before the Exchange shifts the strike prices for an issuer's KPI to a different scaling level.

The proposed strike intervals are generally consistent with current Exchange Rules for other options, which provide for larger strike intervals as the values of strike prices increase. Given the scaling factor for larger KPI values, it may appear the proposed rule change will permit smaller strike intervals for larger KPI values if those intervals are considered solely on a nominal basis. However, that is not the case if the actual values of the strike intervals are considered. The corresponding actual value of the strike interval for a strike price that was subject to a larger scale value is higher than the actual value of the strike interval for a strike price that was subject to a smaller scale value. For example, suppose a strike price of 950 represents $\$950$ million. The proposed rule change would permit strike intervals of $\$1.00$. However, that $\$1.00$ corresponds to $\$1,000,000$. In other words, if the Exchange listed strikes of 950, 951, and 952, the difference in values of those strikes are $\$1$ million, not $\$1$ (i.e., the strikes represent values of $\$950,000,000$, $\$951,000,000$, and $\$952,000,000$). Similarly, suppose a strike price of 3 represents $\$3,000,000,000$. The proposed rule change would permit strike intervals of $\$0.01$. However, that corresponds to $\$10,000,000$. If the Exchange listed strikes of 3.00, 3.01, and 3.02, the difference in values of those strikes are $\$10,000,000$, not $\$0.01$ (i.e., the strikes represent values of $\$3,000,000,000$, $\$3,010,000,000$, and $\$3,020,000,000$, respectively). As a result, the permissible strike intervals for strike prices representing values in the billions are actually larger than the permissible strike intervals for strike prices representing values in the millions. This is consistent with the general premise underlying current strike intervals that larger strike intervals apply to larger strike values.

Proposed Rule 902KPI(e) addresses bid and offer conventions for binary options with multipliers other than 100.

It will provide clarity and consistency in market quotations relative to the notional size of the option, promotes investor understanding of the cost and value of binary KPI option contracts. Therefore, the Exchange believes the proposed rule change is consistent with just and equitable principles of trade because it creates a pricing structure that reflects the notional value of an option based on its multiplier.

Proposed Rule 902KPI(f) describes the initial series of a binary KPI option the Exchange may open for trading. Specifically, the Exchange may open for trading one or more binary KPI option series with a fixed KPI value as the strike price, with approximately the same number of strike prices being opened above and below the at-the-money KPI value (i.e., the value of the KPI in the issuer's most recent earnings-related disclosure) at the time the binary KPI options are opened. The Exchange will list strike prices for binary KPI option series that are reasonably close to the at-the-money KPI value at the time of listing. A strike is "reasonably close" to the at-the-money KPI value if (1) for KPIs less than or equal to 10, it is no more than 100% above or below the at-the-money KPI value; and (2) for KPIs greater than 10, it is no more than 30% above or below the at-the-money KPI value. The Exchange may also open binary KPI option series that are more than 30% above or below the at-the-money KPI value (if the KPI is greater than 10) provided demonstrated customer interest exists for such series, as expressed by institutional, corporate or individual customers or their brokers.

The Exchange may add new series of binary KPI options series when the Exchange deems it necessary to maintain a fair and orderly market or to meet customer demand. To the extent the Exchange lists binary KPI options series for an expiration before then-currently listed binary KPI options expire (and thus before the applicable issuer has disclosed the KPI value for the reporting period immediately preceding the reporting period for these newly listed options), the Exchange may list additional series after the KPI value for the immediately preceding reporting period is disclosed using that disclosed KPI value as the at-the-money KPI. For example, before expiration of a binary KPI options series set to expire on the date of an issuer's disclosure of its third quarter earnings results, the Exchange lists series of that binary KPI option to expire on the date of an issuer's disclosure of its fourth quarter earnings results (using the KPI from the second quarter earnings results as the at-the-money KPI value). After the issuer

discloses its third quarter earnings results, including the applicable KPI, the Exchange may list additional series for the fourth quarter binary KPI options using the third quarter KPI result as the at-the-money KPI value. Any additional strike prices the Exchange lists will be reasonably close (as defined above) to the at-the-money KPI value at the time of listing.

Continuing the above example, suppose the Exchange lists binary KPI options for the fourth quarter before the binary KPI options for the third quarter have expired. As proposed, the Exchange would list strikes above and below the at-the-money strike, which at the time of listing would be the settlement value KPI from the issuer's second quarter earnings results disclosure, as that is the most recently available KPI. If the KPI for the option was net sales, and the second quarter value was \$45.093 billion, the at-the-money strike would be 45.10, and the Exchange could list strikes within 50% of that value, and additional series based on customer demand or market changes. After the Exchange lists those series, the issuer announces its third quarter earnings results, including net sales of \$57.241 billion. As proposed, after that announcement, the Exchange may list additional strikes within 50% of \$57.24 to reflect the change in value of the underlying (as well as additional series based on customer demand or market changes).

This proposed framework for listing and adding series is similar to the framework in current Rules for listing and adding series of equity options. While the proposed strike intervals are narrower than these rules, the permissible ranges are also narrower. The Exchange acknowledges the proposed framework would still permit the Exchange to list a large number of strikes per KPI per expiration. However, the Exchange intends to apply its standard strike listing practices to binary KPI options. Specifically, the Exchange generally lists strikes at wider intervals as they move farther away from the at-the-money value, while listing more granular intervals for strikes closer to the at-the-money value. The Exchange also generally delists granular strikes that are deep out-of-the-money if the Exchange determines they are sufficiently covered by wider strike intervals that are close in value.

These proposed provisions regarding the listing of binary KPI option series are similar to provisions regarding permissible series of other options. The Exchange believes it is reasonable to list binary KPI options for a new reporting period prior to the expiration of then-

listed binary KPI options for the immediately preceding reporting period (e.g., listing binary KPI options for the fourth quarter before expiration of binary KPI options for the third quarter), and thus before the settlement value of the applicable KPI is known for the immediately preceding reporting period for these options, to permit investors to roll positions from one expiration to the next. As proposed, once the settlement value for the immediately preceding reporting period is known (the third quarter in this example), the Exchange may list additional series of the binary KPI options that reflect that KPI value. This is consistent with current practice if there is a change (including a substantial change) in the price of underlying security or value of an underlying index. For example, Rule 903(d) provides that the Exchange may open additional series of a short-term option series overlying a security when the market price of the underlying security moves substantially from the exercise price or prices of the series already opened, subject to the "reasonably close" parameters set forth in that rule. Disclosure of, as an example, the third quarter KPI value after the fourth quarter binary KPI options series were listed based on the second quarter KPI value (if the third quarter KPI value differs from the second quarter KPI value) is similar to the move in the price of an underlying security, which may result in the Exchange listing additional series based on the updated price of the underlying security. Similarly consistent with current practice for other options (as set forth in Rule 903, Commentary .10(c), for example), opening of binary KPI options based on this later-disclosed KPI value will not affect any other series of options of the same binary KPI options class previously opened.

Proposed Rule 902KPI(h) provides that the contract multiplier for each class of binary KPI options is one.

The Exchange proposes to add new Rule 903KPI (Determination of Settlement Value) to establish that binary KPI options that are "at-the-money," "in-the-money," or "out-of-the-money" are a function of the settlement value of the underlying KPI in relation to the type of binary KPI option (*i.e.*, put or call) and the exercise price. As described above, the settlement value for a binary KPI option is the value of the KPI as disclosed in the applicable issuer's earnings related filing. While the timing of an announcement of a KPI value factor into the determination of whether the Exchange lists a binary KPI option as A.M.-settled or P.M.-settled, the Exchange will source the settlement

value from the filing the issuers submits to the Commission. Generally, companies issue press releases that contain earnings results and near contemporaneously submit a Form 8-K to the Commission with the press release as an exhibit. Therefore, it is unlikely the value of the KPI in the Commission filing will differ from the value in the initial announcement; however, the value in the Commission filing will be the ultimate settlement value.

Proposed Rule 904KPI (Adjustment) provides that binary KPI options are subject to adjustment only in accordance with and to the extent specified in the Rules of the Clearing Corporation. When any such adjustment has been determined, the Exchange will announce this adjustment via Trader Update, which will become effective as of the time specified in that announcement.

As described above, binary KPI options would be cleared by the Clearing Corporation, which would serve as the central counterparty to each transaction and facilitate standardized clearing, settlement, and contract administration processes pursuant to its Rules. Consistent with this centralized clearing framework, proposed Rule 904KPI provides that binary KPI options would be subject to adjustment only in accordance with and to the extent specified in the Rules of the Clearing Corporation. When any such adjustment has been determined, the Exchange will announce this adjustment via Trader Update, which will become effective at the time specified in that announcement. The Exchange believes that limiting contract adjustments to those provided under the Rules of the Clearing Corporation provides a clear and transparent framework under which any adjustments to binary KPI options would be administered. A registered clearing agency designated to clear binary KPI options would be subject to Commission oversight and would possess expertise in the clearance and settlement of financial products. Because binary KPI options represent a novel product type, the Exchange anticipates that the Clearing Corporation would develop adjustment procedures designed to address the unique characteristics of these contracts and the types of events that may require adjustment. To the extent the Clearing Corporation adopts new adjustment procedures for binary KPI options, those procedures would be subject to the applicable regulatory process, including review and approval by the Commission, as applicable, before the

Exchange commences trading in the product.

Next, the Exchange proposes to Rule 905KPI to provide that binary KPI options, may be traded on the Exchange from 9:30 a.m. to 4:00 p.m.¹⁸ Further, the last day of trading for P.M.-settled binary KPI options is the day of expiration, and the last day of trading for A.M.-settled binary KPI options is the trading day prior to expiration.

The Exchange recognizes it is possible, although unusual and unlikely, that KPI information may become available at unexpected times. The proposed rules address the impact on trading and expiration that such disclosure may have. First, the proposed rule change provides if the Exchange confirms an issuer discloses the KPI prior to the expiration date, trading in the applicable binary KPI options series will cease, and the expiration date for the option accelerates to a date on or shortly after the date of that disclosure in accordance with the Rules of the OCC.¹⁹ This may occur if, for example, the applicable issuer releases the KPI information in advance of the expiration date of the option. If the issuer releases KPI information after the expiration date, which may be the case if, for example, the issuer's earnings are delayed, trading in the option will not be impacted and will cease as of the expiration date. While the expiration date will not change, expiration processing of such options will be delayed until the KPI information becomes available, in accordance with the rules of the Clearing Corporation. Additionally, the proposed rule change provides if there is an unofficial disclosure of the KPI prior to the expiration date, the Exchange may determine to halt (and resume) trading in the applicable binary KPI options series in accordance with Rule 953NY. In certain circumstances, the expiration date for the option may accelerate in accordance with the Clearing Corporation rules; if this occurs, trading in the binary KPI will cease. This proposed provision addresses the unlikely event that KPI information becomes available through sources other than the issuer in advance of the expiration date. If the Exchange determines the KPI information reported from the unofficial source is unreliable,

trading in the binary KPI option may resume until it expires.

The Exchange believes proposed Rule 905KPI(f), which provides that for binary KPI options, the System initiates the opening rotation at 9:30 a.m., is consistent with the opening auction framework already applicable to other index options listed on the Exchange and ensures that binary KPI options open for trading in an orderly and transparent manner.

The Exchange proposes to amend Rule 960NY to establish the minimum increment for bids and offers on orders for binary KPI options, which may not be less than \$0.01.

The Exchange proposes to adopt Rule 906KPI (Position Limits for Binary KPI Options) to set forth position limit requirements for binary KPI options. The Exchange proposes to adopt Rule 906KPI(a) to provide that in determining compliance with Rule 904 (Position Limits), the position limit for binary KPI options is the same as the applicable position limit for the stock of the issuer per expiration and 100 binary KPI option contracts equal one standard option contract.

Per proposed rule 906KPI(b), positions in binary KPI options on the same KPI that have different expiration dates are not aggregated, and positions in binary KPI options for the same issuer with different underlying KPIs are not aggregated. In addition, the Exchange proposes to adopt Rule 906KPI(c) to provide that Binary KPI options are not aggregated with non-binary options contracts overlying the stock of the issuer. Finally, per Rule 906KPI(d), with respect to binary KPI options, a binary KPI option short position coupled with a binary KPI option short call position, regardless of the KPI option strike, shall be exempt from the established position limits proscribed in Rule 904.

The Exchange also proposes to adopt Rule 907KPI (Reporting of Positions) Positions in binary KPI options shall be reported pursuant to Rule 904, except, in computing reportable binary KPI options thereunder, aggregation of positions shall be in accordance with Rule 906KPI. The proposed Rule 907KPI further provides that for purposes of this report, 100 binary KPI option contracts equal one standard option contract. The Exchange believes this is reasonable given that binary KPI options have a multiplier of 1 while standard equity option contracts have a multiplier of 100.

Except as otherwise described above, all binary KPI options will be listed and traded on the Exchange in a substantially similar manner as standard

equity and index options and binary index options are permitted to be listed and traded under current Rules. The Rules that apply to the listing and trading of non-binary options on the Exchange, including those related to customer accounts, margin requirements and trading halt procedures,²⁰ which are designed to prevent fraudulent and manipulative acts and practices, will apply to the listing and trading of binary KPI options. The Exchange has analyzed its capacity and represents that it believes the Exchange has the necessary systems capacity to handle any potential additional message traffic associated with the listing of binary KPI options.

The Exchange will support electronic trading, floor trading, and complex orders. Trading in Flexible Execution ("FLEX") options will not be offered. The Exchange may determine to support particular order types, order instructions, or times-in-force on a class-by-class basis. Consistent with current practice, if the Exchange modifies the applicability of any functionality or order instructions for binary KPI options, it will notify ATP Holders via Trader Update.

The Exchange will send quotation and transaction price information for binary KPI options to The Options Price Reporting Authority ("OPRA") in the same manner it sends this information to OPRA for all other options the Exchange lists. Additionally, the Exchange understands from OPRA that it will disseminate information regarding binary KPI options in the same manner it does for all other options the Exchange lists. The Exchange intends to follow OPRA's standard capacity monitoring process for binary KPI options (in accordance with OPRA instructions), which includes submission of quarterly capacity projections (the Exchange will include its projected binary KPI option volume in the applicable submission). Further, the Exchange understands from OPRA that no technical changes are required to accommodate the reporting to OPRA of quotation and transaction information regarding binary KPI options (the Exchange represents, if later required by OPRA, it will adhere to any new technical requirements OPRA deems necessary to accommodate binary KPI options).²¹

²⁰ Binary KPI options will not be tied to the trading state of the underlying issuer stock and thus, trading in binary KPI options will not be affected by halts in the underlying issuer stock. The binary KPI options will halt in accordance with Rule 953NY.

²¹ The Exchange understands OPRA may need to update how it disseminates open interest information for binary KPI options, as its current

¹⁸ Unless otherwise specified, all times in this proposal are Eastern Time.

¹⁹ The proposed acceleration of binary KPI options is similar to the existing acceleration process for equity options when the underlying security of such options has been converted entirely to cash. See OCC Rule 807.

The Exchange does not believe American Trade Permit (“ATP”) Holders will experience any capacity issues as a result of this proposal and represents that it will monitor the trading volume associated with binary options and the effect (if any) of binary options on market fragmentation and the capacity of the Exchange’s automated system.

The Exchange represents that the same surveillance procedures applicable to all other options currently listed and traded on the Exchange will apply to binary KPI options, and that it has the necessary systems capacity to support the option series. The Exchange’s existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior and other improper trading. In addition, the Exchange has a Regulatory Services Agreement with the Financial Industry Regulatory Authority, Inc. (“FINRA”). Pursuant to a multi-party 17d–2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillances.²² The Exchange is also a member of the Intermarket Surveillance Group (“ISG”) under the ISG Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. Further, the Exchange will implement any new surveillance procedures it deems necessary to effectively monitor the trading of binary KPI options.

The Exchange will report any information regarding binary KPI options required to be reported to the Consolidated Audit Trail (“CAT”) in the same manner it reports this information to CAT for all other options the Exchange lists.²³ The Exchange

represents, if later required by FINRA CAT, it will adhere to any new technical requirements FINRA CAT deems necessary to accommodate binary KPI options).

Pursuant to the Options Order Protection and Locked/Crossed Market Plan (“Linkage Plan”),²⁴ participant exchanges to the Linkage Plan established a framework to provide order protection. The Linkage Plan (and Exchange Rules 990NY through 993NY regarding intermarket linkage) applies during all trading sessions during which multiply listed options trade. Rule 993NY addresses order routing away from the Exchange to promote compliance with the Linkage Plan. If the proposed binary KPI options become multiply listed options, Users may designate an order for routing (or not available for routing), and the Exchange System is designed to, at all times, prevent trade-throughs and avoid displaying locked/crossed markets in accordance with the Linkage Plan (and Exchange Rules 990NY through 993NY regarding intermarket linkage).

Upon launch, binary KPI options will clear through the Clearing Corporation as that term is defined in proposed Rule 900KPI(b). In doing so, the proposal would bring these securities products within the established regulatory infrastructure applicable to listed options, including exchange trading and surveillance, standardized disclosure, and centralized clearance and settlement through a registered clearing agency, as further described below. Additionally, binary KPI options would be cleared through a registered clearing agency, which would serve as the central counterparty to each transaction and facilitate risk mitigation through established clearing, settlement, contract adjustment, and other standardized operational processes.

The Options Listings Procedure Plan (the “OLPP”) sets forth procedures to facilitate the listing and trading of standardized options. This plan currently describes procedures with respect to options issued by and cleared at the OCC. If the Exchange ultimately does not designate the OCC as the

Clearing Corporation for the purposes of the definition set forth in proposed Rule 900KPI(b), the Exchange will take steps necessary and within its authority to amend the OLPP to reflect listing procedures applicable to binary KPI options to the extent not cleared by the OCC.

The Exchange represents it will not list for trading binary KPI options until the registered clearing agency designated as the Clearing Corporation is authorized and operationally ready to clear the contracts and until all applicable filings and documents of the Clearing Corporation related to binary KPI options being cleared through the Clearing Corporation are approved by the Commission or effective after review by the Commission, as applicable.

As discussed in further detail below, the Exchange intends for binary KPI options to be treated as listed standardized options. Rule 9b–1 under the Act establishes a disclosure framework for standardized options pursuant to which investors receive a disclosure document describing the terms, characteristics, and risks of the product before trading. Depending on which registered clearing agency is designated as the Clearing Corporation, the applicable Rule 9b–1 disclosure document may be based on an existing options disclosure document utilized by that clearing agency, as modified or supplemented, as appropriate, or another comparable disclosure document prepared in connection with the clearance of binary KPI options. In either case, the disclosure document would contain substantially similar information regarding the terms, characteristics, risks, settlement mechanics, and other material features of binary KPI options and would be tailored, as necessary, to address the product’s unique features and distinctions from traditional listed options. The Exchange believes that disclosure through the Rule 9b–1 framework would better serve the informational needs of investors than a traditional prospectus because binary KPI options are standardized options for which the principal investor considerations relate to the contract’s terms, payout structure, settlement mechanics, and trading characteristics rather than the disclosure typically provided in connection with an offering of a corporate issuer’s securities.

The Exchange will not commence listing and trading of binary KPI options until a registered clearing agency is authorized and operationally ready to clear the contracts; the applicable disclosure document under Rule 9b–1 is in place; any necessary changes relating

process incorporates information from OCC and references in this filing are clearing agency-neutral.

²² Section 19(g)(1) of the Act, among other things, requires every self-regulatory organization (“SRO”) registered as a national securities exchange or national securities association to comply with the Act, the rules and regulations thereunder, and the SRO’s own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. See 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d–2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO. Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

²³ CAT reporting requirements will apply to broker-dealers with respect to binary KPI options in the same manner as they apply to any other options the Exchange lists. The Exchange understands from FINRA CAT there will be no changes to the

reporting specifications for broker-dealers to accommodate the reporting of information regarding binary KPI options to CAT.

²⁴ The Linkage Plan requires U.S. options exchanges to establish a framework for providing order protection and addressing locked and crossed markets in eligible options classes. The Linkage Plan is a national market system plan approved by the Commission pursuant to Section 11A of the Act and Rule 608 thereunder. The full text of the Linkage Plan is available at https://www.theocc.com/getcontentasset/7fc629d9-4e54-4b99-9f11-c0e4db1a2266/dfc3d011-8f63-43f6-9ed8-4b444333a1d0/options_order_protection_plan.pdf.

to CAT, FINRA, OPRA, the Linkage Plan, and OLPP have been completed; and the Exchange has issued an implementation notice to Members.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,²⁵ in general, and furthers the objectives of Section 6(b)(5) of the Act,²⁶ in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. In addition, the Exchange believes that the proposed rule change is consistent with the Section 6(b)(5)²⁷ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

Binary KPI Options Are Securities and Standardized Options

As an initial matter, the Exchange's proposal is identical to the proposal made by the Cboe to list binary KPI options.²⁸ The Exchange believes that the binary KPI options proposed herein would be "securities" under the Act.²⁹ Section 3(a)(10) of the Act³⁰ defines the term "security" to include, among other instruments, "any . . . option . . . on any security . . . including any interest therein or based on the value thereof."³¹

Standardized options are generally offered based on the price of the underlying security or index and include puts, calls, and other complex instruments whose value is based on the price of the underlying security or securities. The binary KPI options will operate in substantially the same manner as these binary options but with a different underlying. The Exchange's proposal would expand the universe of listed options to include contracts based

on proposed KPIs, including net income, net sales, net interest income, provision for credit losses, and specified expense metrics, that relate to the valuation of the issuer's stock. Such options contracts would reference financial metrics that are material to the value of the underlying security and are therefore included in the issuer's financial reports submitted to the Commission, including Form 8-K, Form 10-K and Form 10-Q filings.

In addition, the Exchange believes that trading such instruments as binary KPI options would promote a fair and orderly market and facilitate new investment and hedging opportunities on a Commission-regulated exchange. In certain cases, financial instruments may contain features similar to both options contracts and security-based swaps. As compared to characterizing an instrument as a security-based swap, which would typically be traded bilaterally in the over-the-counter ("OTC") market, categorizing an instrument as an options contract comes with a more robust set of regulatory requirements and market practices that the Exchange believes would aid in the development of such binary KPI options. To the extent there is uncertainty regarding how best to characterize these contracts under the statute, the Exchange believes that the best interpretation is the one that promotes innovation and competition while providing robust investor protection guardrails on a regulated exchange.

As discussed above, the Exchange is proposing to list and trade binary KPI options. The Exchange currently trades standardized options (puts and calls) based on the price of an underlying NMS stock. Binary KPI options would be different from these contracts in primarily two respects: (1) binary KPI options contracts would have a fixed or "binary" payout at expiration, regardless of the magnitude of the difference between the option's exercise price and the settlement value for the underlying; and (2) the price of such contracts would be based on the issuer achieving financial metrics that are material to the price of the underlying stock rather than the stock's share price itself. The Exchange does not believe that either of those differences is germane to whether this product is an options contract as defined in the Act.

The Exchange notes that options as defined in Section 3(a)(10) encompass not only options on a security but further include options on any interest in a security or based on the value thereof. This broad statutory language is sufficient to support the trading of

binary KPI options on a Commission-regulated options exchange, including contracts that reference an issuer's earnings, revenues, sales, or other financial metrics on which investors traditionally base investment decisions. Such options contracts would reference financial metrics that are material to the value of the underlying security and are therefore included in the issuer's financial reports submitted to the Commission, including Form 8-K, Form 10-K and Form 10-Q filings.

This is consistent with the Commission's own interpretation of the statute when analyzing its application to similar products offered by another national securities exchange. Consider the Commission's approval of proposals by Cboe to list and trade: (1) credit default options;³² and (2) credit default basket options.³³ As the Commission explained in its order approving credit default options for trading on Cboe, "credit default options . . . are binary options that are automatically exercised upon the occurrence of specified credit events or expire worthless."³⁴ While such products were therefore different in certain important respects from existing options contracts, "[a]fter careful analysis, the Commission [found] that credit default options are options based on the value of a security or securities"³⁵ and also "options on an interest in, or based on the value of an interest in, a security or securities." The Commission made a similar finding when it later approved Cboe's proposal to introduce credit default basket options.

All of this would also be true of the proposed binary KPI options. Similar to Cboe's credit default options and credit default basket options, the proposed binary KPI options are "binary options that are automatically exercised upon the occurrence of specified . . . events or expire worthless."³⁶ The Commission has repeatedly found that contracts with a binary payout structure may nevertheless be properly classified as options contracts under the Act and, while most options contracts have historically had a variable payment structure, such a structure is not required by the Act, which does not specify a particular payment structure. In addition, while in some cases binary options offered by other securities

³³ See Securities Exchange Act Release No. 56275 (August 17, 2007), 72 FR 47097 (August 22, 2007) (SR-CBOE-2007-26).

³⁴ See *supra* note 34.

³⁵ *Id.*

³⁶ *Id.*

exchanges have referenced the price of some underlying security or index, such binary options also encompass contracts like the ones discussed above.

The Commodity Exchange Act's ("CEA") lends further support to the classification of binary KPI options as securities. Specifically, pursuant to Section 3(a)(68) of the Act,³⁷ a "security-based swap"³⁸ is a "swap"³⁹ as defined in the Commodity Exchange Act that is based on: (1) "an index that is a narrow-based security index, including any interest therein or on the value thereof;"⁴⁰ (2) "a single security or loan, including any interest therein or on the value thereof;"⁴¹ or (3) "the occurrence, nonoccurrence, or extent of the occurrence of an event relating to a single issuer of a security or the issuers of securities in a narrow-based security index, provided that such event directly affects the financial statements, financial condition, or financial obligations of the issuer."⁴² In turn, the Commodity Exchange Act defines "swap" to include "any agreement, contract, or transaction . . . that is a put, call, cap floor, collar, or similar option of any kind that is for the purchase or sale, or based on the value, of 1 or more . . . securities."⁴³

This is also the case with the binary KPI options identified in the proposal. The KPIs selected are "material to the value" of a particular security, and payouts of binary KPI options are conditioned on those terms. Indeed, the nexus between the proposed KPIs and the value of the underlying security is, if anything, more direct than in the case of CD options. Whereas CD options reference a credit event (a contingency that may or may not affect the market value of the reference security depending on recovery rates and market conditions), binary KPI options reference the issuer's actual reported financial or operating performance and are the metrics investors consider when determining the value of a stock. Unlike an external event that merely holds the potential to trigger potential financial consequence for a security, each of the proposed KPIs (whether measured at the consolidated or segment level) ultimately constitutes a material component of the issuer's financial results that itself forms the basis for investors' measurements of a company's (and its stock's) intrinsic value.

Each binary KPI option proposed herein provides a cash payout based on the disclosed KPI, some of which are directly tied to a pecuniary interest in a security, such as earnings per share and others of which are indirectly tied to the pecuniary interest of a security, such as the issuer's net revenue and income, which determine the issuer's capacity to generate returns for security holders. A stockholder's pecuniary interest in a security is not limited to contractual payment rights (such as declared dividends) but encompasses the right to benefit from the issuer's earnings capacity, as reflected in the market price of the security. Binary KPI options based on earnings metrics therefore reference a core component of the stockholder's pecuniary interest.

Classifying binary KPI options as securities options under the Act is consistent with the Commission's established regulatory framework for binary options, including investor protection objectives, and preserves the integrity of antimanipulation restrictions, insider trading prohibitions, and material nonpublic information controls. More specifically, because these contracts are tied to Commission disclosure rules and regulations and material nonpublic information ("MNPI") risks that are substantially identical to those present in traditional securities trading, aligning binary KPI options with the securities regulatory framework preserves the integrity of insider trading prohibitions and the Commission's disclosure regime. Listing binary KPI options on a registered national securities exchange subjects trading activity to SRO and Commission surveillance for, among other things, manipulative trading and insider trading, affording investors the full protections of the federal securities laws. Further, classifying binary KPI options as security options under the Act allows these contracts to be offered by the same liquidity providers that offer listed options today, all of whom are Commission-registered and regulated broker-dealers who are also subject to FINRA and exchange SRO oversight, and allows such contracts to be traded by the same retail customer base that trade binary options (and KPI-related contracts) today.

For these reasons, the Exchange believes that binary KPI options, as proposed, are appropriately classified as binary options eligible to trade on a registered national securities exchange and as standardized options subject to the disclosure framework established by Rule 9b–1. This classification reflects the economic substance and standardized structure of the product, is

consistent with the Act and the Commission's prior interpretations, and is designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, foster regulatory and clearing coordination, and protect investors and the public interest consistent with Section 6(b)(5) of the Act.⁴⁴

Proposal

The Exchange believes the proposal is consistent with Section 6(b) of the Act, in general, and furthers the objectives of Section 6(b)(5) of the Act,⁴⁵ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

Specifically, the Exchange believes the proposed rule change will remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest because it establishes a clear and transparent framework for a new category of listed options (binary KPI options) that are tied to financial and operating metrics of issuers that are publicly disclosed in required Commission reports. Currently, investors wishing to position their investment strategies around earnings announcements must rely primarily on equity options, whose pricing is affected by a wide range of variables beyond the reported financial or operating measure of interest (e.g., implied volatility, delta, time value, and general market movement). Binary KPI options allow investors to take a targeted, defined-risk position directly on a specific financial or operating measure (i.e., a KPI) for a particular reporting period. The Exchange believes this additional investment tool will protect investors and the public interest because it will promote market efficiency, enable more precise price discovery around earnings events, allow investors to hedge against potential idiosyncratic risks, and remove a gap in current national securities exchange-listed products available to market participants.

The Exchange believes the proposed list of issuers and KPIs on which the Exchange may list binary KPI options

will prevent fraudulent and manipulative acts and practices, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest. First, as noted above, the Exchange is proposing to list binary KPI contracts based on specific financial and operating metrics reported by the following issuers in their earnings-related disclosures submitted to the Commission: Apple, Inc.; Advanced Micro Devices, Inc.; Alphabet Inc.; Amazon.com, Inc.; Bank of America Corporation; Citigroup Inc.; Coinbase Global, Inc.; Ford Motor Company; Intel Corporation; JPMorgan Chase & Co.; Marathon Digital Holdings, Inc.; Meta Platforms, Inc.; Microsoft Corporation; Netflix, Inc.; NVIDIA Corporation; Palantir Technologies Inc.; SoFi Technologies, Inc.; Space Exploration Technologies Corp.; Super Micro Computer, Inc.; Target Corporation; Tesla, Inc.; and The Walt Disney Company. The Exchange believes offering investors an additional investment tool on a national securities exchange related to some of the most actively traded stocks and options will perfect the mechanism of a free and open market and benefit investors by allowing them to further refine their investment strategies, including using these options to hedge idiosyncratic, even-specific risk embedded in the specific KPIs (as further discussed below), for these actively traded companies.

The Exchange believes the proposed universe of issuers will prevent fraudulent and manipulative acts and practices, because the proposed issuers are large, well-capitalized, and widely followed issuers with highly liquid underlying securities and options markets. During May 2026, each of the issuers exceeded \$3 billion in market capitalization and ranked among the top 200 U.S. companies by average daily options or stock volume, with the exception of Space Exploration Technologies Corp (commonly referred to as SpaceX), which had not been trading for a full calendar month but which the Exchange believes will satisfy these measures with its first month of trading results based on its volumes since it began trading.⁴⁶

Securities with high market capitalizations and liquid markets are generally less susceptible to manipulation because of the substantial

capital required to artificially influence prices of those securities. The depth and breadth of trading activity for securities with significant market capitalizations, such as the stocks of the proposed issuers, make it unlikely that a single market participant would be able to exert undue influence on the price of such a stock, as large volumes of buyers and sellers are what ultimately continuously reflect the true market value of the stock. The Exchange believes the KPIs of issuers with high market capitalizations proposed to underlie binary KPI options are similarly less susceptible to manipulation because any attempt to distort a financial metric of such an issuer would require an enormous and economically impractical deployment of capital, which would likely exceed the fixed payout of a binary KPI option. Therefore, like stocks of large-cap issuers, KPIs of large-cap issuers are less susceptible to manipulation due to the structural barriers that would make manipulating KPI values operationally difficult and financially irrational (in addition to the rigorous financial oversight to which these issuers are subject, as further discussed below).

In addition to the proposed issuers being highly capitalized and having actively traded stocks and options on such stocks, the Exchange also believes the proposed limited universe of issuers for binary KPI options to those proposed will prevent fraudulent and manipulative acts and practices because each issuer is subject to periodic reporting requirements under the Act. Therefore, each of the proposed issuers must file annual reports on Form 10-K, quarterly reports on Form 10-Q, and current reports on Form 8-K with the Commission, which as discussed above disclose information the issuer believes is necessary for an investor to understand its financial condition, changes in financial condition and results of operations, which can include KPIs. Further, each issuer maintains audited financial statements prepared in accordance with U.S. Generally Accepted Accounting Principles ("GAAP") and is subject to executive certification requirements under the Sarbanes-Oxley Act. As a result, the settlement-determining KPI values for each eligible issuer are produced within the Commission's supervisory jurisdiction, are publicly verifiable from a Commission-regulated source and are subject to relevant anti-fraud provisions under the Act, which the Exchange believes will reduce the potential for manipulation of the underlying KPIs as well as the applicable issuer's stock.

Further, the Exchange believes the proposed limited universe of issuers will introduce binary KPI options in a well-developed, well-understood, and transparent Commission-regulated market environment. Each issuer is among the most widely followed, actively traded, and extensively analyzed issuers in its respective sector, with deep and liquid equity and derivatives markets and a broad institutional and retail investor base. The depth of existing market activity surrounding these issuers supports fair and orderly pricing by ensuring that binary KPI options are listed in markets where price discovery is well-established, liquidity is readily available, and participants have broad access to the information necessary to form and express informed views on KPI outcomes. The Exchange believes the continuous public scrutiny to which these issuers are subject substantially reduces the likelihood that any market participant could obtain or maintain an informational advantage sufficient to manipulate the settlement value of the binary KPI options.

The Exchange believes the proposed KPI metrics will similarly prevent fraudulent and manipulative acts and practices, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest. The Exchange's proposal limits eligible KPIs to GAAP and non-GAAP measures and other statistics related to an issuer's financial condition and operational results, all of which the proposed issuers disclose in their earnings-related filings (*i.e.*, Forms 8-K, 10-Q, and 10-K) submitted to the Commission. As such, the settlement values of the proposed binary KPI options are derived exclusively from information that issuers deem as material information required to be disclosed in reports submitted to the Commission. These metrics are routinely referenced and tracked in the investment community and are figures that the market recognizes as a meaningful and central indicator of issuer performance. The Exchange believes that the inclusion of well-established metrics as eligible KPIs expands the value of binary KPI options for investors without compromising the integrity of trading processes, including the settlement process.

The proposed KPI metrics are among the most widely followed and extensively analyzed measures for the proposed issuers. Specifically, the Exchange proposes to be able to list a binary KPI option on earnings per share (prepared in accordance with GAAP) for

⁴⁶ The ADV of SpaceX stock between June 12 and June 22, 2026 was approximately 290,009,963 shares. The market capitalization of SpaceX as of June 22, 2026 was \$2.145 trillion.

each proposed issuer. This metric is among the most widely followed and extensively analyzed figures in public company financial disclosure and is disclosed in each issuer's periodic Commission filings. Similarly, the Exchange proposes to list binary KPI options on revenue, prepared in accordance with the applicable GAAP, for each issuer. As is the case for earnings per share, revenue is a widely followed financial metric for publicly reporting companies and is the subject of extensive analyst coverage.

The Exchange proposes KPIs representing revenues broken out by applicable reportable segment, business unit, or product category, including cloud and artificial intelligence infrastructure revenues, streaming and geographic subscription revenues, automotive segment revenues, financial services segment revenues, consumer product category revenues, and digital asset exchange transaction and subscription revenues, among others, for several of the proposed issuers. Each such metric is a GAAP-defined figure required to be disclosed in the issuer's periodic Commission filings. The Exchange understands these metrics enable market participants to express views on specific high-profile business lines that are extensively covered by analysts and subject to a high volume of publicly available forecasts.

The Exchange proposes KPIs for the proposed financial institution issuers that are specific to financial institution income statement presentation, including net interest income, provision for credit losses, and net income. Each such metric reflects the distinct GAAP reporting framework applicable to banking institutions and is subject to the same periodic disclosures as other proposed KPIs.

The proposed rule change also includes operating margin, gross margin, or cash flow from operations KPIs for several issuers, each of which is computed directly from GAAP financial statement line items disclosed in the issuer's periodic Commission filings. These metrics provide market participants with insight into issuer profitability and capital generation and complement other revenue and earnings figures when market participants are evaluating the value of an issuer and its stock.

The Exchange also proposes several non-financial operational KPIs that issuers disclosed in their periodic Commission filings, including relevant production volumes, network and infrastructure counts, user engagement metrics, deal counts, digital asset trading volume, and digital asset mining

and holdings metrics. Each designated non-financial operational metric is closely tied to the core economic activity of the respective issuer's business and is a figure that the issuer has affirmatively chosen to disclose to the public as a key indicator of business performance. Issuers typically designate and disclose such metrics precisely because they are understood by the market to be among the most meaningful measures of their business activities. As discussed above, this is consistent with Commission guidance that an issuer should include KPIs in these reports that the issuer believes an investor needs to gain understanding of its financial condition, changes in financial condition and results of operations, as such KPIs present the "pulse" of the issuer's business. The market significance of these metrics is further reflected in the extensive analyst coverage and investor attention, particularly near each reporting date. Each metric is subject to executive certification as part of the periodic report in which it appears and is widely tracked by financial data services and equity research analysts.

Overall, the Exchange believes that the proposed well-established, publicly reported metrics as eligible KPIs will expand the value of binary KPI options for investors without compromising the integrity of trading processes, including the settlement process. As a result, the Exchange believes the proposed KPIs will protect investors and the public interest as it will permit the Exchange to offer investors additional investment and hedging tools on the Exchange that investors can incorporate into their investment strategies regarding the proposed issuers.

The Exchange believes the proposed contract terms for binary KPI options will promote just and equitable principles of trade, remove impediments to and perfect a free and open market and national market system, and protect investors. As discussed above, the Exchange believes the proposed contract terms for binary KPI options are standardized option terms. Like standard option contracts and binary index option contracts currently listed for trading on the Exchange, each proposed binary KPI option will be a call or a put, will have an underlying, exercise price, an expiration date, a settlement type, a settlement style, and a multiplier. As is the case for binary index options, each proposed binary KPI option will have an exercise settlement amount paid depending on how the settlement value of the underlying compares to the exercise price.

The proposed binary KPI options will function in a substantially similar manner to binary index options, with the proposed contract terms substantially similar to the contract terms of binary index options. The proposed definitions of binary KPI option, call binary KPI option, exercise price, and put binary KPI option are the same as those terms for binary index options (as previously approved by the Commission), differing only in reference to the underlying (KPI v. index).

The proposed definition of settlement value for binary KPI options is generally similar to the definition for binary index options (as previously approved by the Commission), with certain differences necessary to be addressed due to the different nature of a KPI as the underlying. The Exchange believes the proposed \$1 exercise settlement amount is reasonable given the retail nature of the proposed binary KPI options and merely adds specificity to the Rules for binary KPI options. The Exchange notes binary KPI options differ from standardized index options (which are also cash-settled) in that the exercise settlement amount is \$1.00 rather than the cash difference amount between the settlement value of the index and the strike price of an option. Since the \$1.00 exercise settlement amount will be paid out to the option holder if the criteria of the binary KPI option have been met, binary KPI options utilize a fixed exercise settlement amount.

The Exchange proposes new Rule 901KPI to list the specific binary KPI contracts with the KPI criteria for each option contract. Such KPI criteria are established as the set KPI events that will be used to determine an option contract should be exercised by comparing the strike price of the binary KPI option to the KPI value. The Exchange believes these proposed contracts (including the issuers and KPIs) are consistent with the Act for the reasons set forth above.

The Exchange believes the proposed expirations for binary KPI options will remove impediments to and perfect the mechanism of a free and open market and a national market system because they will align with the reporting periods for which the proposed issuers disclose earnings results and submit corresponding reports to the Commission. These expirations will, therefore, permit investors to incorporate binary KPI options into their investment strategies that correspond to issuers' earnings results. Further, as discussed above, the Exchange believes aligning expirations with Commission-regulated sources will reduce the potential for manipulation of

the underlying KPIs, which will ultimately protect investors and the public interest.

The proposed rule establishes a strike regime for binary KPI options similar to that for traditional options and binary index options. As is the case for traditional options and binary index options, the proposed rule change establishes permissible strike intervals, the amounts of which increase as the value of the strike increases. Additionally, the Exchange proposes to list initial and additional series pursuant to a similar framework as traditional equity options. The differences in the proposed strike regime compared to that of standard equity and index options are necessary and appropriate to reflect the static nature of KPIs (unlike underlying equities and indexes, the values of which change throughout the trading day) and the timing of their disclosure. As noted above, the Exchange intends to list binary KPI options aligned with the cadence of the KPI announcements as their expiration cycle (generally quarterly). The Exchange intends to list for trading binary KPI options with expirations for the then-current reporting period (e.g., third quarter) as well as the following period (e.g., fourth quarter) prior to the expiration of the binary KPI options for the then-current reporting period.

As the Exchange does for standard options, as well as binary index options, the Exchange lists strikes (subject to its Rules) based on relevant market information—including the then-current value of the underlying—and customer demand. As described above, the Exchange intends to do the same for binary KPI options by listing strikes relative to the then current value of the underlying KPI. The Exchange believes it is consistent with just and equitable principles of trade to permit the Exchange to list strikes for a new expiration based on the most recently disclosed KPI value, which may not be for the immediately preceding reporting period, and then add strikes based on the disclosed KPI for the immediately preceding reporting period (which would be the settlement value for binary KPI options that expire in the prior reporting period). This will enable the Exchange to respond to changes in market conditions in the same manner it is able to do today to respond to changes in values of (and market conditions related to) other underlyings. The Exchange believes this flexibility is appropriate for binary KPI options because the value of a KPI changes only when an issuer discloses that KPI, which generally happens every three

months, unlike other underlyings that change every trading day. While this proposed strike listing regime differs from that of other options, the concept is the same, which is to permit the Exchange to list strikes reflective of the then-current value of the underlying. It is possible the changed value of an underlying KPI may be more sudden and pronounced than changes in the value of an underlying equity or index (which are susceptible to sudden value changes); however, like the listing rules for equity and index options, the proposed rules permit the Exchange to list strikes to reflect potentially significant changes in the value of the underlying.

The Exchange believes the proposed scaling of strike prices is reasonable and will protect investors, as it will permit the Exchange to list strike values in amounts similar to current strike values for other options. As noted above, values of certain KPIs may be large (e.g., in the billions). The proposed scaling will permit the Exchange, for example, to list a strike of 27 rather than 27,000,000,000, which the Exchange believes will be simpler for investors to understand (as it will be made clear that 27 will reflect billions in this example) and consistent with current strike levels. The proposed scaling also permits the strike prices for binary KPI options to fit within current system capabilities regarding strike price values. The Exchange believes scaling rather than modifying its systems (and potentially causing investors to modify their systems) will benefit investors by allowing them to trade binary KPI options in the same manner as they trade other options today.

The Exchange believes the proposed strike intervals promote just and equitable principles of trade because it will permit the Exchange to list commercially meaningful strikes that will permit investors to tailor their trading strategies with precision. The Exchange acknowledges the proposed strike intervals are smaller than those in current Rules for other types of options. However, the Exchange believes the precision is appropriate and necessary given the nature of KPIs and the proposed options. The purpose of binary KPI options is to permit investors to take discrete and precise positions on KPIs. Therefore, the Exchange needs the ability to list strikes with the precision necessary to permit investors to take these positions. For example, earnings per share is generally a relatively small number (under \$10). While strike intervals for other options are limited to \$0.50 intervals, that would not be meaningful in the context of binary KPI

options when investors are looking to take positions for a specific KPI, which will be measured in penny intervals. Therefore, the Exchange believes smaller strike intervals will benefit investors because they will allow the Exchange to list binary KPI options that will enable investors to use these options in the precise nature for which they are intended and provide sufficient flexibility for the Exchange to list series to respond to changes in market conditions and customer demand, while other rules will place bounds around the strikes the Exchange may list.

Further, as discussed above, the proposed strike intervals are consistent with current rules for other options, which provide for larger strike intervals as the value of strike prices increases. Given the scaling factor for larger KPI values, while it may appear the proposed rule change will permit smaller strike intervals for larger KPI values, that may be true on a nominal basis but is not the case if the actual value of the strike intervals is considered. The corresponding actual value of the strike interval for a strike price that was subject to a larger scale value is higher than the actual value of the strike interval for a strike price that was subject to a smaller scale value. As a result, the permissible strike intervals for strike prices representing higher KPI values are actually larger than the permissible strike intervals for strike prices representing lower KPI values. This is consistent with general premise underlying current strike intervals that larger strike intervals apply to larger strike values and, therefore, the Exchange believes the proposed rule change will promote just and equitable principles of trade.

The Exchange believes this proposed rule change clearly describes the proposed terms of binary KPI options, such as with respect to expirations (including the Exchange's announcement of the specific expiration date after binary KPI options series for that expiration are listed) and exercise prices (including the scaling factor, negative values, and potential changes to that scaling factor for a binary KPI option class) for all investors. As discussed above, these terms and changes to such terms will be described in Exchange notices, technical specifications (including binary KPI option reference data files), and contract specifications (all of which are posted on the Exchange's public website and thus available to all investors). Exchange ATP Holders and retail brokerage firms are highly sophisticated investors that intake information regarding other Exchange-listed options

(including changes) in the same manner that the Exchange plans to release this information for binary KPI options. Therefore, the Exchange expects retail customers to have access to all relevant information regarding the terms of binary KPI options they choose to trade, including changes to expiration dates and exercise price values as announced by the Exchange.

The proposed rule change specifies a multiplier of one for binary KPI options rather than require the Exchange to designate a multiplier of at least one as the rules for binary index options do. This proposed multiplier is consistent with the definition of contract multiplier for binary index options (as that requires a multiplier of at least one) and merely adds specificity to the Rules.

The Exchange believes proposed Rule 905KPI, which establishes Regular Trading Hours for binary KPI options is consistent with the Act, protects investors, and prevents fraudulent and manipulative practices. The Exchange believes the proposed structure ensures that trading in binary KPI options ceases before the earnings announcement that determines settlement. The distinction between A.M.- and P.M.-settled contracts mirrors the settlement terms already applicable to binary index options, as well as other Exchange products.

The Exchange believes proposed Rule 905KPI(e), which provides that for binary KPI options, the System initiates the opening rotation at 9:30 a.m., removes impediments to a free and open market by applying the same proven opening process to binary KPI options that governs other listed options classes on the Exchange. Additionally, unlike equity options, for which the underlying opens for trading and can trigger the opening rotation, KPIs do not trade, so triggering the opening rotation based on a set time is reasonable for binary KPI options.

The Exchange believes excluding binary KPI options from the obvious error provisions in Rule 975NY is consistent with the Act and promotes just and equitable principles of trade because the standard obvious error framework, which evaluates whether an execution price deviates from a "theoretical value" by a prescribed amount, is incompatible with the structure of binary KPI options. Binary KPI options have no continuously observable theoretical value (unlike equity and index options) prior to the date of the earnings-related disclosure. Rather, their exercise settlement amount is fixed at either a pre-specified dollar amount or zero, depending entirely on whether the reported KPI satisfies the

exercise condition, which itself is based on a single, publicly verifiable metric, disclosed in Commission filings. Applying an obvious error framework premised on theoretical value calculations to a product with a binary, fixed payout would be technically inapplicable and could produce unjust or arbitrary results. Moreover, because settlement of binary KPI options is determined by issuer-reported metrics disclosed through Commission filings (*i.e.*, figures produced pursuant to established accounting standards, subject to independent audit, and certified under the Sarbanes-Oxley Act), the settlement process is itself governed by a comprehensive external regulatory framework. The Exchange believes that establishing any alternative dispute mechanism in this context would be not only unnecessary, but potentially disruptive to market integrity, as it may introduce an element of post-hoc discretion into a settlement process that is expressly designed to be objective, verifiable, and rule-bound.

The Exchange believes the proposed amendments related to position limits for binary KPI options are consistent with the Act because they establish a rational position limit framework for binary KPI options that protects against manipulation while facilitating legitimate trading activity in a novel product. The Exchange believes that setting the position limit for binary KPI options as the same as the applicable position limit for the stock of the issuer, with 100 binary KPI option contracts equaling one standard option contract, is appropriate. As proposed, binary KPI options with a multiplier of one will count toward applicable limits on a proportional basis relative to standard equity options on the issuer's stock, which carry a multiplier of 100.

The Exchange further believes the proposal is reasonable given the nature of binary KPI options and their relationship to the underlying issuer. Because binary KPI options have a fixed maximum notional value and settle on an all-or-nothing basis based on a KPI of the issuer rather than the price of the issuer's stock as with a standard equity option, the Exchange believes the proposed position limits appropriately reflects the distinct structure of these contracts and limits the potential for any single market participant to exert undue influence over binary KPI option settlement. With respect to binary KPI options, the economic risk of a position is binary, in that the contract either settles in-the-money at \$1.00 or out-of-the-money at \$0.00. Additionally, with respect to binary KPI options, the maximum notional exposure per

contract is fixed in advance; it cannot exceed \$1.00 multiplied by the contract multiplier. Moreover, unlike stock prices or index values, binary KPI option positions would not influence a company's financial or operational outcomes; the number of option contracts outstanding or trading volume, for instance, has no effect on revenue or operational metrics.

Further, the Exchange's proposal to provide that positions in binary KPI options on the same KPI with different expiration dates and positions in binary KPI options for the same issuer with different underlying KPIs are not aggregated reflects the distinct structure of binary KPI options. Each binary KPI option expiration corresponds to a separate event tied to a specific issuer reporting period. Thus, the Exchange believes aggregating positions across different expiration dates would not accurately reflect the risk profile of these positions and would impose an unnecessary burden on market participants seeking exposure to company KPI events across different reporting periods. In determining that position limits should not be aggregated across all binary KPI options referencing a single issuer, the Exchange analyzed the degree to which KPIs of a given issuer are correlated with one another.

Similarly, the Exchange believes it is reasonable to provide that binary KPI options are not aggregated with non-binary options contracts overlying the stock of the issuer. Because binary KPI options and equity options overlying the same issuer have different risk profile (*i.e.*, binary KPI options settle based on a KPI of the issuer rather than its stock price), the Exchange believes it would be inappropriate and misleading to require aggregation of these positions for purposes of position limits. As noted above, binary KPI options are based solely on whether a single, specified-issuer KPI meets a discrete threshold at a defined future date, and their value reflects the market's probability assessment of that singular outcome. Standard equity options, on the other hand, reflect a broad array of factors bearing on the price of the underlying security, including macroeconomic conditions and sector dynamics, of which any individual KPI is only one component. Because the two products are not priced off of a common reference and do not represent economically equivalent or fungible exposures, aggregating positions across them would not meaningfully advance the prevention of manipulative practices with respect to the underlying security.

The Exchange further notes that this proposed non-aggregation framework is

not unprecedented. Rule 904ByRDs provides that positions in binary return derivatives shall not be aggregated with options contracts on the same or similar underlying security. The Exchange believes that there was no need to aggregate positions across the two product types to prevent manipulative practices involving the underlying.

Finally, the Exchange believes the amendments to the hedge exemption provision in proposed Rule 906KPI(d) is consistent with the Act because it facilitates legitimate hedging activity in binary KPI options. Because a market participant simultaneously holding a short put and short call position in binary KPI options has taken opposing sides of the potential binary outcome (*i.e.*, the short call is at risk if the KPI is met and the short put is at risk if the KPI is not met), the Exchange believes such a position represents a defined, bounded risk profile that does not present the same potential for manipulation or market disruption that position limits are designed to prevent. The Exchange therefore believes the hedge exemption as proposed will encourage market-making activity and liquidity provision in binary KPI options while protecting investors and the public.

The Exchange also believes the proposed adoption of Rule 907KPI consistent with the Act. By establishing tailored reporting requirements for binary KPI options, the Exchange will be able to monitor ATP Holder positions effectively and detect any accumulation of positions that may approach or exceed applicable limits, to the benefit of investors. The Exchange believes it is consistent with just and equitable principles of trade for 100 binary KPI option contracts to equal one standard option contract for purposes of determining whether the report in proposed Rule 907KPI is required given the size of binary KPI contracts. As discussed above, proposed binary KPI options have a multiplier of one, while standard option contracts have a multiplier of 100. Therefore, the notional value of a binary KPI option is significantly less than the notional value of standard option contracts. For example, 200 contracts with a value of \$1.00 with a multiplier of 100 would equate to \$20,000 notional value, while 200 binary KPI option contracts with a value of \$1.00 (which is the fixed maximum value of a binary KPI option contract) with a multiplier of one would equate to \$200 notional value. Counting 100 binary KPI contracts as one standard option contract for purposes of this report effectively calibrates the reporting requirement so that investors

are required to submit the report for an economically equivalent number of contracts, which promotes just and equitable principles of trade.

The Exchange believes the proposal will provide the Exchange and regulators with visibility into large position concentrations in binary KPI options, preserving the ability to identify unusual activity and respond to any unforeseen concerns, while calibrating the threshold to a metric that is meaningful for this contract given its smaller multiplier relative to that of standard equity options. The Exchange believes this reporting framework, coupled with the position limits amendments, provides a fully adequate regulatory framework for these instruments.

Further, as noted above, the Exchange believes it has an adequate surveillance program in place to detect potentially manipulative trading in binary KPI options. The Exchange notes that manipulation of the reported KPI would constitute securities fraud and expose the issuer to liability under federal securities law, separate and apart from any exchange-related violation.

The Exchange believes the proposed binary KPI options will serve as a vehicle to hedge idiosyncratic, event-specific risk embedded in the specific KPIs. Standard equity options are calibrated to the price of the underlying security and capture a full spectrum of factors or risks which may affect issue value, such as macroeconomic conditions or sector dynamics. Because equity option pricing incorporates this full spectrum, a participant seeking to hedge exposure to a single, discrete KPI outcome cannot do so precisely using standard equity options. Because settlement of a binary KPI option is determined solely by whether a specified-issuer KPI meets a defined threshold, the contract effectively isolates certain individual risks an investor may seek to manage. For example, consider an investor holding a long-term position in a particular issuer stock, who believes the issuer's quarterly revenue will fall short of expectations (for reasons unrelated to the issuer's long-term prospects). The investor may utilize the binary KPI option to hedge precisely against the near-term risk without disruption to the underlying equity position. This targeted hedging utility represents a distinct and additive function relative to existing listed products, which the Exchange believes will serve the interests of investors and provide an efficient mechanism for managing event-specific, KPI-driven risk.

The Exchange believes the proposed rule change will facilitate transactions in securities, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest, because it will provide investors with a securities exchange-listed investment choice for these instruments, offering price transparency and the regulatory protections of a national securities exchange. The Exchange believes the proposed rule change will permit investors to manage their risk exposures and carry out their investment objectives on a securities exchange with more flexibility and broader applicability. The Exchange also believes the proposed rule change will promote competition, as it will meet demands of investors that currently may trade products structured in substantively the same manner as the proposed binary KPI options in other markets (as further discussed below). Binary KPI options would provide investors with a straightforward means of expressing a directional view on key financial and operating metrics. The Exchange further believes the proposed rule change is consistent with the protection of investors and the public interest, as binary KPI options would be subject to the Exchange's existing rules governing the listing and trading of options. The Exchange believes expanding the universe of binary options will benefit investors, particularly retail investors and other investors who prefer simplicity, as a complementary offering to current exchange-traded options.

The proposed rule change will permit the Exchange to list binary KPI options on a national securities exchange as alternatives to products that are structured in substantially the same manner as binary options currently available in the OTC market and on other platforms. The Exchange understands investors have traded binary options similar to the proposed binary options in OTC markets for many years but may prefer to trade such options in a listed environment to receive the benefits of trading listing options. These benefits include: (1) enhanced efficiency in initiating and closing out positions; (2) increased market transparency; and (3) heightened contra-party creditworthiness. The Exchange believes the proposed rule change may encourage liquidity to shift from the OTC market onto the Exchange, which the Exchange believes would increase market transparency as well as enhance the process of price

discovery conducted on the Exchange through increased order flow. The proposed rule change is intended to provide a market for binary KPI options as a standardized product without the credit risk of an individual issuer. By providing a listed and standardized market for more classes of binary options, the Exchange seeks to attract investors who desire the simplicity of a binary option with the certainty and safeguards of a regulated and standardized marketplace. Additionally, unlike an OTC binary option, counterparty credit risk for Exchange-listed binary KPI options is significantly reduced through the issuance and guarantee of the contracts by a registered clearing agency. Further, as an exchange-traded option, binary options will have the advantage of liquidity provided by Market-Makers, which the Exchange believes may lead to tighter spreads than those in the OTC market. The Exchange also believes that standardization will enable more interested parties to become market participants.

In addition to the OTC market, various market platforms that are not registered as national securities exchanges currently offer products structured in substantively the same manner as binary options that the Exchange may list pursuant to current Rules and as proposed. These platforms offer binary option products overlying securities indexes, which may be settled at varying points of the day (not just at the open and close of the trading day). However, as these venues are not national securities exchanges, they do not offer investors the benefits of centralized liquidity, market transparency, or securities regulations intended to protect investors. The Exchange believes listing competitive products on a national securities exchange would create a centralized and standardized marketplace for these products, which promotes price discovery and transparency, within an established regulatory framework designed to afford investors in securities with important protections. In other words, the Exchange believes its proposal offers a more transparent platform than the OTC market or other market platforms offer. It would contribute to leveling the playing field with these alternative markets and provide investors with safeguards associated with Commission and SRO oversight of the trading activity in these exchange-listed binary KPI options.

Ultimately, the Exchange believes the proposed rule change will provide investors with greater trading tools and opportunities and flexibility, resulting

in investors having additional means to carry out their investment objectives and manage their risk exposures through products listed and traded on a national securities exchange. The Exchange believes the proposed rule change will offer market participants a simplified, transparent, and limited risk investment choice overlying securities and securities indexes, which may be more aligned with their specific timing needs and investment and hedging strategies and risk tolerances. The Exchange believes it benefits the investing public to continue to enhance its listed product offerings to respond to continuously changing needs of investors and to a continuously changing competitive environment.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act, because binary KPI options will be available to all market participants who wish to trade such options on the same terms and in the same manner (including with respect to the payout terms and amount). All market participants will be subject to the same rules applicable to binary KPI options, as described in this proposed rule change. Except as set forth in the proposed rule change, binary KPI options will trade in the same manner as other options, including binary index options, on the Exchange.

The Exchange does not believe the proposed rule change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act, because other options exchanges may propose similar products. Additionally, as noted above, substantively similar products to binary KPI options, as proposed, are available in the OTC market and various other markets.

The Exchange notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues who offer similar products. The Exchange believes the proposed rule change will provide investors with a comparable alternative to the OTC market and other venues. The Exchange believes it may be a more attractive alternative to the OTC market and these other venues, as market participants will benefit from

being able to trade these options in an exchange environment, which provides, among other things: (1) enhanced efficiency in initiating and closing out positions; (2) increased market transparency; and (3) heightened counterparty creditworthiness. As a result, the Exchange believes that the proposed rule change may relieve any burden on, or otherwise promote, competition, as it will allow the Exchange to offer a securities exchange-listed alternative to the products currently available in these other markets.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission will:

- A. by order approve or disapprove such proposed rule change, or
- B. institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NYSEAMER-2026-82 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-NYSEAMER-2026-82. This file number should be included on the subject line if email is used. To help the Commission process and review your

comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NYSEAMER-2026-82 and should be submitted on or before October 9, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁴⁷

Sherry R. Haywood,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-106386; File No. SR-GEMX-2026-32]

Self-Regulatory Organizations; Nasdaq GEMX, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Options 2, Section 3, Appointment of Market Makers

September 15, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on September 2, 2026, Nasdaq GEMX, LLC ("GEMX" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Options 2, Section 3, Appointment of Market Makers.

The text of the proposed rule change is available on the Exchange's website at <https://listingcenter.nasdaq.com/>

rulebook/gemx/rulefilings, and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Options 2, Section 3, Appointment of Market Makers, at paragraph (b) to change the current requirement that a Primary Market Maker ("PMM")³ shall be appointed to each options class traded on the Exchange. The Exchange proposes instead to state that a PMM may be appointed to each options class traded on the Exchange. The proposed amendment would replace a mandatory requirement to appoint a PMM to every options class with a permissive standard, affording the Exchange the flexibility to determine, based on prevailing market conditions and the availability of qualified applicants, whether a PMM appointment is appropriate for a particular options class.

Today, there are a number of Competitive Market Makers ("CMMs")⁴ on GEMX that would continue to provide liquidity in the absence of a PMM appointment under this proposal. CMMs are subject to continuous quoting and other market making obligations set forth in Options 2, Section 4 (Obligations of Market Makers), and are required to provide two-sided quotations in 60% of the series in each of the option classes to which they are appointed pursuant to the quoting requirements of Options 2, Section 5 (Market Maker Quotations). CMMs are also not capped in number and may

actively quote in a broad range of option classes.

The proposed amendment aligns GEMX's rule with Nasdaq Phlx LLC ("Phlx") Options 2, Section 12(a)⁵ which expressly permits, but does not require, Phlx to designate a Lead Market Maker for a particular options series. In addition, until July 2026, The Nasdaq Options Market LLC ("NOM") did not adopt rules for a class of market maker similar to a PMM. NOM operated its markets for nearly twenty years without such a category of market maker. The Exchange believes that the current mandatory standard is not necessary to protect investors or to ensure a fair and orderly market on GEMX. Options classes traded on the Exchange vary widely in their liquidity profiles, order flow, and level of market maker interest. Circumstances may arise in which no eligible Member seeks or is well-suited for a PMM appointment in a particular options class, or in which appointing a PMM is not economically viable for any prospective applicant. The Exchange will monitor instances in which a PMM is not fulfilling its obligations or is not in good standing and will seek to replace it with another qualified PMM. In those cases, the mandatory standard in the current rule provides no operable path forward. A permissive standard would enable the Exchange to determine, on a class-by-class basis, whether a PMM appointment serves the interests of the market and the investing public.

The proposed change is not intended to, and would not, alter the substantive obligations or privileges of a PMM once appointed. A PMM appointed to an options class would remain subject to the full set of obligations set forth in GEMX Options 2, Sections 3, 4, and 5, including the Valid Width Quote requirement during the Options Opening Process in Options 3, Section 8, and the 90% two-sided quoting obligation on an intra-day basis. The Exchange further notes that CMMs are available to provide liquidity in options classes traded on the Exchange, and the appointment of a PMM is not a prerequisite for maintaining a fair and orderly market in any given class. In options classes for which no PMM is appointed, quoting and liquidity provision would proceed pursuant to the CMM framework in Options 2, Sections 4 (Obligations of Market Makers) and 5 (Market Maker Quotations).

³ The term "Primary Market Maker" means a Member that is approved to exercise trading privileges associated with PMM Rights. See Options 1, Section 1(b)(35).

⁴ The term "Competitive Market Maker" means a Member that is approved to exercise trading privileges associated with CMM Rights. See Options 1, Section 1(b)(12).

⁵ Phlx Options 2, Section 12(a) provides that a Lead Market Maker is not required to be assigned to an options series. A Lead Market Maker on Phlx is analogous to a Primary Market Maker on GEMX.

⁴⁷ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁶ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁷ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The proposed amendment to Options 2, Section 3(b) protects investors and the public interest and promotes just and equitable principles of trade because CMMs will continue to provide liquidity on the Exchange. There are a number of CMMs on GEMX that would continue to provide liquidity in the absence of a PMM appointment under this proposal. CMMs are subject to continuous quoting and other market making obligations set forth in Options 2, Section 4 (Obligations of Market Makers), and are required to provide two-sided quotations in 60% of the series in each of the option classes to which they are appointed pursuant to the quoting requirements of Options 2, Section 5 (Market Maker Quotations). CMMs are also not capped in number and may actively quote in a broad range of option classes. Further, the amendment affords the Exchange the flexibility to determine whether the appointment of a PMM is appropriate in a given options class, rather than requiring the Exchange to appoint a PMM in every class irrespective of market conditions or applicant availability.⁸

The proposed permissive standard is substantively identical to the framework already in place on Phlx, which provides at Options 2, Section 12(a) that a Lead Market Maker “is not required to be assigned to an options series.” Finally, the proposed change does not reduce or otherwise modify the obligations of a PMM. As a result, the proposal enhances the Exchange’s administrative flexibility with respect to PMM appointments while preserving all of the substantive market-quality protections that flow from a PMM’s obligations. For the foregoing reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change would apply uniformly to all Members that seek or hold PMM appointments on GEMX. Further, the Exchange notes that there is competition among CMMs who are required to provide two-sided quotations in 60% of the series in each of the option classes to which they are appointed pursuant to the quoting requirements of Options 2, Section 5 (Market Maker Quotations).

Members currently appointed as PMMs will retain their appointments and will continue to be subject to the same obligations and eligible for the same entitlements. Members seeking new PMM appointments will continue to be evaluated under the same standards set forth in Options 2, Section 3. The proposal does not favor any Member or class of Members over another, and it does not modify the rights or obligations of CMMs.

The Exchange does not believe the proposed rule change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change would harmonize GEMX Options 2, Section 3(b) with the analogous framework on Phlx.⁹ In addition, affording the Exchange greater flexibility to administer its PMM program may allow the Exchange to compete more effectively for order flow with other options markets.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has

become effective pursuant to Section 19(b)(3)(A)(iii) of the Act¹⁰ and subparagraph (f)(6) of Rule 19b–4 thereunder.¹¹

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR–GEMX–2026–32 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–GEMX–2026–32. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection.

¹⁰ 15 U.S.C. 78s(b)(3)(A)(iii).

¹¹ 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

⁶ 15 U.S.C. 78f(b).

⁷ 15 U.S.C. 78f(b)(5).

⁸ The Exchange notes that not every Market Maker is eligible to be a PMM. A Market Maker may not be in good standing or may not have superior technology to handle the demands of additional quoting obligations (90% versus 60%) as described in Options 2, Section 5.

⁹ See Phlx Options 2, Section 12(a).

All submissions should refer to file number SR–GEMX–2026–32 and should be submitted on or before October 9, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹²

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106368; File No. SR–CboeBZX–2026–074]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Introduce a Data Vendor Program

September 15, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b–4 thereunder,² notice is hereby given that on September 8, 2026, Cboe BZX Exchange, Inc. (the “Exchange” or “BZX”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (the “Exchange” or “BZX”) proposes to introduce a Data Vendor Program, which includes introducing a new defined term of Data Vendor, along with other clarifying changes. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Commission’s website (<https://www.sec.gov/rules/sro.shtml>), the Exchange’s website (https://www.cboe.com/us/equities/regulation/rule_filings/bzx/), and at the principal office of the Exchange.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this proposed rule change is to (i) introduce a definition of Data Vendor; (ii) codify the existing definition (as defined in the Exchange’s applicable North American Market Data Policies) of Extranet Service Provider; (iii) codify an existing practice that permits an External Distributor of both Cboe One Summary and Cboe One Premium to be liable only for the External Distribution Fee for Cboe One Premium; and (iv) create a program for Data Vendors in order to incentivize Data Vendors to build out the applicable feeds and make them commercially available to subscribers.³ The proposed program will provide fee waivers (as described below) for External Distribution Fees for Data Vendors for the Cboe One Summary Feed, Cboe One Premium Feed, and BZX Summary Depth Feed.

Proposed Definitions

In connection with this proposed program, the Exchange first proposes to adopt a definition for a specific category of participants. Specifically, the Exchange proposes to establish the term “Data Vendor” to mean “an External Distributor that (i) is actively engaged, as part of its primary business objective, in the solicitation of unaffiliated third-party Distributors to redistribute a transformed Market Data Product; (ii) does not maintain a brokerage relationship with Users in connection with the receipt or use of the applicable Market Data Product; and (iii) is not an Extranet Service Provider.” As part of

this new definition, and as further described below, the Exchange proposes to codify the existing definition of Extranet Service Provider within the Cboe Global North American Market Data Policies to be within its Fee Schedule.

The Exchange has also established objective, verifiable criteria for determining eligibility as a Data Vendor. The following criteria, which will be reflected in the Exchange’s Fee Schedule, must be satisfied: (1) the External Distributor must identify itself as a Data Vendor in publicly available marketing materials; (2) the External Distributor must transform the applicable Market Data Product before redistribution, which may include aggregation across multiple data sources, normalization into a consistent format, enrichment with reference data or analytics, or repackaging into a proprietary delivery mechanism (e.g., terminal, API, or proprietary feed); (3) the External Distributor must redistribute the applicable transformed Market Data Product to downstream Distributors as part of a paid commercial offering; (4) the External Distributor must not maintain a brokerage relationship with any User to whom it distributes the applicable Market Data Product; (5) the External Distributor must not be an Extranet Service Provider; and (6) the External Distributor must be actively engaged in the solicitation of unaffiliated third-party Distributors to subscribe to and redistribute the applicable transformed Market Data Product. Upon request, the External Distributor must provide a written attestation certifying compliance with the foregoing criteria. The Exchange may request supporting documentation, including but not limited to Distributor subscriber lists, revenue breakdowns by recipient type, and descriptions of the transformations applied to the Market Data Product. These objective eligibility criteria ensure that the Data Vendor Program is equitably applied to all similarly situated market participants.

External Distributor

To begin, “Data Vendor” is intended to only encompass External Distributors and not Internal Distributors. An External Distributor is defined as a Distributor that receives the Exchange Market Data product and then distributes that data to a third party or one or more Users outside the Distributor’s own entity.⁴ The Exchange seeks to adopt this program in order to encourage broader redistribution of this

¹² 17 CFR 200.30–3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

³ The Exchange initially submitted the proposed rule change on July 1, 2026 (SR–CboeBZX–2026–059). On July 15, 2026, the Exchange withdrew that filing and submitted SR–CboeBZX–2026–060. On September 8, 2026, the Exchange withdrew that filing and submitted this filing.

⁴ See BZX Equities Fee Schedule.

data. As such, the Exchange limits this to External Distributors as the intent of this program is to have data distributed outside one's own entity.

Primary Business Is To Redistribute to Distributors

To be eligible as a Data Vendor, an External Distributor must be taking in data for the primary business purpose of selling access to the applicable feed as a service in its own right, not merely redistributing data in incidental support of broader business functions such as trade execution, account management, or brokerage services. The Exchange notes that, as part of its business, a Data Vendor may redistribute a market data product to Users, but the primary purpose must be to redistribute data to Distributors. The Exchange will assess whether an External Distributor's primary business purpose satisfies this criterion based on the External Distributor's publicly available marketing materials. If the Exchange were to modify this requirement to permit a primary business purpose of redistribution to either Distributors or Users, it would unintentionally include firms that may redistribute only to Users and that are not traditionally considered data vendors (e.g., a media outlet or a bank).

Transformed Market Data Product

To be eligible, the Exchange requires that the Data Vendor not simply pass through data in its original form. Transformation may include aggregation across multiple sources, normalization into a consistent format, enrichment with derived analytics, or repackaging into a proprietary delivery mechanism (e.g., terminal, API, feed), or any other value-added processing that distinguishes the output from the original source data.

No Brokerage Relationship With Users

Next, the Exchange proposes that the definition of Data Vendor include a stipulation that a Data Vendor must not maintain a brokerage relationship with Users who receive the market data product. The Exchange already has programs aimed at retail brokers, for example, both the Small Retail Broker Program and the Small Retail Broker Hosted Solutions Program.⁵ This proposed program is intended to encourage Data Vendors specifically to take in the applicable feeds and distribute them. A Data Vendor's service model is different from a retail broker's, as a Data Vendor's business model is built around providing data to firms and

Users alike, whereas a retail broker's business model is focused on connecting Users to markets in order to trade and may include providing market data as part of its offering to its Users. As the Exchange already has programs specifically for retail brokers, the Exchange does not believe it would be appropriate to include retail brokers here. The Exchange notes that if a Data Vendor that is currently receiving a fee waiver under this Program subsequently commences a brokerage relationship with its Users, it will no longer satisfy the definition of Data Vendor and will cease to be eligible for the Program. In such case, the External Distributor would be assessed the standard External Distribution Fee for the applicable feed as of the date it no longer satisfies the definition of Data Vendor.

Not an Extranet Service Provider

As noted above, the Exchange proposes also to define Extranet Service Provider when it introduces the definition of Data Vendor into its Fee Schedule. Today, this term already exists in the Cboe Global Markets North American Data Policies.⁶ The Exchange proposes to codify this definition in its Fee Schedule because the proposed definition of Data Vendor directly references this defined term. Specifically, the Exchange proposes to codify that an Extranet Service Provider is "an entity that has entered into a Cboe Global Markets Global Data Agreement and Transmits an Exchange Market Data Product, via an extranet operated by such entity, to data recipients. 'Transmit' means to direct an Exchange Market Data Product to one or more data recipients without modification of the content, format, or other characteristics of the Exchange Market Data Product." An Extranet Service Provider is not authorized to use or process an Exchange Market Data Product for any purpose.

Applicable Data Feeds

By way of background, the Exchange offers the Cboe One Premium Data Feed, which is a data feed that disseminates, on a real-time basis, the aggregate best bid and offer ("BBO") of all displayed orders for securities traded on the Exchange and its affiliated equities exchanges and enables recipients to receive aggregated two-sided quotations from BZX and its affiliated equities exchanges for up to twelve (12) price levels (and, for a limited time, up to five (5) price levels).⁷ The Cboe One

Premium Data Feed is created using the data from the Exchange and each of its affiliated equities exchanges' Summary Depth data feeds (allowing for up to 48 total price levels).

The Exchange also offers the Cboe One Summary Data Feed, which disseminates, on a real-time basis, the aggregate BBO of all displayed orders for securities traded on BZX and its affiliated equities exchanges and also contains individual last sale information for BZX and its affiliated equities exchanges.⁸

The Exchange also offers the BZX Summary Depth Data Feed, which is a data feed that offers aggregated two-sided quotations for up to 12 price levels for all displayed orders entered into the System.

External Distribution Fees for Cboe One Premium and Cboe One Summary

The proposed rule change also clarifies that External Distributors of both Cboe One Summary and Cboe One Premium shall only be responsible for paying the External Distribution Fee for Cboe One Premium. The current fee schedule provides that "Cboe One Summary User Fees can be applied to Cboe One Summary and Cboe One Premium External Distribution Fees." Under the Exchange's existing application of this provision, an External Distributor receiving both Cboe One Summary and Cboe One Premium is assessed only the Cboe One Premium External Distribution Fee,⁹ and User

(12) levels. To help in this transition, it is currently supporting both the five and twelve level feeds; however, as stated in its rule, BZX shall sunset the five (5) level feed of Cboe One Premium by December 31, 2026 (with the date to be announced via Exchange Notice). See Rule 11.22(i).

⁸ The Cboe One Summary Feed is distinguishable from the Cboe One Premium Feed in that it does not provide depth of book data. In contrast, the Cboe One Premium Feed contains all the available data in the Cboe One Summary Feed and also provides depth of book data.

⁹ To better illustrate this concept, consider the following examples. Example 1: If a firm subscribes to only Cboe One Summary, its User costs will be used to offset the External Distribution Fee for Cboe One Summary. In the event the firm's User costs total \$2,000, the firm will pay \$2,000 in User fees and \$3,000 (\$5,000 - \$2,000) for its External Distribution Fee. Example 2: If a firm subscribes only to Cboe One Premium, its User costs will be used to offset the External Distribution Fee for Cboe One Premium. In the event a firm's User costs total \$10,000, the firm will pay \$10,000 in User fees and \$2,500 (\$12,500 - \$10,000) for its External Distribution Fee. Example 3: If a firm subscribes to both Cboe One Summary and Cboe One Premium, only the External Distribution Fee for Cboe One Premium is assessed and this fee may be offset by both Cboe One Summary and Cboe One Premium User fees. In the event a firm's User costs are \$2,000 for Cboe One Summary and \$10,000 for Cboe One Premium, the firm will pay a total of \$12,000 in User fees (\$10,000 + \$2,000) and it will pay \$500

Continued

⁵ See BZX Equities Fee Schedule.

⁶ See Market Data Policies.pdf.

⁷ BZX filed to increase the levels of the Cboe One Premium Data Feed from five (5) levels to twelve

Fees for both Cboe One Summary and Cboe One Premium may be applied to offset that fee.

The Exchange is now proposing to make this treatment explicit by adding clarifying language to the fee schedule stating that External Distributors of both feeds are only responsible for paying the External Distribution Fee for Cboe One Premium. This amendment does not alter the economic substance of the Exchange's existing fee structure, nor does it impose any new or increased fees on market participants. Rather, it reduces potential ambiguity by expressly codifying the Exchange's existing application of the user fee offset provisions. The Exchange believes this clarification will promote transparency and reduce confusion among External Distributors regarding their fee obligations under the Cboe One market data product offerings.

Impact of Proposed Program

As noted above, the proposed program would waive External Distribution Fees for Data Vendors of the Cboe One Summary Feed, the Cboe One Premium Feed, and the BZX Summary Depth Feed (each, an "Applicable Feed") that satisfy certain eligibility requirements. A Data Vendor must not have received the Applicable Feed for which it seeks the waiver during the 18 months¹⁰ preceding the waiver application date, and must integrate, or be actively in the process of integrating, the Applicable Feed and making it commercially available to its subscribers. The Data Vendor need not have fully integrated the Applicable Feed or made it commercially available before the waiver begins. For a qualifying Data Vendor, the applicable waiver commences on the date it first receives the Applicable Feed, and, if that date occurs mid-month, that partial month counts as the first month of the waiver period. Specifically, the Exchange proposes to waive the External Distribution Fee of \$5,000 per month for Cboe One Summary for 12 months (the "Summary Waiver Period"), except that a Data Vendor is not eligible for a Summary Waiver Period if it is receiving Cboe One Premium because Cboe One Summary is included in the Cboe One Premium External Distribution Fee as noted herein. To clarify, because a Data Vendor receiving Cboe One Premium pays only the Cboe One Premium External Distribution Fee (and no

for its External Distribution Fee (\$12,500 – (\$10,000 + \$2,000)).

¹⁰ The Exchange notes that this same 18-month requirement is the standard for its other fee waiver programs. See BZX Equities Fee Schedule.

separate fee is assessed for Cboe One Summary), there is no separate Cboe One Summary External Distribution Fee to waive for such a firm.¹¹ The Exchange proposes to waive the External Distribution Fee of \$12,500 per month for Cboe One Premium for 24 months (the "Premium Waiver Period").

If an eligible Data Vendor already receives Cboe One Summary, it may still receive the Premium Waiver Period if it has not received Cboe One Premium during the 18 months preceding the waiver application date and satisfies the integration and commercial availability requirement with respect to Cboe One Premium. During the Premium Waiver Period, the Data Vendor's Cboe One Summary subscription would be covered under the Premium Waiver, and no separate External Distribution Fee would be assessed for Cboe One Summary. Similarly, an eligible Data Vendor that builds out both Cboe One feeds simultaneously would receive only the Premium Waiver Period.

Lastly, for eligible Data Vendors, the Exchange also proposes to waive the External Distribution Fee of \$5,000 per month for BZX Summary Depth for 24 months (the "Summary Depth Waiver Period").

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.¹² Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹³ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹⁴ requirement that

¹¹ As noted above, a firm that subscribes to both Cboe One Premium and Cboe One Summary is only charged the External Distribution Fee for Cboe One Premium. Accordingly, an eligible Data Vendor that builds out both feeds simultaneously receives only the Premium Waiver Period.

¹² 15 U.S.C. 78f(b).

¹³ 15 U.S.C. 78f(b)(5).

¹⁴ *Id.*

the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes the proposed rule change promotes just and equitable principles of trade by establishing a clear, objective, and transparent definition of "Data Vendor" that properly captures the characteristics distinguishing Data Vendors from other categories of External Distributors. The proposed definition sets forth specific, verifiable criteria—namely, that a Data Vendor must (i) be an External Distributor; (ii) be actively engaged, as part of its primary business objective, in the solicitation of unaffiliated third-party Distributors to redistribute a transformed Market Data Product; (iii) not maintain a brokerage relationship with Users; and (iv) not be an Extranet Service Provider. By establishing objective eligibility criteria, the proposed rule change ensures that similarly situated market participants are treated consistently and that the benefits of the Data Vendor Program are available to all External Distributors that meet the defined qualifications.

The Exchange further believes that the codification of the existing Extranet Service Provider definition within the Fee Schedule promotes just and equitable principles of trade. Because the proposed Data Vendor definition directly references the term "Extranet Service Provider," market participants seeking to understand their eligibility for the Program should not be required to consult the Cboe Global Markets North American Data Policies to determine how that term applies. By incorporating both defined terms into the Fee Schedule itself, the Exchange ensures that participants have access to the complete framework.

The Exchange further believes that the proposed rule change removes impediments to and perfects the mechanism of a free and open market and a national market system. The Data Vendor Program is designed to incentivize Data Vendors to integrate the Applicable Feeds, make them commercially available to subscribers, and redistribute them by providing fee waivers for External Distribution Fees for the Cboe One Summary Feed, Cboe One Premium Feed, and BZX Summary Depth Feed. By waiving the External Distribution Fee of \$5,000 per month for Cboe One Summary for the Summary Waiver Period, waiving the External Distribution Fee of \$12,500 per month for Cboe One Premium for the Premium Waiver Period, and waiving the External Distribution Fee of \$5,000 per month for BZX Summary Depth for the Summary

Depth Waiver Period, the Exchange encourages broader redistribution of its market data products. Broader distribution of market data enhances price transparency and supports informed decision-making across the national market system, which in turn perfects the mechanism of a free and open market by ensuring that market participants have access to comprehensive, competitive data offerings.

By allowing the waiver to begin while an eligible Data Vendor is actively integrating the Applicable Feed and working to make it commercially available, the Program lowers barriers to entry during the build-out period and incentivizes a broader set of market participants to enter the Exchange's market data distribution chain, thereby expanding the availability of market data throughout the national market system.

The proposed rule change also protects investors and the public interest. By encouraging Data Vendors to take in, transform, and redistribute market data feeds, the proposed program promotes greater availability of enriched market data products to downstream Distributors and Users. The transformation requirement—which may include aggregation across multiple sources, normalization into a consistent format, enrichment with derived analytics, or repackaging into a proprietary delivery mechanism such as a terminal, API, or feed—is a key element of qualifying as a Data Vendor and ensures that meaningful value is added to the data before redistributing it, thereby increasing the utility and accessibility of market information. To the extent the Program achieves its purpose and results in more widespread redistribution of the Applicable Feeds, market participants may benefit from enhanced access to consolidated, real-time price, last sale, and depth information through the distribution channels developed by Data Vendors.

Additionally, the codification of the existing Extranet Service Provider definition within the Fee Schedule provides additional clarity on the program requirements and codifies the definition that exists already in the Cboe Global Markets North American Market Data Policies. Furthermore, the clarification that External Distributors of both Cboe One Summary and Cboe One Premium are only responsible for paying the External Distribution Fee for Cboe One Premium promotes transparency by expressly codifying a practice that is already reflected in the Exchange's existing application of the fee provision. This reduces potential

confusion among market participants regarding their fee obligations.

Not Unfairly Discriminatory

The Exchange believes that the proposed Data Vendor Program is consistent with and complementary to its existing programs for other categories of market participants, and that offering a targeted fee waiver program specifically for Data Vendors does not constitute unfair discrimination. The Exchange has a history of establishing differentiated programs that recognize the distinct roles of different market participants. For example, the Small Retail Broker Distribution Program provides discounted Distribution Fees and Data Consolidation Fees for eligible broker-dealers distributing the applicable feeds to Non-Professional Data Users with whom the broker-dealer has a brokerage relationship.¹⁵ This program is designed to address the specific characteristics and economic needs of small retail broker-dealers. Similarly, the Small Retail Broker Hosted Solutions Program provides fee waivers for eligible Small Retail Brokers that provide the applicable feeds to other Small Retail Brokers via hosted solutions.¹⁶ This program recognizes that smaller retail brokers face unique integration challenges and cost constraints when building out hosted data solutions. In addition, the New Internal Distributor Waiver for the BZX Depth Data Feed waives Internal Distribution Fees for three months for Internal Distributors that have not received the BZX Depth Data Feed during the prior 18 months.¹⁷ This program incentivizes new Internal Distributors to integrate the depth-of-book feed into their systems. Lastly, the Exchange's affiliated options exchange, Cboe Exchange, Inc., introduced a 24-month waiver for qualifying retail brokers for its Complex Order Book Feed.¹⁸

The proposed Data Vendor Program is consistent with the Exchange's practice of creating a distinct program to serve a specific use case. Data Vendors occupy a distinct role in the market data distribution ecosystem. Unlike retail brokers, whose primary business is providing trade execution and account management services to Users (with market data distribution as an ancillary feature), Data Vendors are primarily engaged in the business of transforming and redistributing market data to other

Distributors. This fundamental difference in business model justifies a distinct program with tailored eligibility criteria and waiver periods. The waiver periods under the proposed Data Vendor Program—12 months for Cboe One Summary and 24 months for Cboe One Premium and BZX Summary Depth—are designed to reflect the relative complexity of integrating each feed. Depth-of-book products such as Cboe One Premium and BZX Summary Depth typically require more extensive technical build-out, including handling of larger data volumes, more complex display and aggregation logic, and more rigorous quality assurance processes. Additionally, BZX Summary Depth and Cboe One Premium are more expensive relative to the top of book feeds. This means that Data Vendors require additional interest from clients in these products before they can even break even. Accordingly, the Exchange believes a 24-month waiver period for these products is appropriate to provide sufficient time for Data Vendors to complete their build-out. Top-of-book and summary products, in contrast, are generally less complex to integrate, and the Exchange believes a 12-month waiver period is appropriate for Cboe One Summary.

Data Vendors' cost and investment trade-offs further support this distinction. A Data Vendor's primary commercial objective is to transform market data and make the resulting product available to unaffiliated downstream Distributors, rather than to provide market data only incidentally in support of another business (in comparison to retail brokers). Because a single Data Vendor can make a Cboe data product available through its platform to multiple downstream Distributors, the waiver is targeted to participants capable of materially expanding the product's distribution footprint. Like any business operator, a Data Vendor evaluates whether to add an Applicable Feed based on expected return on investment, weighing expected revenue against the upfront costs of connectivity, programming, technical integration, and sales and marketing, as well as the ongoing exchange market data fees associated with making the product available to subscribers. In many cases, a Data Vendor may need to add three to five new downstream Distributors merely to offset the ongoing External Distribution Fee. These costs are typically incremental: Data Vendors may already offer one or more equity feeds to clients and add an Applicable Feed only where it is expected to provide return on

¹⁵ See BZX Equities Fee Schedule.

¹⁶ See BZX Equities Fee Schedule.

¹⁷ *Id.*

¹⁸ See Securities Exchange Act Release No. 105198 (April 10, 2026), 91 FR 20204 (April 15, 2026) (SR-CBOE-2026-033).

investment beyond their current offerings. A retail broker's determination is different. A retail broker will often migrate or swap from a competitor's product, and may be able to implement the change through a Data Vendor API into its front-end with a simple entitlement change, without bearing the same upfront connectivity and technical build-out costs.

The waiver periods under the proposed Data Vendor Program are longer than certain other Exchange programs because they support more than initial feed access or recruitment of a first User.¹⁹ A qualifying Data Vendor must complete significant technical and commercial build-out before it can distribute the product and begin recovering its upfront costs. Its downstream Distributors may then have their own evaluation, contracting, and integration cycles, further extending the path to meaningful adoption; as noted above, a Data Vendor may need to add three to five new downstream Distributors to offset the ongoing External Distribution Fee.

The Exchange does not maintain comparable fee waiver programs for larger broker-dealers that distribute market data to their brokerage customers. The Exchange believes this distinction is appropriate. The Small Retail Broker programs are specifically designed to address the cost constraints faced by smaller broker-dealers in building out market data distribution capabilities. Larger broker-dealers typically have established data infrastructure and greater resources to absorb market data distribution costs as part of their overall brokerage operations, and, as such, their cost per user is meaningfully lower. Data distribution by large broker-dealers is typically an ancillary component of brokerage services offered. In contrast, a Data Vendor must incur incremental buildout fees and ongoing External Distribution Fees to establish and support a new external redistribution channel. The relevant distinction is therefore the nature of the service and the associated barriers to distribution, not the size or identity of the participant.

The Data Vendor Program is intended to address a different need: incentivizing specialized data redistribution firms to build out the Applicable Feeds and bring on additional downstream Distributors. By encouraging Data Vendors to invest in the transformation and redistribution of

the Exchange's market data products, the Program expands the reach and availability of this data throughout the national market system, benefiting end users and promoting competition. The Exchange therefore believes that creating a targeted program for Data Vendors, in addition to its existing programs for Small Retail Brokers and Internal Distributors, among others, is consistent with Section 6(b)(5) of the Act and does not constitute unfair discrimination.

The Exchange also believes the proposed rule change is consistent with Section 6(b)(5) of the Act in that it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Data Vendor Program is available to all External Distributors that satisfy the objective criteria set forth in the proposed definition of Data Vendor and, for waiver eligibility, the additional objective criteria regarding the 18-month lookback for prior receipt of the Applicable Feed and integration or active integration of the Applicable Feed for commercial availability. The distinctions drawn by the definition—(i) requiring that a Data Vendor's primary business objective be the solicitation of unaffiliated third-party Distributors, (ii) that it not maintain a brokerage relationship with Users, and (iii) that it not be an Extranet Service Provider—reflect meaningful differences in business models and market functions.

External Distributors

The Exchange believes that limiting the Data Vendor Program to External Distributors is not unfairly discriminatory. Internal Distributors and External Distributors occupy fundamentally different roles in the market data distribution ecosystem and are not similarly situated participants. An Internal Distributor receives a market data product and distributes it solely within its own entity, whereas an External Distributor redistributes data outside its entity to Users or other Distributors—and a Data Vendor, as a specialized category of External Distributor, further serves the specific function of soliciting unaffiliated third-party Distributors to redistribute a transformed market data product. The Data Vendor Program is designed precisely to incentivize and expand this type of external redistribution, a purpose that has no meaningful application to Internal Distributors who, by definition, cannot advance the proposed program's goal of broadening the reach of the Exchange's market data to downstream Distributors and end-user investors. Furthermore, the

Exchange already offers programs for its Internal Distributors that it does not offer for External Distributors.²⁰

Primary Business Is To Redistribute to Distributors

To be eligible as a Data Vendor, an External Distributor must be taking in data for the primary business purpose of selling access to the applicable feed as a service in its own right—not merely redistributing data in incidental support of broader business functions such as trade execution, account management, or brokerage services. The Exchange notes that as part of its business, a Data Vendor may redistribute a market data product to Users, but the primary purpose must be the redistribution of data to Distributors. The Exchange will assess whether an External Distributor's primary business purpose satisfies this criterion based on the External Distributor's publicly available marketing materials. This requirement is not unfairly discriminatory because it is directly tied to the purpose of the Program: encouraging entities whose core commercial activity is the transformation and redistribution of market data to build out the Applicable Feeds and bring on additional downstream Distributors, thereby expanding the reach and availability of the Exchange's data products. An entity that distributes market data only incidentally—as an ancillary feature of a brokerage, execution, or account management business—does not serve this purpose.

Transformed Market Data Product

The Exchange believes it is not unfairly discriminatory to require that a Data Vendor transform market data as a condition of eligibility, as transformation is a definitional characteristic that goes to the core of what distinguishes a Data Vendor from other categories of External Distributors and is directly tied to the Program's purpose of incentivizing participants that create new, differentiated distribution channels for the Exchange's consolidated market data. This reasoning is directly analogous to the rationale for excluding Extranet Service Providers—entities that transmit data without modification and therefore cannot create the type of value-added products, whether delivered via terminal, API, or proprietary feed, that the Program is designed to incentivize. Because the transformation requirement ensures that the Program's fee

¹⁹ However, as noted above, Cboe Exchange, Inc., offers a 24-month waiver for qualifying retail brokers for its Complex Order Book Feed.

²⁰ See, e.g., BZX Equities Fee Schedule that describes the New Internal Distributor Waiver for BZX Depth Data Feed.

incentives are directed only at entities whose business is built around adding that value, the Exchange believes this criterion is reasonable and does not constitute unfair discrimination.

No Brokerage Relationship With Users

The Exchange believes it is not unfairly discriminatory to require that Data Vendors not maintain a brokerage relationship with Users. The Exchange already maintains separate programs specifically for qualifying broker-dealers that distribute market data to their brokerage customers. Specifically, the Exchange offers the Small Retail Broker Distribution Program, which provides discounted Distribution Fees and Data Consolidation Fees for eligible broker-dealers distributing the applicable feeds to Non-Professional Data Users with whom the broker-dealer has a brokerage relationship. The Exchange also offers the Small Retail Broker Hosted Solutions Program, which provides fee waivers and lower data costs for Small Retail Brokers that provide the applicable feeds to other Small Retail Brokers via hosted solutions. These existing programs are specifically designed to encourage retail brokers to distribute market data, and the eligibility criteria for those programs reflect the characteristics of the retail brokerage business model.

The proposed Data Vendor Program does not displace or reduce the benefits available to retail brokers under those existing programs. Rather, it creates a parallel and complementary framework for a distinct category of participants—Data Vendors—that do not maintain brokerage relationships with Users, and whose primary business purpose is categorically different from that of a retail broker. Just as it would not be appropriate to extend the Small Retail Broker Program to Data Vendors, it is similarly appropriate—and not unfairly discriminatory—not to extend the Data Vendor Program to retail brokers or other participants that maintain brokerage relationships with their Users, whose needs are separately addressed by the Exchange's existing programs.

Not an Extranet Service Provider

The Exchange also believes it is not unfairly discriminatory to exclude Extranet Service Providers from the Data Vendor Program. An Extranet Service Provider, as defined, is an entity that transmits a market data product to data recipients without modification of the content, format, or other characteristics of the product. Extranet Service Providers do not transform, enrich, or add value to the data they transmit—they serve as conduits, passing data

through in its original form. This is fundamentally distinct from the function of a Data Vendor, which, by definition, must transform the Market Data Product as part of its service offering.

The Data Vendor Program is specifically premised on the value that transformation adds to the data distribution ecosystem. By enabling Data Vendors to create differentiated products—delivered via a terminal, API, proprietary feed, or other value-added mechanism—that appeal to a broader range of downstream Distributors, the Program advances the Exchange's goal of maximizing the reach and utility of its consolidated market data throughout the national market system. Extending the Program to Extranet Service Providers, which do not perform this transformative function, would undermine the Program's core purpose and would not serve the policy goal of broadening distribution of market data products in readily accessible, value-added formats.

The Exchange has created programs to address the distinct needs and business models of different categories of market participants, and the proposed Data Vendor Program is a natural extension of this approach. In addition to the Small Retail Broker programs described above, the Exchange also offers fee waivers for eligible Internal Distributors of the BZX Depth Data Feed, which are intended to incentivize new Internal Distributors to integrate data feeds into their systems. The differentiation between Data Vendors and other categories of market participants reflects the distinct roles these entities play and the distinct incentive structures appropriate to each and does not constitute unfair discrimination.

18-Month and Integration Requirements

The Exchange further believes it is not unfairly discriminatory to limit the Program to Data Vendors that have not received the Applicable Feed for which they seek a waiver during the 18 months preceding the waiver application date, and that have integrated, or are actively in the process of integrating,²¹ the Applicable Feed and making it commercially available to subscribers. The 18-month limitation is designed to ensure that the fee waivers serve their intended purpose of reducing the upfront cost barriers for new market participants. This approach is directly consistent with the analogous frameworks the Exchange has adopted

in prior programs—including the Internal Distributor Waiver for the BZX Depth Data Feed, which similarly limits fee relief to distributors that have not received the relevant feed in the prior 18 months. The integration and commercial availability requirement is likewise reasonable because it ensures that the waiver is directed to Data Vendors that are undertaking the build-out necessary to distribute the Applicable Feed to subscribers, while not requiring full integration or commercial availability before the waiver begins. The Exchange therefore believes that these objective limitations are reasonable and appropriate, prevent the Program from operating as a permanent subsidy for established distributors, and are not unfairly discriminatory.

The Exchange also believes the proposed rule change is consistent with Section 6(b)(4) of the Act,²² which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Trading Permit Holders and other persons using its facilities. The proposed fee waivers represent a reasonable and equitable allocation of charges. The fee waivers for External Distribution Fees are limited in duration—the Summary Waiver Period for Cboe One Summary, the Premium Waiver Period for Cboe One Premium, and the Summary Depth Waiver Period for BZX Summary Depth—and are available only to Data Vendors that have not received the Applicable Feed for which they seek a waiver during the 18 months preceding the waiver application date and that have integrated, or are actively in the process of integrating, the Applicable Feed and making it commercially available to subscribers. This time-limited structure ensures that the waivers serve their intended purpose of incentivizing new market entry and build-out of data feeds. The 18-month lookback requirement further ensures the equitable allocation of fees by limiting the Program to new feeds for Data Vendors, and the integration and commercial availability requirement ensures that the waiver is tied to actual build-out and distribution activity. The Exchange notes that this same 18-month standard is consistent with the requirements applied in its other fee waiver programs.

The clarification that External Distributors of both Cboe One Summary and Cboe One Premium shall only be responsible for paying the External Distribution Fee for Cboe One Premium

²¹ The Exchange notes that no specific step is required for this, only that Data Vendor is working to integrate the Applicable Feed into its system.

²² 15 U.S.C. 78f(b)(4).

does not alter the economic substance of the Exchange's existing fee structure and does not impose any new or increased fees on market participants. Rather, it expressly codifies the Exchange's existing application of the user fee offset provisions—under which an External Distributor disseminating both products is assessed only the Cboe One Premium External Distribution Fee—thereby ensuring that all market participants have a clear and equitable understanding of their fee obligations. The Exchange therefore believes the proposed rule change provides for the equitable allocation of reasonable fees among persons using its facilities.

Lastly, the Exchange believes that the limitations regarding the waiver structure for both Cboe One Premium and Cboe One Summary equitably allocate fees. With respect to the Cboe One Summary waiver, only Data Vendors that (i) have not received Cboe One Summary during the 18 months preceding the waiver application date, (ii) are integrating or actively in the process of integrating Cboe One Summary and making it commercially available to subscribers, and (iii) are not receiving Cboe One Premium are eligible for the Summary Waiver Period. The Exchange believes that this is reasonable, as a firm that subscribes to Cboe One Premium already may elect to receive (without incurring an additional External Distribution Fee) Cboe One Summary Feed. For this reason, there is no need to provide a separate Summary Waiver Period while a firm receives Cboe One Premium, because that firm may receive the Cboe One Summary Feed without paying an additional External Distribution Fee that the proposed program seeks to waive.

Next, the Exchange notes that if a Data Vendor currently receives Cboe One Summary and elects to receive Cboe One Premium under the proposed program, so long as the Data Vendor has not received the Cboe One Premium Feed during the 18 months preceding the waiver application date and satisfies the integration and commercial availability requirement with respect to Cboe One Premium, the Data Vendor may receive the Premium Waiver Period. During that period, the Data Vendor's existing Cboe One Summary ²³

²³ For example, if a Data Vendor currently subscribes to Cboe One Summary Feed and is eligible for the proposed program for the Cboe One Premium Feed, no separate External Distribution Fee would be assessed for Cboe One Summary during the Premium Waiver Period because Cboe One Summary is included in the Cboe One Premium subscription. The Data Vendor would receive the Premium Waiver Period and would not receive a separate Summary Waiver Period during that time.

subscription will be covered under the Premium Waiver, and no separate External Distribution Fee will be assessed for Cboe One Summary. This is because the Cboe One Summary External Distribution Fee is subsumed within the Cboe One Premium External Distribution Fee—accordingly, there is no separate Cboe One Summary fee to waive for a firm receiving Cboe One Premium. The Exchange believes this treatment is reasonable because it avoids providing overlapping or duplicative waiver relief while still incentivizing an existing Summary subscriber to build out Cboe One Premium.

Lastly, if a Data Vendor has not received either Cboe One Summary or Cboe One Premium during the 18 months preceding the waiver application date and elects to build out both Cboe One feeds simultaneously, the Data Vendor will not receive separate Summary and Premium waivers. Instead, because the Cboe One Summary External Distribution Fee is subsumed within the Cboe One Premium External Distribution Fee, the Data Vendor will receive only the Premium Waiver Period, and no separate Summary Waiver Period will apply while it receives Cboe One Premium.

With respect to the BZX Summary Depth waiver, a Data Vendor is eligible for the Summary Depth Waiver Period only if it has not received the BZX Summary Depth Feed during the 18 months preceding the waiver application date and satisfies the integration and commercial availability requirement with respect to BZX Summary Depth. The Exchange believes this treatment is reasonable because it applies the same objective eligibility standards to BZX Summary Depth while providing a 24-month period intended to facilitate the build-out and commercial launch of that feed.

For all of the foregoing reasons, the Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder, including, in particular, the requirements of Sections 6(b)(4) ²⁴ and 6(b)(5) ²⁵ of the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe the proposed

rule change imposes any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed Data Vendor Program is available to all External Distributors that satisfy the objective, clearly defined criteria set forth in the proposed definition of "Data Vendor" and the Program's waiver eligibility standards. Any External Distributor that, as part of its primary business objective, solicits unaffiliated third-party Distributors to redistribute a transformed Market Data Product, does not maintain a brokerage relationship with Users in connection with the applicable Market Data Product, is not an Extranet Service Provider, has not received the Applicable Feed for which it seeks a waiver during the 18 months preceding the waiver application date, and has integrated or is actively integrating the Applicable Feed and making it commercially available to subscribers may qualify for the Program on equal terms. Because eligibility is determined by objective, verifiable criteria rather than by subjective or discretionary determinations, no External Distributor is advantaged or disadvantaged relative to any other similarly situated participant.

To the extent that certain External Distributors—such as retail broker-dealers or Extranet Service Providers—do not qualify for the Data Vendor Program, this does not impose a burden on intramarket competition. As described above, retail broker-dealers and Extranet Service Providers are not similarly situated to Data Vendors. Retail broker-dealers distribute market data to their own brokerage customers as an ancillary feature of their core business of providing trade execution and account management services, and their data distribution needs are more appropriately addressed by the Exchange's existing Small Retail Broker Distribution Program and Small Retail Broker Hosted Solutions Program. Extranet Service Providers, by contrast, transmit data in its original form without transformation, and therefore do not serve the same function in the data distribution ecosystem as Data Vendors, which aggregate, transform, and redistribute data to downstream Distributors. Designing a fee program specifically targeted to Data Vendors, rather than applying it uniformly across all categories of External Distributors, does not burden intramarket competition—it reflects the materially different roles, business models, and barriers of these distinct categories of participants.

²⁴ 15 U.S.C. 78f(b)(4).

²⁵ 15 U.S.C. 78f(b)(5).

Similarly, limiting the Data Vendor Program to External Distributors and not extending it to Internal Distributors does not impose a burden on intramarket competition. Internal Distributors receive and use market data solely within their own legal entities and do not redistribute data to third parties outside their organizations. They are therefore not participants in the same competitive market for external data redistribution that the Program is designed to promote, and their needs are separately addressed through the Exchange's existing Internal Distributor programs—including the New Internal Distributor Waiver for the BZX Summary Depth Data Feed. The proposed Program is specifically designed to incentivize external redistribution of the Applicable Feeds, a purpose that has no meaningful application to Internal Distributors and that creates no competitive disadvantage for them.

The Exchange does not believe the proposed rule change imposes any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the Exchange believes the proposed rule change will enhance intermarket competition by incentivizing a broader class of market participants to subscribe to and redistribute the Exchange's market data products, thereby increasing the Exchange's ability to compete with other national securities exchanges and data vendors for the business of Data Vendors and their downstream Distributor clients.

The market for equity market data is highly competitive. Numerous national securities exchanges offer products that compete directly with the Cboe One Summary Feed, Cboe One Premium Feed, and BZX Summary Depth Feed. Market participants can obtain comprehensive market data from numerous sources, including competing exchanges (such as NYSE and Nasdaq), the consolidated tape (SIP), and alternative trading systems. Prospective Data Vendors evaluating whether to build out the Applicable Feeds must weigh the upfront costs of connectivity, software development, integration, and commercial launch against the commercial opportunity presented by the Exchange's data products. The Data Vendor Program is designed to make the Exchange's market data offering competitively priced relative to alternative options, encouraging Data Vendors to enter the Exchange's market data distribution chain and thereby expanding the availability and reach of

the Exchange's market data throughout the national market system.

Far from burdening intermarket competition, the proposed rule change is a direct response to competitive market forces. The Exchange's decision to offer targeted fee waivers to new Data Vendors reflects its recognition that it must compete aggressively for the participation of data redistribution firms, and that reducing the upfront cost of entry is a legitimate and necessary competitive tool in the market for exchange data products. The Commission has recognized that exchanges operate in a competitive environment with respect to market data, and that exchange fee programs designed to attract new participants and expand market data distribution are consistent with the Act's goals of promoting competition and efficiency in the national market system.

The proposed clarification that External Distributors of both Cboe One Summary and Cboe One Premium are only responsible for paying the External Distribution Fee for Cboe One Premium similarly does not impose any burden on intermarket competition. This change does not alter the economic substance of the Exchange's existing fee structure and does not impose any new fees on any market participant. It simply makes explicit the Exchange's existing application of the user fee offset provisions, reducing potential confusion and ensuring that all market participants have a clear and consistent understanding of their fee obligations. Regulatory clarity of this nature promotes, rather than burdens, competition by enabling market participants to make fully informed decisions about their participation in the Exchange's market data programs.

With respect to the Cboe One Summary and Cboe One Premium feeds specifically, the Exchange notes that the proposed Data Vendor Program does not impose any burden on competition arising from differential pricing between Cboe One and the applicable underlying equities feeds.²⁶ The Exchange notes that historically, its pricing for Cboe One products has been based on the sum of the External Distribution Fees for the four underlying equities feeds.²⁷ As

²⁶ For Cboe One Summary, the four equities feeds are BZX Top, BYX Top, EDGA Top, and EDGX Top. For Cboe One Premium, the four equities feeds are BZX Summary Depth, BYX Summary Depth, EDGA Summary Depth, and EDGX Summary Depth.

²⁷ For example, under the Small Retail Broker Distribution Program, the discounted External Distribution Fee for Cboe One Summary is \$3,500 per month, which equals the sum of the External Distribution Fees for the four underlying Top feeds: BZX Top (\$2,500), BYX Top (\$250), EDGA Top (\$0), and EDGX Top (\$750). See Cboe BZX, BYX, EDGA,

an initial matter, not all underlying equities feeds are offered under this Program. The proposed Data Vendor Program applies only to the following feeds: EDGX Top, EDGX Summary Depth, BZX Summary Depth, Cboe One Premium, and Cboe One Summary. A Data Vendor may choose to receive a waiver for Cboe One Summary or Cboe One Premium, or for EDGX Top, or for EDGX Summary Depth, or for BZX Summary Depth, or any combination thereof, subject to the applicable eligibility requirements. However, the proposed Program does not offer fee waivers for BZX Top, BYX Top, or EDGA Top data feeds, nor does it offer fee waivers for BYX Summary Depth or EDGA Summary Depth. Accordingly, the applicable underlying equities feeds do not "sum" to the applicable Cboe One feed under this proposed Program.²⁸

The Exchange has selected the products covered by the Program based on where it sees the greatest opportunity to expand distribution and align Data Vendor coverage with downstream end-user demand. This product-specific focus is not unfairly discriminatory. All qualifying Data Vendors are subject to the same product-specific eligibility requirements, and offering waivers for some, rather than all four, of the underlying feeds does not result in unequal treatment among similarly situated participants.

Even setting aside the foregoing, the Exchange does not believe that pricing the Cboe One Summary or Cboe One Premium feeds differently from the underlying equities feeds imposes any burden on competition. To date, the Exchange is not aware of any distributor that purchases the underlying equities feeds (either the Top or Summary Depth Feeds) for the purpose of creating its own consolidated product comparable to Cboe One Summary or Cboe One Premium. This demonstrates that the practical market concern underlying any perceived burden—that distributors

and EDGX U.S. Equities Exchange Fee Schedules. Because the proposed Data Vendor Program does not offer fee waivers for BZX Top, BYX Top, EDGA Top, BYX Summary Depth, or EDGA Summary Depth, the External Distribution Fee for each of those feeds would remain in effect for any Data Vendor receiving those feeds, while the External Distribution Fee for Cboe One Summary (\$0 during the Summary Waiver Period) or Cboe One Premium (\$0 during the Premium Waiver Period) would be waived. This results in a pricing differential between the sum of the underlying equities feeds and the Cboe One feeds under this Program.

²⁸ For example, the External Distribution Fee is \$0 for Cboe One Summary under the proposed Program, but the sum of the four underlying equities feeds under the proposed Program is \$2,750 (\$0 EDGX Top + \$2,500 BZX Top + \$250 BYX Top + \$0 EDGA Top).

might be disadvantaged by differential pricing on Cboe One that is not extended to the underlying feeds—does not correspond to actual market behavior.

Moreover, Cboe One Summary and Cboe One Premium are distinct, independent data products—they are not merely consolidations of data from the four underlying equities feeds. In addition to consolidating data from BZX, BYX, EDGX, and EDGA, Cboe One includes supplementary data elements not found in the individual underlying feeds, including data derived from the Securities Information Processor (“SIP”) containing information on the national cumulative volume. This additional content makes Cboe One a distinct product with independent utility. Market participants subscribe to the underlying equities feeds and Cboe One for fundamentally different purposes. For example, a subscriber may be interested only in top-of-book data from a single exchange, such as EDGX, for trading, routing or compliance purposes. Such a subscriber has no need for a consolidated product. Conversely, subscribers seeking a comprehensive, cross-exchange view of Cboe liquidity choose Cboe One precisely because it offers consolidated data with additional enhancements. These distinct use cases support differentiated pricing treatment.

Data Vendors may, in theory, choose to purchase each of the four underlying equities feeds and create their own consolidated product. However, the \$1,000 monthly Data Consolidation Fee associated with purchasing Cboe One (and the primary pricing differential) provides access to a production-ready, supported consolidated product, and a vendor seeking to create a comparable offering independently would bear not only the applicable source-feed, but also the costs of developing and maintaining multiple feed handlers, normalizing the data, applying aggregation logic, performing quality assurance, supporting specification changes, and monitoring production feed health. Clients also generally prefer an official exchange product, such as Cboe One, over a vendor-derived consolidated product that requires reporting across multiple exchange products. From a user-experience perspective, the exchange-provided Cboe One is therefore a better solution. A simple combination of the four underlying feeds also would not recreate all Cboe One content, including supplementary SIP-derived information. The Exchange therefore believes that the \$1,000 monthly Data Consolidation Fee is less than the full economic cost of independently creating and maintaining

a comparable product, particularly for a vendor that does not already operate the required infrastructure.

Section 6(b)(8) of the Exchange Act requires that exchange rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Cboe One Summary, Cboe One Premium, and the applicable underlying equities feeds are separate products serving different market needs. Just as the Commission has permitted exchanges to offer different fees for depth-of-book data versus top-of-book data, the Exchange should have discretion to price its consolidated summary product differently from its component feeds.

Finally, the proposed Data Vendor Program is pro-competitive. By reducing the cost of consolidated and top-of-book data products for qualifying Data Vendors, the Exchange enables broader distribution of comprehensive market information to downstream distributors and, ultimately, to retail and institutional investors. Wider access to market data promotes informed investment decisions, enhances market efficiency, and supports the Exchange Act’s goals of investor protection and fair and efficient markets. The Exchange does not view external distributors as competitors for its real-time feed offerings; rather, distributors serve as essential conduits that expand delivery of Cboe real-time market data to end users who do not have the technical capability or commercial need to connect directly to Cboe’s individual market data feeds. This is particularly important for the retail community, as retail investors typically access market data through vendors rather than purchasing it directly from exchanges. By offering the proposed Data Vendor Program, the Exchange enables distributors to deliver competitively priced, comprehensive market data to a broader audience, thereby enhancing—not burdening—competition in the market data landscape.

For the foregoing reasons, the Exchange does not believe that the proposed rule change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act²⁹ and paragraph (f) of Rule 19b-4³⁰ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeBZX-2026-074 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-CboeBZX-2026-074. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeBZX-2026-074 and should be submitted on or before October 9, 2026.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106375; File No. SR–PEARL–2026–39]

Self-Regulatory Organizations; MIAx PEARL, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 2628 Concerning the Resumption of Trading Following a Level 3 Market-Wide Circuit Breaker Halt in Connection With the Industry's Expansion of Trading Hours to 23 Hours per Day, 5 Days per Week

September 15, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”) ¹ and Rule 19b–4 thereunder, ² notice is hereby given that, on September 3, 2026, MIAx PEARL, LLC (“MIAx Pearl” or the “Exchange”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange to amend Rule 2628 (“Trading Halts Due to Extraordinary Market Volatility”) concerning the resumption of trading following a Level 3 market-wide circuit breaker halt in connection with the industry's expansion of trading hours to 23 hours per day, 5 days per week. The text of the proposed rule change is available on the Exchange's website at <https://www.miaxglobal.com/markets/us-equities/pearl-equities/rule-filings>, and at MIAx Pearl's principal office.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, MIAx Pearl included statements

concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. MIAx Pearl has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 2628 (“Trading Halts Due to Extraordinary Market Volatility”) concerning the resumption of trading following a Level 3 market-wide circuit breaker (“MWCB”) halt (“Level 3 Market Decline”) in connection with the industry's expansion of trading hours to 23 hours per day, 5 days per week (“23/5 Trading”). Some exchanges are planning to offer overnight trading, ³ and as a result, the uniform Level 3 Market Decline rules of each exchange are being modified, as explained further below.

Background

The MWCB mechanism under Rule 2628 provides an important, automatic mechanism that is invoked to promote stability and investor confidence during a period of significant stress when U.S. securities markets experience extreme broad-based declines. All U.S. equity exchanges and FINRA (collectively, the self-regulatory organizations or “SROs”) adopted uniform rules relating to the MWCB mechanism in 2012, which are designed to slow the effects of extreme price movement through coordinated trading halts across U.S. securities markets when severe price declines reach levels that may exhaust market liquidity. ⁴ Such market-wide circuit breakers provide for trading halts in all U.S. cash equity and equities options markets during a severe market decline as measured by a single-day decline in the S&P 500 Index during regular trading hours.

³ See, e.g., Securities Exchange Act Release No. 105532 (May 21, 2026), 91 FR 31509 (May 27, 2026) (SR–NYSEARCA–2026–53) (“NYSE Arca 23/5 Trading Notice”).

⁴ See Securities Exchange Act Release No. 67090 (May 31, 2012), 77 FR 33531 (June 6, 2012) (SR–BATS–2011–038; SR–BYX–2011–025; SR–BX–2011–068; SR–CBOE–2011–087; SR–C2–2011–024; SR–CHX–2011–30; SR–EDGA–2011–31; SR–EDGX–2011–30; SR–FINRA–2011–054; SR–ISE–2011–61; SR–NASDAQ–2011–131; SR–NSX–2011–11; SR–NYSE–2011–48; SR–NYSEAmex–2011–73; SR–NYSEArca–2011–68; SR–Phlx–2011–129) (“MWCB Approval Order”).

Pursuant to Rule 2628, a market-wide trading halt will be triggered if the S&P 500 Index declines in price by specified percentages from the prior day's closing price of that index. Currently, the triggers are set at three circuit breaker thresholds: 7% (Level 1), 13% (Level 2), and 20% (Level 3). A market decline that triggers a Level 1 or Level 2 halt after 9:30 a.m. ET and before 3:25 p.m. ET would halt market-wide trading for 15 minutes, while a similar market decline at or after 3:25 p.m. ET would not halt market-wide trading. If a Level 3 Market Decline occurs at any time during the trading day, trading in all stocks will halt on the Exchange for the remainder of the trading day, and will resume the following trading day at 4:00 a.m. ET.

Proposal

The Exchange now proposes to amend Rule 2628 to reflect extended trading hours under 23/5 Trading. On December 6, 20206 [sic], several exchanges intend to offer new overnight trading sessions that would be available from 9:00 p.m. ET to 4:00 a.m. ET, increasing their hours of operation.

As discussed, consistent with the uniform rules in place across all SROs, current Rule 2628(b)(2) provides that if a Level 3 Market Decline occurs at any time during the trading day, the Exchange shall halt trading in all stocks on the Exchange for the remainder of the trading day. Currently, that means that the earliest that any exchange would re-open trading after a Level 3 Market Decline is 4:00 a.m. ET the following day, since no SROs are open for trading before 4:00 a.m. ET.

Unless amended, when 23/5 Trading is launched, the current rule's reference to halting “for the remainder of the trading day” ⁵ would require SROs participating in 23/5 Trading to re-open trading at an earlier time, i.e., 9:00 p.m. ET on the same calendar day, when those SROs' systems would generally become available for overnight trading. The Exchange does not believe that this is an expected or desired result and is therefore amending this rule in coordination with the other SROs such that trading on any SRO will not resume until 4:00 a.m. ET or later on the following trading day, consistent with current market practice. This proposed rule change is therefore not intended to make any substantive changes to the MWCB mechanism. Rather, the proposed rule change would preserve the current resumption time following a Level 3 Market Decline.

⁵ See Rule 2628(b)(2).

³¹ 17 CFR 200.30–3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

To effect this change, the Exchange proposes to delete the language in Rule 26258(b)(2) [sic] that provides that trading in all stocks will halt on the Exchange “for the remainder of the trading day” if a Level 3 Market Decline occurs at any time during the trading day, and replace it with new language that explicitly provides that trading in all stocks would halt on the Exchange until 4:00 a.m. ET or later on the following trading day.

Implementation

The Exchange plans to implement the proposed rule change on December 6, 2026, the date on which several exchanges intend to offer new overnight trading sessions that would be available from 9:00 p.m. ET to 4:00 a.m. ET.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁶ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁷ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The MWCB mechanism described in Rule 2628 is an important, automatic mechanism that is invoked to promote stability and investor confidence during periods of significant stress when U.S. securities markets experience extreme broad-based declines. The proposed rule change, when applied uniformly by all SROs, would ensure that the current 4:00 a.m. ET resumption time following a Level 3 halt continues to apply under 23/5 Trading, notwithstanding current rule text implying that the resumption time would coincide with the start of overnight trading on SROs operating an overnight session.

Rather than leave the rule in place as is, which would result in an earlier resumption time than originally contemplated when the rule was adopted, the Exchange, the other U.S. equity exchanges, and FINRA met alongside industry representatives to determine the appropriate resumption time. Following those discussions, the collective decision was made to retain the 4:00 a.m. ET resumption time, notwithstanding the fact that an earlier resumption time would be possible with the introduction of 23/5 Trading. The proposed rule change codifies this decision into the Exchange’s rules. The Exchange understands that the other

SROs will also be filing similar proposed rule changes. As a result, the market as a whole, including on- and off-exchange, will continue to be subject to harmonized rules for the resumption of trading following a Level 3 Market Decline.

While the SROs had previously decided to tie the resumption time following a Level 3 halt to the earliest SRO opening time, the upcoming transition to 23/5 Trading raises various concerns that warrant a change from the current approach.

First, the Exchange notes that the MWCB mechanism was designed to provide a cooling-off period where market participants would be provided with additional time to evaluate the market events that led to the decline before determining how to position their trading activity for the next day. With the introduction of 23/5 Trading and the start of overnight trading on some SROs at 9:00 p.m. ET, however, this cooling-off period could be materially shortened, reducing one of the key benefits that the MWCB mechanism was designed to provide in the first place. Rather than shorten the cooling-off period and risk this benefit, the Exchange believes the market would be better served by a change to the length of the associated trading halt that mirrors current market practice. Under the proposed rule, as is the case today, after a Level 3 halt, all SROs would reopen trading at 4:00 a.m. ET or later, and no SRO would offer an overnight trading session starting on the day of a Level 3 halt.

Second, overnight trading may be subject to different liquidity and participation considerations than the current pre-market sessions that start at or after 4:00 a.m. ET. Notably, while retail investors have expressed interest in overnight trading, the Exchange expects that institutional investors will take more time to transition to a round-the-clock model. However, such institutional participation may be of heightened importance following a Level 3 halt, as these investors are likely to have views on the underlying market events that led to the Level 3 Market Decline in the first place. The Exchange is concerned that opening during hours that such participants do not normally trade may impact the quality of price discovery at a time of significant market volatility. Waiting until 4:00 a.m. ET to resume trading would facilitate broader participation and therefore price discovery.

Finally, the Exchange notes that the Commission recently approved an amendment to the Plan to Address Extraordinary Market Volatility (“LULD

Plan”) that would establish new price protections from 9:00 p.m. ET to 4:00 a.m. ET.⁸ While these price bands would help to assure a fair and orderly market during normal market conditions, it is possible that they would instead prevent normal price discovery following a Level 3 Market Decline. Rather than allowing trading to resume with such price bands in effect, which would represent a change from the current trading reopening following a Level 3 Market Decline, the Exchange believes that requiring SROs to wait until 4:00 a.m. ET or later to resume trading would ensure that price discovery can occur unimpeded during pre-market trading, as it does today, which may further inform prices going into the opening auction and regular market hours trading following a Level 3 halt.

Given the factors discussed above, the Exchange believes that trading in all securities on the Exchange should not resume before 4:00 a.m. ET on the trading day after a Level 3 halt. This decision, which the Exchange understands will also be reflected in the rules of the other SROs, would promote a fair and orderly market at a time of significant market volatility, and thereby protect investors and the public interest. In addition, while the actual Level 3 resumption time would not be changing in practice—as proposed, the current resumption time and future resumption time would both be 4:00 a.m. ET at the earliest—the Exchange believes that it is appropriate to amend its rules to ensure that its rules reflect the upcoming changes due to 23/5 Trading. Without this change, market participants may mistakenly believe that the Exchange intends for trading to reopen on overnight trading exchanges at 9:00 p.m. ET following a Level 3 halt. The proposed rule change would therefore facilitate operational transparency while providing for a fair and orderly market.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act because the proposal would ensure the continued, uninterrupted operation of a consistent mechanism to halt trading across U.S.

⁸ See Securities Exchange Act Release No. 106042 (August 5, 2026), 91 FR 51515 (August 10, 2026) (Order Granting Approval of the Twenty-Seventh Amendment to the National Market System Plan to Address Extraordinary Market Volatility to Establish Temporary Price Band Protections in Overnight Trading).

⁶ 15 U.S.C. 78f(b).

⁷ 15 U.S.C. 78f(b)(5).

securities markets. Further, the Exchange understands that the other SROs intend to file proposed rule changes to ensure a consistent resumption time at 4:00 a.m. or later ET across markets. Thus, the proposed rule change will help to ensure consistency across market centers without implicating any competitive issues.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act⁹ and subparagraph (f)(6) of Rule 19b-4 thereunder.¹⁰

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or

- Send an email to rule-comments@sec.gov. Please include file number SR-PEARL-2026-39 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. All submissions should refer to file number SR-PEARL-2026-39. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-PEARL-2026-39 and should be submitted on or before October 9, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹¹

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-106356; File No. SR-NYSE-2026-41]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Rule 7.18 Regarding Trading Halts

September 15, 2026.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 ("Act")² and Rule 19b-4 thereunder,³ notice is hereby given that on September 1, 2026, New York Stock Exchange LLC ("NYSE" or the "Exchange") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared

by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 7.18 ("Trading Halts") to set forth specific requirements for halting and resuming trading in a security that is subject to certain corporate actions. The proposed rule change is available on the Exchange's website at www.nyse.com and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

New York Stock Exchange LLC ("NYSE" or the "Exchange") proposes to amend Rule 7.18 ("Trading Halts") to set forth specific requirements for halting and resuming trading in a security that is subject to certain corporate actions.

In conjunction with the industry's plans for the introduction of trading 23 hours a day, 5 days a week ("23/5 Trading"), the Exchange's affiliate exchange, NYSE Arca, Inc. ("NYSE Arca"), filed with the Commission a proposal to amend its rules to set forth specific requirements for halting trading in a security for which the Exchange is the Primary Listing Market that is subject to certain issuer-related corporate actions and for resuming trading in that security using a Trading Halt Auction. NYSE Arca explained that the proposal would expand on the framework already in place with respect to its authority to declare a mandatory regulatory halt in advance of a reverse stock split, thereby providing greater transparency and clarity with respect to the situations in which trading certain

⁹ 15 U.S.C. 78s(b)(3)(A)(iii).

¹⁰ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

¹¹ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

securities subject to issuer-related corporate actions will be halted and the process through which that halt will be implemented and terminated. On July 8, 2026, the Commission published a notice of filing and immediate effectiveness of NYSE Arca's proposal.⁴

The Exchange now proposes to make the same changes to its own rules. The Exchange understands that the other Primary Listing Markets also plan to implement substantially identical versions of this rule to ensure consistent treatment of corporate actions across the market.

Background

In 2024, the Commission noticed for immediate effectiveness the Exchange's filing establishing the Exchange's authority to declare a mandatory regulatory halt in a security for which the Exchange is the Primary Listing Market when that security is subject to a reverse stock split.⁵ Specifically, the Exchange proposed halting such a security before the end of post-market trading on other markets on the day immediately before the effective date of a reverse stock split, with trading to resume with a Trading Halt Auction after 9:30 a.m. Eastern Time ("ET") on the next trading day, at the start of the Exchange's Core Trading Session.⁶ The Exchange noted that because it processes reverse stock splits overnight, having the security reopen for trading on other markets at 4:00 a.m. ET raised the "potential for errors resulting in a material effect on the market resulting from market participants' processing of the reverse stock split, including incorrect adjustment or entry of orders."⁷ The Exchange explained that this concern could be rectified by imposing a trading halt, "which would

prohibit pre-market trading immediately after a reverse stock split" and open trading in such securities with a Trading Halt Auction after 9:30 a.m., at the start of the Exchange's Core Trading Session.⁸ The Exchange further noted that imposing such a trading halt and deferring the opening of the security until after 9:30 a.m. ET would "allow the Exchange and market participants to better detect any errors or problems with orders for the security resulting from the reverse stock split before trading in the security begins and thereby avoid any material effect on the market."⁹ In approving the substantively identical proposal of another market, the Commission noted that the proposal was "designed to promote fair and orderly trading on the Exchange by reducing the potential for order entry or other system-related errors associated with a reverse stock split in a security for which [the Exchange] is the Primary Listing Market."¹⁰

With the launch of 23/5 Trading later this year, the concerns that led the Exchange to adopt a regulatory halt framework for reverse stock splits will likewise arise with respect to a broader set of corporate actions. Although the Exchange does not currently plan to extend its own trading hours, the Exchange is a Primary Listing Market whose listed securities may trade on any venue, including NYSE Arca and other exchanges that opt to offer 23/5 Trading. Under the current market structure, the Exchange processes corporate action-related changes and updates for its listed securities during overnight hours. Other market participants, including broker-dealers, likewise use that overnight period to process corporate action-related information and adjust quotes, orders, and related instructions accordingly.

Under 23/5 Trading, however, trading in the Exchange's listed securities will resume on other markets at 9:00 p.m., only one hour after the close of trading at 8:00 p.m. Consequently, there will no longer be a substantial non-trading window during which the Exchange and market participants can process such corporate actions without potentially impacting overnight trading on other markets. These corporate actions require coordinated updates across Exchange

and market-participant systems—including adjustments to orders, quotes, and related instructions—to ensure orderly trading and accurate pricing and execution in the affected security. With only a one-hour pause between trading days, neither the Exchange nor other market participants would have sufficient time to process and incorporate corporate action-related information—such as adjustments to systems, orders, quotes, and related instructions—without the risk that trading could occur in the affected security based on incomplete or inconsistent information. In short, the continued trading of securities undergoing such corporate actions could potentially result in price dislocations, investor confusion, erroneous executions, and general operational risk.

To address these concerns, the Exchange proposes to implement substantially the same changes that the Commission recently noticed for immediate effectiveness on NYSE Arca. The Exchange proposes to build on the framework established under Rule 7.18 for reverse stock splits by extending that rule's mandatory regulatory halt requirement to additional corporate actions that, much like reverse stock splits, require a clearly defined and transparent pause in trading to permit coordinated processing. As proposed, under 23/5 Trading, if a security is affected by any of the corporate actions enumerated in the proposal, the Exchange would implement a mandatory regulatory halt¹¹ in that security before the start of overnight trading on other markets at 9:00 p.m. ET, and trading would resume with a Trading Halt Auction after 9:30 a.m. ET. The Exchange believes these changes would provide important operational safeguards by ensuring that both the Exchange and market participants have adequate time to process such corporate actions in a nearly continuous trading environment, thereby preserving a protection that has historically been implicit in a market structure with limited trading hours.

Proposed Rule Change

Implicit in Rule 7.18 is the recognition that certain corporate actions—such as reverse stock splits—require a clearly defined and transparent pause in trading to permit their coordinated processing and thereby avoid the risks associated with concurrent trading in the affected

⁴ See Securities Exchange Release No. 105862 (July 8, 2026), 91 FR 42999 (July 13, 2026) (SR-NYSEARCA-2026-71) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Amend Rule 7.18—E Regarding Regulatory Halts for Corporate Actions and Issuer-Related Events).

⁵ See Securities Exchange Act Release No. 99974 (April 17, 2024), 89 FR 30415 (April 23, 2024) (SR-NYSE-2024-22) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Amend Rule 123D) ("Reverse Stock Split Proposal").

⁶ The Exchange noted in its filing that its affiliates NYSE American LLC and NYSE Arca, Inc. had filed similar rule changes proposing to re-open a security subject to a reverse stock split trading halt with a Trading Halt Auction at 9:00 a.m., during those exchanges' Early Trading Sessions. The Exchange explained that because it does not have an early trading session for securities for which it is the Primary Listing Market, it instead proposed that a security for which the Exchange is the Primary Listing Market that is subject to a reverse stock split trading halt would re-open with a Trading Halt Auction after 9:30 a.m., at the start of the Exchange's Core Trading Session. See Reverse Stock Split Proposal, *supra* note 5, at 30416 n.10.

⁸ *Id.*, 89 FR at 30416.

⁹ *Id.*

¹⁰ See Securities Exchange Act Release No. 98878 (November 7, 2023), 88 FR 78081 (November 14, 2023) SR-NASDAQ-2023-036) (Notice of Filing of Amendment No. 1 and Order Granting Accelerated Approval of Proposed Change, as Modified by Amendment No. 1, Relating to Nasdaq Rules 4120 and 4753).

¹¹ Notification of the declaration and termination of the proposed regulatory halt would be provided in accordance with Rule 7.18.

security while that processing is underway. The same principle applies to the categories of corporate actions addressed in this proposal, particularly in the context of nearly continuous trading.

In the context of 23/5 Trading, the Exchange has determined—based on discussions both internal and with industry participants, including the other Primary Listing Markets—that, similar to reverse stock splits, certain other corporate actions require a clearly defined and transparent pause in trading to facilitate their coordinated processing by the Exchange and other market participants before orderly trading may resume in the affected security.

Specifically, the Exchange believes that the following issuer-related corporate actions are analogous to reverse stock splits with respect to processing requirements and thus warrant analogous treatment with respect to their categorization and regulatory response: (1) changes in trading symbol; (2) changes in CUSIP number; (3) dividends equal to at least 25% of the Official Closing Price;¹² (4) stock splits (including forward and reverse stock splits); (5) De-SPAC transactions; (6) spin-off transactions; (7) security-type changes; (8) mergers or similar mandatory exchanges of shares; and (9) any other corporate action or issuer-related event not enumerated above, for which the Exchange determines that a regulatory halt is appropriate for the maintenance of fair and orderly markets, the protection of investors, or otherwise in the public interest, as described below. Like reverse stock splits, these corporate actions all involve non-discretionary changes to core security characteristics that require synchronized updates across Exchange and market-participant systems.

Accordingly, the Exchange proposes to amend Rule 7.18 and make certain conforming changes to incorporate such corporate actions into the regulatory framework established for corporate actions consisting of reverse stock splits, as follows.

The Exchange proposes to amend Rule 7.18(b)(1)(A)(iii) to extend the current reverse stock split regulatory halt framework to the categories of other corporate actions discussed above that, in addition to reverse stock splits, would be subject to the mandatory regulatory requirements of that rule. The Exchange accordingly proposes to delete the current text of Rule 7.18(b)(1)(A)(iii)

and replace it with revised text stating that the Exchange will declare a Regulatory Halt:

for a security for which the Exchange is the Primary Listing Market that is the subject of an issuer corporate action or other issuer-related event referenced below after the end of post-market trading on other markets and before 9:00 p.m. ET on the day immediately preceding the market effective date of such issuer corporate action or issuer-related event (“Corporate Action Halt”). A security subject to an issuer corporate action or issuer event-related Regulatory Halt pursuant to this rule will resume trading with a Trading Halt Auction after 9:30 a.m. ET on the market effective date of such corporate action or issuer-related event.

The Exchange proposes to further amend Rule 7.18(b)(1)(A)(iii) to provide that “[f]or purposes of this rule, the following shall be deemed corporate actions or issuer-related events subject to the mandatory Regulatory Halt provisions of this rule,” followed by the nine categories of corporate actions discussed above that would be subject to a mandatory regulatory halt under that provision. As proposed, the nine categories of enumerated corporate actions subject to a mandatory regulatory halt would consist of the following corporate actions: (1) trading symbol changes;¹³ (2) changes in CUSIP;¹⁴ (3) dividends equal to at least 25% of the Official Closing Price;¹⁵ (4) forward (and reverse) stock splits;¹⁶ (5)

¹³ As proposed, Rule 7.18(b)(1)(A)(iii)(1) would define changes to any “Trading Symbol” as “a change in the issuer’s trading symbol.”

¹⁴ As proposed, Rule 7.18(b)(1)(A)(iii)(2) would define changes in “CUSIP” as “[a] change in the issuer’s Committee on Uniform Securities Identification Procedures (“CUSIP”).”

¹⁵ As proposed, Rule 7.18(b)(1)(A)(iii)(3) would define “Dividend” transactions as “[s]tock dividends, whether payable in cash, stock, or another security of the issuer (or a subsidiary or other affiliate of the issuer), or any combination thereof, other than stock splits or similar adjustments described in paragraph (4), where the Exchange determines that such dividend has an aggregate value per share that is equal to at least 25% of the Official Closing Price of the affected security on the date immediately preceding the ex-date of such dividend; provided, however, that if no such Official Closing Price is available, the Exchange shall use the most recent available Official Closing Price for such shares (or other securities).”

¹⁶ As proposed, Rule 7.18(b)(1)(A)(iii)(4) would define “Forward, Reverse Stock Splits” as “[a]ny stock split or similar adjustment that affects the number of outstanding shares of an issuer or changes the relative equity ownership of holders of such shares, including any forward or reverse stock split, subdivision, reclassification, or combination of shares, or any similar transaction that has the effect of adjusting the number of outstanding shares or the relative equity ownership of holders, whether effected pursuant to a fixed or variable exchange ratio or otherwise, and whether occurring as a stand-alone action or in conjunction with any other corporate action or issuer-related event.”

de-SPAC transactions;¹⁷ (6) spin-off transactions;¹⁸ (7) security-type changes;¹⁹ (8) mergers/mandatory exchanges;²⁰ and (9) other corporate actions or issuer-related events not specifically enumerated in (1)–(8) above as more particularly described below.²¹

Specifically, proposed Rule 7.18(b)(1)(A)(iii)(9) would require the Exchange to declare a regulatory halt for any other corporate action or issuer-related event not enumerated in (1)–(8) above for which the Exchange determines, based on the totality of the circumstances and any information available to it, including without limitation information obtained from the issuer, that a regulatory halt is necessary or appropriate for the maintenance of fair and orderly markets, the protection of investors, or otherwise in the public interest.

This residual provision is designed to capture issuer-related corporate actions that, while not enumerated in Rule 7.18(b)(1)(A)(iii)(1)–(8), raise operational or market-integrity concerns comparable to those actions. Once the Exchange determines that such a corporate action warrants a Regulatory Halt based on its application of the

¹⁷ As proposed, Rule 7.18(b)(1)(A)(iii)(5) would define a “De-SPAC” transaction as “[a]ny De-SPAC transaction, as that term is defined in Item 1601(a) of Regulation S-K.”

¹⁸ As proposed, Rule 7.18(b)(1)(A)(iii)(6) would define a “Spin-off” transactions as “[a]ny transaction in which an issuer distributes to its security holders, on a pro rata basis, (i) equity securities of a subsidiary or other business that is separated into a new or existing standalone issuer; or (ii) any different class of securities.”

¹⁹ As proposed, Rule 7.18(b)(1)(A)(iii)(7) would define a “Security Type Change” as “[a]ny change in the form, type, class, or designation of a listed security, including, without limitation, (i) American Depositary Receipts or American Depositary Shares (“ADR”/“ADS”) to ordinary shares (and ordinary shares to ADR/ADS); (ii) conversions between ordinary shares and common stock (in either direction); and (iii) similar transactions.”

²⁰ As proposed, Rule 7.18(b)(1)(A)(iii)(8) would define a “Merger/Mandatory Exchange” as “[a]ny merger, consolidation, statutory share exchange, or similar business combination or corporate action that results in the affected security being mandatorily exchanged, converted, redeemed, or cancelled for cash, securities, or other consideration (including an exchange into securities of a successor issuer); provided, however, that this paragraph (8) does not include transactions that solely effect a change in the issuer’s (company) name without a mandatory exchange of the affected security.”

²¹ As proposed, Rule 7.18(b)(1)(A)(iii)(9) would define any “Other Corporate Action or Issuer-Related Event” as “[a]ny other corporate action or issuer-related event not enumerated in (1)–(8) above for which the Exchange determines, based on the totality of the circumstances and any information available to it, including without limitation information obtained from the issuer, that a Regulatory Halt is necessary or appropriate for the maintenance of fair and orderly markets, the protection of investors, or otherwise in the public interest.”

¹² The term “Official Closing Price” is defined in Rule 1.1(u).

standards in Rule 7.18(b)(1)(A)(iii)(9), implementation of the regulatory halt would be required.²² Accordingly, the provision is intended to promote consistent regulatory treatment across comparable corporate actions and to preserve transparency and uniformity in the application of the proposed framework in a 23/5 Trading environment.

Timing of Corporate Action Regulatory Halts

The Exchange proposes that under 23/5 Trading, the mandatory regulatory halts described above in proposed Rule 7.18(b)(1)(A)(iii) would be implemented after the conclusion of post-market trading on other markets and before the start of overnight trading on other markets at 9:00 p.m. ET. This timing differs from the Exchange's current process for reverse stock split regulatory halts, pursuant to which the Exchange implements the mandatory regulatory halt at 7:50 p.m. ET, before the end of post-market trading on other markets, on the day immediately before the reverse split becomes effective. That approach has been feasible in the reverse stock split context, but this proposal would extend the mandatory regulatory halt framework beyond reverse stock splits to a broader set of corporate actions that, although differing in form, share the need for coordinated systems and reference-data updates before trading may resume in an orderly manner. Because some of those actions may involve entirely new symbols or CUSIPs that would not yet exist at 7:50 p.m. ET on the prior trading day, the Exchange does not believe that the current reverse stock split timing can practicably be applied across the full set of covered corporate actions. The Exchange therefore believes it is reasonable, in the context of 23/5 Trading, to adopt a single, uniform implementation time for all halts under proposed Rule 7.18(b)(1)(A)(iii)—after the end of post-market trading on other markets and before overnight trading begins on other markets at 9:00 p.m. ET—which would facilitate consistent treatment of covered corporate actions and enable the halts to be implemented through an automated process.²³ This

timing would apply to each of the corporate actions addressed in this filing, as well as to the Exchange's existing reverse stock split regulatory halt. The proposed change to the timing for the implementation of the reverse stock split regulatory halt is therefore conforming in nature, as it is intended only to align that halt with the trading session structure under 23/5 Trading.

Resumption of Trading After Corporate Action-Related Regulatory Halts

The Exchange proposes to amend Rule 7.18(b)(5)(B)(iii) to provide that under 23/5 Trading, trading in a security halted pursuant to proposed Rule 7.18(b)(1)(A)(iii) would resume “with a Trading Halt Auction after 9:30 a.m. ET on the market effective date of such corporate action or issuer-related event.”²⁴ This is identical to the Exchange's current process with respect to reverse stock split regulatory halts, where the Exchange resumes trading with a Trading Halt Auction after 9:30 a.m. ET on the effective date of the reverse stock split. This proposal is designed to promote uniformity and transparency with respect to the resumption of trading in securities subject to a corporate actions-related regulatory halt under proposed Rule 7.18(b)(1)(A)(iii).

In sum, the corporate actions addressed in this proposal raise operational and market integrity concerns in a 23/5 Trading environment that mirror the concerns addressed by the Commission in approving the Exchange's Reverse Stock Split Proposal. Under 23/5 Trading, the Exchange will no longer have a substantial non-trading window during which it and other market participants can process these corporate actions before trading resumes. With only one hour between trading days, neither the

notification, market notice, and public dissemination mechanisms. Under the Exchange's existing listing and related rules and/or procedures, listed issuers are required in various circumstances to provide the Exchange advance notice of corporate actions and to publicly disclose such events before they become effective. In addition, the Exchange's established corporate action processing and market notification procedures generally result in the Exchange receiving notice of, and disseminating information concerning, other covered corporate actions sufficiently in advance of their effectiveness to support the orderly implementation of the proposed halt process. Accordingly, the Exchange believes that ATSS and other market participants would have adequate advance awareness of the types of corporate actions addressed by this proposal to make informed business decisions with respect to the affected securities, and that proposed Rule 7.18(b)(1)(A)(iii) thus provides a transparent and appropriate mechanism for addressing such corporate actions in a 23/5 Trading environment.

²⁴ See proposed Rule 7.18(b)(5)(B)(iii).

Exchange nor other market participants would have sufficient time to process and incorporate corporate action-related information, resulting in a risk of price dislocations, investor confusion, erroneous executions, and broader operational issues. The Exchange believes that extending its reverse stock split regulatory framework to the additional corporate actions described herein would appropriately preserve, in a 23/5 Trading environment, the safeguard implicit in the current market structure—specifically, the overnight pause in trading that allows for coordinated processing and related systems and reference-data updates. Accordingly, the proposal would promote fair and orderly trading, mitigate operational risk, and help ensure that trading resumes only after those updates have been completed.

Implementation

The Exchange understands that the other Primary Listing Exchanges plan to implement substantially identical versions of this rule to ensure consistent treatment of corporate actions across the market. The Exchange proposes that the changes in this proposal and in the other Primary Listing Exchanges' similar filings would become operative at the commencement of 23/5 Trading.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,²⁵ in general, and furthers the objectives of Section 6(b)(5) of the Act,²⁶ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest. The Exchange believes that the proposed rules will provide greater transparency and clarity with respect to the situations in which trading will be halted due to certain corporate actions and the process through which that halt will be implemented and terminated, as discussed below.

The Exchange believes that extending the reverse stock split regulatory halt framework to the additional, analogous corporate actions addressed in this proposal would promote free and open trade, protect investors, and serve the public interest by helping to ensure fair and orderly markets. Specifically, the proposal would preserve and apply an established, transparent framework for pausing and resuming trading in

²² Such determination would be made by the Exchange's senior trading and regulatory officials in advance of the corporate action effective date.

²³ See Exchange proposed Rule 7.18(b)(1)(A)(iii). Shifting the implementation time for such regulatory halts from 7:50 p.m. to before 9:00 p.m. would not have a material effect on market participants. The Exchange notes that market participants, including alternative trading systems (“ATSS”), would have advance notice of the types of issuer corporate actions addressed in this proposal through the Exchange's existing issuer

²⁵ 15 U.S.C. 78f(b).

²⁶ 15 U.S.C. 78f(b)(5).

securities subject to reverse stock splits to certain corporate actions with analogous processing requirements, so that trading in an affected security does not occur before the corporate action has been processed and the related systems and reference-data updates have been completed and applied across the market.

With respect to the specific categories of corporate actions addressed in this proposal, the Exchange believes that it is reasonable and appropriate to extend the regulatory halt framework applicable to reverse stock splits to certain categories of corporate actions with analogous processing requirements, as more specifically described above. Like reverse stock splits, these corporate actions all involve non-discretionary changes to core security characteristics that require synchronized updates across Exchange and market-participant systems.

Under the current market structure, an overnight pause in trading has historically provided a defined non-trading window during which the Exchange and other market participants have sufficient time to process such corporate actions in an orderly and coordinated manner prior to the resumption of trading. But in the 23/5 Trading environment, with only one hour of non-trading time between trading days, there is a substantial chance that trading in an impacted security could occur based on incomplete, inconsistent, or partially updated information, giving rise to pricing anomalies, investor confusion, erroneous executions, and heightened operational risk. The Exchange believes the proposed approach promotes fair and orderly markets by helping to ensure that trading resumes only once systems and reference data concerning these corporate actions have been fully and consistently updated across the marketplace.

With respect to the mandatory regulatory halts specifically enumerated in proposed Rule 7.18(b)(1)(A)(iii)(1)–(8), if the corporate action falls within the categories enumerated in the rule, the Exchange will not have discretion about whether to declare a trading halt in the affected security.

In addition, proposed Rule 7.18(b)(1)(A)(iii)(9) is intended to operate as a residual provision covering issuer-related corporate actions not enumerated in Rule 7.18(b)(1)(A)(iii)(1)–(8) that nonetheless raise operational or market-integrity concerns comparable to those presented by the enumerated actions. Under that provision, when the Exchange determines, based on the totality of the circumstances and the

information available to it, including information obtained from the issuer, that it is necessary or appropriate for the maintenance of fair and orderly markets, the protection of investors, or otherwise in the public interest, it would be required to declare a regulatory halt in that security. Once the Exchange makes that determination, the regulatory halt would be mandatory, thereby avoiding ad hoc treatment once the applicable standard has been met. In that respect, proposed Rule 7.18(b)(1)(A)(iii)(9) serves as a narrow residual mechanism designed to promote consistent regulatory treatment across comparable corporate actions and to preserve transparency and uniformity in the application of proposed Rule 7.18(b)(1)(A)(iii) in a 23/5 Trading environment by requiring the Exchange to declare a regulatory halt in such cases. The Exchange therefore believes that it is reasonable and appropriate to extend its authority to declare a regulatory halt in this instance.

In all cases under proposed Rule 7.18(b)(1)(A)(iii), a mandatory regulatory halt in the affected security would be implemented after the conclusion of post-market trading on other markets and before the start of overnight trading on other markets at 9:00 p.m. ET on the date immediately preceding the market-effective date of the corporate action.

The Exchange also believes it is reasonable and appropriate to use a Trading Halt Auction under Rule 7.35 to re-open trading in a security that is subject to a regulatory halt pursuant to this proposal because it is consistent with the process that the Exchange currently uses to re-open a security after a reverse stock split regulatory halt, and the operational complexity and processing demands associated with such corporate actions are comparable to those involved regarding reverse stock splits. Furthermore, using a Trading Halt Auction to re-open trading after the regulatory halts addressed in this proposal is consistent with the process that is typically used by the Exchange when re-opening a security that has been halted under Rule 7.18. Applying a uniform, previously approved framework enhances transparency and predictability for issuers, investors, and market participants.

The Exchange's proposal to make conforming changes to its existing reverse stock split regulatory halt structure to harmonize the halt time with the time proposed in this filing is reasonable and would promote transparency and predictability for issuers, investors, and market

participants. As described above, the current practice of implementing a mandatory regulatory halt for a security undergoing a reverse stock split at 7:50 p.m. ET has been feasible in the reverse stock split context, but this proposal would extend the mandatory regulatory halt framework beyond reverse stock splits to a broader set of corporate actions that, although differing in form, share the need for coordinated systems and reference-data updates before trading may resume in an orderly manner. Because some of those actions may involve entirely new symbols or CUSIPs that would not yet exist at 7:50 p.m. ET on the prior trading day, the Exchange does not believe that the current reverse stock split timing can practicably be applied across the full set of covered corporate actions. The Exchange therefore believes it is reasonable, in the context of 23/5 Trading, to adopt a single, uniform implementation time for all halts under proposed Rule 7.18(b)(1)(A)(iii)—after the end of post-market trading on other markets and before overnight trading begins on other markets at 9:00 p.m. ET—which would facilitate consistent treatment of comparable corporate actions, enhance transparency and predictability for issuers, investors, and market participants, and support the orderly and automated implementation of such halts. The Exchange also believes that the proposal is consistent with Section 6(b)(5) of the Act because the Exchange's existing issuer notification, market notice, and public dissemination mechanisms generally provide market participants with advance awareness of the types of corporate actions addressed herein, thereby supporting the orderly implementation of the proposed halt process and helping to protect investors and the public interest.

The Exchange believes that resuming trading in the corporate action-impacted securities addressed in this proposal with a Trading Halt Auction after 9:30 a.m. ET, just as it currently does for reverse stock split halts, would remove impediments to and perfect the mechanism of a free and open market and a national market system by creating uniformity and transparency with respect to the re-opening times for securities subject to a corporate actions-related regulatory halt under proposed Rule 7.18(b)(1)(A)(iii).

The Exchange notes that these timing harmonization changes are purely conforming and that, by aligning the reverse stock split provisions with the corporate action-related halts described in this filing, the proposal promotes a consistent and harmonized rule

structure, enhances transparency and predictability for issuers, investors, and market participants, and reduces the potential for confusion.

Overall, establishing mandatory trading halts for securities that are subject to the corporate actions addressed in this filing and resuming trading thereafter promotes fair and orderly markets and the protection of investors, because it allows the Exchange to protect the broader interests of the national market system and addresses potential concerns that system errors may affect immediate trading in those securities. The Exchange believes that with the advent of 23/5 Trading, the proposed rules will help the Exchange reduce the potential for errors resulting in a material effect on the market resulting from the challenge of processing such corporate actions with only a one-hour non-trading window between trading days. As discussed above, in a 23/5 Trading environment, overnight trading on other markets will begin only one hour after trading closes on the Exchange, meaning that there will no longer be a substantial overnight period during which the Exchange can process corporate actions of the type addressed in this proposal. By extending the existing reverse stock split regulatory halt framework to those categories of corporate actions, the proposal is designed to preserve the safeguards currently afforded by that overnight pause.

For these reasons, the Exchange believes that the proposed rule change is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system by mitigating operational and market integrity risks that would otherwise arise in a nearly continuous trading environment. By helping to ensure that trading resumes only after corporate action processing has been completed in an orderly and coordinated manner, the proposed rule change promotes just and equitable principles of trade and protects investors and the public interest, consistent with Sections 6(b) and 6(b)(5) of the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes the proposal will not impose a burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed rule change is designed to protect investors and facilitate a fair and orderly market, which are both important purposes of the Act. To the extent that there is any impact on

intermarket competition, it is incidental to these objectives.

Rather, the proposed changes will promote competition by ensuring that trading in corporate action-affected securities resumes only when the Exchange has processed corporate actions in a coordinated manner across Exchange and market participants' systems, consistent with its obligations as a Primary Listing Market, thereby avoiding concurrent trading and potential confusion with respect to the affected securities while such corporate action processing is underway. In addition, the Exchange believes that the proposal does not impose any burden on competition because it applies equally to all issuers and market participants. The proposal builds on an established, uniform, and transparent framework governing the timing of trading halts and resumptions in trading in connection with certain corporate actions and is designed to address operational and market-integrity concerns, rather than competitive considerations. In substance, the proposal preserves an operational safeguard implicit in the current market structure and adapts that safeguard to a nearly continuous trading environment by extending the well-established reverse stock split framework to analogous corporate actions. By helping to ensure that trading resumes only after systems and reference data have been updated in a coordinated manner, the proposal promotes fair and orderly markets and enhances, rather than burdens, competition.

The Exchange does not believe that the proposed rule change imposes a burden on intra-market competition because the provisions apply to all market participants and issuers equally. In addition, information regarding the halting and resumption of trading will be disseminated using several freely accessible sources to ensure the widespread availability of that information.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become

operative for 30 days after the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act²⁷ and subparagraph (f)(6) of Rule 19b-4 thereunder.²⁸

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)²⁹ of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NYSE-2026-41 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to file number SR-NYSE-2026-41. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should

²⁷ 15 U.S.C. 78s(b)(3)(A)(iii).

²⁸ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

²⁹ 15 U.S.C. 78s(b)(2)(B).

submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NYSE-2026-41 and should be submitted on or before October 9, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.³⁰

Sherry R. Haywood,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-106384; File No. SR-CboeEDGX-2026-057]

Self-Regulatory Organizations; Cboe EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rules 11.1, 11.6, 11.7, and 11.8 To Add a New Time-in-Force Designation Known as “Regular ‘til Post Market”

September 15, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on September 9, 2026, Cboe EDGX Exchange, Inc. (the “Exchange” or “EDGX”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGX Exchange, Inc. (“EDGX” or the “Exchange”) proposes to amend Exchange Rules 11.1, 11.6, 11.7, and 11.8 to add a new Time-in-Force (“TIF”) designation known as “Regular ‘til Post Market” (“RTP”). The Exchange also proposes to amend Rule 11.8(c) and Rule 11.8(d) to include references to “Regular Hours Only” (“RHO”) where it has been erroneously excluded from certain rule text. The Exchange has designated the proposed rule change as noncontroversial and provided the

Commission with the notice required by Rule 19b-4(f)(6)(iii) under the Act.³ The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Commission’s website (<https://www.sec.gov/rules/sro.shtml>), the Exchange’s website (https://www.cboe.com/us/equities/regulation/rule_filings/edgx/), and at the principal office of the Exchange.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 11.6(q) (“Time-in-Force”) to add a new TIF designation known as “Regular ‘til Post Market” or “RTP.” As proposed, an RTP order would be a limit order designated for execution during both Regular Trading Hours⁴ and the Post-Closing Session,⁵ with any unexecuted portion expiring at the end of the Post-Closing Session. In connection with the introduction of the RTP TIF, the Exchange also proposes conforming amendments to Rules 11.1, 11.7, and 11.8 to reflect the availability of the RTP TIF across the Exchange’s order handling, order type, and opening process rules.

Currently, Rule 11.6(q) provides Users⁶ with the following TIF options

³ 17 CFR 240.19b-4(f)(6)(iii).

⁴ See Exchange Rule 1.5(y). The term “Regular Trading Hours” means the time between 9:30 a.m. and 4:00 p.m. Eastern Time.

⁵ See Exchange Rule 1.5(r). The Post-Closing Session on EDGX means the time between 4:00 p.m. and 8:00 p.m. Eastern Time.

⁶ See Exchange Rule 1.5(ee). “User” is defined as “any Member or Sponsored Participant who is authorized to obtain access to the System pursuant to Rule 11.3.” The “System” is “the electronic communications and trading facility designated by the Board through which securities orders of Users are consolidated for ranking, execution and, when applicable, routing away.” See Exchange Rule 1.5(cc). The term “Member” means any registered broker or dealer that has been admitted to

membership in the Exchange. See Exchange Rule 1.5(n).

for order entry.⁷ An “Immediate-or-Cancel” (“IOC”) order⁸ is an instruction the User may attach to an order stating the order is to be executed in whole or in part as soon as such order is received. Any unexecuted portion of an IOC order is cancelled. A “Day” order⁹ is an instruction the User may attach to an order stating that an order to buy or sell which, if not executed, expires at the end of Regular Trading Hours. A “Fill-or-Kill” (“FOK”) order¹⁰ is an instruction the User may attach to an order stating that the order is to be executed in its entirety as soon as it is received and, if not so executed, cancelled. A “Good ‘til Day” (“GTD”) order¹¹ is an instruction the User may attach to an order specifying the time of day at which the order expires. Any unexecuted portion of an order with a TIF instruction of GTD will be cancelled at the expiration of the User’s specified time, which can be no later than the close of the Post-Closing Session. A “Good ‘til Extended Day” (“GTX”) order¹² is an instruction the User may attach to an order to buy or sell which, if not executed, will be cancelled by the close of the Post-Closing Session. A “Regular Hours Only” (“RHO”) order¹³ is an instruction a User may attach to an order designating it for execution only during Regular Trading Hours, which includes the Opening Process and Re-Opening Process¹⁴ following a halt suspension or pause. A “Pre-Opening Session Plus” (“PRE”) order¹⁵ is a limit order designated for execution during the Pre-Opening Session¹⁶ and Regular Trading Hours. Any portion not executed expires at the end of Regular Trading Hours. A “Pre-Opening Session ‘til Extended Day” (“PTX”) order¹⁷ is a limit order designated for execution during the Pre-Opening Session, Regular Trading Hours, and the Post-Closing Session. Any portion not executed expires at the end of the Post-Closing Session. A “Pre-Opening Session ‘til Day” (“PTD”) order¹⁸ is a limit order designated for execution during the Pre-Opening Session, Regular Trading

membership in the Exchange. See Exchange Rule 1.5(n).

Hours, and the Post-Closing Session. Any portion not executed will be cancelled at the expiration time assigned to the order, which can be no later than the close of the Post-Closing Session. While EDGX currently offers a wide range of TIF designations, the Exchange does not presently offer a TIF that specifically combines Regular Trading Hours with the Post-Closing Session in a single, dedicated designation.

Against this backdrop, the Exchange proposes to introduce the RTP TIF as a new, dedicated TIF option on EDGX. As proposed, the RTP TIF would permit a User to submit a single limit order that is eligible for execution during Regular Trading Hours and that, if not fully executed during Regular Trading Hours, would remain active and eligible for execution during the Post-Closing Session. Any portion of an RTP order not executed by the end of the Post-Closing Session would expire. An RTP order may be modified or cancelled in accordance with Rule 11.10(e) and order priority will be determined pursuant to Rule 11.9(a), just as is the case for RHO orders currently. The Exchange believes that adding the RTP TIF to its suite of available TIF designations in Rule 11.6(q) would provide Users with a convenient, single-instruction mechanism to participate in both Regular Trading Hours and the Post-Closing Session without the need to submit separate orders for each session.

In connection with the introduction of the RTP TIF, the Exchange also proposes to amend Rule 11.1 (“Hours of Trading and Trading Days”) to add RTP to the list of TIF designations that are subject to restrictions on order entry prior to the applicable Start times.¹⁹ Rule 11.1(a) currently provides that the Exchange will not accept, prior to 4:00 a.m. Eastern Time (or prior to 7:00 a.m. Eastern Time for orders eligible for a 7:00 a.m. Start), among other orders, orders with a Minimum Execution Quantity instruction that also include a Time-in-Force of Regular Hours Only.²⁰ Because an RTP order, like an RHO order, is designed for execution during Regular Trading Hours (and, in the case of RTP, extending into the Post-Closing Session), the Exchange proposes to add RTP to this restriction so that orders with a Minimum Execution Quantity instruction that also include a Time-in-

Force of RTP will also not be accepted prior to 4:00 a.m. Eastern Time (or prior to 7:00 a.m. Eastern Time for orders eligible for a 7:00 a.m. Start). This proposed change is consistent with the treatment of RHO orders and ensures that orders combining the Minimum Execution Quantity condition with the RTP TIF are not entered into the System before the applicable trading sessions for such orders have commenced.

The Exchange also proposes amendments to Rule 11.7 (“Opening Process”) to add RTP alongside RHO throughout that rule’s provisions governing eligibility for and participation in the Opening Process and the Re-Opening Process.²¹ Specifically, the Exchange proposes to amend Rule 11.7(a) to provide that, prior to the beginning of the Regular Session, Users who wish to participate in the Opening Process may enter orders to buy or sell that are designated as either RHO or RTP orders. All existing restrictions applicable to RHO orders in Rules 11.7(a)(1) and 11.7(a)(2) would apply equally to RTP orders, including the restriction prohibiting EDGX Post Only Orders, ISOs, and Minimum Quantity Orders from participating in the Opening Process. The Exchange further proposes to amend Rule 11.7(e)(1)(A) to provide that, consistent with non-RHO orders, non-RTP orders will be eligible for participation in the Re-Opening Process following a Regulatory Halt, subject to the same exceptions and limitations that currently apply to non-RHO orders.²² These amendments ensure that the RTP TIF is integrated consistently into the Exchange’s opening and re-opening processes for securities, on the same terms applicable to RHO orders.

The Exchange also proposes conforming amendments to Rule 11.8 (“Order Types”) to add RTP to the list of permissible TIF instructions for the order types that will support the new designation.²³ Specifically, the Exchange proposes to add RTP as an available TIF instruction for Limit Orders (Rule 11.8(b)), Intermarket Sweep Orders (Rule 11.8(c)), MidPoint Peg Orders (Rule 11.8(d)), Market Maker Peg Orders (Rule 11.8(e)), Supplemental Peg Orders (Rule 11.8(f)), and MidPoint Discretionary Orders (Rule 11.8(g)), in

each case alongside the existing RHO instruction and subject to the same handling, display, and re-pricing provisions applicable to those order types. These conforming amendments ensure that the RTP TIF is available across the Exchange’s order types in a manner consistent with the treatment of the existing RHO TIF. The Exchange also proposes to amend Rule 11.8(c) and Rule 11.8(d) to include RHO where it has been erroneously excluded from certain rule text. Specifically, the Exchange proposes to add RHO as a permissible TIF to Rule 11.8(c)(1), Rule 11.8(c)(3), Rule 11.8(c)(5), Rule 11.8(c)(6), and Rule 11.8(d)(1). The Exchange notes that Rule 11.8(c)(1) and Rule 11.8(d)(1) each includes RHO as a permissible TIF in its opening sentence, but the remainder of Rule 11.8(c) and Rule 11.8(d) does not include RHO even though other similar TIFs (*e.g.*, GTD and GTX, which are both TIFs active during Regular Trading Hours) are permissible. Including RHO in Rules 11.8(c)(1), (3), (5), and (6) and Rule 11.8(d)(1) where other TIFs that apply during Regular Trading Hours are similarly included ensures that ISOs²⁴ and MidPoint Peg Orders containing a TIF of RHO are treated similarly to other TIFs active during Regular Trading Hours.

Comparison to Other Exchange Times-in-Force

The Exchange has also considered how other national securities exchanges handle TIF requirements for order entry when it comes to spanning the regular and after-hours trading sessions. NYSE Arca’s trading rules provide for three trading sessions: the Early Trading Session, the Core Trading Session, and the Late Trading Session.²⁵ Under NYSE Arca’s framework, orders entered into the NYSE Arca Marketplace must include a designation for which trading session(s) the order will remain in effect.²⁶ An order is eligible to participate in the designated trading session(s) only and may remain in effect for one or more consecutive trading sessions on a particular day.²⁷ Orders may be accepted by the exchange that

²⁴ An “ISO” refers to an Intermarket Sweep Order as defined in Regulation NMS Rule 600(a)(47).

²⁵ See NYSE Arca Rule 7.34–E(a). NYSE Arca’s Early Trading Session runs from 4:00 a.m. to 9:30 a.m. Eastern Time, its Core Trading Session runs from 9:30 a.m. to 4:00 p.m. Eastern Time, and its Late Trading Session runs from the conclusion of the Core Trading Session until 8:00 p.m. Eastern Time. Under Rule 7.34–E, all order types and modifiers defined in Rule 7.31–E that are designated for the Early Trading Session are eligible to participate in the Early Trading Session, subject to certain order-type restrictions.

²⁶ See NYSE Arca Rule 7.34–E(b)(1).

²⁷ Id.

¹⁹ See Exchange Rule 11.1(a).

²⁰ See Exchange Rule 11.1(a). Rule 11.1(a) provides in part that the Exchange will not accept, prior to 4:00 a.m. Eastern Time (or prior to 7:00 a.m. Eastern Time for orders eligible for a 7:00 a.m. Start), orders with a Minimum Execution Quantity instruction that also include a Time-in-Force of Regular Hours Only.

²¹ See Exchange Rule 11.7(a). Currently, only orders designated as RHO are eligible to participate in the Opening Process for securities prior to the beginning of Regular Trading Hours.

²² See Exchange Rule 11.7(e)(1)(A). Currently, non-RHO orders are eligible for participation in the Re-Opening Process, but IOC, FOK, EDGX Post Only Orders, and Minimum Quantity Orders will be cancelled or rejected, as applicable, and any ISO that is not IOC or FOK will be converted.

²³ See Exchange Rule 11.8.

are not eligible to trade until a later trading session begins.²⁸ Thus, NYSE Arca offers comparable functionality as proposed by the Exchange as it permits orders to be entered during its Early Trading Session that are eligible to trade in both the Core Trading Session and the Late Trading Session, which is analogous to the Exchange's proposed RTP TIF.

Similarly, Nasdaq's Time-in-Force framework, set forth in Nasdaq Equity Rule 4703(a), provides that the TIF assigned to an order designates the period of time that the Nasdaq Market Center will hold the order for potential execution, with Participants specifying both a time at which the order becomes active and a time at which the order ceases to be active.²⁹ Nasdaq does refer to certain periods of times with explicit TIFs throughout its rulebook, including "IOC," "System Hours Day," "System Hours Expire Time," and "Market Hours Day," however these terms are derived from the specific start and end times appended to orders, similar to the NYSE Arca functionality described supra. As such, Nasdaq offers comparable functionality as proposed by the Exchange but does so through the ability of orders to be entered with specific start and end times as opposed to a specific TIF as proposed by the Exchange.

Implementation

The Exchange plans to implement the proposed rule change during the early fourth quarter of 2026 and will announce the implementation date via Trade Desk Notice.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,³⁰ in general, and furthers the objectives of Section 6(b)(5) of the Act,³¹ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market

and a national market system, and, in general, to protect investors and the public interest.

The Exchange believes the proposed rule change promotes just and equitable principles of trade, removes impediments to and perfects the mechanism of a free and open market and national market system, and protects investors and the public interest by providing Users with a convenient, streamlined mechanism to participate in both Regular Trading Hours and the Post-Closing Session through the submission of a single order. Currently, Users seeking to maintain trading interest across both Regular Trading Hours and the Post-Closing Session must either submit separate orders for each session or utilize broader TIF designations that may include trading sessions not desired by the User. The introduction of the RTP TIF in Rule 11.6 directly addresses this gap by offering a dedicated, purpose-built TIF designation that permits a User to submit a single order eligible for execution during Regular Trading Hours and, if not fully executed, to have such order remain active through the end of the Post-Closing Session.

This streamlined approach promotes just and equitable principles of trade by enabling Users to efficiently express their trading interest across the regular and post-close sessions in a single instruction, thereby reducing operational complexity, administrative burden, and the potential for order entry errors that may arise from the need to manage multiple orders across trading sessions.

Furthermore, the conforming amendments to Rules 11.1, 11.7, and 11.8 ensure that the RTP TIF is fully integrated into the Exchange's existing order handling, order type, and opening process framework in a manner that is consistent with the treatment of the existing limit RHO TIF. By aligning the treatment of RTP orders with RHO limit orders for purposes of participation in the Opening Process and Re-Opening Process, the Exchange ensures that RTP orders are processed in a manner that is transparent, predictable, and fair to all Users. The consistent treatment of RTP orders across the Exchange's rules promotes just and equitable principles of trade by providing Users with certainty as to how their RTP orders will be handled throughout the trading day. Additionally, the proposed amendments to Rules 11.8(c) and Rule 11.8(d) to include RHO as a permissible TIF alongside other TIFs that are active during Regular Trading Hours similarly promotes just and equitable principles

of trade by providing Users with certainty as to how their orders designated as ISO and MidPoint Peg orders will be handled throughout the trading day.

Moreover, the proposed rule change perfects the mechanism of a free and open market and supports a national market system by offering Users functionality that is comparable to that available on other national securities exchanges. As discussed above, NYSE Arca permits orders to be entered during its Early Trading Session that are eligible to trade in both the Core Trading Session and the Late Trading Session, providing comparable functionality to the Exchange's proposed RTP TIF. Similarly, Nasdaq's Time-in-Force framework permits Participants to specify both a time at which an order becomes active and a time at which the order ceases to be active, enabling comparable order entry flexibility. The Exchange's adoption of the RTP TIF ensures that Users have access to trading functionality on EDGX that is consistent with industry practice and supports the efficient operation of the national market system by enabling Users to express their trading interest in a manner that is compatible with the trading mechanisms employed by other market centers.

Finally, the Exchange believes that the proposed rule change is not designed to permit unfair discrimination. The RTP TIF would be available to all Users on an equal and non-discriminatory basis. The use of the RTP TIF is entirely optional, and no User is required to utilize the RTP TIF in connection with order submission to the Exchange. Users who do not wish to use the RTP TIF may continue to submit orders using any of the other TIF designations currently offered by the Exchange, including the Day, RHO, and PTX TIF designations.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The RTP TIF is an optional designation offered by the Exchange, and Users are free to decide whether to use the RTP TIF in connection with order submission to the Exchange. The Exchange believes that the proposed RTP TIF and associated conforming amendments do not impose any intramarket burden on competition as they represent an enhancement to existing functionality that would be available to all Users on an equal and non-discriminatory basis. The proposed

²⁸ Id.

²⁹ See Nasdaq Equity Rule 4703(a). Nasdaq provides a list of acceptable times to activate and deactivate orders, which includes Regular Market Hours (similar to the Exchange's RHO TIF) and the end of System Hours (pursuant to Nasdaq Equity 1, Section 1(a)(9), the end of System Hours is defined as 8:00 p.m. ET, which is identical to the end time of the Exchange's Post-Closing Session).

³⁰ 15 U.S.C. 78f.

³¹ 15 U.S.C. 78f(b)(5).

changes do not alter the way in which orders are prioritized, executed, or otherwise processed on the Exchange; they simply provide Users with an additional TIF option and integrate that option consistently into existing rules.

The Exchange believes that the proposed rule change does not impose any undue burden on intermarket competition. On the contrary, the proposed changes are being made to provide Users with enhanced order entry flexibility that may improve their ability to interact across Regular Trading Hours and the Post-Closing Session that is comparable to order entry flexibility on competitor exchanges, therefore promoting competition between venues.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act³² and subparagraph (f)(6) of Rule 19b-4 thereunder.³³

A proposed rule change filed under Rule 19b-4(f)(6)³⁴ normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),³⁵ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposed rule change may become operative immediately upon filing. The Exchange

states that it is seeking to introduce the proposed functionality early in the fourth quarter of 2026 and waiver of the operative delay will permit the proposed rule changes to become effective immediately. The Exchange further states that waiver of the operative delay will allow the Exchange to offer a TIF that is competitive with TIF offerings of Nasdaq³⁶ and NYSE Arca,³⁷ each of which permits Users to submit orders during the respective Pre-Opening Session that become active during Regular Trading Hours and remain active through the end of the Post-Closing Session. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest as the proposal does not raise any new or novel issues. Therefore, the Commission hereby waives the 30-day operative delay and designates the proposed rule change to be operative upon filing.³⁸

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)³⁹ of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeEDGX-2026-057 on the subject line.

³⁶ *Supra* note 29.

³⁷ *Supra* note 25.

³⁸ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

³⁹ 15 U.S.C. 78s(b)(2)(B).

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-CboeEDGX-2026-057. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeEDGX-2026-057 and should be submitted on or before October 9, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁴⁰

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-106378; File No. SR-NYSEARCA-2026-94]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 7.12-E Concerning the Resumption of Trading Following a Level 3 Market-Wide Circuit Breaker Halt in Connection With the Expansion of Trading Hours to 23 Hours per Day, 5 Days per Week

September 15, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² notice is hereby given that, on September 4, 2026, NYSE Arca, Inc. ("NYSE Arca" or the "Exchange") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory

⁴⁰ 17 CFR 200.30-3(a)(12), (59).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³² 15 U.S.C. 78s(b)(3)(A)(iii).

³³ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

³⁴ 17 CFR 240.19b-4(f)(6).

³⁵ 17 CFR 240.19b-4(f)(6)(iii).

organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 7.12-E ("Trading Halts Due to Extraordinary Market Volatility") concerning the resumption of trading following a Level 3 market-wide circuit breaker halt in connection with the extension of exchange trading hours to 23 hours per day, 5 days per week. The proposed rule change is available on the Exchange's website at www.nyse.com and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

NYSE Arca, Inc. ("NYSE Arca" or the "Exchange") proposes to amend Rule 7.12-E ("Trading Halts Due to Extraordinary Market Volatility") concerning the resumption of trading following a Level 3 market-wide circuit breaker ("MWCB") halt ("Level 3 Market Decline") in connection with the extension of exchange trading hours to 23 hours per day, 5 days per week ("23/5 Trading").³ As discussed herein, the proposed rule change would retain the current 4:00 a.m. ET resumption time following a Level 3 Market Decline, notwithstanding the fact that the Exchange would normally open for overnight trading at 9:00 p.m. ET once the Exchange has implemented 23/5 Trading.

³ See Securities Exchange Act Release No. 105532 (May 21, 2026), 91 FR 31509 (May 27, 2026) (SR-NYSEARCA-2026-53) ("NYSE Arca 23/5 Trading Notice").

Background

The MWCB mechanism under Rule 7.12-E provides an important, automatic mechanism that is invoked to promote stability and investor confidence during a period of significant stress when U.S. securities markets experience extreme broad-based declines. All U.S. equity exchanges and FINRA (collectively, the self-regulatory organizations or "SROs") adopted uniform rules relating to the MWCB mechanism in 2012, which are designed to slow the effects of extreme price movement through coordinated trading halts across U.S. securities markets when severe price declines reach levels that may exhaust market liquidity.⁴ Such market-wide circuit breakers provide for trading halts in all U.S. cash equity and equities options markets during a severe market decline as measured by a single-day decline in the S&P 500 Index during regular trading hours.

Pursuant to Rule 7.12-E, a market-wide trading halt will be triggered if the S&P 500 Index declines in price by specified percentages from the prior day's closing price of that index. Currently, the triggers are set at three circuit breaker thresholds: 7% (Level 1), 13% (Level 2), and 20% (Level 3). A market decline that triggers a Level 1 or Level 2 halt after 9:30 a.m. ET and before 3:25 p.m. ET would halt market-wide trading for 15 minutes, while a similar market decline at or after 3:25 p.m. ET would not halt market-wide trading. If a Level 3 Market Decline occurs at any time during the trading day, trading in all stocks will halt on the Exchange for the remainder of the trading day and will resume the following trading day at 4:00 a.m. ET during the Early Trading Session.

Proposal

The Exchange now proposes to amend Rule 7.12-E to reflect extended trading hours, *i.e.*, 23/5 Trading. Currently, the Exchange offers three trading sessions on each day it is open for trading: (1) the Early Trading Session (4:00 a.m. ET to 9:30 a.m. ET); (2) the Core Trading Session (9:30 a.m. ET to 4:00 p.m. ET); and (3) the Late Trading Session (4:00 p.m. ET to 8:00 p.m.). On December 6, 2026, the Exchange intends to offer a

⁴ See Securities Exchange Act Release No. 67090 (May 31, 2012), 77 FR 33531 (June 6, 2012) (SR-BATS-2011-038; SR-BYX-2011-025; SR-BX-2011-068; SR-CBOE-2011-087; SR-C2-2011-024; SR-CHX-2011-30; SR-EDGA-2011-31; SR-EDGX-2011-30; SR-FINRA-2011-054; SR-ISE-2011-61; SR-NASDAQ-2011-131; SR-NSX-2011-11; SR-NYSE-2011-48; SR-NYSEAmex-2011-73; SR-NYSEArca-2011-68; SR-Phlx-2011-129) ("MWCB Approval Order").

new Overnight Trading Session, which would be available from 9:00 p.m. ET to 4:00 a.m. ET, significantly increasing the Exchange's hours of operation in response to customer demand.

As discussed, current Rule 7.12-E (b)(ii) provides that if a Level 3 Market Decline occurs at any time during the trading day, trading in all stocks will halt on the Exchange for the remainder of the trading day. Currently, this means the Exchange would re-open at its normal time, *i.e.*, 4:00 ET a.m., following a Level 3 Market Decline. However, the Exchange intends to begin 23/5 Trading on December 6, 2026.⁵

Unless amended, when the Exchange launches overnight trading, the current rule's reference to halting "for the remainder of the trading day"⁶ would require that the Exchange re-open trading at an earlier time, *i.e.*, at 9:00 p.m. ET on the same calendar day, when the Exchange's systems would generally become available for the Overnight Trading Session. The Exchange does not believe that this is an expected or desired result and is therefore amending this rule in coordination with the other SROs such that trading on the Exchange will not resume until 4:00 a.m. ET or later on the following trading day, consistent with current market practice. This proposed rule change is therefore not intended to make any substantive changes to the MWCB mechanism. Rather, the proposed rule change would preserve the current resumption time following a Level 3 Market Decline, notwithstanding changes to the Exchange's rules that would otherwise allow the Exchange to resume trading at 9:00 p.m. ET as it would on any other trading day.

To effect this change, the Exchange proposes to delete the language in Rule 7.12-E(b)(ii) that provides that trading in all stocks will halt on the Exchange "for the remainder of the trading day" if a Level 3 Market Decline occurs at any time during the trading day, and replace it with new language that explicitly provides that trading in all stocks would halt on the Exchange until 4:00 a.m. ET or later on the following trading day.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁷ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁸ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and

⁵ See *supra* note 3.

⁶ See Rule 7.12-E(b)(ii).

⁷ 15 U.S.C. 78f(b).

⁸ 15 U.S.C. 78f(b)(5).

perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The MWCB mechanism described in Rule 7.12-E is an important, automatic mechanism that is invoked to promote stability and investor confidence during periods of significant stress when U.S. securities markets experience extreme broad-based declines. The proposed rule change would ensure that the Exchange's current 4:00 a.m. ET resumption time following a Level 3 halt continues to apply when the Exchange and various other U.S. equities exchanges begin trading on a 23/5 basis, notwithstanding current rule text implying that the resumption time would coincide with the start of overnight trading on the Exchange.

Rather than leave the rule in place as is, which would result in an earlier resumption time than originally contemplated when the rule was adopted, the Exchange, the other U.S. equity exchanges, and FINRA met alongside industry representatives to determine the appropriate resumption time. Following those discussions, the collective decision was made to retain the 4:00 a.m. ET resumption time, notwithstanding the fact that an earlier resumption time would be possible with the introduction of 23/5 Trading. The proposed rule change codifies this decision into the Exchange's rules. The Exchange understands that the other SROs will also be filing similar proposed rule changes. As a result, the market as a whole, including on- and off-exchange, will continue to be subject to harmonized rules for the resumption of trading following a Level 3 Market Decline.

While the SROs had previously decided to tie the resumption time following a Level 3 halt to the earliest SRO opening time, the upcoming transition to 23/5 Trading raises various concerns that warrant a change from the current approach.

First, the Exchange notes that the MWCB mechanism was designed to provide a cooling-off period where market participants would be provided with additional time to evaluate the market events that led to the decline before determining how to position their trading activity for the next day. With the introduction of 23/5 Trading and the start of the Overnight Trading Session at 9:00 p.m. ET, however, this cooling-off period could be materially shortened, reducing one of the key benefits that the MWCB mechanism was designed to provide in the first place. Rather than shorten the cooling-off period and risk this benefit, the Exchange believes the

market would be better served by a change to the length of the associated trading halt that mirrors current market practice. Under the proposed rule, as is the case today, after a Level 3 halt, the Exchange would re-open for the Early Trading Session at 4:00 a.m. ET and would not offer an Overnight Trading Session starting on the day of a Level 3 halt.

Second, the new Overnight Trading Session may be subject to different liquidity and participation considerations than the current Early Trading Session. Notably, while retail investors have expressed interest in overnight trading, the Exchange expects that institutional investors will take more time to transition to a round-the-clock model. However, such institutional participation may be of heightened importance following a Level 3 halt, as these investors are likely to have views on the underlying market events that led to the Level 3 Market Decline in the first place. The Exchange is concerned that opening during hours that such participants do not normally trade may impact the quality of price discovery at a time of significant market volatility. Waiting until 4:00 a.m. ET to resume trading would facilitate broader participation and therefore price discovery.

Finally, the Exchange notes that the Commission recently approved an amendment to the Plan to Address Extraordinary Market Volatility ("LULD Plan") that would establish new price protections from 9:00 p.m. ET to 4:00 a.m. ET.⁹ While these price bands would help to assure a fair and orderly market during normal market conditions, it is possible that they would instead prevent normal price discovery following a Level 3 Market Decline. Rather than allowing trading to resume with such price bands in effect, which would represent a change from the current trading reopening following a Level 3 Market Decline, the Exchange believes that waiting until 4:00 a.m. ET to resume trading would ensure that price discovery can occur unimpeded during pre-market trading, as it does today, which may further inform prices going into the opening auction and regular market hours trading following a Level 3 halt.

Given the factors discussed above, the Exchange believes that trading in all securities on the Exchange should not

resume before at 4:00 a.m. ET on the trading day after a Level 3 halt. This decision, which the Exchange understands will also be reflected in the rules of the other SROs, would promote a fair and orderly market at a time of significant market volatility, and thereby protect investors and the public interest. In addition, while the actual Level 3 resumption time would not be changing in practice—as proposed, the current resumption time and future resumption time would both be 4:00 a.m. ET at the earliest—the Exchange believes that it is appropriate to amend its rules to ensure that its rules reflect the upcoming changes to the Exchange's hours of operation. Without this change, market participants may mistakenly believe that the Exchange's intention is to re-open trading on the Exchange at 9:00 p.m. ET following a Level 3 halt. The proposed rule change would therefore facilitate operational transparency while providing for a fair and orderly market.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act because the proposal would ensure the continued, uninterrupted operation of a consistent mechanism to halt trading across U.S. securities markets. Further, the Exchange understands that the other SROs intend to file proposed rule changes to ensure a consistent resumption time 4:00 a.m. ET or later across markets. Thus, the proposed rule change will help to ensure consistency across market centers without implicating any competitive issues.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section

⁹ See Securities Exchange Act Release No. 106042 (August 5, 2026), 91 FR 51515 (August 10, 2026) (Order Granting Approval of the Twenty-Seventh Amendment to the National Market System Plan to Address Extraordinary Market Volatility to Establish Temporary Price Band Protections in Overnight Trading).

19(b)(3)(A)(iii) of the Act¹⁰ and subparagraph (f)(6) of Rule 19b–4 thereunder.¹¹

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR–NYSEARCA–2026–94 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSEARCA–2026–94. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer

to file number SR–NYSEARCA–2026–94 and should be submitted on or before October 9, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹²

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106381; File No. SR–FINRA–2026–001]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Order Approving a Proposed Rule Change, as Modified by Partial Amendment No. 1, To Adopt FINRA Rule 3290 (Outside Activities Requirements)

September 15, 2026.

I. Introduction

On January 22, 2026, the Financial Industry Regulatory Authority, Inc. (“FINRA”) filed with the Securities and Exchange Commission (“SEC” or “Commission”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Exchange Act”) ¹ and Rule 19b–4 thereunder,² a proposed rule change to adopt FINRA Rule 3290 (Outside Activities Requirements) to replace existing FINRA Rules 3270 (Outside Business Activities of Registered Persons) and 3280 (Private Securities Transactions of an Associated Person).

The proposed rule change was published for comment in the **Federal Register** on February 3, 2026.³ The public comment period closed on February 24, 2026. The Commission received comment letters in response to the Notice.⁴ On March 13, 2026, FINRA consented to an extension of the time period in which the Commission must approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to approve or disapprove the proposed rule change to May 4, 2026.⁵

¹⁵ U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

³ See Exchange Act Release No. 104746 (Jan. 29, 2026), 91 FR 5003 (Feb. 3, 2026) (File No. SR–FINRA–2026–001) (“Notice”).

⁴ The comment letters are available at <https://www.sec.gov/rules-regulations/public-comments/sr-finra-2026-001>.

⁵ See letter from Alicia Goldin, Vice President and Associate General Counsel, Office of General Counsel, FINRA (dated Mar. 13, 2026), <https://www.finra.org/sites/default/files/2026-07/FINRA-2026-001-Extension-2.pdf>.

On May 1, 2026, FINRA responded to the comment letters received in response to the Notice and filed a partial amendment to modify the proposed rule change (“Amendment No. 1”).⁶ On May 1, 2026, the Commission published a notice of the filing of Amendment No. 1 and an order instituting proceedings (“OIP”) to determine whether to approve or disapprove the proposed rule change, as modified by Amendment No. 1 (hereinafter referred to as the “proposed rule change” unless otherwise specified).⁷ The public comment period closed on May 27, 2026. The Commission received additional comment letters in response to the notice of the filing of the amendment and OIP.⁸ On June 11, 2026, FINRA responded to the comment letters received in response to the OIP.⁹ On July 24, 2026, FINRA consented to extend until October 1, 2026, the time period in which the Commission must approve or disapprove the proposed rule change.¹⁰ This order approves the proposed rule change, as modified by Amendment No. 1.

II. Description of the Proposed Rule Change

A. Background

1. FINRA Rule 3270 (Outside Business Activities of Registered Persons)

Subject to several exemptions, FINRA Rule 3270 prohibits a registered person from being an employee, independent contractor, sole proprietor, officer, director or partner of another person, or being compensated, or having the reasonable expectation of compensation, by any other person as a result of any business activity outside the scope of the relationship with his or her member firm (outside business activities or “OBA”), unless he or she has provided

¹⁰ 15 U.S.C. 78s(b)(3)(A)(iii).

¹¹ 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

prior written notice to the member, in such form as specified by the member.¹¹

Upon receipt of a written notice, FINRA Rule 3270.01 requires the member to consider whether the proposed activity will: (1) interfere with or otherwise compromise the registered person's responsibilities to the member and/or the member's customers; or (2) be viewed by customers or the public as part of the member's business based upon, among other factors, the nature of the proposed activity and the manner in which it will be offered. Based on the member's review of such factors, the member must evaluate whether to condition, limit, or prohibit a registered person's outside activity.¹² FINRA Rule 3270.01 also requires a member to evaluate the registered person's proposed activity to determine whether the activity is properly characterized as an OBA or a private securities transaction ("PST") subject to the requirements of FINRA Rule 3280. Additionally, FINRA Rule 3270.01 requires a member to keep a record of its compliance with these obligations with respect to each written notice received and must preserve this record in accordance with the time and accessibility requirements of Exchange Act Rule 17a-4(e)(1).

2. FINRA Rule 3280 (Private Securities Transactions of an Associated Person)

FINRA Rule 3280(a) prohibits an associated person of a member from participating in any manner in a PST¹³ except in accordance with the following requirements:

- FINRA Rule 3280(b) requires an associated person, prior to participating in any private securities transaction, to provide written notice to the member with which he or she is associated, describing in detail the proposed transaction and the person's proposed role therein and stating whether he or she has received or may receive selling

compensation in connection with the transaction;¹⁴

- FINRA Rule 3280(c)(1) requires a member that has received notice from one of its associated persons regarding a proposed transaction for which the associated person has received or may receive selling compensation to advise the associated person in writing whether it approves or disapproves the person's participation in the proposed transaction;

- FINRA Rule 3280(c)(2) requires a member that approves its associated person's participation in a proposed transaction to record the transaction on its books and records supervise the associated person's participation in the transaction as if the transaction were executed on behalf of the member;

- FINRA Rule 3280(c)(3) prohibits an associated person from participating in a transaction if the member disapproves its associated person's participation in the proposed transaction; and

- FINRA Rule 3280(d) requires a member that has received notice from one of its associated persons regarding a proposed transaction or series of related transactions for which the associated person has not and will not receive any selling compensation to provide the associated person prompt written acknowledgment of his or her notice.¹⁵

B. The Proposed Rule Change

The proposed rule change would replace current FINRA Rules 3270 and 3280 with new FINRA Rule 3290. Proposed FINRA Rule 3290 would retain, or be substantially similar to, many of the existing requirements of the current rules under two distinct categories of activities: (1) outside investment-related activities of registered persons and (2) outside securities transactions of associated persons.¹⁶ Similar to the obligations imposed under current Rules 3270 and 3280, associated persons generally would be required to report outside securities transactions, while only registered persons would be required to report outside activities.

As discussed in more detail below, the proposed rule would narrow the scope of reportable activities of registered persons from outside business

activities to outside investment-related activities (defined as "outside activities" of registered persons). Under proposed FINRA Rule 3290, "investment-related activity" would cover a range of activities involving financial assets beyond securities but would be subject to certain exclusions and exceptions. The proposed rule change would also: (1) recharacterize certain associated person activities (such as those involving an unaffiliated investment adviser) that are currently treated as PSTs under FINRA Rule 3280 as outside activities (rather than as outside securities transactions); (2) codify the treatment of certain activities as outside activities; and (3) exclude from the rule's coverage activity conducted by associated persons (including registered persons) on behalf of an affiliate of a member, certain personal real estate activities, and personal investments in non-securities.

While the proposed rule change would change the scope of activities covered by, or the characterization of certain activities under (*i.e.*, as an outside activity instead of as an outside securities transaction) the proposed rule, many of the obligations imposed on outside activities or outside securities transactions would either be retained or would be substantially similar to the existing requirements for an OBA or a PST, including: (1) requiring that a registered person who intends to participate in certain outside activities and an associated person who intends to participate in outside securities transactions (as defined below) provide prior written notice to the member; (2) requiring members receiving a notice to assess, among other things, whether to permit, prohibit, or limit the person's participation in the identified proposed activity; (3) requiring members' prior written approval or disapproval of certain activities; and (4) requiring member supervision and recordkeeping of certain activities.¹⁷

FINRA stated that, consistent with existing FINRA Rules 3270 and 3280, both the notice requirements and member obligations upon receiving the notice would differ depending on the type of activity (outside activity, outside securities transaction not for selling compensation, or outside securities transaction for selling compensation).¹⁸ The member's obligations after conducting an assessment would also depend on the type of activity, with the

¹¹ FINRA Rule 3270 exempts from its operative requirements passive investments and private securities transactions subject to the requirements of FINRA Rule 3280.

¹² See FINRA Rule 3270.01.

¹³ FINRA Rule 3280(e)(1) defines a PST as any securities transaction outside the regular course or scope of an associated person's employment with a member, excluding: (1) transactions subject to the notification requirements of FINRA Rule 3210 (Accounts at Other Broker-Dealers and Financial Institutions); (2) transactions among immediate family members (as defined in FINRA Rule 5130 (Restrictions on the Purchase and Sale of Initial Equity Public Offerings)) for which no associated person receives any selling compensation; and (3) personal transactions in investment company and variable annuity securities. FINRA Rule 3280(e)(2) defines "selling compensation" as any compensation paid directly or indirectly from whatever source in connection with, or as a result of, the purchase or sale of a security.

¹⁴ In the case of a series of related transactions in which no selling compensation has been or will be received, an associated person may provide a single written notice. FINRA Rule 3280(b).

¹⁵ The member may also require the associated person to adhere to specified conditions in connection with his or her participation in the transaction. See FINRA Rule 3280(d).

¹⁶ The term "associated persons" includes "registered persons." See Notice at 5005.

¹⁷ Notice at 5004. The proposed rule change would also retain the definition of "selling compensation" set forth in FINRA Rule 3280(e)(2).

¹⁸ Notice at 5005.

greatest member obligations applying to outside securities transactions for selling compensation.¹⁹

Importantly, the proposed rule change would not limit a member's ability to expand the scope of its assessment for reportable activities beyond the minimum requirements established in the proposed rule change or to exercise discretion to apply stricter criteria and impose conditions or prohibitions based on the member's own assessment of the risk presented by the identified activity.²⁰ Additionally, nothing in the proposed rule change would alter the well-settled principle that members must investigate "red flags" indicating problematic activities.²¹

FINRA stated that by merging the two existing rules, the proposed rule change would enhance members' regulatory efficiency without compromising protections for investors and members relating to outside activities.²² FINRA stated that reducing or eliminating the regulatory burden on members for activities that FINRA believes are lower risk would enable members to redirect supervisory and compliance resources away from activities that pose fewer investor protection concerns and toward higher-risk investment-related activities.²³ For example, FINRA stated that the proposed rule would focus on those outside activities that are appropriately within the members' purview that are a potential risk to members and the public.²⁴ At the same time, FINRA stated that the proposed rule would provide exclusions for certain activities that FINRA has assessed pose lower risk to its members or the public, including activity conducted at an affiliate or activities such as bartending or refereeing sports games.²⁵ As such, FINRA stated that the proposed rule change would serve the public interest by maintaining the core investor protections of the existing rules and addressing the treatment of business activities and securities transactions that are outside the regular scope of individuals' association with a member, while narrowing the scope of reportable activities to those that present higher risk, particularly the risk that customers or the public would view the activities as part of the member's business.²⁶ In this way, FINRA stated, the rule would promote more effective

risk-based oversight and, as a result, enhance investor protection.²⁷

Each of the proposed rule changes is discussed below in turn.

1. Outside Activities

a. Registered Person's Obligations

Proposed FINRA Rule 3290(a) (Obligations of a Registered Person for Outside Activity) would require a registered person who intends to participate in an "outside activity" (that is, an investment-related activity²⁸ outside the scope of such person's relationship with the member that is not in connection with a securities transaction) to provide prior written notice to the member regarding such outside activity. In addition, proposed FINRA Rule 3290(a) would require a registered person to update any prior written notice to the member if there is a material change to the outside activity. For any notice provided pursuant to the proposed rule, the registered person would be required to describe in detail the proposed outside activity and the person's proposed role therein.²⁹

b. Obligations of a Member for a Registered Person's Outside Activity

Proposed Rule 3290(c) (Obligations of a Member for a Registered Person's Outside Activity) would require a member receiving written notice of a registered person's outside activity to assess, at a minimum, whether the outside activity: (1) is an outside securities transaction;³⁰ (2) involves a customer of the registered person; (3) will interfere with or otherwise compromise the registered person's responsibilities to the member or the member's customers; and (4) will be viewed by the member's customers or the public as part of the member's business based upon, among other factors, the nature of the proposed activity and the manner in which it will

be offered.³¹ FINRA stated that the proposed rule change would add factor (2) (regarding whether the outside activity involves a customer of a registered person) to factors (1), (3), and (4) above, which are consistent with the existing requirements for an OBA under FINRA Rule 3270.³²

Based on the member's review of such factors, the member would be required to evaluate whether to condition, limit, or prohibit a registered person's outside activity.³³

If a member imposes conditions or limitations on an associated person's participation in such an outside activity, proposed FINRA Rule 3290.06 would require the member to reasonably supervise the person's compliance with such conditions or limitations.³⁴ FINRA stated that this obligation is already implicit in existing FINRA Rule 3270, but would be made explicit in proposed FINRA Rule 3290.³⁵

2. Outside Securities Transactions

a. Associated Person's Obligations

Proposed FINRA Rule 3290(b) (Obligations of an Associated Person for Outside Securities Transactions) would require an associated person who intends to participate in an "outside securities transaction" (that is, an investment-related activity³⁶ outside the scope of the associated person's relationship with the member that is in connection with a securities transaction) to provide prior written notice to the member, describing in detail the proposed transaction, the person's proposed role therein, and whether the person will receive selling compensation.³⁷ In addition, FINRA

³¹ Proposed FINRA Rule 3290(c)(1).

³² Notice at 5005.

³³ See proposed FINRA Rule 3290(c)(2).

³⁴ See Amendment No. 1.

³⁵ See FINRA I at 16; see also Amendment No. 1.

³⁶ See *infra* Section II.B.3. (Proposed Definition of Investment-Related Activity) for discussion of "investment-related activity."

³⁷ Proposed FINRA Rules 3290(b)(1) and (3). A separate notice would be required for each outside securities transaction unless an exception applies that allows the use of a single notice. See Notice at 5005. Proposed FINRA Rule 3290(b)(1)(A) would permit an associated person who intends to participate in an outside securities transaction that is in connection with a series of related securities transactions not for selling compensation to provide a single prior written notice to the member. Similarly, proposed FINRA Rule 3290(b)(1)(B) would permit an associated person acting as portfolio manager or investment committee member for registered investment companies, unregistered investment companies, business development companies, real estate investment trusts, and entities that are recognized as tax exempt, and who is not selling an entity's shares for selling compensation, to provide a single prior written notice to the member. ²⁶ *Id.* at 5007.

²⁷ *Id.*

²⁸ Proposed FINRA Rule 3290(f)(3) would define the term "investment-related activity." See *infra* Section II.B.3. (Proposed Definition of Investment-Related Activity). Proposed FINRA Rule 3290 also contains exclusions and exceptions for certain activities that would otherwise fall within the definition of "investment-related activity." See *infra* Section II.B.5 (Exclusions from Proposed FINRA Rule 3290); Section II.B.6. (Associated Person Activities Subject to a Contractual Arrangement).

²⁹ Proposed FINRA Rule 3290(a).

³⁰ FINRA stated that a person may, mistakenly or intentionally, mischaracterize an activity. For this reason, among others, a member must analyze whether the activity is properly characterized to determine its obligations, which vary depending on the activity. See Notice at 5005. If the member determines that the activity is an outside securities transaction, the member would be required to comply with the obligations listed in proposed FINRA Rule 3290(d), as discussed below.

Rule 3290(b)(2) would require an associated person to update any prior written notice if there is a material change to the outside securities transaction described in such notice. Where the associated person intends to participate in an outside securities transaction for selling compensation, the associated person also would need to obtain prior written approval from the member (including approval for any material change to any information provided pursuant to proposed FINRA Rule 3290(b)(1)).³⁸

b. Obligations of a Member for an Associated Person's Outside Securities Transactions

Proposed Rule 3290(d)(1) would require a member receiving written notice of an associated person's outside securities transaction to assess, at a minimum, whether the outside securities transaction: (1) is a securities transaction for selling compensation;³⁹ (2) involves a customer of the associated person;⁴⁰ (3) will interfere with or otherwise compromise the associated person's responsibilities to the member or the member's customers;⁴¹ and (4) will be viewed by the member's customers or the public as part of the member's business based upon, among other factors, the nature of the proposed activity and the manner in which it will be offered.⁴² FINRA stated that while existing FINRA Rule 3280 does not require consideration of the four factors identified in proposed FINRA Rule 3290(d) when assessing a PST, FINRA understands that the proposed rule change is consistent with members' current practices.⁴³

A member's obligations for an associated person's outside securities transactions would depend, in part, on whether the outside securities transaction is for selling compensation. If the outside securities transaction is not for selling compensation, proposed

FINRA Rule 3290(d)(2) would require the member to: (1) provide the associated person prompt written acknowledgement of such notice;⁴⁴ and (2) at the member's discretion, require the associated person to adhere to specified conditions⁴⁵ in connection with the associated person's participation in the transaction. If, instead, the outside securities transaction is for selling compensation, proposed FINRA Rule 3290(d)(3) would require the member to notify the associated person in writing of the member's decision to: (1) approve the proposed transaction after making a reasonable determination based on the criteria enumerated in proposed FINRA Rule 3290(d)(1); (2) approve the proposed transaction subject to specific conditions or limitations after a reasonable determination based on the criteria enumerated in proposed FINRA Rule 3290(d)(1); or (3) disapprove the proposed transaction.⁴⁶

If a member imposes conditions or limitations on an associated person's participation in such an outside securities transaction, proposed FINRA Rule 3290.06 would require the member to reasonably supervise the person's compliance with such conditions or limitations.⁴⁷ FINRA stated that this obligation is already implicit in existing FINRA Rule 3280, but would be made explicit in proposed FINRA Rule 3290.⁴⁸

Further, proposed FINRA Rule 3290(d)(4) would require a member to record each approved outside securities transaction for selling compensation on the books and records of the member and supervise the person's participation in the transaction as if executed on behalf of the member. However, if a member approves an associated person's participation in an outside securities transaction involving selling compensation and that person is associated with more than one member, proposed FINRA Rule 3290.01 would permit members to develop a written allocation arrangement whereby at least one member agrees to be responsible for compliance with respect to all applicable securities laws and regulations and FINRA rules regarding the proposed activity, including those

requiring member supervision and recordkeeping.⁴⁹ FINRA stated that the proposed rule change would codify existing guidance in NASD Notice to Members 96-33, allowing for potential efficiency gains for members that may have been unaware of such previous guidance.⁵⁰

3. Proposed Definition of Investment-Related Activity

The obligations of proposed FINRA Rules 3290(a)–(d) are triggered by the participation of a member's associated person in an investment-related activity that is outside the scope of the associated person's or registered person's relationship with the member. Proposed FINRA Rule 3290(f)(3) would define the term "investment-related activity" as pertaining to financial assets including, but not limited to, securities, crypto assets, commodities, derivatives (such as futures and swaps), currency, banking, real estate or insurance. The term includes, but is not limited to: (1) acting as or being associated with a broker-dealer, issuer, insurance agent or company, investment company, investment adviser, futures commission merchant, commodity trading advisor, commodity pool operator, municipal advisor, futures sponsor, money services business, bank, savings association, or credit union; and (2) an associated person's participation in any manner in a personal investment involving a securities transaction (sometimes referred to as "buying away"), other than transactions indicated in proposed FINRA Rule 3290(g)(3)(A).⁵¹ FINRA stated that by focusing the application of proposed Rule 3290 on activities involving financial assets, the proposed rule change would eliminate the burdens associated with the reporting and assessment of activities that FINRA

⁴⁹ Proposed FINRA Rule 3290.01.

⁵⁰ See Notice at 5006, 5008.

⁵¹ Proposed FINRA Rule 3290(g)(3)(A) would exclude from the definition of "investment-related activity" an associated person's personal investments involving securities transactions subject to or delineated in FINRA Rule 3210. FINRA Rule 3210 applies to securities transactions effected by the associated person or their related persons, as delineated in FINRA Rule 3210.02, at any financial institution other than the member that employs the associated person. FINRA Rule 3210.03 excludes some transactions and accounts from that rule: transactions in unit investment trusts, municipal fund securities as defined under MSRB Rule D-12, qualified tuition programs pursuant to Section 529 of the Internal Revenue Code, variable contracts or redeemable securities of companies registered under the Investment Company Act of 1940, or accounts that are limited to transactions in such securities, or monthly-investment-plan-type accounts, or accounts pursuant to Section 530A of the Internal Revenue Code. FINRA Rule 3210.03 (Transactions and Accounts not Subject to this Rule).

3290.02; see also *infra* Section II.B.4.a. (Associated Persons Acting as Portfolio Managers and Investment Committee Members).

³⁸ See proposed FINRA Rules 3290(b)(1), (2). FINRA Rule 3290(f)(5) would define "selling compensation" as any compensation paid directly or indirectly from whatever source in connection with or as a result of the purchase, sale or exchange of a security. The proposed definition of "selling compensation" is consistent with the definition in FINRA Rule 3280(e)(2).

³⁹ Proposed FINRA Rule 3290(d)(1)(A).

⁴⁰ Proposed FINRA Rule 3290(d)(1)(B).

⁴¹ Proposed FINRA Rule 3290(d)(1)(C).

⁴² Proposed FINRA Rule 3290(d)(1)(D). Pursuant to proposed FINRA Rule 3290(d)(1), a member would not be required to assess an outside securities transaction for selling compensation when disapproving it under proposed Rule 3290(d)(3)(C).

⁴³ See Notice at 5005.

⁴⁴ A single written acknowledgement may be used in the case of a series of related outside securities transactions not for selling compensation. See proposed FINRA Rule 3290(d)(2).

⁴⁵ See Amendment No.1 (FINRA stated that adding a reference to "limitations" in proposed FINRA Rule 3290(d)(2) would improve consistency with proposed FINRA Rules 3290(c)(2) and (d)(3)).

⁴⁶ Proposed FINRA Rule 3290(d)(3)(A)–(C).

⁴⁷ See Amendment No. 1.

⁴⁸ See FINRA I at 16; see also Amendment No. 1.

views as having lower risk (such as refereeing sports games and bartending), allowing members to dedicate resources to activities presenting higher risk to investors, particularly the risk that investors or the public would view the activities as part of the member's business and thus under its supervision.⁵²

4. Specific Activities Treated as Outside Activities for Purposes of Proposed FINRA Rule 3290

a. Associated Persons Acting as Portfolio Managers and Investment Committee Members

Proposed FINRA Rule 3290.02 states that an associated person would not be considered to be participating in an outside securities transaction to the extent the associated person's activities are limited to acting as portfolio manager or investment committee member for registered investment companies (e.g., mutual funds, exchange traded funds, unit investment trusts, or registered closed-end funds), unregistered investment companies, business development companies, real estate investment trusts, and entities that are recognized as tax exempt. Such activity would be treated as an outside activity and not an outside securities transaction.⁵³

However, proposed FINRA Rule 3290.02 also states that the proposed exception would not include an associated person's activities related to purchasing or selling such entities' shares. Those activities would instead be considered an outside securities transaction subject to the applicable notice and assessment requirements in proposed FINRA Rule 3290(b) and (d) unless otherwise excluded under proposed FINRA Rule 3290(g) (discussed *infra*).

FINRA stated that this proposed rule change would codify FINRA staff's position that: (1) an associated person would need to provide prior written notice for activities related to purchasing or selling such entities' shares, and (2) the member would not be required to supervise and maintain records for the activity, unless the associated person is selling such entities' shares for selling compensation and such activity is not otherwise excluded under the proposed rule.⁵⁴

b. Associated Person Activity at an Unaffiliated Registered Investment Adviser ("RIA")

Proposed FINRA Rule 3290.03 states that an associated person's activity at an investment adviser registered either with the Commission under Section 203 of the Investment Advisers Act ("Advisers Act") or with a state securities commission (or any agency or office performing like functions) would be treated as an outside activity of a registered person (and not an outside securities transaction).⁵⁵

FINRA stated that the proposed rule change would eliminate members' supervision and recordkeeping obligations for investment advisory activities performed by associated persons at unaffiliated investment advisers, which were set forth in FINRA guidance issued in the 1990s.⁵⁶ FINRA stated that this prior guidance has caused significant confusion and practical challenges, including privacy challenges to members seeking account information for clients of an unaffiliated investment adviser through which the member's associated person may be acting in an investment advisory capacity.⁵⁷ FINRA stated that without access to information necessary to meaningfully supervise outside unaffiliated investment advisory activities, members would unreasonably bear regulatory responsibility and potential liability without adequate means to fulfill their regulatory obligations.⁵⁸ In addition, FINRA stated that such investment advisers are generally directly regulated by either the Commission or the states, and subject to fiduciary obligation to their clients.⁵⁹

c. Associated Person Outside Securities Activity Subject to the Gramm-Leach-Bliley Act (GLBA) or Exchange Act Regulation R

Proposed FINRA Rule 3290.05 states that an associated person's securities activity that qualifies under the GLBA or SEC Regulation R's exception to broker or dealer⁶⁰ registration

requirements and that is not otherwise covered by proposed FINRA Rule 3290.04⁶¹ would be treated as an outside activity (and not an outside securities transaction).⁶² FINRA stated that the proposed rule change would codify FINRA staff's position with respect to this outside activity.⁶³ Specifically, it would clarify that an associated person's securities activity under proposed Rule 3290.05 would have a prior written notice and assessment requirement but would not be subject to member supervision and recordkeeping by the member.⁶⁴

5. Exclusions From Proposed FINRA Rule 3290

a. Associated Person Activity on Behalf of a Member or an Affiliate

Proposed FINRA Rule 3290(g) would exclude from proposed FINRA Rule 3290 an associated person's activity on behalf of a member or its affiliate.⁶⁵ Proposed FINRA Rule 3290(f)(1) would define "affiliate" as any entity that controls, is controlled by, or is under common control with a member. According to FINRA, this exclusion would include activity such as investment advisory activity at a member that is registered as both a broker-dealer and an investment adviser, as well as investment advisory, insurance, or banking activity conducted on behalf of an affiliate.⁶⁶ FINRA stated that this exclusion for activity conducted on behalf of a member or its affiliate recognizes members' and their control persons' ability to implement meaningful controls across business lines.⁶⁷

b. Securities Transactions Among Immediate Family Members of an Associated Person

Proposed FINRA Rule 3290(g) would exclude from proposed FINRA Rule 3290 an associated person's securities transactions among immediate family for which the associated person receives no selling compensation.⁶⁸ Proposed FINRA Rule 3290(f)(2) would define "immediate family" to have the same meaning as in paragraph (c) of Rule

⁵⁵ Such activity would be subject to the requirements of proposed FINRA Rules 3290(a) and (c). See *supra* note 53.

⁵⁶ See, e.g., Notice at 5006; NASD Notice to Members 94-44 (May 1994) and 96-33 (May 1996).

⁵⁷ See Notice at 5006.

⁵⁸ *Id.* at 5011.

⁵⁹ *Id.* at 5006.

⁶⁰ The GLBA amended the Exchange Act to except specified securities activities conducted by banks from broker or dealer registration. See Exchange Act Section 3(a)(4)(B). See also Definitions of Terms and Exemptions Relating to the "Broker" Exceptions for Banks, Exchange Act Release No. 56501, 72 FR 56514 (Oct. 3, 2007); Definition of Terms in and Specific Exemptions for Banks, Savings Associations, and Saving Banks

Under Sections 3(a)(4) and 3(a)(5) of the Securities Exchange Act of 1934, Exchange Act Release No. 47364 (Feb. 14, 2003), 68 FR 8686 (Feb. 24, 2003).

⁶¹ See *infra* Section II.B.6 (Associated Person Activities Subject to a Contractual Arrangement).

⁶² Such activity would be subject to the requirements of proposed FINRA Rules 3290(a) and (c). See *supra* note 53.

⁶³ See Notice at 5006.

⁶⁴ *Id.*

⁶⁵ Proposed FINRA Rule 3290(g)(1).

⁶⁶ See Notice at 5005.

⁶⁷ *Id.* at 5005-6.

⁶⁸ Proposed FINRA Rule 3290(g)(2).

⁵² See Notice at 5004.

⁵³ As an "outside activity," such activity would be subject to the notice and assessment requirements of proposed FINRA Rules 3290(a) and (c).

⁵⁴ See Notice at 5006.

3240 (Prohibition on Borrowing from or Lending to Customers).⁶⁹ FINRA stated that this exclusion recognizes the lower risks to investors and members associated with this activity and the inefficiency of members' having to expend significant resources reviewing it.⁷⁰

c. Certain Personal Investments of an Associated Person

Proposed FINRA Rule 3290(g)(3) would exclude from proposed FINRA Rule 3290 the following personal investments of an associated person: (1) securities transactions subject to or delineated in FINRA Rule 3210 (Accounts at Other Broker-Dealers and Financial Institutions);⁷¹ (2) personal investments in non-securities; and (3) the purchase, sale, rental or lease of a main home and up to two secondary homes⁷² that are: (a) solely owned by the associated person or the associated person and immediate family;⁷³ (b) owned by the associated person as a sole proprietorship; (c) owned by a corporation, LLC, partnership, limited partnership, or other entity that is solely owned by the associated person or the associated person and immediate family;⁷⁴ or (d) owned by a trust with the associated person or the associated person and immediate family as the sole beneficiaries.⁷⁵ FINRA stated that these exclusions recognize the lower risks to investors and members associated with these activities and the inefficiency of members' having to expend significant resources reviewing them.⁷⁶

6. Associated Person Activities Subject to a Contractual Arrangement

Proposed FINRA Rule 3290.04 states that an associated person's activity that is pursuant to a contract between a member and another entity (e.g., banking or insurance networking arrangement) would not be subject to proposed FINRA Rule 3290 if such

activity is conducted on behalf of the member as it is within the scope of the associated person's relationship with the member. FINRA stated that the proposed rule change is consistent with current requirements and, as is currently required, such activity already would be subject to broker-dealer supervision under FINRA Rule 3110.⁷⁷

7. Recordkeeping

Proposed FINRA Rule 3290(e) would require a member to keep a record of its compliance with the obligations under proposed FINRA Rule 3290 and preserve this record in accordance with the time and accessibility requirements of Exchange Act Rule 17a-4(e)(1).⁷⁸

8. General Exemptive Authority

Proposed FINRA Rule 3290(h) would authorize FINRA staff, for good cause shown after taking into consideration all relevant factors, to conditionally or unconditionally grant an exemption pursuant to the FINRA Rule 9600 Series from any provision of proposed FINRA Rule 3290 to the extent that such exemption is consistent with the purpose of the rule, the protection of investors, and the public interest. FINRA stated that while the proposed rule change is broadly applicable, having the flexibility to provide relief from a particular provision of proposed Rule 3290 where specific factual circumstances justify an exemption would be useful and appropriate.⁷⁹ FINRA also proposed a conforming amendment to FINRA Rule 9610 to add proposed FINRA Rule 3290 to the list of FINRA rules for which members may seek exemptive relief.⁸⁰

III. Discussion and Commission Findings

After careful review of the proposed rule change, comment letters received, and FINRA's responses to the comments, the Commission finds that the proposed rule change is consistent with the requirements of the Exchange Act and the rules and regulations thereunder that are applicable to a national securities association.⁸¹ Specifically, the Commission finds that

the proposed rule change is consistent with Section 15A(b)(6) of the Exchange Act, which requires, among other things, that FINRA rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.⁸²

The proposed rule change is reasonably designed to focus member supervisory and compliance resources on the types of outside activities—that is, investment-related activities—of a member's registered or associated persons that are appropriately within the member's purview, particularly where the activities are most likely to be viewed by investors or other members of the public as part of the member's business and thus under its supervision. The proposed rule change reasonably imposes on members different obligations depending on the nature of the identified activity and its associated risk to the member, investors, and the public. The member's obligation is greatest for those activities that present heightened potential risk to investors and to the public, namely when the activity is an associated person's outside securities transaction for selling compensation.

Other categories of activity—an associated person's outside securities transaction not for selling compensation and a registered person's outside activity that is outside the scope of their employment with the member (including activity that is subject to another regulatory regime such as activity at an unaffiliated registered investment adviser or a bank)—require the member to assess or restrict the activity as the member determines is necessary but does not require the member to explicitly approve or supervise that activity. For these categories of activity, the risk to investors or the public, including the risk that they will view the activity as part of the member's business and under its supervision, is lower, and reasonably calibrates a member's obligations in accordance with that risk. The proposed rule change also enables a member to impose conditions or limitations, which could include subjecting the activity to the member's supervision, if the member deems it necessary to manage its own risk. Finally, the proposed rule change eliminates reporting obligations for outside activities that are lower risk, either because the activities are inherently unlikely to pose risks to investors or the public (e.g., refereeing sports games), or the member is likely

⁶⁹ FINRA Rule 3240 defines the term "immediate family" as "parents, grandparents, mother-in-law or father-in-law, spouse or domestic partner, brother or sister, brother-in-law or sister-in-law, son-in-law or daughter-in-law, children, grandchildren, cousin, aunt or uncle, or niece or nephew, and any other person who resides in the same household as the registered person and the registered person financially supports, directly or indirectly, to a material extent. The term includes step and adoptive relationships."

⁷⁰ Notice at 5006.

⁷¹ See *supra* note 51.

⁷² Proposed FINRA Rule 3290(f)(4) would define "secondary home" as a property that is used for residential purposes by the associated person for at least part of the year.

⁷³ See *supra* note 69 and accompanying text.

⁷⁴ Proposed FINRA Rule 3290(g)(3)(C)(3).

⁷⁵ Proposed FINRA Rule 3290(g)(3)(C)(4).

⁷⁶ Notice at 5006.

⁷⁷ *Id.* at 5006 n.13 (and accompanying text).

⁷⁸ Rule 17a-4(e)(1) states that members subject to Exchange Act Rule 17a-3 must maintain and preserve in an easily accessible place all records required under Rule 17a-3(a)(12) until at least three years after the associated person's employment and any other connection with the member has terminated.

⁷⁹ Notice at 5006.

⁸⁰ *Id.* at 5006 n.15.

⁸¹ In approving this rule change, the Commission has considered the rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

⁸² 15 U.S.C. 78o-3(b)(6).

either to be already aware of the activity or to have ready access to information about the activity (e.g., activities on behalf of an affiliate).

The overall process established by the proposed rule, under which the member's obligations vary based on the nature of the activity, will allow individual members to tailor their oversight of outside activities based on the member's business model, supervisory structure, and the member's risk assessment of the outside activity at issue.

Importantly, the proposed rule change would not limit a member's ability to impose more robust supervision of, or to condition, limit, or prohibit, as appropriate, outside activities at the member's discretion. For example, a member may expand the scope of its assessment or implement additional appropriate safeguards, limitations, or prohibitions, beyond the minimum requirements established here.⁸³ In addition, although the affiliate exclusion in proposed FINRA Rule 3290(g) permits members to exclude activity on behalf of a member or its affiliate, members are free to impose a notice and assessment requirement for this activity if the member has determined additional safeguards are appropriate for its business.⁸⁴ Similarly, the proposed rule change does not alter members' overarching supervisory responsibilities under the federal securities law and FINRA Rule 3110 to supervise its business and to investigate and act upon red flags indicating potential misconduct. Accordingly, and as explained in more detail below, the Commission finds that the proposed rule change is consistent with Section 15A(b)(6) of the Exchange Act.⁸⁵ The Commission addresses the proposed rule change's specific provisions, and any related comments, in turn.

A. Proposed FINRA Rule 3290(a)–(d)

As stated above, the proposed rule change would replace current FINRA Rules 3270 and 3280 with proposed FINRA Rule 3290. Proposed FINRA Rule 3290(a)–(d) would retain many of the existing requirements of the current rules as part of two distinct categories of activities: (1) outside activities of registered persons, and (2) outside securities transactions of associated persons. Specifically, proposed FINRA Rule 3290(a) and (c) would address the obligations of registered persons and members, respectively, with respect to

outside activities of registered persons; proposed FINRA Rule 3290(b) and (d) would address the obligations of associated persons and members, respectively, with respect to outside securities transactions of associated persons. The discussion below addresses the obligations triggered by these two categories.

1. Outside Activities of Registered Persons—Obligations of Registered Persons (Proposed FINRA Rule 3290(a)) and Members (Proposed FINRA Rule 3290(c))

As stated above, the proposed rule change would, among other things, require a registered person who intends to participate in an outside activity that is not in connection with a securities transaction to provide prior written notice to the member describing in detail the proposed outside activity and the person's proposed role therein.⁸⁶ In the event of a material change to the outside activity, a registered person would be required to provide an updated prior written notice.⁸⁷

The proposed rule change would require a member receiving a notice to assess, at a minimum, whether the outside activity: (1) is an outside securities transaction; (2) involves a customer of the registered person; (3) will interfere with or otherwise compromise the registered person's responsibilities to the member or the member's customers; and (4) will be viewed by the member's customers or the public as part of the member's business based upon, among other factors, the nature of the proposed activity and the manner in which it will be offered.⁸⁸ Based on the member's review of such factors, the member would be required to evaluate whether to condition, limit, or prohibit a registered person's outside activity.⁸⁹ If a member imposes conditions or limitations on a registered person's outside activity, proposed FINRA Rule 3290.06 would require the member to reasonably supervise the person's compliance with such conditions or limitations.⁹⁰

2. Outside Securities Transactions of Associated Persons—Obligations of Associated Persons (Proposed FINRA Rule 3290(b)) and Members (Proposed FINRA Rule 3290(d))

As stated above, the proposed rule change would require an associated

person of a member who intends to participate in an outside securities transaction to provide prior written notice to the member, describing in detail the proposed transaction, the person's proposed role therein, and whether the person will receive selling compensation.⁹¹ The associated person must provide prior written notice (and if the transaction is for selling compensation, receive prior written approval) for each separate transaction, with two exceptions: (1) a series of related securities transactions not for selling compensation; and (2) where the associated person is acting as a portfolio manager or investment committee member for an entity as described in proposed FINRA Rule 3290.02 and is not selling the entity's shares for selling compensation.⁹² In those two cases, the associated person may provide a single prior written notice.⁹³ In the event of a material change to the outside securities transaction, an associated person would be required to update any prior written notice and, if the outside securities transaction is for selling compensation, obtain prior written approval from the member for the material change.⁹⁴

Upon receiving the notice, the proposed rule change would require a member to assess, at a minimum, whether the securities transaction: (1) is a securities transaction for selling compensation; (2) involves a customer of the associated person; (3) will interfere with or otherwise compromise the associated person's responsibilities to the member or the member's customers; and (4) will be viewed by the member's customers or the public as part of the member's business based upon, among other factors, the nature of the proposed activity and the manner in which it will be offered.⁹⁵

If the outside securities transaction is not for selling compensation, the proposed rule change would require the member to: (1) provide the associated person prompt written acknowledgement of such notice, and (2) at the member's discretion, require the associated person to adhere to specified conditions in connection with the associated person's participation in the transaction.⁹⁶

If the outside securities transaction is for selling compensation, proposed FINRA Rule 3290(d)(3) would require the member to notify the associated person in writing of the member's

⁸³ See, e.g., Notice at 5011; FINRA I at 9; FINRA II at 4.

⁹¹ Proposed FINRA Rule 3290(b)(1), (3).

⁹² Proposed FINRA Rule 3290(b)(1)(A)–(B).

⁹³ Proposed FINRA Rule 3290(b)(1)(A)–(B).

⁹⁴ Proposed FINRA Rule 3290(b)(2).

⁹⁵ Proposed FINRA Rule 3290(d)(1).

⁹⁶ Proposed FINRA Rule 3290(d)(2).

decision to: (1) approve the proposed transaction after making a reasonable determination based on the criteria enumerated in proposed FINRA Rule 3290(d)(1); (2) approve the proposed transaction subject to specific conditions or limitations after a reasonable determination based on the criteria enumerated in proposed FINRA Rule 3290(d)(1); or (3) disapprove the proposed transaction.⁹⁷ In addition, proposed FINRA Rule 3290(d)(4) would require a member to record each approved outside securities transaction for selling compensation on its books and records and to supervise the person's participation in the transaction as if executed on behalf of the member.⁹⁸ Further, if a member imposes conditions or limitations on an associated person's participation in an outside securities transaction (whether or not for selling compensation), proposed FINRA Rule 3290.06 would require the member to reasonably supervise the person's compliance with such conditions or limitations.⁹⁹

As stated above, proposed FINRA Rule 3290.01 would provide that if a member approves an associated person's participation in an outside securities transaction involving selling compensation and that person is associated with more than one member, the members may develop a written allocation arrangement whereby at least one member agrees to be responsible for compliance with respect to all applicable securities laws and regulations and FINRA rules regarding the proposed activity, including those requiring member supervision and recordkeeping.

3. Comments on Proposed FINRA Rule 3290(a)–(d) and FINRA's Response, Including Amendment

Many commenters supported the proposed consolidation of FINRA Rules 3270 and 3280 into proposed FINRA Rule 3290(a)–(d),¹⁰⁰ stating that

consolidating the OBA and PST reporting requirements and member obligations would promote efficiency and allow compliance personnel to focus on higher-risk activities.¹⁰¹

¹⁰¹ See, e.g., FSI I at 1, 4 (stating that streamlining two rules into proposed Rule 3290 would make a time-consuming process for broker-dealer compliance departments more efficient and focus the efforts of compliance personnel on activities that are likely to impact investor protection); letter from David T. Bellaire, Executive Vice President and General Counsel, Financial Services Institute, at 2 (dated May 27, 2026), <https://www.sec.gov/comments/SR-FINRA-2026-001/srfinja2026001-791919-2397389.pdf> (“FSI II”); CAI at 2; Cambridge I at 1, 2; ASA I at 1, 2; LPL I at 2; letter from Matthew Morningstar, Group Managing Director, Chief Legal Officer, LPL Financial at 1 (dated May 27, 2026), <https://www.sec.gov/comments/SR->

Specifically, commenters supported the proposed requirement under FINRA Rule 3290(c)(1) and (d)(1) that a member assess whether a proposed activity involves a customer of the registered person or associated person, respectively, rather than a customer of the member.¹⁰² One of these commenters stated that the more limited assessment would establish an obligation tied to a relationship that members can realistically identify and verify.¹⁰³ In contrast, another commenter recommended that FINRA expand the assessment requirements to include consideration of whether the activity or transaction involves a customer of the member or, at a minimum, to specify that the involvement of a member's customer after the initial notice is a “material change” that would require an updated notice and assessment, stating that as proposed, the proposed rule change would increase the risk that members will fail to adequately consider potential risks to their customers, such as the risk presented by the outside securities transactions of an associated person employed in an operational role with access to customer information or member systems.¹⁰⁴

FINRA responded that customer confusion and the associated reputational and legal risks to the member are most acute when the customer has a direct relationship with the associated person conducting the outside activity.¹⁰⁵ As such, requiring members to assess whether the activity involves a customer of the associated person is a targeted approach that focuses on situations presenting heightened risk.¹⁰⁶ Additionally, FINRA stated that requiring members to assess whether the proposed activity involves customers of a member (as opposed to customers of a registered person or associated person) would not meaningfully enhance investor protection, as customers who have no relationship with the particular associated person conducting the outside activity face lower risk of

confusion about the member's involvement in the proposed activity.¹⁰⁷

FINRA also stated that the proposed rule change would standardize the minimum assessment that members must conduct upon receiving notice of registered persons' outside activities and associated persons' outside securities transactions to include the assessment required by FINRA Rule 3270, and add a new requirement to assess whether the activity involves the customer of the registered or associated person.¹⁰⁸ FINRA stated, however, that the proposed rule change would not limit a member's ability to expand the scope of its assessment if the member determines a broader scope is appropriate for its business.¹⁰⁹

Other commenters recommended that FINRA expand or clarify other aspects of the assessment requirement through amendments to the proposed rule change or additional guidance. Specifically, one commenter recommended that FINRA require members to inspect the personal and operating bank accounts of its independent registered representatives.¹¹⁰ Several commenters also made various requests for further guidance, including whether the rule would limit a member's ability to conduct a more robust assessment or implement safeguards beyond the minimum required by the proposed rule change,¹¹¹ and what would constitute a "material change" to an outside activity.¹¹²

In response, FINRA stated that the proposed rule change would not limit a member's ability to expand the scope of its assessment or to implement safeguards beyond the minimum requirements established in proposed FINRA Rule 3290.¹¹³ That is, under the proposed rule change, members would maintain the flexibility to develop and implement supervisory systems that reflect their respective business models. For these reasons, FINRA declined to amend the proposed rule change to

provide the additional guidance requested by commenters.¹¹⁴ FINRA stated, however, that if the Commission approves the proposed rule change, it will consider providing additional guidance as appropriate.¹¹⁵

FINRA also declined to modify the proposed rule change to require members to inspect the personal and operating bank accounts of its independent registered representatives, stating that a blanket bank account inspection requirement would raise "significant privacy concerns and be operationally infeasible."¹¹⁶

Finally, one commenter recommended that FINRA explicitly require members to supervise any conditions or limitations they impose on approved outside activities.¹¹⁷ In response, FINRA amended the proposed rule change to include proposed FINRA Rule 3290.06 (Supervision of Imposed Conditions or Limitations) to state if a member imposes conditions or limitations pursuant to paragraphs (c)(2), (d)(2) or (d)(3) of Proposed Rule 3290, the member would be required to reasonably supervise compliance with such conditions or limitations.¹¹⁸ FINRA stated that, while this obligation has always been implicit in the existing rules, the amendment would provide greater clarity to its members.¹¹⁹

Three commenters supported this amendment, stating that although this obligation was already implicit under FINRA Rules 3270 and 3280, explicitly codifying it in proposed FINRA Rule 3290.06 would remove ambiguity and reinforce that a member's imposition of conditions or limitations on an outside activity carries a supervisory obligation to assess compliance with those conditions or limitations.¹²⁰

Another commenter opposed this amendment, stating that the proposed supervisory requirement is "irreconcilable with the legal and ethical obligations that govern law firm outside business activities" ("professional OBAs").¹²¹ This commenter recommended that FINRA

amend proposed Rule 3290.06 to: clarify that members' obligations to supervise conditions or limitations on licensed professionals' outside activities does not require such members to obtain or review privileged material; establish safe harbors from the proposed supervision obligation for members that impose certain good faith limitations or conditions on licensed professionals' outside activities; and, highlight that members may seek an exemption from proposed Rule 3290.06 pursuant to proposed FINRA Rule 3290(h).¹²² In addition, the commenter requested that FINRA provide guidance to help members design conditions and limitation on supervising professional activities that would not require access to privileged information.¹²³

In response, FINRA stated that proposed FINRA Rule 3290.06 would not require that a member impose conditions or limitations on professional OBAs; rather, it would require that if a member imposes conditions or limitations, it must reasonably supervise for compliance with the conditions or limitations.¹²⁴ As such, members would have discretion to determine whether to impose any conditions or limitations, and if they do, what types of conditions or limitations would be appropriate given the nature of the activity.¹²⁵ FINRA also noted that proposed Rule 3290(h) would include general exemptive authority to permit FINRA staff to conditionally or unconditionally grant an exemption for good cause shown pursuant to the FINRA Rule 9600 Series.¹²⁶ Consequently, FINRA stated that a general safe harbor or exemptive relief for professional OBAs is not necessary.¹²⁷ For these reasons, FINRA declined to modify the proposed rule change in this respect. FINRA stated, however, that it remains open to considering whether to provide additional guidance or exemptive relief on a case-by-case basis where specific facts and circumstances demonstrate that such guidance or relief is appropriate.¹²⁸

4. Commission Findings on Proposed FINRA Rule 3290(a)–(d), 3290.01, and 3290.06

The proposed rule change is reasonably designed to establish uniform minimum standards by which

¹⁰⁷ *Id.* at 7. Further, FINRA stated that a broader requirement could present practical challenges. For example, some members may face operational challenges cross-referencing outside activity participants against the member's entire customer base. *Id.* at 7–8 and n.20.

registered persons report outside activities, associated persons report outside securities transactions, and members assess and supervise such activities. In doing so, the proposed rule change would both maintain and build on many of the existing requirements for the notice and assessment process in existing FINRA Rules 3270 and 3280. This approach would permit associated persons, registered persons, and members to leverage established supervisory practices designed to comply with existing obligations where applicable, enhancing regulatory and compliance efficiency.

The proposed rule change would incorporate existing obligations by requiring that a registered person or associated person provide prior written notice to the member describing in detail the proposed outside activity or outside securities transaction, respectively, and the person's role therein. The proposed rule change would also add a requirement for associated and registered persons to update their notice prior to continuing the activity in case of a material change prior.

By enumerating the information that must be included in such notices the proposed rule will set a minimum information requirement so that members have the information that they need to discharge their supervisory obligations. Further, the obligation to provide an updated prior written notice in case of a material change will help ensure that members have current information necessary to fulfill their supervisory obligations. In addition, with respect to the commenter's request for guidance on what constitutes a material change, FINRA will consider providing additional guidance as appropriate if the Commission approves the proposed rule change.

Turning to a member's obligations upon receiving a notice of an outside activity or outside securities transaction, by requiring a member to assess an outside activity or outside securities transaction, the proposed rule change provides a uniform regulatory framework with respect to risk assessment, requiring members to consider the potential risks associated with an outside activity or securities transaction and whether to limit, condition or prohibit the outside activity or outside securities transaction.

Specifically, requiring a member to assess whether an activity is properly characterized as an outside activity, rather than an outside securities transaction, or, if it is an outside securities transaction, whether it is for selling compensation, should help

members address any mistaken or intentional mischaracterization by their associated persons, and help ensure the appropriate obligations apply to the proposed activity.

By requiring a member to consider whether the outside activity or outside securities transaction involves a customer of the registered person or an associated person, respectively, rather than a customer of the member as a commenter suggested, the proposed rule change reasonably focuses a member's attention on the relationships where the risk of customer confusion, and the associated reputational and legal risks to the member, are greatest—those where the customer has a direct relationship with the registered person or associated person engaged in the outside activity or outside securities transaction. Further, by requiring the member to assess whether the activity or transaction would be viewed by the member's customers or the public as part of the member's business, a member would be required to more broadly consider the potential for confusion to the member's customers or the public. Moreover, the proposed rule would require a member to assess whether the outside activity or outside securities transaction will interfere with or otherwise compromise the registered person's or associated person's responsibilities to the member or the member's customers, which again imposes a broad obligation on the member to evaluate the risk of the proposed activity to the member and the member's customers. Finally, the obligations imposed by the proposed rule change are a floor, not a ceiling. Accordingly, a member can expand the scope of its assessment if the member determines a broader scope is appropriate for its business.

Also, it was reasonable for FINRA to decline to impose an overarching obligation for members to inspect personal bank accounts of its independent registered representatives, given that such an obligation could create privacy challenges and could be operationally difficult to implement without a commensurate benefit to the supervisory program of the member. Moreover, even without such an explicit requirement, a member would still be subject to its general supervisory obligations under federal law or FINRA Rule 3110, including responsibility to investigate and act in light of "red flags" suggesting possible misconduct such as an undisclosed outside securities transaction.

Requiring a member to evaluate the advisability of imposing specific conditions or limitations on a registered person's outside activity, including

where circumstances warrant, prohibiting the activity, will require members to reasonably consider the facts and circumstances associated with the outside activity, to evaluate the nature of the risk associated with the activity, and to determine what conditions and limitations, if any, are appropriate, or whether the activity should be prohibited. In doing so, the proposed rule would impose a uniform minimum assessment process for members, while also providing flexibility to members to determine whether to condition, limit, or prohibit an activity, based on the member's assessment of the risks to customers and the member presented by the activity in light of the member's business model and risk profile.

Further, delineating a member's obligations related to an outside securities transaction based on whether the associated person will receive selling compensation maintains existing requirements under FINRA Rule 3280 and is reasonably calibrated to require the member to focus the most supervisory and compliance resources on those activities that pose greater risks to members and their customers. Specifically, for transactions not involving selling compensation, the proposed rule change would reasonably impose fewer obligations—notably requiring a member to assess the proposed transaction and acknowledge the notice—and would leave to the member's discretion to determine whether to impose any conditions on the transaction based on the member's assessment of the enumerated factors set forth in proposed FINRA Rule 3290(d)(1). For transactions involving selling compensation, however, the proposed rule change would impose more stringent obligations on members, reflecting the increased risks associated with an outside securities transaction involving selling compensation, and the corresponding need for heightened scrutiny. In particular, members would be required to assess the proposed transaction and, based on that assessment, approve (with or without limitations or conditions) or disapprove the transaction. If a member approves a proposed securities transaction for selling compensation, the member would be required to record the transaction on its books and records and supervise the associated person's participation in the transaction as if it was executed on behalf of the member.

As the proposed rule change permits, but does not require, members to limit or condition an outside activity or an outside securities transaction (and gives members flexibility in determining any

such limitations or conditions), and enables members to seek an exemption from any provision of the proposed rule change for unique factual scenarios (as discussed further below), it is reasonable for FINRA not to address all unique factual scenarios at the outset, such as those associated with professional licenses.

In addition, as discussed more fully below, the proposed rule change would require a member to supervise any imposed limitations or conditions on an outside activity or outside securities transaction, which will help ensure that any limitations and conditions that a member determines are necessary are observed. Moreover, as noted, the obligations imposed by the proposed rule change are a floor, not a ceiling. Accordingly, the proposed rule change does not restrict a member's ability to limit, condition, or prohibit any outside activities or outside securities transactions where the member has determined such a prohibition is appropriate for its own risk management.

Finally, by permitting members to develop a written allocation agreement regarding regulatory obligations for an associated person's participation in an outside securities transaction involving selling compensation, the proposed rule change promotes regulatory efficiency and minimizes duplicative regulatory oversight, while preserving investor protection.

For these reasons, the proposed rule change is reasonably designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

B. Proposed Definition of Investment-Related Activity

As stated earlier, the obligations of proposed FINRA Rules 3290(a)–(d) are triggered based on the participation of a member's associated person in "investment-related activity." As originally proposed, the term would have been defined as "pertaining to financial assets, including securities, crypto assets, commodities, derivatives (such as futures and swaps), currency, banking, real estate or insurance." The term would have included but not have been limited to, "acting as or being associated with a broker-dealer; issuer; insurance agent or company; investment company; investment adviser; futures commission merchant; commodity trading advisor; commodity pool operator; municipal advisor; futures sponsor; bank; savings association; or

credit union."¹²⁹ The proposed definition also included "an associated person's participation in any manner in a personal investment involving a securities transaction, sometimes referred to as "buying away," other than transactions indicated in proposed FINRA Rule 3290(g)(3)(A)."¹³⁰

Many commenters supported the proposed definition of "investment-related activity" as originally proposed, stating that it would streamline the process of reporting outside activities by eliminating the obligation to report routine activities (such as volunteer youth sports coaching, serving on a local civic board, and farming) that do not cause harm to members or investors and the reporting of which diverts member resources.¹³¹ In particular, commenters stated that the current reporting requirements require members to expend compliance resources on reviewing disclosures of low-risk, non-financial activities that ultimately result in increased costs for financial advisors and their clients.¹³²

Some commenters requested that the proposed definition be broadened, narrowed, or clarified.¹³³ More specifically, with respect to broadening the definition, some commenters opposed the proposed definition as too

narrow, stating that disclosures of OBAs should be robust and not limited to investment-related activity in order to ensure that members can evaluate the OBAs for potential conflicts of interest and the risk of securities fraud.¹³⁴ One commenter stated in particular that the boundary between investment-related and non-investment-related activity is rarely clear, so restricting the type of activities that could be reported to, and assessed by, members, would create gaps in supervision that could obscure misconduct.¹³⁵ One commenter opposed the definition because it excluded significant categories of agent conduct that may pose risks to investors.¹³⁶ One commenter recommended broadening the proposed definition to include, among other things, activities pertaining to money transmission, collectibles, and lending, and to add the phrase "but not limited to" before the list of examples to clarify that the examples are illustrative rather than exhaustive.¹³⁷ Another commenter recommended broadening the proposed definition to include, among other things, financial planning, tax advice, and business advice, stating that

¹²⁹ See proposed FINRA Rule 3290(f)(3)(A).

¹³⁰ See *supra* note 51.

¹³¹ See Form Letter A (identifying volunteer youth sports coaching, serving on a local civic board, and farming as examples of such low risk activities); Form Letter B (stating the definition focuses reporting requirements on activities that matter for investor protection and removes obligations to report low-risk activities); FSI I at 4 (noting that narrowing the focus to investment-related activities will benefit investor protection by allowing compliance personnel to spend their time on higher-risk activities); Robinhood at 2 (stating that the focus on investment-related activities will reduce unnecessary burdens while maintaining core investor protections of the existing FINRA Rules 3270 and 3280). See also CAI at 2; LPL II at 1–2; ACA at 1–2. Commenters also recommended that FINRA amend Form U4 to align with the proposed rule change because requiring registered representatives to disclose non-investment-related outside activities pursuant to Question 14 of Form U4 would negate the benefits of the proposed rule change. See, e.g., SIFMA I at 2; SIFMA II at 3; see also CAI at 3; FSI I at 5; NASAA at 2, n.5; Robinhood at 2. In response, FINRA declined to amend the proposed rule change, stating that Form U4 disclosures are outside the scope of the proposed rule change; but FINRA also stated that it would endeavor to work with the Commission and state regulators to harmonize the Form U4 disclosure obligations where appropriate. See FINRA I at 16; FINRA II at 8–9. FINRA reasonably declined to amend the proposed rule change in response, as the comment is outside the scope of the proposed rule change.

¹³² See, e.g., Form Letter B; SIFMA II at 2; see also Robinhood at 2 (stating that narrowing the proposed rule change to investment-related activities reduces the administrative and operational burdens of reporting low-risk activities).

¹³⁷ See NASAA at 2–3.

investors could perceive these activities as part of a member's business.¹³⁸

By contrast, one commenter suggested narrowing the proposed definition to securities transactions in order to exclude transactions with which a member may not have familiarity, such as transactions in non-securities insurance or banking products.¹³⁹ Another commenter suggested narrowing the proposed definition to exclude fundraising for non-profit organizations and the receipt of residual insurance commissions.¹⁴⁰

With respect to clarifying the proposed definition, one commenter requested guidance regarding the scope of categories such as banking, insurance, and real estate.¹⁴¹ Another commenter requested guidance regarding whether the proposed definition included real estate, and in particular rental properties.¹⁴²

In response to commenters generally opposed to the proposed definition because they viewed it as too narrow, leading to an unduly limited application of the proposed rule change's operative provisions, FINRA stated that the framework under current FINRA rules, in which all OBAs, including those that are non-investment-related, are reported creates significant compliance burdens without commensurate investor protection benefits.¹⁴³ FINRA also stated that by eliminating the notice and assessment requirements for non-investment-related activities, which present minimal investor protection concerns, the proposed rule change would free members to focus resources and attention on activities more likely to involve potential customer confusion or harm.¹⁴⁴ FINRA stated that members would still be required to maintain a system to supervise activities that is reasonably designed to achieve compliance with applicable securities laws and regulations and FINRA rules.¹⁴⁵ In addition, FINRA stated that the proposed definition expressly encompasses "all activities pertaining to financial assets" even if not individually listed, and clarified that

the listed examples in the proposed definition are not exclusive.¹⁴⁶ Further, FINRA stated that members would retain discretion to prohibit or condition activity based on risk.¹⁴⁷ For these reasons, FINRA stated that the scope of the proposed definition strikes the right balance regarding disclosure of activities that may pose a greater risk to the investing public and members.¹⁴⁸ As such, FINRA declined to amend the proposed rule change. However, FINRA also stated if the Commission approves the proposed rule change, it will consider providing additional guidance regarding the scope of investment-related activity as appropriate.¹⁴⁹

FINRA also responded to comments about the coverage of specific activities. In response to comments regarding broadening the scope of the definition to include specific activities, such as money transmission and financial planning, FINRA stated that the list of activities in the proposed definition of investment-related activities was not meant to be exhaustive and therefore activities pertaining to financial assets and other related roles or associations would be covered even if not expressly listed among the examples in the proposed definition. As such, FINRA stated the proposed definition already captures money transmission, lending, collectible activity, and financial planning to the extent they pertain to financial assets.¹⁵⁰ Nevertheless, FINRA amended the proposed rule change to add both the broader phrase "money services business" to provide regulatory clarity and the phrase "but not limited to" before the list of examples in proposed Rule 3290(f)(3) to confirm that the listed examples are illustrative rather than exhaustive.¹⁵¹ FINRA also stated that the proposed definition already captures tax advice and other similar types of services to the extent that are performed concomitant to investment-related activity.¹⁵²

In response to comments requesting the exclusion of specific activities from the scope of the proposed definition, FINRA stated that narrowing the definition to only securities transactions would inappropriately exclude activities that present risks to investors and members, particularly the risk that investors or the public would view the activities as part of the member's

business.¹⁵³ With regard to excluding fundraising activities for non-profit organizations, FINRA stated that depending on the specific facts and circumstances, fundraising activity could be investment-related; as such, excluding all fundraising for non-profit organizations from the proposed definition could exclude activities that present risks to investors and members.¹⁵⁴ With respect to comments seeking to exclude residual insurance commissions, FINRA stated that FINRA Rules 2320 and 2341 already address the receipt of residual insurance commissions, because those rules prohibit associated persons of a member from accepting any compensation in connection with the outside sale and distribution of variable contracts or investment company securities.¹⁵⁵ With respect to comments seeking clarity regarding real estate and particularly rental properties, FINRA stated that real estate is expressly included in the definition of investment-related activity and would be subject to the proposed rule change unless such activity met the exclusion in proposed Rule 3290(g)(3)(C) for a main home and up to two secondary homes.¹⁵⁶

In response to comments that the proposed definition lacks clarity and would cause registered persons to make subjective determinations, FINRA explained that the proposed definition expressly covers "all activities pertaining to financial assets," including those that are not securities-related, and that the examples cited are not exclusive.

Also in response to comments, FINRA proposed a clarifying amendment to make explicit the breadth of the definition with respect to money services business and to confirm that the listed examples are illustrative rather than exhaustive. In addition, FINRA further stated that the definition captures activities related to capital raising, lending, financial planning, selling private funds, investment partnerships, and crypto-asset development, promotion or market intermediation, and that consulting, marketing, accounting, legal and tax advice services concomitant to investment-related activity would also be covered.¹⁵⁷ With the proposed amendment and statements, FINRA

¹³⁸ See St. John's Law at 2 (stating that including these activities within the definition of "investment-related activity" would help avoid confusion and potential conflicts regarding the nature of such services); see also Massachusetts at 3 (stating that the proposed rule change excludes consulting, legal, tax, and marketing functions, as well as accountancy and financial control positions that can be precursors to larger fraudulent activity).

clarified that the proposed definition should be interpreted broadly.

The proposed rule change reasonably focuses members' oversight of outside activities on those that present the greatest potential harm to members or investors. The proposed definition of investment-related activity is designed to scope into the operative provisions of proposed FINRA Rule 3290 associated persons' activities where the risk associated with the activity, such as the potential for customer confusion about the registered person and their broker-dealer's involvement in the activity, is most acute. Although excluding any category of activity from the scope of the proposed rule may result in a member having less visibility into those activities, members have limited compliance resources, and it is thus reasonable for FINRA to adopt a risk-based approach by narrowing the scope of reportable activities to those with greater potential for harm to investors and to the member. Moreover, members would still be required to maintain a system to supervise activities that is reasonably designed to achieve compliance with applicable securities laws and regulations and FINRA rules. In that regard, members could impose reporting requirements on activities that do not fall within the definition of investment-related activity, or prohibit or condition activities, as appropriate. Additionally, nothing in the proposed rule change would alter the well-settled principle that members must investigate "red flags" indicating problematic activities.

The proposed definition would broadly cover activities pertaining to financial assets, subject to certain targeted exclusions, which are more likely to involve potential customer confusion or harm: activities that are either directly securities-related or otherwise associated with common financial services, such as insurance, banking and crypto assets.

The proposed definition of "investment-related activity" as amended is reasonably expansive to capture and focus on activity that has greater potential to cause customer confusion or harm to investors and to members—activities that pertain to financial assets. The proposed definition, coupled with the clarifications and explanations offered, should provide a reasonable compliance roadmap for both members and their associated persons, and help ensure that the proposed rule change will result in members being notified of activities that are more likely to expose members and investors to risk. By enabling members to redirect supervisory and compliance

resources toward higher-risk investment-related activities, including investment-related activities that are not securities-related, the proposed rule change should promote more effective risk-based oversight. FINRA also indicated it would consider providing additional guidance on the scope of investment-related activity if the proposed rule changed is approved, where appropriate.

For these reasons, the proposed rule change is reasonably designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

C. Activities Treated as Outside Activities for Purposes of Proposed FINRA Rule 3290

1. Associated Persons Acting as Portfolio Managers and Investment Committee Members

As stated above, proposed FINRA Rule 3290.02 states that an associated person would not be considered to be participating in an outside securities transaction to the extent that the associated person's activities are limited to acting as portfolio manager or investment committee member for registered investment companies (*e.g.*, mutual funds, exchange traded funds, unit investment trusts, or registered closed-end funds), unregistered investment companies, business development companies, real estate investment trusts, and entities that are recognized as tax exempt. Such activity would be considered an outside activity of a registered person. However, the proposed exception would not include an associated person's activities related to purchasing or selling such entities' shares, which would be considered outside securities transactions unless otherwise excluded under proposed FINRA Rule 3290(g). FINRA Rule 3290.02 would codify FINRA's staff positions on member requirements applicable to these activities.¹⁵⁸

One commenter opposed the proposed rule change as too broad, stating that associated persons engaged in the activities described above are subject to a range of conflicts, including compensation-related conflicts, as well as other risks and thus there should not be a *per se* exclusion of these activities from treatment as outside securities transactions and the associated requirements to supervise and maintain records of that activity.¹⁵⁹ In the context

of a tax-exempt organization, this commenter stated that there may be risks and conflicts that could harm the organization, particularly since these roles may also pay substantial compensation.¹⁶⁰

In response, FINRA stated that the activities deemed to be outside activities under proposed Rule 3290.02 typically involve management of third-party capital with associated fiduciary duties and regulatory oversight, and thus do not present the same level of risk as direct participation in securities transactions.¹⁶¹ As such, requiring the associated person to notify its members of the activity and the member to assess the proposed activity is sufficient to enable members to evaluate any associated risks.¹⁶² Further, FINRA stated that members retain discretion to impose conditions or limitations on the activity based on the member's evaluation of the particular risk, and to the extent a member does impose conditions or limitations on the activity, the member would be required to supervise compliance with the conditions or limitations under proposed FINRA Rule 3290.06.¹⁶³ Additionally, if the associated person begins selling fund shares for compensation, shifting from a governance or management role to a sales capacity, then the proposed rule change's approval, member supervision and recordkeeping requirements would apply.¹⁶⁴ FINRA also stated that the proposed rule change is consistent with how FINRA staff has interpreted FINRA Rules 3270 and 3280.¹⁶⁵

The proposed rule change, which codifies FINRA's current treatment of these activities under existing FINRA Rules 3270 and 3280, reasonably treats certain limited activities of an associated person who acts as a portfolio manager or investment committee member for specified entities as outside activities of a registered person, subject to the notice and member assessment in proposed FINRA Rule 3290(a) and (c), rather than as outside securities transactions, subject to the notice, assessment, and applicable approval requirements in proposed FINRA Rule 3290(b) and (d). The proposed rule change reasonably tailors the obligations of members and associated persons in light of the risk presented by the activity. For example,

¹⁶⁰ *Id.*

¹⁵⁹ See Massachusetts at 4.

portfolio managers and investment committee members of registered investment companies are subject to regulatory oversight under the Advisers Act and the Investment Company Act of 1940 ("Investment Company Act") or oversight by state regulators, as applicable.

Treating this activity as an outside activity is designed to help ensure that the member is aware of the proposed activity, assesses the associated risks, and imposes conditions and limitations (including prohibiting the activity) based on its assessment. Further, proposed FINRA Rule 3290.06 would explicitly impose a new requirement for the member to supervise compliance with any conditions or limitations. Finally, if the activity involves selling shares for compensation, the additional notice, assessment, and approval obligations applicable to outside securities transactions would apply to address the additional risks presented by that activity. For these reasons, the proposed rule change is reasonably designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

2. Associated Person Activity at an Unaffiliated RIA

As stated above, proposed FINRA Rule 3290.03 states that an associated person's activity at an unaffiliated RIA registered either with the Commission under Advisers Act Section 203 or with a state securities commission (or any agency or office performing like functions) would be considered an outside activity of a registered person and not an outside securities transaction for purposes of proposed FINRA Rule 3290. As a result, the associated person would be required to provide prior written notice of such activity under proposed FINRA Rule 3290(a), and the member would be required to conduct an assessment pursuant to the criteria set forth in proposed FINRA Rule 3290(c), but the member would not be required to supervise or keep records of that activity.¹⁶⁶ FINRA stated that as a result, the proposed rule change would "revise[] the member obligations imposed via a series of Notices to Members issued in the 1990s."¹⁶⁷

The majority of commenters supported the proposed rule change,¹⁶⁸

generally stating that activities at unaffiliated RIAs are already effectively regulated by the Commission and state regulators, making the existing requirements duplicative.¹⁶⁹ As such, commenters stated that the existing framework creates a situation in which compliance resources are spent on redundant review rather than investor protection.¹⁷⁰ Commenters also stated that the existing requirements create an uneven regulatory landscape between broker-dealers and investment advisers because registered investment adviser firms without FINRA-registered personnel are not subject to the additional layer of FINRA regulation.¹⁷¹

Other commenters stated that the existing obligation to supervise unaffiliated RIA activity of their associated persons exposes members to an unreasonable liability risk in the event of investor losses stemming from advice provided by the unaffiliated RIA firm.¹⁷² Finally, several supportive commenters stated that the proposed rule change would help eliminate privacy concerns¹⁷³ and other barriers to regulatory compliance caused by the current rules.¹⁷⁴

Commenters opposed to the proposed rule change stated that investment adviser oversight by the Commission or state regulators is an inadequate substitute for broker-dealer supervision,¹⁷⁵ with some noting in particular the length of time that may pass between Commission or state

¹⁷² See Form Letter A, see also IAA at 3 (stating that members' inability to obtain such information subjects them to potential regulatory responsibility and liability without providing adequate means to protect themselves); CAI at 2.

¹⁷³ See Reasor at 1 (stating that the current rules require associated persons registered with broker-dealers and with investment advisers to share their advisory clients' non-public personal information with unaffiliated broker-dealers that have no advisory relationship with those clients). See also Form Letter D; letter from Scott Wallschlaeger, MPPL Financial, at 1–2 (dated Feb. 22, 2026), <https://www.sec.gov/comments/sr-finra-2026-001/srfinra2026001-710028-2232575.pdf> ("MPPL Financial") (stating that trust is fundamental to the fiduciary relationship between an advisor and client and that the confidentiality of the advisor-client relationship is protected under federal law, including Regulation S-P); CAI at 2; PKS at 1; Gutierrez at 1; Redwood at 1.

¹⁷⁴ See ACA at 2 (stating that the proposed rule change would eliminate the difficulty of registering prospective registered representatives who work for unaffiliated investment advisers that are unwilling to provide a broker-dealer with the information necessary for the member to supervise such activity as required under FINRA Rule 3280); IAA at 3 (acknowledging that members may have challenges fulfilling their regulatory obligations under the current rules because they lack access to information necessary to meaningfully supervise outside unaffiliated investment adviser activities); see also Gutierrez at 1–2; J. Mahmood.

¹⁶⁷ See *supra* note 56; Notice at 5006.

¹⁶⁸ See Form Letters A, B, C and D; Cetera I at 1–2; letters from Mark Quinn, Director of Regulatory Affairs, Cetera Financial Group, at 1–2 (dated May 26, 2026), <https://www.sec.gov/comments/SR-FINRA-2026-001/srfinra2026001->

examinations of advisers.¹⁷⁶ One commenter also expressed concern about possible rule changes by the Commission that could lead to further reduced frequency of examinations and other regulatory obligations of some investment advisers, which the commenter believes would result in differing regulatory regimes based on adviser size.¹⁷⁷

Commenters also stated that broker-dealers have unique insights into the day-to-day activities of their associated persons and thus eliminating the member supervision and recordkeeping requirements associated with unaffiliated investment adviser activities would fundamentally weaken investor protections.¹⁷⁸ More specifically, commenters stated that the proposed rule change would remove one of the most effective mechanisms for detecting fraud, conflicts of interest, and undisclosed securities activity by associated persons,¹⁷⁹ and that reducing the reporting requirements would make it more likely that illicit conduct would go unreported and unsupervised.¹⁸⁰ One

commenter stated that the proposed rule change is inconsistent with the Commission's authority under Exchange Act Section 15(b)(4)(E) to impose sanctions on a firm for failing to reasonably supervise a person subject to the firm's supervision who commits a violation of the federal securities laws, including the Advisers Act.¹⁸¹ This commenter stated that there is no authority in the Exchange Act that permits a broker-dealer to delegate this supervisory responsibility to another body or that allows FINRA to exempt members from these requirements because another securities statute or regulatory body covers the same activity.¹⁸²

Other commenters opposing the proposed rule change stated that members do not lack sufficient information to meaningfully supervise unaffiliated RIA activities, contending that the securities regulatory framework has never required members to have complete visibility or direct control to meet their supervisory obligations;

rather, it requires broker-dealers to maintain reasonably designed risk-based supervisory systems.¹⁸³ Similarly, commenters stated that the privacy rationale underlying the proposed rule change are unjustified.¹⁸⁴ Specifically, one commenter stated that broker-dealers already handle extensive non-public personal information and are subject to robust safeguarding requirements.¹⁸⁵

Some commenters (including those who supported and those who opposed the proposed rule change) recommended modifications to the proposed rule change.¹⁸⁶ Similarly, one commenter recommended that, if the proposed rule change is approved by the Commission, FINRA provide guidance or supplementary material stating that a member may not ignore or discount evidence of suspicious activities or red flags arising from activities that they do not supervise and emphasizing that members must consider any red flags related to their associated persons' unaffiliated investment advisory activities as part of their core supervisory obligations.¹⁸⁷ Another commenter stated that practical and privacy challenges to having members supervise the unaffiliated RIA activity of their associated persons can be addressed through targeted safeguards, such as requiring written agreements providing the member access to necessary records, coupled with obtaining applicable client consents.¹⁸⁸

Additionally, a commenter stated that FINRA should tailor rather than eliminate broker-dealer responsibilities for these activities, stating that a reasonable alternative would be requiring notice and member approval of outside advisory activities, while limiting supervisory obligations under proposed FINRA Rule 3290 to activity involving the adviser's clients who are also customers of the member as well as advisory accounts for which the

¹⁷⁶ See Cambridge I at 3; *see also* letter from John S. Burke, Esq., JSB Law, at 2–3 (dated Feb. 20, 2026), <https://www.sec.gov/comments/sr-finja-2026-001/srfinra2026001-707867-2226717.pdf> ("Burke"); Miami Clinic at 2–3; Cambridge II at 3.

Mauriello, Esq., Mauriello Law Firm, at 1 (dated Feb. 24, 2026), <https://www.sec.gov/>

[comments/sr-finja-2026-001/srfinra2026001-714467-2237275.pdf](https://www.sec.gov/comments/sr-finja-2026-001/srfinra2026001-714467-2237275.pdf) ("Mauriello"); Kane at 1; Cosgrove Letter at 1; and letter from Adolfo Anzola, Esq., Sonn Law Group P.A., at 1 (dated Feb. 24, 2026), <https://www.sec.gov/comments/sr-finja-2026-001/srfinra2026001-714047-2236935.pdf> ("Sonn II"). *See also* letters from Mark Pugsley, The Anti-Fraud Coalition (dated Feb. 20, 2026), <https://www.sec.gov/comments/sr-finja-2026-001/srfinra2026001-707627-2226454.html> ("Pugsley"); Reema Mahmood, Individual (dated Jun. 12, 2026), <https://www.sec.gov/comments/SR-FINRA-2026-001/srfinra2026001-2488330.htm> ("R. Mahmood").

A commenter also stated that FINRA did not adequately quantify in its economic analysis the costs of unsupervised outside activity on investors, both in terms of existing gaps in supervision and the additional gaps the proposed rule would create. *See* Burke at 5. In response, FINRA stated that unaffiliated RIA activity is subject to supervision by the unaffiliated RIA and overseen by other regulators, and that any additional investor protections arising from member supervision of these activities may be limited because of the difficulty the member may have in obtaining complete information from the unaffiliated RIA. *See* FINRA I at 14. Additionally, FINRA believes that the assessment it conducted was appropriate to capture the economic impact associated with the proposed rule change and in order to directly address any potential loss in investor protections would require more granular data to quantify the effectiveness of other regulatory regimes and then the marginal impact of additional supervision by broker-dealer firms. *See* FINRA I at 14. FINRA's assessment appropriately captures the economic impacts associated with the proposed rule change.

member is the custodian.¹⁸⁹ The commenter stated that such an approach would align supervision with the interests of the member and responsibilities to investors, while helping to mitigate concerns about access to information, privacy, jurisdiction, and overall compliance burden.¹⁹⁰ In the alternative, the commenter suggested the proposed rule change should be revised to “more directly encourage [members] to impose conditions or limitations on outside investment advisory activities when the [member] makes certain findings in the required assessment.”¹⁹¹

In contrast, a supportive commenter recommended that FINRA clarify that a member approving an associated person’s activities at an unaffiliated investment adviser is not required to oversee compliance with any conditions or limitations imposed on those activities, unlike as required by proposed FINRA Rule 3290.06 for conditions and limitations imposed pursuant to proposed Rule FINRA 3290.¹⁹² Lastly, one commenter, expressing concern that the proposed rule change would disadvantage members that exercise prudent supervision and incentivize members to “offload supervisory risk,” suggested that if the Commission approved proposed FINRA Rule 3290.03, the Commission should provide a safe harbor to members from regulatory enforcement and civil liability if an unaffiliated investment adviser violates regulatory or legal standards or harms clients.¹⁹³

In response, FINRA stated that activities at unaffiliated RIAs are fundamentally different from other situations involving private securities transactions because activities at registered investment advisers are already subject to established regulatory structures, and the proposed rule change respects this allocation of

regulatory responsibility.¹⁹⁴ The proposed rule change would thus eliminate duplicative obligations (e.g., broker-dealer supervision) without diminishing the comprehensive oversight framework already in place.¹⁹⁵ FINRA further stated that the effectiveness of investment adviser regulation cannot be judged solely by examination frequency but rather by “the full spectrum of regulatory requirements, ongoing oversight mechanisms, internal compliance obligations, and the fiduciary duty framework applicable to [investment advisers],” and that the Commission and state regulators are in the best position to determine proper supervision of investment advisers based on market conditions, risk assessments, and available resources.¹⁹⁶

In addition, FINRA stated that members would continue to receive notice of any outside activities at unaffiliated RIAs and retain discretion to prohibit or condition or limit such activities based on the member’s evaluation of the associated risk.¹⁹⁷ FINRA further stated that pursuant to FINRA Rule 3110, members are required to investigate any red flags that suggest that misconduct may be occurring and to act upon the results of such investigation; this would include “red flags suggesting that an associated person is involved in an undisclosed outside activity or that a disclosed outside activity involves undisclosed securities transactions, compensation not previously disclosed, or other misconduct.”¹⁹⁸ Finally, FINRA also stated that although it is not aware of any interpretation of Section 15(b)(4)(E) of the Exchange Act that imposes a general obligation on broker-dealers to supervise investment advisory activity, members are free to impose supervisory obligations on their associated persons as a condition to participating in unaffiliated investment advisory activity.¹⁹⁹

FINRA also declined to modify the proposed rule change to create a tailored approach for unaffiliated RIA activities, such as creating a subcategory of outside securities transaction for unaffiliated RIA activity, or limiting supervision to only the approved activity involving

advisory clients who are also customers of the member and to advisory accounts custodied by the member.²⁰⁰ FINRA stated that the suggested approaches disregard the comprehensive regulatory regime for RIAs.²⁰¹ Further, FINRA stated that creating a tailored regime for customers who have an advisory account custodied by the member, as suggested by commenters, would be inconsistent with FINRA’s longstanding policy of creating rules that are business-model neutral where possible, and could create unintended consequences depending on whether or not a particular member requires its associated persons to execute and custody their outside securities transactions at the member.²⁰²

With respect to the comments regarding privacy concerns and suggestions for targeted safeguards, such as requiring written agreements between members and associated persons engaging in unaffiliated RIA activity, FINRA stated that based on its examination experience it has found that privacy protection is a legitimate concern that raises practical hurdles for members to obtain information regarding unaffiliated RIA activities that cannot be dismissed as a mere “operational inconvenience” and thus managed through disclosure, information-sharing and/or consent agreements.²⁰³ Additionally, FINRA stated that it has observed in examinations that members have faced practical hurdles to obtaining information regarding unaffiliated RIA activity.²⁰⁴ For these reasons, FINRA declined to modify the proposed rule change.

The proposed rule change reasonably treats activity performed by associated persons at an unaffiliated RIA as an outside activity subject to the notice and member assessment requirements in proposed FINRA Rule 3290(a) and (c), rather than an outside securities transaction subject to the notice, assessment, and applicable approval, supervision, and recordkeeping requirements in proposed FINRA Rule 3290(b) and (d). The proposed rule change reasonably tailors the applicable framework to address the level of risk presented by the activity, by recognizing existing oversight of the activity by the Commission or state regulators, and in so doing, addresses privacy and practical challenges noted by commenters and observed by FINRA

¹⁸⁹ See NASAA at 7. See also St. John’s Law at 2 (stating that because unaffiliated RIA activity frequently involves an outside securities transaction and may involve the customer of the registered person, that such activity should either be treated as a subcategory of outside securities transactions or as a separate third category with additional obligations closer to those proposed for outside securities transactions to ensure adequate supervision and investor protection); Miami Clinic at 3 (recommending that FINRA consider retaining risk-based obligations (e.g., reasonable supervision) where associated persons provide any type of investment advice, including through a registered investment adviser).

²⁰⁴ *Id.*

regarding members' ability to obtain data necessary to discharge their obligations under existing Rules 3270 and 3280, while also providing important investor protections.

With respect to the commenter's concern that proposed or potential future rule changes by the Commission could further reduce the frequency of investment adviser examinations or reduce investment advisers' regulatory obligations, FINRA's proposed rule change must be assessed on whether it meets the standards set forth in the Exchange Act, including whether it is designed to protect investors and the public interest;²⁰⁵ any concerns about the impacts of a Commission rulemaking on investor protection would be appropriately addressed in the context of any proposed Commission rulemaking.²⁰⁶

Requiring members to supervise and maintain records of unaffiliated investment adviser activities impose additional compliance costs and liability and causes significant operational and practical challenges for members, which are more appropriately borne by the entity with responsibility for the activity. The proposed rule change eliminates these costs and challenges while preserving reasonable investor protection measures through the obligations imposed by treating these activities as an outside activity.²⁰⁷ Specifically, the proposed rule change would still require an associated person to provide prior written notice to his or her member detailing the activity so that a member can make an informed decision about whether to limit, condition, or prohibit the activity. For example, members could impose restrictions on their associated persons as a condition to participation in the unaffiliated RIA activity, and proposed FINRA Rule 3290.06 would require the member to supervise compliance with such conditions or limitations.

Similarly, while the proposed rule change forgoes imposing the per se

supervisory obligations attendant with treating unaffiliated RIA activity as an outside securities transaction, in favor of a risk-based approach, the proposed rule change does not allow members to turn a blind eye to the risk presented by permitting such activity. Members cannot ignore evidence of suspicious activities, as the proposed rule does not alter members' overarching supervisory responsibilities under applicable federal laws and FINRA rules to investigate and act upon red flags indicating potential misconduct. Furthermore, the proposed rule change establishes a minimum standard under FINRA rules for reasonable supervision of associated persons, including registered persons, for compliance with relevant obligations; the proposed rule change does not alter or supersede a member's obligation to comply with other applicable statutory or regulatory requirements.²⁰⁸ In recognition of the regulatory framework that governs activity at registered investment advisers, the proposed rule change imposes targeted, risk-based regulatory safeguards reasonably designed to protect investors and the public interest. In doing so, the proposed rule change should reduce compliance burdens while facilitating investor protection. For these reasons, the proposed rule change is reasonably designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

3. Associated Person Outside Securities Activity Subject to GLBA or Exchange Act Regulation R

As stated above, proposed FINRA Rule 3290.05 states that an associated person's securities activity that is not subject to a contractual arrangement under proposed FINRA Rule 3290.04 but that qualifies under the GLBA or Regulation R exceptions to broker or dealer²⁰⁹ registration requirements would be considered an outside activity of a registered person and not an outside securities transaction for purposes of the proposed rule. This activity would be subject to the notice and assessment requirements in proposed FINRA Rule 3290(a) and (c), but the member would not be required to supervise or keep records on this activity. The Commission received no comment on this aspect of the proposed rule change.

The proposed rule change is reasonably designed to treat an

associated person's outside securities transactions that qualify under the GLBA or Regulation R exceptions to broker or dealer registration as an outside activity. The proposed rule change tailors the outside activity framework to address the level of risk presented by the activity by recognizing existing oversight of the activity by the banking regulators.²¹⁰

Under the proposed rule change, the member would continue to receive prior written notice of the associated person's activity, be required to conduct an upfront assessment, and retain discretion to condition or limit proposed activity (or prohibit the activity) based on its assessment. Moreover, proposed FINRA Rule 3290.06 would require the member to supervise compliance with any conditions or limitations a member elects to impose. In this way, the proposed rule change reasonably imposes targeted, risk-based regulatory safeguards designed to protect investors and the public interest. For these reasons, the proposed rule change is reasonably designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

D. Exclusions From Proposed FINRA Rule 3290

1. Associated Person Activity on Behalf of a Member or an Affiliate

As stated above, proposed FINRA Rule 3290(g)(1) would exclude from proposed FINRA Rule 3290 an associated person's activity on behalf of a member or its affiliate.²¹¹ Proposed FINRA Rule 3290(f)(1) would define "affiliate" as any entity that controls, is controlled by, or is under common control with a member. FINRA stated that the exclusion for activity conducted on behalf of an affiliate recognizes members' and their control persons' ability to implement meaningful controls across business lines.²¹² According to FINRA, activity conducted on behalf of an affiliate occurs within the scope of the person's relationship with the broader corporate organization and therefore does not pose the same risks as other outside activities targeted

²⁰⁵ See Exchange Act Section 15A(b)(6).

²⁰⁶ Further, the commenter appears to misunderstand the proposal identified, which, if adopted, would not alter the direct obligations of investment advisers registered with the Commission or create any regulatory gap that would weaken investor protection. See "Small Business" and "Small Organization" Definitions for Investment Companies and Investment Advisers for Purposes of the Regulatory Flexibility Act, Release Nos. IA-6935 and IC-35864, 91 FR 1107 (Jan. 12, 2026).

²⁰⁷ This approach is consistent with the way outside securities transactions that qualify under the GLBA or Regulation R exceptions to broker or dealer registration are treated as an outside activity of a registered person. See *infra* Section III.C.3 (Associated Person Outside Securities Activity Subject to GLBA or Exchange Act Regulation R).

²⁰⁸ See, e.g., Exchange Act Sections 15(b)(4)(E) and 15(b)(6)(A).

²⁰⁹ See *supra* note 60.

²¹⁰ FINRA also stated that the proposed rule change codifies FINRA staff's existing position with respect to this activity. See Notice at 5006.

²¹¹ Proposed FINRA Rule 3290(g)(1). FINRA stated that the exclusion would include activity such as investment advisory activity at a member that is registered as both a broker-dealer and an investment adviser, as well as investment advisory, insurance, or banking activity conducted at an affiliate. See Notice at 5005.

²¹² See Notice at 5006.

by the proposed rule change.²¹³ Specifically, FINRA stated that the rule's notice process is designed to bring external activities to the member's attention so that risks that may not otherwise be apparent can be evaluated by the member.²¹⁴ FINRA stated that this process is unnecessary where the activity is conducted within the corporate family, where the member can access information about such activities through corporate governance structures, shared compliance systems, or other internal coordination mechanisms.²¹⁵

Many commenters supported the proposed rule change, generally stating that the affiliate exclusion would create a "more targeted framework" that helps members focus their compliance resources on outside activities that are "more likely to intersect with their supervisory responsibilities and customer facing business."²¹⁶ More specifically, one of these commenters stated that excluding activities at affiliated entities, where shared compliance systems already provide oversight, would eliminate a layer of regulatory duplication that adds cost without adding protection.²¹⁷ Other commenters stated that the Advisers Act already requires investment advisers to establish a "robust" compliance program; thus, by excluding an associated person's advisory activity on behalf of a member or its affiliate from proposed FINRA Rule 3290, the proposed rule change would relieve dual registrants from "regulatory overlap" that added complexity without improving investor protection.²¹⁸

Other commenters opposed the proposed rule change.²¹⁹ For example, one commenter stated that reducing a member's regulatory oversight of the activity of their registered and associated persons at affiliated advisers would be a "dramatic step backward" and may eliminate recourse for investors seeking redress for harm caused by an affiliated adviser.²²⁰

Another commenter stated that the Exchange Act requires members to supervise all investment-related activities of their registered representatives regardless of where those activities occur, and does not exempt members based on their affiliates' ability to effectively control activities across business lines.²²¹

One commenter who supported the proposed rule change recommended that FINRA provide guidance on when the affiliate exclusion would apply in specific scenarios involving an associated person's work on behalf of a bank, credit union, or insurance company that controls, is controlled by, or is under common control with the member.²²² The commenter also requested that FINRA provide concrete examples of how the exclusion applies in common fact patterns, including when a registered person's day-to-day activity at an affiliate is covered by the exclusion and how the exclusion applies when the affiliate is the primary employer and association with the member is "part time or limited in scope."²²³

In response, FINRA stated that the exclusion is appropriate because activity conducted on behalf of an affiliate occurs within the scope of the person's relationship with the broader corporate organization and does not present the same risks that the rule is designed to address.²²⁴ Specifically, FINRA stated that the notice and assessment process, which is designed to bring external activities to the member's attention so that risks that may not otherwise be apparent can be evaluated, is not necessary for activity conducted within a corporate family, where the member can access information about such activities through corporate governance structures, shared compliance systems, or other internal coordination mechanisms.²²⁵ In addition, FINRA stated that rather than imposing a one-size-fits-all notice and assessment

process, the exclusion would provide a member with flexibility to determine how to manage affiliate activities and whether any controls are appropriate, based on its business model, organizational structure, and the specific activities involved.²²⁶ FINRA also stated that, while this exclusion is consistent with regulatory efficiency principles, it in no way lessens a member's general supervisory obligations under federal law or FINRA Rule 3110 nor does it limit a member's ability to implement additional safeguards it determines are appropriate.²²⁷

With respect to the commenter's request for additional guidance on the scope and application of the affiliate exclusion in particular factual scenarios, FINRA confirmed that the affiliate exclusion does not turn on whether the member or an affiliate is a registered person's primary employer.²²⁸ The proposed rule change would exclude from proposed FINRA Rule 3290 an associated person's activities either on behalf of a member (*e.g.*, investment adviser activity conducted for a dually-registered broker-dealer/investment adviser) or its affiliate (investment adviser, insurance or banking activity conducted at an affiliate of the member).²²⁹ Finally, FINRA stated that if the Commission approves the proposed rule change, it will consider providing additional guidance on this and other topics as appropriate.²³⁰

The proposed rule change excluding from proposed FINRA Rule 3290 an associated person's activities on behalf of a member or its affiliates is reasonable given the purpose of the rule: bringing to a member's attention external activities of which the member may not otherwise be aware. With respect to the associated person's activity on behalf of the member, the proposed rule change is reasonably designed to enhance regulatory efficiency by excluding from duplicative obligations activity that already falls within the member's supervisory and compliance responsibilities under other FINRA rules (*e.g.*, FINRA Rule 3110). With respect to activity performed on behalf of an affiliate, it is appropriate to exclude the activity from the proposed rule's mandatory notice and assessment process, as it is conducted within a corporate family, where the member should have visibility into the associated person's conduct through the

²¹³ See FINRA I at 9.

²³⁰ *Id.*

corporate governance structure, shared compliance systems, or other internal coordination.

As such, the proposed rule change reasonably focuses a member's compliance function on activities where member oversight provides the greatest investor protection benefit. In addition, members retain the ability to impose additional measures on any such activity, including notice requirements and placing conditions or limitations on the activity, while also retaining their overarching supervisory obligations. Further, as noted above, the proposed rule change does not alter or supersede a member's obligation to comply with other applicable statutory or regulatory requirements, nor does it address an investor's ability to seek redress for harm.²³¹ As such, the exclusion reflects a reasonable approach that is designed to channel oversight resources toward activities where the member is less likely to have visibility or information, by permitting members to leverage internal structures to avoid unnecessarily duplicative requirements, and providing flexibility to determine how to manage affiliate activities in the context of those structures. For these reasons, the proposed rule change is reasonably designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

2. Securities Transactions Among Immediate Family Members of an Associated Person

As stated above, proposed FINRA Rule 3290(g)(2) would exclude from proposed FINRA Rule 3290 an associated person's securities transactions among immediate family for which the associated person receives no selling compensation.²³² These transactions are also excluded from the current definition of PST, and therefore not subject to the notice and assessment requirements in existing FINRA Rule 3280.²³³ The Commission received no comment on this aspect of the proposed rule change.

The proposed rule change excluding uncompensated securities transactions among immediate family members from the obligations of proposed FINRA Rule 3290 is reasonably designed to focus

members' supervisory and compliance resources on activities that are more likely to raise investor protection concerns. Additionally, the exclusion from proposed FINRA Rule 3290 does not lessen a member's general supervisory obligations under federal law or FINRA Rule 3110 nor limit a member's ability to implement additional safeguards it determines are appropriate. For these reasons, the proposed rule change is reasonably designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

3. Certain Personal Investments of an Associated Person

As stated above, proposed FINRA Rule 3290(g)(3) would exclude from proposed FINRA Rule 3290 the following personal investments of an associated person: (1) securities transactions subject to or delineated in FINRA Rule 3210 (Accounts at Other Broker-Dealers and Financial Institutions); (2) personal investments in non-securities; and (3) the purchase, sale, rental or lease of a main home and up to two secondary homes that are: (a) solely owned by the associated person or the associated person and immediate family; (b) owned by the associated person as a sole proprietorship; (c) owned by a corporation, LLC, partnership, limited partnership, or other entity that is solely owned by the associated person or the associated person and immediate family; or (d) owned by a trust with the associated person or the associated person and immediate family as the sole beneficiaries.²³⁴

Commenters supported the proposed rule change,²³⁵ stating that the treatment of these categories of personal investments is appropriately tailored, reflects a calibrated risk-based approach,²³⁶ and will help members concentrate on outside activities that are more likely to intersect with their supervisory responsibilities and customer-facing business.²³⁷ In particular, commenters supported the real estate exclusion, stating that such activities do not raise investor protection concerns and therefore should not be subject to reporting.²³⁸ No commenters objected to this proposed exclusion.

The proposed rule change to exclude certain personal investments from the obligations of proposed FINRA Rule 3290 is reasonably designed to help focus members' compliance oversight on activities that are more likely to raise investor protection concerns. Specifically, some of these transactions are covered by FINRA Rule 3210, which already requires a member to consent to an associated person's opening an account with another member or financial institution in which securities transactions can be effected and in which the associated person has a beneficial interest; in addition, the associated person's member can request data for any transaction in an account subject to the rule. Therefore, these transactions are already subject to existing controls under FINRA Rule 3210.²³⁹ In addition, an associated person's personal investments in non-securities, or, subject to specified conditions, the purchase, sale, rental or lease of a main home and up to two secondary homes is a targeted exclusion for real estate activities and non-securities that are otherwise included in the definition of investment-related activity in proposed Rule 3290(f). This limited exclusion reasonably recognizes the lower risks to investors and members presented by these activities by reducing the regulatory burdens associated with such activities. Moreover, the exclusion from proposed FINRA Rule 3290 does not lessen a member's general supervisory obligations under federal law or FINRA Rule 3110, nor limit a member's ability to implement additional safeguards it determines are appropriate. For these reasons, the proposed rule change is reasonably designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

4. Treatment of Activity Subject to a Contractual Arrangement

As stated above, proposed FINRA Rule 3290.04 would exclude from proposed FINRA Rule 3290 an associated person's activity conducted on behalf of the member pursuant to a contract between the member and another entity (e.g., a banking or insurance networking arrangement) because the activity would be considered within the scope of the associated person's relationship with the member and therefore subject to the member's supervisory obligations under FINRA Rule 3110. The Commission

²³¹ See *supra* note 208.

²³² Proposed FINRA Rule 3290(g)(2). Proposed FINRA Rule 3290(f)(2) would define "immediate family" to have the same meaning as in FINRA Rule 3240(c).

²³³ See FINRA Rule 3280(e)(1) (excluding from the definition of "private securities transaction" transactions among immediate family members as defined in FINRA Rule 5130).

²³⁴ Proposed FINRA Rule 3290(g)(3)(A)–(C).

²³⁵ See ASA I at 2; Robinhood at 2.

²³⁶ See Robinhood at 2.

²³⁷ See ASA I at 2.

²³⁸ See Cambridge I at 2; *see also* CAI at 2; ASA I at 2; Robinhood at 2; FSI I at 1.

²³⁹ See *supra* note 51.

received no comment on this aspect of the proposed rule change.

The proposed rule change to exclude an associated person's activity conducted on behalf of a member pursuant to a contractual arrangement between the member and another entity is reasonably designed to enhance regulatory efficiency by excluding from duplicative obligations activity that already falls within the member's supervisory and compliance responsibilities under other FINRA rules (e.g., FINRA Rule 3110). For these reasons, the proposed rule change is reasonably designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

E. Recordkeeping

As stated above, proposed FINRA Rule 3290(e) would require a member to keep a record of its compliance with the obligations under proposed FINRA Rule 3290 and preserve this record in accordance with the time and accessibility requirements of Exchange Act Rule 17a-4(e)(1). The Commission received no comments on this aspect of the proposed rule change.

The proposed rule change requiring members to keep and preserve a record of its compliance with the obligations under proposed FINRA Rule 3290 is reasonably designed to facilitate oversight of a member's compliance with the proposed rule change. A key component of regulatory oversight is a member's retention of its business records. By expressly requiring compliance with applicable Commission recordkeeping rules, the proposed rule change makes clear members' obligation to maintain and make available records related to proposed FINRA Rule 3290. As such, the proposed rule change will help ensure that regulators can properly oversee members' compliance with proposed FINRA Rule 3290. For these reasons, the proposed rule change is reasonably designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

F. General Exemptive Authority

As stated above, proposed FINRA Rule 3290(h) would authorize FINRA staff, for good cause shown after taking into consideration all relevant factors, to conditionally or unconditionally grant an exemption pursuant to the FINRA Rule 9600 Series from any provision of proposed FINRA Rule 3290 to the extent that such exemption is consistent with

the purpose of the rule, the protection of investors, and the public interest. The proposal would also amend FINRA Rule 9610 to add Rule 3290 to the list of rules for which a member may seek exemptive relief. The Commission received no comment on this aspect of the proposed rule change.

The proposed rule change authorizing FINRA to grant exemptive relief from any provision of proposed FINRA Rule 3290 is reasonably designed to allow FINRA members to avail themselves of an existing procedural vehicle—FINRA's Rule 9600 Series—to apply for exemptive relief from any provision of the rule, on a case-by-case basis, to address unanticipated factual circumstances that may arise under the rule. Prior to granting an exemption, FINRA staff would be required to consider all relevant factors to determine if good cause is shown for the exemption, and that the exemption is consistent with the protection of investors and the public interest. For these reasons, the proposed rule change is reasonably designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.²⁴⁰

IV. Conclusion

For the reasons set forth above, the Commission finds that the proposed rule change is consistent with Section 15A(b)(6) of the Exchange Act, which requires, among other things, that FINRA rules be designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, and, in general, protect investors and the public interest.²⁴¹

It is therefore ordered pursuant to Section 19(b)(2) of the Exchange Act²⁴² that the proposed rule change (SR-FINRA-2026-001) be, and hereby is, approved.

²⁴⁰ A commenter recommended that FINRA establish an effective date for the proposed rule change that is at least 12 months after Commission approval, in order to provide members sufficient time to update their compliance systems that are currently designed for FINRA Rules 3270 and 3280. See ASA I at 6; ASA II at 6-7. In response, FINRA stated that if the proposed rule change is approved it would determine an effective date balancing sufficient time for implementation with its objective of reducing unnecessary burdens in a timely manner. See FINRA I at 17; FINRA II at 9. FINRA reasonably declined to establish an effective date for the proposed rule change at this time.

²⁴¹ 15 U.S.C. 78o-3(b)(6).

²⁴² 15 U.S.C. 78s(b)(2).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁴³

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-106380; File No. SR-NYSE-2026-43]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 7.12 Concerning the Resumption of Trading Following a Level 3 Market-Wide Circuit Breaker Halt in Connection With the Industry's Expansion of Trading Hours to 23 Hours per Day, 5 Days per Week

September 15, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² notice is hereby given that, on September 4, 2026, New York Stock Exchange LLC ("NYSE" or the "Exchange") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 7.12 ("Trading Halts Due to Extraordinary Market Volatility") concerning the resumption of trading following a Level 3 market-wide circuit breaker halt in connection with the industry's expansion of trading hours to 23 hours per day, 5 days per week. The proposed rule change is available on the Exchange's website at www.nyse.com and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of,

²⁴³ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

New York Stock Exchange LLC ("NYSE" or the "Exchange") proposes to amend Rule 7.12 ("Trading Halts Due to Extraordinary Market Volatility") concerning the resumption of trading following a Level 3 market-wide circuit breaker ("MWCB") halt ("Level 3 Market Decline") in connection with the industry's expansion of trading hours to 23 hours per day, 5 days per week ("23/5 Trading"). Some exchanges, including the Exchange's affiliate exchange, NYSE Arca, Inc. ("NYSE Arca"), are planning to offer overnight trading,³ and as a result, the uniform Level 3 Market Decline rules of each exchange are being modified, as explained further below.

Background

The MWCB mechanism under Rule 7.12 provides an important, automatic mechanism that is invoked to promote stability and investor confidence during a period of significant stress when U.S. securities markets experience extreme broad-based declines. All U.S. equity exchanges and FINRA (collectively, the self-regulatory organizations or "SROs") adopted uniform rules relating to the MWCB mechanism in 2012, which are designed to slow the effects of extreme price movement through coordinated trading halts across U.S. securities markets when severe price declines reach levels that may exhaust market liquidity.⁴ Such market-wide circuit breakers provide for trading halts in all U.S. cash equity and equities options markets during a severe market decline as measured by a single-day decline in

the S&P 500 Index during regular trading hours.

Pursuant to Rule 7.12, a market-wide trading halt will be triggered if the S&P 500 Index declines in price by specified percentages from the prior day's closing price of that index. Currently, the triggers are set at three circuit breaker thresholds: 7% (Level 1), 13% (Level 2), and 20% (Level 3). A market decline that triggers a Level 1 or Level 2 halt after 9:30 a.m. ET and before 3:25 p.m. ET would halt market-wide trading for 15 minutes, while a similar market decline at or after 3:25 p.m. ET would not halt market-wide trading. If a Level 3 Market Decline occurs at any time during the trading day, trading in all stocks will halt on the Exchange for the remainder of the trading day, and will resume the following trading day at 7:00 a.m. ET for UTP Securities and after 9:30 a.m. ET for Exchange-listed securities.⁵

Proposal

The Exchange now proposes to amend Rule 7.12 to reflect extended trading hours under 23/5 Trading. On December 6, 2026, several exchanges, including NYSE Arca, intend to offer new overnight trading sessions that would be available from 9:00 p.m. ET to 4:00 a.m. ET, significantly increasing their hours of operation in response to customer demand.

As discussed, consistent with the uniform rules in place across all SROs, current Rule 7.12(b)(ii) provides that if a Level 3 Market Decline occurs at any time during the trading day, the Exchange shall halt trading in all stocks on the Exchange for the remainder of the trading day. Currently, that means that the earliest that any exchange would re-open trading after a Level 3 Market Decline is 4:00 a.m. ET the following day, since no SROs are open for trading before 4:00 a.m. ET.

Unless amended, when 23/5 Trading is launched, the current rule's reference to halting "for the remainder of the trading day" would require SROs participating in 23/5 Trading to re-open trading at an earlier time, *i.e.*, 9:00 p.m. ET on the same calendar day, when those SROs' systems would generally become available for overnight trading. The Exchange does not believe that this is an expected or desired result and is therefore amending this rule in coordination with the other SROs such that trading on any SRO will not resume until 4:00 a.m. ET or later on the following trading day, consistent with current market practice. This proposed

rule change is therefore not intended to make any substantive changes to the MWCB mechanism. Rather, the proposed rule change would preserve the current resumption time following a Level 3 Market Decline.

To effect this change, the Exchange proposes to delete the language in Rule 7.12(b)(ii) that provides that trading in all stocks will halt on the Exchange "for the remainder of the trading day" if a Level 3 Market Decline occurs at any time during the trading day, and replace it with new language that explicitly provides that trading in all stocks would halt on the Exchange until 4:00 a.m. ET or later on the following trading day.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁷ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁸ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The MWCB mechanism described in Rule 7.12 is an important, automatic mechanism that is invoked to promote stability and investor confidence during periods of significant stress when U.S. securities markets experience extreme broad-based declines. The proposed rule change, when applied uniformly by all SROs, would ensure that the current 4:00 a.m. ET resumption time following a Level 3 halt continues to apply under 23/5 Trading, notwithstanding current rule text implying that the resumption time would coincide with the start of overnight trading on SROs operating an overnight session.

Rather than leave the rule in place as is, which would result in an earlier resumption time than originally contemplated when the rule was adopted, the Exchange, the other U.S. equity exchanges, and FINRA met alongside industry representatives to determine the appropriate resumption time. Following those discussions, the collective decision was made to retain the 4:00 a.m. ET resumption time, notwithstanding the fact that an earlier resumption time would be possible with the introduction of 23/5 Trading. The proposed rule change codifies this decision into the Exchange's rules. The Exchange understands that the other SROs will also be filing similar proposed rule changes. As a result, the market as a whole, including on- and

³ See, *e.g.*, Securities Exchange Act Release No. 105532 (May 21, 2026), 91 FR 31509 (May 27, 2026) (SR-NYSEARCA-2026-53) ("NYSE Arca 23/5 Trading Notice"). The Exchange does not intend to implement 23/5 Trading at this time.

⁴ See Securities Exchange Act Release No. 67090 (May 31, 2012), 77 FR 33531 (June 6, 2012) (SR-BATS-2011-038; SR-BYX-2011-025; SR-BX-2011-068; SR-CBOE-2011-087; SR-C2-2011-024; SR-CHX-2011-30; SR-EDGA-2011-31; SR-EDGX-2011-30; SR-FINRA-2011-054; SR-ISE-2011-61; SR-NASDAQ-2011-131; SR-NSX-2011-11; SR-NYSE-2011-48; SR-NYSEAmex-2011-73; SR-NYSEArca-2011-68; SR-Phlx-2011-129) ("MWCB Approval Order").

⁵ See Rule 7.34(a) ("Trading Sessions").

⁶ See Rule 7.12(b)(ii).

⁷ 15 U.S.C. 78f(b).

⁸ 15 U.S.C. 78f(b)(5).

off-exchange, will continue to be subject to harmonized rules for the resumption of trading following a Level 3 Market Decline.

While the SROs had previously decided to tie the resumption time following a Level 3 halt to the earliest SRO opening time, the upcoming transition to 23/5 Trading raises various concerns that warrant a change from the current approach.

First, the Exchange notes that the MWCB mechanism was designed to provide a cooling-off period where market participants would be provided with additional time to evaluate the market events that led to the decline before determining how to position their trading activity for the next day. With the introduction of 23/5 Trading and the start of overnight trading on some SROs at 9:00 p.m. ET, however, this cooling-off period could be materially shortened, reducing one of the key benefits that the MWCB mechanism was designed to provide in the first place. Rather than shorten the cooling-off period and risk this benefit, the Exchange believes the market would be better served by a change to the length of the associated trading halt that mirrors current market practice. Under the proposed rule, as is the case today, after a Level 3 halt, all SROs would reopen trading at 4:00 a.m. ET or later, and no SRO would offer an overnight trading session starting on the day of a Level 3 halt.

Second, overnight trading may be subject to different liquidity and participation considerations than the current pre-market sessions that start at or after 4:00 a.m. ET. Notably, while retail investors have expressed interest in overnight trading, the Exchange expects that institutional investors will take more time to transition to a round-the-clock model. However, such institutional participation may be of heightened importance following a Level 3 halt, as these investors are likely to have views on the underlying market events that led to the Level 3 Market Decline in the first place. The Exchange is concerned that opening during hours that such participants do not normally trade may impact the quality of price discovery at a time of significant market volatility. Waiting until 4:00 a.m. ET to resume trading would facilitate broader participation and therefore price discovery.

Finally, the Exchange notes that the Commission recently approved an amendment to the Plan to Address Extraordinary Market Volatility ("LULD Plan") that would establish new price protections from 9:00 p.m. ET to 4:00

a.m. ET.⁹ While these price bands would help to assure a fair and orderly market during normal market conditions, it is possible that they would instead prevent normal price discovery following a Level 3 Market Decline. Rather than allowing trading to resume with such price bands in effect, which would represent a change from the current trading reopening following a Level 3 Market Decline, the Exchange believes that requiring SROs to wait until 4:00 a.m. ET or later to resume trading would ensure that price discovery can occur unimpeded during pre-market trading, as it does today, which may further inform prices going into the opening auction and regular market hours trading following a Level 3 halt.

Given the factors discussed above, the Exchange believes that trading in all securities on the Exchange should not resume before 4:00 a.m. ET on the trading day after a Level 3 halt. This decision, which the Exchange understands will also be reflected in the rules of the other SROs, would promote a fair and orderly market at a time of significant market volatility, and thereby protect investors and the public interest. In addition, while the actual Level 3 resumption time would not be changing in practice—as proposed, the current resumption time and future resumption time would both be 4:00 a.m. ET at the earliest—the Exchange believes that it is appropriate to amend its rules to ensure that its rules reflect the upcoming changes due to 23/5 Trading. Without this change, market participants may mistakenly believe that the Exchange intends for trading to reopen on overnight trading exchanges at 9:00 p.m. ET following a Level 3 halt. The proposed rule change would therefore facilitate operational transparency while providing for a fair and orderly market.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act because the proposal would ensure the continued, uninterrupted operation of a consistent mechanism to halt trading across U.S. securities markets. Further, the Exchange understands that the other

SROs intend to file proposed rule changes to ensure a consistent resumption time at 4:00 a.m. or later ET across markets. Thus, the proposed rule change will help to ensure consistency across market centers without implicating any competitive issues.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act¹⁰ and subparagraph (f)(6) of Rule 19b-4 thereunder.¹¹

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NYSE-2026-43 on the subject line.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106387; File No. SR–MRX–2026–35]

Self-Regulatory Organizations; Nasdaq MRX, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Options 2, Section 3, Appointment of Market Makers

September 15, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b–4 thereunder,² notice is hereby given that on September 2, 2026, Nasdaq MRX, LLC (“MRX” or “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to

solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Options 2, Section 3, Appointment of Market Makers.

The text of the proposed rule change is available on the Exchange's website at <https://listingcenter.nasdaq.com/rulebook/mrx/rulefilings>, and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Options 2, Section 3, Appointment of Market Makers, at paragraph (b) to change the current requirement that a Primary Market Maker (“PMM”) ³ shall be appointed to each options class traded on the Exchange. The Exchange proposes instead to state that a PMM may be appointed to each options class traded on the Exchange. The proposed amendment would replace a mandatory requirement to appoint a PMM to every options class with a permissive standard, affording the Exchange the flexibility to determine, based on prevailing market conditions and the availability of qualified applicants, whether a PMM appointment is appropriate for a particular options class.

Today, there are a number of Competitive Market Makers (“CMMs”) ⁴ on MRX that would continue to provide liquidity in the absence of a PMM

³ The term “Primary Market Maker” means a Member that is approved to exercise trading privileges associated with PMM Rights. *See* Options 1, Section 1(b)(36).

⁴ The term “Competitive Market Maker” means a Member that is approved to exercise trading privileges associated with CMM Rights. *See* Options 1, Section 1(b)(13).

appointment under this proposal. CMMs are subject to continuous quoting and other market making obligations set forth in Options 2, Section 4 (Obligations of Market Makers), and are required to provide two-sided quotations in 60% of the series in each of the option classes to which they are appointed pursuant to the quoting requirements of Options 2, Section 5 (Market Maker Quotations). CMMs are also not capped in number and may actively quote in a broad range of option classes.

The proposed amendment aligns MRX's rule with Nasdaq Phlx LLC (“Phlx”) Options 2, Section 12(a) ⁵ which expressly permits, but does not require, Phlx to designate a Lead Market Maker for a particular options series. In addition, until July 2026, The Nasdaq Options Market LLC (“NOM”) did not adopt rules for a class of market maker similar to a PMM. NOM operated its markets for nearly twenty years without such a category of market maker. The Exchange believes that the current mandatory standard is not necessary to protect investors or to ensure a fair and orderly market on MRX. Options classes traded on the Exchange vary widely in their liquidity profiles, order flow, and level of market maker interest. Circumstances may arise in which no eligible Member seeks or is well-suited for a PMM appointment in a particular options class, or in which appointing a PMM is not economically viable for any prospective applicant. The Exchange will monitor instances in which a PMM is not fulfilling its obligations or is not in good standing and will seek to replace it with another qualified PMM. In those cases, the mandatory standard in the current rule provides no operable path forward. A permissive standard would enable the Exchange to determine, on a class-by-class basis, whether a PMM appointment serves the interests of the market and the investing public.

The proposed change is not intended to, and would not, alter the substantive obligations or privileges of a PMM once appointed. A PMM appointed to an options class would remain subject to the full set of obligations set forth in MRX Options 2, Sections 3, 4, and 5, including the Valid Width Quote requirement during the Options Opening Process in Options 3, Section 8, and the 90% two-sided quoting obligation on an intra-day basis. The Exchange further notes that CMMs are

⁵ Phlx Options 2, Section 12(a) provides that a Lead Market Maker is not required to be assigned to an options series. A Lead Market Maker on Phlx is analogous to a Primary Market Maker on MRX.

¹² 17 CFR 200.30–3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

available to provide liquidity in options classes traded on the Exchange, and the appointment of a PMM is not a prerequisite for maintaining a fair and orderly market in any given class. In options classes for which no PMM is appointed, quoting and liquidity provision would proceed pursuant to the CMM framework in Options 2, Sections 4 (Obligations of Market Makers) and 5 (Market Maker Quotations).

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁶ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁷ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The proposed amendment to Options 2, Section 3(b) protects investors and the public interest and promotes just and equitable principles of trade because CMMs will continue to provide liquidity on the Exchange. There are a number of CMMs on MRX that would continue to provide liquidity in the absence of a PMM appointment under this proposal. CMMs are subject to continuous quoting and other market making obligations set forth in Options 2, Section 4 (Obligations of Market Makers), and are required to provide two-sided quotations in 60% of the series in each of the option classes to which they are appointed pursuant to the quoting requirements of Options 2, Section 5 (Market Maker Quotations). CMMs are also not capped in number and may actively quote in a broad range of option classes. Further, the amendment affords the Exchange the flexibility to determine whether the appointment of a PMM is appropriate in a given options class, rather than requiring the Exchange to appoint a PMM in every class irrespective of market conditions or applicant availability.⁸

The proposed permissive standard is substantively identical to the framework already in place on Phlx, which provides at Options 2, Section 12(a) that a Lead Market Maker “is not required to be assigned to an options series.” Finally, the proposed change does not reduce or otherwise modify the obligations of a PMM. As a result, the proposal enhances the Exchange’s administrative flexibility with respect to PMM appointments while preserving all of the substantive market-quality protections that flow from a PMM’s obligations. For the foregoing reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change would apply uniformly to all Members that seek or hold PMM appointments on MRX. Further, the Exchange notes that there is competition among CMMs who are required to provide two-sided quotations in 60% of the series in each of the option classes to which they are appointed pursuant to the quoting requirements of Options 2, Section 5 (Market Maker Quotations).

Members currently appointed as PMMs will retain their appointments and will continue to be subject to the same obligations and eligible for the same entitlements. Members seeking new PMM appointments will continue to be evaluated under the same standards set forth in Options 2, Section 3. The proposal does not favor any Member or class of Members over another, and it does not modify the rights or obligations of CMMs.

The Exchange does not believe the proposed rule change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change would harmonize

quoting obligations (90% versus 60%) as described in Options 2, Section 5.

MRX Options 2, Section 3(b) with the analogous framework on Phlx.⁹ In addition, affording the Exchange greater flexibility to administer its PMM program may allow the Exchange to compete more effectively for order flow with other options markets.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act¹⁰ and subparagraph (f)(6) of Rule 19b–4 thereunder.¹¹

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

⁹ See Phlx Options 2, Section 12(a).

¹⁰ 15 U.S.C. 78s(b)(3)(A)(iii).

¹¹ 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

⁶ 15 U.S.C. 78f(b).

⁷ 15 U.S.C. 78f(b)(5).

⁸ The Exchange notes that not every Market Maker is eligible to be a PMM. A Market Maker may not be in good standing or may not have superior technology to handle the demands of additional

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-106374; File No. SR-NASDAQ-2026-074]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Exchange's Rules at Options 7, Sections 1 and 2

September 15, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on September 1, 2026, The Nasdaq Stock Market LLC ("Nasdaq" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend The Nasdaq Options Market LLC ("NOM") Rules at Options 7, Section 1, General Provisions, and Options 7, Section 2, Nasdaq Options Market—Fees and Rebates.

The text of the proposed rule change is available on the Exchange's website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rulefilings>, and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to make several changes to NOM's Pricing Schedule at Options 7. Specifically, the Exchange proposes to make changes to Options 7, Section 2(1), and add a defined term to Options 7, Section 1(a).

Under Options 7, Section 2(1), the Exchange currently pays Customers,³ Professionals,⁴ Broker-Dealers,⁵ Firms,⁶ Non-NOM Market Makers,⁷ and NOM Market Makers⁸ a rebate to add liquidity in Penny Symbols, on a per contract basis. This rebate is paid according to the following schedule:

	Tier 1	Tier 2	Tier 3	Tier 4	Tier 5	Tier 6
Customer	(\$0.20)	(\$0.25)	(\$0.43)	(\$0.44)	(\$0.45)	(\$0.48)
Professional	(0.20)	(0.25)	(0.43)	(0.44)	(0.45)	(0.47)
Broker-Dealer	(0.10)	(0.10)	(0.10)	(0.10)	(0.10)	(0.10)
Firm	(0.10)	(0.10)	(0.10)	(0.10)	(0.10)	(0.10)
Non-NOM Market Maker	(0.10)	(0.10)	(0.10)	(0.10)	(0.10)	(0.10)
NOM Market Maker	(0.20)	(0.25)	(0.30)	(0.32)	(0.45)	(0.47)

¹² 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ The term "Customer" applies to any transaction that is identified by a Participant for clearing in the Customer range at The Options Clearing Corporation ("OCC") which is not for the account of broker or dealer or for the account of a "Professional" (as that term is defined in Options 1, Section 1(a)(48)). See Options 7, Section 1(a).

⁴ The term "Professional" means any person or entity that (i) is not a broker or dealer in securities, and (ii) places more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s) pursuant to

Options 1, Section 1(a)(48). All Professional orders shall be appropriately marked by Participants. See Options 7, Section 1(a).

⁵ The term "Broker-Dealer" applies to any transaction which is not subject to any of the other transaction fees applicable within a particular category. See Options 7, Section 1(a).

⁶ The term "Firm" applies to any transaction that is identified by a Participant for clearing in the Firm range at OCC. See Options 7, Section 1(a).

⁷ The term "Non-NOM Market Maker" is a registered market maker on another options exchange that is not a NOM Market Maker. A Non-NOM Market Maker must append the proper Non-NOM Market Maker designation to orders routed to NOM. See Options 7, Section 1(a).

⁸ The term "NOM Market Maker" is a Participant that has registered as a Market Maker on NOM pursuant to Options 2, Section 1, and must also remain in good standing pursuant to Options 2, Section 9. In order to receive NOM Market Maker pricing in all securities, the Participant must be registered as a NOM Market Maker in at least one security. See Options 7, Section 1(a). The term "Options Participant" or "Participant" means a firm, or organization that is registered with the Exchange pursuant to Options 2A of the NOM Rules for purposes of participating in options trading on NOM as a "Nasdaq Options Order Entry Firm" or "Nasdaq Options Market Maker". See Options 1, Section 1(a)(40).

Currently, Participants are assessed certain fees and rebates to add liquidity in Non-Penny Symbols, on a per

contract basis, according to the following schedule:

Customer	(\$0.80)
Professional	(0.80)
Broker-Dealer	0.45
Firm	0.45
Non-NOM Market Maker	0.45
NOM Market Maker	0.35/0.00/(0.30)/(0.40)

Currently, Participants are charged fees to remove liquidity in both Penny and Non-Penny Symbols, on a per

contract basis, according to the following schedule:

	Penny symbols	Non-penny symbols
Customer	\$0.49	\$0.85
Professional	0.49	0.85
Broker-Dealer	0.50	1.25
Firm	0.50	1.25
Non-NOM Market Maker	0.50	1.25
NOM Market Maker	0.50	1.25

Currently, the Customer and Professional rebate to add liquidity in Penny Symbols is paid per the highest tier achieved below:

Tier 1: Participant adds Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Symbols and/or Non-Penny Symbols of up to 0.10% of total industry customer equity and ETF option average daily volume ("ADV") contracts per day in a month.

Tier 2: Participant adds Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Symbols and/or Non-Penny Symbols above 0.10% of total industry customer equity and ETF option ADV contracts per day in a month.

Tier 3: Participant: (a) adds Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Symbols and/or Non-Penny Symbols above 0.20% of total industry customer equity and ETF option ADV contracts per day in a month; or (b) adds Customer and/or Professional liquidity in Penny Symbols and/or Non-Penny Symbols above 0.05% of total industry customer equity and ETF option ADV contracts per day in a month and qualifies for MARS.⁹

Tier 4: Participant adds Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Symbols and/or Non-Penny Symbols above 0.30% of total industry

customer equity and ETF option ADV contracts per day in a month.

Tier 5: Participant adds Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Symbols and/or Non-Penny Symbols above 0.40% of total industry customer equity and ETF option ADV contracts per day in a month.

Tier 6: Participant adds Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Symbols and/or Non-Penny Symbols above 0.70% or more of total industry customer equity and ETF option ADV contracts per day in a month, or Participant : (1) adds Customer and/or Professional liquidity in Penny Symbols and/or Non-Penny Symbols of 0.10% or more of total industry customer equity and ETF option ADV contracts per day in a month, and (2) has added liquidity in all securities through one or more of its Nasdaq Market Center MPIDs that represent 1.00% or more of Consolidated Volume in a month or qualifies for MARS.

Currently, the fees to remove liquidity in Penny and Non-Penny Symbols for Non-NOM Market Makers and NOM Market Makers are modified according to note 2, which states as follows:

Participants that add 1.10% of Customer, Professional, Firm, Broker-Dealer or Non-NOM Market Maker liquidity in Penny Symbols and/or Non-Penny Symbols of total industry customer equity and ETF option ADV contracts per day in a month will be subject to the following pricing applicable to executions: a \$0.48 per contract Penny Symbols Fee for Removing Liquidity when the Participant is (i) both the buyer and the seller or (ii) the Participant removes liquidity

from another Participant under Common Ownership.

Participants that add 1.55% of Customer, Professional, Firm, Broker-Dealer or Non-NOM Market Maker liquidity in Penny Symbols and/or Non-Penny Symbols of total industry customer equity and ETF option ADV contracts per day in a month will be subject to the following pricing applicable to executions less than 10,000 contracts: a \$0.38 per contract Penny Symbols Fee for Removing Liquidity when the Participant is (i) both the buyer and seller or (ii) the Participant removes liquidity from another Participant under Common Ownership.

Currently, the Tier 6 rebate to add liquidity in Penny Symbols that is paid to Customers is modified according to note 7, which states as follows:

Participants that: (1) add Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Symbols and/or Non-Penny Symbols of 1.15% or more of total industry customer equity and ETF option ADV contracts per day in a month will receive an additional \$0.02 per contract Penny Symbol Customer Rebate to Add Liquidity for each transaction which adds liquidity in Penny Symbol in that month; or (2) add Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Symbols and/or Non-Penny Symbols of 1.30% or more of total industry customer equity and ETF option ADV contracts per day in a month will receive an additional \$0.05 per contract Penny Symbol Customer Rebate to Add Liquidity for each transaction which adds liquidity in Penny Symbols in that month; or (3) (a) add Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Symbols and/or Non-Penny Symbols above 0.80% of total industry customer equity and ETF option ADV contracts per day in a month, (b) add Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity

⁹ The Market Access and Routing Subsidy ("MARS") is a rebate program set out in Nasdaq Options 7, Section 2(4), under which NOM pays participating firms a per-contract subsidy for routing eligible options order flow to NOM through the participant's own order-routing system.

in Non-Penny Symbols above 0.12% of total industry customer equity and ETF option ADV contracts per day in a month, and (c) execute greater than 0.04% of Consolidated Volume ("CV") via Market-on-Close/Limit-on-Close ("MOC/LOC") volume within The Nasdaq Stock Market Closing Cross within a month will receive an additional \$0.05 per contract Penny Symbol Customer Rebate to Add Liquidity for each transaction which adds liquidity in Penny Symbols in a month. Consolidated Volume shall mean the total consolidated volume reported to all consolidated transaction reporting plans by all exchanges and trade reporting facilities during a month in equity securities, excluding executed orders with a size of less than one round lot. For purposes of calculating Consolidated Volume and the extent of an equity member's trading activity, expressed as a percentage of or ratio to Consolidated Volume, the date of the annual reconstitution of the Russell Investments Indexes shall be excluded from both total

Consolidated Volume and the member's trading activity.

Currently, the Customer and Professional rebates to add liquidity in both Penny Symbols and Non-Penny Symbols are modified according to note 10, which states as follows:

NOM Participants that (a) add Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Symbols and/or Non-Penny Symbols above 1.50% of total industry customer equity and ETF option ADV contracts per day in a month, (b) execute greater than 0.04% of Consolidated Volume ("CV") via Market-on-Close/Limit-on-Close ("MOC/LOC") volume within The Nasdaq Stock Market Closing Cross within a month, and (c) add greater than 1.5 million shares per day of non-displayed volume within The Nasdaq Stock Market within a month will receive a \$0.55 per contract Rebate to Add Liquidity in Penny Symbols as Customer, a \$0.48 per

contract Rebate to Add Liquidity in Penny Symbols as Professional, and a \$1.15 per contract Rebate to Add Liquidity in Non-Penny Symbols as Customer, and a \$0.90 per contract Rebate to Add Liquidity in Non-Penny Symbols as Professional. Participants that qualify for this rebate would not be eligible for any other rebates in Tiers 1–6 or other rebate incentives on NOM for Customer and Professional order flow in Options 7, Section 2(1).

The Exchange proposes to make seven changes to these provisions of the Exchange fee schedule:

First Change

The Exchange proposes to increase the Tier 6 Customer rebate to add liquidity in Penny Symbols from \$0.48 to \$0.49. Therefore, the new schedule of this rebate for Customers will be as follows:

	Tier 1	Tier 2	Tier 3	Tier 4	Tier 5	Tier 6
Customer	(\$0.20)	(\$0.25)	(\$0.43)	(\$0.44)	(\$0.45)	(\$0.49)

Second Change

The Exchange proposes to lower the Tier 6 NOM Market Maker rebate to add

liquidity in Penny Symbols from \$0.47 to \$0.45. Therefore, the new schedule of

this rebate for NOM Market Makers will be as follows:

	Tier 1	Tier 2	Tier 3	Tier 4	Tier 5	Tier 6
NOM Market Maker	(\$0.20)	(\$0.25)	(\$0.30)	(\$0.32)	(\$0.45)	(\$0.45)

Third Change

The Exchange proposes to modify the schedule of fees to remove liquidity in Penny and Non-Penny Symbols by eliminating and reserving note 2, which until now had modified the fees paid by Non-NOM Market Makers and NOM Market Makers to remove liquidity in Penny Symbols.

Fourth Change

The Exchange proposes to modify the Customer and Professional rebate to add liquidity in Penny Symbols by streamlining the criteria to qualify for Tier 6.¹⁰ Specifically, the Exchange would modify the second of the two

alternative paths to qualify for Tier 6.¹¹ This second alternative path, in turn, contains two separate requirements that must both be met. The second of these requirements, in turn, is composed of two alternatives.¹² The Exchange proposes to eliminate the first of these two alternatives.¹³ Therefore, the

¹¹ As seen in the immediately preceding footnote, the two conditions to satisfy this second path are currently as follows: "Participant: (1) adds Customer and/or Professional liquidity in Penny Symbols and/or Non-Penny Symbols of 0.10% or more of total industry customer equity and ETF option ADV contracts per day in a month, and (2) has added liquidity in all securities through one or more of its Nasdaq Market Center MPIDs that represent 1.00% or more of Consolidated Volume in a month or qualifies for MARS."

¹² As seen in the immediately preceding footnote, the two alternatives to satisfy this second requirement are currently that the Participant "(2) has added to liquidity in all securities through one or more of its Nasdaq Market Center MPIDs that represent 1.00% or more of Consolidated Volume in a month or qualifies for MARS."

¹³ As seen in the immediately preceding footnote, the first of these two current alternative requirements is that the Participant "has added to liquidity in all securities through one or more of its Nasdaq Market Center MPIDs that represent 1.00% or more of Consolidated Volume in a month." This is the provision of the Tier 6 criteria for the Customer and Professional rebate to add liquidity in Penny Symbols that the Exchange proposes to delete through this filing.

revised criteria to qualify for Tier 6 would be as follows:

Tier 6: Participant adds Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Symbols and/or Non-Penny Symbols above 0.70% or more of total industry customer equity and ETF option ADV contracts per day in a month, or Participant: (1) adds Customer and/or Professional liquidity in Penny Symbols and/or Non-Penny Symbols of 0.10% or more of total industry customer equity and ETF option ADV contracts per day in a month, and (2) qualifies for MARS.

Fifth Change

The Exchange proposes to modify the schedule of rebates to add liquidity in Penny Symbols by eliminating and reserving note 7, which until now had modified the Tier 6 rebate paid to Customers.

Sixth Change

The only definition of "*Consolidated Volume*" that is currently in Options 7 is contained in note 7, which is being deleted in this filing. The Exchange proposes to relocate this same definition, verbatim, to Options 7,

¹⁰ As mentioned above, the current criteria to qualify for Tier 6 are the following: "Participant adds Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Symbols and/or Non-Penny Symbols above 0.70% or more of total industry customer equity and ETF option ADV contracts per day in a month, or Participant: (1) adds Customer and/or Professional liquidity in Penny Symbols and/or Non-Penny Symbols of 0.10% or more of total industry customer equity and ETF option ADV contracts per day in a month, and (2) has added liquidity in all securities through one or more of its Nasdaq Market Center MPIDs that represent 1.00% or more of Consolidated Volume in a month or qualifies for MARS."

Section 1(a), which contains several other defined terms. The “Consolidated Volume” defined term in Options 7, Section 1(a) would read as follows:

The term “*Consolidated Volume*” shall mean the total consolidated volume reported to all consolidated transaction reporting plans by all exchanges and trade reporting facilities during a month in equity securities, excluding executed orders with a size of less than one round lot. For purposes of calculating Consolidated Volume and the extent of an equity member’s trading activity, expressed as a percentage of or ratio to Consolidated Volume, the date of the annual reconstitution of the Russell Investments Indexes shall be excluded from both total Consolidated Volume and the member’s trading activity.

Seventh Change

The Exchange proposes to modify the rebates to add liquidity in Penny Symbols and the schedule of fees and rebates to add liquidity in Non-Penny Symbols by eliminating and reserving note 10, which until now had modified the rebates paid to Customers and Professionals to add liquidity in Penny Symbols, as well as the rebates paid to Customers and Professionals to add liquidity in Non-Penny Symbols.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,¹⁴ in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,¹⁵ in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system “has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.”¹⁶

Likewise, in *NetCoalition v. Securities and Exchange Commission*¹⁷

(“*NetCoalition*”) the D.C. Circuit upheld the Commission’s use of a market-based approach in evaluating the fairness of market data fees against a challenge claiming that Congress mandated a cost-based approach.¹⁸ As the court emphasized, the Commission “intended in Regulation NMS that ‘market forces, rather than regulatory requirements’ play a role in determining the market data . . . to be made available to investors and at what cost.”¹⁹

Further, “[n]o one disputes that competition for order flow is ‘fierce.’ . . . As the SEC explained, ‘[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution’; [and] ‘no exchange can afford to take its market share percentages for granted’ because ‘no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers’”²⁰ Although the court and the SEC were discussing the cash equities markets, the Exchange believes that these views apply with equal force to the options markets.

The Exchange’s proposed changes to Options 7 are reasonable in several respects. As a threshold matter, the Exchange is subject to significant competitive forces in the market for options transaction services that constrain its pricing determinations in that market. Within this environment, the Exchange must continually adjust the fees and rebates set forth in its Pricing Schedule to remain competitive with the other national securities exchanges to which market participants may direct their options order flow. Each of the seven proposed changes is discussed in turn below.

First Change

The proposed amendment to the Tier 6 Customer rebate to add liquidity in Penny Symbols from \$0.48 per contract to \$0.49 per contract is reasonable because it modestly increases the top-tier Customer Penny Symbol rebate paid on NOM, which is designed to attract additional Customer order flow to the Exchange. As the Exchange has previously observed, Customer liquidity offers benefits to the market that ultimately benefit all Participants: it provides more trading opportunities, which attracts market makers, and an increase in the activity of these market

participants in turn facilitates tighter spreads, which may cause an additional corresponding increase in order flow. The proposed higher Tier 6 rebate is therefore intended to improve overall market quality on the Exchange by incentivizing Participants to bring additional Customer order flow to NOM and, in turn, provide more trading opportunities to the benefit of all market participants. The amendment is part of an overall effort to appropriately calibrate rebates in a manner that helps attract order flow to NOM, from which all Participants benefit through increased trading opportunities and greater interaction with liquidity.

The proposed amendment is equitable and not unfairly discriminatory because the Exchange would uniformly apply the revised Tier 6 rebate to every Participant that satisfies the qualifying criteria for that Tier through Customer liquidity-adding order flow. Continuing to provide more favorable pricing on Customer liquidity than on liquidity from other categories of market participants is consistent with the Exchange’s long-standing practice throughout its Pricing Schedule and is justified because Customer liquidity offers benefits that ultimately flow through to all market participants, as described above. Similar upward adjustments to individual Customer and NOM Market Maker Penny Symbol and Non-Penny Symbol liquidity-adding rebates have previously been effected by the Exchange on the same basis.²¹

Second Change

The proposed amendment to the Tier 6 NOM Market Maker rebate to add liquidity in Penny Symbols from \$0.47 per contract to \$0.45 per contract is reasonable because NOM Market Makers would continue to receive substantial rebates for adding Penny Symbol liquidity across all six volume tiers, and the Tier 6 rebate would remain among the highest of those tiers, tied with the Tier 5 rebate at \$0.45 per contract. The amendment is part of an overall effort to appropriately calibrate rebates in a manner that helps attract order flow to NOM, from which all Participants benefit through increased trading

¹⁵ 15 U.S.C. 78f(b)(4) and (5).

¹⁶ Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005).

¹⁷ *NetCoalition v. SEC*, 615 F.3d 525 (D.C. Cir. 2010).

¹⁸ See *NetCoalition*, at 534–535.

¹⁹ *Id.* at 537.

²⁰ *Id.* at 539 (quoting Securities Exchange Act Release No. 59039 (Dec. 2, 2008), 73 FR 74770, 74782–83 (Dec. 9, 2008) (File No. SR-NYSEArca-2006-21)).

opportunities and greater interaction with liquidity.

The proposed amendment is equitable and not unfairly discriminatory because the Exchange would uniformly apply the revised Tier 6 rebate to every NOM Market Maker that satisfies the qualifying criteria for that Tier. Similar downward adjustments to individual NOM Market Maker Penny Symbol rebate tiers have previously been effected by the Exchange on the same basis.²²

Third Change

The proposed elimination and reservation of note 2 in Options 7, Section 2(1) is reasonable. Note 2 currently offers Non-NOM Market Makers and NOM Market Makers reduced fees for removing liquidity in Penny Symbols of \$0.48 and \$0.38 per contract in narrowly defined transactions in which the Participant is (i) both the buyer and the seller or (ii) removes liquidity from another Participant under Common Ownership, and only where the Participant has separately added 1.10% or 1.55% of total industry customer equity and ETF option ADV. Following the proposed elimination, Non-NOM Market Makers and NOM Market Makers would be assessed the same standard \$0.50 per contract Penny Symbols fee for removing liquidity that is applicable to Broker-Dealers and Firms. The Exchange believes that eliminating this narrow incentive, which today applies only where the Participant is on both sides of the trade or removes liquidity from an affiliate under Common Ownership, produces a more uniform Penny Symbols removal fee structure across Non-NOM Market Makers, NOM Market Makers, Broker-Dealers and Firms and simplifies the Pricing Schedule.

The proposed elimination is equitable and not unfairly discriminatory because, upon its effectiveness, no Participant would be able to qualify for the eliminated note 2 incentives, and the Exchange would uniformly apply the standard fees to remove liquidity in Penny Symbols to all Non-NOM Market Makers and NOM Market Makers.

Fourth Change

The proposed modification to the Tier 6 criteria for the Customer and

Professional rebate to add liquidity in Penny Symbols is reasonable. Tier 6 is presently available under two alternative qualification paths, and the proposal streamlines only the second of those paths. Following the proposed change, that second path will continue to require the Participant to add at least 0.10% of total industry customer equity and ETF option ADV in Customer and/or Professional volume, and to qualify for MARS. The primary qualification path (adding at least 0.70% of total industry customer equity and ETF option ADV in Penny Symbol and/or Non-Penny Symbol liquidity) is not affected by the proposal, and neither is the requirement that the Participant reach 0.10% of total industry customer equity and ETF option ADV in Customer and/or Professional volume under the second path. The Exchange has previously observed, in adding an alternative MARS-tied route to Tier 3 of the Customer and Professional rebate program,²³ that tying rebate qualification to MARS is designed to incentivize Participants to increase their liquidity adding activity on NOM and thereby improve the quality of the market for all Participants. The Exchange believes that the same reasoning supports focusing the second Tier 6 qualification path on the MARS-tied requirement alone.

The proposed modification is equitable and not unfairly discriminatory because the Exchange would uniformly apply the streamlined Tier 6 criteria to every Participant that seeks to earn the Customer and Professional rebate to add liquidity in Penny Symbols at Tier 6. Participants that previously could have qualified for Tier 6 through the deleted alternative (adding liquidity in all securities through one or more of their Nasdaq Market Center MPIDs representing 1.00% or more of Consolidated Volume in a month) may still qualify for Tier 6 either by satisfying the unmodified primary volume threshold or by satisfying the retained MARS-tied requirement of the second path, on the same terms as every other Participant. The Exchange acknowledges that a Participant whose Tier 6 eligibility currently rests solely on the deleted MPID/Consolidated Volume alternative—that is, a Participant that does not meet either the unmodified primary volume threshold or the retained MARS-tied requirement of the

second path—would no longer qualify for Tier 6 following the proposed change. The Exchange believes this outcome is appropriate because it aligns Tier 6 eligibility with volume-based and MARS-linked criteria that more directly incentivize the addition of Customer and Professional order flow to NOM.

Fifth Change

The proposed elimination and reservation of note 7 in Options 7, Section 2(1) is reasonable. Note 7 currently modifies the Tier 6 Customer rebate to add liquidity in Penny Symbols by providing additional \$0.02, \$0.05, or \$0.05 per contract enhancements upon satisfaction of substantial volume and cross-market conditions. The Exchange has observed that these layered volume-based and cross-market enhancements have not attracted incremental Customer order flow at levels commensurate with the complexity that they add to the Pricing Schedule. Following the proposed elimination, Participants that qualify for the Tier 6 Customer rebate to add liquidity in Penny Symbols would continue to receive that rebate at its established level. The Exchange believes that consolidating the Tier 6 Customer rebate at its established, uniform level, without the additional volume-based and cross-market enhancements currently in note 7, produces a simpler and more transparent Tier 6 Customer rebate structure.

The proposed elimination is equitable and not unfairly discriminatory because, upon its effectiveness, no Participant would be able to qualify for the eliminated note 7 enhancements, and the Exchange would uniformly apply the standard Tier 6 Customer rebate to every Participant that qualifies for that Tier.

Sixth Change

The proposed relocation of the “Consolidated Volume” defined term from note 7 of Options 7, Section 2(1) to Options 7, Section 1(a), which houses the defined terms applicable throughout the Pricing Schedule, is reasonable. The proposed relocation is a non-substantive change that reproduces the “Consolidated Volume” definition verbatim in a new location and, in itself, does not modify any fee, rebate, threshold, or qualification criterion under Options 7. Because notes 3, 4, 9 and the note designated by “##” within Options 7, Section 2(1) each use the term “Consolidated Volume” without themselves defining it, and because the concurrent elimination of note 7 (the sole current location of the defined term) would otherwise leave

²² See Securities Exchange Act Release No. 104818 (Feb. 11, 2026), 91 FR 7336 (Feb. 17, 2026) (File No. SR-NASDAQ-2026-006) (reducing the Tier 5 NOM Market Maker Rebate to Add Liquidity in Penny Symbols from \$0.46 to \$0.45 per contract and the Tier 6 NOM Market Maker Rebate to Add Liquidity in Penny Symbols from \$0.48 to \$0.47 per contract).

²³ See Securities Exchange Act Release No. 92974 (Sept. 14, 2021), 86 FR 52273 (Sept. 20, 2021) (File No. SR-NASDAQ-2021-069) (adding an alternative MARS-tied route to qualify for the Tier 3 Customer and Professional Rebate to Add Liquidity in Penny Symbols).

“Consolidated Volume” undefined within Options 7, the proposed relocation preserves an accurate and clearly identifiable definition of “Consolidated Volume” for all remaining references to that term within Options 7. Placing the “Consolidated Volume” defined term alongside the other defined terms in Section 1(a) also makes the Pricing Schedule easier to read and more accessible to Participants and other market participants that consult it.

The proposed relocation is equitable and not unfairly discriminatory because it applies uniformly across all Participants. The definition of “Consolidated Volume” proposed for Options 7, Section 1(a) is identical to the definition that currently appears in note 7, and its relocation does not alter how “Consolidated Volume,” or activity for any fee or rebate tier that references “Consolidated Volume,” is calculated. The Exchange will therefore continue to apply the same measure of “Consolidated Volume,” in the same manner, to every Participant that seeks to qualify under any fee or rebate provision of Options 7 that references that term.

Seventh Change

The proposed elimination and reservation of note 10 in Options 7, Section 2(1) is reasonable. Note 10 currently provides an alternative, exclusive rebate schedule to Participants that satisfy a demanding combination of NOM add-liquidity volume above 1.50% of total industry customer equity and ETF option ADV, MOC/LOC Consolidated Volume greater than 0.04% executed within The Nasdaq Stock Market Closing Cross, and non-displayed volume within The Nasdaq Stock Market greater than 1.5 million shares per day. Participants that qualified for the note 10 rebate schedule were excluded from receiving any of the six tiered Customer and Professional rebates to add liquidity, and from any other Customer and Professional rebate incentive on NOM. With the proposed elimination, all Participants, including any Participant that previously qualified for the note 10 rebate schedule, would be eligible to earn the tiered Customer and Professional rebates to add liquidity in Penny Symbols and Non-Penny Symbols on the same basis as every other Participant.

The proposed elimination is equitable and not unfairly discriminatory because, upon its effectiveness, no Participant would be able to qualify for the eliminated note 10 rebate schedule, and the Exchange would uniformly apply to

all Participants the tiered Customer and Professional rebates to add liquidity.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Inter-Market Competition

The proposal does not impose an undue burden on inter-market competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes its proposal remains competitive with other options markets and will offer market participants with another choice of where to transact options. The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited.

Intra-Market Competition

The Exchange does not believe that its proposal would impose an undue burden on intra-market competition. Each of the seven proposed changes would apply uniformly across all Participants, or uniformly within an identifiable class of Participants to which the corresponding pricing provision applies.

First Change

The proposed increase of the Tier 6 Customer rebate to add liquidity in Penny Symbols from \$0.48 per contract to \$0.49 per contract does not impose an undue burden on intra-market competition, because the revised Tier 6 rebate would apply uniformly to every Participant that satisfies the Tier 6 qualification criteria through Customer liquidity-adding order flow. The Exchange's long-standing practice of providing more favorable pricing on Customer liquidity than on liquidity from other categories of market participants does not impose an undue burden on intra-market competition because, as described above, Customer

liquidity offers benefits that ultimately flow through to all Participants.

Second Change

The proposed reduction of the Tier 6 NOM Market Maker rebate to add liquidity in Penny Symbols from \$0.47 per contract to \$0.45 per contract does not impose an undue burden on intra-market competition, because the revised rebate would apply uniformly to every NOM Market Maker that satisfies the Tier 6 qualification criteria, and NOM Market Makers would continue to receive substantial rebates for adding Penny Symbol liquidity across all six volume tiers.

Third Change

The proposed elimination and reservation of note 2 in Options 7, Section 2(1) does not impose an undue burden on intra-market competition, because, upon its effectiveness, no Participant would be able to qualify for the eliminated note 2 incentives, and Non-NOM Market Makers and NOM Market Makers would be assessed the same \$0.50 per contract Penny Symbol fee for removing liquidity as Broker-Dealers and Firms.

Fourth Change

The proposed modification of the Tier 6 criteria for the Customer and Professional rebate to add liquidity in Penny Symbols does not impose an undue burden on intra-market competition, because the streamlined Tier 6 criteria would apply uniformly to every Participant that seeks the Tier 6 rebate. The primary qualification path (adding at least 0.70% of total industry customer equity and ETF option ADV in Penny Symbol and/or Non-Penny Symbol liquidity) is unchanged by the proposal, and the MARS-tied requirement of the second qualification path is retained without modification. The proposal narrows only one of two alternative requirements within the second qualification path, and it does so on terms that apply identically to every Participant.

Fifth Change

The proposed elimination and reservation of note 7 in Options 7, Section 2(1) does not impose an undue burden on intra-market competition, because, upon its effectiveness, no Participant would be able to qualify for the eliminated note 7 enhancements, and the Tier 6 Customer rebate to add liquidity in Penny Symbols would continue to be paid at its established level to every Participant that satisfies the Tier 6 criteria.

Sixth Change

The proposed relocation of the “Consolidated Volume” defined term from note 7 of Options 7, Section 2(1) to Options 7, Section 1(a) does not impose an undue burden on intra-market competition. The relocation is a non-substantive change that reproduces the definition verbatim in a new location, does not modify any fee, rebate, threshold or qualification criterion, and does not alter how “Consolidated Volume” is calculated or applied to any Participant. The same measure of “Consolidated Volume” will continue to apply to all Participants that seek to qualify under any fee or rebate provision of Options 7 that references the term and, accordingly, the proposed relocation applies uniformly across all Participants.

Seventh Change

The proposed elimination and reservation of note 10 in Options 7, Section 2(1) does not impose an undue burden on intra-market competition. Upon its effectiveness, no Participant would be able to qualify for the eliminated note 10 rebate schedule, and, importantly, Participants that previously would have been excluded from the tiered Customer and Professional rebates to add liquidity by virtue of qualifying for note 10 would once again be eligible to earn those tiered rebates on the same basis as every other Participant. The Exchange therefore believes that this change furthers intra-market competition by allowing all Participants, including any Participants that previously qualified for the note 10 rebate schedule, to be eligible to qualify and earn the tiered Customer and Professional rebates to add liquidity in Penny Symbols and Non-Penny Symbols on the same basis as every other Participant.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.²⁴

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such

action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR–NASDAQ–2026–074 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NASDAQ–2026–074. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NASDAQ–2026–074 and should be submitted on or before October 9, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁵

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2026–19119 Filed 9–17–26; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106379; File No. SR–NYSEAMER–2026–83]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 7.12E Concerning the Resumption of Trading Following a Level 3 Market-Wide Circuit Breaker Halt in Connection With the Industry’s Expansion of Trading Hours to 23 Hours per Day, 5 Days per Week

September 15, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”) ¹ and Rule 19b–4 thereunder,² notice is hereby given that, on September 4, 2026, NYSE American LLC (“NYSE American” or the “Exchange”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 7.12E (“Trading Halts Due to Extraordinary Market Volatility”) concerning the resumption of trading following a Level 3 market-wide circuit breaker halt in connection with the industry’s expansion of trading hours to 23 hours per day, 5 days per week. The proposed rule change is available on the Exchange’s website at www.nyse.com and at the principal office of the Exchange.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

²⁵ 17 CFR 200.30–3(a)(12).

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

NYSE American LLC ("NYSE American" or the "Exchange") proposes to amend Rule 7.12E ("Trading Halts Due to Extraordinary Market Volatility") concerning the resumption of trading following a Level 3 market-wide circuit breaker ("MWCB") halt ("Level 3 Market Decline") in connection with the industry's expansion of trading hours to 23 hours per day, 5 days per week ("23/5 Trading"). Some exchanges, including the Exchange's affiliate exchange, NYSE Arca, Inc. ("NYSE Arca"), are planning to offer overnight trading,³ and as a result, the uniform Level 3 Market Decline rules of each exchange are being modified, as explained further below.

Background

The MWCB mechanism under Rule 7.12E provides an important, automatic mechanism that is invoked to promote stability and investor confidence during a period of significant stress when U.S. securities markets experience extreme broad-based declines. All U.S. equity exchanges and FINRA (collectively, the self-regulatory organizations or "SROs") adopted uniform rules relating to the MWCB mechanism in 2012, which are designed to slow the effects of extreme price movement through coordinated trading halts across U.S. securities markets when severe price declines reach levels that may exhaust market liquidity.⁴ Such market-wide circuit breakers provide for trading halts in all U.S. cash equity and equities options markets during a severe market decline as measured by a single-day decline in the S&P 500 Index during regular trading hours.

Pursuant to Rule 7.12E, a market-wide trading halt will be triggered if the S&P 500 Index declines in price by specified percentages from the prior day's closing price of that index. Currently, the triggers are set at three circuit breaker thresholds: 7% (Level 1), 13% (Level 2), and 20% (Level 3). A market decline

that triggers a Level 1 or Level 2 halt after 9:30 a.m. ET and before 3:25 p.m. ET would halt market-wide trading for 15 minutes, while a similar market decline at or after 3:25 p.m. ET would not halt market-wide trading. If a Level 3 Market Decline occurs at any time during the trading day, trading in all stocks will halt on the Exchange for the remainder of the trading day, and will resume the following trading day at 7:00 a.m. ET.

Proposal

The Exchange now proposes to amend Rule 7.12E to reflect extended trading hours under 23/5 Trading. On December 6, 2026, several exchanges, including NYSE Arca, intend to offer new overnight trading sessions that would be available from 9:00 p.m. ET to 4:00 a.m. ET, significantly increasing their hours of operation in response to customer demand.

As discussed, consistent with the uniform rules in place across all SROs, current Rule 7.12E(b)(ii) provides that if a Level 3 Market Decline occurs at any time during the trading day, the Exchange shall halt trading in all stocks on the Exchange for the remainder of the trading day. Currently, that means that the earliest that any exchange would re-open trading after a Level 3 Market Decline is 4:00 a.m. ET the following day, since no SROs are open for trading before 4:00 a.m. ET.

Unless amended, when 23/5 Trading is launched, the current rule's reference to halting "for the remainder of the trading day"⁵ would require SROs participating in 23/5 Trading to re-open trading at an earlier time, *i.e.*, 9:00 p.m. ET on the same calendar day, when those SROs' systems would generally become available for overnight trading. The Exchange does not believe that this is an expected or desired result and is therefore amending this rule in coordination with the other SROs such that trading on any SRO will not resume until 4:00 a.m. ET or later on the following trading day, consistent with current market practice. This proposed rule change is therefore not intended to make any substantive changes to the MWCB mechanism. Rather, the proposed rule change would preserve the current resumption time following a Level 3 Market Decline.

To effect this change, the Exchange proposes to delete the language in Rule 7.12E(b)(ii) that provides that trading in all stocks will halt on the Exchange "for the remainder of the trading day" if a Level 3 Market Decline occurs at any time during the trading day, and replace

it with new language that explicitly provides that trading in all stocks would halt on the Exchange until 4:00 a.m. ET or later on the following trading day.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁶ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁷ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The MWCB mechanism described in Rule 7.12E is an important, automatic mechanism that is invoked to promote stability and investor confidence during periods of significant stress when U.S. securities markets experience extreme broad-based declines. The proposed rule change, when applied uniformly by all SROs, would ensure that the current 4:00 a.m. ET resumption time following a Level 3 halt continues to apply under 23/5 Trading, notwithstanding current rule text implying that the resumption time would coincide with the start of overnight trading on SROs operating an overnight session.

Rather than leave the rule in place as is, which would result in an earlier resumption time than originally contemplated when the rule was adopted, the Exchange, the other U.S. equity exchanges, and FINRA met alongside industry representatives to determine the appropriate resumption time. Following those discussions, the collective decision was made to retain the 4:00 a.m. ET resumption time, notwithstanding the fact that an earlier resumption time would be possible with the introduction of 23/5 Trading. The proposed rule change codifies this decision into the Exchange's rules. The Exchange understands that the other SROs will also be filing similar proposed rule changes. As a result, the market as a whole, including on- and off-exchange, will continue to be subject to harmonized rules for the resumption of trading following a Level 3 Market Decline.

While the SROs had previously decided to tie the resumption time following a Level 3 halt to the earliest SRO opening time, the upcoming transition to 23/5 Trading raises various concerns that warrant a change from the current approach.

First, the Exchange notes that the MWCB mechanism was designed to

³ See, e.g., Securities Exchange Act Release No. 105532 (May 21, 2026), 91 FR 31509 (May 27, 2026) (SR-NYSEARCA-2026-53) ("NYSE Arca 23/5 Trading Notice"). The Exchange does not intend to implement 23/5 Trading at this time.

⁴ See Securities Exchange Act Release No. 67090 (May 31, 2012), 77 FR 33531 (June 6, 2012) (SR-BATS-2011-038; SR-BYX-2011-025; SR-BX-2011-068; SR-CBOE-2011-087; SR-C2-2011-024; SR-CHX-2011-30; SR-EDGA-2011-31; SR-EDGX-2011-30; SR-FINRA-2011-054; SR-ISE-2011-61; SR-NASDAQ-2011-131; SR-NSX-2011-11; SR-NYSE-2011-48; SR-NYSEAmex-2011-73; SR-NYSEArca-2011-68; SR-Phlx-2011-129) ("MWCB Approval Order").

⁵ See Rule 7.12E(b)(ii).

⁶ 15 U.S.C. 78f(b).

⁷ 15 U.S.C. 78f(b)(5).

provide a cooling-off period where market participants would be provided with additional time to evaluate the market events that led to the decline before determining how to position their trading activity for the next day. With the introduction of 23/5 Trading and the start of overnight trading on some SROs at 9:00 p.m. ET, however, this cooling-off period could be materially shortened, reducing one of the key benefits that the MWCB mechanism was designed to provide in the first place. Rather than shorten the cooling-off period and risk this benefit, the Exchange believes the market would be better served by a change to the length of the associated trading halt that mirrors current market practice. Under the proposed rule, as is the case today, after a Level 3 halt, all SROs would reopen trading at 4:00 a.m. ET or later, and no SRO would offer an overnight trading session starting on the day of a Level 3 halt.

Second, overnight trading may be subject to different liquidity and participation considerations than the current pre-market sessions that start at or after 4:00 a.m. ET. Notably, while retail investors have expressed interest in overnight trading, the Exchange expects that institutional investors will take more time to transition to a round-the-clock model. However, such institutional participation may be of heightened importance following a Level 3 halt, as these investors are likely to have views on the underlying market events that led to the Level 3 Market Decline in the first place. The Exchange is concerned that opening during hours that such participants do not normally trade may impact the quality of price discovery at a time of significant market volatility. Waiting until 4:00 a.m. ET to resume trading would facilitate broader participation and therefore price discovery.

Finally, the Exchange notes that the Commission recently approved an amendment to the Plan to Address Extraordinary Market Volatility (“LULD Plan”) that would establish new price protections from 9:00 p.m. ET to 4:00 a.m. ET.⁸ While these price bands would help to assure a fair and orderly market during normal market conditions, it is possible that they would instead prevent normal price discovery following a Level 3 Market Decline. Rather than allowing trading to

resume with such price bands in effect, which would represent a change from the current trading reopening following a Level 3 Market Decline, the Exchange believes that requiring SROs to wait until 4:00 a.m. ET or later to resume trading would ensure that price discovery can occur unimpeded during pre-market trading, as it does today, which may further inform prices going into the opening auction and regular market hours trading following a Level 3 halt.

Given the factors discussed above, the Exchange believes that trading in all securities on the Exchange should not resume before 4:00 a.m. ET on the trading day after a Level 3 halt. This decision, which the Exchange understands will also be reflected in the rules of the other SROs, would promote a fair and orderly market at a time of significant market volatility, and thereby protect investors and the public interest. In addition, while the actual Level 3 resumption time would not be changing in practice—as proposed, the current resumption time and future resumption time would both be 4:00 a.m. ET at the earliest—the Exchange believes that it is appropriate to amend its rules to ensure that its rules reflect the upcoming changes due to 23/5 Trading. Without this change, market participants may mistakenly believe that the Exchange intends for trading to reopen on overnight trading exchanges at 9:00 p.m. ET following a Level 3 halt. The proposed rule change would therefore facilitate operational transparency while providing for a fair and orderly market.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act because the proposal would ensure the continued, uninterrupted operation of a consistent mechanism to halt trading across U.S. securities markets. Further, the Exchange understands that the other SROs intend to file proposed rule changes to ensure a consistent resumption time at 4:00 a.m. or later ET across markets. Thus, the proposed rule change will help to ensure consistency across market centers without implicating any competitive issues.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act⁹ and subparagraph (f)(6) of Rule 19b–4 thereunder.¹⁰

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR–NYSEAMER–2026–83 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

⁹ 15 U.S.C. 78s(b)(3)(A)(iii).

¹⁰ 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

⁸ See Securities Exchange Act Release No. 106042 (August 5, 2026), 91 FR 51515 (August 10, 2026) (Order Granting Approval of the Twenty-Seventh Amendment to the National Market System Plan to Address Extraordinary Market Volatility to Establish Temporary Price Band Protections in Overnight Trading).

All submissions should refer to file number SR-NYSEAMER-2026-83. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NYSEAMER-2026-83 and should be submitted on or before October 9, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹¹

Sherry R. Haywood,

Assistant Secretary.

DEPARTMENT OF STATE

[Public Notice 13122]

60-Day Notice of Proposed Information Collection: DS-864E, Request for Exemption From Immigrant Visa Applicant's Affidavit of Support

ACTION: Notice of request for public comment.

SUMMARY: The Department of State is seeking Office of Management and Budget (OMB) approval for the information collection described below. In accordance with the Paperwork Reduction Act of 1995, we are requesting comments on this collection from all interested individuals and organizations. The purpose of this notice is to allow 60 days for public comment preceding submission of the collection to OMB.

DATES: The Department will accept comments from the public up to November 17, 2026.

ADDRESSES: You may submit comments by any of the following methods:

- **Web:** Persons with access to the internet may comment on this notice by going to www.Regulations.gov. You can search for the document by entering "Docket Number: DOS-2026-0960" in the Search field. Then click the

"Comment Now" button and complete the comment form.

- **Email:** PRA_BurdenComments@state.gov.

- **Regular Mail:** Send written comments to: Senior Regulatory Coordinator, Visa Services, Department of State, 600 19th St. NW, Washington, DC 20006.

Please contact the Department via email if you are unable to access the supporting documentation through regulations.gov. You must include the DS form number (if applicable), information collection title, and the OMB control number in any correspondence.

SUPPLEMENTARY INFORMATION:

- **Title of Information Collection:** Request for Exemption from Immigrant Visa Applicant's Affidavit of Support.
- **OMB Control Number:** 1405-XXXX.
- **Type of Request:** New Collection.
- **Originating Office:** CA/VO.
- **Form Number:** DS-864E.
- **Respondents:** Immigrant Visa Applicants.

- **Estimated Number of Respondents:** 24,000.

- **Estimated Number of Responses:** 24,000.

- **Average Time Per Response:** 1 hour.

- **Total Estimated Burden Time:** 24,000.

- **Frequency:** Once per respondent's application.

- **Obligation to Respond:** Required to Obtain or Retain a Benefit.

We are soliciting public comments to permit the Department to:

- Evaluate whether the proposed information collection is necessary for the proper functions of the Department.

- Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used.

- Enhance the quality, utility, and clarity of the information to be collected.

- Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Please note that comments submitted in response to this Notice are public record. Before including any detailed personal information, you should be aware that your comments as submitted, including your personal information, will be available for public review.

Abstract of Proposed Collection

Section 213A of the Immigration and Nationality Act (INA) (8 U.S.C. 1183a) sets forth the requirements for an

Affidavit of Support. In most cases, a family-sponsored and certain employment-based immigrant must have a sponsor execute an Affidavit of Support on his or her behalf. The Affidavit of Support is intended to demonstrate the immigrant will have adequate means of financial support and is not likely to rely on governmental financial assistance. The Affidavit of Support is a legally binding contract which may be enforced in federal or state court if the sponsored immigrant receives any means-tested public benefits and the sponsor does not repay the cost of those benefits to the agency that provided them.

The Department of State uses the Department of Homeland Security's (DHS) Form I-864, Affidavit of Support Under Section 213A of the Act—or Form I-864EZ, Affidavit of Support of Support Under Section 213A of the Act, if the applicant qualifies to use it—to determine whether the sponsor meets the minimum income requirements. The Department previously used DHS Form I-864W, Request for Exemption for Intending Immigrant's Affidavit of Support, to determine whether an applicant was eligible for an exemption from filing these forms. However, OIRA approved discontinuation of Form I-864W on October 17, 2024.

The Department developed Form DS-864E to facilitate the Department's continued ability to assess sponsor information in accordance with INA 213A (8 U.S.C. 1183a), INA 212(a)(4) (8 U.S.C. 1182(a)(4)), and 22 CFR 40.41. The Department will use Form DS-864E to determine whether the applicant meets the criteria for exemption from the requirement to submit Form I-864 (or Form I-864EZ). This form will collect the immigrant's basic information, such as name and address, the reason for the exemption, and accompanying documentation in support of the immigrant's claim that he or she is not required to submit Form I-864 (or Form I-864EZ) and serve as his or her affirmative request for an exemption as required under 8 CFR 213a.2(a)(1)(i)(B).

Methodology

Form DS-864E will be available electronically at <https://travel.state.gov>. The form can be completed online and must be submitted as directed by the National Visa Center (NVC) or by a consular officer abroad.

John L. Armstrong,

Principal Deputy Assistant Secretary, Bureau of Consular Affairs, Department of State.

SURFACE TRANSPORTATION BOARD**[Docket No. EP 290 (Sub-No. 5) (2026–4)]****Quarterly Rail Cost Adjustment Factor****AGENCY:** Surface Transportation Board.**ACTION:** Approval of rail cost adjustment factor.

SUMMARY: The Surface Transportation Board has adopted the fourth quarter 2026 Rail Cost Adjustment Factor and cost index filed by the Association of American Railroads.

DATES: *Applicability Date:* October 1, 2026.

FOR FURTHER INFORMATION CONTACT:

Dylan Richmond, (202) 915–0962. If you require an accommodation under the Americans with Disabilities Act, please call (202) 245–0245.

SUPPLEMENTARY INFORMATION: The rail cost adjustment factor (RCAF) is an index formulated to represent changes in railroad costs incurred by the nation's largest railroads over a specified period of time. The Surface Transportation Board (Board) is required by law to publish the RCAF on at least a quarterly basis. Each quarter, the Association of American Railroads computes three types of RCAF figures and submits those figures to the Board for approval. The Board has reviewed the submission and adopts the RCAF figures for the fourth quarter of 2026. The fourth quarter 2026 RCAF (Unadjusted) is 1.193. The fourth quarter 2026 RCAF (Adjusted) is 0.453. The fourth quarter 2026 RCAF–5 is 0.429. Additional information is contained in the Board's decision, which is available at www.stb.gov.

By the Board, Board Members Fuchs, Hedlund, Kloster, and Schultz.

Decided: September 16, 2026.

Stefan Rice,

Clearance Clerk.

BILLING CODE 4915–01–P

SURFACE TRANSPORTATION BOARD**[Docket No. FD 36937]****Ventura County Railroad Company—Operation Exemption—Ventura County Railway Company, LLC**

Ventura County Railroad Company (VCRR), a Class III rail carrier, has filed a verified notice of exemption under 49 CFR 1150.41 to enter into an amendment to extend the term of an operating and maintenance agreement with Ventura County Railway Company, LLC (VCRC, LLC), for approximately 12.19-miles of rail line (the Line). The

Line consists of a mainline from milepost 0.0 (at the interchange with Union Pacific Railroad Company) to approximately milepost 5.8 on the docks at Port Hueneme, and three branches: the 1.05-mile Diamond Branch; the 1.71-mile Edison Branch, and the 3.63-mile Patterson Branch in the Port of Hueneme and Oxnard, Cal.

According to the verified notice, in 2022, VCRR entered into an agreement with VCRC, LLC to operate the Line. *Ventura Cnty. R.R.—Operation Exemption—Ventura Cnty. Ry.*, FD 36651 (STB served Dec. 16, 2022). The verified notice states that the amended agreement allows VCRR to continue operating over the Line by extending the term of the agreement for five years with an option to extend the agreement another five years thereafter.

VCRR certifies that its projected annual revenue resulting from the proposed transaction will not exceed \$5 million and will not exceed those that would qualify it as a Class III rail carrier. VCRR also certifies that the amended agreement does not include an interchange commitment.

The transaction may be consummated on or after October 4, 2026, the effective date of the exemption (30 days after the verified notice was filed).

If the verified notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed no later than September 25, 2026 (at least seven days before the exemption becomes effective).

All pleadings, referring to Docket No. FD 36937, must be filed with the Surface Transportation Board either via e-filing on the Board's website or in writing addressed to 395 E Street SW, Washington, DC 20423–0001. In addition, a copy of each pleading must be served on VCRR's representative, Justin J. Marks, Clark Hill PLC, 601 13th Street NW, Suite 600, Washington, DC 20005.

According to VCRR, this action is categorically excluded from environmental review under 49 CFR 1105.6(c) and from historic preservation reporting requirements under 49 CFR 1105.8(b).

Board decisions and notices are available at www.stb.gov.

Decided: September 15, 2026.

By the Board, Anika S. Cooper, Chief Counsel, Office of Chief Counsel.

Kenyatta Clay,
Clearance Clerk.

[FR Doc. 2026–19099 Filed 9–17–26; 8:45 am]

BILLING CODE 4915–01–P

SURFACE TRANSPORTATION BOARD**[Docket No. FD 36950]****The Great Walton Railroad Company, Inc.—Continuance in Control Exemption—The Athens Line, LLC**

The Great Walton Railroad Company, Inc. (GWRC), a Class III rail carrier, has filed a verified notice of exemption under 49 CFR 1180.2(d)(2) to obtain after-the-fact authority to continue in control of The Athens Line, LLC (The Athens Line).¹ GWRC controls two rail carriers: The Athens Line and the Hartwell Railroad Company (Hartwell). GWRC states that it obtained authority to control Hartwell,² but mistakenly did not obtain authority for its continuance in control of The Athens Line.

GWRC represents that its after-the-fact continuance in control of The Athens Line: (1) is not a transaction where The Athens Line would connect with any other GWRC railroads; (2) is not part of a series of anticipated transactions that would result in any such connection; and (3) does not involve a Class I carrier. Therefore, the transaction is exempt from the prior approval requirements of 49 U.S.C. 11323. *See* 49 CFR 1180.2(d)(2).

Under 49 U.S.C. 10502(g), the Board may not use its exemption authority to relieve a rail carrier of its statutory obligation to protect the interests of its employees. However, 49 U.S.C. 11326(c) does not provide for labor protection for transactions under 49 U.S.C. 11324 and 11325 that involve only Class III rail carriers. Accordingly, because this transaction involves Class III rail carriers only, the Board may not impose labor protective conditions here.

The earliest this transaction may be consummated is October 4, 2026, the effective date of the exemption. If the verified notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the

¹ The Athens Line is a wholly owned subsidiary of GWRC. The Athens Line became a rail carrier when it originally leased, and eventually acquired, a line of railroad from Central of Georgia Railroad Company. *See Athens Line, LLC—Lease & Operation Exemption—Norfolk S. Ry.*, FD 34118 (STB served Dec. 27, 2001); *Athens Line, LLC—Acquis. & Operation Exemption—Rail Line of Norfolk S. Ry.*, FD 36122 (STB served June 16, 2017).

² *See Great Walton R.R.—Acquis. Exemption—Hartwell R.R.*, FD 36599 (STB served May 23, 2022).

exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed by September 25, 2026 (at least seven days before the exemption becomes effective).

All pleadings, referring to Docket No. FD 36950, must be filed with the Surface Transportation Board either via e-filing on the Board's website or in writing addressed to 395 E Street SW, Washington, DC 20423-0001. In addition, a copy of each pleading must be served on GWRC's representative, Richard H. Streeter, Law Office of Richard H. Streeter, 5255 Partridge Lane NW, Washington, DC 20016.

According to GWRC, this action is excluded from environmental review under 49 CFR 1105.6(c) and from historic preservation reporting requirements under 49 CFR 1105.8(b).

Board decisions and notices are available at www.stb.gov.

Decided: September 15, 2026.

By the Board, Anika S. Cooper, Chief Counsel, Office of Chief Counsel.

BILLING CODE 4915-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA-2026-10264]

Notice of Availability, Notice of Public Comment Period, and Request for Comment on the Draft Programmatic Environmental Assessment for Reentry Vehicle Operations in the Marine Environment

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of availability and request for comment.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended (NEPA), DOT Order 5610.1D, *DOT's Procedures for Considering Environmental Impacts*, and FAA Order 1050.1G, *FAA National Environmental Policy Act Implementing Procedures*, FAA is announcing the availability of and requesting comment on the Draft Programmatic Environmental Assessment for Reentry Vehicle Operations in the Marine Environment (Draft PEA). FAA is also requesting comment on proposed new categorical exclusions (CATEXs) as

described in and substantiated by the Draft PEA.

DATES: The public comment period for the Draft PEA will close on October 19, 2026.

ADDRESSES: The Draft PEA is available for public review at https://www.faa.gov/space/environmental/nepa_docs. Public comments can be submitted electronically to www.regulations.gov under Docket No. FAA-2026-10264, or by postal mail to Nicholas Baker, FAA Environmental Protection Specialist, c/o ICF, 1902 Reston Metro Plaza, Reston, VA 20190. The Unique ID for this document is PEAX-012-12-000-1774526578.

FOR FURTHER INFORMATION CONTACT: For more information, visit https://www.faa.gov/space/environmental/nepa_docs or send an email to ReentryCapsulePEA@icf.com.

SUPPLEMENTARY INFORMATION: FAA is the lead federal agency, and the National Aeronautics and Space Administration and U.S. Coast Guard are cooperating agencies. FAA has prepared this Draft PEA to evaluate the potential environmental impacts associated with issuing vehicle operator licenses or experimental permits to commercial reentry vehicle operators, which would authorize reentry operations of vehicles in the marine environment. In addition to issuing a license or permit, FAA's federal actions include issuing airspace closures to ensure reentry operations are conducted safely. FAA intends to use this PEA to comply with its National Environmental Policy Act requirements for subsequent reviews of license or permit applications involving reentry operations in the marine environment, as well as to establish three new CATEXs, as described in the Draft PEA. The new CATEXs would be added to FAA Order 1050.1G, Appendix B-2.2 (Categorical Exclusions for Certification Actions). Concurrent with this public review period, FAA is consulting with the Council on Environmental Quality on its PEA and proposed CATEXs, in accordance with Section 1.4(b)(2) of FAA Order 1050.1G.

Proposed Categorical Exclusions

The first proposed CATEX is for issuing FAA vehicle operator licenses or experimental permits for reentry operations that are within the scope of operations described in Chapter 2, *Description of Proposed Action and Alternatives*, of the PEA. All FAA-licensed or -permitted reentry operations would occur within the study area analyzed in the PEA and the applicant's annual frequency of reentry operations would not exceed the

cumulative number of annual FAA-licensed and -permitted reentries described in the PEA.

The second proposed CATEX is for *renewing* FAA vehicle operator licenses or experimental permits for reentry operations that are within the scope of operations described in Chapter 2, *Description of Proposed Action and Alternatives*, of the PEA. All FAA-licensed or -permitted reentry operations would occur within the study area analyzed in the PEA and the applicant's annual frequency of reentry operations would not exceed the cumulative number of annual FAA-licensed and -permitted reentries described in the PEA.

The third proposed CATEX is for *modifying* FAA vehicle operator licenses or experimental permits for reentry operations that are within the scope of operations described in Chapter 2, *Description of Proposed Action and Alternatives*, of the PEA. Such modifications might include new splashdown locations within the study area analyzed in the PEA or new expended or reused components within the type and frequency described in Chapter 2 of the PEA.

Basis for Establishing the Categorical Exclusions

FAA Order 1050.1G states FAA may establish a CATEX through a decision document supported by a programmatic environmental document that substantiates the FAA's conclusion that the category of actions analyzed in the programmatic environmental document does not have significant effects, individually or in the aggregate.

As described in the PEA and consistent with CEQ's guidance memorandum, *Establishing, Revising, Adopting, and Applying Categorical Exclusions under the National Environmental Policy Act* (April 9, 2026), FAA has analyzed previously implemented reentry operations in multiple environmental documents prepared in accordance with NEPA and determined there would not be significant impacts on the human environment. Each EA resulted in a Finding of No Significant Impact (refer to Appendix B of the PEA for a list of these EAs).

Public Disclosure Statement

Before including your address, phone number, email address, or other personal identifying information in your comment, be advised that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask the FAA in your comment

to withhold from public review your personal identifying information, FAA cannot guarantee that we will be able to do so.

Issued in Washington, DC, on September 16, 2026.

Stacey Molinich Zee,

Manager, Operations Support Branch.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA–2025–1218]

Notice of Availability of Revision E to FAA Order 8000.95, Regarding Individual Designee Management Policy

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of availability.

SUMMARY: Revision E to FAA Order 8000.95, Individual Designee Management Policy, incorporates new FAA policy to address transition from the Designee Registration System to the Designee Management System (DMS) and aligns the Order with the DMS tool workflows. The revision updates several procedural descriptions to better match DMS workflows, including updates to automation for registering, enrolling, tracking, and recording designee training completions. The revision also changes the algorithm for the frequency of direct observation oversight intervals required of Flight Standards Service (FS) managing specialists, and updates email addresses and website links.

FOR FURTHER INFORMATION CONTACT: Mr. Scott Geddie, Policy and Oversight Integration Section, AVS–64, AVS ODA Office, Federal Aviation Administration, by telephone at 405–954–6897 or by email at Scott.Geddie@faa.gov.

SUPPLEMENTARY INFORMATION:

Background

A proposed version of FAA Order 8000.95D, Change 1 published in the **Federal Register** and was available for public comment from November 24, 2025 through January 23, 2026 (90 FR 53045, November 24, 2025). The FAA received 234 public comments. The comments were from various stakeholders, including educational institutions, industry associations, air carriers and commercial operators, and individuals. Organizations submitting comments included Aircraft Owners & Pilots Association, Angel City Flyers/Aero City Flyers, Aviation Services LLC,

Aviation Suppliers Association, Beech Training, Chickasha Wings Inc., Experimental Aircraft Association, Gulfstream Aerospace Corporation, Magnolia Aviation, Minnesota Pilots Association, National Association of Flight Instructors, National Flight Training Alliance, Palouse Pilot Training LLC, Society of Aviation & Flight Educators Inc., SoCo Flight Ops, T/Two Inc., Texas Turbine Conversions Inc., The Boeing Company, Three Rivers Aero, United Airlines, Utah State University, and Vapor Global Aviation LLC. Though FAA submitted a proposed version of FAA Order 8000.95D, Change 1, for public comment, the agency subsequently determined that the number and scope of changes required a comprehensive revision of the Order.

The proposed changes to FAA Order 8000.95D attracted a significant number of public comments. The comments addressed multiple key topics, including requirements for designee qualifications, examiner fee policies, oversight procedures, and the operational realities of flight training and certification. FAA has considered each comment and provides the following summary and responses in accordance with the rulemaking process.

Supportive Comments. While most comments included suggestions or critiques, stakeholders such as Aircraft Owners & Pilots Association and National Association of Flight Instructors expressed support for the FAA's general intent to update, clarify, and improve designee management policy, even as they recommended focused revisions or voiced concerns regarding specific proposed changes.

Five-Hour Pilot-in-Command (PIC) Make and Model Requirement for Designated Pilot Examiners (DPE). Multiple commenters, including flight instructor and examiner associations, flight schools, and individual DPEs, expressed concern regarding the proposed requirement that DPEs log at least five hours of PIC flight time in each make and model prior to administering practical tests in Airplane Single Engine Land (ASEL) or Airplane Single Engine Sea (ASES). Examiner associations that commented include Aircraft Owners & Pilots Association, Experimental Aircraft Association, Minnesota Pilots Association, National Association of Flight Instructors, National Flight Training Alliance, Utah State University. Flight schools that commented include Angel City Flyers/Aero City Flyers, Beech Training, Chickasha Wings Inc, Magnolia Aviation, Palouse Pilot Training, LLC, SoCo Flight Ops, Three Rivers Aero, and

Vapor Global Aviation. Commenters stated the requirement is operationally burdensome, would further constrain examiner availability, and exacerbate checkride delays, particularly for experimental and less common aircraft types. Some commenters pointed out existing regulatory framework already ensures examiner proficiency through category and class experience requirements, recent flight experience, and FAA oversight. Commenters reasoned that no safety data was presented to justify the necessity of a five-hour make and model requirement, and such a threshold is not a standard measure of proficiency elsewhere in FAA policy.

FAA partially accepted these recommendations. The final language has been revised as follows: prior to administering a practical test in a single-engine airplane that is turbine-powered or having Simplified Flight Controls, the designee must have logged at least five hours of PIC flight time in that single-engine make and model. This make-and-model requirement thus applies only to these higher-complexity aircraft. Broader make-and-model requirements for all single-engine airplanes were not adopted.

Fee Collection and “Reasonable Fee” Definition. Stakeholders, including Aircraft Owners & Pilots Association and National Association of Flight Instructors, commented on proposed fee collection provisions, expressing concern over the prohibition on collecting any fee prior to determination of applicant eligibility, which could leave examiners uncompensated for preparation or travel should the applicant be found ineligible. In addition, they commented that the lack of a clear definition for “reasonable fee,” could lead to inconsistent application, complaints, and possible examiner termination for subjective determinations of unreasonableness.

FAA partially accepted these concerns. The restriction on collecting fees prior to eligibility determination is removed from FAA Order 8000.95E.¹ The policy regarding fee collection is addressed in FAA Order 8900.1, Flight Standards Information Management System, Volume 5, Chapter 2, Section 1, paragraph 5–222, which remains in effect. Regarding the definition of “reasonable fee,” FAA has determined that providing a specific definition is outside the scope of this policy revision.

¹ The original language regarding fee collection can be found in draft FAA Order 8000.95D, Change 1, Volume 3, Chapter 5, paragraph f.(8).

FAA acknowledges this as an area for future consideration and discussion.

Limitation on Initial Certified Flight Instructor (CFI) Practical Tests Per Day. Several commenters objected to limits restricting examiners to accepting only one initial CFI application per day, to include retests or continuations of previously discontinued or unsuccessful exams. Commenters contended retests and continuations often require less time and effort than standard initial CFI exams. Also, the commenters stated that the limitation would further reduce examiner availability and increase certification delays.

FAA accepts the recommendation to limit only complete initial CFI practical tests to one per day. FAA removed the restriction on conducting retests or continuations on the same day as a full exam.

Authority and Oversight of Ministerial Functions. Aviation Suppliers Association commented that FAA should streamline oversight by allowing automatic pre-approval for ministerial designee functions such as the issuance of FAA Form 8130-3, Authorized Release Certificate, Airworthiness Approval Tag. The commenter stated that these functions posed a lower risk and required less oversight.

FAA rejected this proposal. The policy intentionally provides Managing Specialists (MS) discretion to evaluate designees and individual situations based on risk. This risk-based approach supports safety and compliance, and remains unchanged.

Elimination of the Designee System. A single commenter advocated for the elimination of designated representatives for flight testing, arguing this function should be inherently governmental.

FAA rejected this proposal. Designated Engineering Representatives (DERs) and other designees are a critical component of the FAA's certification system, enabling efficiency and maintaining high safety standards. There are no plans to discontinue the use of DERs or other designees.

Editorial changes. The FAA evaluated and incorporated multiple suggestions where commenters requested editorial changes and corrections, such as typographical errors and inaccurate references to other paragraphs, regulations, and other FAA policy.

This Order is available to the public at http://www.faa.gov/regulations_policies/orders_notices, on the Dynamic

Regulatory System website at <https://drs.faa.gov>, and in the docket.

Scott A. Geddie,

Manager, AVS-64, Policy and Oversight Integration Section, AVS ODA Office.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Notice of Final Federal Agency Actions on Proposed Highway in Georgia

AGENCY: Federal Highway Administration (FHWA), Department of Transportation (DOT).

ACTION: Notice of limitation on claims for judicial review of actions by FHWA.

SUMMARY: This notice announces actions taken by FHWA that are final. The actions relate to a proposed highway project, Interstate 75 (I-75), from I-475 to State Route (SR) 155 in Butts, Henry, Lamar, Monroe, and Spalding Counties in Georgia, and includes auxiliary lanes from SR 155 up to the I-75/SR 20 interchange in Butts, Henry, Lamar, Monroe, and Spalding Counties, Georgia, for a total project length of approximately 41 miles. Those actions grant licenses, permits, and approvals for the project. The FHWA's Finding of No Significant Impact (FONSI) provides details on the Selected Alternative for the proposed improvements.

DATES: By this notice, FHWA is advising the public of the final agency actions subject to 23 U.S.C. 139(j)(1). A claim seeking judicial review of the Federal agency actions on the listed highway project will be barred unless the claim is filed on or before February 16, 2027. If the Federal law that authorizes judicial review of a claim provides a time period of less than 150 days for filing such claim, then that shorter time period still applies.

FOR FURTHER INFORMATION CONTACT: For FHWA: Ms. Sabrina David, Division Administrator, FHWA, Georgia Division Office; 75 Ted Turner Drive, Suite 1000, Atlanta, Georgia 30303; (404) 562-3630; Sabrina.David@dot.gov. The FHWA Georgia Division's normal business hours are 7:30 a.m. to 4:00 p.m. (eastern time) Monday through Friday. For the Georgia Department of Transportation (GDOT): Mr. Russell McMurry, Commissioner, GDOT; 600 West Peachtree Street, 22nd Floor, Atlanta, Georgia 30308; (404) 631-1990; RMcMurry@dot.ga.gov. The GDOT normal business hours are 8:00 a.m. to 5:00 p.m. (eastern time) Monday through Friday.

SUPPLEMENTARY INFORMATION: Notice is hereby given that FHWA has taken final agency actions subject to 23 U.S.C. 139(j)(1) by issuing licenses, permits, and approvals for the following highway project in the State of Georgia: I-75 Commercial Vehicle Lanes Project, Project Identification Number 0014203. GDOT is proposing improvements to approximately 41 miles of I-75 between I-475 and SR 155 in Butts, Henry, Lamar, Monroe, and Spalding Counties, Georgia. The project will construct two barrier-separated northbound CVLs beginning at the I-75/I-475 interchange in Monroe County and extend northward on the east side of the I-75 northbound corridor for approximately 38 miles, which then transitions to a single auxiliary lane for an additional two miles up to the I-75/SR 155 interchange. A single auxiliary lane will also be added to the I-75 general purpose lanes to accommodate merging trucks beginning at SR 155 and extending up to the I-75/SR 20 interchange. The purpose of the proposed project is to improve travel time reliability, reduce the above average crash rate, and improve freight movement on the I-75 northbound corridor.

The FHWA's actions and the laws under which such actions were taken, are described in the Environmental Assessment (EA) for the project, approved on March 31, 2026, and the FONSI issued on September 15, 2026, and in other documents in the project file. The EA, FONSI, and other project records are available by contacting FHWA or GDOT at the addresses provided above. The EA and FONSI can be viewed and downloaded from the project website at: <https://0014203-gdot.hub.arcgis.com/>.

This notice applies to all Federal agency decisions that are final as of the issuance date of this notice and all laws under which such actions were taken, including but not limited to:

1. *General:* National Environmental Policy Act (NEPA) [42 U.S.C. 4321 *et seq.*]; Federal-Aid Highway Act (FAHA) [23 U.S.C. 109, 139, and 128].
2. *Air:* Clean Air Act (CAA) [42 U.S.C. 7401-7671(q)].
3. *Noise:* Noise Control Act of 1972 [42 U.S.C. 4901-4918]; 23 CFR part 772.
4. *Land:* Section 4(f) of the Department of Transportation Act of 1966 [49 U.S.C. 303 and 23 U.S.C. 138].
5. *Wildlife:* Endangered Species Act (ESA) [16 U.S.C. 1531-1544 and Section 1536]; Fish and Wildlife Coordination Act [16 U.S.C. 661-667(d)]; Migratory Bird Treaty Act (MBTA) [16 U.S.C. 703-712].

6. *Historic and Cultural Resources*: Section 106 of the National Historic Preservation Act of 1966, as amended [54 U.S.C. 306108 *et seq.*]; Archeological Resources Protection Act of 1979 (ARPA) [16 U.S.C. 470(aa)–470(mm)]; Archaeological and Historic Preservation Act [54 U.S.C. 312501–312508]; Native American Grave Protection and Repatriation Act (NAGPRA) [25 U.S.C. 3001–3013].

7. *Social and Economic*: American Indian Religious Freedom Act [42 U.S.C. 1996]; Farmland Protection Policy Act (FPPA) [7 U.S.C. 4201–4209].

8. *Wetlands and Water Resources*: Clean Water Act (Section 404, Section 401, Section 319) [33 U.S.C. 1251–1387]; Coastal Zone Management Act of 1972 (CZMA) [16 U.S.C. 1451–1466]; Land and Water Conservation Fund (LWCF) [16 U.S.C. 4601–4604]; Safe Drinking Water Act (SDWA) [42 U.S.C. 300(f)—300(j)–26]; Wild and Scenic Rivers Act [16 U.S.C. 1271–1287]; Flood Disaster Protection Act [42 U.S.C. 4012(a), 4106]; Rivers and Harbors Act of 1899 [33 U.S.C. 401–406]; Emergency Wetlands Resources Act [16 U.S.C. 3901, 3921]; Wetlands Mitigation [23 U.S.C. 119(g) and 133(b)(14)].

9. *Hazardous Materials*: Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA) [42 U.S.C. 9601 *et seq.*]; Resource Conservation and Recovery Act (RCRA) [42 U.S.C. 6901–6992(k)].

10. *Executive Orders*: E.O. 11990 Protection of Wetlands; E.O. 11988 Floodplain Management; E.O. 11593 Protection and Enhancement of the Cultural Environment; E.O. 13007 Indian Sacred Sites; E.O. 13287 Preserve America; E.O. 13175 Consultation and Coordination with Indian Tribal Governments; E.O. 13112 Invasive Species, as amended by E.O. 13751. (Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Authority: 23 U.S.C. 139(l)(1).

Sabrina S. David,

Division Administrator, Georgia Division, Federal Highway Administration.

BILLING CODE 4910-RY-P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Notice of Final Federal Agency Actions on Proposed Highway in Georgia

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of limitation on claims for judicial review of actions by FHWA.

SUMMARY: This notice announces actions taken by FHWA that are final. The actions relate to a proposed roadway project, the Lee Road Extension—Phase 1, from State Route (SR) 92 to County Road (CR) 141/Bomar Road in Douglas County, Georgia, and includes widening, intersection reconstruction, and new location project on Bomar Road at Pope Road to the State Route (SR) 92 at Lee Road intersection in Douglas County, Georgia, for approximately 1.7 miles. Those actions grant licenses, permits, and approvals for the project. The FHWA's Finding of No Significant Impact (FONSI) provides details on the Selected Alternative for the proposed improvements.

DATES: By this notice, FHWA is advising the public of final agency actions subject to 23 U.S.C. 139(l)(1). A claim seeking judicial review of the Federal agency actions on the listed roadway project will be barred unless the claim is filed on or before February 16, 2027. If the Federal law that authorizes judicial review of a claim provides a time period of less than 150 days for filing such claim, then that shorter time period still applies.

FOR FURTHER INFORMATION CONTACT: *For FHWA:* Ms. Sabrina S. David, Division Administrator; FHWA, Georgia Division; 75 Ted Turner Drive, Suite 1000, Atlanta, Georgia 30303; 404–562–3630; email: Sabrina.David@dot.gov. The FHWA Georgia Division's normal business hours are 7:30 a.m. to 4:00 p.m. (Eastern time) Monday through Friday. *For the Georgia Department of Transportation (GDOT):* Mr. Russell McMurtry, Commissioner, GDOT; 600 West Peachtree Street, 22nd Floor, Atlanta, Georgia 30308; (404) 631–1990; RMcMurtry@dot.ga.gov. The GDOT normal business hours are 8:00 a.m. to 5:00 p.m. (Eastern time) Monday through Friday.

SUPPLEMENTARY INFORMATION: Notice is hereby given that FHWA has taken final agency actions by issuing a FONSI for the following roadway project in the State of Georgia: The Lee Road Extension from SR 92 to CR 141/Bomar Road—Phase I in Douglas County, Georgia—Project Identification (PI) Number 0019889. The project will

reconstruct the Bomar Road at Pope Road intersection into a multi-lane roundabout. Additionally, Bomar Road will be widened to the north of the Pope Road intersection approximately 1,550 feet. From this point along Bomar Road, the project will continue on new location for 1.13 miles to the spur south of the SR 92 at Lee Road intersection. The purpose of the proposed project is to improve connectivity and access within the central portion of Douglas County, providing an important county-wide east-west connector with greater access to I–20.

The FHWA's actions and the laws under which such actions were taken, are described in the Environmental Assessment (EA) for the project, approved on April 30, 2026, the FONSI approved on August 17, 2026, and other documents in the project file. The EA and FONSI are available by contacting FHWA or GDOT at the addresses provided above. In addition, these documents can also be viewed and downloaded from the project website at <https://douglascountygga.gov/894/0019889-Lee-Road-Extension-from-SR-92-to>.

This notice applies to all Federal agency decisions as of the issuance date of this notice and all laws under which such actions were taken, including but not limited to:

1. *General*: National Environmental Policy Act (NEPA) [42 U.S.C. 4321 *et seq.*]; Federal-Aid Highway Act [23 U.S.C. 109, 128, and 139].

2. *Air*: Clean Air Act [42 U.S.C. 7401–7671(q)].

3. *Noise*: Federal-Aid Highway Act of 1970 [Public Law 91–605 [84 Stat. 1713]; 23 U.S.C. 109(h) and (i)].

4. *Land*: Section 4(f) of the Department of Transportation Act of 1966 [23 U.S.C. 138 and 49 U.S.C. 303].

5. *Wildlife*: Endangered Species Act (ESA) [16 U.S.C. 1531–1544 and Section 1536]; Fish and Wildlife Coordination Act [16 U.S.C. 661–667(d)]; Migratory Bird Treaty Act [16 U.S.C. 703–712].

6. *Historic and Cultural Resources*: Section 106 of the National Historic Preservation Act of 1966, as amended [54 U.S.C. 306108 *et seq.*]; Archeological Resources Protection Act of 1977 [16 U.S.C. 470(aa)–470(mm)]; Archeological and Historic Preservation Act [54 U.S.C. 312501–3125–8]; Native American Grave Protection and Repatriation Act (NAGPRA) [25 U.S.C. 3001–3013].

7. *Social and Economic*: American Indian Religious Freedom Act [42 U.S.C. 1996]; Farmland Protection Policy Act (FPPA) [7 U.S.C. 4201–4209].

8. *Wetlands and Water Resources*: Clean Water Act (Section 319, Section 401, Section 404) [33 U.S.C. 1251–

1387]; Safe Drinking Water Act [42 U.S.C. 300f–300j–26]; TEA–21 Wetlands Mitigation [23 U.S.C. 103(b)(6)(m), 133(b)(11)]; Flood Disaster Protection Act [42 U.S.C. 4001–4128]; Wild and Scenic Rivers Act [16 U.S.C. 1271–1287]; Emergency Wetlands Resources Act [16 U.S.C. 3921, 3931]; Rivers and Harbors Act of 1899 [33 U.S.C. 401–406].

9. *Hazardous Materials: Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)*, as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA) [42 U.S.C. 9601 *et seq.*]; Resource Conservation and Recovery Act (RCRA) [42 U.S.C. 6901–6992(k)].

10. *Executive Orders*: E.O. 11990 Protection of Wetlands; E.O. 11988 Floodplain Management; E.O. 11593 Protection and Enhancement of Cultural Resources; E.O. 13007 Indian Sacred Sites; E.O. 13287 Preserve America; E.O. 13175 Consultation and Coordination with Indian Tribal Governments; E.O. 11514 Protection and Enhancement of Environmental Quality; E.O. 13112 Invasive Species.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Authority: 23 U.S.C. 139(l)(1).

Sabrina S. David,

Division Administrator, Georgia Division, Federal Highway Administration.

BILLING CODE 4910-RY-P

DEPARTMENT OF THE TREASURY

Commission on Social Impact Partnerships; Public Meeting

AGENCY: Departmental Offices, Department of the Treasury.

ACTION: Notice of meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act, this notice announces an upcoming meeting of the Commission on Social Impact Partnerships (“Commission”).

DATES: The meeting will be held on Tuesday, September 22, 2026, from 1:00 p.m.–6:00 p.m. Eastern Time.

ADDRESSES: The meeting will be held at the U.S. Department of the Treasury, 1500 Pennsylvania Avenue NW, Washington, DC 20020. The meeting will be open to the public, and the site is accessible to individuals with disabilities.

Because the meeting will be held in a secured facility, members of the public who would like to attend the meeting must register by September 18, 2026, using the following registration link: <https://events.treasury.gov/s/event-template/a2mSJ000000QmvRYAS>. When registering for the public meeting, you will be asked to provide your name, title, and organizational affiliation. Use of ID.me is required to register for the meeting.

The meeting will also be livestreamed via Treasury’s webcast: <https://events.treasury.gov/s/event-template/a2mSJ000000QmvRYAS> for those who are unable to attend in person. The webcast is for viewing only; participants will not be able to ask questions. The meeting will not be recorded, but meeting minutes will be posted on the SIPRA website: <https://home.treasury.gov/services/social-impact-partnerships/sippra-pay-for-results>.

FOR FURTHER INFORMATION CONTACT: Matthew Cook, Designated Federal Officer, by emailing SIPRA@treasury.gov (preferred) or calling (202)–821–5030 (not a toll-free number).

SUPPLEMENTARY INFORMATION: On February 9, 2018, the President signed the Bipartisan Budget Act of 2018, establishing the Commission under the Social Impact Partnerships to Pay for Results Act (“SIPRA”). The Commission’s duties include making recommendations to Treasury on whether to fund social impact partnership grant applications. The Commission consists of nine members. Eight members are appointed by congressional leadership, and the ninth member is appointed by the President. The President’s appointee serves as the Chair of the Commission. Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. 1001 *et seq.*). During this meeting, the Commission will receive a briefing from Treasury staff on (1) SIPRA’s program structure; (2) update on forthcoming Notice of Funding Opportunity (NOFO); and (3) update on current SIPRA awardees.

Submission of Written Statements: Those wishing to make public comments at the public meeting should register no later than three business days before the public meeting. Written comments must be received one calendar day before the public meeting in order to be considered during the public meeting. Written comments can be emailed to SIPRA@treasury.gov.

Exceptional Circumstances: Pursuant to 41 CFR 102–3.150(b), the Department has determined that exceptional

circumstances warrant providing less than seven calendar days’ notice of this meeting in the **Federal Register**. The meeting date was announced to Committee members, program stakeholders, and the public through other channels well in advance, and Committee members and members of the public have made plans, including travel arrangements, in reliance on that schedule. Postponing the meeting at this stage would impose unnecessary costs and disruption on participants and could reduce public participation. In addition, the meeting will primarily provide the Committee and the public with an update from the Department on the status of the program; the Committee is not scheduled to deliberate or make recommendations at this meeting. Under these circumstances, the Department has determined that proceeding on the previously announced date is in the public interest.

Spencer W. Clark,

Treasury Committee Management Officer.

UNITED STATES SENTENCING COMMISSION

Sentencing Guidelines for United States Courts

AGENCY: United States Sentencing Commission.

ACTION: Notice of submission to Congress of amendment to the sentencing guidelines effective March 15, 2027.

SUMMARY: The United States Sentencing Commission hereby gives notice that the Commission has promulgated an amendment to the *Guidelines Manual*. This notice sets forth the text of the amendment and the reason for the amendment.

DATES: The Commission has specified an effective date of March 15, 2027, for the amendment set forth in this notice.

FOR FURTHER INFORMATION CONTACT: Jennifer Dukes, Senior Public Affairs Specialist, (202) 502–4597.

SUPPLEMENTARY INFORMATION: The United States Sentencing Commission is an independent agency in the judicial branch of the United States Government. The Commission promulgates sentencing guidelines and policy statements for federal courts pursuant to 28 U.S.C. 994(a). The Commission also periodically reviews and revises previously promulgated guidelines pursuant to 28 U.S.C. 994(o) and submits guideline amendments to

the Congress not later than the first day of May each year pursuant to 28 U.S.C. 994(p). Absent action of the Congress to the contrary, submitted amendments become effective by operation of law on the date specified by the Commission (generally November 1 of the year in which the amendments are submitted to Congress).

Pursuant to its authority under 28 U.S.C. 994(p) and its emergency authority under section 5017 of the Consolidated Appropriations Act, 2026 (Pub. L. 119–75), the Commission has promulgated an amendment to the *Guidelines Manual*. Notice of the proposed amendment was published in the **Federal Register** on April 24, 2026 (see 91 FR 22228). On September 14, 2026, the Commission submitted this amendment to the Congress and specified an effective date of March 15, 2027.

The text of the amendment, and the reason for the amendment, is set forth below. Additional information pertaining to the amendment described in this notice may be accessed through the Commission's website at www.ussc.gov.

Authority: 28 U.S.C. 994(a), (o), (p), and (u); Section 5017 of the Consolidated Appropriations Act, 2026 (Public Law 119–75); USSC Rules of Practice and Procedure 2.2 and 4.1.

Carlton W. Reeves,
Chair.

Amendment to the Sentencing Guidelines, Policy Statements, and Official Commentary

1. *Amendment:* The Commentary to § 2A5.2 captioned “Statutory Provisions” is amended by striking “49 U.S.C. 46308, 46503, 46504 (formerly 49 U.S.C. 1472(c), (j))” and inserting “49 U.S.C. 46307, 46308, 46503, 46504 (formerly 49 U.S.C. 1472(c), (j))”.

The Commentary to § 2X5.2 captioned “Statutory Provisions” is amended by striking “49 U.S.C. 31310” and inserting “49 U.S.C. 31310, 46307”.

Chapter Three, Part B, is amended by inserting at the end the following new guideline:

“§ 3B1.6. Use of Unmanned Aircraft

(a) (Apply the greater):

(1) If (A) the defendant is convicted of an offense to which the statutory enhancement under 6 U.S.C. 124n–1(c) applies; or (B) the parties stipulate (i) to such an offense for purposes of calculating the guideline range under § 1B1.2 (Applicable Guidelines); or (ii) that the adjustment in this subsection applies, increase by 6 levels.

(2) If the offense otherwise involved the use of an unmanned aircraft, increase by 4 levels.

(b) For purposes of this guideline:

(1) ‘Unmanned aircraft’ has the meaning given that term in 49 U.S.C. 44801.

(2) ‘Use’ does not include mere possession.

(c) Special Instruction

(1) If the use of an unmanned aircraft that forms the basis for an adjustment under this guideline is the only conduct that forms the basis for an enhancement in Chapter Two or another adjustment in Chapter Three, apply the provision that results in the greater offense level.

Commentary

Background: This guideline implements the directive in the SAFER SKIES Act (section 8605(e) of the National Defense Authorization Act for Fiscal Year 2026, Pub. L. 119–60).’.

Appendix A (Statutory Index) is amended by inserting before the line referenced to 49 U.S.C. 46308 the following new line reference:

“49 U.S.C. 46307 2A5.2 (for felony offenses), 2X5.2 (for misdemeanor offenses)”.

Reason for Amendment: This amendment responds to the SAFER SKIES Act (title LXXXVI of the National Defense Authorization Act for Fiscal Year 2026, Pub. L. 119–60) (the “Act”), which contains several provisions relating to criminal penalties for offenses involving aircraft and sets forth a congressional directive to the Commission for offenses involving unmanned aircraft. See Public Law 119–60, 8605 (2025). Emergency amendment authority requires the Commission to promulgate an amendment implementing the directive “as soon as possible” and “not later than December 31, 2026.” Consolidated Appropriations Act, 2026, Public Law 119–75, 5017(a).

Increased Statutory Penalties for Offenses Associated With Unmanned Aircraft and Related Directive to the Commission

The Act amended the statutory penalties for providing contraband to imprisoned individuals, in violation of 18 U.S.C. 1791. Section 1791 sets out statutory maximum terms of imprisonment ranging from six months to twenty years depending on the type of contraband provided to the imprisoned individual. The Act increased the maximum penalty by five years “[i]f a defendant who is convicted under section 1791 . . . knowingly used an unmanned aircraft to provide a prohibited object to an inmate of a prison.” 6 U.S.C. 124n–1(d).

In addition to this specific statutory increase, the Act provided more generally that “[i]f a person who is convicted of a felony offense (other than an offense based solely on the operation of an unmanned aircraft) knowingly operated an unmanned aircraft during, in relation to, or in furtherance of such offense,” the maximum penalty for that offense is doubled or increased by five years, whichever is less. *Id.* § 124n–1(c).

Related to these changes, the Act directed the Commission to “promulgate guidelines, or amendments to guidelines, that substantially increase the sentencing range for all offenses involving the use of an unmanned aircraft.” *Id.* § 124n–1(e)(1)(A). Specifically, for offenses in which the enhanced penalties under 6 U.S.C. 124n–1(c) apply—that is, where the individual knowingly operated an unmanned aircraft during, in relation to, or in furtherance of a felony offense (other than an offense based solely on the operation of an unmanned aircraft)—the guidelines “shall call for an increase of at least 6 levels in the base offense level,” and “in all other cases, the base offense level shall be increased by at least 4 levels.” *Id.* § 124n–1(e)(2).

The amendment implements these provisions of the Act by creating a new guideline at § 3B1.6 (Use of Unmanned Aircraft) providing a tiered adjustment of either 6 or 4 levels for offenses involving the use of an unmanned aircraft. Section 3B1.6 provides a 6-level increase if the defendant is convicted of an offense to which the statutory sentencing enhancement under 6 U.S.C. 124n–1(c) applies, or if the parties stipulate to such an offense for purposes of calculating the guideline range or that the adjustment applies to the offense of conviction. Section 3B1.6 provides a 4-level increase if the offense otherwise involved the use of an unmanned aircraft.

Under the new provision, “unmanned aircraft” has the meaning given to that term in 49 U.S.C. 44801. Further, the amendment includes a provision expressly stating that “use” does not include mere possession. This definition of “use” is consistent with the definition in § 3B1.5 (Use of Body Armor in Drug Trafficking Crimes and Crimes of Violence). See USSG App. C, amend. 659 (effective Nov. 1, 2003) (implementing the directive in section 11009 of the 21st Century Department of Justice Appropriations Authorization Act, Pub. L. 107–273).

To avoid unwarranted double counting, a special instruction directs that if the use of an unmanned aircraft that forms the basis for an adjustment

under this provision is the only conduct that forms the basis for a Chapter Two enhancement or another Chapter Three adjustment, then the court should apply the provision that results in the greater offense level.

New Felony Offense for Repeated Violations of 49 U.S.C. 46307

The Act created a felony offense for repeated convictions for violating national defense airspace under 49 U.S.C. 46307. Section 46307 establishes a criminal offense when an individual knowingly and willfully violates an order issued pursuant to 49 U.S.C. 40103(b)(3) that restricts or prohibits civil aircraft in certain navigable airspace “in the interest of national defense.” An offense under section 46307 constitutes a Class A misdemeanor, punishable by up to one year in prison. The Act added a maximum five-year penalty for a person convicted of a second or subsequent offense under section 46307. In response to this new statutory provision, the amendment revises Appendix A to reference 49 U.S.C. 46307 to § 2A5.2 (Interference with Flight Crew Member or Flight Attendant; Interference with Dispatch, Navigation, Operation, or Maintenance of Mass Transportation Vehicle; Unsafe Operation of Unmanned Aircraft) for felony offenses and § 2X5.2 (Class A Misdemeanors (Not Covered by Another Specific Offense Guideline)) for misdemeanor offenses.

UNITED STATES SENTENCING COMMISSION

Request for Applications; Victims’ Rights Advisory Group

AGENCY: United States Sentencing Commission.

ACTION: Notice.

SUMMARY: In view of an upcoming vacancy in the membership of the Victims’ Rights Advisory Group, the United States Sentencing Commission hereby invites any individual who has knowledge, expertise, or experience in federal crime victimization to apply to be appointed to the advisory group. An applicant for membership of the Victims’ Rights Advisory Group should apply by sending a letter of interest and resume to the Commission as indicated in the **ADDRESSES** section below.

DATES: Application materials for membership in the Victims’ Rights

Advisory Group should be received not later than November 16, 2026.

ADDRESSES: An applicant for membership of the Victims’ Rights Advisory Group should apply by sending a letter of interest and resume to the Commission by electronic mail or regular mail. The email address is pubaffairs@ussc.gov. The regular mail address is United States Sentencing Commission, One Columbus Circle NE, Suite 2–500, South Lobby, Washington, DC 20002–8002, Attention: Public Affairs—VRAG Membership.

FOR FURTHER INFORMATION CONTACT: Jennifer Dukes, Senior Public Affairs Specialist, (202) 502–4597. More information about the Victims’ Rights Advisory Group is available on the Commission’s website at www.ussc.gov/advisory-groups.

SUPPLEMENTARY INFORMATION: The United States Sentencing Commission is an independent agency in the judicial branch of the United States Government. The Commission promulgates sentencing guidelines and policy statements for federal courts pursuant to 28 U.S.C. 994(a). The Commission also periodically reviews and revises previously promulgated guidelines pursuant to 28 U.S.C. 994(o) and submits guideline amendments to the Congress not later than the first day of May each year pursuant to 28 U.S.C. 994(p).

The Victims’ Rights Advisory Group is a standing advisory group of the United States Sentencing Commission established pursuant to 28 U.S.C. 995 and Rule 5.4 of the Commission’s Rules of Practice and Procedure. Under the charter for the Victims’ Rights Advisory Group, the purpose of the advisory group is (1) to assist the Commission in carrying out its statutory responsibilities under 28 U.S.C. 994(o); (2) to provide to the Commission its views on the Commission’s activities and work, including proposed priorities and amendments, as they relate to victims of crime; (3) to disseminate information regarding sentencing issues to organizations represented by the Victims’ Rights Advisory Group and to other victims of crime and victims advocacy groups, as appropriate; and (4) to perform any other functions related to victims of crime as the Commission requests. The advisory group consists of not more than nine members, each of whom may serve not more than two consecutive three-year terms. Each member is appointed by the Commission.

In view of an upcoming vacancy in the membership of the Victims’ Rights Advisory Group, the Commission

invites any individual who has knowledge, expertise, or experience in federal crime victimization to apply to be appointed to the Victims’ Rights Advisory Group by sending a letter of interest and a resume to the Commission as indicated in the **ADDRESSES** section above.

Authority: 28 U.S.C. 994(a), (o), (p), 995; USSC Rules of Practice and Procedure 2.2(c), 5.4.

DEPARTMENT OF VETERANS AFFAIRS

Research Advisory Committee on Gulf War Veterans’ Illnesses, Subcommittee on Veteran Engagement, Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, 5 U.S.C. Ch. 10, that the Research Advisory Committee on Gulf War Veterans’ Illnesses Subcommittee on Veteran Engagement will hold a Veteran Engagement Session (VES) on October 23, 2026 at the Fairmont Washington, DC, Georgetown, 2401 M Street NW, Washington, DC, 20037 in the Longmont room. The formal VES will begin at 1:00 p.m. and end at 4:00 p.m. (ET) followed by informal conversations with interested Gulf War Veterans until 8:00 p.m. (ET). This session will be open to the public.

The purpose of the Veteran Engagement subcommittee is to hear directly from Gulf War Veterans about past and current health and quality of life issues to better understand the Veteran’s experience of living with Gulf War Illness. It is also an opportunity to share the importance of participating in research and the role of VA research in informing Veteran healthcare and policy. Information obtained from the session will be carried to the parent committee to support the RACGWVI mission to provide advice and make recommendations to the Secretary of Veterans Affairs on proposed research studies, research plans, and research strategies relating to the health consequences of military service in the Southwest Asia theater of operations during the 1990–91 Gulf War.

Individuals wishing to seek additional Block, Designated Federal Officer, at
information should contact Dr. Karen *Karen.Block@va.gov*.

Dated: September 16, 2026.

LaTonya L. Small,
*Federal Advisory Committee Management
Officer.*

Vol. 91

Friday,

No. 180

September 18, 2026

Part II

Department of Justice

Antitrust Division

United States of America, et al. v. RealPage, Inc., et al.; Proposed Final Judgment and Competitive Impact Statement; Notice

DEPARTMENT OF JUSTICE

Antitrust Division

United States of America, et al. v. RealPage, Inc., et al.; Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h), that a proposed Final Judgment, Stipulation, and Competitive Impact Statement have been filed with the United States District Court for the Middle District of North Carolina in *United States of America, et al. v. RealPage, Inc., et al.*, Civil Action No. 1:24-cv-00710. On January 7, 2025, the United States filed a Complaint alleging that Pinnacle Property Management Services, LLC's agreements with RealPage, Inc. and other landlords to share information and align pricing violate Section 1 of the Sherman Act, 15 U.S.C. 1. The proposed Final Judgment, filed on September 4, 2026, bars Pinnacle from licensing or using a revenue management software that relies on competitively sensitive data and prohibits Pinnacle from sharing competitively sensitive information with other landlords. Pinnacle must also establish an antitrust compliance policy and cooperate with the United States in this litigation.

Copies of the Complaint, proposed Final Judgment, and Competitive Impact Statement are available for inspection on the Antitrust Division's website at <http://www.justice.gov/atr> and at the Office of the Clerk of the United States District Court for the Middle District of North Carolina. Copies of these materials may be obtained from the Antitrust Division upon request and payment of the copying fee set by Department of Justice regulations.

Public comment is invited within 60 days of the date of this notice. Such comments, including the name of the submitter, and responses thereto, will be posted on the Antitrust Division's website, filed with the Court, and, under certain circumstances, published in the **Federal Register**. Comments should be submitted in English and directed to Danielle Hauck, Acting Chief, Technology and Digital Platforms Section, Antitrust Division, Department of Justice, 450 Fifth Street NW, Suite 7100, Washington, DC 20530 (email address: ATR.Public-Comments-Tunney-Act-MB@usdoj.gov).

Suzanne Morris,

Deputy Director Civil Enforcement Operations,

Antitrust Division.

AMENDED COMPLAINT

Case No. 1:24-cv-00710-LCB-JLW

JURY TRIAL DEMANDED

Table of Contents

I. Introduction

II. RealPage's Revenue Management Software Is Fueled by Nonpublic, Competitively Sensitive Information Shared By Landlords

A. Landlords Agree To Share Nonpublic, Competitively Sensitive Transactional Data With RealPage for Use in Generating Competitors' Pricing Recommendations

B. AIRM and YieldStar Users Agree With RealPage To Use the Software To Align Pricing

C. RealPage's Transactional Data Is Fundamentally Different From Other Data Available to Landlords

D. RealPage Revenue Management Software Uses Nonpublic, Competitively Sensitive Data To Recommend Prices

1. AIRM and YieldStar Leverage Competitively Sensitive Data To Generate Price Recommendations

(a) AIRM Model Training Relies on Competitively Sensitive Data To Generate Learned Parameters.

(b) AIRM and Yieldstar Incorporate Competitors' Nonpublic Data To Generate Floor Plan Price Recommendations.

(c) AIRM and Yieldstar Use Competitors' Nonpublic Data—including Data On Future Occupancy—to Determine Unit-Level Prices.

2. LRO Relies Primarily on Landlords To Input Data on Competitors

E. RealPage Uses Multiple Mechanisms To Increase Compliance With Price Recommendations

1. AIRM and YieldStar Make it Easy To Accept Recommendations and More Difficult and Time-Consuming To Decline

2. RealPage Pushes Clients To Adopt Auto-Accept Settings That Automatically Approve Recommendations

3. RealPage Pricing Advisors Provide a "Check and Balance" on Property Managers To Increase Acceptance of Recommendations

4. Pricing Recommendations Heavily Influence Landlords' Behavior

III. Coordination Among Competing Landlords Is a Feature of This Industry

A. Rental Housing Is a Necessity for Millions of Americans

B. The Multifamily Property Industry Is Rife With Cooperation Among Ostensible Competitors

1. At the Local Level, the Multifamily Property Industry Comprises a Small Number of Large Landlords Managing Buildings With Different Owners

2. Landlords Regularly Discuss Competitively Sensitive Topics With Their Competitors and Swap Information

3. At RealPage User Group Meetings, Landlords Discuss Competitively Sensitive Topics

C. RealPage Uses Nonpublic Information To Allow Landlords To More Easily Compare Units on an Apples-to-Apples Basis

IV. RealPage Harms the Competitive Process and Renters By Entering Into Unlawful Agreements With Landlords To Share and Exploit Competitively Sensitive Data

A. AIRM and YieldStar Have the Purpose and Effect of Distorting the Competitive Pricing of Apartments

B. AIRM and YieldStar Impose Multiple Guardrails Intended to Artificially Keep Prices High or Minimize Price Decreases

C. AIRM and YieldStar Harm the Competitive Process by Discouraging the Use of Discounts and Price Negotiations

D. AIRM and YieldStar Increase and Maintain Landlords' Pricing Power by Using Competitors' Data To Manage Lease Expirations

E. No Procompetitive Benefit Justifies, Much Less Outweighs, RealPage's Use of Competitively Sensitive Data To Align Competing Landlords

V. RealPage Uses Landlords' Competitively Sensitive Data To Maintain Its Monopoly And Exclude Commercial Revenue Management Software Competitors

A. Landlords Are Drawn to RealPage Because of Access to Nonpublic Transactional Data That Is Used To Increase Landlords' Revenue

B. RealPage's Collection and Use of Competitively Sensitive Data Excludes Competition in Commercial Revenue Management Software

VI. Relevant Markets

A. Conventional Multifamily Rental Housing Markets

1. Product Markets

- (a) Conventional Multifamily Rentals Are Distinct From Other Types of Multifamily Housing
- (b) Single-Family Housing Is Not a Reasonable Substitute to Multifamily Rentals
- (c) Conventional Multifamily Rental Units With Different Bedroom Counts Are Relevant Product Markets
- 2. Geographic Markets
 - (a) RealPage-Defined Submarkets Identify Relevant Geographic Markets
 - (b) Core-Based Statistical Areas (CBSAs) Are Relevant Geographic Markets
- B. Commercial Revenue Management Software Market
 - 1. Product Market
 - 2. Geographic Market
- VII. Jurisdiction, Venue, and Commerce
- VIII. Violations Alleged
- IX. Request for Relief
- X. Demand for a Jury Trial
 - Appendix A: Submarkets
 - Appendix B: Submarkets By Bedroom Count

I. Introduction

1. Renters are entitled to the benefits of vigorous competition among landlords. In prosperous times, that competition should limit rent hikes; in harder times, competition should bring down rent, making housing more affordable. RealPage has built a business out of frustrating the natural forces of competition. In its own words, “a rising tide raises all ships.” This is more than a marketing mantra. RealPage sells software to landlords that collects nonpublic information from competing landlords and uses that combined information to make pricing recommendations. In its own words, RealPage “*helps curb [landlords’] instincts to respond to down-market conditions by either dramatically lowering price or by holding price when they are losing velocity and/or occupancy. . . . Our tool [] ensures that [landlords] are driving every possible opportunity to increase price even in the most downward trending or unexpected conditions*” (emphases added).

2. In fact, as RealPage’s Vice President of Revenue Management Advisory Services described, “*there is greater good in everybody succeeding versus essentially trying to compete against one another in a way that actually keeps the entire industry down*” (emphasis added). As he put it, if enough landlords used RealPage’s software, they would “*likely move in unison versus against each other*” (emphasis added). To RealPage, the “greater good” is served by ensuring that otherwise competing landlords rob Americans of the fruits of competition—lower rental prices, better leasing terms, more concessions. At the same time, the landlords enjoy the

benefits of coordinated pricing among competitors.

3. RealPage replaces competition with coordination. It substitutes unity for rivalry. It subverts competition and the competitive process. It does so openly and directly—and American renters are left paying the price.

* * * * *

4. Americans spend more money on housing than any other expense. On average, American households allocate more than one-third of their monthly income to housing. Some purchase a home, while others choose to, or must, rent. A family’s selection of an apartment reflects a complex set of values and criteria including comfort, safety, access to schools, convenience, and critically, affordability. To ensure they secure the greatest value for their needs, renters rely on robust and fierce competition between landlords.

5. RealPage distorts that competition. Across America, RealPage sells landlords commercial revenue management software. RealPage develops, markets, and sells this software to enable landlords to sidestep vigorous competition to win renters’ business. Many of the largest landlords in the United States, including Greystar, Camden, Cortland, Cushman & Wakefield and Pinnacle, LivCor, and Willow Bridge (collectively, Defendant Landlords), which would otherwise be competing with each other, submit or have submitted on a daily basis their competitively sensitive information to RealPage.¹ This nonpublic, material, and granular rental data includes, among other information, a landlord’s rental prices from executed leases, lease terms, and future occupancy. RealPage collects a broad swath of such data from competing landlords, combines it, and feeds it to an algorithm.

6. Based on this process and algorithm, RealPage provides daily, near real-time pricing “recommendations” back to competing landlords. These recommendations are based on the sensitive information of their rivals. But these are more than just “recommendations.” Because, in its own words, a “rising tide raises all ships,” RealPage monitors compliance by landlords to its recommendations. RealPage also reviews and weighs in on landlords’ other policies, including trying to—and often succeeding in—ending renter-friendly concessions (like a free month’s rent or waived fees) to

¹ As used in this Complaint, the term “landlord” refers to a variety of entities that are responsible for setting rents and other lease terms at multifamily properties, including owners, operators, and managers.

attract or retain renters. A significant number of landlords then effectively agree to outsource their pricing function to RealPage with auto acceptance or other settings such that RealPage as a middleman, and not the free market, determines the price that a renter will pay. Competing landlords choose to share their information with RealPage to “eliminate the guessing game” about what their competitors are doing and ultimately take instructions from RealPage on how to make business decisions to “optimize”—or in reality, maximize—rents.

7. Each landlord pays steep fees to license RealPage’s software. RealPage’s stated goals and value proposition are not a secret. Its executives are blunt: They want landlords to “avoid the race to the bottom in down markets.” Sometimes RealPage is even more direct, acknowledging that its software is aimed at “driving every possible opportunity to increase price” or observing that among landlords, “there is a greater good in everybody succeeding versus essentially trying to compete against one another in a way that actually keeps the entire industry down.”

8. But that is not how the free market works. A free market requires that landlords compete on the merits, not coordinate pricing. Landlords should win renters by offering whatever combination of price and quality they think is most attractive. For example, landlords could lower rents or provide other financial concessions, like free months of rent, or with investments in amenities like gyms, grilling areas, or pools. Put differently, the fear of losing a renter to a competitor should motivate rival landlords to compete vigorously.

9. RealPage’s revenue management software ingests on a daily basis nonpublic rental rates, future apartment availability, and changes in competitors’ rates and occupancy. As competitor-landlords increase their rents, RealPage’s software nudges other competing landlords to increase their rents as well. RealPage calls this “maximiz[ing] opportunity[.]” As RealPage explained to one landlord, by using competitors’ data, they can identify situations where “we may have a \$50 increase instead of a \$10 increase for that day.” This is what RealPage encourages as “stretch and pull pricing.”

10. RealPage allows landlords to manipulate, distort, and subvert market forces. One landlord observed that RealPage’s software “can eliminate the guessing game” for landlords’ pricing decisions. Discussing a different RealPage product, another landlord

said: “I always liked this product because your algorithm uses proprietary data from other subscribers to suggest rents and term. That’s classic price fixing” A third landlord explained, “Our very first goal we came out with immediately out of the gate is that we will not be the reason any particular sub-market takes a rate dive. So for us our strategy was to hold steady and to keep an eye on the communities around us and our competitors.”

11. RealPage’s scheme not only distorts competition to the detriment of renters, but also allows it to reinforce its dominant position in the market for commercial revenue management software. By its own account, RealPage controls at least 80 percent of that market. Its dominant position is protected by substantial data advantages due to its massive reservoir of ill-gotten competitively sensitive information from competing landlords. No other revenue management company can match RealPage’s access to landlords’ nonpublic, competitively sensitive rental data. This is why RealPage acknowledges that it “does not have any true competitors, mainly because our data is based on real lease transaction data.” RealPage’s conduct is predatory and exclusionary, which has allowed it to distort the market opportunities for honest providers of revenue management software.

12. At bottom, RealPage is an algorithmic intermediary that collects, combines, and exploits landlords’ competitively sensitive information. And in so doing, it enriches itself and compliant landlords, including Defendant Landlords, at the expense of renters who pay inflated prices and honest businesses that would otherwise compete.

13. The United States, and the States of North Carolina, California, Colorado, Connecticut, Illinois, Minnesota, Oregon, Tennessee, and Washington, and the Commonwealth of Massachusetts, acting by and through their respective Attorneys General, bring this action pursuant to Sections 1 and 2 of the Sherman Act to rid markets of (i) RealPage’s and Defendant Landlords’ unlawful information-sharing and pricing alignment schemes, and (ii) RealPage’s illegal monopoly in commercial revenue management software. In so doing, Plaintiffs seek to restore the free market to deserving individuals, families, and honest businesses.

II. Realpages’s Revenue Management Software Is Fueled by Nonpublic, Competitively Sensitive Information Shared by Landlords

14. RealPage dominates the market for commercial revenue management software that landlords use to price apartments, controlling at least 80 percent of that market, according to its own estimates. RealPage currently offers three revenue management systems to landlords: YieldStar, AI Revenue Management (AIRM), and Lease Rent Options (LRO). The company’s main legacy software, YieldStar, is the product of three acquisitions and subsequent internal development. Its successor, AIRM, uses much of the same codebase as YieldStar, but RealPage claims that AIRM’s refined models and forecasting are more precise. RealPage acquired its other revenue management software, LRO, in 2017. RealPage has made plans to sunset both YieldStar and LRO by the end of 2024.

15. Competitively sensitive data collected from competing landlords is a critical input to RealPage’s revenue management software. AIRM and YieldStar collect this data, such as rental applications, executed new leases, renewal offers and acceptances, and forward-looking occupancy, and use it to generate price recommendations for the competing landlords. This information is among the most competitively sensitive data a landlord maintains.

16. The exploitation of sensitive data from competing landlords is central to RealPage’s approach. As part of pitching its software to landlords, RealPage highlights that its pricing algorithms use their competitors’ data sourced directly from “lease transaction data.” RealPage describes this nonpublic data from competitors as one of three “building blocks of price” in AIRM and YieldStar. Landlords thus share their competitively sensitive information with RealPage with the understanding that RealPage’s software will use the data to generate recommendations for rivals (and vice versa).

A. Landlords Agree To Share Nonpublic, Competitively Sensitive Transactional Data With RealPage for Use in Generating Competitors’ Pricing Recommendations

17. RealPage amasses nonpublic, competitively sensitive data from competing landlords through use of its pricing algorithms, other rental property software, and thousands of monthly phone calls. The combined troves of nonpublic, competitively sensitive data are much more granular, sensitive,

timely, and comprehensive than alternatives—and far more detailed than any data publicly available to potential renters. RealPage then uses this data in generating competitors’ pricing recommendations.

18. *Data shared through YieldStar and AIRM.* Each AIRM and YieldStar client agrees to share detailed data with RealPage that are private, updated nightly, and granular. The data includes lease-level information on each unit’s effective rent (rent net of discounts), rent discounts, rent term, and lease status, as well as unit characteristics such as layout and amenities. It also includes the number of potential future renters who have visited a property or submitted a rental application.

19. Landlords understand that AIRM and YieldStar use their data to recommend prices not just for their own units, but also for competitors. For example, a revenue management director at Greystar testified that she understood that Greystar, and other competing landlords who used AIRM or YieldStar, agreed with RealPage to share their data, which was combined in a single data pool for use by YieldStar and AIRM. An executive at Willow Bridge noted the advantages to using YieldStar at a property if others in the property’s submarket—the small geographic area around the property—also used YieldStar because “the shared data between the models at different communities can be a benefit in getting accurate transactional data on a timely basis.”

20. Landlords agree to provide this information for use by their competitors because they understand they will be able to leverage the sensitive information of their rivals in turn. In its pitch to prospective clients, RealPage describes AIRM’s and YieldStar’s access to competitors’ granular, transactional data as a meaningful tool that it claims enables landlords to outperform their properties’ competitors by 2–7%. RealPage clients receive training that highlights the role of competitors’ transactional data in the price recommendation process.

21. *Data Shared Through Other RealPage Products.* AIRM and YieldStar are not the only ways that RealPage shares nonpublic, competitively sensitive information among landlords. RealPage obtains the same confidential transactional data from landlords that license at least three other programs: OneSite, Performance Analytics with Benchmarking, and Business Intelligence.

22. *OneSite* is RealPage’s property management software, which operates as the central source of data for

landlords' leasing activity. *Performance Analytics with Benchmarking* allows landlords to compare the performance of their properties and floor plans (e.g., a one-bedroom, one-bathroom unit) to their competitors. *Business Intelligence* is a data analytics tool that pulls data from a landlord's property management software and other products.

23. Each landlord using RealPage's OneSite, Business Intelligence, and Performance Analytics with Benchmarking products agrees to share its proprietary data with RealPage and agrees that RealPage's revenue management software can use the data to generate pricing recommendations. The license agreements for these products specifically identify the shared data, such as pricing information, as confidential, nonpublic information. RealPage takes this deeply confidential information and uses it to provide rent recommendations to competitors of these clients.

24. These agreements grant RealPage access to confidential information from over 16 million units across the country, including many that do not use its revenue management products. With respect to Performance Analytics with Benchmarking alone, a RealPage sales representative told a prospective client that "we have over 16 million units of data coming from various source operating systems (PMS) [property management software] into the PAB platform," making RealPage the top choice for "transactional data benchmarking." With properties containing approximately 3 million units using AIRM and YieldStar, these additional agreements meaningfully multiply the scale of the transactional data used by AIRM and YieldStar. This gives RealPage greater visibility, including into markets with less penetration by AIRM and YieldStar, granting even initial AIRM and YieldStar adopters in a new market the benefit of access to a significant amount of nonpublic, competitively sensitive information.

25. Landlords understand that AIRM and YieldStar will use data from these products. A revenue management director at Greystar explained that RealPage ingests transactional data from several RealPage products, besides AIRM and YieldStar, for use in revenue management. A property owner requested information from Greystar on which competing properties used revenue management software. In an internal response, the Greystar director noted that RealPage has "access to more transactional history than anyone and [is] pulling data from anyone using RealPage products which includes

companies who manually price or use other revenue management firms but leveraging their BI [Business Intelligence] products."

26. A revenue management executive at Willow Bridge asked RealPage if other specific landlords were using RealPage's non-revenue management products. The landlord's owner client was concerned about the data available to YieldStar because competing properties were unsophisticated and did not use revenue management. This executive wanted to confirm that "YieldStar will be able to leverage actual transactional data behind the scenes and not just look at offered rents for their comps." RealPage reminded the Willow Bridge executive that RealPage collected transactional data for *all* users of OneSite, Business Intelligence, and Performance Analytics with Benchmarking, and reassured the executive that YieldStar had ample transactional and survey data for that area.

27. *Calling Landlords.* RealPage has an additional, complementary product called Market Analytics. Market Analytics compiles data from over 50,000 monthly phone calls that RealPage makes to landlords across the country. On these calls RealPage collects nonpublic, competitively sensitive information by floor plan on occupancy rates, effective rents, and concessions, as well as information on the owner, management company, and any revenue management software used at the property. These market surveys cover over 11 million units and approximately 52,000 properties. Landlords, including but not limited to those that use AIRM, YieldStar, or other RealPage products, knowingly share this nonpublic information with RealPage.

B. AIRM and YieldStar Users Agree With RealPage To Use the Software To Align Pricing

28. In addition to agreeing to share nonpublic, competitively sensitive data with RealPage, each AIRM and YieldStar licensee agrees with RealPage to use the AIRM or YieldStar pricing software as RealPage designed it.² Landlords are expected to review daily AIRM or YieldStar floor plan price recommendations and use the programs to set scheduled floor plan rents or even unit-level prices.

29. While landlords may not accept every price recommendation, they use AIRM or YieldStar as their pricing

software, regularly review AIRM or YieldStar floor plan recommendations, use AIRM or YieldStar to set a scheduled floor plan rent, and use AIRM or YieldStar to set unit-level prices.

30. Landlords who use AIRM and YieldStar know that others are using the same software. Some landlords track which revenue management software their competitors use, including by contacting competing properties directly and exchanging nonpublic information. Other landlords, including prospective AIRM and YieldStar users, ask RealPage whether there are existing AIRM and YieldStar users nearby before they themselves license the products.

31. An executive at Willow Bridge, for example, explained to her team how she would learn from RealPage data or from a property's website whether a property used revenue management. This information is important because properties that use revenue management tend to update prices much more frequently, and so a landlord will react differently to those price changes if it knows the competitor is using revenue management.

32. RealPage frequently tells prospective and current clients that a "rising tide raises all ships." A RealPage revenue management vice president explained that this phrase means that "there is greater good in everybody succeeding versus essentially trying to compete against one another in a way that actually keeps the industry down." This rising tide lifts all landlords, including but not limited to AIRM and YieldStar users.

33. In using AIRM and YieldStar, landlords expect this pricing alignment and use RealPage software in part for this reason. One landlord echoed the RealPage executive, using the phrase "a rising tide rises [sic] all ships" to explain that AIRM would move prices in a "similar manner" to how the top and bottom of the market move. Elsewhere that same landlord noted that "if everyone in the market is doing well and everyone in the market has [sic] is having the rates go up, so should ours, right?" An employee at Willow Bridge referenced RealPage's use of the phrase "a rising tide raises all ships" to explain how AIRM would provide price recommendations that amplify market trends. Multiple landlords have expressed their preference that their competitors use YieldStar and AIRM because widespread use would benefit them all. An executive of one landlord (which itself uses YieldStar and AIRM) said in a 2021 earnings call that more sophisticated, "high-quality competition" was better for that

² Defendants Camden, Cushman & Wakefield and Pinnacle, Greystar, LivCor, and Willow Bridge were active beta testers for AIRM and provided feedback to RealPage during the AIRM design process.

landlord when “they all use revenue management. They are all smart. They raised rents when they should.” RealPage highlighted in promotional materials the sentiments of another landlord who noted, “It actually gives me chills to think about what a disadvantage we’d be at if we hadn’t adopted YieldStar, knowing others are using it.”

C. RealPage’s Transactional Data Is Fundamentally Different From Other Data Available to Landlords

34. The data that RealPage uses and supplies is unique relative to public data available to landlords on listing or property websites. As compared to public data, RealPage data is much more granular, covers a broader array of business information, and includes competitively sensitive data across several dimensions. For example:

- *Information on Actual Transactions.* RealPage’s data include, for each lease, the unit, floor plan, listed rent, final transacted lease price (including any discounts), and lease term.

- *Renewals.* RealPage’s data include the same information for lease renewals. Information on renewals is not listed publicly—not even asking rents—leaving a significant blind spot for landlords not using RealPage.

- *Time Span.* AIRM and YieldStar have access to current and historical lease data, from the previous day and going back two to three years.

- *Future Demand.* The shared data further includes information on tenant demand, including detailed information on inquiries and applications by potential future tenants.

- *Accuracy.* Landlords have greater assurance of the accuracy of the data because it comes directly from the landlords’ own databases.

- *Coverage.* The RealPage data covers millions of units from users of its revenue management software and other products.

35. RealPage touts how its data is different. As one RealPage pitch deck put it, “we have [the] most data and the best data.” And the “[q]uality of data is best in class given that it is ‘lease transaction data’—this provides insight into performance data from actual

signed leases, both new and renewal, net effective of concessions.” Another noted that without YieldStar “you’ll be pricing your renewals in the dark without insight into actual lease transaction data that YS uses to help you make pricing decisions. This is critical to price renewals right[,] especially in a downturn.”

36. Access to this data proves important in winning over revenue management clients, including skeptical ones. One RealPage senior manager noted that a “highly suspicious CFO” was won over in part by YieldStar’s “lease transaction data” that allowed his company to “achieve what his people couldn’t achieve on their own.”

37. One landlord explained the benefits of YieldStar to its owner clients by calling the use of competitors’ transactional data a “game changer! We have 100% truth on [competitors’] activity powering YieldStar recommendations.”

38. Another landlord’s internal training presentation on YieldStar highlighted the importance of having access to competitors’ transactional data:

How Does it Work?

Calculates Price using complex algorithms:

- Historical data
- Current OneSite data
- Transactional Competitive Market Data

**Used to generate a price recommendation
EVERY day for EVERY unit!**

D. RealPage Revenue Management Software Uses Nonpublic, Competitively Sensitive Data To Recommend Prices

39. AIRM and YieldStar are built upon similar code and leverage

competitive data in similar ways. LRO, on the other hand, was originally developed outside of RealPage and takes a different approach.

1. AIRM and YieldStar Leverage Competitively Sensitive Data to Generate Price Recommendations

40. AIRM uses competitors’ nonpublic, transactional data in three

separate stages of the pricing process: (1) model training, (2) floor plan price recommendations, and (3) unit-level prices. YieldStar uses competitors' nonpublic, transactional data in stages two and three of its process.

(a) AIRM Model Training Relies on Competitively Sensitive Data To Generate Learned Parameters

41. In the first stage, RealPage trains its AIRM models using nonpublic data from OneSite and other property management software, totaling millions of executed lease transactions, new lead applications, renewal applications, and guest cards filled out by visiting potential tenants. This data is run through a machine learning model to generate learned parameters for supply and demand models that are then used for all AIRM clients across the country. Like the coefficients in a regression model, the learned parameters are applied to the data of a landlord's specific property, and to the data of its competitors, when AIRM makes pricing recommendations. RealPage generally retrains the models three to four times per year using updated nonpublic data.

(b) AIRM and YieldStar Incorporate Competitors' Nonpublic Data To Generate Floor Plan Price Recommendations

42. In the second stage AIRM or YieldStar provides a price recommendation for every floor plan of a given property. A floor plan is a grouping of units that share similar characteristics, such as the number of bedrooms and bathrooms and square footage. Landlords define the floor plans in their buildings—for example, a large apartment building might have separate sets of floor plans for studios, one-bedroom, and two-bedroom apartments. As discussed below, AIRM and YieldStar use competitors' nonpublic, transactional data in nearly every step of setting a recommended floor plan price, including identifying peer properties, forecasting occupancy and leasing, increasing rents to match competitors' changes, and determining the magnitude of price changes.

43. *Identifying Peers.* First, AIRM and YieldStar use confidential transaction data to identify a property's peer properties, which include close competitors. In selecting peer

properties, RealPage's algorithm generally looks for properties with similar floor plans, within close geographic proximity, and with similar effective rents over time. AIRM or YieldStar clients may review the list of peer properties and request that RealPage add or remove specific properties.

44. AIRM or YieldStar then uses the nonpublic data from competitors' executed leases to generate a market range chart for each floor plan. This chart identifies a "smoothed" market minimum effective rent and market maximum effective rent. The market minimum is a hard floor. AIRM and YieldStar will not recommend a rent below the market minimum. On the other hand, the market maximum is a "soft ceiling," and the programs will recommend prices above the ceiling.

45. The client has access to the market range chart within the AIRM and YieldStar interfaces. As shown below, for each floor plan the client can see the smoothed market minimum and market maximum and where the client's own floor plan sits within the market range.

46. *Forecasting Occupancy and Leasing.* Every night, for each participating property, AIRM applies the model's learned parameters to that

property's internal transactional data to forecast the number of expected vacancies and expected lease applications for a certain period into the

future. AIRM may also use competitors' data to adjust the projected supply.

47. AIRM or YieldStar then determines whether actual leasing for a floor plan is on track to meet predicted

leasing. To do so, it creates a forecast of the number of leases over time, using nonpublic lease and application data from the subject property, and potentially from so-called surrogate properties (similar properties in the surrounding area).³ When there is an imbalance between a property's actual and forecasted leasing, it recommends a price change.

48. *Changing Rents to Match Competitors.* Even when a property's supply and demand are balanced, RealPage's software will still recommend a price change, based on competitors' nonpublic data, when it determines that the market is moving. For example, if the minimum and maximum of the competing floor plans' effective rents increase, it will recommend a price increase to maintain the floor plan's market position (its price position relative to its competitors).

49. *Determining Magnitude of Price Changes.* Once AIRM or YieldStar has determined that it will recommend a price increase or a price decrease, it again uses competitors' transactional data to determine *how much* the price should move and provide a floor plan price recommendation. It uses nonpublic transactional data from peer properties, in addition to data from the subject property and surrogate properties, to generate a market response curve—analogueous to a market demand curve—for every floor plan. This demand curve provides an estimate of how demand for particular apartments would change in response to changes in rents, a measure that RealPage calls elasticity. In other words, it uses competitors' nonpublic transactional data to calculate how many leases the property will likely gain or lose for a particular floor plan, for every price point along the curve. Using this data, AIRM or YieldStar can determine how much the price can increase and still achieve the target number of leases, or by how little price can decrease to maintain a target occupancy.

50. RealPage describes elasticity as a pivotal input into balancing supply and demand and, therefore, price.

51. The use of surrogate properties in this pricing process has the potential to push convergence on price even further. As two properties' surrogate sets become closer—and therefore their respective demand curves become more

similar—AIRM and YieldStar will generate increasingly similar prices for the two properties. And the use of surrogates is common. One of the largest landlords in the country, for example, uses surrogates at over 80% of its properties.

52. This process repeats for every floor plan in the client's property, every night. A new floor plan price recommendation is generated daily.

(c) AIRM and YieldStar Use Competitors' Nonpublic Data—Including Data on Future Occupancy—To Determine Unit-Level Prices.

53. A property manager at the landlord reviews each floor plan recommendation daily and enters the floor plan price. AIRM and YieldStar then use the floor plan price to generate prices for every unit within the floor plan. The unit price is shown in a pricing matrix, which provides the price for each combination of start date and lease term. To generate the price for an individual unit, the floor plan price is adjusted to account for unit-specific factors such as amenities (*e.g.*, a desirable view, the floor level, or an in-unit washer and dryer), staleness (*i.e.*, how long that specific unit has been vacant), and the timing of lease expirations. AIRM and YieldStar again use competitors' nonpublic data during this step in at least two ways.

54. First, AIRM and YieldStar use data on competitors' supply of multifamily housing to adjust recommendations to limit “exposure” with a feature called lease expiration management. Exposure refers to the number of units that are available for lease. Managing lease expirations is an important element of revenue management software. If too many leases expire and the corresponding units become available at the same time, supply increases and rents for those units will tend to drop. This process will also tend to repeat itself as the same units will become available at the same time a year later for leases with a standard twelve-month term.

55. The objective of expiration management is to smooth out this exposure so that landlords, as explained by one RealPage employee, “remain in a position of pricing power.” For example, if AIRM or YieldStar sees that a large number of units will likely be available in twelve months, it will increase the price recommendation for a twelve-month lease relative to price recommendations for leases of other terms, such as 11 months or 13 months, in order to nudge potential renters to accept those terms. Expiration management can only raise prices—AIRM does not lower a unit's price if

the lease term would fall in an underexposed period.

56. This calculation does not rely *only* on the predicted future supply for the client's property. For any landlord who uses a “market seasonality” setting, AIRM and YieldStar *also* rely on competitors' transactional data and the supply for those competitors—including the supply of competitors' existing leases that expire in the future. AIRM and YieldStar thus work to manage lease expirations for the client's units based on how competitors' supply will change. RealPage strongly recommends to landlords that they use market seasonality.

57. The use of competitors' nonpublic data in expiration management to fill out the pricing matrix occurs regardless of whether the landlord accepts the AIRM or YieldStar recommendation. Thus, even if a landlord were to override every price recommendation, its rental prices would still be influenced by nonpublic information about its competitors' supply.

58. Second, AIRM and YieldStar include an amenity optimization feature. By pricing specific amenities within units, landlords can avoid making wholesale pricing changes to a floor plan if a specific unit fails to lease. Within the amenity analysis, AIRM and YieldStar provide market values for specific amenities to landlords, allowing them to compare their perceived value of an amenity with the nonpublic valuation of their competitors. The peer data include the market minimum and maximum value for specific amenities.

2. LRO Relies Primarily on Landlords To Input Data on Competitors

59. RealPage's LRO also provides pricing recommendations to users. Each week, LRO users manually input competitor information into the system that they have obtained from public websites or more questionable means, such as communicating directly with their competitors.

60. A small number of LRO users subscribe to a feature called AutoComp. With this feature, RealPage provides information on competitors' rents, traffic, and occupancy. This information comes from market surveys that RealPage compiles using call centers to call competitor properties. Landlords may use LRO without using AutoComp.

E. RealPage Uses Multiple Mechanisms To Increase Compliance With Price Recommendations

61. AIRM and YieldStar provide daily price recommendations. RealPage has taken multiple steps to increase compliance with AIRM and YieldStar

³ If there is insufficient historical data for a particular building, or floor plan within that building, RealPage will use data from what it calls a “surrogate property,” which is the confidential transactional data from another property with characteristics similar to the subject property.

price recommendations. It designed AIRM and YieldStar to make it much easier to accept recommendations than to decline them. It built an auto-accept function and pushes clients to adopt it and increase its role. And its pricing advisors encourage landlords to follow AIRM and YieldStar pricing recommendations. Among their duties, pricing advisors review any request to override a price recommendation.

1. AIRM and YieldStar Make it Easy To Accept Recommendations and More Difficult and Time-Consuming To Decline

62. Every morning, the landlord's property manager chooses whether to accept the floor plan price recommendation, keep the previous day's rent, or override the recommendation. These options are the same for new leases and renewal leases. RealPage makes it easier and faster for a client to accept a recommendation than to decline it. When accepting recommendations, the manager can choose to do a bulk acceptance—she can accept all or multiple floor plan recommendations at once. But she cannot do the same when overriding, or rejecting, the recommendation.

63. Instead, for every recommendation that she does not accept—whether overriding or keeping the previous day's rent—the property manager must provide “specific business commentary” for diverging from the recommendation. This justification, RealPage instructs, should not be a mere preference for another price but must be based on a factor that the model cannot account for, such as local construction or renovations occurring in the building. It must be a “strong sound business minded approach.”

64. The property manager knows that these recommendation rejections and accompanying justifications will be sent to a RealPage pricing advisor.⁴ If the pricing advisor disagrees with the rejection or justification, the disagreement is escalated for resolution to a landlord's regional manager, who typically supervises the property manager.

65. As one client who complained to RealPage explained, RealPage's design is “trying to persuade [clients] to take the recommendations (almost like we made it hard to do anything but).”

⁴ Some clients have internal revenue managers that are certified by RealPage. For those clients who have internalized the revenue management function, recommendation rejections may be routed to the internal revenue manager rather than a RealPage pricing advisor.

2. RealPage Pushes Clients To Adopt Auto-Accept Settings That Automatically Approve Recommendations

66. AIRM and YieldStar each include auto-accept functions. This functionality automatically accepts price recommendations falling within certain parameters. By default, AIRM and YieldStar set auto-accept parameters of a 3% daily change and an 8% weekly change. The landlord can change these parameters, disable or enable auto-accept, and even enable partial auto-accept. With partial auto-accept, if the recommendation exceeds the auto-accept parameters, the recommendation is accepted as far as the parameter permits. For example, if the auto-accept daily change limit is 4% and the price recommendation is 5%, using partial auto-accept will result in an increase of 4%. By enabling auto-accept, a landlord functionally delegates pricing authority to RealPage (within the bounds of the daily and weekly limits).

67. As part of the onboarding process, internal RealPage guidance states, “AUTO ACCEPT should be confirmed as ‘on’ with parameters in place.” Internal AIRM training explained that RealPage wanted to “widen auto accept parameters” by introducing the feature and then “creating enough trust so that over time we have client[s] that are willing to let auto accept run with very wide parameters . . . AKA—accept all recommendations.” RealPage trains pricing advisors to have an “accountability conversation” or a “refresher on short term vs. long term goals” for clients that show less tolerance for increasing auto-accept parameters.

68. Even if a landlord does not want to use auto-accept, RealPage trains its advisors to convince the landlord to turn it on with 0% limits—a setting whereby auto-accept will never accept price changes. The reason? So that it is no longer a question of whether the client turns on auto-accept, but only a matter of convincing them to widen the parameters and further delegate pricing decisions. RealPage instructs its advisors on best practices: “[I]f a partner is not ready to use auto acceptance, are they ready to use revenue management?”

3. RealPage Pricing Advisors Provide a “Check and Balance” on Property Managers To Increase Acceptance of Recommendations

69. RealPage offers landlords pricing advisory services. Landlords typically have an assigned pricing advisor, unless

the client has internal revenue managers that were certified by RealPage. Pricing advisors play an important role in the daily review of pricing recommendations. Landlords' property managers are asked to review recommendations every morning by 9:30 a.m. After their review, a pricing advisor accepts agreed-upon pricing within an hour and escalates any disputes to the landlord's regional manager.

70. If a property manager disagrees with the direction of a recommended price change—e.g., the manager wants to implement a price decrease when the model recommends a price increase—the RealPage pricing advisor escalates the dispute to the manager's superior. As a pricing advisor manager explained in a client training, the advisor would “stop the process and reach out to our partners”—the property manager's supervisors—to “talk about this further.” The advisors, the manager elaborated, are part of a system of “checks and balances.” The client confirmed the value of this system to stop property managers from acting on emotions, which could limit RealPage's influence on their pricing.

71. Beyond the daily interactions between pricing advisors and their own property managers, clients agree to make meaningful changes when they use RealPage's pricing advisory services. Under the specifications for this service, clients agree to use AIRM or YieldStar exclusively to give quotes to potential renters, further tying landlords' pricing decisions to RealPage's software. Clients also agree to change their commission programs for leasing agents to “ensure these programs motivate sales behavior that is consistent with the objectives of revenue growth.” And clients further agree to revenue growth as the official metric to evaluate AIRM and YieldStar, as opposed to occupancy rates.

72. RealPage imposes additional requirements on landlords who want to use internal or in-house revenue management advisors with YieldStar or AIRM (rather than use RealPage pricing advisors). RealPage requires these landlords' employees go through RealPage certification. Certification is a multiday course in which landlords are trained—at times in the same session—on AIRM and YieldStar use and best practices, according to RealPage. Certification includes observing and leading pricing calls with property managers and passing a written exam. This certification program facilitates the landlords' agreements with RealPage to align pricing by ensuring that landlords' internal revenue managers are trained

and tested to use AIRM and YieldStar in the same way.

4. Pricing Recommendations Heavily Influence Landlords' Behavior

73. RealPage defines an acceptance as where the final floor plan price is within 1% of the recommended floor plan price. According to that definition, the average acceptance rate across all landlords nationally for new leases between January 2017 and June 2023 is between 40–50%. But RealPage itself recognizes that acceptance rates are not necessarily the best measure of its influence; one employee explained that the spread between a floor plan recommendation and the final scheduled floor plan price is more useful for measuring model adoption—and therefore influence—than the binary accept/reject decision that the RealPage-defined acceptance rate reflects. Widening the definition of acceptance even slightly to account for partial acceptances illustrates the influence of recommendations: nearly 60% of final floor plan prices are within 2.5% of RealPage's recommendation, and more than 85% are within 5% of RealPage's recommendation.

74. RealPage's preferred measure of acceptance understates the influence of RealPage's price recommendations and the effect of competitors' data. AIRM and YieldStar use competitors' nonpublic transactional data to adjust unit-level pricing, after a floor plan recommendation has been accepted or rejected. RealPage's metric does not capture the cumulative effect of rate acceptances over time. Nor do they capture when a client is influenced by and partially accepts a recommendation.

III. Coordination Among Competing Landlords Is a Feature of this Industry

75. Several characteristics of apartment-rental markets make it easier for landlords to coordinate with, or accommodate, each other. Rental housing is a necessity for many Americans, meaning that demand is inelastic—that is, changes in rent produce relatively small changes in the number of renters. There is significant concentration among landlords in local markets, and these landlords engage in widespread, regular communications with one another. And RealPage makes rental units more comparable to each other in AIRM and YieldStar, allowing landlords to track one another more easily. These industry characteristics exacerbate the harm to the competitive process—and ultimately to renters—from the exchange of nonpublic, competitively sensitive data through

RealPage and the use of the AIRM and YieldStar models.

A. Rental Housing Is a Necessity for Millions of Americans

76. Shelter is a basic, foundational necessity of life. And for tens of millions of Americans, conventional multifamily apartment buildings are the only reasonable option for much of their lives. Many renters cannot afford the significant down payment needed to purchase a single-family home, among other requirements.

77. Demand for apartments is relatively inelastic. Rising rents have disproportionately affected low-income residents: The percentage of income spent on rent for Americans without a college degree increased from 30% in 2000 to 42% in 2017. In 2021, the proportion of severely burdened households—households spending more than half of their income on gross rent—was 25%, or approximately 10.4 million households, an increase in approximately 1 million households since 2019. By 2022, this number increased to 12.1 million households. For college graduates, the percentage of income spent on rent increased from 26% to 34% from 2000 to 2017.

B. The Multifamily Property Industry Is Rife With Cooperation Among Ostensible Competitors

78. Within particular metropolitan areas and neighborhoods, the multifamily property industry is concentrated and replete with competitively sensitive discussions among ostensible competitors. Landlords have agreed with one another to share nonpublic, sensitive information, both indirectly through RealPage software and directly outside of RealPage's software. RealPage facilitates some of these discussions, while others are made directly between competing landlords. These discussions supplement and reinforce the indirect information sharing among landlords that occurs through AIRM and YieldStar. As a result of this coordination, RealPage's pricing algorithms are even more likely to restrain, rather than promote, competition.

1. At the Local Level, the Multifamily Property Industry Comprises a Small Number of Large Landlords Managing Buildings With Different Owners

79. In 595 zip codes with at least 1,000 total multifamily units across 125 core-based statistical areas, five or fewer landlords manage more than 50% of the multifamily units. Within the submarkets alleged in this complaint,

there are at least 214 zip codes, each with at least 1,000 total multifamily units, in which five or fewer landlords manage more than half of those units. Similarly, within the ten core-based statistical areas alleged in the complaint, there are 144 zip codes, each with at least 1,000 total multifamily units, in which five or fewer landlords manage more than half of those units.

80. The same landlord often oversees nearby properties with different owners. In at least 502 zip codes, at least one landlord using AIRM or YieldStar oversees properties with different owners.

81. There is also overlap among RealPage pricing advisor assignments. In at least 683 zip codes, within 96 core-based statistical areas, a RealPage pricing advisor has responsibility for properties managed by different landlords. RealPage takes no steps to avoid assigning the same pricing advisor to properties with different owners, even if those properties compete with each other or are RealPage-mapped competitors.

2. Landlords Regularly Discuss Competitively Sensitive Topics With Their Competitors and Swap Information

82. Landlords regularly solicit and obtain nonpublic information about inquiries by prospective renters, occupancy, and rents from their direct competitors. Although this information is not as accurate or thorough as the transactional-level data shared with AIRM and YieldStar, it is nonetheless sensitive competitive information.

83. Landlords collect this information through a variety of means, including weekly phone calls, emails, and in-person visits. Some landlords also share information on their local geographic markets through shared Google Drive documents. One RealPage employee explained to his colleagues, reflecting on his former time working at a landlord, that these weekly inquiries “required cooperation among the competitor[s] but wasn't hard to get that.” In June 2023, a senior director at Cushman & Wakefield admitted that “this practice has been prevalent in our industry for a long time.”

84. Landlords not only knew of these so-called “market surveys,” but expected their property managers to participate. As a manager of Cushman & Wakefield's revenue management department explained, “we have always expected our properties to continue doing a traditional market survey[.]” which “gives us insight into the very specific handful of competitors closest to the subject property.”

85. At a February 2020 industry event, representatives from Cushman & Wakefield and two other landlords shared tips on collecting information on concessions and net effective rents from competitors. The suggestions included bi-weekly and monthly meetings with competitors, sponsored “cocktail hours for regional competitors to share info and build relationships and rapport,” and using Google Drive documents to share information on a weekly basis. Building relationships with competitors to get accurate data was “critical.” The representatives cautioned that the collected data was used to make “major decisions about pricing,” so the landlord employees collecting data should be trained accordingly to ask such questions as “are you seeing a slow down?” and “are you adjusting pricing?”

86. Some landlords engage in even more sensitive communications about price, demand, and market conditions. These communications are not isolated instances at a specific property. Rather, they are conversations at the corporate revenue management level about strategies and approaches to market conditions that apply to the landlords’ business across all markets.

87. For example, in January 2018, Willow Bridge’s director of revenue management reached out to Greystar’s director of revenue management and asked about Greystar’s use of auto accept in YieldStar. In response, Greystar’s director provided Greystar’s standard auto-accept settings, including daily and weekly limits and for which days of the week auto accept was used. The Greystar director, explaining why she provided this information, testified that the Willow Bridge director was a “colleague,” even though Willow Bridge was a competitor to Greystar.

88. In March 2020, Cushman & Wakefield’s director of revenue management reached out to Willow Bridge’s director of revenue management. The Cushman & Wakefield director wanted to hold a call among revenue management executives at multiple landlords to discuss market conditions, use of YieldStar, and strategy plans. The Willow Bridge director agreed and suggested a small number of landlords to invite to keep the group “tight.” The directors agreed to reach out to Greystar, as well as several other landlords.

89. Also in March 2020, a senior executive at Greystar obtained a copy of Willow Bridge’s sensitive strategic plans regarding the COVID-19 pandemic. The plans included Willow Bridge’s corporate protocols for concessions, rent increases, and lease terms. The plans

recommended that property managers work closely with YieldStar and LRO to preserve rent integrity. The Greystar executive forwarded Willow Bridge’s plans to executives at Cushman & Wakefield and another landlord. All four landlords compete with one another.

90. In September 2020, Camden’s director of revenue management reached out to Greystar’s director of its internal revenue management team. Camden asked Greystar—a direct competitor—what increases on renewal pricing Greystar had seen in August and offered what it had seen. Greystar’s director replied with information not only on August renewals, but also on how Greystar planned to approach pricing in the upcoming quarter. Greystar’s director further disclosed its practices on accepting YieldStar rates and use of concessions. As the conversation continued, the two competitors shared additional highly-sensitive information on occupancy—including in specific markets—demand, and the strategic use of concessions.

91. At the same time, Camden’s director emailed a revenue management executive at LivCor and asked how LivCor was faring on raising renewal rates. He explained his request by noting that Performance Analytics provided some good data, but it was “hard to see what our competitors are signing today.” The two executives shared information about their respective renewal increases. After the Camden executive passed this information along internally, he continued his outreach with several other landlords and with the LivCor executive—who in the meantime had reached out to three other landlords about their renewal rates. Camden’s internal team decided to raise a renewal cap to get to the same renewal gains as LivCor.

92. Camden’s director received competitively sensitive information from at least four competitors. Another senior executive at Camden asked him to compile the information so it could be shared internally. That executive noted the usefulness of the competitors’ information and the need to take advantage of the shared information while it was fresh.

93. In June 2021, Willow Bridge’s head of revenue management emailed Greystar’s revenue management director. She proposed collaborating with Greystar to convince a client to move all of its properties, including those managed by Willow Bridge and those managed by Greystar, to AIRM. But she also noted that, in thinking about “the larger picture as well,” it

could be useful to “coordinate with the other companies that we often share business with” to prepare to move their clients to AIRM as well. Greystar responded favorably to transitioning the joint client to AIRM.

94. In November 2021, a revenue management executive at LivCor emailed an executive at Camden to propose a call to discuss Camden’s “renewal philosophy,” for the purpose of informing how LivCor calculated renewal increases. The two spoke that day. The following day, another LivCor executive—who was included on the call—thanked the Camden executive for the opportunity to “connect on industry best practices” and asked another “operational question” about implementing “larger renewal increases.” The executives exchanged emails over the next few months, including discussing their respective strategies on maximum increases to lease renewal prices. They shared not only their increase limits in specific markets but also what price increases they were able to achieve. For example, in April 2022, the executive at LivCor reached out to Camden to share that “my current thinking (not sure it’s right, just where my mind is at) is . . . prices for almost everything are up 20%.” Therefore, unless there is a good reason not to, should we be increasing rates on rentable items by 20%?” The Camden executive responded, “I like your thinking.” He continued, “Typically, we lean into the demand signals to inspire a price increase . . . I’m divided on whether the default increase should be 20% or closer to the 10% . . . Curious what your thoughts are!?”

95. In September 2021, a property manager at Cortland explained to a colleague that the manager had called two competitors and received from them pricing information on two-bedroom and three-bedroom units. The property manager asked for the information to decide how to act on YieldStar’s price recommendations.

96. Landlords also engage in group discussions with local and national competitors about sensitive topics. For example, for a number of months in 2020, dozens of “high-level participants” from competing landlords participated in weekly “multifamily leadership huddle” videoconferences. The organizer informed participants that “the goal of the call is to share information about what our companies are doing, share some collateral and resources,” and then—perhaps recognizing the problematic nature of these calls—he claimed that “then we hang up and make our own decisions.”

97. In one such call in April 2020 with over 100 attendees, participants discussed a number of topics, including “pricing and renewal strategies.” Several senior landlord executives, including a Greystar senior managing director and a CEO of another landlord, participated and shared their practices on new leases and renewals, use of renter payment plans, and use of YieldStar and other revenue management software. On a similar call in October 2020, participants discussed current and forecast rent prices, renewal strategies, and use of concessions. A Willow Bridge employee forwarded a colleague notes from the call, and he specifically highlighted information about a competitor’s use of concessions.

98. These conversations among competing landlords have extended from the national level to local markets across the country. For example, in Minnesota, property managers from Cushman & Wakefield, Greystar, and other landlords regularly discussed competitively sensitive topics, including their future pricing. When a property manager from Greystar remarked that another property manager had declined to fully participate due to “price fixing laws,” the Cushman & Wakefield property manager replied to Greystar, “Hmm . . . Price fixing laws huh? That’s a new one! Well, I’m happy to keep sharing so ask away. Hoping we can kick these concessions soon or at least only have you guys be the only ones with big concessions! It’s so frustrating to have to offer so much.” The property managers from Greystar and Cushman & Wakefield continued to discuss competitively sensitive topics. For example, in response to Greystar’s tipoff that it had reduced concessions and “hop[ed] the Spring/Summer market allow us to pull further back on concessions,” the Cushman & Wakefield property manager replied, “That’s great news and I love hearing about the concessions being pulled back. We have done the same and hoping the rest of the market follows suit.” These communications between RealPage users that are ostensibly competitors are examples of the industry-wide coordination that magnifies the anticompetitive effects of RealPage’s software.

99. In addition to contacting each other directly, many landlords also exchange information through other intermediaries. One vendor offers a tool for landlords to exchange with one another nonpublic information on concessions, net effective rents, inquiries and visits by prospective renters, and occupancy that is pulled from each landlord’s property

management software. Over 150 landlords nationally have used this service, including Greystar, LivCor, and some of the other largest landlords across the country. The vendor’s CEO described this as a “quid pro quo or give to get” arrangement among landlords where “if you share this data with me, I’ll share the same data.” A RealPage employee noted that this vendor makes it “quicker and easier to get your market surveys.”

100. Some landlords use this direct exchange of competitively sensitive information to update competitor rents within LRO—a practice that RealPage is aware of and accepts.

101. Recently, under the scrutiny of antitrust lawsuits, some landlords have adopted internal policies prohibiting “call arounds” and other direct sharing of competitively sensitive information with direct competitors. But even assuming that their property managers fully comply with these legally unenforceable internal policies, these landlords continue to use RealPage’s revenue management software.

3. At RealPage User Group Meetings, Landlords Discuss Competitively Sensitive Topics

102. RealPage holds monthly “user group” meetings attended by competing landlords that use RealPage’s software. There are separate user group meetings for LRO and for YieldStar and AIRM.⁵ One of RealPage’s stated purposes for the user groups is to “to promote communications between users.” Attendees include a wide mix of competing landlords. For example, the June 2022 YieldStar user group included representatives from five of the largest property management companies in the country, among a larger group.

103. Recurring topics at the user group meetings include product enhancements and an “idea exchange” on potential changes to the products. The user group participants often vote on the proposals discussed in the idea exchange. But discussions have covered competitively sensitive topics, including managing lease expirations, pricing amenities, the use of concessions, pricing strategies, and how to manage properties during the COVID–19 pandemic. RealPage encouraged landlords to use the user group meetings to discuss such topics in their industry and set agendas for these meetings to aid them in doing just that, remarking that “[t]he user group is meant to be self-governed to a degree and the clients should be leading it.”

⁵ RealPage previously held separate AIRM and YieldStar user groups but combined them in 2023.

These RealPage-fostered discussions among competitors enhance and facilitate the landlords’ agreement with RealPage to use AIRM and YieldStar to align pricing.

104. At an April 2020 YieldStar user group meeting, the participants discussed strategies for handling the COVID–19 pandemic. In the presentation, two RealPage employees and a landlord led a group discussion of trends in rent payments and collections and provided five strategic tips. One tip encouraged landlords to “push for occupancy but don’t give away the farm (pricing).” Another counseled landlords to “balance internal and external dynamics” and, referring to the nonpublic information used by YieldStar, to “use transactional market data for decision support and to know when you can be more aggressive” in pushing higher rents. Invited attendees included representatives from at least twelve landlords. At this meeting, Greystar and another landlord shared information on their usage of payment plans with tenants.

105. In May 2020, RealPage started a YieldStar user group meeting by surveying them on concessions. RealPage asked landlords how many of their properties offered concessions, whether concessions applied to new leases or renewals, and the types of concessions offered (such as discounts, gift cards, or other benefits). Invited attendees included representatives of thirteen landlords.

106. In March 2021, the user group meeting included a discussion on possible adjustments to how YieldStar calculated lease expiration premiums. A RealPage executive shared that she liked the idea of adding weekend premiums to incentivize prospective renters to move in during the week, and commented that “the rev[enue] potential would then scale up.” The LivCor representative responded in favor of weekend premiums, and another user group member suggested adding the proposal to the user group idea exchange. RealPage agreed to do so.

107. RealPage began its agenda for an April 2021 YieldStar user group meeting with “strategic insights” from a RealPage economist. This employee shared “21 key strategic insights,” including “focus on renewals,” “be cautious with concessions,” and “drive up revenues—not just base rent.” Specifically, he urged the group to “push up new and renewal pricing where demand [is] solid” and warned against over-relying on concessions. They were instead to “trust the science” of YieldStar.

108. In May 2021, RealPage included a “Back to Basics” discussion in a YieldStar user group meeting. This discussion covered “returning to renewal increases post-COVID” and “declining concessions,” as well as eviction moratoria and areas where acceptance rates were “seeing significant uptick in past 6 months.” The meeting group chat is even more revealing. Over a period of approximately fifteen minutes, representatives from fifteen landlords shared their plans for renewal increases and their use of concessions. The questions were posed, “At what point do we go back to normal? If we go back to normal[,] is it now? Is anyone seeing that the model is raising rent and are you doing it?” In response, these representatives made statements on renewal increases such as “increasing, back to normal,” “major rent growth on the west coast,” “increasing the renewals,” “almost all markets we are raising rents,” “actually raising more than before covid at some,” “raising,” and “we are pushing to get back to normal. Sending increases.” A representative from LivCor stated, “increasing renewals and pushing new lease rents.”

109. The user group members were similarly open about their disinterest in concessions, signaling to each other that they do not intend to offer them or would offer them less frequently. Their pronouncements included “no concessions [sic],” “no concessions,” “considerably less concessions,” “less frequent and less aggressive,” “no concessions except in markets with a lot of lease-ups,” and “almost no concessions currently.” A representative from Willow Bridge noted concessions had “gone away a LOT. People asking for a free month on renewals and being denied, but still signing the renewal.”

110. When the discussion turned to acceptance rates, a RealPage employee stated that rates had “pretty much gone back to pre-COVID. Rate Acceptance has grown 11% over the past 6 months.” A landlord responded that they had “seen our acceptance rate increase tremendously.” Another user group member explained to the group, for “about 1/3 of the communities I manage the [YieldStar] model was too slow to respond, and we are pushing rates above market and above YS rec[ommendation].” A representative from Willow Bridge concluded, “Are we deciding as a group to remove hesitation? :).”

111. The LivCor representative who attended this May 2021 meeting testified that similar discussions happened numerous times during the

COVID-19 pandemic—specifically, the beginning of 2020 through the middle of 2022. In these meetings, user group members discussed new and renewal rent increases, concessions, and renewal strategies, as well as other sensitive topics.

112. RealPage claims that this and other user group meetings were not recorded.

113. The July 2021 YieldStar user group meeting, held at RealWorld (a RealPage-hosted industry event), included a roundtable discussion among competitors. One of the discussion topics? “What is the one thing you consistently consider outside of the model when accepting or changing price and why?”

114. At the October 2021 YieldStar user group meeting, a RealPage economist gave a presentation regarding the 2022 market outlook. RealPage presented analyses on current occupancy and pricing, and on expected occupancy and rent growth in 2022 by geographic regions.

115. At the July 2022 RealWorld YieldStar user group meeting, RealPage hosted a “roundtable discussion” on market volatility and its impact on how to use revenue management, unit amenities and their impact on tenant rents, and best practices for conducting lease ups.⁶

116. RealPage recognized the sensitive nature of the information shared at these meetings. Beginning in late 2022, after public reporting about AIRM and YieldStar, RealPage added an antitrust compliance statement in the user group presentations. Among other directions, the statement instructed participants not to discuss “confidential or competitively sensitive information,” and then noted that this included “you or your competitors’ prices or anything that may affect prices, such as current or future pricing strategies, costs, discounts, concessions or profit margins.” But these were the very topics of previous user group meetings, as described above, that RealPage encouraged its users to discuss. And these are the very types of nonpublic information that AIRM and YieldStar use to recommend and determine prices.

117. Landlords frequently take advantage of RealPage user group meeting invites to email each other directly. In August 2020, for example, an employee of Cortland emailed a user group invitee list and asked them to

⁶ A lease up is typically a pre-leasing period (such as with a newly constructed property) where a landlord is seeking to reach a certain, initial occupancy threshold.

support a change to how YieldStar calculated the number of leases needed. In response, an employee of a different landlord agreed, adding that “I also rely on comparing available units to adj[usted] leases needed, to forecast leases, to gut check the pricing recs. These data points are always a factor in my pricing decisions.”

C. RealPage Uses Nonpublic Information To Allow Landlords To More Easily Compare Units on an Apples-to-Apples Basis

118. Renters typically search for a rental unit using certain key criteria, including the number of bedrooms and the location. Recognizing this market reality, RealPage enables landlords to more easily compare unit prices. When picking a property’s “peer set,” RealPage matches floorplans with the same number of bedrooms that are geographically proximate. This makes it easier for landlords, through AIRM and YieldStar, to track and respond to competitors’ movements at the floor plan level.

119. To account for amenities, RealPage instructs landlords to identify amenities using standardized naming conventions so that RealPage can use machine learning to group amenities together. RealPage then provides the market value for specific amenities, allowing landlords to more accurately identify and track how their competitors value these amenities and adjust their own pricing accordingly. The peer data include the market minimum and maximum value, as well as market quartile values, for specific amenities.

IV. RealPage Harms the Competitive Process and Renters by Entering Into Unlawful Agreements With Landlords To Share and Exploit Competitively Sensitive Data

120. AIRM’s and YieldStar’s use of nonpublic, competitively sensitive data is likely to harm, and has harmed, the competitive process and renters. AIRM and YieldStar distort the competitive process by using nonpublic data to maximize pricing increases and minimize pricing decreases. AIRM and YieldStar incorporate special rules, called “guardrails,” that override the ordinary functioning of the algorithms in ways that tend to push rival landlords’ rental prices higher than would occur in a competitive market. RealPage presses landlords to curtail “concessions” to renters. And AIRM and YieldStar’s “lease expiration management” features aim to sequence vacancies to maximize landlords’ pricing power.

A. AIRM and YieldStar Have the Purpose and Effect of Distorting the Competitive Pricing of Apartments

121. As RealPage frequently trumpets to landlords, “a rising tide raises all ships.” AIRM and YieldStar ensure that the ‘tide’ flows primarily one way—higher rental prices. In a hot market, AIRM and YieldStar will recommend price increases to test what the market will bear, while in a down market AIRM and YieldStar will, to the extent possible, still increase or hold prices and minimize price decreases to reach the target occupancy rate.

122. AIRM and YieldStar are designed to help landlords press pricing beyond what they could otherwise achieve while reducing the risk that other landlords would undercut them. A revenue manager at Willow Bridge explained it succinctly: YieldStar is “designed to always test the top of the market whenever it feels it’s safe to.” By using competitors’ sensitive nonpublic data to generate elasticity estimates, among other things, AIRM and YieldStar can recommend higher price increases to extract more money from renters without losing an additional lease. As RealPage explained to a YieldStar client in training, this pricing elasticity measurement informs “how far do we stretch and pull pricing within the market.” That, in turn, means that “we may have a \$50 increase instead of a \$10 increase for that day.”

123. That insight, gleaned from competitors sharing sensitive, transactional data with RealPage, which is in turn shared with landlords through pricing recommendations, removes uncertainty and competitive pressure that benefits renters. As one landlord put it, these products “eliminate the guessing game” on rent.

124. As RealPage explains to its clients, AIRM and YieldStar reveal “hidden yield.” This extra yield or

revenue is hidden in a competitive market—a market in which competitors do not share sensitive information with each other—because landlords “can’t see the opportunity” and “fail to capture [the] full opportunity.”

125. AIRM and YieldStar disrupt the normal competitive bargaining process between landlords and renters. They place landlords in a better negotiating position vis-à-vis renters. Landlords using AIRM and YieldStar know that these models recommend floor plan prices and price units incorporating nonpublic data of their competitors, including effective rents and occupancy rates, all of which allow landlords to raise price with more certainty.

126. As landlords appreciate, AIRM and YieldStar use competitors’ nonpublic data to predict with more certainty the highest price that the market will bear for a particular unit. A landlord is therefore less likely to negotiate on price. Any potential negotiation instead turns on lease term and move-in date, which AIRM and YieldStar adjust the pricing for to avoid overexposure for the landlord in the future.

127. AIRM and YieldStar also encourage landlords to follow each other in raising rents. When transactional data reveal that peers are raising effective rents—particularly the highest and lowest competitors for a given floor plan—AIRM and YieldStar follow with recommendations to increase rental prices. This movement with the market is ingrained in the AIRM and YieldStar models; AIRM and YieldStar will not recommend a floor plan price that falls below the market minimum.

128. Accordingly, as adoption of AIRM and YieldStar increases among peer competitors, the use of AIRM and YieldStar can push prices up through a feedback effect. As peers move up, other AIRM or YieldStar users may move up

accordingly. This phenomenon, where participating landlords “likely move in unison versus against each other,” a RealPage executive testified, explains “the rising tide.” The same executive saw evidence of this “rising tide” in 2020: When looking at multiple peer sites using YieldStar, “we started to see the trajectory of performance and trends be eerily similar when comparing subject sites and comp sets, thus showing that we are in fact ‘r[aising] the entire tide.’” He acknowledged that YieldStar contributed to market prices rising as a tide.

129. Landlords rely on competitors’ data within AIRM and YieldStar to determine their prices and how hard they need to try to be competitive. A revenue management director at Greystar noted in an internal AIRM deck that competitors’ data is “like the boundaries of the street you are driving on.” The director elaborated that “the competitive market range are [sic] the edges of the road, staying in those boundaries are [sic] necessary to get you to the destination.”

130. Another landlord that used YieldStar told RealPage that within a week of adopting YieldStar they started increasing their rents, and within eleven months had raised rents more than 25% and eliminated concessions. The landlord added that they were now pricing at the top of their peers and, importantly, had “brought the rest of the Comps rents up with us.” A RealPage executive responded internally that this was a “great case study that highlights performance before, during, and a result of YS [YieldStar].”

131. A landlord explained in an internal presentation that because YieldStar recommends floor plan pricing that moves with the market—a market position—YieldStar would use competitors’ data to inform “how competitive we need to be [e]ach [d]ay.”

Competing for the Pie

Demand is fixed, but our piece of the pie is variable

YieldStar recommends a Market Position every day, not a price

Previous achievement vs. Peers and Current need will determine *how competitive we need to be Each Day*

4

132. AIRM uses machine learning to train models on competing landlords' sensitive data. The parameters learned in this training are then applied to each AIRM client.⁷ As a result, the model uses the same method and learned parameters to generate price recommendations from the relevant data for each landlord.

133. This aligns and stabilizes prices in at least two ways. First, it reduces volatility in *how* prices change, compared to a situation in which each client sets prices independently. No longer do competitors react in distinctive ways to changing market conditions as they would in a market without access to competitors' transactional data. Instead, AIRM price recommendations tend to standardize those reactions. This leads to the second result: pricing recommendations, and consequently pricing decisions, become more predictable and aligned among competitors as each is using the same set of learned model parameters.

134. RealPage has even manipulated competitor mappings to increase the likelihood that AIRM or YieldStar

would recommend price increases. For example, a prominent client asked why a subject property had mapped peers located more than 100 miles away, in a different metropolitan area, when there were satisfactory mapped competitors within five miles. RealPage's response was that if these distant properties were not mapped, the client's property would be at the top of the market and it would be more difficult for AIRM to recommend price increases. RealPage had originally mapped these distant properties to give the model more room to recommend price increases for the client's property.

135. This dynamic exists not only in markets with growing demand, but also so-called "down markets," where demand is decreasing. In a competitive market with a fixed supply (at least in the short run) of housing units, a demand decrease would result in prices falling. But AIRM and YieldStar resist price decreases in down markets as much as possible while achieving targeted occupancy rates. RealPage told one prospective AIRM client that the combination of "AI and the robust data in the RealPage ecosystem" would allow the landlord to "avoid the race to the bottom in down markets."

136. Using competitors' transactional data to calibrate and set the bounds of its model enables YieldStar and AIRM

to decrease prices as little as possible in a down market. As one example, in 2023 a landlord reached out to RealPage with concerns about price recommendations at a property. Despite the property having too many vacancies and peer properties decreasing in price, AIRM was recommending price increases, frustrating the property owner. A senior RealPage executive responded that the model was not lowering prices because "there isn't much elasticity between the recommended position and the current one" and "the model would recommend the highest possible position [*i.e.*, price] without affecting demand."

137. RealPage succinctly summarized for landlords the effect of using AIRM and YieldStar in down markets: it "curbs [clients'] instincts to respond to down-market conditions by either dramatically lowering price or by holding price when they are losing velocity and/or occupancy." These tools instill pricing discipline in landlords, curbing normal fully independent competitive reactions by substituting them with interdependent decision-making (*i.e.*, through the use of pricing recommendations based on shared, competitively sensitive information). These products ensure that clients are "driving every possible opportunity to increase price even in the most

⁷ There are separate AI Supply models, and therefore potentially different learned model parameters, for clients using Yardi's property management software and clients using other property management software. But within these two categories the learned model parameters for the AI Supply models are the same.

downward trending or unexpected conditions.”

138. When one client wanted to cancel YieldStar, a RealPage executive noted to colleagues that with cancelation the client would lose “our helping them mitigate damage during rent control and covid.” In particular, the client would lose “us helping them rise with the tide given their strategy.”

139. Landlords understand the sensitivity of the information being shared and the likely anticompetitive effects. One potential client put it succinctly to RealPage: “I always liked this product [AIRM] because your algorithm uses proprietary data from other subscribers to suggest rents and term. That’s classic price fixing”

140. Cushman & Wakefield recognized the anticompetitive potential of sharing this level of detailed competitor data. When a property owner asked for information on specific competitors, Cushman & Wakefield’s director of revenue management replied that the requested tool, RealPage’s Performance Analytics with Benchmarking, did not provide information on specific competitors. The reason? Performance Analytics with Benchmarking “tracks transactional information therefore due [to] the potential pricing collusion, it’s anonymize[d] by RealPage.” Performance Analytics with Benchmarking draws from the same transactional database as AIRM and YieldStar. And while AIRM and YieldStar do not display the granular transactional data to the user, AIRM and YieldStar see and use that data. The price recommendations are based upon the very data that this client recognized could lead to collusion.

141. Even RealPage employees selling LRO recognized the anticompetitive harm from using competitors’ transactional data to recommend prices. In a 2018 training deck provided to clients, RealPage explained, “we often times get the question about if comps are on LRO, can we just update the rents for you? Unfortunately, no, we can’t. That could be considered price collusion, and it’s illegal.” But this is precisely what AIRM and YieldStar do.

B. AIRM and YieldStar Impose Multiple Guardrails Intended to Artificially Keep Prices High or Minimize Price Decreases

142. Unsatisfied with relying merely on competitively sensitive data to advantage landlords, RealPage created “guardrails” within AIRM and YieldStar to force adjustments to the price recommendation. But these guardrails serve as one-way ratchets that help landlords, not renters, by increasing

price recommendations or limiting a recommended decrease. And each of these guardrails makes use of competitively sensitive data that landlords agree to share with RealPage. These guardrails have even spurred multiple landlords to tell RealPage that AIRM and YieldStar are not dropping recommended rents as much as their individual conditions, or even market conditions, would warrant.

143. *Hard Floor.* AIRM and YieldStar will not recommend a floor plan price that falls below the smoothed market minimum effective rent. The market minimum is a hard floor. AIRM and YieldStar thus explicitly constrain floor plan price recommendations based on the prices of competitors, using shared nonpublic information.

144. *Revenue Protection Mode.* RealPage created a “revenue protection” mode that effectively lowers output to increase revenues. Revenue protection activates when AIRM or YieldStar predict—using calculations incorporating competitors’ data—that demand is too low for a landlord to meet its target occupancy. Rather than lowering the price to stimulate demand, the algorithm reduces the target number of leases. AIRM and YieldStar then maximizes revenue for the *reduced* occupancy level, which tends to reduce price decreases or increase rental prices.

145. RealPage acknowledges that revenue protection “may seem counterintuitive to leasing needs.” In June 2023, a landlord complained to RealPage that “something in your model is broken” because “the pricing model is not lowering rents dramatically” despite the client’s high exposure during a busy summer leasing season. RealPage explained that, with revenue protection, “the model still sees the way to make more revenue is to lease fewer units at higher prices.” In other words, the model seeks to “raise rates to get the highest dollar value possible for the leases we can statistically achieve” and ignore those leases that the client wants but the model predicts, using competitors’ data, the client will not get.

146. The model’s hard price floor can trigger revenue protection mode. In May 2022, for example, a landlord complained that AIRM was recommending price increases despite a projected shortfall in leases. Because revenue protection mode cannot be turned off, the RealPage pricing advisor recommended that the client reduce sustainable capacity. Sustainable capacity is a client-set parameter that imposes an inventory constraint and determines the number of leases AIRM and YieldStar will try to achieve. This is, of course, what revenue protection

mode functionally does on its own: increase inventory constraints to reduce output.

147. This phenomenon, a RealPage employee explained internally, was “true revenue protection mode.” The client’s floor plan was priced toward the bottom of its competitors. AIRM did not see any price decrease that would achieve the original target number of leases without dropping below the market floor (determined using competitors’ data). Because AIRM never recommends prices below the market floor, AIRM instead reduced the number of leases and optimized against that new, lower occupancy rate.

148. Revenue protection mode interrupts AIRM’s and YieldStar’s normal revenue maximization process. As a RealPage data scientist explained, “the model really wants to reduce rent but is prevented from doing so by the revenue protection restriction.” Revenue protection leads to higher prices and lower occupancy.

149. *Sold-Out Mode.* Once a landlord reaches its targeted capacity for a particular floor plan, the model considers that floor plan “sold out” even though units may still be physically available. In that situation, AIRM and YieldStar recommends the maximum rent charged by a property’s competitors, even if the floor plan’s previous price was far lower.

150. RealPage intentionally designed sold-out mode to use competitively sensitive data to lift rents. In an earlier version of the software, sold-out mode pushed rents to 95% of that floor plan’s highest recently achieved rent. But RealPage modified the algorithm in 2022 to go “straight to 100% of comps,” deliberately aligning rents with competitors’ highest rents, rather than the property’s own historical performance.⁸

151. *The Governor.* AIRM and YieldStar favor recommended price increases over price decreases. When the model calculates that the current day’s “optimal” price will result in greater revenue than the previous day, a feature called the “governor” causes the model to recommend the current day’s optimal price.⁹ But when AIRM or YieldStar calculates that the current

⁸ RealPage has at least considered changing this model logic because it introduced meaningful pricing volatility and significant price increases. Even if RealPage has implemented this proposed logic change, the new model logic still incorporates competitors’ confidential rents because AIRM and YieldStar recommend a market position that is tied to the bottom and top of the market, as defined by mapped competitors.

⁹ In some circumstances AIRM will cap the floor plan recommended price increase at a five percent increase.

day's optimal price will result in less revenue than the previous day, the governor recommends the recent average price *even though it is not optimal for the current day*. In other words, when market conditions weaken and the model calculates that a price decrease is warranted, this guardrail kicks in and recommends keeping the recent rent even though it is suboptimal. This asymmetry favors price increases over price decreases.

152. The effect of these guardrails is intentionally asymmetric. AIRM and YieldStar recommend price increases generated by the model. But the guardrails reduce or eliminate certain proposed price decreases even though the model has determined such deviations may contravene the landlord's individual economic interest.

C. AIRM and YieldStar Harm the Competitive Process by Discouraging the Use of Discounts and Price Negotiations

153. RealPage discourages landlords using AIRM and YieldStar from discounting rents. In the multifamily property industry, discounts typically consist of "concessions," which are financial allowances (such as a free month's rent or waived fees) offered to incentivize renters. Concessions may be offered generally or negotiated individually with a potential tenant.

154. In a competitive marketplace, each landlord may independently decide to offer concessions so that it can better compete in enticing lessors. But, again, RealPage seeks to replace fully independent, competitive decision-making with collective action by ending concessions. AIRM and YieldStar do not work as well when landlords use one-off or lumpy concessions. In its "best practices" for revenue management to landlords, RealPage's guidance is simple: "Eliminate concessions." Detailed "best practices" documents for both YieldStar and AIRM users explain that "concessions will no longer be used in conjunction with" YieldStar and AIRM.

155. When onboarding a new property, RealPage emphasizes the importance of accepting price recommendations without offering discounts, including "no concessions." Concessions cause landlords to deviate from what RealPage determines is the maximum revenue-generating price.

156. Landlords have worked to implement RealPage's requests. In one YieldStar training, Greystar explained that "Concessions are gone!" In a client-facing FAQ document about its revenue management products, RealPage explained that "the vast majority of our clients have discontinued the use of

concessions." A 2023 RealPage client presentation showed that the number of units offering concessions generally trended downward from approximately 30% of units in 2013 to under 15% in 2023. A client's refusal to offer concessions is bolstered by its awareness of competing landlords receiving the same advice from RealPage. In addition to discouraging discounts, RealPage discourages negotiating prices with renters. RealPage trains landlords that "YieldStar [or AIRM] is managing your Price," so the landlord's staff can focus on other things. The YieldStar or AIRM rent matrix is to be the source of prices that are given to a prospective renter. RealPage instructs leasing staff to provide prospective renters the specific price from the matrix that corresponds to the prospect's desired move-in date, unit, and lease term. RealPage cautions landlords not to show renters the matrix itself.

D. AIRM and YieldStar Increase and Maintain Landlords' Pricing Power by Using Competitors' Data To Manage Lease Expirations

157. Supply is a basic component of pricing. For this reason, information on a company's supply is highly sensitive, and its disclosure to competitors is particularly concerning. Yet AIRM and YieldStar use competitors' supply data precisely for the purpose of adjusting unit-level pricing, regardless of whether the landlord accepts the floor plan price recommendation. The goal of this "lease expiration management" is clear: As a RealPage senior manager explained for a client, using this data means that the client's property "will remain in a position of pricing power."

158. The purpose of lease expiration management is to avoid too many units becoming available in the market at the same time. Expiration management only increases unit-level prices. It never reduces the price.

159. Every landlord can choose to use "market seasonality" to inform its lease expiration management. As the name suggests, market seasonality adjusts the landlord's prices based on how many of its competitors' units will be vacant—that is, *future supply*. This feature is popular among landlords. For example, one of the largest landlords in the United States uses it in 98% of its properties. Every single property that uses market seasonality is leveraging RealPage's access to this highly sensitive, nonpublic data about its competitors' supply to inform pricing. RealPage trains landlords to turn on market seasonality as a best practice.

160. When activated, the market seasonality function changes unit-level prices across the different possible lease terms *regardless* of whether the landlord accepts the AIRM or YieldStar floor plan price recommendation.

161. RealPage determines for landlords an important input into lease expiration management: the expirations threshold. This threshold influences the point at which expiration premiums are added. The threshold calculation relies on nonpublic lease transaction data for the property's submarket and pulls from numerous RealPage products, including YieldStar, AIRM, OneSite, Business Intelligence, and Performance Analytics with Benchmarking. Landlords cannot adjust the expirations threshold.

162. Fueled by competitor data, expiration management results in "increased stability" and "pricing power." Using competitors' data reduces the risk of overexposure that "could erode rent roll growth." By adjusting price recommendations based on how much total supply is forecast in the market for a given time period, AIRM empowers landlords to charge higher prices than they could without access to competitors' nonpublic data.

E. No Procompetitive Benefit Justifies, Much Less Outweighs, RealPage's Use of Competitively Sensitive Data To Align Competing Landlords

163. AIRM and YieldStar do not benefit the competitive process or renters. Any legitimate benefits of revenue management software can be achieved through less anticompetitive means, and any theoretical additional benefits of AIRM and YieldStar are not cognizable and outweighed by harm to the competitive process and to renters.

V. RealPage Uses Landlords' Competitively Sensitive Data To Maintain Its Monopoly and Exclude Commercial Revenue Management Software Competitors

164. Landlords are not the only ones that benefit from RealPage's rental pricing practices. RealPage benefits too through maintaining its monopoly over commercial revenue management software for conventional multifamily housing rentals. In that market, RealPage's internal documents reflect that it commands an 80% share.

165. RealPage's core value proposition creates a self-reinforcing feedback loop of data and scale advantages. The sharing of competitively sensitive information among rivals attracts more landlords that seek to maximize revenues and extract more money from renters. As a result of its exclusionary conduct, RealPage has been able to

obstruct rival software providers from competing on the merits via revenue management products that do not harm the competitive process.

166. Over time, RealPage has become more entrenched and has stymied alternatives unless they too enter into similar unlawful agreements with landlords to obtain and use nonpublic transactional data to price units. Even then, RealPage's unparalleled troves of competitively sensitive data provide an ill-gotten advantage.

A. Landlords Are Drawn to RealPage Because of Access to Nonpublic Transactional Data That Is Used To Increase Landlords' Revenue

167. Landlords prize RealPage's accumulation of nonpublic transactional data from competing landlords. For example, Greystar noted that "RealPage supplies the best set of transactional data available via their millions of units of data—this becomes a valuable source of truth to our competitive landscape." In a training document for its employees, the same landlord explained that "better data = better outcomes" and that AIRM has "over 15 million units of data available." From the perspective of Greystar, "pricing decisions start with data" and that precision in pricing "comes from data driven decisions." Importantly, the landlord believed that AIRM's ability to "examine data quality . . . each night" via its property management software integrations, including guest card entry, "plays an important role" in pricing.

168. As another example, Cushman & Wakefield identified this data as especially helpful in a dense market because of insights into competitors' actions in the market. The same landlord also concluded that the more data points, the better confidence a landlord has in RealPage's rental recommendations. According to Cushman & Wakefield, more data—especially data about concessions—enabled the landlord to make better decisions because it showed the landlord where the market stood. Cushman & Wakefield's director of revenue management explained to a colleague that YieldStar "collects about 14 MILLION transactional lease data across the US and has over 20 years of historical records." The director acknowledged that "[t]his is huge! Essentially, this is a window into the market and the shifts we are going to experience . . . Having insight into this data, allows [landlords] to make changes with the dynamic changes in the market."

169. Willow Bridge, who compared AIRM to another commercial revenue

management software product, noted that the competing product "is about half of the cost and does a good job in reviewing rents and making recommendations but does it without the additional reporting capabilities and market data that AIRM uses." Ultimately, this landlord decided to push their owner clients towards AIRM. The landlord's decision to use AIRM was in part based on receiving "more accurate and time sensitive data" and noted that, although revenue management is not changing, "the amount of data and how that information is used to grow revenue is bigger and better than ever" with AIRM.

170. Landlords want access to RealPage's transactional data because RealPage advertises, and landlords believe, that the use of this data will increase a landlord's revenue. "Due to the amount of data RealPage possesses," Greystar explained, RealPage developed AIRM "to leverage machine learning to improve both the supply and demand modeling and provide a tool to further customize to each asset's needs." The materials sent to the landlord's clients also included a flyer explaining that AIRM will "outperform the market 2–7% year over year" and that it provides "[a]ctionable intelligence derived from the industry's largest lease transaction database of 13M+ units."

171. Landlords view the lack of access to transactional data as a significant shortcoming in other commercial revenue management software. One landlord received a request from a property owner client for information on YieldStar and how it compared to another commercial revenue management product. A landlord executive explained that YieldStar was backed by robust data and "millions of units of transactional data to support not only their demand and forecast modeling but also their market/competitive set information." She concluded that the other revenue management software was "in a completely different class" than YieldStar. More than two years later, the same executive again concluded that this company's new revenue management product was inferior to AIRM because AIRM had far more transactional data, supported by RealPage's Market Analytics survey data. In another example, a different landlord compared multiple commercial revenue management products to RealPage's YieldStar. He concluded that a major weakness of these alternatives was that they lacked access to transactional data on competitors' rents.

B. RealPage's Collection and Use of Competitively Sensitive Data Excludes Competition in Commercial Revenue Management Software

172. RealPage recognizes the barriers to competition on the merits that its data, scale, and business model provide. RealPage understands that "pricing decisions start with data." RealPage explains to its clients that "[t]he data entered into your [property management software] and collected each night, along with current market data (and lead data if OneSite) provides insight into advantageous demand drivers, identifies revenue risk and opportunity, and captures this competitive landscape for informed pricing."

173. This data and scale advantage is significant and creates a feedback loop that further increases barriers to competition for commercial revenue management software. RealPage touts its access to an "unmatched database." In one case from 2023, a RealPage sales representative noted that RealPage's "revenue management is the most widely adopted solution in the industry" and RealPage had "approximately 4.8M units on revenue management." In a 2023 presentation for AIRM, RealPage advertised that the "[a]mount of data we have (~17mm units) is unique to RealPage" and that the "[q]uality of data is best in class given that it is 'Lease Transaction Data.'" RealPage claimed this "supports that fact that the industry views RealPage as the source of truth for performance data."

174. RealPage has used this competitively sensitive data to develop an AI-driven revenue management solution that leverages the scale and scope of its data. RealPage's plan to use this database as fuel for its AI pricing model is spelled out in a Go-To-Market summary from 2019. In that document, RealPage describes that:

RealPage can achieve \$10 Million in organic ACV growth through delivery of the next generation of revenue management. Failure to do so reduces the opportunity to harvest gains from our \$300M investment in LRO and places a portion of current \$100M revenue management revenue at risk to emerging competitors, including Yardi and low-cost alternatives that say 'all revenue management is the same.' Over time we can sunset YieldStar and LRO reducing expense, and leverage LRO capabilities as a revenue management lite offering.

175. This plan came to fruition with the introduction of AIRM. In a RealPage training presentation from February 2020—right before the launch of AIRM—RealPage discusses a new optimization solution that is built on the "RealPage Foundation" which is

defined as “13.5m units of lease transactional data informing our models with real actionable intelligence in near real time.” As described earlier in the deck, RealPage’s competitors “lack the foundational capabilities on which to build upon” leaving RealPage with the possibility “to tie together each capability . . . in a single view.”

176. RealPage knows that its rivals do not have access to similar data sets. In one presentation from 2022, RealPage discussed competing revenue management products from Yardi and Entrata. Yardi and Entrata have fewer than 250,000 units, RealPage concluded, while RealPage had at least 4 million. Unlike RealPage, Yardi had a limited data set that used data only from Yardi’s property management software. RealPage likewise explained that Entrata lacked much data outside of student housing and Entrata’s revenue management software worked only with its own property management software, meaning Entrata could not pull data from RealPage’s OneSite or other property management software products. RealPage further criticized manual in-house pricing options for having biased data, introducing errors through manual pricing, and being inefficient.

177. RealPage pitches prospective clients on its unique access to and use of nonpublic transactional data that is competitively sensitive. In 2021, RealPage discussed internally how to pitch AIRM to a prospective client who was considering an alternative revenue management solution. A RealPage employee pointed to the competitor’s lack of “AI driven competitor information derived from lease transaction data.” Another employee added that the salesperson should amplify the prospective client’s concerns about the competitor’s lack of nonpublic transactional data, comparing it to buying a “Ferrari without an engine.” RealPage’s chief economist concurred.

178. RealPage’s use of competitors’ nonpublic transactional data provides it an important advantage on pricing renewals. Information on renewals is not available publicly. Competing revenue management vendors who do not use nonpublic, competitively sensitive data are left partially blind to this important part of the rental market. In 2022, a RealPage salesperson stressed this advantage to a prospective client who was also considering a competing commercial revenue management solution. The salesperson noted the lease transaction data RealPage collected on a nightly basis and declared that RealPage had an

“unequaled ability to stress test renewals *nightly* and drive amenity optimization.”

179. RealPage recognizes that its use of competitively sensitive data minimizes any competitive pressure it faces. A RealPage senior vice president explained in a strategy document that RealPage’s unique nonpublic data on leasing decisions was a “data moat,” protecting RealPage from competitors. In 2020 RealPage’s chief economist noted that RealPage’s access to this data was a “major competitive advantage” and a “major reason we can do what we do.” In 2021 a prospective client asked RealPage why AIRM cost three times the amount of a competing revenue management product. Internally, a RealPage employee pointed to AIRM leveraging daily transactional data of over 13 million units to collect competitors’ rents and forecast demand. He noted that multiple large landlords had refused to adopt the competing revenue management product rather than AIRM even when the competitor offered it for free. The same RealPage employee explained to another client that RealPage’s leveraging of lease transaction data—with access to confidential data for over 14 million units—was a key advantage over a competing commercial revenue management provider.

180. In June 2023 a landlord emailed RealPage and asked, “who are your competitors?” A RealPage sales executive responded, “Our revenue management solution does not have any true competitors, mainly because our data is based on real lease transaction data from all kinds of third-party property management systems”

181. In addition, when discussing a potential entrant, a RealPage executive noted that the entrant needed “to get the data to enable [revenue management].” He further noted that [g]etting the data (and more modern methods) . . . will be hurdles for [the entrant].” Another RealPage senior executive explained that shifting clients from LRO, which is less reliant on competitively sensitive information of rivals, to AIRM, which is very reliant on such information, reduced the threat from new entry when she noted that migrating LRO clients to AIRM was “critical to reducing the risk that may come from this new [entrant’s] offering.”

182. RealPage’s power and conduct in connection with commercial revenue management software serves to exclude rivals and maintain its monopoly power. RealPage has ensured rivals cannot compete on the merits unless they enter into similar agreements with landlords, offer to share competitively

sensitive information among rival landlords, and engage in actions to increase compliance. As a result of its exclusionary conduct, RealPage has been able to obstruct rival software providers from competing via revenue management products that do not harm the competitive process in addition to cementing its massive data and scale advantage that keeps increasing due to feedback effects.

VI. Relevant Markets

A. Conventional Multifamily Rental Housing Markets

1. Product Markets

183. Conventional multifamily rental housing is a relevant product market. Conventional multifamily rental housing includes apartments available to the general public in properties that have five or more living units. Conventional rental housing does not include student housing, affordable housing, age-restricted or senior housing, or military housing. This product market reflects consumer preferences, industry practice, and governmental policy.

184. In 2023, RealPage estimated the conventional multifamily rental market to cover approximately 14 million units. The 2021 American Housing Survey estimated a total of 21.1 million multifamily apartments—not limited to conventional—in the United States.

(a) Conventional Multifamily Rentals Are Distinct From Other Types of Multifamily Housing

185. Other types of multifamily apartment buildings are not good substitutes for conventional multifamily rentals. Some kinds of multifamily buildings are restricted to specific types of renters, such as student housing units, affordable housing units (*i.e.*, income-restricted housing), senior (*i.e.*, age-restricted) housing, and military housing. These housing units focused on different classes of renters are not reasonable substitutes for conventional multifamily rentals. RealPage distinguishes conventional multifamily as being in a different market segment from senior, affordable, and student housing in the ordinary course of business.

186. Non-conventional units are not widely available to all renters and can exhibit different buying patterns. For example, student housing serves individuals enrolled in higher education and is typically located on or near universities. Student housing is typically leased by the bed instead of by unit, and faces a significantly different leasing cycle and different patterns in

renewals and leasing practices. Recognizing these differences, RealPage will assign to student properties surrogates that are distant student assets rather than nearby conventional assets. RealPage in fact offers a different version of both AIRM and OneSite, its property management software, for the “student market.”

187. Affordable housing units are available only to individuals or households whose income falls below certain thresholds. Multiple federal affordable housing regulations, for example, require participants in affordable housing programs to have incomes lower than a set percentage, such as 30%, of the median family income in the local area. Affordable housing units are also relatively scarce, with families seeking such housing often waiting years on a waitlist. These legal and practical restrictions prevent affordable housing from being a reasonable substitute to conventional multifamily housing for the typical renter.

188. Senior housing is typically restricted to individuals aged 55 and older. RealPage separates senior housing into four categories: independent living, assisted living, memory care, and nursing care. Independent living offers senior-focused amenities—such as transportation, meals, and social gatherings among community members—that materially increase housing costs and are less desirable to younger households. The other three categories of senior housing provide professional or special care to assist renters with basic tasks like eating, bathing, and dressing, and they are not reasonable substitutes for conventional multifamily rentals.

189. Military housing is also not a reasonable substitute to conventional multifamily rentals. It is typically geographically proximate to military installations, with roughly 95% of military housing found on-base. Although civilians may in some cases be able to live in military housing properties experiencing low occupancy rates, military regulations place them below five higher-priority categories of potential renters, including active and retired military personnel.

(b) Single-Family Housing Is Not A Reasonable Substitute to Multifamily Rentals

190. The multifamily industry, government regulators, and policy documents distinguish between

properties with at least five units, which are classified as “multifamily housing” and those with fewer units, which are classified as “single-family rentals.”

191. The purchase of single-family or other types of homes is not a reasonable substitute for conventional multifamily housing rentals. A former RealPage economist explained that “the choice between renting and owning is first and foremost a life stage and lifestyle choice over a financial one.” Single-family homes also generally require a substantial down payment. In March 2023, a RealPage economist estimated an “entry premium” of \$800 per month to home ownership over rentals. According to a 2021 RealPage strategic planning guide, the “myth” that people were abandoning multifamily properties for single-family homes is false, stating that “rising home sales do not hurt apartment demand.” Single-family home sales are not reasonable substitutes for conventional multifamily housing.

192. More broadly, renters living in conventional multifamily apartments will not switch to single-family homes—purchases or rentals—because of a small increase in rent. The decision to move from an apartment building to a single-family home is primarily a life-stage and lifestyle choice. For example, the decision by a household to have children may spur a move to a single-family home. In many areas, relatively few children live in conventional multifamily apartments. Multifamily apartments typically offer community amenities and a different lifestyle, such as high walkability in an urban area, whereas single-family homes generally do not offer the same amenities and offer instead increased privacy, including private yards. A RealPage analyst explained in 2022 that because a move to a single-family home is a “lifestyle choice,” single-family home rentals were not direct competitors to multifamily rental housing. A 2022 RealPage deck, shared with a landlord, stated that multifamily rentals and single-family rentals were “complementary, not competitive,” and targeted different renters, with different floor plans, in different locations. Another RealPage analyst explained to a multifamily property owner that single-family rentals offer a different renter profile than multifamily rentals.

193. Industry participants agree that single-family rentals attract a different pool of renters from multifamily rentals. A managing director of a single-family

rental property management company explained in 2021 that a renter’s journey from multifamily apartment living to single-family rentals came as life stages evolved. The CEO of a single-family rental developer similarly explained that these single-family rental homes are for renters who age out of multifamily apartments.

194. Single-family rentals are also typically priced higher than multifamily apartments, further reducing potential substitution between them. The chairman of one institutional multifamily property owner explained in a 2022 earnings call that multifamily housing was relatively affordable compared to single-family rentals. An industry price index showed that, in March 2024, single-family rent was approximately 18% higher than multifamily rent.

(c) Conventional Multifamily Rental Units With Different Bedroom Counts Are Relevant Product Markets

195. Different bedroom floor plans also constitute relevant product markets. A key criterion by which a current or prospective renter searches for a rental unit is the number of bedrooms. One-bedroom units are substitutes for other one-bedroom units, two-bedroom units are substitutes for other two-bedroom units, and so forth. Individual renters may change their desired numbers of bedrooms, but this is typically tied to changes in circumstance independent from price. For example, the birth of a new child may require a family to shift from a one-bedroom unit to a two-bedroom unit.

196. RealPage adopts this practical reality in the ordinary course of business. For every property using AIRM or YieldStar, RealPage maps peer floor plans. These mapped floor plans capture reasonable substitutes for the subject property floor plan and reflect the perceived market by a prospective renter.

197. To be selected as a peer, a floor plan must have the same number of bedrooms. A RealPage employee explained the mapping process to a client: “we are looking specifically at the bedroom level. The tool will only map 2b[edroom] with 2b[edroom] or 1b[edroom] with 1b[edroom].” The object of mapping peers is to mirror the prospect buying experience by identifying properties that a potential tenant will see in online searches when searching for a particular floor plan and price range.

198. AIRM and YieldStar price the different floor plans, which consist of different numbers of bedrooms, independently. RealPage testified that the model considers no cross-price elasticity between different floor plans: “when you set up the different floor plans, a one bedroom, a two bedroom, or three bedroom, those are completely independent. . . . [T]here’s no influence in what the pricing is for the two bedrooms, for example. . . . has no influence on what the pricing is for the one bedrooms.” Landlords also take steps to maintain a pricing spread between one- and two-bedroom units and avoid pricing one-bedrooms at a higher rate than two-bedroom units.

199. Landlords recognize that units with different bedroom counts face different demand from renters. For example, Greystar explained internally in 2022 that demand for studio apartments differs from demand for three-bedroom units. A separate 2023 training by Greystar reiterated that demand trends, and therefore pricing trends, differ by bedroom counts and that staff should not react to a downward trend in one category, such as two bedrooms, with discounts in one- or three-bedroom units. At another time, Greystar emphasized the benefit of RealPage’s lease expiration management feature because it is managed at the bedroom level—not at the property level—so it could match seasonal demand for units with that specific number of bedrooms. A revenue manager at Willow Bridge similarly

explained to colleagues that one-bedroom units have drastically different demand patterns from two-bedroom units and from three-bedroom units.

2. Geographic Markets

200. Defining relevant geographic markets help courts assess the potential anticompetitive impact of the agreements challenged. Here, the relevant geographic markets for the purposes of analyzing the anticompetitive effects of RealPage’s agreements with landlords are the areas in which the sellers (the landlords) sell and in which the purchasers (potential renters) can practicably turn for alternatives. RealPage’s agreements are alleged to have suppressed price competition in the markets for conventional multifamily housing. The relevant geographic markets to assess those agreements are those property locations close enough for their apartments to be considered reasonable substitutes. In delineating a geographic market for conventional multifamily housing, the focus is inherently local. Renters are typically tied to a particular location for work, family, or other needs.

201. RealPage recognizes the local nature of geographic markets. One RealPage former employee explained that under “Real Estate 101 rules, real estate is local, local, local.” Another RealPage former chief economist noted that an effective evaluation of a property’s performance must be done in comparison to similar properties in the

property’s neighborhood because competitive conditions in the neighborhood could differ widely from the city at large. When training landlords on lease expiration management, two RealPage executives explained that market seasonality was based on the most accurate geographic level, such as zip code, neighborhood, or submarket. They further explained that renters typically move locally. Similarly, a former property manager explained that potential tenants will look at a small number of properties in the same neighborhood, and it is on that neighborhood level where competition occurs among multifamily properties. This individual testified, “location really does matter in real estate.”

202. RealPage has created a tool called True Comps. Used in performance benchmarking products that provide decisional support to AIRM and YieldStar, True Comps provides a more accurate mapping of competitor properties. It uses an algorithm to find the properties most comparable to the subject property, as measured by characteristics including distance, effective rent, age, property height, and unit count and mix. By default, True Comps picks competitors within a 15-mile radius. In scoring distance, True Comps applies a “highly-punitive model”—the distance score drops from 99% for a distance of 0.05 miles, to 56% for a distance of 2 miles, and to 10% for a distance of 8 miles. Thus, RealPage acknowledges and incorporates small geographic areas as the appropriate

location in which to find true competitive alternatives.

203. During a property's implementation process, AIRM and YieldStar require the mapping of peer properties, including competitors. RealPage starts by looking for competitors within a half-mile radius from the subject property and then expands as necessary. Geographic proximity is in fact so important that YieldStar has a default radius that limits its search for competing properties to no more than 5 miles in urban settings, and to no more than 10 miles in suburban settings. RealPage has an internal process for escalating any proposed peer property that is more than 15 miles away.

(a) RealPage-Defined Submarkets Identify Relevant Geographic Markets

204. RealPage defines geographic submarkets in the ordinary course of business. Each submarket reflects the geographic area, defined by a set of zip codes, that features similar properties that compete for the same pool of potential renters. In constructing submarkets, which are generally larger than its neighborhoods, RealPage considers major roads, city and county boundaries, and school districts. RealPage also considers socioeconomic factors and apartment market characteristics, such as the age of properties and rental rates.

205. Even within a city, apartment demand varies significantly based on factors such as employment. Supply may also vary widely as existing properties and new construction may be located in different parts of a city. A former RealPage chief economist explained that because "real estate is very local . . . you typically want to take a . . . more narrow view if you can on what's going on in any given submarket."¹⁰

206. The multifamily industry recognizes submarkets as an important geographic area for analyzing competition and pools of renters. Multiple industry analysts offer data by submarkets. A revenue management director at Greystar testified about a submarket that "everybody in our industry uses this term." She further stated that submarkets are a standard

categorization system, used by RealPage and others, including to benchmark a subject property's performance with comparable properties. A revenue manager at Cushman & Wakefield circulated a scorecard comparing performance to the submarket, and exclaimed that "we're perfectly aligned with the submarket" on rent roll.

207. A revenue management executive at Willow Bridge testified that submarkets identify specific, smaller areas of a city where renters look to live to be close to schools or work. This executive testified that submarkets typically identify the area within which a renter is comparing apartment options. This landlord tracks other properties' rents in a subject property's submarket to make sure the subject property remains competitive, and if rents in a submarket increased, then the landlord expected that its property in that submarket would also raise its rents.

208. Appendix A lists RealPage-defined submarkets that identify relevant local markets in which the agreements among RealPage and landlords to share nonpublic, competitively sensitive information for use in pricing conventional multifamily rentals have harmed, or are likely to harm, competition and thus renters.

209. The RealPage-defined submarkets identified in Appendix A are relevant markets in which the agreements between RealPage and AIRM and YieldStar users to align pricing has harmed, or is likely to harm, competition and thus renters. In each of these markets, the penetration rate for AIRM and YieldStar ranges from at least around 26% to 69%, and for AIRM, YieldStar, and OneSite ranges from at least around 30% to 78%.¹¹ In each of these markets, the landlords using AIRM or YieldStar and/or sharing competitively sensitive information collectively have market power.

210. Appendix B identifies submarkets by bedroom count that are relevant markets in which the agreements between RealPage and

landlords, and agreements among landlords, to share nonpublic, competitively sensitive information for use in pricing conventional multifamily rentals have harmed, or are likely to harm, competition and thus renters.

211. The markets identified in Appendix B are relevant markets in which the agreements between RealPage and AIRM and YieldStar users to align pricing collectively have harmed, or are likely to harm, competition and thus renters. In each of these markets, the penetration rate for AIRM and YieldStar ranges from at least around 26% to 79%, and for AIRM, YieldStar, and OneSite ranges from at least around 30% to over 80%. In each of these markets, the landlords using AIRM or YieldStar and/or sharing competitively sensitive information collectively have market power.

(b) Core-Based Statistical Areas (CBSAs) Are Relevant Geographic Markets

212. A core-based statistical area (CBSA) is also a relevant geographic market. A CBSA is a geographic area based on a county or group of counties. A CBSA has at least one core of at least 10,000 individuals. A CBSA includes adjacent counties that have a high degree of social and economic integration with the core, as measured by commuting ties. A CBSA includes both metropolitan statistical areas and micropolitan statistical areas. A CBSA includes the set of reasonable conventional multifamily rental alternatives to which a renter would turn in response to a small but significant, nontransitory price increase.

213. RealPage itself tracks CBSAs in the ordinary course of business and refers to them as "markets."

214. Table 1 identifies relevant markets in which the agreements between RealPage and landlords, and agreements among landlords, to share nonpublic, competitively sensitive information for use in pricing conventional multifamily rentals collectively have harmed, or are likely to harm, competition and/or consumers. In each of these markets, the penetration rate for AIRM and YieldStar ranges from at least around 26% to 37%, and for AIRM, YieldStar, and OneSite ranges from at least around 35% to 45%. Three of these markets are located in North Carolina.

¹¹ Including penetration rates for RealPage's Business Intelligence and Performance Analytics with Benchmarking products, which landlord users agree to share nonpublic data with RealPage that RealPage then uses in AIRM and YieldStar, would increase the data penetration rates subject to unlawful agreements for these and all other relevant conventional multifamily rental housing markets identified in the Complaint.

¹⁰ RealPage also tracks data at a more granular level than a submarket, called a neighborhood.

TABLE 1—CORE-BASED STATISTICAL AREA (CBSA) MARKETS

Core-based statistical area (CBSA) markets	YS/ AIRM 30% or more	YS/AIRM/ OneSite 30% or more
Atlanta-Sandy Springs-Roswell, GA	Yes	Yes.
Austin-Round Rock, TX	Yes	Yes.
Charleston-North Charleston, SC	Yes	Yes.
Charlotte-Concord-Gastonia, NC-SC	Yes	Yes.
Dallas-Fort Worth-Arlington, TX	Yes	Yes.
Denver-Aurora-Lakewood, CO	Yes	Yes.
Durham-Chapel Hill, NC	Yes	Yes.
Nashville-Davidson—Murfreesboro—Franklin, TN	Yes	Yes.
Orlando-Kissimmee-Sanford, FL	Yes	Yes.
Raleigh, NC	Yes	Yes.

215. The markets identified in Table 1 are relevant markets in which the agreements between RealPage and AIRM and YieldStar users to align pricing collectively have harmed, or are likely to harm, competition and thus renters.

216. Table 2 identifies relevant CBSAs by bedroom counts that are relevant

markets in which the agreements between RealPage and landlords, and agreements among landlords, to share nonpublic, competitively sensitive information for use in pricing conventional multifamily rentals collectively have harmed, or are likely

to harm, competition and/or consumers. In each of these markets, the penetration rate for AIRM and YieldStar ranges from at least around 27% to 42%, and for AIRM, YieldStar, and OneSite ranges from at least around 33% to 45%.

TABLE 2—CORE-BASED STATISTICAL AREA (CBSA) MARKETS BY BEDROOM COUNT

Core-based statistical area (CBSA) markets	Number of Beds	YS/AIRM 30% or more	YS/AIRM/ OneSite 30% or more
Atlanta-Sandy Springs-Roswell, GA	1	Yes	Yes.
Atlanta-Sandy Springs-Roswell, GA	2	Yes	Yes.
Austin-Round Rock, TX	1	Yes	Yes.
Austin-Round Rock, TX	2	Yes	Yes.
Charleston-North Charleston, SC	1	Yes	Yes.
Charleston-North Charleston, SC	2	Yes	Yes.
Charlotte-Concord-Gastonia, NC-SC	1	Yes	Yes.
Charlotte-Concord-Gastonia, NC-SC	2	Yes	Yes.
Dallas-Fort Worth-Arlington, TX	1	Yes	Yes.
Dallas-Fort Worth-Arlington, TX	2	Yes	Yes.
Denver-Aurora-Lakewood, CO	1	Yes	Yes.
Denver-Aurora-Lakewood, CO	2	Yes	Yes.
Durham-Chapel Hill, NC	1	Yes	Yes.
Durham-Chapel Hill, NC	2	Yes	Yes.
Nashville-Davidson—Murfreesboro—Franklin, TN	1	Yes	Yes.
Nashville-Davidson—Murfreesboro—Franklin, TN	2	Yes	Yes.
Orlando-Kissimmee-Sanford, FL	1	Yes	Yes.
Orlando-Kissimmee-Sanford, FL	2	Yes	Yes.
Raleigh, NC	1	Yes	Yes.
Raleigh, NC	2	Yes	Yes.

217. The markets identified in Table 2 are relevant markets in which the agreements between RealPage and AIRM and YieldStar users to align pricing collectively have harmed, or are likely to harm, competition and thus renters.

218. Even assuming available land and no regulatory constrictions, local markets for conventional multifamily rental housing feature substantial barriers to entry. Landlords seeking to respond to rising rental prices by expanding supply, rather than simply acquiring an existing property, typically face substantial lead times to construct a new multifamily property.

Additionally, there are significant upfront capital costs, including to fund expenditures on building material and labor, that are recuperated over time, which may require landlords to secure financing.

B. Commercial Revenue Management Software Market

219. RealPage has monopoly power in the market for commercial revenue management software for conventional multifamily housing rentals in the United States, with a durable market share over 80%, according to internal documents and other information.

1. Product Market

220. Commercial revenue management software for conventional multifamily housing rentals is a relevant antitrust product market.

221. Other methods for pricing conventional multifamily housing units are not reasonable substitutes for commercial revenue management software. RealPage and others in the industry recognize that revenue management software companies for multifamily housing units compete primarily against each other and not manual or do-it-yourself pricing methods.

222. Internal documents from RealPage refer specifically to commercial revenue management for multifamily housing and recognize RealPage's substantial market share. For example, a 2021 strategy presentation described RealPage as "the market leader in commercial revenue management for multifamily [housing] with 45 of the 50 Top NMHC Owner and Operators" all using RealPage's revenue management products.

223. A presentation to RealPage's board in 2022 noted that "[RealPage] has gained [the] pole position in Revenue Management largely through the success of AI Revenue Management, which has become RealPage's leading differentiating product." Additionally, the presentation described how "Revenue Management is experiencing strong growth driven by AIRM" due to its "PMS agnostic approach" which gives RealPage the ability to aggregate data from its clients resulting in "revenue management [that] has achieved a market share of 95% of the top 50 owners and operators."

224. RealPage acknowledges its market power and durable market position. A 2023 RealPage presentation reviewing the use of artificial intelligence in property technology noted that "RealPage is already the de facto market leader in certain key areas at leveraging AI for multifamily proptech" and shows "revenue management" as the area where it is the furthest ahead." Later, the same presentation noted that RealPage's current offer for revenue management is "best-in-class" and that "[n]o other company is cross-pollinating their pricing tools with data in a way similar to [RealPage]." As early as 2019, a RealPage presentation for clients stated that RealPage "has around 80% of the Revenue Management market share." That share has proved durable over time. In 2023, during a sales pitch to a property owner, a RealPage representative noted that "[RealPage] has 80% to 85% of the market share with the closest competitor around 12% (<750K units)."

225. In late 2021, a RealPage employee preparing competitor intelligence explained to RealPage's chief economist that RealPage "dominate[d]" revenue management. He added that RealPage "dominate[d]" Yardi and Entrata, which are the next two largest commercial revenue management competitors.

226. RealPage's monopoly power is protected by barriers to entry, including the unlawful collection and use of competitors' nonpublic transactional data on millions of multifamily units.

227. Landlords also recognize RealPage's substantial market share and market power over commercial revenue management software. In 2024, a landlord revenue management executive testified that manual pricing does not compete with AIRM. The same landlord pitched YieldStar to its owner clients by explaining that "it's evident manual pricing cannot solve at the level a revenue management tool can."

228. In a 2023 pricing dispute with a large landlord, RealPage refused to lower the price for its AIRM software. In response, an employee employed by the landlord noted that it was no surprise they would not decrease their price, remarking that "[h]ere is the joy of a monopoly on a product category." In 2021, a different landlord commented that "the entire industry is feeling the monopolizing effects of RealPage right now and everyone is hungry for a new product." A third landlord noted during AIRM renewal negotiations in 2022 that it had no options besides RealPage, with a senior executive stating about RealPage, "too bad they have a monopoly going here!" Also in 2022, a fourth landlord, in the face of RealPage pushing a 400% increase in annual revenue management costs over a five-year period, bemoaned the "limited competition in the market around revenue management tools" and how "the industry desperately needs a solid competitor," and then discussed a plan to "incubate a viable alternative to AIRM in the future." In 2024, that alternative had less than one half of one percent market share.

2. Geographic Market

229. The United States is a relevant geographic market for commercial revenue management software. RealPage sells its commercial revenue management software in the United States and tracks its business in the United States in the ordinary course of business. RealPage sets its subscription prices on a nationwide basis. Further, RealPage can deploy its commercial revenue management software, which may use inputs from properties located throughout the country, in any U.S. state. Landlords in the United States purchase commercial revenue management software from RealPage to set rental prices for renters in the United States. Many landlords have centralized revenue management teams that set nationwide revenue management policies and conduct revenue management trainings for their employees across the United States.

VII. Jurisdiction, Venue, and Commerce

230. The United States brings this action pursuant to Section 4 of the Sherman Act, 15 U.S.C. 4, to prevent and restrain RealPage's violations of Sections 1 and 2 of the Sherman Act, 15 U.S.C. 1, 2.

231. The Attorneys General assert these claims based on their independent authority to bring this action pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26, and common law, to obtain injunctive and other equitable relief based on RealPage's anticompetitive practices in violation of Sections 1 and 2 of the Sherman Act, 15 U.S.C. 1, 2.

232. The Attorneys General are the chief legal officers of their respective States. They have authority to bring actions to protect the economic well-being of their States and their residents, and to seek injunctive relief to remedy and protect against harm resulting from violations of the antitrust laws.

233. This Court has subject matter jurisdiction over this action under Section 4 of the Sherman Act, 15 U.S.C. 4, and 28 U.S.C. 1331, 1337(a), and 1345.

234. The Court has personal jurisdiction over RealPage, Inc. ("RealPage"); venue is proper in this District under Section 12 of the Clayton Act, 15 U.S.C. 22, and under 28 U.S.C. 1391 because RealPage transacts business and resides within this District.

235. RealPage is a privately-owned company organized and existing under the laws of the State of Delaware and is headquartered in Richardson, Texas. It is registered to do business in the State of North Carolina as a foreign corporation offering software solutions for the multifamily housing industry and software as a service.

236. RealPage engages in, and its activities substantially affect, interstate trade and commerce. RealPage provides a range of products and services that are marketed, distributed, and offered to consumers throughout the United States and across state lines.

237. The Court has personal jurisdiction over Camden Property Trust ("Camden"); venue is proper in this District under Section 12 of the Clayton Act, 15 U.S.C. 22, and under 28 U.S.C. 1391 because Camden transacts business and resides within this District.

238. Camden is a publicly-traded multifamily company organized under the laws of the State of Delaware and is headquartered in Houston, Texas. Camden is registered to do business in the State of North Carolina. Camden owns or manages at least one

multifamily rental property using AIRM within this District.

239. Camden engages in, and its activities substantially affect, interstate trade and commerce. Camden owns or manages multifamily rental units across the United States, including within this District. Camden's rental properties are marketed and offered to consumers throughout the United States and across state lines.

240. The Court has personal jurisdiction over Cortland Management, LLC ("Cortland"); venue is proper in this District under Section 12 of the Clayton Act, 15 U.S.C. 22, and under 28 U.S.C. 1391 because Cortland transacts business and resides within this District.

241. Cortland is a privately-owned company organized under the laws of the State of Delaware and is headquartered in Atlanta, Georgia. Cortland is responsible for the management of multifamily rental housing properties, either directly owned by an affiliated entity or other third-party owners of multifamily housing properties. Cortland is registered to do business in the State of North Carolina. Cortland owns or manages multiple multifamily rental properties within this District, which use (or recently used) AIRM. Cortland has a registered agent for service of process in this District.

242. Cortland engages in, and its activities substantially affect, interstate trade and commerce. Cortland owns or manages multifamily rental units across the United States, including within this District. Cortland's rental properties are marketed and offered to consumers throughout the United States and across state lines.

243. The Court has personal jurisdiction over Cushman & Wakefield, Inc. ("Cushman & Wakefield") and Pinnacle Property Management Services, LLC ("Pinnacle"); venue is proper in this District under Section 12 of the Clayton Act, 15 U.S.C. 22, and under 28 U.S.C. 1391 because Cushman & Wakefield, including its subsidiary Pinnacle, transacts business and resides within this District.

244. Cushman & Wakefield is organized under the laws of the State of New York and is headquartered in Chicago, Illinois. Cushman & Wakefield's multifamily rental property business is operated through its subsidiary Pinnacle, and also under the Cushman & Wakefield name since acquiring Pinnacle in March 2020. Pinnacle is organized under the laws of the State of Delaware and is headquartered in Frisco, Texas. Pinnacle is registered to do business in

the State of North Carolina. Cushman & Wakefield U.S., Inc. is also registered to do business in the State of North Carolina. Pinnacle owns or manages multiple multifamily rental properties using YieldStar within this District.

245. Cushman & Wakefield engages in, and its activities substantially affect, interstate trade and commerce. Through Pinnacle, Cushman & Wakefield owns or manages multifamily rental units across the United States, including within this District. Cushman & Wakefield provides a range of multifamily property and revenue management services that are marketed and offered to consumers throughout the United States and across state lines.

246. The Court has personal jurisdiction over Greystar Real Estate Partners, LLC ("Greystar"); venue is proper in this District under Section 12 of the Clayton Act, 15 U.S.C. 22, and under 28 U.S.C. 1391 because Greystar transacts business and resides within the District.

247. Greystar is a privately-owned company organized under the laws of the State of Delaware and is headquartered in Charleston, South Carolina. A Greystar management services entity is registered to do business in the State of North Carolina. Greystar owns or manages multiple multifamily rental properties using AIRM within this District.

248. Greystar engages in, and its activities substantially affect, interstate trade and commerce. Through its subsidiaries, including Greystar Management Services, LLC, Greystar North America Holdings, LLC, and GREP Washington, LLC, Greystar owns or manages multifamily rental units across the United States, including within this District. Greystar provides a range of products and services that are marketed and offered to consumers throughout the United States and across state lines.

249. The Court has personal jurisdiction over LivCor, LLC ("LivCor"); venue is proper in this District under Section 12 of the Clayton Act, 15 U.S.C. 22, and under 28 U.S.C. 1391 because LivCor transacts business and resides within this District.

250. LivCor is a privately-owned company organized under the laws of the State of Delaware and is headquartered in Chicago, Illinois. It is registered to do business in the State of North Carolina as a foreign corporation engaging in ownership and investment in real property and related services. LivCor owns or provides asset management services at least one multifamily rental property using AIRM within this District.

251. LivCor engages in, and its activities substantially affect, interstate trade and commerce. LivCor owns or provides asset management services for multifamily rental units across the United States, including within this District. LivCor provides multifamily asset management services that are marketed and offered to consumers throughout the United States and across state lines.

252. The Court has personal jurisdiction over Willow Bridge Property Company LLC ("Willow Bridge"); venue is proper in this District under 28 U.S.C. 1391 and Section 12 of the Clayton Act, 15 U.S.C. 22 because Willow Bridge transacts business and resides within this District.

253. Willow Bridge is a privately-owned company organized under the laws of the State of Texas and is headquartered in Dallas, Texas. Willow Bridge is registered to do business in the State of North Carolina as a foreign corporation offering services for the multifamily real estate industry. Willow Bridge owns or manages multiple multifamily rental properties using AIRM within this District.

254. Willow Bridge engages in, and its activities substantially affect, interstate trade and commerce. Willow Bridge owns or manages multifamily rental units across the United States, including within this District. Willow Bridge's rental properties are marketed and offered to consumers throughout the United States and across state lines.

255. The Durham-Chapel Hill CBSA is partially or entirely within the Middle District of North Carolina.

256. RealPage tracks the number of rental housing units that use its commercial revenue management software products, including AIRM and YieldStar, by market (*i.e.*, a CBSA) and submarket, and several of these markets and submarkets are entirely or partially within North Carolina. These RealPage-defined markets include Raleigh/Durham, NC; Charlotte-Concord-Gastonia, NC-SC; Greensboro/Winston-Salem, NC; Wilmington, NC; Fayetteville, NC; and Asheville, NC. The submarkets include Southwest Durham, Northwest Durham/Downtown, East Durham, and Chapel Hill/Carrboro, all of which are located entirely or partially within this District.

257. Defendant Landlords each own or manage one or more properties in one or more relevant markets within the Middle District of North Carolina for which they, along with other landlords and RealPage, currently agree (or have in the past agreed) to share information and align pricing by using AIRM or YieldStar to generate rental pricing

using pooled, competitively sensitive information.

258. A substantial part of the activities and conduct giving rise to the claims asserted in this Complaint occurred within this District. As alleged in paragraphs 208–211 above and Appendices A and B below, relevant local geographic markets in which competition and renters have been harmed by RealPage’s anticompetitive conduct include the RealPage-defined submarkets in Raleigh/Durham. As alleged in paragraphs 214–217 above, relevant geographic markets in which competition and renters have been harmed by RealPage’s anticompetitive conduct include the Durham–Chapel Hill CBSA.

VIII. Violations Alleged

First Claim for Relief: Violation of Section 1 of the Sherman Act by Unlawfully Sharing Information for Use in Competitors’ Pricing

(By All Plaintiffs Against RealPage, Cushman & Wakefield, Greystar, LivCor, and Pinnacle; By All Plaintiffs Except Washington Against Camden and Willow Bridge; By the United States, Colorado, and North Carolina Against Cortland)

259. Plaintiffs incorporate the allegations of paragraphs 1 through 258 above.

260. Each landlord using AIRM and YieldStar, including each Defendant Landlord, has agreed with RealPage to provide RealPage daily nonpublic, competitively sensitive data. RealPage invites each landlord to share this information so that it can be pooled to generate pricing recommendations for the landlord and its competitors. Each of these landlords, including Defendant Landlords, uses (or has used) RealPage software, knowing or learning that RealPage will use this data to train its models and provide floor plan price recommendations and unit-level pricing not only for the landlord, but for the landlord’s competitors (and vice versa). Landlords are therefore joining together in a way that deprives the market of fully independent centers of decision-making on pricing.

261. Each landlord using OneSite, Business Intelligence, or Performance Analytics with Benchmarking has agreed with RealPage to provide RealPage daily nonpublic, competitively sensitive data. RealPage invites each landlord to share this information, and each of these landlords understands that RealPage will use this data in RealPage’s other products, including revenue management products that provide

pricing recommendations and prices to competing landlords.

262. The transactional data these landlords agree to provide to RealPage, and indirectly to each other, includes current, forward-looking, granular, and highly competitively sensitive information. It includes information on effective rents, rent discounts, occupancy rates, availability, lease dates, lease terms, unit amenities, and unit layouts. Landlords also shared information on guest cards and lease applications.

263. Landlords, including Defendant Landlords and other landlords that compete with each other in the relevant markets alleged, have agreed with one another, through RealPage and directly, to exchange nonpublic, competitively sensitive data, both through RealPage’s revenue management software and by other means. The other means include RealPage user groups, direct communications, market surveys, and other intermediaries. The information exchanged includes future pricing plans, current pricing and occupancy rates, pricing discounts, and guest traffic.

264. RealPage uses this nonpublic, competitively sensitive data to train its AIRM models and provide floor plan price recommendations and unit-level pricing to AIRM- and YieldStar-using landlords. AIRM and YieldStar are designed to increase prices as much as possible and minimize price decreases.

265. RealPage engages in a variety of conduct to increase compliance with the output of its products and the objectives it touts.

266. The sharing of nonpublic, competitively sensitive data with RealPage, and its use in AIRM and YieldStar, is anticompetitive. It harms or is likely to harm the competitive process and results, or is likely to result, in harm to renters and prospective renters in at least the relevant antitrust markets identified in this complaint.

267. In each relevant market, RealPage and participating landlords collectively have sufficient market power, including market and data penetration, to harm the competitive process and renters.

268. AIRM and YieldStar do not benefit the competitive process or renters. Any theoretical benefits are outweighed by harm to the competitive process and to renters.

269. Less restrictive alternatives are available to RealPage and the market. RealPage has recently altered AIRM or YieldStar for some clients to remove those clients’ access to competitors’ nonpublic data in at least certain portions of the software. RealPage has the ability to make changes to remove

broader access to competitors’ nonpublic data in AIRM and YieldStar. RealPage has the capability to modify its software products to eliminate competitive defects. LRO does not require the same type and quantity of nonpublic, transactional data pulled from competitors’ property management software.¹² RealPage has stopped offering LRO to new clients and made plans to discontinue LRO for legacy clients by the end of 2024.

Second Claim for Relief: Violation of Section 1 of the Sherman Act Through Agreements to Align Pricing

(By All Plaintiffs Against RealPage, Cushman & Wakefield, Greystar, LivCor, and Pinnacle; By All Plaintiffs Except Washington Against Camden and Willow Bridge; By the United States, Colorado, and North Carolina Against Cortland)

270. Plaintiffs incorporate the allegations of paragraphs 1 through 268 above.

271. Each landlord, including Defendant Landlords, that licenses AIRM or YieldStar has agreed with RealPage to use the software as it has been designed. This includes providing nonpublic, competitively sensitive transactional data to RealPage, but more broadly is an agreement to use AIRM or YieldStar as the means to price the landlord’s rental units. The landlord agrees to review AIRM or YieldStar floor plan price recommendations, use AIRM or YieldStar to set a scheduled floor plan rent, and use the AIRM or YieldStar pricing matrix to price units to renters.

272. AIRM and YieldStar are designed to “raise the tide” for all landlords, including AIRM- and YieldStar-using landlords. AIRM and YieldStar have the likely effect of aligning users’ pricing processes, strategies, and pricing responses.

273. These landlords understand this effect, and it is a reason why they sign up for and use AIRM or YieldStar and discuss their usage with one another in user group meetings and other settings.

274. RealPage engages in a variety of conduct to increase compliance with the output of its products and the objectives it touts.

275. RealPage’s user group meetings and its revenue management certification program facilitate landlords’ agreements with RealPage to align pricing.

276. Taken together, the agreements between each AIRM or YieldStar

¹² Landlords may nevertheless use LRO in ways that may likely harm competition, as illustrated in paragraphs 59–60 and 100 above.

landlord and RealPage to use AIRM or YieldStar, respectively, harm or are likely to harm the competitive process and renters.

277. The agreement by a landlord to use AIRM or YieldStar is an agreement to align users' pricing processes, strategies, and pricing responses. Collectively, these agreements between landlords using AIRM or YieldStar and RealPage are harmful to the competitive process and to renters.

278. In each relevant submarket and CBSA, RealPage and participating AIRM or YieldStar landlords collectively have sufficient market power, including market and data penetration, to harm the competitive process and renters.

279. AIRM and YieldStar do not benefit the competitive process or renters. Any theoretical benefits are outweighed by harm to the competitive process and to renters, and less restrictive alternatives are available to RealPage and these landlords.

Third Claim for Relief: Violation of Section 2 of the Sherman Act Through Monopolization of the Commercial Revenue Management Software Market

(By All Plaintiffs Against RealPage)

280. Plaintiffs incorporate the allegations of paragraphs 1 through 279 above.

281. Commercial revenue management software for conventional multifamily housing rentals in the United States is a relevant antitrust market, and RealPage has monopoly power in that market.

282. RealPage has unlawfully monopolized the commercial revenue management market through unlawful exclusionary conduct. RealPage has amassed a massive reservoir of competitively sensitive data from competing landlords and used that data to sell AIRM and YieldStar. RealPage has ensured that rivals cannot compete on the merits unless they enter into similar agreements with landlords, offer to share competitively sensitive information among rival landlords, and engage in actions to increase compliance. As a result of its exclusionary conduct, RealPage has been able to obstruct rival software providers from competing via revenue management products that do not harm the competitive process in addition to cementing its massive data and scale advantage that keeps increasing due to self-reinforcing feedback effects.

283. RealPage's anticompetitive acts have harmed the competitive process and reduced feasible and less restrictive alternatives for landlords, which

alternatives thereby pose less risk of competitive harm to renters.

284. RealPage's exclusionary conduct lacks a procompetitive justification that offsets the harm caused by RealPage's anticompetitive and unlawful conduct.

Fourth Claim for Relief, in the Alternative: Violation of Section 2 of the Sherman Act Through Attempted Monopolization of the Commercial Revenue Management Software Market

(By All Plaintiffs Against RealPage)

285. Plaintiffs incorporate the allegations of paragraphs 1 through 284 above.

286. Commercial revenue management software for conventional multifamily housing rentals in the United States is a relevant antitrust market.

287. RealPage has attempted to monopolize that market through unlawful exclusionary conduct enhanced by its self-reinforcing data and scale advantages. By amassing its massive reservoir of competitively sensitive data from competing landlords and the follow-on benefits that scale and its feedback effects provide in terms of blunting competition among landlords, RealPage's conduct excludes commercial revenue management rivals from competing on the merits in a lawful manner. As such, it has increased, maintained, or protected RealPage's power.

288. RealPage's anticompetitive acts have harmed the competitive process and reduced feasible and less restrictive alternatives for landlords, which alternatives thereby pose less risk of competitive harm to renters.

289. As inferred from the anticompetitive conduct described in Sections IV and V, *supra*, RealPage has acted with a specific intent to monopolize, and to eliminate effective competition in, the commercial revenue management software market in the United States. There is a dangerous probability that, unless restrained, RealPage will succeed in monopolizing the commercial revenue management software market in violation of Section 2 of the Sherman Act.

Fifth Claim for Relief: Violation of North Carolina Law

290. Plaintiff State of North Carolina incorporates the allegations of Paragraphs 1 through 289 above.

291. Defendants engaged in the conduct alleged above while operating their businesses in North Carolina markets, including, but not limited to, the markets alleged in paragraphs 214, 216, 256, and Appendices A and B.

Defendants' anticompetitive conduct has affected commerce in North Carolina to a substantial degree by harming the competitive process and renters across the State including, but not limited to, in the North Carolina markets identified in paragraphs 214, 216, 256, and Appendices A and B.

292. Defendants' acts as alleged in the First and Second claims for reliefs stated in paragraphs 259–279 above, violate the North Carolina Unfair or Deceptive Trade Practices Act in that they constitute contracts in restraint of trade or commerce in North Carolina, and/or acts and contracts in restraint of trade or commerce which violate the principles of the common law. N.C.G.S. §§ 75–1, 75–2.

293. Defendant Real Page's acts as alleged in the Third and Fourth claims for relief stated in paragraphs 280–289, above, violate the North Carolina Unfair or Deceptive Trade Practices Act, N.C.G.S. § 75–1 *et seq.*, in that they constitute unlawful monopolization of a part of trade or commerce in North Carolina. N.C.G.S. § 75–2.1. Plaintiff State of North Carolina seeks the following remedies available for claims under federal law and claims under N.C.G.S. §§ 75–1, 75–2, and 75–2.1, without limitation:

a. Injunctive and other equitable relief pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26, N.C.G.S. § 75–14, and the common law of North Carolina;

b. Civil penalties pursuant to N.C.G.S. § 75–15.2, which provides a penalty of up to \$5,000 per violation;

c. Costs of suit, including expert witness fees, costs of investigation, and attorney's fees pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26 and N.C.G.S. § 75–16.1; and

d. Other remedies as the court may deem appropriate under the facts and circumstances of the case.

Sixth Claim for Relief: Violation of California Law

295. The State of California incorporates the allegations of Paragraphs 1 through 289 above.

296. Defendants' practices, as alleged above, violate the Sherman Act sections 1 and 2 and therefore constitute unlawful business practices under California's Unfair Competition Law ("UCL"), Cal. Bus. & Prof. Code § 17200, *et seq.*

297. Plaintiff State of California seeks the following:

a. injunctive relief and penalties pursuant to sections 17203 and 17206 of the UCL,

b. costs of suit, including expert witness fees, costs of investigation, and

attorney's fees pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26, and

c. other remedies as the court may deem appropriate under the facts and circumstances of the case.

Seventh Claim for Relief: Violation of Colorado Law

298. Plaintiff State of Colorado repeats and re-alleges and incorporates by reference Paragraphs 1 through 289 in this Complaint as if fully set forth herein.

299. The acts alleged in the Complaint violate the Colorado Antitrust Act, § 6–4–101 et. seq., including C.R.S. § 6–4–104 and C.R.S. § 6–4–105. These violations substantially affect the people of Colorado and have impacts within the State of Colorado.

300. Each of the unlawful agreements, arrangements, or acts alleged herein constitute at least one distinct violation of the Colorado Antitrust Act within the meaning of C.R.S. § 6–4–113.

301. Defendants' acts alleged herein constitute a continuous pattern and practice of behavior within the meaning of C.R.S. § 6–4–113(2)(c).

302. Defendants' acts alleged herein were willful within the meaning of C.R.S. § 6–4–113(2)(d).

303. The State of Colorado seeks the following remedies under federal law and the Colorado Antitrust Act, including, without limitation:

a. Injunctive and other equitable relief pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26 and C.R.S. § 6–4–112;

b. Civil penalties pursuant to C.R.S. § 6–4–113 for each violation of the Colorado Antitrust Act;

c. Costs and attorneys' fees, pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26, and C.R.S. § 6–4–112(5); and

d. Other remedies as the Court may deem appropriate based on the facts properly alleged and proven.

Eighth Claim for Relief: Violation of Connecticut Law

304. Plaintiff State of Connecticut, acting by and through its Attorney General pursuant to Conn. Gen. Stat. § 35–44a, incorporates the allegations of paragraphs 1 through 289 above. The State of Connecticut brings its state and federal law claims for relief against all Defendants except Cortland.

305. The acts alleged in the Complaint also constitute violations of the Connecticut Antitrust Act, Conn. Gen. Stat. § 35–24 et seq. These violations had impacts within the State of Connecticut and substantially affected the citizens of Connecticut.

306. Plaintiff State of Connecticut seeks all remedies available under federal law and the Connecticut

Antitrust Act, including, without limitation, the following:

a. Civil penalties pursuant to Conn. Gen. Stat. § 35–38, which provides that in any action instituted by the Attorney General, any person who has been held to have violated any of the provisions of the Connecticut Antitrust Act shall forfeit and pay to the state a civil penalty of not more than one million dollars for each violation;

b. Injunctive and other equitable relief pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26, Conn. Gen. Stat. §§ 35–34, 35–44a;

c. Costs and fees including, without limitation, costs of investigation, litigation, expert witness fees, and attorney's fees pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26, Conn. Gen. Stat. §§ 35–34, 35–44a; and

d. Other remedies as the Court may deem appropriate under the facts and circumstances of the case.

Ninth Claim for Relief: Violation of Illinois Law

307. Plaintiff State of Illinois, acting by and through its Attorney General, incorporates the allegations of paragraphs 1 through 289 above. The State of Illinois brings its state and federal law claims for relief against all Defendants except Cortland.

308. The acts alleged in the Complaint violate the Illinois Antitrust Act, 740 ILCS 10/1 et seq, including 740 ILCS 10/3(1), 740 ILCS 10/3(2), and 740 ILCS 10/3(3). These violations substantially affect the people of Illinois and have impacts within the State of Illinois.

309. The State of Illinois seeks all available remedies under federal law and the Illinois Antitrust Act, including, without limitation:

a. Injunctive and other equitable relief pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26; and 740 ILCS 10/7;

b. Civil penalties pursuant to 740 ILCS 10/7(4) for each violation of the Illinois Antitrust Act;

c. Disgorgement, damages, and/or other equitable or monetary relief pursuant to federal law including Section 4 of the Sherman Act, 15 U.S.C. 4, Section 4c of the Clayton Act, 15 U.S.C. 15c and state law including 740 ILCS 10/7, and treble damages for injuries sustained, directly or indirectly, by individuals residing in Illinois to their property, pursuant to the State of Illinois' parens patriae authority under 740 ILCS 10/7(2);

d. Costs and attorneys' fees, pursuant to Section 4c of the Clayton Act, 15 U.S.C. 15c, Section 16 of the Clayton Act, 15 U.S.C. 26, 740 ILCS 10/7(2); and

e. Other remedies as the Court may deem appropriate on the basis of the facts properly alleged and proven.

Tenth Claim for Relief: Violation of Massachusetts Law

310. Plaintiff Commonwealth of Massachusetts repeats, realleges, and incorporates the allegations of paragraphs 1 through 289 above as if fully set forth herein. The Commonwealth of Massachusetts brings its state and federal law claims for relief against all Defendants except Cortland.

311. The acts alleged in the aforementioned paragraphs of this Complaint, including but not limited to unlawful agreements in restraint of trade and unlawful monopolization, constitute unfair methods of competition and/or unfair or deceptive acts or practices in trade or commerce in violation of the Massachusetts Consumer Protection Act, M.G.L. c. 93A § 2 et seq.

312. Defendants knew or should have known that their conduct violated the Massachusetts Consumer Protection Act, M.G.L. c. 93A § 2 et seq.

313. Plaintiff Commonwealth of Massachusetts is entitled to and seeks the following relief under M.G.L. c. 93A § 4:

a. Injunctive and other equitable relief pursuant to M.G.L. c. 93A § 4;

b. Civil penalties of up to \$5,000 per each violation committed by the Defendants pursuant to M.G.L. c. 93A § 4;

c. Costs and fees including, without limitation, costs of investigation, litigation, and attorneys' fees pursuant to M.G.L. c. 93A § 4; and

d. Other remedies as the court may deem appropriate under the facts and circumstances of the case.

314. The Commonwealth of Massachusetts notified the Defendants of this intended action at least five days prior to the commencement of this action and gave the Defendants an opportunity to confer in accordance with M.G.L. c. 93A § 4.

Eleventh Claim for Relief: Violation of Oregon Law

315. Plaintiff State of Oregon, acting by and through its Attorney General, incorporates the allegations of paragraphs 1 through 289 above. The State of Oregon brings its state and federal law claims for relief against all Defendants except Cortland.

316. The acts alleged in the Complaint also constitute violations of the Oregon Antitrust Law, Oregon Revised Statutes ("ORS") 646.705 to ORS 646.836. These violations had impacts within the State

of Oregon and substantially affected the people of Oregon.

317. The State of Oregon appears in its sovereign or quasi-sovereign capacities and under its statutory, common law, and equitable powers, and as *parens patriae* on behalf of natural persons residing in the State of Oregon pursuant to ORS 646.775(1). The State of Oregon seeks all remedies available under federal law and the Oregon Antitrust Law, including, without limitation, the following:

- a. Disgorgement and/or other equitable relief pursuant to federal law including Section 4 of the Sherman Act, 15 U.S.C. 4, and state law pursuant to ORS 646.770, and ORS 646.775;
- b. Injunctive and other equitable relief pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26, ORS 646.760, ORS 646.770, and ORS 646.775;
- c. Civil penalties pursuant to ORS 646.760(1) which provides that a court may assess for the benefit of the state a civil penalty of not more than \$1,000,000 for each violation of the Oregon Antitrust Law,
- d. Costs of suit, including expert witness fees, costs of investigation, and attorney's fees pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26, ORS 646.760, ORS 646.770, ORS 646.775; and
- e. Other remedies as the court may deem appropriate under the facts and circumstances of the case.

Twelfth Claim for Relief: Violation of Tennessee Law

318. Plaintiff State of Tennessee incorporates the allegations of paragraphs 1 through 289 above. The State of Tennessee brings its state and federal law claims for relief against all Defendants except Cortland.

319. Defendants engaged in the conduct described above, individually and collectively, to thwart competition for multifamily housing in Tennessee. This anticompetitive conduct in Tennessee harmed thousands of multifamily renters across the state.

320. Defendants' business practices have caused a reduction in competition in relevant Tennessee markets, including, but not limited to, in the markets identified in paragraphs 214 and 216 and Appendices A and B, and, as a result, Tennesseans have suffered anticompetitive harms.

321. Accordingly, Defendants' actions violate the Tennessee Trade Practices Act, Tenn. Code Ann. § 47–25–101, as amended.

322. Defendant RealPage engaged in the conduct described above to maintain its monopoly and exclude competing

commercial revenue management software competitors.

323. Accordingly, Defendant RealPage's actions violate the Tennessee Trade Practices Act, Tenn. Code Ann. § 47–25–102, as amended.

324. This conduct has affected Tennessee trade and commerce to a substantial degree.

325. To remedy this anticompetitive conduct, the Tennessee Attorney General and Reporter seeks all remedies available to which it is entitled under federal law and claims under Tenn. Code Ann. §§ 47–25–101, 102, and 106, as amended, including, without limitation, the following:

- a. injunctive or other equitable relief; reasonable attorney fees, costs, and expenses, pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26, Tenn. Code Ann. § 47–25–106(b), and the common law of Tennessee;
- b. civil penalties pursuant to Tenn. Code Ann. § 47–25–106(g);
- c. costs of suit, including expert witness fees, costs of investigation, and attorney's fees pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26 and Tenn. Code Ann. § 47–25–106(b); and
- d. other legal and equitable remedies as the court may deem appropriate and the interest of justice may require under the facts and circumstances of the case.

Thirteenth Claim for Relief: Violation of Washington Law

326. The State of Washington incorporates the allegations in Paragraphs 1 through 289, except for the portions of paragraphs 95, 96, 97, 117, 131, 171, and 228 that Washington was unable to review due to confidentiality redactions. Washington reserves the right to adopt the portions of those paragraphs which are later disclosed.

327. Washington brings its federal and state law claims for relief against Defendants RealPage, Cushman & Wakefield, Pinnacle, Greystar, and LivCor ("Washington Defendants").

328. Washington Defendants engaged in the conduct alleged above while operating their businesses in Washington. This anticompetitive conduct in Washington harmed the competitive process and renters across the State including in, but not limited to, the markets identified in Appendices A and B.

329. The acts alleged in the paragraphs incorporated by the State of Washington also constitute antitrust violations of the Washington Consumer Protection Act under Wash. Rev. Code § 19.86.030, which declares unlawful every contract, combination, or conspiracy in restraint of trade or commerce.

330. The acts alleged in the paragraphs incorporated by the State of Washington also constitute antitrust violations of the Washington Consumer Protection Act under Wash. Rev. Code § 19.86.040, which declares monopolization or attempts to monopolize unlawful.

331. Washington seeks the following remedies available under the Washington Consumer Protection Act and federal law including, without limitation, the following:

- a. That the Court adjudge and decree that conduct alleged in the complaint to be unlawful and in violation of the Washington Consumer Protection Act, Wash. Rev. Code § 19.86.030 and § 19.86.040;
- b. Injunctive and other equitable relief pursuant to Wash. Rev. Code § 19.86.080;
- c. Damages including treble damages; disgorgement; and/or restitution and any appropriate interest pursuant to federal law including Sherman Act, 15 U.S.C. 4, 15c and pursuant to state law including Wash. Rev. Code § 19.86.080;
- d. Civil penalties pursuant to Wash. Rev. Code § 19.86.140;
- e. Costs and attorney's fees and any appropriate interest on those fees and costs pursuant to Sherman Act, 15 U.S.C. 15c and/or pursuant to Wash. Rev. Code § 19.86.080; and
- f. Other remedies, including pre-judgement interest, as the court may deem appropriate under the facts and circumstances of the case.

IX. Request for Relief

332. To remedy these illegal acts, Plaintiffs request that the Court:

- a. Adjudge and decree that Defendants have acted unlawfully to restrain trade in conventional multifamily rental housing markets across the United States in violation of Section 1 of the Sherman Act, 15 U.S.C. 1;
- b. Adjust and decree that RealPage has acted unlawfully to monopolize, or attempt to monopolize, the commercial revenue management software market in the United States in violation of Section 2 of the Sherman Act, 15 U.S.C. 2;
- c. Enjoin Defendants from continuing to engage in the anticompetitive practices described herein and from engaging in any other practices with the same purpose and effect as the challenged practices;
- d. Enter any other preliminary or permanent relief necessary and appropriate to restore competitive conditions in the markets affected by Defendants' unlawful conduct;
- e. Enter any additional relief the Court finds just and proper; and

f. Award Plaintiffs an amount equal to their costs, including reasonable attorneys' fees, incurred in bringing this action.

X. Demand for a Jury Trial

333. Pursuant to Federal Rule of Civil Procedure 38(b), Plaintiffs demand a trial by jury of all issues properly triable to a jury in this case.

Dated this 7th day of January, 2025.

Respectfully submitted,

For Plaintiff United States of America:
Doha Mekki,
Acting Assistant Attorney General.

Ryan Danks,
Director of Civil Enforcement.

Catherine K. Dick,
Acting Director of Litigation.

George C. Nierlich,

United States District Court for the Middle District of North Carolina

United States of America, Plaintiff, v.
Pinnacle Property Management Services, LLC, Defendant.

No. 1:24-cv-00710-WLO-JGM

Proposed Final Judgment

Whereas, Plaintiff, United States of America, filed its Complaint on January 7, 2025;

And whereas, the United States and Defendant, Pinnacle Property Management Services, LLC, have

consented to entry of this Final Judgment without the taking of testimony, without trial or adjudication of any issue of fact or law, and without this Final Judgment constituting any evidence against or admission by any party relating to any issue of fact or law;

And whereas, Defendant agrees to undertake certain actions and refrain from certain conduct to remedy the loss of competition alleged in the Complaint;

And whereas, Defendant represents that the relief required by this Final Judgment can and will be made and that Defendant will not later raise a claim of hardship or difficulty as grounds for asking the Court to modify any provision of this Final Judgment;

Now therefore, it is ordered, adjudged, and decreed:

I. Jurisdiction

The Court has jurisdiction over the subject matter of, and each of the parties to, this action. The Complaint states a claim upon which relief may be granted against Defendant under Section 1 of the Sherman Act, 15 U.S.C. 1.

II. Definitions

As used in this Final Judgment:

A. “Defendant” means Defendant Pinnacle Property Management Services, LLC, a Delaware corporation with its headquarters in Dallas, Texas, its successors and assigns, and all of its subsidiaries, divisions, groups, affiliates, parents, partnerships, and joint ventures engaged in the management or ownership of multifamily rental properties in the United States and its territories, and their directors, officers, managers, agents, and employees.

B. “Competitively Sensitive Information” means, in this Final Judgment, property-specific data or information (whether past, present, or prospective) which, individually or when aggregated with such data or information from other properties, (1) could be reasonably used to determine current or future rental supply, demand, or pricing at a property or of any property’s units, including but not limited to executed rents, rental price concessions or discounts, guest traffic, guest applications, occupancy or vacancy, lease terms, or lease expirations; (2) relates to the Property Owner’s or Property Manager’s use of settings or user-specified parameters within Revenue Management Products with respect to such property or properties; or (3) relates to the Property Owner’s or Property Manager’s rental pricing amount, formula, or strategy, including rental price concessions or discounts with respect to such property or properties.

C. “Cooperation Subject Matter” means the claims alleged in *United States et al. v. RealPage et al.* (currently docketed as No. 1:24-cv-00710 in the Middle District of North Carolina), and

includes conduct as well as the effects of conduct.

D. “External Nonpublic Data” means all Nonpublic Data from any Third-Party. It does not include data for a Defendant Property.

E. “Including” means including, but not limited to.

F. “Model Training” means the process of analyzing data, including by machine learning or regression analysis, to create or adjust the parameters of a model or algorithm to improve the accuracy of the model’s or algorithm’s predictions.

G. “Nonpublic Data” means any Competitively Sensitive Information that is not Public Data.

H. “Person” means any natural person, corporate entity, partnership, association, joint venture, limited liability company, fund, investment vehicle, or any other legal entity or trust.

I. “Property Manager(s)” means any Person, or the Person’s agent, who manages a multifamily rental property.

J. “Property Owner(s)” means any Person who (directly or indirectly) owns or controls a multifamily rental property or that Person’s agent; multifamily rental properties have the same Property Owner if they are (directly or indirectly) owned or controlled by the same Person.

K. “Public Data” means information on a rental property or unit’s asking rental price (including publicly offered concessions), amenities, availability, and other information that is readily accessible to the general public, including but not limited to, on the property’s website, at a physical building, in brochures, or on an internet listing service. Public Data also includes information on a rental property or unit’s asking price, concessions, amenities, and availability provided by a Property Manager or a Property Owner to any natural person who reasonably presents himself as a prospective renter. Public Data does not include any Competitively Sensitive Information obtained through communications between competitors, unless such information is also readily accessible to the general public.

L. “RealPage” means RealPage, Inc., a Delaware corporation with its headquarters in Richardson, Texas.

M. “RealPage Final Judgment” means the Final Judgment between the United States and RealPage entered in *United States et al. v. RealPage et al.* (currently docketed as No. 1:24-cv-00710 in the Middle District of North Carolina).

N. “RealPage Meeting(s)” means RealPage steering committees, RealPage subcommittees, RealPage user groups,

RealPage Idea Exchange, or any variation of these meetings. For avoidance of doubt, a RealPage Meeting does not include any communications between Defendant and the Property Owner of a Defendant Property or any other Person providing services to that Defendant Property, or any software feedback provided solely to RealPage that is not otherwise shared by Defendant with other Property Managers or Property Owners.

O. “Revenue Management Product(s)” means any software or service, including software as a service, that generates rental prices or rental pricing recommendations for multifamily housing rentals. For avoidance of doubt, a Revenue Management Product does not include general purpose spreadsheet software like Microsoft Excel.

P. “Runtime Operation” means any action taken by a Revenue Management Product while it runs, including generating rental prices or pricing recommendations for any unit or set of units at a property. Runtime Operation does not mean Model Training.

Q. “Settled Civil Claims” means any civil federal antitrust claim by the United States arising from Defendant’s conduct accruing before the filing of the complaint in this action relating to (1) Revenue Management Products, including RealPage Revenue Management Products that use competitors’ Competitively Sensitive Information, as well as (2) communications described by Paragraph V.A.

R. “Third-Party” means any Person other than Defendant or a Defendant affiliate.

S. “Defendant Property” means a multifamily rental property, located within the United States or its territories, for which Defendant provides revenue management or related reporting or consulting services (collectively referred to as “Defendant Properties”). Defendant Property does not include student housing, affordable housing, age-restricted or senior housing, or military housing.

III. Applicability

This Final Judgment applies to Defendant, as defined above, and all other Persons in active concert or participation with Defendant who receive actual notice of this Final Judgment.

IV. Restrictions Concerning Use of Revenue Management Product(s)

A. Beginning 180 days after entry of the Stipulation and Order Defendant must not, within the United States and its territories:

1. license or use, for any Defendant Property, any Revenue Management Product that: (1) uses External Nonpublic Data (other than Nonpublic Data of the Property Owner of the subject Defendant Property) in its Runtime Operation to generate rental prices or rental pricing recommendations for a Defendant Property; (2) uses Nonpublic Data from a Defendant Property in its Runtime Operation to generate rental prices or rental pricing recommendations for any other Property Manager or Property Owner (unless the Property Owner of the non-Defendant Property is the same as the Property Owner of the Defendant Property from which the data arises or to which it relates); (3) discloses in any way Nonpublic Data from a Defendant Property to any Third-Party Property Manager or Third-Party Property Owner (other than a Third-Party Property Owner of the Defendant Property from which the data arises or to which it relates, or to a Third-Party Property Manager that provides services to Defendant Properties); (4) pools or combines Nonpublic Data from Defendant Properties that have different Property Owners; or (5) contains or uses a pricing model or algorithm that has been trained using Nonpublic Data (other than Nonpublic Data of the Property Owner of the subject Defendant Property); or

2. license or use any Revenue Management Product that: (1) incorporates a rental price floor or a limit on rental price recommendation decreases (excluding a rental price floor, or limit on rental price decreases, that Defendant or the Property Owner manually selects and is not based on Nonpublic Data other than Nonpublic Data of the Property Owner of the subject Defendant Property); or (2) requires Defendant to accept, or provides any financial rewards for Defendant to accept, any recommended rental prices.

3. agree (expressly or tacitly) with any Property Owner or Non-Defendant Property Manager to use a particular Revenue Management Product (or the utilities or functionalities thereof) or require any other Person to use a particular Revenue Management Product (or the utilities or functionalities thereof). Defendant is not prohibited by the preceding sentence from using a particular Revenue Management Product at a particular property pursuant to an agreement with another Person who is the Property Owner or who, along with Defendant, provides services to that particular property on behalf of the Property Owner, provided that the Revenue

Management Product complies with Paragraphs IV.A.1–2.

B. If management responsibilities or ownership of a property within the United States or its territories is transferred from another Property Manager or Property Owner to Defendant, then Defendant will have 90 days from the date of transfer to comply with the requirements of Paragraph IV.A. for the transferred property.

C. Within 180 days after entry of the Stipulation and Order, Defendant must first notify the United States, in writing, of its intention to license or use a Revenue Management Product 30 calendar days prior to using a Revenue Management Product. Thereafter, if Defendant intends to license or use any other Revenue Management Product at any Defendant Property, Defendant must first notify the United States, in writing, of its intention to license or use such a Revenue Management Product 30 calendar days prior to licensing or using the Revenue Management Product.

D. Notwithstanding Paragraph IV.A, Defendant may license or use a Revenue Management Product that complies with the terms of the RealPage Final Judgment.

E. Beginning 180 days after entry of the Stipulation and Order, if Defendant elects to license or use a Revenue Management Product:

1. After entry by the Court of a RealPage Final Judgment, Defendant may license or use a RealPage Revenue Management Product at any Defendant Property without the need to obtain certification as required in this Paragraph IV.E.

2. If Defendant licenses or uses a Revenue Management Product from a Person other than RealPage or a reseller of a RealPage Revenue Management Product at any Defendant Property, Defendant must secure and submit to the United States a certification from the vendor of the Revenue Management Product that the Revenue Management Product complies with the requirements in Paragraph IV.A or complies with the requirements for Revenue Management Products established in a RealPage Final Judgment.

V. Other Prohibited Conduct

A. Defendant must not, directly or indirectly, as part of setting rental prices or generating rental pricing recommendations for any Defendant Property (1) disclose Nonpublic Data to any Third-Party Property Manager or Third-Party Property Owner (except to a Third-Party Property Owner of the particular Defendant Property from which the data arises or to which it relates, or a Third-Party Property

Manager that provides services to Defendant Properties); (2) solicit External Nonpublic Data from any Third-Party Property Manager or Third-Party Property Owner (except from a Third-Party Property Owner of the particular Defendant Property from which the data arises or to which it relates, or from a Third-Party Property Manager that provides services to Defendant Properties); or (3) use External Nonpublic Data obtained from any Third-Party Property Manager or Third-Party Property Owner (except from a Third-Party Property Owner of the particular Defendant Property from which the data arises or to which it relates, or from a Third-Party Property Manager that provides services to Defendant Properties). For the avoidance of doubt, the restrictions set forth in this Paragraph include Nonpublic Data obtained through any means, whether directly or through an intermediary, including call rounds or market surveys, in-person meetings, calls, text messages, chat communications, emails, surveys, spreadsheets, shared documents (e.g., Google documents and SharePoint documents), industry meetings (e.g., user groups), online fora, private meetings, Revenue Management Products, or information-exchange services.

B. Notwithstanding Paragraph V.A, a Defendant employee may (1) disclose or solicit Nonpublic Data about a particular property for the purpose of evaluating or effectuating a bona fide sale or purchase of the property, as long as any Nonpublic Data received is not used to set rental prices or generate rental pricing recommendations, or (2) disclose Nonpublic Data about a particular Defendant Property between a departing Property Manager and replacement Property Manager as part of a bona fide transfer of management responsibilities for that property.

C. Defendant must not, within the United States or its territories, use or access, as part of setting rental prices or generating rental pricing recommendations for any Defendant Property, any External Nonpublic Data (other than Nonpublic Data of the Property Owner of the subject Defendant Property), including such data derived from any RealPage Revenue Management Product, in Defendant's possession, custody, or control as of the Court's entry of the Stipulation and Order in this matter, acquired through any means. Within 180 days of entry of the Stipulation and Order, Defendant must identify to the United States in writing the existence and location of any structured data set

containing such External Nonpublic Data. For the avoidance of doubt, the proscriptions in this Paragraph do not apply to data for Defendant Properties maintained in OneSite or other property management software.
