Vol. 91 Tuesday,

No. 192 October 6, 2026

Pages 63475–64104

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 91 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register
Vol. 91, No. 192
Tuesday, October 6, 2026

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2026–8054; Airspace Docket No. 26–AGL–15]

RIN 2120–AA66

Establishment of Class E Airspace; Peoria, IL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes Class E airspace at OSF St Francis Medical Center Heliport, Peoria, IL. This action supports new instrument procedures and instrument flight rule (IFR) operations.

DATES: Effective 0901 UTC, December 24, 2026. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order JO 7400.11 and publication of conforming amendments.

ADDRESSES: A copy of the notice of proposed rulemaking (NPRM), all comments received, this final rule, and all background material may be viewed online at *www.regulations.gov* using the FAA Docket number. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365 days each year. An electronic copy of this document may also be downloaded from *www.federalregister.gov.*

FAA Order JO 7400.11M, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications/.* You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Raul Garza Jr., Federal Aviation Administration, Operations Support Group, Central Service Center, 10101 Hillwood Parkway, Fort Worth, TX 76177; telephone (817) 222–5874.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes Class E airspace extending upward from 700 feet above the surface at OSF St Francis Medical Center Heliport, Peoria, IL, to support IFR operations.

History

The FAA published an NPRM for Docket No. FAA–2026–8054 in the **Federal Register** (91 FR 44779; July 24, 2026) proposing to establish Class E airspace at OSF St Francis Medical Center Heliport, Peoria, IL. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. Nine comments were received. One comment expressed support for the NPRM.

The FAA received eight comments objecting to the proposed amendment on the grounds that low-flying helicopter traffic is causing noise and vibration, resulting in disturbance and structural damage to homes within Peoria, including historic homes and districts. These commenters expressed concern with the proposal on these grounds without articulating how it would cause or worsen these conditions that they allege already exist. These commenters requested an environmental review pursuant to the National Environmental Policy Act that considers these impacts, including cumulative impacts, and includes a formal Section 106 review and consultation under the National Historic Preservation Act (NHPA).

In response to these comments, the FAA clarifies that Class E5 airspace extending upward from 700 feet above the surface already exists in the Peoria, IL, area to protect instrument procedures for Peoria International Airport (PIA). The instant rulemaking action does not alter or expand the existing PIA Class E5 airspace footprint over the City of Peoria west of the Illinois River where the commenters' properties are located. This action only establishes a minimal extension of Class E5 airspace east of the Illinois River to safely contain aircraft executing the missed approach segment of the new instrument approach procedure for the OSF helipad. Moreover, this rulemaking action does not change existing flight patterns, altitudes, or baseline operations, including those over the historic districts cited by the commenters. Accordingly, the FAA has determined that the Area of Potential Effects (APE) for this undertaking does not encompass these properties. In accordance with 36 CFR 800.4(d)(1), the FAA finds that no historic properties are affected by this rule. A formal Section 106 review and consultation with respect to the pre-existing Peoria airspace is outside the scope of this action.

One commenter also raised issues outside the scope of this action, such as the number of annual operations at OSF, airspace congestion, and the perceived lack of standardized traffic patterns. Other commenters similarly referenced increasing numbers of operations. The FAA is not addressing these topics because this rulemaking action is unrelated to these matters.

Incorporation by Reference

Class E airspace designations are published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the current version of that order, FAA Order JO 7400.11M, dated July 30, 2026, and effective September 15, 2026. These amendments will be published in the next update to FAA Order JO 7400.11. FAA Order JO 7400.11M, which lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points, is publicly

available as listed in the **ADDRESSES** section of this document.

The Rule

This action modifies 14 CFR part 71 by establishing Class E airspace extending upward from 700 feet above the surface within a 6.6-mile radius of OSF St Francis Medical Center Heliport, Peoria, IL. This action is the result of instrument procedures being developed for this heliport to support IFR operations.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Order 2100.6B, ''Rulemaking and Guidance Procedure'' (March 10, 2025); and (3) is expected to result in, at most, de minimis costs from compliance with applicable operating requirements or minor flight rerouting for operators choosing to navigate around the controlled airspace. Since these amendments are routine and the expected impact to operators is de minimis, the FAA certifies that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1G, ''FAA National Environmental Policy Act Implementing Procedures,'' paragraph B–2.5(a), which categorically excludes from further environmental impact review rulemaking actions that designate or modify classes of airspace areas, airways, routes, and reporting points (see 14 CFR part 71, Designation of Class A, B, C, D, and E Airspace Areas; Air Traffic Service Routes; and Reporting Points); and paragraph B–2.5(k), which categorically excludes from further environmental impact review the publication of existing air traffic control procedures that do not essentially change existing tracks, create new tracks, change altitude, or change concentration of aircraft on these tracks. As such, this action is not expected to result in any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

Lists of Subjects in 14 CFR 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11M, Airspace Designations and Reporting Points, dated July 30, 2026, and effective September 15, 2026, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

AGL IL E5 Peoria, IL [Establish]

OSF St Francis Medical Center Heliport, IL (Lat. 40°42′10″ N, long. 89°35′32″ W)

That airspace extending upward from 700 feet above the surface within a 6.6-mile radius of the OSF St Francis Medical Center Heliport.

* * * * *

Issued in Fort Worth, Texas, on September 28, 2026.

Jerry J. Creecy,

Acting Manager, Operations Support Group, ATO Central Service Center.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 232

[Release Nos. 33–11438; 34–106345; 39–2565; IC–36326]

Adoption of Updated EDGAR Filer Manual

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Securities and Exchange Commission (''Commission'') is adopting amendments to Volume II of the Electronic Data Gathering, Analysis, and Retrieval system Filer Manual (''EDGAR Filer Manual'' or ''Filer Manual'') and related rules and forms. EDGAR Release 26.3 will be deployed in the EDGAR system on September 14, 2026.

DATES: *Effective date:* October 6, 2026. The incorporation by reference of the revised Filer Manual volumes is approved by the Director of the Federal Register as of October 6, 2026.

FOR FURTHER INFORMATION CONTACT: For questions regarding the amendments to Volume II of the Filer Manual, please contact Rosemary Filou, Deputy Director and Chief Counsel, Dan Chang, Senior Special Counsel, or Jerard Gibson, Senior Special Counsel, in the EDGAR Business Office at (202) 551–3900. For questions regarding the EDGAR submission of Form 1, please contact Justin Pica, Assistant Director, or David Michehl, Special Counsel, in the Division of Trading and Markets at (202) 551–5500. For questions regarding EDGAR submission of ANE Exception Notices and withdrawals, please contact John Guidroz, Assistant Director, or Israel Goodman, Special Counsel, in the Division of Trading in Markets at (202) 551–5500. For questions regarding the change to the cover page of Form 13F, please contact Heather Fernandez at (202) 551–6708 or Gregory Jaffray (202) 551–6717 in the Division of Investment Management.

SUPPLEMENTARY INFORMATION: We are adopting an updated Filer Manual, Volume II: ''EDGAR Filing,'' Version 78 (September 2026) and amendments to 17 CFR 232.301, Rule 301 of Regulation S–T. The updated Filer Manual Volume is incorporated by reference into the Code of Federal Regulations.

I. Background

The Filer Manual contains information needed for filers to make submissions on EDGAR. Filers must comply with the applicable provisions of the Filer Manual in order to assure the timely acceptance and processing of filings made in electronic format.[1] Filers must consult the Filer Manual in conjunction with our rules governing mandated electronic filings when preparing documents for electronic submission.

II. Amendments to Volume II of the Filer Manual

EDGAR will be updated pursuant to EDGAR Release 26.3, and corresponding amendments to Volume II of the Filer

[1] *See* Rule 301 of Regulation S–T.

Manual are being made to reflect those changes, as descried below.

Submission of XBRL Documents

Technical information regarding the submission of XBRL documents is being removed from Chapter 6 of the Filer Manual and placed in the EDGAR XBRL Guide, the technical specification document containing detailed information regarding the submission of Inline XBRL documents on EDGAR. The XBRL information being moved is highly technical and therefore it is more appropriate for it to be part of the EDGAR XBRL Guide technical specification document.

Forms 13F and 13F–CTR

The submission templates available on the EDGAR Filing website for Forms 13F and 13F–CTR are being revised to correct an error in labeling. In the ''Cover Page'' section of those templates, the reference to ''Special Instruction 5'' will be corrected to ''Special Instruction 4,'' so filers will be referred to the correct instruction (''Do you wish to provide explanatory information (*e.g.,* pursuant to Special Instruction 4) on your filing?'').

ANE Exception Notices Under 17 CFR 240.3a71–3(d)(1)(vi)

As part of the Division of Trading and Market's Paper to Electronic initiative, on September 14, 2026, EDGAR is introducing a new online ANE Exception Notice interface on the EDGAR Filing website that will allow filers to electronically submit ANE Exception Notices and withdrawals on the interface or via EDGAR filer-constructed submissions.

- Filers are not required to submit ANE Exception Notices and withdrawals on EDGAR until January 1, 2027 and may continue to submit ANE Exception Notices and requests for withdrawal via email until December 31, 2026.
- Filers may submit LIVE ANE Exception Notices and withdrawals on EDGAR as of September 14, 2026.
- Filers may make TEST submissions on EDGAR as of September 14, 2026. Filers may also test the ANE Exception Notice filing process on the EDGAR Beta environment beginning two weeks prior to September 14, 2026.
- As of January 1, 2027, email filings of ANE Exception Notices and withdrawals will not be accepted, and all such submissions must be submitted electronically via the new online ANE Exception Notice EDGAR interface or be filer-constructed for EDGAR.
- Filers who have not filed electronically on EDGAR previously must submit Form ID to convert their EDGAR CIK from ''paper'' to electronic filing, and follow the relevant instructions on *SEC.gov* (Apply for EDGAR Access—Applicants With an EDGAR Central Index Key (CIK) Account but No Access Codes: Broker-Dealer or ''Paper Filer'' Seeks Electronic Access for the First Time in Order to File Electronically on EDGAR).

Form 1

In addition, as part of the Division of Trading and Market's Paper to Electronic initiative, on September 14, 2026, EDGAR is introducing a new online Form 1 interface on the EDGAR Filing website that will allow filers to electronically submit Form 1 and all related variants (1, 1AA, 1AC, 1/A, 1/A–A, 1/A–T, 1/S–M, 1/S–R, and 1W) on the interface or via EDGAR filer-constructed submissions.

- Filers are not required to submit Form 1 and variants on EDGAR until March 2, 2027, and may continue to submit Form 1 and variants in paper until March 1, 2027.
- Filers may submit LIVE Form 1 and variant submissions on EDGAR as of September 14, 2026.
- Filers may make TEST submissions on EDGAR as of September 14, 2026. Filers may also test the Form 1 filing process on the EDGAR Beta environment beginning two weeks prior to September 14, 2026.
- As of March 2, 2027, paper filings of Form 1 and variant submissions will not be accepted, and all such submissions must be submitted electronically via the new online Form 1 EDGAR interface or be filer-constructed for EDGAR.
- Filers who have not filed electronically on EDGAR previously must submit Form ID to convert their EDGAR CIK from paper to electronic filing, and follow the relevant instructions on *SEC.gov* (Apply for EDGAR Access—Applicants With an EDGAR Central Index Key (CIK) Account but No Access Codes: Broker-Dealer or ''Paper Filer'' Seeks Electronic Access for the First Time in Order to File Electronically on EDGAR).

III. Amendment to Rule 301 of Regulation S–T

Along with the adoption of the updated Filer Manual, we are amending Rule 301 of Regulation S–T to provide for the incorporation by reference of the revised Filer Manual into the Code of Federal Regulations. This incorporation by reference is approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51.

The updated EDGAR Filer Manual is available at *https://www.sec.gov/edgar/filer-information/current-edgar-filer-manual.*

IV. Administrative Law Matters

Because the Filer Manual and rule amendments relate solely to agency procedures or practice and do not substantially alter the rights and obligations of non-agency parties, publication for notice and comment is not required under the Administrative Procedure Act (''APA'').[2] It follows that the amendments do not require analysis under requirements of the Regulatory Flexibility Act [3] or a report to Congress under the Small Business Regulatory Enforcement Fairness Act of 1996.[4]

The Office of Management and Budget has determined that this action is not a significant regulatory action as defined in Executive Order 12866, as amended, and therefore it was not subject to Executive Order 12866 review.

The effective date for the updated Filer Manual and related rule amendments is October 6, 2026. In accordance with the APA,[5] we find that there is good cause to establish an effective date less than 30 days after publication of these rules. The Commission believes that establishing an effective date less than 30 days after publication of these rules is necessary to coordinate the effectiveness of the updated Filer Manual with the related system upgrades.

V. Statutory Basis

We are adopting the amendments to Regulation S–T under the authority in sections 6, 7, 8, 10, and 19(a) of the Securities Act of 1933,[6] sections 3, 12, 13, 14, 15, 15B, 23, and 35A of the Securities Exchange Act of 1934,[7] section 319 of the Trust Indenture Act of 1939,[8] and sections 8, 30, 31, and 38 of the Investment Company Act of 1940.[9]

List of Subjects in 17 CFR Part 232

Incorporation by reference, Reporting and recordkeeping requirements, Securities.

Text of the Amendments

In accordance with the foregoing, title 17, chapter II of the Code of Federal Regulations is amended as follows:

---

[2] 5 U.S.C. 553(b)(A).

[3] 5 U.S.C. 601 through 612.

[4] 5 U.S.C. 804(3)(c).

[5] 5 U.S.C. 553(d)(3).

[6] 15 U.S.C. 77f, 77g, 77h, 77j, and 77s(a).

[7] 15 U.S.C. 78c, 78*l,* 78m, 78n, 78*o,* 78*o*–4, 78w, and 78*ll.*

[8] 15 U.S.C. 77sss.

[9] 15 U.S.C. 80a–8, 80a–29, 80a–30, and 80a–37.

PART 232—REGULATION S–T—GENERAL RULES AND REGULATIONS FOR ELECTRONIC FILINGS

■ 1. The general authority citation for part 232 continues to read as follows:

Authority: 15 U.S.C. 77c, 77f, 77g, 77h, 77j, 77s(a), 77z–3, 77sss(a), 78c(b), 78*l,* 78m, 78n, 78n–1, 78*o*(d), 78w(a), 78*ll,* 80a–6(c), 80a–8, 80a–29, 80a–30, 80a–37, 7201 *et seq.;* and 18 U.S.C. 1350, unless otherwise noted.

* * * * *

■ 2. Section 232.301 is revised to read as follows:

§ 232.301 EDGAR Filer Manual.

Filers must prepare electronic filings in the manner prescribed by the EDGAR Filer Manual, promulgated by the Commission, which sets forth the technical formatting requirements for electronic submissions. The requirements for becoming an EDGAR Filer and updating company data are set forth in the EDGAR Filer Manual, Volume I: ''General Information,'' Version 43 (March 2026). The requirements for filing on EDGAR are set forth in the updated EDGAR Filer Manual, Volume II: ''EDGAR Filing,'' Version 78 (September 2026). All EDGAR material referenced in this paragraph is incorporated by reference into this section with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. You must comply with these requirements in order for documents to be timely received and accepted. The EDGAR Filer Manual is made available for inspection by the Commission and the National Archives and Records Administration (NARA). The EDGAR Filer Manual may be obtained from the SEC's website at *https://www.sec.gov/edgar/filerinformation/current-edgar-filer-manual.* For information on the availability of the EDGAR Filer Manual at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

By the Commission.

Dated: September 14, 2026.

Vanessa A. Countryman,

Secretary.

BILLING CODE 8011–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 862

[Docket No. FDA–2026–N–4268]

Medical Devices; Exemptions From Premarket Notification: Class II Devices; Certain Clinical Toxicology Test Systems

AGENCY: Food and Drug Administration, HHS.

ACTION: Final amendment; final order.

SUMMARY: The Food and Drug Administration (FDA) is publishing an order setting forth its final determination to exempt certain class II clinical toxicology test systems from premarket notification (510(k)) requirements, subject to certain limitations. This exemption from 510(k) requirements, subject to certain limitations, is immediately in effect for such devices. This exemption will decrease regulatory burdens on the medical device industry and will eliminate private costs and expenditures required to comply with certain Federal regulations. FDA is amending the classification language within the Code of Federal Regulations (CFR) for certain class II clinical toxicology test systems to reflect this final determination. FDA is publishing this order in accordance with the Federal Food, Drug, and Cosmetic Act (FD&C Act).

DATES: This order is effective October 6, 2026.

FOR FURTHER INFORMATION CONTACT: Joseph Kotarek, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 3528, Silver Spring, MD 20993, 301–796–2718, *Joseph.Kotarek@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Under section 510(k) of the FD&C Act (21 U.S.C. 360(k)) and FDA's implementing regulations in part 807, subpart E of the CFR (21 CFR part 807, subpart E), persons who are required to register and who propose to begin the introduction or delivery for introduction into interstate commerce for commercial distribution of a device intended for human use are required to submit a 510(k) to FDA. The device may not be marketed until FDA (we or the Agency) finds it ''substantially equivalent'' within the meaning of section 513(i) of the FD&C Act (21 U.S.C. 360c(i)) to a legally marketed device that does not require premarket approval. A 510(k) is not required for devices in certain situations, such as when they have been exempted from that requirement under section 510(m) of the FD&C Act.

The 21st Century Cures Act (Cures Act) (Pub. L. 114–255) was signed into law on December 13, 2016. Section 3054 of the Cures Act amended section 510(m) of the FD&C Act. As amended, section 510(m)(1)(A) of the FD&C Act requires that within 90 days of the date of enactment of the Cures Act, and at least once every 5 years thereafter (as FDA determines appropriate), FDA publish in the **Federal Register** a notice containing a list of each type of class II device that FDA determines no longer requires a report under section 510(k) of the FD&C Act to provide reasonable assurance of safety and effectiveness. After providing at least a 60-day public comment period, FDA must then publish in the **Federal Register** a list representing the final determination with respect to the devices contained in the list under section 510(m)(1)(B) of the FD&C Act. Additionally, section 510(m)(2) of the FD&C Act provides that FDA may exempt a class II device from the requirement to submit a report under section 510(k) of the FD&C Act, upon FDA's own initiative or a petition of an interested person, if FDA determines that a 510(k) is not necessary to assure the safety and effectiveness of the device. FDA must publish in the **Federal Register** a notice of intent to exempt a device, or of the petition, and provide a 60-day period for public comment.

Exemptions from premarket notification for certain clinical toxicology test systems, in addition to exemptions for other device types, were proposed and finalized in 2017. FDA published its initial notice for these clinical toxicology test systems under section 510(m)(1)(A) of the FD&C Act in the **Federal Register** of March 14, 2017 (82 FR 13609), and issued its final determination of exemption of the devices in a notice in accordance with section 510(m)(1)(B) of the FD&C Act in the **Federal Register** of July 11, 2017 (82 FR 31976). In the **Federal Register** of December 30, 2019 (84 FR 71794), FDA amended the relevant sections of the CFR to reflect the exemptions finalized in July 2017.

In the **Federal Register** of May 1, 2026 (91 FR 23427) (''the May 2026 notice''), FDA published a notice announcing its intent to expand the exemptions from premarket notification requirements for certain class II clinical toxicology test systems to additional devices within the device types and provided 60 days for interested persons to submit comments

by June 30, 2026. Specifically, FDA announced its intent to remove the exception for devices intended for Federal drug testing programs from the 510(k) exemptions for the clinical toxicology test systems identified in the May 2026 notice. FDA received comments from approximately 70 commenters during the 60-day comment period. FDA's responses to the timely received comments can be found in section III of this order. This final order sets forth our final determination to expand the exemptions for the class II clinical toxicology test systems that were the subject of the May 2026 notice. Through this action, FDA is amending the language for the identified classification regulations (21 CFR 862.3100(b), 862.3150(b), 862.3170(b), 862.3250(b), 862.3270(b), 862.3580(b), 862.3610(b), 862.3620(b), 862.3630(b), 862.3640(b), 862.3650(b), 862.3700(b), 862.3870(b), and 862.3910(b)) to reflect this final determination.[1]

This final order is expected to result in decreased regulatory burdens on the medical device industry and will eliminate private costs and expenditures required to comply with certain Federal regulations. Specifically, regulated industry will no longer have to invest time and resources in 510(k) submissions for devices exempt from such requirements.

II. Factors FDA Generally Considers for Exemption

There are a number of factors FDA generally considers to determine whether a 510(k) is necessary to provide reasonable assurance of the safety and effectiveness of a class II device. These factors are discussed in the January 21, 1998, **Federal Register** notice (63 FR 3142) and subsequently in the guidance the Agency issued on February 19, 1998, titled ''Procedures for Class II Device Exemptions from Premarket Notification'' (Ref. 1).

Accordingly, FDA generally considers the following factors to determine whether premarket notification is necessary or if an exemption would be appropriate for class II devices: (1) the device does not have a significant history of false or misleading claims or of risks associated with inherent characteristics of the device; (2) characteristics of the device necessary for its safe and effective performance are well established; (3) changes in the device that could affect safety and effectiveness will either (a) be readily detectable by users by visual examination or other means such as routine testing, before causing harm, or (b) not materially increase the risk of injury, incorrect diagnosis, or ineffective treatment; and (4) any changes to the device would not be likely to result in a change in the device's classification. FDA may also consider that, even when exempting devices from 510(k) requirements, these devices would still be subject to general limitations of exemptions. FDA's determinations that premarket notification is not necessary to provide a reasonable assurance of safety and effectiveness for class II devices are often based on the Agency's knowledge of the devices, including past experience and relevant reports or studies on device performance (as appropriate), the applicability of general and special controls, and the Agency's ability to limit an exemption, as discussed in section IV of this notice.

III. Comments on the Proposed Exemptions and FDA's Response

In the May 2026 notice, FDA announced its intent to expand the 510(k) exemptions for certain class II clinical toxicology test systems to additional devices within the device types, subject to certain limitations, upon its own initiative, and provided opportunity for interested persons to submit comments by June 30, 2026. After reviewing the comments received, FDA is now providing its final determination on expanding the 510(k) exemptions for the class II clinical toxicology test systems listed in table 1 to include devices intended for use in Federal drug testing programs, subject to certain limitations as identified in this order. FDA is also amending the codified language for the classification regulations for the class II clinical toxicology test systems listed in table 1 to reflect this final determination.

In response to the May 2026 notice announcing FDA's intent to expand the 510(k) exemptions for certain class II clinical toxicology test systems, FDA received comments from approximately 70 commenters, including individuals, trade organizations, regulated industry, labor unions, and other interested parties. Some of the comments contained one or more comments on one or more issues.

The order of the comments and our response to them is purely for organizational purposes and does not signify the comment's value or importance or the order in which comments were received. Certain comments are grouped together under a single number because the subject matter is similar. Please note that in some cases we separated different issues discussed by the same commenter and designated them as distinct comments for purposes of our responses.

(Comment 1) The majority of commenters expressed support for the proposed expansion of the 510(k) exemptions. Commenters stated that they believed the proposal, if finalized, would reduce unnecessary regulatory burdens. Commenters noted that device manufacturers would no longer need to invest time and resources into 510(k) submissions for newly exempt test systems. Many commenters stated that there would be no drop-off in the quality or accuracy of test systems used in Federal drug testing programs should the exemptions be finalized, and one commenter added that unnecessary barriers to adoption of clinical toxicology test systems in Federal drug testing programs are a public safety concern. Several commenters described the proposal as ''a practical, overdue, and well-reasoned step toward a federal drug testing framework that reflects current science and operational reality.''

(Response 1) FDA agrees with the commenters' support for the expansion of the 510(k) exemptions. In this order, FDA is finalizing the proposed exemptions without modification.

(Comment 2) Some commenters requested clarification regarding the scope of the proposed expanded 510(k) exemptions included in the May 2026 notice. Specifically, commenters asked whether a test system would be exempted from 510(k) requirements by the exemptions proposed in the May 2026 notice when the test system measures a different analyte, uses a different methodology, or has a different cutoff concentration than all already cleared devices in a generic device type included in the May 2026 notice. Another commenter asked FDA to clarify that a ''Federal-program-specific predicate is not required for an eligible test system to fall within the exemption.'' Many comments encouraged FDA to liberally interpret the boundaries of the finalized exemptions.

(Response 2) FDA encourages commenters to review the finalized partial limitations of exemption discussed in section IV of this order as well as § 862.9 (21 CFR 862.9) (titled ''Limitations of exemptions from section 510(k) of the Federal Food, Drug, and Cosmetic Act (the act)''). Under § 862.9(a), a device that otherwise

[1] FDA notes that the ''ACTION'' caption for this final order is styled as ''Final amendment; final order,'' rather than ''Final order.'' Beginning in December 2019, this editorial change was made to indicate that the document ''amends'' the Code of Federal Regulations. The change was made in accordance with the Office of Federal Register's (OFR) interpretations of the Federal Register Act (44 U.S.C. chapter 15), its implementing regulations (1 CFR 5.9 and parts 21 and 22), and the Document Drafting Handbook.

would fall within a 510(k) exemption is not exempt from 510(k) requirements when ''[t]he device is intended for a use different from the intended use of a legally marketed device in that generic type of device.'' As reflected in table 1, a test system must be intended for employment and insurance testing to fall within the 510(k) exemptions for the generic device types that are the subject of this order. Additionally, under § 862.9(b), such a device is not exempt from 510(k) requirements when the ''device operates using a different fundamental scientific technology than a legally marketed device in that generic type of device.'' These general limitations of exemption apply to generic device types exempted from 510(k) requirements by this order as well as other generic device types classified in 21 CFR part 862.

Whether a specific test system is or is not exempt from 510(k) requirements depends on the specifics of the test system. FDA encourages manufacturers who have questions about whether a specific test system is exempt from 510(k) requirements to discuss their test system with FDA. Manufacturers may consider submitting a request for information under section 513(g) of the FD&C Act (21 U.S.C. 360c(g)). For more information regarding section 513(g) of the FD&C Act requests for information, please see FDA's guidance document titled ''FDA and Industry Procedures for Section 513(g) Requests for Information under the Federal, Food, Drug, and Cosmetic Act'' (Ref. 2).

(Comment 3) Multiple commenters requested that FDA clarify its authority around Federal drug testing programs and how this authority interacts with that of the Substance Abuse and Mental Health Services Administration (SAMHSA) and the National Laboratory Certification Program (NLCP). Other commenters requested that FDA, SAMHSA, and the NLCP coordinate to reduce regulatory requirements.

(Response 3) FDA's Center for Devices and Radiological Health aims to assure that patients and providers have safe, effective, and high-quality medical devices and safe radiation-emitting products. The term ''device'' is defined under section 201(h) of the FD&C Act (21 U.S.C. 321(h)) to mean, in relevant part, ''an instrument, apparatus, implement, machine, contrivance, implant, in vitro reagent, or other similar or related article, including any component, part, or accessory, which is— . . . (B) intended for use in the diagnosis of disease or other conditions, or in the cure, mitigation, treatment, or prevention of disease, in man or other animals . . . and which does not achieve its primary intended purposes through chemical action within or on the body of man or other animals and which is not dependent upon being metabolized for the achievement of its primary intended purposes.''

FDA does not administer or implement Federal drug testing programs. However, FDA regulates test systems used in Federal drug testing programs. Manufacturers and importers of devices such as clinical toxicology test systems may be subject to a variety of requirements under the FD&C Act and FDA's regulations, including establishment registration, device listing, 510(k), labeling, quality management system, and medical device reporting requirements. Class II devices that are 510(k) exempt are still subject to other applicable requirements.

SAMHSA's Division of Workplace Programs oversees Federal drug-free workplace programs, which aim to eliminate illicit drug use in Federal workplaces. It also oversees the NLCP, which certifies laboratories to conduct forensic drug testing for Federal agencies and federally regulated industries. SAMHSA has published mandatory guidelines for drug testing for urine (88 FR 70768) and for oral fluid (88 FR 70814).

FDA agrees that FDA, SAMHSA, and the NLCP should coordinate to best protect the public health, which may include reducing regulatory requirements where appropriate. In this final order, FDA is expanding the 510(k) exemptions for certain clinical toxicology test systems to include devices intended for Federal drug testing programs. Upon publication of this order, a 510(k) will no longer be required for such devices (subject to the general limitations of exemption under § 862.9 and the partial limitations of exemption identified in table 1).

(Comment 4) Two commenters stated that test systems used for Federal drug testing programs are not devices because they do not meet the definition of a device in the FD&C Act, and therefore, these test systems are not subject to FDA regulation.

(Response 4) FDA disagrees. As previously discussed in our response to comment 3, as defined in section 201(h) of the FD&C Act, the term ''device'' means, in relevant part, ''an instrument, apparatus, implement, machine, contrivance, implant, in vitro reagent, or other similar or related article, including any component, part, or accessory, which is— . . . (B) intended for use in the diagnosis of disease or other conditions, or in the cure, mitigation, treatment, or prevention of disease, in man or other animals . . . and which does not achieve its primary intended purposes through chemical action within or on the body of man or other animals and which is not dependent upon being metabolized for the achievement of its primary intended purposes.'' Drugs of abuse test systems, even when used for employment and insurance testing, are intended to provide information about a condition, namely, whether drugs of abuse are being used or have been used by the subject (see 65 FR 18230 at 18232). Therefore, the test systems newly exempted in this order are devices.

(Comment 5) Some commenters stated that the May 2026 notice did not specify what standards would replace 510(k) requirements for the test systems newly exempted by this order.

(Response 5) For clinical toxicology test systems that are newly exempted in this order, FDA has determined that a 510(k) is not necessary to assure the safety and effectiveness of the device, in accordance with section 510(m)(2) of the FD&C Act. Clinical toxicology test systems of the types listed in table 1 are therefore exempt from 510(k) requirements, including when such test systems are intended for use in Federal drug testing programs, upon publication of this order, subject to the general limitations of exemption under § 862.9 and the partial limitations of exemption identified in table 1. No standards or additional requirements replace 510(k) requirements for these devices. However, as discussed in our response to comment 3, 510(k) exempt devices remain subject to other applicable regulatory requirements, including SAMHSA's mandatory guidelines, to the extent they are used in Federal drug testing programs.

(Comment 6) Many commenters stated that finalizing the expansion of the 510(k) exemptions proposed in the May 2026 notice is a necessary step for the implementation of oral fluid testing in Federal drug testing programs, including those programs administered by SAMHSA and the Department of Transportation (DOT). Some comments questioned why, or expressed frustration that, oral fluid testing has not yet been ''approved'' for use in these programs. Other commenters stated that delays in implementing oral fluid testing in Federal drug testing programs have had, and will continue to have, effects on transportation safety.

(Response 6) FDA is expanding the 510(k) exemptions for the clinical toxicology test systems identified in table 1 of this order because, in consideration of the factors listed in section II of this order, FDA has

determined that a 510(k) is not necessary to assure the safety and effectiveness of these devices, subject to the general limitations of exemption under § 862.9 and the partial limitations of exemption identified in table 1. While FDA understands that the expansion of the exemptions finalized in this order may facilitate the use of oral fluid testing in Federal drug testing programs, FDA does not oversee Federal drug testing programs (as noted in our response to comment 3) and so does not decide whether oral fluid testing may be used in such programs.

(Comment 7) Some commenters stated that finalizing the expansion of the 510(k) exemptions proposed in the May 2026 notice is a necessary step for the implementation of hair testing in Federal drug testing programs, including those programs administered by SAMHSA and DOT.

(Response 7) As noted in our response to comment 3, FDA does not oversee Federal drug testing programs and so does not decide whether hair testing may be used in such programs. Please see our response to comment 6.

(Comment 8) Multiple commenters stated that in addition to the 510(k) exemptions proposed in the May 2026 notice, FDA should exempt additional device types from 510(k) requirements, including test systems for phencyclidine (PCP); all class II clinical toxicology test systems intended for employment or insurance testing; all test systems used in Federal drug testing programs, including automatic additions when new drugs are added to Federal drug testing programs; unspecified additional test systems not intended for employment and insurance testing; and oral fluid collection devices.

(Response 8) These comments are outside the scope of what was proposed in the May 2026 notice and are, therefore, outside the scope of this final order. FDA notes that the 510(k) exemptions in this order are being finalized under the authority of section 510(m)(2) of the FD&C Act, which allows FDA to exempt only class II devices from 510(k) requirements, yet some of the additional device types suggested by comments have not been classified into class II. In addition, some of the device types suggested by the comments have different safety and effectiveness profiles (*e.g.,* oral fluid collection devices) than the test systems for which 510(k) exemptions are being finalized in this order. FDA has not made a determination that a 510(k) is not necessary to assure the safety and effectiveness of oral fluid collection devices; thus, finalizing a 510(k) exemption for them would not be appropriate. FDA notes that there are 510(k)-cleared oral fluid collection devices that may be used with test systems for any drug of abuse analyte.

As indicated in table 1, the list of device types for which FDA is expanding 510(k) exemptions in this order is unchanged from the list proposed in the May 2026 notice.

(Comment 9) One commenter requested clarification regarding product code DJG being listed in the non-exempt product codes in the May 2026 notice and whether fentanyl test systems under product code DJG are exempt from 510(k) requirements if they are intended solely for employment and insurance testing. A different commenter requested clarification regarding whether fentanyl test systems are included in this order because fentanyl test systems were not mentioned by name in the May 2026 notice.

(Response 9) While fentanyl test systems and test systems for other opioids were not mentioned by name in the May 2026 notice, such test systems generally fall within the classification regulation for opiate test systems (§ 862.3650), which is one of the generic device types for which FDA is expanding the 510(k) exemptions in this order. Under § 862.3650(a), an opiate test system is a device intended to measure any of the addictive narcotic pain-relieving opiate drugs in blood, serum, urine, gastric contents, and saliva. Section 862.3650(a) also defines an opiate as any natural or synthetic drug that has morphine-like pharmacological actions. Test systems intended to test for fentanyl generally fall under this regulation. Therefore, fentanyl test systems intended for Federal drug testing programs are included in the 510(k) exemptions finalized in this order.

Test systems that previously were designated under product code DJG will now fall under product code PVH and are 510(k) exempt if they do not exceed the limitations of exemption discussed in section IV of this order, including the limitation that the test system be intended for use solely in employment or insurance testing. For each product code listed in the ''Non-Exempt Product Codes'' column of table 1 of this order, there is a corresponding product code under the ''Exempt Product Code'' column in the same row. When a device in the generic device type does not exceed the limitations of exemption discussed in section IV of this order, then that device is 510(k) exempt and falls under the corresponding exempt product code.

(Comment 10) One comment stated that the 510(k) exemption for opiate test systems (exempt product code PVH) should not include test systems for fentanyl and its analogs. This commenter implied that it is uniquely difficult to accurately test for fentanyl and its analogs compared to other drugs of abuse, and therefore, fentanyl test systems are not appropriate for 510(k) exemption.

(Response 10) FDA disagrees. FDA's classification of opiate test systems includes test systems intended to test for fentanyl (see our response to Comment 9), and FDA has previously exempted opiate test systems, including test systems intended to test for fentanyl, from 510(k) requirements subject to certain limitations. FDA does not believe that fentanyl test systems raise unique considerations above and beyond those that apply to other test systems in this order. In consideration of the factors which FDA generally considers to determine whether a 510(k) is necessary to provide reasonable assurance of the safety and effectiveness of a class II device (see section II of this order), FDA has determined to expand the 510(k) exemption that already exists for opiate test systems (including test systems intended to test for fentanyl) to include test systems intended for Federal drug testing programs.

(Comment 11) Some commenters requested additional specificity regarding the labeling language needed to avoid exceeding the partial limitations of exemption applicable to all exemptions in this order, which state that the exemptions are limited to tests ''for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing.''

(Response 11) FDA does not believe it is necessary or appropriate to provide further specificity regarding the labeling statement identified in the partial limitations of exemption for the clinical toxicology test systems covered by this order. The commenters did not explain why they thought clarification of this statement was necessary or how the partial limitation as proposed in the May 2026 notice was unclear. A partial limitation of exemption indicates that FDA has determined that premarket notification is necessary to provide a reasonable assurance of safety and effectiveness for devices that exceed the limitation. Regarding the labeling statement at issue, FDA has determined that premarket notification is necessary if the labeling for the device does not indicate that the device is intended solely for employment and insurance testing, but FDA has not determined

that specific verbiage must be used for that statement. We therefore decline to provide additional specificity regarding the labeling statement identified in the partial limitations of exemption for these devices.

(Comment 12) Some commenters requested that FDA exercise enforcement discretion regarding compliance with labeling requirements for test systems that were previously 510(k) exempt for employment and insurance testing, and that are labeled as not intended for use in Federal drug testing programs, when now intended for use in Federal drug testing programs consistent with the expanded 510(k) exemptions finalized by this order.

(Response 12) FDA declines to adopt a general enforcement discretion policy as requested by these commenters. FDA expects the clinical toxicology test systems covered by this order, whether exempt from 510(k) requirements or not, to be labeled in accordance with all applicable labeling requirements under the FD&C Act and 21 CFR parts 801 and 809, including that the labeling not be false or misleading.

(Comment 13) Multiple commenters requested that FDA exercise enforcement discretion regarding 510(k) requirements for any test system used in Federal drug testing programs and subject to NLCP requirements, even when such test systems have not been exempted from 510(k) requirements. Many of these commenters also requested that FDA ''stop regulating'' devices intended for use in Federal drug testing programs and ''transfer'' any FDA authority over Federal drug testing programs to NLCP. In contrast, at least one commenter recommended that if FDA were ''to stop regulating'' test systems intended for use in Federal drug testing programs, FDA should not transfer its responsibilities to NLCP.

(Response 13) FDA declines to adopt a general enforcement discretion policy for 510(k) requirements for all test systems used in Federal drug testing programs. FDA is expanding the exemptions from 510(k) requirements for clinical toxicology test systems identified in this order to include test systems intended for use in Federal drug testing programs based on a determination that a 510(k) is not necessary to assure the safety and effectiveness of these devices (subject to the general limitations of exemption under § 862.9 and the partial limitations of exemption identified in table 1). To the extent these comments are requesting or recommending that jurisdiction over these tests systems be transferred from FDA to another Federal agency, such comments are outside the scope of this final order and would require statutory changes by Congress. In addition, FDA considers aspects of these comments to arise from a mistaken premise that FDA oversees Federal drug testing programs and can transfer that authority to another agency. That is not the case. As noted in response 3, FDA regulates devices used in Federal drug testing programs but does not oversee Federal drug testing programs themselves.

(Comment 14) Some commenters stated their belief that if the expansion of the exemptions proposed in the May 2026 notice is finalized, the quality of test systems could decrease, including worse accuracy and reliability, because the devices will no longer undergo premarket review. One commenter suggested expanding the exemptions could lead to decreased confidence in the accuracy of Federal drug testing. Other commenters opposed the expansion of the 510(k) exemptions because the commenters believed expanding the exemptions could lead to increased medical device fraud.

(Response 14) FDA disagrees that the quality of test systems available for Federal drug testing programs will decrease due to the expansion of the exemptions from 510(k) requirements finalized in this order or that fraudulent devices will enter the market because of the expansion of the exemptions. FDA has determined that premarket notification is not necessary to assure the safety and effectiveness of the class II clinical toxicology test systems subject to the limitations outlined in table 1. While 510(k) exempt test systems intended for use in Federal drug testing programs generally will no longer be subject to FDA premarket review requirements, they remain subject to other requirements under the FD&C Act and FDA's regulations as discussed in our response to comment 3, including quality management system requirements, medical device reporting requirements, and labeling requirements. In addition, laboratories that test samples for Federal drug testing programs are subject to requirements associated with Federal drug testing programs and overseen by SAMHSA, including the mandatory guidelines. These requirements may allow interested parties to remain confident in the accuracy of Federal drug testing programs.

(Comment 15) Some commenters did not support the expansion of the 510(k) exemptions proposed in the May 2026 notice because they believed that the expansion could lead to increased highway safety incidents, including increased crashes, injuries, and/or loss of life. The commenters believed that without premarket review, new exempt test systems that are not currently on the market may fail to correctly detect positive samples that would be detected by test systems currently used in Federal drug testing programs. Commenters also expressed similar concerns about other industries subject to DOT testing, including aviation, rail, transit, and maritime industries.

(Response 15) FDA disagrees with comments that suggest that expanding the 510(k) exemptions to include test systems intended for use in Federal drug testing programs will likely cause harm by leading to an increased frequency of highway crashes or other mishaps caused by impaired/intoxicated workers. These comments appear to be premised on the belief that once premarket review of certain test systems intended for use in Federal drug testing programs is no longer required, the test systems will less accurately detect positive samples. However, as noted in our response to comment 14, we disagree with that premise, including because other applicable requirements will help to ensure the safety and effectiveness of these test systems and the accuracy of testing conducted under Federal drug testing programs. In addition to the controls imposed by SAMHSA as discussed in response 14, applicable requirements under the FD&C Act and FDA regulations besides premarket review requirements will continue to apply to the test systems being made 510(k) exempt in this order. For example, manufacturers of test systems exempted from 510(k) requirements by this order remain subject to establishment registration, device listing, quality management system, and device labeling requirements, among other requirements and as applicable (see generally 21 CFR parts 801, 803, 807, 809, and 820). FDA therefore does not believe this order will result in newly exempted test systems lacking reasonable effectiveness in detecting positive samples.

(Comment 16) One commenter stated that they were opposed to the expansion of the 510(k) exemptions proposed in the May 2026 notice because, in their view, FDA caused injury in other contexts by lifting restrictions on medications, and they believed that expansion of the exemptions could similarly cause injury.

(Response 16) We are not clear as to what actions or events the commenter was referencing when stating that FDA has ''gotten people killed or severely sick'' by lifting restrictions on medications. Nevertheless, FDA disagrees that expanding the 510(k)

exemptions for the clinical toxicology test systems identified in this order to include when such test systems are intended for use in Federal drug testing programs is likely to cause harm to patients. The expansion of the exemptions only applies to test systems that are intended for employment and insurance testing. While these test systems are intended to provide information about a condition, namely, whether drugs of abuse are being used or have been used by the subject, these test systems are not intended to be used to make treatment decisions. Therefore, FDA does not agree that the expansion of the exemptions finalized in this order is likely to cause harm to patients.

(Comment 17) A few commenters stated that finalizing the expansion of the exemptions proposed in the May 2026 notice could cause potential disruption to existing Federal drug testing programs or unintended compliance challenges for interested parties in the drug testing industry.

(Response 17) FDA disagrees with these comments. Tests systems intended for use in Federal drug testing programs that were previously authorized by FDA can continue to be used in such programs (assuming compliance with other applicable laws). The final order will enable additional test systems intended for Federal drug testing programs to be legally marketed without first obtaining 510(k) clearance from FDA. Therefore, FDA does not agree that finalization of this order could cause disruption to existing Federal drug testing programs.

(Comment 18) One commenter alleged that non-Federal workplace drug testing programs are often poorly run, and that the expansion of the 510(k) exemptions for the clinical toxicology test systems identified in this order, to include such test systems when intended for use in Federal drug testing programs, would open Federal drug testing programs to poor management seen in these other programs.

(Response 18) FDA does not agree that the finalization of the exemptions in this order will likely affect the management quality of Federal drug testing programs. This order exempts certain clinical toxicology test systems intended for use in Federal drug testing programs from FDA's 510(k) requirements but does not otherwise affect Federal drug testing programs, including the management thereof. FDA believes that the only effect this order will have on Federal drug testing programs is the possible increase in the number of test systems that may be utilized in such programs.

(Comment 19) Some commenters urged FDA to finalize the expansion of the exemptions proposed in the May 2026 notice as soon as possible.

(Response 19) FDA agrees with the commenters that the expansion of the exemptions proposed in the May 2026 notice should be finalized. The comment period regarding the expansion of the exemptions proposed in the May 2026 notice closed on June 30, 2026. FDA has worked to finalize this order as soon as was practicable following consideration of the comments submitted on the May 2026 notice.

(Comment 20) One commenter requested that FDA open a docket regarding how it assigns product codes for ''[F]ederally mandated workplace drug test system devices.'' This commenter indicated that an analyte-specific categorization framework may be inconsistent with modern drug testing systems which generally rely on multi-analyte platforms.

(Response 20) As explained in FDA's guidance document titled ''Medical Device Classification Product Codes'' (the Product Codes guidance), ''[c]lassification product codes are a method of internally classifying and tracking medical devices'' (Ref. 3). The Product Codes guidance states that product codes are assigned and maintained by the Agency, and are used to, among other things, ''help to delineate technology and indication subgroups within a regulation.'' FDA currently does not intend to open a docket regarding product code assignment. However, as stated in the Product Codes guidance, ''[a]s technology changes and 510(k) review practice evolves, some classification product codes may become obsolete. In some cases, product code definitions may be updated to accommodate new technology.'' As technology continues to evolve, FDA may consider modifications to the product codes assigned to the clinical toxicology test systems covered in this order.

(Comment 21) Various comments expressed displeasure with the commenters' personal circumstances connected to failed (or invalid) drug tests administered as part of a Federal drug testing program and/or displeasure with how SAMHSA, the NLCP, the DOT, and other non-FDA organizations administer and/or regulate Federal drug testing programs. Many of these comments were addressed to entities other than FDA. These comments did not address the expansion of the exemptions proposed in the May 2026 notice.

(Response 21) These comments are outside the scope of the May 2026 notice and this order. As discussed in more detail in comment 3, FDA does not oversee Federal drug testing programs.

IV. Limitations of Exemptions

FDA has determined that premarket notification is not necessary to assure the safety and effectiveness of the class II clinical toxicology test systems subject to the limitations outlined in table 1. This determination is based, in part, on the Agency's knowledge of the devices, including past experience and relevant reports or studies on device performance (as appropriate), the applicability of general and special controls, and the Agency's ability to limit an exemption.

A. General Limitations of Exemptions

The exemptions from premarket notification requirements for the class II device types listed in table 1 apply only to those devices that have existing or reasonably foreseeable characteristics of commercially distributed devices within that generic type or, in the case of in vitro diagnostics, only to the extent that misdiagnosis as a result of using the device would not be associated with high morbidity or mortality (see § 862.9). Thus, a manufacturer of a device listed in this order will still be required to submit a premarket notification to FDA before introducing a device or delivering it for introduction into interstate commerce for commercial distribution when the device exceeds any of the limitations of exemptions described in § 862.9.

B. Partial Limitations of Exemptions

In addition to the general limitations described in section IV.A of this notice, partial limitations may limit an exemption from premarket notification requirements to specific devices within a device type. In such situations where a partial limitation of the exemption has been identified, FDA has determined that premarket notification is necessary to assure the safety and effectiveness for devices that exceed the limitations.

Prior to issuance of this order, the classification regulations listed in table 1 already included an exemption from 510(k) requirements (subject to the general limitations in § 862.9 as discussed in section IV.A of this notice) ''provided the test system is intended for employment and insurance testing and includes a statement in the labeling that the device is intended solely for use in employment and insurance testing,'' and as long as the device was not intended for use in Federal drug testing

programs.[2] In this order, FDA is removing the exception to the 510(k) exemption for devices intended for Federal drug testing programs. As such, devices in the device types listed in table 1 are exempt from 510(k) requirements even if intended for use in Federal drug testing programs as long as they do not exceed any of the general limitations of exemptions in § 862.9, and provided the test system is intended for employment and insurance testing and includes a statement in the labeling that the device is intended solely for use in employment and insurance testing, as described in table 1.

When FDA finalized the partial exemptions from 510(k) requirements that were in effect for the classification regulations listed in table 1 prior to issuance of this order, FDA assigned new product codes to ensure that exempt and non-exempt devices within a device type would have separate product codes (82 FR 31976 at 31977). FDA will continue to use the previously established product codes; however, the definitions of the product codes for exempt devices will be modified to accurately reflect the scope of the exemption,[3] and devices which are newly exempt will change from a non-exempt product code to the corresponding exempt product code.

V. List of Class II Devices

FDA has determined that premarket notification is not necessary to assure the safety and effectiveness of clinical toxicology test systems of the types listed in table 1 when they are intended for Federal drug testing programs (see ''New Partial Limitations'' listed in table 1). Devices in the device types listed in table 1 no longer require premarket notification under section 510(k) of the FD&C Act when they are intended for Federal drug testing programs, so long as they do not exceed the partial limitations of exemptions specified in table 1 and the corresponding general limitations of exemptions found in § 862.9.

TABLE 1—CLASS II DEVICES

21 CFR section	Generic device type	Exempt product code	Non-exempt product codes	Partial limitations prior to issuance of this order	New partial limitations
862.3100	Amphetamine test system.	PUX	DIT, DJL, DJP, DKZ, DNI, DOD, DPJ, NFT, NVI, OIW.	Exemption is limited to test systems intended to measure amphetamine for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing, and does not include devices intended for Federal drug testing programs.	Exemption is limited to test systems intended to measure amphetamine for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing.
862.3150	Barbiturate test system.	PUY	DIS, DJN, DKN, DKX, DLX, DMF, KZY, PTH.	Exemption is limited to test systems intended to measure barbiturates for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing, and does not include devices intended for Federal drug testing programs.	Exemption is limited to test systems intended to measure barbiturates for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing.
862.3170	Benzodiazepine test system.	PUZ	JXM, KZZ, LAA, LAB, NFV.	Exemption is limited to test systems intended to measure any of the benzodiazepine compounds for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing, and does not include devices intended for Federal drug testing programs.	Exemption is limited to test systems intended to measure any of the benzodiazepine compounds for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing.
862.3250	Cocaine and cocaine metabolite test system.	PVA	DIN, DIO, DIR, DLN, DMN, DNG, DOM, JXO, KLN, LAC, NFY.	Exemption is limited to test systems intended to measure cocaine and a cocaine metabolite (benzoylecgonine) for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing, and does not include devices intended for Federal drug testing programs.	Exemption is limited to test systems intended to measure cocaine and a cocaine metabolite (benzoylecgonine) for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing.
862.3270	Codeine test system.	PVB	DLD, LAD, LAE	Exemption is limited to test systems intended to measure codeine for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing, and does not include devices intended for Federal drug testing programs.	Exemption is limited to test systems intended to measure codeine for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing.
862.3580	Lysergic acid diethylamide (LSD) test system.	PVC	DLB, DOL	Exemption is limited to test systems intended to measure LSD for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing, and does not include devices intended for Federal drug testing programs.	Exemption is limited to test systems intended to measure LSD for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing.

[2] 21 CFR 862.3100, 862.3150, 862.3170, 862.3250, 862.3270, 862.3580, 862.3610, 862.3620, 862.3630, 862.3640, 862.3650, 862.3700, 862.3870, and 862.3910; 84 FR 71794. Federal drug testing programs include, for example, programs run by the Substance Abuse and Mental Health Services Administration (SAMHSA), the Department of Transportation (DOT), and the U.S. military.

[3] For example, prior to issuance of this order, the definition for product code PUX (Test, Amphetamine, Employment and Insurance Testing, Exempt) included a reference to 82 FR 31976 (the action establishing the exemption). Following publication of this order, this reference, and corresponding ones for the other 510(k)-exempt product codes, will be replaced with a reference to this order which codifies the expanded scope of the exemption.

TABLE 1—CLASS II DEVICES—Continued

21 CFR section	Generic device type	Exempt product code	Non-exempt product codes	Partial limitations prior to issuance of this order	New partial limitations
862.3610	Methamphetamine test system.	PVD	DJC, LAF, LAG, NGG.	Exemption is limited to test systems intended to measure methamphetamine for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing, and does not include devices intended for Federal drug testing programs.	Exemption is limited to test systems intended to measure methamphetamine for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing.
862.3620	Methadone test system.	PVE	DIW, DJR, DKR, DMB, DNT, DPP, PTG.	Exemption is limited to test systems intended to measure methadone for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing, and does not include devices intended for Federal drug testing programs.	Exemption is limited to test systems intended to measure methadone for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing.
862.3630	Methaqualone test system.	PVF	KXS	Exemption is limited to test systems intended to measure methaqualone for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing, and does not include devices intended for Federal drug testing programs.	Exemption is limited to test systems intended to measure methaqualone for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing.
862.3640	Morphine test system.	PVG	DIQ, DJJ, DLR, DMY, DNA, DNK, DOE, DOK, DPK, NGI.	Exemption is limited to test systems intended to measure morphine and its analogs for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing, and does not include devices intended for Federal drug testing programs.	Exemption is limited to test systems intended to measure morphine and its analogs for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing.
862.3650	Opiate test system	PVH	DJF, DJG, DKT, DLT, LAH, LAI, NGL.	Exemption is limited to test systems intended to measure any of the addictive narcotic pain-relieving opiate drugs for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing, and does not include devices intended for Federal drug testing programs.	Exemption is limited to test systems intended to measure any of the addictive narcotic pain-relieving opiate drugs for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing.
862.3700	Propoxyphene test system.	PVI	DPN, JXN, LAJ, LAK, QBF.	Exemption is limited to test systems intended to measure propoxyphene for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing, and does not include devices intended for Federal drug testing programs.	Exemption is limited to test systems intended to measure propoxyphene for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing.
862.3870	Cannabinoid test system.	PVJ	DKE, LAT, LDJ, NFW.	Exemption is limited to test systems intended to measure any of the cannabinoids for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing, and does not include devices intended for Federal drug testing programs.	Exemption is limited to test systems intended to measure any of the cannabinoids for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing.
862.3910	Tricyclic antidepressant drugs test system.	PVK	LFG, LFH, LFI, MLK, QAW.	Exemption is limited to test systems intended to measure any of the tricyclic antidepressant drugs for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing, and does not include devices intended for Federal drug testing programs.	Exemption is limited to test systems intended to measure any of the tricyclic antidepressant drugs for employment and insurance testing and for which the test system labeling includes a statement that the device is intended solely for employment and insurance testing.

VI. Analysis of Environmental Impact

We have determined under 21 CFR 25.30(h) that this action is of a type that does not normally have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

VII. Paperwork Reduction Act of 1995

FDA concludes that this final order contains no new collection of information. This final order refers to previously approved collections of information. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521). The collections of information in part 807, subpart E, regarding premarket notification submissions, have been approved under OMB control number 0910–0120, the collections of information in 21 CFR parts 801 and 809, regarding device labeling, have been approved under OMB control number 0910–0485, and the collections of information in 21 CFR part 820, regarding quality management system regulation, have been approved under OMB control number 0910–0073.

List of Subjects in 21 CFR Part 862

Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 862 is amended as follows:

PART 862—CLINICAL CHEMISTRY AND CLINICAL TOXICOLOGY DEVICES

■ 1. The authority citation for part 862 continues to read as follows:

Authority: 21 U.S.C. 351, 360, 360c, 360e, 360j, 360*l,* 371.

■ 2. In § 862.3100, revise paragraph (b) to read as follows:

§ 862.3100 Amphetamine test system.

* * * * *

(b) *Classification.* Class II (special controls). An amphetamine test system is not exempt if it is intended for any use other than employment or insurance testing. The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 862.9, provided the test system is intended for employment and insurance testing and includes a statement in the labeling that the device is intended solely for use in employment and insurance testing.

■ 3. In § 862.3150, revise paragraph (b) to read as follows:

§ 862.3150 Barbiturate test system.

* * * * *

(b) *Classification.* Class II (special controls). A barbiturate test system is not exempt if it is intended for any use other than employment or insurance testing. The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 862.9, provided the test system is intended for employment and insurance testing and includes a statement in the labeling that the device is intended solely for use in employment and insurance testing.

■ 4. In § 862.3170, revise paragraph (b) to read as follows:

§ 862.3170 Benzodiazepine test system.

* * * * *

(b) *Classification.* Class II (special controls). A benzodiazepine test system is not exempt if it is intended for any use other than employment or insurance testing. The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 862.9, provided the test system is intended for employment and insurance testing and includes a statement in the labeling that the device is intended solely for use in employment and insurance testing.

■ 5. In § 862.3250, revise paragraph (b) to read as follows:

§ 862.3250 Cocaine and cocaine metabolite test system.

* * * * *

(b) *Classification.* Class II (special controls). A cocaine and cocaine metabolite test system is not exempt if it is intended for any use other than employment or insurance testing. The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 862.9, provided the test system is intended for employment and insurance testing and includes a statement in the labeling that the device is intended solely for use in employment and insurance testing.

■ 6. In § 862.3270, revise paragraph (b) to read as follows:

§ 862.3270 Codeine test system.

* * * * *

(b) *Classification.* Class II (special controls). A codeine test system is not exempt if it is intended for any use other than employment or insurance testing. The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 862.9, provided the test system is intended for employment and insurance testing and includes a statement in the labeling that the device is intended solely for use in employment and insurance testing.

■ 7. In § 862.3580, revise paragraph (b) to read as follows:

§ 862.3580 Lysergic acid diethylamide (LSD) test system.

* * * * *

(b) *Classification.* Class II (special controls). A lysergic acid diethylamide (LSD) test system is not exempt if it is intended for any use other than employment or insurance testing. The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 862.9, provided the test system is intended for employment and insurance testing and includes a statement in the labeling that the device is intended solely for use in employment and insurance testing.

■ 8. In § 862.3610, revise paragraph (b) to read as follows:

§ 862.3610 Methamphetamine test system.

* * * * *

(b) *Classification.* Class II (special controls). A methamphetamine test system is not exempt if it is intended for any use other than employment or insurance testing. The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 862.9, provided the test system is intended for employment and insurance testing and includes a statement in the labeling that the device is intended solely for use in employment and insurance testing.

■ 9. In § 862.3620, revise paragraph (b) to read as follows:

§ 862.3620 Methadone test system.

* * * * *

(b) *Classification.* Class II (special controls). A methadone test system is not exempt if it is intended for any use other than employment or insurance testing. The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 862.9, provided the test system is intended for employment and insurance testing and includes a statement in the labeling that the device is intended solely for use in employment and insurance testing.

■ 10. In § 862.3630, revise paragraph (b) to read as follows:

§ 862.3630 Methaqualone test system.

* * * * *

(b) *Classification.* Class II (special controls). A methaqualone test system is not exempt if it is intended for any use other than employment or insurance testing. The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 862.9, provided the test system is intended for employment and insurance testing and

includes a statement in the labeling that the device is intended solely for use in employment and insurance testing.

■ 11. In § 862.3640, revise paragraph (b) to read as follows:

§ 862.3640 Morphine test system.

* * * * *

(b) *Classification.* Class II (special controls). A morphine test system is not exempt if it is intended for any use other than employment or insurance testing. The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 862.9, provided the test system is intended for employment and insurance testing and includes a statement in the labeling that the device is intended solely for use in employment and insurance testing.

■ 12. In § 862.3650, revise paragraph (b) to read as follows:

§ 862.3650 Opiate test system.

* * * * *

(b) *Classification.* Class II (special controls). An opiate test system is not exempt if it is intended for any use other than employment or insurance testing. The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 862.9, provided the test system is intended for employment and insurance testing and includes a statement in the labeling that the device is intended solely for use in employment and insurance testing.

■ 13. In § 862.3700, revise paragraph (b) to read as follows:

§ 862.3700 Propoxyphene test system.

* * * * *

(b) *Classification.* Class II (special controls). A propoxyphene test system is not exempt if it is intended for any use other than employment or insurance testing. The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 862.9, provided the test system is intended for employment and insurance testing and includes a statement in the labeling that the device is intended solely for use in employment and insurance testing.

■ 14. In § 862.3870, revise paragraph (b) to read as follows:

§ 862.3870 Cannabinoid test system.

* * * * *

(b) *Classification.* Class II (special controls). A cannabinoid test system is not exempt if it is intended for any use other than employment or insurance testing. The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 862.9, provided the test system is intended for employment and insurance testing and includes a statement in the labeling that the device is intended solely for use in employment and insurance testing.

■ 15. In § 862.3910, revise paragraph (b) to read as follows:

§ 862.3910 Tricyclic antidepressant drugs test system.

* * * * *

(b) *Classification.* Class II (special controls). A tricyclic antidepressant drugs test system is not exempt if it is intended for any use other than employment or insurance testing. The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 862.9, provided the test system is intended for employment and insurance testing and includes a statement in the labeling that the device is intended solely for use in employment and insurance testing.

Grace R. Graham,

Deputy Commissioner for Policy, Legislation, and International Affairs.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 866

[Docket No. FDA–2026–N–10990]

Medical Devices; Immunology and Microbiology Devices; Classification of the High Throughput DNA Sequencing for Hereditary Cancer Predisposition Assessment Test System

AGENCY: Food and Drug Administration, HHS.

ACTION: Final amendment; final order.

SUMMARY: The Food and Drug Administration (FDA) is classifying the high throughput DNA sequencing for hereditary cancer predisposition assessment test system into class II (special controls). The special controls that apply to the device type are identified in this order and will be part of the codified language for classification of the high throughput DNA sequencing for hereditary cancer predisposition assessment test system. We are taking this action because we have determined that classifying the device into class II will provide a reasonable assurance of the safety and effectiveness of the device. We believe this action will also enhance patients' access to beneficial innovative devices, in part by reducing regulatory burdens.

DATES: This order is effective October 6, 2026. The classification was applicable on September 29, 2023.

FOR FURTHER INFORMATION CONTACT: Jingya Wang, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 3250, Silver Spring, MD 20993–0002, 301–837–7257, *Jingya.Wang@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Upon request, FDA (the Agency or we) has classified the high throughput DNA sequencing for hereditary cancer predisposition assessment test system into class II (special controls), which we have determined will provide a reasonable assurance of the safety and effectiveness of the device. In addition, we believe this action will enhance patients' access to beneficial innovation, in part by reducing regulatory burdens by placing the device into a lower device class than the automatic class III assignment.

The automatic assignment of class III occurs by operation of law and without any action by FDA, regardless of the level of risk posed by the new device. Any device that was not in commercial distribution before May 28, 1976, is automatically classified into, and remains within, class III and requires premarket approval unless and until FDA takes an action to classify or reclassify the device (21 U.S.C. 360c(f)(1)). We refer to these devices as ''postamendments devices'' because they were not in commercial distribution prior to the date of enactment of the Medical Device Amendments of 1976, which amended the Federal Food, Drug, and Cosmetic Act (FD&C Act).

FDA may take a variety of actions in appropriate circumstances to classify or reclassify a device into class I or II. We may issue an order finding a new device to be substantially equivalent under section 513(i) of the FD&C Act (21 U.S.C. 360c(i)) to a predicate device that does not require premarket approval. We determine whether a new device is substantially equivalent to a predicate device by means of the procedures for premarket notification under section 510(k) of the FD&C Act (21 U.S.C. 360(k)) and part 807 (21 CFR part 807).

FDA may also classify a device through ''De Novo'' classification, a common name for the process authorized under section 513(f)(2) of the FD&C Act (see also part 860, subpart D (21 CFR part 860, subpart D)). Section

207 of the Food and Drug Administration Modernization Act of 1997 (Pub. L. 105–115) established the first procedure for De Novo classification. Section 607 of the Food and Drug Administration Safety and Innovation Act (Pub. L. 112–144) modified the De Novo classification process by adding a second procedure. A device sponsor may utilize either procedure for De Novo classification.

Under the first procedure, the person submits a premarket notification (510(k)) for a device that has not previously been classified. After receiving an order from FDA classifying the device into class III under section 513(f)(1) of the FD&C Act, the person then requests a classification under section 513(f)(2).

Under the second procedure, rather than first submitting a 510(k) and then a request for classification, if the person determines that there is no legally marketed device upon which to base a determination of substantial equivalence, that person requests a classification under section 513(f)(2) of the FD&C Act.

Under either procedure for De Novo classification, FDA is required to classify the device by written order within 120 days. The classification will be according to the criteria under section 513(a)(1) of the FD&C Act. Although the device was automatically placed within class III, the De Novo classification is considered to be the initial classification of the device.

We believe this De Novo classification will enhance patients' access to beneficial innovation, in part by reducing regulatory burdens. When FDA classifies a device into class I or II via the De Novo process, the device can serve as a predicate for future devices of that type, including for 510(k)s (see section 513(f)(2)(B)(i) of the FD&C Act). As a result, other device sponsors do not have to submit a De Novo request or premarket approval application to market a substantially equivalent device (see section 513(i) of the FD&C Act, defining ''substantial equivalence''). Instead, sponsors can use the less burdensome 510(k) process, when necessary, to market their device.

II. De Novo Classification

On March 29, 2021, FDA received Invitae Corporation's request for De Novo classification of the Invitae Common Hereditary Cancers Panel. FDA reviewed the request in order to classify the device under the criteria for classification set forth in section 513(a)(1) of the FD&C Act.

We classify devices into class II if general controls by themselves are insufficient to provide reasonable assurance of the safety and effectiveness of the device, but there is sufficient information to establish special controls that, in combination with the general controls, provide reasonable assurance of the safety and effectiveness of the device for its intended use (see section 513(a)(1)(B) of the FD&C Act). After review of the information submitted in the request, we determined that the device can be classified into class II with the establishment of special controls. FDA has determined that these special controls, in addition to the general controls, will provide reasonable assurance of the safety and effectiveness of the device.

Therefore, on September 29, 2023, FDA issued an order to the requester classifying the device into class II. In this final order, FDA is codifying the classification of the device by adding 21 CFR 866.6095.[1] We have named the generic type of device ''high throughput DNA sequencing for hereditary cancer predisposition assessment test system,'' and it is identified as a qualitative in vitro diagnostic (IVD) system intended for analysis of human DNA extracted from human specimens to detect germline mutations in a panel of targeted cancer-related genes. It is intended to aid in hereditary cancer predisposition assessment by qualified health care professionals in accordance with professional guidelines. The device is not intended for screening, prenatal testing, or as a stand-alone diagnostic test. The device is for prescription use only.

FDA has identified the risks to health associated with this type of device and the measures required to mitigate these risks in table 1.

TABLE 1—RISKS TO HEALTH AND MITIGATION MEASURES FOR HIGH THROUGHPUT DNA SEQUENCING FOR HEREDITARY CANCER PREDISPOSITION ASSESSMENT TEST SYSTEMS

Identified risks to health	Mitigation measures
False positive, false negative, or failure to provide a result.	Certain design verification and validation including certain analytical and clinical studies, and mutation annotation and clinical interpretation rules identified in special control (1). Certain labeling information including limitations, device descriptions, methodology and protocols, and performance information identified in special control (2).
Incorrect interpretation of variants/alterations by the lab.	Certain design verification and validation including certain analytical and clinical studies, and mutation annotation and clinical interpretation rules identified in special control (1). Certain labeling information including limitations, device descriptions, methodology and protocols, and performance information identified in special control (2).
Incorrect interpretation of test results by the healthcare provider.	Certain design verification and validation including certain analytical and clinical studies, and mutation annotation and clinical interpretation rules identified in special control (1). Certain labeling information including limitations, device descriptions, methodology and protocols, and performance information identified in special control (2).

FDA has determined that special controls, in combination with the general controls, address these risks to health and provide reasonable assurance of safety and effectiveness of the device. For a device to fall within this classification, and thus avoid automatic classification in class III, it would have to comply with the special controls named in this final order. The necessary special controls appear in the regulation codified by this final order.

At the time of classification, high throughput DNA sequencing for hereditary cancer predisposition assessment test systems are for prescription use only. Therefore, these devices are subject to the prescription

[1] FDA notes that the ''ACTION'' caption for this final order is styled as ''Final amendment; final order,'' rather than ''Final order.'' Beginning in December 2019, this editorial change was made to indicate that the document ''amends'' the Code of Federal Regulations. The change was made in accordance with the Office of Federal Register's (OFR) interpretations of the Federal Register Act (44 U.S.C. chapter 15), its implementing regulations (1 CFR 5.9 and parts 21 and 22), and the Document Drafting Handbook.

labeling requirements for IVD products (see 21 CFR 809.10(a)(4) and (b)(5)(ii)).

Under the FD&C Act, submission of a premarket notification under section 510(k) is required to reasonably assure the safety and effectiveness of class II devices unless FDA determines that the device type should be exempt under section 510(m) of the FD&C Act. At this time FDA has not made this determination for high throughput DNA sequencing for hereditary cancer predisposition assessment test systems. This device is therefore subject to premarket notification requirements under section 510(k) of the FD&C Act.

III. Analysis of Environmental Impact

The Agency has determined under 21 CFR 25.34(b) that this action is of a type that does not normally have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

IV. Paperwork Reduction Act of 1995

This final order establishes special controls that refer to previously approved collections of information found in other FDA regulations and guidance. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521). The collections of information in part 860, subpart D, regarding De Novo classification have been approved under OMB control number 0910–0844; the collections of information in 21 CFR part 814, subparts A through E, regarding premarket approval have been approved under OMB control number 0910–0231; the collections of information in part 807, subpart E, regarding premarket notification submissions have been approved under OMB control number 0910–0120; the collections of information in 21 CFR part 820 regarding quality management system regulation have been approved under OMB control number 0910–0073; and the collections of information in 21 CFR parts 801 and 809 regarding labeling have been approved under OMB control number 0910–0485.

List of Subjects in 21 CFR Part 866

Biologics, Laboratories, Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 866 is amended as follows:

PART 866—IMMUNOLOGY AND MICROBIOLOGY DEVICES

■ 1. The authority citation for part 866 continues to read as follows:

Authority: 21 U.S.C. 351, 360, 360c, 360e, 360j, 360l, 371.

■ 2. Add § 866.6095 to subpart G to read as follows:

§ 866.6095 High throughput DNA sequencing for hereditary cancer predisposition assessment test system.

(a) *Identification.* A high throughput DNA sequencing for hereditary cancer predisposition assessment test system is a qualitative in vitro diagnostic (IVD) system intended for analysis of human DNA extracted from human specimens to detect germline mutations in a panel of targeted cancer-related genes. It is intended to aid in hereditary cancer predisposition assessment by qualified health care professionals in accordance with professional guidelines. The device is not intended for screening, prenatal testing, or as a stand-alone diagnostic test. The device is for prescription use only.

(b) *Classification.* Class II (special controls). The special controls for this device are:

(1) Design verification and validation must include:

(i) A description of genomic coverage that includes:

(A) A list of all genes, variant types, and target regions within each gene that the device detects;

(B) Summary information regarding the clinical significance of each gene, including references;

(C) A description of the genes with high clinical significance that are detected by the device, defined as genes for which the test result(s) may lead to prophylactic screening, confirmatory procedures, or treatment that may incur morbidity or mortality; and

(D) A description of any within-gene targeted regions that cannot be reported.

(ii) Specifications for specimen requirements, including any specimen collection devices, handling, and storage.

(iii) Specifications of the DNA extraction method and criteria for DNA quality and quantity that are prerequisite to performing the assay.

(iv) Detailed documentation of the methodology and protocols for each step of the test, including reagents, instrumentation, and software required. The documentation must include the analysis algorithms used for mutation detection and annotation, and specify the quality metrics, variant calling thresholds, and filters at each step of the test, including the criteria for run failures, batch failures, specimen failures, invalid calls (*e.g.,* failed quality control), and ''no calls'' (*i.e.,* absence of a result), as applicable.

(v) Description of required instrumentation and equipment, and any ancillary reagents, instrumentation, or equipment.

(vi) Detailed documentation of device software, including software applications and hardware-based devices that incorporate software. The documentation must include verification, validation, hazard analysis, and risk assessment activities.

(vii) Documentation of internal and external controls that are recommended or provided and control procedures. The documentation must identify those control elements that are incorporated into the testing procedure.

(viii) Detailed documentation pertaining to the probability of test failure based on data from clinical samples, description of scenarios in which a test can fail, and any risk mitigations, including follow-up actions to be taken.

(ix) Detailed documentation of the rules, procedures, tools, and criteria used for establishing mutation-hereditary disease relationships and mutation annotation, evaluation, and classification (*e.g.,* pathogenic, likely pathogenic, variant of unknown significance, benign, and likely benign).

(x) Detailed documentation of any internal or external database(s) or decision rules used for mutation annotation, including:

(A) The protocol(s) used for variant interpretation, including training of personnel, monitoring accuracy of decision, resolution of discordant interpretations, and updating interpretations;

(B) Detailed documentation of the basis for interpretation, including the use of alternate databases, literature, and guidelines, and the basis for risk reporting;

(C) Methods for data preservation and security; and

(D) Data formats and nomenclature.

(xi) Information that demonstrates the performance characteristics of the device, evaluated either specifically for each gene/mutation or, when determined to be acceptable and appropriate by FDA, using a representative approach based on other mutations of the same type, including:

(A) Data that adequately support the intended specimen type(s) (*e.g.,* whole blood), specimen handling protocol, and DNA extraction method.

(B) A summary of the evidence that demonstrates how the analytical quality metrics and thresholds used to

determine the acceptability of reporting support the minimum accuracy requirements.

(C) Data to adequately support device accuracy using clinical specimens representing all indicated specimen types, mutation types, and size ranges intended to be detected and reported by the device. Accuracy data must fulfill the following:

(*1*) Accuracy of the device must be evaluated with clinical specimens collected in accordance with the device labeling and selected without bias, or well-characterized human cell line samples, when determined to be acceptable and appropriate by FDA.

(*2*) Accuracy must be evaluated by comparison to bidirectional Sanger sequencing or other orthogonal methods identified as appropriate by FDA. Performance criteria for both the comparator method(s) and the device must be predefined and appropriate to the device's intended use. Detailed study protocols must be documented.

(*3*) A sufficient number of specimens must be tested. For BRCA1 and BRCA2 genes, a minimum of 120 variant positive specimens must be tested. For other genes with high clinical significance, at least 40 variant-positive specimens must be tested per gene, including representative specimens for each indicated variant type based on a justification determined to be appropriate and acceptable by FDA. For remaining genes detected by the device, testing must include variant positive specimens representing each variant type, unless the variant type has a prevalence of less than 0.01 percent. Specimen selection must be prioritized based on clinical significance. The selected specimens must be representative of zygosity and challenging genomic context (*e.g.,* guanine-cytosine content, near tandem repeats and homopolymer stretches, pseudogene), and must cover the range of sizes (for insertions, deletions, copy number variant (CNV) amplifications and CNV deletions) intended to be detected and reported by the device.

(*4*) Except as permitted by FDA under paragraph (b)(1)(xi)(C)(*5*) of this section, tested specimens must be selected based on results obtained from the orthogonal method. Positive percent agreement (PPA) and negative percent agreement (NPA) must be calculated and demonstrated for each variant type detected and reported by the device, as well as for clinically relevant variants. PPA is calculated as the number of variants that are tested positive by both the device and the orthogonal method (true ''positives'' (TP)) divided by the number of variants tested positive as determined by the orthogonal method (TP plus false negatives (FN) by the device). NPA is calculated as the number of variants that are tested negative (wild type) by both the device and the orthogonal method (true ''negatives'' (TN)) divided by the number of variants tested negative (wild type) by the orthogonal method (TN plus false positives (FP) by the device). Point estimates for PPA and NPA must be calculated along with 95 percent two-sided confidence intervals (CI). Uncertainty of the point estimate must be within an acceptable range, as identified by FDA, and must be demonstrated using the 95 percent CI.

(*5*) When it is determined by FDA to be appropriate and acceptable to select samples based on the results obtained with the device, accuracy must be presented as technical positive predictive value (TPPV) and technical negative predictive value (TNPV). TPPV relates to the likelihood that a variant call is a true positive and reflects the number of false positives per test. TPPV is calculated as the number of variants that are tested positive by both the device and the orthogonal method (TP) divided by the number of variants tested positive by the device (TP plus FP). TNPV relates to the likelihood that a variant call is a true negative and reflects the number of false negatives per test. TNPV is calculated as the number of variants that are tested negative by both the device and the orthogonal method (TN) divided by the number of variants tested negative by the device (TN plus FN).

(*6*) Any ''no calls'' or invalid calls in the study must be reported separately. The percent of final ''no calls'' or invalid calls must be clinically justifiable.

(*7*) Accuracy as a function of each performance metric (*e.g.,* coverage depth, base quality scores) must be documented to provide evidence of the accuracy of the overall run.

(*8*) Detailed documentation for accuracy of the device must include information and results for the overall study, each mutation type, and each gene. The accuracy must further be described based upon stratification within each mutation type by zygosity, genomic context, and size (for indels and CNVs). Overall accuracy for reporting of substitutions must be ≥99.0 percent; insertions and deletions, ≥99.0 percent; CNVs, ≥99.0 percent for positive agreement (PPA, TPPV); and ≥99.9 percent for negative agreement (NPA, TNPV).

(D) Documentation of the data to adequately support device precision using clinical specimens representing all specimen types, mutation types, and sizes intended to be detected and reported by the device. The precision study must fulfill the following:

(*1*) The study must be performed using multiple instruments and multiple operators, on multiple non-consecutive days, and using multiple reagent lots. If the device is to be performed at more than one site, different sites must be included and reproducibility across sites must be evaluated.

(*2*) Representative clinical specimens of each mutation type must be tested (both positive and negative), considering clinical significance, prevalence, zygosity, genomic context, and size (for indels and CNVs). The precision for CNV detection must be demonstrated on the gene level for genes with high clinical significance. Alternatively, a justification for why such data are not needed must be found acceptable and appropriate by FDA.

(*3*) The study must assess the performance of all steps, including DNA extraction, unless a separate extraction study is performed.

(*4*) The study must use predefined performance criteria. Agreement estimates such as PPA/NPA and average positive agreement/average negative agreement must be provided, including point estimates and 95 percent confidence intervals. Documentation from the precision study must be demonstrated for the overall precision study, in addition to each mutation type, each gene, and each sample. Precision must further be demonstrated upon stratification within each mutation type by zygosity, genomic context, and size (for indels and CNVs). The overall precision point estimates for each variant type must be >99.0 percent.

(*5*) Any ''no calls'' or invalid calls in the study must be included in precision study results and reported separately. The percent of ''no calls'' or invalid calls and key quality control metrics parameters (*e.g.,* coverage, sequencing score) must be summarized and based on stratification in the same way as the precision estimates.

(E) Documentation of the nucleic acid assay input range and the evidence to adequately support the range.

(F) Detailed documentation of additional analytical validation studies, including endogenous and exogenous interfering substances, specimen and reagent stability, cross-reactivity, carryover and cross-contamination, guard-banding, and index misassignment, as applicable. If specimens are pooled, index cross-contamination must be evaluated and

demonstrate that pooling does not negatively impact test performance.

(G) Specimen type and matrix comparison data must be generated if more than one specimen type or anticoagulant can be tested with the device, including failure rates for the different specimen types.

(xii) Information that adequately supports the variant annotation and clinical interpretation of the test must include:

(A) A summary documenting the clinical significance for each gene on the test panel, including the associated conditions/cancers, the most prevalent and representative mutations, and summary of clinical evidence with references, including expected frequency in the general population and different ethnicities, and risks of developing the disease in relevant ethnic populations and the general population.

(B) Detailed documentation of the data to adequately support the performance of the variant annotation algorithms (*e.g.,* concordance studies between the device generated variant classifications and externally established variant classifications, manual classifications by medical professionals, or classifications generated from clinical test reports).

(C) Documentation of any procedures or protocols for incorporation of any updates of valid scientific evidence into variant classification algorithms.

(2) The labeling required under § 809.10 of this chapter must include the following, as applicable:

(i) The intended use must include a description of the intended specimen type(s) and matrix (*e.g.,* whole blood), the validated germline mutation types (*e.g.,* single nucleotide variant, insertion, deletion, CNV), and a statement that the test is for hereditary cancer predisposition assessment and to aid in identifying hereditary genetic variants potentially associated with a diagnosed cancer.

(ii) The name of the testing facility or facilities (*e.g.,* for single-site assays).

(iii) A summary of device description in accordance with paragraphs (b)(1)(i) through (b)(1)(viii) of this section.

(iv) A section that provides summary information on how the test works, how to interpret the results of the test, and an explanation on the database(s) used for mutation annotation.

(v) A summary of the information that demonstrates the performance characteristics of the device as required under paragraph (b)(1)(xi) of this section.

(vi) The following limiting statements:

(A) A statement that the test is not intended for use as a stand-alone diagnostic to diagnose cancer or other health conditions, and is not intended for use for prenatal testing nor as a cancer screening test.

(B) A statement that the test is specifically designed for heritable germline mutations and is not appropriate for the detection of somatic mutations.

(C) A description of the intended test population.

(D) A statement that the risk of cancer or disease for an individual cannot be predicted.

(E) A statement that: test results should be interpreted in the context of clinical findings, family history, lifestyle, environment, and other factors; molecular testing may not detect all possible mutations leading to cancer predisposition; a negative result does not rule out the possibility that the individual has an unidentified variant leading to cancer; and for more information, physicians ordering the test may wish to consult with a clinical medical geneticist or genetic counselor.

(F) A statement that other factors, such as ethnicity, may affect whether the test results are relevant for a particular patient and may also affect how their genetic health results are interpreted.

(G) A statement describing the situations that a patient should not receive the test (*e.g.,* a patient with bone marrow transplant).

(H) A statement describing the challenging genomic contexts that may have reduced performance, where results should be interpreted with care.

(I) A statement disclosing the genetic coverage of the test, including any gaps in coverage.

(J) Statements describing testing conditions that were identified to cause test failures (*e.g.,* low specimen volume, poor DNA quality).

(vii) For variants detected and reported by the device under the category of ''variants of uncertain significance'' or equivalent designation, a limiting statement that the clinical significance has not been demonstrated with adequate clinical evidence in accordance with established guidelines (*e.g.,* professional guidelines).

(viii) For variants detected and reported by the device under the category of ''variants with evidence of clinical significance'' or equivalent designation, reference(s) for physicians to access internal or external information concerning decision rules or conclusions about the level of evidence for clinical significance.

21 CFR Part 870

[Docket No. FDA–2026–N–10995]

Medical Devices; Cardiovascular Devices; Classification of the Hyperoxia Monitoring Device Adjunct to Pulse Oximetry

AGENCY: Food and Drug Administration, HHS.

ACTION: Final amendment; final order.

SUMMARY: The Food and Drug Administration (FDA) is classifying the hyperoxia monitoring device adjunct to pulse oximetry into class II (special controls). The special controls that apply to the device type are identified in this order and will be part of the codified language for classification of the hyperoxia monitoring device adjunct to pulse oximetry. We are taking this action because we have determined that classifying the device into class II will provide a reasonable assurance of the safety and effectiveness of the device. We believe this action will also enhance patients' access to beneficial innovative devices, in part by reducing regulatory burdens.

DATES: This order is effective October 6, 2026. The classification was applicable on October 12, 2023.

FOR FURTHER INFORMATION CONTACT: Annie Abraham, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 1264, Silver Spring, MD 20993–0002, 240–402–5219, *Annie.Abraham@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Upon request, FDA (the Agency or we) has classified the hyperoxia monitoring device adjunct to pulse oximetry into class II (special controls), which we have determined will provide a reasonable assurance of the safety and effectiveness of the device. In addition, we believe this action will enhance patients' access to beneficial innovation, in part by reducing regulatory burdens by placing the device into a lower

device class than the automatic class III assignment.

The automatic assignment of class III occurs by operation of law and without any action by FDA, regardless of the level of risk posed by the new device. Any device that was not in commercial distribution before May 28, 1976, is automatically classified into, and remains within, class III and requires premarket approval unless and until FDA takes an action to classify or reclassify the device (21 U.S.C. 360c(f)(1)). We refer to these devices as ''postamendments devices'' because they were not in commercial distribution prior to the date of enactment of the Medical Device Amendments of 1976, which amended the Federal Food, Drug, and Cosmetic Act (FD&C Act).

FDA may take a variety of actions in appropriate circumstances to classify or reclassify a device into class I or II. We may issue an order finding a new device to be substantially equivalent under section 513(i) of the FD&C Act (21 U.S.C. 360c(i)) to a predicate device that does not require premarket approval. We determine whether a new device is substantially equivalent to a predicate device by means of the procedures for premarket notification under section 510(k) of the FD&C Act (21 U.S.C. 360(k)) and part 807 (21 CFR part 807).

FDA may also classify a device through ''De Novo'' classification, a common name for the process authorized under section 513(f)(2) of the FD&C Act (see also part 860, subpart D (21 CFR part 860, subpart D)). Section 207 of the Food and Drug Administration Modernization Act of 1997 (Pub. L. 105–115) established the first procedure for De Novo classification. Section 607 of the Food and Drug Administration Safety and Innovation Act (Pub. L. 112–144) modified the De Novo classification process by adding a second procedure. A device sponsor may utilize either procedure for De Novo classification.

Under the first procedure, the person submits a premarket notification (510(k)) for a device that has not previously been classified. After receiving an order from FDA classifying the device into class III under section 513(f)(1) of the FD&C Act, the person then requests a classification under section 513(f)(2).

Under the second procedure, rather than first submitting a 510(k) and then a request for classification, if the person determines that there is no legally marketed device upon which to base a determination of substantial equivalence, that person requests a classification under section 513(f)(2) of the FD&C Act.

Under either procedure for De Novo classification, FDA is required to classify the device by written order within 120 days. The classification will be according to the criteria under section 513(a)(1) of the FD&C Act. Although the device was automatically placed within class III, the De Novo classification is considered to be the initial classification of the device.

We believe this De Novo classification will enhance patients' access to beneficial innovation, in part by reducing regulatory burdens. When FDA classifies a device into class I or II via the De Novo process, the device can serve as a predicate for future devices of that type, including for 510(k)s (see section 513(f)(2)(B)(i) of the FD&C Act). As a result, other device sponsors do not have to submit a De Novo request or premarket approval application to market a substantially equivalent device (see section 513(i) of the FD&C Act, defining ''substantial equivalence''). Instead, sponsors can use the less burdensome 510(k) process, when necessary, to market their device.

II. De Novo Classification

On December 21, 2020, FDA received Masimo Corporation's request for De Novo classification of the ORi device. FDA reviewed the request in order to classify the device under the criteria for classification set forth in section 513(a)(1) of the FD&C Act.

We classify devices into class II if general controls by themselves are insufficient to provide reasonable assurance of the safety and effectiveness of the device, but there is sufficient information to establish special controls that, in combination with the general controls, provide reasonable assurance of the safety and effectiveness of the device for its intended use (see section 513(a)(1)(B) of the FD&C Act). After review of the information submitted in the request, we determined that the device can be classified into class II with the establishment of special controls. FDA has determined that these special controls, in addition to the general controls, will provide reasonable assurance of the safety and effectiveness of the device.

Therefore, on October 12, 2023, FDA issued an order to the requester classifying the device into class II. In this final order, FDA is codifying the classification of the device by adding 21 CFR 870.2720.[1] We have named the generic type of device ''hyperoxia monitoring device adjunct to pulse oximetry,'' and it is identified as a device that monitors elevated hemoglobin oxygen saturation levels as an adjunct to arterial oxygen saturation monitoring.

FDA has identified the risks to health associated with this type of device and the measures required to mitigate these risks in table 1.

TABLE 1—RISKS TO HEALTH AND MITIGATION MEASURES FOR HYPEROXIA MONITORING DEVICES ADJUNCT TO PULSE OXIMETRY

Identified risks to health	Mitigation measures
Inaccurate measurement of hyperoxia or hypoxia leading to escalation of unneeded therapy and false reassurance.	Clinical performance testing.
Incorrect or delayed treatment due to over-reliance on device output for clinical decision-making without using arterial blood gas values for confirmation.	Clinical performance testing; Human factors/usability testing; and Labeling.
Procedure delay or inaccuracy due to software failure or corruption in data transfer	Software verification, validation, and hazard analysis.
Patient or operator injury due to electrical hazards	Electrical safety testing; and Electromagnetic compatibility testing.
Adverse tissue reaction	Biocompatibility evaluation.
Inaccurate measurement or infection due to unclean surfaces	Reprocessing validation; and Labeling.

[1] FDA notes that the ''ACTION'' caption for this final order is styled as ''Final amendment; final order,'' rather than ''Final order.'' Beginning in December 2019, this editorial change was made to indicate that the document ''amends'' the Code of Federal Regulations. The change was made in accordance with the Office of Federal Register's (OFR) interpretations of the Federal Register Act (44 U.S.C. chapter 15), its implementing regulations (1 CFR 5.9 and parts 21 and 22), and the Document Drafting Handbook.

FDA has determined that special controls, in combination with the general controls, address these risks to health and provide reasonable assurance of the safety and effectiveness of the device. For a device to fall within this classification, and thus avoid automatic classification in class III, it would have to comply with the special controls named in this final order. The necessary special controls appear in the regulation codified by this final order.

Under the FD&C Act, submission of a premarket notification under section 510(k) is required to reasonably assure the safety and effectiveness of class II devices unless FDA determines that the device type should be exempt under section 510(m) of the FD&C Act. At this time FDA has not made this determination for hyperoxia monitoring devices adjunct to pulse oximetry. This device is therefore subject to premarket notification requirements under section 510(k) of the FD&C Act.

III. Analysis of Environmental Impact

The Agency has determined under 21 CFR 25.34(b) that this action is of a type that does not normally have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

IV. Paperwork Reduction Act of 1995

This final order establishes special controls that refer to previously approved collections of information found in other FDA regulations and guidance. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521). The collections of information in part 860, subpart D, regarding De Novo classification have been approved under OMB control number 0910–0844; the collections of information in 21 CFR part 814, subparts A through E, regarding premarket approval have been approved under OMB control number 0910–0231; the collections of information in part 807, subpart E, regarding premarket notification submissions have been approved under OMB control number 0910–0120; the collections of information in 21 CFR part 820 regarding quality management system regulation have been approved under OMB control number 0910–0073; and the collections of information in 21 CFR part 801 regarding labeling have been approved under OMB control number 0910–0485.

List of Subjects in 21 CFR Part 870

Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 870 is amended as follows:

PART 870—CARDIOVASCULAR DEVICES

■ 1. The authority citation for part 870 continues to read as follows:

Authority: 21 U.S.C. 351, 360, 360c, 360e, 360j, 360*l,* 371.

■ 2. Add § 870.2720 to subpart C to read as follows:

§ 870.2720 Hyperoxia monitoring device adjunct to pulse oximetry.

(a) *Identification.* A hyperoxia monitoring device adjunct to pulse oximetry is a device that monitors elevated hemoglobin oxygen saturation levels as an adjunct to arterial oxygen saturation monitoring.

(b) *Classification.* Class II (special controls). The special controls for this device are:

(1) Clinical performance testing under anticipated conditions of use must evaluate the accuracy of hyperoxia monitoring by the device and evaluate all adverse events.

(2) Human factors/usability testing must demonstrate that the user can correctly use the device, based solely on reading the instructions for use.

(3) Performance data must demonstrate the electromagnetic compatibility and electrical safety of the device.

(4) The patient-contacting components of the device must be demonstrated to be biocompatible.

(5) Performance testing must validate the reprocessing instructions for the device, including demonstration of device performance after repeated cleaning and disinfection.

(6) Software verification, validation, and hazard analysis must be performed. Performance testing must demonstrate compatibility with pulse oximeter devices labeled to be compatible with the device.

(7) Labeling must include:

(i) Cleaning and disinfection instructions;

(ii) A summary of the clinical performance testing with the device;

(iii) A warning against over-reliance on device output without using arterial blood gas values for confirmation; and

(iv) Instructions to monitor oxygen delivery and patient clinical/cardiovascular status when device output changes.

Grace R. Graham,

Deputy Commissioner for Policy, Legislation, and International Affairs.

Food and Drug Administration

21 CFR Part 878

[Docket No. FDA–2026–N–10992]

Medical Devices; General and Plastic Surgery Devices; Classification of the Focused Ultrasound System for Non-Thermal, Mechanical Tissue Ablation

AGENCY: Food and Drug Administration, HHS.

ACTION: Final amendment; final order.

SUMMARY: The Food and Drug Administration (FDA) is classifying the focused ultrasound system for non-thermal, mechanical tissue ablation into class II (special controls). The special controls that apply to the device type are identified in this order and will be part of the codified language for classification of the focused ultrasound system for non-thermal, mechanical tissue ablation. We are taking this action because we have determined that classifying the device into class II will provide a reasonable assurance of the safety and effectiveness of the device. We believe this action will also enhance patients' access to beneficial innovative devices, in part by reducing regulatory burdens.

DATES: This order is effective October 6, 2026. The classification was applicable on October 6, 2023.

FOR FURTHER INFORMATION CONTACT: Cal Rabang, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 4633, Silver Spring, MD 20993–0002, 301–796–6412, *Cal.Rabang@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Upon request, FDA (the Agency or we) has classified the focused ultrasound system for non-thermal, mechanical tissue ablation into class II (special controls), which we have determined will provide a reasonable assurance of the safety and effectiveness of the device. In addition, we believe this action will enhance patients' access to beneficial innovation, in part by

reducing regulatory burdens by placing the device into a lower device class than the automatic class III assignment.

The automatic assignment of class III occurs by operation of law and without any action by FDA, regardless of the level of risk posed by the new device. Any device that was not in commercial distribution before May 28, 1976, is automatically classified into, and remains within, class III and requires premarket approval unless and until FDA takes an action to classify or reclassify the device (21 U.S.C. 360c(f)(1)). We refer to these devices as ''postamendments devices'' because they were not in commercial distribution prior to the date of enactment of the Medical Device Amendments of 1976, which amended the Federal Food, Drug, and Cosmetic Act (FD&C Act).

FDA may take a variety of actions in appropriate circumstances to classify or reclassify a device into class I or II. We may issue an order finding a new device to be substantially equivalent under section 513(i) of the FD&C Act (21 U.S.C. 360c(i)) to a predicate device that does not require premarket approval. We determine whether a new device is substantially equivalent to a predicate device by means of the procedures for premarket notification under section 510(k) of the FD&C Act (21 U.S.C. 360(k)) and part 807 (21 CFR part 807).

FDA may also classify a device through ''De Novo'' classification, a common name for the process authorized under section 513(f)(2) of the FD&C Act (see also part 860, subpart D (21 CFR part 860, subpart D)). Section 207 of the Food and Drug Administration Modernization Act of 1997 (Pub. L. 105–115) established the first procedure for De Novo classification. Section 607 of the Food and Drug Administration Safety and Innovation Act (Pub. L. 112–144) modified the De Novo classification process by adding a second procedure. A device sponsor may utilize either procedure for De Novo classification.

Under the first procedure, the person submits a premarket notification (510(k)) for a device that has not previously been classified. After receiving an order from FDA classifying the device into class III under section 513(f)(1) of the FD&C Act, the person then requests a classification under section 513(f)(2).

Under the second procedure, rather than first submitting a 510(k) and then a request for classification, if the person determines that there is no legally marketed device upon which to base a determination of substantial equivalence, that person requests a classification under section 513(f)(2) of the FD&C Act.

Under either procedure for De Novo classification, FDA is required to classify the device by written order within 120 days. The classification will be according to the criteria under section 513(a)(1) of the FD&C Act. Although the device was automatically placed within class III, the De Novo classification is considered to be the initial classification of the device.

We believe this De Novo classification will enhance patients' access to beneficial innovation, in part by reducing regulatory burdens. When FDA classifies a device into class I or II via the De Novo process, the device can serve as a predicate for future devices of that type, including for 510(k)s (see section 513(f)(2)(B)(i) of the FD&C Act). As a result, other device sponsors do not have to submit a De Novo request or premarket approval application to market a substantially equivalent device (see section 513(i) of the FD&C Act, defining ''substantial equivalence''). Instead, sponsors can use the less burdensome 510(k) process, when necessary, to market their device.

II. De Novo Classification

On December 2, 2022, FDA received HistoSonics, Inc.'s request for De Novo classification of the Edison System. FDA reviewed the request in order to classify the device under the criteria for classification set forth in section 513(a)(1) of the FD&C Act.

We classify devices into class II if general controls by themselves are insufficient to provide reasonable assurance of the safety and effectiveness of the device, but there is sufficient information to establish special controls that, in combination with the general controls, provide reasonable assurance of the safety and effectiveness of the device for its intended use (see section 513(a)(1)(B) of the FD&C Act). After review of the information submitted in the request, we determined that the device can be classified into class II with the establishment of special controls. FDA has determined that these special controls, in addition to the general controls, will provide reasonable assurance of the safety and effectiveness of the device.

Therefore, on October 6, 2023, FDA issued an order to the requester classifying the device into class II. In this final order, FDA is codifying the classification of the device by adding 21 CFR 878.4405.[1] We have named the generic type of device ''focused ultrasound system for non-thermal, mechanical tissue ablation,'' and it is identified as a device that uses focused ultrasound to mechanically ablate soft tissue. The device is not intended to thermally ablate tissue.

FDA has identified the risks to health associated with this type of device and the measures required to mitigate these risks in table 1.

TABLE 1—RISKS TO HEALTH AND MITIGATION MEASURES FOR FOCUSED ULTRASOUND SYSTEM FOR NON-THERMAL, MECHANICAL TISSUE ABLATION

Identified risks to health	Mitigation measures
Impaired tissue or organ function, abscess, pain, or other adverse events downstream of tissue ablation.	Clinical performance testing; Labeling; and Human factors testing.
Acoustic path, non-targeted tissue injury	Clinical performance testing; Human factors testing; Animal performance testing; and Non-clinical performance testing.
Tissue injury due to device malfunction or misuse	Clinical performance testing; Software verification, validation, and hazard analysis; Non-clinical performance testing; Labeling; and Human factors testing.
Adverse tissue reaction	Biocompatibility evaluation.
Electrical shock or electromagnetic interference	Electrical safety testing; Electromagnetic compatibility testing; and Labeling.

[1] FDA notes that the ''ACTION'' caption for this final order is styled as ''Final amendment; final order,'' rather than ''Final order.'' Beginning in December 2019, this editorial change was made to indicate that the document ''amends'' the Code of Federal Regulations. The change was made in accordance with the Office of Federal Register's (OFR) interpretations of the Federal Register Act (44 U.S.C. chapter 15), its implementing regulations (1 CFR 5.9 and parts 21 and 22), and the Document Drafting Handbook.

FDA has determined that special controls, in combination with the general controls, address these risks to health and provide reasonable assurance of the safety and effectiveness of the device. For a device to fall within this classification, and thus avoid automatic classification in class III, it would have to comply with the special controls named in this final order. The necessary special controls appear in the regulation codified by this final order. FDA supports the principles of the ''3Rs,'' to replace, reduce, and/or refine animal use in testing when feasible. We encourage sponsors to consult with us if they wish to use a non-animal testing method they believe is suitable, adequate, validated, and feasible. We will consider whether such an alternative method could be assessed for equivalency to an animal test method.

Under the FD&C Act, submission of a premarket notification under section 510(k) is required to reasonably assure the safety and effectiveness of class II devices unless FDA determines that the device type should be exempt under section 510(m) of the FD&C Act. At this time FDA has not made this determination for focused ultrasound systems for non-thermal, mechanical tissue ablation. This device is therefore subject to premarket notification requirements under section 510(k) of the FD&C Act.

III. Analysis of Environmental Impact

The Agency has determined under 21 CFR 25.34(b) that this action is of a type that does not normally have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

IV. Paperwork Reduction Act of 1995

This final order establishes special controls that refer to previously approved collections of information found in other FDA regulations and guidance. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521). The collections of information in part 860, subpart D, regarding De Novo classification have been approved under OMB control number 0910–0844; the collections of information in 21 CFR part 814, subparts A through E, regarding premarket approval have been approved under OMB control number 0910–0231; the collections of information in part 807, subpart E, regarding premarket notification submissions have been approved under OMB control number 0910–0120; the collections of information in 21 CFR part 820 regarding quality management system regulation have been approved under OMB control number 0910–0073; and the collections of information in 21 CFR part 801 regarding labeling have been approved under OMB control number 0910–0485.

List of Subjects in 21 CFR Part 878

Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 878 is amended as follows:

PART 878—GENERAL AND PLASTIC SURGERY DEVICES

■ 1. The authority citation for part 878 continues to read as follows:

Authority: 21 U.S.C. 351, 360, 360c, 360e, 360j, 360l, 371.

■ 2. Add § 878.4405 to subpart E to read as follows:

§ 878.4405 Focused ultrasound system for non-thermal, mechanical tissue ablation.

(a) *Identification.* This device uses focused ultrasound to mechanically ablate soft tissue. The device is not intended to thermally ablate tissue.

(b) *Classification.* Class II (special controls). The special controls for this device are:

(1) Clinical performance testing must demonstrate that the device performs as intended under anticipated conditions of use. Testing must document the adverse event profile and characterize tissue destruction.

(2) Animal performance testing must demonstrate that the device mechanically destroys targeted tissue while characterizing the chronic safety profile, including thermal and mechanical injury to adjacent, non-target tissue.

(3) Non-clinical performance testing must demonstrate that the device performs as intended under anticipated conditions of use. The following performance characteristics must be tested:

(i) Acoustic characterization at clinically relevant settings;

(ii) Determination of the minimum drive voltages necessary to sustain a bubble cloud in the target tissue;

(iii) Validation of mechanisms to prevent energy delivery that would result in adverse thermal effects;

(iv) Availability of real-time monitoring during the procedure;

(v) Validation that the treatment zone is limited to the defined target tissue; and

(vi) Validation of mechanisms to prevent, pause, and terminate ablation in the event of device failure.

(4) Performance data must support the electrical safety and electromagnetic compatibility of the device.

(5) All patient-contacting components of the device must be demonstrated to be biocompatible.

(6) Software validation, verification, and hazard analysis must be performed.

(7) Human factors testing must demonstrate that the user can safely and correctly use the device.

(8) Labeling must include the following:

(i) A warning that focused ultrasound ablation should only be considered in patients with sufficient functional reserve to withstand the destruction of the planned volume of tissue;

(ii) A statement that the device has not been evaluated for the treatment of any specific disease or condition; and

(iii) A detailed summary of the clinical testing with the device.

Grace R. Graham,

Deputy Commissioner for Policy, Legislation, and International Affairs.

[FR Doc. 2026–20440 Filed 10–5–26; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF THE TREASURY

Office of the Secretary

31 CFR Part 1

Privacy Act Exemptions

AGENCY: Department of the Treasury.

ACTION: Final rule.

SUMMARY: In accordance with the Privacy Act of 1974, as amended (Privacy Act), the Department of the Treasury (Treasury) is issuing a final rule, exempting a new system of records entitled ''Department of the Treasury, Treasury .032—Federal Program Waste, Fraud, and Abuse Tip Intake and Referral Records'' from certain provisions of the Privacy Act. This system of records is established to support the receipt, maintenance, review, triage, and referral of tips, complaints, allegations, leads, supporting information, and related correspondence concerning suspected waste, fraud, abuse, improper payments, misuse of Federal funds, or other misconduct affecting Federal programs. The exemption is intended to protect investigatory material compiled for law enforcement purposes.

DATES: This rule is effective on November 5, 2026.

FOR FURTHER INFORMATION CONTACT: For general questions and questions regarding privacy issues, please contact: Ryan Law, Deputy Assistant Secretary for Privacy, Transparency, and Records, Department of the Treasury, 1500 Suite #8100, JBAB, 250 Murray Lane SW, BLDG 410/Door 123, Washington, DC 20222; telephone: (202) 622–5710.

SUPPLEMENTARY INFORMATION:

Background

Treasury published a notice of proposed rulemaking (Systems Exemption NPRM) in the **Federal Register**, 91 FR 36550 (June 17, 2026), proposing to exempt portions of the system of records from one or more provisions of the Privacy Act.

Executive Order 14249, ''Protecting America's Bank Account Against Fraud, Waste, and Abuse,'' states that it is the policy of the United States to defend against financial fraud and improper payments and directs Treasury-related activity to support fraud prevention and payment integrity. Executive Order 14395, ''Establishing the Task Force To Eliminate Fraud,'' directs a comprehensive national strategy to stop fraud, waste, and abuse in Federal benefit programs and includes Treasury, the Department of Justice, inspectors general, and other agencies in coordinated anti-fraud work.

Treasury intends to receive and maintain tips, complaints, allegations, referrals, supporting information, and related correspondence submitted by members of the public, Federal agencies, law enforcement entities, contractors, and grant recipients concerning suspected fraud, waste, abuse, improper payments, misuse of Federal funds, and related misconduct affecting Federal programs. Treasury will review, assess, validate, categorize, de-duplicate, triage, and refer such information to appropriate Federal agencies, Offices of Inspector General, law enforcement agencies, or other authorized entities in support of fraud detection, investigative, enforcement, and recovery activities. Treasury's review and referral activities are intended to facilitate the coordination and referral of matters that may warrant further review, investigation, enforcement action, or recovery efforts by authorized governmental entities.

To the extent that records maintained within this system constitute investigatory material compiled for law-enforcement purposes, including information supporting investigative, enforcement, and fraud-detection activities conducted by authorized agencies, such records may be exempt from certain provisions of the Privacy Act pursuant to 5 U.S.C. 552a(k)(2).

Public Comments

Treasury received two comments on the proposed rule. One commenter opposed the proposed exemptions, arguing they were overly broad, expressing concerns regarding transparency, oversight, and the handling of personal information. Another commenter generally supported protecting legitimate investigatory material but urged Treasury to narrow the scope of the exemption to qualifying investigatory records and preserve certain Privacy Act protections for non-law-enforcement records.

The system of records is established to support the receipt, maintenance, review, triage, and referral of tips, complaints, allegations, leads, supporting information, and related correspondence concerning suspected waste, fraud, abuse, improper payments, misuse of Federal funds, or other misconduct affecting Federal programs. After careful consideration of the comments received, Treasury continues to conclude that the exemptions adopted in this final rule are authorized by 5 U.S.C. 552a(k)(2) and are necessary to protect the integrity of investigatory material compiled for law enforcement purposes. The exemptions do not apply broadly to all records maintained in the system merely because those records are contained in the system. Rather, the exemptions apply only to records, or portions of records, that constitute investigatory material compiled for law enforcement purposes and otherwise qualify for exemption under 5 U.S.C. 552a(k)(2). Records maintained in the system that do not meet the statutory criteria for exemption remain subject to the applicable provisions of the Privacy Act. This limitation addresses the commenters' concerns that the proposed exemptions could extend to non-law-enforcement records or otherwise apply more broadly than permitted by the statute. Accordingly, Treasury is adopting the proposed rule without change.

Treasury is hereby promulgating a final rule to exempt the Federal Program Waste, Fraud, and Abuse Tip Intake and Referral Records system from certain provisions of the Privacy Act pursuant to 5 U.S.C. 552a(k)(2) and the authority vested in the Secretary of the Treasury by 31 CFR 1.23(c).

Under 5 U.S.C. 552a(k)(2), the head of a Federal agency may promulgate rules to exempt a system of records from certain provisions of 5 U.S.C. 552a if the system of records contains investigatory material compiled for law enforcement purposes that are not within the scope of subsection (j)(2) of the Privacy Act (which applies to agencies and components thereof that perform as their principal function any activity pertaining to the enforcement of criminal laws).

To the extent that this system of records contains investigatory materials compiled for law enforcement purposes protected by 5 U.S.C. 552a(k)(2), Treasury exempts the following system of records from various provisions of the Privacy Act:

Treasury .032—Federal Program Waste, Fraud, and Abuse Tip Intake and Referral Records.

Under 5 U.S.C. 552a(k)(2), Treasury is promulgating a final rule to exempt certain records in the above-referenced system of records be exempt from 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (H), and (I), and (f) of the Privacy Act. See 31 CFR 1.36.

The following are the reasons why investigatory materials contained in the above-referenced system of records may be exempted from various provisions of the Privacy Act pursuant to 5 U.S.C. 552a(k)(2).

(1) 5 U.S.C. 552a(c)(3) requires an agency to make any accounting of disclosures of records required by 5 U.S.C. 552a(c)(1) available to the individual named in the record upon his or her request. Exemption from this requirement is appropriate because release of the accounting of disclosures could alert individuals that they are the subject of a tip, complaint, allegation, referral, inquiry, or law enforcement-related review or analysis. Disclosure of the accounting could reveal the existence, scope, nature, or status of an inquiry or referral and could impede law enforcement or program-integrity efforts by allowing individuals to evade detection, influence witnesses, alter conduct, destroy evidence, fabricate information, or otherwise interfere with lawful investigative, enforcement, or recovery activities.

(2) 5 U.S.C. 552a(d) grants individuals access to records containing information about them and permits them to request amendment of records pertaining to them. Exemption from these requirements is appropriate because access to or amendment of records contained in this system could reveal the existence, nature, scope, or status of investigatory or law enforcement-related materials and could interfere with ongoing or prospective investigations, activities, recovery efforts, or other law enforcement purposes. Providing access or permitting amendment could enable subjects of tips or investigations to avoid detection, intimidate or influence

witnesses, destroy evidence, conceal assets, coordinate testimony, or otherwise impede lawful activities. In addition, investigatory material may include information obtained from third parties or other agencies, the disclosure of which could compromise confidentiality, investigative techniques, or sensitive law enforcement information.

(3) 5 U.S.C. 552a(e)(1) requires an agency to maintain only such information about an individual as is relevant and necessary to accomplish a purpose required by statute or executive order. Exemption from this requirement is appropriate because, during the receipt, assessment, triage, referral, and review of tips and allegations, Treasury may obtain information whose relevance or accuracy is not immediately apparent. In the interests of effective fraud prevention, payment integrity, law enforcement coordination and program-integrity activities, it is appropriate to retain information that may aid in identifying patterns, relationships, schemes, trends, or other indicators relevant to suspected waste, fraud, abuse, improper payments, or related misconduct.

(4) 5 U.S.C. 552a(e)(4)(G), (H), and (I) and 5 U.S.C. 552a(f) require an agency to publish procedures whereby individuals can determine whether a system contains records pertaining to them, gain access to such records, contest their contents, and identify categories of sources of records in the system. Exemption from these requirements is appropriate because this system is exempt from the access and amendment provisions of subsection (d). Publication of such procedures could undermine the purpose of the exemption by revealing investigatory interests, law enforcement-sensitive information, or the existence of ongoing referral or investigatory activities.

Any records from another Treasury system of records or another Executive Branch agency's system of records for which an exemption is claimed under 5 U.S.C. 552a(j) or (k) that may also be included in this system of records retain the same exempt status as such records have in the system for which the exemption is claimed.

Regulatory Analysis

This final rule is not a ''significant regulatory action'' under Executive Order 12866.

Pursuant to the requirements of the Regulatory Flexibility Act (RFA), 5 U.S.C. 601 *et seq.,* it is hereby certified that this final rule will not have a significant economic impact on a substantial number of small entities. This rule, issued pursuant to 5 U.S.C. 552a(k)(2), is to exempt certain information maintained by Treasury in the above-referenced system of records from certain provisions of the Privacy Act. Small entities, as defined in the RFA, are not provided rights under the Privacy Act and are outside the scope of this regulation.

List of Subjects in 31 CFR Part 1

Courts, Freedom of Information, Government Employees, Privacy.

For the reasons stated in the preamble, part 1 of title 31 of the Code of Federal Regulations is amended as follows:

PART 1—DISCLOSURE OF RECORDS

■ 1. The authority citation for part 1 continues to read as follows:

Authority: 5 U.S.C. 301, 552, 552a, 553; 31 U.S.C. 301, 321; 31 U.S.C. 3717.

■ 2. Amend § 1.36 in table 10 to paragraph (g)(1)(i) by adding, in alphanumeric order, an entry for ''Treasury .032'' to read as follows:

§ 1.36 Systems exempt in whole or in part from provisions of the Privacy Act and this part.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2026–1287]

RIN 1625–AA87

Security Zone; Patapsco River, Baltimore, MD

AGENCY: Coast Guard, Department of Homeland Security.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary security zone for certain navigable waters of the Patapsco River. The security zone is needed to protect persons, including those under the protection of the United States Secret Service (USSS), and property from terrorist acts and incidents and to prevent terrorist acts or incidents during a high-ranking public official visit. Entry of vessels or persons into this zone is prohibited unless specifically authorized by the Captain of the Port, Sector Maryland-National Capital Region or a designated representative.

DATES: This rule is effective from 1 p.m. until 7 p.m. on October 6, 2026.

ADDRESSES: To view available documents, go to *https://www.regulations.gov* and search for USCG–2026–1287.

FOR FURTHER INFORMATION CONTACT: If you have questions about this rule, contact Lieutenant Commander Randy Johnston, Sector Maryland-National Capital Region, Waterways Management Division, U.S. Coast Guard: telephone 410–576–2519, or email *Randy.L.johnston@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port
DHS Department of Homeland Security
FR Federal Register
MD Maryland
NCR National Capital Region
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code
USSS United States Secret Service

II. Background Information and Authority

The Coast Guard received notification that persons under the protection of the United States Secret Service (USSS) will conduct a visit to Baltimore, MD, during the afternoon of October 6, 2026. The nationally publicized event is being held in Baltimore, MD, in close proximity to navigable waterways within the Captain of the Port (COTP) Maryland-National Capital Region's (MD-NCR) Area of Responsibility, as set forth at 33 CFR 3.25–15. The COTP MD-NCR has determined that potential hazards associated with the high-ranking official public visit are a safety and security concern for anyone within 1,000 yards of their location. Therefore, the COTP is issuing this rule under the authority in 46 U.S.C. 70051 and 70124, which is needed to protect personnel, vessels, and the marine environment in the navigable waters within the security zone.

Because of risks associated with these potential hazards, the Coast Guard is issuing this rule without prior notice and comment. As is authorized by 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because it is impracticable. The Coast Guard was notified of this event on September 29, 2026, but we must establish this security zone by October 6, 2026, to protect personnel, vessels, and the marine environment. Therefore, we have do not have enough time to solicit and respond to comments.

For the same reason, the Coast Guard finds that under 5 U.S.C. 553(d)(3), good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**.

III. Discussion of the Rule

This rule establishes a security zone from 1 p.m. until 7 p.m. on October 6, 2026. The zone will cover navigable waters on the Patapsco River within 1,000 yards of Sparrows Point and Bear Creek. No vessel or person will be permitted to enter the security zone without obtaining permission from the COTP or their designated representative.

IV. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders.

A. Impact on Small Entities

The regulatory flexibility analysis provisions of the Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, do not apply to rules that are not subject to notice and comment. Because the Coast Guard has, for good cause, waived the notice and comment requirement that would otherwise apply to this rulemaking, the Regulatory Flexibility Act's flexibility analysis provisions do not apply here.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), if this rule will affect your small business, organization, or governmental jurisdiction and you have questions, contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. Small businesses may send comments to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards by calling 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

B. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

C. Federalism and Indian Tribal Governments

We have analyzed this rule under Executive Order 13132, Federalism, and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in that Order.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

D. Unfunded Mandates Reform Act

As required by The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538), the Coast Guard certifies that this rule will not result in an annual expenditure of $100,000,000 or more (adjusted for inflation) by a State, local, or tribal government, in the aggregate, or by the private sector.

E. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment.

This rule is a security zone. It is categorically excluded from further review under paragraph L60 (c) emergency situation less than a week for a high-ranking public official visit under the protection of the USSS of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A Record of Environmental Consideration supporting this determination is available in the docket.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051, 70124; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.4.

■ 2. Add 165.T05–1287 to read as follows:

§ 165.T05–1287 Security Zone; Patapsco River, Baltimore, MD.

(a) *Location.* The following area is a security zone: All navigable waters of the Patapsco River, within 1,000 yards of Sparrows Point and Bear Creek.

(b) *Definitions.* As used in this section, *designated representative* means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer operating a Coast Guard vessel and a Federal, State, and local officer designated by or assisting the Captain of the Port (COTP) Sector Maryland-National Capital Region in the enforcement of the security zone.

(c) *Regulations.* (1) Under the general security zone regulations in subpart D of this part, you may not enter the security zone described in paragraph (a) of this section unless authorized by the COTP or the COTP's designated representative.

(2) To seek permission to enter, contact the COTP or the COTP's representative on VHF–FM channel 16 or by telephone at (410) 576–2693. Those in the security zone must comply with all lawful orders or directions given to them by the COTP or the COTP's designated representative.

(d) *Enforcement period.* This section will be enforced from 1 p.m. until 7 p.m. on October 6, 2026.

Patrick C. Burkett,

Captain, U.S. Coast Guard, Captain of the Port Sector Maryland-National Capital Region.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 26–1040; MB Docket No. 26–152; FR ID 370282]

Radio Broadcasting Services; Whitehall, Michigan

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document amends the Table of FM Allotments, of the Federal Communications Commission's (Commission) rules, by substituting Channel 258A for vacant Channel 248A at Whitehall, Michigan. A staff engineering analysis determines that Channel 258A can be allotted to Whitehall consistent with the Commission's minimum distance separation requirements, with a site restriction of 13 kilometers (8.1 miles) northwest of the community. The reference coordinates are 43–28–30 NL and 86–27–38 WL. The window period for filing applications for Channel 258A at Whitehall, Michigan will not be opened at this time. Instead, the issue of opening this allotment for filing will be addressed by the Commission in subsequent order. *See* **SUPPLEMENTARY INFORMATION**.

DATES: Effective November 12, 2026.

FOR FURTHER INFORMATION CONTACT: Rolanda F. Smith, Media Bureau, (202) 418–2054, *Rolanda-Faye.Smith@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Report and Order,* adopted September 25, 2026, and released September 28, 2026. The full text of this Commission decision is available online at *https://apps.fcc.gov/ecfs/.* The full text of this document can also be downloaded in Word or Portable Document Format (PDF) at *https://www.fcc.gov/edocs.* This document does not contain information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13.

On March 16, 2026, the Audio Division cancelled the license and deleted the callsign of Station WLAW–FM, Whitehall, Michigan (DWLAW–FM) at the licensee's request. *See* Application File No. 0000290925. As a result, Channel 248A at Whitehall became a vacant FM allotment following the cancellation of the Station DWLAW–FM license. Channel 248A at Whitehall is not currently listed in the FM Table since it was occupied by DWLAW–FM.

The Commission will send a copy of this *Report and Order* in a report to Congress and the Government Accountability Office pursuant to the Congressional Review Act, *see* 5 U.S.C. 801(a)(1)(A).

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 26–1039; MB Docket No. 26–113; FR ID 370283]

Radio Broadcasting Services; Selmer, Tennessee

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document amends the Table of FM Allotments, of the Federal Communications Commission's (Commission) rules, by deleting vacant Channel 288A at Selmer, Tennessee, because it does not comply with the minimum distance separation requirements of the Commission's rules. Channel 288A at Selmer, Tennessee is short-spaced to Station WVNA–FM by nine kilometers, and there are no alternate channels available to alleviate the existing spacing conflict that would comply with the Commission's spacing requirements. The deletion of vacant Channel 288A at Selmer is consistent with the Commission's policy that we will not retain a vacant FM channel that does not comply with the Commission's spacing requirements.

DATES: Effective November 12, 2026.

FOR FURTHER INFORMATION CONTACT: Rolanda F. Smith, Media Bureau, (202) 418–2054, *Rolanda-Faye.Smith@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Report and Order,* adopted September 25, 2026, and released September 28, 2026. RIN 0660–AA40; 2127–AN06

Eliminating Obsolete Regulations Related to the 911 Grant Program

AGENCY: National Telecommunications and Information Administration (NTIA), Department of Commerce; National Highway Traffic Safety Administration (NHTSA), U.S. Department of Transportation.

ACTION: Final rule.

SUMMARY: In this action, NTIA and NHTSA are removing regulations related to the 911 Grant Program because the program is no longer active and there have been no new appropriations to revive or extend it. This removal is intended to eliminate obsolete regulatory language, ensure that the Code of Federal Regulations is accurate and up-to-date, and minimize the risk of confusion regarding the availability of grant funds.

DATES: The rule is effective October 6, 2026.

FOR FURTHER INFORMATION CONTACT:

For legal issues (Department of Transportation): Megan Brown, Attorney-Advisor, Office of the Chief Counsel, National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE, Washington, DC 20590; Email: *megan.brown@dot.gov.*

For legal issues (Department of Commerce): Daniel Sweeney, Deputy General Counsel for Economic, Statistical, and Regulatory Affairs, Office of the General Counsel, at (240) 474–3619 and *dsweeney@doc.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

NTIA and NHTSA are eliminating the regulations at 47 CFR part 400, which pertain to the 911 Grant Program jointly administered by NTIA and NHTSA.

The 911 Grant Program was originally established under the Ensuring Needed Help Arrives Near Callers Employing 911 (ENHANCE 911) Act of 2004, codified at 47 U.S.C. 942. Through a final rule published on August 3, 2018 (83 FR 38059), the agencies revised the program's implementing regulations as required by the Next Generation 911 Advancement Act of 2012, which was part of the Middle Class Tax Relief and Job Creation Act of 2012 (Pub. L. 112–96) and modernized the program to support the nationwide transition from legacy 911 systems to Next Generation 911 (NG911) services. The 2018 final rule updated the program's structure and broadened the eligible uses for grant funds to include NG911 technologies.

As of 2026, the 911 Grant Program is no longer active. Authorization for the program expired on October 1, 2022 (47 U.S.C. 942(d)(2)), and the Public Safety Trust Fund that funded the program was not extended past fiscal year 2022 (47 U.S.C. 1457(a)(2)). All projects funded by the program have been closed out and no open grants or applications exist.

II. Description of Regulatory Sections

Part 400 consists of eleven sections: §§ 400.1–400.11. Section 400.1 establishes the purpose of part 400. Section 400.2 provides definitions for various terms used throughout part 400. Section 400.3 addresses who may apply for a grant under part 400. Section 400.4 sets forth the application requirements. Section 400.5 addresses the review and approval of applications. Section 400.6 sets forth the framework for the distribution of grant funds. Section 400.7 establishes restrictions on how grant funds may be used. Section 400.8 sets forth continuing compliance requirements. Section 400.9 sets forth financial and administrative requirements, including reporting requirements related to performance and finances. Section 400.10 establishes the applicable closeout procedures. Section 400.11 addresses the authority of the 911 Implementation Coordination Office to waive the provisions of part 400 in extraordinary circumstances.

III. Discussion

NTIA and NHTSA are eliminating 47 CFR part 400 in its entirety. The ENHANCE 911 Act of 2004, as amended by the Next Generation 911 Advancement Act of 2012, appropriated a limited amount of funding for the 911 Grant Program, and all those funds have been allocated and awarded. No new appropriations have been made to revive or extend the program. Indeed, as stated on the program's website (*https://www.911.gov/projects/federal-funding/*), ''[t]here are currently no 911 Grants open for application.'' Because the program is now obsolete, and all the language in part 400 is now functionally irrelevant, NTIA and NHTSA are removing and reserving part 400. The elimination of part 400 will remove obsolete language, simplify the Code of Federal Regulations, and reduce the possibility of confusion regarding the availability of 911 Grant Program funds.

NTIA and NHTSA will remain ready to promulgate new regulations in the event that the 911 Grant Program is revived or extended by Congress.

IV. Waiver of Notice and Comment

Administrative Procedure Act

NTIA and NHTSA find good cause to issue, without notice and comment, and to make effective immediately, this elimination of the 911 Grant Program regulations in their entirety, in accordance with 5 U.S.C. 553(b)(B) and 5 U.S.C. 553(d)(3). The Administrative Procedure Act provides that when an agency, for good cause, finds that notice and comment are impracticable, unnecessary, or contrary to the public interest, the agency may issue a final rule without providing prior notice and an opportunity for public comment (5 U.S.C. 553(b)(B)). In addition, a substantive rule will be made effective at least 30 days after its publication unless an agency finds good cause to make the rule effective prior to that date. See 5 U.S.C. 553(d)(3).

The 911 Grant Program, which is the subject of the regulations eliminated by this action, is no longer active. Both the authorization and trust fund that provide funding for the 911 Grant Program expired at the end of fiscal year 2022. No funds have been appropriated for the 911 Grant Program since 2022. With these considerations in mind, NTIA and NHTSA find it unnecessary to provide prior notice and opportunity for public comment on this elimination of regulatory language related to the expired 911 Grant Program. For these same reasons, the agencies find good cause to make this amendment effective immediately.

V. Regulatory Analyses and Notices

A. Executive Order 12866 (Regulatory Planning and Review)

The Office of Management and Budget (OMB) has determined this rule to be significant for purposes of Executive Order (E.O.) 12866.

B. Executive Order 14192 (Unleashing Prosperity Through Deregulation)

This rule is an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) of 1980 (5 U.S.C. 601, *et seq.*) requires agencies to evaluate the potential effects of their proposed and final rules on small businesses, small organizations, and small governmental jurisdictions. Section 605 of the RFA allows agencies to certify a rule, in lieu of preparing an analysis, if the proposed rulemaking is not expected to have a significant economic impact on a substantial number of small entities. The Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–21, 110 Stat. 857) amended the RFA to require Federal agencies to provide a statement of the factual basis for certifying that an action would not have a significant economic impact on a substantial number of small entities.

Because a notice of proposed rulemaking and an opportunity for public participation are not required to be given for this rule by 5 U.S.C. 553(b)(B), the analytical requirements of the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*) are not applicable. *See Or. Trollers Ass'n* v. *Gutierrez,* 452 F.3d 1104, 1123–24 (9th Cir. 2006) (noting that the RFA does not apply when an agency validly invokes an exception to the public comment requirements of 5 U.S.C. 553).

D. Executive Order 13132 (Federalism)

This rule does not contain policies having federalism implications as the term is defined in E.O. 13132.

E. Executive Order 12988 (Civil Justice Reform)

This rulemaking meets applicable standards to minimize litigation, eliminate ambiguity, and reduce burden as set forth in sections 3(a) and 3(b)(2) of E.O. 12988 (February 5, 1996).

F. Paperwork Reduction Act

Under the procedures established by the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501, *et seq.*), Federal agencies must obtain approval from OMB for each collection of information they conduct, sponsor, or require through regulations. The OMB Control Number for the information collection was 0660–0041; the information collection expired June 30, 2023. This rule contains no new information collection requirements under the Paperwork Reduction Act of 1995.

G. Unfunded Mandates Reform Act

The changes set forth in this rulemaking do not involve a Federal intergovernmental mandate that will result in the expenditure by State, local, and tribal governments, in the aggregate, of $100 million (as adjusted) or more in any one year, or a Federal private sector mandate that will result in the expenditure by the private sector of $100 million (as adjusted) or more in any one year, and will not significantly or uniquely affect small governments. Therefore, no actions are necessary under the provisions of the Unfunded Mandates Reform Act of 1995. See 2 U.S.C. 1501 *et seq.*

H. National Environmental Policy Act

NHTSA has analyzed the environmental impacts of this final rule pursuant to the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321, *et seq.*). NHTSA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4). Categorical exclusions are categories of actions that the agency has determined normally do not significantly affect the quality of the human environment and therefore do not require either an environmental assessment (EA) or environmental impact statement (EIS). See DOT Order 5610.1D § 9. In analyzing the applicability of a categorical exclusion (CE), the agency must also consider whether extraordinary circumstances are present that would warrant the preparation of an EA or EIS. Id. § 9(b). Each DOT Operating Administration (OA) may apply a CE established in another OA's procedures. Id. § 9(f). To do so, the OA ''must evaluate the action for extraordinary circumstances identified in the OA procedures in which the CE is established to determine if a normally excluded action may have a significant impact and coordinate with the originating OA to ensure that the CE is being applied correctly.'' Id.

This rulemaking eliminates regulatory provisions related to the 911 Grant Program, which is no longer operational, and is categorically excluded pursuant to 23 CFR 771.118(c)(4), ''Planning and administrative activities not involving or leading directly to construction, such as: Training, technical assistance and research; promulgation of rules, regulations, directives, or program guidance; approval of project concepts; engineering; and operating assistance to transit authorities to continue existing service or increase service to meet routine demand.'' NHTSA has coordinated with the Federal Transit Administration to ensure that this CE is being applied correctly. NHTSA does not anticipate any environmental impacts, and there are no extraordinary circumstances present in connection with this rulemaking.

NTIA has analyzed the environmental impacts of this final rule pursuant to the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321, *et seq.*) and in accordance with its *Guidance on NTIA National Environmental Policy Act Compliance* to determine the potential environmental impacts of this rulemaking. NTIA has determined that this Proposed Action, which is a rulemaking to eliminate regulatory provisions for an obsolete grant program, qualifies for NTIA CE A–1, ''Personnel, fiscal, management, and administrative activities, including recruiting, processing, paying, recordkeeping, budgeting, personnel actions, contract administration, and travel.'' This action has no potential for extraordinary circumstances because the elimination of obsolete regulatory provisions would not result in any activities or follow-on actions and has no potential to impact the human environment.

I. Executive Order 13175 (Consultation and Coordination With Indian Tribes)

E.O. 13175 (65 FR 67249, Nov. 9, 2000) requires Federal agencies to consult and coordinate with Tribes on a government-to-government basis on policies that have Tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes. NTIA and NHTSA has assessed the impact of this rule on Indian tribes and determined that this action would not have Tribal implications that require consultation under E.O. 13175.

J. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801, *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule to each House of the Congress and to the Comptroller General of the United States. NTIA and NHTSA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of this rule in the **Federal Register**. Because this rule does not meet the criteria in 5 U.S.C. 804(2) for a major rule, it will be effective upon publication in the **Federal Register**.

L. Privacy Act

Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, *etc.*). [Docket No. 261001–0005]

RIN 0648–BO10

Reef Fish Fishery of the Gulf of America; Amendment 62

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues regulations to implement management measures described in Amendment 62 to the Fishery Management Plan for the Reef Fish Resources of the Gulf (FMP), as prepared and submitted by the Gulf Council (Council). This final rule and Amendment 62 revise the catch limits and sector allocations for Gulf of America (Gulf) red grouper, based on the best scientific information available. Additionally, this final rule removes the shallow-water grouper (SWG) recreational seasonal closure, from February 1 through March 31, in Gulf Federal waters seaward of the 20-fathom boundary.

DATES: This final rule is effective October 2, 2026.

ADDRESSES: An electronic copy of Amendment 62 is available from *https://www.regulations.gov* or from the Southeast Regional Office website at: *https://www.fisheries.noaa.gov/action/amendment-62-gulf-red-grouper-management-measures.* Amendment 62 includes an environmental assessment, a Regulatory Flexibility Act (RFA) analysis, regulatory impact review, and fishery impact statement.

FOR FURTHER INFORMATION CONTACT: Daniel Luers, NMFS Southeast Regional Office, telephone: 727–824–5305, or email: *Daniel.Luers@noaa.gov.*

SUPPLEMENTARY INFORMATION: The Gulf reef fish fishery, which includes red grouper, is managed under the FMP. The FMP was prepared by the Council and NMFS, approved by the Secretary of Commerce, and is implemented by NMFS through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) (16 U.S.C. 1801 *et seq.*).

Background

The Magnuson-Stevens Act requires NMFS, with advice from the regional fishery management councils, to prevent overfishing and achieve, on a continuing basis, the optimum yield from federally managed fish stocks. These mandates are intended to ensure fishery resources are managed for the greatest overall benefit to the Nation, particularly with respect to providing food production, recreational opportunities, and protecting marine ecosystems.

This action is taken under the statutory authority of Magnuson-Steven Act section 303(a)(15), which requires fishery management plans to establish annual catch limits (ACL) and accountability measures (AM) to prevent overfishing, and section 303(b)(2), which allows the designation of zones where, and periods when, fishing may be limited or not permitted.

On April 2, 2026, NMFS published a notice of availability for Amendment 62 and requested public comment (91 FR 16623). On July 7, 2026, NMFS published a proposed rule for Amendment 62 and requested public comment (91 FR 41611). NMFS approved Amendment 62 on June 26, 2026, pursuant to section 304(a)(3) of the Magnuson-Stevens Act. The proposed rule and Amendment 62 outline the rationale for the actions contained in this final rule. The management measures described in Amendment 62 and implemented by this final rule are summarized below.

Unless otherwise noted, all weights in this final rule are in pounds (lb) gutted weight.

The current catch limits for red grouper were set in 2022 (87 FR 40742, July 8, 2022). The current Gulf red grouper overfishing limit (OFL) and acceptable biological catch (ABC) are 5.99 million lb (2.72 million kilogram (kg)) and 4.96 million lb (2.25 million kg), respectively. The total ACL is set equal to the ABC and is allocated 59.3 percent to the commercial sector and 40.7 percent to the recreational sector. This allocation was specified in Amendment 53 to the FMP and is informed, in part, by Marine Recreation Information Program—Fishing Effort Survey (MRIP–FES) recreational data (84 FR 25573, May 2, 2022). The current maximum sustainable yield (MSY) proxy for red grouper is based on the yield associated with a fishing mortality rate (F) that would result in a spawning stock biomass (SSB) of 30 percent of the spawning potential ratio (SPR)($F_{30\%SPR}$), where SPR is the ratio of the SSB to its unfished state. A proxy for MSY is used when there are insufficient data to directly determine the MSY.

The most recent stock assessment for red grouper (Southeast Data, Assessment, and Review (SEDAR) 88) was completed in 2025. SEDAR 88 used updated recreational catch and effort data produced by the Florida State Reef Fish Survey (SRFS). To obtain complete estimates of recreational catch for the stock assessment, SRFS combined private recreational landings and discard estimates with charter vessel catch informed by estimates from MRIP–FES, as well as headboat catch informed by the Southeast Region Headboat Survey. Thus, when ''SRFS'' is referred to in this final rule with respect to management of the red grouper stock and SEDAR 88, it encompasses all of these sources of recreational data combined. The stock assessment results indicated an increase in the red grouper stock size relative to the previous assessment (SEDAR 61, 2019). Based on its review of SEDAR 88, the Council's Standing Scientific and Statistical Committee (SSC) determined that the Gulf red grouper stock was not overfished or undergoing overfishing and recommended increases to the OFL and ABC. However, because SEDAR 88 used different recreational data than the

previous assessment, the current and revised OFL and ABC are not directly comparable.

Based on the results of SEDAR 88 indicating the stock size has increased, the Council requested that NMFS take emergency action (based on social and economic justification) to increase the red grouper catch limits for the 2025 fishing season (90 FR 37804, August 6, 2025). Because initial projections from SEDAR 88 assumed that any management action initiated by the Council would begin in 2027, the assessment projections required updating to reflect management actions that would begin in 2025. Using these updated projections, the Council's SSC recommended an OFL of 10.64 million lb (4.83 million kg) and an ABC of 8.28 million lb (3.76 million kg).

The SSC's OFL recommendation is consistent with its recommendation to change the current MSY proxy to a more conservative value. As explained above, the current MSY proxy is the yield at $F_{30\%SPR}$. The SSC recommended a more conservative MSY proxy of the yield at $F_{40\%SPR}$. An SPR of 40 percent is more conservative than an SPR of 30 percent because it means that the spawning biomass is closer to the level of an unfished population (40 percent of the level of the unfished population as opposed to 30 percent). The SSC concluded that certain biological and ecological characteristics of red grouper support more conservative management. For example, red grouper undergoes ontogenetic spatial shifts from nearshore shallow habitats to offshore deep-water habitats; its large females transition to male based on environmental and social cues that are not completely understood; and its propensity to create unique habitats in the benthic substrate and territorial behavior may generate a carrying capacity issue that limits available space for other red grouper. The SSC determined that accounting for the complex life history of red grouper is imperative when recommending the revised F_{msy} proxy and thus the OFL. The SSC has, in recent years, recommended setting an MSY proxy of $F_{40\%SPR}$ for hermaphroditic groupers like gag, scamp, yellowmouth grouper and yellowedge grouper. Based on their recent management advice to the Council for grouper species with similar life history characteristics to red grouper, the SSC concluded that an $F_{40\%SPR}$ as the proxy for F_{MSY} was appropriate.

Commercial harvest of Gulf red grouper has been managed under the Grouper-Tilefish Individual Fishing Quota (IFQ) Program since 2010 (74 FR 44732, August 31, 2009). The IFQ program serves as the commercial AM for red grouper. The commercial quota for red grouper is set 5 percent less than the commercial ACL to allow for multi-use allocation with gag to reduce discards and allow commercial fishermen to better use the allocation they have in a given fishing year. Red grouper multi-use allocation can be used to possess, land, or sell red grouper after an IFQ account holder's (shareholder or associated vessel accounts) red grouper allocation has been landed and sold or transferred and to possess, land, or sell gag only after both gag and gag multi-use allocation have been landed and sold or transferred from all of the IFQ account holder's accounts. In other words, the combined red grouper and gag multi-use allocation allows fishing industry participants to land those species after their species-specific allocations have been exhausted, thus reducing discards and improving the economic results of the fishery. However, if gag is under a rebuilding plan, the percentage of red grouper multi-use allocation is equal to zero. Gag is currently under a rebuilding plan, and thus red grouper multi-use allocation is currently set to zero.

The recreational sector is managed using an ACL, an ACT, and both in-season and post-season AMs. The in-season AM for red grouper requires NMFS to close the recreational sector when red grouper landings reach or are projected to reach the recreational ACL. If landings exceed the red grouper recreational ACL in a fishing year, the post-season AM requires NMFS to maintain the recreational ACT and shorten the duration of the following fishing year by the amount necessary to ensure landings do not exceed the recreational ACT, unless NMFS determines that managing to the ACT in the following year is unnecessary. If red grouper is overfished and landings exceed the recreational ACL, then both the recreational ACL and ACT must be reduced in the following year by the amount of the previous year's recreational overage. This final rule and Amendment 62 will not revise the recreational AMs.

Recreational harvest triggered in-season closures of the red grouper recreational season in each year from 2021 through 2024. In each of those 4 years, both the recreational ACT and ACL were exceeded, resulting in implementation of the post-season AM in 3 of the 4 following years to shorten the red grouper season as required. The post-season AM for the 2025 recreational season, which was triggered by the 2024 overage of the recreational ACL, was not implemented because the emergency action increased the red grouper catch limits.

For the commercial sector, the 5 percent buffer between the commercial ACL and ACT is retained in this final rule to account for the gag multi-use allocation of the IFQ program. For the recreational sector, this final rule maintains the current 9 percent buffer between the recreational ACL and ACT that was set in Amendment 53. This recreational buffer is expected to prevent future recreational ACL overages considering the use of more precise SRFS data to monitor recreational landings and the substantial increase in the recreational ACL.

In 2013, NMFS implemented a framework action under the FMP that established the current SWG recreational seasonal closure (78 FR 33259, June 4, 2013). The seasonal closure is effective from February 1 through March 31, annually, in Gulf Federal waters seaward of a line approximating the 20-fathom boundary (50 CFR 622.34(d)). In the Gulf, the SWG species are gag, red grouper, black grouper, scamp, yellowfin grouper, and yellowmouth grouper. The closure was established to protect spawning SWG species in deeper Gulf waters while allowing recreational harvest to occur shoreward of the 20-fathom boundary. Although this final rule eliminates this closure, all SWG species except red grouper already have other seasonal closure regulations in effect during that same time period or they will have them by January 1, 2027. Gulf gag has a recreational seasonal closure in effect from January through August (50 CFR 622.34(e)). On June 17, 2026, NMFS published a final rule that creates a recreational seasonal closure for black grouper, yellowfin grouper, scamp, and yellowmouth grouper from January through June (91 FR 36545). When that final rule is effective on January 1, 2027, red grouper will be the only SWG species affected by the removal of the current SWG recreational seasonal closure. However, as described in Amendment 62, the current seasonal closure may be redirecting red grouper recreational effort inshore and therefore reducing the overall benefit of the closure to the red grouper stock. Additionally, red grouper that are shoreward of the current closure boundary are generally smaller in size and therefore discards may be increased due to the red grouper minimum size limit. The Council recommended, and NMFS agrees, that it is appropriate to remove the February through March recreational closure given the health of the red grouper stock as indicated by SEDAR 88.

Management Measures Contained in This Final Rule

This final rule revises the Gulf red grouper commercial and recreational ACLs, the commercial quota, and the recreational ACT. In addition, this final rule removes the February through March SWG recreational seasonal closure seaward of the 20-fathom boundary.

Catch Limits

This final rule increases the commercial ACL from 2.94 million lb (1.33 million kg) to 4.51 million lb (2.05 million kg) for 2026, 5.08 million lb (2.30 million kg) for 2027, and 5.65 million lb (2.56 million kg) for 2028 and subsequent years. The commercial quota increases from 2.79 million lb (1.27 million kg) to 4.28 million lb (1.94 million kg) for 2026, 4.83 million lb (2.19 million kg) for 2027, and 5.37 million lb (2.44 million kg) for 2028 and subsequent years.

This final rule increases the recreational ACL from 2.02 million lb (0.92 million kg) to 2.11 million lb (0.96 million kg) for 2026, 2.37 million lb (1.08 million kg) for 2027, and 2.63 million lb (1.19 million kg) for 2028 and subsequent years. The recreational ACT increases from 1.84 million lb (0.83 million kg) to 1.92 million lb (0.87 million kg) for 2026, 2.16 million lb (0.98 million kg) for 2027, and 2.39 million lb (1.08 million kg) for 2028 and subsequent years. The current and revised recreational catch limits are not directly comparable because of the recreational datasets used in the prior and current assessments, but the revised catch limits are increases from the current values.

SWG Recreational Seasonal Closure

This final rule removes the recreational seasonal closure from February through March for SWG species in Gulf Federal waters seaward of a line approximating the 20-fathom boundary. Although this final rule eliminates this closure, as previously noted, all SWG species except red grouper have other seasonal closure regulations in effect, or will have closure regulations in effect by January 1, 2027, which prohibit their recreational harvest during this time period.

Management Measures in Amendment 62 That Will Not Be Codified by This Final Rule

In addition to the measures that will be codified through this final rule, Amendment 62 updates the MSY proxy, the OFL, the ABC, and the sector allocations for Gulf red grouper.

MSY Proxy, OFL, and ABC

Amendment 62 revises the MSY proxy, OFL, and ABC for red grouper based on the Council's SSC recommendations and consistent with SEDAR 88. The MSY proxy will be defined as the yield at $F_{40\%SPR}$. The OFL will be 10.64 million lb (4.83 million kg), and the ABC will be 8.28 million lb (3.76 million kg). The total ACL will be 6.62 million lb (3.00 million kg) in 2026 (80 percent of the ABC), 7.45 million lb (3.38 million kg) in 2027 (90 percent of the ABC), and 8.28 million lb (3.76 million kg) in 2028 and subsequent years (100 percent of the ABC). The Council determined, and NMFS agrees, that a phase-in approach to increasing the total catch limits over several years is appropriate because the SSC receives an annual interim stock analysis for red grouper and could advise the Council if the increases to the total ACL were no longer warranted.

Sector Allocations

Currently, the commercial sector is allocated 59.3 percent, and the recreational sector is allocated 40.7 percent of the total ACL based on each sector's average landings from 1986 through 2005 (including MRIP–FES recreational harvest estimates). Amendment 53 set this allocation to maintain historical fishing practices. The allocation was based on the original reference years (1986 through 2005) for red grouper landings but with updated recreational landings using the MRIP–FES dataset, which was used in the stock assessment that informed the catch levels in Amendment 53. Amendment 62 updates the commercial-recreational allocation using the same reference period (1986–2005) but based on SRFS-estimated recreational harvest. This results in a commercial allocation of 68.2 percent and a recreational allocation of 31.8 percent of the total ACL. SRFS recreational landings estimates are lower than those produced by MRIP–FES. Continuing with the current allocation without accounting for the decrease in estimated catch and effort associated with the change to SRFS from MRIP–FES would result in a *de facto* reallocation from the commercial sector to the recreational sector.

Comments and Responses

NMFS received 50 public submissions from individuals or entities on the notice of availability and proposed rule for Amendment 62. NMFS thanks the individuals who commented in support of the management measures in this final rule for their comments. Four comments were not specific to Amendment 62 or the proposed rule, and therefore are not addressed in this final rule.

Specific comments that opposed or provided alternative suggestions for some or all of the measures proposed in Amendment 62 and the proposed rule are grouped as appropriate and summarized below, followed by NMFS' respective responses. There have been no changes to the proposed rule as a result of public comments.

Comment 1: The Gulf red grouper stock cannot support the large catch limit increases proposed in Amendment 62. The commercial sector has not been landing its full quota under the current catch limits. Gulf fishermen report that the stock is not healthy based on indicators such as low catch rates, fewer legal-sized fish, and difficulty locating concentrations of marketable red grouper. A more conservative management approach consisting of either no catch limit increases or smaller catch limit increases would be more appropriate.

Response: NMFS is required to rely on the best scientific information available when making management decisions, and the most recent Gulf red grouper stock assessment, SEDAR 88, indicates that the red grouper stock is not overfished or undergoing overfishing and can support substantially higher harvest rates and catch limits. The Council's SSC reviewed SEDAR 88 and the catch level projections based on the assessment and recommended the OFL and ABC adopted in Amendment 62. The Council and NMFS addressed the concerns about the health of the stock expressed by fishermen by phasing-in the increase of the total ACL over three years. This will allow the Council and NMFS to take action, if needed, to address any new information on the Gulf red grouper stock status before the full increase in ABC is available for harvest.

NMFS recognizes some fishermen are reporting difficulty in consistently catching legal-sized red grouper. However, this information does not necessarily indicate that the stock is unhealthy and cannot support increased catch limits. Fishermen have also commented at Council meetings and during the public comment periods for the Amendment 62 rulemaking that the population is healthy and that they are in support of catch limit increases. SEDAR 88 assessed red grouper populations across the entire Gulf. While there may be localized areas in the Gulf in which red grouper are less abundant, the assessment determined

that overall, the Gulf red grouper population is healthy.

Comment 2: The February through March recreational seasonal closure for SWG species should not be eliminated. The closure is intended to protect SWG species when they spawn and is necessary to protect some or all of these species at a vulnerable time. Removal of the closure will increase fishing pressure on red grouper as well as increasing discards of gag which may result in disproportionate fishing mortality on spawning aggregations of red grouper and gag.

Response: The removal of the February through March SWG recreational seasonal closure seaward of the 20-fathom boundary would only directly affect red grouper. As explained above, beginning in the 2027 fishing year, the SWG species of scamp, yellowmouth grouper, black grouper, and yellowfin grouper will have a Gulf-wide recreational seasonal closure in place from January 1 through June 30, each year (91 FR 36545, June 17, 2026). Gulf gag has a recreational seasonal closure in effect from January through August (50 CFR 622.34(e)). Therefore, beginning in 2027, red grouper will be the only SWG species allowed for harvest between January 1 and June 30.

The February through March spawning closure for SWG was implemented to protect these species during their spawning period when they may be more vulnerable. However, spawning season closures are generally most effective when they coincide with areas where the species aggregate to spawn, and thus they are vulnerable to mass harvest. As described in Amendment 62, while some SWG species (*e.g.,* gag) do aggregate to spawn, red grouper do not, as they display site fidelity throughout the year. In addition, there is no indication that the current spawning seasonal closure has a positive effect on red grouper as the stock population has fluctuated greatly both prior to and after implementation of the closure. Additionally, as described in Amendment 62, the current closure may be redirecting fishing effort into waters shoreward of the 20-fathom boundary, where the average size of fish is smaller and more interactions with undersize fish occur. This could lead to additional fishing effort (and discards) necessary to harvest the recreational bag limit, thereby potentially reducing the conservation benefit of this closure.

NMFS recognizes that when red grouper are targeted, other SWG species may also be caught, which would result in discards due to overlapping harvest closures for the rest of the SWG species. However, while the removal of the SWG recreational seasonal closure may slightly increase discards of SWG species, NMFS does not expect these discards to have significant effects on their populations, as there would be no incentive for fishermen to fish on aggregations of those SWG species. It is more likely that fishermen would move to an area and fish where red grouper are more prevalent. Therefore, for the SWG species, the removal of the February through March recreational closure is not expected to have significant negative ecological consequences.

Comment 3: In Amendment 62, the commercial allocation of the total ACL should be greater. Recreational data have high levels of uncertainty, and that should be accounted for by using a more precautionary approach in setting the allocations. Increasing the commercial allocation and reducing the recreational allocation compared to the preferred alternative in Amendment 62 would reduce the overall mortality of red grouper by reducing recreational dead discards and reduce the chances of the total ACL being exceeded and overfishing occurring. The proposed allocations also violate Magnuson-Stevens Act National Standard 2, which requires the use of the best scientific information available, because they are based on recreational data with high uncertainty.

Response: NMFS disagrees that the commercial sector should receive a greater allocation then selected in Amendment 62 and that the allocations are inconsistent with National Standard 2. The sector allocations approved in Amendment 62 are based on the red grouper landings estimates used in the most recent stock assessment (SEDAR 88). For the recreational sector, these landings estimates were produced by SRFS and are generally lower than those produced by MRIP–FES. Although there is uncertainty in the recreational landings estimates, the percent standard error (PSE) of SRFS estimates for Gulf red grouper between 2016 and 2022, fluctuated between about 18 percent and 27 percent for private recreational anglers. The higher an estimate's PSE, the larger the margin of error and uncertainty around the estimate. The PSEs for these SRFS estimates are within the range that NMFS considers to be acceptable for use. For more information on PSE see *https://www.fisheries.noaa.gov/recreational-fishing-data/recreational-fishing-data-glossary#percent-standard-error-pse.* Further, the SRFS landings estimates represent the best scientific information available for determining a commercial-recreational allocation that maintains the historical split between the sectors after accounting for change from MRIP–FES data to SRFS data. No public comments were received that identified a more accurate or otherwise preferable data source.

NMFS does not expect that further increasing the commercial allocation of red grouper would reduce recreational discards. Decreasing the recreational catch limits by allocating more of the total ACL to the commercial sector could reduce recreational discards as a result of a decrease in red grouper recreational fishing opportunities if NMFS needed to implement an AM closure during the fishing year. However, any reduction in discards as result of less directed fishing pressure would likely be offset by discards that occur during the recreational AM closure. The allocation approved in Amendment 62, in combination with the increase in the total ACL, results in recreational catch limits that reduce the probability of AM-based closed seasons (only a predicted short closed season in 2027, none thereafter), which is expected to reduce discards.

Comment 4: In Amendment 62, the recreational allocation of the total ACL should be greater. The distribution of the increasing ACLs to the sectors is not proportional and heavily favors the commercial sector over the recreational sector. This results in limiting access for recreational fishermen. Recreational anglers, charter vessel and headboat (for-hire) operators, and coastal tourism economies depend on access to fishing opportunities, and reducing the recreational allocation percentage threatens those opportunities.

Response: NMFS disagrees that the recreational sector should receive a greater allocation of the total ACL then selected in Amendment 62. As explained in the preamble of this final rule, the sector allocations approved in Amendment 62 and implemented through this final rule will maintain the historical split between the sectors after accounting for change from MRIP–FES data to SRFS data. Although the recreational allocation decreases in Amendment 62, the decrease is consistent with the SRFS estimates used to monitor recreational harvest, which are lower than the estimates produced by MRIP–FES. Further, NMFS expects the red grouper recreational ACL and ACT increases implemented through this final rule to allow the fishing season to remain open until late in 2026 and throughout all of 2027 and 2028. Therefore, NMFS does not expect the change in the recreational allocation to limit access for recreational anglers and

for-hire operators relative to the current sector allocation percentages.

Comment 5: The lack of a sufficient recreational data collection system for private anglers when compared to commercial and for-hire data collection systems results in data being used that is highly distorted. Recreational fishing pressure has increased dramatically but recreational data still have high PSEs, indicating they are highly uncertain.

Response: NMFS recognizes that any data collection system used to estimate recreational harvest will have some level of associated error. As explained in response to *Comment 3,* the PSEs for SRFS estimates for Gulf red grouper between 2016 and 2022, are within the acceptable range. Further, consistent with National Standard 2, NMFS uses the best available data to develop management measures and the SRFS data used to develop Amendment 62 is the best available. To specifically account for uncertainty in recreational harvest estimates, there is a 9 percent buffer between the recreational ACT and ACL, which reduces the probability of exceeding the recreational ACL.

Comment 6: Given that the last year of data included in SEDAR 88 was 2022, a new full interim assessment for Gulf red grouper should be done prior to implementation of Amendment 62 to ensure the increased catch limits are still appropriate.

Response: NMFS has determined that SEDAR 88, which was used to inform the catch limits in Amendment 62, is the best scientific information available. In January 2026, the NMFS Southeast Fisheries Science Center (SEFSC) presented an informal interim assessment, or health check, to the Council's SSC. This health check supports the SEDAR 88 findings, showing an increasing trend in the relative abundance of red grouper through 2025. More information on the 2025 health check can be found at *https://gulf-council-media.s3.amazonaws.com/uploads/2026/01/05a-SEDAR-88_2026_IA.pdf.* The next Gulf red grouper stock assessment is scheduled for 2028.

Comment 7: There are indications that the red grouper stock has declined since 2022, which is the last year of data included in SEDAR 88. It is unclear what mathematical formula or variance factor was applied in the Stock Synthesis model to discount for the gap in timing between the data included in the assessment and implementation of the catch limits in this final rule. By allowing an increase in harvest based on lagged stock assessment data that fail to account for the current mortality conditions of the stock, Amendment 62 and the final rule are not based on the best scientific information available as required by National Standard 2 and do not adequately address the risk of overfishing as required by National Standard 1.

Response: NMFS recognizes that catch limits set in this final rule are supported by an assessment that included data only through 2022. NMFS did not use, or have available, a formula or factor to apply to the Stock Synthesis model to address the gap in timing from the assessment until implementation of Amendment 62. However, as explained in response to *Comment 6,* SEDAR 88 is the best scientific information available to inform the current Gulf red grouper stock status and the catch limits in Amendment 62 and this final rule, and the health check presented to the Council's SSC in January 2026 supports the SEDAR 88 results. Further, the new catch limits include a large buffer between the OFL and ABC to account for scientific uncertainty associated with SEDAR 88 and reduce the likelihood of overfishing. Therefore, NMFS has determined that Amendment 62 and this final rule are consistent with both National Standards 1 and 2.

Comment 8: The proposed catch limits are inconsistent with National Standard 6 because they fail to take into account variations and contingencies in fishery resources, ecosystems, and catches by omitting adaptive buffers for localized environmental events and real-time commercial catch data.

Response: NMFS disagrees that catch limits implemented through this final rule are inconsistent with National Standard 6. National Standard 6 requires conservation and management measures to take into account and allow for variations among, and contingencies in, fisheries, fishery resources, and catches. The catch limits adopted in Amendment 62 and this final rule provide the flexibility to respond to uncertainties or unpredictable events by providing a large buffer between the OFL and ABC, and adopting a phase-in approach for increasing the total ACL over three years. The phase-in approach will allow the SSC to review the annual interim stock analysis for red grouper as the catch limits are increased and allow the Council and NMFS to respond to any new advice from the SSC, as appropriate.

Comment 9: Commercial fishermen have produced years of catch-per-unit-effort (CPUE) data that have not been incorporated into stock assessments for IFQ species such as red grouper. The use of electronic logbooks and electronic monitoring is also expanding and will soon provide more timely fishery-dependent data. NMFS and the Council should consider the most current commercial CPUE information before increasing catch limits to ensure that the increases are sustainable.

Response: NMFS does not currently have a method to incorporate CPUE analyses into stock assessments or to analyze CPUE trends after the completion of a stock assessment. CPUE indices (trends), which had been used prior to the implementation of the commercial Grouper/Tilefish IFQ program, were not updated for SEDAR 88 because the implementation of the IFQ system has changed fishing behavior and catchability compared to earlier years. Prior to implementation of the IFQ, CPUE was used as one of several indices in assessing red grouper abundance. Now that fishing industry participants can choose when to fish, higher CPUE may reflect other variables and CPUE indices developed for IFQ years may not represent the relative abundance of the stock.

The Council asked NMFS to create CPUE indices for the commercial vertical line and longline fleets pursuing red grouper for review by the SSC. In support of this request, at the August 2026 Gulf Council meeting, the SEFSC provided the Council with a CPUE index based on logbook data for IFQ years (2010–2025). Although this index likely provides a useful qualitative indicator of the commercial sector's ability to harvest red grouper, the index includes the caveat that it did not attempt to disentangle the effects of fisher behavior, regulatory actions, and population abundance on observed catch per unit effort, and that it was not feasible for the SEFSC to provide that information given current resources and priorities. Further, at the same meeting, the SEFSC explained why using CPUE as a proxy for relative abundance (as under the current IFQ) can lead to improper conclusions and thus management decisions that do not reflect stock status. Since the red grouper CPUE index is not intended to estimate fish abundance, NMFS has determined that it is not appropriate to incorporate this CPUE data into the next stock assessment or to use it as an indication of the trends in red grouper stock health. Given the resources that would be needed to conduct the necessary research and the existence of two reliable fishery-independent resource surveys of red grouper (G–FISHER and the NMFS bottom longline) that are already available, the SEFSC does not plan to address this request to use CPUE provided by commercial fisherman as an index of stock abundance in the near future. The

SEFSC is currently working to make fishery independent survey data available more rapidly.

Comment 10: Red tide blooms and benthic hypoxia in the eastern Gulf create unquantified localized mortality of red grouper that has occurred since SEDAR 88 and needs to be accounted for in the catch limit increases in Amendment 62.

Response: While SEDAR 88 accounted for red tide-related mortality through 2022, there is no process currently in place to incorporate real-time data into previously completed stock assessments to account for more recent non-fishery related mortality events. These events are not predictable, and the effects of these events are often unknown until years after they occur. However, scientific uncertainty, which includes the impact of these events, is accounted for by the 2.68 million lb (1.22 million kg) buffer between the OFL and the ABC.

Comment 11: The catch limit increases in Amendment 62 are contrary to the mandates of Executive Order 14276 ''Restoring American Seafood Competitiveness.'' Executive Order 14276 directs NMFS to improve fisheries science, incorporate more reliable technology and cooperative research, modernize data collection, and make fisheries management more responsive to real-time ocean conditions. Given the 2022 terminal year in SEDAR 88, before the automatic red grouper ACL increases in Amendment 62 occur each year up until 2028, more current indicators, fishery-dependent data, and catch rate information should be considered. These more recent data sources would demonstrate that the future catch limit increases are not appropriate and that catch limit decreases should occur. The red grouper catch limit changes in Amendment 62 will result in weakening and not strengthening the domestic seafood industry.

Response: NMFS disagrees that the final rule is contrary to the mandates of Executive Order 14726. SEDAR 88 has been determined to be the best scientific information available and was used to develop the catch levels being implemented in Amendment 62 and this final rule. NMFS does not currently have an index to incorporate current commercial catch rate information into management decisions post-stock assessment. Similarly, NMFS did not have the capability to include red grouper commercial catch rate information into SEDAR 88 or analyze red grouper stock size after the completion of SEDAR 88 using this information. In addition, as explained in the response to *Comment 9* above, NMFS has provided a CPUE index to the Council but determined that this index does provide reliable evidence of actual trends in overall red grouper abundance and therefore does not intend to incorporate these data into the next stock assessment. NMFS is working on process improvements to make fishery independent survey data available more rapidly. NMFS has determined that this final rule is consistent with Executive Order 14276 because it is expected to increase red grouper harvest opportunity, enhance economic profitability for commercial fishermen, stabilize seafood markets, improve fishing access, and reduce the risk of recreational fishery closures impacting the for-hire component.

Comment 12: The sector allocations adopted through Amendment 53 to the FMP were remanded by the U.S. Court of Appeals for the District of Columbia Circuit for additional analysis. To date, neither the Council nor NMFS has completed the Court-directed economic analysis or revisited the red grouper allocation decision through a subsequent amendment before proposing additional changes to red grouper management. Amendment 62 changes the recreational data used in the allocation calculation, but it does not provide a complete reassessment of the distributional and economic consequences of Amendment 53. NMFS should therefore avoid characterizing Amendment 62 as fully resolving the allocation concerns or remedying the economic harm experienced by commercial fishing businesses. NMFS should also acknowledge that the allocation formula in Amendment 62 does not constitute the Court-directed economic reassessment of Amendment 53 or fully remedy the resulting economic harm to the commercial sector.

Response: In *A.P. Bell Fish Co.* v. *Raimondo,* 94 F.4th 60 (D.C. Cir. 2024), the Court of Appeals for the District of Columbia Circuit reversed the lower court's order granting summary judgment to NMFS on claims related to economic analysis in Amendment 53 to the FMP and compliance with National Standards 4 and 9 and remanded to NMFS to provide further explanation. The response to the remand order is provided in Appendix F to Amendment 62. Consistent with the Court's order, Appendix F includes an evaluation of the economic effects analysis included in Amendment 53, concluding that the analysis was consistent with other peer-reviewed analyses and provided the best available scientific information when conducting the benefit-cost analysis required or recommended by various authorities, including Executive Order 12866 and the Magnuson-Stevens Act. Appendix F also addresses the Court's order with respect to National Standards 4 and 9, concluding that the analyses in the final rule implementing Amendment 53 were appropriate.

Comment 13: It is not clear in Amendment 62 how red grouper recreational quota overages can be prevented. Recreational quota overages jeopardize the security of the red grouper commercial quota.

Response: Amendment 62 does not change the current recreational AMs, which are used to constrain recreational harvest of red grouper to the recreational ACL. Recreational harvest has exceeded the recreational ACL in the past because landings exceeded NMFS' projections. NMFS expects the increase in the catch limits to substantially increase the length of the recreational season, which will reduce the likelihood of exceeding the ACL. The analysis in Amendment 62 projects that a recreational closure may be necessary late in the year to constrain landings to the recreational ACL in 2026. However, preliminary 2025 landings data indicate that recreational harvest was below the 2026 recreational ACT and ACL implemented through this final rule. If similar landings occur in 2026, the recreational season would remain open until the end of the year. After 2026, the recreational ACT or ACL are not expected to be harvested by the recreational sector as a result of the catch limit increases. However, consistent with the current AMs, NMFS will continue to use projections to determine whether the recreational sector needs to close during the fishing year. Therefore, NMFS does not expect recreational harvest to threaten the health of the red grouper stock or the security of the commercial quota.

Classification

Pursuant to section 304(b)(3) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has determined that this final rule is consistent with Amendment 62, the FMP, other provisions of the Magnuson-Stevens Act, and other applicable law.

This final rule has been determined to be significant for purposes of Executive Order 12866. This final rule is expected to be an Executive Order 14192 deregulatory action.

The Magnuson-Stevens Act provides the statutory basis for this final rule. No duplicative, overlapping, or conflicting Federal rules have been identified. In addition, no new reporting or recordkeeping compliance requirements

are introduced in this final rule. This final rule contains no information collection requirements under the Paperwork Reduction Act of 1995.

A Tribal summary impact statement under section (5)(b)(2)(B) and (c)(2) of Executive Order 13175 was not required for this final rule because this action does not impose substantial direct compliance costs on Indian Tribal Governments and this action does not preempt Tribal law. A Tribal summary impact statement is not required and has not been prepared.

The Senior Lead Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this final rule, if adopted, would not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the proposed rule and is not repeated here. No public comments were received specifically regarding this certification; however, two of the comments related to the potential impacts on small businesses and the economic analysis for Amendment 62 and are addressed in the responses to *Comment 4* and *Comment 12* in the Comments and Responses section of this final rule. No changes to this final rule were made in response to public comments. As a result, a regulatory flexibility analysis was not required and none was prepared.

Because this rule relieves a restriction by allowing additional commercial and recreational harvest of red grouper and removing the SWG recreational seasonal closure, it is not subject to the 30-day delayed effectiveness provision of the Administrative Procedure Act pursuant to 5 U.S.C. 553(d)(1). This final rule will increase the catch limits for both the commercial and recreational sectors, distributing additional allocation to IFQ shareholders and extending the length of the 2026 recreational fishing season. This final rule will also remove the SWG recreational seasonal closure, allowing recreational fishing for red grouper that was previously prohibited from February 1 through March 31 each year, in Gulf Federal waters seaward of the 20-fathom boundary.

List of Subjects in 50 CFR Part 622

Commercial, Fisheries, Fishing, Gulf, Recreational, Red grouper, Reef fish.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: October 2, 2026.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS amends 50 CFR part 622 as follows:

PART 622—FISHERIES OF THE CARIBBEAN, GULF OF AMERICA, AND SOUTH ATLANTIC

■ 1. The authority citation for part 622 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

§ 622.34 [Amended]

■ 2. In § 622.34, remove Table 4 to paragraph (d) and remove and reserve paragraph (d).

■ 3. In § 622.39, revise paragraph (a)(1)(iii)(C) to read as follows:

§ 622.39 Quotas.

* * * * *

(a) * * *

(1) * * *

(iii) * * *

(C) *Red grouper.*

(*1*) For fishing year 2026—4.28 million lb (1.94 million kg).

(*2*) For fishing year 2027—4.83 million lb (2.19 million kg).

(*3*) For fishing year 2028 and subsequent years—5.37 million lb (2.44 million kg).

* * * * *

■ 4. In § 622.41, revise paragraph (e)(1) and (e)(2)(iv) to read as follows:

§ 622.41 Annual catch limits (ACLs), annual catch targets (ACTs), and accountability measures (AMs).

* * * * *

(e) * * *

(1) *Commercial sector.* The IFQ program for groupers and tilefishes in the Gulf of America serves as the accountability measure for commercial red grouper. The commercial ACT for red grouper is equal to the applicable quota specified in § 622.39(a)(1)(iii)(C). The commercial ACL for red grouper, in gutted weight, is 4.51 million lb (2.05 million kg) for 2026, 5.08 million lb (2.30 million kg) for 2027, and 5.65 million lb (2.56 million kg) for 2028 and subsequent years.

(2) * * *

(iv) The recreational ACL for red grouper, in gutted weight, is 2.11 million lb (0.96 million kg) for 2026, 2.37 million lb (1.08 million kg) for 2027, and 2.63 million lb (1.19 million kg) for 2028 and subsequent years. The recreational ACT for red grouper, in gutted weight, is 1.92 million lb (0.87 million kg) for 2026, 2.16 million lb (0.98 million kg) for 2027, and 2.39 million lb (1.08 million kg) for 2028 and subsequent years.

Proposed Rules

Federal Register
Vol. 91, No. 192
Tuesday, October 6, 2026

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2026–7241; Airspace Docket No. 26–ANM–13]

RIN 2120–AA66

Modification of Class E Airspace; Gunnison-Crested Butte Regional Airport, Gunnison, CO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify the Class E airspace designated as a surface area, the Class E airspace area designated as an extension to a Class E surface area, and the Class E airspace area extending upward from 700 feet above the surface at Gunnison-Crested Butte Regional Airport, Gunnison, CO. These actions would support the safety and management of instrument flight rules (IFR) operations at the airport.

DATES: Comments must be received on or before November 20, 2026

ADDRESSES: Send comments identified by FAA Docket No. FAA–2026–7241 and Airspace Docket No. 26–ANM–13 using any of the following methods:

* *Federal eRulemaking Portal:* Go to *www.regulations.gov* and follow the online instructions for sending your comments electronically.

* *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W58–213, West Building, 5th Floor, Washington, DC 20590–0001.

* *Hand Delivery or Courier:* Take comments to Docket Operations in Room W58–213 of the West Building, 5th Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

* *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at *www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W58–213 of the West Building, 5th Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FAA Order JO 7400.11M, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications/*. You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20597; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Bryantjay T. Toves, Federal Aviation Administration, Western Service Center, Operations Support Group, 2200 S 216th Street, Des Moines, WA 98198; telephone (206) 231–3465.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it modifies Class E airspace to support IFR operations at Gunnison-Crested Butte Regional Airport, Gunnison, CO.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Operations office (see **ADDRESSES** section for address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the Northwest Mountain Regional Office of the Federal Aviation Administration, Air Traffic Organization, Western Service Center, Operations Support Group, 2200 S 216th Street, Des Moines, WA 98198.

Incorporation by Reference

Class E2, E4, and E5 airspace designations are published in paragraphs 6002, 6004, and 6005,

respectively, of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11M, dated July 30, 2026, and effective September 15, 2026. These updates would be published in the next update to FAA Order JO 7400.11. FAA Order JO 7400.11M, which lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points, is publicly available as listed in the **ADDRESSES** section of this document.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 that would modify the Class E airspace designated as a surface area, the Class E airspace area designated as an extension to a Class E surface area, and the Class E airspace area extending upward from 700 feet above the surface at Gunnison-Crested Butte Regional Airport, Gunnison, CO.

The current lateral boundary of the Class E airspace area designated as a surface area should be expanded to more appropriately contain IFR arrival operations between the surface and 1,000 feet above the surface and IFR departure operations between the surface and the base of adjacent controlled airspace. The eastern portion should be expanded approximately (~)1.4 miles to more appropriately contain the Area Navigation (RNAV) (Required Navigation Performance [RNP]) M Runway (RWY) 25, RNAV (RNP) RWY 25, GUNNISION ONE DEPARTURE (OBSTACLE), and the LISSA ONE DEPARTURE (RNAV) instrument flight procedures (IFP). The western boundary should be expanded ~2.4 miles to more appropriately contain the RNAV (RNP) RWY 7, GUNNISION ONE DEPARTURE (OBSTACLE), GYLES ONE DEPARTURE (RNAV), Instrument Landing System (ILS) or Localizer (LOC) RWY 7, RNAV (RNP) RWY 7, and the RNAV (RNP) RWY 25 IFPs. The northern boundary should be expanded by ~0.35 miles and the southern boundary by ~0.7 miles to more appropriately contain the Visual Climb Over Airport departure procedure until reaching the base of adjacent airspace.

The Class E airspace area southwest of the airport designated as an extension to a surface area should be widened by ~8 miles to more appropriately contain arriving IFR operations when less than 1,000 feet above the surface while executing the VOR–A or RNAV (GPS) M RWY 7 IFPs. An additional extension to the Class E surface area should be established east of the airport, one mile either side of KGUC's 099° bearing extending from the airport's 6.1-mile radius to the airport's 8.6-mile radius to contain the point at which IFR arrivals are expected to descend to less than 1,000 feet above the surface while executing the RNAV (RNP) M RWY 25 approach procedure.

The current lateral boundary of the Class E airspace area extending upward from 700 feet above the surface should be expanded and extended in most directions to more appropriately contain arriving IFR aircraft below 1,500 feet above the surface and departing IFR aircraft until reaching 1,200 feet above the surface when executing the RNAV (GPS)-B, RNAV (RNP) RWY 7, RNAV (RNP) RWY 7 MAP, RNAV (RNP) RWY 25, RNAV (RNP) M RWY 25, RNAV (RNP) M RWY 25 MAP, VOR–A, GYLES ONE DEPARTURE (RNAV), or the LISSA ONE DEPARTURE (RNAV) IFPs. The western portion of the Class E airspace area extending upward from 700 feet above the surface is no longer needed to contain the VOR–A procedure turn maneuvering area, as such, the far west portion measuring approximately 9 by 12 miles should be removed.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Order 2100.6B, ''Rulemaking and Guidance Procedure'' (March 10, 2025); and (3) is expected to result in, at most, de minimis costs from compliance with applicable operating requirements or minor flight rerouting for operators choosing to navigate around the controlled airspace. Since these proposed amendments are routine and the expected impact to operators is de minimis, the FAA certifies that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1G, ''FAA National Environmental Policy Act Implementing Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11M, Airspace Designations and Reporting Points, dated July 30, 2026 and effective September 15, 2026, is amended as follows:

Paragraph 6002 Class E Airspace Areas Designated as a Surface Area.

* * * * *

ANM CO E2 Gunnison, CO [Amended]

Gunnison-Crested Butte Regional Airport, CO
(Lat. 38°32′04″ N, long. 106°55′54″ W)

That airspace extending upward from the surface bounded by a line beginning at the airport's 017° bearing at 7.2 miles, thence clockwise via its 7.2-mile radius to its 138° bearing, thence to its 205° bearing at 7.2 miles, thence clockwise to its 300° bearing at 7.2 miles, thence to the point of beginning.

* * * * *

Paragraph 6004 Class E Airspace Areas Designated as an Extension to Class D or Class E Surface Area.

* * * * *

ANM CO E4 Gunnison, CO [Amended]

Gunnison-Crested Butte Regional Airport, CO
(Lat. 38°32′04″ N, long. 106°55′54″ W)

That airspace extending upward from the surface within one mile of either side of the airport's 099° bearing extending from the airport's 6.1-mile radius to the airport's 8.4-mile radius; that airspace within an area bounded by a line beginning at the airport's 271° bearing at 7.2 miles, thence counterclockwise via the airport's 7.2-mile radius to its 205° bearing, thence to lat. 38°20′02″ N, long. 107°06′12″ W, to lat. 38°24′24″ N, long. 107°11′35″ W, to lat. 38°30′32″ N, long. 107°12′00″ W, thence to the point of beginning.

* * * * *

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ANM CO E5 Gunnison, CO [Amended]

Gunnison-Crested Butte Regional Airport, CO
(Lat. 38°32′04″ N, long. 106°55′54″ W)

That airspace extending upward from 700 feet above the surface bounded by a line beginning at lat. 38°39′30″ N, long. 106°46′44″ W, to lat. 38°35′22″ N, long. 106°41′25″ W, to lat. 38°30′14″ N, long. 107°41′40″ W, to lat. 38°20′02″ N, long. 107°06′12″ W, to lat. 38°23′59″ N, long. 107°10′55″ W, to lat. 38°33′18″ N, long. 107°14′22″ W, thence to the point of beginning.

BILLING CODE 4910–13–P

DELAWARE RIVER BASIN COMMISSION

18 CFR Part 410

Basin Regulations; Water Code

AGENCY: Delaware River Basin Commission.

ACTION: Notice of proposed rulemaking; public hearing.

SUMMARY: The Commission proposes to amend its *Water Code* and Comprehensive Plan to require water supply systems serving the public (purveyors) to report water use by their largest customers.

DATES:

Written comments: Written comments will be accepted through 5:00 p.m. EST on Friday, December 4, 2026.

Public hearing: A public hearing will be held remotely *via* Zoom on Wednesday, November 4, 2026, beginning at 1:30 p.m. and ending no later than 3:00 p.m. EST. Details about accessing the hearing are available on the Commission's website, *www.drbc.gov.*

ADDRESSES:

To submit written comments: Written comments will be accepted until 5:00 p.m. EST on Friday, December 4, 2026, through the Commission's online public comment collection system at: *https://hearing.drbc.commentinput.com?id=T95htQGAg.* To request an exception from use of the online system based on lack of access to the internet, please submit your request, along with your comment, to: Commission Secretary, DRBC, P.O. Box 7360, West Trenton, NJ 08628.

To register to speak at the public hearing: Those who wish to provide oral comment at a hearing must register in advance to do so. Registration will be through Zoom. A link to the Zoom registration for the public hearing is posted at *www.drbc.gov.* Online registration will remain open until 5:00 p.m. on the day prior to the hearing date or until all available speaking slots have been filled, whichever is earlier. Each person who wishes to provide oral comment may do so at only one public hearing. Registrations will be monitored, and if capacity is not adequate to accommodate all who wish to speak, additional opportunities may be added.

See **SUPPLEMENTARY INFORMATION** for details regarding the substance of written comments.

FOR FURTHER INFORMATION CONTACT: For information regarding the public hearing and submission of written comments, contact Kate Schmidt, Communications Specialist, at *contact@drbc.gov* (preferred) or 609–477–7205. For information concerning the substance of the proposed amendments, contact Chad Pindar, Manager of Water Resource Planning, at *chad.pindar@drbc.gov* (preferred) or 609–477–7248.

SUPPLEMENTARY INFORMATION: The Delaware River Basin Commission (''DRBC'' or ''Commission'') is a Federal-interstate compact agency formed by the enactment of concurrent legislation by four states and the United States in 1961 [1] to manage the water resources of the Delaware River Basin (the ''Basin'') without regard to political boundaries. The Commission's members are, *ex officio,* the governors of the basin states (Delaware, New Jersey, New York, and Pennsylvania) and the Division Engineer of the U.S. Army Corps of Engineers North Atlantic Division, who represents the United States.

Background

Water use data are critical for effective management of the Basin's water resources. They are needed to develop consumptive use estimates, project water use trends, establish water budgets, assess water resource needs, and evaluate the effectiveness of water conservation programs. The Commission established annual reporting requirements for water supply systems serving the public (also herein, ''purveyors'') in 1986 and updated them in 2001 and 2009. The requirements apply to ''source data,'' consisting of monthly withdrawal or bulk purchase information for each system, and ''service area data,'' which identify water uses by category as residential, commercial, institutional, industrial, bulk sale, non-revenue, unaccounted for, or other. *See* Delaware River Basin Water Code (hereinafter, ''Water Code''), secs. 2.50.3 A.1.a.–b.

The proposed amendments would require water supply systems serving the public to furnish the Commission with a third class of supplemental water use data—large customer data. These data would help DRBC characterize the water needs of the largest users that obtain their water from purveyors rather than withdrawing it directly from a surface water or ground water source. The data would contribute to a clearer picture of how the Basin's water resources are used.

Because the proposed amendments include a new section 2.50.1, ''Definitions,'' current sections 2.50.1 through 2.50.3 are to be re-numbered 2.50.2 through 2.50.4. The substantive new requirements appear in proposed new subsection 2.50.4 A.1.c. Additional non-substantive amendments are proposed to the introductory paragraphs of current subsections 2.50.3 A.1., ''Annual Reporting Requirements—Water Supply Systems Serving the Public'' and A.2., ''Annual Reporting Requirements—Other Withdrawals,'' and to current subsection 2.50.3 B., solely for purposes of consistency and clarification. Changes to the latter subsection, in particular, are proposed to continue to ensure that DRBC's annual reporting requirements do not compel entities to submit the same data to both DRBC and state agencies.

Currently, approximately 300 purveyors in the Basin report source and service area water use to Basin state agencies in accordance with the Water Code provisions cited above. Working closely with our member state agencies, the Commission is able to access, compile, and analyze approximately 30 years of source and service area data from each state for purposes of identifying and projecting water use trends Basin-wide. The Commission now seeks to better understand the role of large customers of water supply systems serving the public in water use across the Basin. It also wishes to better quantify consumptive uses of water—those uses that do not involve return of the water to a surface or ground water source after its use but instead involve evaporative loss or export of the water from the Basin.

[1] United States Public Law 87–328, Approved Sept. 27, 1961, 75 Statutes at Large 688; 53 Delaware Laws, Ch. 71, Approved May 26, 1961; New Jersey Laws of 1961, Ch. 13, Approved May 1, 1961; New York Laws of 1961, Ch. 148, Approved March 17, 1961; Pennsylvania Acts of 1961, Act. No. 268, Approved July 7, 1961; commonly known as the ''Delaware River Basin Compact,'' and referred to hereinafter as the ''Compact.''

Excluding out-of-basin diversions, withdrawals by purveyors in 2024 comprised the second largest water use and second largest consumptive water use in the Delaware River Basin, equal to approximately 15 percent (833 million gallons per day (''mgd'')) of total water use and 28.5 percent (83 mgd) of consumptive water use.[2] For decades, the Commission has applied a consumptive use coefficient of ten percent (10%) to water withdrawn from the Basin by most water supply systems serving the public. Data obtained as a result of the proposed amendments would help the Commission determine whether its consumptive use coefficient for water supply systems serving the public remains accurate.

A clearer understanding of water use by large customers of water supply systems serving the public is particularly important in helping develop a more accurate profile of consumptive use in the Basin and evaluating whether current drought management measures and contingency plans will be adequate in the future.

The Commission expects that under the amended rule, a subset of the approximately 300 water supply systems serving the public that are subject to the rule will be required to identify large customers supplied by their systems. The incremental burden on these purveyors is expected to be manageable, as most are already accustomed to furnishing source and service area data electronically to the Commission's respective member states in accordance with subsections 2.50.3 A.1.a. and b. of the Water Code, adopted in 1986, and to providing DRBC with an annual ''water audit'' report in accordance with section 2.1.8 of the Water Code, adopted in 2012. Data collected pursuant to the proposed amendments would be reported electronically in a manner similar to that currently used by purveyors to report water audit data to the Commission.

Specifically, the proposed amendments would require the owner or operator of each water supply system serving the public with a withdrawal of 100,000 gallons per day (''gpd'') or more as an average during any 30-day period to report the following data for each customer to which the system supplies an amount greater than or equal to 50,000 gpd as a 30-day average through one or more proximate connections: the calendar year for which the data are reported; the DRBC docket number and state permit number for the reporting entity; the identification number assigned by the reporting entity to the customer served by the connection(s); the amount of water supplied monthly to the customer for each of the twelve months for which data are reported; the type or sector to which the customer belongs; and the NAICS code.

The Commission proposes to collect monthly data for large customers beginning with calendar year 2026 data, to be submitted in June 2027. If a purveyor's practice is to bill less frequently than monthly, then less frequent use data for 2026 and any portion of 2027 that precedes the effective date of the final rule would be accepted. Regardless of their current billing practices, all purveyors subject to the rule would be required to report monthly large customer water use for each month following the rule's effective date. Accordingly, if the rule becomes effective in May 2027, the purveyor's report for 2026 (to be submitted in June 2027) may include less-than-monthly data for all of 2026. The purveyor's report for 2027 (to be submitted in 2028) may include less-than-monthly water use data for the months of January through April of 2027 but must include monthly data for each large customer for the months of May through December 2027.

The text of the proposed amendments is available on the Commission's website at *https://www.nj.gov/drbc/meetings/proposed/notice_water-reporting.html.*

Incorporation by Reference

The entirety of the Water Code, including section 2.50, is incorporated into the Code of Federal Regulations at 18 CFR 410.1 and was last approved for incorporation by reference by the Office of the Federal Register (''OFR'') on March 6, 2023. In accordance with OFR's regulations concerning incorporation by reference, the preamble summarizes the proposed amendments to section 2.50 of the Water Code.

The Commission further proposes to amend section 410.1(c) of title 18 of the Code of Federal Regulations by replacing the date of incorporation by reference there with respect to the Water Code (March 6, 2023) with the date on which the Commission adopts a final rule pursuant to this proposal.

Interested persons may obtain or inspect copies of the Water Code at the Delaware River Basin Commission, 25 Cosey Road, West Trenton, New Jersey, 08628–0360 or on the Commission's website, *https://www.nj.gov/drbc/library/documents/watercode.pdf.*

Public Process

Substance of comments. The Commission welcomes and will consider comments that concern the potential impacts of the proposed amendments on the conservation, utilization, development, management and control of the water and related resources of the Delaware River Basin and on public participation in the Commission's water resource management activities. In particular, the Commission seeks comment on the burden the proposed rule would impose on water supply systems serving the public and large customers.

Non-digitized, voluminous materials such as books, journals and collections of documents will not be accepted. Digital submissions of articles and websites must be accompanied by a statement containing citations to the specific findings or conclusions the commenter wishes to reference.

Submission of written comments. Written comments along with any attachments should be submitted through the Commission's web-based comment system (*https://drbc.commentinput.com/?id=kciDptC8h*) until 5 p.m. on Friday, December 4, 2026. All materials should be provided in searchable formats, preferably in .pdf searchable text. Notably, a picture scan of a document may not result in searchable text. Comments received through any method other than the designated on-line method, including *via* email, fax, postal/delivery services or hand delivery, will not be considered or included in the rulemaking record unless accompanied by a written request for an exception based on lack of access to the web-based comment system. Such requests and accompanying materials may be sent to: Commission Secretary, DRBC, P.O. Box 7360, West Trenton, NJ 08628.

Public hearing. To ensure an orderly process and to provide access to interested parties regardless of their geographic location, the Commission is conducting its public hearing virtually. Attendance at the hearing is not limited and requires no registration. However, to eliminate uncertainty on the part of attendees about whether they will have an opportunity to provide oral comment, those who wish to speak at a hearing must register in advance to do so, using the link on the Commission's website. Registrations will be monitored, and if capacity is not adequate to accommodate all who wish to speak, additional opportunities may

[2] Delaware River Basin Commission. (June 2026). Water Resources Program FY 2027–2029. Sec. 1.2.2. Available at: *https://www.nj.gov/drbc/library/documents/WRPFY27-29.pdf.*

be added. Key elements of the procedure are as follows:

- Online registration to speak at a public hearing will remain open until 5 p.m. on the day immediately before each hearing date.
- Each person who wishes to provide oral comment may do so at only one public hearing.
- Speaking time will be limited to approximately three minutes per speaker.
- Elected government officials and their staff members will have the opportunity to identify themselves when registering to attend a hearing.
- Attendance at the public hearing is not limited and requires no advance registration.
- Written and oral comments will receive equal consideration.

The Commission appreciates the public's participation and input on this matter.

Translation Services for Rulemaking Materials. The Commission will consider requests for translation of this document and the proposed rule text into languages other than English. To request translation of documents related to this rulemaking, please send an email to *translate@drbc.gov.* Please specify both the requested language and the requested documents.

More Information. Detailed and up-to-date information about the rulemaking, including proposed rule text, a frequently asked questions document, public notices, and links for submitting written comments and for registering online to speak at the scheduled public hearing can be found on the Commission website, *www.drbc.gov.*

List of Subjects in 18 CFR Part 410

Incorporation by reference, Water pollution control, Water resources, Water supply.

For the reasons set forth in the preamble, the Delaware River Basin Commission proposes to amend title 18, chapter III, subchapter A of the Code of Federal Regulations as follows:

PART 410—BASIN REGULATIONS; WATER CODE AND ADMINISTRATIVE MANUAL—PART III WATER QUALITY REGULATIONS

■ 1. The authority citation for part 410 continues to read as follows:

Authority: Delaware River Basin Compact, 75 Stat. 688.

■ 2. Amend § 410.1 by revising paragraph (c) to read as follows.

§ 410.1 Basin regulations—Water Code and Administrative Manual—Part III Water Quality Regulations.

* * * * *

(c) Work, services, activities and facilities affecting the conservation, utilization, control, development or management of water resources within the Delaware River Basin are subject to regulations contained within the Delaware River Basin Water Code with Amendments through [EFFECTIVE DATE OF FINAL RULE], and the Administrative Manual—Part III Water Quality Regulations with Amendments through December 7, 2022. Both the Delaware River Basin Water Code and the Administrative Manual—Part III Water Quality Regulations are incorporated by reference into this section with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. You may obtain or inspect this material at the Delaware River Basin Commission (DRBC), 25 Cosey Road, West Trenton, New Jersey 08628–0360, 609–883–9500, *www.drbc.gov.*

Dated: September 29, 2026.

Naomi Mendelsohn,

Commission Secretary/Assistant General Counsel.

DEPARTMENT OF THE TREASURY

Financial Crimes Enforcement Network

31 CFR Part 1010

RIN 1506–AB47

Proposal of Special Measure Regarding Convertible Virtual Currency Mixing, as a Class of Transactions of Primary Money Laundering Concern; Withdrawal

AGENCY: Financial Crimes Enforcement Network (FinCEN).

ACTION: Withdrawal of finding and notice of proposed rulemaking.

SUMMARY: FinCEN is withdrawing its finding and proposed rulemaking, pursuant to section 311 of the USA PATRIOT Act, that international Convertible Virtual Currency (CVC) mixing is a class of transactions of primary money laundering concern and that a special measure requiring enhanced recordkeeping and reporting requirements should be imposed regarding this class of transactions.

DATES: FinCEN is withdrawing the proposed rulemaking published at 88 FR 72701 (October 23, 2023), as of October 6, 2026.

FOR FURTHER INFORMATION CONTACT: The FinCEN Regulatory Support Section by submitting an inquiry at *www.fincen.gov/contact.*

SUPPLEMENTARY INFORMATION:

I. Statutory Provisions

Section 311 of the USA PATRIOT Act [1] (section 311), codified at 31 U.S.C. 5318A, grants the Secretary of the Treasury (Secretary) the authority to make a finding that ''reasonable grounds exist for concluding'' that any of the following ''is of primary money laundering concern'':

(i) A jurisdiction outside of the United States;

(ii) One or more financial institutions operating outside of the United States;

(iii) One or more classes of transactions within, or involving, a jurisdiction outside of the United States; or

(iv) One or more types of accounts.[2]

Upon making such a finding, the Secretary is authorized to require domestic financial institutions and domestic financial agencies—collectively, ''covered financial institutions''—to take certain ''special measures.'' Specifically, pursuant to section 311, the Secretary may impose one or more of five possible special measures as safeguards to defend the U.S. financial system from money laundering and terrorist financing risks. Through special measures one through four, the Secretary may impose additional recordkeeping, information collection, and reporting requirements on covered financial institutions.[3] Through special measure five, the Secretary may ''prohibit, or impose conditions upon, the opening or maintaining in the United States of a correspondent account or payable-through account'' for or on behalf of a foreign banking institution, if such correspondent account or payable-through account involves the financial institution operating outside of the United States found to be of primary money laundering concern.[4]

The authority of the Secretary to administer the Bank Secrecy Act (BSA) [5]

[1] Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001, Public Law 107–56, 115 Stat. 272 (Oct. 26, 2001) (USA PATRIOT Act).

[2] 31 U.S.C. 5318A(a)(1).

[3] 31 U.S.C. 5318A(b)(1)–(4).

[4] 31 U.S.C. 5318A(b)(5).

[5] The BSA, as amended, is the popular name for a collection of statutory authorities that FinCEN administers that is codified at 12 U.S.C. 1829b, 1951–1960 and 31 U.S.C. 5311–5314, 5316–5336,

Continued

and its implementing regulations, including the authority under section 311 to make such a finding and to impose special measures, has been delegated to FinCEN.[6]

II. Finding and Notice of Proposed Rulemaking

On October 23, 2023, FinCEN published a proposed rule that, if finalized, would impose recordkeeping and reporting obligations on covered financial institutions to report certain information when they know, suspect, or have reason to suspect a CVC transaction involves the use of CVC mixing within or involving a jurisdiction outside of the United States.[7] Under the proposed rule, FinCEN defined the term ''CVC Mixing'' as activity that entailed the facilitation of CVC transactions in a manner that obfuscates the source, destination, or amount involved in one or more transactions regardless of the type of protocol or service used, such as: (1) pooling or aggregating CVC from multiple persons, wallets, addresses, or accounts; (2) using programmatic or algorithmic code to coordinate, manage, or manipulate the structure of a transaction; (3) splitting CVC for transmittal and transmitting the CVC through a series of independent transactions; (4) creating and using single-use wallets, addresses, or accounts, and sending CVC through such wallets, addresses, or accounts through a series of independent transactions; (5) exchanging between types of CVC or other digital assets; or (6) facilitating user-initiated delays in transactional activity.[8] Additionally, FinCEN proposed a definition for services called ''CVC Mixers'' as ''any person, group, service, code, tool, or function that facilitates CVC mixing.''[9] The proposed rule would have required covered financial institutions to file a report with FinCEN containing certain information related to CVC Mixing transactions, such as the amount of CVC transferred, CVC type, CVC mixer used, CVC wallet address associated with customers, relevant transaction hashes, date of transactions, IP addresses, and a description of activity through a narrative. The proposed rule would have also required covered financial institutions to keep records of customers associated with covered transactions to include the customer's full identity, date of birth, address, email address, or unique identifying numbers.

As stated in the July 2025 report by the President's Working Group on Digital Asset Markets established by Executive Order 14178 (E.O. 14178), *Strengthening American Leadership in Digital Financial Technology,* ''the Trump Administration supports the ability of lawful users of digital assets to privately transact on a public blockchain.''[10] The report also acknowledged that although illicit actors ''use mixers to obfuscate and launder funds . . . lawful users of digital assets may leverage mixers to enable financial privacy when transacting through public blockchains.''[11] The report recommended that Treasury should consider next steps regarding its proposed rulemaking concerning CVC mixing.[12]

FinCEN is withdrawing its finding that international CVC Mixing is a class of transactions of primary laundering concern, and the proposed rule, published on October 23, 2023, seeking to impose special measure one regarding international CVC Mixing. While FinCEN maintains that illicit actors continue to use mixers and other tools and methods to hinder law enforcement investigations, this withdrawal is informed by the concerns from commentors that the expansive definition of CVC mixing in the proposed rule could have a chilling effect on legitimate activity and place a large reporting burden on covered financial institutions. However, FinCEN will continue to monitor activity involving CVC mixers for indicia of money laundering, terrorist financing, or other illicit finance activity, and may take appropriate steps in the future to mitigate any such activity.

Jimmy L. Kirby,

Deputy Director, Financial Crimes Enforcement Network.

Financial Crimes Enforcement Network

31 CFR Parts 1010, 1020, and 1022

RIN 1506–AB47

Requirements for Certain Transactions Involving Convertible Virtual Currency or Digital Assets; Withdrawal

AGENCY: Financial Crimes Enforcement Network (FinCEN), Treasury.

ACTION: Proposed rule; withdrawal.

SUMMARY: FinCEN is withdrawing a notice of proposed rulemaking (NPRM) that proposed requiring banks and money service businesses (MSBs) to submit reports, keep records, and verify the identity of customers in relation to transactions involving convertible virtual currency (CVC) or digital assets with legal tender status (LTDA) held in unhosted wallets or in wallets hosted in a jurisdiction identified by FinCEN. FinCEN will not take any further action on this NPRM.

DATES: FinCEN is withdrawing the proposed rule published at 85 FR 83840 (December 23, 2020), as of October 6, 2026.

FOR FURTHER INFORMATION CONTACT: The FinCEN Regulatory Support Section by submitting an inquiry at *www.fincen.gov/contact.*

SUPPLEMENTARY INFORMATION: On December 23, 2020, FinCEN published an NPRM that proposed adopting recordkeeping, verification, and reporting requirements for certain deposits, withdrawals, exchanges, or other payments or transfers of CVC or LTDA by, through, or to a bank or MSB that involve an unhosted or otherwise covered wallet.[1] Under the proposal, the term ''unhosted wallet'' described ''when a financial institution is not required to conduct transactions from the wallet.''[2] FinCEN proposed defining otherwise covered wallets as those wallets that are held at a financial institution that is not subject to the Bank Secrecy Act and is located in a foreign jurisdiction identified by FinCEN.[3] The NPRM proposed requiring banks and MSBs to file a report with FinCEN containing certain information related to a customer's CVC or LTDA transaction and counterparty, and to verify the identity of their customer, if a counterparty to the transaction is using an unhosted or

[2] *Id.* at 83843.

[3] *Id.*

otherwise covered wallet and the transaction is greater than $10,000, or multiple transactions that aggregate to greater than $10,000 in 24 hours. The NPRM also proposed requiring banks and MSBs to keep records of a customer's CVC or LTDA transaction and counterparty, including verifying the identity of their customer, if a counterparty is using an unhosted or otherwise covered wallet and the transaction is greater than $3,000.

As stated in the report issued by the President's Working Group on Digital Asset Markets established by Executive Order 14178, ''Strengthening American Leadership in Digital Financial Technology,'' FinCEN is withdrawing the NPRM as part of the Trump Administration's ongoing efforts to ensure digital asset regulations are fit-for-purpose.[4] FinCEN will take no further action on this NPRM.

Jimmy L. Kirby,

Deputy Director, Financial Crimes Enforcement Network.

BILLING CODE 4810–02–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2026–1057]

RIN 1625–AA00

Safety Zone; Red Bull Flugtag, Intercoastal Waterway, Biscayne Bay, Miami, FL

AGENCY: Coast Guard, Department of Homeland Security.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to establish a temporary safety zone for certain navigable waters on the Intercoastal Waterway portion of Biscayne Bay in Miami, FL. The safety zone is needed to protect spectators, vessels, and the marine environment from potential hazards associated with event proceedings. This proposed rulemaking would prohibit persons and vessels from being in the safety zone unless specifically authorized by the Captain of the Port, Sector Miami. We invite your comments on this proposed rulemaking.

DATES: Comments and related material must be received by the Coast Guard on or before October 21, 2026.

ADDRESSES: To submit comments and view available documents, go to *https://www.regulations.gov* and search for USCG–2026–1057.

FOR FURTHER INFORMATION CONTACT: If you have questions about this proposed rule, contact MST2 Elliot Cortes, Sector Miami Waterways Management Division, U.S. Coast Guard; telephone 786–295–9051, or email *SectorMiamiWaterways@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background and Authority

On May 21, 2026, Red Bull North America notified the Coast Guard that they will be hosting a homemade flying machine contest. Thirty teams will build crafts that cannot use stored energy for flight. They will launch off a 22 feet deck built above the water to see how far they can fly on the intercoastal waters of Biscayne Bay, Miami, FL on October 31st from 10 a.m. to 5 p.m. Hazards from the flying machines breaking apart mid-flight or debris drifting unpredictably threaten persons, vessels, and the marine environment. The Captain of the Port Sector Miami (COTP) has determined that potential hazards associated with event are a safety concern for anyone within 200 feet. Therefore, the COTP is proposing this rule under the authority in 46 U.S.C. 70034, which is needed to protect spectators, vessels, and the marine environment in the navigable waters within the safety zone.

III. Discussion of the Rule

This proposed rule would establish a safety zone from 10 a.m. until 5 p.m. on October 31, 2026. The safety zone would cover all navigable waters within 200 feet of the event stage. No vessel or person would be permitted to enter the safety zone without obtaining permission from the COTP or their designated representative. The regulatory text we are proposing appears at the end of this document.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders.

A. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. Section 605 of the RFA allows an agency to certify a rule, in lieu of preparing an analysis, if the rulemaking is not expected to have a significant economic impact on a substantial number of small entities. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities for the following reasons.

Vessel traffic will be able to safely transit around this regulated area. This regulation will only impact a small area for a few hours. The enforcement period is during a time when vessel traffic is higher than normal. In addition, the Coast Guard will issue a Broadcast Notice to Marines via VHF FM marine channel 16, which will allow small entities to adjust their transit plans.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this proposed rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this proposed rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), if this proposed rule will affect your small business, organization, or governmental jurisdiction and you have questions, contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. Small businesses may send comments to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards by calling 1–888–REG–FAIR (1–888–734–3247).

B. Collection of Information

This proposed rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

[4] *See* White House, *Strengthening American Leadership in Digital Financial Technology,* p. 100 (July 2025), *https://www.whitehouse.gov/wp-content/uploads/2025/07/Digital-Assets-Report-EO14178.pdf; see also* Exec. Order 14178, 90 FR 8647 (Jan. 31, 2025).

C. Federalism and Indian Tribal Governments

We have analyzed this proposed rule under Executive Order 13132, Federalism, and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in that Order.

Also, this proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

D. Unfunded Mandates Reform Act

As required by The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538), the Coast Guard certifies that this proposed rule will not result in an annual expenditure of $100,000,000 or more (adjusted for inflation) by a State, local, or tribal government, in the aggregate, or by the private sector.

E. Environment

We have analyzed this proposed rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment.

This proposed rule is a safety zone. It is categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A Record of Environmental Consideration supporting this will be in the docket.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

Submitting comments. We encourage you to submit comments at *https://www.regulations.gov.* To do so, go to *https://www.regulations.gov,* type USCG–2026–1057 in the search box and click ''Search.'' Next, look for this document in the Search Results column, and click on it. Then click on the Comment option. If you cannot submit your material by using *https://www.regulations.gov,* call or email the person in the **FOR FURTHER INFORMATION CONTACT** section of this proposed rule for alternate instructions.

Viewing material in the docket. To view available documents, find the docket as described in the previous paragraph, and then select ''Supporting & Related Material'' in the Document Type column. We will post public comments in our online docket. Additional information is on the *https://www.regulations.gov* Frequently Asked Questions web page.

Personal information. We accept anonymous comments. Comments we post to *https://www.regulations.gov* will include any personal information you have provided. For more about privacy and submissions to the docket in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard is proposing to amend 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051, 70124; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.4.

■ 2. Add § 165.T07–1057 to read as follows:

§ 165.T07–1057 Safety Zone; Bayfront Park, Miami, FL

(a) *Location.* The following area is a safety zone: All waters of Biscayne Bay, from surface to bottom, encompassed by a line connecting the following points beginning at 25°46.56174′ N, 80°11.00034′ W, thence to 25°46.33974′ N, 80°10.9881′ W, thence to 25°46.31904′ N, 80°11.09454′ W, thence to 25°46.52172′ N, 80°11.09376′ W. These coordinates are based on the World Geodetic System (WGS 84).

(b) *Definitions.* As used in this section, *designated representative* means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer operating a Coast Guard vessel and a Federal, State, and local officer designated by or assisting the Captain of the Port Sector Miami (COTP) in the enforcement of the safety zone.

(c) *Regulations.* (1) Under the general safety zone regulations in subpart C of this part, you may not enter the safety zone described in paragraph (a) of this section unless authorized by the COTP or the COTP's designated representative.

(2) To seek permission to enter, contact the COTP or the COTP's representative on VHF–FM channel 16 or by telephone at (305) 535–4472. Those in the safety zone must comply with all lawful orders or directions given to them by the COTP or the COTP's designated representative.

(d) *Enforcement period.* This section will be enforced from 10 a.m. to 5 p.m. on October 31, 2026.

F.J. Florio,

Captain, U.S. Coast Guard, Captain of the Port Sector Miami.

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 81

[EPA–HQ–OAR–2024–0078; FRL–11650–03–OAR]

RIN 2060–AW33

Initial Air Quality Designations for the 2024 Revised Primary Annual Fine Particle ($PM_{2.5}$) National Ambient Air Quality Standards (NAAQS)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability; opportunity for public comment.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is providing notice of the Agency's intended approach for area designations for the 2024 primary annual fine particulate matter ($PM_{2.5}$) National Ambient Air Quality Standard (NAAQS) (the 2024 annual $PM_{2.5}$ NAAQS) under Clean Air Act (CAA) section 107(d). Details regarding these designations, as well as the EPA's notifications to States, territories, and Tribes regarding their initial area designations are accessible via the Agency's website and public electronic docket. With this notice, the EPA is providing an opportunity for public comment on its intended approach for finalizing area designations during the comment period

specified in the **DATES** section. The EPA sent notifications directly to applicable States, territories, and Tribes regarding their initial area designations on or about October 2, 2026, and anticipates promulgating final designations consistent with CAA requirements.

DATES: Comments must be received on or before November 5, 2026.

ADDRESSES: You may send comments, identified by Docket ID No. EPA–HQ–OAR–2024–0078, by any of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov* (the EPA's preferred method). Follow the online instructions for submitting comments.
- *Email: a-and-r-docket@epa.gov.* Include Docket ID No. EPA–HQ–OAR–2024–0078 in the subject line of the message.
- *Mail:* U.S. Environmental Protection Agency, EPA Docket Center, Office Air and Radiation Docket, Mail Code 28221T, 1200 Pennsylvania Avenue NW, Washington, DC 20460.
- *Hand Delivery or Courier (by scheduled appointment only):* EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Avenue NW, Washington, DC 20004. The Docket Center's hours of operations are 8:30 a.m.–4:30 p.m., Monday–Friday (except Federal holidays).

Instructions: All submissions received must include the Docket ID No. for this rulemaking. Comments received may be posted without change to *https://www.regulations.gov,* including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the **SUPPLEMENTARY INFORMATION** section of this document. For information on EPA Docket Center services, please visit us online at *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: For information on this notice of data availability, contact Gabrielle Deabler, U.S. Environmental Protection Agency, Office of State Air Partnerships, Air Quality Planning Division, P.O. Box 12055, Mail Code: C541G, Research Triangle Park, NC 27709; telephone number: (919) 541–5766; email address: *deabler.gabrielle@epa.gov* or Andrew Leith, U.S. Environmental Protection Agency, Office of State Air Partnerships, Air Quality Planning Division, P.O. Box 12055, Mail Code: C541D, Research Triangle Park, NC 27709; telephone number: (919) 541–1069; email address: *leith.andrew@epa.gov.*

Regional Office Contacts

The following serve as points of contact for inquiries related to specific areas within the respective EPA Regional offices. The information can also be reviewed online at *https://www.epa.gov/particle-pollution-designations* and in the public docket for these 2024 annual $PM_{2.5}$ NAAQS designations at *https://www.regulations.gov* under Docket ID No. EPA–HQ–OAR–2024–0078.

EPA regional office contacts	Affected states
EPA Region 1, Lynne Hamjian, *Hamjian.Lynne@epa.gov*	CT, ME, MA, NH, RI, VT.
EPA Region 2, Richard Ruvo, *Ruvo.Richard@epa.gov*	NJ, NY, Puerto Rico, U.S. Virgin Islands.
EPA Region 3, Michael Dunn, *Dunn.Michael@epa.gov*	DE, DC, MD, PA, VA, WV.
EPA Region 4, Denisse Diaz, *Diaz.Denisse@epa.gov*	AL, FL, GA, KY, MS, NC, SC, TN.

SUPPLEMENTARY INFORMATION:

Docket. The EPA has established a docket for this action under Docket ID No. EPA–HQ–OAR–2024–0078. All documents in the docket are listed in *https://www.regulations.gov.* Although listed, some information is not publicly available, *e.g.,* Confidential Business Information (CBI) or other information the disclosure of which is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available as PDF versions that can only be accessed on the EPA computers in the docket office reading room. Certain databases and physical items cannot be downloaded from the docket but may be requested by contacting the docket office at (202) 566–1744. With the exception of such material, publicly available docket materials and a plain language summary of the action are available electronically at *https://www.regulations.gov.*

Written Comments. Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2024–0078, at *https://www.regulations.gov* (the EPA's preferred method) or the other methods identified in the **ADDRESSES** section. Once submitted, comments cannot be edited or removed from the docket. The EPA will publish any comment received to the Agency's public docket. Do not submit to the EPA's docket at *https://www.regulations.gov* any information you consider to be CBI, Proprietary Business Information (PBI), or other information the disclosure of which is restricted by statute. This type of information should be submitted as discussed below. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). Please visit *https://www.epa.gov/dockets/commenting-epa-dockets* for additional submission methods; the full EPA public comment policy; information about CBI, PBI, or multimedia submissions; and general guidance on making effective comments.

Submitting CBI. Do not submit information containing CBI to the EPA through *https://www.regulations.gov.* Clearly mark the part or all of the information that you claim to be CBI. For CBI information on any digital storage media that you mail to the EPA, note the docket ID, mark the outside of the digital storage media as CBI, and identify electronically within the digital storage media the specific information that is claimed as CBI. In addition to one complete version of the comments that includes information claimed as CBI, you must submit a copy of the comments that does not contain the information claimed as CBI directly to the public docket through the procedures outlined in *Written Comments* section above. If you submit any digital storage media that does not

contain CBI, mark the outside of the digital storage media clearly that it does not contain CBI and note the docket ID. Information not marked as CBI will be included in the public docket and the EPA's electronic public docket without prior notice. Information marked as CBI will not be disclosed except in accordance with procedures set forth in 40 Code of Federal Regulations (CFR) part 2.

Our preferred method to receive CBI is electronic transmission using email attachments, File Transfer Protocol (FTP), or other online file sharing services (*e.g.,* Dropbox, OneDrive, Google Drive). Electronic submissions must be transmitted directly to the Office of State Air Partnerships (OSAP) CBI Office at the email address *osapcbi@epa.gov* and, as described above, should include clear CBI markings and note the docket ID. If assistance is needed with submitting large electronic files that exceed the file size limit for email attachments, and if you do not have your own file sharing service, please email *osapcbi@epa.gov* to request a file transfer link. If sending CBI information through the postal service, please send it to the following address: U.S. Environmental Protection Agency, Attn: OSAP Document Control Officer, Mail Drop: C404–02, 109 T.W. Alexander Drive, P.O. Box 12055, Research Triangle Park, North Carolina 27711, Attention Docket ID No. EPA–HQ–OAR–2024–0078. The mailed CBI material should be double wrapped and clearly marked. Any CBI markings should not show through the outer envelope.

Preamble acronyms and abbreviations. Throughout this preamble, the use of ''we,'' ''us,'' or ''our'' is intended to refer to the EPA. We use multiple acronyms and terms in this preamble. While this list may not be exhaustive, to ease the reading of this preamble and for reference purposes, the EPA defines the following terms and acronyms here:

CAA Clean Air Act
CBI Confidential Business Information
CFR Code of Federal Regulations
DV Design Value
EPA Environmental Protection Agency
FR Federal Register
FTP File Transfer Protocol
NAAQS National Ambient Air Quality Standard or Standards
OSAP Office of State Air Partnerships
PBI Proprietary Business Information
PM Particulate Matter
SIP State Implementation Plan
TAS Treatment in a Similar Manner as a State
U.S.C. United States Code

Table of Contents

I. Overview of Action
II. Legal Authority
III. The EPA's Intended Approach to Area Designations

I. Overview

Under CAA section 107(d), the EPA is to issue area designations upon promulgation of a new or revised NAAQS. On February 7, 2024, the EPA promulgated revisions to the primary annual $PM_{2.5}$ NAAQS to a level of 9.0 micrograms per cubic meter ($\mu g/m^3$) as described in 40 CFR 50.20.[1] On July 17, 2026, the Northern District Court of California ordered the EPA to publish final designations for all areas of the country no later than February 6, 2027.[2] Although EPA is appealing the order, EPA is also moving forward in the absence of action from the judiciary, to complete the designations.

As a general matter, the first step in the designations process is for the Governors of States and territories, and Tribes, if they so choose, to submit initial area designations to the EPA. Whenever the EPA intends to modify a Governor's initial designation, the Agency must notify the State, territory, or Tribe no later than 120 days prior to promulgating final designations.[3] These notifications are informally referred to as 120-day letters.

This notice of availability provides notice of the EPA's intended approach for designations for the 2024 annual $PM_{2.5}$ NAAQS under CAA section 107(d)(1)(B). The EPA invites public input regarding area designations during the 30-day comment period announced in this notice. To receive full consideration, input from the public must be submitted to the docket by the date provided in the **DATES** section of this document. This notice and opportunity for public comment does not affect any rights or obligations of any State, territory, or Tribe, or of the EPA, which might otherwise exist pursuant to CAA section 107(d).

II. Legal Authority

Following promulgation of a new or revised NAAQS, CAA section 107(d) requires the EPA to designate areas of the country as attainment, nonattainment, or unclassifiable for that NAAQS. CAA section 107(d)(1)(A)(i)–(iii) defines: (i) nonattainment, as any area that does not meet (or that contributes to ambient air quality in a nearby area that does not meet) the NAAQS; (ii) attainment, as any area (other than an area identified in clause (i)) that meets the NAAQS; and (iii) unclassifiable, as any area that cannot be classified on the basis of available information as meeting or not meeting the NAAQS. Generally, the designations process involves identifying areas of the country that either meet or do not meet the NAAQS, along with any nearby areas that are causing or contributing to NAAQS violations. The EPA calculates design values (DVs) at monitors to determine whether a given area has met the 2024 annual $PM_{2.5}$ NAAQS, based on procedures outlined in 40 CFR part 50, Appendix N.[4] The 2024 annual $PM_{2.5}$ NAAQS is met at an ambient air quality monitoring site when the annual arithmetic mean, averaged over three years (*i.e.,* the DV) is less than or equal to 9.0 $\mu g/m^3$.

In accordance with the statutory timeline prescribed under CAA section 107(d)(1)(A), Governors of each State or territory were required to submit a list of initial designations for all areas of their State or territory by February 7, 2025. Though not required, Tribal governments were encouraged to submit initial designations for their respective areas of Indian Country.[5] These submissions generally relied on the 2021–2023 DVs and other information relevant to that time period. When promulgating final designations, the EPA will use the most recently available ambient air monitoring data and other information. The EPA intends to rely on DVs from the 2023–2025 period for promulgating final area designations.

The EPA evaluates the initial area designation submissions from States,

[1] 89 FR 16202 (Mar. 6, 2024).

[2] *All. of Nurses for Healthy Env'ts* v. *Zeldin,* No. 26–cv–03118–HSG (N.D. Cal. July 17, 2026).

[3] The EPA notified Tribes that have obtained treatment in a similar manner as a state (TAS) under CAA section 301(d) and 40 CFR part 49 for purposes of CAA section 107(d), and those Tribes that may be affected by a nonattainment designation in the relevant State.

[4] In accordance with 40 CFR part 50 Appendix N, $PM_{2.5}$ measurements from the primary monitor and suitable collocated $PM_{2.5}$ Federal Reference Method (FRM) or Federal Equivalent Method (FEM) may be used in a ''combined site data record'' to establish a $PM_{2.5}$ design value to determine whether the NAAQS is met or not met at a particular $PM_{2.5}$ monitoring site. For final area designations, the EPA intends to rely on Air Quality System (AQS) data from 2023–2025.

[5] After promulgation of a new or revised NAAQS, each Governor or Tribal leader has an opportunity to submit initial area designations to the EPA. Consistent with the approach outlined in the EPA's 2011 Policy for Establishing Separate Air Quality Designations for Areas of Indian Country, in circumstances in which the Agency either does not receive an initial area designation letter from a Tribe, or receives a letter that does not specify designation of a separate area, the Agency intends to designate the relevant Tribe's Indian country as part of the surrounding multi-jurisdictional area. See memorandum from Stephen D. Page to Regional Air Directors, Regions 1–10, *https://www.epa.gov/sites/default/files/2015-09/documents/20120117indiancountry.pdf.*

the District of Columbia, territories, and Tribes as part of the Agency's duty to promulgate final designations for a new or revised NAAQS. CAA section 107(d)(1)(B)(ii) provides that, whenever the EPA intends to modify an initial designation for a State, territory, or Tribe, the Agency must notify the State, territory, or Tribe no later than 120 days before the date the Administrator promulgates final designations. CAA section 107(d)(1)(B)(ii) further requires the EPA to provide such State with an opportunity to demonstrate why any potential modification is inappropriate. Although not required by the CAA, the EPA has issued letters notifying all States, the District of Columbia territories, and certain Tribes of EPA's intended approach for finalizing designations, including instances where the State, territory, or Tribe declined to submit an initial area designation. The EPA's 120-day letters requested that the States provide additional information to the Agency within 30 days of receipt of the letters.

III. The EPA's Intended Approach to Area Designations

A. What is the EPA's intended approach for area designations?

Consistent with CAA section 107(d)(1), the EPA has conducted an evaluation of the most recent and relevant air quality information available. This includes evaluation of the complete and certified $PM_{2.5}$ ambient air quality monitoring data, including the 2021–2023 DVs on which States, the District of Columbia, territories, and Tribes, based their initial designation submissions. Additionally, the EPA evaluated and utilized the most recent complete and certified $PM_{2.5}$ air quality monitoring data, including the 2023–2025 DVs, and other available technical information pertinent to these designations. Furthermore, the EPA considered the information submitted from States, the District of Columbia, territories, and Tribes in their initial area designations.

On or about October 2, 2026, in accordance with CAA section 107(d)(1)(B)(ii), the EPA completed its obligation to notify States of any intended modification to initial designations no later than 120-days prior to promulgating final designations. The EPA notified all States, the District of Columbia, territories, and certain Tribes as to whether the EPA intends to modify aspects of the State's initial designations for the 2024 annual $PM_{2.5}$ NAAQS. With respect to State initial designations that indicated ''attainment,'' and where the EPA functionally agrees with the State recommendation, the Agency intends to designate those States as ''attainment/unclassifiable.'' As a functional matter, there is no change for those States; the statutory and regulatory burdens of ''attainment'' and ''attainment/unclassifiable'' are the same.

Information may be submitted to the EPA's public docket regarding these intended designations at EPA–HQ–OAR–2024–0078, available at *www.regulations.gov.* Pursuant to CAA section 107(d)(1)(B) and following consideration of any additional information the EPA receives, the Agency anticipates completing final designations consistent with CAA requirements and in a timely manner commensurate with any applicable court order. The EPA is available to assist States, the District of Columbia, territories, and Tribes with any outstanding matters concerning appropriate designations for all remaining areas.

B. Where can I find information related to these designations?

Information is provided in the individual 120-day letters themselves and the dataset(s) included in the docket. The relevant datasets, technical assistance documents, applicable EPA guidance memoranda, and copies of correspondence regarding this process between the Agency and the States, along with other parties, are available for review at the public docket for these 2024 annual $PM_{2.5}$ NAAQS designations at *http://www.regulations.gov* under Docket ID No. EPA–HQ–OAR–2024–0078, at the EPA Docket Center listed in the **FOR FURTHER INFORMATION CONTACT** section of this document, and on the Agency's Particulate Matter Designations website at *https://www.epa.gov/particle-pollution-designations.*

Aaron Szabo,

Assistant Administrator, Office of Air and Radiation.

Notices

Federal Register
Vol. 91, No. 192
Tuesday, October 6, 2026

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are required regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by November 5, 2026 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Farm Service Agency

Title: Emergency Conservation Program and Biomass Crop Assistance Program.

OMB Control Number: 0560–0082.

Summary of Collection: The Farm Service Agency (FSA), in cooperation with the Natural Resources Conservation Service, the Forest Service, and other agencies and organizations, provides eligible producers and landowners cost-share incentives and technical assistance through several conservation and environmental programs to help farmers, ranchers, and other eligible landowners and operators conserve soil, improve water quality, develop forests, and rehabilitate farmland severely damaged by natural disasters authorized under the Agricultural Credit Act of 1978 (16 U.S.C. 2201–2205). FSA provides emergency funds for sharing with agricultural producers the cost of rehabilitating farmland damaged by natural disaster, and for carrying out emergency water conservation measures during periods of severe drought.

FSA is also managing the Biomass Crop Assistance Program (BCAP) authorized by Section 9010 of the Agricultural Act of 2014 (Pub. L. 113–79), which amends Title 1X of the Food, Conservation and Energy Act of 2008. BCAP regulations outlined the legislations parameters, program definitions and process for: (1) Establishing BCAP project areas; (2) Matching payment opportunity for eligible material owners and qualifying biomass conversion facilities; (3) Contracting acreage for producers in BCAP project areas; and (4) Establishment and annual production payments for producers in BCAP projects areas.

Need and Use of the Information: FSA will collect information using several forms. The collected information will be used to determine if the person, land, and practices are eligible for participation in the respective program and to receive cost-share assistance. Also, information collection from eligible biomass owners, biomass conversion facilities, and producers meeting the requirements for matching payments, annual production payment assistance, establishment payments and BCAP project area designation is necessary in order to ensure the financial accountability needed to operate and administer the BCAP. Without the information, FSA will not be able to make eligibility determinations and compute payments in a timely manner.

Description of Respondents: Farms; Business or other for profit.

Number of Respondents: 10,000.

Frequency of Responses: Reporting: Annually.

Total Burden Hours: 12,427.

Rachelle Ragland-Greene,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–05–P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are required regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by November 5, 2026 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Farm Service Agency

Title: Farm Loan Program, General Program Administration.

OMB Control Number: 0560–0238.

Summary of Collection: Farm Loan Program (FLP) in the Farm Service Agency provides loans to family farmers to purchase real estate and equipment and finance agricultural production to comply the regulation of 7 CFR part 761, General Program Administration.

Need and Use of the Information: Information collections are submitted by applicants and borrowers to the local FSA office serving the county in which their business is headquartered. The information is necessary to provide supervised credit as legislatively mandated and is used by FSA to:

- Ensure that when loan funds or insurance proceeds are used for construction and development projects, work is completed according to applicable State and local requirements, and in a manner that protects the Government's financial interest.
- Ensure that the loan repayment plan is developed using realistic data, based on the operation's actual history and any planned improvements.
- Identify potential concerns limiting the success of the operation and develop a loan assessment outlining the course of action to be followed, to improve the operation so that commercial credit is available.

The general nature of a loan from FSA is very similar to that of any conventional commercial creditor. However, FSA applicants and borrowers tend to pose more of an economic risk of loss than those operations financed by commercial credit sources, as applicants must document that no other source of credit is available at the time of application. Legislation requires FSA to actively supervise these borrowers and provide credit counseling, management advice, and financial guidance. Also, FLP provides either a prompt payment or standard guarantee plan to sellers who enter a land contract with a beginning or socially disadvantaged farmers to comply with the regulation of 7 CFR part 763, Land Contract Guarantee Loan but have not received any requests for land contract.

FLP is mandated to provide supervised credit; therefore, failure to collect the information, or collecting it less frequently, could result in the failure of the farm operation or loss of agency security property.

Description of Respondents: Business or other for-profit; farms.

Number of Respondents: 66,041.

Frequency of Responses: Reporting: On occasion; annually.

Total Burden Hours: 158,263.

Rachelle Ragland-Greene,

Departmental Collection Clearance Officer.

Certain Uncoated Paper From Portugal: Final Results of Antidumping Duty Administrative Review; 2024–2025

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that The Navigator Company, S.A (Navigator), the only producer/exporter subject to this review, made sales of subject merchandise at less than normal value (NV) during the period of review (POR), March 1, 2024, through February 28, 2025.

DATES: Applicable October 6, 2026.

FOR FURTHER INFORMATION CONTACT: Monica Gillis, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–6384.

SUPPLEMENTARY INFORMATION:

Background

On June 3, 2026, Commerce published the *Preliminary Results* of this administrative review in the **Federal Register** and invited interested parties to comment.[1] No interested party submitted comments on the *Preliminary Results.* Accordingly, the final results remain unchanged from the *Preliminary Results,* the *Preliminary Results* are hereby adopted as these final results, and no decision memorandum accompanies this notice. Commerce conducted this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of the Order [2]

The merchandise subject to the *Order* is certain uncoated paper products from Portugal. For a complete description of the scope of the *Order, see* the Preliminary Decision Memorandum.

[1] *See Certain Uncoated Paper from Portugal: Preliminary Results of Antidumping Duty Administrative Review; 2024–2025,* 91 FR 33145 (June 3, 2026) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum (Preliminary Decision Memorandum).

[2] *See Certain Uncoated Paper from Australia, Brazil, Indonesia, the People's Republic of China, and Portugal: Amended Final Affirmative Antidumping Determinations for Brazil and Indonesia and Antidumping Duty Orders,* 81 FR 11174 (March 3, 2016) (*Order*).

Final Results of Review

For these final results, we determine that the following estimated weighted-average dumping margin exists for the period March 1, 2024, through February 28, 2025:

Producer/exporter	Weighted-average dumping margin (percent)
The Navigator Company, S.A	2.70

Disclosure

Normally, Commerce discloses to interested parties the calculations of the final results of an administrative review within five days of a public announcement or, if there is no public announcement, within five days of the date of publication of the notice of final results in the **Federal Register**, in accordance with 19 CFR 351.224 (b). However, because we have made no changes from the *Preliminary Results,* there are no new calculations to disclose.

Assessment Rates

Pursuant to section 751(a)(2)(A) of the Act and 19 CFR 351.212(b)(1), Commerce has determined, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the

final results of this review. Pursuant to 19 CFR 351.212(b)(1), we calculated importer-specific *ad valorem* duty assessment rates based on the ratio of the total amount on estimated entered values. Because Navigator's weighted-average dumping margin is not zero or *de minimis* (*i.e.,* less than 0.5 percent) in the final results of this review, we calculated importer-specific assessment rates based on the ratio of the total amount of dumping calculated for each importer's examined sales and the total entered value of those same sales in accordance with 19 CFR 351.212(b)(1). Where an importer-specific assessment rate is zero or *de minimis* (*i.e.,* less than 0.5 percent), the entries by that importer will be liquidated without regard to antidumping duties.[3]

In accordance with Commerce's ''automatic assessment'' practice, for entries of subject merchandise during the POR produced by Navigator for which it did not know that the merchandise was destined for the United States, we intend to instruct CBP to liquidate those entries at the all-others rate calculated in the less-than-fair-value (LTFV) investigation if there is no rate for the intermediate company(ies) involved in the transaction.[4]

Commerce intends to issue assessment instructions to CBP regarding Navigator no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for subject merchandise exported by Navigator will be equal to the weighted-average dumping margin established in these final results of this administrative review; (2) for previously investigated or reviewed companies not covered by this review, the cash deposit rate will continue to be the company-specific cash deposit rate published for the most recently completed segment of this proceeding in which the company participated; (3) if the exporter is not a firm covered in this review, or the LTFV investigation, but the manufacturer is, then the cash deposit rate will be the rate established for the most recent segment for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 7.80 percent, the all-others rate established in the LTFV investigation.[5] These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Administrative Protective Order (APO)

This notice also serves as a preliminary reminder to parties subject to an APO of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Notification to Interested Parties

We are issuing and publishing this notice in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(5).

Dated: October 1, 2026.

Scot Fullerton,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Drawn Stainless Steel Sinks From the People's Republic of China: Final Results of the Expedited First and Second Sunset Reviews of the Countervailing Duty Order; Correction

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

ACTION: Notice; correction.

SUMMARY: The U.S. Department of Commerce (Commerce) published notice in the **Federal Register** of July 25, 2018 and October 20, 2023 in which Commerce announced the final results of the first and second sunset reviews of the countervailing duty (CVD) order on drawn stainless steel sinks from the People's Republic of China (China). These notices incorrectly stated an all-others rate of 8.61 percent.

FOR FURTHER INFORMATION CONTACT: Sarah Keith, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0264.

SUPPLEMENTARY INFORMATION:

Background

On July 25, 2018, Commerce published in the **Federal Register** the *Final Results* of the first CVD sunset review of drawn stainless steel sinks from China.[1] On October 20, 2023, Commerce published in the **Federal Register** the *Final Results* of the second CVD sunset review of drawn stainless steel sinks from China.[2] We incorrectly stated in both notices that the all-others rate is 8.61 percent.

Correction

In the **Federal Register** of July 25, 2018, in FR Doc 2018–15883 on page 35213, in the first column, correct the final line of the ''Net subsidy rate %'' table (*i.e.,* All Others) to state: ''8.51.''

In the **Federal Register** of October 20, 2023, in FR Doc 2023–23269 on page 72429, in the second column, correct the final line of the ''Subsidy rate (percent *ad valorem*)'' table (*i.e.,* All Others) to state: ''8.51.''

[1] *See Drawn Stainless Steel Sinks From the People's Republic of China: Final Results of the Expedited First Sunset Review of the Countervailing Duty Order,* 83 FR 35212 (July 25, 2018).

[2] *See Drawn Stainless Steel Sinks From the People's Republic of China: Final Results of the Expedited Second Sunset Review of the Countervailing Duty Order,* 88 FR 72428 (October 20, 2023).

Notification to Interested Parties

This notice is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Tariff Act of 1930, as amended, and 19 CFR 351. 221(b)(4).

Dated: October 1, 2026.

Scot Fullerton,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

[C–489–834]

Large Diameter Welded Pipe From the Republic of Türkiye: Final Results of Countervailing Duty Administrative Review; 2024

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines countervailable subsidies were provided to HDM Çelik Boru Sanayi Ve Ticaret A.S. (HDM Çelik), a producer/exporter of large diameter welded pipe (welded pipe) from the Republic of Türkiye (Türkiye) during the period of review, January 1, 2024, through December 31, 2024.

DATES: Applicable October 6, 2026.

FOR FURTHER INFORMATION CONTACT: Maria Papakostas, AD/CVD Operations, Office IX, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0086.

SUPPLEMENTARY INFORMATION:

Background

On June 4, 2026, Commerce published the *Preliminary Results* and invited comments from interested parties.[1] No interested party submitted comments on the *Preliminary Results.* Accordingly, the final results remain unchanged from the *Preliminary Results,* except as noted below, and there is no decision memorandum accompanying this notice. Commerce conducted this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of the Order [2]

The merchandise covered by the *Order* is welded pipe from Türkiye. For a complete description of the scope of the *Order, see* the *Preliminary Results* PDM.

Changes Since the Preliminary Results

We revised our calculations for HDM Çelik to incorporate the minor corrections from HDM Çelik's verification.[3]

Final Results of Review

We determine that, for the period, January 1, 2024, through December 31, 2024, the following total net countervailable subsidy rate exists:

Company	Subsidy rate (percent *ad valorem*)
HDM Çelik Boru Sanayi Ve Ticaret A.S.[4]	3.34 [5]

Disclosure

Commerce intends to disclose its calculations performed in connection with the final results of review to interested parties within five days of public announcement or, if there is no public announcement, within five days of the date of publication of the notice of final results in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Assessment Rates

Pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.212(b)(2), Commerce has determined, and U.S. Customs and Border Protection (CBP) shall assess, countervailing duties on all appropriate entries of subject merchandise in accordance with the final results of this review. For HDM Çelik, we intend to instruct CBP to assess countervailing duties at the *ad valorem* subsidy rate listed in the table above. Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Rates

Pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.107(e), Commerce intends to instruct CBP to collect cash deposits of estimated countervailing duties with regard to shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this review, as follows: (1) the cash deposit rate for the company listed above will be equal to the company-specific estimated individual countervailable subsidy rates determined in the final results of this review, except if the rate is less than 0.50 percent and, therefore, *de minimis* within the meaning of 19 CFR 351.106(c)(1), in which case the cash deposit rate will be zero; (2) if both the producer and exporter of the subject merchandise have company-specific estimated subsidy rates assigned, and their rates differ, then the applicable cash deposit rate will be the higher of these two rates; (3) if either the producer or the exporter, but not both, of the subject merchandise has a company-specific estimated subsidy rate assigned, the applicable cash deposit rate will be that company's company-specific rate; and (4) the cash deposit rate for all other producers and exporters will continue to be 3.72 percent, the all-others subsidy rate established in the investigation.[6] These cash deposit instructions, when imposed, shall remain in effect until further notice.

Administrative Protective Order (APO)

This notice serves as the only reminder to parties subject to an APO of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

[2] *See Initiation of Antidumping and Countervailing Duty Administrative Reviews,* 90 FR 26967 (June 25, 2025); *see also Large Diameter Welded Pipe from the Republic of Turkey: Countervailing Duty Order,* 84 FR 18771 (May 2, 2019) (*Order*).

[3] *See* Memorandum, ''Verification of the Questionnaire Responses of HDM Çelik Boru Sanayi ve Ticaret A.S.,'' dated September 15, 2026; *see also* Memorandum, ''Final Results Calculation for HDM Çelik Boru Sanayi Ve Ticaret A.S.,'' dated concurrently with this memorandum (HDM Çelik's Final Calculation Memorandum).

[4] This rate also applies to HDM Spiral Kaynakli Çelik Boru A.S., the English name of which is HDM Spirally Welded Steel Pipe Inc.

[5] This subsidy rate calculated for HDM Çelik includes export subsidies of 0.61 percent. *See* HDM Çelik's Final Calculation Memorandum at 2.

[6] *See Order.*

Notification to Interested Parties

These final results are issued and published in accordance with sections 751(a)(1) and 777(i) of the Act, and 19 CFR 351.221(b)(5).

Dated: October 1, 2026.

Scot Fullerton,

Circular Welded Carbon-Quality Steel Pipe From the United Arab Emirates: Final Results of Antidumping Duty Administrative Review; 2023–2024

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that producers/exporters subject to this review made sales of subject merchandise at less than normal value (NV) during the period of review (POR), December 1, 2023, through November 30, 2024.

DATES: Applicable October 6, 2026.

FOR FURTHER INFORMATION CONTACT: Rebecca Janz, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2972.

SUPPLEMENTARY INFORMATION:

Background

On June 3, 2026, Commerce published in the **Federal Register** the *Preliminary Results* of this administrative review and invited interested parties to comment.[1] The deadline for these final results is October 1, 2026.

For a complete description of the events since the *Preliminary Results, see* the Issues and Decision Memorandum.[2] The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS), which is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *https://access.trade.gov/frnotices.*

Commerce conducted this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of the Order [3]

The merchandise subject to the *Order* is circular welded carbon-quality steel pipe from the United Arab Emirates. For a complete description of the scope of the *Order, see* the Issues and Decision Memorandum.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs submitted by interested parties are addressed in the Issues and Decision Memorandum and listed in the appendix to this notice.

Changes Since the Preliminary Results

Based on our analysis of the comments received from interested parties regarding the *Preliminary Results,* we made certain changes to the weighted-average dumping margin calculations for THL Tube and Pipe Industries LLC; KHK Scaffolding and Formwork LLC; and Universal Tube and Pipe Industries FZE (collectively, Universal).[4] For a discussion of these changes, *see* the Issues and Decision Memorandum.

Rates for the Non-Individually Examined Companies

The Act does not address the establishment of a rate to be applied to companies not selected for individual examination when Commerce limits its examination in an administrative review pursuant to section 777A(c)(2) of the Act. However, 19 CFR 351.109(g) states that Commerce will determine the rate for non-selected companies by applying the methodology set forth in 19 CFR 351.109(f)(1)–(2), which generally parallels the methodology for determining the all-others rate in an investigation under section 735(c)(5) of the Act. Under 19 CFR 351.109(f)(1) and section 735(c)(5)(A) of the Act, the all-others rate is normally ''an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely {on the basis of facts available}.''

In this administrative review, we calculated weighted-average dumping margins for the individually investigated respondents, Conares Metal Supply Limited (Conares) and Universal, that are not zero, *de minimis,* or based entirely on facts otherwise available. Accordingly, we are assigning to the companies under review that were not selected for individual examination a weighted-average dumping margin equal to the weighted average of the estimated weighted-average dumping margins calculated for Conares and Universal, weighted by the mandatory respondents' publicly ranged total sales values, consistent with the guidance in section 735(c)(5)(A) of the Act.[5]

Final Results of Review

Commerce determines that the following estimated weighted-average dumping margins exist for the period December 1, 2023, through November 30, 2024:

[1] *See Circular Welded Carbon-Quality Steel Pipe from the United Arab Emirates: Preliminary Results of Antidumping Duty Administrative Review; 2023–2024,* 91 FR 33142 (June 3, 2026) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum.

[2] *See* Memorandum, ''Issues and Decision Memorandum for the Final Results of the Administrative Review of the Antidumping Duty Order on Circular Welded Carbon-Quality Steel Pipe from United Arab Emirates; 2023–2024,'' dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

[3] *See Circular Welded Carbon-Quality Steel Pipe from the Sultanate of Oman, Pakistan, and the United Arab Emirates: Amended Final Affirmative Antidumping Duty Determination and Antidumping Duty Orders,* 81 FR 91906 (December 19, 2016) (*Order*).

[4] *See* Issues and Decision Memorandum.

[5] With two respondents under examination, Commerce normally calculates: (A) a weighted-average of the dumping margins calculated for the examined respondents; (B) a simple average of the dumping margins calculated for the examined respondents; and (C) a weighted-average of the dumping margins calculated for the examined respondents using each company's publicly ranged U.S. sale quantities for the merchandise under consideration. Commerce then compares (B) and (C) to (A) and selects the rate closest to (A) as the most appropriate rate for all other producers and exporters. *See, e.g., Ball Bearings and Parts Thereof from France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed-Circumstances Review, and Revocation of an Order in Part,* 75 FR 53661, 53663 (September 1, 2010); *see also* Memorandum, ''Calculation of the Preliminary Weighted-Average Dumping Margin for the Companies Not Selected for Individual Examination,'' dated concurrently with this notice.

Producer/exporter	Weighted-average dumping margin (percent)
Conares Metal Supply Limited	3.15
THL Tube and Pipe Industries LLC; KHK Scaffolding and Formwork LLC; Universal Tube and Pipe Industries FZE	5.11
Ajmal Steel Tubes & Pipes Ind. L.L.C.–Branch–1; Ajmal Steel Tubes & Pipes Ind. L.L.C	4.68
K.D. Industries Inc	4.68
TSI Metal Industries L.L.C	4.68

Disclosure

Commerce intends to disclose the calculations and analysis performed in connection with the final results of this administrative review to interested parties within five days of any public announcement or, if there is no public announcement, within five days of the publication date of this notice in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Assessment Rates

Pursuant to section 751(a)(2)(C) of the Act, and 19 CFR 351.212(b)(1), Commerce has determined, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the final results of this review.

Pursuant to 19 CFR 351.212(b)(1), because Conares and Universal reported the entered value of their U.S. sales, we calculated importer-specific *ad valorem* antidumping duty assessment rates on the basis of the ratio of the total amount of dumping calculated for an importer's examined sales to the total entered value of those sales. Where either the respondent's weighted-average dumping margin is zero or *de minimis,* within the meaning of 19 CFR 351.106(c)(1), or an importer-specific rate is zero or *de minimis,* we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties.[6]

In accordance with Commerce's ''automatic assessment'' practice, for entries of subject merchandise during the POR produced by Conares or Universal for which the company did not know that the merchandise was destined for the United States, we will instruct CBP to liquidate those entries at the all-others rate calculated in the less-than-fair-value (LTFV) investigation if there is no rate for the intermediate company(ies) involved in the transaction.[7]

For the companies listed above of that were not selected for individual examination, we will instruct CBP to assess antidumping duties on all appropriate entries at the review-specific rate, calculated as noted in the ''Rate for Non-Individually Examined Companies'' section, above.[8]

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for the companies listed above will be equal to the weighted-average dumping margin established in the final results of this review; (2) for previously investigated or reviewed companies not listed above, the cash deposit will continue to be the company-specific rate published for the most recently completed segment of this proceeding in which the company participated; (3) if the exporter is not a firm covered in this review, a prior review, or the LTFV investigation, but the producer is, the cash deposit rate will be the rate established for the most recent segment for the manufacturer of the merchandise; and (4) the cash deposit rate for all other producers or exporters will continue to be 5.95 percent, the all-others rate established in the LTFV investigation.[9] These deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Administrative Protective Order (APO)

This notice serves as the only reminder to parties subject to an APO of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

Notification to Interested Parties

We are issuing and publishing this notice in accordance with sections 751(a)(1) and 777(i) of the Act, and 19 CFR 351.221(b)(5).

Dated: October 1, 2026.

Scot Fullerton,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Certain Frozen Warmwater Shrimp From Thailand: Final Results of Antidumping Duty Administrative Review and Final Determination of No Shipments; 2024–2025

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that certain producers/exporters subject to this administrative review made sales of certain frozen warmwater shrimp (shrimp) from Thailand at less than normal value during the period of review (POR), February 1, 2024, through January 31, 2025.

DATES: Applicable October 6, 2026.

FOR FURTHER INFORMATION CONTACT: Gregory Taushani, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–1012.

SUPPLEMENTARY INFORMATION:

Background

On May 14, 2026, Commerce published the *Preliminary Results* in the **Federal Register**, and invited interested parties to comment.[1] Commerce made no changes from the *Preliminary Results,* which are herein adopted as the final results of review. On September 8, 2026, Commerce extended the deadline for these final results to October 1, 2026.[2]

For a complete description of the events that occurred since Commerce published the *Preliminary Results, see* the Issues and Decision Memorandum.[3] Commerce conducted this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of the Order [4]

The merchandise covered by the *Order* is frozen warmwater shrimp from Thailand. For a complete description of the scope of the *Order, see* the Issues and Decision Memorandum.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs submitted by interested parties in this review are addressed in the Issues and Decision Memorandum and are listed in Appendix I to this notice. Additionally, a full discussion of the issues raised by parties for these final results are discussed in the Issues and Decision Memorandum. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS), which is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed at *https://access.trade.gov/frnotices.*

Changes Since the Preliminary Results

Based on a review of the record and comments received from interested parties regarding our *Preliminary Results,* and for the reasons explained in the Issues and Decision Memorandum, Commerce made no changes to the weighted-average dumping margin calculations for Thai Union Group Public Co., Ltd. (Thai Union),[5] Thai Royal Frozen Food Co., Ltd. (Thai Royal), and the non-selected companies.[6]

Determination of No Shipments

In the *Preliminary Results,* we determined that the Rubicon Group,[7] Marine Gold Products Ltd. (Marine Gold); and Thai Union Manufacturing Company Limited (Thai Union Manufacturing) had no shipments during the POR.[8] Following publication of the *Preliminary Results,* we received no comments from interested parties with respect to our determination. Therefore, for the final results, we continue to find that the Rubicon Group, Marine Gold, and Thai Union Manufacturing had no shipments of subject merchandise to the United States during the POR and we will issue appropriate instructions to U.S. Customs and Border Protection (CBP) based on the final results.

Rate for Non-Selected Companies

The Act does not address the establishment of a rate to apply to companies not selected for individual examination when Commerce limits its examination in an administrative review pursuant to section 777A(c)(2) of the Act. However, Commerce's regulation at 19 CFR 351.109(g) states that Commerce will determine the rate for non-selected companies by following the process set forth in 19 CFR 351.109(f)(1)–(2), which generally parallels the process for determining the all-others rate in an investigation under section 735(c)(5) of the Act. Section 735(c)(5)(A) of the Act and 19 CFR 351.109(f) state that for companies not investigated, in general, we will determine an all-others rate by weight averaging the antidumping duty rates established for each of the companies individually investigated, excluding zero and de *minimis* rates or any rates based entirely on facts available. Where the estimated weighted-average dumping margin for each of the individually examined companies is zero, *de minimis,* or based entirely on facts available, section 735(c)(5)(B) of the Act provides that Commerce may use ''any reasonable method to establish the estimated all-

[1] *See Certain Frozen Warmwater Shrimp from Thailand: Preliminary Results of Antidumping Duty Administrative Review; Rescission of Review, in Part, and Preliminary Determination of No Shipments; 2024–2025,* 91 FR 27255 (May 14, 2026) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum (PDM).

[2] *See* Memorandum, ''Extension of Deadline for Final Results of the 2024–25 Antidumping Duty Administrative Review,'' dated September 8, 2026.

[3] *See* Memorandum, ''Issues and Decision Memorandum for the Final Results of the Administrative Review of the Antidumping Duty Order on Certain Frozen Warmwater Shrimp from Thailand; 2024–2025,'' dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

[4] *See Notice of Amended Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order: Certain Frozen Warmwater Shrimp from Thailand,* 70 FR5145 (February 1, 2005) (*Order*).

[5] In the 2012–2013 administrative review, Commerce found that the following companies comprised a single entity: Thai Union Frozen Products Public Co. Ltd.; Thai Union Seafood Co., Ltd.; Pakfood Public Company Limited; Asia Pacific (Thailand) Co., Ltd; Chaophraya Cold Storage Co., Ltd.; Okeanos Co., Ltd; Okeanos Food Co., Ltd.; Takzin Samut Co., Ltd. *See Certain Frozen Warmwater Shrimp from Thailand: Final Results of Antidumping Duty Administrative Review, Final Determination of No Shipments, and Partial Rescission of Review; 2012–2013,* 79 FR 51306 (August 28, 2014) (*Shrimp from Thailand 2012–2013*). Further, on January 5, 2016, Commerce found that Thai Union Group Public Co., Ltd. is the successor-in-interest to Thai Union Frozen Products Public Co., Ltd. *See Notice of Final Results of Antidumping Changed Circumstances Review: Certain Frozen Warmwater Shrimp from Thailand,* 81 FR 222 (January 5, 2016). Therefore, absent information to the contrary, we are treating these companies as a single entity for the purposes of this administrative review.

[6] *See* Issues and Decision Memorandum.

[7] The Rubicon Group is a single entity comprised of the following companies: Andaman Seafood; Chanthaburi Seafoods Co., Ltd.; Chanthaburi Frozen Food Co., Ltd.; Phatthana Seafood Co., Ltd.; Thai International Seafood Co., Ltd.; Thailand Fishery Cold Storage Public Co., Ltd.; Wales & Company Universe Ltd.; S.C.C. Frozen Seafood Co., Ltd.; Intersia Foods Co., Ltd.; Phatthana Frozen Food Co., Ltd., and Sea Wealth Frozen Food Co, Ltd.

[8] *See Preliminary Results,* 91 FR at 27256.

others rate for exporters and producers not individually investigated, including averaging the estimated weighted-average dumping margins determined for the exporters and producers individually investigated.''

In this review, we calculated estimated weighted-average dumping margins of zero percent for Thai Royal and 1.76 percent for Thai Union. Section 735(c)(5)(A) of the Act states that ''{t}he estimated all-others rate shall be an amount equal to the weighted average of the estimated weighted average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776.'' Consistent with section 735(c)(5)(A) of the Act, we assigned the companies not selected for individual examination in this review a weighted-average dumping margin based on the rate of 1.76 percent calculated for Thai Union. The companies not selected for individual examination are listed in Appendix II.

Final Results of Administrative Review

We determine that the following estimated weighted-average dumping margins exist for the period February 1, 2024, through January 31, 2025:

Exporter/producer	Weighted-average dumping margin (percent)
Thai Union Group Public Co., Ltd.; Thai Union Seafood Co., Ltd.; Pakfood Public Company Limited; Asia Pacific (Thailand) Co. Ltd.; Chaophraya Cold Storage Co., Ltd.; Takzin Samut Co., Ltd	1.76
Thai Royal Frozen Foods Co., Ltd	0.00
Review-Specific Rate for Non-Examined Companies[9]	1.76

Disclosure

Normally, Commerce discloses to interested parties the calculations of the final results of an administrative review within five days of a public announcement or, if there is no public announcement, within five days of the date of publication of the final results in the **Federal Register**, in accordance with 19 CFR 351.224(b). However, because we have made no changes from the *Preliminary Results,* there are no calculations to disclose.[10]

Assessment Rates

Pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.212(b)(1), Commerce has determined, and CBP shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the final results of this review.

Pursuant to 19 CFR 351.212(b)(1), we calculated importer-specific *ad valorem* duty assessment rates based on the ratio of the total amount of dumping calculated for each importer's examined sales and the total entered value of those sales. Where either the respondent's weighted-average dumping margin is zero or *de minimis* within the meaning of 19 CFR 351.106(c)(1), or an importer-specific assessment rate is *de minimis* (*i.e.,* less than 0.5 percent), we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties. The final results of this review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the final results of this review and for future deposits of estimated duties, where applicable.[11]

Commerce's ''automatic assessment'' will apply to entries of subject merchandise during the POR produced or exported by Thai Royal and Thai Union for which it did not know that its merchandise they sold to the intermediary (*e.g.,* a reseller, trading company or exporter) was destined for the United States. In such instances, we will instruct CBP to liquidate the unreviewed entries at the all-others rate of 5.34 percent *ad valorem* made effective by the *Section 129 Determination,*[12] if there is no rate for the intermediate company(ies) involved in the transaction.

For the companies listed in Appendix II which were not selected for individual review, we will assign an assessment rate based on the review-specific rate, calculated as noted in the ''Rate for the Non-Selected Companies'' section above.

Commerce intends to issue assessment instructions to CBP regarding Thai Royal, Thai Union, the no shipment companies (the Rubicon Group, Marine Gold, and Thai Union Manufacturing), and the companies listed in Appendix II no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective for all shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review in the **Federal Register**, as provided for by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for companies subject to this review will be the rates established in these final results of the review; (2) for merchandise exported by producers or exporters not covered in this review but covered in a prior segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding; (3) if the exporter is not a firm covered in this review, a prior review, or the original investigation but the producer is, then the cash deposit rate will be the rate established for the most recently-completed segment of this proceeding for the producer of the subject merchandise; and (4) the cash deposit rate for all other producers or exporters will continue to be 5.34 percent, the all-others rate established in the *Section 129 Determination.*[13] These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this POR. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties has occurred and the subsequent assessment of double antidumping duties.

Notification Regarding Administrative Protective Order (APO)

This notice also serves as a final reminder to parties subject to an APO of their responsibility concerning the return or destruction of proprietary information disclosed under APO in

Patent and Trademark Office

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Patent and Trademark Resource Center Metrics

AGENCY: United States Patent and Trademark Office, Department of Commerce.

ACTION: Notice of information collection; request for comments.

SUMMARY: The United States Patent and Trademark Office (hereafter ''USPTO'' or ''Agency''), as required by the Paperwork Reduction Act of 1995, invites comments on the extension and revision of an existing information collection: 0651–0068 (Patent and Trademark Resource Center Metrics). The purpose of this notice is to allow 60 days for public comments prior to submission of the information collection to the Office of Management and Budget (OMB).

DATES: To ensure consideration, you must submit comments regarding this information collection on or before December 7, 2026.

ADDRESSES: Interested persons are invited to submit written comments by any of the following methods. Do not submit Confidential Business Information or otherwise sensitive or protected information.

- *Email: InformationCollection@uspto.gov.* Include ''0651–0068 comment'' in the subject line of the message.
- *Federal eRulemaking Portal: https://www.regulations.gov.*
- *Mail:* Justin Isaac, Office of the Chief Administrative Officer, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450.
- *Telephone:* Johnna Childs, Librarian, Patent and Trademark Resource Center Program, 571–270–3793.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Johnna Childs at: Patent and Trademark Resource Center Program, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450; 571–270–3793; or *Johnna.Childs@uspto.gov* with ''0651–0068 comment'' in the subject line. Additional information about this information collection is also available at *https://www.reginfo.gov* under ''Information Collection Review.''

SUPPLEMENTARY INFORMATION:

I. Abstract

The Patent and Trademark Resource Center (PTRC) Program is authorized under the provision of 35 U.S.C. 2(a)(2), which provides that the United States Patent and Trademark Office (USPTO) shall be responsible for disseminating information with respect to patents and trademarks to the public. The PTRC Program is comprised of public, state, and academic libraries. Each participating library designated as a PTRC must fulfill the following requirements: assist the public in the efficient use of patent and trademark resources; provide free access to patent and trademark resources provided by the USPTO; and send representatives to attend USPTO-hosted PTRC training seminars.

The USPTO collects information about the public's use of the PTRCs and training provided through the PTRC program. The PTRC Program requirements stipulate that all participating libraries must submit quarterly metrics for the public's use of PTRC services and public outreach efforts provided by the PTRCs. To facilitate that requirement, the USPTO electronically collects these metrics on a quarterly basis. This information collection enables the USPTO to see how stakeholders are being served by the PTRCs and to ascertain what changes may be needed in the types of services provided. These metrics also provide the PTRC Program Office with insight into the trainings it should offer to PTRC librarians.

II. Method of Collection

Items in this information collection must be submitted as electronic submissions.

III. Data

OMB Control Number: 0651–0068.

Forms:

- PTO–8601 (PTRC Metric Worksheet)

Type of Review: Extension and revision of a currently approved information collection.

Affected Public: State, local, and tribal governments.

Respondent's Obligation: Mandatory.

Frequency: Quarterly.

Estimated Number of Annual Respondents: 150 respondents.

Estimated Number of Annual Responses: 600 responses.

Estimated Time per Response: The USPTO estimates that the responses in this information collection will take the public approximately 30 minutes (0.50 hours) to complete. This includes the time to gather the necessary

information, create the document, and submit the completed item to the USPTO.

Estimated Total Annual Respondent Burden Hours: 300 hours.

Estimated Total Annual Respondent Hourly Cost Burden: $12,186.

TABLE 1—TOTAL REPORTING BURDEN HOURS AND HOURLY COSTS TO STATE, LOCAL, AND TRIBAL GOVERNMENT RESPONDENTS

Item no.	Item	Estimated annual respondents (a)	Responses per respondent (b)	Estimated annual responses (a) × (b) = (c)	Estimated time for response (hours) (d)	Estimated burden (hour/year) (c) × (d) = (e)	[1] Rate ($/hour) (f)	Estimated annual respondent cost burden (e) × (f) = (g)
1	PTRC Metric Worksheet. PTO–8601	150	4	600	0.50 ..... (30 minutes)	300	$40.62	$12,186
.....	Totals	150	.....	600	.....	300	.....	$12,186

[1] The USPTO uses the Bureau of Labor Statistics (BLS) Occupation Employment Statistics wage category 25–4022 (Librarians and Media Collections Specialists) to represent an estimated wage of respondents. The USPTO estimates that the hourly wage rate will be in the 75th percentile, as respondents will likely be living in metropolitan areas; *https://data.bls.gov/oesprofile/?major_group=250000&occupation=254022&measure=01&areas=INDUSTRY,STATE,MSA.*

Estimated Total Annual Respondent Non-hourly Cost Burden: $0. There are no capital start-up costs, maintenance costs, recordkeeping costs, filing fees, or postage costs associated with this information collection.

IV. Request for Comments

The USPTO is soliciting public comments to:

(a) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected; and

(d) Minimize the burden of the collection of information on those who are to respond, including through the use of automated collection techniques or other forms of information technology.

All comments submitted in response to this notice are a matter of public record. The USPTO will include or summarize each comment in the request to OMB to approve this information collection. Before including an address, phone number, email address, or other personally identifiable information (PII) in a comment, be advised that the entire comment—including PII—may be made publicly available at any time. While one may request in a comment to withhold PII from public view, the USPTO cannot guarantee that it will be able to do so.

Justin Isaac,

Information Collections Officer, Office of the Chief Administrative Officer, United States Patent and Trademark Office.

- *Telephone:* Kortney Hammonds, 571–272–1626.

SUPPLEMENTARY INFORMATION:

Title: Global Intellectual Property Academy (GIPA) Surveys.

OMB Control Number: 0651–0065.

Abstract: The Global Intellectual Property Academy (GIPA) was established in 2006 and is a critical resource of the United States Patent and Trademark Office (USPTO) for encouraging the development of effective and balanced intellectual property (IP) systems around the world. Through targeted international technical assistance activities, GIPA helps to promote both domestic and international IP rights. GIPA's activities cover every aspect of intellectual property law and policy, including patents, trademarks, copyrights, trade secrets, commercialization, and enforcement. By participating in GIPA courses, foreign government officials learn about global intellectual property rights protection and enforcement and

discuss strategies to handle the protection and enforcement issues in their respective countries. GIPA is an important tool the USPTO uses to achieve its objective of halting intellectual property theft and advancing intellectual property right policies.

The surveys in this information collection are conducted to measure the effectiveness of each activity or intervention. Specifically, the GIPA surveys help to demonstrate the impact of the specific activity on each participant's work and the relevance of each activity to the country's efforts to improve systems for protecting and enforcing IP rights. The survey information is then used to further tailor and improve future interventions. The data captured is also used to help meet organizational performance and accountability goals through the following legislative mandates and performance:

- Government Performance and Results Act of 1993; [1]
- Government Performance and Results Modernization Act of 2010 (GPRMA); [2]
- President's Management Agenda (PMA); [3] and
- Foundations for Evidence-Based Policy Making Act of 2018.[4]

Evaluations and measurement efforts provide methodologically rigorous data activity and analyses in lieu of more subjective, ad hoc, non-standardized anecdotal material.

These voluntary surveys support various business goals developed by the USPTO to fulfill customer service and performance goals; to assist the USPTO in strategic planning for future initiatives; to verify existing service standards, and to establish new ones. The USPTO also uses these surveys to implement Executive Order 12862 of September 11, 1993, *Setting Customer Service Standards,* published in the **Federal Register** on September 14, 1993 (58 FR 48257).[5]

Forms: None.

Type of Review: Extension and revision of a currently approved information collection.

Affected Public: Indivdiuals or households.

Respondent's Obligation: Voluntary.

Frequency: On occasion.

Estimated Number of Annual Respondents: 14,508 respondents.

Estimated Number of Annual Responses: 14,508 responses.

Estimated Time per Response: The USPTO estimates that the responses in this information collection will take the public approximately 15 minutes (0.25 hours) to complete. This includes the time to gather the necessary information, create the document, and submit the completed item to the USPTO.

Estimated Total Annual Respondent Burden Hours: 3,627 hours.

Estimated Total Annual Respondent Non-hourly Cost Burden: $0.

Justin Isaac,

Information Collections Officer, Office of the Chief Administrative Officer, United States Patent and Trademark Office.

COMMODITY FUTURES TRADING COMMISSION

Agency Information Collection Activities Under OMB Review

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (''PRA''), this notice announces that the Information Collection Request (''ICR'') abstracted below has been forwarded to the Office of Information and Regulatory Affairs (''OIRA''), of the Office of Management and Budget (''OMB''), for review and comment. The ICR describes the nature of the information collection and its expected costs and burden.

DATES: Comments must be submitted on or before November 5, 2026.

ADDRESSES: Written comments and recommendations for the proposed information collection should be submitted within 30 days of this notice's publication to OIRA, at *https://www.reginfo.gov/public/do/PRAMain.* Please find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the website's search function. Comments can be entered electronically by clicking on the ''comment'' button next to the information collection on the ''OIRA Information Collections Under Review'' page, or the ''View ICR—Agency Submission'' page. A copy of the supporting statement for the collection of information discussed herein may be obtained by visiting *https://www.reginfo.gov/public/do/PRAMain.*

In addition to the submission of comments to *https://Reginfo.gov* as indicated above, a copy of all comments submitted to OIRA may also be submitted to the Commodity Futures Trading Commission (the ''Commission'' or ''CFTC'') by any of the following methods:

- *Regulations.gov:* Go to *https://www.regulations.gov* and press the ''Search'' button, then proceed as follows:

1. Under Refine Documents Results—check the box to ''Only show documents open for comment'';

2. Under Agency—select ''See More'' and check the box for ''Commodity Futures Trading Commission,'' then press the Apply button;

3. Identify this notice in the list of CFTC documents open for comment, press the ''Comment'' button to open the submission form, and follow the instructions on the form.

Alternatively, if you are viewing this notice on *www.federalregister.gov,* click the ''Submit A Public Comment'' button at the top of the page to open the comment form. Follow the instructions on the form to submit your comment to *Regulations.gov.*

- *Mail:* Send to—Christopher Kirkpatrick, Secretary of the Commission, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW, Washington, DC 20581.
- *Hand Delivery/Courier:* Address to—CFTC Comment Submission, Attn: Christopher Kirkpatrick, Secretary of the Commission, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW, Washington, DC 20581.

Please submit your comments using only one of these methods. To avoid possible delays with mail or in-person deliveries, submissions through *Regulations.gov* are encouraged.

All comments must be submitted in English, or if not, accompanied by an English translation. Do not include in your comment text or attachments any personal identifying information or business information that you do not want published online. Comments (regardless of submission method) will be published without review for, and without removal of, any personal identifying information or information your business may consider confidential.

If you wish to submit confidential information for the Commission's consideration, please contact the CFTC personnel listed in this Notice under **FOR FURTHER INFORMATION CONTACT**

before making any submission. Please also carefully review the Commission's procedures in 17 CFR 145.9 for requesting confidential treatment under the Freedom of Information Act (FOIA) of information submitted to the Commission.

The CFTC reserves the right, but shall have no obligation, to review, pre-screen, filter, or redact all or any part of your comment submission. The CFTC also reserves the right, without further notification, to refuse to publish or to remove from public view all or any part of your submission to the extent it contains content inappropriate for publication in a comment file, such as—without limitation—obscene language, threats of violence, solicitations for commercial sales or illegal activity, or obvious spam. If a submission that is refused for or withdrawn from publication because of inappropriate content also contains comments on the merits of this notice, such submission will be retained in the record for the matter and will be considered as required under the Administrative Procedure Act, the Paperwork Reduction Act, and other applicable laws, and may be accessible under the FOIA.

FOR FURTHER INFORMATION CONTACT: Paul Chaffin, Special Counsel, Division of Market Oversight, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW, Washington, DC 20581 (202) 418–5185; email: *pchaffin@cftc.gov,* and refer to OMB Control No. 3038–0096.

SUPPLEMENTARY INFORMATION:

Title: Swap Data Recordkeeping and Reporting Requirements (OMB Control No. 3038–0096). This is a request for revision of a currently approved information collection.

Abstract: The collection of information is needed to ensure that the CFTC and other regulators have access to swap data as required by the Commodity Exchange Act, as amended by the Dodd-Frank Wall Street Reform and Consumer Protection Act (''Dodd-Frank Act''). The Dodd-Frank Act directed the CFTC to adopt rules providing for the reporting of data relating to swaps. In 2012, the CFTC adopted part 45, which imposes recordkeeping and reporting requirements relating to swaps. In 2020, a final rule adopting modifications to part 45 was adopted by the Commission.[1]

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. On June 16, 2026, the Commission published in the **Federal Register** notice of the proposed revision of this information collection and provided 60 days for public comment on the proposed revision, 91 FR 36122 (''60-Day Notice''). The Commission received two comments that addressed its PRA burden estimates. First, a commenter asserted that the Commission's burden estimates are inaccurate because those estimates are premised on the assumption that reported data are truthful which, according to the commenter, they are not.[2] A second commenter purports to examine evidence provided in the first comment letter and asserts, based on that examination, that swap data lacks practical utility.[3] However, neither comment letter provides any information to demonstrate any swap data are inaccurate. The second commenter also questions the Commission's capital costs estimate and operating and maintenance costs estimate, and asserts that the Commission underestimates average annual burden hours. However, that commenter did not provide any analysis to support these assertions or provide any alternative estimates. Accordingly, the Commission has chosen to maintain the updated estimates described in the 60-Day Notice.

Burden Statement: Part 45 of the Commission's regulations establishes swap reporting and recordkeeping requirements for swap execution facilities (''SEFs''), designated contract markets (''DCMs''), swap data repositories (''SDRs''), derivatives clearing organizations (''DCOs''), swap dealers (''SDs''), major swap participants (''MSPs''), and non-SD/MSP/DCO counterparties (''non-SD/MSP counterparties''). The Commission estimates the burden of the collection of information as set out below.

Respondents/Affected Entities: Swap Dealers, Major Swap Participants, SEFs, DCMs, DCOs, and other counterparties to a swap transaction (*i.e.,* end-user, non-SD/non-MSP counterparties).

Estimated number of respondents: 1,732.

Estimated average burden hours per respondent: 839 hours (rounded).

Estimated total annual burden hours on respondents: 1,452,730 hours.

Frequency of collection: Ongoing.

There are no capital costs or operating and maintenance costs associated with this collection.

(Authority: 44 U.S.C. 3501 *et seq.*)

Dated: October 2, 2026.

Robert Sidman,

Deputy Secretary of the Commission.

DEPARTMENT OF ENERGY

[Docket No. 26–127–LNG]

Freedom LNG LLC; Application for Long-Term, Multi-Contract Authorization To Export U.S.-Sourced Natural Gas to Mexico and To Re-Export Liquefied Natural Gas From Mexico to Non-Free Trade Agreement Countries

AGENCY: Hydrocarbons and Geothermal Energy Office, Department of Energy.

ACTION: Notice of application.

SUMMARY: The Hydrocarbons and Geothermal Energy Office (HGEO) of the Department of Energy (DOE) gives notice (Notice) of receipt of an application (Application), filed by Freedom LNG LLC (Freedom LNG) on September 11, 2026. Freedom LNG requests long-term, multi-contract authorization to export U.S.-sourced natural gas by pipeline to Mexico in a volume up to approximately 343 billion cubic feet (Bcf) per year (Bcf/yr), and to re-export 307 Bcf/yr of this natural gas as liquefied natural gas (LNG). Freedom LNG seeks to re-export this LNG by vessel from its proposed LNG production, storage, and export facility, the BRAVO LNG Project (Project), to be located nearshore the Port of Matamoros in the State of Tamaulipas, Mexico, on the Gulf Coast. Freedom LNG filed the Application under the Natural Gas Act (NGA).

DATES: Protests, motions to intervene, or notices of intervention, as applicable, and written comments are to be filed electronically as detailed in the Public Comment Procedures section no later than 4:30 p.m., Eastern Time, December 7, 2026.

ADDRESSES:

Electronic Filing by Email (Strongly Encouraged): fergas@hq.doe.gov.

Postal Mail, Hand Delivery, or Private Delivery Services (*e.g.,* FedEx, UPS, etc.), U.S. Department of Energy (EX–31), Office of Global Energy Security, Hydrocarbons and Geothermal Energy Office, Forrestal Building, Room 3E–056, 1000 Independence Avenue SW, Washington, DC 20585.

Due to potential delays in DOE's receipt and processing of mail sent through the U.S. Postal Service, we

encourage respondents to submit filings electronically to ensure timely receipt.

FOR FURTHER INFORMATION CONTACT:
Jennifer Wade or Peri Ulrey, U.S. Department of Energy (EX–31) Office of Global Energy Security, Office of Strategic Resources, Hydrocarbons and Geothermal Energy Office, Forrestal Building, Room 3E–042, 1000 Independence Avenue SW, Washington, DC 20585, (202) 586–4749 or (202) 586–7893, *jennifer.wade@hq.doe.gov* or *peri.ulrey@hq.doe.gov.*
Cassandra Bernstein, U.S. Department of Energy (GC–76), Office of the Assistant General Counsel for Energy Delivery and Resilience, Forrestal Building, Room 6D–033, 1000 Independence Avenue SW, Washington, DC 20585, (240) 780–1691, *cassandra.bernstein@hq.doe.gov*

SUPPLEMENTARY INFORMATION: Freedom LNG states that it is filing the Application in connection with the development of the BRAVO LNG Project, which will be located nearshore within the port (land and marine) concessions allocated to the Port of Matamoros in the State of Tamaulipas, Mexico. According to Freedom LNG, the Project will be developed in a modular configuration consisting of one liquefaction train with a nominal capacity of approximately 6 million tons per annum of LNG (equivalent to 307 Bcf/day of natural gas). Freedom LNG states that the Project is being developed by its affiliate LNG Alliance Pte. Ltd., a Singapore private limited company. Freedom LNG further states that the Project will be owned and operated by BRAVO LNG S.A. de C.V., which is Freedom LNG's affiliate through common ownership.[1]

Freedom LNG requests long-term authorization to export domestically produced natural gas to Mexico via the existing offshore Sur de Texas-Tuxpan pipeline system to the Project. Freedom LNG seeks authorization to export this natural gas for both consumption in Mexico and to convert the natural gas, as well as U.S.-sourced natural gas volumes for which it acquires title in Mexico, to LNG for re-export to: (i) any nation with which the United States has entered into a free trade agreement (FTA) requiring national treatment for trade in natural gas (FTA nations), and (ii) any other nation with which trade is not prohibited by U.S. law or policy (non-FTA nations). This Notice applies only to the portion of the Application requesting authority to re-export LNG produced from U.S.-sourced natural gas to non-FTA countries pursuant to section 3(a) of the NGA.[2] DOE will review Freedom LNG's request for an FTA export authorization separately pursuant to NGA section 3(c).[3]

Freedom LNG seeks this authorization on its own behalf and as agent for other entities that will hold title to the natural gas or LNG at the point of export or re-export, respectively. Freedom LNG requests authorization for a term of 20 years after commercial exports under the requested authorization begin.

Additional details can be found in Freedom LNG's Application, posted on the DOE website at: *https://www.energy.gov/sites/default/files/2026-09/Freedom%20LNG%20LLC%2010SEP2026%20CV%20and%20Application_REDACTED.pdf.*

DOE Evaluation

In reviewing the Application, DOE will consider any issues required by law or policy under NGA section 3(a), DOE's regulations, and any other documents deemed appropriate.

Parties that may oppose the Application should address these issues and documents in their comments and/or protests, as well as other issues deemed relevant to the Application.

The National Environmental Policy Act (NEPA), 42 U.S.C. 4321 *et seq.,* requires DOE to give appropriate consideration to the environmental effects of its proposed decisions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this Notice, any person may file a protest, comments, or a motion to intervene or notice of intervention, as applicable, addressing the Application. Interested parties will be provided 60 days from the date of publication of this Notice in the **Federal Register** in which to submit comments, protests, motions to intervene, or notices of intervention.

Any person wishing to become a party to this proceeding evaluating the Application must file a motion to intervene or notice of intervention.[4] The filing of comments or a protest with respect to the Application will not serve to make the commenter or protestant a party to this proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the Application. All protests, comments, motions to intervene, or notices of intervention must meet the requirements specified by DOE's regulations in 10 CFR part 590, including the service requirements.

Filings may be submitted using one of the following methods:

(1) Submitting the filing electronically at *fergas@hq.doe.gov;*

(2) Mailing the filing to the Office of Global Energy Security at the address listed in the **ADDRESSES** section; or

(3) Hand delivering the filing to the Office of Global Energy Security at the address listed in the **ADDRESSES** section.

For administrative efficiency, DOE prefers filings to be filed electronically. All filings must include a reference to ''Docket No. 26–127–LNG'' or ''Freedom LNG LLC Application'' in the title line. Filings must be submitted in English to be considered.[5]

For electronic submissions: Please include all related documents and attachments (*e.g.,* exhibits) in the original email correspondence. Please do not include any active hyperlinks or password protection in any of the documents or attachments related to the filing. All electronic filings submitted to DOE must follow these guidelines to ensure that all documents are filed in a timely manner.

The Application, and any filed protests, motions to intervene, notices of intervention, and comments will be available electronically on the DOE website at *www.energy.gov/hgeo/regulation.*

A decisional record on the Application will be developed through responses to this Notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final Order may be issued based on the official record, including the Application and responses filed by parties pursuant to this Notice, in accordance with 10 CFR 590.316.

[1] Specifically, the Project will be owned and operated by BRAVO LNG through its subsidiaries BRAVO FLNG Barge Facility S.A. de C.V., BRAVO LNG Storage S.A. de C.V., BRAVO Maritime Facilities S.A. de C.V., and BRAVO LNG Operations S.A. de C.V., as described in the Application.

[2] 15 U.S.C. 717b(a).

[3] 15 U.S.C. 717b(c).

[4] 10 CFR 590.303.

[5] *See* Executive Order 14224 of March 1, 2025, *Designating English as the Official Language of the United States,* 90 FR 11363 (Mar. 6, 2025).

Signed in Washington, DC, on October 2, 2026.

Amy Sweeney,

Director, Office of Global Energy Security, Office of Strategic Resources.

[FR Doc. 2026–20467 Filed 10–5–26; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Agency Information Collection Revision

AGENCY: U.S. Department of Energy.

ACTION: Notice of request for comments.

SUMMARY: The Department of Energy (DOE), pursuant to the Paperwork Reduction Act of 1995, intends to revise and extend for three years, an information collection request with the Office of Management and Budget (OMB). The information collection requests a three-year revision of its collection, titled State Energy Program, OMB Control Number 1910–5126.

DATES: Comments regarding this proposed information collection must be received on or before November 5, 2026. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, please advise the DOE Desk Officer at OMB of your intention to make a submission as soon as possible. The Desk Officer may be telephoned at (202) 881–9493.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Gregory Davoren, CM–5SCP, U.S. Department of Energy, 1000 Independence Ave. SW, Washington, DC 20585–0121 or by email or telephone at *gregory.davoren@doe.gov,* (202) 287–1706.

SUPPLEMENTARY INFORMATION: Comments are invited on: (a) Whether the extended collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

This information collection request contains:

(1) *OMB No.:* 1910–5126;

(2) *Information Collection Request Titled:* State Energy Program (SEP);

(3) *Type of Review:* Revision of a Currently Approved Collection;

(4) *Purpose:* To collect information on the status of grantee activities related to the SEP Annual Appropriations and SEP funding appropriated under the Infrastructure and Jobs Act (IIJA)—total activities funded with grant funds; expenditures; and results, to ensure that program funds are being used appropriately, effectively, and expeditiously;

(5) *Annual Estimated Number of Respondents:* 56;

(6) *Annual Estimated Number of Total Responses:* 744;

(7) *Annual Estimated Number of Burden Hours:* 12,056;

(8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* $1,002,456.

Statutory Authority: Title 42, Chapter 77, Subchapter III, Part B of the United States Code (U.S.C.), (42 U.S.C. 6321 *et seq.*). All grant awards made under this program shall comply with applicable laws including, but not limited to, the SEP statutory authority (42 U.S.C. 6321 *et seq.*), 10 CFR part 420, and 2 CFR part 200 as amended by 2 CFR part 910.

Signing Authority

This document of the Department of Energy was signed on, by September 30, 2026, Audrey Robertson, Assistant Secretary of Energy, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on October 2, 2026.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

[FR Doc. 2026–20459 Filed 10–5–26; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP26–572–000]

Southern Star Central Gas Pipeline, Inc.; Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Evergy McNew Power Plant Delivery Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental document that will discuss the environmental impacts of the Evergy McNew Power Plant Delivery Project involving construction and operation of facilities by Southern Star Central Gas Pipeline, Inc. (Southern Star) in Reno, Harvey, and Stafford counties, Kansas. The Commission will use this environmental document in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies regarding the project. As part of the National Environmental Policy Act (NEPA) review process, the Commission takes into account concerns the public may have about proposals and the environmental impacts that could result from its action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. This gathering of public input is referred to as ''scoping.'' The main goal of the scoping process is to focus the analysis in the environmental document on the important environmental issues. Additional information about the Commission's NEPA process is described below in the *NEPA Process and Environmental Document* section of this notice.

By this notice, the Commission requests public comments on the scope of issues to address in the environmental document. To ensure that your comments are timely and properly recorded, please submit your comments so that the Commission receives them in Washington, DC on or before 5:00 p.m. Eastern Time on

November 2, 2026. Comments may be submitted in written form. Further details on how to submit comments are provided in the *Public Participation* section of this notice.

Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. Your input will help the Commission staff determine what issues they need to evaluate in the environmental document. Commission staff will consider all written comments during the preparation of the environmental document.

If you submitted comments on this project to the Commission *before* the opening of this docket on August 31, 2026, you will need to file those comments in Docket No. CP26–572–000 to ensure they are considered as part of this proceeding.

This notice is being sent to the Commission's current environmental mailing list for this project. State and local government representatives should notify their constituents of this proposed project and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The company would seek to negotiate a mutually acceptable easement agreement. You are not required to enter into an agreement. However, if the Commission approves the project, the Natural Gas Act conveys the right of eminent domain to the company. Therefore, if you and the company do not reach an easement agreement, the pipeline company could initiate condemnation proceedings in court. In such instances, compensation would be determined by a judge in accordance with state law. The Commission does not subsequently grant, exercise, or oversee the exercise of that eminent domain authority. The courts have exclusive authority to handle eminent domain cases; the Commission has no jurisdiction over these matters.

Southern Star provided landowners with a fact sheet prepared by the FERC entitled ''An Interstate Natural Gas Facility On My Land? What Do I Need To Know?'' which addresses typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. This fact sheet along with other landowner topics of interest are available for viewing on the FERC website (*www.ferc.gov*) under the Natural Gas, Landowner Topics link.

Public Participation

There are three methods you can use to submit your comments to the Commission. Please carefully follow these instructions so that your comments are properly recorded. The Commission encourages electronic filing of comments and has staff available to assist you at (866) 208–3676 or *FercOnlineSupport@ferc.gov.*

(1) You can file your comments electronically using the *eComment* feature, which is located on the Commission's website (*www.ferc.gov*) under the link to FERC Online. Using eComment is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically by using the *eFiling* feature, which is located on the Commission's website (*www.ferc.gov*) under the link to FERC Online. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''*eRegister.*'' You will be asked to select the type of filing you are making; a comment on a particular project is considered a ''Comment on a Filing''; or

(3) You can file a paper copy of your comments by mailing them to the Commission. Be sure to reference the project docket number (CP26–572–000) on your letter. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Additionally, the Commission offers a free service called eSubscription which makes it easy to stay informed of all issuances and submittals regarding the dockets/projects to which you subscribe. These instant email notifications are the fastest way to receive notification and provide a link to the document files which can reduce the amount of time you spend researching proceedings. Go to *https://www.ferc.gov/ferc-online/overview* to register for eSubscription.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502–6595 or *OPP@ferc.gov.*

Summary of the Proposed Project

Southern Star proposes to construct and operate approximately 1.6 miles of new 30-inch-diameter natural gas pipeline, a new compressor station, and associated appurtenant facilities in Reno County, Kansas; and modify two existing compressor stations in Harvey and Stafford counties, Kansas. According to Southern Star, the project is designed to provide up to 710 megawatts per day of firm natural gas transportation service from Southern Star's existing mainline facilities to Evergy Kansas Central, Inc.'s new combined cycle gas turbine plant (McNew Power Plant) in Reno County. The additional firm transportation capacity would support the McNew Power Plant's planned conversion to a natural gas-fueled electric generation facility, enhancing regional electric reliability and supporting the transition from coal-fired generation.

Specifically, the project would consist of the following, all in Kansas:

- Construction and operation of:
  - a new 1.6-mile-long 30-inch-diameter natural gas pipeline (Line RE) extending from a new, greenfield compressor station (Hutchinson Compressor Station) to the new Evergy Meter Station at the McNew Power Plant in Reno County;
  - the new Hutchinson Compressor Station and associated infrastructure along Southern Star's existing 26-inch-diameter Hugoton Loop Line RA in Reno County;
  - a new measurement and flow control station (Evergy Meter Station) and associated infrastructure at the McNew Plant in Reno County;
- Modifications within the existing Hesston Compressor Station in Harvey County and the existing Stafford Compressor Station in Stafford County;
- Installation of:
  - tie-in piping, a pig launcher, and associated infrastructure at the connection to the existing Southern Star mainline system in Reno County;
  - a new pig receiver and associated infrastructure at the Evergy Meter Station in Reno County.

The general location of the project facilities is shown in appendix 1.[1]

Land Requirements for Construction

Construction of the proposed facilities would disturb about 74.23 acres of land.

[1] The appendices referenced in this notice will not appear in the **Federal Register**. Copies of the appendices were sent to all those receiving this notice in the mail and are available at *www.ferc.gov* using the link called ''*eLibrary.*'' For instructions on connecting to eLibrary, refer to the last page of this notice. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll free, (886) 208–3676 or TTY (202) 502–8659.

Following construction, Southern Star would maintain about 53.11 acres for permanent operation of the project's facilities; the remaining acreage would be restored and revert to former uses.

NEPA Process and the Environmental Document

Any environmental document issued by the Commission will discuss effects that could occur as a result of the construction and operation of the proposed project under the relevant general resource areas:

- geology and soils;
- water resources and wetlands;
- vegetation and wildlife;
- threatened and endangered species;
- cultural resources;
- socioeconomics;
- land use;
- air quality and noise; and
- reliability and safety.

Commission staff have already identified a routing issue. It is unclear why the proposed Line RE is a circuitous route from near milepost 0.4 extending south parallel to S McNew Road, turning west parallel to E Morgan Ave., and then extending north parallel to S McNew Road to approximately milepost 1.2 instead of a more direct route. Commission staff will also evaluate reasonable alternatives to the proposed project or portions of the project and make recommendations on how to lessen or avoid impacts on the various resource areas. Your comments will help Commission staff identify and focus on the issues that might have an effect on the human environment and potentially eliminate others from further study and discussion in the environmental document.

Following this scoping period, Commission staff will determine whether to prepare an Environmental Assessment (EA) or an Environmental Impact Statement (EIS). The EA or the EIS will present Commission staff's independent analysis of the issues. If Commission staff prepares an EA, a *Notice of Schedule for the Preparation of an Environmental Assessment* will be issued. The EA may be issued for an allotted public comment period. The Commission would consider timely comments on the EA before making its decision regarding the proposed project. If Commission staff prepares an EIS, a *Notice of Intent to Prepare an EIS/ Notice of Schedule* will be issued, which will open up an additional comment period. Staff will then prepare a draft EIS which will be issued for public comment. Commission staff will consider all timely comments received during the comment period on the draft EIS and revise the document, as necessary, before issuing a final EIS. Any EA or draft and final EIS will be available in electronic format in the public record through eLibrary [2] and the Commission's natural gas environmental documents web page (*https://www.ferc.gov/industries-data/natural-gas/environment/environmental-documents*). If eSubscribed, you will receive instant email notification when the environmental document is issued.

With this notice, the Commission is asking agencies with jurisdiction by law and/or special expertise with respect to the environmental issues of this project to formally cooperate in the preparation of the environmental document.[3] Agencies that would like to request cooperating agency status should follow the instructions for filing comments provided under the *Public Participation* section of this notice.

Consultation Under Section 106 of the National Historic Preservation Act

In accordance with the Advisory Council on Historic Preservation's implementing regulations for section 106 of the National Historic Preservation Act, the Commission is using this notice to initiate consultation with the applicable State Historic Preservation Office(s), and to solicit their views and those of other government agencies, interested Indian tribes, and the public on the project's potential effects on historic properties.[4] The environmental document for this project will document findings on the impacts on historic properties and summarize the status of consultations under section 106.

Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American Tribes; other interested parties; and local libraries and newspapers. This list also includes all affected landowners (as defined in the Commission's regulations) who are potential right-of-way grantors, whose property may be used temporarily for project purposes, or who own homes within certain distances of aboveground facilities, and anyone who submits comments on the project and includes a mailing address with their comments. Commission staff will update the environmental mailing list as the analysis proceeds to ensure that Commission notices related to this environmental review are sent to all individuals, organizations, and government entities interested in and/or potentially affected by the proposed project.

If you need to make changes to your name/address, or if you would like to remove your name from the mailing list, please complete one of the following steps:

(1) Send an email to *GasProjectAddressChange@ferc.gov* stating your request. You must include the docket number CP26–572–000 in your request. If you are requesting a change to your address, please be sure to include your name and the correct address. If you are requesting to delete your address from the mailing list, please include your name and address as it appeared on this notice. *This email address is unable to accept comments.*

OR

(2) Return the attached ''Mailing List Update Form'' (appendix 2).

Additional Information

Additional information about the project is available from the FERC website at *www.ferc.gov* using the eLibrary link. Click on the eLibrary link, click on ''General Search'' and enter the docket number in the ''Docket Number'' field. Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at *FercOnlineSupport@ferc.gov* or (866) 208–3676, or for TTY, contact (202) 502–8659. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

Public sessions or site visits will be posted on the Commission's calendar located at *https://www.ferc.gov/news-events/events* along with other related information.

[2] For instructions on connecting to eLibrary, refer to the last page of this notice.

[3] Cooperating agency responsibilities are addressed in Section 107(a)(3) of NEPA (42 U.S.C. 4336(a)(3)).

[4] The Advisory Council on Historic Preservation's regulations are at Title 36, Code of Federal Regulations, Part 800. Those regulations define historic properties as any prehistoric or historic district, site, building, structure, or object included in or eligible for inclusion in the National Register of Historic Places.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP26–576–000]

Transcontinental Gas Pipe Line Company, LLC; Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Leidy Access Expansion Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental document that will discuss the environmental effects of the Leidy Access Expansion Project involving construction and operation of facilities by Transcontinental Gas Pipe Line Company, LLC (Transco) in Luzerne, Pennsylvania. The Commission will use this environmental document in its decision-making process to determine whether the project is in the public interest and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies regarding the project. As part of the National Environmental Policy Act (NEPA) review process, the Commission takes into account concerns the public may have about proposals and the environmental effects that could result from its action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. This gathering of public input is referred to as ''scoping.'' The main goal of the scoping process is to focus the analysis in the environmental document on the important environmental issues. Additional information about the Commission's NEPA process is described below in the *NEPA Process and Environmental Document* section of this notice.

By this notice, the Commission requests public comments on the scope of issues to address in the environmental document. To ensure that your comments are timely and properly recorded, please submit your comments so that the Commission receives them in Washington, DC on or before 5:00 p.m. Eastern Time on November 2, 2026. Comments may be submitted in written form. Further details on how to submit comments are provided in the *Public Participation* section of this notice.

Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental effects. Your input will help the Commission staff determine what issues they need to evaluate in the environmental document. Commission staff will consider all written comments during the preparation of the environmental document.

If you submitted comments on this project to the Commission *before* the opening of this docket on September 4, 2026, you will need to file those comments in Docket No. CP26–576–000 to ensure they are considered as part of this proceeding.

This notice is being sent to the Commission's current environmental mailing list for this project. State and local government representatives should notify their constituents of this proposed project and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The company would seek to negotiate a mutually acceptable easement agreement. You are not required to enter into an agreement. However, if the Commission approves the project, the Natural Gas Act conveys the right of eminent domain to the company. Therefore, if you and the company do not reach an easement agreement, the pipeline company could initiate condemnation proceedings in court. In such instances, compensation would be determined by a judge in accordance with state law. The Commission does not subsequently grant, exercise, or oversee the exercise of that eminent domain authority. The courts have exclusive authority to handle eminent domain cases; the Commission has no jurisdiction over these matters.

Transco provided landowners with a fact sheet prepared by the FERC entitled ''An Interstate Natural Gas Facility On My Land? What Do I Need To Know?'' which addresses typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. This fact sheet along with other landowner topics of interest are available for viewing on the FERC website (*www.ferc.gov*) under the Natural Gas, Landowner Topics link.

Public Participation

There are three methods you can use to submit your comments to the Commission. Please carefully follow these instructions so that your comments are properly recorded. The Commission encourages electronic filing of comments and has staff available to assist you at (866) 208–3676 or *FercOnlineSupport@ferc.gov.*

(1) You can file your comments electronically using the *eComment* feature, which is located on the Commission's website (*www.ferc.gov*) under the link to FERC Online. Using eComment is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically by using the *eFiling* feature, which is also on the Commission's website (*www.ferc.gov*) under the link to FERC Online. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''*eRegister.*'' You will be asked to select the type of filing you are making; a comment on a particular project is considered a ''Comment on a Filing''; or

(3) You can file a paper copy of your comments by mailing them to the Commission. Be sure to reference the project docket number (CP26–576–000) on your letter. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Additionally, the Commission offers a free service called eSubscription which makes it easy to stay informed of all issuances and submittals regarding the dockets/projects to which you subscribe. These instant email notifications are the fastest way to receive notification and provide a link to the document files which can reduce the amount of time you spend researching proceedings. Go to *https://www.ferc.gov/ferc-online/overview* to register for eSubscription.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502–6595 or *OPP@ferc.gov.*

Summary of the Proposed Project

Transco proposes to construct and operate the Diamond Loop to provide an incremental 183,100 dekatherms per day of year round for transportation from the Marcellus Shale production area in northeastern Pennsylvania to a

delivery point along Transco's Leidy Loop in Luzerne, Pennsylvania.[1]

The Leidy Access Expansion Project would consist of the following facilities:

- 3.38 miles of 42-inch-diameter pipeline (Diamond Loop), all of which would be collocated with Transco's Leidy Loop Lines B and C; [2]
- a pig launcher/receiver and tie-in facilities at Transco's existing Compressor Station 515; and [3]
- a new mainline valve site that includes a tie-in and pig launcher/receiver at the terminus of the proposed Diamond Loop at milepost 3.38.

Ancillary facilities, access roads, and contractor yards would also be constructed as part of the project. The general location of the project facilities is shown in appendix 1.[4]

Land Requirements for Construction

Construction of the proposed facilities would disturb about 95 acres of land for the aboveground facilities, pipeline, access roads, and contractor yards. Following construction, Transco would maintain about 20 acres for permanent operation of the project's facilities (including about 0.3 acres for access roads); the remaining acreage would be restored and revert to former uses. All of the proposed pipeline route parallels existing pipeline rights-of-way.

NEPA Process and the Environmental Document

Any environmental document issued by the Commission will discuss effects that could occur as a result of the construction and operation of the proposed project under the relevant general resource areas:

- geology and soils;
- water resources and wetlands;
- vegetation and wildlife;
- threatened and endangered species;
- cultural resources;
- land use;
- air quality and noise; and
- reliability and safety.

Commission staff will also evaluate reasonable alternatives to the proposed project or portions of the project and make recommendations on how to lessen or avoid effects on the various resource areas. Your comments will help Commission staff identify and focus on the issues that might have an effect on the human environment and potentially eliminate others from further study and discussion in the environmental document.

Following this scoping period, Commission staff will determine whether to prepare an Environmental Assessment (EA) or an Environmental Impact Statement (EIS). The EA or the EIS will present Commission staff's independent analysis of the issues. If Commission staff prepares an EA, a *Notice of Schedule for the Preparation of an Environmental Assessment* will be issued. The EA may be issued for an allotted public comment period. The Commission would consider timely comments on the EA before making its decision regarding the proposed project. If Commission staff prepares an EIS, a *Notice of Intent to Prepare an EIS/Notice of Schedule* will be issued, which will open an additional comment period. Staff will then prepare a draft EIS which will be issued for public comment. Commission staff will consider all timely comments received during the comment period on the draft EIS and revise the document, as necessary, before issuing a final EIS. Any EA or draft and final EIS will be available in electronic format in the public record through eLibrary [5] and the Commission's natural gas environmental documents web page (*https://www.ferc.gov/industries-data/natural-gas/environment/environmental-documents*). If eSubscribed, you will receive instant email notification when the environmental document is issued.

With this notice, the Commission is asking agencies with jurisdiction by law and/or special expertise with respect to the environmental issues of this project to formally cooperate in the preparation of the environmental document.[6] Agencies that would like to request cooperating agency status should follow the instructions for filing comments provided under the *Public Participation* section of this notice.

Consultation Under Section 106 of the National Historic Preservation Act

In accordance with the Advisory Council on Historic Preservation's implementing regulations for section 106 of the National Historic Preservation Act, the Commission is using this notice to initiate consultation with the applicable State Historic Preservation Offices, and to solicit their views and those of other government agencies, interested Indian tribes, and the public on the project's potential effects on historic properties.[7] The environmental document for this project will document findings on the impacts on historic properties and summarize the status of consultations under section 106.

Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; Native American Tribes; environmental and public interest groups; other interested parties; and media outlets. This list also includes all affected landowners (as defined in the Commission's regulations) who are potential right-of-way grantors, whose property may be used temporarily for project purposes, or who own homes within certain distances of aboveground facilities, and anyone who submits comments on the project and includes a mailing address with their comments. Commission staff will update the environmental mailing list as the analysis proceeds to ensure that Commission notices related to this environmental review are sent to all individuals, organizations, and government entities interested in and/or potentially affected by the proposed project.

If you need to make changes to your name/address, or if you would like to remove your name from the mailing list, please complete one of the following steps:

(1) Send an email to *GasProjectAddressChange@ferc.gov* stating your request. You must include the docket number CP26–576–000 in your request. If you are requesting a change to your address, please be sure to include your name and the correct address. If you are requesting to delete your address from the mailing list, please include your name and address

[1] All new proposed facilities are proposed in Luzerne County, Pennsylvania. However, a single contractor yard would be in Monroe County, Pennsylvania.

[2] A pipeline loop is a segment of pipe constructed parallel to an existing pipeline to increase capacity.

[3] A ''pig'' is a tool that the pipeline company inserts into and pushes through the pipeline for cleaning the pipeline, conducting internal inspections, or other purposes. A launcher/receiver is where pigs are inserted/retrieved into and from the pipeline.

[4] The appendices referenced in this notice will not appear in the **Federal Register**. Copies of the appendices were sent to all those receiving this notice in the mail and are available at *www.ferc.gov* using the link called ''eLibrary.'' For instructions on connecting to eLibrary, refer to the last page of this notice. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll free, (886) 208–3676 or TTY (202) 502–8659.

[5] For instructions on connecting to eLibrary, refer to the last page of this notice.

[6] Cooperating agency responsibilities are addressed in Section 107(a)(3) of NEPA (42 U.S.C. 4336(a)(3)).

[7] The Advisory Council on Historic Preservation's regulations are at Title 36, Code of Federal Regulations, Part 800. Those regulations define historic properties as any prehistoric or historic district, site, building, structure, or object included in or eligible for inclusion in the National Register of Historic Places.

as it appeared on this notice. *This email address is unable to accept comments.*

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings #1

Take notice that the Commission received the following Electric Corporate filings:

Docket Numbers: EC26–181–000.

Applicants: Rhode Island State Energy Center, LP, Constellation Energy Generation, LLC.

Description: Joint Application for Authorization Under Section 203 of the Federal Power Act of Rhode Island State Energy Center, LP, et al.

Filed Date: 9/30/26.

Accession Number: 20260930–5275.

Comment Date: 5 p.m. ET 11/30/26.

Take notice that the Commission received the following Electric Rate filings:

Docket Numbers: ER10–2437–026.

Applicants: Arizona Public Service Company.

Description: Supplement to 04/30/2026 Notice of Change in Status of Arizona Public Service Company.

Filed Date: 9/29/26.

Accession Number: 20260929–5203.

Comment Date: 5 p.m. ET 10/20/26.

Docket Numbers: ER19–2858–010.

Applicants: East Coast Power Linden Holding, L.L.C.

Description: Refund Report: Refund Report to be effective N/A.

Filed Date: 9/30/26.

Accession Number: 20260930–5229.

Comment Date: 5 p.m. ET 10/21/26.

Docket Numbers: ER22–2946–007.

Applicants: Red Oak Power, LLC.

Description: Refund Report: Refund Report to be effective N/A.

Filed Date: 10/1/26.

Accession Number: 20261001–5269.

Comment Date: 5 p.m. ET 10/22/26.

Docket Numbers: ER26–1487–002.

Applicants: Hecate Energy Cider Solar LLC.

Description: Notice of Non-Material Change in Status of Hecate Energy Cider Solar LLC.

Filed Date: 9/30/26.

Accession Number: 20260930–5265.

Comment Date: 5 p.m. ET 10/21/26.

Docket Numbers: ER26–1695–002.

Applicants: Big Muddy Solar Project, LLC.

Description: Notice of Non-Material Change in Status of Big Muddy Solar Project, LLC.

Filed Date: 9/30/26.

Accession Number: 20260930–5267.

Comment Date: 5 p.m. ET 10/21/26.

Docket Numbers: ER26–2638–002.

Applicants: Southwest Power Pool, Inc.

Description: Tariff Amendment: Deficiency Response—Revisions to Adjust RUC Make Whole Payment Distribution to be effective 12/31/9998.

Description: Tariff Amendment: Notice of Cancellation of ISA, SA No. 6849; Queue No. AE1–170 to be effective 10/30/2026.
Filed Date: 10/1/26.
Accession Number: 20261001–5319.
Comment Date: 5 p.m. ET 10/22/26.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502–6595 or *OPP@ferc.gov.*

Dated: October 1, 2026.

Debbie-Anne A. Reese,

Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP26–581–000]

Natural Gas Pipeline Company of America LLC; Notice of Application and Establishing Intervention Deadline

Take notice that on September 17, 2026, Natural Gas Pipeline Company of America LLC (Natural), 3250 Lacey Road, Suite 700, Downers Grove, Illinois 60515–7918, filed an application under section 7(c) of the Natural Gas Act (NGA) and Part 157 of the Commission's regulations requesting authorization for its Amarillo Expansion Project (Project). Natural proposes to construct (1) the new Compressor Station 112 comprised of four 5,500 horsepower (hp) (22,000 hp total) gas-fired compressor units in Moore County, Texas, (2) various auxiliary facilities in Moore County, Texas, and (3) a new delivery point in Deaf Smith County, Texas. The project is designed to create 321,200

dekatherms per day (Dth/d) of incremental firm natural gas transportation. The project will be combined with existing unsubscribed capacity to provide a total of 550,000 Dth/d of firm natural gas transportation service for electric power generation. Natural estimates the total cost of the Project to be $139 million, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at (202) 502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

Any questions regarding the proposed project should be directed to Francisco Tarin, Director, Regulatory, Kinder Morgan, Inc., as Operator of Natural Gas Pipeline Company of America LLC, 2 North Nevada Avenue, Colorado Springs, Colorado 80903, by phone at (719) 667–7517 or by email at *francisco_tarin@kindermorgan.com.*

Pursuant to section 157.9 of the Commission's Rules of Practice and Procedure,[1] within 90 days of this Notice the Commission staff will either: complete its environmental review and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or environmental assessment (EA) for this proposal. The filing of an EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file comments on the project, you can protest the filing, and you can file a motion to intervene in the proceeding. There is no fee or cost for filing comments or intervening. The deadline for filing a motion to intervene is 5:00 p.m. Eastern Time on October 22, 2026. How to file protests, motions to intervene, and comments is explained below.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation (OPP) at (202) 502–6595 or *OPP@ferc.gov.*

Comments

Any person wishing to comment on the project may do so. Comments may include statements of support or objections, to the project as a whole or specific aspects of the project. The more specific your comments, the more useful they will be.

Protests

Pursuant to sections 157.10(a)(4)[2] and 385.211[3] of the Commission's regulations under the NGA, any person[4] may file a protest to the application. Protests must comply with the requirements specified in section 385.2001[5] of the Commission's regulations. A protest may also serve as a motion to intervene so long as the protestor states it also seeks to be an intervenor.

To ensure that your comments or protests are timely and properly recorded, please submit your comments on or before 5:00 p.m. Eastern Time on October 22, 2026.

There are three methods you can use to submit your comments or protests to the Commission. In all instances, please reference the Project docket number CP26–581–000 in your submission.

(1) You may file your comments electronically by using the eComment feature, which is located on the Commission's website at *www.ferc.gov* under the link to Documents and Filings. Using eComment is an easy method for interested persons to submit brief, text-only comments on a project;

(2) You may file your comments or protests electronically by using the eFiling feature, which is located on the Commission's website (*www.ferc.gov*) under the link to Documents and Filings. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''eRegister.'' You will be asked to select the type of filing you are making; first select ''General'' and then select ''Comment on a Filing''; or

(3) You can file a paper copy of your comments or protests by mailing them to the following address below. Your written comments must reference the Project docket number (CP26–581–000).

To file via USPS: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other courier: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission encourages electronic filing of comments (options 1 and 2 above) and has eFiling staff available to assist you at (202) 502–8258 or *FercOnlineSupport@ferc.gov.*

Persons who comment on the environmental review of this project will be placed on the Commission's environmental mailing list, and will receive notification when the environmental documents (EA or EIS) are issued for this project and will be notified of meetings associated with the Commission's environmental review process.

The Commission considers all comments received about the project in determining the appropriate action to be taken. However, the filing of a comment alone will not serve to make the filer a party to the proceeding. To become a party, you must intervene in the proceeding. For instructions on how to intervene, see below.

Interventions

Any person, which includes individuals, organizations, businesses, municipalities, and other entities,[6] has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders issued in this proceeding and to subsequently

[1] 18 CFR 157.9.

[2] 18 CFR 157.10(a)(4).

[3] 18 CFR 385.211.

[4] Persons include individuals, organizations, businesses, municipalities, and other entities. 18 CFR 385.102(d).

[5] 18 CFR 385.2001.

[6] 18 CFR 385.102(d).

challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and Procedure [7] and the regulations under the NGA [8] by the intervention deadline for the project, which is 5:00 p.m. Eastern Time on October 22, 2026. As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as your interest in the proceeding. For an individual, this could include your status as a landowner, ratepayer, resident of an impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at *https://www.ferc.gov/resources/guides/how-to/intervene.asp.*

There are two ways to submit your motion to intervene. In both instances, please reference the Project docket number CP26–581–000 in your submission.

(1) You may file your motion to intervene by using the Commission's eFiling feature, which is located on the Commission's website (*www.ferc.gov*) under the link to Documents and Filings. New eFiling users must first create an account by clicking on ''eRegister.'' You will be asked to select the type of filing you are making; first select ''General'' and then select ''Intervention.'' The eFiling feature includes a document-less intervention option; for more information, visit *https://www.ferc.gov/docs-filing/efiling/document-less-intervention.pdf.;* or

(2) You can file a paper copy of your motion to intervene, along with three copies, by mailing the documents to the address below. Your motion to intervene must reference the Project docket number CP26–581–000.

To file via USPS: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other courier: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission encourages electronic filing of motions to intervene (option 1 above) and has eFiling staff available to assist you at (202) 502–8258 or *FercOnlineSupport@ferc.gov.*

Protests and motions to intervene must be served on the applicant either by mail at: Francisco Tarin, Director, Regulatory, Kinder Morgan, Inc., as Operator of Natural Gas Pipeline Company of America LLC, 2 North Nevada Avenue, Colorado Springs, Colorado 80903, or by email (with a link to the document) at *francisco_tarin@kindermorgan.com.* Any subsequent submissions by an intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online. Service can be via email with a link to the document.

All timely, unopposed [9] motions to intervene are automatically granted by operation of Rule 214(c)(1).[10] Motions to intervene that are filed after the intervention deadline are untimely, and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations.[11] A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from OPP at (202) 502–6595 or on the FERC website at *www.ferc.gov* using the ''eLibrary'' link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to *www.ferc.gov/docs-filing/esubscription.asp.*

Intervention Deadline: 5:00 p.m. Eastern Time on October 22, 2026.

(Authority: 18 CFR 2.1)

Dated: October 1, 2026.

Federal Energy Regulatory Commission

[Project No. 487–145]

BIF III Holtwood LLC; Notice of Application for Non-Project Use of Project Land and Waters Accepted for Filing, Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Application Type:* Non-Project Use of Project Lands and Waters.

b. *Project No:* 487–145.

c. *Date Filed:* March 10, 2026.

d. *Applicant:* BIF III Holtwood LLC.

e. *Name of Project:* Wallenpaupack Hydroelectric Project.

f. *Location:* The Wallenpaupack Hydroelectric Project is located in Pike and Wayne counties, Pennsylvania; the proposed docks would be located in Pike County.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a–825r

h. *Applicant Contact:* Katie Lester, Brookfield Renewable, (570) 226–1371, *kathleen.lester@brookfieldrenewable.com.*

i. *FERC Contact:* Shawn Halerz, (202) 502–6360, *Shawn.Halerz@ferc.gov.*

j. *Cooperating agencies:* With this notice, the Commission is inviting federal, state, local, and Tribal agencies with jurisdiction and/or special expertise with respect to environmental issues affected by the proposal, that wish to cooperate in the preparation of any environmental document, if applicable, to follow the instructions for filing such requests described in item k below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of any environmental document cannot also intervene. *See* 94 FERC ¶ 61,076 (2001).

k. Deadline for filing comments, motions to intervene, and protests: October 30, 2026 5:00 p.m. Eastern Time.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit

brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. The first page of any filing should include the docket number P–487–145. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. *Description of Request:* The licensee requests Commission authorization to permit Escape Property Owners Association to modify existing community docks to accommodate an additional 47 watercraft, for a total watercraft capacity of 168. The proposed changes would conform to the project's approved Shoreline Management Plan and the Public Lake Use and Shoreline Use Permitting Policy for Lake Wallenpaupack.

m. *Locations of the Application:* This filing may be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1–866–208–3676 or email *FERCOnlineSupport@ferc.gov,* for TTY, call (202) 502–8659. Agencies may obtain copies of the application directly from the applicant.

n. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

o. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

p. *Filing and Service of Documents:* Any filing must (1) bear in all capital letters the title ''COMMENTS'', ''PROTEST'', or ''MOTION TO INTERVENE'' as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

q. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502–6595 or *OPP@ferc.gov.*

[Project No. 8221–124]

Alaska Energy Authority Notice Soliciting Recommendations, Terms and Conditions, and Fishway Prescriptions for Application for Non-Capacity Amendment of License

On July 29, 2026, Commission staff issued a Notice of Application for Non-Capacity Amendment of License Accepted for Filing, Soliciting Comments, Motions to Intervene, and Protests for Alaska Energy Authority's Bradley Lake Project (No. 8221). The project is located on the Bradley River in Kenai Peninsula Borough, Alaska.

The July 29, 2026 Notice established a deadline for filing comments, motions to intervene, and protests as August 28, 2026. Based on our review of comments filed pursuant to the notice we are requesting recommendations, terms and conditions, and fishway prescriptions due by November 30, 2026, by 5:00 p.m. Eastern Time and reply comments are due by January 14, 2027, by 5:00 p.m. Eastern Time.

The Commission strongly encourages electronic filing. Please file recommendations, terms, conditions and fishway prescriptions using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. The first page of any filing should include the docket number P–8221–124. Responses emailed to Commission staff are not considered part of the Commission record.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC26–33–000]

Commission Information Collection Activities (FERC–603); Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of information collection renewal and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, the Federal Energy Regulatory Commission (Commission or FERC) is submitting its currently approved information collection, FERC–603: Critical Energy/Electric Infrastructure Information Data Request (OMB Control No 1902–0197), to the Office of Management and Budget (OMB) for review of the information collection requirements. There are no proposed changes to the reporting requirements.

DATES: Comments on the collection of information are due November 5, 2026.

ADDRESSES: Send written comments on FERC–603 to OMB through *https://www.reginfo.gov/public/do/PRA/icrPublicCommentRequest?ref_nbr=202608-1902-004.* You can also visit *https://www.reginfo.gov/public/do/PRAMain* and use the drop-down under ''Currently under Review'' to select the ''Federal Energy Regulatory Commission'' where you can see the open opportunities to provide comments. Comments should be sent within 30 days of publication of this notice.

Please submit a copy of your comments to the Commission via email to *DataClearance@FERC.gov.* You must specify the Docket No. (IC26–33–000) and the FERC Information Collection number (FERC–603) in your email. If you are unable to file electronically, comments may be filed by USPS mail or by hand (including courier) delivery:

- *Mail via U.S. Postal Service Only:* Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.
- *All other delivery methods:* Federal Energy Regulatory Commission, Secretary of the Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Docket: To view comments and issuances in this docket, please visit *https://elibrary.ferc.gov/eLibrary/search.*

FOR FURTHER INFORMATION CONTACT: Kayla Williams, (202) 502–6468. *DataClearance@FERC.gov*

SUPPLEMENTARY INFORMATION:

Title: FERC–603, Critical Energy/Electric Infrastructure Information Data Request.

OMB Control No.: 1902–0197.

Type of Request: Three-year extension of the FERC–603 information collection requirements with no changes to the current reporting and recordkeeping requirements.[1]

Abstract: In accordance with section 215A(d) of the Federal Power Act [2] and 18 CFR 388.113, this collection of information provides that persons may seek Critical Energy/Electric Infrastructure Information (CEII). To receive CEII, they must show they have a legitimate need for such information, and they must submit a non-disclosure agreement that decreases the likelihood that such information could be used to plan or execute terrorist attacks.

This collection of information provides an alternative to seeking CEII in accordance with the Freedom of Information Act (FOIA).[3] That statute requires federal agencies to disclose the requested information unless one or more of several FOIA exemptions justifies withholding of the requested information. In the case of CEII, two FOIA exemptions are likely to apply,[4] and applying one of them frequently results in a decision to withhold the information from the FOIA requester. The Commission realizes that this process could prevent persons with a legitimate need for CEII from obtaining such information. For example, market participants seeking to develop new or expanded energy resources may have such a need.

In the aftermath of the September 11, 2001 terrorist attacks, the Commission determined that it was important to improve the appropriate treatment of CEII, both to assist requesters with a legitimate need for CEII, and to restrict access to the sensitive information due to the ongoing terrorism threat. The Commission promulgated 18 CFR 388.113 to achieve those goals.

Under 18 CFR 388.13(g)(5), a request for CEII must contain:

- The requester's name, title, address, and telephone number;
- The name, address, and telephone number of the person or entity on whose behalf the information is requested;
- A detailed Statement of Need; and
- An executed non-disclosure agreement.

Under 18 CFR 388.133(h)(2), the non-disclosure agreement indicates the individual's willingness to adhere to limitations on the use and disclosure of the information requested, and stipulates at minimum that the CEII:

- Will only be used for the purpose for which it was requested;
- May only be discussed with authorized recipients;
- Information utilized for modelling will not be disclosed;
- Must be kept in a secure place in a manner that would prevent unauthorized access;
- Must be destroyed or returned to the Commission upon request;
- Is strictly prohibited from disclosure to anyone outside the United States; and
- Is not subject to release under either FOIA or Sunshine Laws.

In addition, the non-disclosure agreement provides that the Commission may audit the recipient's compliance with the non-disclosure agreement; that a recipient is obligated to protect the CEII even after a designation has lapsed [5] until the CEII Coordinator [6] determines the information should no longer be designated as CEII; and the recipient is required to promptly report all unauthorized disclosures of CEII to the Commission.

Type of Respondents: Persons seeking access to CEII.

Estimate of Annual Burden: The Commission estimates the total annual

[1] The CEII request form and three versions of the non-disclosure agreement (General Non-Disclosure Agreement, Federal Agency Acknowledgement and Agreement, and State Agency Employee Non-Disclosure Agreement) are posted at *https://www.ferc.gov/legal/ceii-foia/ceii.asp.*

[2] 16 U.S.C. 824o–1(d).

[3] 5 U.S.C. 552 (2018).

[4] The relevant FOIA exemptions are Exemption 3, which allows the withholding of information prohibited from disclosure by another statute and Exemption 7, which protects from disclosure certain law enforcement information, including information the disclosure of which might jeopardize a person's life or safety.

[5] The Commission's regulation at 18 CFR 388.113 provides criteria and procedures to designate information as CEII. A designation may last for up to five years, unless it is re-designated. A designation may be removed at any time, in whole in part, if the Commission determines that the unauthorized disclosure of CEII can no longer be used to impair the security or reliability of the bulk-power system or distribution facilities or any other form of energy infrastructure.

[6] The regulation at 18 CFR 375.313 delegates authority to a CEII Coordinator to receive and review all requests for CEII, make determinations regarding such requests, establish reasonable conditions on the release of CEIII, and release CEII to requesters who agree in writing to abide by the conditions set forth by the Coordinator.

burden [7] and cost [8] for this information collection as follows.

(1) Number of respondents	(2) Annual number of responses per respondent	(3) Total number of responses (column 1 × Column 2)	(4) Average burden & cost per response	(5) Total annual burden hours & total annual cost (column 3 × column 4)	(6) Cost per respondent ($) (column 5 ÷ column 1)
100	1	100	0.3 hrs.; $30.60	30 hrs.; $3,060	$30.60

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: September 30, 2026.

Carlos D. Clay,

Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL26–108–000]

PJM Interconnection, L.L.C.; Notice of Institution of Section 206 Proceeding and Refund Effective Date

On September 29, 2026, the Commission issued an order in Docket No. EL26–108–000, pursuant to section 206 of the Federal Power Act (FPA), 16 U.S.C. 824e, instituting an investigation to determine whether PJM Interconnection, L.L.C.'s submitted proposed changes to its Open Access Transmission Tariff and Reliability Assurance Agreement to establish the Reliability Backstop Procurement are considered unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. *PJM Interconnection, L.L.C.,* 196 FERC ¶ 61,245 (2026).

The refund effective date in Docket No. EL26–108–000, established pursuant to section 206(b) of the FPA, will be the date of publication of this notice in the **Federal Register**.

Any interested person desiring to be heard in Docket No. EL26–108–000 must file a notice of intervention or motion to intervene, as appropriate, with the Federal Energy Regulatory Commission, in accordance with Rule 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.214 (2025), within 21 days of the date of issuance of the order.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. From FERC's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field. User assistance is available for eLibrary and the FERC's website during normal business hours from FERC Online Support at 202–502–6652 (toll free at 1–866–208–3676) or email at *mailto:ferconlinesupport@ferc.gov* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFile'' link at *http://www.ferc.gov.* In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502–6595 or *mailto:OPP@ferc.gov*.

Dated: September 30, 2026.

Carlos D. Clay,

Deputy Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2021–0669; FRL–9116–09–OAR]

Phasedown of Hydrofluorocarbons: Notice of 2027 Allowance Allocations for Production and Consumption of Regulated Substances Under the American Innovation and Manufacturing Act of 2020, and Notice of Final Actions Establishing Administrative Consequences

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has issued calendar year 2027 allowances for the production and consumption of hydrofluorocarbons in accordance with the Agency's regulations. This issuance of allowances is undertaken pursuant to the American Innovation and Manufacturing (AIM) Act, which directs the EPA by October 1 of each calendar year to determine the quantity of production and consumption allowances for the following calendar year. In this notice, the EPA is also providing notice of separate Agency actions taken to establish administrative consequences for specific entities. These finalized actions withheld or revoked the identified entities' newly issued calendar year 2027 allowances in accordance with the administrative consequence regulatory provisions.

FOR FURTHER INFORMATION CONTACT: Connor Henderson, Chemicals, Coatings, and Products Division, Office of Clean Air Programs, Mail Code 6205A, U.S. Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564–2177; email address: *henderson.connor@epa.gov.* You may also visit the EPA's website at *https://www.epa.gov/hfcs* for further information.

SUPPLEMENTARY INFORMATION: Subsection (e)(2)(D)(i) of the American Innovation and Manufacturing Act of 2020 (AIM Act) directs the Environmental Protection Agency (EPA) to determine, by October 1 of each calendar year, the quantity of allowances for the production and consumption of regulated substances that may be used for the following calendar year. The EPA has codified the production and consumption baselines and phasedown schedules for regulated substances in 40 CFR 84.7. Under the phasedown schedule, for 2027, total production allowances may not exceed 229,521,263 metric tons of exchange value equivalent (MTEVe) and total consumption allowances may not exceed 181,522,990 MTEVe.

The EPA regulations at 40 CFR part 84, subpart A, outline the process by which the Agency determines the number of allowances each entity is allocated. The EPA allocated allowances for 2027 consistent with the regulatory requirements and has posted entity-specific allowance allocations on its website. An allowance allocated under the AIM Act does not constitute a property right and is a limited authorization for the production or consumption of a regulated substance. The EPA also tracks information on how those allowances are used. Reported information for calendar year 2025 HFC activity, including how many allowances were used and total U.S. production and consumption of HFCs in 2025, can be found on EPA's HFC Data Hub web page. Both allowance allocations and the HFC Data Hub can

be found by visiting *https://www.epa.gov/hfcs.*

Note that while allowances may be transferred or conferred once they are allocated, they can only be expended to cover imports and production in the calendar year for which they are allocated. In other words, calendar year 2027 allowances may only be expended for production and import of bulk HFCs between January 1, 2027, and December 31, 2027.

Application-Specific Allowances

The EPA established the methodology for issuing application-specific allowances in the 2021 final rule titled *Phasedown of Hydrofluorocarbons: Establishing the Allowance Allocation and Trading Program Under the American Innovation and Manufacturing Act* [1] and updated this methodology in the final rule titled *Phasedown of Hydrofluorocarbons: Review and Renewal of Eligibility for Application-Specific Allowances*,[2] hereinafter referred to as the HFC Allocation Framework Rule and the 2025 Application-specific Allowance Review and Renewal Rule, respectively. The methodology for application-specific allowance allocations is codified in 40 CFR 84.13. Because application-specific allowances can be expended to either produce or import HFCs, and application-specific allowances must be provided from within the overall annual production and consumption caps, the EPA subtracts the amount of application-specific allowances allocated from both the production and consumption general allowance pools. The EPA issues application-specific allowances to end users in four applications: propellants in metered dose inhalers (MDIs), structural composite preformed polyurethane foam for marine use and trailer use, etching of semiconductor material or wafers and the cleaning of chemical vapor deposition chambers within the semiconductor manufacturing sector, and onboard aerospace fire suppression. Additionally, the EPA issues application-specific allowances to the U.S. Department of Defense for mission-critical military end uses.

Applying the methodology codified in 40 CFR 84.13, for 2027 the EPA allocated the number of application-specific allowances shown in Table 1.

TABLE 1—NUMBER OF CALENDAR YEAR 2027 APPLICATION-SPECIFIC ALLOWANCES ALLOCATED PER ENTITY

Entity	Application	Application-specific allowances allocated (MTEVe)
Analog Devices	Semiconductors	14,104.4

TABLE 1—NUMBER OF CALENDAR YEAR 2027 APPLICATION-SPECIFIC ALLOWANCES ALLOCATED PER ENTITY—Continued

Entity	Application	Application-specific allowances allocated (MTEVe)
Department of Defense	Mission-critical Military End Uses	9,070,115.2
Total Issued	All	13,839,651.2

The EPA's 2025 Application-specific Allowance Review and Renewal Rule established an annual set-aside of 1,000,000 MTEVe allowances to accommodate unforeseen HFC needs resulting from a global pandemic, other public health emergency, or other healthcare system need (referred hereafter as the ''MDI set-aside''). The EPA has set aside 1,000,000 MTEVe allowances for that purpose from both the consumption and production pools. Entities that use HFCs as a propellant in MDIs have until April 30, 2027, to apply for these allowances. Once the deadline passes, the EPA will evaluate such requests and expects to issue allowances within 60 days. The EPA also intends to distribute any remaining set-aside allowances pro rata amongst general pool allowance holders within 60 days of the April 30 request date.[3]

General Pool Allowances

The EPA's 2023 final rule titled *Phasedown of Hydrofluorocarbons: Allowance Allocation Methodology for 2024 and Later Years*[4] updated the methodology for how the Agency would issue production and consumption allowances for 2024 through 2028 for general pool allowance holders. These updates are codified in 40 CFR 84.9 (production) and 40 CFR 84.11 (consumption), and the EPA has issued allowances to entities who meet the criteria in the regulations, including those who were previously issued consumption allowances as new market entrants pursuant to 40 CFR 84.15.

The EPA also created a new form of allowances called ''production for export allowances'' in the 2025 Application-specific Allowance Review and Renewal Rule. In accordance with the provisions codified in that rule at 40 CFR 84.18, Iofina Chemical is allocated production for export allowances in the amount of 3,000.0 MTEVe on an annual basis for a five-year period starting calendar year 2026, to calendar year 2030. These allowances were set aside and allocated, respectively, prior to issuing general pool production allowances.

For 2027, the EPA allocated the number of production allowances shown in Table 2.

TABLE 2—NUMBER OF CALENDAR YEAR 2027 PRODUCTION ALLOWANCES ALLOCATED PER ENTITY

Entity	Production allowances allocated (MTEVe)
Arkema	25,904,001.0
Chemours	48,023,780.9

Administrative Consequences

Separate from the allocation of calendar year 2027 allowances, the EPA hereby provides notice that it also took final actions establishing administrative consequences for specific entities. Each action, which the EPA took through a letter issued to the relevant entity, is a separate final action informing the recipient entity of an administrative consequence. The requirements pertaining to administrative consequences are codified in 40 CFR 84.35. Under this provision, the EPA can retire, revoke, or withhold the allocation of allowances, or ban an entity from receiving, transferring, or conferring allowances. A retired allowance is one that must go unused and expire at the end of the year; a revoked allowance is one that the EPA takes back from an allowance holder and redistributes to all the other eligible allowance holders; and a withheld allowance is one that is retained by the Agency until an allowance holder that has failed to meet a regulatory requirement comes back into compliance, at which point the EPA allocates it to the allowance holder.[5]

The EPA finalized administrative consequences for two entities that were allocated application-specific allowances, listed in Table 1 for calendar year 2027. These entities failed to submit their auditing reports as required in 40 CFR 84.33 and therefore the EPA has withheld a portion of their allowances (if allowances were allocated to the entity) and will continue withholding these allowances until the missing reports are submitted and subsequently verified by the Agency: University of California (UC) San Diego and Wolfspeed. These final actions became effective on September 30, 2026, and are summarized below in Table 4.

TABLE 4—SUMMARY OF ADMINISTRATIVE CONSEQUENCES TAKEN PURSUANT TO 40 CFR 84.35 FOR CALENDAR YEAR 2027 APPLICATION-SPECIFIC ALLOWANCES, EFFECTIVE SEPTEMBER 30, 2026

Entity	Number of affected allowances (MTEVe)	Administrative consequence action	Reasoning
UC San Diego [a]	0.0	Withhold	Failure to submit auditing report as required in 40 CFR 84.33.
Wolfspeed	2,291.3	Withhold	Failure to submit auditing report as required in 40 CFR 84.33.

[a] The entity was not allocated calendar year 2027 application-specific allowances and as a result no allowances could be withheld.

The EPA finalized administrative consequences for certain entities that were allocated consumption allowances, as listed in Table 5 for calendar year 2027. These final actions affecting calendar year 2027 allowances became effective on either August 7, 2026, or September 30, 2026. The following entities imported regulated HFCs without expending the requisite number of consumption allowances at the time of import and therefore the EPA has revoked consumption allowances commensurate with the quantities of regulated substances imported without allowances: Solstice Advanced Materials US and FluoroFusion Specialty Chemicals. A summary of these administrative consequences is included in Table 5.

TABLE 5—SUMMARY OF ADMINISTRATIVE CONSEQUENCES PURSUANT TO 40 CFR 84.35 FOR CALENDAR YEAR 2027 CONSUMPTION ALLOWANCES, EFFECTIVE AUGUST 7, 2026, OR SEPTEMBER 30, 2026

Entity	Effective date	Number of affected allowances (MTEVe)	Administrative consequence action and effective date	Reasoning
FluoroFusion Specialty Chemicals.	September 30, 2026	[a] 1,841.2	Revoke	Imported regulated HFCs without expending requisite number of allowances.
Solstice Advanced Materials US.	August 7, 2026	[b] 1,144,200.0	Revoke	Imported regulated HFCs without expending requisite number of allowances.

[a] As stated in the HFC Allocation Framework Rule (86 FR 55116, Oct. 5, 2021), the EPA explained it can take a 20 to 200 percent premium for repeat instances of administrative consequences. This value corresponds to 100 percent of the full amount of consumption without requisite allowances at the time of import given this is the second administrative consequence issued to FluoroFusion Specialty Chemicals.

[b] As stated in the HFC Allocation Framework Rule (86 FR 55116, Oct. 5, 2021), the EPA explained it would take a 50 percent premium in first instances of administrative consequences. This value corresponds to 50 percent of the full amount of consumption without requisite allowances at the time of import.

In addition to the administrative consequences listed in Tables 4 and 5 that were finalized in the past year, 61,751.9 MTEVe of 2027 consumption allowances were retired and 1,388,004.3 MTEVe were revoked, consistent with administrative consequences finalized in prior years and described in *Phasedown of Hydrofluorocarbons: Notice of 2024 Allowance Allocations for Production and Consumption of Regulated Substances Under the American Innovation and Manufacturing Act of 2020, and Notice of Final Administrative Consequences,*[6] hereafter referred to as the 2024 Notice of HFC Allowance Allocations. The entities subject to those prior year actions include Bluon, Honeywell International (now known as Solstice

[5] More information on the EPA's approach to administrative consequences can be found at 86 FR 55168 (October 23, 2024).

[6] 88 FR 72060, 72064 (Oct. 19, 2023).

Advanced Materials US), and Resonac America.

Adjustments to Application-Specific Allowances

As described above, certain entities listed in Table 1 have had a portion of their calendar year 2027 allowances withheld for not submitting the auditing report required in 40 CFR 84.33. These allowances will be withheld until the missing reports are submitted and subsequently verified by the EPA. Accordingly, Table 7 shows the number of application-specific allowances available to each entity as a result of finalized administrative consequences.

TABLE 7—NUMBER OF CALENDAR YEAR 2027 APPLICATION-SPECIFIC ALLOWANCES AVAILABLE TO EACH ENTITY AS OF OCTOBER 1, 2026, ADJUSTED FOR ADMINISTRATIVE CONSEQUENCES

Entity	Application	Available application-specific allowances, adjusting for administrative consequences (MTEVe)

Adjustments to Consumption Allowances

An entity is eligible to receive redistributed allowances if they were not subject to administrative consequences that took effect on the same day (except entities that had allowances withheld). For example, if the EPA revoked 50 MTEVe allowances from company A and 50 MTEVe allowances from company B, effective on the same day, the EPA's redistribution of that single pool of 100 MTEVe allowances would go to all general pool allowances holders except company A and company B. This applies regardless of whether the revocation happens in one year or over

multiple years. However, entities who only had allowances withheld by the Agency, *e.g.,* as a result of failure to comply with the auditing requirements as contained in 40 CFR 84.33, were eligible to receive allowances that were redistributed.

For 2027, the total number of revoked and redistributed allowances is 2,534,045.5 MTEVe, which are being apportioned to eligible consumption allowance holders based on their relative market share, and the total number of retired allowances in 2027 is 61,751.9 MTEVe. These amounts are the result of administrative consequences with various effective dates. For more information on the administrative consequences finalized in 2023 that impact calendar year 2027 consumption allowances, see the 2024 Notice of HFC Allowance Allocations.

Table 8 reflects the 2027 consumption allowance totals available to each entity as of October 1, 2026, after taking into account the administrative consequences and eligibility described elsewhere in this notice.

[a] While these entities were eligible for revoked and redistributed consumption allowances with an effective date of September 30, 2025, the Agency has previously finalized administrative consequences for them stating that EPA ''[w]ill retire and revoke allowances until the full administrative consequence is covered,'' (88 FR 72060, Oct. 19, 2023).

[b] See Table 7; this value corresponds to the total number of application-specific allowances available on October 1, 2026, after adjusting for administrative consequences.

Judicial Review

The AIM Act provides that certain sections of the Clean Air Act (CAA) ''shall apply to'' the AIM Act and actions ''promulgated by the Administrator of [the EPA] pursuant to [the AIM Act] as though [the AIM Act] were expressly included in title VI of [the CAA].'' [7] Among the applicable sections of the CAA is section 307, which includes provisions governing judicial review.[8] CAA section 307(b)(1) provides, in part, that petitions for review must only be filed in the United States Court of Appeals for the District of Columbia Circuit: (i) When the agency action consists of ''nationally applicable regulations promulgated, or final actions taken, by the Administrator,'' or (ii) when such action is locally or regionally applicable, but ''such action is based on a determination of nationwide scope or effect and if in taking such action the Administrator finds and publishes that such action is based on such a determination.''

The issuance of calendar year 2027 allowances for the production and consumption of hydrofluorocarbons herein noticed is ''nationally applicable'' within the meaning of CAA section 307(b)(1). The AIM Act imposes a national cap on the total number of allowances available for each year for all entities nationwide.[9] For 2027, there was a national pool of 229,521,263 MTEVe production allowances and 181,522,990 MTEVe consumption allowances available to distribute. The allocation action noticed herein distributed that finite set of allowances consistent with the methodology the EPA established in the nationally applicable HFC Allowance framework rule and updated in the *Phasedown of Hydrofluorocarbons: Allowance Allocation Methodology for 2024 and Later Years* rule. As such, the allowance allocation is the division and assignment of a single, nationwide pool of HFC allowances to entities across the country according to the uniform, national methodology established in EPA's regulations. Each entity's allowance allocation is a relative share of that pool; thus, any additional allowances awarded to one entity directly affects the allocations to others. For these reasons, the final action of the Agency allocating hydrofluorocarbon allowances to entities located throughout the country is nationally applicable.

Under CAA section 307(b)(1), petitions for judicial review of this allocation action must be filed in the United States Court of Appeals for the District of Columbia Circuit by December 7, 2026.

As described, in this notice the EPA is also publishing notice of adjudicatory actions establishing administrative consequences that took effect August 7, 2026, and September 30, 2026. Under CAA section 307(b)(1), any petition for judicial review of such a final action must be filed in the United States Court of Appeals for the appropriate circuit by December 7, 2026.

Filing a petition for reconsideration by the Administrator does not affect the finality of any action noticed herein for purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed and

[7] 42 U.S.C. 7675(k)(1)(C).

[8] 42 U.S.C. 7607(b)(1).

[9] 42 U.S.C. 7675(e)(2)(B)–(D).

shall not postpone the effectiveness of such action. The final actions described herein may not be challenged later in proceedings to enforce their requirements.[10]

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPPT–2026–1849; FRL–13203–06–OCSPP]

Certain New Chemicals or Significant New Uses; Statements of Findings—June 2026

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Toxic Substances Control Act (TSCA) requires EPA to publish in the **Federal Register** a statement of its findings after its review of certain TSCA submissions when EPA makes a finding that a new chemical substance or significant new use is not likely to present an unreasonable risk of injury to health or the environment. Such statements apply to premanufacture notices (PMNs), microbial commercial activity notices (MCANs), and significant new use notices (SNUNs) submitted to EPA under TSCA. This document presents statements of findings made by EPA on such submissions during the period from June 1, 2026, to June 30, 2026.

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPPT–2026–1849, is available online at *https://www.regulations.gov.* Additional information about dockets generally, along with instructions for visiting the docket in person, is available at *https://www.epa.gov/*dockets.

FOR FURTHER INFORMATION CONTACT:

For technical information: Rebecca Edelstein, New Chemical Division (7405M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 564–1667; email address: *edelstein.rebecca@epa.gov.*

For general information: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554–1404; email address: *TSCA-Hotline@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Does this action apply to me?

This action provides information that is directed to the public in general.

B. What action is the Agency taking?

This document lists the statements of findings made by EPA after review of submissions under TSCA section 5(a) that certain new chemical substances or significant new uses are not likely to present an unreasonable risk of injury to health or the environment. This document presents statements of findings made by EPA during the applicable period.

C. What is the Agency's authority for taking this action?

TSCA section 5(a)(3) requires EPA to review a submission under TSCA section 5(a) and make specific findings pertaining to whether the substance may present unreasonable risk of injury to health or the environment. Among those potential findings is that the chemical substance or significant new use is not likely to present an unreasonable risk of injury to health or the environment per TSCA Section 5(a)(3)(C).

TSCA section 5(g) requires EPA to publish in the **Federal Register** a statement of its findings after its review of a submission under TSCA section 5(a) when EPA makes a finding that a new chemical substance or significant new use is not likely to present an unreasonable risk of injury to health or the environment. Such statements apply to PMNs, MCANs, and SNUNs submitted to EPA under TSCA section 5.

Anyone who plans to manufacture (which includes import) a new chemical substance for a non-exempt commercial purpose and any manufacturer or processor wishing to engage in a use of a chemical substance designated by EPA as a significant new use must submit a notice to EPA at least 90 days before commencing manufacture of the new chemical substance or before engaging in the significant new use.

The submitter of a notice to EPA for which EPA has made a finding of ''not likely to present an unreasonable risk of injury to health or the environment'' may commence manufacture of the chemical substance or manufacture or processing for the significant new use notwithstanding any remaining portion of the applicable review period.

II. Statements of Findings Under TSCA Section 5(a)(3)(C)

In this unit, EPA identifies the PMNs, MCANs and SNUNs for which EPA has made findings under TSCA section 5(a)(3)(C) that the new chemical substances or significant new uses are not likely to present an unreasonable risk of injury to health or the environment. For the findings made during this period, the following list provides the EPA case number assigned to the TSCA section 5(a) submission and the chemical identity (generic name if the specific name is claimed as confidential).

- J–25–0012, Strain of *Streptomyces cyaneofuscatus* modified with genetically stable, DNA insertion responsible for the production of a modified enzyme (Generic Name).

To access EPA's decision document describing the basis of the ''not likely to present an unreasonable risk'' finding made by EPA under TSCA section 5(a)(3)(C), lookup the specific case number at *https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca/chemicals-determined-not-likely.*

Authority: 15 U.S.C. 2601 *et seq.*

Dated: September 30, 2026.

Shari Z. Barash,

Director, New Chemicals Division, Office of Pollution Prevention and Toxics.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0180; FR ID 370441]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice; request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's

[10] 42 U.S.C. 7607(b)(2).

burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

DATES: Written PRA comments should be submitted on or before December 7, 2026. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION: The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

OMB Control Number: 3060–0180.

Title: Section 73.1610, Equipment Tests.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; Not-for-profit institutions.

Number of Respondents and Responses: 50 respondents; 50 responses.

Estimated Hours per Response: 0.5 hours.

Frequency of Response: On occasion reporting requirement.

Total Annual Burden: 25 hours.

Total Annual Cost: No cost.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in Section 154(i) of the Communications Act of 1934, as amended.

Needs and Uses: The information collection requirements contained in 47 CFR 73.1610 require the permittee of a new broadcast station to notify the FCC of its plans to conduct equipment tests for the purpose of making adjustments and measurements as may be necessary to assure compliance with the terms of the construction permit and applicable engineering standards. FCC staff use the data to assure compliance with the terms of the construction permit and applicable engineering standards.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

OMB Control Number: 3060–1275.

Title: Upper C-band Clearinghouse; Upper C-band Relocation Coordinator; 3.7 GHz Band Space Station Operators.

Form Number: N/A.

Type of Review: Revision of a currently approved information collection.

Respondents: Business or other for-profit entities; Not for profit institutions; State, Local or Tribal Government.

Estimated Number of Respondents and Responses: 16,512 respondents and 34,871 responses.

Estimated Time per Response: 0.5 hours–64 hours.

Frequency of Response: Recordkeeping requirement; on occasion, weekly, monthly, quarterly, semi-annual, and annual reporting requirements; third-party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in sections 1, 2, 4(i), 4(j), 5(c), 201, 302, 303, 304, 307(e), 309, and 316 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i), 154(j), 155(c), 201, 302, 303, 304, 307(e), 309, and 316.

Estimated Total Annual Burden: 123,465 hours.

Total Annual Costs: $10,705,353.

Needs and Uses: On July 22, 2026, in furtherance of the goal of releasing more mid-band spectrum into the market to support and enable next-generation wireless networks, the Commission adopted a Report and Order, Order of Proposed Modification, and Order on Reconsideration, FCC 26–46 (*Upper C-band R&O*). The *Upper C-band R&O* calls for the relocation of existing FSS operations in the Upper C-band, making 160 megahertz (3.98–4.14 GHz) available for flexible-use terrestrial wireless service throughout the contiguous United States through a Commission-administered public auction of licenses that must be completed by July 4, 2027, pursuant to a mandate in the One Big Beautiful Bill Act.

The Commission adopted a robust transition schedule to achieve an expeditious clearing and relocation of FSS operations and ensure that a significant amount of spectrum is made available quickly for next-generation

wireless deployments, while also ensuring effective accommodation of relocated incumbent users. Pursuant to the *Upper C-band R&O,* all incumbent FSS operations in the contiguous United States must clear the 4.0–4.16 GHz portion of the C-band by December 30, 2030, or June 30, 2031, to ensure a timely transition process.

To facilitate an efficient transition, the Commission adopted a process for reimbursing eligible space station operators for the reasonable and necessary costs of the relocation and for offering incentive payments in the event of a timely transition. New flexible-use licensees in the Upper C-band from 3.98–4.14 GHz (Upper C-band Licensees) will be required to reimburse eligible space station operators, as well as incumbent earth station operators, for their reasonable and necessary relocation costs associated with clearing 4.0–4.16 GHz. Incumbent earth station operators will also have the option to elect a lump sum reimbursement option in lieu of actual cost reimbursement.

Upper C-band Licensees must also provide rebates to defined classes of eligible aircraft owners and operators to facilitate their compliance with the Federal Aviation Administration's radio altimeter retrofit requirements. These requirements are designed to foster a successful coexistence environment between new Upper C-band wireless operations and radio altimeters in the adjacent 4.2–4.4 GHz band. The *Upper C-band R&O* establishes an Upper C-band Clearinghouse to oversee the cost-related aspects of the transition, including administration of actual cost reimbursement, lump sum, and incentive payments, as well as radio altimeter rebates. The *Upper C-band R&O* also establishes a Relocation Coordinator to take actions necessary to facilitate the migration of incumbent earth stations to ensure uninterrupted service during and following the transition.

The Commission concluded in the *Upper C-band R&O* that the Upper C-band Clearinghouse and Relocation Coordinator are critical to ensuring that the band reconfiguration is administered in a fair, transparent manner and that the transition occurs as expeditiously as possible. To accomplish these goals most effectively, the Commission is seeking approval for this revised information collection to collect information from the Upper C-band Clearinghouse, the Relocation Coordinator, and eligible space station operators, and to allow the Upper C-band Clearinghouse and Relocation Coordinator to collect information, as described below:

Upper C-Band Clearinghouse

The Commission concluded in the *Upper C-band R&O* that an independent Upper C-band Clearinghouse is necessary to administer the cost-related aspects of the transition in a fair, transparent manner and, pursuant to Commission rules and oversight, to mitigate financial disputes among stakeholders, and to collect and distribute payments in a timely manner. The clearinghouse will be responsible for collecting and distributing actual cost reimbursement. lump sum, and incentive payments, collecting and distributing radio altimeter retrofit rebate payments, auditing incoming and outgoing invoices, mitigating disputes among parties, and generally acting as a clearinghouse.

To that end, the *Upper C-band R&O* calls for the clearinghouse to create and submit the following information: (1) quarterly reports that detail the status of reimbursement funds available, the payments issued, the amounts collected from the Upper C-band Licensees, and similar information for the adjacent band radio altimeter retrofit rebates, account for all funds spent in both contexts, and include the descriptions of any disputes and the manner in which they were resolved; (2) 30 days' notice to Upper C-band Licensees of the additional pro-rata shares they must contribute; (3) requests for additional documentation from claimants to determine whether their claims are reasonable and to ensure they comply with the requirements adopted in section 27.1416(a) of the Commission's rules; (4) notice to a claimant that the amount sought is unreasonable, and notice of the amount the clearinghouse deems eligible for payment; (5) following a determination on a reimbursement, lump sum, or rebate claim, invoices of approved claims, which it shall issue to each relevant licensee indicating the amount to be paid; (6) when referring an unresolved issue to the Chief of the Wireless Telecommunications Bureau, the entire record on any disputed issues, including such dispositions thereof; and (7) prompt notice to Upper C-band Licensees following validation of the Certification of Completion set forth in section 27.1412(b) of the Commission's rules.

The Upper C-band Clearinghouse will also collect the following information from claimants and Upper C-band Licensees, as required by the *Upper C-band R&O:* documentation of claims, including where appropriate actual expenses, and objections by parties disputing a cost estimate, approved claim invoice, or payment or cost-sharing obligation. The clearinghouse will collect payments from Upper C-band Licensees to replenish the reimbursement and rebate funds and will notify licensees when eligible space station operators' Certifications of Completion are validated in connection with incentive payments. Finally, the Upper C-band Clearinghouse must file a request with the Wireless Telecommunications Bureau to wind down and suspend operations.

Relocation Coordinator

The *Upper C-band R&O* sets forth specific obligations, filing requirements, and deadlines for eligible space station operators that must clear by the Transition Deadlines in order to ensure that incumbent earth station operators, other C-band satellite customers, and prospective Upper C-band Licensees are adequately informed and accommodated throughout the transition.

The Commission found that making each eligible space station operator responsible for its clearing obligations would promote an efficient and effective transition process. Nevertheless, in light of the complicated interdependencies involves in transitioning incumbent earth station operations out of 4.0–4.16 GHz, as well as the extensive number of incumbent earth stations, the Commission determined that a Relocation Coordinator is necessary to ensure that all eligible space station operators relocate in a timely manner.

The Relocation Coordinator will be responsible for performing several duties, which include:

(1) coordinating the schedule for clearing the band; (2) performing engineering analysis, as necessary, to determine necessary earth station migration actions; (3) assigning obligations, as necessary, for earth station migrations; (4) coordinating with the Upper C-band Licensees throughout the transition process; (5) assessing and tracking the completion of the transition in each PEA and determining the Upper C-band wireless licensees' ability to commence operations; and (6) mediating scheduling disputes. In short, the Relocation Coordinator may establish a timeline and take actions necessary to migrate incumbent earth stations to ensure uninterrupted service during and following the transition.

Accordingly, the *Upper C-band R&O* requires that the Relocation Coordinator create, collect, and/or provide the following: (1) financial information as requested by the Wireless Telecommunications Bureau to satisfy the Commission's oversight

responsibilities and/or agency specific/government-wide reporting obligations; (2) receive and review the Transition Plans filed by all eligible space station operators and recommend any changes to those plans to the Commission to the extent needed to ensure a timely transition; (3) receive notice from incumbent earth station operators or other satellite customers of any disputes related to comparability of facilities, workmanship, or preservation of service during the transition, which it shall notify to the Wireless Telecommunications Bureau and provide recommendation for resolution; (4) status reports on the overall status of clearing efforts, on a quarterly basis, beginning after the Wireless Telecommunications Bureau confirms its selection; and (5) additional information requested by the Wireless Telecommunications Bureau.

Each eligible space station operator shall be eligible to appoint one member to a selection committee that will seek proposals for an entity with technical experience in understanding and working on earth stations to serve as a Relocation Coordinator. The committee should proceed by consensus; however, if a vote on selection of a Relocation Coordinator is required, it shall be by a majority. In the event that the search committee fails to select a Relocation Coordinator and to notify the Commission by January 1, 2027, the search committee will be dissolved without further action by the Commission, and the Commission will initiate a procurement of a Relocation Coordinator to facilitate the transition.

Eligible Space Station Operators

The *Upper C-band R&O* establishes rules to transition incumbent FSS C-band users out of 4.0–4.16 GHz. The Commission's approach requires eligible space station operators to lead this transition process and, if they complete the requisite clearing process by each Transition Deadline, they will become eligible for incentive payments. To this end, the Commission requires the following information from each eligible space station operator: (1) status of its clearing efforts on a quarterly basis, beginning March 31, 2027; (2) a timely Certification of Completion that certifies it has completed the necessary clearing actions to satisfy the relevant Transition Deadline. The certification must be filed once the eligible space station operator completes its obligations but no later than the relevant Transition Deadline referenced in section 27.1412(a) of the Commission's rules. The Wireless Telecommunications Bureau will prescribe the form of such certification; and (3) notice of any incumbent earth station transition delays, which must be submitted to the Wireless Telecommunications Bureau within seven days of discovering an inability to accomplish the assigned earth station transition task. Such a request must include supporting documentation to allow for resolution as soon as practicable and must be submitted before the relevant Transition Deadline.

OMB Control Number: 3060–1281.

Title: 3.7 GHz Service Licensee and Earth Station Operator Agreements; 3.7 GHz Service Licensee Engineering Analysis.

Form Number: N/A.

Type of Review: Revision of a currently approved information collection.

Respondents: Business or other for-profit entities; Not for profit institutions; State, Local or Tribal Government.

Estimated Number of Respondents and Responses: 30 respondents and 30 responses.

Estimated Time per Response: 2 hours–5 hours.

Frequency of Response: Recordkeeping requirement; on occasion reporting requirement; third-party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in sections 1, 2, 4(i), 4(j), 5(c), 201, 302, 303, 304, 307(e), 309, and 316 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i), 154(j), 155(c), 201, 302, 303, 304, 307(e), 309, and 316.

Estimated Total Annual Burden: 120 hours.

Total Annual Costs: No costs.

Needs and Uses: On February 28, 2020, in furtherance of the goal of releasing more mid-band spectrum into the market to support and enable next-generation wireless networks, the Commission adopted a Report and Order, FCC 20–22 (*3.7 GHz Report and Order),* in which it reallocated the use of the 3.7–4.2 GHz band, also known as the C-band. Prior to the *3.7 GHz Report and Order,* the 3.7–4.2 GHz band was allocated in the United States exclusively for non-Federal use on a primary basis for Fixed Satellite Service (FSS) and Fixed Service. Domestically, space station operators used the entire 3.7–4.2 GHz band to provide downlink signals of various bandwidths to licensed transmit-receive, registered receive-only, and unregistered receive-only earth stations throughout the United States.

The *3.7 GHz Report and Order* called for the relocation of existing FSS operations in the band into the upper 200 megahertz of the band (4.0–4.2 GHz) and made available the lower 280 megahertz (3.7–3.98 GHz) for flexible use terrestrial wireless services throughout the contiguous United States through a Commission-administered public auction of overlay licenses. The Commission adopted a robust transition schedule to facilitate the prompt relocation of FSS operations so that a significant amount of spectrum could be made available quickly for next-generation wireless deployments.

On July 22, 2026, once again in furtherance of the goal of releasing more mid-band spectrum into the market to support and enable next-generation wireless networks, the Commission adopted a Report and Order, FCC 26–46 (*Upper C-band R&O*), in which it further reallocated the use of the 4.0–4.2 GHz portion of the C-Band. The 4.0–4.2 GHz band currently is allocated in the United States exclusively for non-Federal use on a primary basis for Fixed Satellite Service (FSS) and Fixed Service. Domestically, eligible space station operators use the 4.0–4.2 GHz band to provide downlink signals of various bandwidths to licensed transmit-receive, registered receive-only, and unregistered receive-only earth stations throughout the United States.

The *Upper C-band R&O* again calls for the relocation of existing FSS operations in the C-band, making an additional 160 megahertz (3.98–4.14 GHz) available for flexible-use terrestrial wireless service throughout the contiguous United States through a Commission-administered public auction of licenses that must be completed by July 4, 2027, pursuant to a mandate in the One Big Beautiful Bill Act. As before, the Commission adopted a robust transition schedule to achieve an expeditious clearing and relocation of FSS operations and ensure that a significant amount of spectrum is made available quickly for next-generation wireless deployments, while also ensuring effective accommodation of relocated incumbent users. Pursuant to the *Upper C-band R&O,* all incumbent FSS operations in the contiguous United States must clear the 4.0–4.16 GHz portion of the C-band by December 30, 2030, or June 30, 2031, to ensure a timely transition process. Some residual incumbent FSS links or services will remain in the 4.16–4.2 GHz portion of the band, while others will be relocated to other spectrum bands.

In both the *3.7 GHz Report and Order* and *Upper C-band R&O,* the Commission concluded that, once the transitions are complete, coordination measures are needed to protect any incumbent FSS operations that remain in the C-band. To accomplish this goal

most effectively, the Commission is seeking approval for a revised information collection to collect information from existing and new 3.7 GHz Service licensees as described below:

3.7 GHz Service Licensee and Earth Station Operator Agreements—(47 CFR 27.1424)

The Commission determined that 3.7 GHz Service licensees are required to comply with certain technical rules and coordination practices designed to reduce the risk of interference to incumbent operations. Specifically, 3.7 GHz Service licensees are required to comply with specific power flux density (PFD) limits to protect incumbent earth stations from out-of-band emissions and blocking and to coordinate frequency usage with incumbent Telemetry, Tracking, and Command (TT&C) earth stations. The *3.7 GHz Report and Order* and the *Upper C-band R&O* allow 3.7 GHz Service licensees and FSS C-Band earth station operators to modify these PFD limits, but they require a 3.7 GHz Service licensee that is a party to such an agreement to maintain a copy of the agreement in its station files and disclose it, upon request, to prospective license assignees, transferees, or spectrum lessees, and to the Commission. This information collection promotes safety of operations in the band and ensures that all relevant stakeholders have access to important coordination and technical aspects of the transition.

3.7 GHz Service Licensee Engineering Analysis—(3.7 GHz Report and Order at Paragraph 384, Upper C-Band R&O at Paragraph 86)

The Commission concluded in the *3.7 GHz Report and Order* and the *Upper C-band R&O* that 3.7 GHz Service licensees shall be required, post-transition, to comply with certain rules to coordinate operations, minimize interference, and protect C-band incumbents. To that end, the *3.7 GHz Report and Order* and the *Upper C-band R&O* required any 3.7 GHz Service licensee with base stations located within the appropriate coordination distance to provide upon request an engineering analysis to the TT&C operator to demonstrate their ability to comply with the applicable −6 dB I/N criteria.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1322; FR ID 370492]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice; request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

DATES: Written PRA comments should be submitted on or before December 7, 2026. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION: The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

OMB Control Number: 3060–1322.

Title: Targeting and Eliminating Unlawful Text Messages, Implementation of the Telephone Consumer Protection Act of 1991.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for profit entities, and state, local or tribal governments.

Number of Respondents and Responses: 1,184 respondents; 14,208 responses.

Estimated Time per Response: 1 hour.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information is contained in sections 4(i), 4(j), 154(i), 154(j), 227, 301, 303, 307, and 316.

Total Annual Burden: 14,208 hours.

Total Annual Cost: No cost.

Needs and Uses: Text message-based scams can include links to well-designed phishing websites that appear identical to the website of a legitimate company and can fool a victim into providing personal or financial information. Texted links can also load unwanted software onto a device, including malware that steals passwords, credentials, or other personal information. The FCC is therefore requiring all mobile wireless providers to block certain text messages that are highly likely to be illegal.

In the Text Blocking Report and Order, 88 FR 21497, April 11, 2023, the FCC is requiring mobile wireless providers to block certain text messages that are highly likely to be illegal. The Commission is requiring mobile wireless providers to block—at the network level—texts purporting to be from North American Numbering Plan (NANP) numbers on a reasonable Do-Not-Originate (DNO) list, which include numbers that purport to be from invalid, unallocated, or unused numbers, and NANP numbers for which the subscriber to the number has requested that texts purporting to originate from that number be blocked. These are texts that no reasonable consumer would wish to receive because they are highly likely to be illegal.

The FCC is also ensuring that any erroneous blocking can be quickly remedied by requiring mobile wireless providers and other entities to maintain a point of contact for texters to report erroneously blocked texts.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL DEPOSIT INSURANCE CORPORATION

Privacy Act of 1974; System of Records

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Rescindment of systems of records notice.

SUMMARY: The Federal Deposit Insurance Corporation (FDIC) is rescinding two systems of records from its existing inventory of systems of records subject to the Privacy Act of 1974. The FDIC systems of records titled FDIC–001, Honors Attorney Applicant Records, and FDIC–011, Corporate Applicant Recruiting, Evaluating, and Electronic Referral Records, were established to support the recruiting and evaluating of applicants for FDIC employment. FDIC–001 and FDIC–011 are being rescinded because they have been identified as duplicative of a government-wide system of records notice published by the U.S. Office of Personnel Management.

DATES: This action is effective on October 6, 2026.

ADDRESSES: Interested parties are invited to submit written comments identified by Privacy Act System of Records (FDIC–001/011) by any of the following methods:

- *Agency Website: https://www.fdic.gov/resources/regulations/federal-register-publications.* Follow the instructions for submitting comments on the FDIC website.
- *Email: comments@fdic.gov.* Include ''Comments—SORN (FDIC–001/011)'' in the subject line of communication.
- *Mail:* Jennifer M. Jones, Deputy Executive Secretary, Attention: Comments SORN (FDIC–001/011), Legal Division, Office of the Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street NW, Washington, DC 20429.
- *Hand Delivery/Courier:* Comments may be hand-delivered to the guard station at the rear of the 550 17th Street NW building (located on F Street NW) on business days between 7:00 a.m. and 5:00 p.m.

Public Inspection: Comments received, including any personal information provided, may be posted without change to *https://www.fdic.gov/resources/regulations/federal-register-publications.* Commenters should submit only information that the commenter wishes to make available publicly. The FDIC may review, redact, or refrain from posting all or any portion of any comment that it may deem to be inappropriate for publication, such as irrelevant or obscene material. The FDIC may post only a single representative example of identical or substantially identical comments and in such cases will generally identify the number of identical or substantially identical comments represented by the posted example. All comments that have been redacted, as well as those that have not been posted, that contain comments on the merits of this document will be retained in the public comment file and will be considered as required under all applicable laws. All comments may be accessible under the Freedom of Information Act (FOIA).

FOR FURTHER INFORMATION CONTACT: Claire Stapleton, Acting Assistant Director, Privacy, 703–516–5500, *privacy@fdic.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to the Privacy Act of 1974, 5 U.S.C. 552a, the FDIC is rescinding two systems of records: FDIC–001, Honors Attorney Applicant Records, and FDIC–011, Corporate Applicant Recruiting, Evaluating, and Electronic Referral Records. These systems of records are being rescinded because the underlying records within each are covered by an existing government-wide system of records notice (SORN) established by the U.S. Office of Personnel Management (OPM) titled OPM/GOVT–5, Recruiting, Examining, and Placement Records (last republished in full 79 FR 16834, March 26, 2014). Going forward, FDIC will rely on OPM/GOVT–5 alone as the governing SORN for these records.

A Government-wide system of records is one where a single agency has regulatory authority over records in the custody of multiple agencies, and the agency with regulatory authority publishes a SORN that applies to all of the records regardless of their custodial location. In such cases, all agencies—not just the agency with government-wide responsibilities—are responsible for complying with the terms of the SORN. *See* Office of Management and Budget Circular No. A–108, ''Federal Agency Responsibilities for Review, Reporting, and Publication under the Privacy Act.'' By rescinding FDIC–001 and FDIC–011 in favor of OPM/GOVT–5, the FDIC is seeking to ensure that its internal privacy practices for these records are consistent with the rules of OPM and that individuals whose data is maintained in these records are not confused by multiple notices describing the same set of records.

OPM/GOVT–5 was last republished in full in the **Federal Register** on March 26, 2014 (79 FR 16834). It was further modified on December 1, 2021 (86 FR 68291) and February 2, 2022 (87 FR 5874). Links to this and other Government-wide SORNs as well as FDIC SORNs may be found on FDIC's Privacy Program website at *https://www.fdic.gov/privacy.*

The rescinded systems of records will be removed from FDIC's inventory of record systems.

SYSTEM NAME AND NUMBER:

FDIC–001, Honors Attorney Applicant Records.

HISTORY:

84 FR 35184 (July 22, 2019), 90 FR 51316 (November 17, 2025).

SYSTEM NAME AND NUMBER:

FDIC–011, Corporate Applicant Recruiting, Evaluating, and Electronic Referral Records.

HISTORY:

84 FR 35184 (July 22, 2019), 90 FR 51316 (November 17, 2025).

Federal Deposit Insurance Corporation.

Dated at Washington, DC, on October 2, 2026.

Jennifer M. Jones,

Deputy Executive Secretary.

BILLING CODE 6714–01–P

FEDERAL RESERVE SYSTEM

Agency Information Collection Activities: Announcement of Board Approval Under Delegated Authority and Submission to OMB

AGENCY: Board of Governors of the Federal Reserve System.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) is adopting a proposal to extend for three years, with revision, the Applications for Employment with the Board of Governors of the Federal Reserve System (FR 28; OMB No. 7100–0181).

DATES: The revisions are effective October 5, 2026.

FOR FURTHER INFORMATION CONTACT: Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, *nuha.elmaghrabi@frb.gov,* (202) 452–3884.

Office of Management and Budget (OMB) Desk Officer for the Federal Reserve Board, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395–6974.

SUPPLEMENTARY INFORMATION: On June 15, 1984, OMB delegated to the Board authority under the Paperwork Reduction Act (PRA) to approve and assign OMB control numbers to collections of information conducted or sponsored by the Board. Board-approved collections of information are incorporated into the official OMB inventory of currently approved collections of information. The OMB inventory, as well as copies of the PRA Submission, supporting statements (which contain more detailed information about the information collections and burden estimates than this notice), and approved collection of information instrument(s) are available at *https://www.reginfo.gov/public/do/PRAMain.* These documents are also available on the Federal Reserve Board's public website at *https://www.federalreserve.gov/apps/reportingforms/review* or may be requested from the agency clearance officer, whose name appears above. On the page displayed at the link above, you can find the supporting information by referencing the collection identifier, FR 28.

Final Approval Under OMB Delegated Authority of the Extension for Three Years, With Revision, of the Following Information Collections

Collection title: Applications for Employment with the Board of Governors of the Federal Reserve System.

Collection identifier: FR 28.

OMB control number: 7100–0181.

General description of collection: The FR 28 consists of the following information collections:

The Application for Employment (FR 28a), which collects information to determine the qualifications of applicants for employment with the Board (such as education and training, employment records, and other general background information since the time the applicant left high school), the Applicant's Voluntary Self-Identification (FR 28s), which is an optional form that collects information on the applicant's sex, race, and ethnicity, the Research Assistant Application (FR 28i), which collects contact information, information on a Research Assistant (RA) applicant's level of interest in various economic topics and experience in different data analytics/programs, and application documentation (including resume, cover letter, transcripts, and letter(s) of recommendation), the Pre-Hire Conflict of Interest Screening Form (FR 28c), which collects information from external applicants after they have been selected for an interview at the Board regarding certain financial interests that could pose a conflict of interest based on the Board's supplemental ethics regulations and/or the duties of the position for which they are applying, and the Reference Check Form (FR 28r), which captures information from professional references when the Board conducts reference checks for external applicants who have received a verbal offer of employment.

Frequency: Event-generated.

Respondents: Individuals seeking employment with the Board.

Total estimated number of respondents: FR 28a (LinkedIn), 14,076; FR 28a (Resume Parsing), 18,098; FR 28a (Manual Application), 4,021; FR 28a (Use Last Application), 4,021; FR 28a (Interview Selection), 1,129; FR 28a (PDF), 238; FR 28s, 40,216; FR 28i, 800; FR 28c, 1,547; and FR 28r, 273.

Estimated average hours per response: FR 28a (LinkedIn), 0.46; FR 28a (Resume Parsing), 0.44; FR 28a (Manual Application), 0.69; FR 28a (Use Last Application), 0.26; FR 28a (Interview Selection), 0.71; FR 28a (PDF), 1.69; FR 28s, 0.02; FR 28i, 0.91; FR 28c, 0.62; and FR 28r, 0.34.

Total estimated change in burden: (1,950).

Total estimated annual burden hours: 22,045.

Current actions: On July 9, 2026, the Board published a notice in the **Federal Register** (91 FR 42441) requesting public comment for 60 days on the extension, with revision, of the FR 28. The Board proposed to revise the FR 28 by changing the collection platform of the FR 28a and FR 28s from Taleo to Workday, which will allow for three new submission methods in the Workday system (applying through LinkedIn, applying with resume parsing, and applying with previous application); the FR 28c, which is currently sent out via email, will also transition into Workday. The platform change will result in several data field changes for the FR 28a to (1) align with the configuration of Workday as the Board's new applicant tracking system (ATS) and (2) remove fields that are no longer necessary. By Fall 2028, the FR 28i will also be transitioned from ServiceNow to Workday. Before the transition of the FR 28i into Workday, one additional data field will be added in order to link applicants between ServiceNow and Workday; once the FR 28i is also in Workday, the data field will be removed. There were no proposed changes to the FR 28r as part of this clearance. The comment period for this notice expired on September 8, 2026. The Board did not receive any comments. The revisions will be implemented as proposed.

Board of Governors of the Federal Reserve System, October 2, 2026.

Erin M. Cayce,

Assistant Secretary of the Board.

[FR Doc. 2026–20478 Filed 10–5–26; 8:45 am]

BILLING CODE 6210–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2026–P–3632]

Determination PRALIDOXIME CHLORIDE (Autoinjector) (Pralidoxime Chloride) Solution, 600 Milligrams/2 Milliliters (300 Milligrams/Milliliter), Was Not Withdrawn From Sale for Reasons of Safety or Effectiveness

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA, Agency, or we) has determined that PRALIDOXIME CHLORIDE (AUTOINJECTOR) (pralidoxime chloride) solution, 600 milligrams (mg)/2 milliliters (mL) (300 mg/mL), was not withdrawn from sale for reasons of safety or effectiveness. This determination will allow FDA to approve abbreviated new drug applications (ANDAs) for pralidoxime chloride solution, 600 mg/2 mL (300 mg/mL), if all other legal and regulatory requirements are met.

FOR FURTHER INFORMATION CONTACT: Awo Archampong-Gray, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6243, Silver Spring, MD 20993–0002, 301–796–0110, *Awo.Archampong-Gray@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Section 505(j) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 355(j)) allows the submission of an ANDA to market a generic version of a previously approved drug product. To obtain approval, the ANDA applicant must show, among other things, that the generic drug product: (1) has the same active ingredient(s), dosage form, route of administration, strength, conditions of use, and (with certain exceptions) labeling as the listed drug, which is a version of the drug that was previously approved, and (2) is bioequivalent to the listed drug. ANDA applicants do not have to repeat the extensive clinical testing otherwise necessary to gain

approval of a new drug application (NDA).

Section 505(j)(7) of the FD&C Act requires FDA to publish a list of all approved drugs. FDA publishes this list as part of the ''Approved Drug Products With Therapeutic Equivalence Evaluations,'' which is known generally as the ''Orange Book.'' Under FDA regulations, drugs are removed from the list if the Agency withdraws or suspends approval of the drug's NDA or ANDA for reasons of safety or effectiveness or if FDA determines that the listed drug was withdrawn from sale for reasons of safety or effectiveness (21 CFR 314.162).

A person may petition the Agency to determine, or the Agency may determine on its own initiative, whether a listed drug was withdrawn from sale for reasons of safety or effectiveness. This determination may be made at any time after the drug has been withdrawn from sale, but must be made prior to approving an ANDA that refers to the listed drug (§ 314.161 (21 CFR 314.161)). FDA may not approve an ANDA that does not refer to a listed drug.

PRALIDOXIME CHLORIDE (AUTOINJECTOR) (pralidoxime chloride) solution, 600 mg/2 mL (300 mg/mL), is the subject of NDA 018986, held by Meridian Medical Technologies, Inc., and initially approved on April 26, 1983. PRALIDOXIME CHLORIDE (AUTOINJECTOR) is indicated for intramuscular use as an adjunct to atropine in the treatment of poisoning by nerve agents having anticholinesterase activity.

PRALIDOXIME CHLORIDE (AUTOINJECTOR) (pralidoxime chloride) solution, 600 mg/2 mL (300 mg/mL), is currently listed in the ''Discontinued Drug Product List'' section of the Orange Book.

Premier Research International, LLC, submitted a citizen petition dated March 25, 2026 (Docket No. FDA–2026–P–3632), under 21 CFR 10.30, requesting that the Agency determine whether PRALIDOXIME CHLORIDE (AUTOINJECTOR) (pralidoxime chloride) solution, 600 mg/2 mL (300 mg/mL), has been voluntarily withdrawn for reasons of safety or effectiveness.

After considering the citizen petition and reviewing Agency records and based on the information we have at this time, FDA has determined under § 314.161 that PRALIDOXIME CHLORIDE (AUTOINJECTOR) (pralidoxime chloride) solution, 600 mg/2 mL (300 mg/mL), was not withdrawn for reasons of safety or effectiveness. The petitioner has identified no data or other information suggesting that PRALIDOXIME CHLORIDE (AUTOINJECTOR) (pralidoxime chloride) solution, 600 mg/2 mL (300 mg/mL), was withdrawn for reasons of safety or effectiveness. We have carefully reviewed our files for records concerning the withdrawal of PRALIDOXIME CHLORIDE (AUTOINJECTOR) (pralidoxime chloride) solution, 600 mg/2 mL (300 mg/mL), from sale. We have also independently evaluated relevant literature and data for possible postmarketing adverse events. We have found no information that would indicate that this drug product was withdrawn from sale for reasons of safety or effectiveness.

Accordingly, the Agency will continue to list PRALIDOXIME CHLORIDE (AUTOINJECTOR) (pralidoxime chloride) solution, 600 mg/2 mL (300 mg/mL), in the ''Discontinued Drug Product List'' section of the Orange Book. The ''Discontinued Drug Product List'' delineates, among other items, drug products that have been discontinued from marketing for reasons other than safety or effectiveness. ANDAs that refer to this drug product may be approved by the Agency as long as they meet all other legal and regulatory requirements for the approval of ANDAs. If FDA determines that labeling for this drug product should be revised to meet current standards, the Agency will advise ANDA applicants to submit such labeling.

Grace R. Graham,

Deputy Commissioner for Policy, Legislation, and International Affairs.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2026–N–10429]

Design and Safety Considerations for Clinical Trials Involving Ibogaine Drug Products; Request for Information

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; request for information; establishment of a public docket.

SUMMARY: The Food and Drug Administration (FDA or the Agency) is describing the approaches it is considering for the design of early-phase clinical trials of ibogaine drug products and is opening a public docket to receive comments. The Department of Health and Human Services (HHS) is funding clinical development of ibogaine, and the first federally supported trials are expected to study ibogaine in adults with opioid use disorder (OUD) and adults with post-traumatic stress disorder (PTSD). FDA is building on the guidance for industry entitled ''Psychedelic Drugs: Considerations for Clinical Investigations'' by seeking comments, data, and information from the public on protocol elements relevant to ibogaine development—including dose selection and escalation, care setting, safety monitoring, eligibility criteria, stopping rules, and safety oversight, in part, because the Federal Government is funding work in this area. FDA will consider all information provided in response to this Request for Information (RFI) to inform whether and how these specific elements should be considered in its review of Investigational New Drug Applications (INDs) involving ibogaine.

DATES: Submit either electronic or written comments, data, or information by November 20, 2026.

ADDRESSES: You may submit comments, data, and information as follows. Please note that late, untimely filed comments will not be considered. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of November 20, 2026. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you

do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2026–N–10429 for ''Design and Safety Considerations for Clinical Trials Involving Ibogaine Drug Products; Request for Information.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Bernard Fischer, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Rm. 4208, Silver Spring, MD 20993–0002, 855–543–3784, *IbogaineRFI@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

FDA is responsible under the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 301 *et seq.*) and the Public Health Service Act for protecting and promoting the public health through the regulation of human drugs, biological products, medical devices, foods, and other products. FDA's oversight of drug products—including ibogaine drug products and other psychedelic drugs—spans preclinical investigation through the full lifecycle of an approved product. FDA remains committed to innovation and recognizes the potential of psychedelic drugs to treat substance use disorders and certain psychiatric and neurologic conditions, while upholding its public health mission to ensure that drugs are safe, effective, and of high quality.

Consistent with this commitment, FDA has taken significant steps to support implementation of Executive Order 14401 of April 18, 2026, ''Accelerating Medical Treatments for Serious Mental Illness'' (91 FR 21709, April 22, 2026). Executive Order 14401 establishes a policy of accelerating innovative research models and appropriate drug approvals to help increase access to psychedelic drugs for serious mental illness, and it specifically notes that ibogaine compounds show potential in clinical studies to address serious mental illnesses for patients whose conditions persist after completing standard therapy.

On July 14, 2026, FDA issued the final guidance for industry entitled ''Psychedelic Drugs: Considerations for Clinical Investigations'' (Psychedelics Guidance) (91 FR 43101). The guidance provides general considerations for sponsors developing psychedelic drugs for the treatment of certain medical conditions and discusses recommendations for clinical investigations using psychedelic drugs. The Agency has also allowed an early-phase clinical study of noribogaine hydrochloride, a derivative of ibogaine, to proceed under an IND as a potential treatment for alcohol use disorder. Consistent with Executive Order 14401, FDA is coordinating with other components of HHS to support the development of ibogaine drug products under appropriate safeguards, including gathering data that bears on the considerations described below.

Federal Support for Ibogaine Clinical Development

HHS, through the Advanced Research Projects Agency for Health (ARPA–H), is funding a program to collect safety and efficacy data through early-phase clinical trials. HHS, through the National Institute on Drug Abuse (NIDA), is also funding research on ibogaine for the potential treatment of OUD. Data collected through these federally funded programs, which will be made available publicly to investigators and sponsors, may support future later-stage studies to develop ibogaine under an IND.

FDA has identified serious safety risks with ibogaine drug products that have the potential for exposing human subjects to an unreasonable and significant risk of illness or injury (see 21 CFR 312.42(b)(1)(i)), including prolongation of the heart rate-corrected QT (QTc) interval and the associated risk of life-threatening arrhythmia, neurotoxicity in nonclinical studies, and uncertainty regarding an appropriate starting dose for humans. The approaches under consideration in section II are intended to address these risks to the extent possible. To accelerate development of ibogaine drug products across development programs, FDA is describing the approaches it is considering and seeking comment on each before taking any additional action, such as issuing guidance. The elements described below provide further detail of one possible approach and are consistent with the recommendations in Psychedelics Guidance. The Agency asks clinicians, researchers, prospective sponsors, patients, and the public to provide feedback.

In determining whether a proposed investigation would expose participants to an unreasonable and significant risk of illness or injury, FDA considers the seriousness of the condition, the adequacy of available therapy, and the safeguards built into the trial. FDA's

review of any IND, including an IND supported by federal funds, remains governed by the FD&C Act and FDA's regulations, and nothing in this RFI predetermines FDA's action on any submission.

Research on Ibogaine Drug Products

While published reports suggest potential benefits of ibogaine for treatment of substance use disorders and certain psychiatric and neurologic conditions—including mood disorders, PTSD, and traumatic brain injury—ibogaine also has serious known risks. Clinical data have shown that ibogaine has serious cardiovascular risks and commonly causes substantial QTc interval prolongation, which has been associated with life-threatening ventricular arrhythmias and death. Commonly reported non-cardiac adverse events include changes in perception, impaired cognition, and impaired coordination and balance (ataxia). Published nonclinical toxicology studies in rodent and non-rodent species have reported dose-dependent neurotoxicity, ranging from tremors and ataxia at lower doses to neuronal degeneration, neuroinflammation, convulsions, and death at higher doses.

The published literature on ibogaine also has significant limitations, particularly the detail needed to characterize the investigational drug product adequately (*e.g.,* dose, quality, purity, and potency). Most studies also lack participant-level data and reliable summary-level safety, efficacy, and pharmacokinetic data.

Uncertainty about the benefit-risk profile of ibogaine drug products and evidence limitations of studies involving ibogaine is not new. In 1993, FDA convened the Drug Abuse Advisory Committee to discuss an ibogaine IND for potential treatment of cocaine dependence, focusing specifically on whether sufficient safety data existed to allow testing of ibogaine in human volunteers (58 FR 38773, July 20, 1993). The discussion centered on the challenge of establishing a meaningful therapeutic window between efficacious and toxic doses. Committee members highlighted data on neurotoxicity, difficulties in appropriately characterizing risks to enable informed consent, the need for additional preclinical data, as well as the significant unmet need for treatments for cocaine use disorder.

The questions raised at that Advisory Committee meeting remain relevant today. However, ibogaine's association with QTc interval prolongation and torsades de pointes (TdP) was identified after the Advisory Committee met in 1993, so the Committee did not address strategies to mitigate this particular life-threatening risk. FDA also recognizes, notwithstanding the various known risks, the seriousness of the health conditions at issue and the severity of unmet need that patients seeking ibogaine treatments face. Given this reality, FDA seeks information that might inform selection of populations and use cases for clinical research with ibogaine drug products under an IND where the potential risks may be acceptable. Through its current research funding, and based on available data supporting potential for a favorable benefit-risk assessment, HHS is prioritizing two initial populations, adults with OUD and adults with PTSD, in which the seriousness of the condition and the limits of available therapy may justify the known risks of ibogaine in a closely monitored early-phase trial conducted under an IND.

How FDA Evaluates Drugs That Prolong the QTc Interval

Some drugs delay cardiac repolarization, which manifests on the surface electrocardiogram as prolongation of the QTc interval. QTc prolongation increases the risk of TdP, a life-threatening ventricular arrhythmia. After several drugs were withdrawn from the market because of TdP between 1991 and 2003, the International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH) guidance ''E14 Clinical Evaluation of QT/QTc Interval Prolongation and Proarrhythmic Potential for Non-Antiarrhythmic Drugs'' (ICH E14 guidance) (October 2005) was developed to address this critical safety risk. The ICH E14 guidance is applicable to chronically administered, single-dose, and episodically administered drugs. Potent QTc-prolonging drugs (*e.g.,* sotalol, dofetilide) are initiated in the hospital setting and discontinued if the QTc interval exceeds 500 milliseconds (ms), the threshold above which the overwhelming majority of drug-induced TdP cases occur. Similarly, the 500 ms threshold (marked QTc prolongation) is used as a stopping criterion in drug development. This threshold for drug discontinuation is primarily intended to prevent further drug exposure outside the hospital setting and is therefore most applicable to chronically administered drugs. Ibogaine, however, is typically administered as a single dosage regimen or occasional intermittent dosing. Because TdP occurs in a minority of patients with a QTc-interval >500 msec and can be terminated (drug infusions, direct current cardioversion, temporary transvenous pacing, etc.), it is conceivable that the benefit-risk balance of repeat ibogaine exposure could still be favorable if administered in an intensively monitored setting. Accordingly, the FDA seeks input on what data could potentially allow for repeated dosing despite known risks of TdP and corresponding established precedent for drug discontinuation among patients. FDA's preliminary thinking is that an initial trial could administer a single dose in an intensively monitored inpatient setting, as described in section II, and that data from such a trial could inform whether, and under what conditions, repeat dosing could be studied.

Experience with FDA-approved drugs may inform cardiac safety monitoring for ibogaine drug products. For example, ibutilide is an approved antiarrhythmic drug given by brief intravenous infusion to convert atrial fibrillation or atrial flutter to sinus rhythm, and it causes TdP in about 1.7 percent of patients. It should be administered by personnel trained to treat acute ventricular arrhythmias and requires continuous electrocardiographic monitoring for at least 4-hours (based on its short half-life) until the QTc-interval normalizes. Thus, while ibogaine has an active metabolite and likely would require more prolonged monitoring, the general safety monitoring approach for administration of ibutilide could be informative.

Under section 505(d) of the FD&C Act (21 U.S.C. 355(d)), for a new drug to be approved for marketing in the United States, FDA must determine that the drug is safe and effective for use under the conditions prescribed, recommended, or suggested in the product's labeling. Demonstrating effectiveness under this standard requires substantial evidence that the drug will have the effect it purports or is represented to have (see section 505(d) of the FD&C Act). Because all drugs can have adverse effects, the demonstration of safety requires a showing that the benefits of the drug outweigh its risks. Risks, such as substantial QTc prolongation, can be a basis for not approving a drug, or for placing an investigation on clinical hold, where the risk cannot feasibly be managed or outweighs the benefit, especially where the drug offers no clear advantage over available therapy and the available therapy appears to meet the needs of most patients. The benefit-risk assessment may take into consideration how serious the untreated

condition is and what benefit the drug has shown compared with existing options. Whether the risk can realistically be managed through labeling or other mechanisms is also a factor. Thus, FDA seeks input on considerations for patient safety that could help inform the Agency's evaluation of the overall benefit-risk profile of ibogaine drug products.

Other Safety Considerations for Ibogaine Drug Products

As described above, published studies in animals have reported that ibogaine can cause injury to the brain, including to the cerebellum. The 1993 Advisory Committee focused on whether a dose exists that is high enough to help patients, but low enough to avoid that injury. That question remains unresolved, and its answer depends on several issues that the published studies leave uncertain.

The most critical challenge is defining a threshold at which brain injury would be predicted to occur in humans based upon nonclinical data. If brain injury occurs only when drug exposure rises above a certain threshold, the goal would be to identify a therapeutic dose that keeps exposure below that threshold. Because neurotoxicity has been reported in several animal species, it is critical to gather nonclinical data on the blood concentrations that not only do not produce brain injury but also show no adverse effects. Comparing studies by dose alone can be misleading, because the same milligram (mg)-per-kilogram (kg) dose can result in very different blood levels depending on the animal species and how the drug is administered. FDA encourages the use of new approach methodologies in place of animal testing where appropriate.

Transient neurologic effects, particularly ataxia, are common after ibogaine administration; in one prospective study of patients with OUD who received a single 10 mg/kg dose, all participants experienced severe transient ataxia (Knuijver 2022). Whether ibogaine causes persistent neurologic or cognitive injury in humans at clinically used doses, however, has not been systematically studied, and the available reports generally lack the product characterization, exposure data, and structured follow-up needed to answer that question.

II. FDA's Initial Considerations on Trial Design for Ibogaine Drug Products

FDA welcomes INDs for ibogaine drug products and encourages sponsors to request a pre-IND meeting to discuss a specific proposed design. FDA has made no final determination as to the characteristics that would allow a trial of an ibogaine drug product to proceed, and it must evaluate whether each IND is supported by adequate scientific justification. However, based on a thorough review of available information, FDA has developed preliminary thinking [1] on a design for an initial, open-label trial in which small groups of participants each receive a single dose of ibogaine, with the dose increasing from one group to the next. This section describes that thinking and requests comments, data, and information from interested parties to facilitate the initiation of clinical trials for ibogaine drug products. This RFI does not establish legally enforceable requirements or regulatory expectations, nor does it represent FDA's final views.

Several of the elements described below apply existing requirements and recommendations to ibogaine drug products, including the informed consent requirements of 21 CFR part 50, the QTc evaluation principles in the ICH E14 guidance and FDA's guidance entitled ''E14 and S7B Clinical and Nonclinical Evaluation of QT/QTc Interval Prolongation and Proarrhythmic Potential—Questions and Answers'' (E14/S7B Q&A guidance) (August 2022), the dose-selection principles in FDA's guidance on estimating the maximum safe starting dose, and the monitoring recommendations in the Psychedelics Guidance. Other elements are not derived from existing guidance and are described here for public comment. FDA will evaluate INDs on an individual basis and consider the applicability of these (and other) elements in the context of each sponsor's unique development plan. FDA will consider the comments submitted in response to this RFI and may issue new guidance or update existing guidance in accordance with 21 CFR 10.115, or take another action, as appropriate.

A. Trial Design and Dose

An initial trial could assess whether ibogaine can be given safely under close monitoring and test whether the monitoring plan works. The main goals could be to measure how the body processes ibogaine and its active metabolite, noribogaine, in terms of both pharmacokinetics (PK) and pharmacodynamics (PD), how both ibogaine and noribogaine affect the heart, and how well participants tolerate ibogaine and noribogaine.

In initial trials, participants could be enrolled in sequential dose ascending groups, starting with an initial dose justified by the published literature and not exceeding 10 mg/kg. Within each group, participants could be dosed one at a time. A potential increase in dose for the next group could be considered after appropriate review, which may be conducted by a safety review committee (SRC), a data and safety monitoring board (DSMB), and the FDA.

CYP2D6 is the main enzyme that converts ibogaine to noribogaine, so participants could be genotyped for it, with only fast and intermediate metabolizers included, and doses adjusted if needed. Sponsors could also study whether pretreatment, such as with intravenous magnesium, reduces the magnitude of QTc-interval prolongation. The ibogaine used must be well characterized, with a certificate of analysis and the chemistry, manufacturing, and controls information required under 21 CFR 312.23(a)(7).

B. Care Setting and Monitoring

In study designs FDA is contemplating, the care setting should be an inpatient unit equipped to manage a life-threatening arrhythmia, which would likely include continuous heart rhythm monitoring, a physician-led team trained in advanced cardiac life support, a defibrillator at the bedside, drugs to treat TdP, emergency cardiac pacing, and ventilator support.

A recording before dosing (*e.g.,* 24-hour recording) should be considered to establish each participant's baseline heart rhythm. Continuous monitoring should begin at dosing, ending when there are no abnormal rhythms and the QTc interval has returned to near its pre-dose value, which could be as long as 36 hours.

More broadly, at least two staff members should monitor each participant during the drug's acute effects, including one that is a licensed mental health professional (Psychedelics Guidance). Participants should be assessed for potential adverse events, which may include ataxia, seizures, suicidal thoughts, psychosis, and other psychiatric symptoms. Cognitive testing at baseline and repeated at intervals through 12 months after dosing may help distinguish short-term effects on cognition from lasting ones.

[1] This includes review of published literature on ibogaine, regulatory experience with drugs presenting similar safety profiles, review of information regarding ibogaine administration in settings outside the United States and other information available to the Agency, and consultation with other components of the Department.

C. Medications

Before dosing, participants should stop medications that prolong the QTc-interval, slow the heart rate, interact with CYP2D6, or raise serotonin levels. These include but are not limited to opioid agonist medications (*e.g.,* methadone and buprenorphine), antipsychotics, antiemetics, and selective serotonin reuptake inhibitors (*e.g.,* paroxetine, sertraline). Any medications used to treat side effects during the trial, such as antiemetics and sleep aids, should not prolong the QTc interval.

D. Study Stopping Rules

In the scenario FDA is considering, dosing should be paused for appropriate review, which may be conducted by an SRC, a DSMB, and the FDA, if any of the following occurs:

- a participant has a sustained ventricular arrhythmia or a seizure;
- a participant's QTc prolongation above 500 ms persists more than two days;
- a participant develops new suicidal thoughts or behavior after the acute effects wear off, or lasting perceptual disturbances;
- a death or serious adverse event possibly related to ibogaine occurs; or
- two or more participants in a group have severe adverse events.

E. Safety Oversight

In the trial FDA is envisioning, the SRC should include a cardiologist. The trial should also be overseen by an independent DSMB that includes a cardiologist, a neurologist, a psychiatrist, and a biostatistician. For trials enrolling participants with OUD, both bodies should include an addiction medicine physician. FDA could also request to review the trial data in certain circumstances, which may include the occurrence of an adverse event meeting the study stopping rules or prior to allowing dose escalation in a trial cohort.

F. Discharge and Follow-Up

FDA is also envisioning that the trial would have participants stay in the telemetry monitored unit for an appropriate amount of time (*e.g.,* at least 36 hours after dosing). They should leave after meeting predetermined discharge criteria, *e.g.,* a 48-hour 12-lead ECG without QTc prolongation. Upon physician discharge approval, the patient may be escorted home by a trusted adult.

G. Who Can Enroll

Potential participants could be adults 18 to 55 years old who have stopped taking psychiatric medications. Likely exclusion criteria may include any of the following:

- structural cardiovascular disease, a baseline QTcF of 430 ms or greater, or abnormal heart rate or blood pressure;
- a personal or family history of arrhythmia or sudden cardiac death;
- a history of seizures, psychosis, or bipolar disorder;
- recent suicidal thoughts or behavior;
- a neurodegenerative or balance disorder;
- significant liver or kidney impairment; or
- pregnancy or breastfeeding.

Low serum potassium, calcium, or magnesium levels should be corrected before dosing.

H. Potential Study Populations

One prospective study population could include participants with moderate-to-severe PTSD for at least 6 months. For example, participants might have PTSD that has not responded to at least one adequate course of a selective serotonin reuptake inhibitor and one full course of PTSD-focused psychotherapy, with at least 12 months since the most recent course.

A second prospective study population could include participants with moderate or severe OUD. For example, participants might want to stop using opioids and have not achieved sustained remission in the years preceding study participation despite adequate treatment with an FDA-approved medication for OUD, including opioid agonist treatment, as well as multiple treatment attempts (outpatient, residential, inpatient).

I. Important Study Documents

FDA guidance documents, including two guidances for industry, ''E6(R3) Good Clinical Practice'' (September 2025) and ''Informed Consent Guidance for IRBs, Clinical Investigators, and Sponsors'' (August 2023), identify several essential documents that are fundamental to the planning, conduct, oversight, and evaluation of clinical trials. For this notice, the Agency highlights the following and requests comment on how these concepts should be applied in the context of ibogaine trials:

1. Informed consent. Participants must be given adequate information regarding the serious, potentially life-threatening risks of ibogaine drug products to provide informed consent for treatment.

2. Investigator's brochure. The investigator's brochure should provide an up-to-date summary of information on the investigational product and clinical and nonclinical data on the ibogaine drug product. The investigator's brochure should provide sufficient information to facilitate an understanding of the rationale for the key elements of the protocol specific to the proposed use in the clinical trial (*e.g.,* population, dosing, safety monitoring).

III. Topics for Public Input

FDA invites comment on every element described in section II. Comments are most useful if they identify the specific element addressed, state whether it should continue to be part of FDA's thinking, be modified, or if FDA should change its thinking about that element. Comments should also provide the data or clinical experience that supports that view. In addition to the preliminary thinking described above, FDA is particularly interested in comments on the following questions:

(1) General Study Design Considerations

a. Are there study populations for which a strong potential for benefit may justify the known risks of ibogaine drug products?

b. For trials enrolling participants with OUD, what approaches to discontinuing opioid agonist medications before dosing (including setting, duration, and measures to mitigate risks from loss of opioid tolerance) would best manage associated risks?

(2) Dose Selection and Escalation

a. Is a maximum dose of 10 mg/kg, reached through small, stepwise cohorts, appropriate for identifying a minimum pharmacologically active dose and an approximate MTD? Doses ranging from 5 to 20 mg/kg have been described in published clinical reports; however, these doses lack adequate safety margins based on available nonclinical data. Should dosing be based on total body weight, lean body weight, or a target exposure? Commenters are encouraged to consider the following:

i. What animal pharmacokinetic data, if any, are available or can be produced to correlate with no observed adverse effect levels in animal studies from published literature in order to determine whether adequate safety margins exist relative to anticipated human exposures to mitigate neurotoxicity risks?

ii. What threshold for neurotoxicity can be identified from animal studies across multiple species following both single and repeated dosing, and what role noribogaine, the metabolite of

ibogaine, may be playing in contributing to or modulating such effects?

iii. Given the significant limitations of published literature on clinical investigations with ibogaine, including inadequate characterization of the drug product and dose, how can clinical experience, which may include clinical neurological assessments, cognitive testing, brain imaging, or laboratory testing, be used in conjunction with animal study findings to inform appropriate monitoring strategies that would help detect, and ideally mitigate, neurotoxicity risks in clinical trials?

(3) Safety Considerations

a. Cardiac Safety Considerations. As ibogaine may have effects that last several days, it is anticipated that a multi-day cardiac safety monitoring period involving inpatient observation may be required. Potential safety monitoring requirements may include but are not limited to: (i) continuous cardiac rhythm monitoring; (ii) direct access to cardiac resuscitation; (iii) duration of electrocardiographic monitoring, given that ibogaine and its metabolite, noribogaine, are cleared slowly; and (iv) managing QTc prolongation when the full dose has already been given. Additional considerations include:

i. Given cardiac safety requirements (*e.g.,* continuous electrocardiogram monitoring, staff trained to provide advanced cardiac life support interventions, resuscitation equipment), what care setting (*e.g.,* intensive care unit or hospital telemetry) and safeguards would be needed to conduct an early phase trial of an ibogaine drug product in the United States?

ii. How should QTc prolongation be managed for a drug given as a single dose, and what potential pre-treatment to mitigate QTc prolongation and monitoring measures might inform dosing?

iii. What study design would best quantify and distinguish the effects on QTc interval change from baseline of ibogaine alone and ibogaine administered with pre-treatment with magnesium or other products intended to minimize delayed repolarization?

iv. What upper pre-treatment QTc threshold as an exclusion criterion for enrollment (*e.g.,* greater than 430 ms) would best minimize the proportion of patients who experience marked QTc prolongation of greater than 500 ms?

v. What participant-level and study-wide stopping rules would best mitigate cardiac arrythmia risks?

vi. What enrollment criteria would best minimize risk of cardia arrhythmia in early-stage trials based on the known risk factors for TdP (*e.g.,* low serum potassium, calcium, or magnesium, bradycardia, structural heart disease, other QTc-prolonging medications, a personal or family history suggesting congenital long QT syndrome, and populations with known susceptibility to arrhythmia, including women)?

b. Central Nervous System Safety Considerations. Potential safety monitoring requirements may include but are not limited to: (i) monitoring for seizures and cerebellar abnormalities, such as ataxia; (ii) precautions to minimize risk of falls; (iii) assessment of the duration and persistence of neurologic and cognitive effects; and (iv) criteria for safe discharge.

i. What clinical safety outcomes or assessments are needed to inform acute neurologic and cognitive risks?

ii. What duration of follow-up and assessments are needed to characterize long-term neurologic and cognitive sequelae to inform benefit-risk assessment?

(4) Ethical and Oversight Considerations

a. What informed consent information would ensure prospective research participants understand the serious, potentially life-threatening risks of ibogaine drug products?

b. What factors might DSMBs and Institutional Review Boards need to consider?

c. What would make data from treatment settings outside the United States useful in designing a trial, including the individual-level pharmacokinetic, electrocardiographic, and product information that would be needed to interpret it?

FDA is not seeking comments on the following topics: (1) the safety or effectiveness of any specific ibogaine drug product, or the merits of any pending or anticipated application before the Agency; (2) the scheduling status of ibogaine drug products under the Controlled Substances Act, which is addressed through separate statutory processes; (3) the legalization or decriminalization of psychedelic substances, or the merits of state or local programs authorizing their use, although FDA welcomes input on data collection from such programs as described above; (4) religious, ceremonial, or personal (non-medical) use of psychedelic substances; or (5) individual disputes, enforcement matters, or complaints regarding specific practitioners or entities. Comments addressing these topics may not be considered.

FDA will review the comments received and expects to reflect them, as appropriate, in regulatory activities, including review of protocols for federally supported and other clinical trials of ibogaine drug products and future guidance on their development.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2026–N–4291]

Teva Pharmaceuticals USA, Inc., et al.; Withdrawal of Approval of 15 Abbreviated New Drug Applications; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a notice that appeared in the **Federal Register** on May 7, 2026. The document announced the withdrawal of approval of 15 abbreviated new drug applications (ANDAs) from multiple applicants, withdrawn as of June 8, 2026. The document indicated that FDA was withdrawing approval of ANDA 210285 for dimethyl fumarate delayed-release capsule, 120 milligrams (mg) and 240 mg, held by Upsher-Smith Laboratories, LLC., U.S. Agent for Sawai USA, Inc., 6701 Evenstad Dr. N, Suite 300, Maple Grove, MN 55369. Before FDA withdrew the approval of this ANDA, Upsher-Smith Laboratories, LLC., U.S. Agent for Sawai USA, Inc., informed FDA that they did not want the approval of the ANDA withdrawn. Because Upsher-Smith Laboratories, LLC., U.S. Agent for Sawai USA, Inc., timely requested that approval of the ANDA not be withdrawn, the approval is still in effect. This notice removes the entry for ANDA 210285.

FOR FURTHER INFORMATION CONTACT: Martha Nguyen, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 75, Rm. 1676, Silver Spring, MD 20993–0002, 301–796–3471, *Martha.Nguyen@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In the **Federal Register** of Thursday, May 7, 2026 (91 FR 24879), appearing on page 24879 in FR Doc. 2026–09012, the following correction is made:

On page 24879, in the table, the entry for ANDA 210285 is removed.

Grace R. Graham,

Deputy Commissioner for Policy, Legislation, and International Affairs.

Food and Drug Administration

[Docket No. FDA–2026–N–11259]

Issuance of Priority Review Voucher; Rare Pediatric Disease Product; FAYUVI (rebisufligene etisparvovec-hopf)

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the issuance of a priority review voucher to the sponsor of a rare pediatric disease product application. The Federal Food, Drug, and Cosmetic Act (FD&C Act) authorizes FDA to award priority review vouchers to sponsors of approved rare pediatric disease product applications that meet certain criteria. FDA is required to publish notice of the award of the priority review voucher. FDA has determined that FAYUVI (rebisufligene etisparvovec-hopf), approved on September 17, 2026, manufactured by Ultragenyx Pharmaceutical Inc., meets the criteria for a priority review voucher.

FOR FURTHER INFORMATION CONTACT: Myrna Hanna, Center for Biologics Evaluation and Research, Food and Drug Administration, *industry.biologics@fda.hhs.gov,* 240–402–7911.

SUPPLEMENTARY INFORMATION: FDA is announcing the issuance of a priority review voucher to the sponsor of an approved rare pediatric disease product application. Under section 529 of the FD&C Act (21 U.S.C. 360ff), FDA will award priority review vouchers to sponsors of approved rare pediatric disease product applications that meet certain criteria. FDA has determined that FAYUVI (rebisufligene etisparvovec-hopf), manufactured by Ultragenyx Pharmaceutical Inc., meets the criteria for a priority review voucher. FAYUVI (rebisufligene etisparvovec-hopf) is an adeno-associated virus (AAV) vector-based gene therapy indicated for the treatment of neurologic manifestations of mucopolysaccharidosis type IIIA (MPS IIIA, Sanfilippo syndrome type A) in pediatric patients with preserved neurodevelopmental function.

For further information about the Rare Pediatric Disease Priority Review Voucher Program and for a link to the full text of section 529 of the FD&C Act, go to *https://www.fda.gov/industry/developing-products-rare-diseases-conditions/rare-pediatric-disease-rpd-designation-and-voucher-programs.* For further information about FAYUVI (rebisufligene etisparvovec-hopf), go to the Center for Biologics Evaluation and Research's Approved Cellular and Gene Therapy Products website at *https://www.fda.gov/vaccines-blood-biologics/cellular-gene-therapy-products/approved-cellular-and-gene-therapy-products.*

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Cancer Institute; Notice of Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the President's Cancer Panel.

The meeting will be held as a virtual meeting and will be open to the public as indicated below. Individuals who plan to view the virtual meeting and need special assistance or other reasonable accommodations to view the meeting, should notify the Contact Person listed below in advance of the meeting. The meeting can be accessed by clicking on the links below.

Name of Committee: President's Cancer Panel.

Date: October 15, 2026.

Time: 9:00 a.m. to 1:00 p.m.

Agenda: Opportunities to Reduce Obesity-Related Cancer Risk: GLP–1 Medications.

Address: National Institutes of Health, 31 Center Drive, Room 11A30B, Bethesda, MD 20892.

Meeting Format: Virtual Meeting. Access to Meeting: *https://cbiit.webex.com/weblink/register/r8def1cffd7e6e17a9b599f8f3c6e9441.*

Contact Person: Samantha L. Finstad, Ph.D., Executive Secretary, President's Cancer Panel, Office of the Director, National Cancer Institute, NIH, 31 Center Drive, Room 11A30B, MSC 2590, Bethesda, MD 20892, 240–276–6460, *samantha.finstad@nih.gov.*

Registration is not required to attend this meeting.

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

Information is also available on the PCP website: *https://prescancerpanel.cancer.gov/,* where an agenda, instructions for accessing the virtual meeting, and any additional information for the meeting will be posted when available.

Agency Information Collection Activities: Submission for OMB Review, Comment Request; Hazard Mitigation Grant Programs

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: 30-Day notice of revision and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA) will submit the information collection abstracted below to the Office of Management and Budget for review and clearance in accordance with the requirements of the Paperwork Reduction Act of 1995. FEMA invites the general public to take this opportunity to comment on a revision of a currently approved information collection. In accordance with the requirements of the Paperwork Reduction Act of 1995, this notice seeks comments concerning the information collection instruments for Hazard Mitigation Grant Programs (HMA).

DATES: Comments must be submitted on or before November 5, 2026.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection should be made to Director, Information Management Division, 500 C Street SW, Washington, DC 20472, email address *FEMA-Information-Collections-Management@fema.dhs.gov* or H-Camille Crain, Deputy Director, Documents, Design, Program Effectiveness Branch, FEMA, at 202–212–4871 or via email at *H-Camille.Crain@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: This collection of information is necessary for eligibility determinations, grants management, and compliance with other Federal laws and regulations for HMA's financial and technical assistance programs. HMA programs included in this information collection are the Flood Mitigation Assistance (FMA) program and FMA Swift Current (Swift Current), the Building Resilient Infrastructure and Communities (BRIC) program, BRIC Direct Technical Assistance (DTA), the Pre-Disaster Mitigation (PDM) program, the Safeguarding Tomorrow Revolving Loan Fund (RLF) Program, the Rehabilitation of High Hazard Potential Dams (HHPD), and the National Dam Safety Program (NDSP).

The FMA program and FMA's Swift Current is authorized by section 1366 of the National Flood Insurance Act of 1968, as amended (Pub. L. 90–448, 42 U.S.C. 4104c); the Flood Disaster Protection Act of 1973 (Pub. L. 93–234, 42 U.S.C. 4001 *et seq.*); and the National Flood Insurance Reform Act of 1994 (Pub. L. 103–325, 42 U.S.C. 4001). FMA under 44 CFR part 77 (October 1, 2021) (previously located at 44 CFR part 79) provides funding for measures taken to reduce or eliminate the long-term risk of flood damage to buildings, manufactured homes, and other structures insured under the National Flood Insurance Program (NFIP).

The BRIC program is authorized by section 203 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), as amended (Pub. L. 93–288, 42 U.S.C. 5133). The BRIC program seeks to fund effective and innovative activities that will reduce risk, increase resilience, and serve as a catalyst to encourage the whole community to invest in and adopt hazard mitigation policies. BRIC is designed to promote a national culture of preparedness and public safety by encouraging investments to protect our communities and infrastructure and strengthen our national hazard mitigation capabilities to foster resilience.

BRIC DTA provides non-financial direct technical assistance as authorized by section 203 of the Stafford Act (42 U.S.C. 5133) to eligible communities, helping them reduce risks from natural disasters and build resilience. The program offers hands-on guidance for developing and implementing mitigation projects, navigating funding opportunities, and strengthening local capability and capacity to address natural hazards. BRIC DTA focuses on ensuring communities can access resources and expertise to enhance disaster preparedness and resilience.

The PDM grant program is authorized under section 203 of the Stafford Act (42 U.S.C. 5133). PDM makes Federal funds available to State, local, Tribal, and territorial governments to plan for and implement sustainable cost-effective

measures designed to reduce the risk to individuals and property from future natural hazards, while also reducing reliance on federal funding from future disasters.

The NDSP is authorized under section 215 of the Water Resources Development Act of 1996 (Pub. L. 104–303, 33 U.S.C. 467f). The NDSP was most recently reauthorized in the Water Resources Reform and Development Act of 2024 (Pub. L. 118–272, 33 U.S.C. 467j). The NDSP enhances dam safety across the United States by reducing risks to life and property associated with dam failures through coordinated efforts among federal and state agencies to improve dam safety practices, promote public awareness, and support the development and implementation of safety programs.

The HHPD program, established under section 5006 of the Water Infrastructure Improvements for the Nation Act (Pub. L. 114–332, 33 U.S.C. 467f–2) signed on December 16, 2016, is a grant program under the NDSP. The HHPD program provides technical, planning, design, and construction assistance through grants to support the rehabilitation of eligible high hazard potential dams. 33 U.S.C. 467f–2(f) mandates the development of a risk-based priority system to identify eligible high hazard potential dams for grant funding. Applicants must coordinate with the State Dam Safety offices and State Hazard Mitigation Officer to meet grant requirements, including NFIP participation, hazard mitigation plans, floodplain management plans, risk prioritization, and state dam safety agency approval.

The Safeguarding Tomorrow RLF program, authorized under section 205 of the Stafford Act (42 U.S.C. 5135), is a competitive grant program providing capitalization grants to States, eligible Federally recognized Tribes, territories, and the District of Columbia to establish revolving loan funds that provide hazard mitigation assistance for local governments to reduce risks from natural hazards and disasters.

In accordance with 2 CFR 200.204, FEMA requires that all parties interested in receiving FEMA mitigation grants submit an application package for grant assistance. Applications and subapplications for BRIC and FMA are submitted via FEMA Grants Outcomes (FEMA GO). FEMA GO was developed to meet the intent of the e-Government initiative, authorized by Federal Financial Assistance Management Improvement Act of 1999 (Pub. L. 106–107, 31 U.S.C. 6101). This initiative requires that all Government agencies both streamline grant application processes and provide for the means to electronically create, review, and submit a grant application via the internet.

FEMA is revising this information collection by adding four new instruments for the Safeguarding Tomorrow RLF Grant (the Grants Capitalization Form, Project Proposal List, Intended Use Plan, and Environmental and Historic Preservation Checklist) and removing one instrument for the BRIC program (the BRIC National Review Panel Solicitation). The new instruments for the Safeguarding Tomorrow RLF Grant will facilitate program administration, track proposed projects, outline intended use of funds, and identify information that may be needed for an EHP review. Revisions were made to the existing EHP review instrument. FEMA is removing the BRIC National Review Panel Solicitation from this information collection to streamline the application review process. Because the application review process is now conducted entirely by internal FEMA personnel, this shift eliminates the need for external data collection, thereby reducing the regulatory burden on respondents.

This proposed information collection previously published in the **Federal Register** on February 11, 2026, at 91 FR 6238 with a 60-day public comment period. No comments were received. Two changes from the previously published notice are that FEMA is no longer adding FEMA Form FF–206–FY–26–106, HHPD Prioritization Tool to this information collection, but is adding FEMA Form FF–206–FY–26–110, Safeguarding Tomorrow Through Ongoing Risk Mitigation Revolving Loan Fund (RLF) Environmental and Historic Preservation (EHP) Checklist. The purpose of this notice is to notify the public that FEMA will submit the information collection abstracted below to the Office of Management and Budget for review and clearance.

Collection of Information

Title: Hazard Mitigation Grant Programs.

Type of Information Collection: Revision of a currently approved information collection.

OMB Number: 1660–0072.

FEMA Forms: FEMA Form FF–206–FY–22–151, Quarterly Progress Report (QPR); FEMA Form FF–206–FY–22–155, Building Resilient Infrastructure and Communities (BRIC) Direct Technical Assistance (DTA) Request Form; FEMA Form FF–206–FY–22–156, Model Statement of Assurances for Property Acquisition Projects; FEMA Form FF–206–FY–22–157, FEMA Model Deed Restriction; FEMA Form FF–206–FY–22–158, Acknowledgement of Conditions For Properties Using FEMA Hazard Mitigation Assistance Grant Funds; FEMA Form FF–206–FY–26–100, Benefit Cost Analysis (BCA) Toolkit; FEMA Form FF–206–FY–26–101, Safeguarding Tomorrow Revolving Loan Fund (RLF) Grant Capitalization Application; FEMA Form FF–206–FY–26–102 Safeguarding Tomorrow Revolving Loan Fund (RLF) Project Proposal List (PPL); FEMA Form FF–206–FY–26–103, Safeguarding Tomorrow Revolving Loan Fund (RLF) Intended Use Plan (IUP); FEMA Form FF–206–FY–26–104, FEMA Go Project Narrative Subgrant Application; FEMA Form FF–206–FY–26–109, Environmental and Historic Preservation (EHP) Review; and FEMA Form FF–206–FY–26–110, Safeguarding Tomorrow Through Ongoing Risk Mitigation Revolving Loan Fund (RLF) Environmental and Historic Preservation (EHP) Checklist.

Abstract: HMA's financial and technical assistance programs use an automated grant application and management system called FEMA GO to collect information for eligibility determinations, grants management, and compliance with other Federal laws and regulations. The FEMA GO system includes application information needed to apply for funding under these grant programs. These programs seek to reduce or eliminate risk to insured structures, increase resilience, invest in community hazard mitigation policies, and strengthen local capability and capacity to address natural hazards.

Affected Public: State, local or Tribal Governments.

Estimated Number of Respondents: 705.

Estimated Number of Responses: 25,949.

Estimated Total Annual Burden Hours: 129,858.

Estimated Total Annual Respondent Cost: $9,582,221.

Estimated Respondents' Operation and Maintenance Costs: $0.

Estimated Respondents' Capital and Start-Up Costs: $0.

Estimated Total Annual Cost to the Federal Government: $8,403,640.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the Agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the Agency's estimate of the

burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Nigel S. Allicock,

Records Management Branch Chief, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0082]

Agency Information Collection Activities; Extension, Without Change, of a Currently Approved Collection: Application To Replace Permanent Resident Card

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 60-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) invites the general public and other Federal agencies to comment upon this proposed extension of a currently approved collection of information. In accordance with the Paperwork Reduction Act (PRA) of 1995, the information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (*i.e.* the time, effort, and resources used by the respondents to respond), the estimated cost to the respondent, and the actual information collection instruments.

DATES: Comments are encouraged and will be accepted for 60 days until December 7, 2026.

ADDRESSES: All submissions received must include the OMB Control Number 1615–0082 in the body of the letter, the agency name and Docket ID USCIS–2009–0002. Submit comments via the Federal eRulemaking Portal website at *https://www.regulations.gov* under e-Docket ID number USCIS–2009–0002.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, telephone number (240) 721–3000 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *https://www.uscis.gov,* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

SUPPLEMENTARY INFORMATION:

Comments

You may access the information collection instrument with instructions or additional information by visiting the Federal eRulemaking Portal site at: *https://www.regulations.gov* and entering USCIS–2009–0002 in the search box. Comments must be submitted in English, or an English translation must be provided. All submissions will be posted, without change, to the Federal eRulemaking Portal at *https://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *https://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Extension, Without Change, of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Application To Replace Permanent Resident Card.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* I–90; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals or households. Form I–90 is used by USCIS to determine eligibility to replace a Lawful Permanent Resident Card.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I–90 (paper) is 444,601 and the estimated hour burden per response is 1.82 hours; the estimated total number of respondents for the information collection I–90 (electronic) is 296,400 and the estimated hour burden per response is 1.59 hours; and the estimated total number of respondents for the information collection biometrics is 741,001 and the estimated hour burden per response is 1.17 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 2,146,087 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $254,163,343.

Dated: October 1, 2026.

John R. Pfirrmann-Powell,

Acting Deputy Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

BILLING CODE 9111–97–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–6565–N–02]

Statutorily Mandated Designation of Difficult Development Areas and Qualified Census Tracts for 2027

AGENCY: Office of the Assistant Secretary for Policy Development and Research, HUD.

ACTION: Notice.

SUMMARY: This document designates ''Difficult Development Areas'' (DDAs) and ''Qualified Census Tracts'' (QCTs) for purposes of the Low-Income Housing Tax Credit (LIHTC). The United States Department of Housing and Urban Development (HUD) makes new DDA and QCT designations annually.

ADDRESSES: *Copies Available Electronically:* This notice and additional information about DDAs and QCTs, including the lists of DDAs and QCTs, are available electronically on the internet at *https://www.huduser.gov/portal/datasets/qct.html.*

FOR FURTHER INFORMATION CONTACT: For questions on how areas are designated and on geographic definitions, contact Richard Duckworth, Economist, Public Finance and Regulatory Analysis Division, Office of Policy Development and Research, Department of Housing and Urban Development, 451 7th Street SW, Room 8216, Washington, DC 20410–6000; telephone number 202–402–3685, or send an email to *Richard.Duckworth@hud.gov.* For specific legal questions pertaining to Internal Revenue Code (IRC) Section 42, Office of the Associate Chief Counsel, Passthroughs and Special Industries, Internal Revenue Service, 1111 Constitution Avenue NW, Washington, DC 20224; telephone number 202–317–4137. For questions about the ''HUBZone'' program, contact the Office of Government Contracting and Business Development, U.S. Small Business Administration, 409 Third Street SW, Suite 8800, Washington, DC 20416; telephone number 1–866–443–4110, or send an email to *certifications@sba.gov*. Additional copies of this notice are available through HUD User at, toll-free, 800–245–2691 for a small fee to cover duplication and mailing costs. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.*

SUPPLEMENTARY INFORMATION:

I. This Notice

Under IRC Section 42(d)(5)(B)(iii)(I),[1] for purposes of the LIHTC, the Secretary of HUD must designate DDAs, which are areas with high construction, land, and utility costs relative to area median gross income (AMGI). This notice designates DDAs for each of the 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the Northern Mariana Islands, and the U.S. Virgin Islands. HUD makes the designations of DDAs in this notice based on modified Fiscal Year (FY) 2026 Small Area Fair Market Rents (Small Area FMRs, SAFMRs), FY 2026 nonmetropolitan county FMRs, FY 2026 income limits, and 2020 Census population counts, as explained below.

Similarly, under IRC Section 42(d)(5)(B)(ii)(I), the Secretary of HUD must designate QCTs, which are areas where either 50 percent or more of the households have an income less than 60 percent of the AMGI or have a poverty rate of at least 25 percent. This notice designates QCTs based on new income and poverty data released in the American Community Survey (ACS). Specifically, HUD relies on the most recent three sets of ACS data to ensure that anomalous estimates, due to sampling error, do not affect the QCT status of tracts.

II. Data Used To Designate DDAs

HUD uses data from the 2020 Census on total population of metropolitan areas, metropolitan ZIP Code Tabulation Areas (ZCTAs), and nonmetropolitan areas in the designation of DDAs. The Office of Management and Budget (OMB) published updated metropolitan areas in OMB Bulletin No. 23–01 on July 21, 2023.[2] FY 2026 FMRs and FY 2026 income limits HUD uses to designate DDAs are based on these metropolitan statistical area (MSA) definitions, with modifications to account for substantial differences in rental housing markets (and, in some cases, median family income levels) within MSAs. HUD calculates Small Area FMRs for the ZCTAs, or portions of ZCTAs within the metropolitan areas defined by OMB Bulletin 23–01.

III. Data HUD Uses To Designate QCTs

HUD uses data from the 2020 Census on total population of census tracts, metropolitan areas, and the nonmetropolitan parts of states in the designation of QCTs. The FY 2026 income limits HUD uses to designate QCTs are based on these MSA definitions with modifications to account for substantial differences in rental housing markets (and in some cases median family income levels) within MSAs. In this QCT designation, HUD uses the OMB metropolitan area definitions published in OMB Bulletin No. 23–01, without modification, for purposes of evaluating how many census tracts can be designated under the population cap but uses the HUD-modified definitions and their associated area median family incomes for determining QCT eligibility.

Because the 2020 Decennial Census did not include questions on respondent household income, HUD uses ACS data to designate QCTs. The ACS tabulates data collected over 5 years to provide estimates of socioeconomic variables for small areas containing fewer than 65,000 persons, such as census tracts. Due to sample-related anomalies in estimates from year to year, HUD uses three sets of ACS tabulations to minimize the effect of anomalous estimates on QCT status.

IV. Background

The U.S. Department of the Treasury (Treasury) and the Internal Revenue Service (IRS) are authorized to interpret and enforce the provisions of IRC Section 42 (26 U.S.C. 42). In order to assist in understanding HUD's mandated designation of DDAs and QCTs for use in administering IRC Section 42, a summary of the section is provided below. The following summary does not purport to bind Treasury or the IRS in any way, nor does it purport to bind HUD, since HUD has authority to interpret or administer the IRC only in instances where it receives explicit statutory delegation.

V. Summary of the Low-Income Housing Tax Credit

A. Determining Eligibility

The LIHTC is a tax incentive intended to increase the availability of low-income rental housing. IRC Section 42 provides an income tax credit to certain owners of newly constructed or substantially rehabilitated low-income rental housing projects. The dollar amount of the LIHTC available for allocation by each state (credit ceiling) is limited by population. Section 42 allows each state a credit ceiling based on a statutory formula indicated at IRC Section 42(h)(3). States may carry forward unallocated credits derived from the credit ceiling for one year;

[1] 26 U.S.C. 42(d)(5)(B)(iii)(I),

[2] Available at: *https://www.whitehouse.gov/wp-content/uploads/2023/07/OMB-Bulletin-23-01.pdf.*

however, to the extent such unallocated credits are not used by then, the credits go into a national pool to be allocated to qualified states as additional credit. State and local housing agencies allocate the state's credit ceiling among low-income housing buildings whose owners have applied for the credit. Besides IRC Section 42 credits derived from the credit ceiling, states may also provide IRC Section 42 credits to owners of buildings based on the percentage of certain building costs financed by tax-exempt bond proceeds. Credits provided based on the use of tax-exempt bond proceeds do not reduce the credits available from the credit ceiling. *See* IRC Section 42(h)(4).

The credits allocated to a building are based on the cost of units placed in service as low-income units under particular minimum occupancy and maximum rent criteria. Prior to the enactment of the Consolidated Appropriations Act, 2018 (the 2018 Act), Public Law 115–141, under IRC Section 42(g), a building was required to meet one of two tests to be eligible for the LIHTC; either: (1) 20 percent of the units must be rent-restricted and occupied by tenants with incomes no higher than 50 percent of AMGI, or (2) 40 percent of the units must be rent-restricted and occupied by tenants with incomes no higher than 60 percent of AMGI. A unit is ''rent-restricted'' if the gross rent, including an allowance for tenant-paid utilities, does not exceed 30 percent of the imputed income limitation (*i.e.,* 50 percent or 60 percent of AMGI) applicable to that unit. The rent and occupancy thresholds remain in effect for at least 15 years, and building owners are required to enter into agreements to maintain the low-income character of the building for at least an additional 15 years.

The 2018 Act added a third test, the average income test. *See* IRC Section 42(g)(1) as amended by Public Law 115–141, Division T, Section 103(a) (March 23, 2018). A building meets the minimum requirements of the average income test if 40 percent or more (25 percent or more in the case of a project located in a high-cost housing area as described in IRC Section 142(d)(6)) of the residential units in such project are both rent-restricted and occupied by individuals whose income does not exceed the imputed income limitation designated by the taxpayer with respect to the respective unit. The taxpayer designates the imputed income limitation for each unit. The designated imputed income limitation of any unit is determined in 10-percentage-point increments, and may be designated as 20, 30, 40, 50, 60, 70, or 80 percent of AMGI. The average of the imputed income limitations designated must not exceed 60 percent of AMGI. *See* IRC Section 42(g)(1)(C).

B. Calculating the LIHTC

The LIHTC reduces income tax liability dollar-for-dollar. It is taken annually for a term of 10 years and is intended to yield a present value of either: (1) 70 percent of the ''qualified basis'' for new construction or substantial rehabilitation expenditures that are not federally subsidized (as defined in IRC Section 42(i)(2)), or (2) 30 percent of the qualified basis for the cost of acquiring certain existing buildings or projects that are federally subsidized. The tax credit rates are determined monthly under procedures specified in IRC Section 42 and cannot be less than 9 percent for new buildings that are not federally subsidized, and cannot be less than 4 percent for buildings that are federally subsidized. Individuals can use the credits up to a deduction equivalent of $25,000 (the actual maximum amount of credit that an individual can claim depends on the individual's marginal tax rate). For buildings placed in service after December 31, 2007, individuals can use the credits against the alternative minimum tax. Corporations, other than S or personal service corporations, can use the credits against ordinary income tax, and, for buildings placed in service after December 31, 2007, against the alternative minimum tax. These corporations also can deduct losses from the project.

The qualified basis represents the product of the building's ''applicable fraction'' and its ''eligible basis.'' The applicable fraction is based on the number of low-income units in the building as a percentage of the total number of units, or based on the floor space of low-income units as a percentage of the total floor space of residential units in the building. The eligible basis is the adjusted basis attributable to acquisition, rehabilitation, or new construction costs (depending on the type of LIHTC involved). These costs include amounts chargeable to a capital account that are incurred prior to the end of the first taxable year in which the qualified low-income building is placed in service or, at the election of the taxpayer, the end of the succeeding taxable year. In the case of buildings located in designated DDAs or designated QCTs, or for credits awarded from the state's per capita allocation, to buildings designated by the state agency, eligible basis may be increased up to 130 percent from what it would otherwise be. This means that the available credits also may be increased by up to 30 percent. For example, if a 70 percent credit is available, it effectively could be increased to as much as 91 percent (70 percent × 130 percent).

C. Defining Difficult Development Areas (DDAs) and Qualified Census Tracts (QCTs)

As stated above, IRC Section 42 defines a DDA as an area designated by the Secretary of HUD that has high construction, land, and utility costs relative to the AMGI. All designated DDAs in metropolitan areas (taken together) may not contain more than 20 percent of the aggregate population of all metropolitan areas, and all designated areas not in metropolitan areas may not contain more than 20 percent of the aggregate population of all nonmetropolitan areas. *See* IRC Section 42(d)(5)(B)(iii).

Similarly, IRC Section 42 defines a QCT as an area designated by the Secretary of HUD where, for the most recent year for which census data are available on household income in such tract, either 50 percent or more of the households in the tract have an income which is less than 60 percent of the AMGI or the tract's poverty rate is at least 25 percent. All designated QCTs in a single metropolitan area or nonmetropolitan area (taken together) may not contain more than 20 percent of the population of that metropolitan or nonmetropolitan area. Thus, unlike the restriction on DDA designations, QCTs are restricted by the total population of each individual area as opposed to the aggregate population across all metropolitan areas and nonmetropolitan areas. *See* IRC Section 42(d)(5)(B)(ii).

IRC Section 42(d)(5)(B)(v) allows states to award an increase in basis up to 30 percent to buildings located outside of federally designated DDAs and QCTs if the increase is necessary to make the building financially feasible. This state discretion applies only to buildings allocated credits under the state housing credit ceiling and is not permitted for buildings receiving credits in connection with tax-exempt bonds. Rules for such designations shall be set forth in the LIHTC-allocating agencies' qualified allocation plans (QAPs). *See* IRC Section 42(m).

VI. Explanation of HUD Designation Method

A. 2027 Difficult Development Areas

In developing the 2027 list of DDAs, as required by IRC Section 42(d)(5)(B)(iii), HUD compared housing costs with incomes. HUD used 2020

Census population for ZCTAs, and nonmetropolitan areas, and the MSA definitions, as published in OMB Bulletin 23–01 on July 21, 2023. In keeping with past practice of basing the coming year's DDA designations on data from the preceding year, the basis for these comparisons is the FY 2026 HUD income limits for very low-income households (very low-income limits, or VLILs), which are based on 50 percent of AMGI, and modified FMRs based on the FY 2026 FMRs used for the Housing Choice Voucher (HCV) program. For metropolitan DDAs, HUD used Small Area FMRs based on three annual releases of ACS data, to compensate for statistical anomalies which affect estimates for some ZCTAs. For nonmetropolitan DDAs, HUD used the FY 2026 FMRs published on August 22, 2025, and effective on October 1, 2025 (90 FR 41096), as updated by the April 21, 2026, publication effective May 21, 2026 (91 FR 21301).

In formulating the FY 2026 FMRs and VLILs, HUD modified the current OMB definitions of MSAs to account for differences in rents among areas within each current MSA that were in different FMR areas under definitions used in prior years. HUD formed these ''HUD Metro FMR Areas'' (HMFAs) in cases where one or more of the parts of newly defined MSAs were previously in separate FMR areas. All counties added to metropolitan areas are treated as HMFAs with rents and incomes based on their own county data, where available. All HMFAs are contained entirely within MSAs. (Complete details on HUD's process for determining FY 2026 FMR areas and FMRs are available at *https://www.huduser.gov/portal/datasets/fmr.html#2026.* Complete details on HUD's process for determining FY 2026 income limits are available at *https://www.huduser.gov/portal/datasets/il.html#2026*).

HUD's unit of analysis for designating metropolitan DDAs consists of ZCTAs, whose Small Area FMRs are compared to metropolitan VLILs. For purposes of computing VLILs in metropolitan areas, HUD considers entire MSAs in cases where these were not broken up into HMFAs; and HMFAs within the MSAs that were broken up for such purposes. Hereafter in this notice, the unit of analysis for designating metropolitan DDAs will be called the ZCTA, and the unit of analysis for nonmetropolitan DDAs will be the nonmetropolitan county or county equivalent area. The procedure used in making the DDA designations follows:

1. *Calculate FMR-to-Income Ratios.* For each metropolitan ZCTA and each nonmetropolitan county, HUD calculated a ratio of housing costs to income. HUD used a modified FY 2026 two-bedroom Small Area FMR for ZCTAs, a modified FY 2026 two-bedroom FMR for nonmetropolitan counties, and the FY 2026 four-person VLIL for this calculation.

The modified FY 2026 two-bedroom Small Area FMRs for ZCTAs differ from the FY 2026 Small Area FMRs in four ways. First, HUD did not limit the Small Area FMR to 150 percent of its metropolitan area FMR. Second, HUD did not limit annual decreases in Small Area FMRs to ten percent, which was first applied in the FY 2018 FMR calculations. Third, HUD adjusted the Small Area FMRs in New York City using the New York City Housing and Vacancy Survey, which is conducted by the U.S. Census Bureau, to adjust for the effect of local rent control and stabilization regulations. No other jurisdictions have provided HUD with data that could be used to adjust Small Area FMRs for rent control or stabilization regulations.[3] Finally, the Small Area FMRs are not limited to the State nonmetropolitan minimum FMR.

The FY 2026 two-bedroom FMR for nonmetropolitan counties was modified only by removing the state nonmetropolitan minimum FMR.

The numerator of the ratio, representing the development cost of housing, was the area's modified FY 2026 FMR, or modified Small Area FMR in metropolitan areas. In general, the FMR is based on the 40th-percentile gross rent paid by recent movers to live in a standard quality two-bedroom rental unit.

The denominator of the ratio, representing the maximum income of eligible tenants, was the monthly LIHTC income-based rent limit, which was calculated as 1/12 of 30 percent of 120 percent of the area's 4-person VLIL (where the VLIL was rounded to the nearest $50).

2. *Sort Areas by Ratio and Exclude Unsuitable Areas.* The ratios of the FMR, or Small Area FMR, to the LIHTC income-based rent limit were arrayed in descending order, separately, for ZCTAs and for nonmetropolitan counties. ZCTAs with populations less than 100 were excluded in order to avoid designating areas unsuitable for residential development, such as ZCTAs containing airports.

3. *Select Areas With Highest Ratios and Exclude QCTs.* The DDAs are those areas with the highest ratios that cumulatively comprise 20 percent of the 2020 population of all metropolitan areas and all nonmetropolitan areas. For purposes of applying this population cap, HUD excluded the population in areas designated as 2027 QCTs. Thus, an area can be designated as a QCT or DDA, but not both.

B. Application of Population Caps to DDA Determinations

In identifying DDAs, HUD applied caps, or limitations, as noted above. The cumulative population of metropolitan DDAs cannot exceed 20 percent of the cumulative population of all metropolitan areas, and the cumulative population of nonmetropolitan DDAs cannot exceed 20 percent of the cumulative population of all nonmetropolitan areas.

In applying these caps, HUD established procedures to deal with small overruns of the caps. The remainder of this section explains those procedures. In general, HUD stops selecting areas when it is impossible to choose another area without exceeding the applicable cap. The only exceptions to this policy are when the next eligible excluded area contains either a large absolute population or a large percentage of the total population, or the next excluded area's ranking ratio, as described above, was identical (to four decimal places) to the last area selected, and its inclusion resulted in only a minor overrun of the cap. Thus, for both the designated metropolitan and nonmetropolitan DDAs, there may be minimal overruns of the cap. HUD believes the designation of additional areas in the above examples of minimal overruns is consistent with the intent of the IRC. As long as the apparent excess is small due to measurement errors, some latitude is justifiable, because it is impossible to determine whether the 20 percent cap has been exceeded. Despite the care and effort involved in a Decennial Census, the Census Bureau and all users of the data recognize that the population counts for a given area and for the entire country are not precise. Therefore, the extent of the measurement error is unknown. There can be errors in both the numerator and denominator of the ratio of populations used in applying a 20 percent cap. In circumstances where a strict application of a 20 percent cap results in an anomalous situation, recognition of the unavoidable imprecision in the census data justifies accepting small variances above the 20 percent limit.

B. Qualified Census Tracts

In developing the list of QCTs, HUD used 2020 Census 100-percent count

[3] HUD encourages other jurisdictions with rent control laws that affect rents paid by recent movers into existing units to contact HUD about what data might be provided or collected to adjust Small Area FMRs in those jurisdictions.

data on total population, total households, and population in households; the median household income and poverty rate as estimated in the 2018–2022, 2019–2023 and 2020–2024 ACS tabulations; the FY 2026 Very Low-Income Limits (VLILs) computed at the HMFA level to determine tract eligibility; and the MSA definitions published in OMB Bulletin No. 23–01 on July 21, 2023, for determining how many eligible tracts can be designated under the statutory 20 percent population cap.

HUD uses the HMFA-level AMGIs to determine QCT eligibility because the statute, specifically IRC Section 42(d)(5)(B)(iv)(II), refers to the same section of the IRC that defines income for purposes of tenant eligibility and unit maximum rent, specifically IRC Section 42(g)(4). By rule, the IRS sets these income limits according to HUD's VLILs, which, starting in FY 2006 and thereafter, are established at the HMFA level. HUD uses the entire MSA to determine how many eligible tracts can be designated under the 20 percent population cap as required by the statute (IRC Section 42(d)(5)(B)(ii)(III)), which states that MSAs should be treated as singular areas.

HUD determined the QCTs as follows:

1. *Calculate 60 percent AMGI.* To be eligible to be designated a QCT, a census tract must have 50 percent of its households with incomes below 60 percent of AMGI or have a poverty rate of 25 percent or more. Due to potential statistical anomalies in the ACS 5-year estimates, one of these conditions must be met in at least 2 of the 3 ACS 5-year tabulations for a tract to be considered eligible for QCT designation. HUD calculates 60 percent of AMGI by multiplying by a factor of 1.2 the HMFA or nonmetropolitan county FY 2026 VLIL adjusted for inflation to match the ACS estimates, which are adjusted to the value of the dollar in the last year of the 5-year group.

2. *Determine Whether Census Tracts Have Less than 50 percent of Households Below 60 percent AMGI.* For each census tract, whether or not 50 percent of households have incomes below the 60 percent income standard (income criterion) was determined by: (a) calculating the average household size of the census tract, (b) adjusting the income standard to match the average household size, and (c) comparing the average-household-size-adjusted income standard to the median household income for the tract reported in each of the three years of ACS tabulations (2018–2022, 2019–2023 and 2020–2024). HUD did not consider estimates of median household income to be statistically reliable unless the margin of error was less than half of the estimate (or a Margin of Error Ratio, MoER, of 50 percent or less). If at least two of the three estimates were not statistically reliable by this measure, HUD determined the tract to be ineligible under the income criterion due to lack of consistently reliable median income statistics across the three ACS tabulations. Since 50 percent of households in a tract have incomes above and below the tract median household income, if the tract median household income is less than the average-household-size-adjusted income standard for the tract, then more than 50 percent of households have incomes below the standard.

3. *Estimate Poverty Rate.* For each census tract, HUD determined the poverty rate in each of the three releases of ACS tabulations (2018–2022, 2019–2023 and 2020–2024) by dividing the population with incomes below the poverty line by the population for whom poverty status has been determined. As with the evaluation of tracts under the income criterion, HUD applies a data quality standard for evaluating ACS poverty rate data in designating the 2027 QCTs. HUD did not consider estimates of the poverty rate to be statistically reliable unless both the population for whom poverty status has been determined and the number of persons below poverty had MoERs of less than 50 percent of the respective estimates. If at least two of the three poverty rate estimates were not statistically reliable, HUD determined the tract to be ineligible under the poverty rate criterion due to lack of reliable poverty statistics across the ACS tabulations.

4. *Designate QCTs Where 20 percent or Less of Population Resides in Eligible Census Tracts.* QCTs are those census tracts in which 50 percent or more of the households meet the income criterion in at least two of the three years evaluated, or 25 percent or more of the population is in poverty in at least two of the three years evaluated, such that the population of all census tracts that satisfy either one or both of these criteria does not exceed 20 percent of the total population of the respective area.

5. *Designate QCTs Where More than 20 percent of Population Resides in Eligible Census Tracts.* In areas where more than 20 percent of the population resides in eligible census tracts, census tracts are designated as QCTs in accordance with the following procedure:

a. The statistically reliable income and poverty criteria are each averaged over the three ACS tabulations (2018–2022, 2019–2023 and 2020–2024). Statistically reliable values that did not exceed the income and poverty rate thresholds were included in the average.

b. Eligible tracts are placed in one of two groups based on the averaged values of the income and poverty criteria. The first group includes tracts that satisfy both the income and poverty criteria for QCTs for at least two of the three evaluation years; a different pair of years may be used to meet each criterion. The second group includes tracts that satisfy either the income criterion in at least two of the three years, or the poverty criterion in at least two of three years, but not both. A tract must qualify by at least one of the criteria in at least two of the three evaluation years to be eligible.

c. HUD ranked tracts in the first group from highest to lowest by the average of the ratios of the tract average-household-size-adjusted income limit to the median household income. Then, HUD ranked tracts in the first group from highest to lowest by the average of the poverty rates. HUD averaged the two ranks to yield a combined rank. HUD then sorted the tracts on the combined rank, with the census tract with the highest combined rank being placed at the top of the sorted list. In the event of a tie, HUD ranked more populous tracts above less populous ones.

d. HUD ranked tracts in the second group from highest to lowest by the average of the ratios of the tract average-household-size-adjusted income limit to the median household income. Then, HUD ranked tracts in the second group from highest to lowest by the average of the poverty rates. HUD then averaged the two ranks to yield a combined rank. HUD then sorted the tracts on the combined rank, with the census tract with the highest combined rank being placed at the top of the sorted list. In the event of a tie, HUD ranked more populous tracts above less populous ones.

e. HUD stacked the ranked first group on top of the ranked second group to yield a single, concatenated, ranked list of eligible census tracts.

f. Working down the single, concatenated, ranked list of eligible tracts, HUD identified census tracts as designated until the designation of an additional tract would cause the 20 percent limit to be exceeded. If HUD does not designate a census tract because doing so would raise the percentage above 20 percent, HUD then considers subsequent eligible census tracts to determine whether one or more eligible census tract(s) with smaller

population(s) could be designated without exceeding the 20 percent limit.

C. Exceptions to OMB Definitions of MSAs and Other Geographic Matters

As stated in OMB Bulletin 23–01, defining metropolitan areas:

> OMB establishes and maintains the delineations of Core Based Statistical Areas solely for statistical purposes. . . . OMB does not take into account or attempt to anticipate any non-statistical uses that may be made of the delineations[.] . . . In cases where . . . an agency elects to use the Core Based Statistical Area definitions in non-statistical programs, it is that agency's responsibility to ensure that the delineations are appropriate for such use. . . . [A]n agency using the statistical delineations in a non-statistical program may modify the delineations; however, such potential modification would apply only to the purposes of that program. In such cases, any deviations from the Core Based Statistical Areas delineated by OMB should be clearly identified as such, in order to avoid confusion.

Following OMB guidance, HUD's estimation procedure for the FMRs and income limits incorporates the OMB definitions of metropolitan Core-Based Statistical Areas (CBSAs) based on the CBSA standards, but makes adjustments to the definitions, in order to separate subparts of these areas in cases where counties were added to an existing or newly defined metropolitan area. In CBSAs where HUD establishes subareas, it is HUD's view that the geographic extent of the housing markets is not the same as the geographic extent of the CBSAs.

In the New England states (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont), HUD defines HMFAs according to county subdivisions or minor civil divisions (MCDs), rather than county or county-equivalent boundaries. However, since no part of an HMFA is outside an OMB-defined, county-based MSA, all New England nonmetropolitan counties are kept intact for purposes of designating Nonmetropolitan DDAs.[4]

VII. Future Designations

HUD designates DDAs annually as updated HUD income limit and FMR data are made public. HUD designates QCTs annually as new income and poverty rate data are released.

A. Effective Date

The 2027 lists of QCTs and DDAs are effective:

(1) for allocations of credit after December 31, 2026; or

(2) for purposes of IRC Section 42(h)(4), if the bonds are issued and the building is placed in service after December 31, 2026.

If an area is not on a subsequent list of QCTs or DDAs, the 2027 lists are effective for the area if:

(1) the allocation of credit to an applicant is made no later than the end of the 730-day period after the applicant submits a complete application to the LIHTC-allocating agency, and the submission is made before the effective date of the subsequent lists; or

(2) for purposes of IRC Section 42(h)(4), if:

(a) the bonds are issued or the building is placed in service no later than the end of the 730-day period after the applicant submits a complete application to the bond-issuing agency, and

(b) the submission is made before the effective date of the subsequent lists, provided that both the issuance of the bonds and the placement in service of the building occur after the application is submitted.

An application is deemed to be submitted on the date it is filed if the application is determined to be complete by the credit-allocating or bond-issuing agency. A ''complete application'' means that no more than de minimis clarification of the application is required for the agency to make a decision about the allocation of tax credits or issuance of bonds requested in the application.

In the case of a ''multiphase project,'' the DDA or QCT status of the site of the project that applies for all phases of the project is that which applied when the project received its first allocation of LIHTC. For purposes of IRC Section 42(h)(4), the DDA or QCT status of the site of the project that applies for all phases of the project is that which applied when the first of the following occurred: (a) the building(s) in the first phase was (were) placed in service, or (b) the bonds were issued.

For purposes of this notice, a ''multiphase project'' is defined as a set of buildings to be constructed or rehabilitated under the rules of the LIHTC and meeting the following criteria:

(1) the multiphase composition of the project (*i.e.,* total number of buildings and phases in the project, with a description of how many buildings are to be built in each phase and when each phase is to be completed, and any other information required by the agency) is made known by the applicant in the first application of credit for any building in the project, and that the applicant identifies the buildings in the project for which credit is (or will be) sought;

(2) the aggregate amount of LIHTC applied for on behalf of, or that would eventually be allocated to, the buildings on the site exceeds the one-year limitation on credits per applicant, as defined in the QAP of the LIHTC-allocating agency, or the annual per-capita credit authority of the LIHTC allocating agency, and is the reason the applicant must request multiple allocations over 2 or more years; and

(3) all applications for LIHTC for buildings on the site are made in immediately consecutive years.

Members of the public are hereby reminded that the Secretary of Housing and Urban Development, or the Secretary's designee, has legal authority to designate DDAs and QCTs, by publishing lists of geographic entities as defined by, in the case of DDAs, the Census Bureau, the several states and the governments of the insular areas of the United States and, in the case of QCTs, by the Census Bureau; and to establish the effective dates of such lists. The Secretary of the Treasury, through the IRS thereof, has sole legal authority to interpret, and to determine and enforce compliance with the IRC and associated regulations, including **Federal Register** notices published by HUD for purposes of designating DDAs and QCTs. Representations made by any other entity as to the content of HUD notices designating DDAs and QCTs that do not precisely match the language published by HUD should not be relied upon by taxpayers in determining what actions are necessary to comply with HUD notices.

B. Interpretive Examples of Effective Date

For the convenience of readers of this notice, interpretive examples are provided below to illustrate the consequences of the effective date in areas that gain or lose QCT or DDA status. The examples covering DDAs are equally applicable to QCT designations.

(Case A) Project A is located in a 2027 DDA that is NOT a designated DDA in 2028 or 2029. A complete application for tax credits for Project A is filed with the allocating agency on November 15, 2027. Credits are allocated to Project A on October 30, 2029. Project A is eligible for the increase in basis

[4] In five of the six New England states, metropolitan and nonmetropolitan areas comprise towns instead of counties. The sixth, Connecticut, officially changed their county-equivalent geographic units from towns to planning regions (see 87 FR 34235). This change was incorporated for the first time in the 2023 American Community Survey (ACS) data and the FY2025 HUD income limits. For more information on the effect of the Connecticut geography change on HUD's Income Limits, see: *https://www.huduser.gov/portal/datasets/il.html#faq_2025.*

accorded a project in a 2027 DDA because the application was filed BEFORE January 1, 2028 (the assumed effective date for the 2028 DDA lists), and because tax credits were allocated no later than the end of the 730-day period after the filing of the complete application for an allocation of tax credits.

(Case B) Project B is located in a 2027 DDA that is NOT a designated DDA in 2028 or 2029. A complete application for tax credits for Project B is filed with the allocating agency on December 1, 2027. Credits are allocated to Project B on March 30, 2030. Project B is NOT eligible for the increase in basis accorded a project in a 2027 DDA because, although the application for an allocation of tax credits was filed BEFORE January 1, 2028 (the assumed effective date of the 2028 DDA lists), the tax credits were allocated later than the end of the 730-day period after the filing of the complete application.

(Case C) Project C is located in a 2027 DDA that was not a DDA in 2026. Project C was placed in service on November 15, 2026. A complete application for tax-exempt bond financing for Project C is filed with the bond-issuing agency on January 15, 2027. The tax-exempt bonds that will support the permanent financing of Project C are issued on September 30, 2027. Project C is NOT eligible for the increase in basis otherwise accorded a project in a 2027 DDA, because the project was placed in service BEFORE January 1, 2027.

(Case D) Project D is located in an area that is a DDA in 2027 but is NOT a DDA in 2028 or 2029. A complete application for tax-exempt bond financing for Project D is filed with the bond-issuing agency on October 30, 2027. Tax-exempt bonds are issued for Project D on April 30, 2029, but Project D is not placed in service until January 30, 2030. Project D is eligible for the increase in basis available to projects located in 2027 DDAs because: (1) one of the two events necessary for triggering the effective date for buildings described in Section 42(h)(4)(B) of the IRC (the two events being tax-exempt bonds issued and buildings placed in service) took place on April 30, 2029, within the 730-day period after a complete application for tax-exempt bond financing was filed, (2) the application was filed during a time when the location of Project D was in a DDA, and (3) both the issuance of the tax-exempt bonds and placement in service of Project D occurred after the application was submitted.

(Case E) Project E is a multiphase project located in a 2027 DDA that is NOT a designated DDA or QCT in 2028. The first phase of Project E received an allocation of credits in 2027, pursuant to an application filed March 15, 2027, which describes the multiphase composition of the project. An application for tax credits for the second phase of Project E is filed with the allocating agency by the same entity on March 15, 2028. The second phase of Project E is located on a contiguous site. Credits are allocated to the second phase of Project E on October 30, 2028. The aggregate amount of credits allocated to the two phases of Project E exceeds the amount of credits that may be allocated to an applicant in one year under the allocating agency's QAP and is the reason that applications were made in multiple phases. The second phase of Project E is, therefore, eligible for the increase in basis afforded a project in a 2027 DDA, because it meets all of the conditions to be a part of a multiphase project.

(Case F) Project F is a multiphase project located in a 2027 DDA that is NOT a designated DDA in 2028 or 2029. The first phase of Project F received an allocation of credits in 2027, pursuant to an application filed March 15, 2027, which does not describe the multiphase composition of the project. An application for tax credits for the second phase of Project F is filed with the allocating agency by the same entity on March 15, 2029. Credits are allocated to the second phase of Project F on October 30, 2029. The aggregate amount of credits allocated to the two phases of Project F exceeds the amount of credits that may be allocated to an applicant in one year under the allocating agency's QAP. The second phase of Project F is, therefore, NOT eligible for the increase in basis accorded a project in a 2027 DDA, since it does not meet all of the conditions for a multiphase project, as defined in this notice. The original application for credits for the first phase did not describe the multiphase composition of the project. Also, the application for credits for the second phase of Project F was not made in the year immediately following the first phase application year.

(Case G) Project G is located in an area that is NOT a DDA in 2027 or 2029, but is in a DDA in 2028. A complete application for tax-exempt bond financing for Project G is filed with the bond-issuing agency on October 30, 2027. Project G is placed in service on November 15, 2028 and the bonds are issued on February 20, 2029. Property G is eligible for the increase in basis available to projects located in 2028 DDAs because one of the two necessary actions (the two events being tax-exempt bonds issued and buildings placed in service) occur when the property is in a DDA and both events occur after January 1, 2028, the assumed effective date of the 2028 DDAs.

VIII. Findings and Certifications

A. Environmental Impact

This notice involves the statutorily required establishment of fiscal requirements or procedures that are related to rate and cost determinations and do not constitute a development decision affecting the physical condition of specific project areas or building sites. Accordingly, under 24 CFR 50.19(c)(6) of HUD's regulations, this notice is categorically excluded from environmental review under the National Environmental Policy Act of 1969 (42 U.S.C. 4321, *et seq.*).

B. Federalism Impact

Executive Order 13132 (entitled ''Federalism'') prohibits an agency from publishing any policy document that has federalism implications if the document either imposes substantial direct compliance costs on state and local governments and is not required by statute, or the document preempts state law, unless the agency meets the consultation and funding requirements of section 6 of the executive order. This notice merely designates DDAs and QCTs as required under IRC Section 42, as amended, for the use by political subdivisions of the states in allocating the LIHTC. This notice also details the technical methods used in making such designations. As a result, this notice is not subject to review under the order.

Reid Wilson,

Deputy Chief of Staff to the Secretary, Performing the Delegable Duties of the Principal Deputy Assistant Secretary for Policy Development and Research.

[FR Doc. 2026–20390 Filed 10–5–26; 8:45 am]

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Office of the Secretary

[2560102DM; DS6CS00000; DLSN00000.000000; OMB Control Number 1090–0012]

Agency Information Collection Activities; Submission to the Office of Management and Budget; Improving Customer Experience (OMB Circular A–11, Section 280 Implementation)

AGENCY: Department of the Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, we, the Department of the Interior are proposing to renew an information collection.

DATES: Interested persons are invited to submit comments on or before November 5, 2026.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain*. Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function. Please provide a copy of your comments to Jeffrey Parrillo, Departmental Information Collection Clearance Officer, 1849 C Street NW, Washington, DC 20240; or by email to *DOI-PRA@ios.doi.gov*. Please reference OMB Control Number 1090–0012 in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: Jeffrey Parrillo, Departmental Information Collection Clearance Officer, by email at *DOI-PRA@ios.doi.gov,* or by telephone at (202) 208–7072. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. You may also view the information collection request at *https://www.reginfo.gov/public/do/PRAMain*.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act (PRA; 44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR part 1320, all information collections require approval under the PRA. We may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number.

On April 9, 2026, we published in the **Federal Register** (91 FR 17984) a notice of our intent to request that OMB approve this information collection. In that notice, we solicited comments for 60 days, ending on June 8, 2026. We did not receive any comments in response to that notice.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again inviting the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are especially interested in public comments addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personally identifiable information in your comment, you should be aware that your entire comment—including your personally identifiable information—may be publicly available at any time. While you can ask us in your comment to withhold your personally identifiable information from public review, we cannot guarantee that we will be able to do so.

Abstract: A modern, streamlined and responsive customer experience means: raising government-wide customer experience to the average of the private sector service industry; developing indicators for high-impact Federal programs to monitor progress towards excellent customer experience and mature digital services; and providing the structure (including increasing transparency) and resources to ensure customer experience is a focal point for agency leadership.

This information collection activity provides a means to garner customer and stakeholder feedback in an efficient, timely manner in accordance with the Administration's commitment to improving customer service delivery as discussed in Section 280 of OMB Circular A–11 at *https://www.whitehouse.gov/wp-content/uploads/2025/08/a11.pdf*.

As discussed in OMB guidance, agencies should identify their highest impact customer journeys (using customer volume, annual program cost, and/or knowledge of customer priority as weighting factors) and select touchpoints/transactions within those journeys to collect feedback.

These results will be used to improve the delivery of Federal services and programs. It will also provide government-wide data on customer experience that can be displayed on *www.performance.gov* to help build transparency and accountability of Federal programs with the customers they serve.

As a general matter, these information collections will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

The Department of the Interior will only submit collections if they meet the following criteria.

- The collections are voluntary;
- The collections are low-burden for respondents (based on considerations of total burden hours or burden-hours per respondent) and are low-cost for both the respondents and the Federal Government;
- The collections are noncontroversial and do not raise issues of concern to other Federal agencies;
- Any collection is targeted at the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future;
- Personally identifiable information (PII) is collected only to the extent necessary and is not retained;
- Information gathered is intended to be used for general service improvement and program management purposes
- Upon agreement between OMB and the agency, all or a subset of information may be released as part of A–11, Section 280 requirements on performance.gov. Summaries of customer research and user testing activities may be included in public-facing customer journey maps.
- Additional release of data must be done in coordination with OMB.

These collections will allow for ongoing, collaborative and actionable communications between the Agency, its customers and stakeholders, and OMB as it monitors agency compliance on Section 280. These responses will inform efforts to improve or maintain the quality of service offered to the public. If this information is not

collected, vital feedback from customers and stakeholders on services will be unavailable.

Title of Collection: Improving Customer Experience (OMB Circular A–11, Section 280 Implementation).

OMB Control Number: 1090–0012.

Form Number: None.

Type of Review: Extension without change of a currently approved collection.

Respondents/Affected Public: Individuals/Households, Private Sector, and State/local/Tribal Governments.

Total Estimated Number of Annual Respondents: 146,384.

Total Estimated Number of Annual Responses: 146,384.

Estimated Completion Time per Response: Varied, dependent upon the possible response time to complete a questionnaire or survey may be 3 minutes up to 90 minutes to participate in an interview based on the data collection method used.

Total Estimated Number of Annual Burden Hours: 13,876.

Respondent's Obligation: Required to obtain or retain a benefit.

Frequency of Collection: On occasion.

Total Estimated Annual Nonhour Burden Cost: None.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Jeffrey Parrillo,

Departmental Information Collection Clearance Officer.

BILLING CODE 4334–63–P

DEPARTMENT OF JUSTICE

Federal Bureau of Investigation

[OMB Number 1110–0008]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Extension of a Currently Approved Collection; Title—Monthly Return of Arson Offenses Known to Law Enforcement

AGENCY: FBI, Department of Justice (DOJ).

ACTION: 60-Day notice.

SUMMARY: The DOJ, FBI, Criminal Justice Information Services (CJIS) Division, is submitting the following information collection request to the Office of Management and Budget for review and approval in accordance with the Paperwork Reduction Act (PRA) of 1995.

DATES: DOJ encourages public comment and will accept input until December 7, 2026.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Matthew B. Fancher, Crime and Law Enforcement Statistics Unit Chief, FBI, CJIS Division, Module D–1, 1000 Custer Hollow Road, Clarksburg, West Virginia 26306, 304–625–4830.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

➢ Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the FBI, including whether the information will have practical utility;

➢ Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

➢ Evaluate whether, and if so, how the quality, utility, and clarity of the information to be collected can be enhanced; and

➢ Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (*e.g.,* permitting electronic submission of responses).

Abstract: Under 34 United States Code 41303, Uniform Federal Crime Reporting Act of 1988; the Anti-Arson Act of 1982; and FBI, General Functions, 28 Code of Federal Regulations § 0.85 (f); this collection requests the number of reported arson offenses from federal, state, local, tribal, and territorial LEAs in order for the FBI's Uniform Crime Reporting (UCR) Program to serve as the national clearinghouse for the collection and dissemination of arson data and to publish these statistics.

Overview of This Information Collection

1. *Type of Information Collection:* Extension of a currently approved collection.

2. *The Title of the Form/Collection:* Monthly Return of Arson Offenses Known to Law Enforcement.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* The form number is 1–725. The applicable component within DOJ is the CJIS Division in the FBI.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Federal, state, local, tribal, and territorial law enforcement agencies (LEAs).

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated number of LEAs submitting arson data to the UCR Program monthly is 3,671. The estimated time it takes for an average respondent to respond is 9 minutes.

6. *An estimate of the total public burden (in hours) associated with the collection: Annually,* the estimated 3,671 LEAs submit an estimated 44,052 responses (3,671 LEAs × 12 months = 44,052 responses). Therefore, the estimated annual public burden is 6,607 hours. ([44,052 annual responses × 9 minutes per response]/60 minutes per hour = 6,607 total annual hours.]

7. According to the U.S. Bureau of Labor Statistics for 2023, the mean hourly wage of law enforcement officers is $36.80. An estimate of the total annual cost burden associated with the collection: $243,137.06 (6,607 annual hours × $36.80).

TOTAL BURDEN HOURS

Activity	Number of respondents	Frequency (annually)	Total annual responses	Time per response (minutes)	Total annual burden (hours)
UCR Participation Burden Estimation	3,671	12	44,052	9	6,607
Unduplicated Totals	3,761		44,052		6,607

If additional information is required contact: Darwin Arceo, DOJ Clearance Officer, United States Department of Justice, Justice Management Division, Enterprise Portfolio Management, Two Constitution Square, 145 N Street NE, 3E.405A, Washington, DC 20530.

Dated: October 2, 2026.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–02–P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA–2027–001]

Privacy Act of 1974; System of Records

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice revising a system of records.

SUMMARY: We propose to revise a system of records in our existing inventory of systems subject to the Privacy Act of 1974. The system is NARA 44, Reasonable Accommodation Request Records. We are updating the new system manager and system location due to organizational changes at the agency. NARA also proposes to expand the system to include requests for reasonable accommodations involving pregnancy or childbirth and the associated authority for collecting this information. Further, NARA proposes to use an internal web-based application and database for some of the records in this system to modernize the agency's receipt, processing, and monitoring reasonable accommodation requests and maintaining the associated records. In this notice, we publish the system of records notice in full for public notice and comment.

DATES: Submit comments on this system of records by November 5, 2026. This revised systems of records, NARA 44, is effective on November 16, 2026 unless we receive comments that necessitate revising the SORN.

ADDRESSES: You may submit comments, identified by ''SORN NARA 44'' by email to *regulation_comments@nara.gov.* Include ''SORN NARA 44'' in the subject line of the message.

Instructions: All submissions must include SORN NARA 44 so we can identify what the comment is responding to. We may publish any comments we receive without changes, including any personal information you include.

FOR FURTHER INFORMATION CONTACT: Courtney Whatley, Agency Accommodation Program Manager, by email at *courtney.whatley@nara.gov.*

SUPPLEMENTARY INFORMATION: Our Reasonable Accommodation Request Records system of records (NARA 44) includes records of requests, processing, and decisions for reasonable accommodations submitted by current and former NARA employees and applicants. It specifically mentions accommodations for employees and applicants with disabilities and for religious reasons. NARA proposes to expand the system to include requests for reasonable accommodations involving pregnancy or childbirth under the Pregnant Workers Fairness Act (PWFA), Public Law 117–328, and citing this authority for collecting this information. NARA is also updating the new system manager and system location due to organizational changes at the agency. Further, NARA proposes to use an internal web-based application and database for some of the records in this system to modernize the agency's receipt, processing, and monitoring reasonable accommodation requests and maintaining the associated records.

The Privacy Act of 1974, as amended (5 U.S.C. 552a) (''Privacy Act''), provides certain safeguards for an individual against an invasion of personal privacy. It requires Federal agencies that disseminate any record of personally identifiable information to do so in a manner that assures the action is for a necessary and lawful purpose, the information is current and accurate for its intended use, and the agency provides adequate safeguards to prevent misuse of such information. NARA intends to follow these principles when transferring information to another agency or individual as a ''routine use,'' including assuring that the information is relevant for the purposes for which it is transferred.

Bradford P. Wilson

Archivist of the United States.

NARA 44

SYSTEM NAME AND NUMBER:

Reasonable Accommodation Request Records, NARA 44.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

The Office of the Chief of Management and Administration at the National Archives in College Park maintains reasonable accommodation request files. The system address is the same as the system manager address.

SYSTEM MANAGER:

For these case files, the system manager is the Chief of Management and Administration Officer. The business addresses for system managers are listed in Appendix B, last republished September 27, 2018 (*83 FR 48869*). As system manager contact information is subject to change, for the most up-to-date information, visit our website at *www.archives.gov/privacy/inventory.*

AUTHORITY FOR MAINTAINING THE SYSTEM:

5 U.S.C. 552a(a)(3), as amended.

44 U.S.C. 2104(a), as amended.

The Americans with Disabilities Act of 1990, as amended.

Title VII of the Civil Rights Act of 1964, as amended.

29 U.S.C. 791.

Executive Order 13164.

29 CFR part 1614.

The Pregnant Workers Fairness Act (PWFA), Public Law 117–328.

PURPOSE OF THE SYSTEM:

We use the information in this system to process and implement employee reasonable accommodation requests and any resulting accommodation.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals covered by this system include current and former NARA employees and applicants who have requested accommodation pursuant to NARA policy for processing reasonable accommodation requests. This includes accommodations for employees and applicants who have requested accommodations related to: disability, religion, pregnancy, childbirth, or related medical conditions.

CATEGORIES OF RECORDS IN THE SYSTEM:

Reasonable accommodation request records may contain some or all of the following records: Requests for reasonable accommodation including medical records or religious information, notes or records made during consideration of requests, and decisions on requests. These records may contain: The employee or applicant's name, email address, mailing address, phone number, medical information, information on their religious beliefs and practices, and any additional information provided by the employee related to the processing of the request. If an accommodation request is made by a family member, health professional, or representative of a NARA employee or applicant, the records may also contain that

requestor's name, email address, mailing address, phone number, and any additional information provided by the requestor relating to the processing of the request.

RECORD SOURCE CATEGORIES:

NARA obtains information in these files from employees, applicants, and any family members, health professionals, or representatives of a NARA employee or applicant, who request reasonable accommodation.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

We maintain reasonable accommodation request files to (or for):

(a) Process and implement employee requests for reasonable accommodations, including manager review, reasonable accommodation staff review, medical or health staff review, and sharing with other people necessary to process or implement the request and any resulting accommodation;

(b) disclosures generally permitted under *5 U.S.C. 552a(b)* of the Privacy Act; and

(c) routine uses A, B, C, D, E, F, G, H, and I listed in Appendix A apply to this system. Appendix A was last republished on December 20, 2013 (*78 FR 77255, 77287*). For the most up-to-date information, see the Appendix on our website at *www.archives.gov/privacy/inventory.*

POLICIES AND PRACTICES FOR STORING RECORDS:

Paper and electronic records.

POLICIES AND PRACTICES FOR RETRIEVING RECORDS:

Staff may retrieve information in these case files by the name of the employee or applicant, or by request number.

POLICIES AND PRACTICES FOR RETAINING AND DISPOSING OF RECORDS:

Reasonable accommodation request records are temporary records and we destroy them in accordance with disposition instructions in the NARA Records Schedule (a supplement to the NARA Files Maintenance and Records Disposition Manual). Individuals may request a copy of the disposition instructions from the NARA Privacy Act Officer (at the address listed in Appendix B).

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Electronic records are stored within NARA's secure cloud-based system. All data is encrypted in transit and at rest in storage. In addition to other electronic records in this Privacy Act system, NARA operates an internal web application and database to receive, monitor, and maintain data on employee requests for reasonable accommodation. This application and database can only be accessed through NARA's internal private network, and users of this internal application must have a NARA authorized account. Access to the data within the web application and database is restricted to authorized employees and contractors. Other employees and contractors may be granted access on a need-to-know basis.

All electronic files and records in this system are protected by NARA privacy safeguards and security protocols designed to meet Federal cybersecurity and privacy standards, including those required by the Federal Information Security Modernization Act of 2014 (FISMA), OMB, and the National Institute of Standards and Technology (NIST). Authorized NARA personnel access electronic records via workstations and laptops located in attended offices or through NARA's secure remote-access capabilities.

During normal hours of operation, we maintain paper records in areas accessible only by authorized NARA personnel. After business hours, buildings have security guards and secured doors, and electronic surveillance equipment monitors all entrances.

RECORDS ACCESS PROCEDURES:

People who wish to access their records should submit a request in writing to the NARA Privacy Act Officer at the address listed in Appendix B.

CONTESTING RECORDS PROCEDURES:

NARA's rules for contesting the contents of a person's records and appealing initial determinations are in *36 CFR part 1202.*

NOTIFICATION PROCEDURES:

People inquiring about their records should notify the NARA Privacy Act Officer at the address listed in Appendix B.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

Last republished as a full notice on January 28, 2022 (87 FR 4661).

Bradford P. Wilson,

Archivist of the United States.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Office of Government Information Services

[NARA–2027–002]

Meeting of the Chief Freedom of Information Act Officers Council

AGENCY: Office of Government Information Services (OGIS), National Archives and Records Administration (NARA) and Office of Information Policy (OIP), U.S. Department of Justice (DOJ).

ACTION: Notice of meeting.

SUMMARY: We are announcing a meeting of the Chief Freedom of Information Act (FOIA) Officers Council, co-chaired by the Director of OGIS and the Director of OIP.

DATES: The meeting will be on Thursday, October 22, 2026, from 10:00 a.m. to 12:30 p.m. ET. You must register to attend. (See registration information below.)

ADDRESSES: This meeting will be a virtual meeting. We will send access instructions for the meeting to those who register according to the instructions below.

FOR FURTHER INFORMATION CONTACT: Martha Murphy, by email at *ogis@nara.gov* with the subject line ''Chief FOIA Officers Council,'' or by telephone at 202–741–5770.

SUPPLEMENTARY INFORMATION: This meeting is open to the public in accordance with the Freedom of Information Act (5 U.S.C. 552(k)). Additional details about the meeting, including the agenda, will be available on the Chief FOIA Officers Council website at *https://www.foia.gov/chief-foia-officers-council.*

Procedures: The virtual meeting is open to the public. If you wish to offer oral public comments during the public comments periods of the meeting, you must register in advance at *https://nara.zoomgov.com/webinar/register/WN_nmDV4ldSTCO54EFeDjxWDw.* You will be provided with information to access the meeting online. Public comments will be limited to three minutes per individual. We will also live-stream the meeting on the National Archives YouTube channel, *https://www.youtube.com/live/JkcgAHqoSps,* and include a captioning option. To request additional accommodations (*e.g.,* a transcript), email *ogis@nara.gov* or call 202–741–5770. Members of the media who wish to register, those who are unable to register online, and those who require special accommodations,

should contact Martha Murphy (contact information listed above).

Dated: October 1, 2026.

Alina M. Semo,

Director, Office of Government Information Services.

BILLING CODE 7515–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2026–4291]

Applications for Amendments to Facility Operating Licenses Involving Proposed No Significant Hazards Consideration Determination and Containing Sensitive Unclassified Non-Safeguards Information and Order Imposing Procedures for Access to Sensitive Unclassified Non-Safeguards Information

AGENCY: Nuclear Regulatory Commission.

ACTION: License amendment request; notice of opportunity to comment, request a hearing, and petition for leave to intervene; order imposing procedures.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC, the Commission) received, and is considering approval of, two requests to amend three licenses. The license amendment requests are for Cooper Nuclear Station and Vogtle Electric Generating Plant, Units 1 and 2. For each license amendment request, the NRC proposes to determine that it involves no significant hazards consideration (NSHC). Because each amendment request contains sensitive unclassified non-safeguards information (SUNSI), the NRC is issuing an order imposing procedures to obtain access to SUNSI for contention preparation by persons who file a hearing request or petition for leave to intervene.

DATES: Comments must be filed by November 5, 2026. A request for a hearing or petitions for leave to intervene must be filed by December 7, 2026. Any potential party as defined in section 2.4 of title 10 of the *Code of Federal Regulations* (10 CFR) who believes access to SUNSI is necessary to respond to this notice must request document access by October 16, 2026.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website.

- *Federal rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2026–4291. Address questions about Docket IDs in *Regulations.gov* to Bridget Curran; telephone: 301–415–1003; email: *Bridget.Curran@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Office of Nuclear Material Safety and Safeguards, Mail Stop: TWFN–5–A85, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Guidance and Publications Branch.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Susan Lent, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–1365; email: *Susan.Lent@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2026–4291, facility name, unit number(s), docket number(s), application date, and subject when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2026–4291.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin ADAMS Public Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.
- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2026–4291, facility name, unit number(s), docket number(s), application date, and subject, in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Pursuant to section 189a.(1)–(2) of the Atomic Energy Act of 1954, as amended (the Act), the NRC is publishing this notice. The Act requires the Commission to publish notice of any amendments issued or proposed to be issued and grants the Commission the authority to issue and make immediately effective any amendment to an operating license or combined license, as applicable, upon a determination by the Commission that such amendment involves NSHC, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This notice includes notices of amendments containing SUNSI.

III. Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The Commission has made a proposed determination that the following amendment requests involve NSHC. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or

consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown as follows.

The Commission is seeking public comments on these proposed determinations. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendments until the expiration of 60 days after the date of publication of this notice. The Commission may issue any of these license amendments before expiration of the 60-day period provided that its final determination is that the amendments involves no significant hazards consideration. In addition, the Commission may issue any of these amendments prior to the expiration of the 30-day comment period if circumstances change during the 30-day comment period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility. If the Commission takes action on any of these amendments prior to the expiration of either the comment period or the notice period, it will publish a notice of issuance in the **Federal Register**. If the Commission makes a final no significant hazards consideration determination for any of these amendments, any hearing on those amendments will take place after issuance. The Commission expects that the need to take this action will occur very infrequently.

A. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any person (petitioner) whose interest may be affected by any of these actions may file a request for a hearing and petition for leave to intervene (petition) with respect to that action. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult 10 CFR 2.309. If a petition is filed, the Commission or a presiding officer will rule on the petition and, if appropriate, a notice of a hearing will be issued.

Petitions must be filed no later than 60 days from the date of publication of this notice in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document. Petitions and motions for leave to file new or amended contentions that are filed after the deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii).

If a hearing is requested, and the Commission has not made a final determination on the issue of no significant hazards consideration, the Commission will make a final determination on the issue of no significant hazards consideration, which will serve to establish when the hearing is held. If the final determination is that the license amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing would take place after issuance of the amendment. If the final determination is that the license amendment request involves a significant hazards consideration, then any hearing held would take place before the issuance of the amendment unless the Commission finds an imminent danger to the health or safety of the public, in which case it will issue an appropriate order or rule under 10 CFR part 2.

A State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h) no later than 60 days from the date of publication of this notice. Alternatively, a State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof, may participate as a non-party under 10 CFR 2.315(c).

For information about filing a petition and about participation by a person not a party under 10 CFR 2.315, see ADAMS Accession No. ML20340A053 (*https://adamswebsearch2.nrc.gov/webSearch2/main.jsp?AccessionNumber=ML20340A053*) and the NRC's public website (*https://www.nrc.gov/about-nrc/regulatory/adjudicatory/hearing.html#participate*).

B. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings, including documents filed by an interested State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof that requests to participate under 10 CFR 2.315(c), must be filed in accordance with 10 CFR 2.302. The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases, to mail copies on electronic storage media, unless an exemption permitting an alternative filing method, as further discussed, is granted. Detailed guidance on electronic submissions is located in the ''Guidance for Electronic Submissions to the NRC'' (ADAMS Accession No. ML13031A056), and on the NRC's public website (*https://www.nrc.gov/site-help/e-submittals.html*).

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *Hearing.Docket@nrc.gov,* or by telephone at 301–415–1677, to: (1) request a digital identification (ID) certificate, which allows the participant (or their counsel or representative) to digitally sign submissions and access the E-Filing system for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition or other adjudicatory document (even in instances in which the participant, or their counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public website (*https://www.nrc.gov/site-help/e-submittals/getting-started.html*). After a digital ID certificate is obtained and a docket is created, the participant must submit adjudicatory documents in the Portable Document Format. Guidance on submissions is available on the NRC's public website (*https://www.nrc.gov/site-help/electronic-sub-ref-mat.html*). A filing is considered complete at the time the document is submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. ET on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email confirming receipt of the document. The E-Filing system also distributes an email that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed in order to obtain

access to the documents via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC's Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public website (*https://www.nrc.gov/site-help/e-submittals.html*), by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., ET, Monday through Friday, except Federal holidays.

Participants who believe that they have good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted in accordance with 10 CFR 2.302(b)–(d). Participants filing adjudicatory documents in this manner are responsible for serving their documents on all other participants. Participants granted an exemption under 10 CFR 2.302(g)(2) must still meet the electronic formatting requirement in 10 CFR 2.302(g)(1), unless the participant also seeks and is granted an exemption from 10 CFR 2.302(g)(1).

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket, which is publicly available on the NRC's public website (*https://ehd.nrc.gov*), unless otherwise excluded pursuant to an order of the presiding officer. If you do not have an NRC-issued digital ID certificate as previously described, click ''cancel'' when the link requests certificates and you will be automatically directed to the NRC's electronic hearing docket where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal privacy information such as social security numbers, home addresses, or personal phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants should not include copyrighted materials in their submission.

The following table provides the plant name(s), docket number(s), date of application, ADAMS accession number, and location in the application of the licensee's proposed NSHC determination. For further details with respect to these license amendment applications, see the applications for amendment, publicly available portions of which are available for public inspection in ADAMS. For additional direction on accessing information related to this document, see the ''Obtaining Information and Submitting Comments'' section of this document.

Nebraska Public Power District; Cooper Nuclear Station; Nemaha County, NE

Docket No	50–298.
Application Date	July 8, 2026.
ADAMS Accession No	ML26189A402.
Location in Application of NSHC	Pages 6–8 of Attachment 1.
Brief Description of Amendment	The proposed amendment would modify technical specification (TS) requirements to permit the use of Risk-Informed Completion Times in accordance with Technical Specifications Task Force (TSTF) Traveler TSTF–505, Revision 2, ''Provide Risk-Informed Extended Completion Times—RITSTF [Risk-Informed TSTF] Initiative 4b'' (ML18183A493). The proposed amendment would incorporate NRC-approved Traveler TSTF–591, Revision 0, ''Revise the Risk Informed Completion Time (RICT) Program'' (ML22081A224). Lastly, the proposed amendment would adopt TSTF–439, Revision 2, ''Eliminate Second Completion Times Limiting Time from Discovery of Failure to Meet an LCO [Limiting Condition for Operation]'' (ML051860296), which involves the elimination of second Completion Times currently specified in the TS. Adopting TSTF–439 is a prerequisite to applying a risk-informed Completion Time to certain TS Required Actions.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	John C. McClure, Executive Vice President, External Affairs and General Counsel, Nebraska Public Power District, P.O. Box 499, Columbus, NE 68601.
NRC Project Manager, Telephone Number	Thomas Byrd, 301–415–3719.

Southern Nuclear Operating Company, Inc.; Vogtle Electric Generating Plant, Units 1 and 2; Burke County, GA

Docket Nos	50–424, 50–425.
Application Date	July 17, 2026.
ADAMS Accession No	ML26198A221.
Location in Application of NSHC	Pages E2–57—E2–59, of Enclosure 2.
Brief Description of Amendments	The proposed amendments would extend the use of lead test assemblies (LTAs) to demonstrate operating characteristics for accident-tolerant fuel (ATF). The proposed amendment request proposes to change Technical Specifications 2.1.1.2 and 4.2.1 to authorize the operation of four ATF LTAs for a third cycle.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Millicent Ronnlund, Vice President and General Counsel, Southern Nuclear Operating Co., Inc., P.O. Box 1295, Birmingham, AL 35201–1295.
NRC Project Manager, Telephone Number	John Lamb, 301–415–3100.

Order Imposing Procedures for Access to Sensitive Unclassified Non-Safeguards Information for Contention Preparation; Nebraska Public Power District; Cooper Nuclear Station; Nemaha County, NE; Southern Nuclear Operating Company, Inc.; Vogtle Electric Generating Plant, Units 1 and 2; Burke County, GA

A. This Order contains instructions regarding how potential parties to this proceeding may request access to documents containing SUNSI.

B. Within 10 days after publication of this notice of hearing or opportunity for hearing, any potential party who believes access to SUNSI is necessary to respond to this notice may request access to SUNSI. A ''potential party'' is any person who intends to participate as a party by demonstrating standing and filing an admissible contention under 10 CFR 2.309. Requests for access to SUNSI submitted later than 10 days after publication of this notice will not be considered absent a showing of good cause for the late filing, addressing why the request could not have been filed earlier.

C. The requestor shall submit a letter requesting permission to access SUNSI to the Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemakings and Adjudications Staff, and provide a copy to the Deputy General Counsel for Licensing, Hearings, and Enforcement, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001. The expedited delivery or courier mail address for both offices is: U.S. Nuclear Regulatory Commission, 11555 Rockville Pike, Rockville, Maryland 20852. The email addresses for the Office of the Secretary and the Office of the General Counsel are *Hearing.Docket@nrc.gov* and *RidsOgc MailCenter.Resource@nrc.gov,* respectively.[1] The request must include the following information:

(1) A description of the licensing action with a citation to this **Federal Register** notice;

(2) The name and address of the potential party and a description of the potential party's particularized interest that could be harmed by the action identified in C.(1); and

(3) The identity of the individual or entity requesting access to SUNSI and the requestor's basis for the need for the information in order to meaningfully participate in this adjudicatory proceeding. In particular, the request must explain why publicly available versions of the information requested would not be sufficient to provide the basis and specificity for a proffered contention.

D. Based on an evaluation of the information submitted under paragraph C, the NRC staff will determine within 10 days of receipt of the request whether:

(1) There is a reasonable basis to believe the petitioner is likely to establish standing to participate in this NRC proceeding; and

(2) The requestor has established a legitimate need for access to SUNSI.

E. If the NRC staff determines that the requestor satisfies both D.(1) and D.(2), the NRC staff will notify the requestor in writing that access to SUNSI has been granted. The written notification will contain instructions on how the requestor may obtain copies of the requested documents, and any other conditions that may apply to access to those documents. These conditions may include, but are not limited to, the signing of a Non-Disclosure Agreement or Affidavit, or Protective Order[2] setting forth terms and conditions to prevent the unauthorized or inadvertent disclosure of SUNSI by each individual who will be granted access to SUNSI.

F. Filing of Contentions. Any contentions in these proceedings that are based upon the information received as a result of the request made for SUNSI must be filed by the requestor no later than 25 days after receipt of (or access to) that information. However, if more than 25 days remain between the petitioner's receipt of (or access to) the information and the deadline for filing all other contentions (as established in the notice of hearing or opportunity for hearing), the petitioner may file its SUNSI contentions by that later deadline.

G. Review of Denials of Access.

(1) If the request for access to SUNSI is denied by the NRC staff after a determination on standing and requisite need, the NRC staff shall immediately notify the requestor in writing, briefly stating the reason or reasons for the denial.

(2) The requestor may challenge the NRC staff's adverse determination by filing a challenge within 5 days of receipt of that determination with: (a) the presiding officer designated in this proceeding; (b) if no presiding officer has been appointed, the Chief Administrative Judge, or if this individual is unavailable, another administrative judge, or an Administrative Law Judge with jurisdiction pursuant to 10 CFR 2.318(a); or (c) if another officer has been designated to rule on information access issues, with that officer.

(3) Further appeals of decisions under this paragraph must be made pursuant to 10 CFR 2.311.

H. Review of Grants of Access. A party other than the requestor may challenge an NRC staff determination granting access to SUNSI whose release would harm that party's interest independent of the proceeding. Such a challenge must be filed within 5 days of the notification by the NRC staff of its grant of access and must be filed with: (a) the presiding officer designated in this proceeding; (b) if no presiding officer has been appointed, the Chief Administrative Judge, or if this individual is unavailable, another administrative judge, or an Administrative Law Judge with jurisdiction pursuant to 10 CFR 2.318(a); or (c) if another officer has been designated to rule on information access issues, with that officer.

If challenges to the NRC staff determinations are filed, these procedures give way to the normal process for litigating disputes concerning access to information. The availability of interlocutory review by the Commission of orders ruling on such NRC staff determinations (whether granting or denying access) is governed by 10 CFR 2.311.[3]

I. The Commission expects that the NRC staff and presiding officers (and any other reviewing officers) will consider and resolve requests for access to SUNSI, and motions for protective orders, in a timely fashion in order to minimize any unnecessary delays in identifying those petitioners who have standing and who have propounded contentions meeting the specificity and basis requirements in 10 CFR part 2. The attachment to this Order summarizes the general target schedule for processing and resolving requests under these procedures.

It is so ordered.

[1] While a request for hearing or petition to intervene in this proceeding must comply with the filing requirements of the NRC's ''E-Filing Rule,'' the initial request to access SUNSI under these procedures should be submitted as described in this paragraph.

[2] Any motion for Protective Order or proposed Non-Disclosure Affidavit or Agreement for SUNSI must be filed with the presiding officer or the Chief Administrative Judge if the presiding officer has not yet been designated, within 30 days of the deadline for the receipt of the written access request.

[3] Requestors should note that the filing requirements of the NRC's E-Filing Rule (72 FR 49139; August 28, 2007, as amended at 77 FR 46562; August 3, 2012, 78 FR 34247, June 7, 2013) apply to appeals of NRC staff determinations (because they must be served on a presiding officer or the Commission, as applicable), but not to the initial SUNSI request submitted to the NRC staff under these procedures.

Authority: 42 U.S.C. 2011 *et seq.*

Dated: October 2, 2026.

For the Nuclear Regulatory Commission.

Jody Martin,

Secretary of the Commission.

ATTACHMENT 1—GENERAL TARGET SCHEDULE FOR PROCESSING AND RESOLVING REQUESTS FOR ACCESS TO SENSITIVE UNCLASSIFIED NON-SAFEGUARDS INFORMATION IN THIS PROCEEDING

Day	Event/activity
0	Publication of **Federal Register** notice of hearing or opportunity for hearing, including order with instructions for access requests.
10	Deadline for submitting requests for access to Sensitive Unclassified Non-Safeguards Information (SUNSI) with information: (i) supporting the standing of a potential party identified by name and address; and (ii) describing the need for the information in order for the potential party to participate meaningfully in an adjudicatory proceeding.
60	Deadline for submitting petition for intervention containing: (i) demonstration of standing; and (ii) all contentions whose formulation does not require access to SUNSI (+25 Answers to petition for intervention; +7 petitioner/requestor reply).
20	U.S. Nuclear Regulatory Commission (NRC) staff informs the requestor of the staff's determination whether the request for access provides a reasonable basis to believe standing can be established and shows need for SUNSI. (NRC staff also informs any party to the proceeding whose interest independent of the proceeding would be harmed by the release of the information.) If NRC staff makes the finding of need for SUNSI and likelihood of standing, NRC staff begins document processing (preparation of redactions or review of redacted documents).
25	If NRC staff finds no ''need'' or no likelihood of standing, the deadline for petitioner/requestor to file a motion seeking a ruling to reverse the NRC staff's denial of access; NRC staff files copy of access determination with the presiding officer (or Chief Administrative Judge or other designated officer, as appropriate). If NRC staff finds ''need'' for SUNSI, the deadline for any party to the proceeding whose interest independent of the proceeding would be harmed by the release of the information to file a motion seeking a ruling to reverse the NRC staff's grant of access.
30	Deadline for NRC staff reply to motions to reverse NRC staff determination(s).
40	(Receipt +30) If NRC staff finds standing and need for SUNSI, deadline for NRC staff to complete information processing and file motion for Protective Order and proposed Non-Disclosure Agreement or Affidavit. Deadline for applicant/licensee to file proposed Non-Disclosure Agreement or Affidavit for SUNSI.
A	If access is granted: issuance of presiding officer or other designated officer decision on motion for Protective Order for access to sensitive information (including schedule for providing access and submission of contentions) or decision reversing a final adverse determination by the NRC staff.
A + 3	Deadline for filing executed Non-Disclosure Agreements or Affidavits. Access provided to SUNSI consistent with decision issuing the Protective Order.
A + 28	Deadline for submission of contentions whose development depends upon access to SUNSI. However, if more than 25 days remain between the petitioner's receipt of (or access to) the information and the deadline for filing all other contentions (as established in the notice of hearing or notice of opportunity for hearing), the petitioner may file its SUNSI contentions by that later deadline.
A + 53	(Contention receipt +25) Answers to contentions whose development depends upon access to SUNSI.
A + 60	(Answer receipt +7) Petitioner/Intervenor reply to answers.
>A + 60	Decision on contention admission.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2026–2311]

Privacy Act of 1974; Systems of Records

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of modified systems of records; request for comment.

SUMMARY: Pursuant to the Privacy Act of 1974 and the Office of Management and Budget (OMB) Circular A–108, the U.S. Nuclear Regulatory Commission (NRC) is republishing 13 Privacy Act systems of records notices (SORNs) following a comprehensive review. Eight notices include only minor administrative updates, one is unchanged, and four systems—NRC 27, NRC 36, NRC 39, and NRC 40—contain substantive revisions requiring a 30-day public comment period. The updates modernize system descriptions, clarify authorities and system locations, and update categories of records and safeguards.

DATES: Submit comments on revisions and changes by November 5, 2026. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received before this date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

- *Federal rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2026–2311. Address questions about Docket IDs in *Regulations.gov* to Bridget Curran; telephone: 301–415–1003; email: *Bridget.Curran@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Office of Nuclear Material Safety and Safeguards, Mail Stop: TWFN–5–A85, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Guidance and Publications Branch.
- *Obtaining Information and Submitting Comments:* Please refer to Docket ID NRC–2026–2311 when contacting the NRC about the availability of information for this action. The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2026–2311 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the

comment submissions into Agencywide Documents Access and Management System (ADAMS). The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from others for submission to the NRC, then you should inform them not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2026–2311.
- *ADAMS:* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin ADAMS Public Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.*
- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Sally Hardy, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone: 301–415–5607; email: *Sally.Hardy@nrc.gov.*

SUPPLEMENTARY INFORMATION: The NRC has conducted a comprehensive review of 13 of its Privacy Act systems of records in accordance with the Privacy Act of 1974 and OMB Circular A–108. As a result of this review, the NRC is republishing all 13 SORNs. Eight SORNs include only minor or administrative updates that do not meet the threshold for a new or altered system, and one SORN is being republished without changes. Four SORNs—NRC 27, NRC 36, NRC 39, and NRC 40—contain substantive revisions that meet the criteria for an altered system of records and are therefore being published for a 30-day public comment period.

The proposed updates modernize system descriptions, clarify authorities, update system locations to reflect current organizational structures and cloud environments, revise categories of records and sources, and update administrative, technical, and physical safeguards. The changes also ensure each SORN is in alignment with current NRC operations, cybersecurity requirements, and applicable National Archives and Records Administration records schedules.

A report on these revisions has been sent to OMB, the Committee on Homeland Security and Governmental Affairs of U.S. Senate, and the Committee on Oversight and Accountability of the U.S. House of Representatives, as required by the Privacy Act.

If changes are made, based on the NRC's review of comments received, the NRC will publish a subsequent notice.

The text of the report, in its entirety, is attached.

(Authority: 42 U.S.C. 2011 *et seq.*)

Dated: October 1, 2026.

For the Nuclear Regulatory Commission.

Garo Nalabandian,

Senior Agency Official for Privacy, Office of the Chief Information Officer.

Attachment—U.S. Nuclear Regulatory Commission Privacy Act Systems of Records

NRC Systems of Records

25 Oral History Program
26 Transit Subsidy Benefits Program
27 Radiation Exposure Information and Reporting System
33 Special Inquiry Records
35 Drug Testing Program Records
36 Employee Locator Records
37 Information Security Files and Associated Records
38 Mailing Lists
39 Personnel Security Files and Associated Records
40 Facility Security Access Control Records
44 Employee Fitness Center Records
45 Electronic Credentials for Personal Identity Verification
46 Health Emergency Records

These systems of records are maintained by the NRC and contain personal information about individuals that is retrieved by an individual's name or identifier.

The notice for each system of records states the name and location of the record system, the authority for and manner of its operation, the categories of individuals that it covers, the types of records that it contains, the sources of information in those records, and the routine uses of each system of records. Each notice also includes the business address of the NRC official who will inform interested persons of the procedures whereby they may gain access to and request amendment of records pertaining to them.

The Privacy Act provides certain safeguards for an individual against an invasion of personal privacy by requiring Federal agencies to protect records contained in an agency system of records from unauthorized disclosure and to ensure that information is current and accurate for its intended use and that adequate safeguards are provided to prevent misuse of such information.

SYSTEM NAME AND NUMBER:

Oral History Program—NRC 25.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Office of the Secretary, NRC, One White Flint North, 11555 Rockville Pike, Rockville, Maryland.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2161(b) and 44 U.S.C. 3301.

PURPOSE(S) OF THE SYSTEM:

Recorded interviews and transcribed scripts of interviews for providing a history of the nuclear regulatory program.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who volunteer to be interviewed for the purpose of providing information for a history of the nuclear regulatory program.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records consist of recorded interviews and, as needed, transcribed scripts of the interviews.

RECORD SOURCE CATEGORIES:

Information in this system of records is obtained from interviews granted on a voluntary basis to the Historian.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to the other types of disclosures permitted under subsection (b) of the Privacy Act, the NRC may disclose information contained in this system of records without the consent of the subject individual if the disclosure is compatible with the purpose for which the record was collected under the following routine uses:

a. For incorporation in publications on the history of the nuclear regulatory program;

b. To provide information to historians and other researchers;

c. A record from this system of records may be disclosed as a routine use to appropriate agencies, entities, and persons when (1) the NRC suspects or has confirmed that there has been a breach of the system of records, (2) the NRC has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the NRC (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with NRC efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm; and

d. A record from this system of records may be disclosed as a routine use to another Federal agency or Federal entity, when the NRC determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Maintained on electronic media.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Information is accessed by the name of the interviewee.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Narrative Histories will be retained under NRC's approved schedule found in the NUREG 0910 version 4 at 2.22.7.a(1): Record copy maintained by the NRC Deputy Secretary. Permanent. Transfer to the National Archives when 20 years old. (Paper records created before 4/1/2000. ADAMS PDF files and TIFF files (2.22.7.a(4)) are cutoff at the close of the fiscal year. Transfer to the National Archives 5 years after cutoff.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Maintained on an access-restricted SharePoint page. Access to and use of these records is limited to those authorized by the Historian or a designee.

SYSTEM MANAGER(S):

Deputy Secretary, Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

RECORD ACCESS PROCEDURES:

Same as ''Notification procedures.''

CONTESTING RECORD PROCEDURES:

Same as ''Notification procedures.''

NOTIFICATION PROCEDURES:

Individuals seeking to determine whether this system of records contains information about them should write to the Freedom of Information Act or Privacy Act Officer, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and comply with the procedures contained in NRC's Privacy Act regulations, 10 CFR part 9.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

HISTORY:

89 FR 58780 (July 19, 2024).

SYSTEM NAME AND NUMBER:

Transit Subsidy Benefits Program Records—NRC 26.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Facility, Logistics and Support Branch, Office of Administration, NRC, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland.

SYSTEM MANAGER(S):

Chief, Facility, Logistics and Support Branch, Division of Facilities and Security, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 7905; 26 U.S.C. 132; 31 U.S.C. 3511; 41 CFR 102–74.210; 41 CFR subtitle F; 41 CFR 102–71.20; Executive Order (E.O.) 9397, as amended by E.O. 13478; E.O. 13150.

PURPOSE(S) OF THE SYSTEM:

The information contained in this system is used to enroll employees in the Transit Subsidy Program.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NRC employees who apply for subsidized mass transit costs.

CATEGORIES OF RECORDS IN THE SYSTEM:

The records consist of an individual's application to participate in the program which includes, but is not limited to, the applicant's name, home address, office telephone number, and information regarding the employee's commuting schedule and mass transit system(s) used.

RECORD SOURCE CATEGORIES:

NRC employees.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to the other types of disclosures permitted under subsection (b) of the Privacy Act, the NRC may disclose information contained in this system of records without the consent of the subject individual if the disclosure is compatible with the purpose for which the record was collected under the following routine uses:

a. To provide statistical reports to city, county, State, and Federal government agencies;

b. To provide the basis for program approval and issue monthly subsidies;

c. A record from this system of records which indicates a violation of civil or criminal law, regulation, or order may be referred as a routine use to a Federal, State, local, or foreign agency that has authority to investigate, enforce, implement, or prosecute such laws. Further, a record from this system of records may be disclosed for civil or criminal law or regulatory enforcement purposes to another agency in response to a written request from that agency's head or an official who has been delegated such authority;

d. A record from this system of records may be disclosed as a routine use in the course of discovery; in presenting evidence to a court, magistrate, administrative tribunal, or grand jury or pursuant to a qualifying order from any of those; in alternative dispute resolution proceedings, such as arbitration or mediation; or in the course of settlement negotiations;

e. A record from this system of records may be disclosed as a routine use to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual;

f. A record from this system of records may be disclosed as a routine use to NRC-paid experts or consultants, and those under contract with the NRC on a ''need-to-know'' basis for a purpose within the scope of the pertinent NRC task. This access will be granted to an NRC contractor or employee of such contractor by a system manager only after satisfactory justification has been provided to the system manager;

g. A record from this system of records may be disclosed as a routine

use to appropriate agencies, entities, and persons when (1) the NRC suspects or has confirmed that there has been a breach of the system of records, (2) the NRC has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the NRC (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with NRC efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm; and

h. A record from this system of records may be disclosed as a routine use to another Federal agency or Federal entity, when the NRC determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are maintained on electronic media.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Accessed by name and SmarTrip card.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records are retained under the National Archives and Records Administration's General Records Schedule 2.4: Employee Compensation and Benefit Records, Item 130, Transportation subsidy program administrative records. Destroy when 3 years old, but longer retention is authorized if required for business use. Records are also retained under General Records Schedule 2.4, item 131, Transportation subsidy program individual case files. Destroy 2 years after employee participation concludes, but longer retention is authorized if required for business use.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Computer files are maintained on a hard drive, access to which is password-protected. Access to and use of these records is limited to those persons whose official duties require access.

RECORD ACCESS PROCEDURES:

Same as ''Notification procedures.''

CONTESTING RECORD PROCEDURES:

Same as ''Notification procedures.''

NOTIFICATION PROCEDURES:

Individuals seeking to determine whether this system of records contains information about them should write to the Freedom of Information Act or Privacy Act Officer, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and comply with the procedures contained in NRC's Privacy Act regulations, 10 CFR part 9.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

HISTORY:

89 FR 58781 (July 19, 2024).

SYSTEM NAME AND NUMBER:

Radiation Exposure Information and Reporting System (REIRS) Records-NRC 27.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Oak Ridge Associated Universities (ORAU), Oak Ridge, Tennessee (or current contractor facility).

SYSTEM MANAGER(S):

REIRS Project Manager, Radiation Protection Branch, Division of Systems Analysis, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2051, 2073, 2093, 2095, 2111, 2133, 2134, and 2201(o); 10 CFR Parts 20 and 34; Executive Order (E.O.) 9397, as amended by E.O. 13478.

PURPOSE(S) OF THE SYSTEM:

REIRS serves as the central repository for all NRC radiation exposure monitoring records that are recorded and reported pursuant to part 20 of title 10 of the *Code of Federal Regulations* (10 CFR) and Regulatory Guide 8.7. This central repository is used for the oversight of radiation protection policies and practices at NRC-licensed facilities.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals monitored for radiation exposure while employed by, visiting, or temporarily assigned to certain NRC-licensed facilities; individuals who are exposed to radiation or radioactive materials in incidents required to be reported under 10 CFR 20.2201–20.2204 and 20.2206 by all NRC licensees; individuals who may have been exposed to radiation or radioactive materials offsite from a facility, plant installation, or other place of use of licensed materials, or in unrestricted areas, as a result of an incident involving byproduct, source, or special nuclear material.

CATEGORIES OF RECORDS IN THE SYSTEM:

These records contain information relating to an individual's name, sex, social security number, birth date, place and period/date of exposure; name and license number of individual's employer; name and number of licensees reporting the information; radiation doses or estimates of exposure received during this period, type of radiation, part(s) or organ(s) exposed, and radionuclide(s) involved.

RECORD SOURCE CATEGORIES:

Information in this system of records comes from licensees; the subject individual; the individual's employer; the person in charge of the facility where the individual has been assigned; NRC Form 5, ''Occupational Exposure Record for a Monitoring Period,'' or equivalent; contractor reports; and Radiation Safety Officers.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to the other types of disclosures permitted under subsection (b) of the Privacy Act, the NRC may disclose information contained in this system of records without the consent of the subject individual if the disclosure is compatible with the purpose for which the record was collected under the following routine uses:

a. To provide data to other Federal and State agencies involved in monitoring and/or evaluating radiation exposure received by individuals as enumerated in the paragraph ''Categories of individuals covered by the system;''

b. To return data provided by licensee upon request;

c. A record from this system of records which indicates a violation of civil or criminal law, regulation, or order may be referred as a routine use to a Federal, State, local, or foreign agency that has authority to investigate, enforce, implement, or prosecute such laws. Further, a record from this system of records may be disclosed for civil or criminal law or regulatory enforcement purposes to another agency in response to a written request from that agency's head or an official who has been delegated such authority;

d. A record from this system of records may be disclosed as a routine use to a Federal, State, local, or foreign agency to obtain information relevant to an NRC decision concerning hiring or retaining an employee, letting a contract, or issuing a security clearance, license, grant, or other benefit;

e. A record from this system of records may be disclosed as a routine use to a Federal, State, local, or foreign agency requesting a record that is relevant and necessary to its decision on a matter of hiring or retaining an employee, issuing a security clearance, reporting an investigation of an employee, letting a contract, or issuing a license, grant, or other benefit;

f. A record from this system of records may be disclosed as a routine use in the course of discovery; in presenting evidence to a court, magistrate, administrative tribunal, or grand jury or pursuant to a qualifying order from any of those; in alternative dispute resolution proceedings, such as arbitration or mediation; or in the course of settlement negotiations;

g. A record from this system of records may be disclosed as a routine use to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual;

h. A record from this system of records may be disclosed as a routine use to NRC-paid experts or consultants, and those under contract with the NRC on a ''need-to-know'' basis for a purpose within the scope of the pertinent NRC task. This access will be granted to an NRC contractor or employee of such contractor by a system manager only after satisfactory justification has been provided to the system manager;

i. A record from this system of records may be disclosed as a routine use to appropriate agencies, entities, and persons when (1) the NRC suspects or has confirmed that there has been a breach of the system of records, (2) the NRC has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the NRC (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with NRC efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm; and

j. A record from this system of records may be disclosed as a routine use to another Federal agency or Federal entity, when the NRC determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are maintained on paper and electronic media. The electronic records maintained in Oak Ridge, TN, are in a centralized database management system that is password protected. Backup tapes of the database are generated and maintained at a secure, off-site location for disaster recovery purposes. During the processing and data entry, paper records are temporarily stored in designated business offices that are locked when not in use and are accessible only to authorized personnel. Upon completion of data entry and processing, the paper records are stored in an offsite security storage facility accessible only to authorized personnel.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records are accessed by individual name, social security number, date of birth, and/or by licensee name or number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records managed using REIRS are scheduled under NRC's NUREG–0910, Revision 4. Transfer a copy of REIRS data to the National Archives and Records Administration every 5 years (2.19.16). Retain Personnel monitoring reports and personnel overexposure reports entered into REIRS. Paper records are retained under 2.19.14.a(1). Destroy 2 years after data are input into REIRS. ADAMS PDF files, TIFF files, ADAMS document profiles, and ADAMS digital signature and concurrence data are retained under 2.19.14.a(4) and are cut off at the end of the fiscal year and destroyed 2 years after cutoff. Personnel monitoring reports and personnel overexposure reports of which only selected data are entered into REIRS, records are retained under 2.19.14.b(1). Cut off at end of fiscal year. Transfer to National Archives and Records Administration (NARA) when 20 years old.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Information maintained at ORAU is accessible by the Office of Nuclear Regulatory Research (RES) and individuals that have been authorized access by NRC, including all NRC Radiation Safety Officers and ORAU employees that are directly involved in the REIRS project. Reports received and reviewed by the NRC's RES, Office of Nuclear Reactor Regulation (NRR), Office of Nuclear Material Safety and Safeguards (NMSS), and Regional offices are in lockable file cabinets and bookcases in secured buildings. A log is maintained of both telephone and written requests for information.

The data maintained in the REIRS database are protected from unauthorized access by several means. The database server resides in a protected environment with physical security barriers under keycard access control. Accounts authorizing access to the server and databases are maintained by the ORAU REIRS system administrator. In addition, ORAU maintains a computer security firewall that further restricts access to the ORAU computer network. Authorization for access must be approved by NRC, ORAU project management, and ORAU computer security. Transmittal of data via the internet is protected by data encryption.

RECORD ACCESS PROCEDURES:

Same as ''Notification procedures.''

CONTESTING RECORD PROCEDURES:

Same as ''Notification procedures.''

NOTIFICATION PROCEDURES:

Individuals seeking to determine whether this system of records contains information about them should write to the Freedom of Information Act or Privacy Act Officer, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and comply with the procedures contained in NRC's Privacy Act regulations, 10 CFR part 9.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

HISTORY:

89 FR 58782 (July 19, 2024).

SYSTEM NAME AND NUMBER:

Special Inquiry Records—NRC 33.

SECURITY CLASSIFICATION:

Classified and Unclassified.

SYSTEM LOCATION:

Special Inquiry Group, NRC, One White Flint North, 11555 Rockville Pike, Rockville, Maryland.

SYSTEM MANAGER(S):

Records Manager, Special Inquiry Group, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2051, 2052, 2201(c), (i), and (o).

PURPOSE(S) OF THE SYSTEM:

Investigation material for potential or actual concerns in connection with investigations of accidents or incidents at nuclear power plants or other nuclear facilities or involving nuclear materials, or allegations regarding public health and safety.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals possessing information regarding or having knowledge of matters of potential or actual concern to the Commission in connection with the investigation of an accident or incident at a nuclear power plant or other nuclear facility, or an incident involving nuclear materials or an allegation regarding the public health and safety related to the NRC's mission responsibilities.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system consists of an alphabetical index file bearing individual names. The index provides access to associated records which are arranged by subject matter, title, or identifying number(s) and/or letter(s). The system incorporates the records of all Commission correspondence, memoranda, audit reports and data, interviews, questionnaires, legal papers, exhibits, investigative reports and data, and other material relating to or developed as a result of the inquiry, study, or investigation of an accident or incident.

RECORD SOURCE CATEGORIES:

The information in this system of records is obtained from sources including, but not limited to, NRC officials and employees; Federal, State, local, and foreign agencies; NRC licensees; nuclear reactor vendors and architectural engineering firms; other organizations or persons knowledgeable about the incident or activity under investigation; and relevant NRC records.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to the other types of disclosures permitted under subsection (b) of the Privacy Act, the NRC may disclose information contained in this system of records without the consent of the subject individual if the disclosure is compatible with the purpose for which the record was collected under the following routine uses:

a. To provide information relating to an item which has been referred to the Commission or Special Inquiry Group for investigation by an agency, group, organization, or individual. A record from this system may be disclosed as a routine use to notify the referring agency, group, organization, or individual of the status of the matter or of any decision or determination that has been made;

b. To disclose a record as a routine use to a foreign country under an international treaty or convention entered into and ratified by the United States;

c. To provide records relating to the integrity and efficiency of the Commission's operations and management. A record from this system may be disseminated outside the Commission as part of the Commission's responsibility to inform the Congress and the public about Commission operations;

d. A record from this system of records which indicates a violation of civil or criminal law, regulation, or order may be referred as a routine use to a Federal, State, local, or foreign agency that has authority to investigate, enforce, implement, or prosecute such laws. Further, a record from this system of records may be disclosed for civil or criminal law or regulatory enforcement purposes to another agency in response to a written request from that agency's head or an official who has been delegated such authority;

e. A record from this system of records may be disclosed as a routine use to a Federal, State, local, or foreign agency to obtain information relevant to an NRC decision concerning hiring or retaining an employee, letting a contract, or issuing a security clearance, license, grant, or other benefit;

f. A record from this system of records may be disclosed as a routine use in the course of discovery; in presenting evidence to a court, magistrate, administrative tribunal, or grand jury or pursuant to a qualifying order from any of those; in alternative dispute resolution proceedings, such as arbitration or mediation; or in the course of settlement negotiations;

g. A record from this system of records may be disclosed as a routine use to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual;

h. A record from this system of records may be disclosed as a routine use to NRC-paid experts or consultants and those under contract with the NRC on a ''need-to-know'' basis for a purpose within the scope of the pertinent NRC task. This access will be granted to an NRC contractor or employee of such contractor by a system manager only after satisfactory justification has been provided to the system manager;

i. A record from this system of records may be disclosed as a routine use to appropriate agencies, entities, and persons when (1) the NRC suspects or has confirmed that there has been a breach of the system of records, (2) the NRC has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the NRC (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with NRC efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm; and

j. A record from this system of records may be disclosed as a routine use to another Federal agency or Federal entity, when the NRC determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are maintained on paper in file folders and electronic media. Documents are maintained in secured vault facilities.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Accessed by name (author or recipient), corporate source, title of document, subject matter, or other identifying document or control number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Permanent Records retained as General Program Correspondence Files (Subject Files) at the Office Director Level are scheduled under NUREG 0910 rev 4–2.18.5.a(1). Cut off at close of fiscal year. Transfer to the National Archives and Records Administration when 20 years old. Permanent Nuclear Power Plant Docket Files are scheduled

under NUREG 0910 Rev 4–2.18.11.a(1). Cut off files upon license termination following completion of decommissioning procedure. Closing date is the termination date following completion of decommissioning procedure. Transfer to the National Archives and Records Administration 20 years after termination of license.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

These records are located in locking filing cabinets or safes in a secured facility and are available only to authorized personnel whose duties require access.

RECORD ACCESS PROCEDURES:

Same as ''Notification procedures.'' Information classified under Executive Order 12958 will not be disclosed. Information received in confidence will not be disclosed to the extent that disclosure would reveal a confidential source.

CONTESTING RECORD PROCEDURES:

Same as ''Notification procedures.''

NOTIFICATION PROCEDURES:

Individuals seeking to determine whether this system of records contains information about them should write to the Freedom of Information Act or Privacy Act Officer, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and comply with the procedures contained in NRC's Privacy Act regulations, 10 CFR part 9.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Pursuant to 5 U.S.C. 552a(k)(1), (k)(2), and (k)(5), the Commission has exempted portions of this system of records from 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (H), and (I), and (f).

HISTORY:

89 FR 58786 (July 19, 2024).

SYSTEM NAME AND NUMBER:

Drug Testing Program Records—NRC 35.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Division of Facilities and Security, Office of Administration, NRC, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland.

SYSTEM MANAGER(S):

Director, Division of Facilities and Security, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C 7301; 5 U.S.C. 7361–7363; 42 U.S.C. 2165; 42 U.S.C. 290dd; Executive Order (E.O.) 12564; 9397, as amended by E.O. 13478.

PURPOSE(S) OF THE SYSTEM:

This record system will maintain information gathered by and in the possession of NRC Drug Testing Program, used in verifying positive test results for illegal use of controlled substances, as well as collecting and maintaining evidence of possession, distribution, or trafficking of controlled substances.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NRC employees, applicants, consultants, licensees, and contractors.

CATEGORIES OF RECORDS IN THE SYSTEM:

These records contain information regarding the drug testing program; requests for and results of initial, confirmatory and follow-up testing, if appropriate; additional information supplied by NRC employees, employment applicants, consultants, licensees, or contractors in challenge to positive test results; and written statements or medical evaluations of attending physicians and/or information regarding prescription or nonprescription drugs.

RECORD SOURCE CATEGORIES:

NRC employees, employment applicants, consultants, licensees, and contractors who have been identified for drug testing who have been tested; physicians making statements regarding medical evaluations and/or authorized prescriptions for drugs; NRC contractors for processing including, but not limited to, specimen collection, laboratories for analysis, and medical evaluations; and NRC staff administering the drug testing program to ensure the achievement of a drug-free workplace.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to the other types of disclosures permitted under subsection (b) of the Privacy Act, the NRC may disclose information contained in this system of records without the consent of the subject individual if the disclosure is compatible with the purpose for which the record was collected under the following routine uses:

a. To identify substance abusers within the agency;

b. To initiate counseling and/or rehabilitation programs;

c. To take personnel actions;

d. To take personnel security actions;

e. For statistical reporting purposes. Statistical reporting will not include personally identifiable information;

f. A record from this system of records may be disclosed as a routine use to NRC-paid experts or consultants, and those under contract with the NRC on a ''need-to-know'' basis for a purpose within the scope of the pertinent NRC task. This access will be granted to an NRC contractor or employee of such contractor by a system manager only after satisfactory justification has been provided to the system manager;

g. A record from this system of records may be disclosed as a routine use to appropriate agencies, entities, and persons when (1) the NRC suspects or has confirmed that there has been a breach of the system of records, (2) the NRC has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the NRC (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with NRC efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm; and

h. A record from this system of records may be disclosed as a routine use to another Federal agency or Federal entity, when the NRC determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are maintained on paper and electronic media. Specimens are maintained in appropriate environments.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records are indexed and accessed by name, social security number, testing position number, specimen number, drug testing laboratory accession number, or a combination thereof.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Employee drug test plans, procedures, and scheduling records are retained under the National Archives and

Records Administration's General Records Schedule 2.7: Employee Health and Safety Records, item 100. Destroy when 3 years old or when superseded or obsolete. Employee drug test acknowledgement of notice forms are retained under General Records Schedule 2.7, item 110. Destroy when employee separates from testing-designated position. Employee drug testing specimen records are retained under General Records Schedule 2.7, item 120. Destroy 3 years after date of last entry or when 3 years old, whichever is later. Employee drug test results (Positive Results) are retained under General Records Schedule 2.7, item 130. Destroy when employee leaves agency or when 3 years old, whichever is later. Employee drug test results (Negative results) are retained under General Records Schedule 2.7, item 131. Destroy when 3 years old.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Records in use are protected to ensure that access is limited to those persons whose official duties require such access. Unattended records are maintained in NRC-controlled space in locked offices, locked desk drawers, or locked file cabinets. Stand-alone and network processing systems are password protected and removable media is stored in locked offices, locked desk drawers, or locked file cabinets when unattended. Network processing systems have roles and responsibilities protection and system security plans. Records at laboratory, collection, and evaluation facilities are stored with appropriate security measures to control and limit access to those persons whose official duties require such access.

RECORD ACCESS PROCEDURES:

Same as ''Notification procedures.''

CONTESTING RECORD PROCEDURES:

Same as ''Notification procedures.''

NOTIFICATION PROCEDURES:

Individuals seeking to determine whether this system of records contains information about them should write to the Freedom of Information Act or Privacy Act Officer, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and comply with the procedures contained in NRC's Privacy Act regulations, 10 CFR part 9.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Pursuant to 5 U.S.C. 552a(k)(5), the Commission has exempted portions of this system of records from 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (H), and (I), and (f)

HISTORY:

89 FR 58787 (July 19, 2024).

SYSTEM NAME AND NUMBER:

Employee Locator Records—NRC 36.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Records are maintained in a Federal Risk and Authorization Management Program (FedRAMP)-authorized cloud environment hosted by Amazon Web Services (AWS) within U.S. regions. System infrastructure is located in AWS U.S. East and U.S. West regions. Supporting system administration and operational activities may occur at contractor facilities in Vienna, Virginia, and Pasadena, California.

SYSTEM MANAGER(S):

Branch Chief, Security Operations Branch, Cyber and Information Security Division, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 3101, 3301; Executive Order (E.O.) 9397, as amended by E.O. 13478; and E.O. 12656.

PURPOSE(S) OF THE SYSTEM:

The purpose of this system is to provide a platform for the NRC to notify employees and contractors of important events such as office or building closures, weather-related events, or other emergencies requiring notification. The system also supports personnel accountability during emergencies by allowing employees and contractors to report their status in response to system notifications.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NRC employees and contractors.

CATEGORIES OF RECORDS IN THE SYSTEM:

These records include, but are not limited to, an individual's name, home address, personal email address, office organization and location (building, room number, mail stop), telephone number (home, business, and cell), person to be notified in case of emergency (name, address, telephone number), and other related records.

RECORD SOURCE CATEGORIES:

Individual on whom the record is maintained; Enterprise Identity Hub (EIH), and other related records.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to the other types of disclosures permitted under subsection (b) of the Privacy Act, the NRC may disclose information contained in this system of records without the consent of the subject individual if the disclosure is compatible with the purpose for which the record was collected under the following routine uses:

a. To contact the subject individual's designated emergency contact in the case of an emergency;

b. To contact the subject individual regarding matters of official business;

c. To maintain the agency telephone directory (accessible from *www.nrc.gov*);

d. For internal agency mail services;

e. A record from this system of records which indicates a violation of civil or criminal law, regulation, or order may be referred as a routine use to a Federal, State, local, or foreign agency that has authority to investigate, enforce, implement, or prosecute such laws. Further, a record from this system of records may be disclosed for civil or criminal law or regulatory enforcement purposes to another agency in response to a written request from that agency's head or an official who has been delegated such authority;

f. A record from this system of records may be disclosed as a routine use to NRC-paid experts or consultants, and those under contract with the NRC on a ''need-to-know'' basis for a purpose within the scope of the pertinent NRC task. This access will be granted to an NRC contractor or employee of such contractor by a system manager only after satisfactory justification has been provided to the system manager;

g. A record from this system of records may be disclosed as a routine use to appropriate agencies, entities, and persons when (1) the NRC suspects or has confirmed that there has been a breach of the system of records, (2) the NRC has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the NRC (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with NRC efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm; and

h. A record from this system of records may be disclosed as a routine use to another Federal agency or Federal entity, when the NRC determines that information from this system of records

is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Electronic media.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Information is accessed by name.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Mail, printing, and telecommunication service control records are retained under the National Archives and Records Administration's General Records Schedule 5.5: Mail, Printing, and Telecommunications Service Management Records, item 020. Destroy when 1 year old or when superseded or obsolete, whichever is applicable, but longer retention is authorized if required for business use. Customer/client records are retained under General Records Schedule 6.5: Public Customer Service Records, item 020. Destroy when superseded, obsolete, or when customer requests the agency to remove the records.

Administrative records maintained in any agency office are retained under General Records Schedule 5.1: Common Office Records, item 010. Destroy when business use ceases.

Employee emergency contact information records are retained under the National Archives General Records Schedule 5.3 item 020. Destroy when superseded or obsolete, or upon separation or transfer of employee. These records are used to account for and maintain communication with personnel during emergencies, office dismissal, and closure situations.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Electronic records are protected by password controls and multi-factor authentication. Access to, and use of, these records is limited to authorized individuals whose official duties require such access. Administrative, technical, and physical safeguards are implemented to protect records from unauthorized access, use, or disclosure.

RECORD ACCESS PROCEDURES:

Same as ''Notification procedures.''

CONTESTING RECORD PROCEDURES:

Same as ''Notification procedures.''

NOTIFICATION PROCEDURES:

Individuals seeking to determine whether this system of records contains information about them should write to the Freedom of Information Act or Privacy Act Officer, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and comply with the procedures contained in NRC's Privacy Act regulations, 10 CFR part 9.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

HISTORY:

89 FR 58788 (July 19, 2024).

SYSTEM NAME AND NUMBER:

Information Security Files and Associated Records—NRC 37.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Division of Security Operations, Office of Nuclear Security and Incident Response, NRC, One White Flint North, 11555 Rockville Pike, Rockville, Maryland.

SYSTEM MANAGER(S):

Director, Division of Security Operations, Office of Nuclear Security and Incident Response, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2161–2169 and 2201(i); Executive Order 13526; 10 CFR part 95.

PURPOSE(S) OF THE SYSTEM:

Keep track of NRC employees, contractors, consultants, licensees, and other cleared persons who have been granted classification authority.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals include present and former NRC employees, contractors, consultants, licensees, and other cleared persons.

CATEGORIES OF RECORDS IN THE SYSTEM:

These records include information regarding:

a. Personnel who are authorized access to specified levels, categories and types of information, the approving authority, and related documents; and

b. Names of individuals who classify and/or declassify documents (*e.g.,* for the protection of Classified National Security Information and Restricted Data).

RECORD SOURCE CATEGORIES:

NRC employees, contractors, consultants, and licensees.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to the other types of disclosures permitted under subsection (b) of the Privacy Act, the NRC may disclose information contained in this system of records without the consent of the subject individual if the disclosure is compatible with the purpose for which the record was collected under the following routine uses:

a. To prepare statistical reports for the Information Security Oversight Office;

b. A record from this system of records which indicates a violation of civil or criminal law, regulation, or order may be referred as a routine use to a Federal, State, local, or foreign agency that has authority to investigate, enforce, implement, or prosecute such laws. Further, a record from this system of records may be disclosed for civil or criminal law or regulatory enforcement purposes to another agency in response to a written request from that agency's head or an official who has been delegated such authority;

c. A record from this system of records may be disclosed as a routine use to a Federal, State, local, or foreign agency to obtain information relevant to an NRC decision concerning hiring or retaining an employee, letting a contract, or issuing a security clearance, license, grant or other benefit;

d. A record from this system of records may be disclosed as a routine use to a Federal, State, local, or foreign agency requesting a record that is relevant and necessary to its decision on a matter of hiring or retaining an employee, issuing a security clearance, reporting an investigation of an employee, letting a contract, or issuing a license, grant, or other benefit;

e. A record from this system of records may be disclosed as a routine use in the course of discovery; in presenting evidence to a court, magistrate, administrative tribunal, or grand jury or pursuant to a qualifying order from any of those; in alternative dispute resolution proceedings, such as arbitration or mediation; or in the course of settlement negotiations;

f. A record from this system of records may be disclosed as a routine use to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual;

g. A record from this system of records may be disclosed as a routine use to NRC-paid experts or consultants,

and those under contract with the NRC on a ''need-to-know'' basis for a purpose within the scope of the pertinent NRC task. This access will be granted to an NRC contractor or employee of such contractor by a system manager only after satisfactory justification has been provided to the system manager;

h. A record from this system of records may be disclosed as a routine use to appropriate agencies, entities, and persons when (1) the NRC suspects or has confirmed that there has been a breach of the system of records, (2) the NRC has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the NRC (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with NRC efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm; and

i. A record from this system of records may be disclosed as a routine use to another Federal agency or Federal entity, when the NRC determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are maintained on electronic media.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Accessed by name and/or assigned number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records are retained under the National Archives and Records Administration's, General Records Schedule 4.2: Information Access and Protection Records. Freedom of Information Act (FOIA), Privacy Act (PA), and classified administrative records are retained under General Records Schedule 4.2, item 001. Destroy when 3 years old, but longer retention is authorized if needed for business use. Information access and protection tracking and control records are retained under General Records Schedule 4.2, item 030. Destroy 2 years after last form entry, reply, or submission; or when associated documents are declassified or destroyed; or when authorization expires; whichever is appropriate. Longer retention is authorized if required for business use. Access control records are retained under General Records Schedule 4.2, item 031. Destroy when superseded or obsolete, but longer retention is authorized if required for business use. Accounting for and control of access to classified and controlled unclassified records and records requested under FOIA, PA and Mandatory Declassification Review are retained under General Records Schedule 4.2, item 040. Destroy or delete 5 years after date of last entry, final adjudication by courts, or final action by agency (such as downgrading, transfer, or destruction of related classified documents, or release of information from controlled unclassified status), as may apply, whichever is later; but longer retention is authorized if required for business use.

Classified information nondisclosure agreements which are maintained separately from the individual's official personnel folder are retained under the National Archives and Records Administration's General Records Schedule 4.2 item 121. Destroy records when 50 years old.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Information maintained in locked buildings, containers, or security areas under guard and/or alarm protection, as appropriate. Records are processed only on systems approved for processing classified information or accessible through password protected systems for unclassified information. The classified systems are stand-alone systems located within secure facilities or with removable hard drives that are either stored in locked security containers or in alarmed vaults cleared for open storage of TOP SECRET information.

CONTESTING RECORD PROCEDURE:

Same as ''Notification procedures.''

RECORD ACCESS PROCEDURE:

Same as ''Notification procedures.'' Some information is classified under Executive Order 13526 and will not be disclosed. Other information has been received in confidence and will not be disclosed to the extent that disclosure would reveal a confidential source.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about them should write to the Freedom of Information Act or Privacy Act Officer, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and comply with the procedures contained in NRC's Privacy Act regulations, 10 CFR part 9.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Pursuant to 5 U.S.C. 552a(k)(1) and (k)(5), the Commission has exempted portions of this system of records from 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4), (G), (H), and (I), and (f).

HISTORY:

89 FR 58789 (July 19, 2024).

SYSTEM NAME AND NUMBER:

Mailing Lists—NRC 38.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Facilities, Logistics and Support Branch, Division of Facilities and Security, Office of Administration, NRC, 11545 Rockville Pike, Rockville, Maryland.

SYSTEM MANAGER(S):

Facilities, Logistics and Support Branch, Division of Facilities and Security, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 3101, 3301.

PURPOSE(S) OF THE SYSTEM:

The system is maintained for the purpose of mailing informational literature or responses to those who request it; maintaining lists of individuals who attend meetings; and for other purposes for which mailing or contact lists may be created.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals, including NRC staff, with an interest in receiving information from the NRC.

CATEGORIES OF RECORDS IN THE SYSTEM:

Mailing lists include an individual's name and address; and title, occupation, and institutional affiliation, when applicable.

RECORD SOURCE CATEGORIES:

NRC staff, NRC licensees, and individuals expressing an interest in NRC activities and publications.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to the other types of disclosures permitted under subsection

(b) of the Privacy Act, the NRC may disclose information contained in this system of records without the consent of the subject individual if the disclosure is compatible with the purpose for which the record was collected under the following routine uses:

a. A record from this system of records may be disclosed as a routine use for distribution of documents to persons and organizations listed on the mailing list;

b. A record from this system of records may be disclosed as a routine use to NRC-paid experts or consultants, and those under contract with the NRC on a ''need-to-know'' basis for a purpose within the scope of the pertinent NRC task. This access will be granted to an NRC contractor or employee of such contractor by a system manager only after satisfactory justification has been provided to the system manager;

c. A record from this system of records may be disclosed as a routine use to appropriate agencies, entities, and persons when (1) the NRC suspects or has confirmed that there has been a breach of the system of records, (2) the NRC has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the NRC (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with NRC efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm; and

d. A record from this system of records may be disclosed as a routine use to another Federal agency or Federal entity, when the NRC determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records maintained on paper and electronic media.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records are accessed by company name, individual name, or file code identification number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Customer/client records are retained under the National Archives and Records Administration's General Records Schedule 6.5: Public Customer Service Records, Item 020. Delete when superseded, obsolete, or when customer requests the agency to remove the records.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Access to and use of these records is limited to those persons whose official duties require such access.

RECORD ACCESS PROCEDURES:

Same as ''Notification procedures.''

CONTESTING RECORD PROCEDURES:

Same as ''Notification procedures.''

NOTIFICATION PROCEDURES:

Individuals seeking to determine whether this system of records contains information about them should write to the Freedom of Information Act or Privacy Act Officer, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and comply with the procedures contained in NRC's Privacy Act regulations, 10 CFR part 9.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

HISTORY:

89 FR 58791 (July 19, 2024).

SYSTEM NAME AND NUMBER:

Personnel Security Files and Associated Records—NRC 39.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Division of Facilities and Security, Office of Administration, NRC, Two White Flint North, Rockville, Maryland.

SYSTEM MANAGER(S):

Director, Division of Facilities and Security, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2011 *et seq.;* 42 U.S.C. 2165, 2201(i), 2201a, and 2284; 42 U.S.C. 5801 *et seq.;* Executive Order (E.O.) 9397, as amended by E.O. 13478; E.O. 10450, as amended; E.O. 10865, as amended; E.O. 13467; E.O. 13526; E.O. 13587; 10 CFR Parts 10, 11, 25, 50, 73, 95; OMB Circular No. A–130, Revised; 5 CFR parts 731, 732, and authorities cited therein.

PURPOSE(S) OF THE SYSTEM:

This record system will maintain information gathered by and in the possession of the NRC Division of Facilities and Security to maintain the NRC's Personnel Security and Insider Threat programs.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons including NRC employees, employment applicants, consultants, contractors, and licensees; other Government agency personnel, other persons who have been considered for an access authorization, special nuclear material access authorization, unescorted access to NRC buildings or nuclear power plants, NRC building access, access to Federal automated information systems or data, and actual or suspected violators of laws administered by NRC.

CATEGORIES OF RECORDS IN THE SYSTEM:

These records contain information about individuals, which includes, but is not limited to, their name(s), address, date and place of birth, social security number, identifying information, citizenship, residence history, employment history, military history, financial history, foreign travel, foreign contacts, education, spouse/cohabitant and relatives, personal references, organizational membership, medical, fingerprints, criminal record, and security clearance history. These records also contain copies of personnel security investigative reports from other Federal agencies, summaries of investigative reports, results of Federal agency indices and database checks, records necessary for participation in the criminal history program, reports of personnel security interviews, clearance actions information (*e.g.,* grants and terminations), access approval/disapproval actions related to NRC building access or unescorted access to nuclear plants, or access to Federal automated information systems or data, violations of laws, reports of security infraction, insider threat program inquiry records including analysis, results, referrals, and/or mitigation actions, and other related personnel security processing documents.

RECORD SOURCE CATEGORIES:

NRC applicants, employees, contractors, consultants, licensees, visitors and others, as well as information furnished by other Government agencies or their contractors.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information in these records may be used by the Division of Facilities and Security and on a need-to-know basis by appropriate NRC officials, Hearing Examiners, Personnel Security Review Panel members, Office of Personnel Management, Central Intelligence Agency, Office of the Director of National intelligence, and other Federal agencies under the following routine uses:

a. To determine clearance or access authorization eligibility;

b. To determine eligibility for access to NRC buildings or access to Federal automated information systems or data;

c. To certify clearance or access authorization;

d. To maintain the NRC personnel security program, including the Insider Threat Program;

e. To provide licensees information needed for unescorted access or access to safeguards information determinations;

f. A record from this system of records which indicates a violation of civil or criminal law, regulation, or order may be referred as a routine use to a Federal, State, local, or foreign agency that has authority to investigate, enforce, implement, or prosecute such laws. Further, a record from this system of records may be disclosed for civil or criminal law or regulatory enforcement purposes to another agency in response to a written request from that agency's head or an official who has been delegated such authority;

g. A record from this system of records may be disclosed as a routine use to a Federal, State, local, or foreign agency to obtain information relevant to an NRC decision concerning hiring or retaining an employee, letting a contract, or issuing a security clearance, license, grant or other benefit;

h. A record from this system of records may be disclosed as a routine use to a Federal, State, local, or foreign agency requesting a record that is relevant and necessary to its decision on a matter of hiring or retaining an employee, issuing a security clearance, reporting an investigation of an employee, letting a contract, or issuing a license, grant, or other benefit;

i. A record from this system of records may be disclosed as a routine use in the course of discovery; in presenting evidence to a court, magistrate, administrative tribunal, or grand jury or pursuant to a qualifying order from any of those; in alternative dispute resolution proceedings, such as arbitration or mediation; or in the course of settlement negotiations;

j. A record from this system of records may be disclosed as a routine use to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual;

k. A record from this system of records may be disclosed as a routine use to NRC-paid experts or consultants, and those under contract with the NRC on a ''need-to-know'' basis for a purpose within the scope of the pertinent NRC task. This access will be granted to an NRC contractor or employee of such contractor by a system manager only after satisfactory justification has been provided to the system manager;

l. A record from this system of records may be disclosed as a routine use to appropriate agencies, entities, and persons when (1) the NRC suspects or has confirmed that there has been a breach of the system of records, (2) the NRC has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the NRC (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with NRC efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm; and

m. A record from this system of records may be disclosed as a routine use to another Federal agency or Federal entity, when the NRC determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records maintained on paper, tapes, and electronic media.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Indexed and accessed by name, social security number, docket number, or a combination thereof.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Security administrative records are retained under the National Archives and Records Administration's General Records Schedule 5.6: Security Records, Item 010. Destroy when 3 years old, but longer retention is authorized if required for business use. Visitor processing records in areas requiring highest level security awareness are retained under General Records Schedule 5.6, item 110. Destroy when 5 years old, but longer retention is authorized if required for business use. Visitor processing records in all other facility security areas are retained under General Records Schedule 5.6, item 111. Destroy when 2 years old, but longer retention is authorized if required for business use. Personnel security and access clearance records of people issued clearances are retained under General Records Schedule 5.6, item 181. Destroy 5 years after employee or contractor relationship ends, but longer retention is authorized if required for business use. Indexes to the personnel security case files are retained according to General Records Schedule 5.6 item 190 and destroyed when superseded or obsolete.

Insider threat inquiry records are retained according to General Records Schedule 5.6 item 220 and destroyed 25 years after close of inquiry, but longer retention is authorized if required for business use.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Records in use are protected to ensure that access is limited to those persons whose official duties require such access. Unattended records are maintained in NRC-controlled space in locked offices, locked desk drawers, or locked file cabinets.

Mass storage of records is protected when unattended by a combination lock and alarm system. Unattended classified records are protected in appropriate security containers in accordance with Management Directive 12.1.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about them should write to the Freedom of Information Act or Privacy Act Officer, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and comply with the procedures contained in NRC's Privacy Act regulations, 10 CFR part 9.

RECORD ACCESS PROCEDURE:

Same as ''Notification procedures.'' Some information is classified under Executive Order 12958 and will not be disclosed. Other information has been received in confidence and will not be

disclosed to the extent the disclosure would reveal a confidential source.

CONTESTING RECORD PROCEDURE:

Same as ''Notification procedures.''

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Pursuant to 5 U.S.C. 552a(k)(1), (k)(2), and (k)(5), the Commission has exempted portions of this system of records from 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (H), and (I), and (f).

HISTORY:

89 FR 58792 (July 19, 2024).

SYSTEM NAME AND NUMBER:

Facility Security Access Control Records—NRC 40.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Division of Facilities and Security, Office of Administration, NRC, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland.

SYSTEM MANAGER(S):

Director, Division of Facilities and Security, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2165–2169 and 2201; Executive Order (E.O.) 9397, as amended by E.O. 13478; E.O. 13462, as amended by E.O. 13516.

PURPOSE(S) OF THE SYSTEM:

Tracking NRC personal identification badges issued for access to NRC-controlled space and approved visitors to the NRC.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former NRC employees, consultants, contractors, other Government agency personnel, and approved visitors.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system includes information regarding: (1) NRC personal identification badges issued for continued access to NRC-controlled space; and (2) records regarding visitors to NRC. The records include, but are not limited to, an individual's name, electronic image, badge number, citizenship, employer, purpose of visit, person visited, date and time of visit, and other information contained on Government issued credentials.

RECORD SOURCE CATEGORIES:

Sources of information include NRC employees, contractors, consultants, employees of other Government agencies, and visitors.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to the other types of disclosures permitted under subsection (b) of the Privacy Act, the NRC may disclose information contained in this system of records without the consent of the subject individual if the disclosure is compatible with the purpose for which the record was collected under the following routine uses:

a. To control access to NRC classified information and to NRC spaces by human or electronic means;

b. Information (identification badge) may also be used for tracking applications within the NRC for other than security access purposes;

c. The electronic image used for the NRC employee personal identification badge may be used for other than security purposes only with the written consent of the subject individual;

d. A record from this system of records which indicates a violation of civil or criminal law, regulation, or order may be referred as a routine use to a Federal, State, local, or foreign agency that has authority to investigate, enforce, implement, or prosecute such laws. Further, a record from this system of records may be disclosed for civil or criminal law or regulatory enforcement purposes to another agency in response to a written request from that agency's head or an official who has been delegated such authority;

e. A record from this system of records may be disclosed as a routine use to a Federal, State, local, or foreign agency to obtain information relevant to an NRC decision concerning hiring or retaining an employee, letting a contract, or issuing a security clearance, license, grant or other benefit;

f. A record from this system of records may be disclosed as a routine use to a Federal, State, local, or foreign agency requesting a record that is relevant and necessary to its decision on a matter of hiring or retaining an employee, issuing a security clearance, reporting an investigation of an employee, letting a contract, or issuing a license, grant, or other benefit;

g. A record from this system of records may be disclosed as a routine use in the course of discovery; in presenting evidence to a court, magistrate, administrative tribunal, or grand jury or pursuant to a qualifying order from any of those; in alternative dispute resolution proceedings, such as arbitration or mediation; or in the course of settlement negotiations;

h. A record from this system of records may be disclosed as a routine use to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual;

i. A record from this system of records may be disclosed as a routine use to NRC-paid experts or consultants, and those under contract with the NRC on a ''need-to-know'' basis for a purpose within the scope of the pertinent NRC task. This access will be granted to an NRC contractor or employee of such contractor by a system manager only after satisfactory justification has been provided to the system manager;

j. A record from this system of records may be disclosed as a routine use to appropriate agencies, entities, and persons when (1) the NRC suspects or has confirmed that there has been a breach of the system of records, (2) the NRC has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the NRC (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with NRC efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm; and

k. A record from this system of records may be disclosed as a routine use to another Federal agency or Federal entity, when the NRC determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are maintained on paper and electronic media.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Information is indexed and accessed by individual's name, identification badge number, employer's name, date of visit, or sponsor's name.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

The National Archives and Records Administration (NARA) General Records Schedule (GRS) 5.6, Security

Management Records establishes retention requirements for visitor processing records and related security indexes. Visitor processing records for areas requiring the highest level of security awareness, including spaces designated by the Interagency Security Committee (ISC) as Facility Security Level (FSL) V, are covered under GRS 5.6, item 110 and are temporary records authorized for destruction when 5 years old, unless a longer retention period is required for business use. Visitor processing records for all other facility security areas, including those designated by ISC as FSL I through IV, are covered under GRS 5.6, item 111 and are temporary records authorized for destruction when 2 years old, unless longer retention is required for business use. Indexes to personnel security case files are covered under GRS 5.6, item 190 and are temporary records authorized for destruction when superseded or obsolete. The NARA GRS 5.6, Security Management Records establishes retention requirements for routine facility security operations, credentialing records, and personnel security investigative documentation. Facility security management operations records are covered under GRS 5.6, item 090 and are temporary records authorized for destruction when 30 days old, unless longer retention is required for business use. Records associated with personal identification credentials and cards, including application and activation records, are covered under GRS 5.6, item 120 and are temporary records authorized for destruction 6 years after the end of an employee or contractor's tenure, unless a longer retention period is required for business use. Personal identification cards are covered under GRS 5.6, item 121 and are temporary records authorized for destruction after expiration, confiscation, or return. Personnel suitability and eligibility investigative reports are covered under GRS 5.6, item 170 and are temporary records authorized for destruction in accordance with the investigating agency's instructions. Reports and records created by agencies conducting investigations under delegated investigative authority are covered under GRS 5.6, item 171 and are temporary records authorized for destruction in accordance with the applicable delegated authority agreement or memorandum of understanding.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

All records are maintained in NRC-controlled space that is secured after normal duty hours or a security area under guard presence in a locked security container/vault. There is an approved security plan which identifies the physical protective measures and access controls (*i.e.,* passwords and software design limiting access based on each individual's role and responsibilities relative to the system) specific to each system.

RECORD ACCESS PROCEDURES:

Same as ''Notification procedures.''

CONTESTING RECORD PROCEDURES:

Same as ''Notification procedures.''

NOTIFICATION PROCEDURES:

Individuals seeking to determine whether this system of records contains information about them should write to the Freedom of Information Act or Privacy Act Officer, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and comply with the procedures contained in NRC's Privacy Act regulations, 10 CFR part 9.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

HISTORY:

89 FR 58793 (July 19, 2024).

SYSTEM NAME AND NUMBER:

Employee Fitness Center Records—NRC 44.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Fitness Center, NRC, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland.

SYSTEM MANAGER(S):

Office of Chief Human Capital Officer Contracting Officer Representative, Office of the Chief Human Capital Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 7901; Executive Order (E.O.) 9397, as amended by E.O. 13478.

PURPOSE(S) OF THE SYSTEM:

Maintaining membership for the NRC Fitness Center.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NRC employees who apply for membership at the Fitness Center, including current and former members.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system includes applications to participate in NRC's Fitness Center, information on an individual's degree of physical fitness and their fitness activities and goals; and various forms, memoranda, and correspondence related to Fitness Facilities membership and financial/payment matters. Specific information contained in the application for membership includes the employee applicant's name, gender, age, badge id, height, weight, and medical information, including a history of certain medical conditions; the name of the individual's personal physician and any prescription or over-the-counter drugs taken on a regular basis; and the name and address of a person to be notified in case of emergency.

RECORD SOURCE CATEGORIES:

Information in this system of records is principally obtained from the subject individual. Other sources of information include, but are not limited to, the NRC Fitness Center Director, staff physicians retained by the NRC, and the individual's personal physicians.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to the other types of disclosures permitted under subsection (b) of the Privacy Act, the NRC may disclose information contained in this system of records without the consent of the subject individual if the disclosure is compatible with the purpose for which the record was collected under the following routine uses:

a. To the individual listed as an emergency contact, in the event of an emergency;

b. To the National Archives and Records Administration or to the General Services Administration for records management inspections conducted under 44 U.S.C. 2904 or 2906;

c. A record from this system of records which indicates a violation of civil or criminal law, regulation or order may be referred as a routine use to a Federal, State, local, or foreign agency that has authority to investigate, enforce, implement, or prosecute such laws. Further, a record from this system of records may be disclosed for civil or criminal law or regulatory enforcement purposes to another agency in response to a written request from that agency's head or an official who has been delegated such authority;

d. A record from this system of records may be disclosed as a routine use to a Federal, State, local, or foreign agency to obtain information relevant to an NRC decision concerning hiring or retaining an employee, letting a contract, or issuing a security clearance, license, grant or other benefit;

e. A record from this system of records may be disclosed as a routine use to a Federal, State, local, or foreign agency requesting a record that is relevant and necessary to its decision on a matter of hiring or retaining an employee, issuing a security clearance, reporting an investigation of an employee, letting a contract, or issuing a license, grant, or other benefit;

f. A record from this system of records may be disclosed as a routine use in the course of discovery; in presenting evidence to a court, magistrate, administrative tribunal, or grand jury or pursuant to a qualifying order from any of those; in alternative dispute resolution proceedings, such as arbitration or mediation; or in the course of settlement negotiations;

g. A record from this system of records may be disclosed as a routine use to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual;

h. A record from this system of records may be disclosed as a routine use to NRC-paid experts or consultants, and those under contract with the NRC on a ''need-to-know'' basis for a purpose within the scope of the pertinent NRC task. This access will be granted to an NRC contractor or employee of such contractor by a system manager only after satisfactory justification has been provided to the system manager;

i. A record from this system of records may be disclosed as a routine use to appropriate agencies, entities, and persons when (1) the NRC suspects or has confirmed that there has been a breach of the system of records, (2) the NRC has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the NRC (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with NRC efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm; and

j. A record from this system of records may be disclosed as a routine use to another Federal agency or Federal entity, when the NRC determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are maintained on paper and electronic media.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Information is indexed and accessed by an individual's name and/or NRC Badge ID number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Fitness Center records are retained according to the National Archives and Records Administration's General Records Schedule 2.7: Employee Health and Safety Records, item 080, Non-occupational health and wellness program records. Destroy 3 years after the project/activity or transaction is completed or superseded, but longer retention is authorized if needed for business use.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Records are maintained in a building where access is controlled by a security guard force. Access to the Fitness Center is controlled by keycard and bar code verification. Records in paper form are stored alphabetically by individuals' names in lockable file cabinets maintained in the NRC where access to the records is limited to agency and Fitness Center personnel whose duties require access. The records are under visual control during duty hours. Electronic records are protected by screen saver. Access to electronic data requires use of proper password and user identification codes. Only authorized personnel have access to areas in which information is stored.

RECORD ACCESS PROCEDURES:

Same as ''Notification procedures.''

CONTESTING RECORD PROCEDURES:

Same as ''Notification procedures.''

NOTIFICATION PROCEDURES:

Individuals seeking to determine whether this system of records contains information about them should write to the Freedom of Information Act or Privacy Act Officer, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and comply with the procedures contained in NRC's Privacy Act regulations, 10 CFR part 9.

Office of the Chief Information Officer, NRC, White Flint North Complex, 11555 Rockville Pike, Rockville, Maryland, and current contractor facility.

SYSTEM MANAGER(S):

Director, Solutions Development and Operations Division, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 42 U.S.C. 2165 and 2201(i); 44 U.S.C. 3501, 3504; Electronic Government Act of 2002, 44 U.S.C. chapter 36; Homeland Security Presidential Directive 12 (HSPD–12), Policy for a Common Identification Standard for Federal Employees and Contractors, August 27, 2004; Executive Order (E.O.) 9397, as amended by E.O. 13478.

PURPOSE(S) OF THE SYSTEM:

Track and control Personal Identity Verification (PIV) cards issued to persons entering and exiting the NRC facilities or using NRC systems; and verify that all person entering federal facilities, using Federal information resources, are authorized to do so.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals covered are persons who have applied for the issuance of electronic credentials for signature, encryption, and/or authentication purposes; have had their credentials renewed, replaced, suspended, revoked, or denied; have used their credentials to electronically make contact with, retrieve information from, or submit information to an automated information system; or have corresponded with NRC or its contractor concerning digital services.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains information needed to establish and verify the identity of users, to maintain the system, and to establish accountability and audit controls. System records may include: (a) applications for the issuance, amendment, renewal, replacement, or revocation of electronic

credentials, including evidence provided by applicants or proof of identity and authority, and sources used to verify an applicant's identity and authority; (b) credentials issued; (c) credentials denied, suspended, or revoked, including reasons for denial, suspension, or revocation; (d) a list of currently valid credentials; (e) a list of currently invalid credentials; (f) a record of validation transactions attempted with electronic credentials; and (g) a record of validation transactions completed with electronic credentials.

RECORD SOURCE CATEGORIES:

The sources for information are the individuals who apply for electronic credentials, the NRC and contractors using multiple sources to verify identities, and internal system transactions designed to gather and maintain data needed to manage and evaluate the electronic credentials program.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to the disclosures permitted under subsection (b) of the Privacy Act, the NRC may disclose information contained in this system of records without the consent of the subject individual if the disclosure is compatible with the purpose for which the record was collected under the following routine uses:

a. To agency electronic credential program contractors to compile and maintain documentation on applicants for verifying applicants' identity and authority to access information system applications; to establish and maintain documentation on information sources for verifying applicants' identities; to ensure proper management, data accuracy, and evaluation of the system;

b. To Federal authorities to determine the validity of subscriber digital certificates and other identity attributes;

c. To the National Archives and Records Administration (NARA) for records management purposes;

d. To a public data repository (*only name, email address, organization, and public key*) to facilitate secure communications using digital certificates;

e. A record from this system of records which indicates a violation of civil or criminal law, regulation, or order may be referred as a routine use to a Federal, State, local, or foreign agency that has authority to investigate, enforce, implement, or prosecute such laws. Further, a record from this system of records may be disclosed for civil or criminal law or regulatory enforcement purposes to another agency in response to a written request from that agency's head or an official who has been delegated such authority;

f. A record from this system of records may be disclosed as a routine use to a Federal, State, local, or foreign agency to obtain information relevant to an NRC decision concerning hiring or retaining an employee, letting a contract, or issuing a security clearance, license, grant or other benefit;

g. A record from this system of records may be disclosed as a routine use to a Federal, State, local, or foreign agency requesting a record that is relevant and necessary to its decision on a matter of hiring or retaining an employee, issuing a security clearance, reporting an investigation of an employee, letting a contract, or issuing a license, grant, or other benefit;

h. A record from this system of records may be disclosed as a routine use in the course of discovery; in presenting evidence to a court, magistrate, administrative tribunal, or grand jury or pursuant to a qualifying order from any of those; in alternative dispute resolution proceedings, such as arbitration or mediation; or in the course of settlement negotiations;

i. A record from this system of records may be disclosed as a routine use to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual;

j. A record from this system of records may be disclosed as a routine use to NRC-paid experts or consultants, and those under contract with the NRC on a ''need-to-know'' basis for a purpose within the scope of the pertinent NRC task. This access will be granted to an NRC contractor or employee of such contractor by a system manager only after satisfactory justification has been provided to the system manager;

k. A record from this system of records may be disclosed as a routine use to appropriate agencies, entities, and persons when (1) the NRC suspects or has confirmed that there has been a breach of the system of records, (2) the NRC has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the NRC (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with NRC efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm; and

l. A record from this system of records may be disclosed as a routine use to another Federal agency or Federal entity, when the NRC determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are stored electronically.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records are retrievable by an individual's name, email address, certificate status, certificate number or credential number, certificate issuance date, or approval role.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records are retained under the National Archives and Records Administration's, General Records Schedule 5.6: Security Records. Application and activation records for personal identification credentials and cards are retained under General Records Schedule 5.6, item 120. Destroy 6 years after the end of an employee or contractor's tenure, but longer retention is authorized if required for business use. Personnel identification cards are retained under General Records Schedule 5.6, item 121. Destroy after expiration, confiscation, or return. Local facility identification and card access records are retained under General Records Schedule 5.6, item 130. Destroy upon immediate collection once the temporary credential or card is returned for potential reissuance due to nearing expiration or not to exceed 6 months from time of issuance or when individual no longer requires access, whichever is sooner, but longer retention is authorized if required for business use.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Technical, administrative, and personnel security measures are implemented to ensure confidentiality, integrity, and availability of the system data stored, processed, and transmitted. Electronic records are, at a minimum, password protected. Access to and use of these records is limited to those

individuals whose official duties require access.

RECORD ACCESS PROCEDURES:

Same as ''Notification procedures.''

CONTESTING RECORD PROCEDURES:

Same as ''Notification procedures.''

NOTIFICATION PROCEDURES:

Individuals seeking to determine whether this system of records contains information about them should write to the Freedom of Information Act or Privacy Act Officer, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and comply with the procedures contained in NRC's Privacy Act regulations, 10 CFR part 9.

EXEMPTIONS CLAIMS FOR THE SYSTEM:

None.

HISTORY:

89 FR 58799 (July 19, 2024).

SYSTEM NAME AND NUMBER:

Health Emergency Records—NRC 46.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Headquarters, 11555 Rockville Pike, Rockville, Maryland. Records may be maintained at all locations at which the NRC, or contractors on behalf of the NRC, operate or at which NRC operations are supported.

SYSTEM MANAGER(S):

Chief Human Capital Officer, Office of the Chief Human Capital Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Workforce safety Federal requirements, which include: the Occupational Safety and Health Act of 1970; Executive Order 12196; and 5 U.S.C. 7902, ''Safety programs.'' Federal laws that authorize the NRC to create and maintain Federal records of agency activities, which include: 44 U.S.C. 3101; the Religious Freedom Restoration Act of 1993, 42 U.S.C. Chapter 21B; Title VII of the Civil Rights Act of 1964, as amended, 42 U.S.C. 2000e; and the Rehabilitation Act of 1973, as amended, 29 U.S.C. 701 *et seq.*

Authorities addressing the federal government's preparation for, and response to, public health threats, including the PREVENT Pandemics Act, 42 U.S.C. 300hh–3; and Executive Order 13987, ''Organizing and Mobilizing the United States Government to Provide a Unified and Effective Response to Combat COVID–19 and to Provide United States Leadership on Global Health and Security.''

PURPOSE(S) OF THE SYSTEM:

Maintaining records necessary and relevant to NRC activities responding to and mitigating high-consequence public health threats. Records may include, but are not limited to, those applicable health related records needed to understand the impact of an illness or disease on the NRC workforce or to assist the NRC in protecting its workforce from a declared public health emergency, pandemic, or other high-consequence public health threat, including records submitted by NRC personnel or by the lawful representative of such personnel.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NRC employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records maintained in this system may include:

A. Full name, NRC employee ID number; telephone number, worksite, email address, supervisor's name, address and contact information.

C. Other information about the individual directly related to the disease or illness (*e.g.,* testing results/information, symptoms, treatments, source of exposure, or other applicable health related information).

D. Appointment scheduling information, including the date, time, and location of a scheduled appointment.

E. Medical screening information, including the individual's name, date of birth, age, category of employment, current medical status, related medical history, and any relevant medical history.

RECORD SOURCE CATEGORIES:

Records may be obtained from NRC employees or their representative who may provide relevant information on a suspected or confirmed disease or illness, or the prevention of such disease or illness, which is the subject of a high-consequence public health threat.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to the other types of disclosures permitted under subsection (b) of the Privacy Act, the NRC may disclose information contained in this system of records without the consent of the persons or entities mentioned herein if the disclosure is compatible with the purpose for which the record was collected under the following routine uses:

A. To appropriate medical facilities, or Federal, State, local, Tribal, territorial or foreign government agencies, to the extent permitted by law, for the purpose of protecting the vital interests of individual(s), including to assist the United States Government in responding to or mitigating high-consequence public health threats.

B. To determine eligibility for access to NRC buildings, NRC licensee facilities or sites, or other Federal facilities.

C. To provide licensees information needed for unescorted access or access to the licensee's facility or facilities.

D. Where a record, either alone or in conjunction with other information, indicates a violation or potential violation of law—criminal, civil, or regulatory in nature—the relevant records may be referred to the appropriate Federal, State, local, territorial, Tribal, or foreign law enforcement authority or other appropriate entity charged with the responsibility for investigating or prosecuting such violation or charged with enforcing or implementing such law.

E. In an appropriate proceeding before a court, grand jury, or administrative or adjudicative body, when the NRC determines that the records are arguably relevant to its proceeding; or in an appropriate proceeding before an administrative or adjudicative body when the adjudicator determines the records to be relevant to the proceeding.

F. To contractors, grantees, experts, consultants, students, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for the Federal Government, when necessary to accomplish an NRC function related to this system of records.

G. A record on an employee from this system of records may be disclosed as a routine use to a Federal, State, local, territorial, Tribal, or foreign agency requesting a record that is relevant and necessary to its decision on a matter of hiring or retaining an employee, issuing a security clearance, reporting an investigation of that individual, letting a contract, or issuing a license, grant, or other benefit.

H. A record on an employee from this system of records may be disclosed as a routine use to a Congressional office in response to an inquiry from the Congressional office made at the request of that individual.

I. To the National Archives and Records Administration for purposes of records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

J. To appropriate agencies, entities, and persons when (1) the NRC suspects or has confirmed that there has been a breach of the system of records, (2) the NRC has determined that as a result of the suspected or confirmed breach there is a risk of harm to an individual(s), the NRC (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the NRC's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

K. To another Federal agency or Federal entity, when the NRC determines that information from this system of records is necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach, or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

L. To any agency, organization, or individual for the purpose of performing authorized audit or oversight operations of the NRC and meeting related reporting requirements.

M. To such recipients and under such circumstances and procedures as are mandated by Federal statute or treaty.

N. A record from this system of records may be disclosed as a routine use to NRC-paid experts or consultants, and those under contract with the NRC on a ''need-to-know'' basis for purpose within the scope of the pertinent NRC task. This access will be granted to an NRC contractor or employee of such contractor by a system manager only after satisfactory justification has been provided to the system manager.

O. To a Federal agency employee, expert, consultant, or contractor in performing a Federal duty for purposes of authorizing, arranging, and/or claiming reimbursement for official travel, including, but not limited to, traveler profile information.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

All records in this system of records are maintained and in compliance with applicable executive orders, statutes, and agency implementing recommendations. Electronic records are stored in databases. Paper records are maintained in a secure, access-controlled room, with access limited to authorized personnel.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records will be retrieved by any of the categories of records, including name, location, date of applicable health information, or work status.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

To the extent applicable, to ensure compliance with Americans with Disabilities Act, the Rehabilitation Act, and the Genetic Information Nondiscrimination Act of 2008, medical information must be ''maintained on separate forms and in separate medical files and be treated as a confidential medical record.'' 42 U.S.C. 12112(d)(3)(B); 42 U.S.C. sec 2000ff–5(a); 29 CFR 1630.14(b)(1), (c)(1),(d)(4)(i); and 29 CFR 1635.9(a).

This means that medical information and documents must be stored separately from other personnel records. As such, the NRC must keep medical records for at least 1 year from creation date (29 CFR 1602.14). Further, records compiled under this system of records notice will be maintained in accordance with the National Archives and Records Administration General Records Schedule (GRS) 2.7, Employee Health and Safety Records, Items 010, 070, or 080 to the extent applicable.

GRS 2.7 item 010 (DAA–GRS–2017–0010–0001)—Clinic scheduling records. Temporary. Destroy when 3 years old, but longer retention is authorized if needed for business use.

GRS 2.7 item 070 (DAA–GRS–2017–0010–0012)—Non-occupational individual case files. Temporary. Destroy 10 years after the most recent encounter, but longer retention is authorized if needed for business use.

GRS 2.7 item 080 (DAA–GRS–2017–0010–0013)—Non-occupational health and wellness program records. Temporary. Destroy 3 years after the project/activity/or transaction is completed or superseded, but longer retention is authorized if needed for business use.

GRS 2.7 item 063 (DAA–GRS–2021–0003–0001)—Vaccination attestations and proof of vaccination records. Federal employees and contractors. Temporary. Destroy when 3 years old.

GRS 2.7 item 064 (DAA–GRS–2021–0003–0002)—Vaccination attestations and proof of vaccination records. Visitors. Temporary. Destroy when 30 days old.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

The NRC safeguards records in this system according to applicable rules and policies, including all applicable NRC automated systems security and access policies. The NRC has imposed controls to minimize the risk of compromising the information that is being stored. Users of individual computers can only gain access to the data by valid user identification and password. Paper records are maintained in a secure, access-controlled room, with access limited to authorized personnel.

RECORDS ACCESS PROCEDURES:

Same as ''Notification procedures.''

CONTESTING RECORD PROCEDURES:

Same as ''Notification procedures.''

NOTIFICATION PROCEDURES:

Individuals seeking to determine whether this system of records contains information about them should write to the Freedom of Information Act Officer or Privacy Act Officer, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and comply with procedures contained in NRC's Privacy Act regulations, 10 CFR part 9.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

POSTAL REGULATORY COMMISSION

[Docket Nos. MC2026–401 and K2026–390]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *https://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

II. Public Proceeding(s)
III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). The Public Representative does not represent any individual person, entity or particular point of view, and, when Commission attorneys are appointed, no attorney-client relationship is established. Section II also establishes comment deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s) identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041. Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. *See* 39 CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR 3041.405(c)–(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests.

II. Public Proceeding(s)

None. *See* Section III for summary proceedings.

III. Summary Proceeding(s)

1. *Docket No(s).:* MC2026–401 and K2026–390; *Filing Title:* USPS Request to Add New Mid-Market Standardized Distinct Product, PM–GA Contract 1104, and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* October 1, 2026; *Filing Authority:* 39 U.S.C. 3642 and 3633, 39 CFR 3035.105, and 39 CFR 3041.325.

This Notice will be published in the **Federal Register**.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106564; File No. SR–NYSEARCA–2026–68]

Self-Regulatory Organizations; NYSE Arca, Inc.; Order Instituting Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To Amend Rules 5.32–O and 5.35–O

October 1, 2026.

I. Introduction

On June 18, 2026, NYSE Arca, Inc. (''Exchange'' or ''NYSE Arca'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] a proposed rule change to permit cash settlement for up to 50 non-ETF Flexible Exchange (''FLEX'') Equity Options. The proposed rule change was published for comment in the **Federal Register** on July 7, 2026.[4] On August 19, 2026, pursuant to Section 19(b)(2)(A) of the Act,[5] the Commission designated a longer period within which to take action on the proposed rule change.[6] The Commission is instituting proceedings pursuant to Section 19(b)(2)(B) of the Act[7] to determine whether to approve or disapprove the proposed rule change.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

II. Description of the Proposed Rule Change

As described more fully in the Notice,[8] the Exchange proposes to: (i) amend paragraph (f)(3)(ii) of Rule 5.32–O to permit cash settlement for up to 50 non-ETF FLEX Equity Options whose underlying security meets the same criteria that currently must be met to qualify for the cash settlement program for ETF FLEX Equity Options; (ii) amend paragraph (f)(3)(ii)(A) of Rule 5.32–O to provide that, where more than 50 underlying ETFs or 50 underlying non-ETFs qualify, the Exchange will select the 50 qualifying securities with the highest average daily notional value, replacing the current usage of highest average daily share volume; (iii) and correspondingly revise Rule 903G, which addresses FLEX Equity Option position limits.

III. Proceedings To Determine Whether To Approve or Disapprove SR–NYSEARCA–2026–68 and Grounds for Disapproval Under Consideration

The Commission is instituting proceedings pursuant to Section 19(b)(2)(B) of the Act[9] to determine whether the Exchange's proposed rule change should be approved or disapproved. Institution of proceedings is appropriate at this time in view of the legal and policy issues raised by the proposed rule change. Institution of proceedings does not indicate that the Commission has reached any conclusions with respect to any of the issues involved. Rather, as described below, the Commission seeks and encourages interested persons to provide additional comment on the proposed rule change to inform the Commission's analysis of whether to

[4] *See* Securities Exchange Act Release No. 105833 (July 1, 2026), 91 FR 41716 (''Notice'').

[5] 15 U.S.C. 78s(b)(2)(A).

[6] *See* Securities Exchange Act Release No. 106164, 91 FR 54783 (August 24, 2026). The Commission designated October 5, 2026, as the date by which the Commission shall approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change.

[7] 15 U.S.C. 78s(b)(2)(B).

[8] *See* Notice, *supra* note 4.

[9] 15 U.S.C. 78s(b)(2)(B).

approve or disapprove the proposed rule change.

Pursuant to Section 19(b)(2)(B) of the Act,[10] the Commission is providing notice of the grounds for disapproval under consideration. The Commission is instituting proceedings to allow for additional analysis of, and input from commenters with respect to, the proposed rule change's consistency with the Act and, in particular, Section 6(b)(5) of the Act,[11] which requires, among other things, that the rules of a national securities exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public.

The Commission asks that commenters address the sufficiency of the Exchange's statements in support of the proposal, which are set forth in the Notice,[12] in addition to any other comments they may wish to submit about the proposed rule change. By way of example, the Commission recently granted exemptive relief—to permit p.m. settlement for cash-settled security futures—that was conditioned on the collection and provision of certain data elements.[13] Commenters may submit comments regarding the potential utility of the same or similar data collection commitments here, in addition to any other comments they may wish to submit about the proposed rule change.

IV. Procedure: Request for Written Comments

The Commission requests that interested persons provide written submissions of their views, data, and arguments with respect to the concerns identified above, including the issues raised by commenters, as well as any other concerns they may have with the proposal. In particular, the Commission invites the written views of interested persons concerning whether the proposed rule change is consistent with Section 6(b)(5), or any other provision of the Act, or the rules and regulations thereunder. Although there do not appear to be any issues relevant to approval or disapproval that would be facilitated by an oral presentation of views, data, and arguments, the Commission will consider, pursuant to Rule 19b–4 under the Act,[14] any request for an opportunity to make an oral presentation.[15]

Interested persons are invited to submit written data, views, and arguments regarding whether the proposed rule change should be approved or disapproved by October 27, 2026. Any person who wishes to file a rebuttal to any other person's submission must file that rebuttal by November 10, 2026.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSEARCA–2026–68 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSEARCA–2026–68. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSEARCA–2026–68 and should be submitted on or before October 27, 2026. Rebuttal comments should be submitted by November 10, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106559; File No. SR–IEX–2026–36]

Self-Regulatory Organizations; Investors Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Supplementary Material .04 and .05 to IEX Rule 23.150(h) To Change Three of the Variables in the Options Risk Parameter Quote Instability Calculation, Each Within the Permitted Ranges Specified Therein

October 1, 2026.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on September 23, 2026, the Investors Exchange LLC (''IEX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Pursuant to the provisions of Section 19(b)(1) under the Act,[4] and Rule 19b–4 thereunder,[5] the Exchange is filing with the Commission a proposed rule change to amend Supplementary Material .04 and .05 to IEX Rule 23.150(h) to change three of the variables in the Options Risk Parameter quote instability calculation, each within the permitted ranges specified therein. The Exchange has designated this proposal as constituting an interpretation with respect to the administration of an existing IEX Rule pursuant to Rule 19b–4(f)(1) under the Act.[6]

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] 15 U.S.C. 78s(b)(1).

[5] 17 CFR 240.19b–4.

[6] 17 CFR 240.19b–4(f)(1).

The text of the proposed rule change is available at the Exchange's website at *https://www.iexexchange.io/resources/regulation/rule-filings* and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

On September 18, 2025, the Commission approved IEX's rule change proposal to adopt rules governing the trading of options on the Exchange in a new facility called ''IEX Options'';[7] IEX Options has announced its plan to commence trading options on October 2, 2026.[8] The purpose of the proposed rule change is to amend Supplementary Materials .04 and .05 to IEX Rule 23.150(h) to change three of the variables in the Options Risk Parameter quote instability calculation, each within the range specified therein. Pursuant to IEX Rule 23.150(h), IEX Options will offer Market Makers the Options Risk Parameter (''ORP''), which the Market Makers can elect to apply to a quotation that rests on the Order Book at the price designated by the Market Maker that entered the quotation.[9] When the ORP is triggered based on pre-defined criteria in IEX rules, the relevant quotation(s) will be adjusted or canceled in the manner specified in IEX rules.[10]

As described in the Options Rule Filing, the ORP will leverage IEX's proprietary mathematical formula—the Options Quote Indicator, which is a fixed formula specified transparently in IEX's rules, to assess the materiality of an imminent change to the current best Protected Bid[11] of the Away Markets[12] to a lower price or of an imminent change to the current best Protected Offer[13] of the Away Markets to a higher price for a particular listed options series (*i.e.,* an imminent adverse price change).[14] The Indicator utilizes real time relative quoting activity of protected quotations from Signal Exchanges (as defined in IEX Rule 11.190(g)) in securities underlying each listed options series and a proprietary mathematical calculation (the ''quote instability calculation''), as described in more detail below, to assess the impact of a price change in the underlying on the price of a particular options series.[15] When the quote instability calculation identifies an imminent adverse price change in a particular listed options series, it will generate a quote instability determination.[16] If a Market Maker has elected that its quotations be subject to the ORP, and a quote instability determination is generated for an options series quoted by a Market Maker and the quote is above (below) the price level of the quote instability determination, the quote will be either cancelled or repriced to the price level of the quote instability determination, as instructed by the Market Maker.[17]

Supplementary Materials .04 and .05 to IEX Rule 23.150(h) provide that the Exchange may change three of the variables in the ORP quote instability calculation. For two aspects of the Quote Instability Calculation formula—the Delta Bound Band[18] and the Quote Instability Threshold[19]—Supplementary Material .04 to IEX Rule 23.150(h) specifies the possible range of values the Exchange may use for each aspect and the initial value for each aspect. Similarly, for the frequency of calculation of implied volatility, which is used to calculate Delta, Supplementary Material .05 to IEX Rule 23.150(h) specifies that it will be calculated each half-hour of System operation but that the Exchange may determine to calculate the value more frequently based on its assessment of factors that would optimize application of the ORP.[20]

As specified in Supplementary Material .04 and .05 to IEX Rule 23.150(h), in the event that the Exchange determines to change any of the two variables described above or the frequency of its calculation of implied volatility, it will submit a rule filing pursuant to Rule 19b–4(f) specifying the new value(s). Furthermore, as specified in the Options Rule Filing (and consistent with its approval by the Commission), if the Exchange determines to change such values within the applicable specified ranges, the Exchange will submit a rule filing pursuant to Rule 19b–4(f)(1) under the Act[21] (or other appropriate rule filing type) specifying the new value, within the range of possible values specified in the applicable rule. IEX believes that the proposed changes in this rule filing to values that fall within the previously approved range of possible values constitutes a stated policy, practice, or interpretation with respect to the meaning, administration, or enforcement of an existing rule, and therefore that a filing pursuant to Rule 19b–4(f)(1) under the Exchange Act is appropriate.[22]

In preparation for launch of IEX Options, the Exchange proposes to modify each of these three (Delta Bound Band, Quote Instability Threshold, and

[7] *See* Securities Exchange Act Release No. 103998 (September 18, 2025), 90 FR 45861 (September 23, 2025) (SR–IEX–2025–02) (Commission order approving a Proposed Rule Change, as Modified by Amendment No. 3, to Adopt Rules to Govern the Trading of Options on the Exchange for a New Facility Called IEX Options) (''Approval Order'').

[8] *See https://www.iex.io/options/resources#important-dates.*

[9] The purpose and operation of the ORP is described in the Exchange's Proposed Rule Change to Adopt Rules to Govern the Trading of Options on the Exchange for a New Facility Called IEX Options (the ''Options Rule Filing''), Securities Exchange Act Release No. 103290 (June 18, 2025), 90 FR 26865 (June 24, 2025) (SR–IEX–2025–02).

[10] *See* IEX Rule 23.150(h).

[11] *See* IEX Rule 28.100(a)(19).

[12] *See* IEX Rule 22.160(a)(7).

[13] *See* IEX Rule 28.100(a)(19).

[14] *See* IEX Rule 23.150(h).

[15] *See* Supplementary Material .04 to IEX Rule 23.150(h).

[16] *See* IEX Rule 23.150(h)(1)(A).

[17] *See* IEX Rule 23.150(h)(1)(C).

[18] *See* Supplementary Material .04(1)(q) to IEX Rule 23.150(h). Delta is a key metric in options trading that measures the sensitivity of an option's price to changes in the price of the underlying asset. The Delta Bound Band restricts the ORP from triggering unless the option's Delta is within the specified band. Currently, the initial value for the Delta Bound Band would be between 0–1, with the possible range of values between 0–1.

[19] *See* Supplementary Material .04(2)(e) to IEX Rule 23.150(h). Currently, the possible Quote Instability Threshold range will be within a range of 0%–100%. If the Quote Instability Threshold is set at 100%, the expected change in the NBB/NBO of the option resulting from price movement in the underlying must be at least 100% of the current value of the NBB/NBO of the option for the ORP to trigger. If the Quote Instability Threshold is set at 0%, ORP would trigger if there is any expected change to the NBB/NBO of the option resulting from price movement in the underlying. The current initial value for the Quote Instability Threshold is specified to be 0.1%. When triggered, ORP will only result in the repricing or cancellation of quotes if the change to the NBB/NBO of the option resulting from price movement in the underlying is to a different price level than the current NBB/NBO after rounding to the nearest minimum price variation.

[20] *See* Supplementary Material .05 to IEX Rule 23.150(h).

[21] *See* 17 CFR 240.19b–4(f)(1). A rule filing pursuant to Rule 19b–4(f)(1) under the Exchange Act takes effect upon filing with the Commission.

[22] *See* Options Rule Filing, *supra,* note 9, 90 FR at 26879.

Implied Volatility calculation frequency) variables, as set forth below, in order to optimize the application of the ORP for launch with more conservative settings than initially approved (but within the approved ranges), in order to enable market participants to acclimate to IEX's new options market. The proposed rule change would be operative for IEX Options launch, currently scheduled to begin on October 2, 2026.

Variable	Current value	Range	Proposed value
Delta Bound Band	0–1	0–1	0.30–1.00.
Quote Instability Threshold	0.1%	0%–100%	0.5%.
Implied Volatility Calculation frequency.	Each half hour of System operation.	No longer than each half hour of System operation.	Each one minute of System operation.

Accordingly, IEX proposes to amend Supplementary Material .04 and .05 to IEX Rule 23.150(h) to reflect such modifications to the value of each of the three variables, as described above.

The Exchange will issue a Trading Alert announcing the modifications to the values of the three variables, as described above, upon effectiveness of this proposed rule change.

2. Statutory Basis

IEX believes that the proposed rule change is consistent with Section 6(b) [23] of the Act in general, and furthers the objectives of Section 6(b)(5) of the Act,[24] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. Specifically, as discussed in the Purpose section, the proposed change constitutes a stated policy, practice or interpretation with respect to the meaning, administration, or enforcement of existing IEX rules as contemplated by the Options Rule Filing. In this regard, IEX believes that the changes to the manner in which IEX will administer the ORP will optimize application of the ORP for IEX Options launch and thereby support Market Makers in providing more competitive quotes which will benefit all market participants and thereby support the protection of investors and the public interest.

Additionally, the Exchange notes that the ORP will continue to leverage a fixed formula specified transparently in IEX rules, that was previously approved by the Commission.[25] The Exchange is not proposing to add any new functionality, but merely to adjust the values for the three variables for the ORP quote instability calculation within the ranges set forth in IEX rules, as discussed in the Purpose section. Thus, IEX does not believe that the proposed rule change raises any new or novel issues that have not already been considered by the Commission, in that the ORP functionality and IEX's ability to change the three values within specified ranges were previously approved by the Commission.[26]

B. Self-Regulatory Organization's Statement on Burden on Competition

IEX does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, as discussed in the Statutory Basis section, the proposal is designed to enhance competition by optimizing application of the ORP for IEX Options launch.

The Exchange does not believe that the proposed rule change will impose any burden on intra-market competition because it will apply to all Options Members in the same manner and any Options Member could become a Market Maker subject to meeting applicable requirements.

The Exchange also does not believe that the proposal will impose any burden on inter-market competition that is not necessary or appropriate. Competing exchanges are free to adopt similar functionality, subject to the Commission rule filing process.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(i) [27] of the Act and Rule 19b–4(f)(1) [28] thereunder, in that the proposed rule change constitutes a stated policy, practice, or interpretation with respect to the meaning, administration, or enforcement of an existing rule of IEX.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [29] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–IEX–2026–36 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–IEX–2026–36. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/*

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106567; File No. 10–256]

Acknowledgement of Receipt of Notice of Registration as a National Securities Exchange Pursuant to Section 6(g) of the Securities Exchange Act of 1934 by ICE Futures U.S., Inc.

October 1, 2026.

Section 6(g) of the Securities Exchange Act of 1934 (''Exchange Act'') [1] provides that an exchange that lists or trades security futures products may register as a national securities exchange solely for the purposes of trading security futures products by filing a written notice with the Securities and Exchange Commission (''Commission'') if: (1) the exchange is a board of trade, as that term is defined by the Commodity Exchange Act (''CEA''),[2] that has been designated a contract market by the Commodity Futures Trading Commission (''CFTC'') and such designation is not suspended by order of the CFTC; and (2) such exchange does not serve as a market place for transactions in securities other than security futures products or futures on exempted securities or groups or indexes of securities or options thereon that have been authorized under Section 2(a)(1)(C) of the CEA.[3] Rule 6a–4 under the Exchange Act [4] requires that such an exchange submit written notice of registration to the Commission on Form 1–N.[5] Under Exchange Act Section 6(g)(2)(B), an exchange's registration as a national securities exchange becomes effective contemporaneously with the submission of the written notice on Form 1–N.[6]

On September 30, 2026, ICE Futures U.S., Inc. (''ICE Futures'') filed a Form 1–N with the Commission. Pursuant to Section 6(g)(3) of the Exchange Act,[7] the Commission hereby acknowledges receipt of the Form 1–N submitted by ICE Futures. Copies of the Form 1–N, including all exhibits, are available on the Commission's internet website (*https://www.sec.gov/rules-regulations/commission-orders-notices/other-commission-orders-notices-information*).

For further information about this Release, you may contact David Dimitrious, Senior Special Counsel; Jennifer Colihan, Special Counsel; Eugene Hsia, Special Counsel; Michou Nguyen, Special Counsel; and Alba Baze, Attorney-Adviser, Office of Market Supervision, Division of Trading and Markets, at (202) 551–5550, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[8]

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106560; File No. SR–C2–2026–027]

Self-Regulatory Organizations; Cboe C2 Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 5.52

October 1, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on September 24, 2026, Cboe C2 Exchange, Inc. (the ''Exchange'' or ''C2'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe C2 Exchange, Inc. (''C2'' or the ''Exchange'') is filing with the Securities and Exchange Commission (''Commission'' or ''SEC'') a proposed rule change to amend Exchange Rule 5.52 (Market-Maker Quotes) to provide that the $5 maximum bid/ask differential will apply to options series expiring in 270 days or less, and a $15 maximum bid/ask differential will apply to options series expiring in more than 270 days. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Commission's website (*https://www.sec.gov/rules/sro.shtml*), the Exchange's website (*https://www.cboe.com/us/equities/regulation/rule_filings/ctwo/*), and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 5.52(c) to add a time-to-expiration tier to the existing bid/ask differential requirements for Market-Maker quotes.

The Exchange previously adopted bid/ask differential requirements for Market-Maker quotes under Rule 5.52(c) in a recent rule filing.[3] The Prior Filing

[3] *See* Securities Exchange Act Release No. 106207 (August 27, 2026), 91 FR 56257 (September 1, 2026) (SR–C2–2026–022) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend

Continued

established a single general maximum bid/ask differential of $5 regardless of the Market-Maker's bid, applicable to all options series without regard to time to expiration. The Exchange now proposes to amend Rule 5.52(c) to conform to the approach in Cboe Options Rule 5.52(c), under which the $5 maximum bid/ask differential applies to options series expiring in 270 days or less, and a $15 maximum applies to options series expiring in more than 270 days.

The use of time to expiration as a variable in bid/ask differential requirements is an established concept across options exchanges. Cboe Options Rule 5.52(c) uses a 270-day threshold, under which a $5 maximum bid/ask differential applies to options series expiring in 270 days or less, and a $15 maximum applies to options series expiring in more than 270 days. Similarly, ISE Options 2, Section 4(b)(4) provides that bid/ask differentials do not apply to options series until the time to expiration is less than nine months (approximately 270 days), and Phlx Options 4A, Section 12(b)(2)(i) similarly provides that bid/ask differential rules shall not apply to index long-term option series until the time to expiration is less than twelve months.

The Exchange believes the proposed general bid/ask differentials of $5 for options series expiring in 270 days or less and $15 for options series expiring in more than 270 days are reasonable and appropriate. The $5 differential for shorter-dated series is sufficiently wide to accommodate normal market conditions and volatility while preventing Market-Makers from entering quotes that are so wide as to provide no meaningful liquidity. The wider $15 differential for longer-dated series (*i.e.,* those with more than 270 days to expiration) accounts for the reduced liquidity, wider theoretical values, and greater uncertainty associated with long-term options.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[4] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[5] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[6] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that adding a time-to-expiration tier to the existing bid/ask differential requirements promotes just and equitable principles of trade and removes impediments to and perfects the mechanism of a free and open market and a national market system. The amendment conforms to Cboe Options Rule 5.52(c), and will enhance the quality of markets on C2 Options by establishing bid/ask differential requirements calibrated to the differing liquidity characteristics and pricing uncertainty across options series with varying times to expiration. Specifically, by establishing a general maximum permissible width of $5 (for options series expiring in 270 days or less) and $15 (for options series expiring in more than 270 days) between a Market-Maker's bid and offer, the Exchange believes the proposal will improve market quality by providing investors with more meaningful execution opportunities and contributing to more efficient price discovery.

As discussed above, the Exchange believes the proposed bid/ask differentials are reasonable and appropriate. The $5 differential for shorter-dated series accommodates normal market conditions while preventing excessively wide quotes. The wider $15 differential for longer-dated series accounts for the reduced liquidity, wider theoretical values, and greater uncertainty associated with long-term options. The use of time to expiration as a variable in bid/ask differential requirements is an established concept across options exchanges, including Cboe Options Rule 5.52(c), ISE Options 2, Section 4(b)(4), and Phlx Options 4A, Section 12(b)(2)(i).

The amended, tiered bid/ask differential requirements will apply uniformly to all Market-Makers on C2 Options based on the applicable time to expiration. The proposal therefore does not permit unfair discrimination among Market-Makers and applies the same $5 and $15 maximums on the same basis to similarly situated options series. For the foregoing reasons, the Exchange believes the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the amended, tiered bid/ask differential requirements will apply uniformly to all Market-Makers on C2 Options. The $5 and $15 maximums will be determined by the same time-to-expiration framework for all Market-Makers.

The Exchange does not believe that the proposed rule change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed time-to-expiration tier conforms to Cboe Options Rule 5.52(c) and is consistent with the quote width frameworks of other options exchanges, including ISE and Phlx. By adopting bid/ask differential requirements consistent with those of other options exchanges, Market-Makers on the Exchange will be subject to comparable bid/ask differential requirements as market-makers on other markets.

For the foregoing reasons, the Exchange does not believe the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become

Exchange Rule 5.52 (Market-Maker Quotes) To Adopt Two-Sided Quote Bid/Ask Differentials) (the ''Prior Filing'').

[4] 15 U.S.C. 78f(b).

[5] 15 U.S.C. 78f(b)(5).

[6] *Id.*

operative for 30 days after the date of the filing, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act [7] and subparagraph (f)(6) of Rule 19b–4 thereunder.[8]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [9] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–C2–2026–027 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–C2–2026–027. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection.

All submissions should refer to file number SR–C2–2026–027 and should be submitted on or before October 27, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[10]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[OMB Control No. 3235–0780]

Agency Information Collection Activities; Proposed Collection; Comment Request; Extension: Rule 0–5

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the ''Commission'') is soliciting comments on the collection of information summarized below. The Commission plans to submit this collection of information to the Office of Management and Budget for extension and approval.

Rule 0–5 (17 CFR 270.0–5) under the Investment Company Act (the ''Act'') (15 U.S.C. 80a *et seq.*) entitled ''Procedure with Respect to Applications and Other Matters,'') sets forth procedure for applications seeking orders for exemptions or other relief under the Investment Company Act. Rule 0–5(e) requires applicants seeking expedited review to include certain information with the application. Rule 0–5(e)(1) requires that the cover page of the application include a notation prominently stating ''EXPEDITED REVIEW REQUESTED UNDER 17 CFR 270.0–5(d).'' Rule 0–5(e)(2) requires applicants to submit exhibits with marked copies of the application showing changes from the final versions of two precedent applications identified as substantially identical. Rule 0–5(e)(3) requires an accompanying cover letter, signed, on behalf of the applicant, by the person executing the application (i) identifying two substantially identical applications and explaining why the applicant chose those particular applications, and if more recent applications of the same type have been approved, why the applications chosen, rather than the more recent applications, are appropriate; and (ii) certifying that that the applicant believes the application meets the requirements of rule 0–5(d) and that the marked copies required by rule 0–5(e)(2) are complete and accurate.

Rule 0–5(g) provides that, if an applicant has not responded in writing to a request for clarification or modification of an application filed under standard review within 120 days after the request, the application will be deemed withdrawn. As an oral response would not stop an application from being deemed withdrawn, rule 0–5(g), requires applicants to respond ''in writing'' and therefore create an additional cost within the meaning of the PRA.

The information collected under rule 0–5(g) and (e) is intended to provide an expedited review procedure for certain applications and establish an internal timeframe for review of applications outside of the expedited procedure. The rule is meant to provide relief as efficiently and timely as possible, while also ensuring that applications continue to be carefully analyzed consistent with the relevant statutory standards.

Applicants for orders under the Act can include investment companies and affiliated persons of investment companies. Applicants file applications as they deem necessary. The Commission receives approximately 188 applications per year under the Act, and of the 188 applications, we estimate to receive approximately 47 applications seeking expedited review under the Act. Although each application is typically submitted on behalf of multiple entities, the entities in the vast majority of cases are related companies and are treated as a single applicant for purposes of this analysis. Each application subject to rules 0–5(e) and 0–5(g) does not impose any ongoing obligations or burdens on the part of an applicant.

Much of the work of preparing an application is performed by outside counsel. Based on conversations with applicants and Staff experience, approximately 20 percent of applications are prepared by in-house counsel.

The mandatory requirements under rule 0–5(e) increase the estimated hour or cost burden for applicants utilizing

in-house counsel by 7 hours [1] or $5,418 [2] per application. Therefore, the mandatory requirements under rule 0–5(e) increase the total estimated annual hour burden by approximately 65.80 hours utilizing in-house counsel.[3] The total estimated annual cost burden for utilizing in-house counsel is $50,929.20.[4]

We estimate to receive approximately 141 applications [5] per year seeking standard review under the Act and of the 141 applications, we estimate that in approximately 10 percent of those, the applicants respond ''in writing'' to avoid the application being deemed withdrawn pursuant to rule 0–5(g). We believe the ''in writing'' requirement under rule 0–5(g) increases the burden for applicants utilizing in-house counsel by 2 hours or $1,548 per application.[6] Therefore, the ''in writing'' requirement under rule 0–5(g) increases the total estimated annual hour burden by approximately 5.64 hours utilizing in-house counsel.[7] The total estimated annual cost burden utilizing in-house counsel is $4,365.36.[8]

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

Written comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Please direct your written comments on this 60-Day Collection Notice to Austin Gerig, Director/Chief Data Officer, Securities and Exchange Commission, c/o Tanya Ruttenberg via email to *PaperworkReductionAct@sec.gov* by December 7, 2026.

Dated: October 1, 2026.

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2026–20400 Filed 10–5–26; 8:45 am]

BILLING CODE 8011–01–P

[1] This estimate is based on the following calculation: 5 hours (estimated hours per application to prepare the marked copies) + 2 hour (estimated hours per application to explain, notate, and certify) = 7 hours.

[2] This estimate is based on the following calculation: 5 (estimated hours per application to prepare the marked copies) × $774 (hourly rate for a lawyer) = $3,870. 2 (estimated hours per application to explain, notate, and certify) × $774 (hourly rate for a lawyer) = $1,548. $3,870 (estimated cost per application to prepare the marked copies) + $1,548 (estimated cost per application to explain, notate, and certify) = $5,418.

[3] This estimate is based on the following calculations: [5 (estimated hours per application to prepare the marked copies) + 2 (estimated hours per application to explain, notate, and certify)] × 47 (estimated number of applications under expedited review) × 0.20 (approximate percentage of applications prepared by in-house counsel) = 65.80 hours.

[4] This estimate is based on the following calculation: 65.80 (estimated total hours utilizing in-house counsel) × $774 (hourly rate for a lawyer) = $50,929.20.

[5] This estimate is based on the following calculation: 188 (estimated number of all applications) − 47 (estimated number of applications under expedited review) = 141.

[6] This estimate is based on the following calculation: 2 (estimated hours to prepare ''in writing'' response) × $774 (hourly rate for a lawyer) = $1,548.

[7] This estimate is based on the following calculations: 2 (estimated hours to prepare ''in writing'' response) × 141 (estimated number of applications under standard review) × 0.10 (approximate percentage of application required to respond ''in writing'') × 0.20 (approximate percentage of applications prepared by in-house counsel) = 5.64 hours.

[8] This estimate is based on the following calculation: 5.64 (estimated total hours utilizing in-house counsel) × $774 (hourly rate for a lawyer) = $4,365.36.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106561; File No. SR–CboeEDGX–2026–063]

Self-Regulatory Organizations; Cboe EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 22.6

October 1, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on September 24, 2026, Cboe EDGX Exchange, Inc. (the ''Exchange'' or ''EDGX'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGX Exchange, Inc. (''EDGX'' or the ''Exchange'') is filing with the Securities and Exchange Commission (''Commission'' or ''SEC'') a proposed rule change to amend Exchange Rule 22.6 (Market Maker Quotations) to provide that the $5 maximum bid/ask differential will apply to options series expiring in 270 days or less, and a $15 maximum bid/ask differential will apply to options series expiring in more than 270 days. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Commission's website (*https://www.sec.gov/rules/sro.shtml*), the Exchange's website (*https://www.cboe.com/us/equities/regulation/rule_filings/edgx/*), and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 22.6(c) to add a time-to-expiration tier to the existing bid/ask differential requirements for Market Maker quotes.

The Exchange previously adopted bid/ask differential requirements for Market Maker quotes under Rule 22.6(c) in a recent rule filing.[3] The Prior Filing established a single general maximum bid/ask differential of $5 regardless of the Market Maker's bid, applicable to all options series without regard to time to expiration. The Exchange now proposes to amend Rule 22.6(c) to conform to the approach in Cboe Options Rule 5.52(c), under which the $5 maximum bid/ask differential applies to options series expiring in 270 days or less, and a $15 maximum applies to options series expiring in more than 270 days.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 106205 (August 27, 2026), 91 FR 56245 (September 1, 2026) (SR–CboeEDGX–2026–054) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 22.6 (Market Maker Quotations) To Adopt Two-Sided Quote Bid/Ask Differentials) (the ''Prior Filing'').

The use of time to expiration as a variable in bid/ask differential requirements is an established concept across options exchanges. Cboe Options Rule 5.52(c) uses a 270-day threshold, under which a $5 maximum bid/ask differential applies to options series expiring in 270 days or less, and a $15 maximum applies to options series expiring in more than 270 days. Similarly, ISE Options 2, Section 4(b)(4) provides that bid/ask differentials do not apply to options series until the time to expiration is less than nine months (approximately 270 days), and Phlx Options 4A, Section 12(b)(2)(i) similarly provides that bid/ask differential rules shall not apply to index long-term option series until the time to expiration is less than twelve months.

The Exchange believes the proposed general bid/ask differentials of $5 for options series expiring in 270 days or less and $15 for options series expiring in more than 270 days are reasonable and appropriate. The $5 differential for shorter-dated series is sufficiently wide to accommodate normal market conditions and volatility while preventing Market Makers from entering quotes that are so wide as to provide no meaningful liquidity. The wider $15 differential for longer-dated series (*i.e.,* those with more than 270 days to expiration) accounts for the reduced liquidity, wider theoretical values, and greater uncertainty associated with long-term options.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[4] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[5] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[6] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that adding a time-to-expiration tier to the existing bid/ask differential requirements promotes just and equitable principles of trade and removes impediments to and perfects the mechanism of a free and open market and a national market system. The amendment conforms to Cboe Options Rule 5.52(c), and will enhance the quality of markets on EDGX Options by establishing bid/ask differential requirements calibrated to the differing liquidity characteristics and pricing uncertainty across options series with varying times to expiration. Specifically, by establishing a general maximum permissible width of $5 (for options series expiring in 270 days or less) and $15 (for options series expiring in more than 270 days) between a Market Maker's bid and offer, the Exchange believes the proposal will improve market quality by providing investors with more meaningful execution opportunities and contributing to more efficient price discovery.

As discussed above, the Exchange believes the proposed bid/ask differentials are reasonable and appropriate. The $5 differential for shorter-dated series accommodates normal market conditions while preventing excessively wide quotes. The wider $15 differential for longer-dated series accounts for the reduced liquidity, wider theoretical values, and greater uncertainty associated with long-term options. The use of time to expiration as a variable in bid/ask differential requirements is an established concept across options exchanges, including Cboe Options Rule 5.52(c), ISE Options 2, Section 4(b)(4), and Phlx Options 4A, Section 12(b)(2)(i).

The amended, tiered bid/ask differential requirements will apply uniformly to all Market Makers on EDGX Options based on the applicable time to expiration. The proposal therefore does not permit unfair discrimination among Market Makers and applies the same $5 and $15 maximums on the same basis to similarly situated options series. For the foregoing reasons, the Exchange believes the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the amended, tiered bid/ask differential requirements will apply uniformly to all Market Makers on EDGX Options. The $5 and $15 maximums will be determined by the same time-to-expiration framework for all Market Makers.

The Exchange does not believe that the proposed rule change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed time-to-expiration tier conforms to Cboe Options Rule 5.52(c) and is consistent with the quote width frameworks of other options exchanges, including ISE and Phlx. By adopting bid/ask differential requirements consistent with those of other options exchanges, Market Makers on the Exchange will be subject to comparable bid/ask differential requirements as market-makers on other markets.

For the foregoing reasons, the Exchange does not believe the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[7] and subparagraph (f)(6) of Rule 19b–4 thereunder.[8]

[4] 15 U.S.C. 78f(b).

[5] 15 U.S.C. 78f(b)(5).

[6] *Id.*

[7] 15 U.S.C. 78s(b)(3)(A)(iii).

[8] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change,

Continued

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [9] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–CboeEDGX–2026–063 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CboeEDGX–2026–063. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection.

All submissions should refer to file number SR–CboeEDGX–2026–063 and should be submitted on or before October 27, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[10]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106562; File No. SR–CboeBZX–2026–078]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 22.6

October 1, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on September 24, 2026, Cboe BZX Exchange, Inc. (the ''Exchange'' or ''BZX'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (''BZX'' or the ''Exchange'') is filing with the Securities and Exchange Commission (''Commission'' or ''SEC'') a proposed rule change to amend Exchange Rule 22.6 (Market Maker Quotations) to provide that the $5 maximum bid/ask differential will apply to options series expiring in 270 days or less, and a $15 maximum bid/ask differential will apply to options series expiring in more than 270 days. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Commission's website (*https://www.sec.gov/rules/sro.shtml*), the Exchange's website (*https://www.cboe.com/us/equities/regulation/rule_filings/bzx/*), and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 22.6(c) to add a time-to-expiration tier to the existing bid/ask differential requirements for Market Maker quotes.

The Exchange previously adopted bid/ask differential requirements for Market Maker quotes under Rule 22.6(c) in a recent rule filing.[3] The Prior Filing established a single general maximum bid/ask differential of $5 regardless of the Market Maker's bid, applicable to all options series without regard to time to expiration. The Exchange now proposes to amend Rule 22.6(c) to conform to the approach in Cboe Options Rule 5.52(c), under which the $5 maximum bid/ask differential applies to options series expiring in 270 days or less, and a $15 maximum applies to options series expiring in more than 270 days.

The use of time to expiration as a variable in bid/ask differential requirements is an established concept across options exchanges. Cboe Options Rule 5.52(c) uses a 270-day threshold, under which a $5 maximum bid/ask differential applies to options series expiring in 270 days or less, and a $15 maximum applies to options series expiring in more than 270 days. Similarly, ISE Options 2, Section 4(b)(4) provides that bid/ask differentials do not apply to options series until the time to expiration is less than nine months (approximately 270 days), and Phlx Options 4A, Section 12(b)(2)(i) similarly provides that bid/ask differential rules shall not apply to index long-term option series until the

at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[9] 15 U.S.C. 78s(b)(2)(B).

[10] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 106206 (August 27, 2026) 91 FR 56250 (September 1, 2026) (SR–CboeBZX–2026–067) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 22.6 (Market Maker Quotations) To Adopt Two-Sided Quote Bid/Ask Differentials) (the ''Prior Filing'').

time to expiration is less than twelve months.

The Exchange believes the proposed general bid/ask differentials of $5 for options series expiring in 270 days or less and $15 for options series expiring in more than 270 days are reasonable and appropriate. The $5 differential for shorter-dated series is sufficiently wide to accommodate normal market conditions and volatility while preventing Market Makers from entering quotes that are so wide as to provide no meaningful liquidity. The wider $15 differential for longer-dated series (*i.e.,* those with more than 270 days to expiration) accounts for the reduced liquidity, wider theoretical values, and greater uncertainty associated with long-term options.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[4] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[5] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[6] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that adding a time-to-expiration tier to the existing bid/ask differential requirements promotes just and equitable principles of trade and removes impediments to and perfects the mechanism of a free and open market and a national market system. The amendment conforms to Cboe Options Rule 5.52(c), and will enhance the quality of markets on BZX Options by establishing bid/ask differential requirements calibrated to the differing liquidity characteristics and pricing uncertainty across options series with varying times to expiration. Specifically, by establishing a general maximum permissible width of $5 (for options series expiring in 270 days or less) and $15 (for options series expiring in more than 270 days) between a Market Maker's bid and offer, the Exchange believes the proposal will improve market quality by providing investors with more meaningful execution opportunities and contributing to more efficient price discovery.

As discussed above, the Exchange believes the proposed bid/ask differentials are reasonable and appropriate. The $5 differential for shorter-dated series accommodates normal market conditions while preventing excessively wide quotes. The wider $15 differential for longer-dated series accounts for the reduced liquidity, wider theoretical values, and greater uncertainty associated with long-term options. The use of time to expiration as a variable in bid/ask differential requirements is an established concept across options exchanges, including Cboe Options Rule 5.52(c), ISE Options 2, Section 4(b)(4), and Phlx Options 4A, Section 12(b)(2)(i).

The amended, tiered bid/ask differential requirements will apply uniformly to all Market Makers on BZX Options based on the applicable time to expiration. The proposal therefore does not permit unfair discrimination among Market Makers and applies the same $5 and $15 maximums on the same basis to similarly situated options series. For the foregoing reasons, the Exchange believes the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the amended, tiered bid/ask differential requirements will apply uniformly to all Market Makers on BZX Options. The $5 and $15 maximums will be determined by the same time-to-expiration framework for all Market Makers.

The Exchange does not believe that the proposed rule change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed time-to-expiration tier conforms to Cboe Options Rule 5.52(c) and is consistent with the quote width frameworks of other options exchanges, including ISE and Phlx. By adopting bid/ask differential requirements consistent with those of other options exchanges, Market Makers on the Exchange will be subject to comparable bid/ask differential requirements as market-makers on other markets.

For the foregoing reasons, the Exchange does not believe the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[7] and subparagraph (f)(6) of Rule 19b–4 thereunder.[8]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[9] of the Act to determine whether the proposed rule change should be approved or disapproved.

[7] 15 U.S.C. 78s(b)(3)(A)(iii).

[8] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[9] 15 U.S.C. 78s(b)(2)(B).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–CboeBZX–2026–078 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CboeBZX–2026–078. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection.

All submissions should refer to file number SR–CboeBZX–2026–078 and should be submitted on or before October 27, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[10]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106566; File No. SR–NYSE–2026–47]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Delete the Approved Person Registration Category and Adopt a New Definition of Associated Person

October 1, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on September 18, 2026, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [3] and Rule 19b–4(f)(6) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to (1) delete the ''approved person'' registration category as no longer necessary; (2) adopt a new definition of ''associated person'' based on the definition of associated person in Rule 1011(b) of the Financial Industry Regulatory Authority, Inc., and elements of the current definition of approved person; and (3) make related technical and conforming changes. The proposed rule change is available on the Exchange's website at *www.nyse.com* and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to (1) delete the ''approved person'' registration category as no longer necessary; (2) adopt a new definition of ''associated person'' based on the definition of associated person in Rule 1011(b) of the Financial Industry Regulatory Authority, Inc. (''FINRA'') and elements of the current definition of approved person; and (3) make related technical and conforming changes.

The proposal is not intended to effect any substantive change to the scope of the Exchange's jurisdiction. The Exchange will continue to exercise general supervision over, and retain jurisdiction over, the same categories of persons as currently set forth in Rule 2A (Jurisdiction). The persons currently encompassed by the ''approved person'' category would be captured by the proposed definition of ''associated person'' for jurisdictional and all other applicable Exchange rules on that basis.

Separately, the principal basis for the approved person category—identifying persons who directly or indirectly control a member organization—is already addressed through existing disclosure infrastructure. Member organization are required to identify such persons in Schedules A and B of the Form BD in the Central Registration Depository (''CRD''). Because control relationships of the kind that gave rise to the approved person category are already documented through that mechanism, a separate Exchange-specific registration category serves no independent regulatory purpose, and its elimination will not create any gap in oversight.

Finally, replacing the approved person category with a definition of associated person that aligns with FINRA's corresponding rule (and, by extension, with the statutory definition in the Act, as discussed below) will provide greater harmonization between Exchange rules and FINRA rules of similar purpose, resulting in less burdensome and more efficient regulatory compliance.

Background

The ''approved person'' designation is an NYSE-specific regulatory category for certain persons or entities that have a

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(iii).

[4] 17 CFR 240.19b–4(f)(6).

controlling interest in a member organization. The rules governing the definition and application process for approved persons are Rules 2 and 304.[5]

The approved person category was adopted when Exchange membership was organized around individual seat-holders. Under that structure, certain individuals, including major shareholders, holding company executives, technology, and operations leaders, exercised significant control over member organizations without being registered representatives or principals, and therefore fell outside the Exchange's formal oversight reach. The approved person category was designed to close that potential gap by extending the Exchange's supervisory jurisdiction to those controlling persons who would otherwise escape review, thus enabling the Exchange to assess the fitness and background of individuals in a position to affect how a member organization conducted its business. That structural rationale no longer carries the same force. As described below, the Exchange proposed definition of ''associated person'' would capture the same individuals within the Exchange's regulatory framework without requiring a separate registration category and without the associated administrative burdens that the separate registration category imposes on the Exchange and member organizations.

Rule 2(c) defines ''approved person'' as a person, other than a member, principal executive or employee of a member organization, or governmental entity, who controls a member organization, is engaged in a securities or kindred business that is controlled by a member or member organization, or is a U.S.-registered broker-dealer under common control with a member organization. Rule 2(c) defines ''governmental entity'' to mean a sovereign nation, state, or territory, or other political subdivision, agency, or instrumentality thereof.

Rule 2(d) defines ''person'' as a natural person, corporation, limited liability company, partnership, association, joint stock company, trust, fund or any organized group of persons whether incorporated or not.

Under Rule 2(e), ''control'' means the power to direct or cause the direction of the management or policies of a person whether through ownership of securities, by contract or otherwise. A person is presumed to control another person if such person, directly or indirectly, has the right to vote 25 percent or more of the voting securities, is entitled to receive 25 percent or more of the net profits, or is a director, general partner or principal executive (or person occupying a similar status or performing similar functions) of the other person.

Rule 304 provides that a member organization must identify each approved person to the Exchange. Pursuant to the rule, each approved person must execute a written consent to the jurisdiction of the Exchange and agree to (1) supply the Exchange with information relating to the existence of any statutory disqualification to which the approved person or any person associated with the approved person may be subject, as defined in the Act; (2) abide by such provisions of the rules of the Exchange relating to approved persons as shall from time to time be in effect; and (3) permit examination by the Exchange, or any person designated by it, at any time or from time to time, of its books and records to verify the accuracy of the information required to be supplied herein and by the rules of the Exchange.

Supplementary Material .10 to Rule 304 sets forth certain additional requirements for approved persons domiciled outside the United States.

Supplemental Material .20 to Rule 304 provides that a member organization that is directly or indirectly controlled by a governmental entity as defined in Rule 2(c) shall be required to identify such governmental entity to the Exchange.

Form BD is the Uniform Application for Broker-Dealer Registration. Broker-Dealers are required to file this form to register with the Commission, the self-regulatory organizations, and jurisdictions through the CRD system operated by FINRA.

Schedule A to Form BD requires broker-dealers to provide detailed information about their direct owners and executive officers, including:

- Names and addresses of all direct owners (individuals or entities) and executive officers;
- Ownership percentages for each direct owner;
- Type of ownership (*e.g.,* partnership, corporation, trust); and
- Control relationships, indicating whether the owner or officer has control over the firm.

Schedule A assists regulators in the assessment of a broker-dealer's ownership structure and in the identification of individuals or entities with influence or control of the broker-dealer's activities.

Schedule B to Form BD requires broker-dealers to disclose information about their indirect owners, *i.e.,* those who own or control the firm through intermediary entities, and requires:

- Identification of Indirect Owners: List all individuals or entities that have indirect ownership or control over the broker-dealer through one or more layers of ownership.
- Ownership Structure: Provide details on how ownership is held, including the names of intermediary entities and the percentage of ownership at each level.
- Control Relationships: Indicate whether any indirect owner exercises control over the broker-dealer, as defined by the SEC (*e.g.,* voting rights, capital contributions).
- Personal Information: For individuals, include identifying details such as name, address, and employment history (via Form U–4 if applicable).

Schedule B complements Schedule A, which covers direct owners and executive officers, and helps regulators understand the full ownership and control structure of a broker-dealer.

Broker-dealers are required to keep Form BD current and promptly amend or update the information reported in Schedules A and B using Schedule C.

Proposed Rule Change

The Exchange proposes to eliminate the approved person registration category and delete the concept from its rules while simultaneously adopting a definition of associated person that incorporates elements of the current definition of approved persons and the FINRA definition of associated person in FINRA Rule 1011(b).

To effectuate these changes, the Exchange proposes the following amendments to its Rules.

Rule 2(c) (Definition of Approved Person)

The Exchange proposes the following changes to Rule 2(c). First, the Exchange would delete the definition of approved person in the first sentence of the Rule in its entirety. Second, the Exchange would adopt a new definition of associated persons based on FINRA Rule 1011(b) and the current approved person definition. As proposed, the Exchange would define ''Associated Person,'' ''associated person,'' and ''person associated with a member organization'' to mean

(1) a natural person registered under Exchange rules or who has applied for registration under Exchange rules. Proposed Rule 2(c)(1) would be substantially the same as FINRA Rule

[5] The Exchange notes that the approved person definition is an Exchange convention that is not intended to be identical to the definition of ''associated person of a broker or dealer'' pursuant to Section 3(a)(18) of the Act. See 15 U.S.C. 78c(a)(18).

1011(b)(1) except for the reference to registration under NYSE rules;

(2) any partner, officer, director, or branch manager of a member organization (or any person occupying a similar status or performing similar functions). Once again, this provision would be substantially similar to FINRA Rule 1011(b)(2) except that the Exchange would omit the reference to ''sole proprietor,'' which does not exist in the Exchange's rules; [6]

(3) any person (excluding a government entity) directly or indirectly controlling or controlled by a member organization, or a U.S. registered broker-dealer under common control with a member organization. This proposed definition would encompass the current ''approved person'' category in Rule 2(c), including persons that control a member organization, are engaged in a securities or kindred business controlled by a member or member organization, or are U.S. registered broker-dealers under common control with a member organization. The Exchange would also include members, principal executives,[7] or employees of member organizations to the extent such persons are identified as control persons on Form BD. The proposed definition is derived from Rule 346 (Statutory Disqualification—Association of Member Organizations and Persons Associated with Member Organizations) and is similar to FINRA Rule 1011(b)(5). Consistent with the existing definition of ''approved person'' in Rule 2(c), the proposal uses the term ''governmental entity,'' and the related provision is substantially similar to FINRA Rule 1011(b)(3). In addition, a member organization that is directly or indirectly controlled by a governmental entity would be required to identify that governmental entity to the Exchange. This requirement is substantially the same as Supplementary Material .20 to current Rule 304; or

(4) any employee of such member organization. The provision is substantially the same as FINRA Rule 1011(b)(4), except that the Exchange would not, consistent with Section 3(a)(18) of the Act, exclude any person whose functions are solely clerical or ministerial.[8]

The Exchange also proposes to add a new Supplementary Material .30 that would provide that ''Control Persons'' as defined in subsection (c) of this Rule include both direct and indirect owners identified on Schedules A and B of Form BD. Proposed Supplementary Material .30 would further provide that each Control Person agrees to submit to the jurisdiction of the Exchange and to comply with any provisions of the Exchange Rules applicable to Control Persons, as such term is defined in the Rules of the Exchange.

Because proposed Supplemental Material would encompass the substance of FINRA Rules 1011(b)(5) and (b)(6), the Exchange does not propose to adopt those provisions separately. Specifically, FINRA Rule 1011(b)(5) includes within the definition of an associated person any individual or entity that directly or indirectly controls an applicant for FINRA membership, regardless of whether that person is registered with or exempt from registration under the FINRA By-Laws or FINRA Rules. FINRA Rule 1011(b)(6), in turn, includes any person engaged in the investment banking or securities business that is directly or indirectly controlled by the applicant, regardless of whether such person is registered with or exempt from registration under the FINRA By-Laws or FINRA Rules.[9]

The approved person category and Form BD's Schedules A and B are, in material respects, duplicative. Both focus on the concept of control, that is, the power to direct management or policies, and both presume control at the 25% ownership or voting rights threshold. Schedule A captures direct owners and executive officers; Schedule B captures indirect owners, including entities exercising control through means other than direct equity ownership. Taken together, the Schedules require disclosure of substantially the same universe of individuals and entities that the approved person category was designed to identify persons who directly or indirectly control a member organization, affiliates engaged in securities or kindred businesses under common control, and U.S. registered broker-dealers under common control. Because those relationships are already documented through Form BD—a disclosure mechanism applicable across all FINRA members and Exchange member organizations—the approved person category no longer performs a disclosure function that is not already performed elsewhere. Elimination of separate Exchange-specific registration requirements would therefore remove a layer of redundant reporting without diminishing the Exchange's ability to identify and exercise jurisdiction over the controlling persons that the category was designed to reach. Member organizations would benefit from a corresponding reduction in the administrative obligations associated with maintaining a parallel, Exchange-only disclosure track.

Rule 2A (Jurisdiction)

The Exchange proposes conforming amendments to Rule 2A(c), (d), (e) and (f) to replace references to ''employees of member organizations,'' ''registered and non-registered employees of member organizations,'' ''registered or non-registered employees of members or member organizations'' and ''approved persons'' with the term ''associated persons, whether or not such person is registered or exempt from registration under Exchange rules.'' [10]

These amendments are designed to align the text of Rule 2A with the proposed definition of ''associated person'' and to ensure consistent terminology throughout the Exchange's rulebook. As revised, the provisions would continue to apply to the same categories of individuals currently subject to the Exchange's jurisdiction, including employees of member organizations and Control Persons, regardless of whether such individuals are registered, exempt from registration, or otherwise not required to be registered under Exchange rules. The proposed references to associated

[6] Prior to de-mutualization, a sole proprietor was the equivalent to a ''member'' under Exchange rules. Rule 2(a) provides that the term ''member,'' when used to denote a natural person approved by the Exchange, means a natural person associated with a member organization who has been approved by the Exchange and designated by such member organization to effect transactions on the floor of the Exchange or any facility thereof.

[7] The Exchange notes that, although principal executives are encompassed within the proposed definition of ''associated person,'' it is nonetheless proposing to retain separate references to principal executives throughout its rules. Retaining these references will preserve existing rule text and avoid any potential ambiguity regarding the continued application of those provisions to principal executives.

[8] See note 13, infra and Rule 1230.

[9] The Exchange does not propose to adopt FINRA Rule 1011(b)(7), which extends the definition of an associated person to include any individual or entity that will be, or is anticipated to become, a person described in paragraphs (1) through (6) of the FINRA rule. Unlike FINRA, the Exchange's jurisdiction does not extend to applicants for membership, prospective principal executives, or other persons who have not yet become subject to Exchange jurisdiction. See Rule 2A(f). Accordingly, the Exchange is not proposing to expand the scope of its jurisdiction to encompass such persons.

[10] The Exchange also proposes several non-substantive technical and grammatical changes. First, in Rule 2A(c), the Exchange would replace ''members organizations'' with ''member organizations'' to correct a typographical error. Second, in Rule 2A(f), the Exchange would lowercase the term ''self-regulatory organization'' to conform to standard drafting conventions. Finally, in Supplementary Material .01(b) of Rule 5.2, Rule 8.300(e)(2), and Rule 8.400(e)(2), the Exchange would lowercase the ''s'' in ''See'' or consistency with the formatting used throughout the Exchange's rules.

persons ''whether or not such person is registered or exempt from registration'' are consistent with both the breadth of the proposed definition of ''associated person'' and the scope of the existing provisions relating to approved persons that these amendments would replace. As discussed above, the approved person framework was intended to extend the Exchange's regulatory authority beyond registered persons and principals to encompass other individuals associated with a member organization whose conduct may appropriately be subject to Exchange oversight. Accordingly, the proposed amendments do not expand or narrow the substantive scope of the rules, but instead update the terminology to reflect the Exchange's revised definitional framework and preserve the Exchange's existing jurisdiction over the relevant persons.

The Exchange would also add a new subsection (g) to Rule 2A based on Supplemental Material .10 of Rule 304, replacing ''approved person'' with ''associated person'' throughout. As proposed, an associated person domiciled outside the United States would not be required to permit the Exchange or its designee to examine its books and records at its domicile if, in the opinion of an independent attorney or government official, such examination would violate local law or conflict with generally accepted customs or business practices in that jurisdiction.

To invoke this exemption, the associated person must, at its own expense, obtain a written certification from either an attorney or counselor at law independent of both the associated person and its affiliated member organization and authorized to practice in the relevant jurisdiction, or from an appropriate governmental official of that jurisdiction confirming that the on-site examination would violate local law or generally accepted customs or business practices. Separately, while the exemption remains in effect, the associated person must annually provide its affiliated member organization with a certification from an independent attorney, counselor at law, or auditor authorized to practice in the jurisdiction. That annual certification must confirm, based on a reasonable examination conducted under generally accepted local practices, two things: first, with respect to any omnibus account carried by the affiliated member organization for the associated person (but not for its benefit), that the certifier has no reason to believe that any transaction beneficiary was a person associated with the associated person or its affiliated member organization under the Exchange Act; and second, with respect to any account carried in the name and for the benefit of the associated person reflecting transactions under Section 11(a)(1)(G) of the Act and Rule 11a1–2, that the associated person derived more than 50% of its gross revenues during the preceding fiscal year from the sources specified in Section 11(a)(1)(G)(i) of the Act.

Proposed subsection (g) to Rule 2A is substantively identical to current Supplementary Material .10 to Rule 304, except that it would require an associated person relying on the exemption to provide the annual written certification to the affiliated member organization rather than directly to the Exchange. This change is administrative in nature and relates solely to the maintenance of the certification records. It does not alter the substantive requirements of the exemption, the persons eligible to rely on it, or the content and frequency of the certification. Moreover, the Exchange retains the authority to request and review such certifications from member organizations as part of its regulatory and surveillance activities.

Conforming Changes

The Exchange proposes conforming changes to the following rules. Unless otherwise indicated, the Exchange would replace ''approved person'' and/or references to ''employees'' or ''registered or non-registered employee affiliated with such entity'' with ''associated person'':

- Supplementary Material .01(b) to Rule 5.2 provides that member organizations acting as a registered market maker in Commodity-Linked Securities, Currency-Linked Securities, Futures-Linked Securities or Multifactor Index-Linked Securities must provide the Exchange with access to books, records, or other information related to, among other things, transactions made by the firm or any limited partner, officer or approved person thereof, or registered or nonregistered employee affiliated with such entity, for its or their own accounts in the Index Asset components, the underlying commodities, currencies, or futures, or in derivatives based on any of the above;
- Rule 8.204(f)(2) (Commodity Futures Trust Shares) provides that a member organization acting as a registered market maker in Commodity Futures Trust Shares will make available to the Exchange such books, records or other information pertaining to transactions by such entity or any limited partner, officer or approved person thereof, or registered or non-registered employee affiliated with such entity for its or their own accounts in the underlying commodity, related futures or options on futures, or any other related derivatives, as may be requested by the Exchange;
- Rule 8.300(e)(2) (Partnership Units) provides that a member organization acting as a registered market maker in Partnership Units will make available to the Exchange such books, records or other information pertaining to transactions by such entity or any limited partner, officer or approved person thereof, or registered or non-registered employee affiliated with such entity for its or their own accounts in the underlying asset or commodity, related futures or options on futures, or any other related derivatives, as may be requested by the Exchange;
- Rule 8.400(e)(2) (Paired Trust Shares) provides that a member organization acting as a registered market maker in Paired Trust Shares will make available to the Exchange such books, records or other information pertaining to transactions by such entity or any limited partner, officer or approved person thereof, registered or non-registered employee affiliated with such entity for its or their own accounts in the asset, commodity or other economic interest underlying the Reference Price, related options, related futures or options on futures, or any other related derivatives, as may be requested by the Exchange;
- Rule 8.700(f)(2) (Managed Trust Securities) provides that a member organization acting as a registered market maker in Managed Trust Securities will make available to the Exchange such books, records or other information pertaining to transactions by such entity or any limited partner, officer or approved person thereof, or registered or non-registered employee affiliated with such entity for its or their own accounts in the underlying commodity or applicable currency, related futures or options on futures, or any other related derivatives, as may be requested by the Exchange;
- Rule 21 (Disqualification of Directors on Listing of Securities) prohibits Board members or any authorized committee from participating in decisions related to the listing or distribution of securities if they have a substantial interest in the security or related plan. A Board member is deemed to have such an interest if, among other things, the Board member or any member, principal executive, approved person in their member organization is an officer or director (or person occupying a similar status or performing similar functions) or a

voting trustee of the issuer of such security or of any corporation which to his knowledge controls or is controlled by the issuer or such security (Rule 21(2)); the Board member or their member organization or any member, affiliate, principal executive, or approved person of such member organization owns directly or indirectly more than 1% of such security or of any class of stock of the issuer, or of any corporation which to his knowledge controls the issuer of such security (Rule 21(3)); or the Board member or their member organization or any member, affiliate, principal executive, or approved person of such member organization to his knowledge holds directly or indirectly any substantial contract, option, or other privilege to purchase such security; or within six months prior thereto has directly or indirectly purchased (other than through the exercise of a right to subscribe) such security from the issuer or an underwriter thereof at a price below the market price (Rule 21(4)). The Exchange would replace approved person with associated person in subsections (2), (3) and (4);

• Rule 22(a) (Disqualification Because of Personal Interest) provides that the individuals specified therein shall not participate in the investigation or consideration of any matter relating to any member, principal executive, approved person, or member organization or affiliate of such member organization with knowledge that such member, principal executive, approved person, member organization or affiliate is indebted to such director or committee member, or to their member organization or any participant therein, or that they, their member organization or any participant therein is indebted to such member, principal executive, approved person, member organization, or affiliate, excluding, however, any indebtedness arising in the ordinary course of business out of transactions on any exchange, out of transactions in the over-the-counter markets, or out of the lending and borrowing of securities;

• Rule 91 (Taking or Supplying Securities Named in Order) provides that an Exchange member, including DMMs, may not execute a client's buy or sell order by trading from an account in which they or their member organization, or any member, principal executive, approved person or officer of such member organization, have a direct or indirect interest, if they know or should know about that interest unless specific exceptions apply;

• Rule 96 (Limitation on Members' Trading Because of Options) prohibits members while on the trading Floor form trading a stock for their own or affiliated accounts if they or their member organization or any member, principal executive, or approved person of such member organization is directly or indirectly interested, if any stock in which the member holds or has granted options (*e.g.,* puts, calls, straddles) on that stock unless those options are listed on a national exchange;

• Rule 98 (Operation of a DMM Unit) governs the operations of DMM units and restricts DMMs on the trading Floor to trading only their assigned DMM securities at their designated post and prohibits them from trading related derivative products or accessing related customer or position information while on the Floor. The Exchange would replace approved person with ''Control Person'' in subsections (a)(1), (c)(3)(D), (c)(7), (e)(1), (f)(1), and (f)(4)). The Exchange believes that Control Persons as defined in proposed Rule 2(c) would most closely align with the persons covered by the current Rule;

• Rule 98A (Restrictions on Persons or Parties Affiliated with A DMM Unit), prohibits, among other things, a DMM from being registered in a stock of an issuer, or a partner or subsidiary thereof, if such entity is an approved person or affiliate of the DMM unit's member organization. The Exchange would replace approved person in this sentence with ''Control Person.'' As previously noted, the Exchange believes that Control Persons as defined in proposed Rule 2(c) would most closely align with the persons covered by the current Rule;

• Rule 112 (Orders initiated ''Off the Floor.'') restricts certain trading activity by members on the Exchange's Trading Floor. Subsection (a) provides that orders for the account of a member organization or any member, principal executive, approved person, officer, or employee of such organization or a discretionary account serviced by the member or member organization must be routed to the trading Floor through standard customer order transmission channels, such as a clearing firm's order room. Subsection (d) provides that orders placed after a conversation with a Floor-based employee for any account in which a member organization, or any member, principal executive, approved person, or officer, or employee of such organization is directly or indirectly interested, or for any discretionary account serviced by the member organization, are considered off-Floor orders if sent through standard public order channels with a time-stamped record, unless an exception applies. Finally, subsection (e) provides that members and member organizations are prohibited from executing trades on the Exchange for any account in which such member, member organization, or any member, principal executive, approved person, officer or employee of such organization is directly or indirectly interested, or for any discretionary account serviced by the member or member organization, if doing so violates Exchange front-running policies related to block transactions. The Exchange would replace approved person with associated person and delete ''or employee of such organization'' in subsections (a), (d), and (e) as duplicative, and replace the reference to ''employee'' in that organization who is on the trading Floor with ''associated person'' in subsection (d));

• Supplementary Material .20 of Rule 113 (DMM Unit's Public Customers) provides that it is contrary to good business practice for a DMM, ''his or her'' DMM unit or any other member or principal executive in such organization or any officer or employee to ''popularize'' either orally or in writing any security in which ''he or she'' is registered. The second sentence makes an exception for approved persons or member organizations associated with the DMM unit provided that certain disclosures are made. The Exchange would replace approved person in the second sentence with ''Control Person'' to reflect that associated persons who are Control Persons outside the DMM unit are the intended associated persons for the exception and not associated persons within the DMM. The Exchange would also replace gender-based references with references to the DMM;

• Rule 304 governing Approved Persons would be deleted in its entirety and marked ''Reserved''; [11]

[11] Supplementary Material .90T(a) to Rule 304A (Member Examination Requirements) provides that it only applies to approved persons of a member organization who (i) have been designated by such member organization to effect transactions on the Floor of Exchange; and (ii) held a valid 86 Trinity Permit at the time they were designated to effect transactions on the Floor of the Exchange. Subsection (b) to Supplementary Material .90T provides that approved persons who satisfy the conditions in subsection (a) have six months from the date of such designation to meet the requirements contained in Rule 304A. Further, if an approved person who has been designated to effect transactions on the Floor of the Exchange fails to meet the requirements of Rule 304A by the end of the grace period, the rule provides that such approved person shall not be permitted to effect trades on the Floor until such approved person shall have satisfied the requirements of Rule 304A. This temporary provision was added in 2008 to facilitate the relocation of all equities trading conducted on or through the existing systems and facilities of the American Stock Exchange LLC (''Amex'') located at 86 Trinity Place to trading systems and facilities operated by the NYSE located at 11 Wall Street. See Securities Exchange Act

• Rule 311 (Formation and Approval of Member Organizations) sets forth the requirements to form a NYSE member organization. The Exchange proposes to delete the second sentence of Rule 311(a), which currently requires that all approved persons execute agreements with the Exchange under Rule 304 as a condition of a member organization becoming or remaining a member organization. This requirement originated from the Exchange's approved person registration framework, which was designed to extend the Exchange's supervisory and disciplinary jurisdiction to controlling persons who might otherwise fall outside the scope of regulatory oversight. The framework enabled the Exchange to assess the fitness, qualifications, and disciplinary history of individuals in positions to direct or influence a member organization's business and affairs. Because such persons are now visible to the Exchange through CRD, the Exchange believes this agreement requirement is no longer necessary and proposes its removal. The Exchange would also remove Rule 311(b)(5), which requires every approved person of the member organization to meet the requirements of Rule 304. Rule 311.12 setting forth a required Authorization and Statement of Understanding for each natural person who is an approved person under Rule 2(c) would also be deleted as no longer necessary given the information available in CRD. The remaining subsections would be renumbered. Given the elimination of the approved person category and the Exchange's jurisdiction over individuals previously classified as approved persons, these provisions are obsolete. References to approved person would be changed to associated person with the exception of subsection (b)(1), which would be changed to Control Person which would most closely align with the persons covered by the current Rule. Subsection (c) would be deleted in its entirety as unnecessary since this information is currently available in CRD;

• Rule 312 (Changes Within Member Organizations) requires member organizations to provide notice to the Exchange of certain changes and actions. Rule 312(b)(1) requires written notice of any material change in the stockholdings of any member, principal executive or approved person of such member corporation. Rule 312(c) requires each member, principal executive and approved person of a member corporation to promptly notify his member corporation of any material acquisition or disposition of shares of stock of such corporation. Finally, Rule 312(d) requires a member corporation to take certain actions whenever a person who is required to be approved by the Board as a member, principal executive or approved person fails or ceases to be so approved. The Exchange would replace approved person with Control Person which would most closely align with the persons covered by the current Rule;

• Rule 313 (Submission of Partnership Articles, Corporate Documents and Limited Liability Company Documents) provides for the submission of certain documents to the Exchange prior to becoming effective, including agreements between a member organization and, among others, any approved person (subsection (b)) and provides for submission of a certified list of members, principal executives and approved persons showing the number of shares of each class of stock of the member organization held of record or beneficially or both by each such party (subsection (e)). The Exchange would replace approved person with Control Person in each subsection;

• Rule 346 (Statutory Disqualification—Association of Member Organizations, and Persons Associated With Member Organizations) provides that no member organization, principal executive, approved person, person associated with a member organization or any person directly or indirectly controlling, controlled by or under common control with a member organization shall have associated with it any person who is known, or in the exercise of reasonable care should be known, to be subject to any ''statutory disqualification'' as defined in Section 3(a)(39) of the Act. Supplementary Material .01 provides for waiver of this provision when there is a pending proceeding before another self-regulatory organization to determine whether to permit a member or associated person of a member to become or continue membership or association notwithstanding a statutory disqualification. The Exchange proposes to replace ''approved person, person associated with a member organization or any person directly or indirectly controlling, controlled by or under common control with a member organization'' with associated person in both sections. The Exchange believes that the proposed change would not alter the scope or operation of this rule. The terms ''person associated with a member organization'' and ''associated person'' are substantively equivalent, as the proposed definition of ''associated person'' encompasses the categories of individuals currently captured by the term ''person associated with a member organization.''

• Rule 402(4) (Customer Protection—Reserves and Custody of Securities) provides for customers to withdraw uncalled fully paid securities from a firm at any time prior to a partial call and to withdraw excess margin securities under certain circumstances. The Exchange would replace approved persons with associated persons.''

• Rule 422 (Loans of and to Directors, etc.) restricts directors, officers, and employees of ICE, ICE Holdings, NYSE Holdings, and the Exchange from making or receiving loans involving, among others, approved persons, without prior Board approval unless the loan is either fully secured by marketable collateral or made within the same member organization. The Exchange would replace approved person and three references to ''employee'' of a member organization with associated person. The Exchange would also add a missing ''the'' before the word Exchange in the first sentence of the Rule.

• Rule 460.30 (DMMs Participating in Contests) provides that approved persons or a member organization associated with a DMM unit must notify the Exchange of its participation in any distribution or tender or exchange offer of any security covered by paragraph (b) of the rule and shall provide the information required therein. The Exchange would replace approved person with ''Control Person'' in order to most closely align with the persons covered by the current Rule.

• Rule 619(h) of the Arbitration Rules (General Provision Governing Subpoenas, Production of Documents, etc.) provides that it may be deemed conduct or proceeding inconsistent with just and equitable principles of trade for purposes of Rule 2050(6) or Rule 8210, as applicable, for a member, member organization, principal executive, approved person, registered or non-registered employee of a member or member organization or person otherwise subject to the jurisdiction of the Exchange to fail to appear or to produce any document in their possession or control as directed pursuant to provisions of the NYSE Arbitration Rules. The Exchange would replace ''approved person, registered or

Release No. 58706 (Oct. 1, 200), 73 FR 59019 (Oct. 8, 2008) (SR–NYSE–2008–70) (Order Granting Approval of Proposed Rule Change Amending Rules Governing Membership in Order To Waive-In Members in Good Standing of the American Stock Exchange LLC as Members and Member Organizations of the Exchange). The Exchange proposes to delete Supplementary Material .90T(a) to Rule 304A as obsolete.

non-registered employee of a member or member organization'' with associated person.

• Subsection (a) of Rule 6140 (Other Trading Practices) prohibits a member, member organization, principal executive, approved person, registered or non-registered employee of a member or member organization or person otherwise subject to the jurisdiction of the Exchange from executing or participating in trades that involves successively higher purchases or successively lower sales of a designated security, are intended to create a false or misleading appearance of market activity, or are meant to manipulate the market price or establish an artificial price that does not reflect the true market conditions. Rule 6140(b) prohibits the same persons from engaging in actions that create a false or misleading appearance of market activity or creating or inducing a false or misleading appearance with respect to the market in such security. The Exchange would replace approved person with associated person and delete ''registered or non-registered employee of a member or member organization'' in both subsections as redundant.

• Finally, Rule 9120 (Definitions) sets forth definitions applicable to the Exchange's disciplinary rules in the Rule 9000 Series. Subsection (g) defines ''covered person'' to mean a member, principal executive, approved person, registered or non-registered employee of a member organization, or other person (excluding a member organization) subject to the jurisdiction of the Exchange. The Exchange would replace approved person with associated person and delete ''registered or non-registered employee of a member organization,'' as redundant.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[12] in general, and furthers the objectives of Section 6(b)(5) of the Act,[13] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system, and protect investors and the public interest.

In particular, the Exchange believes that the proposal to eliminate the approved person category would eliminate a registration category that has no analogue under the membership scheme of FINRA or any other national securities exchange, thereby harmonizing the Exchange's rules with those of FINRA and other exchanges and resulting in less burdensome and more efficient regulatory compliance for member organizations. The Exchange accordingly believes that the proposal would remove impediments to and perfecting the mechanism of a free and open market and a national market system, consistent with the objectives of Section 6(b)(5) of the Act.[14]

The Exchange further believes that elimination of the approved person category would not diminish the scope of its jurisdiction. The principal function of the approved person category is identifying persons who directly or indirectly control a member organization, and this is already addressed through the disclosure infrastructure of the CRD, which captures controlling relationships through Form BD's Schedules A and B. Moreover, the proposed sub-definition of ''Control Person'' within the proposed definition of ''associated person'' would include persons who control a member organization, persons engaged in a securities or kindred business controlled by a member or member organization, and U.S. registered broker-dealers under common control with a member organization, the same three categories of persons encompassed by the current ''approved person'' definition. The Exchange thus believes that the proposal would thereby preserve the substantive coverage of the current approved person category within the Exchange's broader jurisdictional framework. For the foregoing reasons, the Exchange believes the proposed change is consistent with preserving the current scope of Exchange jurisdiction while eliminating a separate, Exchange-specific registration category that is no longer necessary to achieve that purpose.

Each of the individuals and entities that would be encompassed in the proposed definition of ''associated person'' would fall within the definition of ''associated person of a broker or dealer'' in Section 3(a)(18) of the Act.[15] The Exchange notes that the definition of associated person in the Act is broader in scope than the individuals and entities currently subject to the Exchange's jurisdiction since the Act's definition of associated person includes any person under common control with a broker-dealer, while the current definition of approved person in Rule 2(c) does not include all affiliates; rather, it includes only affiliates engaged in a securities or kindred business that is controlled by a member or member organization or a U.S. registered broker-dealer under common control with a member organization. The Exchange thus believes that harmonizing its definition of associated person with FINRA's definition would also harmonize its rules with Section 3(a)(18) of the Act.[16] As noted, the Exchange believes that providing greater harmonization between Exchange and FINRA rules of similar purpose would result in less burdensome and more efficient regulatory compliance for Exchange member organizations. As such, the proposed rule change will foster cooperation and coordination with persons engaged in facilitating transactions in securities and will remove impediments to and perfect the mechanism of a free and open market and a national market system.

For the foregoing reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issues, but rather would remove a registration category from the Exchange's rules that is no longer necessary and adopt a new definition of ''associated person'' based on the definition in FINRA Rule 1011(b). The proposed amendments are thus intended to encourage less burdensome and more efficient regulatory compliance and will not impose any burden on competition. Further, the proposed changes would

[12] 15 U.S.C. 78f(b).

[13] 15 U.S.C. 78f(b)(5).

[14] 15 U.S.C. 78f(b)(5).

[15] See 15 U.S.C. 78c(a)(18). Under Section 3(a)(18), ''associated person'' means any partner, officer, director, or branch manager of a broker-dealer (or any person occupying a similar status or performing similar functions), any person directly or indirectly controlling, controlled by, or under common control with a broker-dealer, or any employee of such broker-dealer, excluding for certain purposes any person whose functions are solely clerical or ministerial.

[16] See 15 U.S.C. 78c(a)(18). Under Section 3(a)(18), ''associated person'' means any partner, officer, director, or branch manager of a broker-dealer (or any person occupying a similar status or performing similar functions), any person directly or indirectly controlling, controlled by, or under common control with a broker-dealer, or any employee of such broker-dealer, excluding for certain purposes any person whose functions are solely clerical or ministerial. See also Rule 1230 (Associated Persons Exempt from Registration), which provides that persons associated with a member organization whose functions are solely and exclusively clerical or ministerial are not required to be registered with the Exchange.

apply to all member organizations in the same manner and therefore would not impose any unnecessary intramarket burdens.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Pursuant to Section 19(b)(3)(A) of the Act[17] and Rule 19b–4(f)(6)[18] thereunder, the Exchange has designated this proposal as one that effects a change that: (i) does not significantly affect the protection of investors or the public interest; (ii) does not impose any significant burden on competition; and (iii) by its terms, does not become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest.[19]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSE–2026–47 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSE–2026–47. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSE–2026–47 and should be submitted on or before October 27, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[20]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106563; File No. SR–NYSEAMER–2026–54]

Self-Regulatory Organizations; NYSE American LLC; Order Instituting Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To Amend Rules 903G and 906G

October 1, 2026.

I. Introduction

On June 29, 2026, NYSE American LLC (''Exchange'' or ''NYSE American'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] a proposed rule change to permit cash settlement for up to 50 non-ETF Flexible Exchange (''FLEX'') Equity Options. The proposed rule change was published for comment in the **Federal Register** on July 7, 2026.[4] On August 19, 2026, pursuant to Section 19(b)(2)(A) of the Act,[5] the Commission designated a longer period within which to take action on the proposed rule change.[6] The Commission is instituting proceedings pursuant to Section 19(b)(2)(B) of the Act[7][6] to determine whether to approve or disapprove the proposed rule change.

II. Description of the Proposed Rule Change

As described more fully in the Notice,[8] the Exchange proposes to: (i) amend paragraph (c)(3)(ii) of Rule 903G to permit cash settlement for up to 50 non-ETF FLEX Equity Options whose underlying security meets the same criteria that currently must be met to qualify for the cash settlement program for ETF FLEX Equity Options; (ii) amend paragraph (c)(3)(ii)(A) of Rule 903G to provide that, where more than 50 underlying ETFs or 50 underlying non-ETFs qualify, the Exchange will select the 50 qualifying securities with the highest average daily notional value, replacing the current usage of highest average daily share volume; (iii) and correspondingly revise Rule 906G, which addresses FLEX Equity Option position limits.

III. Proceedings To Determine Whether To Approve or Disapprove SR–NYSEAMER–2026–54 and Grounds for Disapproval Under Consideration

The Commission is instituting proceedings pursuant to Section 19(b)(2)(B) of the Act[9] to determine whether the Exchange's proposed rule change should be approved or disapproved. Institution of proceedings is appropriate at this time in view of the legal and policy issues raised by the proposed rule change. Institution of proceedings does not indicate that the Commission has reached any conclusions with respect to any of the issues involved. Rather, as described below, the Commission seeks and encourages interested persons to provide additional comment on the proposed rule change to inform the

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] *See* Securities Exchange Act Release No. 105831 (July 1, 2026), 91 FR 41696 (''Notice'').

[5] 15 U.S.C. 78s(b)(2)(A).

[6] *See* Securities Exchange Act Release No. 106165, 91 FR 54778 (August 24, 2026). The Commission designated October 5, 2026, as the date by which the Commission shall approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change.

[7] 15 U.S.C. 78s(b)(2)(B).

[8] *See* Notice, *supra* note 4.

[9] 15 U.S.C. 78s(b)(2)(B).

Commission's analysis of whether to approve or disapprove the proposed rule change.

Pursuant to Section 19(b)(2)(B) of the Act,[10] the Commission is providing notice of the grounds for disapproval under consideration. The Commission is instituting proceedings to allow for additional analysis of, and input from commenters with respect to, the proposed rule change's consistency with the Act and, in particular, Section 6(b)(5) of the Act,[11] which requires, among other things, that the rules of a national securities exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public.

The Commission asks that commenters address the sufficiency of the Exchange's statements in support of the proposal, which are set forth in the Notice,[12] in addition to any other comments they may wish to submit about the proposed rule change. By way of example, the Commission recently granted exemptive relief—to permit p.m. settlement for cash-settled security futures—that was conditioned on the collection and provision of certain data elements.[13] Commenters may submit comments regarding the potential utility of the same or similar data collection commitments here, in addition to any other comments they may wish to submit about the proposed rule change.

IV. Procedure: Request for Written Comments

The Commission requests that interested persons provide written submissions of their views, data, and arguments with respect to the concerns identified above, including the issues raised by commenters, as well as any other concerns they may have with the proposal. In particular, the Commission invites the written views of interested persons concerning whether the proposed rule change is consistent with Section 6(b)(5), or any other provision of the Act, or the rules and regulations thereunder. Although there do not appear to be any issues relevant to approval or disapproval that would be facilitated by an oral presentation of views, data, and arguments, the Commission will consider, pursuant to Rule 19b–4 under the Act,[14] any request for an opportunity to make an oral presentation.[15]

Interested persons are invited to submit written data, views, and arguments regarding whether the proposed rule change should be approved or disapproved by October 27, 2026. Any person who wishes to file a rebuttal to any other person's submission must file that rebuttal by November 10, 2026.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSEAMER–2026–54 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSEAMER–2026–54. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection.

All submissions should refer to file number SR–NYSEAMER–2026–54 and should be submitted on or before October 27, 2026. Rebuttal comments should be submitted by November 10, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106565; File No. SR–TXSE–2026–034]

Self-Regulatory Organizations; Texas Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt a Transaction Fee Applicable to Orders That Execute in Auctions on the Exchange

October 1, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on September 24, 2026, Texas Stock Exchange LLC (the ''Exchange'' or ''TXSE'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing with the Securities and Exchange Commission (''Commission'') a proposal to adopt a transaction fee applicable to orders that execute in auctions on the Exchange. The text of the proposed rule change is available on the Commission's website (*https://www.sec.gov/rules/sro.shtml*) at the Exchange's website (*https://www.txse.com/regulations/rules-filings*), and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedule to adopt a fee for orders executed in auctions conducted pursuant to Rule 11.022.[3] Specifically, the Exchange proposes to add a Transaction Fee for Eligible Auction Orders that are executed in a TXSE Opening, Closing, IPO, Halt or Volatility Closing Auction of $0.0012 per share executed.

The proposed fee would apply uniformly and without regard to whether an order is displayed or non-displayed, adds or removes liquidity, is designated to participate exclusively in an auction, or rests on the TXSE Book before participating in an auction. The fee applicable to executions in an auction would apply in lieu of, and would not be combined with, any other transaction-specific fee or rebate set forth in the Fee Schedule. Accordingly, each side of an auction execution would be assessed the applicable fee. The Exchange believes this approach would provide Members with a simple and predictable method for determining the fee applicable to an auction execution.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[4] in general, and furthers the objectives of Section 6(b)(5)[5] requirements in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and is not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers as well as Section 6(b)(4)[6] in that it is designed to provide for the equitable allocation of reasonable dues, fees, and other charges among its members and other persons using its facilities.

The Exchange believes the proposed fee is reasonable. The proposed $0.0012-per-share rate is within the range of auction transaction fees imposed by other equities exchanges. NYSE Texas and NYSE Arca assess a $0.0012-per-share fee for specified orders executed in a closing auction and a $0.0015-per-share fee for specified orders executed in an opening auction.[7] Cboe BZX has also assesses an auction execution fee of $0.0011 per share for specified closing-auction and continuous-book executions and $0.0013 per share for specified opening-, IPO-, and halt-auction executions.[8] The proposed $0.0012-per-share fee therefore is comparable to fees charged for auction executions on competing equities exchanges.

The Exchange also believes that applying one rate to all auction executions is reasonable because every executed order receives the benefit of the Exchange's auction process and the resulting single-price execution. A uniform rate would avoid distinctions based on how an order entered the auction and would allow Members to determine the applicable charge without considering whether an order was displayed, non-displayed, auction-only, or resting on the TXSE Book before the auction.

Further to this point, the Exchange also believes the proposed fee is equitably allocated and not unfairly discriminatory because it would apply uniformly to all Members and to each buy and sell order executed in an Exchange auction. The proposal would not distinguish based on a Member's identity, capacity, volume, order type, or whether its order added or removed liquidity. Each Member would be subject to the same fee for the same type of auction execution. Members whose orders do not execute in an auction would not be charged the proposed fee. The proposal also would not provide a rebate, discount, tier, or exemption to any category of Member. The Exchange therefore believes that the proposed fee is consistent with Sections 6(b)(4) and 6(b)(5) of the Act.

The Exchange operates in a competitive market in which market participants may direct order flow to competing exchanges and off-exchange venues. The Commission has recognized the importance of market forces in determining prices and self-regulatory organization revenues. The Exchange believes the proposed fee reflects a competitive rate designed to support the operation of its auctions while remaining comparable to auction fees assessed by other equities exchanges. Members are not required to enter orders for execution in an Exchange auction. Members may determine whether and to what extent to submit auction interest based on their customers' instructions, regulatory obligations, and the available execution alternatives. Competing exchanges may also respond by modifying their auction functionality or pricing. For these reasons, the Exchange believes the proposed rule change is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange does not believe the proposed rule change will impose any undue burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the fee for transacting in auctions on the Exchange would be assessed uniformly on each buy and sell order executed in an Exchange auction. The proposal would not distinguish among Members, capacities, order types, or liquidity-adding and liquidity-removing interest. No Member would receive a preferential auction rate, credit, tier, or exemption.

The Exchange does not believe the proposed rule change will impose an undue burden on intermarket competition because it would not restrict the ability of competing exchanges to offer auctions or to establish their own auction pricing. Market participants may consider the Exchange's fees, auction functionality, and execution quality when determining where to direct eligible order flow. To the extent the proposed fee affects competition, the Exchange believes it would promote competition among exchanges with respect to auction pricing and services. For these reasons, the Exchange does not believe the proposed rule change will impose any burden on competition that is not

[3] The Exchange initially filed the proposed rule change on September 15, 2026, as SR–TXSE–2026–034 [sic]. On September 23, 2026, the Exchange withdrew that filing and refiled the proposed rule change as SR–TXSE–2026–034.

necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [9] and Rule 19b–4(f)(2) [10] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposal is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File No. SR–TXSE–2026–034 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File No. SR–TXSE–2026–034. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–TXSE–2026–034 and should be submitted on or before October 27, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106573; File No. SR–OCC–2025–018]

Self-Regulatory Organizations; The Options Clearing Corporation; Order Setting Aside Action by Delegated Authority and Approving Proposed Rule Change, as Modified by Partial Amendment No. 1, by The Options Clearing Corporation Concerning Methodology To Allocate Clearing Fund Deposit Requirements Among Its Clearing Members To Better Align the Allocation With the Sizing of the Clearing Fund so Stress Based Risk is Fairly Allotted to Market Participants That Expose OCC to Such Stress Risk

October 2, 2026.

I. Introduction

On September 26, 2025, the Options Clearing Corporation (''OCC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change SR–OCC–2025–018, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Exchange Act'') [1] and Rule 19b–4 [2] thereunder, to amend its allocation methodology for the Clearing Fund [3] deposit requirements of its Clearing Members by realigning the allocation to correspond to the sizing of the Clearing Fund so that certain stress-based risk is proportionally allotted to market participants that expose OCC to such risk.[4]

On December 11, 2025, the Commission, acting through authority delegated to the Division of Trading and Markets,[5] approved the Proposed Rule Change (''Delegated Order'').[6] On December 18, 2025, Fidelity Investments (''Fidelity'' or ''Petitioner'') [7] filed a notice of its intention to petition for review,[8] pursuant to Rule 430 of the Commission's Rules of Practice.[9] Pursuant to Commission Rule of Practice 431(e), the Delegated Order was stayed by the filing with the Commission of a notice of intention to petition for review.[10] On December 24, 2025, Fidelity submitted its Petition for Review (''Petition'') of the Delegated Order.[11] On February 13, 2026, the

[4] The Commission published notice of the proposed rule change in the **Federal Register** on October 1, 2025. *See* Securities Exchange Act Release No. 104111 (Sept. 26, 2025), 90 FR 47383 (Oct. 1, 2025) (File No. SR–OCC–2025–018) (''Notice of Filing''). On October 7, 2025, OCC filed Partial Amendment No. 1 to append an Exhibit 2 to documents filed as part of File No. SR–OCC–2025–018 on September 26, 2025 (hereinafter, together, defined as ''Proposed Rule Change''). Exhibit 2 consists of communication from OCC to its Clearing Members discussing, amongst other things, the proposed rule change in File No. SR–OCC–2025–018. On November 3, 2025, the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. *See* Securities Exchange Act Release No. 104173 (Nov. 3, 2025), 90 FR 51424 (Nov. 17, 2025) (File No. SR–OCC–2025–018).

Commission issued a scheduling order, pursuant to Commission Rule of Practice 431,[12] granting the Petition and providing until March 12, 2026, for any party or other person to file a written statement in support of, or in opposition to, the Delegated Order.[13] On March 12, 2026, Petitioner submitted a written statement in opposition to the Delegated Order.[14] The Commission received additional comment from the public, including from OCC.[15]

The Commission has conducted a *de novo* review of OCC's proposal, giving careful consideration to the entire record—including all comments and statements submitted—to determine whether the proposal is consistent with the requirements of the Exchange Act and the rules and regulations thereunder applicable to a registered clearing agency. Section 19(b)(2)(C) of the Exchange Act directs the Commission to approve a proposed rule change of a self-regulatory organization if it finds that such proposed rule change is consistent with the requirements of the Exchange Act and the rules and regulations thereunder applicable to such organization.[16] Under the Commission's Rules of Practice, the ''burden to demonstrate that a proposed rule change is consistent with the Exchange Act and the rules and regulations issued thereunder . . . is on the self-regulatory organization that proposed the rule change.'' [17] The description of a proposed rule change, its purpose and operation, its effect, and a legal analysis of its consistency with applicable requirements must all be sufficiently detailed and specific to support an affirmative Commission finding,[18] and any failure of an SRO to provide this information may result in the Commission not having a sufficient basis to make an affirmative finding that a proposed rule change is consistent with the Exchange Act and the applicable rules and regulations.[19] Moreover, ''unquestioning reliance'' on an SRO's representations in a proposed rule change is not sufficient to justify Commission approval of a proposed rule change.[20]

For the reasons discussed herein, OCC has met its burden to show that the Proposed Rule Change is consistent with the Exchange Act and rules and regulations thereunder applicable to OCC, and this order sets aside the Delegated Order and approves the Proposed Rule Change. In particular, the Commission finds that the record before the Commission demonstrates that the Proposed Rule Change is consistent with the requirements of the Exchange Act and the rules and regulations thereunder applicable to OCC. More specifically, the Commission finds that the Proposed Rule Change is consistent with Sections 17A(b)(3)(F), and (I) of the Exchange Act, and with Exchange Act Rules 17ad–22(e)(2) and (18).

II. Summary of the Proposal

OCC is registered with the Commission as a clearing agency and, as such, is an SRO under the Exchange Act.[21] OCC is the only clearing agency for standardized U.S. securities options listed on Commission-registered national securities exchanges (''listed options''). In addition, OCC serves other financial markets, including the commodity futures, commodity options, security futures, securities lending, and the over-the-counter options markets. OCC provides central counterparty (''CCP'') clearing services for all these markets and performs critical functions in the clearance and settlement process. OCC's role as a CCP means that, as part of its function as a clearing agency, it interposes itself as the buyer to every seller and the seller to every buyer for certain financial transactions. As the CCP for the listed options markets in the United States, as well as for certain futures and stock loans, OCC is exposed to various risks arising from providing clearance and settlement services to its Clearing Members. Because OCC is obligated to perform on the contracts it clears, one such risk that OCC is exposed to is credit risk, including the risk that OCC would not maintain sufficient financial resources to cover exposures if one of its Clearing Members defaults.

Among the ways that OCC manages the credit risk posed by a potential Clearing Member default is by periodically collecting margin collateral from Clearing Members on an individual basis and, to the extent this margin collateral could be insufficient to cover OCC's credit exposure in the event of a Clearing Member default, maintaining a Clearing Fund, which is a mutualized pool of financial resources to which each Clearing Member is required to contribute. OCC establishes the size of its Clearing Fund on a monthly basis, in part, at an amount determined by OCC to be sufficient to protect it against losses stemming from the default of the two Clearing Member Groups that would potentially cause the largest aggregate credit exposure for OCC under stress test scenarios that represent extreme but plausible market conditions.[22]

After establishing the size of the Clearing Fund each month, OCC allocates a percentage of the obligation to contribute to the Clearing Fund to each Clearing Member. From time to time, OCC has modified its allocation methodology to more accurately reflect the risk each Clearing Member poses to OCC.[23] Currently, each Clearing Member's contribution to the Clearing Fund is a function of that member's proportionate share of total risk,[24] open

[22] OCC Rule 1001(a). OCC determines the size of its Clearing Fund based on the daily output of stress tests conducted using a range of foreseeable scenarios that utilize standard pre-determined parameters and assumptions, including: relevant peak historic price volatilities; shifts in other market factors including, as appropriate, priced determinants and yield curves; the default of one or multiple members; forward-looking stress scenarios. *See* Notice of Filing, 90 FR at 47384.

[23] *See* Securities Exchange Act Release No. 69403 (Apr. 18, 2013), 78 FR 24257 (Apr. 24, 2013) (File No. SR–OCC–2013–02) (replacing OCC's method of calculating Clearing Members' contributions to OCC's Clearing Fund in proportion to open interest with a formula based on open interest, total risk, and volume with relative weightings of 50%, 35%, and 15%, respectively); Securities Exchange Act Release No. 83735 (July 27, 2018), 83 FR 37855 (Aug. 2, 2018) (File No. SR–OCC–2018–008) (modifying OCC's allocation weighting to better manage its credit exposures to its Clearing Members by better aligning each Clearing Member's contributions to the credit risk it poses to OCC).

[24] Total risk in this context refers to a member's proportionate share of margin posted to OCC. *See* OCC Rule 1003(b)(i).

interest,[25] and volume.[26] OCC currently uses a one-month lookback when calculating a member's proportionate share of the Clearing Fund.[27]

In the Proposed Rule Change, OCC proposed to modify the allocation methodology again to more closely align member obligations with the risks to which they expose OCC.[28] Although the current Clearing Fund allocation methodology contemplates risk as a function of margin, it does not include a component that accounts for the stressed losses used to size the Clearing Fund when determining each Clearing Member's required Clearing Fund contribution. OCC states that the lack of such a stress loss component creates an inconsistency between the sizing and allocation across the membership.[29] To address this inconsistency, OCC's Proposed Rule Change includes the stress loss component in the allocation methodology, allowing OCC to more accurately allocate individual Clearing Fund requirements because they better reflect the potential risk also known as the directional stressed risk that Clearing Members present to OCC.

OCC's Proposed Rule Change would modify OCC's formula for allocating Clearing Fund Contribution requirements by (a) introducing a 70% Clearing Fund risk-based shortfall allocation based on stress loss in excess of margin (the ''shortfall''); [30] and (b) changing the weighting percentages by reducing the margin allocation from 70% to 15% and open interest to 0%. These changes would result in a new weighting scheme of 70% shortfall, 15% margin, and 15% cleared volume.

As part of the change to allocation weighting, OCC also proposed extending the lookback period from one month to three months of data to align with parameters OCC uses when sizing the Clearing Fund.[31] Secondly, OCC proposed adopting rules that would authorize OCC to hold allocation weights constant month-over-month in light of volatile market conditions.[32] Finally, OCC proposed clarifying and conforming changes to the Clearing Fund Methodology Policy (''Policy'') and the Comprehensive Stress Testing & Clearing Fund Methodology, and Liquidity Risk Management Description (''Methodology Description'').[33]

A. Modifications to the Allocation Weighting Formula

OCC proposed replacing the current allocation weighting (70% total risk, 15% open interest, and 15% volume) with a new weighting that aligns more closely with OCC's Clearing Fund sizing methodology (70% shortfall,[34] 15% margin,[35] and 15% volume). Under the proposed weighting scheme, the proposed methodology would be driven primarily by a Clearing Member's proportionate share of shortfalls and would use the same Clearing Fund sizing scenarios to calculate these shortfalls.[36] OCC states that, based on its analysis of different allocation weightings, this specific allocation scheme generates a balance between the various risks captured by each component and would align the Clearing Fund allocation with the exposure driving the size of the Clearing Fund.[37] OCC also proposed to align the lookback period for all allocation-related measures with the parameters used to size the Clearing Fund by moving from a one-month lookback to a three-month lookback.[38]

Before the Commission published its Delegated Order, OCC provided and Commission staff reviewed confidential data describing how the proposed methodology could affect contributions by its Clearing Members.[39] OCC observed that, overall, the proposed approach allocates the Clearing Fund in a more distributed fashion within the top 10 Clearing Members (as measured by highest Clearing Fund contribution amounts), with some members experiencing larger changes relative to other Clearing Members.[40] Under the proposed methodology, while the top 10 Clearing Members would have experienced, on average, a 1.28% increase in their Clearing Fund contributions, the top five Clearing Members within that group would have experienced, on average, a 2.67% decrease in such contributions.[41] Outside of the top 10 group, the remaining Clearing Members would have experienced a 1.28% decrease in average contributions.[42]

B. Authority to Hold Constant

As noted above, OCC proposed to adopt rules that would authorize it to hold allocation weights constant month-over-month in light of volatile market conditions.[43] As OCC stated in its

[25] Open interest is the total number of cleared contracts and open positions plus units of stock underlying open stock loan or borrow positions. *See* Securities Exchange Act Release No. 69403 (Apr. 18, 2013), 78 FR 24257 (Apr. 24, 2013) (File No. SR–OCC–2013–02).

[26] OCC Rule 1003(a). The proportionate requirements are determined over and above the contribution of $500,000 per Clearing Member. *See id.*

[27] *See* Notice of Filing, 90 FR at 47386.

[28] *See* Notice of Filing, 90 FR at 47383 (providing notice of OCC's proposal to better align the allocation with the sizing of the Clearing Fund so that stress-based risk is fairly allotted to those market participants that expose OCC to such stress risk).

[29] Notice of Filing, 90 FR at 47384 (''OCC's rules require OCC to size the Clearing Fund monthly based on stress test scenarios that present extreme but plausible market condition . . . [h]owever, the current allocation methodology does not include a component that takes into account the same stressed losses used to size the fund when determining each Clearing Member's required Clearing Fund deposit'').

[30] OCC refers to such a shortfall as Stress Loss Over Initial Margin (''SLOIM''). *See generally* Letter from Nicole Jakubowski, Deputy General Counsel and Corporate Secretary, OCC (Mar. 12, 2026) (''OCC II''), *available at https://www.sec.gov/comments/sr-occ-2025-018/srocc2025018-722767-2261914.pdf.*

[31] Petitioner does not object to extending the lookback period used for allocation inputs from one month to three months. *See* Petition, at 6 n. 2. *See also* Opposition, at 9 n.3.

[32] Petitioner does not object to adopting a new authority allowing OCC to hold allocation weights constant month-over-month during periods of heightened market volatility. *See* Petition, at 6 n. 2. *See also* Opposition, at 9 n.3.

[33] In addition to the modifications to the allocation weighting formula and the authority to hold constant, OCC proposed non-substantive conforming changes and clarifications, which were not subject to Fidelity's Petition. *See* Delegated Order, 90 FR at 58354 (''Such clarifying changes include the removal of Interpretation and Policy .03 of Rule 1003, which provides for implementation of the current allocation methodology and is no longer necessary. The conforming changes also include the introduction of 'shortfall' into the provisions describing OCC's Clearing Fund allocation methodology across the Rules, Policy, and Methodology Description. Similarly, OCC would remove references to 'open interest; and other terms that are not relevant to the proposed allocation methodology.''). The clarifying and conforming changes are considered as part of the Proposed Rule Change; however, they were not the subject of concerns raised in the Petition.

[34] As proposed, OCC would define ''shortfall'' to mean ''an estimated stress loss exposure in excess of margin amounts aggregated across all accounts of a Clearing Member determined using the Corporation's margin methodology and such add-on charges as may be determined pursuant to the Corporation's policies and procedures.'' *See* Notice of Filing, 90 FR at 47385.

[35] ''Margin'' under the proposed rule would have the same meaning as ''total risk'' under the current rule. OCC states that using the term ''margin'' rather than ''total risk'' provides better clarity as to the metric upon which the factor is based. *See id.* at 47385 n. 12.

[36] The shortfall component used in the allocation is based on the highest shortfall across all sizing scenarios for that Clearing Member on a given business date and will be treated as zero in the event there are no shortfalls.

[37] *See* Notice of Filing, 90 FR at 47385. OCC provided the results of its analysis in confidential Exhibit 3 to File No. SR–OCC–2025–018. *See id.* at 47385 n. 14.

[38] Petitioner does not object to extending the lookback period used for allocation inputs from one month to three months. *See* Petition, at 6 n. 2. *See also* Opposition, at 9 n.3.

[39] *See* Notice of Filing, 90 FR at 47386.

[40] *Id.*

[41] *Id.*

[42] *Id.*

[43] Petitioner does not object to adopting a new authority allowing OCC to hold allocation weights constant month-over-month during periods of heightened market volatility. *See* Petition, at 6 n. 2. *See also* Opposition, at 9 n.3.

proposal, when markets are highly volatile during periods of market stress, elevated margin coverage becomes more commonplace and consequently may reduce or even eliminate Clearing Fund shortfalls because of elevated margin requirements.[44] This is because the shortfall component represents a stress loss in excess of margin. Thus, an increase in margin, all else being equal, results in a decreased shortfall.

As OCC further stated in its proposal, reductions in shortfalls could cause the resulting Clearing Fund allocation to change dramatically month-over month.[45] This is because the proposed changes to the allocation methodology described above reduce the weight of margin and give significant weight to shortfall. As a result, an increase in a Clearing Member's proportionate share of margin would not offset an equal reduction in that member's proportionate share of shortfall under the proposed allocation methodology. OCC stated that the proposed implementation of a three-month lookback would help to smooth month-over-month changes;[46] however, OCC stated that it is possible the extended lookback alone may not be sufficient in the unlikely event that high volatility and reduced shortfalls persisted even though OCC did not observe such persistence in its analysis.[47]

To address the potential impact of persistent high volatility on the allocation of Clearing Fund requirements, OCC proposed to adopt rules that would allow it to hold allocations constant month-over-month. As proposed, Rule 1003(c) would grant OCC the authority to make the hold-constant decision at its sole discretion. The rule would provide that any hold-constant decision would (i) be based upon then-existing facts and circumstances, (ii) be in furtherance of the integrity of OCC and the stability of the financial system, and (iii) take into consideration the legitimate interests of Clearing Members and market participants. Under the proposed Policy, OCC would exercise its hold-constant authority by conducting daily analyses of the output of OCC's sizing stress tests[48] and, if warranted, by escalating to the Chair of the Stress Testing Working Group (''STWG'')[49] or the Chief Financial Risk Officer so that an STWG meeting be convened to review, and approve or reject, a hold-constant recommendation.[50] Such a recommendation would be required to be supported by an analysis that may include and is not limited to the percentage of firms generating shortfalls, the size of peak shortfalls relative to the Clearing Fund size, a comparison of the Clearing Fund allocation projections to current requirements, and a breakdown of the allocation projections by component.[51] OCC would be required to notify Clearing Members and the Risk Committee of any hold-constant decision or reversion to the proportionate approach. Further, OCC would be required to notify the Commission and the CFTC promptly of any decision to hold allocations constant and to provide the reasons for such decision.

III. Discussion and Commission Findings

The Commission finds that the Proposed Rule Change is consistent with the requirements of the Exchange Act and the rules and regulations thereunder applicable to OCC. More specifically, the Commission finds that the Proposed Rule Change is consistent with Sections 17A(b)(3)(F) and (I) of the Exchange Act,[52] and with Exchange Act Rules 17ad–22(e)(2) and (18),[53] as described in detail below.[54] Also as described below, commenters' argument regarding the equitable allocation of dues, fees, and other charges under Section 17A(b)(3)(D) of the Exchange Act[55] is misplaced. The Commission therefore approves the Proposed Rule Change.

A. Consistency With Sections 17A(b)(3)(F) and 17A(b)(3)(I) of the Exchange Act

Section 17A(b)(3)(F) of the Exchange Act requires, among other things, that a clearing agency's rules are not designed to permit unfair discrimination among participants in the use of the clearing agency.[56] Section 17A(b)(3)(I) of the Exchange Act requires that the rules of a clearing agency do not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act. Section 17A(b)(3)(I) does not require the Commission to make a finding that OCC chose the option that imposes the least possible burden on competition. Rather, the Exchange Act requires that the Commission find that the Proposed Rule Change does not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act, which involves balancing the competitive effects of the Proposed Rule Change against all other relevant considerations under the Exchange Act.[57] Because the concerns raised by the Petitioner and commenters regarding unfair discrimination and burdens on competition overlap substantively, this section addresses them together under the relevant statutory sections.

The purpose of the Proposed Rule Change is to align the financial obligations imposed by OCC's rules with the credit risk each Clearing Member poses to OCC. As described above, OCC maintains the Clearing Fund to cover OCC's credit exposure in the event of a Clearing Member default to the extent such exposure is not covered by margin collateral. The size of the Clearing Fund is a direct function of the difference between the margin OCC collects from Clearing Members and the potential losses OCC could face from a member default under extreme but plausible market conditions, *i.e.,* shortfall.[58] Collecting such collateral is necessary to ensure that OCC maintains sufficient financial resources to manage its credit risk. The greater the potential

[44] *See* Notice of Filing, 90 FR at 47387.

[45] *Id.*

[46] *Id.*

[47] *Id.*

[48] In particular, these tests would be the Cover 2 Sizing Stress Tests, where ''Cover 2'' means ''sufficient Pre-Funded Financial Resources, at a minimum, to enable OCC to cover a wide range of foreseeable stress scenarios that include, but are not limited to, the default of the two Clearing Member Groups that would potentially cause the largest aggregate credit exposure in extreme but plausible market conditions.'' *See* Notice of Filing, 90 FR at 47384 n.23 and accompanying text. *See also* Notice of Filing, 90 FR at 47384 (''As described in the Methodology Description, OCC leverages a suite of sizing stress tests broadly categorized into two types: 'Systemic Scenarios' and 'Idiosyncratic Scenarios.' Systemic Scenarios are created to capture risk to OCC in an extreme event impacting all positions mainly driven by risk drivers, while Idiosyncratic Scenarios are used to assess the impact of extreme moves of specific equities in a Clearing Member portfolio. [. . .] OCC selects the largest aggregate stress test exposures as the primary basis for sizing the Clearing Fund.'').

[49] *See* Notice of Filing, 90 FR at 47387 (''OCC believes the STWG is the appropriate OCC internal governing body to approve or reject such recommendation given the authority the Management Committee has delegated to it as the subject matter expert on OCC's financial risk and liquidity risk stress-testing scenarios, models, underlying parameters and assumptions, and stress test results.'').

[50] *See* Notice of Filing, 90 FR at 47387 n. 24. Likewise, OCC would have the authority to revert to the proposed allocation calculation formula, subject to the STWG's prior approval. *See* Notice of Filing, 90 FR at 47387.

[51] *See* Notice of Filing, 90 FR at 47387 n. 25.

[58] *See* Notice of Filing, 90 FR at 47384 (defining shortfall as the estimated stress loss exposure in excess of margin requirements).

shortfall, the greater the size of the Clearing Fund.[59] Currently, however, the size of each Clearing Member's contribution is unrelated to the share of the shortfall it presents to OCC.

Both the Petition and several comments received after the Petition address the burden on competition, as described in detail below.[60] Petitioner states that the proposal overstates the risk posed by agency brokers [61] in that the allocation methodology would ''require agency brokers to contribute to the Clearing Fund substantially in excess of the risk they generate, while allowing proprietary trading firms and market makers to contribute substantially less than their risk profile warrants—resulting in a loss-allocation framework in which agency brokers subsidize any loss created by other distinct cohorts.'' [62]

Petitioner and some commenters suggest that, unlike Clearing Fund sizing, the proposed Clearing Fund allocation does not align with each Clearing Member's relative default likelihood as well as expected losses, and that the relative default likelihood of an agency broker is distinct from that of proprietary trading firms and market makers due to structural differences.[63] Petitioner states that theoretical exposure to market direction (via, in some cases, many individual accounts) for agency brokers does not necessarily translate into real-world default risk,[64] and that, unlike proprietary and market-making firms, whose losses hit their books immediately, stress losses attributable to agency brokers are borne by individual customers and would first be absorbed by the defaulting customers' net equity and available margin collateral.[65] Petitioner also states that agency brokers frequently have access to additional forms of loss protection, including fidelity bonds, insurance coverage, and clearing deposits by introducing brokers.[66]

Lastly, Petitioner states that the proposed allocation formula overstates relative credit risk posed by agency brokers compared to proprietary trading firms and market-makers because the contribution requirements are driven primarily by OCC's new stress loss metric, and the proposed allocation change minimizes operational risk that can lead to member default since proprietary trading firms and market makers face greater operational risk than agency brokers.[67] The Petitioner states that, unlike agency brokers, ''[p]roprietary trading firms and market-makers face greater operational risk than agency brokers because they often employ high-volume, programmatic trading strategies. When these strategies fail—through system errors, algorithmic malfunctions, or breakdowns in intraday controls and hedging—the resulting losses can scale with their trading volumes and open interest, introducing more systemic risk.'' [68] As a result, by removing open interest entirely and instead focusing on shortfall, the Petitioner states that the proposal would compound structural disparities in the Clearing Fund methodology between agency brokers and proprietary and market-making firms, thereby disadvantaging retail-facing agency brokers and unfairly discriminating against that type of business model.[69]

[59] *See* OCC Rule 1001(a) (explaining that the size of the Clearing Fund is set at an amount determined sufficient to protect against losses under stress test scenarios that represent extreme but plausible market conditions).

(Mar. 12, 2026) (''Schwab II''), *available at https://www.sec.gov/comments/sr-occ-2025-018/srocc2025018-722707-2261854.pdf;* Letter from Matthew Morningstar, Group Managing Director, Chief Legal Officer, LPL Financial (Mar. 20, 2026) (''LPL Letter''), *available at https://www.sec.gov/comments/SR-OCC-2025-018/srocc2025018-731607-2277094_0.pdf;* and Letter from Jessica Giroux, Chief Legal Officer, American Securities Association (Mar. 19, 2026) (''ASA Letter''), available at *https://www.sec.gov/comments/sr-occ-2025-018/srocc2025018-729927-2274615.pdf.*

[61] Although Petitioner states that ''the relative default risk of each member is fundamental to the equitable allocation of Clearing Fund contributions,'' it also states that the ''proposed allocation change greatly overstates the risk posed by the agency-broker model, compared to the risks posed by different business models such as proprietary trading firms and market makers.'' *See* Petition, at 11. *See also* Opposition, at 13–19.

[62] *See* Petition, at 11. Under the Proposed Rule Change, Petitioner estimates that its contribution obligations will increase by approximately 67%. *Id.,* at 3, 9, and 17. *See also* Schwab II, at 4 (''Specifically, Schwab's monthly Clearing Fund contribution is projected to increase by approximately 40% under the Re-Weighted Formula. At the same time, principal trading firms, including quantitative trading firms, market makers, and other broker-dealers engaged primarily or solely in principal trading [. . .] would see only modest increases (*e.g.,* 1.28%)—or even *decreases*—in their Clearing Fund contributions under the Re-Weighted Formula.'' (emphasis in original)). *See also* LPL Letter, at 2. *See also generally* ASA Letter.

[63] *See* Petition, at 12–14; Opposition, at 14–17; Schwab II, at 5–6; and LPL Letter, at 3.

[64] *See* Petition, at 12 (''OCC's stress-testing methodology does not account for key structural and regulatory features of agency brokerage that materially reduce the actual likelihood of agency-broker default [. . .] put simply, two customers may short the same options, but may not default at the same time.''). *See also* LPL Letter, at 3 (''Retail order flow is typically highly diversified across a large number of customers, strategies, and underlying securities. Unlike institutional trading strategies that may involve concentrated directional positions, retail activity tends to consist of smaller positions spread across a large number of accounts and a variety of asset classes. This volume and diversification reduce the likelihood that a single market event or exposure would result in large losses concentrated on a single intermediary or clearing participant.'').

[65] *See* Petition, at 12; and Opposition, at 14–15. *See also* Schwab II, at 5 (''OCC's new stress-based shortfall approach ignores the fact that when an Agency Broker's customer fails to pay or deliver, 100% of the loss does not need to be covered by OCC-collected margin with any shortfall being covered by Clearing Fund resources. Instead, the Agency Broker business model has built-in regulatory protections that mitigate the risk of Clearing Fund resources being needed to cover an Agency Broker customer default. FINRA Rule 4210 provides one such protection by requiring Agency Brokers to collect margin when they extend credit to their customers to finance transactions in exchange-listed options. Collecting margin protects Agency Brokers from customer credit risk because the collected margin serves as collateral for the transaction, mitigating the extent of any loss to the firm if the customer ultimately fails to pay for or deliver the securities subject to the transaction.'') (footnotes omitted).

[66] *See* Petition, at 12; Opposition, at 15. *See also* Schwab II, at 5 (''Because Agency Brokers have resources to mitigate losses stemming from customer failures to pay or deliver, the likelihood of Agency Broker defaults is lower than anticipated by the Proposed Rule Change. Even in the event of an Agency Broker default, a significant portion of any loss may be covered before any need to rely on OCC resources. If an Agency Broker covers a significant portion of the loss before OCC resources are needed, then OCC-collected margin may fully cover the remaining portion of the loss without needing to rely on the Clearing Fund. Even if OCC-collected margin does not fully cover the loss, any margin shortfall would be significantly smaller than if OCC resources were needed to cover 100% of the loss.'').

[67] *See* Petition, at 12–14; Opposition, at 16–17. *See also* Schwab II, at 6. One commenter also states that the proposed extended lookback period could prevent Clearing Fund allocations from fully capturing all relevant risks to OCC. *Id.,* at 9. The Proposed Rule Change, however, is focused solely on the allocation of collateral contribution requirements, not on the sizing those requirements. *See* Notice of Filing, 90 FR at 47384 (''While the changes would not affect the overall size of the Clearing Fund, some Clearing Members would see their allocation increase while others would see their allocation decrease.''). The commenter also suggested potential alternatives to achieve the goals of the Proposed Rule Change without ''disproportionately impacting'' agency brokers (*e.g.,* phase in the re-weighted formula on which the allocation methodology relies, permit agency broker-dealers to use certain offsets in net capital requirements). *See* Schwab II at 8–9. The alternatives suggested by commenters do not alter the Commission's determination that the Proposed Rule Change, as designed, is consistent with the applicable statute, rules, and regulations. While there may be more than one reasonable way to address a given risk, the existence of an alternative does not, in and of itself, render the proposed approach inconsistent with applicable law. Additionally, Rule 17ad–22(e) generally provides CCAs with flexibility in designing their written policies and procedures, rather than to take a strictly prescriptive approach. *See, e.g.,* Securities Exchange Act Release No. 78961 (Sept. 28, 2016), 81 FR 70786, at 70795–97, and 70800–01 (Oct. 13, 2016) (File No. S7–03–14). This means that clearing agencies have the flexibility to tailor their policies and procedures to the risks posed by their particular businesses.

[68] *See* Petition, at 13. *See also* Opposition, at 16.

[69] *See* Opposition, at 13–14.

OCC states that the proposed allocation is business model-neutral because if a Clearing Member is required to increase its contribution under the new allocation, that is because that Clearing Member contributes more tail risk than it is currently being charged for, and that any burden on competition imposed is necessary and appropriate in furtherance of the purposes of the Exchange Act.[70] OCC states that it ''has a single class of members subject to a single Clearing Fund—there are not separate rules or requirements applicable to particular classes of Clearing Members'' and, ''[i]n fact, the PRC is designed to *more fairly* allocate Clearing Fund contributions to those Clearing Members who present increased tail risk.'' [71] OCC states that the proposed methodology ''considers only the risk that Clearing Members introduce into the clearing system, and is agnostic to external characterizations of the nature of their business.'' [72] OCC also states that the proposed approach ''reflects a measured, data-driven calculation that was vetted closely by regulators, Clearing Members, and others [. . .].'' [73] OCC further states, ''[t]he change in allocation methodology necessarily means that the deposit requirement for some Clearing Members will increase because they present higher risk to OCC in a default scenario, represented by shortfall, than is apportioned under the current methodology, while the deposit requirement of other Clearing Members will decrease correspondingly based on a lower risk profile.'' [74] Based on the underlying impact data confidentially submitted to the Commission, OCC states that of the top 15 largest Clearing Fund allocations for June 2026 under the proposal, nine Clearing Members would have seen an increased allocation, ranging from +8.69% to +104.78%, and six Clearing Members would have seen a decreased allocation, ranging from –4.79% to –39.97%.[75] OCC states that the Clearing Members who would have experienced higher allocations ''are not limited to those who generally describe themselves as serving retail customers. Some Clearing Members who serve retail customers would in fact see their allocation decrease.'' [76]

Additionally, OCC states that because the proposed allocation methodology more accurately measures Clearing Fund deposits based on the tail risk represented by a particular Clearing Member to OCC in the event of a default, the proposal is ''designed to appropriately apportion contributions so that Clearing Members who do not cause significant tail risk are not required to subsidize those who do cause such risk.'' [77] As detailed below, several commenters support OCC's proposed Clearing Fund reallocation and its effect on mutualization of losses, stating that the proposal would enhance resilience of the clearing system in the markets OCC serves and more appropriately align structural incentives for Clearing Members to manage the risks they bring into the system in the face of OCC's evolving risk profile.[78] OCC and the supportive commenters point out that, due to ''tremendous growth and innovation in the options markets'' [79]—such as the rise of new products like options on cryptocurrencies, the introduction of new expiry days, extended trading hours, and increased retail investor participation—certain developments ''can increase non-linear tail exposures, making shortfalls a particularly relevant measure for allocating mutualized default resources.'' [80] One such commenter states that the proposal realigns the incentives around loss mutualization,[81] adding that ''[w]here clearing members are able to introduce risks that are not fully reflected in their Clearing Fund contributions, those risks are effectively subsidized by others in the mutualized pool, undermining both fairness and the integrity of the risk management framework.'' [82] This commenter further states that ensuring that Clearing Fund contributions are commensurate with the risks OCC faces ''is therefore a critical component of the safety and soundness of OCC and the broader market ecosystem.'' [83]

Regarding relative likelihood of default, OCC states that the Clearing Fund and the applicable regulatory requirements [84] are not designed to address the probability of default, but rather the degree of loss if and after a default occurs.[85] OCC states that neither OCC's Rules nor federal securities laws ''provide for OCC to discount or haircut the financial resources it must maintain to meet OCC's Cover 2 standard by reference to the creditworthiness of the Clearing Members generating the Cover 2 exposures.'' [86] Rather, OCC states that it assesses a Clear Member's credit worthiness through ''other processes for addressing the probability of a member's default, including Commission-approved margin requirements, membership standards (and ongoing monitoring of members' adherence to

[70] *See* OCC II, at 7–8 (''Far from being unfair or discriminatory, the new allocation method more fairly allocates tail risk and places all Clearing Members on a more level playing field.'').

[83] Goldman Letter, at 2.

[84] *See* 17 CFR 240.17ad–22(e)(4).

[85] *See* OCC II, at 8 (''The Clearing Fund and Exchange Act Rule 17ad–22(e)(4) are not designed to address the *probability of default,* but rather the degree of loss *given* default. The proposed allocation appropriately does not take into account the likelihood of default; that is not what the Clearing Fund is for.'' (emphasis in the original)).

[86] OCC II, at 8.

those standards), and protective measures.'' [87] Moreover, OCC states that despite the fact that agency brokers collect customer margin as an internal buffer before potentially resorting to OCC's Clearing Fund in the event of a Clearing Member default, ''agency brokers may choose to keep this excess margin at the firm, which puts these resources outside the reach of OCC in the event of the Clearing Member's failure. Because it does not have access to this increased margin in the event of a default, OCC does not realize a reduced tail risk associated with that Clearing Member in the event that Clearing Member in fact defaults.'' [88]

Lastly, regarding Petitioner's statements on operational risk, the proposed removal of open interest as a component of the allocation methodology, and the proposed shortfall-focused approach, OCC states that the ''SLOIM methodology is [sic] more appropriate way to apportion the costs of tail risk to the Clearing Members who actually create that risk'' and, as such, ''if the risk in excess of margin associated with a particular Clearing Member increases, that Clearing Member's Clearing Fund allocation likewise increases.'' [89] Further, OCC states that ''the Petition provides no support for why operational risk necessarily scales with open interest.'' [90] Rather, OCC states that other metrics, such as shortfall, ''are more closely aligned with the actual market and tail risk that Clearing Member activity produces.'' [91] OCC additionally states that ''open interest does not account for the sizeable and growing presence of trading in options with zero days to expiration (so-called '0DTE' options), particularly among retail traders.'' [92] OCC further states that it is not required to select the least restrictive means of complying with the Exchange Act for a particular subset of members.[93]

As noted above, supporting commenters state that the proposal appropriately realigns incentives and is consistent with recognized international CCP clearing practices, both generally and specifically as to the shortfall-based calculation. For example, one commenter states that the proposal is ''a well-reasoned shift toward ensuring that clearing members whose portfolios produce the greatest stress exposures bear a proportionate share of the mutualised resources required to manage those risks.'' [94] Another commenter states that the proposed allocation methodology ''which emphasizes stress losses in excess of margin ('shortfall') while incorporating margin and cleared volume, represents a thoughtful and well-reasoned shift toward a stress-centric allocation.'' [95] Other commenters state that the focus on such a shortfall, or SLOIM, addresses the misaligned incentives existing in the current market, where although ''[s]hortfall is an important measure of the likelihood that OCC would need to draw on the mutualized Clearing Fund'', under the present methodology, Clearing Members ''whose activities drive growth in the size of the overall Clearing Fund today are not responsible for funding that increase.'' [96] These commenters state that ''[b]y better funding tail risk ex ante, the proposal also reduces the likelihood of abrupt and destabilizing Clearing Fund reallocations during periods of market stress.'' [97]

In response to the commenters' concerns regarding the impact on agency brokers serving retail customers, the Commission acknowledges that the Proposed Rule Change would result in some Clearing Members' allocations increasing while other Clearing Members' allocations would decrease. Based on the Commission's review, however, the change would not impose any burden on competition not necessary or appropriate. The rights afforded to Clearing Members are accompanied by a set of obligations, including an obligation to provide assets to OCC as collateral. The amount of collateral required varies from member to member, and, therefore, the relative burden of such obligations also varies from member to member. To the extent OCC's rules impose burdens that impact competition between Clearing Members, such burdens must be both necessary and appropriate.

As described above, OCC's role as a CCP exposes it to credit risk in the event of a Clearing Member default. One of the tools [98] OCC uses to maintain sufficient financial resources to manage a potential Clearing Member default is the collection of collateral, including Clearing Fund deposits.[99] OCC determines the amount of Clearing Fund deposits that it needs to hold based on Clearing Member shortfall calculations, which, as described above, account for losses that would exceed the margin collateral posted by a given Clearing Member. The change OCC proposed would, similarly, allocate Clearing Fund requirements based, in part, on shortfall to align with the risk the Clearing Fund is designed to mitigate. Although changing the allocation methodology will increase the collateral obligations of some Clearing Members while reducing the collateral obligations of others, the change is necessary to ensure the burden of posting collateral is tied to the purpose of that collateral. Therefore, to the extent the change in allocation may impose a burden, that burden is necessary to align the collateral obligations with the risk such collateral is designed to cover.

Whether the relative burden of providing Clearing Fund collateral is appropriately distributed among OCC's Clearing Members must be based on the method for allocating such obligations.

[96] *See* Goldman Letter, at 2.

[97] *Id. See also* ABN Amro Letter, at 1 (''We strongly believe that any allocation to prefund a clearing fund should be based on the principle that a potential defaulter should cover as far as possible the potential credit risk that its positions and those it guarantees for its clients pose to the CCP and thus via risk mutualization to the other clearing members. [. . .] In our view, Shortfall (*i.e.* stress loss in excess of margin assets) better accounts for the non-linearity of credit risk exposures and potential losses in portfolios than Margin (or some multiple of it) that is calibrated rather to normal, less volatile market conditions.'').

[98] Clearing Fund deposits serve as a secondary buffer on top of OCC's initial collection of margin to cover credit exposures that could arise under normal market conditions. *See* Securities Exchange Act Release No. 95319 (July 19, 2022), 87 FR 44167 (July 25, 2022) (File No. SR–OCC–2022–001) (As a CCP, OCC ''interposes itself as the buyer to every seller and seller to every buyer for financial transactions. As the CCP for the listed options markets in the U.S., as well as for certain futures, OCC is exposed to the risk that one or more of its members may fail to make a payment or to deliver securities. OCC addresses such exposures, in part, by requiring its members to provide collateral, including margin collateral. [. . .] Typically, margin is designed to cover such exposures during normal market conditions''). *See also* 17 CFR 240.17ad–22(b)(2).

[99] Clearing Fund deposits serve to cover credit exposures under a wide range of foreseeable stress scenarios, including the default of a participant family in extreme but plausible market conditions. *See* Notice of Filing, at 47384. *See also* 17 CFR 240.17ad–22(e)(4)(iii).

Based on both the language of the proposed rule and the impact data provided by OCC and reviewed by the Commission, the proposal allocates Clearing Fund contribution requirements based on the credit risk presented by a Clearing Member's portfolio, not the member's business model. The addition of shortfall as the most heavily weighted factor in OCC's allocation methodology would help to calibrate a Clearing Member's obligation to post collateral to the extent to which that member makes it necessary for OCC to collect such collateral in the first place. As noted above, a Clearing Member would be in a position to change its Clearing Fund requirement by changing the positions it submits for clearing. The extent to which the change affects a member over time, therefore, is at least in part a function of the changes in the positions the Clearing Member submits for clearing at OCC. For example, if the proposed changes had been put in place in 2023, one Clearing Member who would have seen a 1.1% reduction in its Clearing Fund requirements [100] while the same member would have seen a 47.08% increase if the change were implemented in 2026.[101] Such a change in potential impact of the Proposed Rule Change is a function of it being designed to address the Clearing Member's risk rather than any unfair discrimination by OCC.

Although the Petitioner and commenters state that the Proposed Rule Change would disproportionately impact Clearing Members serving retail investors, the proposed rule text is not based upon a specific business model or organizational structure. Instead, it is based on the risk that each Clearing Member brings to OCC. To the extent the Proposed Rule Change would require some members to contribute more to the Clearing Fund, such a burden is appropriate given that it reflects the proportionate share of the shortfall that could arise out of such member's default. Removing open interest and focusing on shortfall in the allocation methodology would more accurately account for tail risks posed by developments in the options markets, such as the rise of 0DTE products, increased participation by retail traders, and heightened options trading volume.[102] Based upon the Commission's review and analysis of the data provided confidentially by OCC, the Proposed Rule Change is designed to address risk presented by Clearing Members and not target retail or agency brokers, or other specific business models, contrary to the assertions of the Petitioner or other commenters.[103]

Additionally, the Commission disagrees with the Petitioner as to whether operational risk necessarily scales with open interest. Further, Petitioner acknowledges that volume, which would remain an input in the allocation methodology, can help capture operational risk.[104] Rather than focusing on open interest or relying exclusively or primarily on volume, the proposal's shortfall-based approach helps apportion the burden of providing the collateral necessary to cover tail risk to the Clearing Members whose cleared positions pose such risk to OCC. As a practical matter, and specifically as to Petitioner's statements regarding the likelihood of default, the Commission agrees with OCC that it would be unable to rely on assets outside of its control in the context of a Clearing Member default.[105] Moreover, the current design of the Clearing Fund, assuming default, is unchanged.

Further, based on the Commission's review of the record, the proposed amendment to the allocation methodology is not unfairly discriminatory because it is reasonably designed to align responsibility for mitigating risk with the activity generating such risk. Although the proposed changes will result in a shift in collateral requirements with some Clearing Members being required to post more collateral and some to post less collateral,[106] such a shift in collateral requirements will relate directly to the risk that each member presents to OCC as represented by that Clearing Member's shortfall calculation.

The proposed change is not designed to permit unfair discrimination among current or future Clearing Members in the use of OCC's clearance and settlement services and facilities. Rather, the proposed changes would require each Clearing Member to post collateral to cover the risk posed by the positions that member submits for clearing at OCC over and above the coverage provided by such member's margin collateral. As Clearing Members change the positions they submit for clearing, the relevant collateral requirements will change as well to reflect the change in risk associated with the new position.[107] For example, if the proposed changes had been put in place in 2023, one Clearing Member who would have seen a 1.1% reduction in its Clearing Fund requirements [108] while the same member would have seen a 47.08% increase if the change were implemented in 2026.[109] Such a change in potential impact of the Proposed Rule Change is a function of the Clearing Member's risk rather than any unfair discrimination by OCC. The Proposed Rule Change is, therefore, not designed to permit unfair discrimination of OCC's Clearing Members.

Separately, Petitioner and some commenters state that increasing Clearing Fund contribution requirements for certain types of Clearing Members would result in higher costs in the form of pass-through costs and limited access to the markets for which OCC clears that would disproportionately harm retail investors, and, thus, is inconsistent with the

[100] *See supra* note 37 (Confidential Exhibit 3 to File No. SR–OCC–2025–018).

[101] *See* underlying impact data submitted confidentially to the Commission alongside OCC III, at 2.

[102] Open interest captures the number of positions open at the end of the trading day. Open interest will not include trades that expire the same day they are executed. Similarly, open interest will not reflect trades opened and closed by offsetting trades on the same day. Therefore, open interest will not account for the risk posed by such positions because it is an end-of-day metric.

[103] *See* confidential Exhibit 3 to File No. SR–OCC–2025–018 and underlying impact data submitted confidentially alongside OCC III.

[104] *See* Petition, at 2. Additionally, as noted above, the Proposed Rule Change is one in a series of changes that, since 2013, have reduced the role of open interest in allocating Clearing Fund contributions. *See* Securities Exchange Act Release No. 69403 (Apr. 18, 2013), 78 FR 24257 (Apr. 24, 2013) (File No. SR–OCC–2013–02) and Securities Exchange Act Release No. 83735 (July 27, 2018), 83 FR 37855 (Aug. 2, 2018) (File No. SR–OCC–2018–008). Regarding these prior matters, commenters supported shifting the weights in favor of risk over open interest *See, e.g.,* Letter from Andrej Bolkovic, CEO, ABN AMRO Clearing Chicago LLC (June 26, 2018), *available at https://www.sec.gov/comments/sr-occ-2018-008/occ2018008-3952920-167052.pdf* (stating that the then current Clearing Fund allocation methodology disincentived Clearing Members from appropriately managing the risk they present to OCC by underweighting total risk and overweighting open interest); Letter from Kurt Eckert, Partner, Wolverine Execution Services, LLC (July 12, 2018), *available at https://www.sec.gov/comments/sr-occ-2018-008/occ2018008-4038120-168568.pdf* (agreeing that a change shifting allocation weights in favor of risk over open interest better aligns incentives for each Clearing Member to reduce the risk it introduces to the Clearing Fund).

[105] When calculating the financial resources it must maintain to cover extreme but plausible market conditions, OCC's policies and procedure must be reasonably designed to include prefunded resources exclusive of resources that are not prefunded. *See* 17 CFR 240.17ad–22(e)(4)(iv).

[106] *See* Notice of Filing, 90 FR at 47386.

[107] Similarly, a Clearing Member may reduce its shortfall calculation by posting additional margin collateral because shortfall represents a stress loss in excess of margin. *See supra* p. 9.

[108] *See supra* note 37 (Confidential Exhibit 3 to File No. SR–OCC–2025–018).

[109] *See* underlying impact data submitted confidentially to the Commission alongside OCC III, at 2.

regulatory requirement of protecting investors and the public interest.[110] Specifically, Petitioner states that OCC's proposed formula will result in higher costs to agency brokers, who will be forced to pass those costs through to their clients, a majority of whom are retail investors.[111] Petitioner and opposing commenters state that these pass-through costs will lead to reducing customer access to the markets for which OCC clears, providing more limited products or services, or imposing higher costs on retail customers.[112]

With regard to potential pass-through costs to or limited access for retail investors, OCC states that the Petitioner ''fails to acknowledge the very purpose of the rule, which is to mitigate and apportion risk based on the risk profile of the activity at issue,'' [113] OCC states that irrespective of whether pass-through costs or limited access would result from the proposal, the Petitioner does not provide supporting data, nor disputes OCC's data-driven process.[114] OCC adds that ''increased cost to certain market participants based on the increased tail risk they pose to OCC and the market does not equate to 'investor harm.' '' [115] Additionally, supporting commenters suggest that the proposal could address concentration in the clearing ecosystem, where options clearing capacity is concentrated in a small number of members.[116] These commenters state that ''[a] more risk-sensitive allocation also supports more efficient use of members' constrained balance sheet resources, which is important to maintaining consistent liquidity provision under evolving bank capital and liquidity requirements.'' [117] Supporting commenters state that the amount of clearing capacity Clearing Members provide is driven by many factors, including whether risks are being appropriately mutualized across participants, and state that the proposal would align the Clearing Fund contributions with the amount of risk Clearing Members bring to OCC and, thus, would give Clearing Members ''additional confidence to expand the amount of clearing capacity they can provide.'' [118] OCC and supporting commenters also state that the Proposed Rule Change reflects a consistency of approach with evolving market expectations, standard business practices and regulatory developments [119] as well as with recent regulatory developments.[120]

Based on the Commission's review of the record, the Petitioner's statements about pass-through costs and limited access affecting retail investors are outside the scope of the Proposed Rule Change. The Proposed Rule Change pertains only to the allocation of Clearing Fund requirements to Clearing Members; it does not prescribe whether or how these Clearing Members would pass costs associated with such Clearing Fund requirements onto their clients. Indeed, Section 17A(b)(3)(E) of the Exchange Act requires that the rules of a clearing agency do not impose any schedule of prices, or fix rates or other fees, for services rendered by its participants.[121] Consistent with that requirement, the Proposed Rule Change does not impose a schedule of fees or attempt to fix prices for the services that OCC's Clearing Members charge to their customers. This is consistent with other collateral requirements that OCC imposes on its Clearing Members.[122] As with all collateral requirements imposed by OCC on its Clearing Members, it is entirely within the individual Clearing Member's discretion and control—and entirely outside of OCC's knowledge or control—whether and how the Clearing Member passes on such collateral requirements to its customers. To the extent a change in collateral obligations may impact competition, that concern is addressed separately above in this section.

Therefore, for the reasons stated above, the Proposed Rule Change is consistent with Sections 17A(b)(3)(F) and 17A(b)(3)(I) of the Exchange Act.[123]

B. Section 17A(b)(3)(D) of the Exchange Act

Section 17A(b)(3)(D) of the Exchange Act requires that the rules of the clearing agency provide for the equitable allocation of reasonable dues, fees, and other charges among participants.[124] The requirement to pledge collateral to the Clearing Fund is not a due, fee, or other charge, which relate to a payment rather than the pledging of collateral.[125] When amending parts of the Exchange Act in 1975 to establish a national market

system and a system for nationwide clearance and settlement of securities transactions, Congress intended that the references to dues, fees, and other charges in Section 17A(b)(3)(D) contemplated payment for services rendered (rather than the pledging of collateral).[126] Consistent with this Congressional intent, the Commission has distinguished such collateral from working capital.[127]

OCC requires its Clearing Members to pay a variety of dues, fees, and other charges as defined in its schedule of fees.[128] Such obligations include monthly dues for ancillary services, per contract clearing fees, and potential other charges such as OCC's operational loss fee.[129] The obligation to contribute collateral to the Clearing Fund is different in nature. Specifically, Clearing Fund contributions are collateral held to cover potential losses, but not a fee collected by OCC for performing a service. Such collateral must be returned to the contributing member to which it belongs upon termination of membership.[130] The equitable allocation requirements of Section 17A(b)(3)(D) [131] are not relevant here because they pertain specifically to dues, fees, and other charges among participants, which do not include contributions to the Clearing Fund.

One commenter states that the Proposed Rule Change does not provide for the equitable allocation of reasonable fees, but that it disproportionately impacts broker-dealers that clear options trades for their retail and institutional customers in a way that amounts to unfair discrimination among clearing members.[132] The commenter goes on to state that the proposed change disproportionately impacts agency brokers in that it deemphasizes operational risk, and projects that such a change would increase its Clearing Fund contribution requirement by approximately 40%.[133] As discussed above, the commenters' argument regarding the equitable allocation of dues, fees, and other charges is misplaced. The Commission recognizes that the proposed change in allocation will shift the relative burden of each Clearing Member to meet its Clearing Fund obligations, but such burdens are considered above in the context of Section 17A(b)(3)(I) of the Exchange Act.[134]

C. Consistency With Rule 17ad–22(e)(2) Under the Exchange Act

Rule 17ad–22(e)(2) under the Exchange Act requires, in part, that a covered clearing agency establish, implement, maintain, and enforce written policies and procedures reasonably designed to provide for governance arrangements that are clear and transparent [135] and that specify clear and direct lines of responsibility.[136]

Both Petition and comments received after the Petition are directly related to governance, transparency, and clarity, as described in detail below.

With regard to governance more broadly, the Petitioner states that OCC failed to meaningfully consult with agency brokers in developing the proposed allocation change.[137] The Petitioner acknowledges that OCC presented the proposal to its Financial Risk Advisory Council (''FRAC''), but states that OCC cannot rely on the FRAC to vet its proposals because not all Clearing Members participate in it.[138] One commenter states that it was not until OCC provided more comprehensive impact data in November 2025 that the commenter understood the full impact of the Proposed Rule Change.[139] Commenters also recommend that OCC establish a process and procedure to periodically review, and update as needed, the manner in which it allocates its Clearing Fund to members.[140]

OCC states that, between 2023 and 2025 it spent considerable time and traded considerable correspondence with Clearing Members in which OCC shared data related to costs to Clearing Members and answered their questions.[141] OCC states further that it provided data to Clearing Members, including the Petitioner, in November 2023, December 2023, January 2024, and May 2024, and discussed the Proposed Rule Change at a September 25, 2025, meeting of OCC's FRAC Risk Management Committee.[142] OCC also commits to presenting results of its annual review of its allocation methodology to the FRAC and FRAC Risk Management Committee on an annual basis going forward.[143]

The substance of the Proposed Rule Change, as well as related data, was presented through several channels over the course of multiple years. OCC presented the substance of the Proposed Rule Change as well as related data to members, including the Petitioner, as early as 2023. The Commission does not agree with the Petitioner's argument that OCC cannot rely on the FRAC to vet its proposals because not all Clearing Members participate in it. Such an argument would necessitate that OCC form an advisory committee comprising representation from each Clearing Member to be consulted prior to the filing of any proposed rule change that could impact members, which is not required by either the Exchange Act or the Commission's rules.[144]

Continued

Further, Petitioner states that the Proposed Rule Change offers only a superficial analysis of the impact on individual clearing members.[145] Petitioner states that it cannot quantify the impact of the proposed allocation change on agency brokers versus proprietary trading firms versus market makers because OCC treats member-specific Clearing Fund information as confidential.[146] Petitioner acknowledges, however, that it has data regarding how the Proposed Rule Change would impact its own Clearing Fund requirements.[147] Petitioner and commenters acknowledge receipt of updated impact data since November 2025.[148] However, Petitioner and commenters have not provided data to support the premise that the Proposed Rule Change would categorically disadvantage agency brokers to the benefit of OCC's other Clearing Members.

In its submission of the Proposed Rule Change to the Commission, OCC stated that Exhibits 3, 5B, and 5C to File No. SR–OCC–2025–018, which contain internal policies and procedures as well as an impact analysis and assessment, were entitled to confidential treatment because they contained commercial and financial information that is not customarily released to the public and is treated as the private information of OCC. Consistent with commenters' statements about impacts to their respective businesses, OCC committed to parallel reporting during which daily Clearing Fund requirement projections will be made available.[149] In contrast to Petitioner's and commenters' statements regarding impact, the data provided by OCC to the Commission as recently as June 17, 2026, demonstrates that the impact on agency brokers is not so clear cut.[150] The data is consistent with OCC's statement that some Clearing Members who serve retail customers would in fact see their allocation decrease.[151] Further, OCC has committed to consult with members through its existing governance arrangements [152] on an at least annual basis.

Based on a review of the record, the data provided by OCC was sufficient to allow the Commission to understand the impact of the Proposed Rule Change at an individual Clearing Member level. The information that OCC provided in the public portion of its filing was summary data describing the overall impact of the Proposed Rule Change. However, the data that OCC provided confidentially to the Commission was more detailed. In its confidential Exhibit 3 to File No. SR–OCC–2025–018,[153] OCC included Clearing Member level data describing the largest changes in allocation of the Proposed Rule Change in terms of both dollar and percentage impact. OCC provided such data both for a single month as well as an average set of effects over the course of five months, also at the individual Clearing Member level. Subsequently, OCC provided updated data showing the projected effect of the Proposed Rule Change at an individual Clearing Member level.[154] As a result, OCC provided sufficient information in its confidential submission to allow the Commission to assess the effects of the Proposed Rule Change as well as how those effects would have changed over the course of time, including on a member-by-member basis.

Separate from the concerns raised by the Petitioner, the Proposed Rule Change would amend the arrangements governing OCC's allocation of Clearing Fund requirements; specifically, the proposed authority to hold allocations constant month-over-month. As noted above, Petitioner does not challenge this aspect of the Proposed Rule Change.[155] As such, the following analysis of the proposed authority here is consistent with that stated in the Delegated Order.[156] OCC's proposal to hold allocations constant to address the potential impact of persistent high volatility is subject to a review process initiated by OCC staff and implemented by the STWG, a panel delegated by OCC management as the relevant subject matter expert. As proposed, OCC staff would be required to base the hold-constant recommendation on daily analyses of stress test results and in consideration of a non-exhaustive list of factors before escalating it to the STWG or the Chief Financial Risk Officer. The STWG or the Chief Financial Risk Officer would have the authority to accept or reject the hold-constant recommendation. This same review process would be implemented if OCC staff recommends a reversion to the proportionate approach. Additionally, OCC staff would be required to provide notification of (1) a hold-constant decision or reversion to Clearing Members and the Risk Committee; and (2) a hold-constant decision to the Commission and CFTC, with reasons for such a decision provided to the regulators. This recommendation review process provided for in OCC's rules and policies would help facilitate governance arrangements that specify clear and direct lines of responsibility.

Accordingly, the Proposed Rule Change is consistent with Rule 17ad–22(e)(2) under the Exchange Act.[157]

D. Consistency With Rule 17ad–22(e)(18) Under the Exchange Act

Rule 17ad–22(e)(18)(ii) under the Exchange Act requires, in part, that a covered clearing agency establish, implement, maintain, and enforce written policies and procedures reasonably designed to establish objective, risk-based, and publicly disclosed criteria for participation, which require participants to have

(contemplating board solicitation, consideration, and documentation of such consideration of the views of participants and stakeholders). The Commission approved updates to OCC's governance arrangements as recently as December 2024 to align with applicable rules and regulations. *See* Securities Exchange Act Release No. 101792 (Dec. 2, 2024), 89 FR 97127 (Dec. 6, 2024) (File No. SR–OCC–2024–015).

[145] *See* Petition, at 16. One commenter states that the Delegated Order relied on high-level data provided by OCC explaining that its top 10 clearing members would, on average, experience a 1.28% increase in their Clearing Fund contributions. Schwab II, at 11.

[146] *See* Opposition, at 17–18. Another commenter recommends that the Commission should ''[r]equire OCC to provide a comprehensive economic analysis of the proposed changes, including stress test results, estimated impact on clearing fund sizing by business model, differentiated risk analysis for retail vs. institutional activity, and assessment of alternative approaches.'' ASA Letter, at 2.

[147] *See* Opposition, at 17–18.

[148] *See* Opposition, at 10 (''During the comment period, OCC also communicated to clearing members that data reflecting firm-specific impacts to Clearing Fund requirements could be provided 'upon request.'''); Schwab II, at 10 (''It was not until OCC provided more comprehensive impact data in November 2025 that Schwab understood the full impact of the Proposed Rule Change.'').

[149] *See* Exhibit 3 to SR–OCC–2025–018.

[150] *See generally* OCC III. As part of submitting OCC III, OCC also provided to the Commission confidential data underlying summary statements made in its public comment letter dated June 17, 2026.

[154] *See* underlying impact data submitted confidentially alongside OCC III.

[155] Petitioner does not object to adopting a new authority allowing OCC to hold allocation weights constant month-over-month during periods of heightened market volatility. *See* Petition, at 6 n. 2. *See also* Opposition, at 9 n.3.

[156] *See* Delegated Order, 90 FR at 58355.

[157] 17 CFR 240.17ad–22(e)(2).

sufficient financial resources and robust operational capacity to meet obligations arising from participation in the clearing agency.[158]

OCC manages its credit exposures, in part, through the resources held in its Clearing Fund. Such resources are sized to address stress losses in excess of margin; however, the current allocation methodology does not consider the extent to which a member poses risk to OCC that exceeds its potential margin contributions. As a requirement of participation, each Clearing Member is required to contribute financial resources to fund the Clearing Fund. The methodology for allocating such contributions is not currently aligned with the methodology for setting the size of the Clearing Fund itself. As described above, OCC proposed to revise its allocation methodology to align the weighting of variables and lookback period more closely with OCC's methodology for sizing the Clearing Fund. As a result, the proposed changes would more closely align a member's financial obligations to OCC with the credit risk the member poses without entirely removing consideration of other factors. To address the possibility that the proposed weighting methodology could cause an inappropriate allocation of requirements due to persistent, high volatility, the Proposed Rule Change would authorize OCC to hold allocation requirements constant month-over-month where doing so would be in furtherance of the integrity of OCC and the stability of the financial system, and take into consideration the legitimate interests of Clearing Members and market participants. These changes would further align Clearing Members' obligations with the exposures such members pose to OCC while also providing flexibility to respond to extreme market volatility. Such alignment is consistent with Rule 17ad–22(e)(18)(ii) because it would help ensure that Clearing Fund contribution requirements, which are a requirement for participation in OCC, are risk-based and objective.

Accordingly, the Proposed Rule Change is consistent with Rule 17ad–22(e)(18)(ii) under the Exchange Act.[159]

IV. Conclusion

For the foregoing reasons, the Commission finds that the Proposed Rule Change is consistent with the Act and the rules and regulations thereunder applicable to a national securities association.

It is therefore ordered, pursuant to Rule 431 of the Commission's Rules of Practice, that the earlier action taken by delegated authority, Exchange Act Release No. 104359 (Dec. 11, 2025), 90 FR 58352 (Dec. 16, 2025), is set aside and, pursuant to Section 19(b)(2) of the Act, the Proposed Rule Change (SR–OCC–2025–018), as modified by Amendment No. 1, hereby is approved.

By the Commission.

Sherry R. Haywood,

Assistant Secretary.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #21930 and #21931; CONNECTICUT Disaster Number CT–20004]

Administrative Declaration of a Disaster for the State of Connecticut

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is notice of an Administrative declaration of a disaster for the state of Connecticut dated October 2, 2026.

Incident: Severe Storms and Flash Flooding.

DATES: Issued on October 2, 2026.

Incident Period: September 13, 2026.

Physical Loan Application Deadline Date: December 1, 2026.

Economic Injury (EIDL) Loan Application Deadline Date: July 2, 2027.

ADDRESSES: *Visit the MySBA Loan Portal at https://lending.sba.gov* to apply for a disaster assistance loan.

FOR FURTHER INFORMATION CONTACT: Shaquille Lewis, Office of Disaster Recovery, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given as a result of the Administrator's disaster declaration, applications for disaster loans may be submitted online using the MySBA Loan Portal *https://lending.sba.gov* or in person at other locally announced locations. For further assistance please contact the SBA disaster assistance customer service center by email at *disastercustomerservice@sba.gov* or by phone at 1–800–659–2955. If you are deaf, hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

The following areas have been determined to be adversely affected by the disaster:

Primary County: Fairfield.

Contiguous Counties:

Connecticut: Litchfield, New Haven.

New York: Dutchess, Nassau, Putnam, Suffolk, Westchester.

The Interest Rates are:

	Percent
For Physical Damage:	
Homeowners with Credit Available Elsewhere	6.000
Homeowners without Credit Available Elsewhere	3.000
Businesses with Credit Available Elsewhere	8.000
Businesses without Credit Available Elsewhere	4.000
Private Non-Profit Organizations with Credit Available Elsewhere	3.625
Private Non-Profit Organizations without Credit Available Elsewhere	3.625
For Economic Injury:	
Business and Small Agricultural Cooperatives without Credit Available Elsewhere	4.000
Private Non-Profit Organizations without Credit Available Elsewhere	3.625

The number assigned to this disaster for physical damage is 219306 and for economic injury is 219310.

(Catalog of Federal Domestic Assistance Number 59008)

(Authority: 13 CFR 123.3(b).)

James Stallings,

Associate Administrator, Office of Disaster Recovery.

[FR Doc. 2026–20472 Filed 10–5–26; 8:45 am]

BILLING CODE 8026–09–P

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #21929; OREGON Disaster Number OR–20031 Declaration of Economic Injury]

Administrative Declaration of an Economic Injury Disaster for the State of Oregon

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is notice of an Economic Injury Disaster Loan (EIDL) declaration for the state of Oregon dated October 1, 2026.

Incident: Mid-July Severe Storms and Wildfires.

DATES: Issued on October 1, 2026.

Incident Period: July 15, 2026 through August 24, 2026.

Economic Injury (EIDL) Loan Application Deadline Date: July 1, 2027.

ADDRESSES: Visit the MySBA Loan Portal at *https://lending.sba.gov* to apply for a disaster assistance loan.

FOR FURTHER INFORMATION CONTACT: Shaquille Lewis, Office of Disaster Recovery, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given as a result of the Administrator's EIDL declaration, applications for disaster loans may be submitted online using the MySBA Loan Portal *https://lending.sba.gov* or in person at other locally announced locations. For further assistance please contact the SBA disaster assistance customer service center by email at *disastercustomerservice@sba.gov* or by phone at 1–800–659–2955. If you are deaf, hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties: Baker, Clackamas, Deschutes, Grant, Umatilla, Wallowa, Wasco, Wheeler.

Contiguous Counties:

Oregon: Crook, Gilliam, Harney, Hood River, Jefferson, Klamath, Lake, Lane, Linn, Malheur, Marion, Morrow, Multnomah, Sherman, Union, Washington, Yamhill.

Idaho: Adams, Idaho, Nez Perce, Washington.

Washington: Asotin, Benton, Columbia, Garfield, Klickitat, Walla Walla.

The Interest Rates are:

	Percent
Business and Small Agricultural Cooperatives without Credit Available Elsewhere	4.000
Private Non-Profit Organizations without Credit Available Elsewhere	3.625

The number assigned to this disaster for economic injury is 219290.

(Catalog of Federal Domestic Assistance Number 59008)

(Authority: 13 CFR 123.3(b).)

James Stallings,

Associate Administrator, Office of Disaster Recovery.

[FR Doc. 2026–20399 Filed 10–5–26; 8:45 am]

BILLING CODE 8026–09–P

SURFACE TRANSPORTATION BOARD

60-Day Notice of Intent To Seek Extension of Approval: Petitions for Declaratory Order and Petitions for Relief Not Otherwise Specified

AGENCY: Surface Transportation Board.

ACTION: Notice and request for comments.

SUMMARY: As required by the Paperwork Reduction Act of 1995 (PRA), the Surface Transportation Board (STB or Board) gives notice of its intent to seek approval from the Office of Management and Budget (OMB) for extensions of the collections regarding petitions for declaratory order and petitions for relief not otherwise specified, as described below.

DATES: Comments on these information collections should be submitted by December 7, 2026.

ADDRESSES: Direct all comments to Chris Oehrle, Surface Transportation Board, 395 E Street SW, Washington, DC 20423–0001, or to *PRA@stb.gov.* When submitting comments, please refer to ''Paperwork Reduction Act Comments, Petitions for Declaratory Orders and Petitions for Relief Not Otherwise Specified.'' For further information regarding this collection, contact Mike Higgins at (866) 254–1792 (toll-free) or 202–245–0238, or by emailing *rcpa@stb.gov.* Assistance for the hearing impaired is available through the Federal Information Relay Service (FIRS) at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: For each collection, comments are requested concerning: (1) the accuracy of the Board's burden estimates; (2) ways to enhance the quality, utility, and clarity of the information collected; (3) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology, when appropriate; and (4) whether the collection of information is necessary for the proper performance of the functions of the Board, including whether the collection has practical utility. Submitted comments will be summarized and included in the Board's request for OMB approval.

Description of Collections

Collection Number 1

Title: Petitions for declaratory order.
OMB Control Number: 2140–0031.
STB Form Number: None.
Type of Review: Extension without change.
Respondents: Affected shippers, railroads, communities, and other stakeholders that choose to seek a declaratory order from the Board to terminate a controversy or remove uncertainty.
Number of Respondents: Approximately seven (based on the average number of petitioners filing during 2023–2025).
Estimated Time per Response: 180 hours.
Frequency: On occasion. In calendar years 2023–2025, approximately seven petitions for declaratory order were filed with the Board per year.
Total Burden Hours (annually including all respondents): 1,260 hours (estimated hours per petition (180) × total number of petitions (7)).
Total ''Non-hour Burden'' Cost: None identified. Filings are submitted electronically to the Board.
Needs and Uses: Under 5 U.S.C. 554(e) and 49 U.S.C. 1321, the Board may issue a declaratory order to terminate a controversy or remove uncertainty. Because petitions for declaratory order can encompass a broad range of issues and types of requests, the Board does not prescribe specific instructions for their filing. The collection by the Board regarding petitions for declaratory order that parties choose to file enables the Board to meet its statutory duty to regulate the rail industry.

Collection Number 2

Title: Petitions for relief not otherwise provided.
OMB Control Number: 2140–0030.
STB Form Number: None.
Type of Review: Extension without change.
Respondents: Affected shippers, railroads, communities, and other stakeholders that seek to address issues under the Board's jurisdiction that are not otherwise specifically provided for under the Board's other regulatory provisions.
Number of Respondents: Approximately five (based on the average number of petitioners filing during 2023–2025).
Estimated Time per Response: 25 hours.
Frequency: On occasion. In calendar years 2023–2025, approximately six petitions of this type were filed with the Board per year.
Total Burden Hours (annually including all respondents): 150 hours (estimated hours per petition (25) × total number of petitions (6)).
Total ''Non-hour Burden'' Cost: None identified. Filings are submitted electronically to the Board.
Needs and Uses: Under 49 U.S.C. 1321 and 49 CFR part 1117 (the Board's

catch-all petition provision), shippers, railroads, and the public in general may seek relief (such as waiver of the Board's regulations) not otherwise specifically provided for under the Board's other regulatory provisions. Under section 1117.1, such petitions should contain three items: (a) a short, plain statement of jurisdiction, (b) a short, plain statement of petitioner's claim, and (c) request for relief. The collection by the Board of these petitions that parties choose to file enables the Board to more fully meet its statutory duty to regulate the rail industry.

The Board makes this submission because, under the PRA, a federal agency that conducts or sponsors a collection of information must display a currently valid OMB control number. A collection of information, which is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c), includes agency requirements that persons submit reports, keep records, or provide information to the agency, third parties, or the public. Under 44 U.S.C. 3506(c)(2)(A), federal agencies are required to provide, prior to an agency's submitting a collection to OMB for approval, a 60-day notice and comment period through publication in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information.

Dated: October 2, 2026.

Stefan Rice,

Clearance Clerk.

[FR Doc. 2026–20455 Filed 10–5–26; 8:45 am]

BILLING CODE 4915–01–P

SURFACE TRANSPORTATION BOARD

60-Day Notice of Intent To Seek Extension of Approval: Classification Index Survey Form

AGENCY: Surface Transportation Board.

ACTION: Notice and request for comments.

SUMMARY: As required by the Paperwork Reduction Act of 1995 (PRA), the Surface Transportation Board (STB or Board) gives notice of its intent to seek approval from the Office of Management and Budget (OMB) for extensions of the collection of a Classification Index Survey Form, as described below.

DATES: Comments on this information collection should be submitted by December 7, 2026.

ADDRESSES: Direct all comments to Chris Oehrle, Surface Transportation Board, 395 E Street SW, Washington, DC 20423–0001, or to *PRA@stb.gov.* When submitting comments, please refer to ''Paperwork Reduction Act Comments, Classification Index Survey Form.'' For further information regarding this collection, contact Pedro Ramirez at (202) 245–0333 or *pedro.ramirez@stb.gov.* Assistance for the hearing impaired is available through the Federal Relay Service at (800) 877–8339.

SUPPLEMENTARY INFORMATION: Comments are requested concerning: (1) the accuracy of the Board's burden estimates; (2) ways to enhance the quality, utility, and clarity of the information collected; (3) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology, when appropriate; and (4) whether the collection of information is necessary for the proper performance of the functions of the Board, including whether the collection has practical utility. Submitted comments will be summarized and included in the Board's request for OMB approval.

Subjects: In this notice, the Board is requesting comments on the following information collection:

Description of Collection

Title: Classification Index Survey Form.

OMB Control Number: 2140–0043.

Form Number: Classification Index Survey Form.

Type of Review: Extension without change.

Respondents: All railroad companies not required to file an Annual Report (Form R–1).

Number of Respondents: One per year (based on an average of filings 2023–2025).

Estimated Time per Response: Approximately 24 hours. This estimate includes time spent reviewing instructions; searching existing data sources; gathering and maintaining the data needed; completing and reviewing the collection of information; and converting the data from the carrier's individual accounting system.

Frequency of Response: On occasion.

Total Annual Hour Burden: 24 hours annually.

Total Annual ''Non-Hour Burden'' Cost: The Classification Index Survey Form may be submitted electronically without non-hourly costs.

Needs and Uses: Railroads are classified by size into groups of large, medium, and small carriers. The Board must determine the classification of each rail carrier as a Class I, Class II, or Class III railroad. Railroads with a Class I classification (large railroads) must file Annual Reports (Form R–1) under 49 U.S.C. 11145. See OMB Control Number 2140–0009 (Class I Railroad Annual Reports). These reports are used by the Board, other Federal agencies, and industry groups to monitor and assess railroad industry growth, financial stability, traffic, and operations, and to identify industry changes that may affect national transportation policy. All other railroads (those not required to file an (R–1) Annual Report) shall annually compute their adjusted revenues using the ''railroad revenue deflator formula,'' and, if the computation derived from that formula indicates a change in a carrier's classification, that carrier must submit a ''Classification Index Survey Form'' to the Board pursuant to 49 CFR 1201 General Instructions 1–1 and § 1241.15.

Under the PRA, a federal agency that conducts or sponsors a collection of information must display a currently valid OMB control number. A collection of information, which is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c), includes agency requirements that persons submit reports, keep records, or provide information to the agency, third parties, or the public. Under 44 U.S.C. 3506(c)(2)(A), federal agencies are required to provide, prior to an agency's submitting a collection to OMB for approval, a 60-day notice and comment period through publication in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information.

Dated: October 2, 2026.

Stefan Rice,

Clearance Clerk.

[FR Doc. 2026–20456 Filed 10–5–26; 8:45 am]

BILLING CODE 4915–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA–2026–3172]

Agency Information Collection Activities: Requests for Comments; Clearance of a New Approval of Information Collection: Federal Aviation Administration (FAA) Surface Weather Status Dashboard

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB)

approval for a new information collection. The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on May 11, 2026. The collection involves voluntarily reporting when National Airspace System (NAS) surface weather systems (AWOS and ASOS) experience operational issues, such as erroneous data or full outages. The information to be collected will be used to verify and track these errors and outages, and publish the status onto the FAA's Surface Weather Status Dashboard for user awareness.

DATES: Written comments should be submitted by November 5, 2026.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Joel Siegel by email at: *joel.m.siegel@faa.gov;* phone: 405–954–4341.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information.

OMB Control Number: 2120–XXXX.

Title: Federal Aviation Administration (FAA) Surface Weather Status Dashboard.

Form Numbers: Report a Problem Webform.

Type of Review: New Information Collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on May 11, 2026 (91 FR 25753). The FAA's Air Traffic Organization plans to host the Congressionally mandated Surface Weather Status Dashboard as part of the existing FAA Weather Cameras website. As part of this dashboard, the FAA plans to offer the ability for National Airspace System (NAS) users (*e.g.,* pilots, meteorologists, members of the public) to voluntarily submit information regarding any safety issues (*e.g.,* outages, erroneous data) with surface weather stations.

It is anticipated that the information collected will be used after verification to create reports that will trigger trouble tickets within the FAA's Remote Monitoring and Logging System (RMLS) for corrective action to be taken by the responsible parties, such as technicians within the FAA, NOAA, and non-federal entities. Once the trouble ticket is logged, the FAA's Aviation Weather Cameras website will capture and display the real-time service status of all automated surface observation systems/automated weather observing systems within 30 minutes.

As the information collected will be system site specific, the FAA may use the information collected from this form to update future policy decisions regarding surface weather infrastructure, for approvals and audits. FAA's NAS Security and Enterprise Operations (NASEO) will retain control over the information collected and safeguard it from improper access, modification, and destruction, consistent with FAA standards for confidentiality, privacy, and electronic information.

Respondents: Anyone may use the publicly available webform via the FAA Aviation Weather Cameras website. There is no limit on the number of responses.

Frequency: N/A.

Estimated Average Burden per Response: 1 minute.

Estimated Total Annual Burden: Respondents may submit webforms for multiple sites with issues. The annual burden per respondent per submission is one minute. Estimate around 1,825 responses per year equating to 1,825 minutes of total burden to the public per year.

Issued in Oklahoma City, OK, on October 1, 2026.

Jeremy Traylor,

Manager, National Airway Systems Engineering Group, Weather Systems Team, AJW–141.

[FR Doc. 2026–20483 Filed 10–5–26; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2026–2081]

Agency Information Collection Activities; New Information Collection: Hours of Service of Drivers: Pilot Program To Allow Commercial Drivers To Pause Their 14-Hour Driving Window

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FMCSA announces its plan to submit the Information Collection Request (ICR) described below to the Office of Management and Budget (OMB) for review and approval and invites public comment. This notice invites comments on a proposed information collection titled *Hours of Service of Drivers: Pilot Program to Allow Commercial Drivers to Pause Their 14-Hour Driving Window.* This research study will collect data on commercial motor vehicle (CMV) drivers to examine if extending the 14-hour ''driving window'' with up to 3 hours of off duty, sleeper berth, or on-duty/not driving time (provided it is taken at the location of cargo delivery or pickup) improves the working conditions and quality of life of America's truck drivers and result in an equivalent or greater level of safety relative to operations under the current regulations. Approximately 256 CMV drivers will provide data in the study. The study will provide FMCSA with data to examine driver fatigue and driving performance while operating under current hours of service (HOS) regulations and while operating under split duty period (SDP) exemptions.

DATES: Comments on this notice must be received on or before December 7, 2026.

ADDRESSES: You may submit comments identified by Docket Number FMCSA–2026–2081 using any of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Mail:* Dockets Operations; U.S. Department of Transportation, 1200 New Jersey Avenue SE, W58–213, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* Dockets Operations, U.S. Department of Transportation, 1200 New Jersey

Avenue SE, W58–213, Washington, DC 20590–0001 between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

- *Fax:* (202) 493–2251.

To avoid duplication, please use only one of these four methods. See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: Samuel White, Research Division, DOT, FMCSA, 1200 New Jersey Avenue SE, West Building, 6th Floor, Washington, DC 20590–0001; 202–366–3068; *Samuel.White@dot.gov.*

SUPPLEMENTARY INFORMATION:

Instructions

All submissions must include the Agency name and docket number. For detailed instructions on submitting comments, see the Public Participation heading below. Note that all comments received will be posted without change to *https://www.regulations.gov,* including any personal information provided. Please see the Privacy Act heading below.

Public Participation and Request for Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2026–2081), indicate the specific section of this document to which your comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to *https://www.regulations.gov/docket/FMCSA-2026-2081/document,* click on this notice, click ''Comment,'' and type your comment into the text box on the following screen.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing.

FMCSA will consider all comments and material received during the comment period.

Privacy Act

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its regulatory process. DOT posts these comments, including any personal information the commenter provides, to *www.regulations.gov* as described in the system of records notice DOT/ALL 14 (Federal Docket Management System (FDMS)), which can be reviewed at *https://www.transportation.gov/individuals/privacy/privacy-act-system-records-notices.* The comments are posted without edits and are searchable by the name of the submitter.

Background

HOS is a high-priority topic for FMCSA. Addressing driver fatigue, which is a serious safety concern for our nation's truck drivers and those who share the road with them, is at the heart of HOS regulations. Previous research has shown that driver fatigue is associated with an increased risk of being involved in a safety-critical event and may be involved in over 30 percent of fatal CMV crashes. As a result, HOS regulations are designed to limit the number of driving hours within a 24-hour period and across a 7- or 8-day window.

Under 49 CFR 395.3(a)(2), a driver of a property-carrying CMV may drive only during a period of 14 consecutive hours after coming on duty following 10 consecutive hours off duty. The driver may not drive after the end of the 14-consecutive-hour period without first taking 10 consecutive hours off duty or in the sleeper berth (including the option to take the ''equivalent of at least 10 consecutive hours off-duty'' as referenced in § 395.1(g)(1)(i)(E)).

On August 22, 2019, FMCSA published a notice of proposed rulemaking (NPRM) concerning drivers' HOS which proposed certain amendments to provide greater flexibility for drivers, without adversely affecting safety (84 FR 44190). As part of that rulemaking, FMCSA proposed that a single off-duty period of between 30 minutes and 3 consecutive hours could be excluded from the 14-hour ''driving window,'' provided the driver complies with the existing requirement to take 10 consecutive hours off-duty before beginning driving. The Agency explained that a single pause of up to 3 hours would provide significantly more flexibility than was allowed under the current rules. The pause would have allowed drivers to take an off-duty break without concern of exhausting their available hours under the 14-hour ''driving window.'' This would also have allowed them to get additional rest or avoid traffic congestion.

After reviewing the public comments to the NPRM, the Agency decided not to include the pause to the 14-hour ''driving window'' in the final rule (85 FR 33396, June 1, 2020). Although FMCSA explained that it continued to believe that an opportunity for a single off-duty pause in the 14-hour ''driving window'' would provide flexibility for drivers without compromising safety, many commenters believed that drivers would be pressured by carriers, shippers, or receivers to use the break for reasons other than accommodating their own rest or schedule. These comments suggested that the pause could have unintended consequences that were not adequately evaluated in the development of the NPRM.

To further evaluate the outcomes of a split duty period, the Agency later proposed a pilot program which would have examined the level of safety of extending the 14-hour ''driving window'' after a 30-minute to 3-hour off-duty period (85 FR 55061, Sept. 3, 2020). Due to changes in programmatic priorities over time, FMCSA ultimately did not initiate the pilot program. Since then, drivers have continued to encounter various scenarios in which they might have benefited from the flexibility to extend the 14-hour ''driving window,'' including encountering unreasonably long periods of ''detention time'' when waiting to load or unload. The previously proposed pilot program, however, would not have allowed on-duty time of any type to count toward a ''pause,'' even if that program had been completed.

As such, this study will assess the safety and performance impacts of additional flexibility for CMV drivers to pause their 14-hour driving window. Specifically, the study will collect multiple sources of data to examine driver fatigue and driving performance while operating under current HOS regulations and while operating under SDP exemptions.

The study includes data collection via pre- and post-study surveys, psychomotor vigilance tests, subjective sleepiness ratings, a wrist actigraphy device, drivers' record of duty status (RODS), and a non-intrusive telematics device. These data will provide information on drivers' schedules, the use of SDP exemptions, fatigue, and driving performance. This information will allow FMCSA to assess whether additional flexibility in how drivers may pause their 14-hour driving window achieves a level of safety equivalent to that which would be achieved absent the regulatory relief. After agreeing to participate in the study, drivers will participate in the study for 16 weeks.

Eligibility to participate will be based on carrier and driver safety records. A

motor carrier's participation in the pilot program shall be contingent upon the carrier meeting the following eligibility criteria:

1. Must have applicable interstate operating authority and registration;
2. Must have the minimum levels of financial responsibility under 49 CFR part 387, if applicable;
3. Must not be a high or moderate risk carrier, as defined in the Agency's **Federal Register** notice titled ''Notification of Changes to the Definition of a High-Risk Motor Carrier and Associated Investigation Procedures'' (81 FR 11875, Mar. 7, 2016);
4. Must not have a ''Unsatisfactory'' safety rating;
5. Must not have any FMCSA enforcement actions within the past 3 years;
6. Must not have a driver out of service (OOS) rate above the National average; and
7. Must not have a vehicle OOS rate above the National average.

In addition, unpaid civil penalties may be grounds for exclusion from participating in the pilot program.

Further, motor carriers participating in the pilot program would be required to:

- Grant permission for drivers to participate in the pilot program;
- Agree to comply with all pilot program procedures;
- Grant permission for the Virginia Tech Transportation Institute to gather RODS information for each participating driver throughout the study duration; and
- Grant permission for drivers participating in the study to operate under the applicable exemption.

A driver would not be eligible for participation in the pilot program if the driver is identified in FMCSA's Drug and Alcohol Clearinghouse, regardless of whether the driver has completed the return-to-duty process, or during the 2-year period immediately preceding the date of participation, the driver had his or her license suspended, revoked, cancelled, or has been disqualified for a conviction of one of the disqualifying offenses listed in § 383.51. In addition, drivers would be required to:

- Possess a valid commercial driver's license;
- Maintain a valid medical certificate from a healthcare professional on the Agency's National Registry of Certified Medical Examiners while participating in the pilot program;
- Be employed by a motor carrier who has been approved for participation in the pilot program and/or certify as an owner-operator;
- Agree to the release of specific information to FMCSA for purposes of the pilot; and
- Agree to comply with all study procedures, including the use of actigraphs and RODS.

FMCSA would also reserve the right to exclude from participation any driver whom the Agency believes has a safety history incompatible with the interests of the pilot programs.

The study will use a convenience sampling approach, where participating carriers and drivers volunteer to participate. This is expected to attract drivers who are likely to use the exemption, which is key to obtaining sufficient data during the exemption period and maximizing statistical power for analyses. However, the sample of drivers will be drawn from carriers who are representative of the overall distribution of carrier sizes in the population of interstate motor carriers utilizing drivers beyond a 100-mile radius. A total of 256 CMV drivers will participate in this study.

The ''method of comparison'' for the ''safety analysis plan'' will vary depending on the data, but may include *t*-tests, χ^2 tests, other inferential/descriptive statistics, and/or qualitative analyses to include case narratives (*e.g.,* for crash events). To make effective comparisons between drivers operating in compliance with the current regulations and drivers operating under the conditions of the exemption, the study has been structured as a within-subjects research design, which will compare data for the same drivers operating under both conditions.

Title: Hours of Service of Drivers: Pilot Program to Allow Commercial Drivers to Pause Their 14-hour Driving Window.

OMB Control Number: 2126–00XX.

Type of Request: New ICR.

Respondents: CMV drivers.

Estimated Number of Respondents: 256 CMV drivers.

Estimated Time per Response: Varies depending on the task, 16.68 total hours per respondent over 16 weeks.

Expiration Date: This is a new ICR.

Frequency of Response: Daily.

Estimated Total Annual Burden: 4,270.92 hours.

Public comments invited: You are asked to comment on any aspect of this information collection, including: (1) whether the proposed collection is necessary for the performance of FMCSA's functions; (2) the accuracy of the estimated burden; (3) ways for FMCSA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized without reducing the quality of the collected information. The Agency will summarize or include your comments in the request for OMB's clearance of this ICR.

Issued under the authority of 49 CFR 1.87.

Nicole S. Michel,

Acting Associate Administrator, Office of Research and Registration.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2025–0060]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Request for Comment; Assessment of Contextual Driver Monitoring Systems (DMS)

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice and request for comments on a request for approval of a new information collection.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (PRA), this notice announces that the Information Collection Request (ICR) summarized below will be submitted to the Office of Management and Budget (OMB) for review and approval. The ICR describes the nature of the information collection and its expected burden. This document describes a collection of information for which NHTSA intends to seek OMB approval to assess contextual driver monitoring systems (DMS). A **Federal Register** Notice with a 60-day comment period soliciting comments on the following information collection was published on June 10, 2026 (with an administrative correction published June 18, 2026).

DATES: Comments must be submitted on or before November 5, 2026.

ADDRESSES: Written comments and recommendations for the proposed information collection, including suggestions for reducing burden, should be submitted to the Office of Management and Budget at *www.reginfo.gov/public/do/PRAMain.* To find this particular information collection, select ''Currently under Review—Open for Public Comment'' or use the search function.

FOR FURTHER INFORMATION CONTACT: For additional information or access to background documents, contact Jeffrey

Dressel, Office of Vehicle Safety Research, Human Factors/Engineering Integration Division NSR–310, West Building, U.S. Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590; (202) 366–7409; *jeffrey.dressel@dot.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501 *et seq.*), a Federal agency must receive approval from the Office of Management and Budget (OMB) before it collects certain information from the public and a person is not required to respond to a collection of information by a Federal agency unless the collection displays a valid OMB control number. In compliance with these requirements, this notice announces that the following information collection request will be submitted OMB.

Title: Assessment of Contextual Driver Monitoring Systems (DMS).

OMB Control Number: New.

Form Number(s): There are multiple forms for this new information collection including:

- NHTSA Form 2235—Advertisement
- NHTSA Form 2243—Eligibility Questionnaire & Availability Form
- NHTSA Form 2249—Scheduling Form
- NHTSA Form 2236—Appointment Reminder Form
- NHTSA Form 2246—Informed Consent Document
- NHTSA Form 2238—Demographics Questionnaire
- NHTSA Form 2251—Simulator Sickness Questionnaire
- NHTSA Form 2239—Acceptance Questionnaire 1
- NHTSA Form 2240—Acceptance Questionnaire 2
- NHTSA Form 2241—Acceptance Questionnaire 3
- NHTSA Form 2242—Acceptance Questionnaire 4
- NHTSA Form 2237—Debrief & Honorarium Confirmation Form

Type of Request: New information collection.

Type of Review Requested: Regular.

Requested Expiration Date of Approval: Three years from date of approval.

Summary of the Collection of Information: The National Highway Traffic Safety Administration (NHTSA) is proposing a new information collection consisting of a single, one-time experimental research study that involves voluntary participation from members of the public. The purpose of this research is to develop and evaluate a prototype contextual DMS, which fuses data gathered from driver attention (*e.g.,* gaze location), physiological state (*e.g.,* heart rate variability), vehicle kinematics (*e.g.,* lateral lane position) and environmental sensors (*e.g.,* time to collision). The research goals are to examine the efficacy of a contextual DMS with respect to safety-critical events and assess driver response and acceptance. Data collection will occur as needed, and results will be shared with NHTSA for eventual publication in the National Transportation Library for public access. The final report will include a literature review and a supplementary report documenting the down-selection process of candidate DMS systems and scenarios. This information collection is for reporting purposes.

This information collection will be a one-time effort to recruit 48 participants from the public to address NHTSA's research questions on the effectiveness of a contextual DMS. Recruitment will occur via Westat's internal participant database and social media posts, with sex and age balanced among experimental groups. No specific experience is required to participate, but generally, participants must be at least 18 years old, possess a valid driver's license, and drive at least 3000 miles per year. Participation is voluntary and individuals may withdraw at any time. This research will require Westat's institutional review board (IRB) approval.

Participant attrition is acknowledged, and specific measures are being taken to ensure the target sample size is achieved. Participants will complete a series of four drives in a driving simulator using either a contextual or conventional DMS. The conventional DMS will consist of either a research or production-grade DMS model that uses standard practices at classifying driver distraction (*e.g.,* gaze direction, head pose). The contextual DMS will retain all the capabilities of the conventional DMS but will also factor in driver physiological state (*e.g.,* heart rate variability), vehicle handling (*i.e.,* kinematics), and driver interactions with the driving environment (*e.g.,* extended glances towards hazards). While completing the driving scenarios, participants will perform a secondary task in which they recite number strings displayed on an adjacent tablet, mimicking distraction from a smartphone or infotainment system, in order to assess the performance of the DMS during distracting events.

Each of the four drives will be approximately ten minutes in length to allow for sufficient data collection. All drives will consist of typical highway driving environments and speeds.

The first three drives will have one of three safety-relevant events (*i.e.,* events that could cause a crash) occur at randomized drive portions. The last drive will consist of a safety-critical scenario that requires drivers to perform an action (*e.g.,* brake) to avoid a collision, such as a covered-to-revealed road obstruction. The first three drives will be counterbalanced to control for order effects, however due to the potential for significant behavioral changes, the safety-critical scenario will always occur last.

Eligibility screening will be completed through an online questionnaire (NHTSA Form 2243—Eligibility Questionnaire & Availability Form) hosted by Qualtrics, a secure online survey administration platform. Form display and branching logic will ensure respondents see the minimal number of questions required to determine eligibility by ending the questionnaire early if criteria are not met at different points in time. The components include (1) a PRA statement informing participants about the rules governing federally funded research; (2) consent for the eligibility questionnaire and study introduction and description to inform participants about the study and specific data to be collected; (3) eligibility questionnaire to identify participants based on predefined criteria; and (4) contact information for scheduling purposes.

The landing page of the questionnaire will contain a forced response question asking if the respondent is above 18 years old, then (if yes) branching logic will display the consent text that contains the elements necessary for eligibility consent. Participants will provide consent to the online questionnaire when they answer ''yes'' to both the consent and study interest questions. These questions will be set to force response. Respondents who are less than 18 years old, or those who do not give consent to provide responses to the online eligibility questionnaire, or who are not interested in the study will be directed to a message informing them they are not eligible and thanking them for their time. Everyone else will be directed to complete the questionnaire. The questionnaire will ask potential participants about their ability to adhere to study requirements, driving qualifications, and general health history.

If criteria are not met, participants will be directed to a message thanking them for their time and telling them they are not eligible. If criteria are met, participants will be asked to provide their contact information and general availability. They will be informed this

would link their questionnaire responses to their name. If a participant meets study criteria, a researcher will schedule the study session using participant information provided in the eligibility questionnaire and confirmed by a scheduling phone call, where the participant's name, study date and time is recorded as part of recruitment record keeping (NHTSA Form 2249—Scheduling Form), until all slots have been filled. Approximately 24 hours before the participant's study session, NHTSA Form 2236—Appointment Reminder Form will be sent (via email) along with a copy of the informed consent document for their records. This email will also serve to remind participants to abstain from alcohol and recreational substance use (including marijuana) 24 hours before their study session. The email also requests that participants verify they have no current symptoms of illness, do not feel unwell, that they have experienced no changes to their health or mobility since completion of the eligibility questionnaire and to respond to the email confirming their attendance, which will be recorded by researchers as part of recruitment recordkeeping. Note that recruitment record keeping will be kept separate from any data collected during the study to maintain confidentiality.

Participants will be quasi-randomly assigned to complete four simulated driving scenarios using either a conventional or contextual DMS. Researchers will attempt to balance age and sex across groups. All data will be anonymized such that any data linking study data to participant eligibility criteria will be kept separate and secured on Westat systems that are only accessible by the research team. Only participants who complete the study will have their data retained for three years per OMB data storage requirements. All other data will be destroyed after the project period of performance.

Upon arrival at the study location, participants will be greeted and led to a private room where data collection will occur. Researchers will review the participant's driver's license to ensure validity, age and sex for participation eligibility and condition balancing. Participants will then complete NHTSA Form 2246—Informed Consent Document, which will be presented physically for both the participant and researcher to sign. If individuals agree to participate, they will then proceed with the Intake Procedures, completing the NHTSA Form 2238—Demographic Questionnaire on a tablet using Qualtrics. If participants decline to participate, they will be thanked for their interest and escorted out.

The second component of the Intake Procedures consists of driving simulator training to determine if participants can complete study procedures (*i.e.,* no simulator sickness). Participants will be directed to the driving simulator, where a researcher will describe how to operate the driving simulator, and give an overview of the DMS functions and alerts. Participants will receive the same explanation for the DMS functionality regardless of DMS type to enable group comparisons across self-report measures. Next, participants will receive an explanation of the secondary task, called the Numbers Task, which will be displayed on a tablet next to the driving simulator designed to replicate smartphone or infotainment center distraction. Researchers will inform participants that their recitations will be scored for accuracy to encourage consistent engagement with the secondary task while driving. After all procedures have been explained, participants will be instrumented with a physiological sensor suite to capture participant heart rate variability and electrodermal activity. These sensors do not interfere with participant dexterity or mobility.

After the sensors have been secured, participants will complete a 5-minute practice drive to familiarize themselves with vehicle control and secondary tasks. This drive will be similar to the study driving scenarios, including highway setting and speed (*e.g.,* >45 mph). However, no safety events will occur during the practice drive. Participants can request as many practice drives as needed to feel comfortable with the driving simulator. Participants will then complete NHTSA Form 2251—Simulator Sickness Questionnaire (SSQ) to assess any symptoms that developed during the practice drive. If participants are feeling unwell, they will be provided with bottled water and a place to rest until symptoms have passed. The SSQ will be administered to participants following each study drive to continuously monitor participant wellbeing. Participants may stop driving at any point during practice or study drives.

Participants will then complete a series of four driving scenarios, all of which consist of standard highway driving and will take ten minutes to complete as part of Data Collection Activities. These drives are 10 minutes long to ensure adequate distraction data is captured from both DMS. The first three scenarios will not contain a safety-critical scenario due to potential behavioral changes resulting from the near crash and will be counterbalanced to control for order effects. The safety-critical scenario will occur in the final drive (*e.g.,* a covered-to-revealed road obstruction). No other vehicle maneuvers will prevent a crash from occurring. The secondary task will be coordinated with the safety-critical event such that participants will be engaged in the task immediately preceding the safety-critical event to ensure consistency in assessment of the DMS. After each drive, participants will complete NHTSA Form 2239—Acceptance Questionnaire 1, which consists of survey questions focused on the usefulness, annoyance, predictability, timing, and perceived accuracy of the DMS. After all drives have been completed, participants will complete NHTSA Form 2240—Acceptance Questionnaire 2, which asks two questions about the participant's comfort level with being monitored by the DMS and their preference for having such a system in their vehicle (*i.e.,* their acceptance of the DMS). This questionnaire is administered once after all drives to ensure that participants have sufficient exposure to the system, providing more consistent and well-informed feedback regarding their experiences.

Next, participants proceed to System Comparison Activities. To help participants understand the differences between the two DMS types, they will watch four videos, one for each driving scenario, accompanied by explanations highlighting how the systems differ. The DMS will be labeled as System A (conventional DMS) and System B (contextual DMS) to avoid biasing participants. As the contextual DMS is a prototype of a new technology, it is critical to examine how a deeper understanding with its functionality influences participant opinions. After each set of videos (a total of four), participants will complete NHTSA Form 2241—Acceptance Questionnaire 3. The questionnaire will ask participants to rate the systems side-by-side on factors of usefulness, annoyance, predictability, timing, and perception of system accuracy of the system's distraction detection for a total of four repetitions. Participants will watch the videos in the order they experienced the driving scenario. However, the presentation of System A and System B videos will be counterbalanced across drives to control order effects. After all sets of videos have been watched, participants will complete a final survey (NHTSA Form 2242—Acceptance Questionnaire 4) to assess their comfort with DMS

monitoring and their acceptance of the two DMS. They will be asked to indicate their system preference, if they have one.

After the study is completed, participants will complete NHTSA Form 2237—Debrief & Honorarium Confirmation Form where researchers will discuss the purpose of the study and answer any remaining questions. As part of this process, participants will complete a document acknowledging receipt of the honorarium. Participants will receive $120 for completing the study, which is anticipated to last approximately two hours.

Description of the Need for the Information and Proposed Use of the Information: NHTSA's mission is to save lives, prevent injuries, and reduce the economic costs of road traffic crashes through education, research, safety standards, and enforcement activity. As vehicle technologies advance, they have the potential to dramatically reduce the loss of life from roadway crashes. Alternatively, the systems may not reach this potential or could potentially decrease safety when drivers do not understand how to safely interact with the systems or do not understand the capabilities and limitations. This new information request is for a driving simulator study designed to assess a new type of driver monitoring system that uses external sensor data to identify potential hazards, determine driver distraction based on whether they observed the hazard and modify countermeasures based on this joint understanding of driver distraction and the driving environment. The following components will be used to obtain the necessary information to achieve this purpose.

NHTSA Form 2235—Advertisement—This form is necessary to recruit potential participants. This document's content will be published on the contractor's intranet and social media channels, as well as distributed via email to a database of former participants expressing interest in future research. Participants who are interested in participating will be redirected to NHTSA Form 2243—Eligibility Questionnaire & Availability Form to determine eligibility.

NHTSA Form 2243—Eligibility Questionnaire & Availability Form—Determining participant eligibility is critical both for completing the study objectives as well as the health and wellbeing of participants. This process will involve online screening and diverse outreach efforts, such as social media advertisements and intranet postings, to assemble a representative participant pool. At the end of the eligibility questionnaire, participants will also provide their contact information and days of the week and session times they are available to participate so researchers may contact them to schedule their study session.

NHTSA Form 2249—Scheduling Form—The next step in the enrollment process involves calling eligible individuals to schedule their appointment.

NHTSA Form 2236—Appointment Confirmation Form—Sending a reminder email 24 hours before scheduled sessions is a critical step to ensure smooth coordination and minimize participant no-shows. Participants will be asked to confirm their intention to attend their session, which will be noted by researchers. This form will include essential information such as the session time, location, materials to bring, and instructions to confirm their attendance. Additionally, the email provides an opportunity for participants to ask any last-minute questions or inform the research team of scheduling conflicts. This step is designed to reinforce participant preparedness, reduce logistical issues, and enhance overall study efficiency.

NHTSA Form 2246—Informed Consent Document—Obtaining informed consent upon arrival is an essential step to ensure compliance with ethical research standards.

Intake Procedures—The purpose of the intake procedures is to collect important demographic information from participants for reporting purposes. Afterward, participants under driving simulator training to learn how to operate the driving simulator, respond to the secondary task, and to ensure that participants can complete the study drives without experiencing motion sickness.

NHTSA Form 2238—Demographics Questionnaire—Collecting participant demographics is an integral part of communicating sample characteristics and ensuring representativeness and generalizability. Participants will complete an online survey that focuses on only the most important demographic characteristics needed to describe the sample, including age, sex, ethnicity, highest level of education level completed and income. Age and sex are collected a second time to ensure balance among experimental conditions.

Driving Simulator Training—This step is necessary for preparing participants for driving in the simulator. Simulator driving may feel different from regular driving and requires an adjustment period to successfully control the vehicle. *In addition,* participants who experience simulator sickness can withdraw from the study. Before entering the vehicle, participants will receive training on the operation of the vehicle, the DMS, and the secondary task on an adjacent tablet, which is expected to last approximately eight minutes. Participants will then enter the vehicle and receive additional training. Next, participants will complete a 5-minute familiarization drive to practice driving, experience the DMS, and practice completing a secondary task.

NHTSA Form 2251—Simulator Sickness Questionnaire (SSQ)—This form is required to ascertain whether participants feel well enough to continue after the driving simulator training and after each of the four subsequent study drives (administered five times). The SSQ is important to administer after the last drive because some participants may feel motion sickness due to vehicle control or the safety-critical event and would require monitoring from study staff until the symptoms pass.

Data Collection Activities—This process is required because it captures the information necessary to answer NHTSA's research questions regarding acceptance and the valuation of the contextual DMS. It is composed of two subcomponents: study drives, and a DMS acceptance form. Each subcomponent is discussed in greater detail below. The subcomponents of burden can be seen below.

Driving Scenario Test Drives—These driving scenarios will serve as the main source of data collection. Measures will include data gathered from the driving simulator that relate to vehicle control (*e.g.,* standard deviation of lane position, velocity), driver behavior (*e.g.,* gaze location, head and body pose data) gathered from the DMS, and driver physiological data (*e.g.,* electrodermal activity, heart rate variability). Participants will complete four driving scenarios using either a conventional or contextual DMS. All drives mimic standard highway settings and speed. The first three driving scenarios will have non-crash imminent events (*e.g.,* passing vehicles, merging) and will be counterbalanced to control for order effects. The last drive will have a crash-imminent event (*e.g.,* a covered-to-revealed road obstruction). The secondary task will be synchronized with the simulator such that participants will be distracted approaching the hazard to ensure validity of the DMS assessment.

NHTSA Form 2239—Acceptance Questionnaire 1: This questionnaire is critical as it directly answers NHTSA's

research question regarding how a contextual DMS affects driver acceptance of the DMS. The questionnaire will be administered after each study drive and consist of five questions related to the participant's perception of the DMS's usefulness, annoyance, predictability, timing and perceived accuracy.

NHTSA Form 2240—Acceptance Questionnaire 2: This questionnaire is critical as it directly answers NHTSA's research question regarding how a contextual DMS affects driver acceptance of the DMS. Two questions will be collected focusing on the participant's comfort with DMS monitoring and their acceptance of the system. These items were not added to NHTSA Form 2239—Acceptance Questionnaire 1 because these address long term factors which require more experience with the systems before participants can form meaningful conclusions.

System Comparison Activities: This process is required because it contains the information necessary to answer NHTSA's research questions regarding acceptance. It is composed of two subcomponents: a review of conventional and contextual DMS drives and completing a DMS acceptance form. Each subcomponent is discussed in greater detail below.

Review of Conventional and Contextual DMS Drives: Participants watch videos comparing the DMS types across driving scenarios to increase their understanding of how a contextual DMS operates. Driving scenarios will be presented in the same sequence experienced by the participants, while the order of DMS presentation will be counterbalanced to control for order effects. Each video is anticipated to last two minutes covering the lead up to the DMS action or inaction, and the conclusion of the triggering event. Each drive scenario will have two videos, one for the conventional DMS and one for the contextual DMS (referred to as a set of videos). After each set of videos, participants will then complete NHTSA Form 2241—Acceptance Questionnaire 3 before proceeding to the next driving scenario.

NHTSA Form 2241—Acceptance Questionnaire 3: After each video, researchers will ask participants to complete this survey, which consists of rating both types of DMS side-by-side on the factors of interest from NHTSA Form 2239—Acceptance Questionnaire 1.

NHTSA Form 2242—Acceptance Questionnaire 4: After all sets of driving scenario videos have been watched, participants will complete a survey comparing the conventional and contextual DMS in terms of monitoring comfort and acceptance, as well explicating indicating their preference for the conventional or contextual DMS.

NHTSA Form 2237—Debrief & Honorarium Confirmation Form— Debriefing is an essential study component which is designed to gather participant insights and refine study outcomes. Following NHTSA Form 2241—Acceptance Questionnaire 4 completion, participants will engage in a semi-structured debriefing session where the researcher will explain the purpose of the study and participants will provide feedback on the DMS, including usability and their overall study experience. This process allows researchers to identify potential issues, capture subjective perspectives, and gain insights into interface design features (*e.g.,* alerts, warnings), ensuring comprehensive evaluation and improving the quality of study findings. The honorarium confirmation form will be completed after the debrief and is necessary because it ensures that participants are compensated for their time and provides a record of compensation.

60-Day Notice: A **Federal Register** notice with a 60-day comment period soliciting public comments on the following information collection was published on June 10, 2026 (91 FR 35296), with an administrative correction published on June 18, 2026 (91 FR 36946). NHTSA received a total of 11 comments from: Alliance for Automotive Innovation (Auto Innovators), *Responsibility.Org* and the National Alliance to Stop Impaired Driving (NASID), Mitsubishi Electric Automotive America (MEAA), The Insurance Institute for Highway Safety's Highway Loss Data Institute (IIHS HLDI), Consumer Reports (CR), American Trucking Associations (ATA), and comments from five individuals: Juli Patrick, Sean Patrick, Paul Runstrom, Emily Faubion, and Sergio Drosihn. The following excerpts summarize the key points submitted by commenters for NHTSA's consideration; all cited references have been removed for brevity. When applicable, to facilitate a clear mapping of the agency's response to the specific issues raised, the points are numbered to correspond with the numbered responses below.

Auto Innovators stated that the notice did not describe in detail the methods and scenarios to be used in the research, concerns over whether the DMS used would reflect commercially available systems and whether limited exposure to such a system would reflect the efficacy of such systems, and concern with the use of physiological measures and their feasibility of use with in-vehicle systems.

NHTSA thanks Auto Innovators for the feedback on this topic. Regarding the specific points, NHTSA agrees with Auto Innovators about the need to be specific with regard to the construction of the candidate contextual DMS system and associated scenarios. While the 60-day notice provides a high-level summary, these operating parameters will be described in full detail in the research and analysis plan and included in the final report. Specifically, the candidate scenarios (and alerting strategies) are safety-relevant and selected based on conditions where a contextual DMS may offer enhanced safety and performance over a conventional DMS, and part of the system down-selection process involves engaging with industry stakeholders, including original equipment manufacturers (OEMs) and tier-one suppliers, to gather feedback on scenario definitions, alerting approaches, and sensor integration parameters. NHTSA also agrees with Auto Innovators' point regarding the study limitations of a prototype contextual DMS compared to an eventual commercial application and will clearly qualify findings with regard to future generalization of a commercial contextual DMS as appropriate by noting study parameters within the controlled simulated environment.

In addition, NHTSA acknowledges industry perspectives on the practical considerations for use of physiological sensors in mass-market implementation. Physiological measures were referenced to illustrate the broader potential range of inputs that a contextual DMS could incorporate, and within this exploratory research, if they are collected, it will primarily be to better understand participant state and cognitive workload under controlled simulated conditions. To ensure practical feasibility in vehicle environments, physiological sensors that can be integrated directly into touchpoints such as steering wheels or in-cabin radar sensors (*e.g.,* heart rate variability monitors) may be utilized, whereas intrusive setups (*e.g.,* electroencephalography) are not being considered as feasible for implementation in this study. In addition to exploring these measures, the research study incorporates a broad array of primary performance and behavioral metrics, including standard deviation of lane position, glance frequency and duration, eyes-off-road time, response times to safety-critical events, and driver acceptance questionnaires, to evaluate prototype

contextual DMS efficacy. NHTSA agrees that the report will reflect the findings of the exploratory research study, and will make additional efforts to qualify the findings as specific to the prototype DMS and scenarios tested, to list limitations, and to avoid over-generalization of these initial research findings.

Responsibility.Org and NASID provided three comments, summarized here: (1) ''Consider the Impact of Significant Implementation Differences in the Proposed Conventional and Contextual DMS Approaches,'' (2) ''Equally Evaluate Potential Safety Benefits Alongside User Acceptance,'' and (3) ''Future Research Should Consider Additional Driver States such as Drowsiness and Impairment.''

NHTSA thanks *Responsibility.Org* and NASID for the compelling comments. Regarding the first comment, NHTSA acknowledges the *Responsibility.Org* and NASID's perspective regarding potential implementation and technological maturity differences, as well as the practical considerations of sensor invasiveness. To be clear, NHTSA is not building a prototype contextual DMS for future commercial implementation; rather, the prototype capability features a production equivalent DMS and driving simulator environment, which is designed to evaluate the core concept of a potential contextual DMS as it pertains to driver acceptance and the potential to yield improved driving performance and safety metrics by gathering and utilizing contextual information from the environment. Because the specific prototype configurations are still in development, the final hardware and software specifications are not fixed yet; however, the research design relies on a common baseline production-grade DMS (currently deployed in the U.S. vehicle fleet) for both conditions to establish a consistent technical foundation. NHTSA recognizes that participant perceptions must be interpreted within the context of a controlled laboratory simulation rather than a commercial deployment and will ensure participants are fully briefed on the exploratory nature of the study, noting that questions surrounding features of the prototype system tested pertain to hypothetical, potential features. With regard to sensor configuration, if included, the intent is to utilize practical, non-intrusive touchpoint-integrated physiological sensors (such as steering wheel monitors) while avoiding intrusive setups like electroencephalography. From the participant's standpoint, the primary and most noticeable difference will center on what and how alerts and warnings are presented, as the research focus is squarely on evaluating these modified alerting strategies rather than evaluating core classification capabilities.

Regarding *Responsibility.Org* and NASID's second comment, NHTSA agrees that assessing safety outcomes alongside user acceptance is critical for understanding the underlying value of contextual intelligence (as described by the commenter). In addition to measuring subjective perceptions of usefulness, annoyance, and acceptance, the research study incorporates a comprehensive array of primary performance and behavioral metrics, such as standard deviation of lane position, glance frequency and duration, eyes-off-road time, response times to safety-critical events, and driver acceptance questionnaires (including trust calibration dynamics), to evaluate prototype contextual DMS efficacy. Furthermore, while NHTSA concurs with the commenter on the fundamental importance of trust in the functional use of a contextual DMS, it notes that recent research indicates there may not always be sufficient discriminant validity between measures of acceptance and trust (Rönkkö & Cho, 2022; [1] Chen, *et al.,* 2023 [2]).

Regarding *Responsibility.Org* and NASID's third comment, NHTSA acknowledges the recommendation to consider broader driver states such as drowsiness, fatigue, medical events, and substance impairment in future efforts.

Mitsubishi Electronic Automotive America, Inc. (MEAA) made multiple comments focused in four topic areas: (1) ''The Necessity and Practical Utility of Information Collection'', (2) ''Accuracy of the Burden Estimate,'' (3) ''Ways to Improve the Quality, Utility and Clarity of Collected Information,'' and (4) ''Ways to Minimize Respondent Burden.''

NHTSA thanks MEAA for their helpful comments. Regarding the first topic, NHTSA acknowledges the commenter's interest in metrics such as sensitivity, false positive rate, ROC/AUC, and reaction time. Because both the conventional and contextual conditions utilize the same underlying camera-based classification architecture, with the contextual DMS primarily modifying alert timing and presentation based on additional inputs, thus, system-level classification performance differences is not an experimental variable. Consequently, the research focus is on evaluating the comparative impact of these modified alerting strategies rather than re-evaluating core algorithmic classification. Where available, manufacturer-reported DMS performance metrics will be included in the final report to provide contextual transparency.

In addition, NHTSA notes that physiological measures are referenced primarily to illustrate the broader range of multi-modal inputs that a conceptual, future-generation contextual DMS could potentially incorporate to gather deeper contextual driver state information. To the extent physiological sensing hardware and software are utilized in the study, they will serve to monitor participant state under controlled simulator conditions rather than validate hardware-level measurement accuracy or establish commercial sensor specifications. Because the primary focus of this study is driving performance and the potential safety benefit of these additional inputs rather than testing a production-ready sensor suite, any collected physiological signals will support the evaluation of relative changes in cognitive workload and driver acceptance.

Regarding MEAA's second topic, NHTSA appreciates the detailed review of the burden calculation assumptions. The figures, rounding for Form 2242, and participant cost accounting will be verified and reconciled in the final package to ensure full consistency across all tables and narrative text, and unrevised placeholders will be corrected.

In response to MEAA's third topic, where available, NHTSA will include manufacturer-reported DMS performance metrics in the final report. To the extent physiological sensing hardware and software are utilized in the study, high-quality research-grade equipment will serve to monitor participant state under controlled simulator conditions rather than validate hardware-level measurement accuracy or establish commercial sensor specifications. When available, the error margin reported by the manufacturer will be included in the final report. Because the primary focus of this research is driving performance and potential safety impact, rather than testing a production-ready sensor suite, any collected physiological signals will support the evaluation of relative changes in cognitive workload.

[2] Chen, Y., Khalid Khan, S., Shiwakoti, N., Stasinopoulos, P., & Aghabayk, K. (2023). Analysis of Australian public acceptance of fully automated vehicles by extending technology acceptance model. *Case Studies on Transport Policy, 14,* 101072. *https://doi.org/10.1016/j.cstp.2023.101072.*

Furthermore, alerts will be constructed in a method designed to enable preemptive DMS alert status, where perceived false alarms will be captured by the acceptance questionnaires.

In addition, the conventional and contextual conditions utilize the same production-grade DMS currently employed in the U.S. vehicle fleet. NHTSA will include the relevant DMS and alerting capabilities described in the final report, alongside a transparent description of the down-selection process, which is focused specifically on driving performance and safety metrics, rather than evaluating different core DMS hardware platforms. NHTSA agrees with the point regarding the scope of comparisons, as this study is designed to assess the differences between a contextual DMS and a conventional DMS rather than validate the importance of DMS relative to vehicles without such systems.

Also, NHTSA agrees with the potential inferential limitation regarding the effects of video comparisons to experiencing the drives. We will take care to construct the videos as closely as possible, but will acknowledge the associated limitations in the final report. While the final research report and aggregated summary metrics will be made publicly available, releasing raw participant datasets directly is not feasible at this stage due to privacy protections, proprietary baseline DMS architecture agreements, and human-subjects data governance restrictions regarding personally identifiable information (PII).

Regarding MEAA's fourth topic, NHTSA agrees that the use of electronic submission is helpful at reducing participant burden. It is anticipated to be the primary form of survey cataloguing from this study. To further minimize burden, NHTSA will limit questionnaires to only those items strictly necessary for the research objectives and will utilize clear pre-briefings and standardized protocols to minimize participant confusion and ensure high data quality.

The Insurance Institute for Highway Safety's Highway Loss Data Institute (IIHS HLDI) provided valuable input summarized into eight topic areas: (1) ''[d]esign the study to test when contextual DMS provides added value,'' (2) ''[d]istinguish sensing from system response,'' (3) [k]eep feedback consistent across conditions,'' (4) ''[c]ollect baseline data before simulated drives,'' (5) ''[f]irstly, evaluate and compare how the DMS solutions identify distraction,'' (6) ''[c]onsider using production systems or collaborating with industry partners,'' (7) ''[a]ccount for prior experience with driver assistance technologies,'' and (8) ''[r]econsider the video-based acceptance evaluation.''

NHTSA thanks IIHS HLDI for their valuable feedback. Regarding the first topic, NHTSA agrees that the proposed numbers task is likely to produce frequent glances away from the roadway, which the conventional DMS is well-suited to capture. However, the primary goal of this empirical research is to examine potential improved safety behavior and acceptance of the contextual DMS. To incorporate this comment, the researchers will consider other tasks that may be more cognitively distracting than visually distracting. It should be noted that a previous commenter recommended the reverse; the researchers will consider the balance of cognitive and visual-manual distraction in the tasks selected for the experiment.

Regarding the second topic, NHTSA agrees with IIHS' point about the importance of alerting strategies.

In response to the third topic, NHTSA clarifies that while the fundamental alert modalities (auditory sounds and visual instrument cluster displays) and content remain identical across both conditions, the timing and escalation methods of the alerts in the prototype contextual DMS used in this experiment may be adapted based on real-time traffic conditions, environmental data, and time-to-collision metrics. Unlike the conventional DMS, which may trigger alerts strictly using standard driver gaze thresholds, vehicle measures, or a mix of both, the prototype contextual DMS will have the capability to preemptively issue or escalate alerts when an imminent traffic hazard is detected or suppress/de-escalate alerts if the driver is already actively attending to the specific roadway threat. This localized adjustment in alert timing and feedback structure serves as the core mechanism being evaluated to determine whether adapting feedback to the driving context improves driver responses to safety-critical scenarios, improves overall driver acceptance as a function of reduced false alarms, and ultimately improves safety.

Regarding the fourth topic, NHTSA agrees with the importance of establishing baseline measures of driving behavior and driver state. To incorporate this comment, baseline measures will be captured in the pre-driving simulations component as part of the quality checks to ensure adequate data quality throughout the session.

With regard to the fifth topic, NHTSA agrees that DMS sensor fusion can introduce additional noise in the model. To ensure that the DMS performance remains the same across integrated sensor systems, the same production-quality DMS will remain unchanged. The alerting strategies are informed and modified by additional simulated driving environment sensors, allowing repeatability. NHTSA currently anticipates physiological data being used for exploratory purposes of workload assessment.

Regarding IIHS HLDI's sixth topic, the proposed prototype DMS is a production-grade system currently available in the U.S. vehicle fleet, with proposed alerting modalities and iconography reflecting common designs. Furthermore, the research will involve outreach to industry stakeholders, providing valuable feedback during the down-selection process to ensure the selected sensors, scenarios, and alerting strategies are feasible and practical.

In response to the seventh topic, NHTSA agrees that controlling for participant prior experience with ADAS is an important study consideration. To incorporate this comment, NHTSA and the researchers amended the eligibility questionnaire to collect data on whether participants have used a system that monitors their attention.

Regarding the eighth topic, NHTSA clarifies that the study design relies primarily on extensive, hands-on driving experience across four distinct simulated drives (three safety-relevant and one safety-critical) before any video-based preference evaluations occur. Participants complete iterative technology acceptance questionnaires (Acceptance Questionnaires 1 and 2) directly following their hands-on driving sessions. The comparative video phase and subsequent questionnaires (Acceptance Questionnaires 3 and 4) are administered *only after* direct operational experience is established, serving solely to help participants articulate nuanced preference tradeoffs between the two specific architectural approaches.

Consumer Reports expressed support for the research and provided valuable feedback, summarized into four topic areas: (1) specificity of the description of the research design, including operational definitions, specific physiological metrics, and baseline conditions, (2) concern with the proposed sample size, a recommendation to conduct a power analysis, and a suggestion to consider prior participants' experience with DMS, (3) a recommendation to consider a visual-manual distraction task as well as a cognitive distraction task, and (4) a recommendation to keep researcher scripts strictly neutral in the video

comparison explanation component of the research, to avoid a potential halo effect or injecting other biases.

In response to Consumer Reports' first topic, NHTSA agrees with Consumer Reports' points regarding variable definitions and characteristics. While the 60-day notice provides a high-level summary, these variables are described in the full research and analysis plan and will be included in the final report. NHTSA agrees with the importance of establishing baseline measures of driving behavior and driver state. This will be captured in the pre-driving simulations component as part of the quality checks to ensure adequate data quality throughout the session.

Regarding the second topic, a power analysis was included in the full research and analysis plan and will be included in the final report. The 2 (between; DMS type) × 4 (within; drive type) returned sufficient statistical power to detect a small effect with a between subjects group size of 24. To further incorporate Consumer Reports' comment, a sensitivity power analysis with more conservative assumptions was performed to seek greater confidence in the adequacy of the planned sample size, and the sample size was confirmed. Regarding Consumer Reports' suggestion to consider prior participants' experience with DMS, a screening question will be added to assess prior experience. This question will be administered during contact information collection for eligible respondents, meaning it will only target a subset of those who complete the screener. Consequently, the addition of this single question is expected to introduce negligible burden to participants.

In response to Consumer Reports' third topic, NHTSA acknowledges the value of evaluating multiple distraction modalities and notes that the proposed numbers task is specifically structured to test visual-manual and cognitive demands by requiring drivers to look away from the road to an adjacent tablet to recite digit sequences. To further incorporate this comment, the researchers will consider incorporating additional tasks that target different distraction modalities, including visual-manual and purely cognitive tasks.

Regarding the fourth topic, NHTSA agrees with Consumer Reports' assessment of the importance of keeping procedures neutral to avoid biasing participants. We will carefully review procedures, scripts, and videos to ensure neutral language, and that there is no favoritism for a particular system.

American Trucking Associations (ATA) provided insightful comments, stating that contextual DMS in the trucking industry has been shown to accommodate drivers' privacy and data capture concerns, as well as demonstrating efficacy in providing context-specific feedback and training opportunities, concluding that it is valuable for NHTSA to study such technologies.

NHTSA thanks ATA for their insights and feedback on this topic.

NHTSA appreciates comments received from the five individuals, as well. Paul Runstrom's comment addressed alcohol impairment detection; NHTSA clarifies that such technologies are not within the scope of this project. Juli Patrick and Sean Patrick both shared concerns about the potential accuracy, false alarm and false positive rates of potential contextual DMS. NHTSA acknowledges and notes those concerns, and while system performance is not the focus of this research, NHTSA anticipates such potential effects to be better understood and empirically addressed by this research. Emily Faubion described concern with unintended consequences of contextual (and non-contextual) DMS potentially altering driver behavior. NHTSA acknowledges and notes those concerns, and expects such effects to be explored and documented by this safety focused research effort. Sergio Drosihn shared a suggestion that DMS may serve a safety function best by assessing driver consciousness, and by doing so using only posture and head position. NHTSA thanks the commenter for his insight and cited research; the concern is noted. Several of the commenters mentioned a concern with privacy, and DMS capability to collect biometric sensitive personally identifiable information. NHTSA thanks the commenters for sharing these concerns; the concerns are noted. In addition, NHTSA clarifies that one metric of interest in this research is driver acceptance of contextual DMS, which may yield results reflecting and documenting such concerns.

After thoughtful consideration of all the above comments, NHTSA ensured that additional sensitivity power analyses were conducted, PRA documentation was aligned, the eligibility form was updated, and cognitive and visual-manual tasks are being considered, among other actions to be taken as mentioned above. These modifications yielded an addition of two hours in the participant burden estimate from that which was published in the 60-day notice, for a total of 134 participant burden hours.

Affected Public: Individuals in the Washington, DC metro area who have opted to receive research-related emails through the contractor's participant database will be contacted. Recruitment efforts will be supplemented by advertisements placed on the contractor's intranet and via social media posts and advertisements. Respondents must meet specific eligibility criteria to be included in this information collection. Respondents must (1) be at least 18 years old, (2) possess a valid driver's license, (3) drive at least 3,000 miles annually, (4) have normal or corrected-to-normal vision, (5) have normal or corrected-to-normal hearing, (6) refrain from alcohol and recreational substance use (*e.g.,* marijuana) for 24 hours before the session, (7) not take sedative or psychotropic medication, (8) not wear bifocal lenses while driving, (9) not require specialized driving equipment, (10) not have medical conditions that might impact their ability to get in and out of vehicles or sit for extended periods of time with intermittent driving, (11) no history of simulator sickness.

Estimated Number of Respondents: The contractor estimates contacting 204 respondents to achieve a final, valid dataset consisting of 48 respondents. Of the 204 respondents anticipated, the contractor anticipates contacting 68 respondents via phone call. Of the 68 respondents contacted, the contractor anticipates nine percent attrition, resulting in 62 scheduled participants; the contractor anticipates an attrition rate of nine percent between scheduling and study session, resulting in 56 participants attending their scheduled session. Some respondents may experience minor simulator sickness and be unable to complete the study, which the contractor estimates at seven percent, resulting in 52 respondents completing the study. Finally, the contractor estimates eight percent of respondent data will be unusable due to data quality problems (*e.g.,* equipment malfunction, non-compliance), resulting in the target dataset of 48 valid respondents.

Frequency: One-time collection.

Estimated Total Annual Burden Hours: The total estimated burden is 134 hours, which can be seen in Table 1 and is the sum of the total opportunity burden hours column. All data collection is estimated to occur within the same year, so the annualized burden equals the total burden.

TABLE 1—BURDEN HOURS

NHTSA form No.	Information collection	Total number of respondents	Estimated burden per response (minutes)	Frequency of response (count)	Total opportunity burden hours
2235	Advertisement	204	1	1	3
2243	Eligibility Questionnaire & Availability Form	204	5	1	17
2249	Scheduling Form	68	5	1	6
2236	Appointment Reminder Form	62	1	1	1
2246	Informed Consent Document	56	3	1	3
2238	Intake Procedures (Demographics Questionnaire, Driving Simulator Training).	56	16	1	15
2251	Simulator Sickness Questionnaire	52	2	5	9
2239	Data Collection Activities (Driving Scenarios Test Drives, Acceptance Questionnaire 1).	52	12	4	43
2240	Acceptance Questionnaire 2	52	1	1	1
2241	System Comparison Activities (Review of Conventional and Contextual DMS Drives; Acceptance Questionnaire 3).	52	8	4	29
2242	Acceptance Questionnaire 4	52	2	1	2
2237	Debrief & Honorarium Confirmation Form	52	6	1	5
Total Burden					134

Estimated Total Annual Burden Cost: Participation is voluntary and there will be no start-up or record-keeping costs to respondents to obtain these data. The only cost burdens respondents will incur are costs related to travel to and from the research location. The costs are minimal and are expected to be offset by the honorarium that will be provided to the research participants. NHTSA estimates that each participant will travel less than 30 miles one-way to the research location (60 miles round trip). Using the IRS standard mileage rate of $0.70 per mile, each respondent is expected to incur no more than $42.00 ($0.70 × 60 miles) in transportation costs. Therefore, estimated travel burden costs are no more than $2,352 ($42.00 × 56 respondents).

Public Comments Invited: You are asked to comment on any aspects of this information collection, including (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Authority—The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; 49 CFR 1.49; and DOT Order 1351.29A.

Cem Hatipoglu,

Associate Administrator, Vehicle Safety Research.

BILLING CODE 4910–59–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2026–2113]

Request for Information: Nationwide Implementation of Prehospital Blood Transfusion

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice; Request for Information (RFI).

SUMMARY: The National Highway Traffic Safety Administration (NHTSA), on behalf of the Federal Interagency Committee on Emergency Medical Services (FICEMS), is seeking comments from all sources (public, private, governmental, academic, professional, public interest groups, and other interested parties) on the nationwide implementation of prehospital blood transfusion. The purpose of this notice is to solicit comments on strategies, barriers, and solutions to advance prehospital blood transfusion capabilities across State, local, tribal, and territorial emergency medical services (EMS) and 911 systems, and to request responses to specific questions provided below. This notice is an information-gathering inquiry and is neither a request for proposals nor an invitation for bids.

DATES: Comments on this announcement must be submitted on or before November 5, 2026.

ADDRESSES: You may submit comments, identified by Docket No. NHTSA–2026–2113, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility, M–30, U.S. Department of Transportation, West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery or Courier:* West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m. Eastern Time, Monday through Friday, except Federal holidays.

Instructions: Regardless of how you submit your comments, you must include the docket number identified in the heading of this document. Note that all comments received, including any personal information provided, will be posted without change to *http://www.regulations.gov.* Please see the Privacy Act heading below.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its decision-making process. DOT posts these comments, without editing, including any personal information the commenter provides, to *http://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *https://www.transportation.gov/privacy.*

Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78).

FOR FURTHER INFORMATION CONTACT: Office of Emergency Medical Services, National Highway Traffic Safety Administration, U.S. Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590; email: *FICEMS@dot.gov.*

SUPPLEMENTARY INFORMATION:

I. Background and Statutory Authority

FICEMS was created (42 U.S.C. 300d–4) by the Secretaries of Transportation, Health and Human Services and Homeland Security to, in part, ensure coordination among the Federal agencies involved with State, local, tribal or regional emergency medical services and 9–1–1 systems. FICEMS has statutory authority to identify State and local Emergency Medical Services (EMS) and 9–1–1 needs, to recommend new or expanded programs and to identify the ways in which Federal agencies can streamline their processes for support of EMS. FICEMS includes representatives from the Department of Defense (DoD) Office of the Assistant Secretary of Defense for Health Affairs, the Department of Health and Human Services (HHS) Office of the Administration for Strategic Preparedness and Response (ASPR), HHS Indian Health Service (IHS), HHS Centers for Disease Control and Prevention (CDC), HHS Health Resources and Services Administration (HRSA), HHS Centers for Medicare and Medicaid Services (CMS), the Department of Homeland Security (DHS) Office of Health Security (OHS), DHS U.S. Fire Administration (USFA), NHTSA, the Federal Communications Commission (FCC) and a State EMS Director appointed by the Secretary of Transportation.

Severe hemorrhage remains a leading cause of preventable death following traumatic injury. To address systemic challenges and improve clinical outcomes nationwide, FICEMS is prioritizing the implementation of prehospital blood transfusion in its strategic planning process. By focusing national efforts on this critical clinical intervention, FICEMS aims to support EMS systems in preventing up to 10,000 deaths annually and achieving a 5% reduction in overall mortality from severe bleeding by 2028.

On June 11, 2025, FICEMS convened a national Prehospital Blood Transfusion Summit in Washington, DC, bringing together nearly 900 in-person and virtual stakeholders across EMS, 911 dispatch, trauma surgery, blood banking, public health, and regulatory entities.

II. Questions Regarding Nationwide Implementation of Prehospital Blood Transfusion

Responses to the following questions are requested. Please provide references as appropriate.

1. What are the current impediments to possible solutions for achieving the following national goals by the end of calendar year 2028?

a. Increasing the number of EMS agencies nationwide with active prehospital blood transfusion programs to 2,028;

b. Providing 911 pre-arrival instructions to 25% of pediatric patients with life-threatening bleeding;

c. Providing 911 pre-arrival instructions to 25% of all patients with life-threatening bleeding;

d. Administering a prehospital blood transfusion to 28% of pediatric patients with life-threatening bleeding;

e. Administering a prehospital blood transfusion to 16% of all patients with life-threatening bleeding;

f. Capturing outcomes data in the National EMS Information System (NEMSIS) for 10% of all children transfused prehospitally;

g. Capturing outcomes data in NEMSIS for 10% of all patients transfused prehospitally;

h. Participation from at least 51 states and territories in the National EMS Licensure Compact; and

i. Establishing 10,000 prehospital pediatric emergency care coordinators (PECCs) across the nation.

2. What role can technology such as Advanced Automatic Crash Notification (AACN) play in improving timely delivery of prehospital blood transfusion to patients injured in crashes?

3. What is the potential role of structured 911 call-taking protocols, including Emergency Medical Dispatch (EMD), in optimizing call processing, dispatch accuracy, and early bystander intervention for patients with life-threatening bleeding?

3. What mechanisms, technical standards, or policy enhancements are needed to advance data integration and linkage across local, State, and national data systems (*e.g.,* NEMSIS, trauma registries) in support of prehospital blood transfusion surveillance and quality measurement?

4. How might improve military and civilian EMS integration advance prehospital blood transfusion practices, logistics, cold-chain management, and clinical training?

5. What improvements and curriculum enhancements are needed within the EMS education and training system to support transfusion medicine, clinical competency, and other innovative prehospital practices?

6. Do you have any additional comments regarding the nationwide implementation of prehospital blood transfusion programs?

Authority: 42 U.S.C. 300d–4; 44 U.S.C. 3506(c)(2)(A); 23 U.S.C. 403(b)(1)(A)(iv); 49 CFR 1.95; 501.8.

Issued in Washington, DC.

Angie Wang,

Acting Associate Administrator, Research and Program Development.

[FR Doc. 2026–20426 Filed 10–5–26; 8:45 am]

BILLING CODE 4910–59–P

DEPARTMENT OF THE TREASURY

Alcohol and Tobacco Tax and Trade Bureau

[Docket No. TTB–2026–0001]

Proposed Information Collections; Comment Request (No. 99)

AGENCY: Alcohol and Tobacco Tax and Trade Bureau (TTB); Treasury.

ACTION: Notice and request for comments.

SUMMARY: As part of our continuing effort to reduce paperwork and respondent burden, and as required by the Paperwork Reduction Act of 1995, we invite comments on the continuing or proposed information collections listed below in this document.

DATES: We must receive your written comments on or before December 7, 2026.

ADDRESSES: You may send comments on the information collections described in this document using one of these two methods:

- *Internet*—To submit comments electronically, use the comment form for this document posted on the ''*Regulations.gov*'' e-rulemaking website at *https://www.regulations.gov* within Docket No. TTB–2026–0001.
- *Mail*—Send comments to the Paperwork Reduction Act Officer, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW, Box 12, Washington, DC 20005.

Please submit separate comments for each specific information collection described in this document. You must reference the information collection's title, form number or recordkeeping requirement number (if any), and OMB control number in your comment.

You may view copies of this document, the relevant TTB forms, and any comments received at *https://www.regulations.gov* within Docket No. TTB–2026–0001. TTB has posted a link to that docket on its website at *https://www.ttb.gov/rrd/information-collection-notices.* You also may obtain paper copies of this document, the listed forms, and any comments received by contacting TTB's Paperwork Reduction Act Officer at the addresses or telephone number shown below.

FOR FURTHER INFORMATION CONTACT: Michael Hoover, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW, Box 12, Washington, DC 20005; 202–453–1039, ext. 135; or complete the Regulations and Rulings Division contact form at *https://www.ttb.gov/contact-rrd.*

SUPPLEMENTARY INFORMATION:

Request for Comments

The Department of the Treasury and its Alcohol and Tobacco Tax and Trade Bureau (TTB), as part of a continuing effort to reduce paperwork and respondent burden, invite the general public and other Federal agencies to comment on the proposed or continuing information collections described below, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Comments submitted in response to this document will be included or summarized in our request for Office of Management and Budget (OMB) approval of the relevant information collection. All comments are part of the public record and subject to disclosure. Please do not include any confidential or inappropriate material in your comments.

We invite comments on: (a) Whether an information collection is necessary for the proper performance of the agency's functions, including whether the information has practical utility; (b) the accuracy of the agency's estimate of the information collection's burden; (c) ways to enhance the quality, utility, and clarity of the information collected; (d) ways to minimize the information collection's burden on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide the requested information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information has a valid OMB control number.

Information Collections Open for Comment

Currently, we are seeking comments on the following forms, letterhead applications or notices, recordkeeping requirements, questionnaires, or surveys:

OMB Control No. 1513–0001

Title: Tax Information Authorization.

TTB Form Number: TTB F 5000.19.

Abstract: In general, the Internal Revenue Code (IRC) at 26 U.S.C. 6103 protects the privacy of taxpayer information by prohibiting the disclosure of tax returns and taxpayer information to unauthorized persons while allowing a taxpayer to authorize a representative to receive otherwise confidential tax information. Under that authority, the Alcohol and Tobacco Tax and Trade Bureau (TTB) requires a taxpayer to file form TTB F 5000.19 to authorize a representative, who does not have the power of attorney, to receive their otherwise confidential tax information. TTB uses the collected information to identify the taxpayer's designated representative and the scope of that representative's authority to obtain their otherwise confidential tax information.

Current Actions: There are no current program changes or adjustments to this information collection at this time, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits; Individuals or households.

Estimated Annual Burden

- *Number of Respondents:* 10.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 10.
- *Average Per-response Burden:* 1 hour.
- *Total Burden:* 10 hours.

OMB Control No. 1513–0003

Title: Referral of Information.

TTB Form Number: TTB F 5000.21.

Abstract: TTB personnel may identify, during investigations or other duties, apparent violations of State and local government laws and regulations, and TTB uses form TTB F 5000.21, Referral of Information, to provide information to such external agencies if disclosure is authorized under 26 U.S.C. 6103 or other Federal laws. This form includes a section for an external agency to respond to TTB regarding its action on the referral. The TTB-requested response from external agencies provides information as to the utility of the referrals and potential enforcement actions taken by those agencies against TTB-regulated entities.

Current Actions: There are no program changes to this information collection at this time, and TTB is submitting it for extension purposes only. As for adjustments, due to changes in agency estimates, TTB is decreasing the estimated number of annual respondents, responses, and total burden hours associated with this collection.

Type of Review: Extension of a currently approved collection.

Affected Public: State, local, and tribal governments.

Estimated Annual Burden

- *Number of Respondents:* 25.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 25.
- *Average Per-response Burden:* 1 hour.
- *Total Burden:* 25 hours.

OMB Control No. 1513–0041

Title: Distilled Spirits Plants—Records and Monthly Reports of Processing Operations.

TTB Form and Recordkeeping Numbers: TTB F 5110.28 and TTB REC 5110/03.

Abstract: The IRC at 26 U.S.C. 5207 requires that distilled spirits plant (DSP) proprietors keep records and submit reports regarding their production, storage, denaturation, and processing operations in as the Secretary of the Treasury (the Secretary) prescribes by regulation. As defined in that section, processing activities include receipt or transfer of alcoholic ingredients used in spirits production, bottling and packaging of distilled spirits, and removal of distilled spirits from the DSP premises. Under that authority, the TTB regulations in 27 CFR part 19 require DSP proprietors to keep certain records related to their processing operations, and based on those records, to submit monthly summary reports of their processing operations using form TTB F 5110.28. TTB uses the collected information to ensure that the relevant tax provisions of the IRC are appropriately applied and to produce generalized distilled spirits statistical reports for release to the public.

Current Actions: There are no program changes to this information collection, and TTB is submitting for extension purposes only. As for adjustments, due to a change in agency estimates resulting from continued growth in the number of DSPs in the United States, TTB is increasing the estimated number of annual respondents, total responses, and burden hours associated with this information collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profits; State and local governments.

Estimated Annual Burden

- *Number of Respondents:* 6,100.
- *Average Responses per Respondent:* 12 (once per month).
- *Number of Responses:* 73,200.
- *Average Per-response Burden:* 2 hours (1 hour recordkeeping and 1 hour reporting).
- *Total Burden:* 146,000 hours.

OMB Control No. 1513–0058

Title: Usual and Customary Business Records Maintained by Brewers.

TTB Recordkeeping Number: TTB REC 5130/1.

Abstract: The IRC at 26 U.S.C. 5415 requires brewers to keep records containing such information as the Secretary prescribes by regulation and make them available for Government inspection, while 26 U.S.C. 5555 requires any person liable for Federal excise tax on alcohol beverages to keep records, make reports, and comply with regulations prescribed by the Secretary. Under those IRC provisions, the TTB regulations in 27 CFR part 25, Beer, require brewers to keep certain usual and customary business records documenting their operations, including production and packaging of beer and other brewery products and inventories, removals, returns, shipments, storage, and transfers of such products. TTB uses the collected information to establish a brewer's excise tax liability and verify tax claims, and verify that beer is produced, packaged, stored, shipped, and transferred in accordance with the relevant Federal laws and regulations.

Current Actions: There are no program changes associated with this information collection, and TTB is submitting it for extension purposes only. As for adjustments, due to changes in agency estimates, TTB is increasing the estimated number of annual respondents and responses to this information collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 15,380.
- *Average Responses per Respondent:* 1 (one) per year.
- *Number of Responses:* 15,380.
- *Average Per-response and Total Burden:* This information collection consists of usual and customary records kept by respondents during the normal course of business, regardless of any regulatory requirement to do so. As such, under the OMB regulations at 5 CFR 1320.3(b)(2), this information collection imposes no additional burden on respondents.

OMB Control No. 1513–0059

Title: Usual and Customary Business Records Relating to Tax-Free Alcohol.

TTB Recordkeeping Number: TTB REC 5150/3.

Abstract: In general, the IRC at 26 U.S.C. 5001 imposes Federal excise tax on distilled spirits produced in or imported into the United States, but, under sections 26 U.S.C. 5214(a)(2) and (a)(3), distilled spirits may be withdrawn free of tax for nonbeverage purposes for use by Federal, State, and local governments, and for use by certain educational organizations and institutions, research laboratories, hospitals, blood banks, sanitariums, and nonprofit clinics, subject to regulations prescribed by the Secretary. In addition, the IRC at 26 U.S.C. 5275 requires persons that procure or use distilled spirits withdrawn free of tax under those sections to keep records and make reports regarding the receipt and use of such spirits as required by regulation. Under that IRC authority, the TTB regulations in 27 CFR part 22 require tax-free alcohol users to maintain certain usual and customary business records regarding the inventory, receipt, and disposition of such alcohol. TTB uses the collected information to account for tax-free spirits and detect their diversion to taxable beverage use.

Current Actions: There are no program changes to this information collection, and TTB is submitting it for extension purposes only. As for adjustments, due to changes in agency estimates, TTB is decreasing the estimated number of annual respondents, responses, and total burden hours associated with this collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 5,050.
- *Average Responses per Respondent:* 1 (one) per year.
- *Number of Responses:* 5,050.
- *Average Per-response and Total Burden:* This information collection consists of usual and customary records kept by respondents during the normal course of business, regardless of any regulatory requirement to do so. As such, under the OMB regulations at 5 CFR 1320.3(b)(2), this information collection imposes no additional burden on respondents.

OMB Control No. 1513–0062

Title: Usual and Customary Business Records Relating to Denatured Spirits.

TTB Recordkeeping Number: TTB REC 5150/1.

Abstract: Denatured distilled spirits, which generally are not subject to Federal excise tax, may be used for industrial purposes in the manufacture of nonbeverage products. To prevent diversion of denatured spirits to taxable beverage use, the IRC at 26 U.S.C. 5271–5275 imposes a system of permits, bonds, recordkeeping, and reporting requirements on persons that procure or use such alcohol and authorize the Secretary to issue regulations regarding those matters. Under those authorities, the TTB regulations in 27 CFR part 20 require industrial alcohol users to keep certain usual and customary business records regarding the procurement, distribution, and use of denatured spirits. To protect the revenue, TTB uses the required records to account for denatured spirits and ensure compliance with statutory and regulatory requirements.

Current Actions: There are no program changes associated with this information collection, and TTB is submitting it for extension purposes only. As for adjustments, due to changes in agency estimates, TTB is increasing the estimated number of annual respondents and responses to this information collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 5,770.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 5,770.
- *Average Per-response and Total Burden:* None. This information collection consists of usual and customary records kept by respondents during the normal course of business,

regardless of any regulatory requirement to do so. As such, under the OMB regulations at 5 CFR 1320.3(b)(2), this information collection imposes no additional burden on respondents.

OMB Control No. 1513–0071

Title: Tobacco Products Importer or Manufacturer—Records of Large Cigar Wholesale Prices.

TTB Recordkeeping Number: TTB REC 5230/1.

Abstract: In general, the IRC at 26 U.S.C. 5701 imposes Federal excise taxes on tobacco products and cigarette papers and tubes, and, as described at 26 U.S.C. 5701(a)(2), the excise tax on large cigars is based on a percentage of the price at which such cigars are sold by the manufacturer or importer. The IRC at 26 U.S.C. 5741 also requires every manufacturer and importer of tobacco products to keep records in such manner as the Secretary prescribes by regulation. Under those authorities, the TTB regulations at 27 CFR 40.187 and 41.181 require that manufacturers and importers of large cigars maintain certain records regarding the price for which those cigars are sold. TTB uses the collected information to verify that the appropriate amount of excise tax is paid on large cigars.

Current Actions: There are no program changes or adjustments associated with this information collection at this time, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 300.
- *Average Responses per Respondent:* 1 (one) per year.
- *Number of Responses:* 300.
- *Average Per-response Burden:* 2.33 hours.
- *Total Burden:* 699 hours.

OMB Control No. 1513–0085

Title: Principal Place of Business Address and Place of Production Coding on Beer and Malt Beverage Labels.

TTB Recordkeeping Number: TTB REC 5130/5.

Abstract: Under the authority of the IRC at 26 U.S.C. 5412 and the Federal Alcohol Administration Act (FAA Act) at 27 U.S.C. 205(e), the TTB regulations require consumer containers of beer to be marked with the name and address of the brewer. In the case of multi-plant brewers, the TTB regulations in 27 CFR parts 7 and 25 allow such brewers to label beer containers with their principal place of business, provided that the brewer also places a code on each beer container indicating its actual place of production. This option allows multi-plant brewers to use identical labels at all their breweries. The labeling of beer containers with the producer's name and place of production is a usual and customary business practice undertaken by brewers to identify their products to consumers and facilitate recall of adulterated products. In addition, TTB uses the required information to verify tax refund claims for the loss or destruction of beer.

Current Actions: There are no program changes associated with this information collection, and TTB is submitting it for extension purposes only. As for adjustments, TTB is decreasing the estimated number of annual respondents to this information collection but is increasing its number of annual responses and its average number of responses per respondent.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 1,280.
- *Average Responses per Respondent:* 2.4.
- *Number of Responses:* 3,072.
- *Average Per-response and Total Burden:* None. This information collection consists of usual and customary labeling practices undertaken by respondents during the normal course of business, regardless of any regulatory requirement to do so. As such, under the OMB regulations at 5 CFR 1320.3(b)(2), this information collection imposes no additional burden on respondents.

OMB Control No. 1513–0086

Title: Marks on Brewery Equipment and Structures (TTB REC 5130/3), and Marks and Labels on Containers of Beer (TTB REC 5130/4).

TTB Recordkeeping Numbers: TTB REC 5130/3 and TTB REC 5130/4.

Abstract: Under the authority of chapter 51 of the IRC, the TTB regulations in 27 CFR part 25 require brewers to place certain marks, signs, and measuring devices on their equipment and structures, and to place certain brands, labels, and marks on bulk and consumer containers of beer and other brewery products. The required information identifies the use, capacity, and contents of brewery equipment and structures, as well as taxable brewery products and the responsible taxpayer. TTB uses the required information to ensure effective administration of the IRC's provisions regarding brewery operations and products.

Current Actions: There are no program changes associated with this information collection, and TTB is submitting it for extension purposes only. As for adjustments, due to changes in agency estimates, TTB is increasing the estimated number of annual respondents and responses to this information collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 15,380.
- *Average Responses per Respondent:* 1 (one) per year.
- *Number of Responses:* 15,380.
- *Average Per-response and Total Burden:* This information collection consists of usual and customary records kept by respondents during the normal course of business, regardless of any regulatory requirement to do so. As such, under the OMB regulations at 5 CFR 1320.3(b)(2), this information collection imposes no additional burden on respondents.

OMB Control No. 1513–0095

Title: Application for Registration for Tax-Free Firearms and Ammunition Transactions Under 26 U.S.C. 4221.

TTB Form Number: TTB F 5300.28.

Abstract: The IRC at 26 U.S.C. 4181 imposes a Federal excise tax on the sale of firearms and ammunition sold by manufacturers, producers, and importers. However, under 26 U.S.C. 4221, no tax is imposed on certain sales of firearms and ammunition, provided that the seller and purchaser of the articles (with certain exceptions) are registered as required by 26 U.S.C. 4222 and regulations prescribed by the Secretary. Under those authorities, the TTB regulations at 27 CFR 53.140 prescribe the use of TTB F 5300.28 as the application to obtain an approved Certificate of Registry to sell or purchase firearms and ammunition tax free. Also, once registered, respondents amend their registration information by filing a revised TTB F 5300.28 or a letterhead notice. TTB uses the collected information to determine if the respondent is qualified to engage in tax-free sales of firearms and ammunition.

Current Actions: There are no program changes to this information collection, and TTB is submitting for extension purposes only. As for adjustments, due to a change in agency estimates, TTB is decreasing the estimated number of annual

respondents, total responses, and burden hours associated with this information collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profits; State, local, and tribal governments.

Estimated Annual Burden

- *Number of Respondents:* 85.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 85.
- *Average Per-response Burden:* 3 hours.
- *Total Burden:* 255 hours.

OMB Control No. 1513–0119

Title: Certification of Proper Cellar Treatment for Imported Natural Wine.

Abstract: Under the IRC at 26 U.S.C. 5382, importers of natural wine produced after December 31, 2004, must provide the Secretary with a certification, accompanied by an affirmed laboratory analysis, that the practices and procedures used to produce the wine constitute proper cellar treatment unless exempted by international agreement or affiliation with a domestic winery. In addition, the FAA Act at 27 U.S.C. 205 vests the Secretary with authority to prescribe regulations regarding the identity and quality of alcohol beverages. Under those authorities, the TTB wine labeling regulations in 27 CFR part 4 and its alcohol beverage import regulations in 27 CFR part 27 implement the IRC's statutory requirement.

Current Actions: There are no program changes associated with this information collection, and TTB is submitting it for extension purposes only. As for adjustments, due to a change in agency estimates, TTB is increasing the estimated number of annual responses, average number of responses per respondent, and burden hours associated with this information collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 20.
- *Average Responses per Respondent:* 3.25.
- *Number of Responses:* 65.
- *Average Per-response Burden:* 20 minutes.
- *Total Burden:* 22 hours.

OMB Control No. 1513–0127

Title: Petitions to Establish or Modify American Viticultural Areas.

Abstract: The FFA Act at 27 U.S.C. 205(e) authorizes the Secretary to prescribe regulations for the labeling of wine, distilled spirits, and malt beverages to prohibit consumer deception, the use of misleading statements, and provide adequate information as to the identity and quality of the product. Under that FAA Act authority, TTB regulates the use of appellations of origin on wine labels, including the use of American viticultural area (AVA) names. Specific to this information collection, the TTB regulations in 27 CFR part 9 specify the information to be included in petitions to create or modify AVAs. TTB uses the provided information to evaluate a petitioner's proposal and, if accepted for rulemaking, draft a notice of proposed rulemaking requesting public comment regarding the creation of a new AVA or the amendment of the name, boundary, or other terms of an existing AVA.

Current Actions: There are no program changes to this information collection, and TTB is submitting it for extension purposes only. As for adjustments, due to changes in agency estimates, TTB is decreasing the estimated number of annual respondents, responses, and total burden hours associated with this collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits; Individuals or households.

Estimated Annual Burden

- *Number of Respondents:* 12.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 12.
- *Average Per-response Burden:* 130 hours.
- *Total Burden:* 1,560 hours.

OMB Control No. 1513–0138

Title: Tax Class Statement Required on Hard Cider Labels.

Abstract: In general, the IRC at 26 U.S.C. 5041 imposes six Federal excise tax rates on wine based on a wine's alcohol and carbon dioxide content. The lowest rate is that for hard cider tax as listed in section 5041(b)(6), while section 5041(g) defines the products eligible for the hard cider tax rate. Under the authority of the FAA Act, TTB's wine labeling regulations in 27 CFR part 4 allow the term ''hard cider'' to appear on the labels of products that do not meet the IRC's definition of hard cider for tax purposes. In light of that difference, in order to adequately identify products eligible for the hard cider tax rate, the TTB regulations in 27 CFR parts 24 and 27 provide that the tax class statement, ''Tax class 5041(b)(6),'' appear on containers of domestic and imported hard cider, respectively, which are eligible for that tax rate. The placement of such a statement on such labels identifies the product for Federal excise tax purposes without affecting other marketing information on the label.

Current Actions: There are no program changes or adjustments associated with this information collection at this time, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 20.
- *Average Responses per Respondent:* 2 per year.
- *Number of Responses:* 40.
- *Average Per-response Burden:* 1 hour.
- *Total Burden:* 40 hours.

OMB Control No. 1513–0139

Title: Record of Carbon Dioxide Measurement in Effervescent Products Taxed as Hard Cider.

Abstract: In general, the IRC at 26 U.S.C. 5041 lists six tax rates on wine that vary by their alcohol and carbon dioxide content. Under that section, wines with more than 0.392 grams of carbon dioxide per 100 milliliters are taxed as effervescent wine at $3.30 per gallon if artificially carbonated or $3.40 per gallon if naturally carbonated. However, under that section, certain apple- and pear-based wines are subject to the hard cider tax rate of $0.226 per gallon if the product contains no more than 0.64 grams of carbon dioxide per 100 milliliters of wine and does not exceed 8.5 percent alcohol by volume. Given the significant difference in those excise tax rates which, in part, depend on the level of a wine's effervescence, the TTB regulations at 27 CFR 24.302 require proprietors who produce or receive effervescent hard cider to record the amount of carbon dioxide in the product. This recordkeeping requirement is necessary to allow TTB to verify a respondent's compliance with the statutory definition of wine eligible for the hard cider tax rate.

Current Actions: There are no program changes or adjustments associated with this information collection at this time, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 50.
- *Average Responses per Respondent:* 2.
- *Number of Responses:* 100.
- *Average Per-response Burden:* 1 hour.
- *Total Burden:* 100 hours.

OMB Control No. 1513–0142

Title: CBMA Imports Refund Program—Foreign Producer Registration and Assignment System, and CBMA Importer Refund Claims System.

Abstract: The IRC at 26 U.S.C. 5001, 5041, and 5051 imposes Federal excise tax on, respectively, distilled spirits, wine, and beer produced in or imported into the United States, while certain quantities of those products are eligible for lower excise taxes under the Craft Beverage Modernization Act (CBMA). For imported products, rather than receiving CBMA tax benefits at the time of entry, U.S. alcohol beverage importers are required to pay the full excise tax rate to U.S. Customs and Border Protection and then subsequently submit refund claims to TTB to receive their assigned CBMA tax benefits. Under the IRC at 26 U.S.C. 5001(c), 5041(c), and 5051(a), a U.S. importer will only be eligible for CBMA tax benefits if a foreign producer has elected to assign, and the importer has elected to receive, such benefits in accordance with regulations and procedures issued by the Secretary. Finally, under 26 U.S.C. 6038E, foreign producers electing to make such assignments are required to provide the information the Secretary requires by regulation, including ownership information relating to such producers. Under those IRC authorities, the TTB regulations in 27 CFR part 27 establish procedures for foreign producers to assign CBMA tax benefits to U.S. importers, and for U.S. importers to receive those assignments and submit their CBMA tax benefit refund claims to TTB. This information collection is required to ensure that the IRC provisions regarding CBMA tax benefit refund claims for U.S. alcohol importers are appropriately applied, including for confirming an importer's eligibility for a refund.

Current Actions: There are no program changes at this time, and TTB is submitting it for extension purposes only. As for adjustments, due to changes in agency estimates, TTB is decreasing the estimated number of annual respondents, responses, and burden hours for this information collection, but is increasing its estimated average number of annual responses per respondent.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 12,000.
- *Average Responses per Respondent:* 2.75.
- *Number of Responses:* 33,000.
- *Average Per-response Burden:* 2 hours.
- *Total Burden:* 66,000 hours.

OMB Control No. 1513–0143

Title: Combined Alcohol Excise Tax Returns and Operations Reports—Pilot Test.

TTB Form Numbers: TTB F 5130.Pilot–A and TTB F 5130.Pilot–B.

Abstract: Under the IRC at 26 U.S.C. 5061, the Federal excise tax on distilled spirits, wine, and beer is collected on the basis of a return which taxpayers file on a semi-monthly, quarterly, or annual basis, depending on the amount of their annual tax liability. In addition, under the IRC at 26 U.S.C. 5207, 5367, and 5415, taxpayers for distilled spirits, wine, and beer respectively, must furnish operations reports as the Secretary prescribes by regulation. Under those IRC authorities, the TTB regulations in 27 CFR chapter I currently require alcohol excise taxpayers to report their excise tax liability using form TTB F 5000.24, Excise Tax Return, approved under OMB No. 1513–0083, while those taxpayers separately file operations reports using various forms approved under various OMB control numbers to account for their production, removals, losses, and certain other matters that affect their excise tax liability. As part of TTB's efforts to lower respondent burden, the Bureau is developing combined tax returns and simplified operations report for each alcohol beverage commodity and intends to pilot their use with its taxpayers. Under this pilot, alcohol excise taxpayers will submit a letterhead application to join the pilot program as an alternative to filing their current tax return and operations reports under existing regulatory requirements. Once approved, taxpayers participating in the pilot program will file their combined alcohol excise return and simplified operations report under the due dates currently applicable to their excise tax returns. The collected information allows TTB to identify the excise taxpayer, the amount of taxes due, and the amount of payments made, as well as operational activities that affect the amount of alcohol excise taxes due, while reducing the overall burden of filing separate tax returns and operations reports.

Current Actions: TTB is currently piloting a combined excise tax return and operations report forms for brewers. There are no program changes or adjustments associated with this collection, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 10,000.
- *Average Responses per Respondent:* 5.8.
- *Number of Responses:* 58,000.
- *Average Per-response Burden:* 1.0 hour.
- *Total Burden:* 58,000 hours.

Dated: October 1, 2026.

Amy R. Greenberg,

Acting Assistant Administrator, Headquarters Operations.

BILLING CODE 4810–31–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Action

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of one or more persons that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons are generally prohibited from engaging in transactions with them.

DATES: This action was issued on October 1, 2026. See **SUPPLEMENTARY INFORMATION** for relevant dates.

FOR FURTHER INFORMATION CONTACT: OFAC: Associate Director for Global Targeting, 202–622–2420; Assistant Director for Licensing, 202–622–2480; Assistant Director for Sanctions Compliance, 202–622–2490; or *https://ofac.treasury.gov/contact-ofac.*

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website: *https://ofac.treasury.gov.*

Notice of OFAC Actions

On October 1, 2026, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following persons are blocked under the relevant sanctions authorities listed below.

Individuals

1. HAMEDANI, Mehnoosh Poursaraf (Arabic: مهنوش پورصراف همدانی), China; DOB 07 Mar 1984; POB Qom, Iran; nationality Iran; alt. nationality Dominica; Additional Sanctions Information - Subject to Secondary Sanctions; Gender Female; National ID No. 0058172041 (Iran) (individual) [IRAN-EO13871] (Linked To: SHANGHAI RUIMI IMPORT AND EXPORT TRADE CO., LTD.).

   Designated pursuant to section 1(a)(v) of Executive Order 13871 of May 8, 2019, 84 FR 20761, "Imposing Sanctions With Respect to the Iron, Steel, Aluminum, and Copper Sectors of Iran," ("E.O. 13871") for having acted or purported to act for or on behalf of, directly or indirectly, SHANGHAI RUIMI IMPORT AND EXPORT TRADE CO., LTD., a person whose property and interests in property are blocked pursuant to E.O. 13871.

2. KESHVARDOUST, Ramin (Arabic: رامین کشوردوست), Hong Kong, China; DOB 20 May 1983; POB Tehran, Iran; nationality Iran; alt. nationality Dominica; Additional Sanctions Information - Subject to Secondary Sanctions; Gender Male; Passport W55497664 (Iran) expires 27 Dec 2026; National ID No. 0063416611 (Iran) (individual) [IRAN-EO13871].

   Designated pursuant to section 1(a)(i) of Executive Order 13871 for operating in the iron, steel, aluminum, or copper sector of Iran, or being a person that owns, controls, or operates an entity that is part of the iron, steel, aluminum, or copper sector of Iran.

Entities

1. ISLAMIC REPUBLIC OF IRAN RAILWAY COMPANY (Arabic: شركت راه آهن جمهوري اسلامي ايران سهامي خاص) (a.k.a. THE RAILWAYS OF ISLAMIC REPUBLIC OF IRAN COMPANY), Ground Floor, Railway Central Building, No. 0, Dadman Boulevard, Argentina Square, District 6, Tehran, Tehran Province, Iran; Website www.rai.ir; Additional Sanctions Information - Subject to Secondary Sanctions; Organization Established Date 31 Jul 1988; Company Number 10101155744 (Iran); Registration Number 70644 (Iran) [IRAN-EO13902].

   Designated pursuant to section 1(a)(i) of Executive Order 13902 of January 10, 2020, "Imposing Sanctions With Respect to Additional Sectors of Iran," 85 FR 2003, 3 CFR, 2020 Comp., p. 299 (E.O. 13902), for operating in the rail sector of the Iranian economy.

2. RAJA PASSENGER TRAINS COMPANY (Arabic: شركت قطارهای مسافری رجاء) (a.k.a. RAJA RAIL TRANSPORTATION COMPANY), No. 159, Karim Khan Zand St., Sanaee St. Intersection, Tehran, Iran; Website www.raja.ir; Additional Sanctions Information - Subject to Secondary Sanctions; Organization Established Date 1996; Company Number 10100029590 (Iran); Registration Number 128209 (Iran) [IRAN-EO13902].

   Designated pursuant to section 1(a)(i) of E.O 13902 for operating in the rail sector of the Iranian economy.

3. SHERKAT-E RAH AHAN-E KHAMLE-O-NAGHLE (Arabic: شركت راه آهن حمل و نقل سهامي خاص) (a.k.a. "RAILWAY TRANSPORTATION COMPANY"), No. 124, Nosrat Street, North Kargar Street, District 6, Tehran, Tehran Province, Iran; Website http://rwt.ir/; Additional Sanctions Information - Subject to Secondary Sanctions; Organization Established Date 16 Mar 1993; Company Number 10101402621 (Iran); Registration Number 96201 (Iran) [IRAN-EO13902].

   Designated pursuant to section 1(a)(i) of E.O 13902 for operating in the rail sector of the Iranian economy.

4. FIDAR FOOLAD RADMAN (Arabic: شركت فيدار فولاد رادمان), No. 35, 2nd Floor, Northeast Unit, Raz Boulevard, Ammar Street, Farmanieh, Tehran, Iran; Additional Sanctions Information - Subject to Secondary Sanctions; Organization Established Date 17 Apr 2018; National ID No. 14007529243 (Iran); Registration Number 525217 (Iran) [IRAN-EO13871] (Linked To: KESHVARDOUST, Ramin).

   Designated pursuant to section 1(a)(v) of E.O. 13871 for being owned or controlled by, or having acted or purported to act for or on behalf of, directly or indirectly, RAMIN KESHVARDOUST, a person whose property and interests in property are blocked pursuant to E.O. 13871.

5. M AND R STEEL CO., LTD. (a.k.a. BEIJING M & R STEEL CO., LTD. (Chinese Simplified: 北京润达森进出口贸易有限公司)), Unit 3005, Building 5,

Wanda Plaza No. 93, Jian'guo Road, Chaoyang District, Beijing 100022, China; Organization Established Date 16 Apr 2008; Unified Social Credit Code (USCC) 91110105674279546N (China) [IRAN-EO13871] (Linked To: KESHVARDOUST, Ramin).

Designated pursuant to section 1(a)(v) of E.O. 13871 for being owned or controlled by, or having acted or purported to act for or on behalf of, directly or indirectly, RAMIN KESHVARDOUST, a person whose property and interests in property are blocked pursuant to E.O. 13871.

6. SHANGHAI RUIMI IMPORT AND EXPORT TRADE CO., LTD. (Chinese Simplified: 上海睿弥进出口贸易有限公司), 1125, No. 35 Rijing Road, China Pilot Free Trade Zone, Shanghai 200000, China; Organization Established Date 29 Jan 2019; Unified Social Credit Code (USCC) 91310115MA1K49TG93 (China) [IRAN-EO13871] (Linked To: KESHVARDOUST, Ramin).

   Designated pursuant to section 1(a)(v) of E.O. 13871 for being owned or controlled by, or having acted or purported to act for or on behalf of, directly or indirectly, RAMIN KESHVARDOUST, a person whose property and interests in property are blocked pursuant to E.O. 13871.

7. TECH-TRADE INTERNATIONAL IMPEX GMBH, Engelbertstrasse 13a, Hilden 40724, Germany; Organization Established Date 29 Nov 2017; Trade License No. HRB 82099 (Germany); Registration Number DER1101.HRB82099 (Germany) [IRAN-EO13871] (Linked To: ESFAHAN'S MOBARAKEH STEEL COMPANY).

   Designated pursuant to section 1(a)(iv) of E.O. 13871 for having materially assisted, sponsored, or provided financial, material, or technological support for, or goods or services in support of, ESFAHAN'S MOBARAKEH STEEL COMPANY, a person whose property and interests in property are blocked pursuant to E.O. 13871.

8. TRACO INTERNATIONAL FZE (Arabic: تراكو إنترنا□ونا□ م.م.ح), Ras Al Khaimah, United Arab Emirates; Organization Established Date 17 Oct 2021; License 5024613 (United Arab Emirates); Economic Register Number (CBLS) 11769621 (United Arab Emirates) [IRAN-EO13871].

   Designated pursuant to section 1(a)(i) of E.O. 13871 for operating in the iron, steel, aluminum, or copper sector of Iran, or being a person that owns, controls, or operates an entity that is part of the iron, steel, aluminum, or copper sector of Iran.

9. HEAVY EQUIPMENT PRODUCTION COMPANY (Arabic: هپکو سنگین تجهیزات تولید شرکت□) (a.k.a. "HEPCO"), Ground Floor, No. 102 Somayyeh Street, Ramsar Street, Government Gate, Tehran, Tehran 1581875513, Iran; HEPCO Manufacturing Complex, Shahid Bakhtiari Boulevard, San'at Square, Arak, Markazi, Iran; Website https://hepcoir.com; Additional Sanctions Information - Subject to Secondary Sanctions; Organization Established Date 22 Feb 1973; Company Number 10100594509 (Iran); Registration Number 16584 (Iran) [IRAN-EO13902].

Designated pursuant to section 1(a)(i) of E.O. 13902 for operating in the manufacturing sector of the Iranian economy.

10. HEPCO SHANGHAI CO., LTD. (Chinese Simplified: 赫世浦上海机械贸易有限公司) (a.k.a. HESHIPU SHANGHAI MACHINERY TRADING CO., LTD; a.k.a. SHANGHAI HEPCO LTD.), Room C-25, 6th Floor, Building 1, No. 198, Huashen Road, China (Shanghai) Pilot Free Trade Zone, Pudong New Area, Shanghai 200135, China; Block E, 16 F, Huadu Mansion, No. 858 Zhangyang Rd., Shanghai 200135, China; Organization Established Date 31 May 2011; Enterprise Number 3100574132491 (China); Registration Number 310115400269442 (China); Unified Social Credit Code (USCC) 913100005741324917 (China) [IRAN-EO13902] (Linked To: HEAVY EQUIPMENT PRODUCTION COMPANY).

    Designated pursuant to section 1(a)(iv) of E.O. 13902 for being owned or controlled by, or having acted or purported to act for or on behalf of, directly or indirectly, HEAVY EQUIPMENT PRODUCTION COMPANY.

11. HESSENBERG CO., LIMITED (Chinese Traditional: 海森堡有限公司) (a.k.a. JEDBURGH CO., LIMITED (Chinese Traditional: 傑德堡有限公司)), 1320, Unit A, 13/F Wing Tai Centre, 12 Hing Yip Street, Kowloon, Hong Kong, China; Organization Established Date 10 May 2023; Trade License No. 3277708 (Hong Kong); Business Registration Number 75302415 (Hong Kong) [IRAN-EO13902].

    Designated pursuant to section 1(a)(i) of E.O. 13902 for operating in the automotive sector of the Iranian economy.

12. NIROO MOTOR DAMAVAND COMPANY, (Arabic: ركت نيرو موتور دماوند) 3rd Floor, No. 127, Khaled Islambouli Street, Shahid Masoud Ahmadian Street, Argentina-Saei, Tehran 1513833115, Iran; Additional Sanctions Information - Subject to Secondary Sanctions; Organization Established Date 14 Mar 2017; National ID No. 14006666240 (Iran); Business Registration Number 507567 (Iran); Registration Number 411546754799 (Iran) [IRAN-EO13902].

    Designated pursuant to section 1(a)(i) of E.O. 13902 for operating in the automotive sector of the Iranian economy.

13. NIROO MOTOR SHIRAZ INDUSTRIAL AND MANUFACTURING COMPANY (Arabic: ركت توليدى و صنعتى نيرو موتور□يراز) (a.k.a. NIROO MOTOR COMPANY), Beheshti Street, No. 69, Niroo Motor Building, Tehran, Iran; Additional Sanctions Information - Subject to Secondary Sanctions; Organization Established Date 11 Mar 2003; National ID No. 10102422801 (Iran); Business Registration Number 200521 (Iran); Registration Number 411134851895 (Iran) [IRAN-EO13902].

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Action

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of one or more persons that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of this entity are blocked, and U.S. persons are generally prohibited from engaging in transactions with them.

DATES: This action was issued on October 1, 2026. See **SUPPLEMENTARY INFORMATION** for relevant dates.

FOR FURTHER INFORMATION CONTACT: *OFAC:* Associate Director for Global Targeting, 202–622–2420; Assistant Director for Licensing, 202–622–2480; Assistant Director for Sanctions Compliance, 202–622–2490 or *https://ofac.treasury.gov/contact-ofac.*

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website: *https://ofac.treasury.gov.*

Notice of OFAC Action

On October 1, 2026, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following person are blocked under the relevant sanctions authorities listed below.

Entity

1. A7 NETWORK, Russia; Kyrgyzstan; Nigeria; Zimbabwe; Organization Established Date 2024; Target Type Criminal Organization [TCO].

Designated pursuant to section 1(a)(ii)(A) of Executive Order 13581 of July 24, 2011, ''Blocking Property of Transnational Criminal Organizations,'' 76 FR 44757 (July 27, 2011), as amended by Executive Order 13863 of March 15, 2019, ''Taking Additional Steps to Address the National Emergency With Respect to Significant Transnational Criminal Organizations,'' 84 FR 10255 (March 19, 2019) (''E.O. 13581, as amended'') for being a foreign person that constitutes a significant transnational criminal organization.

(Authorities: E.O. 13581, as amended)

Notice of OFAC Actions

On September 29, 2026, OFAC determined that one or more persons identified below meet one or more of the criteria for the imposition of sanctions set forth in section 1(a)–(c) of Executive Order 14059 of December 15, 2021, ''Imposing Sanctions on Foreign Persons Involved in the Global Illicit Drug Trade,'' 86 FR 71549 (E.O. 14059). OFAC has selected to impose blocking sanctions pursuant to section 2(a)(i) of E.O. 14059 on the persons identified below.

OFAC further determined that one or more persons identified below meet one or more of the criteria for sanctions pursuant to Executive Order 13224 of September 23, 2001, ''Blocking Property and Prohibiting Transactions With Persons Who Commit, Threaten to Commit, or Support Terrorism,'' 66 FR 49079, as amended by Executive Order 13886 of September 9, 2019, ''Modernizing Sanctions To Combat Terrorism,'' 84 FR 48041 (E.O. 13224, as amended).

As a result, the property and interests in property subject to U.S. jurisdiction of the following persons are blocked under the relevant sanctions authorities listed below.

BILLING CODE 4810–AL–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Agency Information Collection Activities; Comment Request on Cognitive and Psychological Research Coordinated by Statistics of Income on Behalf of All IRS Operations Functions

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of information collection; request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the IRS is inviting comments on the information collection request outlined in this notice.

DATES: Written comments should be received on or before December 7, 2026 to be assured of consideration.

ADDRESSES: Direct all written comments to Andres Garcia, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224, or by email to *pra.comments@irs.gov.* Include ''OMB Control No. 1545–1349'' in the subject line of the message.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of this collection should be directed to Kerry Dennis, (202) 317–5751.

SUPPLEMENTARY INFORMATION: The IRS, in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the IRS assess the impact and minimize the burden of its information collection requirements. Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record, and viewable on relevant websites. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Title: Cognitive and Psychological Research Coordinated by Statistics of Income on Behalf of All IRS Operations Functions.

OMB Control Number: 1545–1349.

Abstract: The proposed research will improve the quality of data collection by examining the psychological and cognitive aspects of methods and procedures such as: Interviewing processes, forms redesign, survey and tax collection technology and operating procedures (internal and external in nature).

Current Actions: We will be conducting different opinion surveys, focus group sessions, think-aloud interviews, and usability studies regarding cognitive research surrounding forms submission or IRS system/product development.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals and businesses or other for-profit organizations.

Estimated Number of Respondents: 10,000.

Estimated Time per Response: 1 hour, 30 minutes.

Estimated Total Annual Burden Hours: 15,000.

Dated: October 1, 2026.

Kerry Dennis,

Tax Analyst.

BILLING CODE 4831–GV–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–NEW]

Agency Information Collection Activity: Department of Veterans Affairs Work Study Work Site Application

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Veterans Benefits Administration, Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed revision of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Comments must be received on or before December 7, 2026.

ADDRESSES: Comments must be submitted through *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: *Program-Specific information:* Kendra McCleave, 202–461–9568, *kendra.mccleave@va.gov.*

VA PRA information: Dorothy Glasgow, 202–461–1084, *VAPRA@va.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Title: Department of Veterans Affairs Work Study Work Site Application, VA Form 22–10219.

OMB Control Number: 2900–NEW. *https://www.reginfo.gov/public/do/PRASearch* (Once at this link, you can enter the OMB Control Number to find the historical versions of this Information Collection).

Type of Review: New Collection.

Abstract: The VA Work Study program allows Veterans and other VA beneficiaries who are enrolled at least ¾ time (75% Rate of Pursuit) in school to earn pay by working part-time jobs related to VA services. These jobs are available at locations such as colleges and training facilities, VA Regional Offices, VA cemeteries, and other allowed sites. Each work site wishing to be considered for approval must submit a request for approval. Required information to determine suitability as a work site includes items such as the location of the work site, the type of facility, designation of Primary and Secondary Work Site Supervisors, and confirmation that Human Resources is aware of VA Work Study program participation.

VA Form 22–10219, Department of Veterans Affairs Work Study Site Application, will capture this information in an efficient manner when a work site initially applies for VA approval. Historically, the VA Work Study Team has provided a locally produced template to capture this information. A digital process will

reduce administrative delays, facilitate faster communication between schools and VA, and streamline record-keeping. Additionally, an official form is required to lay the groundwork for future automation of the application process.

Affected Public: Individuals, households and educational Institutions.

Estimated Annual Burden: 292 hours.

Estimated Average Burden per Respondent: 10 minutes.

Frequency of Response: Annually, or as needed.

Estimated Number of Respondents: 1,750.

(Authority: 44 U.S.C. 3501 *et seq.*)

Shunda Willis,

Alternate, VA PRA Clearance Officer, Office of Information and Technology/Office of Data Governance and Analytics, Department of Veterans Affairs.

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0663]

Agency Information Collection Activity Under OMB Review: PayVA (Pay Now Enter Info Page)

AGENCY: Debt Management Center, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Debt Management Center (DMC), Department of Veterans Affairs (VA), will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden, and it includes the actual data collection instrument.

DATES: Comments and recommendations for the proposed information collection should be sent by November 5, 2026.

ADDRESSES: To submit comments and recommendations for the proposed information collection, please type the following link into your browser: *www.reginfo.gov/public/do/PRAMain,* select ''Currently under Review—Open for Public Comments'', then search the list for the information collection by Title or ''OMB Control No. 2900–0663.''

FOR FURTHER INFORMATION CONTACT: *VA PRA information:* Dorothy Glasgow, 202–461–1084, *VAPRA@va.gov.*

SUPPLEMENTARY INFORMATION:

Title: PayVA (Pay Now Enter Info Page).

OMB Control Number: 2900–0663 *https://www.reginfo.gov/public/do/PRASearch.*

Type of Review: Revision of a currently approved collection.

Abstract: PayVA (Pay Now Enter Info Page—*pay.va.gov*) is used by the VA Debt Management Center (DMC) to verify debts that are active at DMC before the indebted person makes a payment. PayVA collects basic debt information from the respondent and redirects them to *pay.gov* (a Department of Treasury website) for online payments. PayVA then collects responses from *pay.gov* to verify payment. The change in burden was the result of more payments being made electronically through the *pay.va* platform and a higher number of overall overpayment debts owed to the VA.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 91 FR 48228, July 30, 2026.

Affected Public: Individuals.

Estimated Annual Burden: 42,878 hours.

Estimated Average Burden per Respondent: 10 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 257,266.

(Authority: 44 U.S.C. 3501 *et seq.*)

Shunda Willis,

Alternate, VA PRA Clearance Officer, Office of Information and Technology, Office of Data Governance and Analytics, Department of Veterans Affairs.

FOR FURTHER INFORMATION CONTACT: *Program-Specific information:* Kendra McCleave, 202–461–9568, *kendra.mccleave@va.gov.*

VA PRA information: Dorothy Glasgow, 202–461–1084, *VAPRA@va.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Title: Designation of Work Study Site Supervisors, VA Form 22–10219a.

OMB Control Number: 2900–NEW. *https://www.reginfo.gov/public/do/PRASearch* (Once at this link, you can enter the OMB Control Number to find the historical versions of this Information Collection).

Type of Review: New Collection.

Abstract: The VA Work Study program allows Veterans and other VA beneficiaries who are enrolled at least ¾ time (75% Rate of Pursuit) in school to earn pay by working part-time jobs related to VA services. These jobs are available at locations such as approved colleges and training facilities, VA Regional Offices, VA cemeteries, and other approved sites. Each approved

work site is required to designate a Primary and at least one Secondary Work Site Supervisor. Similar to designated VA School Certifying officials (SCO) at schools and training facilities approved to certify training for VA students to receive GI Bill benefits, the designated Work Study Site Supervisors are the only individuals authorized to provide and receive information pertaining to approved VA Work Study students and who have the authority to submit VA Work Study forms on a student's behalf.

VA Form 22–10219, Department of Veterans Affairs Work Study Site Application captures this information when a work site initially applies for VA approval. The VA Form 22–10219 is not practical for collecting subsequent changes to the Work Site Supervisors and would require a work site to provide redundant and unneeded information when updates to the Work Site Supervisors are needed. Therefore, the VA Work Study Team currently provides a locally produced template to capture this information when updates are needed to the listed site supervisors. When a work site needs to update its Site Supervisor information, staff currently must request a template by email and manually submit changes to VA, which is an inefficient manual process. Additionally, in some instances a Work Site cannot certify Work Study Students for payment during this process, and the delay may cause financial hardship, making it difficult for students to cover essential expenses.

VA Form 22–10219a, Designation of Work Study Site Supervisors, has been patterned after the form used to collect designated VA School Certifying Officials, VA Form 22–8794, as the concepts are very similar. Incorporation of VA Form 22–10219a, Designation of Work Study Site Supervisors, will allow work sites to download the form online and submit it to VA, enabling faster communication between work sites and VA. This digital process will not only provide quicker processing of work study site supervisor designations, reducing payment delays, but will streamline record-keeping as well. Additionally, an official form is required to lay the groundwork for future automation of the process.

Affected Public: Individuals, households and educational Institutions.

Estimated Annual Burden: 86 hours.

Estimated Average Burden per Respondent: 10 minutes.

Frequency of Response: As needed.

Estimated Number of Respondents: 515.

Authority: 44 U.S.C. 3501 *et seq.*

Shunda Willis,

Alternate, VA PRA Clearance Officer, Office of Information and Technology/Office of Data Governance and Analytics, Department of Veterans Affairs.

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0165]

Agency Information Collection Activity Under OMB Review: Financial Status Report

AGENCY: Debt Management Center, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Debt Management Center (DMC), Department of Veterans Affairs (VA), will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden, and it includes the actual data collection instrument.

DATES: Comments and recommendations for the proposed information collection should be sent by November 5, 2026.

ADDRESSES: To submit comments and recommendations for the proposed information collection, please type the following link into your browser: *www.reginfo.gov/public/do/PRAMain,* select ''Currently under Review—Open for Public Comments'', then search the list for the information collection by Title or ''OMB Control No. 2900–0165.''

FOR FURTHER INFORMATION CONTACT: *VA PRA information:* Dorothy Glasgow, 202–461–1084, *VAPRA@va.gov.*

SUPPLEMENTARY INFORMATION:

Title: Financial Status Report, VA Form 5655.

OMB Control Number: 2900–0165 *https://www.reginfo.gov/public/do/PRASearch.*

Type of Review: Revision of a currently approved collection.

Abstract: The major use of the form is to document and support the eligibility determinations for waivers of collection, for the consideration of compromise offers, determine financial hardship suspensions, and/or for assisting in the development of repayment plans for overpayment debts owed to the VA.

The burden has increased since the previous approval due to the resumption of collections of debts that were suspended during the Coronavirus 2019 (COVID–19) Pandemic. Collection was paused on new debts effective April 2020 at the Debt Management Center (DMC). Collection action resumed beginning May 2022 for suspended debts, and additional debts continue to be created, returning operations to normal.

Additionally, DMC also no longer requires VA Form 5655 to approve repayment plans extending 60 months or fewer. Previously, VA Form 5655 was required to approve repayment plans extending greater than 12 months. Repayment plans on compensation and pension benefit overpayments now also automatically extend for 36 months instead of 12 months when over the minimum monthly payment threshold.

Form usage has fluctuated due to the above-mentioned policy changes and collections restarting.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 91 FR 48229, July 30, 2026.

Affected Public: Individuals.

Estimated Annual Burden: 150,871 hours.

Estimated Average Burden per Respondent: 60 minutes.

Frequency of Response: On occasion and/or annually.

Estimated Number of Respondents: 150,871.

Authority: 44 U.S.C. 3501 *et seq.*

Securities and Exchange Commission

17 Part 239, 249, 274, et al.
Investment Adviser Performance-Based Compensation Modernization; Proposed Rule

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 239, 249, 274, and 275

[Release Nos. 33–11443; 34–106533; IA–7022; IC–36350; File No. S7–2026–28]

RIN 3235–AN59

Investment Adviser Performance-Based Compensation Modernization

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule.

SUMMARY: The Securities and Exchange Commission (the ''Commission'') is proposing to amend the rule under the Investment Advisers Act of 1940 that provides an exemption from the statutory prohibition on registered investment advisers receiving compensation on the basis of a share of capital gains in or capital appreciation of an advisory client's account. Specifically, the proposed amendments would expand the ability of investment advisers to receive this compensation from clients that are registered management investment companies and business development companies (collectively, ''regulated funds''), subject to certain conditions. The proposal would relatedly amend certain regulated fund registration and reporting forms to require separate disclosure of all performance-based compensation paid by regulated funds to their investment adviser. The proposed rule amendments would also allow investment advisers to receive this compensation from additional clients by revising the rule's ''qualified client'' definition to include investors that meet the ''accredited investor'' definition in Regulation D under the Securities Act of 1933. The proposal would relatedly make conforming amendments to certain other rules under the Investment Advisers Act of 1940 whose provisions reference the ''qualified client'' definition.

DATES: This release was published in the **Federal Register** on October 6, 2026. Comments should be received on or before December 7, 2026.

ADDRESSES: Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/comments/s7-202628/investment-adviser-performance-based-compensation-modernization*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number S7–2026–28 on the subject line.

Paper Comments

- Send paper comments to Vanessa A. Countryman, Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number S7–2026–28. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method of submission. The Commission will post all comments on the Commission's website (*https://www.sec.gov/comments/s7-202628/investment-adviser-performance-based-compensation-modernization*). Do not include personally identifiable information in submissions; you should submit only information that you wish to make available publicly. The Commission may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection.

Studies, memoranda, or other substantive items may be added by the Commission or staff to the comment file during this rulemaking. A notification of the inclusion in the comment file of any such materials will be made available on the Commission's website. To ensure direct electronic receipt of such notifications, sign up through the ''Stay Connected'' option at *www.sec.gov* to receive notifications by email.

A summary of the proposal of not more than 100 words is posted on the Commission's website (*https://www.sec.gov/comments/s7-202628/investment-adviser-performance-based-compensation-modernization*).

FOR FURTHER INFORMATION CONTACT: Daniel Levine, Neema Nassiri, Lawrence Pace, Senior Counsels; Robert Holowka, Assistant Director, at (202) 551–6787, Investment Adviser Regulation Office; Pamela Ellis, Senior Counsel; Blair Burnett, Branch Chief; Brian McLaughlin Johnson, Assistant Director, at (202) 551–6792, Investment Company Regulation Office, Division of Investment Management, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–8549.

SUPPLEMENTARY INFORMATION: The Commission is proposing for public comment amendments to the following rules and forms:

I. Introduction and Background

The asset management industry has expanded significantly in recent decades, driven by evolving investor demands and the availability of a broader range of investment opportunities across public and private markets. Asset managers today employ an increasingly wide array of investment strategies and offer those strategies through multiple investment products, including, among others, regulated funds, private funds, separately managed accounts, and direct advisory recommendations to individual clients.

As the variety of investment products and their delivery channels have grown, both institutional and individual investors have increasingly sought to access alternative investment assets and to construct more diversified investment portfolios than in the past. The Commission is committed to identifying ways to reduce unnecessary regulatory obstacles to investment product innovation, allowing for the broadening of investor choice available in today's asset management industry while appropriately addressing risks associated with increasingly diverse portfolio compositions and operations.

As part of this commitment, the Commission is proposing amendments to the ''qualified client'' definition and other provisions in rule 205–3 under the Advisers Act that would expand the ability of registered investment advisers and certain of their clients, including regulated funds under certain conditions and investors that meet the ''accredited investor'' definition in Regulation D under the Securities Act, to enter into performance-based compensation arrangements calculated on the basis of a share of capital gains in or capital appreciation of an advisory client's account. We anticipate that such expansion would allow a wider range of advisers to offer regulated funds, enable the introduction of more investment strategies into regulated funds, and separately expand the availability of investment opportunities to accredited investors in pools or separately managed accounts. In addition, the proposal would amend certain forms under the Investment Company Act to require disclosure of all performance-based compensation to shareholders of regulated funds, including compensation based on interest, ordinary income, or dividends. As the ''qualified client'' definition is also referenced in the definition of ''investment adviser representative'' in rule 203A–3 and the exceptions to a registered investment adviser's brochure supplement delivery requirement in rule 204–3 under the Advisers Act, we also propose conforming amendments to these rules.[5]

The use of performance-based compensation has long been a common and defining characteristic of investment strategies that are associated with private funds, such as hedge fund, private equity, and venture capital strategies, which generally include private market strategies as well as complex or differentiated public market strategies.[6] Because registered investment advisers and their private fund clients are largely able to enter into and tailor performance-based compensation arrangements, these types of alternative investment strategies have, as a practical matter, been limited to the private fund industry, reducing access to a limited group of eligible investors. Therefore an adviser may be incentivized to allocate its potentially higher performing investment strategies and opportunities to this limited group of investors. This situation results in a structural disadvantage for retail investors, as it may disincentivize capable advisers from allocating potentially higher performing strategies to regulated funds or, in some cases, from launching or maintaining regulated funds altogether.

Performance-based compensation can offer a rational and effective means to define and align adviser and investor goals, especially as arrangements have evolved over time through commercial practice to commonly include features and terms designed to more closely

[5] *See also infra* section II.B.3.c. (noting that the proposed amendments to the qualified client definition would expand the meaning of ''high net worth individual'' as defined in Form ADV).

[6] Performance-based compensation has in practice also been used in the context of separately managed accounts of eligible clients, including for advisory services with respect to more traditional investment strategies.

align adviser and investor interests.[7] Expanding the ability for advisers to charge performance fees could incentivize advisers currently operating in the private markets to bring diverse strategies to a wider group of clients and investors, including investors in regulated funds. Accordingly, the proposed amendments are designed to modernize the regulatory framework related to performance-based compensation, facilitate capital formation in the public and private markets by promoting innovation in regulated fund structures, and expand investor choice, while maintaining appropriate investor protections and safeguards.

As discussed below, Congress amended the Advisers Act in 1970 to authorize the Commission to exempt any person or transaction (or class of persons or transactions) from any provision of the Advisers Act, if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and the provisions of the Advisers Act.[8] In granting such authority to the Commission, Congress specifically contemplated its potential application to the performance fee prohibition in section 205 under the Advisers Act.[9] Congress also amended the Advisers Act in 1996 to authorize the Commission to exempt any person or transaction (or class thereof) specifically from the performance fee prohibition in section 205, provided that the exemption relates to an advisory contract with ''any person that the Commission determines does not need the protections'' of the prohibition ''on the basis of such factors as financial sophistication, net worth, knowledge of and experience in financial matters, amount of assets under management, relationship with a registered investment adviser, and such other factors as the Commission determines are consistent with'' section 205.[10] Over decades, the Commission has used these authorities to expand the use of performance fees by registered investment advisers, and this proposal continues on that path.

A. Overview of Section 205 and Rule 205–3

Section 205(a)(1) of the Advisers Act generally prohibits an investment adviser registered or required to be registered with the Commission from receiving compensation on the basis of a share of capital gains in or capital appreciation of an advisory client's account.[11] These restricted performance-based compensation arrangements are commonly referred to as ''performance fees'' because they compensate advisers based on the investment performance of a client's account rather than on another basis, such as the aggregate value of the assets in a client's account.[12] For example, an advisory fee calculated as a percentage of the investment gains in a client's account over a period of time (*e.g.,* twenty percent of an account's gains over the last year) is a performance fee, while an advisory fee calculated as a percentage of the total value of a client's account (*e.g.,* two percent of such client's assets) is not a performance fee.

Although performance fees can be structured in various amounts and forms, section 205(a)(1) functions to broadly prohibit a registered investment adviser from entering into, extending, renewing, or in any way performing an investment advisory contract that provides for any performance fees to the adviser, however that performance fee is expressed or calculated, unless that advisory contract qualifies for an exception or exemption to the prohibition on performance fees. Statutory exceptions to the prohibition are provided in sections 205(b)(1) through (b)(5) of the Advisers Act,[13] and the Commission has authority to promulgate exemptions to the prohibition under sections 205(e) and/or 206A thereof. Pursuant to these authorities, the Commission previously adopted and amended rule 205–3 as a generally available exemption to the statutory performance fee prohibition set forth in section 205(a)(1).

1. Section 205: 1940 Enactment and 1970 Amendments

The prohibition on performance fees in section 205(a)(1) has been part of the Advisers Act since its original enactment by Congress in 1940 (originally as section 205(1) thereof). Legislative history indicates that the prohibition was included because of Congressional concern that performance fee arrangements (then typically called ''profit-sharing'' arrangements) would by their nature incentivize investment advisers to take inappropriate risks with their clients' funds, rather than because of evidence of actual abuse or misconduct in the advisory industry related to performance fees at that time.[14] Specifically, because performance fee arrangements generally provided an adviser with additional fees when its client had investment gains but did not decrease the adviser's compensation when the client had investment losses, performance fees were viewed by some as encouraging advisers to speculate excessively with their clients' funds.[15]

No. 477, 76th Cong., 2d Sess. 30 (1939) (summarizing an industry survey and a public conference held by the Commission on February 11, 1938, in which an industry representative asserted that performance fees encourage advisers to recommend a degree of risk that investors themselves would not knowingly undertake, as advisers have ''everything to gain . . . and nothing to lose''); *see also Investment Trusts and Investment Companies: Hearings on S. 3580 before a Subcomm. of the Senate Comm. on Banking and Currency,* 76th Cong., 3d Sess. 319–320 (1940) (''1940 Senate Hearings'') (testimony from Director Schenker of the then-SEC Investment Company Division that ''it was virtually . . . the unanimous consensus of the industry that what you ought to abolish is these profit-sharing abuses in the industry: 'If you make any money, you turn part of

Although the performance fee prohibition for registered investment advisers has been in the Advisers Act since its enactment in 1940, the prohibition was, in practice, narrow in scope for two reasons:

- First, the Advisers Act provided a registration exemption for investment advisers whose only clients were registered investment companies, and the performance fee prohibition did not extend to advisers that were not required to register with the Commission.
- Second, for advisers that were registered, or required to register, with the Commission, the Advisers Act excepted from the performance fee prohibition advisory contracts with investment companies registered under the Investment Company Act.

These were intentional decisions. The original bill did not include these exceptions, but the final Advisers Act excepted contracts with investment company clients from the performance fee prohibition, with legislative history suggesting Congress ultimately responded to industry input that performance fees closely linked the interests of investment company investors and advisers ''throughout the life of the investment,'' and that the basis of advisory compensation should not be limited by statute if clearly and adequately disclosed to investors.[16]

In the decades following the enactment of the Investment Company Act and the Advisers Act, the registered investment company industry grew dramatically from under $450 million in assets and 300,000 investors in 1940 to over $45 billion in assets and 4 million investors by the end of 1966.[17] This dramatic growth and accompanying perceptions of prevalent excessive fee and expense practices in the industry, especially related to the then-popular ''go-go funds'' that aggressively sought short-term gains with high portfolio turnover and related transaction costs, prompted both Congress and the Commission to take a hard look at the registered fund industry and investor protections under the securities laws more broadly.[18] Congress directed the Commission to comprehensively review and conduct a study on the registered fund industry, and the Commission in turn requested the securities research unit of the Wharton School of Finance and Commerce to broadly examine the industry in 1958.

This examination resulted in the transmittal to the Commission in 1962 of Wharton's ''A Study on Mutual Funds,'' which generally found that advisory fees paid by registered funds often bore little relation to the actual cost of the advisory services provided or to investment performance.[19] The Wharton report was immediately followed by a special study by the Commission's staff that focused its attention on problematic distribution practices and excessive sales charges in the registered fund industry.[20]

This review effort culminated in the Commission's submission to Congress in 1966 of its Report on the Public Policy Implications of Investment Company Growth (the ''PPI Report''), which recommended, among a broader package of comprehensive reforms to fee and expense practices, the extension of the Advisers Act's performance fee prohibition to advisory contracts with registered investment companies.[21] Although the PPI Report did not contain any specific examples of abuse or misconduct relating to performance fees at registered investment companies, the Commission nonetheless recommended that Congress amend the Advisers Act to remove its exceptions for advisers to registered investment companies, and explained that doing so with respect to the performance fee prohibition would complement the Commission's primary recommendation at the time to incorporate a general standard of reasonableness into the Investment Company Act for advisory compensation paid by registered investment companies.[22] Combined with this reasonableness standard, the extension of the performance fee prohibition to advisory contracts with registered investment companies would, according to the Commission, permit ''capital gains and appreciation of a registered investment company [to] be taken into account as a factor in setting the amount of the fee of its investment adviser, [notwithstanding that] such fee could not be tied directly to such gains or appreciation.'' [23]

Shortly afterward, bills were introduced in Congress that would largely implement the Commission's recommendations discussed above, including the extension of the performance fee prohibition to investment advisory contracts with registered investment companies.[24] In Congressional hearings on these bills, it was generally acknowledged that the types of performance fee arrangements ''that would be barred by section 205(1) . . . are not common in the investment company industry, but some do exist, and the number of [such] contracts appears to be increasing.'' [25]

Notwithstanding the view that performance fees were generally uncommon for investment companies and the fact that the Commission's 1966 PPI Report had not included any specific examples of abuse, there was an effort to justify the extension of the performance fee prohibition by broadly

it over to me; but if you lose, I don't lose anything.' ''); S. Rep. No. 1775, 76th Cong., 3d Sess. 22 (1940) (''Individuals assuming to act as investment advisers at present can enter profit-sharing contracts which are nothing more than 'heads I win, tails you lose' arrangements.'').

[23] *Id.* at 345.

[24] 1967 Senate Hearings, *supra* note 17, at 897.

[25] S. Rep. No. 1351, 90th Cong., 2d Sess. 43–45 (1967). The Commission's views at the time that performance fee arrangements at registered investment companies were increasing was based on an increase in the registration of such companies, which coincided with litigation where a federal court found that a New York Stock Exchange rule prohibiting advisory services ''based on the profits realized'' did not apply to registered investment companies. SEC, 35th Annual Report, 14–15, 141–42 (1969) (''1969 SEC Annual Report''). The Commission subsequently furnished Congress with information that, out of 137 registered investment companies with performance fee arrangements, 48 allowed the adviser to earn a bonus for good performance without imposing a penalty for poor performance, and another 45 had performance fee arrangements where the potential rewards were substantially greater than the penalties. *Mutual Fund Amendments: Hearings before the Subcomm. on Commerce and Finance of the House Comm. on Interstate and Foreign Commerce on H.R. 11995, S. 2224, H.R. 13754 and H.R. 14737,* 91st Cong., 1st Sess. 207 (1969).

referencing the legislative history from the Investment Company Act's and Advisers Act's original enactments.[26] The Commission's Chairman at the time echoed the earlier characterization of performance fees as a 'heads, I win; tails, you lose' arrangement and opined that performance fees inherently lead to excessive risk-taking by investment advisers, such that Congress should act to ''protect fund clients'' in the growing investment company industry and ''insulate investment company shareholders from arrangements that give investment managers a direct pecuniary interest in pursuing high risk investment policies.'' [27]

The proposed extension of the performance fee prohibition to advisory contracts with registered investment companies was met with some scrutiny and skepticism by the investment advisory industry and other stakeholders, including criticism that the proposal had received insufficient deliberation and that prohibiting performance-based compensation was inconsistent with the Commission's recognition in other contexts that the quality of investment advisory services is ultimately reflected by performance. One investment adviser objected that ''[a]s far as we can determine little or no attention has been directed to the proposed amendments [to the performance fee prohibition] either during the hearings, in the press or otherwise.'' [28] After discussions with the Investment Company Institute and other industry representatives, Congress added a narrow exception for a limited type of performance-based fee (commonly called a ''fulcrum fee'') to the pending extension of the performance fee prohibition to registered investment companies.[29]

Under the new fulcrum fee exception, advisory contracts that based any part of the adviser's compensation on a percentage of a company's (or other client's) capital gains or appreciation would be prohibited, but fulcrum fees that increased and decreased proportionately on the basis of the company's investment performance (over a specified period and measured against an appropriate securities index or other appropriate measure of performance) would be permissible. Using a fulcrum fee, an adviser would thus be permitted to receive its ''baseline'' fee only at the point that the fund's performance equaled the index or other appropriate measure. Fulcrum fees were intended to address the notion that an adviser with a performance fee arrangement did not face any downside and share in the otherwise excessive risk that might be incentivized by performance-based compensation.

Despite further objections from some stakeholders,[30] Congress enacted a version of the bill extending the prohibition on performance fees to advisory contracts with registered investment companies, with a narrow exception for fulcrum fees.[31] However, Congress also amended the Advisers Act to include new section 206A, which authorized the Commission, by rulemaking on its own motion or by order upon application, to exempt conditionally or unconditionally any person or transaction (or class or classes of persons or transactions) from any provision in the Advisers Act, if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and the provisions of the Advisers Act.[32] This broad exemptive authority was intended to provide the Commission with greater flexibility to appropriately administer the Advisers Act in light of the broader coverage of the Advisers Act to investment advisers of registered investment companies, and it accordingly mirrored the general exemptive authority that the Commission already had with respect to the Investment Company Act under section 6(c) thereof.[33]

Congress specifically contemplated the potential application of section 206A's exemptive authority to exempt persons in appropriate circumstances from the registration requirements of section 203 and from the performance fee prohibition in section 205, each of which were newly being applied to advisers of registered investment companies.[34]

---

[26] *Cf.* Chairman Cohen Address, *supra* note 18 (''[F]ee structure has provided a real opportunity for the exercise of the ingenuity for which fund managers have established an enviable reputation. . . . A current and developing fashion seems to be the performance fee. An appealing case can be made for the proposition that the man who does well for the fund he manages is entitled to extra compensation measured by the quality of his performance. But, apart from the problem of establishing appropriate yardsticks against which to measure performance, a difficult problem which has not as yet been resolved, we must not overlook the dangers inherent in certain types of incentive fees which led the Congress in the Investment Advisers Act of 1940 to prohibit compensation for investment advisers based on a percentage of the gains achieved by their clients. These considerations are equally matters of concern in the investment company area today.'').

[27] *See* 1967 Senate Hearings, *supra* note 17, at 111. Because advisory contracts with private clients were not excepted under section 205 at the time, the Commission also characterized the extension as making applicable to advisers of registered investment companies the prohibition on performance fees then-applicable to advisers of private clients. 1969 SEC Annual Report, *supra* note 25, at 15.

[28] *Investment Company Amendments Act of 1969: Hearings before the Comm. on Banking and Currency,* 91st Cong., 1st Sess. 421 (1969) (''1969 Senate Hearings''). *Cf.* 1967 Senate Hearings, *supra* note 17, at 253 (''The Commission . . . indicates that in the securities field, the quality of service means performance. . . . Despite this recognition of the significance of relating compensation to performance the Commission apparently is reluctant to put this relationship into practice. It has recommended that the Investment Advisers Act be amended to outlaw compensation on the basis of a share of capital gains or appreciation of the funds—although such a fee clearly would be most directly tied to performance. This suggests an odd discrepancy between recommended theory and recommended practice.'') (from ''Implications of the Rate-Making Proposals of the SEC in the Mutual Fund Industry'' by Sidney Robbins, Professor of Finance, Graduate School of Business, Columbia University).

[29] *See Investment Company Act Amendments of 1967: Hearings before the Subcomm. on Commerce and Finance of the House Comm. on Interstate and Foreign Commerce on H.R. 9510, H.R. 9511,* 90th Cong., 1st Sess. 79 (1968) (noting that the shift from an absolute prohibition on performance fees to permitting a fulcrum fee occurred subsequent to discussions with the Investment Company Institute).

[30] *See, e.g.,* 1969 Senate Hearings, *supra* note 28, at 422 (''[T]he real problem today should not be fear of the 'heads I win, tails you lose' investment adviser, since even without prohibitory legislation, the present competitive nature of the business would make it hard for such an adviser to survive. The real danger is that a misunderstanding of the fundamental problem and a lack of interest on the part of much of the mutual fund industry could effectively destroy the incentives available to the 'put your money where your mouth is' type of money manager, the investment adviser who is not afraid to tie his fees to his investment results. There is no question that such type of adviser poses a competitive threat to the more traditional fund manager whose fees depend solely upon the amount of money managed. It is understandable, therefore, that the Investment Company Institute and many other spokesmen for the industry might not be overly concerned with the proposed amendments to section 205.'') (statement of John M. Hartwell, President of Hartwell Management Co.).

[31] Investment Company Act Amendments of 1970, Public Law 91–547, 25, 84 Stat. 1413 (1970) (codified at 15 U.S.C. 80b–5(b)(1)). The exception for appropriate fulcrum fees is available with respect to an advisory contract with a client that is a registered investment company or any person ''except a trust, governmental plan, collective trust fund, or separate account referred to in section 3(c)(11) of [the Investment Company Act],'' provided that the advisory contract with such a person relates to the investment of assets in excess of $1 million.

[32] *Id.* at § 26 (codified at 15 U.S.C. 80b–6a).

[33] *See, e.g.,* H.R. Rep. No. 1351, 90th Cong., 2d Sess. 43–45 (1967); *Investment Company Amendments of 1969: Analysis of S. 34,* 91st Cong., 1st Sess. 29 (1969) (''The proposed amendment [to add new section 206A] would be the counterpart of section 6(c) of the Investment Company Act, which gives the Commission broad power to exempt any person, transaction, or security from any provision of that statute. The flexibility which this amendment would introduce into the administration of the Advisers Act is appropriate in view of the broader coverage provided for by this bill.'').

[34] *See id.* (''Under proposed section 206A, the Commission would in appropriate cases be able to exempt persons from the registration requirements

Over the next decade, the Commission used its exemptive authority under section 206A to issue several orders conditionally exempting certain performance fee arrangements in advisory contracts with certain clients.[35] These conditional exemptions were generally subject to objective client eligibility requirements relating to both minimum client income or net worth and minimum amounts invested with the adviser.

In 1980, Congress added another statutory exception to the performance fee prohibition, permitting advisers to business development companies (''BDCs'') to include performances fee arrangements in their advisory contracts, provided that the fee did not exceed 20% of the BDC's net realized capital gains over a defined period and the BDC did not have other incentive compensation structures in place.[36] This exception was part of broader legislation to incentivize venture capital investing in small businesses and accordingly allowed BDCs, which were engaged in that type of investment, to receive performance-based compensation similar to that charged by advisers to private venture capital funds, subject to meaningful structural constraints designed to align adviser and investor interests.

2. Initial Rule 205–3 Adoption and Subsequent Section 205 Amendments

Based partly on its experience using its authority under section 206A to approve individual exemptive orders related to performance fees, the Commission used its rulemaking authority thereunder in 1985 to propose and adopt a generally applicable exemptive rule to the performance fee prohibition as rule 205–3 under the Advisers Act.[37] As originally adopted, rule 205–3 permitted an adviser to charge performance fees to a client that had at least $500,000 in assets under management with the adviser or had a net worth of at least $1,000,000, departing from some of the Commission's earlier orders that had required both a minimum client net worth and a minimum investment amount as conditions for exemptive relief.[38] If the client was a private or registered investment company or business development company, rule 205–3 required the adviser to ''look through'' the company and apply these net worth and investment minimums to each of its equity owners. This requirement expressly covered clients that were registered investment companies, which were thus provided with their first alternative to the statutory fulcrum fee exception for performance fee arrangements with their advisers.[39] The Commission ''concluded that it is consistent with the protection of investors and the purposes of the [Advisers] Act to permit clients who are financially experienced and able to bear the risks associated with performance fees to have the opportunity to negotiate compensation arrangements which they and their advisers consider appropriate.'' [40] To provide ''alternate safeguards to the statutory prohibition,'' however, rule 205–3 at the time also required that performance fee contracts include certain provisions concerning the appropriate calculation of performance fees, and that advisers provide certain disclosures to their clients regarding potential conflicts of interest, the periods and any index used to measure performance for purposes of the fee, and, if relevant to the fee's calculation, the valuation of unrealized appreciation of securities for which market quotations are not readily available.[41]

In 1992, the staff of the Commission's Division of Investment Management (the ''Division'') issued a report recommending that the existing exemptions from the performance fee prohibition be expanded to generally permit performance fees in advisory contracts with institutions or otherwise financially sophisticated clients, as well as with foreign clients, whether sophisticated or unsophisticated.[42] In the report, the Division acknowledged that the ''existing exemptions . . . preclude the use of performance fees in advisory contracts in a number of situations, even where the clients are institutions and otherwise sophisticated.'' [43] In particular, whereas the fulcrum fee exception requires advisers to ''structure their performance fee arrangements to increase and decrease proportionately[, m]any institutional investors, however, prefer to structure performance fee arrangements with a low base fee, with satisfactory performance resulting in additional compensation,'' which arrangement ''does not qualify as a fulcrum fee.'' [44] In this regard, the Division expressed its view that, ''where a client appreciates the risk of performance fees and is in a position to protect itself from overreaching by the adviser, the determination of whether such fees provide value is best left to the client.'' [45] With respect to sophisticated and unsophisticated foreign clients, the Division stated its belief that the Advisers Act's performance fee prohibition ''likely reduce[s] the ability of domestic advisers to compete effectively with foreign advisers in foreign markets'' where performance fees may not be restricted.[46]

The Division explained these views by acknowledging various criticisms of the performance fee prohibition, noting that the prohibition ''always has been controversial.'' [47] These included criticisms that performance fee arrangements rationally align advisory and client interests by linking adviser compensation to client investment performance, encourage the establishment of new and smaller advisory firms, incentivize advisers to service smaller client accounts that may otherwise not have access to advisory services, and function to reduce advisory costs during periods of market decline.[48] The Division concluded that it ''believe[d] that some of the criticisms of the performance prohibition [were] valid and that modification of the

of proposed section 203 and from the ban on performance-based advisory compensation in proposed section 205(1) of the Advisers Act if and to the extent such action is appropriate in the public interest and consistent with the protection of investors and the policy of the [A]ct.''); S. prohibition is warranted.'' [49] Consequently, the Division recommended that Congress amend section 205 to specifically authorize the Commission to unconditionally exempt advisory contracts with any person whom the Commission determines to not need the protections of the prohibition and contracts with foreign clients.

Four years later, in 1996, Congress amended the Advisers Act to add new statutory exceptions for advisory contracts with clients that are companies excepted from the definition of ''investment company'' by section 3(c)(7) of the Investment Company Act or that are foreign residents, as well as new section 205(e).[50] Following the Division's earlier recommendation, section 205(e) provides that the Commission may conditionally or unconditionally exempt any person or transaction (or class or classes of persons or transactions) from the performance fee prohibition in section 205(a)(1), provided that the exemption relates to an advisory contract with ''any person that the Commission determines does not need the protections'' of the prohibition ''on the basis of such factors as financial sophistication, net worth, knowledge of and experience in financial matters, amount of assets under management, relationship with a registered investment adviser, and such other factors as the Commission determines are consistent with'' section 205.[51] As the Commission has noted, the definition of ''person'' under section 202 of the Advisers Act includes companies, which in turn includes investment companies, for purposes of section 205.[52]

3. Current Rule 205–3

Shortly following the addition of section 205(e) to the Advisers Act in 1996, the Commission used its expanded rulemaking authority to propose (in 1997) and adopt (in 1998) amendments to rule 205–3, giving shape to the rule in its current form.[53] These amendments eliminated the specific contractual and disclosure requirements relating to performance fees that were previously explained in 1985 as ''alternative safeguards'' to the statutory prohibition, because the Commission ultimately viewed these requirements as in practice ''hav[ing] inhibited the flexibility of advisers and their clients in establishing performance fee arrangements beneficial to both parties'' and, moreover, as unnecessary in light of the other protections provided by the Advisers Act.[54] The amendments also expanded the eligibility criteria for clients to which investment advisers could charge performance fees, with clients that satisfied the new eligibility criteria referred to by the rule as ''qualified clients.''

Under rule 205–3 as amended in 1998, qualified clients to which an investment adviser may charge a performance fee include: (1) clients that meet a minimum net worth or assets-under-management requirement, with the threshold amounts from original rule 205–3 inflation-adjusted from $1,000,000 to $1,500,000 for the net worth test and from $500,000 to $750,000 for the assets-under-management test; [55] (2) clients that are ''qualified purchaser[s]'' under section 2(a)(51)(A) of the Investment Company Act; and (3) clients that are certain executive officers or employees of the adviser who actively participate in the investment activities of the adviser, similar to the category of ''knowledgeable employees'' eligible to invest in section 3(c)(1) and 3(c)(7) companies in accordance with rule 3c–5 under the Investment Company Act.[56] With respect to the addition of qualified purchasers as a category of clients eligible for performance fees, the Commission explained that, although persons that have the $5,000,000 in investments required to be a qualified purchaser under section 2(a)(51)(A) generally should separately satisfy the lower minimum net worth or minimum assets-under-management thresholds under rule 205–3, they may in certain cases not meet the lower thresholds because of different approaches to accounting for indebtedness between these provisions.[57] In light of the 1996 amendments' addition of section 3(c)(7) companies (*i.e.,* privately-offered qualified purchaser pools) to the statutory exceptions for the performance fee, the addition of qualified purchasers themselves to rule 205–3 filled an eligibility gap to provide qualified purchasers and their advisers with the flexibility to enter into performance fee contracts outside of the context of a section 3(c)(7) private fund.[58] Regarding the addition of certain knowledgeable employees as a category of qualified clients, the Commission stated that an adviser's officers and ''employees who actively participate in the investment activities of the adviser are likely to be sophisticated financially and do not need the protections of the performance fee prohibition,'' [59] consistent with its authority under section 205(e) to consider ''whether a client may not need the protections of the performance fee prohibition by virtue of the client's relationship with the adviser,'' in addition to other criteria.[60]

The Commission retained ''look-through'' treatment for clients that are private or registered investment companies or business development companies, requiring each equity owner thereof that would be charged a performance fee to fall into one of the three categories of qualified client in order for the company itself to be a qualified client under the rule.[61] Some commenters objected to the application of the look-through requirement in contexts where the financial sophistication of an independent fund representative could be expected to adequately protect investors' interests by enabling the negotiation of performance fees at arm's length with the adviser, consistent with the exemption provided by rule 205–3.[62] Although the Commission did not expressly disagree with this view, the Commission determined ''not to eliminate the look through provision of the rule at this time'' but clarified that it would still ''entertain requests for relief from the application of the look through provision in circumstances where the policies and purposes of

section 205 of the Advisers Act would not be served by its application.'' [63]

In 2011, the Dodd-Frank Wall Street Reform and Consumer Protection Act (''Dodd-Frank Act'') amended section 205(e) of the Advisers Act to provide that, by July 21, 2011, and every five years thereafter, the Commission shall, by order, adjust for the effects of inflation the dollar amount thresholds included in rules issued under section 205(e), rounded to the nearest multiple of $100,000.[64] As of June 29, 2026, the dollar amount threshold of the assets-under-management test is $1,400,000, and the dollar amount threshold for the net worth test is $2,700,000.[65]

B. Performance-Based Compensation: Current Practices

The current exceptions to and exemptions from the performance fee prohibition have led to a patchwork of permitted performance fee arrangements and practices in the asset management industry. As detailed above, current section 205 and rule 205–3 under the Advisers Act operate to permit certain performance fee arrangements largely conditioned on the relevant advisory client's legal type or form (*e.g.,* the legal classification of a client fund managed by the adviser), rather than on an investor's ability to evaluate and bear the risks of an investment product with performance fees.[66] Specifically, the current use of performance fees can depend on the following classifications:

- whether the client is a registered investment company or any person (other than a trust, governmental plan, collective trust fund, or separate account referred to in section 3(c)(11) of the Investment Company Act, which covers most employee benefit plans) with at least $1 million in assets managed by the adviser, *provided that* in each instance an appropriate fulcrum fee is used;
- whether the client is a BDC, *provided that* the performance fee is structured to meet specific statutory conditions;
- whether the client is a section 3(c)(7) qualified-purchaser private fund;
- whether the client is a non-U.S. resident; or
- whether the client (or its equity owners, as applicable) is a ''qualified client,'' *e.g.,* a high net worth individual with a separately managed account.

These exceptions to and exemptions from the performance fee prohibition conditioned on a client's legal classification have in practice confined the use of performance fees behind the requirements for such classifications, including applicable investor eligibility requirements. Particularly, the use of performance fees has long been a defining characteristic of the private fund industry, which has experienced tremendous asset growth over the last decades.[67] Investors that do not meet the eligibility requirements for these performance-fee investment products have had limited opportunities for exposure to their underlying investment strategies and for participation in their asset growth.[68]

However, performance fee arrangements have come to reflect a matured industry practice that can offer a rational and effective means of aligning adviser and investor interests, as well as incentivizing outperformance and rewarding specialized advisory expertise. This is particularly true as performance fees have evolved over time through commercial negotiations to commonly include features designed to mitigate the prospect of conflicted or otherwise excessive risk-taking and more closely align adviser and investor interests (*e.g.,* distribution waterfalls with preferred return and high-water mark rates, catch-ups, and agreed-upon valuation procedures, as applicable to the particular investment strategy). Although initially developed through negotiations between advisers and sophisticated institutional investors, these features have since become commonly adopted across performance fee arrangements offered to private fund investors.[69]

Private funds that are offered exclusively to investors that are ''qualified purchasers'' with generally at least $5,000,000 in investments in accordance with section 3(c)(7) of the Investment Company Act fall under the broad statutory exception to the performance fee prohibition set forth in section 205(b)(4) of the Advisers Act. As such, performance fee arrangements are most commonly and freely used in section 3(c)(7) qualified-purchaser private funds, causing investment strategies generally associated with performance fees, such as private equity, hedge fund, and venture capital strategies, to be offered largely through these types of clients (and hence through some of the most investor eligibility-restricted investment products).

Unlike section 3(c)(7) private funds, private funds that are offered to fewer than one hundred persons in accordance with section 3(c)(1) of the Investment Company Act do not generally qualify for a statutory exception under section 205(b) of the Advisers Act. Instead, a section 3(c)(1) private fund and its adviser can rely on the client-identification or ''look-through'' provision in rule 205–3(b) to enter into a performance fee arrangement if each of the fund's relevant equity owners is a ''qualified client'' under the rule (*e.g.,* a person with at least $1,400,000 managed by the adviser or a net worth of at least $2,700,000, or a knowledgeable employee of the adviser).[70] Similar to section 3(c)(1) private funds, a regulated fund and its investment adviser may likewise currently enter into a performance fee arrangement if each of the regulated fund's relevant equity owners is a ''qualified client'' under rule 205–3.

Because section 3(c)(1), like section 3(c)(7), requires that a relying fund ''is not making and does not presently propose to make a public offering of its securities,'' section 3(c)(1) funds are generally privately offered to U.S. investors in reliance on section 4(a)(2) of the Securities Act and the non-exclusive safe harbors and exemptions provided by Regulation D.[71] Private

[66] As noted above, compensation arrangements based on measures of performance other than capital gains or capital appreciation are also not prohibited, such as with respect to investment strategies where gains are sought primarily in the form of interest, ordinary income, or dividends. *See supra* note 12.

[67] Based on Form ADV reporting data, as of the end of 2025, private fund assets have increased from $11.9 trillion to $36.8 trillion in the preceding ten years alone.

[68] *Cf.* Democratizing Access to Alternative Assets for 401(k) Investors, E.O. 14330 (Aug. 7, 2025) [90 FR 38921 (Aug. 12, 2025)] (stating that the vast majority of investors in employer-sponsored defined-contribution plans ''do not have the opportunity to participate, either directly or through their retirement plans, in the potential growth and diversification opportunities associated with alternative asset investments'' and directing the Commission to ''facilitate access to investments in alternative assets,'' including ''consideration of revisions to existing SEC regulations and guidance relating to accredited investor and qualified purchaser status'').

[69] *Cf.* Institutional Limited Partners Association, ILPA Principles 3.0: Fostering Transparency, Governance and Alignment of Interests for General and Limited Partners (June 2019).

[70] Investors that are qualified clients by virtue of their status as qualified purchasers are eligible to invest in a section 3(c)(7) qualified-purchase private fund rather than a section 3(c)(1) private fund.

[71] 17 CFR 230.500–508 (''Regulation D'').

offerings to U.S. investors in reliance on rule 506(b) of Regulation D may be made to up to 35 non-accredited investors (in any 90-calendar-day period) and to an unlimited number of ''accredited investors,'' a definition that includes, among other qualifying criteria, entities with over $5,000,000 in assets or investments and individuals with net worths of over $1,000,000 (excluding their primary residence) or incomes of over $200,000 (individually) or $300,000 (with a spouse or spousal equivalent).[72] Some private funds have also begun to rely on rule 506(c) of Regulation D, which requires that the issuer take reasonable steps to verify accredited investor status of all investors and does not permit any non-accredited investors. Section 3(c)(1) private funds that rely on Regulation D and seek to enter into performance fee arrangements are thus generally subject to separate qualified client and accredited investor asset tests to determine investor eligibility. In addition to these distinct investor eligibility requirements, the requirement that a section 3(c)(1) fund have not more than one hundred beneficial owners necessarily limits the potential scale of these funds, which may limit the incentive for investment advisers to sponsor investment products that utilize them and, in turn, the ultimate availability of these investment products to investors.

The option to use a fulcrum fee in accordance with section 205(b)(2)(B) of the Advisers Act may be available with respect to section 3(c)(1) private funds (if their advisory contracts relate to assets of at least $1,000,000) and regulated funds. However, the inflexibility of the fulcrum fee model and its concomitant operational risks have contributed to its lack of substantial adoption in the industry. Based on available industry data, in 2026 only approximately 1% of registered funds used a fulcrum fee, indicating the model's limited appeal as a practical matter.[73]

Specifically, the symmetrical nature of the fulcrum fee model can lead to unanticipated operational consequences for an adviser and its fund client. The model requires that the fulcrum fee ''provide for increases and decreases in compensation which are proportionate to each other,'' so that the potential upside performance adjustment must equal the potential downside performance adjustment in absolute terms.[74] As a result, the potential for unpredictable changes in a fund's net assets (upon which a fulcrum fee must be calculated) because of factors other than its relative performance (*e.g.,* due to a general declining or rising asset environment that impacts the fund's portfolio to a different extent than it does its chosen benchmark or due to fund redemptions or purchases over the period) can in practice make the total advisory fees paid by the fund unpredictable.[75] Accordingly, fund advisers may face pressure to increase their fulcrum fee's base fee (*i.e.,* the fee earned when performance is equivalent to the fund's benchmark index) and/or limit the possible extent of their upside and downside performance adjustments in order to ensure more reliably that they receive a level of compensation adequate to continue their advisory operations in an economically feasible manner. Otherwise, they risk receiving a minimal level of compensation—or even zero or negative compensation, depending on the applicable fulcrum fee and performance adjustment schedule—that could be inadequate to meet an adviser's own ongoing expenses necessary for its continued operation and provision of services to its client funds, which can in turn precipitate their closures and liquidations. Although unpredictable changes in a client fund's net assets can impact the compensation level of any fund adviser with an asset-based fee, including advisory fees that are not performance fees, the fulcrum fee's requirement for strictly proportional performance adjustments can exacerbate these impacts and heighten the risk of receiving inadequate compensation to address operational challenges.[76]

Additionally, the frequency of compensation under a fulcrum fee model can likewise cause operational difficulties, as the fulcrum fee exception generally requires that the period used for calculating the base fee must be the same as the period used for purposes of calculating the performance adjustment.[77] This can cause a mismatch between the operational needs of the adviser to receive compensation more regularly (*e.g.,* quarterly) than may be desired for a meaningful performance period (*e.g.,* yearly). Although rule 205–2(c) under the Advisers Act provides some flexibility in this respect to use a rolling performance period for purposes of calculating the performance adjustment while using the most recent subperiod of that performance period for purposes of calculating the base fee,[78] the use of two different periods can in practice result in actual fees that greatly differ from the predictable advisory fees that advisers and funds may anticipate.

In sum, the fulcrum fee model's inflexibility has limited its adoption among regulated funds. More broadly, as a result of the general statutory prohibition on performance fees paired with the rigidity of the fulcrum fee exception, the regulated fund industry has been prevented from developing more competitive fee structures, including, for instance, adapting features from performance fee arrangements that have evolved in the private fund industry to address the prospect of conflicted or otherwise excessive risk-taking that originally animated the performance fee prohibition. Instead, advisory fees for registered investment companies are

[72] Rule 501(a) of Regulation D. In addition to the net worth and income criteria, the current accredited investor definition includes individuals who are directors, executive officers, or general partners of the issuer; are a ''family client'' of a ''family office''; hold certain professional certifications; or are ''knowledgeable employees'' of the issuer (if the issuer is a private fund). *See* Rule 501(a)(4), (10), (11), and (13). For entities, in addition to entities with over $5,000,000 in assets or investments, certain financial institutions, certain insurance companies, business development companies, entities in which all of the equity owners are accredited investors, and ''family offices'' are also accredited investors. *See* Rule 501(a)(1), (2), (8), and (12).

[73] This approximation is derived from an assessment of data obtained from Morningstar Direct as of June 10, 2026.

[74] S. Rep. No. 184, 91st Cong., 1st Sess. 45 (1969).

[75] *See, e.g.,* Redmond Growth Fund, Inc., SEC No-Action Letter (pub. avail. Apr. 30, 1974) (granting no-action letter to a fund in connection with its transition to a fulcrum fee arrangement, where its adviser would not receive any advisory fee and would pay monies to the fund, if the performance adjustment resulted in a total advisory fee of less than zero). *See also* Andrew J. Donohue, *Speech by Staff: Keynote Address at the Independent Directors Council Investment Company Directors Conference* (Nov. 12, 2009) (''What advisers sometimes fail to realize, however, is that when the base fee is calculated on current level net assets, the adviser runs the risk of having to reimburse the fund when there is a significant decline in assets coupled with poor performance'').

[76] *See* J. W. Murphy *et al.,* Mutual Fund Performance Fees: Perspectives After More Than 40 Years, The Investment Lawyer, Vol. 26, No. 5 (May 2019) (discussing some of the practical issues faced by advisers and fund boards that seek to implement fulcrum fees).

[77] *See* section 205(b)(2)(B) and rule 205–2(b).

[78] *See* rule 205–2(c). In effect, rule 205–2(c) provides that the periods for calculating the fulcrum fee's base fee and its performance adjustment may differ if: (1) the performance-related portion of the fee is computed on the basis of net asset value averaged over a rolling period (*e.g.,* 12, 24 or 36 months); (2) the base fee is computed on the basis of net asset value averaged over the most recent subperiod of the performance period (*e.g.,* a month, quarter or semi-annual period); and (3) the total advisory fee (*i.e.,* both the base fee and the performance adjustment) is paid at the end of each subperiod.

generally based solely on their net asset value, where an adviser's compensation is principally a function of their client funds' size, which, while reflecting asset accumulation that can result from strong performance, may not isolate investment performance as a direct driver of compensation.

Allowing other kinds of performance fees for registered investment companies would provide investors with the opportunity to select funds where adviser compensation is more directly tied to investment performance and ultimately the returns generated for shareholders. For instance, allowing advisers to be compensated commensurate with the investment gains they generate for shareholders rather than solely based on accumulated assets may promote capital formation in capacity-constrained strategies, where advisers limit assets under management to preserve investment efficacy, but where meaningful return opportunities nonetheless exist.[79]

II. Discussion

A. Expansion of the Ability of Investment Advisers To Charge Performance-Based Compensation to RICs and BDCs

The proposal would amend the qualified client definition in rule 205–3 to expand the ability of investment advisers to regulated funds to enter into investment advisory contracts with performance-based compensation arrangements, provided the following conditions are satisfied:

- The performance-based compensation does not exceed 20% of the regulated fund's net gains over a specified period;
- The regulated fund satisfies rule 0–1(a)(7) under the Investment Company Act (the ''fund governance standards''); and
- The regulated fund's board, including a majority of independent directors, determines that the performance-based compensation arrangement is in the best interest of the regulated fund and its shareholders and makes specific findings regarding the arrangement's appropriateness, structure, and investor protection features.

As discussed above, the prohibition in section 205(a)(1) of the Advisers Act was primarily designed to protect investors who lack the sophistication and bargaining power to evaluate performance fees from the prospect of excessive risk-taking by investment advisers.[80] Regulated funds operate within a comprehensive regulatory framework that provides for a number of investor protections, including, among other features, board oversight, shareholder approval rights, leverage limits, and mandatory disclosure and reporting obligations. Notably, with respect to advisory compensation, the Investment Company Act requires regulated fund boards to annually evaluate and approve the reasonableness of the advisory fees paid to the regulated fund's adviser.[81] The proposed amendments would leverage the existing investor protection framework under the Investment Company Act and the Advisers Act and incorporate conditions tailored to mitigate the risks associated with performance-based compensation arrangements.

1. Scope of Amended Exception

The proposed rule amendments would apply to investment advisers of a registered management investment company or BDC.[82] The amended rule would therefore apply to investment advisers of open-end management investment companies (''registered open-end funds''), such as exchange-traded funds and mutual funds, as well as registered closed-end management investment companies, such as interval funds and tender offer funds. The proposed amendments would apply to investment advisers of regulated funds that are listed for trading on an exchange and those that are unlisted.

We are not, however, proposing to include contracts with unit investment trusts (''UITs'') within the scope of the proposed amendments. Unlike management investment companies and BDCs, UITs are organized under a trust indenture or similar instrument and do not have a board of directors or other governing body responsible for ongoing management of the trust. Because the proposed amendments are premised on the existence of a board of directors capable of exercising ongoing oversight, we have not proposed to extend the scope of the amendments to contracts with UITs. In addition, we are not proposing to include within the scope of the rule amendments contracts with separate accounts that are registered management investment companies offering variable annuity contracts registered on Form N–3 because such separate accounts typically function as pass-through vehicles that allocate contract holder assets to underlying management investment companies registered on Form N–1A, where active portfolio management occurs and to which the proposed amendments would already apply.

Although section 205(b)(3) of the Advisers Act provides an exception to the prohibition on charging performance-based compensation for certain contracts with BDCs, our proposal would allow investment advisers of BDCs to rely on the amended rule. We do not see a basis to differentiate between contracts with BDCs and contracts with registered management investment companies for purposes of the proposed amendments, as BDCs employ investment strategies similar to those of many registered management investment companies and are subject to a substantially similar regulatory framework, which includes the requirement to have a board of directors.

We are not proposing to limit the availability of performance-based compensation arrangements to contracts with registered closed-end funds or BDCs that focus their investments in private markets. Currently, performance-based compensation arrangements are most closely associated with private market-oriented strategies, such as private equity, private credit, hedge fund strategies, or other alternative asset approaches. Registered closed-end funds and BDCs, rather than registered open-end funds, typically have been perceived as better suited to holding relatively less-liquid private market assets because the liquidity and daily valuation and redeemability requirements for registered open-end funds restrict their ability to allocate a significant portion of their portfolio to less-liquid private market assets. There are varying degrees of liquidity associated with exempt offering products, however. For example, hedge fund strategies, which typically charge both management and performance fees, tend to be more liquid relative to private equity fund strategies, which also commonly charge performance fees.[83]

[79] For example, advisers pursuing investments in public market small- or micro-capitalization companies may limit the total assets deployed in such strategies, as large inflows can impair execution. Under a fee structure based solely on net asset value, an adviser's compensation in such a strategy would be inherently constrained by the capacity limitation, potentially rendering the strategy economically unattractive to offer in a regulated fund notwithstanding its return potential. A performance fee would allow the adviser to be compensated in proportion to the returns generated for shareholders, independent of the strategy's asset ceiling.

Continued

Similarly, innovative regulated funds formed as registered open-end funds could offer complex and differentiated strategies that rely heavily on manager skill, warranting performance-based compensation paid to the adviser. Accordingly, we are proposing to expand the ability of investment advisers to include performance fees in investment advisory agreements with all regulated funds, including registered open-end funds.

We request comment on the scope of the proposed rule amendments that would expand the ability of investment advisers to regulated funds to enter into investment advisory contracts with performance-based compensation arrangements.

1. Should the proposed rule amendments apply to contracts with all regulated funds, or just some subset of regulated funds? For example, should we explicitly exclude registered open-end funds from the amended rule and limit the scope of the proposed amendments to investment advisory agreements with registered closed-end funds and BDCs, considering that these regulated fund types are currently most associated with investing in private markets? Should the proposed amendments apply both to exchange-listed and unlisted regulated funds? Should the rule exclude regulated funds employing passive or index-tracking strategies?

2. Are there operational or administrative challenges unique to registered open-end funds that would make compliance by their advisers with the proposed amendments difficult or impracticable? For example, given that registered open-end funds continuously issue and redeem shares on a daily basis, are there structural or operational characteristics of registered open-end funds that present particular difficulties in implementing or administering performance fee arrangements? If so, how should the proposed rule amendments account for these challenges, and should the Commission consider alternative compliance frameworks or exemptions tailored to the operational realities of registered open-end fund structures?

3. Is there a basis to exclude investment advisers of BDCs from relying on the amended rule? Why or why not?

4. Should the proposed rule amendments apply to UITs? If so, how should the proposed amendments be modified to account for the structural differences between UITs and management investment companies and BDCs?

5. The proposed rule amendments would not apply to contracts with separate accounts that are registered management investment companies offering variable annuity contracts registered on Form N–3. These separate accounts typically allocate contract holder assets to underlying management investment companies where the active portfolio management occurs, and thus do not generally have an investment adviser whose managerial skills are relevant to the strategy. Should contracts with separate accounts that are registered management investment companies be included in the proposal? Why or why not? Are there any special considerations that would be important to address if such registered management investment companies were included in the proposal?

6. Should the Commission provide guidance on ''capital gains'' or ''capital appreciation'' or any other terms used in section 205(a) or rule 205–3 or define those terms by rule? Are there ways in which performance-based compensation calculated using risk-adjusted, market-relative returns (such as alpha) could be structured in a manner that falls outside the statutory scope of capital gains and capital appreciation under section 205(a)(1)? If so, what specific methodological, contractual, or economic features would distinguish such metrics from capital gains and capital appreciation?

2. Conditions

The proposed rule amendments would expand the ability of investment advisers to include performance fees in investment advisory agreements with regulated funds, permitting the adviser to align its economic incentives with the interests of the regulated fund and its shareholders by linking a portion of the adviser's compensation to the fund's investment performance. The proposed rule amendments would subject the adviser to certain conditions that are designed to protect regulated funds and their shareholders.[84] By conditioning compliance on limiting the maximum level of performance fees, mandating independent board oversight, and requiring a board determination that the compensation arrangement serves the best interests of the fund and its shareholders, the proposed rule amendments are intended to mitigate the potential for excessive risk-taking and speculation that prompted Congress to apply the general prohibition in section 205 of the Advisers Act to advisory agreements with regulated funds. We discuss each of the conditions below.

a. The Performance-Based Compensation Does Not Exceed 20% of the Regulated Fund's Net Gains Over a Specified Period

The current statutory exception on the performance fee prohibition for BDCs reflects a congressional judgment that investment advisers to certain investment vehicles should be permitted to receive performance fees, subject to certain conditions that protect investors from excessive fees.[85] Specifically, Section 205(b)(3) permits an investment adviser to a BDC to receive compensation based on a share of capital gains, not to exceed 20% of realized capital gains upon the funds of the BDC over a specified period or as of definite dates (computed net of all realized capital losses and unrealized capital deprecation). Congress calibrated the 20% ceiling to the then-prevailing market practice for private equity and venture capital funds, while providing investors with a statutory limit above which performance fees could not be increased by contractual negotiation.[86] In addition, considering that venture capital and private equity funds typically compensate managers through performance fees triggered upon the realization of portfolio gains, Congress designed section 205(b)(3) to apply only to the realized gains of BDCs.[87]

The proposal draws on this statutory framework as the conceptual foundation for a new condition in the amended rule, which would allow compensation to the investment adviser on the basis of a share of the capital gains upon, or the capital appreciation of, the funds of a regulated fund, subject to a ceiling of 20% of net capital gains or net capital appreciation over a specified period or as of definite dates.[88] Unlike section 205(b)(3), as applicable to BDCs, the proposed rule amendments would allow an investment adviser to calculate performance fees on net realized and net unrealized capital appreciation. This modification allows flexibility for investment advisers to align their compensation with the total-return experience of investors who typically

advisers (or related persons of investment advisers) may be paid a performance fee or allocation calculated by taking into account unrealized gains. . .'').

[88] *See* proposed rule 205–3(c)(1)(iv)(A).

redeem (or tender shares for repurchase) from regulated funds at net asset value (a price that reflects current unrealized appreciation and depreciation on a mark-to-market basis).[89]

The clause ''over a specified period or as of definite dates,'' which appears in section 205(b)(3) and which we propose to incorporate into the amended rule's exemptive conditions, requires that the advisory contract specify a defined measurement period or reference dates over which net capital appreciation is calculated and against which the adviser's entitlement to performance-based compensation is determined. This measurement window can be a rolling period, such as the fiscal year, a cumulative period calculated from a specified inception date, or discrete valuation dates at periodic intervals. The rule does not propose to mandate a minimum measurement period, consistent with the flexibility afforded by the statutory text in section 205(b)(3).[90]

We request comment on the proposed condition that the performance-based compensation to an adviser for a regulated fund does not exceed 20% of the fund's net capital gains or net capital appreciation over a specified period or as of definite dates.

7. Should the amended rule allow advisers to regulated funds to enter into advisory agreements that include performance fees that exceed 20% of the fund's net capital gains? Conversely, should the proposal include a lower cap (*e.g.,* 10% or 15% of a regulated fund's net capital gains)? Why or why not?

8. Should the amended rule allow advisers to regulated funds to charge performance fees on unrealized gains in addition to realized gains or should the proposed rule permit advisers to regulated funds to charge performance fees on realized gains only? Why or why not?

9. Should investment advisers to BDCs be permitted to charge performance-based compensation on net unrealized capital gains, consistent with the proposed amendments to rule 205–3, or should they be limited to charging performance-based compensation only on net realized gains, as provided by the statutory exception in section 205(b)(3) of the Advisers Act?

10. The proposed amendments would require that performance fees for regulated funds be calculated over ''a specified period'' or ''as of definite dates,'' but do not prescribe a minimum measurement period or minimum interval between measurement dates. Should the amended rule require a specific time period or minimum measurement period over which net capital appreciation is calculated? For instance, should the rule mandate a quarterly, semi-annual, or annual measurement period? Would a mandated minimum measurement period better protect investors by preventing advisers from structuring short measurement windows that obscure volatility or diminish the practical effect of high-water mark and loss carryforward protections? Are those investor protection benefits outweighed by any reduction in flexibility for regulated funds with structural or liquidity reasons to assess performance on a shorter cadence? For regulated funds that currently pay performance fees to their advisers on capital gains or capital appreciation, what measurement periods are typically used in practice, and would a required annual minimum measurement period be consistent with or disruptive to those existing arrangements?

b. Compliance With the Fund Governance Standards

Regulated funds are typically organized and operated by an investment adviser that is responsible for the day-to-day operations of the fund. The adviser is a separate and distinct entity from the regulated fund it advises. This framework presents inherent conflicts of interest and potential for abuses that the Investment Company Act and the Commission have addressed in different ways. The primary manner in which the Investment Company Act and the rules thereunder address this conflict is by giving regulated fund boards, in particular disinterested or ''independent'' directors, an important role in fund governance to look after the interests of regulated fund shareholders and provide an independent check upon the fund's adviser.[91] This framework encourages directors to bring to the boardroom a high degree of rigor and skeptical objectivity to the evaluation of management and its plans and proposals. Certain exemptive rules under the Investment Company Act include a condition that requires regulated funds to comply with rule 0–1(a)(7) under the Investment Company Act, a set of requirements intended to reinforce board independence (the ''fund governance standards'').[92] The fund governance standards require that:

- A majority of a regulated fund's board is made up of independent directors;
- The independent directors of the regulated fund select and nominate any other independent directors;
- Any person who acts as legal counsel for the independent directors of the regulated fund is an independent legal counsel as defined in the fund governance standards;
- The board of directors evaluates at least once annually the performance of the board of directors and the committees of the board of directors, which evaluation must include a consideration of the effectiveness of the committee structure of the fund board and the number of funds on whose boards each director serves;
- The independent directors meet at least once quarterly in a session at which no directors who are interested persons of the fund are present; and
- The independent directors have been authorized to hire employees and to retain advisers and experts necessary to carry out their duties.

These fund governance standards, collectively, are designed to enhance the independence and effectiveness of independent directors and currently are conditions to commonly used exemptive rules under the Investment Company Act that rely on the independent judgment and scrutiny of directors, including independent directors, in overseeing activities that involve inherent conflicts of interest between the funds and their managers.[93] Section 205 of the Advisers Act generally prohibits investment advisers from receiving compensation based on a share of capital gains or capital appreciation of a client's funds. The proposed amendments to rule 205–3 would expand the exemption from this

[93] *See* 2001 Independent Directors Release, *supra* note 92, at n.20 and accompanying text.

prohibition. Consistent with our practice of applying the fund governance standards to other exemptive rules that rely on independent director oversight to address conflicts of interest between regulated funds and their management, we propose to apply the fund governance standards as a condition of the proposed expansion of relief to regulated funds. Compliance with the fund governance standards is appropriate in the context of the negotiation and review of a performance fee arrangement between a regulated fund and its investment adviser that is subject to the proposed amendments to rule 205–3 because a board with a majority of independent directors is better positioned to represent the interest of the fund by more effectively mitigating the potential conflicts of interest inherent in performance fee arrangements. Therefore, proposing to require a regulated fund's board to satisfy the fund governance standards as a condition to the fund being a ''qualified client'' is intended to help ensure appropriate board oversight of any conflicts of interest associated with a performance fee arrangement proposed by the adviser.

We request comment on the proposed requirement that a regulated fund satisfy the fund governance standards as a condition to meeting the definition of a qualified client under the amended rule.

11. Would requiring the regulated fund's board to satisfy the fund governance standards, as a condition to being treated as a qualified client, enhance the independence and effectiveness of the board in negotiating any performance fee arrangement with the fund's adviser?

12. Is the proposed condition that a regulated fund comply with the fund governance standards appropriate? Would it be appropriate to remove reference to the fund governance standards and simply rely on the current requirement that the board of directors, including a majority of disinterested directors, approve the investment advisory contract?

13. Are there certain requirements in the fund governance standards that the proposal should exclude? For instance, should the rule require that disinterested directors meet at least once quarterly in a session at which no directors who are interested persons of the fund are present, as is currently required in the fund governance standards? Alternatively, are there additional fund governance standards we should require in light of the specific conflicts involved in negotiating a performance fee arrangement?

c. Determination by the Board of Directors

The final condition in the proposed rule amendments would require a regulated fund's board of directors to determine, as part of its approval and annual review of an investment advisory contract required under section 15(c) of the Investment Company Act, that the performance-based compensation arrangement is in the best interest of the regulated fund and its shareholders, and to make specific findings regarding the arrangement's appropriateness, structure, and investor protection features.[94]

Section 15(c) of the Investment Company Act requires that the initial approval, and any annual continuance, of an investment advisory contract by a regulated fund be approved by a majority of the fund's board, including a majority of directors who are not interested persons of the adviser.[95] In discharging this responsibility, the board must request and evaluate such information as may be reasonably necessary to evaluate the terms of the advisory contract.[96]

Courts and Commission guidance have stated that this evaluation should encompass what are commonly referred to as the *Gartenberg* factors, which include the nature, extent, and quality of services provided by the investment adviser; the investment performance of the regulated fund and the investment adviser; the costs of the services and the profitability of the advisory relationship to the adviser; economies of scale; and comparisons of advisory fees and services with those of other advisers to similarly situated funds.[97] This annual evaluation process is further reinforced by section 36(b) of the Investment Company Act, which imposes a fiduciary duty on an investment adviser of a regulated fund with respect to the receipt of compensation for services paid by the fund or its shareholders.[98] Because performance-based compensation is a component of the total advisory fee paid to an investment adviser, it is necessarily within the board's existing obligations under both sections 15(c) and 36(b). To the extent applicable, boards already consider performance fees as part of their review of the adviser's total compensation under these provisions.

Section 15(c) contemplates that a fully informed board, particularly its non-interested directors, will scrutinize the regulated fund's advisory relationship on an annual basis, supported by all information reasonably necessary to evaluate the terms of the advisory agreement.[99] For purposes of actions under section 36(b), courts are instructed to give a board's approval of a particular advisory fee arrangement under section 15(c) such consideration as is deemed appropriate under all the circumstances, which may include considerable weight where the board has engaged in a fully informed process in which it requested and considered all material information bearing on the relevant factors identified in *Gartenberg.*[100] Our proposal builds on this framework. By requiring that the board's findings related to the performance fee arrangement be made as part of its section 15(c) review, we are anchoring the timing of the board's review of performance-based compensation to its established section 15(c) process as a matter of practical expediency and to promote coherent, integrated board oversight of the advisory relationship and compensation. This integrated review framework would help ensure that the board evaluates the performance-based compensation within the same deliberative framework that governs all other material terms of the advisory contract, and would help ensure that the appropriateness of a performance fee arrangement will be reassessed annually as the regulated fund's performance, strategy, portfolio composition, and valuation complexity evolve over time. In addition, this approach would allow the board's evaluation of any performance fee arrangement to also include the evaluation of the aggregate

advisory fee burden on fund shareholders, considering that the total cost borne by shareholders reflects the combined effect of any performance fee and base management fee, among other expenses.[101]

The findings required by the proposed amendments to rule 205–3, however, are not simply a restatement of what sections 15(c) and 36(b) already require, nor are they intended to be redundant with those existing obligations. Rather, the proposed rule 205–3 conditions are designed to operate independently of, and in addition to, the board's existing statutory duties, by requiring findings that are more particularized to the specific features of the performance fee arrangement. For example, the proposed rule amendments would require the board to make specific written findings regarding adequacy of investor protection features in the compensation arrangement, such as considerations of a preferred return or a high-water mark. These are targeted findings about the design of the performance fee itself and go beyond the general assessment of whether the adviser's total compensation is excessive or the product of arm's-length bargaining, which is the focus of the *Gartenberg* analysis under section 15(c) and the judicial standard under section 36(b). In other words, while sections 15(c) and 36(b) require a regulated fund's board to evaluate whether the adviser's compensation, considered as a whole, is reasonable and not excessive, the conditions in proposed rule 205–3 require the board, as part of the 15(c) process, to determine whether the features of the performance fee arrangement are appropriately designed and the arrangement is in the best interests of the regulated fund and its shareholders.

The proposed condition requiring that a regulated fund's board, including a majority of independent directors, determines that a performance-based compensation arrangement is in the best interests of the fund and its shareholders provides important investor protections. Unlike an asset-based advisory fee, a performance-based fee could create an economic incentive for an investment adviser to pursue strategies or assume portfolio risks that it might not otherwise take in the absence of the contingent compensation opportunity. This asymmetric incentive structure, where the adviser participates in upside gains but does not share in the downside losses, has the potential to misalign the interests of the adviser with those of fund shareholders. To the extent an adviser would like to rely on the exemptive rule, requiring an affirmative best-interest finding by the board, grounded in written findings addressing certain factors relevant to the evaluation of performance fees, is designed to provide a check against the regulated fund being managed on behalf of the adviser or other affiliated persons of the regulated fund rather than on behalf of its shareholders.

The proposed best interest determination requirement reflects the Commission's view that the board is best positioned to assess whether the specific contours of a proposed compensation arrangement are appropriate for a given regulated fund. This condition is not intended to operate as a basis for Commission staff to substitute their judgment for that of a diligently engaged board. Just as with the section 15(c) process, to the extent that directors have meaningfully considered the relevant factors and obtained sufficient information to evaluate the performance fee arrangement, their approval of the arrangement is entitled to considerable weight. Separately, the ''best interests of the regulated fund and its shareholders'' in this context is not intended to apply to each regulated fund shareholder individually, but rather to the shareholders generally.

The proposed best interest finding by the board would be required to include a written finding addressing the appropriateness of a performance-based compensation arrangement considering such factors as the regulated fund's investment strategy and valuation practices.[102] With respect to a fund's investment strategy, a board would generally need to consider whether the adviser is managing the fund's assets in a manner consistent with the fund's stated strategies, and should be attentive to whether the compensation structure may be incentivizing the adviser to take on excessive risk in pursuit of higher fees to the detriment of fund shareholders. Boards generally also would need to consider whether an adviser may be increasing the volatility of the fund's portfolio beyond what is consistent with the fund's stated investment objectives and strategies, whether to enhance the prospect of exceeding a performance threshold or to influence the timing of when performance fees are earned or crystallized, and whether the arrangement could harm shareholders by exposing them to risks that may not be reflected in the fund's disclosures. Under the proposed best interests finding, a board would need to consider, for example, whether the adviser's portfolio construction, use of leverage, or concentration of positions has materially shifted in a manner that appears inconsistent with the fund's investment strategy, particularly during periods proximate to performance fee measurement dates.

Performance-based compensation arrangements are most closely associated with private market-oriented strategies or other complex or differentiated strategies, such as private equity, private credit, or liquid strategies employing relative value, long/short equity, market arbitrage, or other active management techniques. Because these strategies aim to generate risk-adjusted outperformance and rely heavily on manager skill, compensation contingent on investment results may be reasonably justified. Unlike asset-based management fees, which compensate an adviser based solely on the size of assets under management and may therefore incentivize growth of a fund without regard to investment outperformance of a benchmark, a performance fee, if properly structured, can align the interests of the adviser and fund shareholders by tying a portion of the adviser's compensation to returns that genuinely exceed a meaningful benchmark or create risk-adjusted outperformance. By contrast, fund board approval of a performance fee arrangement in connection with the fund tracking a broad-based securities market index, where the investment strategy is passive or formulaic in nature and where excess returns above a market benchmark are neither the stated objective nor a realistic expectation, would generally seem unjustifiable.

The proposal's requirement that the board make written findings assessing the appropriateness of the compensation arrangement considering the regulated fund's valuation practices is important. For instance, where a fund holds assets for which there are no readily available market quotations, such as many private market investments, the risk that performance-based compensation would be calculated on valuations that depend on subjective inputs is elevated, and the board would need to assess the appropriateness of a performance fee, or the design of any proposed performance fee, given the inherently subjective

[101] Regulated funds have an existing obligation to retain any documents or written information considered by the board in approving the terms of an investment advisory contract under section 15(c) of the Investment Company Act, including board meeting minutes memorializing the directors' consideration of the contract. *See* rules § 270.31a–1(b)(4) and § 270.31a–2(a)(6). This also would include materials related to the board's findings related to performance fees under the proposed amendments to rule 205–3.

[102] *See* proposed rule 205–3(c)(1)(iv)(C)(1).

nature of the valuation of such private market portfolio securities.

This obligation is familiar to boards of regulated funds, as the Investment Company Act and rules thereunder currently require regulated fund boards to oversee a fund's valuation process.[103] The Commission has made clear that this oversight obligation is not passive.[104] Boards are expected to apply a level of scrutiny commensurate with the degree to which the fair value of the regulated fund's portfolio depends on subjective inputs and assumptions rather than objective market-based measures.[105] Accordingly, a regulated fund that invests primarily in private market assets for which no readily available market quotation exists should demand more intensive board oversight of the valuation process relative to a fund whose portfolio consists principally of exchange-traded or other readily marketable securities. The proposed rule condition is designed to complement the existing valuation oversight framework in rule 2a–5 under the Investment Company Act, with particular emphasis on the risks that could arise when fair value of portfolio assets serves as the basis for calculating performance-based compensation.

In addition, the proposed amendments would require the board's written findings to address the basis upon which performance fees are calculated and, specifically, whether fees are determined with reference to realized gains, unrealized gains, or both.[106] This distinction is of material significance to fund shareholders and implicates fairness considerations that the board should evaluate with reference to the particular structural characteristics of the fund:

- On one hand, calculating performance fees on unrealized appreciation and depreciation may better align the investment adviser's compensation with the actual economic experience of fund shareholders, because shareholders in many types of regulated fund structures purchase and redeem shares at net asset value and therefore benefit or suffer from changes in portfolio value that include unrealized components. For these types of regulated funds, a strictly realized-gains-only performance fee could create a misalignment between when the adviser is compensated and when shareholders actually experience the economic results being compensated. Moreover, limiting performance fees to realized gains could create incentives for investment advisers to prematurely dispose of higher performing positions to achieve a higher performance fee, potentially to the detriment of fund shareholders who might otherwise benefit from continued appreciation in those positions.
- On the other hand, the inclusion of unrealized appreciation in the performance fee base could introduce meaningful risks to shareholders. For instance, when a portfolio asset lacks a readily available market quotation, upward movements in the fair value of the illiquid asset could inflate a performance fee base without corresponding economic realization. This risk of such an asset could be compounded in the near term, as shareholders may bear asymmetric performance fees on unrealized appreciation that is subsequently reversed, eroding net asset value without any mechanism for recovery absent contractual protections. Boards should be alert to valuation practices that inflate the performance fee base without corresponding economic substance. For example, a regulated fund's acquisition of private fund interests at a discount to net asset value, followed by an immediate mark to full net asset value calculated by the private fund, can artificially accelerate reported returns and, by extension, performance fee accrual.[107]

The proposed board oversight conditions are intended to provide a framework to guide boards in evaluating whether a regulated fund's valuation practices produce performance fee outcomes that are truly reflective of fund performance and are in the best interests of the fund and its shareholders.

The board's evaluation of the basis upon which performance fees are calculated would also need to account for the structural relationship between the regulated fund's net asset value and any price at which shareholders are able to transact in fund shares, if different from a price based on net asset value. For instance, the board's evaluation may be more complex for exchange-listed regulated funds, whose shares trade on a secondary market at prices that may diverge materially from net asset value. In many cases, such secondary market trading is the only way investors are able to buy and sell the fund's shares. Where a listed regulated fund's shares trade at a persistent discount to net asset value (common for many exchange-listed registered closed-end funds), a performance fee calculated on net asset value may impose a fee burden on fund shareholders that is disconnected from the economic experience of those shareholders in the secondary market. A shareholder who purchased shares at a discount to net asset value and continues to hold at a discount has not realized, and may never realize, the net asset value appreciation on which the performance fee is based. Boards of exchange-listed regulated funds should therefore consider whether performance fee calculations based on net asset value are appropriately calibrated to the actual returns experienced by shareholders transacting in the secondary market, and whether additional structural protections, such as a discount-adjusted fee calculation or enhanced hurdle rate, would be warranted to address this potential misalignment.

While the Commission does not prescribe a single approach, in evaluating whether a performance fee arrangement is in the best interests of the regulated fund and its shareholders, the board would have to consider, and therefore its written findings would have to reflect, an evaluation of the relevant structural features of the regulated fund and their relationship to the performance fee arrangement and the extent to which the proposed performance fee arrangement equitably aligns adviser compensation with shareholder outcomes across the range of circumstances in which shareholders may transact.

A regulated fund's board also would be required to make written findings addressing the measurement period over which performance is assessed.[108] The length of the performance fee measurement period can have a significant impact on the alignment of adviser compensation with fund performance and the interests of shareholders. The measurement period that may be appropriate for a given fund may depend, among other things, on the fund's investment strategy and the time horizon over which the fund's returns are anticipated. A fund's liquidity profile and portfolio turnover, among other factors, may bear on whether a

[103] *See* rule 2a–5 under the Investment Company Act.

[104] *See* Good Faith Determination of Fair Value, Investment Company Act Rel. No. 34128 (Dec. 3, 2020) [86 FR 748 (Jan. 6. 2021)], at text following n.209.

[105] *See id.,* at text accompanying n.213 (stating that ''[a]s the level of subjectivity increases and the inputs and assumptions used to determine fair value move away from more objective measures, we expect that the board's level of scrutiny would increase correspondingly.'').

[106] *See* proposed rule 205–3(c)(1)(iv)(C)(2).

[107] This typically involves a fund relying on the practical expedient to use net asset value to estimate fair value, subject to certain criteria. *See* Financial Accounting Standards Board (''FASB'') Accounting Standards Codification (''ASC'') Topic 820–10–35–59 through 35–62. This practice is sometimes referred to as ''NAV squeezing.''

[108] *See* proposed rule 205–3(c)(1)(iv)(C)(2).

shorter or longer measurement period is consistent with the nature of the fund's investments and the interests of its shareholders.[109] Boards should evaluate the length of the measurement period holistically and in connection with other investor protection features that are incorporated into the performance fee arrangement and could mitigate some of the risks associated with shorter measurement periods (*e.g.,* high-water marks or loss carryforward mechanisms). Accordingly, the board's written findings should reflect a considered assessment of whether the measurement period, viewed in the context of the overall fee arrangement, is appropriate for the fund and consistent with the best interests of its shareholders.

Lastly, the proposed amendments would require the board's written findings to address the adequacy of any investor protection features embedded in the performance-based compensation arrangement to protect the interests of shareholders, including, where no investor protection features are present, the basis for concluding that the compensation arrangement is adequate to protect the interests of shareholders.[110] Common investor protection features in performance arrangements include preferred returns, hurdles, high-water marks, and/or loss carryforward mechanisms. These structural protections are well-established features of private fund performance fee arrangements and have been refined over decades of negotiations between institutional investors and private fund managers. The development of many of these features postdates the prohibition on performance-based compensation in section 205 of the Advisers Act, and therefore Congress may not have considered these tools when contemplating the prohibition as applied to advisory contracts with regulated funds. Preferred returns and hurdle rates establish a minimum return threshold that must be achieved before any performance-based compensation accrues to the manager. They operate as a floor that is designed to ensure investors receive a baseline return on their investment before the manager participates in profits.[111] High-water mark provisions and/or loss carryforward mechanisms require that any prior losses be fully recovered before additional performance fees may be charged, thereby preventing an adviser from repeatedly extracting performance fees during periods of volatile performance without regard to the investors' cumulative experience.[112]

The implementation of one or more of these features would protect the interest of shareholders because these features would directly counteract the most acute forms of investment adviser overreach that performance-based compensation can generate (*e.g.,* payment of performance fees attributable to unrealized gains that are never realized, fee layering across volatile performance cycles, and the misalignment of adviser compensation with shareholder capital accumulation over time). The Commission recognizes, however, that no single mechanism is universally appropriate for all regulated fund strategies and structures. Accordingly, the proposed amendments do not mandate the use of any particular feature or mechanism in all circumstances. The board is best positioned to evaluate the benefits and drawbacks of any investor protection feature as applied to the individual strategy and structure of the regulated fund. If no investor protection features are included in the performance-based compensation arrangement, the proposed amendments would require that the board's determination include written findings that address the basis for concluding that the compensation arrangement is adequate to protect the interests of shareholders without such investor protection features.

In aggregate, the proposed conditions are designed to permit the adviser to align its economic incentives with shareholders' interests, while mitigating the risks that led Congress to include the general prohibition on performance-based compensation in section 205 of the Advisers Act, namely, that such compensation arrangements would incentivize investment advisers to take excessive risks with client funds to the detriment of fund shareholders. The proposed conditions create a structured, board-centered governance process through which advisers to regulated funds may access performance-based compensation arrangements in a manner that is consistent with investor protection and the purposes of the Advisers Act. The principles-based approach in the proposed amendments draws on the accumulated market experience that has shaped performance fee practices in the private fund context for decades but is also designed to ensure that regulated fund boards have the tools to evaluate and accommodate future innovation in performance fee structures.

We request comment on the proposed condition requiring that the regulated fund's board determine that the performance-based compensation arrangement is in the best interest of the regulated fund and its shareholders and make specific findings regarding the arrangement's appropriateness, structure, and investor protection features.

14. Should the proposal explicitly require that the board conduct a comparative analysis, such as requiring that the board determine that the performance fee structure is more beneficial to shareholders than a conventional asset-based only fee arrangement?

15. The proposed rule amendments would require that the board's written findings be made as part of the regulated fund's annual review and approval of an investment advisory contract under section 15(c) of the Investment Company Act. Should the rule instead require that the board's written findings be made more frequently than annually, for example, on a semi-annual or quarterly basis? Are there circumstances where a more frequent determination by the board would be warranted to protect the interests of fund shareholders; for instance, where a regulated fund's performance fee is calculated over a shorter measurement period?

16. Should a regulated fund's initial approval and any annual continuance of a performance fee arrangement be subject to heightened procedural requirements, such as a supermajority vote of the independent directors or a shareholder vote? Should the proposed rule amendments require the board to retain independent fee consultants or financial advisors when evaluating performance fee arrangements?

[109] *Cf.* Alt. Inv. Mgmt. Ass'n, *AIMA Global Investor Board Perspectives: Alignment of Interests and Fee Preferences* (Oct. 7, 2022) (noting that most investors in hedge funds surveyed prefer that performance fees be paid no more frequently than annually, while acknowledging that ''there can be considerable differences in the crystallisation frequencies applied by different hedge fund strategies—mainly due to the variety of fund liquidity terms used across the universe of hedge fund strategies.'').

[110] *See* proposed rule 205–3(c)(1)(iv)(C)(3).

[111] The board should consider whether the arrangement employs a ''hard hurdle,'' under which the performance fee is calculated only on returns in excess of the threshold or a ''soft hurdle,'' which permits the adviser to earn a performance fee on all profits once the threshold is cleared.

[112] Boards should consider incorporating features within the performance fee arrangement that are common in contracts between institutional investors and private fund managers, to the extent applicable or useful for the fund structure/strategy. For example, including a provision in the investment advisory agreement that accrued performance fees be held in escrow rather than distributed immediately to the adviser would preserve the adviser's ability to satisfy any loss recovery obligations or clawbacks if subsequent fund performance deteriorates.

17. Should the rule affirmatively enumerate categories of fund strategies for which an adviser would be categorically ineligible to charge performance fees under the exemption, rather than leaving this determination to the discretion of the regulated fund's board? For example, should the rule exclude regulated funds employing passive or index-tracking strategies? Alternatively, should the Commission define or offer further guidance on the boundary between complex and differentiated strategies that may rely heavily on manager skill and passive or formulaic strategies where performance fees may be less appropriate?

18. To what degree should the proposed rule amendments specifically address performance fees for regulated funds investing in strategies with highly heterogeneous or mixed asset compositions? For example, a regulated fund that invests most of its assets in private market investments but also maintains a liquidity sleeve of money market instruments or large-capitalization equity securities. Should the proposed condition require that performance-based compensation be calculated only with respect to the portion of the regulated fund's portfolio attributable to private market or alternative asset strategies? Is a blended or sleeve-based performance fee structure administratively workable for regulated funds and their service providers, including funds with multi-manager structures?

19. Should the rule require that portfolio investments subject to unrealized gain-based performance fee calculations be independently valued by a qualified independent third-party valuation agent prior to any payment of performance fees to the adviser attributable to such portfolio investments? Alternatively, should the rule condition payment of any performance fee based on unrealized gains on the board's affirmative finding that the fund's valuation methodology is sufficiently objective and verifiable to support performance fee calculations?

20. In cases where the performance fee base includes unrealized appreciation on assets for which no readily available market quotation exists, is there a heightened risk that the adviser's application of the fair value determination framework established under rule 2a-5 under the Investment Company Act, including its use of FASB ASC Topic 820 methodologies, would fail to sufficiently address the conflicts of interest introduced by charging performance fees on capital gains or capital appreciation? Are there specific aspects of the FASB ASC Topic 820 framework, such as its reliance on unobservable inputs or its use of management assumptions and estimates commonly applied to private market investments, that, when coupled with the risks inherent in charging a performance fee, give rise to particular conflicts of interest that may negatively impact the reliability of fair value estimates as a basis for performance fee calculations? Are there certain incremental safeguards that advisers should be required to put in place to address such conflicts? Alternatively, should the proposed rule amendments condition the ability of an investment adviser to charge performance fees to a regulated fund on the regulated fund's portfolio consisting entirely of assets for which readily available market quotations exist, or, more broadly, on the regulated fund's entire portfolio consisting of assets classified as level 1 or level 2 assets under the FASB ASC Topic 820 fair value hierarchy?

21. The proposed rule amendments would require the board's written findings to address the adequacy of investor protection features embedded in the performance-based compensation arrangement, such as preferred return, hurdles, high-water marks, and/or loss carryforward mechanisms. Should the rule mandate the inclusion of one or more of these investor protection features as a categorical requirement for reliance on the proposed rule, rather than leaving their inclusion to board discretion subject to a written findings requirement?

22. The proposed rule amendments would require that the board's written findings address the adequacy of investor protection features in the performance-based compensation arrangement but would not prescribe a specific form or level of detail for those written findings. Should the Commission provide additional guidance, or establish minimum content requirements, regarding the form and substance of the board's written findings, such as by requiring that the findings specifically identify and respond to any material conflicts of interest identified by the board in connection with its evaluation of the performance fee arrangement?

23. Should the amendments include specific provisions governing the treatment of accrued or anticipated performance fees in the event of the board's termination of an adviser? If so, what form should such provisions take, and how should they be structured to appropriately balance the board's fiduciary obligations to fund shareholders with the adviser's interest in receiving earned compensation? For example, where a board terminates an adviser for cause (such as for fraud, willful misconduct, or a material breach of the advisory agreement), should the amended rule provide that the adviser forfeit some or all accrued but unpaid performance fees, or should the rule distinguish between fees that have already crystallized and those that are merely anticipated? Conversely, where a board terminates an adviser without cause (*e.g.,* as part of a strategic management decision, to transition to a different adviser, or following a change in the fund's investment mandate), the adviser may have a stronger claim to compensation reflecting value it has already created for the regulated fund even if that value has not yet been realized or crystallized into a payable fee. Should the Commission provide guidance identifying factors boards should consider when evaluating adviser termination in light of accrued or anticipated performance fee obligations, or are these matters better left to private contract between the regulated fund and the adviser?

3. Disclosure Related to Performance-Based Compensation

a. Prospectus Disclosure

Currently, regulated funds are required to disclose in their prospectuses information about the investment advisory fees paid to the fund's adviser, including any performance-based compensation. Unlike section 205 of the Advisers Act and rule 205–3 thereunder, the scope of the prospectus disclosure requirements related to performance-based compensation are not limited to compensation based solely on capital gains or appreciation. They also encompass fees based on other performance measures, such as interest, ordinary income, or dividends. We are proposing to maintain this approach.[113] The proposal would require a regulated fund to provide more particularized prospectus disclosure in two locations about any performance-based compensation paid to the investment adviser:

- *Fee table:* the proposal would add a distinct line item regarding any performance-based compensation paid to the adviser or its affiliates, while also alerting the investor about the variability of the performance fees and providing a cross-reference to the more

[113] Accordingly, the use of ''performance-based compensation'' or ''performance fees'' in this section II.A.3.a includes fees paid to the adviser based on all performance measures, consistent with the existing disclosure requirements in Form N–1A and Form N–2.

complete discussion about the performance fees provided later in the prospectus.[114] In addition, the proposal would require that the expense example reflect any performance fees; [115] and

• *Management discussion:* the proposal would require a detailed description of the performance fee arrangement, including a graphical representation illustrating the calculation of the performance fee across a range of hypothetical performance scenarios.[116]

To help implement the proposal's investor protection goals and safeguards discussed above, the proposed disclosure would augment the current registration form requirements that require that a regulated fund provide disclosure in its prospectus and statement of additional information about the compensation of its investment advisers, including performance-based compensation.[117] These amendments are designed to enhance transparency for investors about performance fees paid to the adviser and to complement our proposed amendments to rule 205–3 under the Advisers Act by providing disclosure regarding the expanded ability for regulated funds to pay performance fees based on capital gains or appreciation.[118] Without the amendments, as discussed below, it may be difficult for an investor to easily determine that the adviser is paid a performance fee, which is a material part of the cost structure of the advisory fee, as the performance fee would not be disclosed separately in the regulated fund's fee table.[119] Requiring separate disclosure about the fees that the regulated fund may pay to its adviser would assist an investor in making an informed investment decision as well as enhance the ability of an investor to compare regulated funds.

Fee Table Disclosure

Regulated funds are currently required to disclose certain key information about the funds' fees and expenses in a standardized fee table in their prospectus. The fee table is designed to help investors understand the costs associated with investing in a regulated fund and to facilitate comparisons across funds. The instructions to the fee table require funds to disclose ''management fees,'' as a line item that encompasses all fees paid to the investment adviser for managing the fund's portfolio, including any fees that are based on the fund's performance.[120] The instructions to the prospectus fee table do not currently require a regulated fund to separately identify, as a distinct line item or caption within the fee table, the portion of management fees attributable to performance-based compensation as distinguished from asset-based advisory fees. As a result, if such fees are not separately identified, investors in regulated funds that could charge performance fees may not be able to readily discern from the fee table the extent to which the total management fees they bear reflect asset-based charges exclusively versus fees that would vary with fund performance, potentially obscuring a material aspect of the fund's cost structure and limiting investors' ability to make fully informed investment decisions and to fully compare funds. Some regulated funds where the adviser receives performance fees have developed a practice of including separate disclosure in their fee tables about such fees.[121] The practice of separating performance fees from management fees results in enhanced transparency to investors about performance fees, and thus we are proposing to require separate line-item disclosure in the fee table about performance fees paid to a regulated fund's adviser, to the extent applicable.

Specifically, we are proposing to require that a regulated fund add a caption to its prospectus fee table titled ''performance fees.'' This caption would disclose that the regulated fund has an investment advisory agreement that includes performance-based compensation which may be payable to the investment adviser or its affiliates.[122] The performance fees caption would be located directly below and indented equally to the ''management fees'' caption in the fee table. The regulated fund would be required to disclose the performance fee paid to the adviser during the prior fiscal year as a percentage of the value of the shareholder's investment, for Form N–1A disclosure, or as a percentage of net assets attributable to common shares, for Form N–2 disclosure.

A regulated fund that may pay its adviser performance fees under its investment advisory agreement also would be required to add a footnote to the fee table that would provide concise information about the performance fees with a cross-reference to where the investor could find additional information about the performance fees. Specifically, the footnote would explain briefly the basis on which performance fees are imposed and that performance fees may be substantially higher or lower because these fees are based on the performance of the registrant, which may fluctuate over time.[123] Performance fees are variable, and the footnote disclosure would alert the investor to this variability. In addition, consistent with the Commission's layered disclosure framework, the footnote would include a cross-reference to the more complete disclosure about the performance fees which would be provided later in the prospectus.[124] The proposed prospectus fee table amendments also would address New Funds, as defined in each registration statement form, that will pay their advisers performance fees and existing regulated funds that newly determine to pay their advisers performance fees.[125]

[114] *See* proposed Instruction 3(b) to Item 3 of Form N–1A; proposed Instruction 7.c. to Item 3 of Form N–2.

[115] *See* proposed Instruction 4(f) to Item 3 of Form N–1A; proposed Instruction 12.d. to Item 3 of Form N–2.

[116] *See* proposed Item 10(a)(1)(ii)(B) of Form N–1A; proposed Instruction 2. to Item 9.1.b.(3) of Form N–2.

[117] *See* Items 10 and 19 of Form N–1A; Items 9 and 20 of Form N–2; *see supra* sections II.A.1 and II.A.2. This disclosure would complement information regulated funds currently provide on performance fees, including the current requirement for a regulated fund that charges a performance fee to disclose, in notes to the fund's financial statements, how the performance fee was calculated and the amount of the performance fee that was paid during the reporting period. *See, e.g.,* FASB ASC Topic 850–10–50–1; rule 4–08(k) of Regulation S–X [17 CFR 210.4–08].

[118] Unlike the disclosure required in the initial adoption of rule 205–3 in 1985 and subsequently removed from the 1998 amendments to rule 205–3, our proposed disclosure requirements would be applicable only to performance fee arrangements with regulated funds and are designed to provide retail investors with the information necessary to understand the performance fee arrangement. *See supra* section I.A.3.

[119] *See infra* note 122 and accompanying text.

[120] *See* Instruction 3(a) to Item 3 of Form N–1A; Instruction 7.a. to Item 3 of Form N–2. These instructions apply to fulcrum fees and any other compensation arrangements based on measures of performance.

[121] *See, e.g.,* Blackstone Private Multi-Asset Credit and Income Fund (Investment Company Act File No. 811–23996); Carlyle Tactical Private Credit Fund (Investment Company Act File No. 811–23319); Hamilton Lane Private Assets Fund (Investment Company Act File No. 811–23509).

[122] *See* proposed Instruction 3(b) to Item 3 of Form N–1A; proposed Instruction 7.c. to Item 3 of Form N–2.

[123] *See* proposed Instruction 3(b) to Item 3 of Form N–1A; proposed Instruction 7.c. to Item 3 of Form N–2.

[124] *See, e.g.,* Tailored Shareholder Reports for Mutual Funds and Exchange-Traded Funds; Fee Information in Investment Company Advertisements, Investment Company Act Rel. No. 34731 (Oct. 26, 2022) [87 FR 72758 (Nov. 25, 2022)] at section I.A.2.; *see also* proposed Instruction 3(b) to Item 3 of Form N–1A; proposed Instruction 7.c. to Item 3 of Form N–2.

[125] *See* Instruction 6 to Item 3 of Form N–1A (defining a new fund as a ''Fund that does not include in Form N–1A financial statements reporting operating results or that includes financial

Continued

The proposed amendments would provide that a New Fund, as defined in Form N–1A and Form N–2, would be able to show zero performance fees paid to the investment adviser or its affiliates.[126] A New Fund has no or a limited track record and therefore would not have performance information on which to base its disclosure of performance fees paid to the adviser. Following the regulated fund's first fiscal year, however, a regulated fund with a performance fee arrangement would be required to disclose in the fee table the performance fee paid to the investment adviser or its affiliates during the prior fiscal year.[127] Further, if there are any changes to the annual fund operating expenses disclosure in the fee table that would materially affect the information disclosed in the fee table, which would include the performance fee disclosure for an existing regulated fund that newly determines to pay its adviser performance fees, the regulated fund would be required to restate the expense information using the current fees as if they had been in effect during the previous fiscal year.[128] Accordingly, existing funds (*i.e.,* funds that do not qualify as ''New Funds'' as defined in Form N–1A and Form N–2) that adopt a performance fee arrangement, would disclose in the fee table the performance fee that would have been payable to their investment adviser had the performance fee arrangement been in place during the previous fiscal year and would disclose in a footnote to the fee table that the expense information in the table has been restated to reflect current fees.[129]

To implement our proposed performance fees line-item disclosure, we are proposing to amend the definition of ''Management Fees'' in the fee table instructions to exclude any fees based on the fund's performance.[130] Therefore, the regulated fund's base management fees would be presented separately from any performance-based compensation in the fee table.

Further, we are proposing to require that the fee table expense example include performance fees, to the extent applicable.[131] We recognize that the expense example currently includes management fees, which are defined to include any performance fees. Our proposed requirement is designed to ensure the expense example would reflect the performance fees shown in the fee table line item and would parallel that disclosure requirement.[132]

Requiring separate disclosure regarding performance fees in the prospectus fee table would alert an investor in an easily accessible location and reader-friendly format that performance fees may be payable to the regulated fund's adviser. In addition, because regulated funds already are required to tag their fee tables using the Inline eXtensible Business Reporting Language (''XBRL''), fee table disclosure about performance-based compensation, including the footnote to the fee table and the expense example, would be included in the Interactive Data Files that are required to be submitted to the Commission.[133] The Commission would make taxonomy changes to reflect the disclosure revisions. The Interactive Data Files provide a structured, machine-readable data language, which would make the fee table disclosure about performance fees more readily available and easily accessible for aggregation, comparison, filtering, and other analysis.

Further, our proposed prospectus fee table disclosure about performance fees would be included in a registered open-end fund's summary prospectus, as applicable.[134] A registered open-end fund may satisfy its prospectus delivery obligations by sending or giving a summary prospectus to investors.[135] Most open-end funds satisfy their prospectus delivery requirements with summary prospectuses.

Performance Fee/Management Discussion Disclosure

Currently, in addition to fee table disclosure, the registration statement forms for regulated funds require a description of the investment adviser's compensation, including whether the compensation will be based on a percentage of average net assets.[136] While this disclosure is important, it is not explicitly tailored to dovetail with the requirements of the proposed amendments to rule 205–3 discussed above.[137]

Specifically, if the investment adviser's compensation includes a performance fee, the regulated fund would be required to disclose the following:

- The rate of the performance fee and the basis on which it is calculated, including whether the fee is determined with reference to realized or unrealized gains, investment income, or any combination thereof;
- Whether the performance fee is calculated on the fund's total investment return before or after deducting fees, commissions or expenses;
- The measurement period over which the performance fee is assessed;
- A description of any features that limit or condition the payment of a performance fee to the investment

statements for the Fund's initial fiscal year reporting operating results for a period of 6 months or less'') and proposed Instruction 13. to Item 3 of Form N–2.

[126] *See id.* Further, a regulated fund that is subject to a performance fee but that did not pay a performance fee to its adviser in the prior fiscal year would show zero performance fees paid in the line item disclosure and would include the note to the fee table required by proposed Instruction 3(b) to Item 3 of Form N–1A and proposed Instruction 7.c. to Item 3 of Form N–2.

[127] *See* proposed Instruction 6(c) to Item 3 of Form N–1A and proposed Instruction 7.c. to Item 3 of Form N–2.

[128] *See* renumbered Instruction 3(e)(ii)(A) to Item 3 of Form N–1A; *see also* proposed Instruction 11.b.1 to Item 3 of Form N–2.

[129] *See* proposed renumbered Instruction 3(e)(ii)(B) to Item 3 of Form N–1A; *see also* proposed Instruction 11.b.2 to Item 3 of Form N–2. As in proposed renumbered Instruction 3(e)(iii) to Item 3 of Form N–1A, proposed Instruction 11.c to Item 3 of Form N–2 would explain that a change in ''Annual Fund Expense'' means either an increase or a decrease in expenses that occurred during the most recent fiscal year or that is expected to occur during the current fiscal. A change in ''Annual Fund Expenses'' would not include a decrease in annual expenses as a percentage of assets due to economies of scale or breakpoints in a fee arrangement resulting from an increase in the Registrant's assets.

[130] *See* proposed Instruction 3(a) to Item 3 of Form N–1A; proposed Instruction 7.a. to Item 3 of Form N–2.

[131] *See* proposed Instruction 4(f) to Item 3 of Form N–1A; proposed Instruction 12.d. to Item 3 of Form N–2.

[132] Because the examples in Form N–1A and Form N–2 require registrants to assume a 5 percent annual return, there may be circumstances in which a regulated fund would not reflect a performance fee in the example. For instance, if a New Fund, for which past performance does not exist and the performance fee is only payable on returns exceeding a hurdle rate or benchmark return that is greater than 5 percent, the assumed 5 percent annual return would not trigger a performance fee obligation, and therefore no performance fee would be reflected in the example.

[133] *See* General Instruction C.3.(g) to Form N–1A; General Instruction I. to Form N–2.

[134] *See* 17 CFR 230.498 (rule 498 under the Securities Act). Only certain disclosure items are included in the summary prospectus. While fee table disclosure is included in the summary prospectus, the discussion about management, organization, and capital structure required by Item 10 of Form N–1A is not included in the summary prospectus.

[135] A summary prospectus uses a layered disclosure approach designed to provide investors with key information about the registered open-end fund in a concise more reader-friendly presentation, with access to more detailed information available online, or delivered in paper or electronic format upon request. *See* Enhanced Disclosure and New Prospectus Delivery Option for Registered Open-End Management Investment Companies, Investment Company Act Rel. No. 28584 (Jan. 13, 2009) [74 FR 4546 (Jan. 26, 2009)].

[136] *See* Item 10(a)(1)(ii)(A) of Form N–1A; Instruction 1 to Item 9.1.b.(3) of Form N–2. These disclosure items are not required to be included in the interactive data files submitted to the Commission.

[137] *See supra* section II.A.2; *see also* proposed rule 205–3(c)(1)(iv)(C).

adviser, including, but not limited to, any preferred return, hurdle rate, high-watermark, loss carryforward mechanism, or any other features that limit or condition the payment of a performance fee to the investment adviser; and

- A graphical representation that illustrates the calculation of the performance fee across a range of hypothetical performance scenarios.[138]

We designed these disclosure requirements to help investors evaluate the principal components of the performance fee arrangement.[139]

Further, while not currently required to do so by the registration statement forms, many regulated funds include graphical representations in their prospectuses to explain how their performance fee is calculated. These representations are helpful in explaining the multiple components that may be part of such fees. Our proposal would codify this practice.[140]

We request comment on the proposed prospectus disclosure requirements regarding performance-based compensation.

24. Form N–1A and Form N–2 require disclosure about all types of performance-based compensation, including compensation based on measures other than capital gains or capital appreciation. Consistent with section 205 of the Advisers Act, however, Form ADV defines performance-based fees as fees based on capital gains on or capital appreciation of the assets of the client.[141] Should the Commission revise the definition of performance-based fees in Form ADV to include other measures of performance besides capital gains or capital appreciation?

25. Currently, management fees are defined, for purposes of the prospectus fee table line-item disclosure, as including performance fees. Under our proposal, the definition of management fees would be revised to exclude performance fees for the fee table line-item disclosure. Would our proposal to exclude performance fees from the definition of management fees and require distinct disclosure of performance fees in the fee table be helpful to investors and provide transparency about the amount of any performance fees? Would there be complications or difficulties with separating performance fees from the management fee line-item in the prospectus fee table? Should we require a different presentation for performance fees in the fee table instead? Please explain.

26. We are proposing to require that the performance fees shown in the fee table be based on the performance fees that were payable to the investment adviser or its affiliates during the regulated fund's most recent prior fiscal year, accompanied by disclosure about fee variability in both a footnote to the fee table and elsewhere in the prospectus. Is this approach appropriate, or would such an approach be misleading to investors? Alternatively, are there other approaches to disclosing the amount of performance fees payable to the investment adviser or its affiliates that would be more appropriate? For example, should the Commission instead require disclosure in the fee table of an average of the performance fees paid over a multi-year period, such as three years?

27. Is the proposed fee table disclosure and the accompanying footnote to the fee table regarding performance fees necessary in light of the information required by proposed Item 10(a)(ii)(B) of Form N–1A and proposed Instruction 2 to Item 9.1.b.(3) of Form N–2?

28. Should we require additional particularized fee table disclosure about fulcrum fees? For example, should we require that regulated funds with fulcrum fee arrangements include line-item disclosure below the performance fees that would disclose the base fee and any performance adjustments associated with the fulcrum fee? Are there additional ways that would facilitate investor understanding about the fulcrum fee in the fee table?

29. We are proposing to require that the basis on which the performance fee is imposed be disclosed briefly in a note to the fee table. Would the proposed note about the basis on which the performance fee is imposed help to facilitate investor understanding about the performance fee and assist the investor in making an informed choice about the regulated fund? Why or why not?

30. We are proposing to require that the distinct performance fees line-item disclosure in the fee table be located directly below the management fees line-item. Are there other places in the fee table where the performance fees line-item should be located?

31. A New Fund, as defined in its registration statement form, that has an investment advisory agreement under which performance fees may be payable to investment adviser or its affiliates would be able to show zero performance fees payable to its investment adviser or its affiliates on the performance fees line-item in the fee table. The proposal would require an existing registered open-end or closed-end fund that newly adopts a performance fee arrangement to disclose in the fee table the performance fee that would have been payable to its investment adviser had the performance fee arrangement been in place during the previous fiscal year. Is this approach appropriate? Alternatively, should we permit the existing regulated fund to show zero performance fees in the fee table, similar to the approach for a New Fund?

32. When presenting the expense examples in Form N–1A and Form N–2, rather than basing any performance fees included in the examples on the amount of the performance fees reflected in the fee table, should the examples instead include the performance fee amounts that would be paid under the stated assumption of a 5 percent annual return and/or an alternative or additional assumed return rate, such as the fund's hurdle rate or another rate sufficient to trigger the performance fee, to ensure that performance fees are captured in the example?

33. Should the Commission require that regulated funds disclose to shareholders, in plain English and with numerical specificity, the amount of performance fees paid or accrued during each reporting period that are attributable to unrealized appreciation and realized gains separately? Should this disclosure be required elsewhere, such as in annual reports for registered open-end funds?

34. Forms N–1A and N–2 currently require that a regulated fund submit an interactive data file to the Commission that includes the prospectus fee table. The data file is designed to facilitate timely availability of important information in a structured format to investors, their investment professionals, and other data users. For data aggregators, the data file allows them to quickly process data and related analysis and to share the analysis with investors. Would having an interactive data file that includes performance fees as a distinct fee table line-item be

helpful to investors, investment professionals and other data users?

35. The Commission has granted exemptive relief to sponsors to operate actively managed exchange-traded funds (''ETFs'') that do not provide daily portfolio transparency. Under the terms of the exemptive relief, each non-transparent ETF uses a standard risk legend in its prospectus, fund website, and marketing materials that highlight certain differences between non-transparent ETFs and fully transparent ETFs. Would a similar risk legend for regulated funds that highlight the performance fees as compared to regulated funds without performance fees in a standard format be useful for investors, particularly investors in registered open-end funds who may not be familiar with performance fees? For example, this risk legend could address how a regulated fund with performance fees may create additional risks for investors such as the performance fee being payable even if the regulated fund is losing money; that basing performance fees on unrealized gains may create risks for investors in funds that invest primarily in securities or other assets for which market quotations are not readily available; that the performance fees may create an incentive for the adviser to make investments on the regulated fund's behalf that are risky or more speculative than would be the case absent such a compensation arrangement; that the regulated fund with the performance fees may be more expensive than a regulated fund without performance fees; and that these additional risks may be greater in uncertain market conditions. If so, should the legend include a cross-reference to prospectus disclosure about the performance fee?

36. We are proposing to require that a regulated fund include a graphical representation of the performance fee that would include the principal components of the performance fee. Would such a graphical representation aid investors in understanding the economic impact of performance fee arrangements, and are there particular design requirements or standardization elements we should mandate to ensure comparability across registrants? For example, should we require that the graphical representations depict standard scenarios such as a market that has a 10% percent investment return, a negative 10% investment return, and a no investment return? What should the design and/or standard elements be that we mandate across registrants? For instance, should we require that the graphical depiction be in the form of a bar chart, or some other format? Should we require the graphical depiction be reflected in another location in addition to the prospectus, such as on the fund's website?

37. Should the Commission require funds to supplement the required graphical representation with a dynamic or interactive model or spreadsheet that would allow investors to input their own assumptions and observe the resulting performance fee calculations in real time? Should funds be required to provide such an interactive tool, for example, through the fund's website with a link to the interactive tool provided in the fund's prospectus? Would an interactive model provide meaningful additional value to investors beyond the static graphical representation? What are any operational, cost, or compliance burdens associated with creating and maintaining an interactive tool?

38. Our proposed prospectus disclosure requirements about performance fees that may be paid to a regulated fund's adviser are designed to complement the proposed amendments to rule 205–3 under the Advisers Act. Are there other disclosure factors that we should consider requiring in the regulated fund's management discussion about the performance fee that would be helpful to investors?

b. Form N–CSR Disclosure

Form N–CSR, a combined reporting form used by registered management investment companies to transmit shareholder reports to the Commission as well as to report corporate governance and financial data, requires a registered management investment company to provide disclosure about the basis for the board's approval of its investment advisory contract. Specifically, under Item 11 of Form N–CSR, if a fund's board of directors has approved any investment advisory contract during the fund's most recent half-year, the fund is required to discuss in reasonable detail the material factors and the conclusions that formed the basis of the board's approval, including the factors relating to the approval of the advisory fee and any other amounts paid by the registrant to the adviser.[142] Although the current disclosure requirements of Item 11 of Form N–CSR require disclosure regarding a board's approval of advisory contracts with a performance fee of any kind, we are proposing to amend Item 11 to include more particularized disclosure regarding the approval of performance fees based on capital gains in or capital appreciation of a regulated fund whose investment adviser charges the regulated fund a performance fee pursuant to the conditions of proposed rule 205–3(c)(1)(iv).[143] These particularized disclosure requirements under proposed Item 11(3) of Form N–CSR would mirror the written findings that we are proposing that the board would be required to make when it determines that such performance fees are in the best interests of the regulated fund under proposed Advisers Act rule 205–3. This disclosure would be useful for investors because it would provide them with meaningful insight into the board's reasoning and analysis in approving a performance fee arrangement that could impact their returns.

We request comment on the proposed Form N–CSR requirements regarding performance-based compensation.

39. Would the proposed amendments to Item 11 of Form N–CSR be helpful to investors? Why or why not? Are there additional or different disclosure items about performance fees that registrants should be required to disclose on Form N–CSR? If so, what are those disclosures?

40. Disclosures on Form N–CSR are available to investors through the Commission's EDGAR website but are not required to be sent directly to a regulated fund's shareholders. Proxy statements, however, are required to be sent directly to a regulated fund's shareholders. Should the Commission require that the proposed particularized disclosure regarding the approval of performance fees based on capital gains or capital appreciation on Form N–CSR instead be, or also be, included in a proxy statement on Schedule 14A filed in connection with a regulated fund's shareholder meeting? Why or why not?

B. Additional Amendments to the ''Qualified Client'' Definition

In addition to the proposed amendments expanding the qualified client definition to include regulated funds that meet certain conditions, the proposal would amend rule 205–3 to modernize the ''qualified client'' definition by expanding eligibility to include investors that satisfy the ''accredited investor'' definition under Regulation D.[144] Specifically, the proposed changes would amend the definition of ''qualified client'' to include natural persons or entities that meet the ''accredited investor'' definition and relatedly would remove the ''qualified client'' definition's

[142] *See* Item 11 of Form N–CSR.

[143] *See supra* section II.A.2.

[144] Rule 501 of Regulation D, *supra* note 71.

separate net worth test,[145] as well as its assets-under-management test.[146] These amendments would harmonize the regulatory framework governing access to private funds by enabling advisers to funds that already limit their investors to accredited investors (*e.g.,* section 3(c)(1) private funds that rely on Regulation D) to enter into performance fee arrangements without needing to additionally limit investor eligibility by applying a separate qualified client standard. By amending the existing definition of qualified client, the proposed amendments would provide accredited investors, intended to capture persons whose financial sophistication renders the protections of the Securities Act's registration process unnecessary,[147] with greater access to investment products that include performance fees.

Because the ''qualified client'' definition is referenced in the definition of ''investment adviser representative'' in rule 203A–3 and in the exceptions to a registered investment adviser's brochure supplement delivery requirement in rule 204–3 under the Advisers Act, the proposal would include conforming amendments to these rules.

1. Incorporation of the ''Accredited Investor'' Definition

The proposal would amend the ''qualified client'' definition to include any natural person or company (other than a ''private investment company'') [148] that an investment adviser reasonably believes is an ''accredited investor'' at the time of entering into an investment advisory contract with such person or company.[149] Currently, the qualified client and accredited investor definitions use distinct eligibility thresholds. The qualified client definition uses a $1,400,000 assets-under-management test and a $2,700,000 net worth test in the alternative, while certain prongs of the accredited investor definition use a $1,000,000 net worth (excluding primary residence) test and a $200,000 ($300,000 with a spouse) income test in the alternative but does not include an assets-under-management test.[150] The qualified client definition uses a single net worth threshold for natural persons and entities, while the accredited investor definition includes a net worth test for natural persons (as noted above) and separate $5,000,000 total assets (or investments, as applicable) tests for entities.[151] Additionally, the dollar thresholds in the qualified client definition are subject to periodic inflation adjustments at five-year intervals, whereas the accredited investor definition is not subject to inflation adjustment.

Because of these distinct qualification thresholds under the current regulatory framework, an investor may qualify as an accredited investor and thus be eligible to invest in a section 3(c)(1) private fund that relies on Regulation D to offer its interests (as well as other issuers that rely on Regulation D), but may not meet the definition of a ''qualified client'' necessary to invest in a section 3(c)(1) fund with a performance fee, given its higher eligibility thresholds. This effectively prevents some accredited investors from investing in section 3(c)(1) private funds that have performance fee arrangements despite being otherwise qualified under Regulation D. Including accredited investors in the definition of a ''qualified client'' would remove this higher bar on investing in section 3(c)(1) private funds with performance fees, which should improve access to investment products with performance fees for accredited investors.

Additionally, the proposed changes would simplify the application of the qualified client standard with respect to funds that already limit their investor eligibility to accredited investors by making it unnecessary to screen potential investors under a separate qualified client standard in order to charge performance fees. According to Form ADV reporting, as of the end of 2025, approximately 75% of section 3(c)(1) private funds that rely on Regulation D and are managed by registered investment advisers limit their sales to investors who meet the definition of qualified clients under the current rule.

In addition to section 3(c)(1) private funds that rely on Regulation D, separately managed accounts of accredited investors (as well as other types of advisory services to accredited investors) would be eligible for performance fee arrangements under the proposed amendments. Although the proposed amendments would not specify conditions in order for an adviser to enter into a performance fee arrangement with an accredited investor client (other than that the client be an accredited investor), an adviser's services would remain in this context subject to its fiduciary obligations, as well as its other obligations under the federal securities laws. The extent and nature of advisory compensation, including any performance fees, are material facts relating to an advisory relationship, about which an adviser must make full and fair disclosure in order to satisfy its fiduciary duty.[152] As the Commission has stated before, in applying this fiduciary principle, ''the specific obligations that flow from the adviser's fiduciary duty [will] depend upon what functions the adviser, as agent, has agreed to assume for the client, its principal.'' [153] With respect to

[145] Rule 205–3(d)(1)(ii)(A).

[146] Rule 205–3(d)(1)(i).

[147] *See* Accredited Investor Definition, Securities Act Rel. No. 10824 (Aug. 26, 2020) [82 FR 64234 (Oct. 9, 2020)], at n.7 and accompanying text; Regulation D Revisions; Exemption for Certain Employee Benefit Plans, Securities Act Rel. No. 6683 (Jan. 16, 1987) [52 FR 3015 (Jan. 30, 1987)]. *See also SEC* v. *Ralston Purina Co.,* 346 U.S. 119, 125 (1953) (taking the position that the availability of the Section 4(a)(2) exemption ''should turn on whether the particular class of persons affected needs the protection of the Act. An offering to those who are shown to be able to fend for themselves is a transaction 'not involving any public offering' '').

[148] Current rule 205–3(d)(3) (as proposed, rule 205–3(c)(3)) defines ''private investment company'' to include companies that would be ''investment companies'' under the Investment Company Act but for the exception provided by section 3(c)(1) thereof. The proposed amendments would exclude a ''private investment company'' from gaining status as a qualified client solely by virtue of its own status as an accredited investor. Instead, pursuant to proposed rule 205–3(c)(1)(iii), a private investment company may qualify as a qualified client if each of its equity owners (other than those with respect to which compensation on the basis of a share of capital gains or capital appreciation is not provided for) separately qualify as qualified clients, *e.g.,* if each is separately an accredited investor. *See infra* section II.C.

[149] *See* proposed rule 205–3(c)(1)(i)(A). Under Regulation D, a person is an ''accredited investor'' if that person either comes within one or more eligibility categories or is reasonably believed by the *issuer* to do so. *See* rule 501(a). The requirement under the proposed amendments to rule 205–3 that the adviser ''reasonably believe'' a person to be an ''accredited investor'' in order for it to be a ''qualified client'' is not intended to duplicate or otherwise layer the reasonable belief standard set forth in Regulation D. Instead, it is intended to ensure that such standard reaches and applies to the *adviser* for purposes of rule 205–3.

[150] *See* rule 501(a)(5) and (a)(6). *See also supra* note 72 (discussing prongs of the accredited investor definition that are not based on net worth or income).

[151] *See* rule 501(a)(5); *see also* rule 501(a)(1), (3), (7), (9) and (12).

[152] *See, e.g.,* Commission Interpretation Regarding Standard of Conduct for Investment Advisers, Investment Advisers Act Rel. No. 5248 (June 5, 2019) [84 FR 33669 (July 12, 2019)].

[153] *Id.* at text accompanying n.28 (''For example, the obligations of an adviser providing comprehensive, discretionary advice in an ongoing relationship with a retail client (*e.g.,* monitoring and periodically adjusting a portfolio of equity and fixed income investments with limited restrictions on allocation) will be significantly different from the obligations of an adviser to a registered investment company or private fund where the contract defines the scope of the adviser's services and limitations on its authority with substantial specificity (*e.g.,* a mandate to manage a fixed income portfolio subject to specified parameters, including concentration limits and credit quality and maturity ranges).'').

separately managed accounts of clients who are not accredited investors and are not otherwise qualified clients under the proposed amendments, performance fee arrangements would continue to be prohibited.

An additional benefit of including accredited investors in the definition of a qualified client would be to recognize measures of financial sophistication that go beyond monetary thresholds or employment with the adviser as means for meeting the qualified client standard. In particular, the accredited investor definition includes ''[a]ny natural person holding in good standing one or more professional certifications or designations or credentials from an accredited educational institution that the Commission has designated as qualifying an individual for accredited investor status.'' [154] The Commission used this authority in 2020 to designate as accredited investors individuals holding in good standing the General Securities Representative license (Series 7), the Private Securities Offerings Representative license (Series 82), and/or the Investment Adviser Representative license (Series 65), and may designate other professional certifications or designations or credentials in the future as appropriate.[155] As such, including accredited investors as qualified clients would address the current standard's exclusion of persons with professional certifications or designations or credentials who may not meet the rule's current net worth, assets-under-management or knowledgeable employee tests but nonetheless can reasonably be expected to have sufficient knowledge and experience in financial and business matters to evaluate the merits and risks of a prospective investment with performance fees.

The Commission has stated that the ''accredited investor'' definition under Regulation D is intended to capture persons whose financial sophistication renders the protections of the Securities Act's registration process unnecessary.[156] Likewise, the Commission has characterized rule 205–3 as intended to appropriately provide ''flexibility in structuring performance fee arrangements with clients who are financially sophisticated or have the resources to obtain sophisticated financial advice regarding the terms of these arrangements.'' [157] Although the monetary qualification thresholds for natural persons in the accredited investor definition are lower than the thresholds in the qualified client definition, accredited investor status is already recognized as a measure for financial sophistication that is sufficient to indicate whether an investor needs the protections of the Securities Act's registration process or not. An investor who is sufficiently financially sophisticated to render the protections of the Securities Act's registration process unnecessary is also, in the Commission's view, sufficiently financially sophisticated to evaluate and bear the risks of an investment product with performance fees, so as to not need the protections of the Advisers Act's performance fee prohibition.

Although the Commission declined to extend eligibility as a qualified client to persons that satisfied the accredited investor definition when originally adopting rule 205–3 in 1985,[158] the nature and profile of the risks associated with performance fees arrangements have significantly evolved with their development in the private fund industry over the intervening decades. Performance fee arrangements have matured to commonly include features designed to address the prospect of excessive risk-taking that animated early concerns regarding the use of performance fees.[159] At the same time, the potential impact of excluding accredited investors from accessing investment products with performance fees has grown considerably, given the tremendous asset growth of the private markets and the increasing proportion of investment strategies and opportunities that are now primarily offered through the private fund industry.[160] Considering these significant developments since rule 205–3's original adoption, it is in our view no longer necessary for the protection of investors to impose greater restrictions under rule 205–3 to access investment products with performance fees than are imposed under Regulation D to access private investment products.

In connection with including accredited investors in the qualified client definition, the proposal would remove from the definition of qualified client the existing net worth test, which is currently set at $2.7 million.[161] As the accredited investor definition already contains a net worth standard, with natural persons qualifying as accredited investors if their net worth (individually or with spouse or partner) is over $1 million (excluding their primary residence), the existing net worth standard in the qualified client definition would conflict with the use of the accredited investor standard. We recognize that certain entity investors would under the proposal be subject to the investments or assets tests (in each case requiring in excess of $5 million) set forth in the accredited investor definition,[162] where they would have otherwise used the $2.7 million net worth or $1.4 million assets-under-management tests set forth in the current qualified client definition. However, we expect that the number of entity investors that meet the definition of a qualified client under either the net worth or the assets-under-management tests but that are not accredited investors may be minimal as a practical matter, and we request comment in this regard below. Furthermore, to the extent that contractual relationships are

[154] *See* rule 501(a)(10).

[155] *See, e.g., Order Designating Certain Professional Licenses as Qualifying Natural Persons for Accredited Investor Status,* Securities Act Rel. No. 10823 (Aug. 26, 2020) [85 FR 64234 (Oct. 9, 2020)]; *see also Potential Designation of Chartered Financial Analyst Designation as Qualifying Natural Persons for Accredited Investor Status, Potential Designation of Certified Financial Planner Certification as Qualifying Natural Persons for Accredited Investor Status, Potential Designations of the Investment Banking Representative License (Series 79) and the Research Analyst License (Series 86 and Series 87) as Qualifying Natural Persons for Accredited Investor Status, Potential Designation Designate of Passage of an Accredited Investor Exam to Be Developed by FINRA as Qualifying Natural Persons for Accredited Investor Status,* and *Potential Designation of U.S. Certified Public Accountants License as Qualifying Natural Persons for Accredited Investor Status* published elsewhere in this issue of the **Federal Register**.

[156] *See supra* note 147 and accompanying text.

[157] 1985 Adoption, *supra* note 37, at 48557.

[158] In the adopting release for original rule 205–3, the Commission stated that it declined to extend client eligibility to any natural person who met the then-minimum $200,000 individual income test for the purpose of qualifying as an ''accredited investor'' under Regulation D of the Securities Act of 1933. The Commission explained its adoption of the $500,000 assets-under-management and $1 million net-worth tests as proposed based on its view that these ''alternative eligibility tests . . . will provide sufficient flexibility to advisers and clients while adequately protecting investors within the policies and purposes of the Advisers Act.'' 1985 Adoption, *supra* note 37, at 48558.

[159] *See supra* notes 68–70 and accompanying text. We have historically recognized that requiring specific contractual requirements for performance fee arrangements can inhibit the flexibility of advisers and their clients in structuring performance fee arrangements that may benefit both parties. *See supra* notes 53–54 and accompanying text. The proposed amendments likewise would not mandate any specific contractual requirement for performance fee arrangements with accredited investors. Additionally, we note that Item 6 of Form ADV Part 2A requires a registered investment adviser that charges performance-based fees or that has a supervised person who manages an account that pays such fees to disclose this fact. If such an adviser also manages accounts that are not charged a performance fee, the item also requires the adviser to discuss the conflicts of interest that arise from its (or its supervised person's) simultaneous management of these accounts, and to describe generally how the adviser addresses those conflicts.

[160] *See supra* note 67 and accompanying text.

[161] Rule 205–3(d)(1)(ii)(A); 2026 Inflation Adjustment Order, *supra* note 65.

[162] Rule 501(a)(1), (3), (7), (9), and (12).

entered into prior to the effective date of the amendments if adopted, the changes (*i.e.,* addition of accredited investor definition to the definition and removal of the net worth and assets under management tests) 7would not generally apply retroactively to such contractual relationships, subject to the transition rules set forth in rule 205–3.[163]

Finally, the proposal also would remove the existing inflation adjustment provision from rule 205–3. Under current rule 205–3(e), the Commission adjusts the net worth test and assets-under-management test every five years by order.[164] Because the proposal would remove these tests from the qualified client definition, the inflation adjustment provision in rule 205–3 would become inapplicable.

We request comment on whether the Commission should amend the ''qualified client'' definition in rule 205–3 to incorporate accredited investors under Regulation D.

41. Would amending rule 205–3 as proposed to incorporate accredited investors into the definition of ''qualified client'' be appropriate? Are there alternative tests or thresholds (monetary or otherwise) that the Commission should consider for this purpose?

42. Would the proposed amendments to close the eligibility gap between accredited investors and qualified clients for purposes of the performance fee prohibition provide investors with greater access to private market opportunities in practice? Would advisers that sponsor investment products seek to expand their offerings to the newly eligible group?

43. Would the proposed amendments broaden the pool of eligible investors for private offerings generally or would the impact be mostly confined to the pool of potential section 3(c)(1) private fund investors?

44. Do accredited investors in practice have a sufficient level of financial sophistication to evaluate and bear the risks of an investment product with performance fees, so as to not need the protections provided by the Advisers Act's performance fee prohibition? Are the existing qualified client thresholds more appropriate with respect to investor qualification and protection against the risks of performance fees?

45. Should we include any specific contractual requirements for performance fee arrangements with accredited investors and, if so, which?

46. Is the removal of the net worth test from the qualified client definition appropriate? To what extent, if any, would a separate net worth test not conflict with the net worth test that is in the accredited investor definition?

47. Is the dollar amount threshold of the net worth test in the accredited investor definition a more appropriate measure for the financial sophistication necessary to not need the protection provided by the Advisers Act's performance fee prohibition? If not, how should the Commission modify the proposal or what alternatives should it consider? For example, should the Commission maintain the dollar amount threshold of the net worth test in the qualified client definition?

48. What types of and how many entity investors, if any, would meet the net worth test (or assets under management test) in the existing qualified client definition but not meet the qualification thresholds to be an accredited investor? Should the Commission retain the current net worth test in the definition?

49. Are there private fund sponsors for which the proposed amendments could lead to an increased (or decreased) use of rule 506(c) under Regulation D? If so, please describe why and how the proposed amendments could be expected to impact the use of rule 506(c) by these private fund sponsors.

2. Removal of the Assets Under Management Test

The proposal would remove the existing assets-under-management test in the qualified client definition, which is currently $1.4 million.[165] Removing the assets-under-management test may simplify the rule without meaningfully reducing the number of clients that currently meet the qualified client definition, given the expansion of eligibility to accredited investors generally.

We request comment on whether the Commission should remove the assets-under-management test from the qualified client definition in connection with the other proposed amendments to rule 205–3 described above.

50. Given the proposed amendments to incorporate accredited investors as qualified clients, would the assets-under-management test still be a meaningful distinct test for meeting the definition of a qualified client? Should the Commission retain the current assets-under-management test in the definition of a qualified client?

51. Are there investors that would no longer qualify as a qualified client because the investor previously relied on the assets-under-management test and would now be subject to either the income or net worth test (in the case of a natural person) or the investments or assets test (in the case of an entity) to be an accredited investor (and therefore qualify as a qualified client)? If so, how common is this scenario?

3. Amending References to the ''Qualified Client'' Definition in Rule 203A–3, Rule 204–3 and Form ADV

The definition of ''qualified client'' in rule 205–3(d)(1)—as proposed, rule 205–3(c)(1)—is currently also referenced in the definition of ''investment adviser representative'' in rule 203A–3(a)(3)(i) under the Advisers Act, the exceptions to a registered investment adviser's brochure supplement delivery requirement in rule 204–3(c)(2)(iii) under the Advisers Act, and the definition of a ''high net worth individual'' for purposes of Form ADV reporting. The proposal would include technical conforming amendments to rules 203A–3(a)(3)(i) and 204–3(c)(2)(iii) under the Advisers Act to replace the existing references to the ''qualified client'' definition in rule 205–3(d)(1) with references instead to rule 205–3(c)(1), corresponding to the proposed redesignation of current paragraph (d)(1) to (c)(1). Additionally, because the proposed changes to the underlying ''qualified client'' definition would impact the scope of rule 203A–3 as well as the information that would be reportable on Form ADV, we request comment below on whether these references to the ''qualified client'' definition should be substantively amended.

a. The ''Investment Adviser Representative'' Definition in Rule 203A–3

Section 203A of the Advisers Act preempts most state regulatory requirements for SEC-registered investment advisers and their

[163] *See* rule 205–3(c)(1) (''If a registered investment adviser entered into a contract and satisfied the conditions of this section that were in effect when the contract was entered into, the adviser will be considered to satisfy the conditions of this section; Provided, however, that if a natural person or company who was not a party to the contract becomes a party (including an equity owner of a private investment company advised by the adviser), the conditions of this section in effect at that time will apply with regard to that person or company.'').

[164] *See* section 205(e) of the Advisers Act*; see also* 2026 Inflation Adjustment Order, *supra* note 65.

[165] *See* rule 205–3(d)(1)(i); 2026 Inflation Adjustment Order, *supra* note 65. In connection with removing the ''net worth'' and ''assets under management'' tests, the proposal would also remove rule 205–3(d)(5) (defining the term ''most recent order'') and rule 205–3(e) (setting forth the inflation adjustment mechanism) as these two elements of rule 205–3 would also become unnecessary.

supervised persons,[166] but permits a state to license, register, or otherwise qualify an ''investment adviser representative'' who has a place of business in the state.[167] Under the current definition of ''investment adviser representative'' in rule 203A–3(a)(1), supervised persons of registered investment advisers are not deemed to be investment adviser representatives and are thus not subject to state qualification requirements if they have no more than five clients that are natural persons (other than ''excepted persons'') or no more than ten percent of their clients are natural persons (again, other than ''excepted persons'').[168] Rule 203A–3(a)(3)(i) defines ''excepted person'' to mean ''a natural person who is a qualified client as described in [rule 205–3(d)(1)].'' [169]

We propose to retain this reference in rule 203A–3(a)(3)(i) to the ''qualified client'' definition but to amend it to refer to rule 205–3(c)(1), corresponding to the proposed redesignation of current paragraph (d)(1) to (c)(1). Section 203A and section 205(e) under the Advisers Act were adopted by Congress together in 1996, and as the Commission has previously explained, Congress reasonably could have expected persons with whom the Commission permits advisers to enter into performance fee arrangements pursuant to its authority under section 205(e) to similarly not need the protections of the state qualification requirements for investment adviser representatives under section 203A.[170] The proposal would retain this connection and continue to treat qualified clients for purposes of the performance fee prohibition as also excepted persons for purposes of the investment adviser representative requirements.

As a consequence of retaining this reference and the proposed amendments to generally incorporate the definition of ''accredited investor'' under Regulation D into the definition of ''qualified client,'' excepted persons for purposes of the ''investment adviser representative'' definition would include natural persons that are accredited investors. Under this approach, investors deemed sufficiently financially sophisticated to forgo the protections of the Securities Act's registration process would similarly be considered sufficiently financially sophisticated to forgo the protections of state qualification requirements.[171] Thus expanding the category of excepted persons for purposes of determining whether a supervised person is an investment adviser representative may result in some supervised persons no longer being subject to state licensing requirements to which they are currently subject.

We request comment on whether the Commission should adopt as proposed or substantively amend the reference in rule 203A–3 to the ''qualified client'' definition.

52. What would be the expected impacts of expanding excepted persons for purposes of the ''investment adviser representative'' definition to include natural persons that are accredited investors? How many supervised persons, overall and/or at an individual firm, would this cause to be excluded from status as an investment adviser representative and thus to no longer be subject to state licensing requirements?

53. Instead of retaining the reference to qualified clients in the definition of ''excepted person'' in rule 203A–3(a)(3)(i), should we amend this definition to replace and/or modify its reference to qualified clients? For example, should we replace the reference with the criteria of the current ''qualified client'' definition, so as to preserve the current operation of rule 203A–3 and leave it unimpacted by the proposed amendments to the ''qualified client'' definition? Should we modify the reference, so that only certain types of accredited investors could ultimately be deemed as excepted persons (*e.g.,* those who qualify by virtue of the ''accredited investor'' definition's monetary net worth or income tests)?

b. The Exception to the Brochure Supplement Delivery Requirement in Rule 204–3(c)(2)(iii)

Rule 204–3 requires that each adviser firm brochure be accompanied by brochure supplements providing information about the advisory personnel on whom the particular client receiving the brochure relies for investment advice.[172] The brochure supplements contain, among other things, information about the educational background, business experience, and any disciplinary history of the supervised persons who provide advisory services to the client.[173] However, advisers are not required to deliver brochure supplements to clients who are ''an officer, employee, or other person related to the adviser that would be a 'qualified client' of your firm under [rule 205–3(d)(1)(iii)].'' [174] Under current rule 205–3(d)(1)(iii), qualified clients include clients that are certain executive officers or employees of the adviser.[175] The Commission adopted this exception because ''[s]ophisticated clients are likely to request this type of information, even if not affirmatively provided by an investment adviser.'' [176] We propose to retain this reference and make a conforming amendment, so that the provision would refer to rule 205–3(c)(1)(ii), corresponding to the proposed redesignation of current paragraph (d)(1)(iii) to (c)(1)(ii). Because the referenced prong of the ''qualified client'' definition would not be impacted by the proposed amendments beyond this redesignation, this conforming amendment would not have any substantive effect on the number of clients that would be exempted from receiving the brochure supplement.

We request comment on whether the Commission should revise as proposed or make other amendments to the reference in rule 204–3(c)(2)(iii) to the ''qualified client'' definition.

54. Instead of retaining the reference to ''qualified client'' in the exception to the brochure supplement delivery

[166] Section 202(a)(25) of the Advisers Act defines ''supervised person'' to include ''any partner, officer, director (or other person occupying a similar status or performing similar functions), or employee of an investment adviser, or other person who provides investment advice on behalf of the investment adviser and is subject to the supervision and control of the investment adviser.''

[167] *See* section 203A(b)(1)(A) of the Advisers Act.

[168] Supervised persons who do not on a regular basis solicit, meet with, or otherwise communicate with clients of the investment adviser or who provide only impersonal investment advice are excluded from the definition of an ''investment adviser representative.'' *See* rule 203A–3(a)(2). Supervised persons are not required to count clients that are not residents of the United States. *See* rule 203A–3(a)(4).

[169] *See* Exemption for Investment Advisers Operating in Multiple States; Revisions to Rules Implementing Amendments to the Investment Advisers Act of 1940; Investment Advisers With Principal Offices and Places of Business in Colorado or Iowa, Investment Advisers Act Rel. No. 1733 (July 17, 1998) [63 FR 39708 (July 24, 1998)]; Rules Implementing Amendments to the Investment Advisers Act of 1940, Investment Advisers Act Rel. No. 1633 (May 15, 1997) [62 FR 28112 (May 22, 1997)] (''The Commission believes that such individuals [who are permitted with their investment advisers to enter into performance fee arrangements] similarly do not need the protections of state qualification requirements. Because of the historical treatment of wealthy and sophisticated individuals under the federal securities laws, Congress reasonably could have expected these persons not to be considered retail investors.'').

requirement in rule 204–3(c)(2)(iii), should we amend this definition in any way? Why or why not?

c. Reporting in Form ADV

Form ADV is the investment adviser registration form and exempt reporting adviser reporting form filed with the Commission under the Advisers Act. Form ADV contains several references to the term ''qualified client,'' either directly or indirectly via additional defined terms. The term ''qualified client'' is defined as ''A client that satisfies the definition of qualified client in SEC rule 205–3.'' [177] The term ''high net worth individual'' is defined as ''An individual who is a qualified client or who is a 'qualified purchaser' as defined in section 2(a)(51)(A) of the Investment Company Act of 1940.'' [178] Relatedly, the number of ''high net worth individual'' clients is used as a reference point for how the term ''investment adviser representative'' is defined.[179] Finally, Question 5 of the General Instructions references ''qualified clients'' when a filer is determining if it can file an umbrella registration.[180]

We are not proposing any amendments to Form ADV, but the meaning of these terms would change. Accordingly, filers may need to alter how they complete some of the questions on Form ADV. For example, in Part 1A, Item 5, the form asks how many of an adviser's employees are registered with one or more state securities authorities as investment adviser representatives. We anticipate that this number could decline for some filers based on the underlying changes to the definition of an ''investment adviser representative.'' Item 5 also asks about the number of clients who are high net worth individuals and individuals who are not high net worth individuals. Under the proposal to incorporate the definition of ''accredited investor'' under Regulation D into the definition of ''qualified client,'' we anticipate that filers would generally record more high net worth individuals and fewer individuals who are not high net worth individuals.

We request comment related to Form ADV reporting in connection with our proposed amendments to the definition of ''qualified client.''

55. Would it be burdensome for filers of Form ADV to adjust their reporting, either as an initial matter or going forward, based on the proposed amendments to the qualified client definition?

56. How would the proposed amendments to the qualified client definition alter the amount or quality of data that filers provide on Form ADV?

57. Are there any changes that we should make to Form ADV in connection with the proposed amendments to the definition of ''qualified client''? Why or why not?

C. Client Look-Through

The proposal would amend the form of the current client ''look-through'' provision, without altering the ultimate function of this provision.[181] Currently, the ''look-through'' provision set forth in rule 205–3(b) provides that, in the case of a section 3(c)(1) private investment company or a regulated fund, each equity owner thereof (except for the investment adviser and any other equity owners not charged a fee on the basis of a share of capital gains or capital appreciation) will be considered a ''client'' of the adviser for purposes of rule 205–3(a). As a result of this provision, when determining the qualified client status of a section 3(c)(1) private fund or a regulated fund, an adviser must look through the fund to determine whether each applicable equity owner of the fund would be a qualified client.

The proposal would remove the existing client ''look-through'' provision and instead add two new provisions, which would together function similarly to the existing ''look-through'' provision. Under these two provisions, a section 3(c)(1) private investment company or regulated fund would be a qualified client if each equity owner thereof, other than an equity owner with respect to which a performance fee is not provided for, meets the definition of a qualified client.[182] In this way, the amendments would specify conditions for a section 3(c)(1) private fund or regulated fund to itself be a qualified client, rather than require that each of the fund's equity owners be identified as a ''client'' for purposes of the rule, as under current rule 205–3(b). This change is intended to reflect that, in the case of a fund client, an adviser's ''client'' under the Advisers Act and the rules thereunder is the fund itself rather than the equity owners of the fund.[183]

We request comment on the proposed amendments to the ''look-through'' provision in rule 205–3.

58. Should the Commission make the proposed amendments to the ''look-through'' provision set forth in rule 205–3?

59. As noted above, unlike the current ''look-through'' provision, the proposal would not specifically except ''the investment adviser entering into the contract'' from the qualified client test, as investment advisers would generally be qualified clients due to their inclusion in the definition of ''accredited investor.'' Should the Commission instead retain the specific reference to ''the investment adviser entering into the contract''? If so, why?

D. Compliance Period

We propose to provide a 12-month compliance period for regulated funds to come into compliance with the proposed amendments to Forms N–1A, N–2, and N–CSR, if adopted. The proposed 12-month compliance period would give investment advisers and regulated funds sufficient time to adjust their prospectus and shareholder report disclosures to comply with the proposed amendments to the forms.

Notwithstanding this compliance period, any adviser and regulated fund that relies on new paragraph (c)(1)(iv) of the proposed amendments to rule 205–3 must rely on the amended rule as amended in its totality and must comply with the proposed amendments to Forms N–1A, N–2, and N–CSR at the time it first relies on that provision.

We request comment on the proposed compliance period.

60. Is the proposed compliance period appropriate? Is a longer or shorter period necessary to allow advisers and regulated funds to comply with one or more of these particular amendments? If so, which proposed amendments, and what would be an appropriate compliance period?

III. Economic Analysis

A. Introduction

The Commission is mindful of the economic effects, including the costs

[177] Form ADV, Glossary of Terms.

[178] *Id.*

[179] *See id.*

[180] *See* Form ADV, General Instruction 5.

[181] *See* rule 205–3(b).

[182] *See* proposed rule 205–3(c)(1)(iii) and (c)(1)(iv). Proposed rule 205–3(c)(1)(iii) would provide that a private investment company is a qualified client only if each equity owner thereof is a qualified client, except for equity owners with respect to which compensation on the basis of a share of capital gains or capital appreciation is not provided for. Unlike current rule 205–3(b), this provision would not also refer to an ''investment adviser entering into the contract.'' This language would be unnecessary under the proposed amendments because investment advisers would be qualified clients due to their inclusion in the definition of ''accredited investor.'' *See* rule 501(a)(1) of Regulation D. In addition, proposed rule 205–3(c)(1)(iv) would not include the exception for equity owners not charged a performance fee because regulated funds may not vary the terms of the advisory fee from shareholder to shareholder. *See* section 18(a) of the Investment Company Act; *see also* rule 18f–3 under the Investment Company Act.

[183] *Id.*

and benefits, of the proposed amendments. Section 2(c) of the Investment Company Act, section 202(c) of the Advisers Act, section 2(b) of the Securities Act, and section 3(f) of the Exchange Act provide that when the Commission is engaging in rulemaking that requires us to consider or determine whether an action is necessary or appropriate in or consistent with the public interest, the Commission shall also consider whether the action will promote efficiency, competition, and capital formation, in addition to the protection of investors.[184] The analysis below addresses the likely economic effects of the proposed amendments, including the anticipated benefits and costs of the amendments and their likely effects on efficiency, competition, and capital formation.[185] The Commission also discusses the potential economic effects of certain alternatives to the approaches taken in this proposal.

The Commission is proposing amendments to rule 205–3 and Forms N–1A, N–2, and N–CSR that would:

1. Expand the ability of investment advisers to charge performance-based compensation on capital gains or capital appreciation (''performance fees on capital gains'') to regulated funds, provided that certain requirements related to fund governance are met; [186]

2. Expand the ability of investment advisers to charge performance fees on capital gains to regulated and private funds with shareholders that are accredited investors and to other non-fund clients that meet the definition of accredited investor;

3. Require separate disclosure of all performance-based compensation paid by regulated funds; and

4. Require a written determination by the board that the performance fee is in the best interests of the fund and its shareholders.

Performance-based compensation arrangements commonly allow advisers the opportunity to participate in the upside resulting from their management of a client's portfolio. Such agreements are often associated with strategies that are more complex and require more specialized knowledge or a higher degree of involvement from an investment adviser.[187] Investment strategies that are generally associated with performance fees on capital gains may help investors diversify their portfolios and improve their risk-adjusted returns.[188] However, currently these strategies are not equally available to all investors, as less wealthy investors have fewer avenues to access these strategies compared to high net worth individuals and institutional investors. The current regulatory framework, among other factors, has contributed to this unequal access among investors because it allows advisers to charge performance fees on capital gains only to wealthier clients and funds consisting of such clients. As a result, less affluent investors are generally excluded from strategies often associated with performance fees on capital gains, such as those with exposure to private equity or more complex public equity strategies.

However, these less affluent investors are generally *not* excluded from participation in other strategies that may be as complex. For example, access to strategies with performance compensation tied to other measures, such as interest income, has generally not been restricted to a particular set of investors or adviser clients because performance compensation based on income is not prohibited, regardless of how complex such a strategy may be.[189] As another example, access to equity BDC strategies, which may also be complex, has also not been restricted to a particular set of investors, because advisers to BDCs can take advantage of a statutory exception to the performance fee prohibition.[190] Moreover, while less affluent accredited investors are generally not prohibited from investing in section 3(c)(1) private funds that rely on Regulation D, the advisers to these funds are not permitted to charge these investors performance fees on capital gains unless these investors also meet generally more stringent financial thresholds in the qualified client definition.

As such, the regulatory landscape for investor access to certain strategies or vehicle structures with performance compensation agreements is driven by performance measures and vehicle type, and not necessarily by investors' financial sophistication.[191] This may lead to inefficient investment decisions for less affluent investors. In particular, these investors may have aggregate portfolios that are less efficiently constructed compared to those of higher-net-worth individuals and institutional investors, because such portfolios exclude alternative asset strategies—despite their similar complexity to other options available to them—that may offer diversification benefits and thereby increase risk-adjusted returns.[192]

The proposal aims to mitigate disparate access to these investments by allowing investment advisers to charge performance fees on capital gains to a wider pool of investors, thereby lowering barriers to advisory contracts with less affluent investors and with funds that have such investors. First, the proposed amendments would provide advisers flexibility in the implementation of performance fee contracts with regulated funds that either (i) meet the proposed governance requirements without restricting a fund's investor base,[193] or (ii) restrict their investor base to investors that satisfy the requirements of the qualified client definition, which would be expanded to include accredited

[184] *See* 15 U.S.C. 80a–2(c), 80b–2(c), 77b(b),78c(f).

[185] Concurrently with this proposal, the Commission is separately proposing amendments to, among other things, allow closed-end management investment companies and business development companies to make repurchase offers to shareholders at net asset value at periodic intervals pursuant to a fundamental policy. *See* Interval Fund Modernization; Expansion of Multiple Share Class Relief to Registered Closed-End Management Investment Companies and Business Development Companies, Rel. No. 33–11444 (Sep. 30, 2026) 2026 (''Interval Fund Modernization Proposal''). The Commission has considered whether there are interactive effects between this proposal and the Interval Fund Modernization Proposal and has concluded that, if adopted as proposed, there would be no substantial impact on the proposal from the Interval Fund Modernization Proposal.

[186] Throughout the Economic Analysis, we use the term ''performance fees on capital gains'' to refer to performance-based compensation based on capital gains or capital appreciation.

[187] *See infra* section III.B.3.a.

[188] *See infra* notes 192 and 195 and accompanying discussion.

[189] Specifically, both private equity strategies (which mainly generate capital gains) and private credit strategies (which mainly generate gains from income) can be complex and may result in excessive risk-taking by a fund adviser due to misaligned incentives between adviser and fund investors. However, performance fees on income are not currently prohibited.

[190] *See* section 205(b)(3) of the Advisers Act; *see also infra* section III.B.1.a. We note that BDCs can rely on this exception provided that the fee does not exceed 20% of the BDC's net realized capital gains over a defined period.

[191] However, while advisers that charge performance fees to BDCs and to funds with strategies where performance compensation is based on measures other than capital gains or capital appreciation do not have explicit regulatory constraints on their investor base, investor access to these vehicles may still be constrained by fund-imposed investment minimums or as a result of limited availability of certain funds across distribution channels. *See infra* section III.B.3.c for a discussion of fund distribution channels; *see also infra* section III.B.3.d for a discussion of investment minimums. The proposed amendments would not address investment minimums or distribution channels for regulated funds.

[192] Portfolio diversification refers to investing in different asset classes and asset types to reduce overall portfolio risk associated with price volatility. Adding investments with returns that have a low correlation with those of the other portfolio investments would make the expected portfolio return less volatile. To that extent, a return adjusted for risk (risk-adjusted return) could increase.

[193] *See* proposed rule 205–3(c)(1)(iv).

investors. This flexibility could lead to the creation of new regulated funds, whether offering strategies currently unavailable to investors in the regulated fund space or more conventional strategies, to the extent that advisers seek to charge performance fees on capital gains. Second, the proposed amendments would allow advisers to 3(c)(1) funds and separately managed accounts to admit accredited investors that do not currently meet the qualified client definition or to create new 3(c)(1) funds or separately managed accounts that admit such investors.[194]

In doing so, the proposed amendments could improve investors' access to strategies typically associated with performance fees on capital gains, such as certain alternative public market strategies and private market strategies,[195] within regulated and private funds.[196] Moreover, lowering the barriers for investment advisers to enter into advisory contracts with performance fees on capital gains may improve the ability of advisers to design more incentive-compatible contracts, meaning that the interests of advisers would be more aligned with the interests of investors, because advisers acting in their own self-interest to increase their compensation could also produce positive outcomes for fund investors through enhanced investment returns. The incentives these compensation arrangements provide may improve risk-adjusted returns for investors, to the extent that such incentive-based compensation does not result in risk-shifting behavior for fund advisers.[197] However, while exposure to such strategies can increase expected risk-adjusted returns, less affluent investors that are less familiar with these risks may position themselves sub-optimally.

The proposed disclosure requirements for regulated funds would make it easier to discern the contribution of performance fees to fund expenses over time and across funds and would make disclosure of performance fees more uniform across regulated funds, which may reduce investor search costs. This, in turn, may reduce the risk of a mismatch between investor preferences and investor choice, and may help investors make more efficient investment decisions.

Many of the benefits and costs discussed below are difficult to quantify because the data needed to do so are not currently available. For example, we cannot quantify the degree to which various types of regulated funds would adopt performance fees on capital gains, or the degree to which investors would choose to invest in such funds. While the staff has attempted to quantify economic effects where possible, much of the discussion is qualitative. Accordingly, we seek comment on all aspects of the economic analysis, especially any data or information that would enable quantification of the proposal's economic effects.[198]

B. Economic Baseline

The baseline against which the costs, benefits, and the effects on efficiency, competition, and capital formation of the proposed amendments are measured consists of the current regulatory framework, the current state of the market, and market participants' current practices.[199]

1. Regulatory Baseline

a. Performance Compensation

Registered investment advisers may enter into advisory contracts with different types of clients, such as registered funds, BDCs, private funds, or individual clients. Under the Advisers Act, a registered investment adviser generally may not be compensated on the basis of a share of capital gains in or capital appreciation of an advisory client's account.[200] Compensation arrangements based on other measures of performance, such as interest, ordinary income, or dividends, are not prohibited by section 205(a)(1) and are therefore outside the scope of the proposed amendments to rule 205–3 for investment advisers.

The general prohibition on performance fees on capital gains has several exceptions. First, a statutory exception permits agreements with registered funds, or with other accounts with $1 million or more under management, that provide for performance fees symmetrically structured as fulcrum fees.[201] Under this exception, an adviser may charge a fee that increases and decreases proportionately on the basis of the accounts' investment performance measured against an appropriate securities index or other appropriate measure of performance. An adviser would thus receive its full ''baseline'' fee when the accounts' performance equaled that index or other appropriate measure, additional compensation for outperformance, and symmetrically reduced compensation for underperformance.[202]

Second, section 205(b)(3) of the Advisers Act provides a statutory exception to the prohibition on performance fees on *realized* capital gains of externally-managed BDCs, allowing these funds to pay performance-based compensation up to 20 percent of net realized capital gains.[203] An adviser relying on this

[194] 3(c)(1) private funds are limited to 100 investors, which may limit the willingness of fund advisers to admit less affluent accredited investors that likely would commit less capital than investors satisfying the current qualified client definition. *See infra* sections III.B.1.a and III.B.3.d.

[195] As used herein ''private market strategies'' refers to: (i) strategies that directly or indirectly invest in private markets, and (ii) hedge fund-like strategies, which commonly utilize leverage, derivatives, and short-selling, and may invest in both public and private markets.

[196] The proposed amendments would expand the ability of advisers to enter into contracts with performance fees on capital gains in separately managed accounts to clients that meet the definition of accredited investor. However, we do not anticipate a meaningful increase in usage of performance fees in this space, as adviser compensation for management of retail-oriented separately managed accounts generally does not include performance-based compensation. *See infra* sections III.B.3.d and III.C.1.d.

[197] *See infra* section III.B.3 for a discussion of the literature.

[198] *See infra* section III.F.

[199] *See, e.g., Nasdaq* v. *SEC,* 34 F.4th 1105, 1111–14 (D.C. Cir. 2022). This approach also follows SEC staff guidance on economic analysis for rulemaking. *See* SEC Staff, *Current Guidance on Economic Analysis in SEC Rulemaking* (Mar. 16, 2012), *available at https://www.sec.gov/divisions/riskfin/rsfi_guidance_econ_analy_secrulemaking.* (''The economic consequences of proposed rules (potential costs and benefits including effects on efficiency, competition, and capital formation) should be measured against a baseline, which is the best assessment of how the world would look in the absence of the proposed action.''); *id.* at 7 (''The baseline includes both the economic attributes of the relevant market and the existing regulatory structure.'').

[200] *See* 15 U.S.C. 80b–5(a)(1). This prohibition also applies to advisers required to be registered with the Commission but does not apply to exempt reporting advisers. As such, exempt reporting advisers may be compensated on the basis of a share of capital gains in, or capital appreciation of, an advisory client's account.

[201] *See* 15 U.S.C. 80b–5(b).

[202] *See also supra* note 29 and accompanying text.

[203] Section 2(a)(48) of the Investment Company Act (15 U.S.C. 80a–2) defines a BDC as a domestic closed-end company that operates for the purpose of making investments in the securities specified in Section 55(a) of the Investment Company Act (15 U.S.C. 80a–54) and that makes available significant managerial assistance to the issuers of those types of securities. BDCs may be publicly traded, non-traded but publicly offered, and privately offered (relying on Regulation D). A BDC may be internally or externally managed. An externally managed BDC must enter into an advisory agreement which would be subject to the Advisers Act. BDCs can rely on either the issuer tender rule under the Exchange Act (rule 13e–4) for investor repurchases and have discretionary or irregular repurchase intervals or on rule 23c–3 under the Investment Company Act to make periodic repurchase offers as a fundamental policy and/or to make discretionary repurchase offers no more frequently than once every two years. BDCs are permitted to lever equity capital up to a 200% debt-to-equity ratio, which corresponds to leverage of approximately 66.7% of total capital under the Small Business Credit Availability Act of 2018 (15 U.S.C. 80a–60(a)(1)).

statutory exception cannot charge performance-based compensation on unrealized gains.

Third, rule 205–3 provides an exemption from the general prohibition on performance fees on capital gains when the client entering into the contract is a qualified client. The rule establishes several paths by which a natural person or a company is considered a qualified client: the client has at least $1.4 million in assets under management with the adviser; [204] the adviser reasonably believes the client has a net worth exceeding $2.7 million; [205] the client is a ''qualified purchaser''; [206] or the client is a knowledgeable employee of the adviser.[207] When the adviser's client is a registered investment company, BDC, or a 3(c)(1) private investment company, the qualified client designation applies on a look-through basis to each of the fund's equity holders that are charged a fee on the basis of capital gains or capital appreciation (the ''look-through'' provision).[208] These vehicles are discussed below in relation to the qualified client exception.

Registered Investment Companies and BDCs.[209] Rule 205–3(b) requires that, when an adviser's client is a registered investment company, under the look-through provision, all underlying equity holders must meet the definition of a qualified client. Similarly, under the look-through provision, advisers to a BDC can treat the BDC as a qualified client (instead of relying on the broad statutory exception provided to them in section 205(b)(3) of the Advisers Act) if all underlying equity holders of the BDC are qualified clients. Separately, the Investment Company Act does not permit regulated funds to issue different share classes based on differences in advisory fees, including performance fees.[210] Thus, the current regulatory framework requires that registered investment companies and BDCs paying performance fees on capital gains to their investment advisers restrict their entire investor base to qualified clients, because performance fees are paid at the fund level rather than by individual investors.

Private Funds. Private investment companies are funds that are excepted from the definition of an investment company pursuant to section 3(c)(1) or 3(c)(7) of the Act.[211] Advisers to 3(c)(1) private funds can charge performance fees on capital gains only to fund investors that are qualified clients.[212] Unlike regulated funds, however, 3(c)(1) funds may generally have performance fees that vary across investors. 3(c)(1) funds are limited to a maximum of 100 beneficial owners (or, in the case of a qualifying venture capital fund, 250 persons).[213] Advisers to 3(c)(1) funds with performance fees on capital gains are required to assess the qualified client status of each investor.[214] In addition to the qualified client restriction applicable to 3(c)(1) funds paying performance fees on capital gains, 3(c)(1) funds that offer interests pursuant to Regulation D exempt offerings are also required to limit their investors to accredited investors (and up to 35 non-accredited investors for offerings relying on 506(b)).[215]

b. Accredited Investor Definition

Individuals may qualify as accredited investors by: (i) having net worth over $1 million, excluding primary residence (individually or with spousal equivalent); [216] (ii) having income over $200,000 (individually) or $300,000 (with spouse or spousal equivalent) in each of the prior two years, with a reasonable expectation of reaching the same income level in the current year; [217] (iii) holding in good standing one or more professional certifications or designations or credentials from an accredited educational institution that the Commission has designated as qualifying an individual for accredited investor status; [218] (iv) being directors,

[204] *See* rule 205–3(d)(1)(i); *see also* 2026 Inflation Adjustment Order, *supra* note 65.

[205] *See* rule 205–3(d)(1)(ii)(A); *see also* 2026 Inflation Adjustment Order, *supra* note 65.

[206] *See* rule 205–3(d)(1)(ii)(B). Section 2(a)(51)(A) of the Investment Company Act defines a ''qualified purchaser''. This definition is generally more stringent than the definition of a ''qualified client''.

[207] *See* rule 205–3(d)(1)(iii).

[208] *See* rule 205–3(b).

[209] Registered investment companies may be open-ended or closed-ended. Open-end funds offer daily subscriptions and redemptions, while closed-end funds may vary in their share repurchase programs. Among closed-end funds, tender-offer funds rely on the issuer tender rule 13e–4 under the Exchange Act for investor repurchases and may have discretionary or irregular repurchase intervals. Interval funds rely on rule 23c–3 under the Investment Company Act for investor repurchases and must conduct repurchases at scheduled intervals. Under the Investment Company Act, open-end funds are prohibited from issuing senior securities other than bank borrowing and must maintain asset coverage of at least 300% with respect to such borrowings (leverage of approximately 33.3%). Closed-end funds are similarly subject to a 300% asset coverage requirement for senior securities representing indebtedness but are not limited to bank borrowings and may also issue preferred stock, subject to a separate asset coverage requirement of at least 200%. *See* 15 U.S.C. 80a–18(a)(1)(A)–(B), 15 U.S.C.80a–18(f)(1).

[210] Specifically, sections 18(a)(1) and 18(f)(1) restrict the issuance of ''senior securities'' by closed-end and open-end registered investment companies, respectively. Section 61(a) applies the restrictions in section 18(a) to BDCs. Open-end registered investment companies may issue multiple share classes by relying on exemptive rule 18f–3, but this rule does not permit share classes based on differences in advisory fees, including performance fees. *See* rule 18f–3(a)(1)(iii). Likewise, while exemptive relief may be granted for registered closed-end funds and BDCs to offer multiple share classes, the exemptive conditions to obtain this relief require compliance with rule 18f–3, and thus have not allowed for share classes based on differences in advisory fees. *See e.g.,* Ares Core Infrastructure Fund, et al., Investment Company Act Rel. No. 35523 (Apr. 8, 2025); Antares Strategic Credit Fund, et al., Investment Company Act Rel. No. 35528 (Apr. 9, 2025); Jefferies Credit Management LLC and Jefferies Credit Partners BDC Inc., Investment Company Act Rel. No. 35527 (Apr. 9, 2025); Carlyle Global Credit Investment Management L.L.C., et al., Investment Company Act Rel. No. 35534 (Apr. 14, 2025).

[211] *See* rule 205–3(d)(3). Funds excepted under section 3(c)(7) of the Investment Company Act are only permitted to admit investors that are qualified purchasers as defined under 2(a)(51)(A), and such funds are statutorily excepted from the Advisers Act's performance fee prohibition (and thus are not included in rule 205–3) in accordance with section 205(b)(4) thereof.

[212] *See* rule 205–3(b).

[213] A beneficial owner means any natural person or company whose securities are counted toward the 100-person limit under section3(c)(1), including a company whose holdings are treated as a single owner unless it holds 10% or more of the issuer's outstanding voting securities and including any person who acquires securities through an involuntary transfer such as legal separation, divorce, or death. *See* 15 U.S.C. 80a–3(c)(1) and17 CFR 270.3c–1(b).

[214] *See* rule 205–3(b).

[215] Rule 506(b) of Regulation D permits private funds to admit up to 35 non-accredited investors (in any 90-calendar-day period) that, either alone or with a purchaser representative, meet the legal standard of having sufficient knowledge and experience in financial and business matters to be capable of evaluating the merits and risks of the prospective investment. *See* 17 CFR 230.506(b). Funds must disclose the number of non-accredited investors in a notice that they are required to file with the Commission on Form D within 15 days after the first sale of securities in the offering. *See* 17 CFR 230.503(a). Offerings made in reliance on rule 506(c), which permits issuers to engage in general solicitation and advertising, requires that all purchasers be accredited investors and that the issuer takes reasonable steps to verify their accredited investor status. *See* 17 CFR 230.506(c).

[216] *See* rule 501(a)(5) of Regulation D. The rule contains detailed provisions regarding the treatment of primary residence debt in calculating net worth.

[217] *See* rule 501(a)(6) of Regulation D.

[218] *See* rule 501(a)(10) of Regulation D. In 2020, the Commission issued an order designating the General Securities Representative license (Series 7), Private Securities Offerings Representative license (Series 82), and Investment Adviser Representative license (Series 65) as qualifying a holder of such licenses in good standing for accredited investor status. *See Order Designating Certain Professional Licenses as Qualifying Natural Persons for Accredited Investor Status,* Release No. 33–10823 (Aug. 26, 2020) [85 FR 64234 (Oct. 9, 2020)]. The Commission is considering potentially designating each of the following as qualifying natural persons for accredited investor status under Rule 501(a)(10): (1) chartered financial analyst (CFA); (2) chartered financial planner (CFP); (3) FINRA Series 79 and Series 86 and 87; (4) individuals that pass an accredited investor exam to be developed by FINRA; and (5) certified public accountant (CPA). As the result, the number of persons qualifying as accredited investors could increase. *See Potential Designation of Chartered Financial Analyst Designation as Qualifying Natural Persons for*

executive officers, or general partners of the issuer selling the securities; [219] (v) for investments in a private fund, being ''knowledgeable employees'' of the fund as defined in rule 3c–5(a)(4) under the Investment Company Act.[220] Entities may qualify as accredited investors by meeting one of the following criteria: (i) financial institutions such as banks, insurance companies, registered investment companies, business development companies, broker-dealers, investment advisers, and employee benefit plans, among others; [221] (ii) corporations, partnerships, limited liability companies, Massachusetts or similar business trusts, 501(c)(3) organizations, and trusts, not formed for the specific purpose of acquiring the securities offered, with total assets in excess of $5 million; [222] (iii) entities in which all equity owners are accredited investors; [223] (iv) ''family offices'' with assets under management in excess of $5 million and their ''family clients''; [224] and (v) entities of a type not otherwise listed, not formed for the specific purpose of acquiring the securities offered, owning investments in excess of $5 million.[225] Issuers of private funds relying on rule 506(b) of Regulation D are required to have a reasonable belief that purchasers of securities sold in the offering are accredited investors or furnish certain information to non-accredited investor purchasers.[226] Issuers relying on rule 506(c) may only sell to accredited investors and must take reasonable steps to verify that purchasers of securities sold in the offering are accredited investors.[227]

c. Fund Board Requirements and Performance Fee Disclosure

Section 15(c) of the Investment Company Act requires that the initial approval, and any annual continuance, of an investment advisory contract by a regulated fund be approved by a majority of the fund's board, including a majority of directors who are not interested persons of the adviser.[228] In discharging this responsibility, the board must request and evaluate such information as may be reasonably necessary to evaluate the terms of the advisory contract.[229] The Investment Company Act, however, does not prescribe a particular form of advisory compensation, such as whether it should be based on a percentage of assets under management, on the fund's performance, or on some other basis.

Regulated funds that currently pay their advisers any type of performance fees, including fulcrum fees or asymmetric performance fees on capital gains or income, are required to disclose such fees on Forms N–1A (registered open-end funds) and N–2 (registered closed-end funds and BDCs) as part of the overall Management Fees line in the fee table. However, the instructions to the prospectus fee table do not currently require a registered fund to separately identify, as a distinct line item or under a subheading within the fee table, the portion of the management fees attributable to performance-based compensation.[230]

In addition to fee table disclosure, the registration statement forms for regulated funds require a description of the investment adviser's compensation, including whether it is based on a percentage of average net assets and, if not, the basis of the compensation, such as a performance fee.[231] Regulated funds are also currently required to disclose in Form N–CSR information about the basis upon which the board approved the advisory fee under section 15(c) of the Investment Company Act.[232]

Unlike regulated funds, private funds are not required to make standardized public disclosures. However, as with other private placements, private fund offerings are subject to various antifraud provisions, including section 17(a) of the Securities Act, section 10(b) of the Exchange Act and rule 10b–5 thereunder. Investment advisers are likewise subject to prohibitions under sections206(1), (2), and (4) of the Advisers Act on employing any device, scheme, or artifice to defraud clients or prospective clients, engaging in any transaction, practice, or course of business that operates upon any client or prospective client as a fraud or deceit, or engaging in any act, practice, or course of business that is fraudulent, deceptive, or manipulative.[233] Additionally, all registered investment advisers, including those that advise private fund clients, must disclose elements of their compensation on Form ADV, Part 2, including whether they or their supervised persons are compensated on the basis of capital gains or capital appreciation of client assets.[234] While ScheduleD of FormADV requires extensive fund-level disclosures, these disclosures do not include information about fees actually paid to the adviser for each fund.

d. References to the ''Qualified Client'' Definition

Currently, the definition of ''qualified client'' is referenced in certain rules and Form ADV. First, Form ADV requires investment advisers to report the number of high net worth individuals, and the definition of a high net worth individual is tied to the qualified client

Accredited Investor Status, Potential Designation of Certified Financial Planner Certification as Qualifying Natural Persons for Accredited Investor Status, Potential Designations of the Investment Banking Representative License (Series 79) and the Research Analyst License (Series 86 and Series 87) as Qualifying Natural Persons for Accredited Investor Status, Potential Designation Designate of Passage of an Accredited Investor Exam to Be Developed by FINRA as Qualifying Natural Persons for Accredited Investor Status, and *Potential Designation of U.S. Certified Public Accountants License as Qualifying Natural Persons for Accredited Investor Status* published elsewhere in this issue of the **Federal Register**.

[219] *See* rule 501(a)(4) of Regulation D. The rule also includes directors, executive officers, or general partners of a general partner of the issuer.

[220] *See* rule 501(a)(11) of Regulation D. This category applies only where the issuer would be an investment company but for the exclusion provided by section 3(c)(1) or 3(c)(7) of the Investment Company Act.

[221] *See* rules 501(a)(1) and 501(a)(2) of Regulation D. Employee benefit plans qualify as accredited investors if: (a) the investment decision is made by a plan fiduciary that is a bank, savings and loan association, insurance company, or registered investment adviser; (b) the plan has total assets in excess of $5 million; or (c) the plan is self-directed with investment decisions made solely by accredited investors. *See* 17 CFR 230.501(a)(1).

[222] *See* rules 501(a)(3) and 501(a)(7) of Regulation D. Trusts must additionally have their purchase directed by a sophisticated person as described in rule 506(b)(2)(ii). *See* 17 CFR 230.501(a)(3); 17 CFR 230.501(a)(7).

[223] *See* rule 501(a)(8) of Regulation D.

[224] *See* rules 501(a)(12) and 501(a)(13) of Regulation D. As used therein, ''family office'' and ''family client'' are as defined in rule 202(a)(11)(G)–1 under the Advisers Act. The family office must additionally not be formed for the specific purpose of acquiring the securities offered, and the prospective investment must be directed by a person with sufficient knowledge and experience to evaluate the merits and risks of the prospective investment.

[225] *See* rule 501(a)(9) of Regulation D. As used therein, ''investments'' is as defined in rule 2a51–1(b) under the Investment Company Act.

[226] *See* rule 501(a) of Regulation D; rule 502(b) of Regulation D. If the issuer is selling to non-accredited investors such investors must possess such knowledge and experience in financial and business matters that they are capable of evaluating the merits and risks of the prospective investment, and the issuer may only sell to 35 such non-accredited purchasers in offerings under rule 506(b) in any 90-calendar-day period. *See* rule 506(b)(2).

[227] *See* rule 506(c) of Regulation D.

[228] Sections 15(a) through (c) of the Investment Company Act.

[229] *See* section 15(c) of the Investment Company Act. *See also supra* section II.A.2.c.

[230] *See* Instruction 3(a) to Item 3 of Form N–1A; Instruction 7 to Item 3 of Form N–2.

[231] *See* Item 10(a)(1)(ii) of Form N–1A; Instruction 1 to Item 9.1.b.(3) of Form N–2. *See also* Form N–1A Item 10(A)(1)(ii)(B); Instruction 2 of Item 9.1.b.(3) of Form N–2.

[232] *See* Item 11 of Form N–CSR; *see also* Item 13 of Form N–CSR.

[233] Under section 206(4) of the Advisers Act, the Commission is authorized to ''by rules and regulation define, and prescribe means reasonably designed to prevent, such acts, practices and courses of business as are fraudulent, deceptive or manipulative.''

[234] *See* Form ADV, Part 2, Item 6.

definition.[235] In addition, Question 5 of the General Instructions to Form ADV references ''qualified clients'' when a filer is determining if it can file an umbrella registration.

Second, the qualified client definition is used for purposes of determining whether a supervised person meets the federal definition of an ''investment adviser representative'' in rule 203A–3. Under this rule, supervised persons of registered investment advisers are not deemed to be investment adviser representatives—and thus are not subject to state qualification requirements—if they have five or fewer clients that are natural persons (other than ''excepted persons'') or ten percent or less of their clients are natural persons (other than ''excepted persons''). Rule 203A–3 defines ''excepted persons'' as natural persons who are qualified clients under rule 205–3(d)(1).[236]

Third, the qualified client definition is used for purposes of determinations for the exceptions to the brochure supplement delivery in rule 204–3.[237] The rule provides that no brochure supplement need be delivered to a client who is an officer, employee, or similar person related to the adviser and who would be a ''qualified client'' of the adviser under rule 205–3(d)(1)(iii).[238]

2. Affected Parties

a. Registered Investment Advisers

The proposed amendments would affect registered investment advisers that enter into advisory contracts with different types of clients. Table 1 presents the number of advisers and their aggregate regulatory assets under management (RAUM) by client type.

BILLING CODE 8011–01–P

[235] *See* Form ADV, Glossary of Terms. Part 1A, Item 5.D. of Form ADV requires advisers to categorize their clients (*e.g.,* individuals, banks, pension plans) and to identify high net worth individuals as a separate subset of individuals. Relatedly, the number of ''high net worth individual'' clients is used as a reference point for how the term ''investment adviser representative'' is defined. *See also supra* section II.B.3.c.

[236] *See* 17 CFR 275.203A–3(a)(3)(i). *See also supra* section II.B.3.a.

[237] *See* 17 CFR 275.204–3(c)(2)(iii). The rule implements the brochure (Part 2A) and brochure supplement (Part 2B) delivery obligations. *See also supra* section II.B.3.b.

[238] The rule likewise also provides exemptions from delivery requirements (i) where no firm brochure is required (*e.g.,* certain investment company clients) and (ii) where the client receives only impersonal advice.

Table 1. Registered Investment Advisers by Client Type, as of December 31, 2025[a]

Client Type	Number of Advisers	Client RAUM,[b] $ Trillion	Adviser RAUM,[c] $ Trillion
1. Regulated funds:			
- RICs:	1,673	$56.8	$101.8
- Open-end funds	777	$42.9	$74.9
- Closed-end funds	224	$0.4	$45.6
--- Traditional	88	$0.1	$15.3
--- Interval	102	$0.2	$17.8
--- Tender-offer	72	$0.1	$12.5
- BDCs:	132	$0.6	$5.6
2. Other pooled investment vehicles:[d]	6,272	$46.8	$124.6
- 3(c)(1) funds	3,572	$2.8	$65.2
- 3(c)(7) funds	4,793	$29.6	$111.8
3. Separately managed accounts:[e]	12,413	$61.9	$133.9
- Individuals	10,512	$27.7	$89.6
--- High net worth individuals[f]	10,091	$18.7	$87.7
--- Other individuals[g]	9,400	$8.9	$73.0
Total:	16,427	$166.0	$166.0

[a] The estimates are based on Form ADV and Form N-CEN as of December 2025, incorporating filings received through May 31, 2026. 3(c)(7) private funds would not be affected by this rulemaking but are included in the table for context.

[b] Client RAUM represents the share of RAUM attributable to each particular client type, as reported on Form ADV, Part 1A, Item 5.D.(3) and Item 5.F.(2)(c). Form ADV does not collect data for each type of registered investment company. We estimate client counts and RAUM for open-end and closed-end funds from average net assets reported on Form N-CEN. *See infra* Table 2. Note that Form N-CEN is filed by investment companies while Form ADV is filed by advisers. Funds report their advisers with corresponding identifiers, including Central Registration Depository (CRD) numbers, on Form N-CEN. We use CRD numbers to match advisers reported on Form N-CEN with advisers to these funds on Form ADV. The adviser match is reliant on a valid CRD number reported on Form N-CEN and a match on Form ADV. There may be differences between the values reported on the two forms due to timing differences or reporting inconsistencies; therefore, the CRDs reported on N-CEN may not always have a valid match on Form ADV. As such, the estimates for the number of advisers to each registered fund type may be underestimated.

[c] Adviser RAUM totals eliminate RAUM for sub-advisory relationships identified through analysis of reporting on Form ADV, Part 1A, Item 5.D.(3) and Item 5.F.(2)(c), and reported investment adviser affiliations, to avoid double-counting.

[d] Other pooled investment vehicles include 3(c)(1) funds, 3(c)(7) funds and other pooled investment vehicles which are not private funds or regulated funds. For example, entities that would be investment companies as defined in section 3 of the Investment Company Act but for sections 3(c)(5) or 3(c)(11) of that Act would typically be considered pooled investment vehicles (other than investment companies and BDCs) in Item 5.D. Similarly, UCITS funds that are regulated by the European Commission and that are not registered under the Investment Company Act would also typically be considered pooled investment vehicles (other than investment companies and BDCs) in Item 5.D. Other pooled investment vehicles which are not 3(c)(1) or 3(c)(7) funds are not reported on Form ADV, Schedule D, Section 7.B.(1).

As of December 31, 2025, there were 16,427 advisers registered with the Commission. Among advisers to registered funds, approximately 22.2 percent advise only registered funds; approximately 13.5 percent of advisers to 3(c)(1) funds advise only 3(c)(1) funds; and approximately 20.4 percent advise individual clients only.

b. Regulated Funds

The proposed amendments would affect funds that are regulated by the Commission, including RICs and BDCs and their investors. Table 2 presents the number of funds and net assets under management by category of registered investment company.

[e] Form ADV defines separately managed accounts as accounts of clients other than those listed in Part 1A, Item 5.D.(3), lines (d) through (f). As such, separately managed accounts include accounts of clients that are individuals (including high net worth individuals), banking or thrift institutions, pension and profit sharing plans, charitable organizations, state or municipal government entities, investment advisers, insurance companies, sovereign wealth funds and foreign official institutions, corporations or other businesses, and other clients, as reported in Part 1A, Item 5.D., lines (a) through (c) and (g) through (n).

[f] As reported on Form ADV in Part 1A, Item 5.D., line (b).

[g] As reported on Form ADV in Part 1A, Item 5.D., line(a).

Table 2. Regulated Funds by Type, as of December 31, 2025[a]

Fund Type	All Funds[b]		Index Funds[c]		Funds of Funds[d]	
	Count	Net Assets, $Trillion	Count	Net Assets, $Trillion	Count	Net Assets, $Trillion
Registered investment companies:						
- Open-end funds:	12,674	$42.92	2,789	$15.69	1,695	$4.22
--- Mutual funds[e]	8,484	$29.92	657	$3.68	1,490	$4.16
--- ETFs[f]	4,190	$13.00	2,132	$12.01	205	$0.06
- Closed-end funds:[g]	706	$0.43	1	$0.00	71	$0.06
--- Traditional[h]	393	$0.10	-	-	11	$0.01
--- Interval[i]	139	$0.23	-	-	4	$0.00
--- Tender offer[j]	174	$0.10	1	$0.00	56	$0.04
Business Development Companies:[k]	176	$0.28	-	-	-	-
- Listed	51	$0.07	-	-	-	-
- Unlisted	125	$0.21	-	-	-	-
Total	13,556	$43.63	2,790	$15.69	1,766	$4.28

Table notes:

[a] The estimates are based on the most recent N-CEN filings of funds that report on Form N-1A and Form N-2, received for reporting periods ending on or before December 31, 2025, with filings through May 29, 2026.

[b] The estimates for net assets are based on average net assets reported on Form N-CEN, Item C.19.

[c] Index funds are identified as those that are reported as an index fund on Form N-CEN, Item C.3.b or as a fund that seeks to achieve a multiple of an index, as reported on Form N-CEN, Item C.3.c.

[d] Funds of funds are identified as a fund of funds on Form N-CEN, Item C.3.e.

[e] Mutual funds are identified as those funds registered on Form N-1A, excluding ETFs registered on Form N-1A as indicated on Form N-CEN, Item C.3.a.i.

[f] ETFs registered as open-ended funds are identified in Item C.3.a.i of Form N-CEN. UIT ETFs and exchange-traded managed funds are excluded from these ETF totals, as they will not be affected by the proposed rule.

[g] Closed-end funds are identified in Form N-CEN, Item B.6.b.

[h] Traditional closed-end funds are identified as those that are not reported as interval or tender offer funds.

[i] Interval funds are identified on Form N-CEN, Item C.3.d.

[j] Tender offer funds are identified as closed-end funds that are neither traditional nor interval funds.

[k] Based on quarterly BDC filings data from Refinitiv BDC Collateral, as of December 31, 2025. The estimates for the counts of listed and unlisted BDCs are based on the tickers associated with these BDC.

As of December 31, 2025, there were 13,556 regulated funds representing approximately $43.6 trillion in cumulative net assets. Out of these funds, 20.6 percent were index funds representing approximately 36 percent of cumulative net assets, and 13 percent were funds of funds representing approximately 9.8 percent of cumulative net assets.

c. Private Funds

The proposed amendments would affect private funds and their investors. Table 3 presents the distribution of private funds by exclusion and strategy.

Table 3. Private Fund Types, as of December 31, 2025[a]

Private Fund Type	All Private Funds		Funds Restricted to Qualified Clients[b]		Funds with an Investment Minimum[c]		Number of Beneficial Owners[d]	
	Count	GAV, $ Trillion	Count	GAV, $ Trillion	Count	GAV, $ Trillion	Median	90th Percentile
3(c)(1):[e]	14,138	$1.2	10,308	$0.9	10,707	$0.8	21	81
- Hedge Fund	2,019	$0.4	1,650	$0.3	1,856	$0.3	23	77
- Private Equity	6,546	$0.4	4,882	$0.3	4,681	$0.3	21	82
- Venture Capital	2,086	$0.1	1,356	$0.0	1,356	$0.1	21	74
- Other	3,491	$0.3	2,423	$0.2	2,818	$0.2	20	87
3(c)(1) and 3(c)(7):[f]	5,999	$1.6	5,631	$1.6	3,881	$1.2	8	63
- Hedge Fund	609	$0.3	600	$0.3	416	$0.3	10	60
- Private Equity	3,485	$0.8	3,331	$0.8	2,234	$0.6	10	67
- Venture Capital	527	$0.1	462	$0.1	370	$0.1	12	63
- Other	1,379	$0.4	1,239	$0.3	862	$0.2	5	49
3(c)(7):[g]	45,357	$27.9	N/A		32,826	$21.5	11	132
- Hedge Fund	9,047	$13.8	N/A		7,363	$11.5	10	149
- Private Equity	20,767	$8.6	N/A		13,794	$5.9	13	119
- Venture Capital	2,172	$0.6	N/A		1,311	$0.3	26	153
- Other	13,408	$5.0	N/A		10,389	$3.9	7	136
Total:	65,494	$30.7			47,414	$23.5	13	104

Table notes:

[a] The data is based on the analysis of Form ADV data for the reporting period ending December 31, 2025 with filings received through May 31, 2026. The estimates include private funds advised by registered investment advisers, including funds advised by registered investment advisers which are also sub-advised by exempt reporting advisers. The estimates do not include private funds advised by exempt reporting advisers (because exempt reporting advisers are not subject to rule 205-3). Gross Asset Value (GAV) is reported on Form ADV, Part 1A, Section 7.B.(1).A of Schedule D, Question 11.

[b] This item is reported for 3(c)(1) private funds only on Form ADV, Part 1A, Section 7.B.(1).A of Schedule D, Question 15(b). We note that this question is specific to 3(c)(1) funds because contracts with 3(c)(7) funds are excepted from the prohibition in section 205. We also note that, because 3(c)(7) funds are restricted to qualified purchasers, which are scoped in the current qualified client definition, all investors in 3(c)(7) funds are assumed to be qualified clients.

[c] Minimum investment commitment required of an investor in a private fund is reported on Form ADV, section 7.B.(1)A Question 12.

[d] An approximate number of beneficial owners is reported for each private fund on Form ADV, Part 1A, Section 7.B.(1).A of Schedule D, Question 13.

[e] This category includes private funds that qualify for the exclusion from the definition of investment company under section 3(c)(1) of the Investment Company Act but do not qualify for the exclusion under section 3(c)(7), as reported on Form ADV, Part 1A, section 7.B.(1).A of Schedule D, Questions 4(1) and 4(2). We note that some private funds report qualifying for both exclusions--such funds are reported in a separate category below.

[f] This category includes private funds that qualify for both 3(c)(1) and 3(c)(7) exclusions, as reported on Form ADV, Part 1A, Section 7.B.(1).A of Schedule D, Questions 4(1) and 4(2).

[g] This category includes private funds that qualify for the exclusion from the definition of investment company under section 3(c)(7) but do not qualify for the exclusion under section 3(c)(1), as reported on Form ADV, Part 1A, Section 7.B.(1).A of Schedule D, Questions 4(1) and 4(2).

We estimate that, out of $30.7 trillion in cumulative gross assets held by 65,494 private funds, approximately 21.6 percent of funds are funds relying on the 3(c)(1) exclusion exclusively. These funds represent approximately 3.8 percent of cumulative gross assets held by private funds. In addition, approximately 9.2 percent of funds rely on both the 3(c)(1) and 3(c)(7) exclusions. These funds represent approximately 5.3 percent of cumulative gross assets held by private funds. We estimate that approximately 75 percent of 3(c)(1) funds rely on Regulation D.[239] We also estimate that approximately 21.1 percent of funds relying on the 3(c)(1) exclusion exclusively are private funds of funds, representing approximately 22.6 percent of cumulative gross assets held by section 3(c)(1) funds.

3. Performance-Based Compensation: Current Market Practices

a. Rationale and Design

When investors delegate asset management to investment advisers, their interests may not automatically align with those of the adviser. In particular, when advisers are compensated based on the level of assets under management, such a compensation structure may create incentives that may not necessarily align with the goal of maximizing investor returns. For example, advisers may have an incentive to prioritize asset gathering or an incentive to unnecessarily avoid risk if doing so maintains or increases their assets under management. Various direct and indirect (implicit) incentive mechanisms exist to address this misalignment.[240] While academic literature is mixed on which form of managerial incentives is optimal for aligning adviser and client interests,[241] managerial incentives can materially affect adviser behavior and investor outcomes and may be an important driver of performance.[242]

Among these mechanisms, performance-based compensation is one of the most direct tools for aligning adviser and client interests because it ties adviser compensation to investment outcomes. Performance-based compensation may take various forms, including fees, carried interest, or deferred compensation tied to performance.[243] Further, performance-based compensation can be structured symmetrically or asymmetrically. Symmetric performance compensation (*e.g.,* a fulcrum fee) adjusts in both directions relative to a base fee rate—it increases when performance exceeds the benchmark and decreases when the portfolio underperforms, such that the adviser shares in both outperformance and underperformance.

Asymmetric performance compensation is triggered only when a portfolio outperforms (*e.g.,* relative to a high-water mark, a hurdle rate, or a benchmark) and does not impose a corresponding reduction in compensation when the portfolio underperforms. This structure creates a payoff for the adviser similar to that of a call option, where the option is exercised only when the gain exceeds the strike price (a benchmark or a hurdle rate). Therefore, asymmetric performance compensation can incentivize excessive risk-taking on the part of an adviser—because volatility increases the likelihood of a higher performance fee—and exposes investors to increased risk of loss.[244] The academic literature is mixed, however, as to whether asymmetric performance fees lead to increased risk-taking on the part of advisers.[245]

[239] This estimate is based on responses to Questions 4 and 21 of Section 7.B.(1) in Schedule D of Form ADV. Section 3(c)(1) funds may also rely on exclusions from registration under the Securities Act other than Regulation D, such as Regulation S (with respect to non-U.S. offerings) or section 4(a)(2) of the Securities Act directly. Section 3(c)(1) of the Investment Company Act generally requires that a relying issuer ''is not making and does not presently propose to make a public offering of its securities.''

[240] Direct incentive mechanisms include managerial ownership in the fund, performance-based compensation, threat of dismissal if the portfolio performs poorly, compensation contracts between the advisers and sub-advisers, among others. For example, although investment advisers of regulated funds are limited in charging performance fees to the funds they advise, individual portfolio managers, who are employees of the adviser, are not restricted in receiving compensation linked to fund performance from the adviser. As such, a practice for asymmetric, option-like performance-based incentives for individual portfolio managers has developed to be the predominant compensation for portfolio managers in the mutual fund sector. For example, one academic study uses data for 4,597 U.S. mutual funds from 2006 and 2011 and finds that portfolio manager compensation is directly tied to fund investment performance for 79% of the funds in the sample. *See* Linlin Ma, Yuehua Tang, and Juan-Pedro Gomez, *Portfolio Manager Compensation in the U.S. Mutual Fund Industry,* 74.2 J. Fin. 587–638 (2019) (Ma, Tang, and Gomez (2019)). While this study concerns portfolio managers' compensation rather than that of registered investment advisers themselves, it highlights the role that performance-based pay has in design of compensation structures that may better align interests of advisers and their employees with those of investors. Examples of indirect incentive mechanisms include the relationship between performance and flows (inferior performance discourages capital inflow) and investor sophistication (the more sophisticated investors are, the better they can monitor and discipline adviser risk-taking behavior).

[241] For example, some studies suggest that portfolio manager ownership in the fund mitigates managers' incentives to engage in risk-taking behavior and that actively-managed mutual funds with greater managerial ownership are associated with lower levels of risk and better performance. *See, e.g.,* Ajay Khorana, Henri Servaes, Lei Wedge, *Portfolio Manager Ownership and Fund Performance: An Empirical Analysis,* 85(1) J. Fin. Econ. 179–204 (2007); Linlin Ma, and Yuehua Tang, *Portfolio Manager Ownership and Mutual Fund Risk Taking,* 65.12 Mgmt. Sci. 5518–34 (2019). Another study finds that investor sophistication and the threat of dismissal serve as substitutes for explicit performance-based incentives for portfolio managers. The same study does not find significant evidence of differences in future fund performance associated with any particular compensation arrangement, which is consistent with optimal contract equilibrium (performance-based compensation is optimal when agency conflicts are severe enough and suboptimal when agency conflicts are less severe because of the costs associated with performance-based compensation). As a result, authors do not find evidence of a relation between the type of portfolio manager compensation and subsequent fund performance. *See* Ma, Tang, and Gomez (2019). *See also supra* note 240.

[242] *See, e.g.,* Michael C. Jensen, and Kevin J. Murphy, *Performance Pay and Top-Management Incentives,* 98(2) J. Pol. Econ. 225–64 (1990); Bing Liang, *On the Performance of Hedge Funds,* 55.4 Fin. Analysts J. 72–85 (1999); Vikas Agarwal, Naveen D. Daniel, and Narayan Y Naik, *Role of Managerial Incentives and Discretion in Hedge Fund Performance,* 64.5 J. Fin. 2221–56 (2009). For a comprehensive review of studies of performance in private equity funds, *see* Na Dai, *Empirical Research on Private Equity Funds: A Review of the Past Decade and Future Research Opportunities,* 2–3 Rev. Corp. Fin., 427–50 (2022). *See also* Florian Fuchs et al., *Should Investors Care Where Private Equity Managers Went to School?,* Rev. Corp. Fin. (2022).

[243] Carried interest is a form of performance-based compensation where a portion of profits is allocated to a general partner before the remaining profits are distributed to limited partners. Deferred compensation refers to an arrangement where a portion of adviser's performance-based compensation is held back and paid at a later date, subject to certain conditions, generally tied to future performance.

[244] A key insight from an option pricing theory is that the value of a call option increases with the volatility of the underlying asset. *See* Fischer Black and Myron Scholes, *The Pricing of Options and Corporate Securities,* 81 J. Pol. Econ. 637 (1973). This is because higher volatility increases the probability that the underlying asset's value will exceed the strike price, generating a payout; while the downside for the option holder remains fixed at zero (because the option expires unexercised if the underlying asset's value remains below the strike price). Similarly, with an asymmetric performance fee, an adviser benefits from increased portfolio volatility—higher volatility increases the likelihood that the portfolio will outperform its benchmark or hurdle rate, generating a fee payout—while the corresponding downside remains fixed at zero if the increased volatility causes the portfolio to underperform (because the performance fee payout would simply equal to zero). This dynamic can incentivize an adviser to take on excessive portfolio risk at the expense of investors.

[245] For example, some theoretical and empirical studies have found that both management fees and asymmetric performance fees can create incentives to increase the risk of a portfolio. *See, e.g.,* Jennifer N. Carpenter, *Does Option Compensation Increase Managerial Risk Appetite?,* 55.5 J. Fin. 2311–31 (2000); Suleyman Basak, Anna Pavlova, and Alexander Shapiro, *Optimal Asset Allocation and*

Continued

This issue is more pronounced for strategies where returns are driven by capital appreciation, such as equity strategies, where advisers have greater control over the timing of disposition of depreciating assets. By delaying such dispositions, an adviser can avoid realizing a loss that would reduce or eliminate any current period performance compensation based on realized capital gains, while delaying any such reduction in compensation resulting from future losses, which may exacerbate excessive risk-taking. In contrast, when an adviser receives performance compensation on income, such as interest income, any asset underperformance that results in a default or delinquency on a loan would reduce interest income and, with it, the adviser's performance fees. Because such interest income cannot be timed, advisers cannot increase the likelihood of a large performance compensation payout through excessive risk-taking without also increasing the likelihood that the income stream from underlying assets would be eroded due to their increased default probabilities. Therefore, advisers with compensation tied to income may be less incentivized to take excessive risk than advisers with compensation tied to capital gains.

Advisory contracts that include a performance fee commonly feature investor protections designed to align managerial incentives with investor interests. For instance, many such arrangements stipulate that an adviser may collect performance fees only on returns above a ''high-water mark,'' which is the fund's prior peak NAV. Advisory contracts may also feature clawback provisions that make a previously paid performance fee subject to recoupment when current performance erodes past gains. In addition, performance fee arrangements may include hurdle rates, which are minimum performance thresholds that can be numeric or tied to a specific benchmark. A benchmark used to determine a performance fee can be an important factor for investor outcomes.[246]

The structure of performance compensation arrangements and associated investor protections may depend on a fund's or account's lifespan, liquidity profile, and strategy type, among other things. For example, for drawdown funds, which are funds with a finite lifespan that do not permit investor redemptions, performance compensation is charged based on realized gains because investments are held until realization. While performance compensation may be collected on a deal-by-deal basis, such contracts for drawdown funds typically include clawback provisions, such that previously distributed compensation is returned if aggregate realized performance at fund termination falls short. In contrast, performance compensation for funds that permit periodic redemptions and do not have a fixed life (evergreen funds) may be based on unrealized gains, which introduces the risk that compensation collected on mark-to-market gains may later be reversed. For these funds, a high-water mark can serve as a stronger investor protection mechanism because it prevents the payment of performance compensation on the same unrealized gains multiple times. In addition, the frequency of compensation crystallization and the length of the measurement period are important features of performance compensation arrangements for evergreen funds. The less frequently performance compensation is locked in and paid, and the longer the measurement period, the lower the risk that performance compensation is paid on gains that are subsequently reversed.

b. Structural Constraints on Performance Compensation Design

The ability of investment advisers to implement performance compensation contracts depends on whether a fund is a regulated fund or a private fund. Private funds may be organized as limited partnerships, in which the general partner typically is an affiliate of the adviser, and the investors are limited partners.[247] The terms governing performance compensation for a partnership are set out in the fund's operating agreement (as well as the adviser's advisory contract with the fund), and each investor individually agrees to the terms of the agreement upon subscription. The fund's operating agreement typically permits advisers and investors to negotiate modifications to performance compensation arrangements through side letters, which are bilateral agreements between the general partner or adviser (or both) and the investor. As such, performance compensation obligations may differ at the investor level within the same fund. Private funds employ different mechanisms to subject individual fund investors to the payment of performance compensation, in order to account for an individual investor's performance experience rather than the fund's aggregate performance. For example, funds structured as limited partnerships generally account for each partner's individual capital account on the fund's books. Performance compensation attributable to the general partner is computed for each capital account relative to each partner's contributions, distributions, and profit and loss allocations.[248]

In regulated funds, the advisory contract is between the fund as an entity and the investment adviser. Individual investors are not parties to this contract—instead, the fund's board of directors acts as the representative of shareholder interests and reviews and approves the advisory contract on their behalf annually. As such, fund investors cannot individually negotiate performance compensation terms.[249] This structural difference has implications for how performance compensation is assessed and borne by investors in regulated funds.

In particular, in regulated funds, performance compensation is assessed on the fund itself and, therefore, accrues in liabilities of the fund. Rule 2a–4 for open-end funds requires fund expenses, including any investment advisory fees, to be reflected in the NAV at which investors transact, with estimates of the accrued amounts used when the actual value is not available. Separately, FASB ASC Topic 946, *Financial Services—Investment Companies,* requires that

Risk Shifting in Money Management, 20.5 Rev. Fin. Stud. 1583–1621 (2007). Other studies find different results. For example, one study covers European mutual funds (UCITS) that charge performance fees, most of which are asymmetric, and finds that funds with performance fees generally do not take more risk overall relative to other funds but they may increase risk in the second half of the year when the sensitivity of changes in the performance fee contract payoffs to changes in risk is highest. *See* Henri Servaes and Kari Sigurdsson, *The Costs and Benefits of Performance Fees in Mutual Funds,* 50 Fin. Intermediation, 100959 (2022).

[246] *See, e.g.,* Richard Evans et al., *Peer Versus Pure Benchmarks in the Compensation of Mutual Fund Managers,* 59.7 J. Fin. & Quantitative Analysis 3101–38 (2024); Anna Pavlova and Taisiya Sikorskaya, *Benchmarking Intensity,* 36.3 Rev. Fin. Stud. 859–903 (2023); Juan Sotes-Paladino and Fernando Zapatero, *Carrot and Stick: A Role for Benchmark-Adjusted Compensation in Active Fund Management,* 52 J. Fin. Intermediation 100981 (2022).

[247] In addition to limited partnerships, private funds may be organized as limited liability companies or corporations, among other forms. Regardless of organizational form, its operating agreement will set out the terms of performance compensation, and investors agree to such terms upon subscription.

[248] Some other examples are series accounting, where each investor subscription creates a separate series of fund interests with its own cost basis and high-water mark, and equalization accounting, where incoming investors subscribe at NAV plus or minus an adjustment. Series accounting and equalization accounting are typically used for funds structured as corporations.

[249] In addition, all shares of the same class must be treated identically under section 18(i) of the Investment Company Act; therefore, performance compensation cannot vary within a share class.

performance fees be accrued based on actual performance through the accrual date, meaning that performance fees must be accrued in fund liabilities as they are incurred. This requirement applies to all regulated funds.[250] As such, investors in regulated funds that pay performance fees bear the performance fee costs through NAV reductions rather than through direct charges.[251] This has two implications.

First, in practice, performance compensation cannot be assessed or charged at the individual investor level, and mechanisms that allocate performance compensation owed by individual investors that are available to private funds cannot be implemented to account for individual investors' experiences in regulated funds. This, in turn, results in a free-rider problem among regulated fund shareholders. Because performance fees reduce a fund's NAV uniformly across all outstanding shares, regardless of the time investors subscribed to the fund, investors who subscribe at different times would not have net-of-fee returns that account for their individual investment experience, in contrast to how they would be in many private funds. In particular, investors who subscribe midway through a measurement period participate in all the gains after their subscription, but the performance fee they bear is based only on a portion of the gains rather than their full gains, which may result in a lower effective fee rate for those investors for that period compared to what is stated in the fund's advisory contract.[252] Therefore, the structural inability of registered funds to implement investor-level equalization mechanisms produces an inherent inequality among investors—investors in the same fund may bear different effective performance fees depending on the timing of their subscriptions or redemptions. This is in contrast to private funds where investors pay performance fees based on their own performance experience.

Second, because the final performance fee cannot be determined until the end of a measurement period, the amount of accrued performance fee has to be estimated each time that NAV calculation is performed. In particular, because the accrued fee estimate may be reversed if performance reverses within the period, investors who enter or exit the fund in the middle of the period may bear impacts from fees that are ultimately not paid. This effect is more pronounced for funds that are required to calculate their NAV daily. For closed-end regulated funds that allow periodic repurchases, the estimation effect is less pronounced and may not be present at all, if the NAV calculation is aligned with the frequency of repurchases.

c. Distribution Channels

Access to a fund depends on the channels through which it is distributed, and these channels differ in how readily investors can purchase interest in a particular fund. Private funds are distributed only by the fund sponsor or a placement agent, and investors are generally admitted to the fund by subscribing directly, rather than purchasing the fund through an intermediary.

On the other hand, regulated funds can sometimes be purchased directly through the fund's principal underwriter or transfer agent, or through an investment adviser or broker-dealer, which can vary in cost and accessibility. For example, accounts receiving recommendations or advice, whether through a broker-dealer or through a registered investment adviser, are typically charged higher costs and in general require higher account minimums, compared to self-directed brokerage accounts.

We understand that unlisted regulated closed-end funds that make periodic or discretionary repurchase offers are generally not available for self-directed purchase through a brokerage platform.[253] Accordingly, in practice, these funds can be purchased primarily by subscribing directly with the fund's transfer agent or through a financial professional (either a broker-dealer or investment adviser). This limitation could be due to operational constraints of self-directed brokerage platforms. For example, if a fund restricts investors to a particular set (*e.g.,* to qualified clients or accredited investors), we understand that self-directed brokerage platforms are generally not equipped with automated systems that would perform and track the required investor eligibility checks—which is in contrast to a financial professional at a broker-dealer or an investment adviser. As another example, a self-directed brokerage platform may be built on a system that assumes daily redeemability, and funds that do not issue redeemable shares (*e.g.,* interval funds or tender-offer funds) generally cannot be transacted through the ordinary self-directed order flow.[254]

These operational constraints may compound for retirement plans, specifically defined contribution plans, because recordkeeping systems are built on daily participant-level valuation and daily processing of contributions, loans, and distributions (which are applied proportionally to portfolio holdings). Closed-end funds are accordingly rare on defined contribution plan menus as standalone options for investors. While a plan may obtain exposure to a target-date or balanced fund that holds closed-end funds in its portfolio, investor access to regulated funds that do not issue redeemable shares may currently be hindered by operational constraints of fund intermediaries.

[250] *See* FASB ASC Topic 946–20–25–10.

[251] We note that, because performance compensation in regulated funds is allocated to fund investors through NAV reductions, certain forms of performance-based compensation, such as carried interest, are not practicable in the regulated fund context. This is because carried interest is a preferential profit allocation that is attainable in funds structured as partnerships. For regulated funds, which generally are structured as corporations or trusts, profits and distributions flow through share ownership and, therefore cannot differ within the same share class. Therefore, when discussing regulated funds, we assume that performance-based compensation is structured as a performance fee.

[252] For example, consider a fund with a 20% performance fee relative to the fund's high-water mark, crystallized annually. Assume that the fund's high-water mark is $100 at the beginning of the year. Investor A subscribes at the start of the year at a NAV of $100. At mid-year, the fund's investments have appreciated by $10, and a $2 performance fee is accrued, resulting in a NAV increase of $10 − $2 = $8 and a NAV of $108. Investor B subscribes at this price. By year-end, the fund's investments appreciate by another $10, and an additional $2 of performance fees accrues. At this point, the fee is crystallized, and the NAV is $116. Because the performance fee is based on appreciation at the fund level, Investors A and B experience different effective performance fees. In particular, Investor A bears $4 in performance fees on $20 = $120 − $100 of her gains or exactly the stated 20% performance fee. Investor B, however, bears $2 on $12 = $120 − $108 of her gains, resulting in an effective performance fee of just 16.7%. This difference arises because the high-water mark is set at the fund level ($100) rather than at Investor B's entry price ($108), meaning Investor B does not bear a $2 fee on the $10 gain already included in the NAV at her subscription, yet still benefits from this gain. In effect, Investor A's early capital generated returns that Investor B captured at a discount.

[253] *See e.g.,* Morningstar Manager Research, Jason Kephart, Jack Shannon and Brian Moriarty, *The State of Semiliquid Funds 2025* (June 24, 2025; revised July 1, 2025), *available at https://www.morningstar.com/content/cs-assets/v3/assets/blt9415ea4cc4157833/bltcf5a9d2acb058df7/68652d27e8e8e649c55d114e/The_State_of_Semiliquid_Funds_2025_(revised_July_1_4 p.m.).pdf.*

[254] For example, open-end fund orders are processed through Fund/SERV operated by National Securities Clearing Corporation whose automated model depends on the daily redeemability. Orders for funds whose shares are not redeemable, therefore, need to be processed through a separate infrastructure such as Alternative Investment Product service offered by DTCC or through a manual subscription process.

d. Market Practices and Investor Access to Alternative Strategies

(1) Private Funds

Currently, performance-fee arrangements are most closely associated with private funds, which employ various strategies such as private equity, private credit, and hedge fund strategies. Advisers to private funds may charge performance fees based on capital gains or other measures, such as income and dividends, to participate in the profits generated by their investment activities. Although various academic studies suggest that private funds may offer superior risk-adjusted returns to investors,[255] these funds vary in their accessibility to investors.

3(c)(7) private funds are restricted to qualified purchasers only and predominantly serve institutional investors (the Advisers Act prohibition on performance fees based on capital gains does not apply to 3(c)(7) funds and the proposed amendments would not affect advisory contracts with such funds). 3(c)(1) private funds are open to individual investors but are generally restricted to accredited investors (if the fund relies on Regulation D) or accredited investors that are also qualified clients (if the fund's adviser relies on both Regulation D and the exemption for qualified clients in rule 205–3 in order to charge performance fees on capital gains). Because the qualified client definition generally has more stringent thresholds than the accredited investor standard, in practice most 3(c)(1) funds are available to accredited investors that are also qualified clients. We estimate that approximately 72.9 percent of 3(c)(1) funds require their investors to be qualified clients.[256] As a result, less affluent accredited investors have limited access to these investment opportunities.

Private funds may also restrict their investor set by imposing an investment minimum. We estimate that approximately 75.7 percent of private funds relying exclusively on the section 3(c)(1) exclusion require minimum investments to participate in the fund.[257] Table 4 reports information on these minimum investments as reported on Form ADV.

Table 4. Minimum Investment Requirements of 3(c)(1) Funds, as of December 31, 2025[a]

Investment Minimum Range	Fund Count	Gross Assets, $ Billion	Investment Minimum[b]	
			Median, $	Mean, $
No minimum	3,431	$325.2	$0	$0
< $10,000	592	$54.1	$2,619	$2,982
$10,000 to $100,000	4,806	$176.2	$50,000	$61,815
$100,000 to $300,000	1,770	$102.2	$250,000	$235,514
$300,000 to $500,000	911	$62.1	$500,000	$495,418
$500,000 to $1 million	1,688	$235.1	$1,000,000	$993,550
$1 million to $5 million	612	$126.6	$5,000,000	$4,064,408
$5 million to $10 million	207	$62.6	$10,000,000	$9,686,053
> $10 million	121	$24.7	$29,155,000	$65,001,291
Total	14,138	$1,168.7	$100,000	$1,075,239

Table notes:

[a] The data is based on the analysis of Form ADV data for the reporting period ending December 31, 2025 with filings received through May 31, 2026. *See* note [a] to Table 3. The table includes private funds that qualify for the exclusion from the definition of investment company under section 3(c)(1) of the Investment Company Act but do not qualify for the exclusion under section 3(c)(7), as reported on Form ADV, Part 1A, Section 7.B.(1).A of Schedule D, Questions 4(1) and 4(2). *See* note [e] to Table 3.

[b] Based on data reported on Form ADV, Part 1A, Schedule D, Section 7.B.(1).A, Question 12.

We estimate that out of 14,138 private funds relying on the 3(c)(1) exclusion exclusively, approximately 28.5 percent either do not require an investment minimum or require a minimum less than $10,000. These funds represent approximately 32.4 percent of cumulative gross assets reported by private funds relying on the 3(c)(1) exclusion exclusively. Less affluent accredited investors may be unable to meet higher investment minimums,

[255] *See, e.g.,* David T. Robinson and Berk A. Sensoy, *Do Private Equity Fund Managers Earn Their Fees? Compensation, Ownership, and Cash Flow Performance,* 26 Rev. Fin. Stud. 2760 (2013). *See also* Harris et al., *Private Equity Performance: What Do We Know?* J. of Fin. (2014), finding performance in a sample of 1,400 buyout funds, in which advisers participate ''carry'' in the upside of profitable deals, consistently outperformed the S&P 500 net of fees by more than 3% annually. Results for venture capital funds are mixed, with these funds outperforming public equities in the 1990s but underperforming them in the early 2000s. *See also* Kosowski et al., Do *Hedge Funds Deliver Alpha? A Bayesian and Bootstrap Analysis,* J. of Fin. Econ. (2007), finding that top hedge fund performance cannot be explained by luck and that hedge fund performance persists at annual horizons. Other studies suggest that this outperformance of private funds only compensates investors for illiquidity or other risks they bear in their investment. *See e.g.,* Franzoni et al., *Private Equity Performance and Liquidity Risk,* J. of Fin. (2012). *See also* Sorensen et al., *Valuing Private Equity,* Rev. of Fin. Stud. (2014).

[256] *See* Table 3. We note that this estimate is for all 3(c)(1) funds, regardless of whether they pay performance fees on capital gains or not.

[257] *Id.*

regardless of whether those funds restrict their client base to qualified clients or not.

(2) Separately Managed Accounts

In contrast to regulated and private funds that are managed on behalf of a group of investors, separately managed accounts are managed directly for individual clients.[258] Each separately managed account owner directly owns underlying portfolio investments and has transparency into those investments and portfolio transactions. Similarly to mutual funds and ETFs, separately managed accounts offer various investment strategies; however, direct asset ownership allows for portfolio customization, such as an investor's ability to impose a unique set of guidelines for investment allocation or the investor's ability to use customized tax treatment to avoid the forced realization of capital gains or losses that can occur with mutual fund share ownership, such as in-kind account funding (*e.g.,* transfer of a security from another account into a separately managed account without selling it). Direct ownership of portfolio assets also provides investors with full transparency of portfolio holdings and account transactions.

Together, transparency and customization benefits for investors may translate into operational challenges for investment advisers: the more customized accounts an adviser manages, the more operationally burdensome it can become to employ strategies, track compliance, and provide detailed reports on holdings, performance, and transaction activity to each account holder.[259] Because of this potential limitation on economies of scale, for the same level of aggregate client assets managed by an adviser, it may be less operationally complex to manage a small number of large separately managed accounts than many smaller separately managed accounts. Generally, smaller accounts allow limited customization and may focus on public market strategies that replicate mutual fund portfolios managed by the same adviser or portfolios tracking an index (''direct indexing'').[260]

Retail-oriented separately managed accounts typically carry higher expenses and may therefore underperform their institutional counterparts on a net return basis, according to a recent study.[261] In addition, separately managed accounts often require substantial investment minimums, with thresholds for institutional accounts starting at $100,000 and thresholds for retail accounts ranging between $50,000 and $100,000, according to a recent academic study.[262]

Advisers to retail-oriented separately managed accounts typically charge fees based on a stated percentage of assets under management, rather than a performance fee.[263] For example, a subset of separately managed accounts is offered through wrap fee programs,[264] where investors are charged a single, bundled ''wrap'' or ''model'' fee for investment advice, brokerage services, administrative expenses, and other fees and expenses.[265]

(3) Regulated Funds

Regulated funds offer a variety of strategies to investors, historically focusing on public markets, and vary in their adoption of performance fees. Although advisers to regulated funds have been permitted to charge symmetric performance fees (fulcrum fees), the use of fulcrum fees remains limited in recent years. We estimate that at least 85 active mutual funds pay fulcrum fees.[266] Of these funds, 72 are reported as equity funds, 9 as fixed income funds, 3 as allocation funds, and 1 as a hybrid fund.[267]

In recent years, regulated funds began offering more complex alternative strategies to investors and entering into advisory contracts with asymmetric performance fees on both income gains and capital gains. Regulated closed-end

[258] As used in this Economic Analysis, the term ''separately managed accounts'' refers to managed investment advisory accounts, consistent with the use of the term in Part 1A, Item 5.K.(1) of Form ADV. *See* note [e] to Table 1 above.

[259] In addition, different separately managed accounts may have different service providers, such as administrators and custodians, which thwarts centralized workflow for investment advisers. *See* Richard B. Evans et al., *Diseconomies of Scale in Quantitative and Fundamental Investment Styles,* J. of Fin. & Quantitative Analysis, 58(6), 2417–2445 (2023). Authors use data on separately managed accounts to compare economies of scale between accounts implementing fundamental (more complex and customized process) and quantitative (more algorithmic) investment approaches and find that separately managed accounts with fundamental strategies exhibit greater diseconomies of scale than those with quantitative strategies.

[260] For example, an industry report by Cerulli Associates estimates that, as of year-end 2024, direct indexing strategies account for 37.6% of manager-traded assets reported by SMA asset managers. *See* Cerulli Associates, *Direct Indexing Assets Close Year-End 2024 at $864.3 Billion* (Apr. 10, 2025), *https://www.cerulli.com/press-releases/direct-indexing-assets-close-year-end-2024-at-864.3-billion* (last accessed Aug.14, 2026).

[261] *See* Martin Rohleder et al., *Do Investor Types Matter? A Comparative Analysis of Separate Account Characteristics and Performance,* 43(1) Rev. of Fin. Econ., 95–110 (2025). Authors analyze a sample of 4720 actively-managed U.S. domestic equity separately managed accounts for the period July 1998 to June 2022 and find that, with an equal-weighted annualized alpha of 1.76%, institutional accounts exhibit a significantly higher performance than their mixed (1.39%) or pure retail (1.30%) counterparts. *See also* Howard Jones, Jose Vicente Martinez, and Alexander Montag, *What Twins Tell us about the Performance of Separate Accounts, Mutual Funds, and Their Investors* (May 28, 2025), *available at http://dx.doi.org/10.2139/ssrn.3883499* (retrieved from SSRN Elsevier database).

[262] *See* Martin Rohleder, et al., *Do Investor Types Matter? A Comparative Analysis of Separate Account Characteristics and Performance,* 43 Rev. Fin. Econ. 95 (2025). Authors find that a median investment minimum for retail account is $100,000 and the median investment minimum for institutional account is $3 million. Authors use Morningstar's definition of a retail investor. As an example, Fidelity's minimums for separately managed accounts range between $100,000 and $350,000, depending on the strategy. *See* Fidelity, *What Is a Separately Managed Account and How Does It Work? https://www.fidelity.com/learning-center/trading-investing/separately-managed-accounts* (last accessed Aug. 16, 2026). As another example, Nuveen's minimums for separately managed accounts range between $100,000 and $250,000 for fixed income strategies. *See,* Nuveen, *Investing in Separately Managed Accounts, https://documents.nuveen.com/Documents/Nuveen/Default.aspx?uniqueid=7bef76e2-7f63-4148-a371-d7551bdf2c31* (last accessed Aug. 16, 2026). *See also e.g.,* Hartford Funds, *Model-Delivery SMAs, https://www.hartfordfunds.com/products/core-equity-SMA-strategy.html* (last accessed Aug. 14, 2026).

[266] This estimate is based on data reported in Morningstar Direct as of June 10, 2026. Fulcrum fees are reported among other performance fees without a separate designation; however, based on a review of selected filings, fulcrum fees are typically reported as performance adjustments to the ''basic'' management fee, expressed as a percent of a fund's net assets (*e.g.,* ±0.20% of average net assets over the performance period). For the purpose of this estimate, we assume that any performance fee paid by an open-end fund is a fulcrum fee.

[267] Based on Morningstar's broad categories.

funds such as interval funds, tender-offer funds, and BDCs are primarily associated with such performance fees in the regulated fund space. We estimate that out of 706 closed-end funds, at least 95 funds report paying performance fees on either income gains, capital gains, or based on another measure.[268] The range of strategies available through these vehicles may be limited by advisers' compensation preferences, as current market practices favor fee structures that are more compatible with certain investment approaches than others.[269]

BDCs. BDCs are permitted higher leverage than closed-end funds and are permitted to pay performance fees on capital gains under certain conditions without restricting their investor base.[270] As such, BDCs adopt performance fees at a higher rate compared to other regulated funds. We estimate that 152 out of 176 BDCs (representing nearly 100 percent of cumulative BDC net assets) pay performance fees (on either income gains or capital gains) to their advisers.[271] In addition, we estimate that, among unlisted BDCs, there are 102 private BDCs (representing approximately 42.9 percent of cumulative BDC net assets) that voluntarily restrict their investor base to accredited investors.[272]

While BDCs can generally invest in both the equity and debt of small and mid-sized U.S. companies, one study finds that publicly traded BDCs currently specialize primarily in private credit.[273] The same study finds that nearly all BDCs specializing in private credit charge a 20 percent performance fee on cumulative net investment income above a defined hurdle rate and that the compensation structure of BDCs resembles that of a traditional private equity fund,[274] with one notable difference: management fees are typically charged on gross AUM (which includes leverage) rather than on net assets.[275] This results in BDCs having lower net-of-fees risk-adjusted returns compared to private equity funds with the same before-fee performance and level of borrowings. According to the study, retail investors generally sort into BDCs that engage in more hybrid financing and charge higher fees, and institutional investors sort into private equity-affiliated BDCs. A separate report finds that most BDCs have performance fees based on both net investment income and capital gains.[276]

Interval Funds. Interval funds conduct repurchases at scheduled intervals and are subject to a debt-to-asset ratio limit of 1/3, which is a more restrictive leverage limit than that for BDCs.[277] A recent academic study finds that interval funds invest in a broader range of asset classes than BDCs.[278] According to the study, almost 60 percent of interval fund investors are retail investors, and the median minimum investment requirement is $2,500. Another report finds that funds representing approximately 20 percent of interval fund assets require investment minimums less than $100,000, while the rest require investment minimums above $100,000, with 47 percent of interval fund assets in funds requiring a minimum investment over $1 million.[279] Similar to the strategies of BDCs, private credit and real estate are the most prominent strategies among interval funds. The authors find that retail investors in interval funds realize superior returns relative to exchange-traded benchmarks only when they co-invest alongside large and more sophisticated investors. The study estimates that 17.5 percent of interval funds pay performance fees on interest and dividend income.[280] We estimate that at least 29.5 percent (41 out of 139) of interval funds pay performance fees on either capital gains or income.[281]

Tender-Offer Funds. In contrast to BDCs and registered interval funds, registered tender-offer funds are primarily offered to accredited investors and qualified clients. Like interval funds, tender-offer funds are subject to a debt-to-assets ratio limit of 1/3; like most BDCs, they conduct repurchases on a discretionary basis. The same study finds that around 70 percent of tender-offer funds are offered to high net worth individuals, while around 22 percent are offered to retail investors.[282] The study estimates that 44 percent of tender-offer funds pay performance fees on interest and dividend income.[283] We estimate that 33 out of 174 of tender-offer funds pay performance fees on either capital gains or income.[284]

Because tender-offer funds are not required to have a fixed repurchase schedule like interval funds, this type of regulated fund may offer a better match between the limited fund liquidity offered to investors and the illiquidity of investments in private companies. For example, a recent study indicates that 57 percent of tender-offer fund assets are in public and private equity, while only 16 percent of interval fund assets are in public and private equity.[285]

Open-End Funds. Certain regulated open-end funds, including mutual funds

[268] This estimate is based on the data reported in Morningstar Direct as of June 10, 2026 and performance fee data reported on Form N–2, as of Aug. 25, 2026. For Form N–2 data, we use the number of regulated funds that used the ''IncentiveFeesPercent'' Inline XBRL tag to identify a performance fee disclosed on Form N–2, Item 3 (Fee Table and Synopsis) in one or more filings beginning January 1, 2025. *See* Closed-End Fund (CEF) 2026 Taxonomy Guide, available at *https://xbrl.sec.gov/cef/2026/cef-taxonomy-guide-2026-03-16.pdf.*

[269] *See* sections I.B and III.B.3 for a discussion of these limitations.

[270] *See* section III.B.1.a. BDCs are permitted a debt-to-assets ratio of up to 2/3. BDCs also can operate under rule 23c–3 as interval funds. In practice, however, most use the Exchange Act rule 13e–4 framework for discretionary tender offers.

[271] The estimate is based on quarterly BDC filings data from Refinitiv BDC Collateral, as of December 31, 2025, and staff review of selected filings.

[272] *Id.* Private BDCs are a subset of unlisted BDCs. Private BDCs do not file Form N–2. The ''private'' BDC designation is based on cross checking registration filings and designation of ''BDC Type'' in the Refinitiv BDC Collateral dataset.

[273] Most BDCs make income-generating loans to middle-market firms (domestic operating companies with unlisted shares). *See, e.g.,* David T. Robinson and Melanie Wallskog, *The Growth of Private Lending and Retail Access to Alternative Investments,* Nat'l Bureau of Econ. Rsch. Working Paper No. 34617 (2026).

[274] *Id.* The study finds that performance compensation for BDCs closely resembles the carried interest commonly charged by general partners in private equity, both in magnitude and structure, with hurdle rates and catch-up provisions similar to what is observed in traditional private equity funds.

[275] *Id.* Authors use an unbalanced panel of 53 publicly traded BDCs spanning 2001 to 2023 (667 year-fund observations) and find that the mean and median incentive fees were 19.33% and 20%, respectively.

[276] *See* Mayer Brown, *BDC Facts and Stats: (2025), https://www.mayerbrown.com/-/media/files/perspectives-events/publications/2025/06/bdc---factsstats-(2025).pdf%3Frev=644a03d6db80415e9da067a9aba85de6* (last accessed Aug. 12, 2026).

[277] *See* section III.B.1. Closed-end funds are subject to a debt-to-assets ratio limit of 1/3.

[278] *See* Stefano Pegoraro, Sophie Shive, and Rafael Zambrana, *Democratizing Illiquid Assets: Liquidity Transformation and Performance in Interval Funds* (June 12, 2025), *available at http://dx.doi.org/10.2139/ssrn.5365061* (retrieved from SSRN Elsevier database) (Pegoraro et. al (2025)). The study identifies interval fund share classes as ''retail'' or ''high net worth'' based on descriptions in the funds' prospectuses and amendments.

[279] *See* Figure S6, Investment Company Institute, *The Closed-End Fund Market, 2025,* ICI Rsch. Perspective (Apr. 2026), *https://www.ici.org/system/files/2026-04/per-32-03.pdf* (last accessed Aug. 14, 2026).

[280] *See* Pegoraro et. al (2025).

[281] *See supra* note 268. *See also* Table 2.

[282] *See* Pegoraro et. al (2025).

[283] *Id.*

[284] The number of tender-offer funds paying performance fees may be underestimated, as it includes only the funds who voluntarily report performance fees on a separate line of the fee table using the ''IncentiveFeesPercent'' Inline XBRL tag. *See supra* note 268. *See also* Table 2.

[285] *See* Figure 11, Investment Company Institute, *The Closed-End Fund Market, 2025,* ICI Rsch. Perspective (Apr. 2026), *https://www.ici.org/system/files/2026-04/per-32-03.pdf* (last accessed Aug. 14, 2026). Public/private equity includes hedge fund equity and venture capital strategies. For interval funds, this category also includes a small number of funds of hedge funds.

and ETFs, currently offer alternative strategies. These funds primarily offer exposure to established private firms and are more restricted than BDCs and closed-end funds in their ability to utilize leverage. However, liquidity and daily valuation and redeemability requirements for registered open-end funds restrict their ability to allocate a significant portion of their portfolio to less-liquid private market assets.

Certain investment strategies may also be available to investors in regulated funds via regulated funds of private funds. However, such structures may be more expensive for investors, compared to funds directly investing in alternative strategies,[286] to the extent that the advisory fees, including performance fees, that acquired funds pay to their advisers are significant. Regulated funds are required to disclose as a separate line item any acquired fund fees incurred indirectly by the fund as a result of its investment in certain other funds.[287]

e. Market Practices for Performance Compensation Disclosure

While advisers to private funds are not required to make standardized public disclosures regarding the offering terms for private funds, they must comply with certain SEC requirements (if applicable), such as filing Form D for offerings relying on Regulation D, and they are subject to the antifraud provisions of the federal securities laws.[288] While private placement offering memoranda typically include detailed information concerning fund strategy, terms, fees, liquidity provisions, potential conflicts, and risk factors, unlike the disclosures required of registered investment companies, private fund disclosures are neither standardized nor generally as comprehensive, making cross-offering comparison more difficult for investors. For instance, while there are reporting templates for fees, expenses, and carried interest in the private equity industry,[289] adoption of these templates is not a regulatory requirement and may depend in part on the bargaining power of fund investors. Because such disclosures are generally provided only to current and certain prospective fund investors, comparing expenses and potential risks across private funds may involve more significant search costs for investors.

Regulated funds that have performance fees (either on capital gains or income) may present these fees inconsistently in their disclosures on Forms N–1A and N–2, because these forms do not require funds to list performance fees separately in the fee table; instead, performance fees are reported in an aggregate line item together with other investment advisory fees. As a result, some regulated funds that pay performance fees have developed the practice of including separate disclosure of those fees in their fee tables.[290] For example, a regulated fund may include a footnote in its fee table indicating that the reported management fee includes a performance adjustment and disclosing the base fee level absent that adjustment.

C. Benefits and Costs

1. Changes to the Qualified Client Definition

Rule 205–3 permits investment advisers to charge performance fees on capital gains to clients that are qualified clients.[291] The current definition of a qualified client includes natural persons and companies with at least $2.7 million in net worth (excluding primary residence) or at least $1.4 million in assets managed by the adviser; certain officers and employees of the adviser; and qualified purchasers. Additionally, a regulated or private fund can meet the qualified client definition only if each equity owner (except for private fund owners not charged a performance fee) also does so, a requirement known as the ''look-through'' provision.

The proposed changes to rule 205–3 would expand the qualified client definition. Specifically, the changes would: (i) replace the net worth and assets-under-management tests with the ''accredited investor'' test for natural persons and companies; [292] (ii) include regulated funds that meet certain conditions; [293] and (iii) remove the existing look-through provision and embed a similar provision directly into the definition.[294] As a result, the expanded definition of a qualified client would newly include:

(1) Natural persons or companies that are accredited investors;

(2) Regulated funds each of whose equity owners is an accredited investor; [295]

(3) Regulated funds that satisfy the following conditions:

- The compensation does not exceed 20 percent of net capital gains;
- The fund complies with the fund governance standards; and
- The fund's board determines that the performance-based compensation arrangement is in the best interest of the regulated fund and its shareholders and makes specific findings regarding the arrangement's appropriateness, structure, and investor protection features;

(4) 3(c)(1) funds provided that each equity owner that is charged performance compensation based on capital gains is an accredited investor.

The proposed changes to the qualified client definition would expand investor access to investment strategies with performance fees on capital gains through two channels. The first channel (''accredited investor channel'') would

[286] This approach layers on fund-of-fund management fees or performance fees, which can erode overall performance. *See e.g.,* Stephen J. Brown, William N. Goetzmann and Bing Liang, *Fees on Fees in Funds of Funds,* 2 J. Inv. Mgmt. 39–56 (2004). *Also see* Andrew Ang, Matthew Rhodes-Kropf, and Rui Zhao, *Do Funds-of-Funds Deserve Their Extra Fees?* 4 J. Inv. Mgmt. 6 (2008), arguing that funds-of-funds add value given the limited set of direct hedge fund investments an investor with limited capital could make absent the fund-of-funds vehicle.

[287] *See* Form N–1A Item 3 Instruction 3.(f); Form N–2 Item 3 Instruction 10. These Items define an acquired fund as any company in which the regulated fund invests has invested (or for purposes of Form N–2, ''intends to invest'') that is either an investment company or that would be an investment company under section 3(a) of the Investment Company Act but for the exceptions to that definition provided for in sections 3(c)(1) and 3(c)(7) of the Investment Company Act.

[288] *See* rule 503 of Regulation D; 15 U.S.C. 78j(b); 17 CFR. 240.10b-5.

[289] For instance, the Institutional Limited Partners Association maintains/publishes a reporting template for private equity funds to provide quarterly reports on fees and fund performance. *See* ILPA, *ILPA Reporting Template, https://ilpa.org/industry-guidance/templates-standards-model-documents/ilpa-templates-hub/ilpa-reporting-template/* (last accessed Aug. 14, 2026).

[290] *See supra* section II.A.3.

[291] We note that advisers may charge performance fees on capital gains based on the statutory exceptions for BDCs and for fulcrum fees. *See* section III.B.1.a for description of these exceptions. This rulemaking does not address these exceptions.

[292] The definition of accredited investor includes, among other qualifying criteria, individuals with net worth above $1,000,000 (excluding primary residence) or incomes of over $200,000 (individually) or $300,000 (with a spouse or partner) in each of the two most recent years. *See* sections II.B and III.B.1.a and *supra* notes 72 and 220 discussing the qualifying criteria for accredited investor status.

[293] *See supra* section II.A.2.

[294] *See supra* section II.C. The proposed changes to reformulate the look-through provision would not alter its ultimate function and, as such, would not impose new requirements on funds, as regulated and private funds would continue to meet the qualified client definition for purposes of the performance fee prohibition if each equity owner (except for owners not charged a performance fee) satisfies the requirements of the qualified client definition.

[295] We note that, in contrast to private funds, regulated funds are not permitted to vary advisory fees, including performance fees, among their shareholders. Therefore, if a regulated fund implements an advisory contract with a performance fee in reliance on the look-through provision of the rule 205–3, in practice, the advisory fee would be reflected in the fund's NAV and would pass through to all fund shareholders via NAV reductions. *See supra* section III.B.3.b.

allow advisers to charge accredited investors a performance fee on capital gains directly through advisory contracts or indirectly through regulated or private funds in which each of the underlying equity owners is an accredited investor. As a result, investors that meet the definition of an accredited investor but do not meet the current qualified client definition (''less affluent accredited investors'') would be newly included within the proposed qualified client definition.

The second channel (''fund board channel'') would permit advisers to charge a regulated fund a performance fee on capital gains if the fund meets specified investor-protection conditions, regardless of whether fund investors meet the accredited investor definition. As a result, any investor would qualify to access regulated funds that pay a performance fee on capital gains. This could increase access to such strategies for investors who do not meet either the current qualified client definition or the accredited investor definition (''non-accredited investors''), and who are generally excluded from registered fund strategies that carry a performance fee on capital gains.

While we anticipate that the adoption of strategies with performance fees on capital gains would vary by client type and investor base, certain overarching economic considerations apply more generally. We discuss these considerations first, followed by effects particular to each client type.

a. General Considerations

The number of investors that would be able to invest in products with performance fees on capital gains would increase as a result of the proposed amendments. This is because the monetary thresholds for investors to qualify as qualified clients under current rule 205–3 are generally more stringent than those for accredited investor status.[296] In particular, individual investors with at least $1 million in net worth qualify as accredited investors, while individuals and companies with at least $2.7 million in net worth meet the current qualified client definition.[297] Accredited investor status can also be met through income thresholds, regardless of net worth level, in contrast to the current qualified client definition, which does not incorporate income thresholds. In addition, certain individuals qualify as accredited investors by virtue of holding designated professional certifications that can serve as proxies for financial sophistication (*i.e.,* the General Securities Representative (Series 7), Private Securities Offerings Representative (Series 82), or Investment Adviser Representative (Series 65) licenses), rather than by satisfying a wealth- or income-based threshold.[298] These investors do not currently meet the qualified client definition, to the extent that they do not otherwise meet the net worth or assets under management thresholds of the qualified client definition and they are not certain officers or employees of the adviser.[299]

The proposal to include accredited investors in the qualified client definition would bring less affluent accredited investors within the pool of clients eligible to be charged a performance fee on capital gains. A recent report analyzes the data reported in the 2022 Survey of Consumer Finances (SCF) [300] and estimates that approximately 24.3 million (18.5 percent) of U.S. households qualify for accredited investor status and that approximately 16.4 million (12.5 percent) of U.S. households meet the $1 million net worth threshold of the accredited investor definition.[301] Using the same data, we estimate that approximately 29.6 percent of all accredited investors—approximately 7.2 million U.S. households—have a net worth of at least $2.7 million and would meet the current qualified client definition.[302] Accordingly, we estimate that approximately 17.1 million U.S. households qualifying as accredited investors do not currently meet the net worth test of the qualified client definition and would meet the definition of qualified client under the proposal.

The proposed fund board channel could also bring non-accredited investors within the pool of investors eligible to access investment products associated with performance fees on capital gains. The potential number of investors reached through this channel is considerably broader: in principle, the fund board channel could extend to all U.S. households, to the extent that regulated funds relying on this channel

[296] The accredited investor status can be met by satisfying one of several criteria, including both monetary and non-monetary criteria, similarly to how the current qualified client definition can be satisfied through different criteria. *See supra* note 220 and accompanying text.

[297] We note that the accredited investor definition has a $5 million in investments threshold for non-financial companies. In principle, non-financial companies that rely on the $2.7 million net worth test to meet the current qualified client definition may be bound by the higher $5 million in investments threshold to qualify as an accredited investor. However, we do not expect this case to be frequent in practice, as companies that are not accredited investors generally would not be permitted to invest in private funds unless they are among a small number of non-accredited investors that rule 506(b) of Regulation D permits to admit. *See supra* notes 222, 224, and 225 and accompanying text.

[298] *See also supra* note 220 discussing notices to designate individuals holding certain professional licenses or certifications.

[299] A recent study estimates that out of 1.7% of U.S. individuals who qualify as accredited investors based on specialized expertise, 61% do not qualify under other criteria for accredited investor status. *See* Katherine Carman and Alycia Chin, *Accredited Investors in the US Population,* 9(1) Fin. Planning Rev., e70023 (Feb. 13, 2026) (''Carman and Chin (2026)''). As such, to the extent that these professional certification holders do not already meet one or more of the criteria of the current qualified client definition, these investors would be newly scoped in as qualified clients.

[300] The Survey of Consumer Finances (SCF) is a triennial cross-sectional survey of U.S. families published by the Board of Governors of the Federal Reserve System. The survey collects information on families' balance sheets, income, net worth, credit use, and other financial outcomes. The data is available at Board of Governors of the Federal Reserve system, *Survey of Consumer Finances (SCF),* (last updated Apr. 5, 2024), *https://www.federalreserve.gov/econres/scfindex.htm.*

[301] *See* Securities and Exchange Commission, *SEC Statistics & Data Visualizations: Qualifying Households under Accredited Investor Financial Criteria* (Aug. 12, 2025), *https://www.sec.gov/data-research/statistics-data-visualizations/qualifying-households-under-accredited-investor-financial-criteria.* We estimate the number of U.S. households that satisfy the financial qualifications as a proxy for the number of natural persons who would qualify financially as accredited investors. We note that another study with individual as unit of analysis uses the data from the January 2024 wave of THRIVE panel, a nationally representative, longitudinal survey panel maintained by the Office of Investor Research at the US Securities and Exchange Commission, and finds a different estimate of 9.7% for the number of accredited investors that meet the $1 million net worth threshold of the accredited investor definition. *See* Carman and Chin (2026).

[302] The number of qualified clients based on the net worth threshold ($2.7 million) was estimated by aggregating the sample weights of the U.S. households that reported net worth excluding home equity, greater than $2.7 million, assuming there is, at least, one individual from the household that meets the threshold. Total number of U.S. households was estimated by aggregating the sample weights of all the U.S. households that participated in the survey. The fraction of the U.S. households that meet the qualified client definition based on the $2.7 million net worth threshold is estimated by dividing the number of the U.S. households that meet the qualified client net worth threshold by the estimated total number of U.S. households. Net worth is defined as the difference between household assets and household debt. Based on the SCF's definitions, assets include all financial assets (stocks, bonds, mutual funds, cash and cash management accounts, retirement assets, life insurance, managed assets like trusts and annuities, and other financial assets like deferred compensation, royalties, futures, etc.) and non-financial assets; debt includes mortgage and home equity loans, lines of credit, credit card debt, installment loans including vehicle loans, margin loans, pension loans, and other debt (*e.g.,* loans against insurance). The estimate excludes the value of the household's principal residence and any outstanding mortgages associated with the principal residence.

would be made available to non-accredited investors.

The proposed amendments would also remove the $1.4 million in assets under management test from the qualified client definition. Because accredited investor criteria are not tied to a specific level of assets managed by a particular investment adviser, investors who are not accredited investors but currently meet the qualified client definition by virtue of the $1.4 million managed assets test would be excluded from the proposed qualified client definition.[303] This may occur for non-accredited investors with substantial liabilities that reduce their net worth below the $1 million threshold in the accredited investor definition. However, we do not expect this group of investors to be large because non-accredited investors generally may not participate in exempt offerings, including those made by private funds.

A more diverse pool of investment options may become available to more investors as a result of the proposed changes to the qualified client definition. For example, the proposed amendments could lead to the creation of new regulated funds offering broader exposure to various markets and strategies to less affluent accredited investors and non-accredited investors,[304] as well as new 3(c)(1) private funds to the extent that sponsors find it profitable to operate such funds at the scale attainable by an investor base that includes less affluent accredited investors. This could allow investors to more efficiently select investments that meet their goals.[305] To the extent that newly available strategies would enhance portfolio returns, investors could benefit from adding them to their portfolios. For example, to the extent that the current prohibition on performance fees on capital gains places constraints on advisers to regulated funds in offering private equity strategies and limits the investment options to primarily income-based private market strategies,[306] the proposal may promote the creation of regulated funds that offer exposure to private equity strategies with performance fees on capital gains, which could increase investors' risk-adjusted returns.[307]

While performance fees on capital gains are most commonly associated with private market strategies, the proposed amendments to rule 205–3 would permit any regulated fund adhering to the proposed conditions to charge such fees. Agreements providing for a regulated fund's adviser to be compensated based on capital gains could benefit fund investors by rewarding portfolio management that increases the fund's returns.[308] Some investors may additionally prefer to invest in regulated funds in which a larger percentage of fees is contingent on the funds' performance.

While the number of investors that would be able to invest in funds whose advisers charge performance fees on capital gains could increase, we cannot estimate how many new and existing funds would become available to the investors who currently do not meet the definition of qualified client. For example, to the extent that advisers have reasons to restrict the shareholder base to more affluent investors beyond the current constraints on charging performance fees on capital gains to non-qualified clients,[309] an adviser could continue to restrict the fund's shareholder base. One avenue through which advisers can do so is establishing investment minimums for funds and accounts they advise.[310]

Nonetheless, to the extent that access to more complex investment strategies would expand as a result of the proposed amendments, such expanded access carries certain risks associated with those strategies. For instance, investment strategies that are commonly associated with performance fees, such as private market strategies, generally offer lower liquidity and less valuation transparency to investors, and may employ more leverage, compared to their public counterparts.[311] While exposure to risk can increase expected risk-adjusted returns, investors unfamiliar with these risks may position themselves sub-optimally or face unexpected losses. Thus, one possible cost of expanding the pool of investors is the potential for uninformed or insufficiently informed investing by newly eligible investors. To the extent that advisers may offer inferior strategies while charging performance fees to less wealthy investors who are less familiar with such strategies, those investors may be negatively affected. In addition, less wealthy investors may experience higher search costs for high-quality advisers, and thus may not realize the same net returns as wealthier investors, to the extent that less wealthy investors are limited to products offered by lower-quality advisers. For example, a recent study suggests that the returns realized by individual investors investing in private equity funds vary significantly depending on their wealth level.[312] In particular, the most affluent

[303] We do not have information or data about how many investors fall into this category.

[304] We anticipate that, in the regulated fund space, the primary mechanism affecting investors' access to a broader range of strategies would be new funds offering strategies that are currently unavailable to these investors. While we recognize that existing regulated funds that do not charge performance fees on capital gains could, with board and shareholder approval, implement a performance fee (but keep the adviser and the strategy the same as before) as a result of the proposed amendments, we do not anticipate that this would be a significant channel. We also recognize that existing regulated funds could, with board and shareholder approval, change their strategies or merge with other funds to accommodate performance fees as a result of this proposal. For the purposes of this discussion, we also refer to these funds as new funds; however, we do not anticipate that this would be a significant channel.

[305] We note that less affluent accredited investors in private funds may face higher costs relative to wealthier investors. For instance, given that many private funds require minimum investment amounts, less affluent accredited investors may need to invest through funds-of-funds to obtain exposure to multiple private funds. This approach layers on fund-of-fund management fees or performance fees, which can erode overall performance. *See e.g.,* Stephen J. Brown, William N. Goetzmann and Bing Liang, *Fees on Fees in Funds of Funds,* 2 J. Inv. Mgmt. 39–56 (2004). *But see* Andrew Ang, Matthew Rhodes-Kropf, and Rui Zhao, *Do Funds-of-Funds Deserve Their Extra Fees?* 4 J. Inv. Mgmt. 6 (2008), arguing that funds-of-funds add value given the limited set of direct hedge fund investments an investor with limited capital could make absent the fund-of-funds vehicle.

[306] *See* section III.B.3.d. *See also* note 285 and related text.

[307] As discussed in *infra* section III.C.1.b, we anticipate that registered closed-end funds would be better suited to provide private market exposure given the liquidity and leverage limitations on registered open-end funds.

[308] *See, e.g.,* Jennifer Huang, Kelsey D. Wei and Hong Yan, *Participation Costs and the Sensitivity of Fund Flows to Past Performance,* 62(3) J. of Fin (2007). *See also* Judith Chevalier and Glenn Ellison, *Risk Taking by Mutual Funds as a Response to Incentives,* 105(6) J. Pol. Econ. 1167–1200 (1997).

[309] For example, if it is operationally less burdensome to have fewer investors, an adviser may prefer higher capital commitments per investor.

[310] Regulated and private funds can set investment minimums without regulatory restrictions. *See* section III.B.3.c for the discussion of practices related to the minimum investment requirements.

[311] *See* section III.B.3 for a more detailed discussion. *See also e.g.,* Ben Bates, *Retail Access to Private Markets: What Are the Risks? Continued

investors have returns that are nine percentage points (in risk-adjusted public market equivalent) higher compared to the least affluent investors. This result is primarily explained by variation in investment adviser quality—wealthier clients match with better-performing advisers—and differences in fees (including intermediation costs) also contribute to the effect. The study also indicates that, after accounting for advisers' fees, the least wealthy investors did not achieve higher returns relative to the public markets.[313] To the extent that wealthier investors match with better advisers because they are able to provide more upfront capital required for higher-performing strategies, and to the extent that wealthier investors have greater bargaining power to negotiate performance fees, less affluent investors may continue to be excluded from higher-performing strategies offered by high-quality advisers. In addition, to the extent that strategies newly available to less affluent investors would be offered by lower-quality advisers, such investors may experience a decrease in risk-adjusted returns. Further, to the extent that adding performance fees would increase funds' operating expenses without a corresponding increase in risk-adjusted returns that would generate offsetting cash flows, and to the extent that funds would need to deplete their liquid assets to pay these operating expenses, funds with performance fees may have less liquid assets compared to funds with the same strategies that do not pay performance fees.

The proposed amendments would allow performance fees on both realized and unrealized capital gains. Certain strategies, such as income-based strategies where realized gains on income occur when interest payments from portfolio assets are made, or certain vehicle types, such as private funds with lockup periods where performance fees are not paid until the capital gains are realized, can more easily accommodate performance fees on realized gains. By contrast, vehicles with frequent subscriptions and redemptions that have strategies that do not post substantial realized gains as frequently, such as equity strategies, are able to accommodate performance fees based on unrealized gains. As such, advisers to regulated funds that pursue equity strategies may be at a structural disadvantage relative to advisers of funds with income strategies, given that equity strategies generate capital appreciation primarily through unrealized gains in the short term. Therefore, permitting performance fees on unrealized gains may level the playing field for advisers to regulated funds with equity strategies by better aligning their incentive structure to that of advisers to income strategies. This, in turn, may benefit investors in regulated funds, to the extent that it would expand the range and quality of strategies offered in the regulated fund space.

Estimating unrealized gains can be complex and may depend on many assumptions underlying the fair value of an investment for which market quotations are not readily available: the less information about an investment is available in the market, the more complex fair value estimation becomes. Investors may not fully understand this process and the risks it poses, as it requires specialized knowledge, and, therefore, they may underestimate the risks related to valuation of complex products. For example, for open-end funds (both private and regulated), undesirable outcomes may arise when a fund purchases equity assets (*e.g.,* a private equity stake) in a secondary market at a discount to the NAV of such assets. In particular, at the time of the purchase, the asset's value is recorded at cost. However, when a fund applies the NAV practical expedient to estimate fair value, the fund may recognize an immediate unrealized gain equal to the difference between the asset's cost and its NAV.[314] As a result, advisers may have an incentive to allocate disproportionately large amounts of investor capital to such assets and record gains for the fund without any change to the fundamental characteristics of the underlying assets, because these unrealized gains may trigger a performance fee. However, if the fund later must accommodate redemptions or fund operating expenses, such as management or performance fees, by selling these assets in the same secondary market at a discount, remaining investors would absorb the loss, which may in turn trigger further redemptions and additional losses.[315]

We anticipate these potential risks would be mitigated by the safeguards accompanying each channel. The proposed conditions for relying on the fund board channel would mitigate these risks in the regulated fund space by limiting the magnitude of performance fees as a percentage of net capital gains,[316] by requiring compliance with fund governance standards, and by requiring a best-interest determination by regulated fund boards.[317] For the accredited investor channel, any expansion in investor access would affect less affluent accredited investors who are already eligible to invest in exempt offerings (including in 3(c)(1) private funds) and who are recognized as having a degree of financial sophistication that may better position them to evaluate the risks of complex investment strategies than non-accredited investors.[318] Additionally, to the extent that fund boards (for regulated funds) or investors in 3(c)(1) funds and separately managed accounts negotiate provisions such as high-water marks and hurdle rates (as applicable), these risks could be further mitigated. Together, these conditions would provide advisers with appropriate incentives to maximize risk-adjusted returns for their clients without encouraging excessive risk-taking.

b. Regulated Funds

Investors in regulated funds that cannot adopt asymmetric performance fees on capital gains may be at a disadvantage compared to investors in funds whose advisers can freely charge performance fees to these funds. This is because an inability to charge

by 9 percentage points in risk-adjusted public market equivalent. The public market equivalent measure compares the returns generated by an investment relative to a hypothetical investment made in public equities. The study finds evidence suggesting that less affluent investors have worse advisers that deliver persistently lower returns, and that those investors pay significantly higher fees (including intermediation costs), compared to more affluent individual investors. *See also* Steven N. Kaplan and Antoinette Schoar, *Private Equity Performance: Returns, Persistence, and Capital Flows,* 60 J. Fin. 1791 (2005).

[313] *Id. See also* Robert S. Harris et al. *Has Persistence Persisted in Private Equity? Evidence from Buyout and Venture Capital Funds,* 81 J. Corp. Fin. 102361 (2023). This study shows similar results for wealth-performance gap for venture capital funds.

[314] *See also supra* note 107. This process is typically referred to as ''NAV squeezing'' and has recently become a growing concern in the secondary market for private equity stakes. *See, e.g.,* EDHEC, *Evergreens: The Tree That Never Sheds, A Closer Look at Performance, Risk, and Valuation Practices in Private Equity Evergreens* (October 2025), *available at https://edhecinfra privateassets.com/wp-content/uploads/2025/10/2025_private_equity_evergreens.pdf.*

[315] *Id.* The study estimated that since 2021, more than 70% of gains across SEC-registered evergreen funds, which primarily invest in private equity through secondary markets, remain unrealized, with the number exceeding 90% for newer funds.

[316] *See supra* section II.A.2.a.

[317] *See supra* sections II.A.2.b and II.A.2.c.

[318] Accredited investors are already deemed under the federal securities laws to have sufficient financial sophistication to participate in private offerings without the full protections afforded to the general investing public. To the extent that this determination reflects meaningful differences in financial sophistication, accredited investors may be relatively better equipped to assess and negotiate the terms of performance fee arrangements.

asymmetric performance fees may discourage capable advisers from allocating their best-performing strategies to regulated funds, and because fulcrum fees are associated with higher operational risk to advisers and, therefore, do not provide strong enough incentives to bring such strategies to regulated funds.[319]

Expanding the ability to charge performance fees could similarly lead advisers currently operating in the private markets to bring strategies into the regulated fund wrapper by providing an alternative to the fulcrum fee structure for performance-based compensation. It would also allow advisers to regulated funds with strategies that are already available in regulated funds to enter into agreements that provide for compensation that varies asymmetrically with the fund's performance, potentially better aligning advisers' interests with those of regulated funds' shareholders by incentivizing advisers to maximize fund returns. Accordingly, the proposed amendments could promote innovation in regulated funds and expand investor choice.

Advisers to regulated funds considering advisory agreements that provide for compensation based on capital gains would choose through which channel to implement a performance fee on capital gains: some may choose the accredited investor channel and others may choose the fund board channel. For example, it could be more feasible for advisers to open-end funds and listed closed-end funds to implement performance fees via the fund board channel, to the extent that investor-level conditions prevent certain intermediaries from offering funds restricted to a particular set of investors on such platforms.[320] On the other hand, for advisers to regulated funds that primarily market and distribute their funds through intermediaries and prefer higher initial investments, it could be less costly to implement performance fees on capital gains via the accredited investor channel.

Non-accredited investors in funds that would choose to implement performance fees on capital gains through the fund board channel may be less familiar with these fee structures than accredited investors,[321] may not fully understand the associated risks related to financial products that include performance fee structures,[322] and may be less well positioned to bear any increased risks relative to accredited investors. However, the proposed conditions for reliance on the fund board channel are designed to address these concerns by requiring that the board, as part of its 15(c) process, evaluate the specific structural features of the performance fee arrangement and make particularized findings. This approach would help ensure that the performance fee arrangement is reassessed annually as the regulated fund's performance, strategy, portfolio composition, and valuation complexity evolve over time.

The proposed best interest finding by the board would also be required to include a written finding addressing the appropriateness of a performance-based compensation arrangement in light of the fund's investment strategy and valuation practices.[323] In addition, the proposal would amend Item 11 of Form N–CSR to include more particularized disclosure regarding the approval of performance fees on capital gains to mirror these written findings. Together, these requirements would help safeguard shareholders' interests and reinforce the board's oversight of adviser compensation arrangements.

While exposure to novel strategies, such as private market strategies or strategies that are similar to those of hedge funds, may improve risk-adjusted returns of investors in regulated funds, the extent to which these investors would be able to capture these returns may be limited by several factors. First, due to liquidity and leverage constraints of regulated funds, the implementation of strategies that are similar to those of private funds may not be feasible, as such strategies may require long lock-up periods (in the case of private equity funds) or high leverage usage (*e.g.,* in some hedge fund strategies). Where liquid alternative strategies can be implemented, such strategies may yield lower net-of-fees risk-adjusted returns, which could turn out to be similar to returns of strategies already available to the general public.[324] This return offset effect would be the strongest for funds with more restrictive liquidity and leverage requirements, such as registered open-end funds with daily subscriptions and redemptions. Conversely, net-of-fees risk-adjusted returns of regulated funds with the least restrictive liquidity and leverage requirements, such as BDCs and tender-offer funds, may have more potential for higher net-of-fees risk-adjusted returns compared to those of strategies already available to the general public. Therefore, we anticipate that return-enhancing benefits of the proposed amendments would primarily affect investors in registered closed-end funds because closed-end funds are generally more suited to less liquid investments such as private market strategies.

While the proposal would also allow advisers to regulated funds with more conventional strategies to enter into agreements that provide for compensation that varies asymmetrically with the fund's performance, many registered open-end fund strategies may not be deemed by fund boards to be appropriate candidates for performance fees. For example, a performance fee on capital gains would be difficult to justify for a fund that tracks a market index—because the strategy is largely mechanical to implement, there is limited basis for measuring adviser outperformance.[325] As another example, a performance fee on capital gains would be difficult to justify for a registered fund of funds, to the extent the underlying funds already pay performance fees.[326] Lastly, a performance fee on capital gains would be difficult to justify for a fund investing in primarily fixed-income securities, such as money market funds or bond funds, because usually the gains of such funds are primarily income gains rather than capital gains.[327] Moreover, as many

[319] *See supra* section III.B.3.

[325] We estimate that, as of December 31, 2025, approximately 22% of open-end funds, representing approximately 36.6% of cumulative open-end fund net assets, are index funds.

[326] We estimate that, as of December 31, 2025, approximately 13.4% of open-end funds, representing approximately 9.8% of cumulative open-end fund net assets, are funds of funds.

[327] We estimate that, as of December 31, 2025, approximately 2.4% of open-end funds, representing approximately 17.8% of cumulative open-end fund net assets, were money market funds. These estimates are based on the data reported in a recent staff report, reflecting data collected from Form N–CEN filings received through May 13, 2026 for reporting periods from December 2019 through December 2025. *See* Annual Registered Investment Company Update, Report of the Staff of the Division of Investment Management's Analytics Office of the U.S. Securities and Exchange Commission, available at *https://www.sec.gov/files/annual-registered-investment-company-update-20260512.pdf* (last accessed Aug. 25, 2026). We also estimate that approximately 26.7% of mutual funds representing 20.3% of aggregate mutual fund assets, 25.3% of ETFs representing 18.3% of aggregate ETF assets, and 49.7% of closed-end funds representing 51.4% of aggregate closed-end fund assets invest primarily

Continued

such funds already compete on management fees, adding additional fees may make a fund less attractive to new and existing investors and potentially lead to shareholder attrition, because net-of-fees risk-adjusted returns may decrease.[328] This effect may be reinforced as the implementation of performance fees on capital gains in open-end funds produces unequal outcomes among investors, where investors in the same fund may bear different effective performance fees depending on the timing of their subscriptions or redemptions.[329] Therefore, we anticipate that the uptake of performance fees on capital gains in existing open-end funds would be limited.

To the extent that regulated funds would choose to pay performance fees on capital gains, shareholders of funds that pay performance fees based on unrealized gains may be at risk of paying performance fees that do not correspond to future realized gains. Regulated funds with equity strategies would be most affected by this part of the proposal, as equity strategies primarily have unrealized gains. However, funds with income strategies may also be affected, to the extent that advisers would choose to charge performance fees on both income and capital gains. In particular, the proposal would permit adviser contracts with registered funds, in which compensation based on interest or income is already permissible, to also include a performance fee on realized or unrealized gains, provided the conditions of the proposed rule are satisfied. This effect would be less pronounced for BDCs because advisers to BDCs can already charge performance fees on realized capital gains, to the extent that they qualify for the statutory BDC exclusion. The proposal would allow them to also charge fees on unrealized capital gains.[330]

Because BDCs primarily invest in credit instruments, unrealized capital gains may be a smaller part of their total return.[331] To the extent that BDCs continue to invest primarily in credit instruments, we do not expect this part of the proposal to have a significant effect on access to alternative strategies in the regulated fund space. This is because advisers to BDCs can already charge performance fees on both income gains and realized capital gains, provided that performance-based compensation does not exceed 20 percent of net realized capital gains over a defined period and the BDC does not have other incentive compensation structures in place.[332] However, to the extent that boards and investors of existing BDCs approve adding unrealized gains to the performance fee calculation, those investors may pay higher fees. On the other hand, to the extent that BDCs are already more expensive to investors than other funds offering similar strategies and additional fees may result in investor attrition, this amendment may not result in BDCs adopting additional performance fees.[333]

In addition, to the extent that BDCs are currently limited in their range of strategies because of the current prohibition on performance fees based on unrealized capital gains, BDC advisers may expand the range of strategies they offer as a result of the proposal, and such a broader array of strategies may benefit investors. In particular, because certain equity strategies, such as private equity, do not post realized gains often, and BDCs are permitted to pay performance fees only on realized capital gains currently, advisers to BDCs may not be sufficiently incentivized to offer private equity strategies (because capital gains would be realized only upon a sale of portfolio companies, which typically does not occur in the short term).

A regulated fund's compliance with the fund governance standards of rule 0–1(a)(7) is a condition of relying on the fund board channel. Funds that already satisfy these standards would not incur incremental governance costs, to the extent they choose to implement performance fees on capital gains. We estimate that there are at least 8,336 registered funds that currently satisfy the fund governance standards.[334] Funds that do not currently satisfy fund governance standards and choose to implement performance fees on capital gains through the fund board channel would experience a cost increase. These costs could include one-time costs related to restructuring fund boards and governance processes (such as the costs of a shareholder vote to add independent directors), as well as ongoing costs, such as additional director fees, costs of additional board meetings, and costs of counsel to the independent directors. One report indicates that, as of year-end 2024, 89 percent of fund complexes reported that independent directors held 75 percent or more of seats on boards at the complex, indicating that fund boards are overwhelmingly independent.[335] The same report states that 95 percent of fund complexes report that independent directors are represented either by dedicated counsel or by counsel separate from the adviser's counsel.[336] To the extent these regulated funds would choose to adopt performance fees on capital gains through the fund board channel, they will not incur the one-time costs of adding additional directors or the costs of independent director counsel.

In addition to meeting the fund governance standards, an existing regulated fund that adopts a performance fee on capital gains would generally need to obtain shareholder approval of the amended advisory contract under section 15(c) of the

in taxable and municipal bonds. These estimates are based on the data reported in a recent staff report and are based on Form N–CEN filings received for reporting periods from January 2025 through December 2025. *See* Registered Fund Statistics for period ending December 2025, Report of the Staff of the Division of Investment Management's Analytics Office of the U.S. Securities and Exchange Commission, available at *https://www.sec.gov/files/investment/im-investment-registered-fund-statistics-202512.pdf* (last accessed Aug. 24, 2026). The report defines prevalent asset class if the fractional allocation toward an asset class is greater than 75%.

[328] *See* section III.B.3.

[329] *See* section III.B.3.b.

[330] *See* proposed rule 205–3(c)(1)(iv).

[331] *See supra* section III.B.3.d(3).

[332] *See* section 205(b)(3) of the Advisers Act; *see also* Small Business Investment Incentive Act of 1980, Public Law 96–477, 94 Stat. 2275 (1980).

[333] *See supra* notes 274 and 275 and accompanying discussion.

[334] A fund must satisfy the board governance standards if it relies on one or more of the following exemptive rules: rule 10f–3(c)(11), rule 12b–1(c), rule 15a–4(b)(2)(vii), rule 17a–7(f), rule 17a–8(a)(4), rule 17d–1(d)(7)(v), rule 17e–1(c), rule 17g–1(j)(3), rule 18f–3(e), or rule 23c–3(b)(8). The estimates for funds relying on rules 10f–3(c)(11), rule 17a–7(f), rule 17a–8(a)(4), and rule 17e–1(c) are derived from Form N–CEN, Item C.7, which asks funds to report reliance on certain statutory exemptions and rules under the Investment Company Act. For reliance on rule 18f–3(e), we use the number of authorized share classes reported in Item C.2.a as a proxy, treating any fund reporting more than one authorized class as relying on rule 18f–3. Item C.7 does not separately enumerate rule 12b–1, rule 17d–1(d)(7), or rule 17g–1, so reliance on these three rules is not reflected in this estimate. To the extent funds rely on these rules without also relying on one of the other rules on this list, the estimate understates the true count. Item C.7 also does not distinguish reliance on rule 15a–4(b)(2) from reliance on rule 15a–4 generally; we therefore use reported reliance on rule 15a–4 as a proxy, which may overstate reliance on the (b)(2) provision specifically. For rule 23c–3 we use the interval fund indicator reported in Item C.3.d, which is defined as a closed-end management investment company that makes periodic repurchases of its shares pursuant to rule 23c–3. The estimate is based on each fund's most recently filed Form N–CEN for reporting periods ending on or before December 31, 2025, with filings through May 29, 2026. Funds relying on multiple exemptions are counted only once.

[335] *See* Independent Directors Council, ''*Overview of Fund Governance Practices*'', *available at https://www.idc.org/system/files/2025-10/25-idc-overview-of-fund-governance-practices.pdf.* (last accessed Aug. 13, 2026).

[336] *Id.*

Investment Company Act and would incur the associated costs of preparing a proxy statement, soliciting proxies, and conducting a shareholder meeting. These are one-time costs that would vary with the fund's shareholder base and distribution structure, and they would not be incurred by newly organized funds that include a performance fee in their initial advisory contract.

Funds that choose to implement performance fees on capital gains through the fund board channel would experience compliance costs. We estimate that the ongoing costs would amount to $83,881 per fund per year.[337] Funds that would choose to implement performance fees through the accredited investor channel would experience compliance costs related to establishing the accredited investor status of fund shareholders. Funds that already charge asymmetric performance fees on capital gains and currently need to determine whether investors meet the definition of qualified client may experience a cost reduction because, under the proposal, funds operating through the accredited investor channel would need to assess only accredited investor status for their investors, rather than both accredited investor status and qualified client status, as the current framework requires.

c. Private Funds

Section 3(c)(1) private funds that rely on Regulation D generally limit their investors to accredited investors under the baseline.[338] However, under rule 205–3, advisers to 3(c)(1) funds may not charge performance fees to investors who, despite being accredited investors, do not meet the qualified client definition—for example, because they lack $2.7 million in net worth, $1.4 million in assets under management with the adviser, or satisfaction of another prong of the current definition.

The proposed inclusion of accredited investor status as a basis for satisfying the qualified client standard would harmonize the regulatory frameworks governing access to private funds by enabling advisers to funds that already limit their investors to accredited investors to enter into performance fee arrangements without separately applying the qualified client standard.

As a result, more 3(c)(1) funds may become available to accredited investors, providing them with a wider set of investment options and the potential for diversification benefits offered by those funds' strategies.[339] This expanded access could increase investors' exposure to certain risks associated with private funds. For example, private funds generally offer less liquidity to investors than registered investment companies and other funds (*e.g.,* public BDCs) that are available to investors without eligibility restrictions.[340]

Aligning the accredited investor and qualified client thresholds would reduce the cost burden associated with establishing the eligibility of new investors in 3(c)(1) funds. In particular, advisers to 3(c)(1) funds that rely on rules 506(b) and 506(c) to exempt their offerings from registration under the Securities Act generally must either have a reasonable belief that their investors are accredited investors (under rule 506(b)) or take reasonable steps to verify that their investors are accredited investors (under rule 506(c)). Separately, however, advisers to these funds must verify that fund investors that will be charged performance fees also are qualified clients. The proposed amendments would render that separate analysis unnecessary, as an accredited investor would be a qualified client.

However, we anticipate that the magnitude of these economic effects on accredited investors may be limited. Because 3(c)(1) funds are generally limited to 100 investors, advisers to these funds may prefer investors with a higher net worth than an accredited investor who does not meet the current qualified client standard, because such investors with higher net worth may be able to commit larger amounts of capital both initially and as more investment opportunities arise. Additionally, large capital commitments may open opportunities for better deals within the private equity space, which in turn may increase the risk-adjusted returns of a fund. As a result, accredited investors that do not meet the current qualified client definition may not represent sufficient assets, either now or in the future, for advisers to justify creating 3(c)(1) funds designed specifically for these investors or to open 3(c)(1) funds to these investors in addition to investors that meet the current qualified client definition. As such, advisers to 3(c)(1) funds may continue to set investment minimums that would in practice exclude less affluent accredited investors, particularly those whose net worth or income is near or below the applicable accredited investor monetary thresholds.[341] We estimate that approximately 31 percent of 3(c)(1) funds require minimum investments of $10,000 or less, and 59.3 percent require an average investment minimum size of $100,000 or less.[342] This suggests that there nevertheless is meaningful scope for private funds to accommodate relatively small investments.

d. Separately Managed Accounts

Although the proposed amendments would newly include less affluent accredited investors within the qualified client definition and permit them to enter into direct advisory contracts that include a performance fee on capital gains, we do not expect that investment opportunities for less affluent accredited investors through separately managed accounts would increase significantly. This is because we do not anticipate that less affluent accredited investors would individually represent sufficient assets for advisers to justify the operational costs of separately managed accounts offering strategies that are typically associated with performance fees.[343] Because advisers to retail-oriented separately managed accounts do not employ a market practice of charging performance fees on separately managed accounts with limited customization and because the proposed amendments would not alter advisers' ability to scale customized separately managed accounts for smaller accounts, we do not expect that there would be a substantial change in this market practice.[344] In addition, to the extent that advisers introduce performance fees for retail-oriented separately managed accounts as a result of the proposed

[337] This estimate is the sum of monetized internal and external burdens for the proposed rule 205–3 requirements and the proposed Form N–CSR requirements. The estimated burden for the proposed rule 205–3 requirements is based on an annual internal burden hours increase of 6 hours per fund, monetized at a blended rate of $12,186 and an annual external burden hours increase of 5 hours per fund, monetized at $774 wage rate: (6 × $12,186) + (5 × $774) = $76,986. *See infra* section IV.B, PRA Table 1. The estimated burden for the proposed Form N–CSR requirements is based on an annual internal burden hours increase of 5 hours per fund, monetized at a blended rate of $605 and an annual external burden hours increase of 5 hours per fund, monetized at $774 wage rate: (5 × $605) + (5 × $774) = $6,895. *See infra* section IV.B, PRA Table 4.

[338] *See* section III.B.1.a.

[339] *See supra* sections III.B.3 and III.C.1 for a more detailed discussion of benefits offered by strategies that are associated with performance fees.

[340] Venture capital and private equity funds require investors to commit their capital for several years, with the complete investment returned (subject to the possibility of losses) only when the portfolio companies are sold and the fund retires. Hedge funds often redeem investors periodically, but redemptions are often conditional on the availability of liquidity, which depends on market conditions and whether other investors seek to redeem as well. Secondary markets for the shares of private funds are not widespread.

[341] *See supra* section III.B.1.

[342] *See supra* Table 4.

[343] *See supra* section III.B.3.d(2).

[344] *Id.*

amendments, we do not expect that investor demand for these products would increase, and we do not anticipate that investor access to strategies typically associated with performance fees on capital gains would increase significantly through separately managed accounts.

2. Amending References to the Qualified Client Definition

The qualified client definition is currently also referenced in the definition of investment adviser representative in rule 203A–3(a)(3)(i) under the Advisers Act, the exceptions to a registered investment adviser's brochure supplement delivery requirement in rule 204–3(c)(2)(iii) under the Advisers Act, and the definition of a ''high net worth individual'' for purposes of Form ADV reporting.[345] The proposal would include technical conforming amendments to rules 203A–3(a)(3)(i) and 204–3(c)(2)(iii) under the Advisers Act to replace the existing references to the ''qualified client'' definition in rule 205–3(d)(1) with references instead to rule 205–3(c)(1), corresponding to the proposed redesignation of current paragraph (d)(1) to (c)(1).[346]

With respect to rule 204–3, because the referenced prong of the qualified client definition would not be impacted by the proposed amendments beyond the proposed redesignation of rule 205–3(d)(1) to rule 205–3(c)(1), the conforming amendment would not have any substantive effect on the number of clients that would be exempted from receiving the brochure supplement.[347]

With respect to rule 203A–3, the proposed expansion of the qualified client definition would broaden the category of excepted persons, meaning that a greater number of clients would not count toward the thresholds that trigger investment adviser representative status. As a result, some supervised persons who are currently subject to state licensing and qualification requirements may no longer be subject to those requirements. This would reduce ongoing compliance costs for affected supervised persons and their firms. However, investors working with such supervised persons may lose the investor-protection benefits related to the state qualification requirements that currently apply to their supervised persons, such as examination requirements, state oversight, and bonding requirements, among other things.[348]

Because the definition of high net worth individuals on Form ADV is based on the qualified client definition, the proposed changes would require all advisers with individual clients to reclassify which of their clients are high net worth for reporting purposes, regardless of whether an adviser is affected by the proposed changes to rule 205–3.[349] We estimate that, as of December 31, 2025, approximately 64 percent of registered investment advisers report advising individual clients,[350] and, therefore, would be subject to the Form ADV reporting changes, regardless of whether they charge performance fees on capital gains or not. As a result, the high net worth individual data reported on Form ADV would no longer be necessarily representative of any particular level of net worth, because accredited investor status can be met based on non-net-worth-related qualifications, which would reduce the usefulness of this data for monitoring trends in advisers' client net worths over time.

Together, the conforming amendments would impose one-time costs on advisers related to updating their internal systems that track clients and client suitability questionnaires, as well as their systems for preparing Form ADV, regardless of whether an adviser is otherwise affected by the proposed changes to rule 205–3.

3. Performance Fee Disclosure for Regulated Funds

The proposal would require regulated funds to provide more detailed prospectus disclosure on Forms N–1A and N–2 about performance-based compensation paid to the investment adviser.[351] In particular, regulated funds would be required to disclose performance fees as a separate line item in the fee table [352] and to reflect performance fees in the required expense example demonstrating the cost of investing in the fund over various time horizons.[353] In addition, the proposed amendments would require a detailed description of the performance fee arrangement, including a graphical representation illustrating the calculation of the performance fee in the management discussion section of Forms N–1A and N–2.[354] We estimate that the proposed disclosure requirements would result in an ongoing annual cost increase of $8,487 per fund for both N–1A and N–2 filers.[355]

a. Scope of the Proposed Amendments

In contrast to section 205 of the Advisers Act and rule 205–3, the scope of the proposed prospectus disclosure requirements related to performance fees would not be limited to compensation based solely on capital gains or appreciation; it also would encompass performance fees based on other performance measures, such as interest, ordinary income, or dividends. The proposed changes to the disclosure requirements would apply to any type of performance fee paid to the fund's adviser, including both symmetric and asymmetric performance fees on capital gains and performance fees based on other measures, such as interest income. As a result, all regulated funds that pay performance fees to their advisers would be subject to the proposed disclosure requirements—including funds that would otherwise not be affected by the proposed amendments to rule 205–3, such as regulated funds that pay fulcrum fees, regulated funds that pay performance compensation not based on capital gains, and BDCs that pay performance fees on capital gains in reliance on the statutory exception rather than the ''look-through'' provision in rule 205–3.

b. Prospectus Fee Table

Currently, funds that pay performance fees are required to present them in a line item for management fees aggregated with base management fees,[356] which represents the total advisory fee. However, the current

[345] *See supra* section III.B.1.d.

[346] *See also supra* section II.B.3.

[347] *See also supra* section II.B.3.b.

[348] State registration of investment adviser representatives allows state securities regulators to monitor and examine their activities pursuant to applicable state securities laws. Investment adviser representatives may also be required to pass the Uniform Investment Adviser Law Examination (Series 65) or the Uniform Combined State Law Examination (Series 66), administered by FINRA on behalf of North American Securities Administrators Association (NASAA). Some states require investment adviser representatives to maintain a surety bond, providing a source of recovery for investors in the event of misconduct.

[349] Advisers would need to revise their answers to Item 5.D. of Part 1A of Form ADV.

[350] *See* Table 1.

[351] *See supra* section II.A.3.

[352] *See* proposed Form N–1A Item 3 Instruction 3.(b) and Form N–2 Item 3 Instruction 7.c.

[353] *See* proposed Form N–1A Item 3 Instruction 4.(f) and proposed Form N–2 Item 3 Instruction 11.(d).

[354] *See* proposed Form N–1A Item 10.(a)(1)(ii)(B) and proposed Form N–2 Item 9.1.b.(3) Instructions 2 and 3.

[355] This estimate is based on the sum of annual internal burden hours increase of 10 hours per fund, monetized at a blended rate of $462 and annual external burden hours increase of 5 hours per fund, monetized at $774 wage rate: (10 × $462) + (5 × $774) = $8,487. *See infra* section IV.B, PRA Tables 2 and 3.

[356] *See* Form N–1A Item 3 Instruction 3.(a); Form N–2 Item 3 Instruction 7.a.

requirements for the example accompanying the fee table do not require a presentation of performance fees disaggregated from the total advisory fees paid.[357] As such, the current requirement to present advisory fees inclusive of any performance adjustment aggregates information that could be material for some investors. While some regulated funds have developed a practice of reporting performance fees separately from other advisory fees, either in the fee table or in the notes to the table, the detail and salience of such disclosure may vary across funds because it is voluntary. This inconsistency may affect investors' ability to choose regulated funds efficiently and in accordance with their investment and risk-tolerance objectives. In addition, while performance fee data for some regulated funds is available through third-party data aggregators, these data are not standardized and may therefore be outdated, incomplete, or inconsistently available across funds or over time, which may contribute to inefficient investment decisions.

Further, BDCs already provide performance fee disclosures in periodic reports, some of which are in an Interactive Data File (*i.e.,* tagged in Inline XBRL, a machine-readable data language).[358] Specifically, BDCs disclose in an Interactive Data File investment advisory, management, and service fees in the statement of operations, with notes describing the rate, base, and method of fee computation, as well as any fee reductions, reimbursements, or offsets.[359] Additionally, while not part of the Interactive Data File, any material performance fees must be explained and quantified in the Management's Discussion and Analysis of Financial Condition and Results of Operations section, particularly where they materially affect earnings or cash flow.[360] As a result, performance fee information for BDCs is available in periodic reports and, for those disclosures in the Interactive Data File, generally more accessible to investors and information intermediaries, such as data aggregators and financial analysts.

The proposal to require all regulated funds to report performance fees in a separate line item of the fee table and the related example would enhance the transparency and salience of the performance fees. This may increase investor awareness and could lead to a reduction in these fees, to the extent that they are higher than those of other funds with similar strategies.[361]

Moreover, because fee table disclosures in Forms N–1A and N–2 are required to be tagged in Inline XBRL,[362] the proposed performance fee disclosures in the fee table, including the caption and the associated note, would also be required to be tagged in Inline XBRL, making this information easier to access and analyze for investors, Commission staff, and information intermediaries such as financial analysts and data aggregators.[363] Research from the operating company context suggests that XBRL requirements lower information processing costs, leading to lower informational asymmetry, greater price efficiency, enhanced artificial intelligence capabilities, and other market effects.[364]

However, because the fee table requires fund expenses to be expressed as a percentage of average net assets, and because performance fees are generally not designed to be proportional to fund size, presenting past performance fees as a percentage of net assets may limit some of the benefits of fee table disclosures for investors. In addition, because the fee table requires showing only the fees paid during the most recent fiscal year, if a fund with a performance compensation arrangement did not perform in a way that would trigger a performance fee (*e.g.,* it did not have capital gains or did not outperform an established benchmark or a preferred return), the fund would report ''zero'' in the line for performance fees, which may create potential confusion for investors. In addition, because the expense example is required to assume a five percent annual return, funds with a performance fee arrangement where the hurdle rate or a benchmark return generally exceeds five percent would not necessarily include performance fee expenses in the example (to the extent that the assumed five percent annual return would be below the hurdle rate or benchmark). This may limit the usefulness of the required example for illustrating the operating costs of a fund with a performance fee arrangement and may lead to investor confusion and inefficient investment decisions.

Because the fee table is primarily aimed at helping investors make informed decisions about whether to invest or remain invested in a fund, presenting actual performance fees paid rather than the performance fee arrangement itself may lead to inefficient investment decisions, as investors may underestimate the potential range of the contribution of performance fees to the fund's operating expenses. However, the proposed layered disclosure approach would mitigate these concerns: the required footnote would alert investors about fee variability and direct them to the prospectus discussion, which would include a graphical representation of the performance fee across a range of hypothetical scenarios, including the cases where a zero is reported in the fee table or where the fee table example does not capture potential performance fees.[365] While investors may pay more attention to information that is presented more prominently in the disclosure,[366] the layered approach

[361] For example, a recent academic study uses a sample of open-end U.S. domestic equity mutual funds between 1998 and 2015 and estimates that, as a result of the 2004 SEC requirement to include the dollar amount of fund fees in shareholders' reports, retail fund fees decreased by 0.27% during the five years after the rule change compared to the five years before. The author suggests that the rule change made fund fees more salient among investors, forcing mutual funds to decrease fees. *See* Parida, Sitikantha Parida, *The impact of salient fees: Evidence from the mutual fund market,* 92 Int'l Rev. Fin. Analysis 103058 (2024).

[365] *See supra* section II.A.3.a and *infra* section III.C.3.c.

[366] For example, academic studies suggest that investor confusion or reduced understanding of the key elements of the disclosure are likely to increase as disclosure documents become longer, more complex, or more reliant on narrative text. *See, e.g.,* Samuel B. Bonsall and Brian P. Miller, *The Impact of Narrative Disclosure Readability on Bond Ratings*

Continued

would leverage the existing framework for the fee table and related discussion already used across regulated funds and would be less costly compared to an entirely different disclosure format for performance fee where the implementation costs would likely outweigh the incremental benefits of more prominent performance fee disclosure.

The proposed disclosure requirements would lead to new costs for funds that pay performance fees or those funds' advisers, which might be passed on to fund investors. Depending on the current disclosure practices of regulated funds that already pay performance fees, the increase in compliance burdens would vary. For example, compliance costs for funds that already disclose performance fees as a separate line item would not increase. We estimate that 142 regulated funds reporting on Form N–2 already report performance fees separately in XBRL format.[367]

By contrast, regulated funds that pay performance fees but do not separately disclose them or such funds' advisers would experience a bigger increase in compliance burdens as a result of the proposed disclosures, which might be passed on to the funds' investors. Because regulated funds are already tagging the fee table, the incremental cost of the tagging requirement for additional disclosures would be minimal.

c. Prospectus Discussion of Performance Compensation

While the current instructions to Form N–1A and Form N–2 require a fund that pays performance fees to describe the basis for these fees, they do not provide a list of specific items to disclose.[368] This may result in varying disclosure practices across funds that pay performance fees, with some funds providing more or less detail on the methodology for calculating the performance fee. The proposed amendments would require a standardized list of performance fee items in the discussion in Forms N–1A and N–2.[369] Disclosure of this information in a more standardized format could help investors better assess particular features of a fund's performance fee agreement with its adviser, including the presence or absence of certain protective features that determine when a performance fee applies and at what level.

Requiring a graphical representation illustrating the performance fee across a range of hypothetical scenarios would aid investors in understanding the mechanics and complexities of performance fee arrangements at regulated funds in which they are considering an investment. It would also aid investors in comparing adviser compensation structures across funds, which in turn could facilitate more efficient matching of investors to advisers. For instance, an investor seeking exposure to a particular market strategy would be better equipped to assess the magnitude and potential variability of fund operating expenses depending on whether the advisory contract includes certain features, such as a hurdle rate, or whether fees are assessed on realized or unrealized gains. This may aid investors in comparing fund cost structures and allow them to make a more informed choice among funds with similar strategies based on their preferences regarding the potential variability of fund expenses.[370]

4. Aggregate Monetized Benefits and Costs

Throughout this economic analysis, we have estimated monetized benefits and costs per affected entity. In this section, we present aggregate measures of these monetized effects across entities and time. These aggregates include only benefits and costs that are monetized in the economic analysis and thus do not encompass all of the proposed amendments' benefits and costs. In particular, we were unable to monetize the main benefits of the proposal. As discussed qualitatively above, the proposal may improve investor access to strategies typically associated with performance fees on capital gains; and the incentives such compensation arrangements provide may improve risk-adjusted returns for investors. We also were unable to monetize certain costs that are discussed qualitatively above. For example, while exposure to risk can increase expected risk-adjusted returns, investors unfamiliar with these risks may position themselves sub-optimally or face unexpected losses. Finally, we note that benefits or costs may vary across entities depending on their existing practices and whether those practices continue after the proposed amendments.

a. Initial and Annual Aggregate Monetized Benefits and Costs

Table 5 reports costs that are monetized in this economic analysis, aggregated across affected entities and instances of compliance each year. To aggregate these monetized effects we use estimates of the number of affected parties [371] and burdens under the Paperwork Reduction Act in section IV (''PRA'').[372] We estimate that the proposed rule would result in aggregate annual costs for covered entities of approximately $62,563,223.[373]

BILLING CODE 8011–01–P

and the Cost of Debt, 22 Rev. Acct. Stud. 608 (2017) and Alistair Lawrence, *Individual Investors and Financial Disclosure,* 56 J. Acct. & Econ. 130 (2013). *Also see* Tailored Shareholder Reports for Mutual Funds and Exchange-Traded Funds; Fee Information in Investment Company Advertisements, Investment Company Act Rel. No. 34731 (Oct. 26, 2022) [87 FR 72758 (Nov. 25, 2022)] at section IV.C.1 and IV.C.2 for a review of literature related to investor attention.

[367] Based on Form N–2 data as of Aug. 25, 2026. The estimate is based on the number of regulated funds that used the ''IncentiveFeesPercent'' Inline XBRL tag to identify a performance fee disclosed on Form N–2, Item 3 (Fee Table and Synopsis) in one or more filings beginning January 1, 2025. *See* Closed-End Fund (CEF) 2026 Taxonomy Guide, available at *https://xbrl.sec.gov/cef/2026/cef-taxonomy-guide-2026-03-16.pdf.*

[368] Basis refers to the overall methodology for calculating the performance fee. For example, the underlying metrics used to calculate the fee (*e.g.,* is the fee charged on realized gains only, unrealized gains, or some combination of those), any benchmark that is used to measure performance against, whether the calculation is based on net or gross profits, etc.

[369] *See* proposed Form N–1A Item 10.(a)(1)(ii)(B); proposed Form N–2 Item 9.1.b.(3).2. This additional information includes: the rate of the performance fee and the basis upon which it is calculated, including whether the fee is determined with reference to realized gains, unrealized gains, investment income, or any combination thereof; whether the performance fee is calculated on the fund's total investment return before or after deducting fees, commissions or expenses; the measurement period over which the performance fee is assessed; a description of any features that limit or condition the payment of a performance fee to the investment adviser, including, but not limited to, any preferred return, hurdle rate, high-water mark, loss carryforward mechanism, or any other features that limit or condition the payment of a performance fee to the adviser; and a graphical representation that illustrates the calculation of the performance fee across a range of hypothetical performance scenarios.

[370] *See supra* note 367 discussing literature on how investor understanding varies based on disclosure presentation.

[371] *See supra* section III.B.2.

[372] *See infra* section IV.

[373] *See infra* Table 7 for present value of monetized benefits and costs over 10 years.

Table 5. Aggregate Annual Monetized Cost Estimates by Source (2026 dollars)

Requirement	Total Annual Monetized Cost per Fund[a]	Number of Affected Funds	Aggregate Annual Cost Increase[b]
Rule 205-3[c]	$76,986	678	$52,196,508
Form N-1A[d]	$8,487	634	$5,380,547
Form N-2[e]	$8,487	44	$373,413
Form N-CSR[f]	$6,895	669	$4,612,755
		Total:	$62,563,223

Table notes:

[a] *See supra* notes 337 and 355 for details of the calculations. *See also infra* section IV.B.

[b] The estimate for the aggregate annual cost increase is calculated by multiplying the number of affected funds by the total annual monetized cost per fund.

[c] We estimate that advisers to 13,556 funds could potentially rely on rule 205-3. This estimate is based on the estimated number of open-end funds (12,674), closed-end funds (706), and BDCs (176). *See* Table 2. Consistent with the PRA, we assume that 5% of regulated funds would enter into investment advisory contracts that include performance fees on capital gains subject to the conditions of the proposed amendments to rule 205-3. Accordingly, for the purposes of this section, we estimate the number of funds affected by the proposed rule 205-3 to be 678 = 5% x 13,556. *See infra* PRA Table 1.

[d] We assume that the number of affected funds that would file Form N-1A to be equal to the number of open-end funds (12,674). *See* Table 2. Consistent with the PRA, we assume that 5% of regulated funds that file Form N-1A would enter into investment advisory contracts that include performance fees based on capital gains or based on other measures. Accordingly, for the purposes of this section, we estimate the number of funds affected by the proposed changes to Form N-1A to be 634 = 5% x 12,674. *See infra* PRA Table 2.

[e] We estimate the number of funds that would file Form N-2 to be 882, which is the sum of the estimated number of closed-end funds (706) and estimated number of BDCs (176). Consistent with the PRA, we assume that 5% of regulated funds that file Form N-2 would enter into investment advisory contracts that include performance fees based on capital gains or based on other measures. Accordingly, for the purposes of this section, we estimate the number of funds affected by the proposed changes to Form N-2 to be 44 = 5% x 882. *See infra* PRA Table 3.

[f] We estimate the number of funds that would file Form N-CSR to be 13,380, which is the sum of the numbers of open-end funds (12,674) and closed-end funds (706). Consistent with the PRA, we assume that 5% of regulated funds would enter into investment advisory contracts that include performance fees on capital gains subject to the conditions of the proposed amendments to rule 205-3. Accordingly, for the purposes of this section, we estimate the number of funds affected by the proposed changes to Form N-CSR to be 669 = 5% x 13,380. *See infra* PRA Table 4.

BILLING CODE 8011–01–C

b. Present Values and Annualized Values of Aggregate Monetized Benefits and Costs

Consistent with the requirements of Executive Order 12866, the Commission reports estimated total monetized benefits and costs for all affected entities in two additional ways specified in OMB Circular A–4.[374] The two presentations are intended to address the fact that the various benefits and costs of the proposed rule would not all accrue at the same point in time, and that benefits and costs realized sooner are generally more valuable than those that occur later in time.[375]

We report (1) the present values of expected benefits and costs that are monetized in our Economic Analysis, aggregated across all affected entities, over a 10-year time horizon, starting in 2026, and (2) the annualized values over the same time horizon, derived from the present values. This time horizon represents the period over which the principal benefits and costs that are monetized in the Economic Analysis are expected to accrue.[376] The present values and annualized values account for the timing of benefits and costs through discounting, which is a procedure that accounts for the time value of money.[377]

Table 6 reports the present values of the aggregate annual monetized costs from Table 5. The analysis uses annual real discount rates of three percent and seven percent over a 10-year time horizon, starting in 2026.[378] Table 6 does not show a present discounted value for benefits of the proposed rule because no benefits were monetized. In addition, we estimate that the present value of total monetized costs is about $541,622,982 using a three percent discount rate and about $454,537,408 using a seven percent discount rate.

Table 6. Present Value of Monetized Benefits and Costs over 10 years from 2026 to 2035 (2026 dollars)[a]

Estimated Effects[b]	3% Real Discount Rate	7% Real Discount Rate
Benefits	Not monetized	Not monetized
Costs	$541,622,982	$454,537,408

Table notes:

[a] This table includes only benefits and costs that are monetized. *See* Table 5. As discussed in this economic analysis, there are other benefits and costs that we are not able to monetize. *See*, *e.g.*, *supra* section III.C.4 (introduction).

[b] For each discount rate, the present value calculations are based on the following assumptions: (i) all recurring annual monetized benefits and costs begin to accrue in the first year in which affected entities rely on the proposed rule; (ii) recurring monetized benefits and costs occur in a steady stream. We use a mid-year discount rate.

Table 7 reports annualized aggregate monetized benefits and costs using real discount rates of 3 percent and 7 percent over a 10-year horizon.[379] The lump sum present values of aggregate monetized benefits and costs reported in Table 6 are converted in Table 7 into a constant stream of annualized benefits and costs over a 10-year time horizon, starting in 2026.[380] Annualized benefits and costs may differ from an aggregation of the recurring monetized annual benefits and costs discussed earlier in the Economic Analysis because they incorporate the timing of benefits and costs, through discounting, and combine one-time and recurring benefits and costs.[381] Table 7 does not provide a value for annualized total monetized benefits because no benefits were monetized for this analysis. We estimate that annualized total monetized costs are about $62,563,223 per year using a three percent discount rate and about $62,563,223 per year using a seven percent discount rate.

[374] *See* E.O. No. 12866 (Sept. 30, 1993), 58 FR 51735, 51741 (Oct. 4, 1993) (requiring agencies to provide an analysis of benefits, costs, and regulatory alternatives to OIRA for significant regulatory actions); OMB, Circular A–4, at 31–34, 45 (Sept. 17, 2003) (providing guidance to agencies regarding compliance with E.O. 12866); *see also* E.O. No. 14215 (Feb. 18, 2025), 90 FR 10447, 10448 (Feb. 24, 2025) (requiring all Federal agencies, including the Securities and Exchange Commission, to comply with E.O. No. 12866). In addition, E.O. 14192 requires agencies to provide their best approximation of the total costs or savings associated with each new regulation or repealed regulation consistent with the analyses required by E.O. 12866. *See* E.O. No. 14192 (Jan. 31, 2025), 90 FR 9065, 9066 (Feb. 6, 2025).

[375] *See* Circular A–4, at 32.

[376] *See Id.* at 31 (stating that ''[t]he ending point should be far enough in the future to encompass all the significant benefits and costs likely to result from the rule''). For the purposes of this analysis, we assume the effective date of the proposed rule, as well as the start year for the analysis's time horizon, is the present year. The analysis uses calendar years and accounts for the compliance periods included in the release (*see* note [a] in Table 5).

[377] *See id.* at 32 (''The Rationale for Discounting'') and 45 (''Treatment of Benefits and Costs over Time''); *see also* OIRA, Regulatory Impact Analysis: A Primer, at 11 (Aug. 15, 2011), *available at https://www.reginfo.gov/public/jsp/Utilities/circular-a-4_regulatory-impact-analysis-a-primer.pdf* (''To provide an accurate assessment of benefits and costs that occur at different points in time or over different time horizons, an agency should use discounting. Agencies should provide benefit and cost estimates using both 3 percent and 7 percent annual discount rates expressed as a present value as well as annualized.''); Harvey S. Rosen & Ted Gayer, Public Finance 151 (8th ed. 2008) (defining present value as ''the value today of a given amount of money to be paid or received in the future'').

[378] This approach is consistent with OMB Circular A–4. *See* Circular A–4, at 31–34 (stating that, ''[f]or regulatory analysis, [agencies] should provide estimates of net benefits using both 3 percent and 7 percent'' discount rates and discussing why those rates are reasonable default rates). Also, we use a mid-year discount rate. *See OMB,* Circular A–94, at 21–22 (Oct. 19, 1992) (stating that, ''When costs and benefits occur in a steady stream, applying mid-year discount factors is more appropriate.'').

[379] This approach is consistent with the recommended treatment of benefits and costs over time in Circular A–4. *See id.* at 45 (''You should present annualized benefits and costs using real discount rates of 3 and 7 percent'').

[380] For each discount rate, the annualized monetized benefits (costs, respectively) in Table 6 represent the constant annual stream of benefits (costs, respectively) whose present value over the time horizon equates the corresponding present value in Table 5. *See* note [a] in Table 6, for additional calculation details.

[381] The annualized benefits and costs present these values over the 10-year time horizon, starting in the present year.

Table 7. Annualized Monetized Benefits and Costs over 10 years from 2026 to 2035 (2026 dollars)[a]

Estimated Effects[b]	3% Real Discount Rate	7% Real Discount Rate
Benefits	Not monetized	Not monetized
Costs	$62,563,223	$62,563,223

Table notes:

[a] This table includes only benefits and costs that are monetized. *See* Table 5. As discussed in this economic analysis, there are other benefits and costs that we are not able to monetize. *See, e.g., supra* section III.C.4 (introduction).

[b] For each discount rate, the annualized values are calculated by dividing the corresponding present values in Table 6 by the sum of discount factors over the time horizon. The discount factor in year t of the time horizon is equal to $1/(1 + \text{discount rate})^{(t-0.5)}$. The annualized costs are identical under both the 3 percent and 7 percent discount rates, which is mathematically expected because all costs are recurring annual costs and there are no one-time initial costs.

D. Effects on Efficiency, Competition, and Capital Formation

1. Efficiency

The proposed amendments could better align investors' portfolios with their preferences and improve allocative efficiency. To the extent that the proposed amendments to rule 205–3 incentivize advisers to offer regulated funds with strategies that cannot be currently accessed by less affluent investors and to the extent that these strategies offer risk-return combinations not otherwise replicable through existing investment options, investors in these funds may be better able to construct portfolios that improve expected investment return given their individual risk tolerances. The amendments to rule 205–3 may also improve allocative efficiency to the extent that adviser talent and the investment strategies offered by advisers can be better matched with an appropriate fund structure and investors.

The proposed amendments expanding the qualified client definition to include accredited investors could similarly increase the set of strategies available to accredited investors by providing further incentive for advisers to 3(c)(1) private funds to admit these investors.[382] In particular, these changes could allow investors to better achieve exposures to certain return-enhancing factors that are more readily available through private fund strategies. For instance, investors with longer investment horizons and greater willingness to tolerate illiquidity, who currently may have limited access to vehicles that harvest any such premium, could have more options to construct portfolios that potentially benefit from it.

These efficiency gains may be offset, however, to the extent that performance fees on unrealized gains distort the allocation of capital across assets. As discussed in section III.B.3.a, permitting performance fees on unrealized gains may create an incentive for advisers to favor assets whose recorded value can be increased without a corresponding change in fundamental value (*e.g.,* acquiring assets in the secondary market and marking them up to net asset value under the practical expedient) because the resulting mark-to-market gains may trigger a performance fee. To the extent advisers allocate capital on the basis of an asset's capacity to generate such recorded gains rather than its expected risk-adjusted return, the proposed amendments could reduce allocative efficiency. In addition, valuations of funds holding less liquid assets that are inherently difficult to value may cause investors to over- or under-allocate to those funds, further reducing any efficiency gains from the proposed amendments. The proposed conditions for the fund board channel (including the cap on performance fees, the fund governance standards, and the board's valuation-related findings) are designed to mitigate these effects, though the degree to which they would do so in practice is uncertain.

Additionally, the proposed amendments to Forms N–1A and N–2 requiring more detailed disclosure of performance fees may allow investors to more efficiently evaluate performance fee information when considering investments in regulated funds. As such, these disclosures could facilitate more efficient matching between investors and advisers that both prefer compensation structures more closely aligned with fund performance, which could contribute to the allocative efficiency gains discussed above. As these disclosures would apply to all forms of performance-based advisory compensation in regulated funds, including compensation not directly affected by the proposed amendments to rule 205–3, they may better enable a market consensus regarding appropriate forms of compensation across different strategies, investment vehicles, and investor characteristics. For instance, if investors in certain strategies would tend to prefer symmetric performance fees, the disclosures would better enable these investors to select funds accordingly, which in turn would provide a signal to fund sponsors offering funds with those strategies. Alternatively, if advisers to funds in certain strategies require higher management fees to offset the downside risk inherent in symmetric performance fees, the proposed disclosures would make such information more readily available to investors.

2. Competition

The proposed amendments may affect competition in various ways. First, the proposed amendments may affect competition among investment advisers. To the extent that performance fees may attract new advisers to the regulated fund space, competition may increase among advisers in that space. In particular, advisers to registered funds may face incentives to compete on fees, offering quality, or other dimensions. To the extent that these funds face agency problems (such as misaligned incentives

[382] *See supra* section III.C.1.c.

between fund advisers and investors),[383] increased competition could incentivize fund boards to implement measures to address them. However, differences in economies of scale and other structural differences between smaller and larger investment advisers may produce asymmetric effects from the proposed amendments, which in turn could affect the competitive balance between them. Larger fund advisers, which generally benefit from economies of scale, may more readily promote and launch new funds and attract investor capital relative to smaller fund advisers. As a result, smaller advisers may be less able to compete in providing individual investors with exposure to private fund strategies, which may in turn weaken their overall competitive position.

Relatedly, the advisers best positioned to bring capital-gains-oriented and other private market strategies into the regulated fund space may be established alternative asset managers with existing private fund track records in those strategies. To the extent such managers expand into the regulated fund space more readily than smaller or traditional asset managers, the proposed amendments could contribute over the longer term to greater concentration among regulated fund advisers, which would partially offset the competitive benefits described above. The magnitude of this effect is uncertain and would depend on the degree to which smaller advisers are able to develop competitive private market offerings in the regulated fund space.

Second, competition among regulated funds offering different private market strategies may increase. In particular, returns in private equity strategies frequently take the form of capital gains. Because the current regulatory framework prohibits asymmetric performance fees on capital gains except under certain circumstances, including fees paid by qualified clients, advisers cannot enter into performance-based compensation agreements with funds pursuing a private equity strategy without restricting their investor base to more affluent clients.[384] By contrast, the current regulatory framework does not prohibit advisers from charging performance fees based on income, which more commonly comprises fund returns in private credit strategies. This gives regulated funds offering private credit exposure a competitive advantage relative to regulated funds offering private equity exposure to investors. The proposed amendments would increase competitive parity between these private market strategies offered in the regulated fund space. As a result, the number of new closed-end funds offering private equity strategies may increase. This may in turn promote fee competition among funds offering private market strategies, which could benefit fund investors by improving after-fee risk-adjusted returns.

Third, competition may increase between regulated funds and private funds offering similar strategies. By permitting advisers to regulated funds to charge performance fees on capital gains to a broad investor base, the proposed amendments could allow regulated funds to offer certain capital-appreciation strategies (*e.g.,* private equity strategies) and other strategies that have in practice been available primarily through private funds. To the extent regulated funds can offer these strategies with the additional investor protections, transparency, and liquidity associated with the Investment Company Act framework, they may compete with private funds for investor capital, which could benefit investors by expanding the range of vehicles through which comparable strategies are available. Conversely, private fund advisers in strategy categories that have not previously faced a regulated fund competitor may experience increased competitive pressure. The direction and magnitude of these effects would depend on the extent to which regulated fund structures can replicate the return characteristics of private fund strategies, which are limited by the liquidity and leverage constraints discussed in section III.B.3.d.

Fourth, competition between BDCs and closed-end funds may increase as a result of the proposed amendments. BDCs have a broad statutory exception to the prohibition on charging performance fees on capital gains, while closed-end funds charging these fees generally must restrict their investor base to qualified clients. As a result, advisers currently have a greater incentive to pursue certain private market strategies in BDCs rather than in closed-end funds. The proposed amendments may thus make closed-end funds more competitive with BDCs.

Fifth, the proposed amendments to Forms N–1A and N–2 could promote competition with respect to fund adviser compensation. The amendments to the fee tables may make it easier for investors to determine the sources of a regulated fund's overall expenses.[385] In particular, for funds that pay performance-based compensation, the amended tables may make clearer the portion of total fund expenses that derives from fund over- or under-performance, as applicable. In doing so, the proposed table may better allow fund investors to assess the cost of investing in the fund in light of its recent performance, and similarly may better enable investors to project fund expenses in potential performance scenarios. By making this information available in the fee tables of registered open- and closed-end funds in their Form N–1A and N–2 filings, respectively, and in the Form N–2 filings of BDCs, the proposed amendments would require regulated funds to provide investors with information that may help promote competition among funds in terms of both advisory fee levels and structure.

Sixth, competition between regulated funds and other investment vehicles available to investors through retail channels (such as collective investment trusts (CITs) within the 401(k) space) may be affected. To the extent that CITs currently offer private market strategies that newly created regulated funds would also offer, regulated funds may become more competitive within the retirement space for investors who value the additional protection that regulated funds provide. On the other hand, to the extent that regulated funds would become relatively more expensive compared to CITs as a result of this proposal, such funds may become less competitive with CITs.[386]

3. Capital Formation

The proposed amendments would promote capital formation to the extent that increased investor access to private fund strategies, including those investing in private markets, results in new investor capital channeled to operating companies. This effect may occur through two related channels: the demand side, as more investors could gain access to regulated and private funds pursuing private market strategies, and the supply side, as advisers could become more willing to offer certain strategies in the regulated fund space.

[383] *See supra* section III.B.3.

[384] *See supra* section III.B.1.

[385] *See* proposed Form N–1A Item 3 Instruction 3.(b) and proposed Form N–2 Item 3 Instruction 7.c.

[386] For example, recent academic studies document a shift from mutual funds to CITs in the 401(k) space and suggest that CITs are adopted due to lower fees. *See e.g.,* Jiaxing Tian, and Jiahong Shi, *Why Mutual Funds Decline in 401(k)s* (September 18, 2024), *available at https://ssrn.com/abstract=4960502* (retrieved from SSRN Elsevier database); *also see e.g.,* Alexey Vasilenko, Veronika Krepely Pool, Nicolas P.B. Bollen, and Irina Stefanescu, *Asset Reclassification and Mutual Fund Flows* (June 18, 2026), *available at https://ssrn.com/abstract=6963739* (retrieved from SSRN Elsevier database).

On the demand side, some inflows to private markets that could result from the proposed amendments would be redirected from existing investment options and thus would have a neutral effect on aggregate capital formation. To the extent, however, that the availability of previously inaccessible investment options increases the risk-adjusted returns of investors' portfolios, investors may increase their total investments, channeling additional capital to both private and public companies.[387] The net effect on aggregate capital formation would depend on the degree to which investors substitute between public and private investment vehicles rather than expand their overall investment.

On the supply side, the proposed amendments may expand the set of strategies offered in regulated funds, particularly for capacity-constrained strategies in which advisers limit fund size to preserve expected performance. For such strategies with reduced scale, asset-based fees may not adequately compensate the adviser, creating an incentive to deploy the strategy outside the regulated fund space or not at all in a regulated vehicle. By permitting asymmetric performance fees on capital gains, the proposed amendments would allow advisers to be compensated in proportion to returns generated, which may reduce this disincentive. To the extent this results in regulated vehicles that raise capital that would not otherwise have been raised in the regulated fund space (rather than capital redirected from private funds or other existing options), the effect would contribute to capital formation beyond what the demand-side channel alone would produce. The magnitude of this supply-side effect would depend on the number of advisers pursuing capacity-constrained strategies that would find a regulated fund structure attractive under the proposed framework, which we are unable to estimate.

In addition, capital formation effects from the proposed amendments would depend on whether investor access is constrained via channels unrelated to the prohibition on performance fees on capital gains, such as high investment minimums that less affluent accredited investors could not meet, or continued limited access to distribution channels for offerings of vehicles with more complex strategies. To the extent that these other channels would constrain investors' ability to access new strategies, the effects on capital formation may be reduced.

E. Reasonable Alternatives Considered

1. Performance Fees Only on Realized Capital Gains

As an alternative, we could have proposed an exemption from the section 205(a)(1) prohibition for performance fees only on realized gains instead of an exemption for performance fees on both realized and unrealized gains. Under this alternative, regulated fund investors would be less prone to the risk of overpaying performance fees because NAVs of funds with equity strategies are primarily based on unrealized gains, which could be reversed in the future.

Charging performance fees only on realized gains may also reduce an incentive for fund managers to overstate values of underlying portfolio investments and an incentive to allocate disproportionately large amounts of investor capital to assets whose value can show instant gains if the value is recorded at NAV, but the asset is purchased at a discount.[388] The alternative of a blanket prohibition on basing performance fees on unrealized gains would closely align with the current regulatory environment for BDCs.

In addition, allowing performance fees on unrealized gains in the private fund context but not in advisory contracts with regulated funds could be an approach that is more tailored to the level of the above risks in different vehicles. For example, as discussed in section III.B.3.b, regulated funds cannot implement mechanisms that would account for the individual experience of a fund investor, and investors of regulated funds would pay performance fees indirectly through NAV reductions (which are the same across fund investors regardless of subscription or redemption time), in contrast to private funds. For certain private funds, such as private equity funds, performance fees are typically subject to clawback provisions, which reduce the relevance of the valuation concerns related to unrealized gains. However, open-end fund shares are redeemable daily, and clawback provisions may be difficult to implement in that context. Therefore, the risks associated with including unrealized gains as a base for performance fees are increased for open-end funds with portfolio holdings that do not have widely available prices, such as less liquid assets that are challenging to value.

However, permitting performance fees only on realized gains may result in several issues. First, a performance fee on realized gains only would compensate the adviser on a basis that does not correspond to the economic experience of investors who transact at NAV, which reflects unrealized appreciation and depreciation on a mark-to-market basis for many strategies, potentially misaligning adviser compensation with the returns that investors actually realize. Second, this alternative could create incentives for advisers to prematurely dispose of portfolio positions in order to trigger a performance fee, reducing risk-adjusted returns of investors who could benefit from continued appreciation in these positions. Third, this alternative may disadvantage advisers to regulated funds pursuing equity strategies (where investor returns are generated primarily through unrealized capital appreciation rather than through frequent realization of capital gains) relative to advisers pursuing income-based strategies (where gains occur regularly through interest and dividend payments). Permitting performance fees on unrealized gains would address this structural disadvantage and may expand the range and quality of strategies available to regulated fund investors.

2. Performance Fee on Capital Gains for Contracts With a Subset of Regulated Funds

As alternative approaches, we could have limited the proposed amendments to closed-end funds only or to the fund board channel only for closed-end funds. For example, investors in closed-end funds may face a lower risk of overpaying performance fees on capital gains relative to investors in open-end funds. As discussed in section III.B.3.b, because the final performance fee cannot be determined until the end of the performance measurement period, regulated funds must estimate the amount of accrued performance fees at each NAV calculation.[389] Because open-end funds are required to calculate NAV daily, they need to estimate accrued performance fees at each daily calculation, which increases the frequency a fund must estimate accrued fees. In contrast, because closed-end fund investors do not transact at daily prices and NAV calculations for repurchases can be better aligned with the performance measurement period, accrued performance fee estimates reflected in the closed-end fund's NAV are more aligned with the actual performance of the fund. Therefore, an

[387] As hedge funds, which are privately offered, generally invest primarily in public securities, any investor capital net of fees that would be allocated to hedge funds from public vehicles would not decrease the total capital available to public companies.

[388] *See supra* section III.C.1.a.

[389] *See supra* sections III.B.3.b and III.C.1.a.

alternative to restrict the proposed amendments to rule 205–3 to closed-end funds only could reduce investors' exposure to the frequency of estimating accrued performance fees. In addition, to the extent that the costs of estimating accrued performance fees are passed on to investors, investors would experience lower costs under this alternative.

Similarly, an alternative of further restricting the proposed amendments to rule 205–3 to the fund board channel only for closed-end funds could provide a more uniform set of investor protections to regulated fund investors, relative to an approach that also permits a regulated fund to enter into advisory contracts featuring performance fees on capital gains through the accredited investor channel. Under this alternative, all regulated funds paying performance fees on capital gains would be subject to the proposed governance conditions, thereby applying these investor protection conditions to all regulated fund investors, including accredited investors.

However, with respect to restricting performance fees on capital gains to closed-end funds only, the proposed board requirements, including the best interest finding, are designed specifically to address the risks associated with performance fees on capital gains in regulated funds, including the estimation and overpayment risks described above. To the extent that fund boards of open-end funds would not approve advisory contracts with performance fees on capital gains where these risks are not adequately mitigated, the proposed conditions would operate as a functional restriction without the need for a categorical restriction to closed-end funds only. Similarly, for open-end regulated funds that would implement performance fees through the accredited investor channel, the requirement that each equity owner be an accredited investor would restrict access to investors who are already recognized as having a degree of financial sophistication sufficient to evaluate the risks of performance fee arrangements, providing an analogous investor protection through investor eligibility rather than board oversight. Therefore, such a categorical restriction would not create additional benefits to investors while it would introduce additional regulatory complexity for fund advisers. Similarly, to the extent that advisers to regulated funds would prefer the fund board channel because it may be more feasible for implementing performance fees on capital gains given the potential operational and distribution constraints,[390] a categorical restriction to the fund board channel only may not add meaningful investor protections beyond what the proposed conditions already aim to provide. In particular, mandating the fund board channel for all regulated funds, including those that primarily serve accredited investors, would impose the costs and operational complexity of the board governance conditions on funds and advisers for whom the accredited investor channel is operationally better suited, without a corresponding investor protection benefit for accredited investors who are already subject to a separate eligibility standard designed to protect their interests.

3. Additional Conditions for the Fund Board Channel

As an alternative, we could have proposed additional conditions for regulated fund boards choosing adviser contracts with performance fees on capital gains, such as requiring a regular approval of the advisory contract by shareholder vote (*e.g.,* annually) or requiring an evaluation of the performance fee arrangement by an independent consultant. These alternatives could provide additional safeguards, such as an unbiased assessment of the arrangement, benefitting regulated fund investors. However, such approaches may be challenging in practice because of their related costs.

4. Disclosure Alternatives

a. Performance Fee Disclosures

As an alternative to the proposed management discussion amendments, we could have proposed a structured disclosure for various performance fee arrangement components, either in registration forms or funds' ongoing disclosures, such as Form N–CEN or other forms. For example, we could have proposed Inline XBRL disclosure for: (i) whether the fund has a performance compensation arrangement (Yes or No); (ii) if yes, the basis of performance compensation (income, realized capital gains, unrealized capital gains, or a combination thereof); (iii) the frequency of payment or accrual, or measurement period; (iv) whether a hurdle rate applies; (v) the percentage of profit subject to the performance fee; (vi) whether a catch-up provision applies; (vii) the dollar or percentage amount of fee paid; and (viii) any other material structural features of the performance fee arrangement. For example, some funds already use custom XBRL tags to report certain components of their performance fee arrangements, such as hurdle rates.

Under this alternative, performance fee information would be easily accessible to investors and information intermediaries in a standardized, machine-readable format. Structured XBRL disclosure would enable systematic comparison of performance fee arrangements across funds, reduce investor search costs, and facilitate Commission staff examination and analysis. This approach would also complement the proposed fee table disclosure by providing granular, field-level data that the fee table's line-item format cannot capture.

However, structured XBRL disclosure of individual performance fee components would impose significant initial implementation burdens on regulated funds and their service providers, requiring the application of new elements from updated data taxonomies and adjustment of tagging infrastructure. More importantly, the nuanced and varied nature of performance fee arrangements (including the interaction among hurdle rates, high-water marks, measurement periods, and fee calculation bases) may not be adequately captured in a binary or categorical structured format. The proposed management discussion requirements, which require a narrative description and graphical representation of the performance fee arrangement, may be better suited to conveying the complexity and variability of these arrangements, which could be difficult to compare to one another.

b. Other Disclosures

As an alternative, we could have proposed to require regulated funds to disclose whether they have minimum investment requirements and the amount of any such minimum, which could be consistent with the goals of the proposed structured disclosure of performance fees—although investment minimums are already disclosed in prospectuses and statements of additional information (similarly to performance fees), they are not disclosed in a structured format that is readily aggregable or comparable across funds. This alternative may complement investor analysis of performance fee arrangements because it could allow investors to consider performance fees in conjunction with practical barriers to accessing regulated funds paying performance fees, reducing investors' search costs when it comes to choosing funds that offer alternative strategies. This is because even if an investor meets the proposed qualified client

[390] *See supra* section III.B.3.c.

threshold and would therefore be eligible to invest in a fund that pays performance fees on capital gains, investment minimums may represent a comparable practical barrier to access.

Investment minimums are currently reported for private funds on Form ADV in a structured, machine-readable format, aiding in systematic analysis of practical access barriers for investors across the private fund universe. However, regulated funds do not have such a requirement, and investment minimum requirements are presented in a non-structured format in prospectuses and statements of additional information, which are not readily aggregable. Currently, data on investment minimums is inconsistently available across regulated funds. For example, third-party aggregators (*e.g.,* Morningstar) provide data points related to investment minimums for regulated funds. In addition, recent research has analyzed these data for a subset of regulated funds.[391]

Nonetheless, the primary objective of the proposed amendments related to disclosure is to improve disclosure of performance fee arrangements. Requiring disclosure of investment minimums for regulated funds, while potentially useful to investors, could entail implementation costs for regulated funds that could be passed on to investors.

F. General Request for Comment

We request comment on all aspects of the economic analysis of the proposed amendments. To the extent possible, we request that commenters provide supporting data and analysis with respect to the benefits, costs, and effects on competition, efficiency, and capital formation of adopting the proposed amendments or any reasonable alternatives. In particular, we ask commenters to consider the following questions:

1. What additional qualitative or quantitative information should be considered as part of the baseline for the economic analysis of these amendments?

2. Are the benefits and costs of the proposed amendments accurately characterized? If not, why not? Should any of the costs or benefits be modified? What, if any, other costs or benefits should be taken into account? If possible, please offer ways of estimating these benefits and costs. What additional considerations can be used to estimate the benefits and costs of the proposed amendments?

3. Are the benefits and costs of the proposed amendments to the qualified client definition accurately characterized? If not, why not? What, if any, other costs or benefits should be taken into account? If possible, please offer ways of estimating these benefits and costs.

4. Are the effects on competition, efficiency, and capital formation arising from the proposed amendments accurately characterized? If not, why not?

5. Are the economic effects of the above alternatives accurately characterized? If not, why not? Should any of the costs or benefits be modified? What, if any, other costs or benefits should be taken into account?

6. Are the economic effects of the alternative approaches to disclosure adequately characterized? If not, why not? Should any of the costs or benefits be modified? What, if any, other costs or benefits should be taken into account?

7. Are there other reasonable alternatives to the proposed amendments that should be considered? What are the costs, benefits, and effects on competition, efficiency, and capital formation of any other alternatives?

8. What effects would the proposed changes have on (1) investment options available to investors if certain asset classes are not available or are less available in open-end vehicles; and (2) the markets for those underlying assets, including, but not limited to, private markets?

9. How likely is it that open-end fund managers will choose to offer new strategies as a result of the proposed amendments? Relatedly, how likely is it that investors will move assets from private funds to regulated funds in response to the proposed amendments?

10. How likely is it that existing regulated funds would implement performance fees on capital gains? What would be the costs of doing so? What would be the benefits? Are certain fund types more likely to implement performance fees on capital gains?

11. How likely are regulated funds to implement performance fees on capital gains via the fund board channel? Would this channel be less or more costly compared to the accredited investor channel?

12. How many regulated funds would implement performance fees on capital gains via each channel?

13. Are there data sources or data sets that can help refine the estimates of the benefits and costs associated with the proposed amendments? If so, please identify them.

14. Are there data sources that can help us estimate the aggregate number of affected investors with more accuracy? If so, please identify them.

15. Which third-party service providers would be affected the most by the proposed amendments? Please explain why. If possible, please provide data on the number and size of such entities.

16. What would be the costs to advisers of reclassifying their high net worth clients on Form ADV as a result of the proposed change to the qualified client definition? Are there ways to reduce those costs while still achieving the goals of the proposal?

17. Are there costs or benefits associated with the proposed conforming amendments to rule 203A–3 and rule 204–3 that we have not identified or adequately considered?

IV. Paperwork Reduction Act Analysis

A. Summary of the Collections of Information

Certain provisions of the proposed amendments contain ''collection of information'' requirements within the meaning of the Paperwork Reduction Act of 1995 (''PRA'').[392] We are submitting the proposed collections of information to the Office of Management and Budget (''OMB'') for review in accordance with the PRA.[393] The hours and costs associated with preparing and filing the forms and responses required under the applicable rules constitute paperwork burdens imposed by each collection of information. An agency may not conduct or sponsor, and a person is not required to comply with, a collection of information unless it displays a currently valid OMB control number. Compliance with the information collections is mandatory or mandatory to receive benefits. Responses are not kept confidential.

The proposed amendments to rule 205–3 under the Advisers Act would result in a new collection of information requirement under the PRA, as follows:

- ''Rule 205–3 under the Investment Advisers Act of 1940—Exemption from the compensation prohibition of section 205(a)(1) for investment advisers.'' OMB has not yet assigned control numbers for this title.

The titles for the existing collections of information are:

- ''Form N–1A under the Investment Company Act of 1940 and the Securities Act of 1933, Registration Statement of Open-End Management Investment

[391] *See, e.g.,* ICI Research Perspective, The Closed-End Fund Market, 2025, *available at https://www.ici.org/system/files/2026-04/per-32-03.pdf* (last accessed Jul. 8, 2026).

[392] 44 U.S.C. 3501 through 3521.

[393] 44 U.S.C. 3507(d) and 5 CFR 1320.11.

Companies'' (OMB Control No. 3235–0307);

• ''Form N–2 under the Investment Company Act of 1940 and the Securities Act of 1933, Registration Statement of Closed-End Management Companies'' (OMB Control No. 3235–0026); and

• ''Form N–CSR under the Securities Exchange Act of 1934 and under the Investment Company Act of 1940, Certified Shareholder Report of Registered Management Investment Companies'' (OMB Control No. 3235–0570).

The forms and rules listed above were adopted under the Securities Act, the Exchange Act, the Investment Company Act, and/or the Advisers Act. A description of the proposed amendments, including the need for the information and its proposed use, as well as a description of the likely respondents and a discussion of the potential economic effects of the proposed amendments can be found in sections II and III above.

B. Summary of the Proposed Amendments' Estimated Effects on the Collections of Information

We estimate below the changes in paperwork burden as a result of the proposed amendments. These estimates represent the average burden for all respondents, both large and small. In deriving our estimates, we recognize that the burdens will likely vary among individual respondents based on a number of factors, including the number of investment advisers and regulated funds electing to rely on the proposed exemption permitting investment advisers to include performance fees in investment advisory agreements with regulated funds, the number of regulated funds that pay any performance fees to their investment adviser, as well as the size and complexity of their business. These estimates include the time and the cost of preparing and reviewing disclosure and filing documents. We believe that some respondents would experience costs in excess of this average and some respondents would experience less than the average costs. Our methodologies for deriving these estimates are discussed below. For purposes of this PRA analysis, the burden is generally allocated between burden hours and costs. The cost burden generally reflects the portion of the burden carried by outside professionals, while the burden hours generally reflect the portion of the burden carried by the issuer internally.

Rule 205–3 PRA Estimates

As of December 31, 2025, there were approximately 13,556 regulated funds. We estimate that 5 percent of regulated funds would enter into an investment advisory contract with an investment adviser that includes a performance-based compensation arrangement subject to the conditions of the proposed amendments to rule 205–3. As a result, 678 regulated funds and their investment advisers would be subject to the proposed determination amendments to rule 205–3 under the Advisers Act. The proposed amendments to rule 205–3 would require one response per year. The table below summarizes our PRA annual burden estimates associated with the amendments to rule 205–3.

BILLING CODE 8011–01–P

PRA Table 1. Estimated Paperwork Burden Effects of the Proposed Amendments to Rule 205-3

Annual Hours[1]	Total Monetized Burden Hours[2]	Total Annual Cost Burden[3]
4,068 hours	$49,572,648	$2,623,860

Notes

[1] We estimate that there would be an average burden of 6 hours per response spent by the regulated funds' board of directors in connection with the proposed amendments to rule 205-3 (6 hours x 678 funds = 4,068 hours)

[2] The total monetized burden hours are based on the total annual hours estimate times a $12,186 wage rate for a regulated funds' board of directors (4,068 hours x $12,186 = $49,572,648). To estimate the $12,186 hourly rate for a fund board of directors, Commission staff used an occupational hourly rate of $1,354 f for Chief Executives to estimate the hourly rate for a single director and assumed an average of 9 directors per board.

[3] The total annual cost burden is the cost of goods and services purchased in connection with PRA-related burdens related to the proposed amendments to rule 205-3, such as for the services of independent auditors and outside counsel. The cost burden estimate is based upon the estimated wage rate of $774/hour for an attorney in the securities industry multiplied by 5 hours of work (5 hours x $774 wage rate = $3,870 per fund). 678 regulated funds x $3,870 = $2,623,860.

To calculate the occupational hourly rates used in this release, the Commission uses the May 2025 occupational mean hourly wage data from the Occupational Employment and Wage Statistics (OEWS) program of the Bureau of Labor Statistics (BLS) for "Securities, Commodity Contracts, and Other Financial Investments and Related Activities" (NAICS 523). *See* Occupational Employment and Wage Statistics, U.S. Bureau of Labor Statistics, https://www.bls.gov/oes/; *see also* Standard Occupational Classification, U.S. Bureau of Labor Statistics, https://bls.gov/soc/ (describing occupational classification system used by BLS); Exec. Off. of the President, Off. of Mgmt. & Budget, North American Industry Classification System (2022), *available at* https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf (describing the industry classification system used by BLS and other agencies). The mean hourly wage for each occupation is multiplied by an employment cost index (ECI) factor of 1.0227, calculated as one plus the percentage change in the seasonally adjusted ECI for wages and salaries of private industry workers from the second quarter of 2025 (ECI=173.563), which contains the May 2025 OEWS reference period, to the first quarter of 2026 (ECI=177.498), which is the date of the most recently available ECI observations when the occupational hourly rates used in this release were calculated. *See* Employment Cost Index, U.S. Bureau of Labor Statistics, Seasonal Data 2001-Present, available at https://www.bls.gov/eci/tables.htm. The adjusted mean hourly wage is then multiplied by a nonwage cost adjustment factor of 5.734, which accounts for nonwage costs borne by employers, such as bonuses, benefits, and overhead. This factor is calculated as the average, over 2016-2025, of the ratio of the Bureau of Economic Analysis's gross output for NAICS 523 to total annual wages across all occupations for NAICS 523 in the OEWS data. *See* Gross Output by Industry, U.S. Bureau of Economic Analysis, https://www.bea.gov/data/industries/gross-output-by-industry; Occupational Employment and Wage Statistics, U.S. Bureau of Labor Statistics, https://www.bls.gov/oes/. For example, the $774 occupational hourly rate for lawyers is calculated as $131.91 x 1.0227 x 5.734, or approximately $774 (where $131.91 is the May 2025 mean hourly wage for lawyers in NAICS 523). The final product is the occupational hourly rate. *See generally* Updated Methodology for Calculating Occupational Hourly Rates (Dec. 19, 2025), *available at* https://www.sec.gov/files/method-occupational-hourly-rates.pdf.

BILLING CODE 8011–01–C

1. Form N–1A PRA Estimates

As of December 31, 2025, there were approximately 12,674 regulated funds that file Form N–1A. We estimate that 5 percent of these regulated funds would enter into an investment advisory contract with an investment adviser that includes a performance-based compensation arrangement based on capital gains or based on other measures. As a result, we estimate that 634 regulated funds will be subject to the enhanced disclosure regarding performance-based compensation paid to the investment adviser on Form N–1A. The table below summarizes our PRA annual burden estimates associated with the amendments to Form N–1A.

PRA Table 2. Estimated Paperwork Burden Effects of the Proposed Amendments to Form N-1A

Annual Hours[1]	Total Monetized Burden Hours[2]	Total Annual Cost Burden[3]
6,340 hours	$2,929,080	$2,453,580

Notes

[1] We estimate that the amendments would increase the annual hour burden for Form N-1A by 10 hours per fund or 6,340 hours in aggregate (10 hours x 634 funds = 6,340 hours).

[2] The total monetized burden hours are based on the total annual hours estimate times a $462 blended wage rate (6,340 hours x $462 = $2,929,080). The $462 wage rate reflects current estimates of the blended hourly rate for an accountant and auditor ($330), paralegal and legal assistant ($281), and attorney ($774) in the securities industry (($330 + $281 + $774)/3 = $462).

[3] The total annual cost burden is the cost of goods and services purchased to prepare and amend registration statements on Form N-1A in connection with the proposed amendments, such as for the services of independent auditors and outside counsel. The cost burden estimate is based upon the estimated wage rate of $774/hour for an attorney in the securities industry multiplied by 5 hours of work (5 hours x $774 wage rate = $3,870 per fund). 634 regulated funds x $3,870 = $2,453,580.

2. Form N–2 PRA Estimates

As of December 31, 2025, there were approximately 882 regulated funds that file Form N–2. We estimate that 5 percent of these funds would enter into an investment advisory contract with an investment adviser that includes a performance-based compensation arrangement based on capital gains or based on other measures. As a result, we estimate that 44 regulated funds will be subject to the enhanced disclosure regarding performance-based compensation paid to the investment adviser on Form N–2. The table below summarizes our PRA annual burden estimates associated with the amendments to Form N–2.

PRA Table 3. Estimated Paperwork Burden Effects of the Proposed Amendments to Form N-2

Annual Hours[1]	Total Monetized Burden Hours[2]	Total Annual Cost Burden[3]
440 hours	$203,280	$170,280

Notes

[1] We estimate that the amendments would increase the annual hour burden for Form N-2 by 10 hours per fund or 440 hours in aggregate (10 hours x 44 funds = 440 hours).

[2] The total monetized burden hours are based on the total annual hours estimate times a $462 blended wage rate (440 hours x $462 = $203,280). The $462 wage rate reflects current estimates of the blended hourly rate for an accountant and auditor ($330), paralegal and legal assistant ($281), and attorney ($774) in the securities industry (($330 + $281 + $774)/3 = $462).

[3] The total annual cost burden is the cost of goods and services purchased to prepare and amend registration statements on Form N-2 in connection with the proposed amendments, such as for the services of independent auditors and outside counsel. The cost burden estimate is based upon the estimated wage rate of $774/hour for an attorney in the securities industry multiplied by 5 hours of work (5 hours x $774 wage rate = $3,870 per fund). 44 regulated funds x $3,870 = $170,280.

3. Form N–CSR PRA Estimates

We estimate that 669 regulated funds would be subject to the particularized disclosure requirements regarding the approval of performance fees based on capital gains in or capital appreciation of a regulated fund whose investment adviser charges the regulated fund a performance fee pursuant to the conditions of proposed rule 205–3(c)(1)(iv). This estimate is based on the number of regulated funds (except for BDCs, which do not file Form N–CSR) that would pay its investment adviser a performance fee based on capital gains or capital appreciation of the regulated fund pursuant to the conditions of proposed rule 205–3(c)(1)(iv).[394] The table below summarizes our PRA annual burden estimates associated with the amendments to Form N–CSR.

PRA Table 4. Estimated Paperwork Burden Effects of the Proposed Amendments to Form N-CSR

Annual Hours[1]	Total Monetized Burden Hours[2]	Total Annual Cost Burden[3]
3,345 hours	$2,023,725	$2,589,030

Notes

[1] We estimate that the amendments would increase the annual hour burden for Form N-CSR by 5 hours per fund and 3,345 hours in aggregate (5 hours x 669 funds = 3,345 hours).

[2] The total monetized burden hours are based on the total annual hours estimate times a $605 blended wage rate (3,345 hours x $605 = $2,023,725). The $605 wage rate reflects current estimates of the blended hourly rate for a computer programmer ($436) and an attorney ($774) in the securities industry (($436 + $774)/2 = $605).

[3] The total annual cost burden is the cost of goods and services purchased to prepare and amend registration statements on Form N-CSR in connection with the proposed amendments, such as for the services of independent auditors and outside counsel. The cost burden estimate is based upon the estimated wage rate of $774/hour for an attorney in the securities industry multiplied by 5 hours of work (5 hours x $774 wage rate = $3,870 per fund). 669 regulated funds x $3,870 = $2,589,030.

[394] 5 percent of 13,376 funds = 669 funds.

C. Changes in Paperwork Burdens Under the Proposed Amendments

The following PRA Table 5 summarizes the current and requested paperwork burdens and calculates the changes to affected information collections' estimated responses and total burdens under the proposed amendments.

PRA Table 5. Changes in Paperwork Burdens under the Proposed Amendments

	Current Burden (from OMB inventory)			Program Change			Revised Burden (from PRA Table 2)		
Form/Rule	Current Annual Responses	Current Burden Hours	Current Cost Burden	Estimated Increase or (Decrease) in Number of Annual Responses	Estimated Increase or (Decrease) in Burden Hours	Estimated Increase or (Decrease) in Cost Burden	Estimated Annual Responses[1]	Estimated Burden Hours	Estimated Cost Burden
Rule 205-3	0	0	$0	678	4,068	$2,623,860	678	4,068	$2,623,860
Form N-1A	6,002	1,787,043	$143,540,098	0	6,340	$2,453,580	6,002	1,793,383	$145,993,678
Form N-2	298	102,525	$6,940,207	129	440	$170,280	427	102,965	$7,110,487
Form N-CSR	29,308	228,037	$6,129,524	0	3,345	$2,589,030	29,308	231,382	$8,718,554

Notes:

1 The estimated number of annual responses is largely calculated based upon the number of responses currently reflected in the OMB inventory as modified by the change in responses per the proposed amendments, other than for rule 205-3, for which there are no responses currently reflected in the OMB inventory and for Form N-2, which reflects the three-year average of total Form N-2 filings made for the last three years.

D. Request for Comments

Pursuant to 44 U.S.C. 3506(c)(2)(B), we request comment in order to:

- Evaluate whether the proposed changes to the collections of information are necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility;
- Evaluate the accuracy of our estimates of the changes in burden hours and cost burden that would result from adoption of the proposed amendments;
- Determine whether there are ways to enhance the quality, utility, and clarity of the information to be collected;
- Evaluate whether there are ways to minimize the burden of the collections of information on those who respond, including through the use of automated collection techniques or other forms of information technology; and
- Evaluate whether the proposed amendments would have any effects on any other collection of information not previously identified in this section.

Any member of the public may direct to us any comments concerning the accuracy of these burden estimates and any suggestions for reducing these burdens. Persons submitting comments on the collection of information requirements should direct their comments to the OMB Desk Officer for the Securities and Exchange Commission, *MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov,* and should send a copy to Vanessa A. Countryman, Secretary, Securities and Exchange Commission, using any of the methods in the **ADDRESSES** section, with reference to File No. 2026–28. Requests for materials submitted to OMB by the Commission with regard to these collections of information should be in writing, refer to File No. 2026–28, and be submitted to the Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736. OMB is required to make a decision concerning the collections of information between 30 and 60 days after publication of this release. Consequently, a comment to OMB is best assured of having its full effect if OMB receives it within 30 days after publication.

V. Initial Regulatory Flexibility Analysis

The Commission has prepared the following Initial Regulatory Flexibility Analysis (''IRFA'') in accordance with section 3(a) of the Regulatory Flexibility Act (''RFA'').[395] It relates to proposed amendments to rules 203A–3(a)(3)(i), 204–3(c)(2)(iii), and 205–3 under the Advisers Act and Forms N–1A, N–2, and N–CSR under the Investment Company Act (collectively, the ''proposed amendments'').

[395] 5 U.S.C. 603(a).

A. Reasons for and Objectives of the Proposed Actions

1. Proposed Amendments to Rule 205–3

We are proposing amendments to rule 205–3, a generally applicable exemptive rule to the performance fee prohibition under the Advisers Act that provides an exception to the prohibition for clients that satisfy the definition of ''qualified client'' within the rule. The current rule defines a ''qualified client'' in one of three ways: (1) a natural person or company that meets a minimum net worth or assets-under-management requirement; (2) a natural person or company that is a ''qualified purchaser'' under section 2(a)(51)(A) of the Investment Company Act; and (3) a natural person that is a certain executive officer or employee of the investment adviser who actively participates in the investment activities of the adviser. We are proposing amendments to rule 205–3 to expand the definition of a ''qualified client'' to include (1) regulated funds that satisfy certain conditions and (2) natural persons or entities that meet the ''accredited investor'' definition under Regulation D. The proposed amendments are designed to enhance, simplify, and modernize the regulatory framework related to performance-based compensation, as well as to facilitate access for a wider group of investors to investment strategies and products that include performance-based compensation

arrangements, while maintaining appropriate investor protections and safeguards.

In addition, the proposal would include technical conforming amendments to rules 203A–3(a)(3)(i) and 204–3(c)(2)(iii) under the Advisers Act to replace the existing references to the ''qualified client'' definition in rule 205–3(d)(1) with references instead to rule 205–3(c)(1), corresponding to the proposed redesignation of current paragraph (d)(1) to (c)(1).

2. Proposed Amendments to Forms N–1A, N–2, and N–CSR

We are also proposing amendments to Forms N–1A and N–2, the forms on which registered open-end funds and registered closed-end funds and BDCs, respectively, are required to disclose information about performance-based compensation paid to the investment adviser. Currently, regulated funds are required to disclose certain key information about the fund's fees and expenses in a standardized fee table in their prospectus. In addition to fee table disclosure, the registration statement forms for regulated funds require a description of the investment adviser's compensation. The proposal would require (1) a distinct line item to the fee table regarding performance-based compensation paid to the adviser, to the extent applicable; and (2) a detailed description of the performance fee arrangement, including a graphical representation illustrating the calculation of the performance fee later in the prospectus. These proposed amendments are designed to enhance transparency by requiring clearer disclosure of performance-based advisory fees in the prospectus.

In addition, Form N–CSR, a combined reporting form used by registered management investment companies to transmit shareholder reports to the Commission as well as to report corporate governance and financial data, requires a registered management investment company to provide disclosure about the basis for the board's approval of its investment advisory contract. We are proposing to amend Form N–CSR to require more particularized disclosure regarding the approval of performance fees based on capital gains in or capital appreciation of a regulated fund whose investment adviser charges the regulated fund a performance fee pursuant to the conditions of proposed rule 205–3(c)(1)(iv). This disclosure would be useful for investors because it would provide them with meaningful insight into the board's reasoning and analysis in approving a performance fee arrangement that could impact their returns. It would also be useful for Commission staff in reviewing compliance with the proposed rules.

The reasons for, and objectives of, the proposed amendments are discussed in more detail in sections I and II, above. The burdens of these requirements on small advisers are discussed below as well as above in sections III and IV, which discuss the burdens on all advisers. The professional skills required to meet these specific burdens are also discussed in section IV.

B. Legal Basis

The Commission is proposing the rule and form amendments contained in this document under the authority set forth in the Advisers Act, particularly sections 203A, 204, 205(e), 206A, 206(4), and 211(a) thereof, the Investment Company Act, particularly sections 6, 8, 24, 30, 31, 37, 38, 59, and 63 thereof; the Securities Act, particularly sections 5, 7, 10, 19(a), and 28 thereof; and the Securities Exchange Act of 1934, particularly sections 12, 13(a), 14, 15(d), 23(a), 35A, and 36 thereof.

C. Small Entities Subject to the Rule Amendments

The proposed amendments would affect registered investment advisers, registered investment companies, and BDCs, including entities that are considered to be a small business or small organization (each, a ''small entity'') for purposes of the RFA. For the purposes of the RFA, under the Advisers Act, an investment adviser generally is a small entity if it: (1) has assets under management having a total value of less than $25 million; (2) did not have total assets of $5 million or more on the last day of the most recent fiscal year; and (3) does not control, is not controlled by, and is not under common control with another investment adviser that has assets under management of $25 million or more, or any person (other than a natural person) that had total assets of $5 million or more on the last day of its most recent fiscal year.[396] Under the Investment Company Act, an investment company is a small entity if, together with other investment companies in the same group of related investment companies, it has net assets of $50 million or less as of the end of its most recent fiscal year.[397] Based on Commission filings, we estimate that there are approximately 66 investment companies[398] and 466 SEC-registered advisers[399] that are small entities. The number of small entities that would be affected by the proposed amendments to rule 205–3 would generally depend on the number of small entities that would rely on the exemptive rule to charge performance fees. It is not mandatory that any small entity comply with the proposed amendments, as the proposed amendments operate as an exemption from an otherwise applicable statutory prohibition and imposes no affirmative obligations on any adviser or regulated fund that does not seek to avail itself of the exemption. To the extent a small entity would charge performance fees, even if not by availing itself of the proposed exemptive rule, it would then be required to make the applicable disclosures in Forms N–1A, N–2, and/or N–CSR, as appropriate.

D. Projected Reporting, Recordkeeping, and Other Compliance Requirements

1. Proposed Rule 205–3 Amendments

Proposed amendments to rule 205–3 would impose certain compliance requirements on investment advisers, including those that are small entities, to the extent they enter into performance-based compensation arrangements with certain clients. All registered investment advisers to regulated funds that enter into

[396] 17 CFR 275.0–7. In a separate rulemaking, the SEC is proposing to increase the thresholds for an investment adviser to qualify as a small entity (the ''Small Entity Proposal''). Under the Small Entity Proposal, an investment adviser would generally be a small entity for purposes of the Advisers Act and the RFA if the adviser (1) has assets under management of less than $1 billion, (2) did not have total assets of $5 million or more on the last day of the most recent fiscal year, and (3) does not control, is not controlled by, and is not under common control with another investment adviser that has assets under management of $1 billion or more, or any person (other than a natural person) that had total assets of $5 million or more on the last day of the most recent fiscal year, all thresholds of which would have a mechanism for future inflation adjustments. *See* Amendments to the ''Small Business'' and ''Small Organization'' Definitions for Investment Companies and Investment Advisers for Purposes of the Regulatory Flexibility Act, Release No. IA–6935 (Jan. 7, 2026) and proposed 17 CFR 275.0–7.

[397] *See* 17 CFR 270.0–10(a); *see also* Small Entity Proposal. Under the Small Entity Proposal, an investment company would generally be a small entity for purposes of the Investment Company Act and the RFA if the investment company, together with other investment companies in the same family of investment companies, has net assets of $10 billion or less as of the end of its most recent fiscal year. The Commission encourages commenters to review the proposal to determine whether it might affect their comments on this IRFA.

[398] This estimate is derived from an analysis of data obtained from Morningstar Direct and data reported to the Commission (*e.g.,* N–PORT, N–CSR, 10–Q and 10–K) as of Dec. 2025 (estimate includes 27 registered open-end funds, 34 registered closed-end funds, and 5 BDCs).

[399] Based on a review of Form ADV filings for the reporting period ending December 2025, with filings received through March 31, 2026.

investment advisory contracts that include performance-based compensation arrangements based on capital gains would be required to comply with the proposed amendments' conditions for reliance on the expanded exemptions to from performance fee prohibition. The proposed amendments are summarized in this IRFA. In addition, the proposal would include technical conforming amendments to rules 203A–3(a)(3)(i) and 204–3(c)(2)(iii) under the Advisers Act to replace the existing references to the ''qualified client'' definition in rule 205–3(d)(1) with references instead to rule 205–3(c)(1), corresponding to the proposed redesignation of current paragraph (d)(1) to (c)(1). All of these proposed requirements are also discussed in detail, above, in sections I and II, and these requirements and the burdens on respondents, including those that are small entities, are discussed above in sections III and IV (the Economic Analysis and PRA Analysis, respectively) and below. The professional skills required to meet these specific burdens are also discussed in section IV.

As discussed above, there are approximately 466 advisers currently registered with us that are small entities, and we estimate that 5 percent of advisers registered with us would be subject to the proposed amendments to rule 205–3. We therefore estimate that approximately 23 advisers that are small entities would be impacted by the proposed amendments to rule 205–3.

2. Proposed Disclosure and Reporting Requirements

The proposed amendments to Forms N–1A, N–2, and N–CSR would impose certain disclosure and reporting requirements on regulated funds, including those that are small entities, to the extent they enter into any performance-based compensation arrangements with an adviser. All regulated funds that enter into investment advisory contracts that include performance-based compensation arrangements, including arrangements based on measures other than capital gains, would be required to disclose performance-based advisory fees in the prospectus fee table and provide detailed information regarding performance fee arrangements later in the prospectus. In addition, regulated funds whose investment adviser charges the regulated fund a performance fee based on capital gains in or capital appreciation of the fund pursuant to the conditions of proposed rule 205–3(c)(1)(iv) would need to include particularized disclosure regarding the approval of performance fees on Form N–CSR. The proposed amendments are summarized in this IRFA. All of these proposed requirements are also discussed in detail, above, in sections I and II, and these requirements and the burdens on respondents, including those that are small entities, are discussed above in sections III and IV (the Economic Analysis and PRA analysis, respectively) and below. The professional skills required to meet these specific burdens are also discussed in section IV.

As discussed above, there are approximately 66 regulated funds that are small entities, and we estimate that 5 percent of regulated funds would be subject to the proposed amendments to Forms N–1A, N–2, and N–CSR. We therefore estimate that approximately three regulated funds that are small entities would be impacted by the proposed amendments to Forms N–1A, N–2, and N–CSR.

E. Duplicative, Overlapping, or Conflicting Federal Rules

1. Proposed Amendments to Rule 205–3

Section 205(a)(1) of the Advisers Act prohibits registered investment advisers from entering into, extending, or performing advisory contracts that provide for performance fees on the basis of a share of capital gains in or capital appreciation of an advisory client's account. Statutory exceptions to the prohibition are provided in sections 205(b)(1) through (b)(5) of the Advisers Act, and the Commission has authority to promulgate exemptions from the prohibition under sections 205(e) and/or 206A thereof. One of those exceptions, section 205(b)(3), permits an investment adviser to a BDC to receive compensation based on a share of capital gains, not to exceed 20 percent of realized capital gains upon the funds of the BDC over a specified period or as of definite dates (computed net of all realized capital losses and unrealized capital deprecation). This existing statutory exception differs from our proposed amendment to rule 205–3, which would permit an investment adviser to a BDC to charge performance fees based on net realized and net unrealized capital gains or appreciation. We do not think that this difference in approach would conflict with the statute because the proposed amendment would require the investment adviser and BDC to meet certain other conditions and disclosure requirements that are designed to protect the fund and its shareholders.

Additionally, section 15(c) of the Investment Company Act requires that the initial approval, and any annual continuance, of an investment advisory contract by a regulated fund be approved by a majority of the fund's board, including a majority of directors who are not interested persons of the adviser. In addition, section 10(a) of the Investment Company Act requires that 40% of any regulated fund's board be composed of disinterested directors. Relatedly, rule 0–1(a)(7) under the Investment Company Act contains certain fund governance standards to enhance the independence and effectiveness of independent directors. The proposed amendments to rule 205–3 would leverage sections 15(c) and 10(a) and rule 0–1(a)(7) under the Investment Company Act to help strengthen investor protections and fund and adviser oversight. Therefore, there are no duplicative, overlapping, or conflicting Federal rules with respect to the proposed amendments to rule 205–3.

Furthermore, there are no federal rules that are duplicative, overlapping, or conflicting with the proposed technical conforming amendments to rules 203A–3(a)(3)(i) and 204–3(c)(2)(iii) under the Advisers Act to replace the existing references to the ''qualified client'' definition in rule 205–3(d)(1) with references instead to rule 205–3(c)(1), corresponding to the proposed redesignation of current paragraph (d)(1) to (c)(1).

2. Proposed Amendments to Forms N–1A, N–2, and N–CSR

The instructions to both Forms N–1A and N–2 require registered open-end funds and registered closed-end funds and BDCs, respectively, to disclose ''management fees,'' a line item that encompasses all fees paid to the investment adviser for managing the fund's portfolio, including any fees that are contingent on the fund's performance. The instructions to the prospectus fee table do not currently require a regulated fund to separately identify, as a distinct line item or caption within the fee table, the portion of management fees attributable to performance-based compensation as distinguished from asset-based advisory fees. Our proposed amendments to Forms N–1A and N–2 would add a caption to the prospectus fee table, where applicable, titled ''performance fees'' to disclose to the investor any performance-based compensation payable to the investment adviser.

Similarly, the current versions of both forms require a regulated fund to describe the investment adviser's

compensation, including whether the compensation will be based on a percentage of average net assets, but they do not separately address performance fees and how such fees may be calculated. Our proposed amendments would require tailored disclosure about performance fees. Given that performance fees are different from base management fees, the proposed amendments to Forms N–1A and N–2 do not conflict with the existing disclosure regime.

Lastly, Form N–CSR currently requires a registered management investment company to provide disclosure about the basis for the board's approval of its investment advisory contract. We are proposing to amend Form N–CSR to require particularized disclosure regarding the approval of performance fees based on capital gains in or capital appreciation of a regulated fund whose investment adviser charges the regulated fund a performance fee pursuant to the conditions of proposed rule 205–3(c)(1)(iv). Generally, the investor protection benefits of the disclosure provisions of the proposed amendments justify the additional costs of their application.

F. Significant Alternatives

The RFA directs the Commission to consider significant alternatives that would accomplish our stated objectives, while minimizing any significant adverse impact on small entities. We considered the following alternatives for small entities in relation to the proposed amendments to rules 205–3, 203A–3(a)(3)(i), and 204–3(c)(2)(iii) and Forms N–1A, N–2, and N–CSR: (i) differing compliance or reporting requirements that take into account the resources available to small entities; (ii) the clarification, consolidation, or simplification of compliance and reporting requirements under the proposed rule for such small entities; (iii) the use of performance rather than design standards; and (iv) an exemption from coverage of the proposed rule, or any part thereof, for such small entities.

Regarding the first and fourth alternatives, the Commission believes that establishing different compliance, reporting, or disclosure requirements for small entities, or exempting small entities from the proposed amendments, or any part thereof, would be inappropriate under these circumstances. Because the protections of the Advisers Act, Investment Company Act, and Securities Act are intended to benefit equally clients or investors of both large and small entities, it would be inconsistent with the purposes of the Advisers Act, Investment Company Act, and Securities Act to specify different requirements for small entities under the proposed amendments. As discussed above, we believe that the proposed amendments would result in multiple benefits. For example, the proposed amendments could provide investors with opportunities to gain exposure to expanded investment strategies and to participate in their asset growth. At the same time, the proposed conditions and disclosures are intended to align the investment adviser's economic incentives with the interests of a regulated fund and its shareholders or with other advisory clients and mitigate the potential for excessive risk-taking and speculation. We believe that these benefits should benefit clients of smaller entities as well as larger entities. In addition, as discussed above, our staff would use the corresponding information that advisers or regulated funds would document or disclose to help prepare for examinations of investment advisers and regulated funds. Establishing different conditions or types of disclosures for large and small entities that serve many types of investors would negate these benefits.

Regarding the second alternative, we believe the current proposal is clear and that further clarification, consolidation, or simplification of the compliance requirements is not necessary. As discussed above: the proposed amendments would expand the ability for investment advisers to regulated funds to enter into investment advisory contracts that include performance-based compensation arrangements, provided they meet three specific conditions, and would require specific disclosures on Forms N–1A, N–2, and N–CSR, as appropriate, about performance-based compensation. These provisions would modernize our regulatory programs to reflect and enhance investment product innovation and the ever-broadening investor choice available in today's asset management industry, while also taking into account the risks associated with increasingly diverse portfolio compositions and operations. The proposed amendments also would amend the definition of ''qualified client'' to include natural persons or entities that meet the ''accredited investor'' definition and remove the ''qualified client'' definition's separate net worth test and assets-under-management test, thereby harmonizing the regulatory framework governing access to private funds by enabling advisers to funds that already limit their investors to accredited investors (*e.g.,* section 3(c)(1) private funds that rely on Regulation D) to enter into performance fee arrangements without needing to apply a separate qualified client standard.

Regarding the third alternative, we determined to use design standards rather than performance standards. Performance standards allow for increased flexibility in the methods firms can use to achieve the objectives of the requirements. Design standards specify the behavior or manner of compliance that regulated entities must adopt. While the proposed amendments to rule 205–3 would expand the ability of registered investment advisers and certain of their clients to enter into performance-based compensation arrangements—and would not dictate their terms—they would impose specific conditions and restrictions, to meet the proposed exemption, and the proposed amendments to Forms N–1A, N–2, and N–CSR would impose certain related disclosures. These conditions, restrictions, and disclosures are principles-based and narrowly tailored to protect regulated funds and their shareholders, and to be consistent with the purposes fairly intended by the policy and provisions of the Advisers Act and the Investment Company Act.

G. Request for Comment

The Commission encourages written comments on the matters discussed in this IRFA. We request comment on the number of small entities that would be subject to our proposal and whether our proposal would have any effects that have not been considered. We request that commenters describe the nature of any effects on small entities subject to our proposal and provide empirical data to support the nature and extent of such effects. We also request comment on the estimated compliance burdens of our proposal and how they would affect small entities.

VI. Congressional Review Act

For purposes of Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (also known as the Congressional Review Act),[400] the Commission must seek OMB's determination as to whether a final regulation constitutes a ''major rule.'' Under the Congressional Review Act, a rule is considered ''major'' where, if adopted, it results in or is likely to result in:

- An annual effect on the U.S. economy of $100 million or more;

[400] *See* 5 U.S.C. chapter 8.

• A major increase in costs or prices for consumers or individual industries; or

• Significant adverse effects on competition, investment, or innovation.[401]

To help inform OMB's determination as to whether any final rule that results from the proposal would be a ''major rule,'' the Commission solicits comment and data on:

• The potential effect of the proposed amendments on the U.S. economy on an annual basis;

• Any potential increase in costs or prices for consumers or individual industries; and

• Any potential adverse effect on competition, investment, or innovation.

Commenters are requested to provide empirical data and other factual support for their views to the extent possible, to inform OMB's determination regarding whether any final rule following this proposal is likely to be a ''major rule'' for the purposes of the Congressional Review Act.

VII. Other Matters

This action is an economically significant regulatory action under section 3(f)(1) of Executive Order 12866 and has been reviewed by OMB, consistent with Executive Order 14215. This action, if finalized as proposed, is expected to be an Executive Order 14192 deregulatory action.

Statutory Authority

The Commission is proposing the rule and form amendments contained in this document under the authority set forth in the Advisers Act, particularly sections 203A, 204, 205(e), 206A, 206(4), and 211(a) thereof; the Investment Company Act, particularly sections 6, 8, 24, 30, 31, 37, 38, 59, and 63 thereof; the Securities Act, particularly sections 5, 7, 10, 19(a), and 28 thereof; and the Securities Exchange Act of 1934, particularly sections 12, 13(a), 14, 15(d), 23(a), 35A, and 36 thereof.

List of Subjects

17 CFR Part 239

Reporting and recordkeeping requirements, Securities.

17 CFR Part 249

Brokers, Fraud, Reporting and recordkeeping requirements, Securities.

17 CFR Part 274

Investment companies, Reporting and recordkeeping requirements, Securities.

17 CFR Part 275

Reporting and recordkeeping requirements; Securities.

Text of Proposed Rules and Rule and Form Amendments

For the reasons set out in the preamble, the Commission proposes to amend title 17, chapter II of the Code of Federal Regulations as follows:

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

■ 1. The authority citation for part 239 continues to read, in part, as follows:

Authority: 15 U.S.C. 77c, 77f, 77g, 77h, 77j, 77s, 77z–2, 77z–3, 77sss, 78c, 78*l,* 78m,78n, 78o(d), 78o–7 note, 78u–5, 78w(a), 78*ll,* 78mm, 80a–2(a), 80a–3, 80a–8, 80a–9, 80a–10, 80a–13, 80a–24, 80a–26, 80a–29, 80a–30, and 80a–37; and sec. 107, Pub. L. 112–106, 126 Stat. 312, unless otherwise noted.

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

■ 2. The authority citation for part 249 continues to read, in part, as follows:

Authority: 15 U.S.C. 78a *et seq.* and 7201 *et seq.;* 12 U.S.C. 5461 *et seq.;* 18 U.S.C. 1350; Sec. 953(b), Pub. L. 111–203, 124 Stat. 1904; Sec. 102(a)(3), Pub. L. 112–106, 126 Stat. 309 (2012); Sec. 107, Pub. L. 112–106, 126 Stat. 313 (2012), and Sec. 72001, Pub. L. 114–94, 129 Stat. 1312 (2015), unless otherwise noted.

* * * * *

Section 249.331 is also issued under 15 U.S.C. 78j–1, 7202, 7233, 7241, 7264, 7265; and 18 U.S.C. 1350.

* * * * *

■ 3. Amend Form N–CSR (referenced in §§ 249.331 and 274.128) by:

■ a. Revising Item 11.

Note: Form N–CSR is attached as Appendix A to this document. Form N–CSR will not appear in the Code of Federal Regulations.

PART 274—FORMS PRESCRIBED UNDER THE INVESTMENT COMPANY ACT OF 1940.

■ 4. The authority for part 274 continues to read as follows:

Authority: 15 U.S.C. 77f, 77g, 77h, 77j, 77s, 78c(b), 78l, 78m, 78n, 78n–1, 78o(d), 80a–8, 80a–24, 80a–26, 80a–29, and sec. 939A, Pub. L. 111–203, 124 Stat. 1376, unless otherwise noted.

■ 5. Amend Form N–1A (referenced in §§ 239.15A and 274.11A) by:

■ a. Revising Item 3; and

■ b. Revising Item 10; and

■ c. Redesignate Instructions 3(b) through 3(f) to 3(c) through 3(g) to Item 3 of Form N–1A.

Note: Form N–1A is attached as Appendix B to this document. Form N–1A will not appear in the Code of Federal Regulations.

■ 6. Amend Form N–2 (referenced in §§ 239.14 and 274.11a–1) by:

■ a. Revising Item 3;

■ b. Redesignate Instruction 11 as Instruction 12 to Item 3 of Form N–2;

■ c. Redesignate Instruction 12.d. as Instruction 12.e. to Item 3 of Form N–2; and

■ d. Revising Item 9.

Note: Form N–2 is attached as Appendix C to this document. Form N–2 will not appear in the Code of Federal Regulations.

PART 275–RULES AND REGULATIONS, INVESTMENT ADVISERS ACT OF 1940

■ 7. The general authority citation for part 275 continues to read, in part, as follows:

Authority: 15 U.S.C. 80b–2(a)(11)(G), 80b–2(a)(11)(H), 80b–2(a)(17), 80b–3, 80b–4, 80b–4a, 80b–6(4), 80b–6a, and 80b–11, unless otherwise noted.

■ 8. Amend § 275.203A–3 by revising paragraph (a)(3)(i) to read as follows:

(i) ''Excepted person'' means a natural person who is a qualified client as described in § 275.205–3(c)(1).

■ 9. Amend § 275.204–3 by revising paragraph (c)(2)(iii) to read as follows:

(iii) Who is an officer, employee, or other person related to the adviser that would be a ''qualified client'' of your firm under § 275.205–3(c)(1)(ii).

■ 10. Revise and republish § 275.205–3 to read as follows:

§ 275.205–3 Exemption from the compensation prohibition of section 205(a)(1) for investment advisers

(a) *General.* The provisions of section 205(a)(1) of the Act (15 U.S.C. 80b–5(a)(1)) will not be deemed to prohibit an investment adviser from entering into, performing, renewing or extending an investment advisory contract that provides for compensation to the investment adviser on the basis of a share of the capital gains upon, or the capital appreciation of, the funds, or any portion of the funds, of a client, *Provided,* That the client entering into the contract subject to this section is a qualified client, as defined in paragraph (c)(1) of this section.

(b) *Transition rules—*

(1) *Registered investment advisers.* If a registered investment adviser entered into a contract and satisfied the conditions of this section that were in effect when the contract was entered into, the adviser will be considered to satisfy the conditions of this section; *Provided,* however, that if a natural person or company who was not a party

[401] *See* 5 U.S.C. 804(2) (defining ''major rule'').

to the contract becomes a party (including an equity owner of a private investment company advised by the adviser), the conditions of this section in effect at that time will apply with regard to that person or company.

(2) *Registered investment advisers that were previously not registered.* If an investment adviser was not required to register with the Commission pursuant to section 203 of the Act (15 U.S.C. 80b–3) and was not registered, section 205(a)(1) of the Act will not apply to an advisory contract entered into when the adviser was not required to register and was not registered, or to an account of an equity owner of a private investment company advised by the adviser if the account was established when the adviser was not required to register and was not registered; *Provided,* however, that section 205(a)(1) of the Act will apply with regard to a natural person or company who was not a party to the contract and becomes a party (including an equity owner of a private investment company advised by the adviser) when the adviser is required to register.

(3) *Certain transfers of interests.* Solely for purposes of paragraphs (b)(1) and (b)(2) of this section, a transfer of an equity ownership interest in a private investment company by gift or bequest, or pursuant to an agreement related to a legal separation or divorce, will not cause the transferee to ''become a party'' to the contract and will not cause section 205(a)(1) of the Act to apply to such transferee.

(c) *Definitions.* For the purposes of this section:

(1) The term *qualified client* means:

(i) A natural person who, or a company (other than a private investment company, as defined in paragraph (c)(3) of this section) that, the investment adviser entering into the contract (and any person acting on his behalf) reasonably believes either:

(A) Is an accredited investor as defined in rule 501(a) of Regulation D under the Securities Act of 1933 (17 CFR 230.501(a)) at the time the contract is entered into; or

(B) Is a qualified purchaser as defined in section 2(a)(51)(A) of the Investment Company Act of 1940 (15 U.S.C. 80a–2(a)(51)(A)) at the time the contract is entered into;

(ii) A natural person who immediately prior to entering into the contract is:

(A) An executive officer, director, trustee, general partner, or person serving in a similar capacity, of the investment adviser; or

(B) An employee of the investment adviser (other than an employee performing solely clerical, secretarial or administrative functions with regard to the investment adviser) who, in connection with his or her regular functions or duties, participates in the investment activities of such investment adviser, provided that such employee has been performing such functions and duties for or on behalf of the investment adviser, or substantially similar functions or duties for or on behalf of another company for at least 12 months;

(iii) A private investment company, as defined in paragraph (c)(3) of this section, *Provided,* that each equity owner of any such company (except equity owners with respect to which compensation on the basis of a share of capital gains or capital appreciation is not provided for) meets the requirements of paragraph (c)(1) of this section; or

(iv) A regulated fund, *Provided,* that each equity owner of any such regulated fund meets the requirements of paragraph (c)(1) of this section, or that the following conditions are satisfied:

(A) The compensation to the investment adviser on the basis of a share of the capital gains upon, or the capital appreciation of, the funds, or any portion of the funds, of the regulated fund, does not exceed 20% of the regulated fund's net capital gains or net capital appreciation over a specified period or as of definite dates;

(B) The board of directors of the regulated fund satisfies the fund governance standards defined in rule 0–1(a)(7) under the Investment Company Act of 1940 (15 U.S.C. 270.0–1(a)(7)); and

(C) As part of the regulated fund's annual review and approval of an investment advisory contract required under section 15(c) of the Investment Company Act of 1940 (15 U.S.C. 80a–15(c)), the board of directors, including a majority of directors who are not interested persons of the regulated fund, determine that the compensation to the investment adviser on the basis of a share of the capital gains upon, or the capital appreciation of, the funds, or any portion of the funds, of the regulated fund, is in the best interests of the regulated fund and its shareholders. Such determination must include written findings addressing:

(*1*) The appropriateness of such compensation arrangement considering such factors as the regulated fund's investment strategy and valuation practices;

(*2*) The basis upon which such compensation is calculated, including the measurement period over which performance is assessed, and whether such compensation is determined with reference to realized gains, unrealized gains, or both; and

(*3*) The adequacy of any investor protection features in such compensation arrangement to protect the interests of shareholders (*e.g.,* a preferred return or hurdle that requires a specified return or yield to be achieved before the investment adviser may receive compensation, or a high-watermark or loss carryforward mechanism that allows shareholders to recoup losses before compensation is paid to the investment adviser), including, where no such investor protection features are present, the basis for concluding that the compensation arrangement is adequate to protect the interests of shareholders.

(2) The term *company* has the same meaning as in section 202(a)(5) of the Act (15 U.S.C. 80b–2(a)(5)), but does not include a company that is required to be registered under the Investment Company Act of 1940 but is not registered.

(3) The term *private investment company* means a company that would be defined as an investment company under section 3(a) of the Investment Company Act of 1940 (15 U.S.C. 80a–3(a)) but for the exception provided from that definition by section 3(c)(1) of such Act (15 U.S.C. 80a–3(c)(1)).

(4) The term *executive officer* means the president, any vice president in charge of a principal business unit, division or function (such as sales, administration or finance), any other officer who performs a policy-making function, or any other person who performs similar policy-making functions, for the investment adviser.

(5) The term *regulated fund* means a management investment company registered under the Investment Company Act of 1940, or a business development company, as defined in section 202(a)(22) of the Act (15 U.S.C. 80b–2(a)(22), but does not include separate accounts that are registered management investment companies offering variable annuity contracts registered on Form N–3.

By the Commission.

Dated: September 30, 2026.

Vanessa A. Countryman,

Secretary.

Appendix A—Form N–CSR

* * * * *

Item 11. Statement Regarding Basis for Approval of Investment Advisory Contract

* * * * *

(3) If the investment advisory contract approved by the board provides for compensation to the investment adviser on the basis of a share of the capital gains upon, or the capital appreciation of, the funds, or any portion of the funds, of the Fund (a

''performance fee''), and the board made the findings required under rule 205–3(c)(1)(iv) under the Investment Advisers Act of 1940 (17 CFR 275.205–3(c)(1)(iv)), discuss in reasonable detail the factors and the conclusions with respect to the approval of such contract that formed the basis for the board's determination that the performance fee is in the best interests of the Fund and its shareholders, including:

(A) The appropriateness of the performance fee arrangement, considering such factors as the Fund's investment strategy and valuation practices;

(B) The basis upon which the performance fee is calculated, including the measurement period over which performance is assessed, and whether the performance fee is determined with reference to realized gains, unrealized gains, or both; and

(C) The adequacy of investor protection features in the performance fee arrangement, such as a preferred return or hurdle rate that requires a specified return or yield to be achieved before the investment adviser may receive a performance fee, or a high-water mark or loss carry forward mechanism that allows shareholders to recoup losses before a performance fee is paid to the investment adviser, including where no such investor protection features are present, the basis for concluding that the performance fee arrangement is adequate to protect the interests of shareholders.

Appendix B—Form N–1A

* * * * *

Part A—Information Required In a Prospectus

* * * * *

Item 3. Risk/Return Summary: Fee Table

* * * * *

Instructions

* * * * *

3. *Annual Fund Operating Expenses.*

(a) ''Management Fees'' include investment advisory fees (excluding any fees based on the Fund's performance), any other management fees payable to the investment adviser or its affiliates, and administrative fees payable to the investment adviser or its affiliates that are not included as ''Other Expenses.''

(b) If the Fund is subject to investment advisory fees payable to the investment adviser or its affiliates that are based on the performance of the Fund (''performance fees''), disclose these fees in a caption to the ''Annual Fund Operating Expenses'' portion of the table directly below and indented equally to the caption titled ''Management Fees.'' Title the additional caption: ''Performance Fees.'' The basis on which performance fees are imposed should be described briefly in a note to the table. The note should provide a cross-reference to the discussion in Item 10(a)(1)(ii)(B) for a more complete description of the performance fee. The note also should explain that performance fees may be substantially higher or lower because these fees are based on the performance of the Fund, which may fluctuate over time.

* * * * *

4. *Example.*

* * * * *

(f) Reflect any performance fee, consistent with instruction 3(b), above, to the extent applicable.

(g) Include the second 1-, 3-, 5-, and 10-year periods and related narrative explanation only if a sales charge (load) or other fee is charged upon redemption.

* * * * *

6. *New Funds.* For purposes of this Item, a ''New Fund'' is a Fund that does not include in Form N–1A financial statements reporting operating results or that includes financial statements for the Fund's initial fiscal year reporting operating results for a period of 6 months or less. The following Instructions apply to New Funds.

* * * * *

(c) A New Fund may show zero performance fees payable to the investment adviser or its affiliates in the performance fees caption of the fee table. Thereafter, the Fund must show the performance fees paid to the investment adviser or its affiliates during the prior fiscal year as a percentage of the value of your investment.

* * * * *

Item 10. Management, Organization, and Capital Structure

(a) *Management.*

(1) *Investment Adviser.*

(i) Provide the name and address of each investment adviser of the Fund, including sub advisers. Describe the investment adviser's experience as an investment adviser and the advisory services that it provides to the Fund.

(ii) Describe the compensation of each investment adviser of the Fund as follows:

(A) If the Fund has operated for a full fiscal year, state the aggregate fee paid to the adviser for the most recent fiscal year as a percentage of average net assets. If the Fund has not operated for a full fiscal year, state what the adviser's fee is as a percentage of average net assets, including any breakpoints.

(B) If the investment adviser's compensation includes a performance fee, provide the following information:

(1) the rate of the performance fee and the basis upon which it is calculated, including whether the fee is determined with reference to realized gains, unrealized gains, investment income, or any combination thereof;

(2) whether the performance fee is calculated on the Fund's total investment return before or after deducting fees, commissions or expenses;

(3) the measurement period over which the performance fee is assessed;

(4) a description of any features that limit or condition the payment of a performance fee to the investment adviser, including, but not limited to, any preferred return, hurdle rate, high-water mark, loss carryforward mechanism, or any other features that limit or condition the payment of a performance fee to the investment adviser; and

(5) a graphical representation that illustrates the calculation of the performance fee across a range of hypothetical performance scenarios.

(C) If any portion of the investment adviser's compensation is not based on a percentage of average net assets and is not a performance fee, describe the basis of the adviser's compensation.

(iii) Include a statement, adjacent to the disclosure required by paragraph (a)(1)(ii) of this Item, that a discussion regarding the basis for the board of directors approving any investment advisory contract of the Fund is available in the Fund's reports filed on Form N–CSR, and providing the period covered by the most recent Form N–CSR report that includes this discussion.

* * * * *

Appendix C—Form N–2

* * * * *

Part A—Information Required in a Prospectus

* * * * *

Item 3. Fee Table and Synopsis

* * * * *

Instructions

* * * * *

Annual Expenses

* * * * *

7. a. ''Management Fees'' include investment advisory fees (excluding any component thereof based on the performance of the Registrant), any other management fees payable to the investment adviser or its affiliates, and administrative fees payable to the investment adviser or its affiliates not included as ''Other Expenses,'' and any expenses incurred within the Registrant's own organization in connection with the research, selection, and supervision of investments. Where management fees are ''tiered'' or based on a ''sliding scale,'' they should be calculated based on the fund's asset size after giving effect to the anticipated net proceeds of the present offering. With respect to a best-efforts offering with breakpoints, assume the maximum fee will be payable.

b. In lieu of the information about management fees required by Item 3.1, a business development company with a fee structure that is not based solely on the aggregate amount of assets under management should provide disclosure concerning the fee arrangement to allow investors to assess its impact on the Registrant's expenses; a business development company may use any appropriate expense categories and may include items that may not, for accounting purposes, be treated as expenses. A business development company with special fee arrangements should provide a cross-reference, where applicable, to the discussion in Item 9.1.a of special management compensation plans.

c. If the Registrant is subject to investment advisory fees payable to the investment adviser or its affiliates that are based on the performance of the Registrant (''performance fees''), disclose these fees in a caption to the ''Annual Expenses'' portion of the table directly below and indented equally to the caption titled ''Management Fees.'' Title the

additional caption: ''Performance Fees.'' The basis on which performance fees are imposed should be described briefly in a note to the table. The note should provide a cross-reference to the discussion in Item 9.1.b for a more complete description of the performance fee. The note also should explain that performance fees may be substantially higher or lower because these fees are based on the performance of the Registrant, which may fluctuate over time.

A New Fund may show zero performance fees payable to the investment adviser or its affiliates in the performance fees caption of the fee table. Thereafter, the Registrant must show the performance fees paid to the investment adviser during the prior fiscal year as a percentage of the net assets attributable to common shares.

* * * * *

11. a. Base the percentages of ''Annual Expenses'' on amounts incurred during the Registrant's most recent fiscal year, but include in expenses amounts that would have been incurred absent expense reimbursement or fee waiver arrangements. If the Registrant has changed its fiscal year and, as a result, the most recent fiscal year is less than three months, use the fiscal year prior to the most recent fiscal year as the basis for determining ''Annual Expenses.''

b. If there have been any changes in ''Annual Expenses'' that would materially affect the information disclosed in the table:

(1) Restate the expense information using the current fees as if they had been in effect during the previous fiscal year; and

(2) In a footnote to the fee table, disclose that the expense information in the table has been restated to reflect current fees.

c. A change in ''Annual Fund Expenses'' means either an increase or decrease in expenses that incurred during the most recent fiscal year or that is expected to occur during the current fiscal year. A change in ''Annual Fund Expenses'' does not include a decrease in annual expenses as a percentage of assets due to economies of scale or breakpoints in a fee arrangement resulting from an increase in the Registrant's assets.

* * * * *

Example

* * * * *

12. For purposes of the Example in the table:

* * * * *

d. reflect any performance fee, consistent with instruction 7.c. above, to the extent applicable; and

* * * * *

13. *New Fund.* A ''New Fund'' is a Registrant that does not include in Form N–2 financial statements reporting operating results or that includes financial statements for the Registrant's initial fiscal year reporting operating results for a period of 6 months or less.

* * * * *

Item 9. Management

1. General. Describe concisely how the business of the Registrant is managed, including:

* * * * *

b. Investment Advisers. For each investment adviser of the Registrant:

* * * * *

(3) a description of its compensation; and

Instructions.

1. State generally what the adviser's fee is or will be as a percentage of average net assets, including any break-point. It is not necessary to include precise details as to how the fee is computed or paid.

2. If the adviser's compensation includes a performance fee, provide the following information:

a. the rate of the performance fee and the basis upon which it is calculated, including whether the fee is determined with reference to realized gains, unrealized gains, investment income, or any combination thereof;

b. whether the performance fee is calculated on the Registrant's total investment return before or after deducting fees, commissions or expenses;

c. the measurement period over which the performance fee is assessed;

d. a description of any features that limit or condition the payment of a performance fee to the adviser, including, but not limited to, any preferred return, hurdle rate, high-water mark, loss carryforward mechanism, or any other features that limit or condition the payment of a performance fee to the adviser; and

e. a graphical representation that illustrates the calculation of the performance fee across a range of hypothetical performance scenarios.

3. If any portion of the adviser's fee is not based on a percentage of average net assets and is not a performance fee, describe the basis of the adviser's compensation.

Transparency in Coverage

AGENCY: Internal Revenue Service, Department of the Treasury; Employee Benefits Security Administration, Department of Labor; Centers for Medicare & Medicaid Services, Department of Health and Human Services.

ACTION: Final rule.

SUMMARY: These final rules set forth requirements that amend the regulations under the Public Health Service Act, the Employee Retirement Income Security Act of 1974, and the Internal Revenue Code regarding price transparency reporting requirements for non-grandfathered group health plans and health insurance issuers offering non-grandfathered group and individual health insurance coverage. Specifically, these final rules are intended to improve the standardization, accuracy, and accessibility of public pricing disclosures in line with the goals of Executive Order 14221, ''Making America Healthy Again by Empowering Patients With Clear, Accurate, and Actionable Healthcare Pricing Information.'' With respect to the In-network Rate and out-of-network Allowed Amount machine-readable files, these final rules aim to achieve these goals by adding new contextual files and additional data elements like product type, provider network name, and provider network identifier; changing the reporting level for aggregation of data; removing in-network rates for unlikely provider-to-service mappings; increasing the reporting period and lowering the claims threshold for out-of-network historical data; and reducing the reporting cadence. These final rules also aim to improve the findability of all publicly disclosed machine-readable files required under the Transparency in Coverage rules, including the prescription drug file, by requiring a text file containing contact information for the files, and a footer with website URLs. These final rules also require pricing information that is made available through an online consumer tool and on paper (upon request), to also be made available by phone, and establish that the satisfaction of such requirement also satisfies the requirements of section 114 of the No Surprises Act (including for grandfathered group health plans and health insurance issuers offering grandfathered group and individual health insurance coverage that are not otherwise subject to these final rules).

DATES: These regulations are effective on December 7, 2026.

Alexander Krupnick, Internal Revenue Service, Department of the Treasury, (202) 317–5500.

Individuals interested in obtaining information from the Department of Labor (DOL) concerning employment-based health coverage laws may call the Employee Benefits Security Administration (EBSA) Toll-Free Hotline at 1–866–444–EBSA (3272) or visit the DOL's website (*www.dol.gov/agencies/ebsa*). In addition, information from the Department of Health and Human Services (HHS) on private health insurance coverage and coverage provided by non-Federal governmental group health plans can be found on the Centers for Medicare & Medicaid Services (CMS) website (*http://www.cms.gov/marketplace*), information on health care reform can be found at *http://www.healthcare.gov,* and information on surprise medical bills can be found at *http://www.cms.gov/nosurprises.*

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Purpose

The Departments of Labor, Health and Human Services (HHS), and the Treasury (collectively, the Departments) issued proposed requirements in the 2019 Transparency in Coverage proposed rules (2019 proposed rules) [1] and finalized the rules in 2020 (the 2020 final rules).[2] The rules aimed to provide consumers with price and benefit information that would enable them to better evaluate health care options and make cost-conscious decisions; reduce surprises in consumers' out-of-pocket costs for health care services; create a competitive dynamic that would begin to narrow price differences for the same services in the same health care markets; foster innovation by providing industry the information necessary to support informed, price-conscious consumers in the health care market; and, over time, potentially lower overall health care costs.[3]

The public disclosures made under the 2020 final rules led to the release of an enormous amount of previously hidden pricing data. However, post-implementation, the Departments received feedback from users of the machine-readable files emphasizing the need to address certain gaps in reporting, shrink file size by reducing duplication and removing unnecessary data, and improve the usability of the files.

On February 25, 2025, President Trump issued Executive Order 14221, ''Making America Healthy Again by Empowering Patients With Clear, Accurate, and Actionable Healthcare Pricing Information'' (Executive Order 14221).[4] Among other things, Executive Order 14221 directs the Departments to take all necessary and appropriate action, including issuing proposed regulatory action to promote more transparency in health care pricing information. To better inform a response to Executive Order 14221, on June 2, 2025, the Departments published a Request for Information (RFI) seeking the public's input on ways to effectively implement or amend the prescription drug machine-readable file requirement in the 2020 final rules including information on existing prescription drug file data elements, the ability of health plans to access necessary data for reporting, as well as state approaches and innovation.[5] The Departments plan to begin working to implement the prescription drug file in short order.

To address statutory requirements and fulfill their responsibility under Executive Order 14221, the Departments proposed to amend certain requirements of the 2020 final rules in the December

[1] 84 FR 65464 (November 27, 2019).

[2] 85 FR 72158 (November 12, 2020).

[3] 85 FR 72158, 72160 (November 12, 2020).

[4] Exec. Order No. 14221, 90 FR 11005 (February 28, 2025).

[5] 90 FR 23303 (June 2, 2025).

23, 2025, Transparency in Coverage proposed rules (the proposed rules).[6] The proposed rules addressed what the Departments identified as three main barriers to fully achieving the goals of the 2020 final rules: inaccessibility due to the large size of the machine-readable files, data ambiguity due to lack of contextual information alongside the raw data, andareas of misalignment with the Hospital Price Transparency rules [7] that make comparing data across disclosures challenging. The proposed rules' Executive Summary further discussed the need for price transparency, including how it would benefit employers leveraging the data to lower their health care costs and app developers conducting analyses to offer pricing tools to individuals and employers, in addition to past regulatory and sub-regulatory action (section I.A.).[8]

After consideration of public comment to the proposed rules and to address the need for regulatory action, the Departments are finalizing these rules pursuant to the authority under section 2715A of the Public Health Service (PHS) Act, included in section 715 of the Employee Retirement Income Security Act (ERISA) and section 9815 of the Internal Revenue Code (Code), which provide that non-grandfathered group health plans and health insurance issuers offering non-grandfathered group or individual health insurance coverage must comply with section 1311(e)(3) of the Patient Protection and Affordable Care Act (Affordable Care Act).[9] This section of the Affordable Care Act addresses transparency in health coverage and imposes certain reporting and disclosure requirements on health plans that are seeking certification as qualified health plans (QHPs) that may be offered on an Exchange (as defined by section 1311(b)(1) of the Affordable Care Act).

The Departments are also finalizing these rules pursuant to the authority under the No Surprises Act, which amended chapter 100 of the Code, part 7 of ERISA, and title XXVII of the PHS Act. Among other protections, the No Surprises Act provides Federal protections against surprise billing by limiting out-of-network cost sharing and prohibiting balance billing in many of the circumstances in which surprise bills most frequently arise. Section 114 of the No Surprises Act, which added Code section 9819, ERISA section 719, and PHS Act section 2799A–4, requires group health plans and health insurance issuers to offer price comparison guidance by telephone and make a ''price comparison tool'' available on the plan's or issuer's website.

B. Summary of Costs and Cost Savings

BILLING CODE 3510–60–P

TABLE 1a: Summary of Annual Costs

Provision Description	Annual Cost ($)
Information Collection Requests (ICRs) Regarding Requirements for Disclosures to Participants, Beneficiaries, or Enrollees Under 26 CFR 54.9815-2715A2, 29 CFR 2590.715-2715A2, and 45 CFR 147.211*	$60,450,000
ICRs Regarding Requirements to Implement the Disclosures Required for the Utilization File (26 CFR 54.9815-2715A3(b)(2)(i), 29 CFR 2590.715-2715A3(b)(2)(i), and 45 CFR 147.212(b)(2)(i))	$9,552,155
ICRs Regarding Requirements to Respond to Machine-Readable File Inquiries (26 CFR 54.9815-2715A3(b)(2)(iii), 29 CFR 2590.715-2715A3(b)(2)(iii), and 45 CFR 147.212(b)(2)(iii))	$7,475,608
ICRs Regarding Requirements to Attest to the Accuracy and Completeness of Machine-Readable Files (26 CFR 54.9815-2715A3(b)(1)(iv), 29 CFR 2590.715-2715A3(b)(1)(iv), and 45 CFR 147.212(b)(1)(iv))	$2,961,863
Total	**$80,439,626**

* High-end estimates are represented in the table and used to determine the overall average annual cost.

[6] 90 FR 60432 (December 23, 2025).

[7] Medicare and Medicaid Programs: CY 2020 Hospital Outpatient PPS Policy Changes and Payment Rates and Ambulatory Surgical Center Payment System Policy Changes and Payment Rates. Price Transparency Requirements for Hospitals To Make Standard Charges Public, 84 FR 65524 (November 27, 2019); Medicare Program: Hospital Outpatient Prospective Payment and Ambulatory Surgical Center Payment Systems and Quality Reporting Programs; Price Transparency of Hospital Standard Charges; Radiation Oncology Model, 86 FR 63458 (November 16, 2021); Medicare Program: Hospital Outpatient Prospective Payment and Ambulatory Surgical Center Payment Systems; Quality Reporting Programs; Payment for Intensive Outpatient Services in Hospital Outpatient Departments, Community Mental Health Centers, Rural Health Clinics, Federally Qualified Health Centers, and Opioid Treatment Programs; Hospital Price Transparency; Changes to Community Mental Health Centers Conditions of Participation, Changes to the Inpatient Prospective Payment System Medicare Code Editor; Rural Emergency Hospital Conditions of Participation Technical Correction, 88 FR 81540 (November 22, 2023); Medicare Program: Hospital Outpatient Prospective Payment and Ambulatory Surgical Center Payment Systems; Quality Reporting Programs; Overall Hospital Quality Star Rating; Hospital Price Transparency; and Notice of Closure of a Teaching Hospital and Opportunity To Apply for Available Slots, 90 FR 53448 (November 25, 2025).

[8] 90 FR 60432 (December 23, 2025).

[9] Except that under section 2715A of the PHS Act, a plan or coverage that is not offered through the Exchange is only required to submit information to the applicable Secretary and the State insurance commissioner, and to make such information available to the public.

TABLE 1b: Summary of One-Time Costs

Provision Description	Total Cost ($)
ICRs Regarding Requirements to Update Cost-Sharing Disclosure Reflecting Federal Balance Billing Protections (26 CFR 54.9815-2715A2, 29 CFR 2590.715-2715A2, and 45 CFR 147.211)	$45,934
To Train Customer Service Representatives and Supervisors to Provide Cost-Sharing Information for ICRs Regarding Requirements for Disclosures to Participants, Beneficiaries, or Enrollees to Provide Pricing Information via Phone (26 CFR 54.9815-2715A2, 29 CFR 2590.715-2715A2, and 45 CFR 147.211*)	$14,597,802
ICRs Regarding Requirements to Organize Files by Provider Network, Allow Service Providers or Other Parties to Organize by Provider Network Across Multiple Self-Insured Group Health Plans, and Include a Common Provider Network Name and Provider Network Identifier (26 CFR 54.9815-2715A3(b)(1)(i) and (b)(5)(iii), 29 CFR 2590.715-2715A3(b)(1)(i) and (b)(5)(iii), and 45 CFR 147.212(b)(1)(i) and (b)(5)(iii))	$51,671,077
ICRs Regarding Requirements to Include Product Type in Both In-network Rate and Allowed Amount Files (26 CFR 54.9815-2715A3(b)(1)(i)(C) and (b)(1)(ii)(A), 29 CFR 2590.715-2715A3(b)(1)(i)(C), and (b)(1)(ii)(A), and 45 CFR 147.212(b)(1)(i)(C) and (b)(1)(ii)(A))	$7,688,387
ICRs Regarding Requirements to Report Dollar Amounts Except for Only "Percentage-of-Billed Charges" Payments (26 CFR 54.9815-2715A3(b)(1)(i)(E)(1), 29 CFR 2590.715-2715A3(b)(1)(i)(E)(1), and 45 CFR 147.212(b)(1)(i)(E)(1))*	$7,688,387
ICRs Regarding Requirements to Exclude Certain Providers From In-network Rate Files and to Publish Taxonomy Files (26 CFR 54.9815-2715A3(b)(1)(i)(F), 29 CFR 2590.715-2715A3(b)(1)(i)(F) and 45 CFR 147.212(b)(1)(i)(F), and 26 CFR 54.9815-2715A3(b)(2)(iii), 29 CFR 2590.715-2715A3(b)(2)(iii), and 45 CFR 147.212(b)(2)(iii))	$46,130,323
ICRs Regarding Requirements to Aggregate Allowed Amount Files by Market Type and Allow Service Providers or Other Parties to Aggregate by Market Type Across Multiple Self-Insured Group Health Plans (26 CFR 54.9815-2715A3(b)(1)(ii), 29 CFR 2590.715-2715A3(b)(1)(ii), and 45 CFR 147.212(b)(1)(ii) and Permit Such Aggregation at the Third-Party Administrator (TPA) Level (26 CFR 54.9815-2715A3(b)(5)(iv), 29 CFR 2590.715-2715A3(b)(5)(iv), and 45 CFR 147.212(b)(5)(iv))	$15,376,774
ICRs Regarding Requirements to Implement the Utilization File (26 CFR 54.9815-2715A3(b)(2)(i), 29 CFR 2590.715-2715A3(b)(2)(i), and 45 CFR 147.212(b)(2)(i))	$175,037,782
ICRs Regarding Requirements to Add a Text File and Identify Point-of-Contact Information for Inquiries to Improve Discoverability and Accessibility of Machine-Readable Files (26 CFR 54.9815-2715A3(b)(2)(iii), 29 CFR 2590.715-2715A3(b)(2)(iii), and 45 CFR 147.212(b)(2)(iii))	$5,356,416
ICRs Regarding Requirements to Publish Machine-Readable Files in a Single Non-Proprietary, Open-Standards Format 26 CFR 54.9815-2715A1(b)(3)(i), 29 CFR 2590.715-2715A1(b)(3)(i), and 45 CFR 147.212(b)(3)(i))	$4,483,653
ICRs Regarding Requirements to Attest to the Accuracy and Completeness of Machine-Readable Files (26 CFR 54.9815-2715A3(b)(1)(iv), 29 CFR 2590.715-2715A3(b)(1)(iv), and 45 CFR 147.212(b)(1)(iv))	$5,046,281
ICRs Regarding Requirements for Phased Implementation of New and Amended Machine-Readable File Requirements (26 CFR 54.9815-2715A3(c)(1)(ii)-(iii), 29 CFR 2590.715-2715A3(c)(1)(ii)-(iii), and 45 CFR 147.212(c)(1)(ii)-(iii))	$66,624,563
Total	**$399,747,381**

* High-end estimates are represented in the table and used to determine the overall average one-time costs.

TABLE 1c: Summary of Annual Cost Savings[10]

Provision Description	Annual Amount ($)
For third-party developers and other file users: ICRs Regarding (1) Requirements to Reduce Data Cleaning Computational Costs (26 CFR 54.9815-2715A3(b)(1)(i)(F), 29 CFR 2590.715-2715A3(b)(1)(i)(F) and 45 CFR 147.212(b)(1)(i)(F)), and (2) Changing Timing Requirements for Machine-Readable Files Reporting From Monthly to Quarterly (26 CFR 54.9815-2715A3(b)(4), 29 CFR 2590.715-2715A3(b)(4), and 45 CFR 147.212(b)(4))	-$9,147,120
For plans, issuers, third-party developers, employers, and other file users: ICRs Regarding (1) Requirements to Reduce Storage Costs (26 CFR 54.9815-2715A3(b)(1)(i)(F), 29 CFR 2590.715-2715A3(b)(1)(i)(F) and 45 CFR 147.212(b)(1)(i)(F)), and (2) Changing Timing Requirements for Machine-Readable Files Reporting From Monthly to Quarterly (26 CFR 54.9815-2715A3(b)(4), 29 CFR 2590.715-2715A3(b)(4), and 45 CFR 147.212(b)(4))	-$73,317,600
For plans and issuers: ICRs Regarding (1) Requirements to Reduce Network Egress Costs (26 CFR 54.9815-2715A3(b)(1)(i)(F), 29 CFR 2590.715-2715A3(b)(1)(i)(F) and 45 CFR 147.212(b)(1)(i)(F)), and (2) Changing Timing Requirements for Machine-Readable Files Reporting From Monthly to Quarterly (26 CFR 54.9815-2715A3(b)(4), 29 CFR 2590.715-2715A3(b)(4), and 45 CFR 147.212(b)(4))	-$171,126,000
For third-party developers and other file users: ICRs Regarding Requirements to Reduce Time Locating Files by Requiring a Text File and Footer Links to Quickly Find Machine-Readable Files (26 CFR 54.9815-2715A2(b)(2)(iii) and (b)(3)(iii), 29 CFR 2590.715-2715A2(b)(2)(iii) and (b)(3)(iii), and 45 CFR 147.212(b)(2)(iii) and (b)(3)(iii))	-$1,344,120
Total	**-$254,934,840**

BILLING CODE 3510–60–C

II. Background

A. Statutory Background and Enactment of the Affordable Care Act and the No Surprises Act

The Patient Protection and Affordable Care Act (Pub. L. 111–148) was enacted on March 23, 2010, and the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152) was enacted on March 30, 2010 (collectively the Affordable Care Act). As relevant here, the Affordable Care Act reorganized, amended, and added to the provisions of part A of title XXVII of the PHS Act relating to health coverage requirements for group health plans and health insurance issuers. The term group health plan includes both insured and self-insured group health plans.

The Affordable Care Act also added section 715 to ERISA and section 9815 to the Code to include the provisions of part A of title XXVII of the PHS Act, PHS Act sections 2701 through 2728, into ERISA and the Code, making them applicable to group health plans and health insurance issuers providing coverage in connection with group health plans.

Section 2715A of the PHS Act, included in section 715 of ERISA and section 9815 of the Code, provides that plans and issuers must comply with section 1311(e)(3) of the Affordable Care Act, which addresses transparency in health coverage and imposes certain reporting and disclosure requirements for health plans that are seeking certification as qualified health plans that may be offered on an Exchange. A plan or coverage that is not offered through an Exchange (as defined by section 1311(b)(1) of the Affordable Care Act) is required to submit the information required to the relevant Secretary and the relevant State's insurance commissioner, and to make that information available to the public.

Title I of Division BB of the Consolidated Appropriations Act of 2021, which included the No Surprises Act, added new provisions applicable to plans and issuers in subchapter B of chapter 100 of the Code, part 7 of ERISA, and parts D and E of title XXVII of the PHS Act. As relevant here, section 107 of the No Surprises Act added new section 9816(e) of the Code, section 716(e) of ERISA, and section 2799A–1(e) of the PHS Act, which contain requirements for plans and issuers to include certain information, in clear writing, on any physical or electronic plan or insurance identification card issued to the participants or beneficiaries in the plan or coverage. This information includes any deductible applicable to such plan or coverage, any out-of-pocket maximum limitation applicable to such plan or coverage, and a telephone number and internet website address through which such individual may seek consumer assistance information.

Further, section 114 of the No Surprises Act added section 9819 of the Code, section 719 of ERISA, and section 2799A–4 of the PHS Act, which require plans and issuers to offer price comparison guidance by telephone and make available on the internet website of the plan or issuer a price comparison tool that (to the extent practicable) allows an individual enrolled under such plan or coverage, with respect to such plan year, such geographic region, and participating providers with respect to such plan or coverage, to compare the amount of cost sharing that the individual would be responsible for paying under such plan or coverage with respect to the furnishing of a specific item or service by any such provider.

[10] For purposes of the Summary of Annual Cost Savings table and Executive Order 14192, negative values reflect reductions in costs with respect to monetized cost savings.

B. Executive Orders and Regulations

On June 24, 2019, President Trump issued Executive Order 13877, ''Improving Price and Quality Transparency in American Healthcare to Put Patients First.'' [11] Executive Order 13877 sought to improve transparency in health care and empower patients to make fully informed decisions about their health care. As Executive Order 13877 noted, ''patients often lack both access to useful price and quality information and the incentives to find low-cost, high-quality care.'' The ''opaque pricing structures'' may harm the market by protecting ''powerful special interest groups, such as large hospital systems and insurance companies'' while ''leav[ing] patients and taxpayers worse off than would a more transparent system.'' [12]

Executive Order 13877 directed the Departments to take action that would combat this issue by making meaningful price and quality information more broadly available to more Americans, thereby increasing competition, innovation, and value in the health care system. Specifically, section 3(b) of Executive Order 13877 directed the Secretaries of the Departments to issue an advance notice of proposed rulemaking, consistent with applicable law, soliciting comment on a proposal to require health care providers, health insurance issuers, and self-insured group health plans to provide or facilitate access to information about expected out-of-pocket costs for items or services to patients before they receive care.

To fulfill their responsibility under Executive Order 13877, the Departments proposed [13] and subsequently finalized the Transparency in Coverage rules in the 2020 final rules.[14] The 2020 final rules, published by the Departments on November 12, 2020, implemented section 2715A of the PHS Act, which requires group health plans and health insurance issuers offering group or individual health insurance coverage to comply with section 1311(e)(3) of the Affordable Care Act.

The 2020 final rules required non-grandfathered health plans and health insurance issuers offering non-grandfathered group or individual health insurance coverage to disclose cost-sharing information for all covered items and services to participants, beneficiaries, and enrollees through an internet-based self-service tool or, if requested by the individual, on paper. Those provisions of the 2020 final rules implemented paragraph (C) of section 1311(e)(3) of the Affordable Care Act.

The 2020 final rules also required non-grandfathered plans and health insurance issuers offering non-grandfathered group or individual health insurance coverage to disclose on a public website three separate machine-readable files containing certain information regarding health care pricing under the plan or coverage. Those provisions of the 2020 final rules, requiring plans and issuers to disclose in-network negotiated rates, out-of-network allowed amounts and the associated billed charges, and negotiated rates and historical net prices for prescription drugs, implemented paragraph (A) of section 1311(e)(3) of the Affordable Care Act. In particular, the provisions requiring the disclosure of out-of-network allowed amounts specifically implemented the requirement in section 1311(e)(3)(A)(vii) of the Affordable Care Act that require issuers of qualified health plans (QHPs) to provide information on ''payments with respect to any out-of-network coverage.'' In addition, the Secretary of HHS determined that requiring disclosure of payment information on in-network rates and prescription drugs was appropriate under section 1311(e)(3)(A)(ix) of the Affordable Care Act.

After the 2020 final rules were issued, interested parties used GitHub and other forums to bring to the Departments' attention specific questions related to implementation and compliance. In response, the Departments have issued Frequently Asked Questions (FAQs) [15] and technical guidance.[16]

On February 25, 2025, President Trump issued Executive Order 14221,[17] ''Making America Healthy Again by Empowering Patients With Clear, Accurate, and Actionable Healthcare Pricing Information.'' Executive Order 14221 stated that ''[m]aking America healthy again will require empowering individuals with the best information possible to inform their life and healthcare choices'' with the goal to ''make more meaningful price information available to patients to support a more competitive, innovative, affordable, and higher quality healthcare system.'' To that end, the Executive Order directs the Departments to ''promote universal access to clear and accurate healthcare prices[;] . . . to improve existing price transparency requirements; increase enforcement of price transparency requirements; and identify opportunities to further empower patients with meaningful price information, potentially including through the expansion of existing price transparency requirements.'' [18]

Section 3 of Executive Order 14221 directs the Secretaries of the Departments to rapidly implement and enforce the health care price transparency regulations issued pursuant to Executive Order 13877,[19] including action to: ''(a) require the disclosure of the actual prices of items and services, not estimates; (b) issue updated guidance or proposed regulatory action ensuring pricing information is standardized and easily comparable across hospitals and health plans; and (c) issue guidance or proposed regulatory action updating enforcement policies designed to ensure compliance with the transparent reporting of complete, accurate, and meaningful data.'' [20] To fulfill their responsibility under Executive Order 14221, on December 23, 2025, the Departments published the proposed rules to amend the 2020 final rules.

C. Statutory Background for Enforcement With Regard to the Affordable Care Act and the No Surprises Act

The enforcement responsibilities of HHS and the States, with respect to oversight of compliance with the Federal insurance market reforms, are set forth in the PHS Act. Pursuant to section 2723(a)(1) of the PHS Act, as amended by the No Surprises Act, States have primary enforcement authority over health insurance issuers regarding the provisions of parts A and

D of title XXVII of the PHS Act. Under this framework, HHS has enforcement authority over issuers in a State if the State indicates it cannot or will not enforce a provision (or provisions) of part A or D of title XXVII of the PHS Act, or the Secretary of HHS makes a determination that the State is failing to substantially enforce a provision (or provisions) of part A or D of title XXVII of the PHS Act.[21] HHS also has primary enforcement authority with respect to the same provisions over non-Federal governmental plans, such as those sponsored by State and local government employers.[22]

The Departments of Labor and the Treasury generally have primary enforcement authority over private sector employment-based group health plans. The Internal Revenue Service (IRS) has jurisdiction over certain church plans.

D. Public Comments Received in Response to the Proposed Rules

The Departments received comments from 132 commenters in response to the proposed rules from a wide variety of interested parties, including private citizens; consumer and advocacy organizations; employers and other plan sponsors; health information technology, health care consulting, and health care staffing companies; health care providers and facilities, and health systems; health insurance issuers; service providers, including third-party administrators (TPAs); trade and professional associations; and researchers and academics. Many commenters provided detailed feedback on multiple aspects of the proposed rules and in response to various specific comment solicitations included in the preamble to the proposed rules.

The Departments received many comments expressing general support for the proposed rules, stating that the proposals would help control health care costs and empower consumers to make more informed decisions by improving the accuracy and usability of Transparency in Coverage data, reducing administrative burden for plans and issuers, and aligning with the Hospital Price Transparency requirements. The Departments also received many comments supporting technical and structural changes, including moving to network-level reporting, standardizing file structures, requiring additional contextual information, moving to a quarterly reporting cadence, requiring footer links to the location of the machine-readable files, and excluding from the data set providers who are unlikely to provide services typically outside their scope of practice. The Departments also received several comments supporting alignment with the Hospital Price Transparency requirements, stating that such alignment would reduce duplication, facilitate comparisons, and support more meaningful analyses of health care cost drivers. The Departments respond to these comments in section III. of this preamble.

The Departments also received several comments expressing general disagreement with the proposed rules and concern with the Departments' broader approach to Transparency in Coverage, stating that the proposals leave significant gaps that would undermine the goals of the statute. Several commenters expressed concern that the proposed rules could reduce competition in concentrated health insurance markets and place insufficient emphasis on quality as a factor in health care decision-making and suggested that the Departments work directly with physicians and other providers to inform price transparency. The Departments also received several comments stating that, despite the proposed improvements, fundamental issues of machine-readable file incompleteness, ambiguity, and usability would persist and continue to hinder data interpretation. In addition, several commenters did not support the proposed rules because they believed the proposals would increase costs and administrative burden for group health plans, particularly small and regional plans, and make the machine-readable files more complex for users to access. The Departments also received several comments expressing concern that the proposed rules favor researchers and academics over the development of consumer decision-support tools and focus on price without including quality or outcomes data needed to inform consumer decision-making.

The Departments received many comments suggesting additional ways in which the Departments could use their statutory authority to strengthen the Transparency in Coverage requirements, particularly by reducing barriers to accessibility and improving data usability. The Departments received a few comments recommending standardized, plain-language, consumer-facing summaries that translate machine-readable file data into estimated out-of-pocket costs, including deductible status, coinsurance, and network tier information. The Departments also received a few comments noting that issuers relying on TPAs to comply with Transparency in Coverage requirements may face barriers to accessing their own data. A few commenters recommended requiring the establishment of a unified national standards authority, creation of a national database compiling machine-readable file rates, and expansion of reporting requirements to additional payers or coverage programs, such as Medicaid managed care plans and Medicare Advantage plans.

Many commenters requested the Departments increase their enforcement activity, including through an increased use of audits, warning letters, corrective action plans, and monetary fines. Additionally, a commenter encouraged the Departments to take steps to publicly disclose information related to non-compliance warnings, corrective action plans, and civil money penalties, similar to existing enforcement protocols under the Hospital Price Transparency requirements.

The Departments respond to these comments in more detail in the relevant subsections of section III. of this preamble. The Departments recognize that plans and issuers may need to examine contracts with TPAs to identify if changes are necessary to enable access to the data required under these final rules. The Departments are not requiring standardized summaries of estimated out-of-pocket costs, including deductible status, coinsurance, and network tier information, because the data in the machine-readable files are rates and historic billed charges only and cannot reflect an individual consumer's personalized estimated cost-sharing liability, including accumulators and deductible progress. Requiring this information to be made available in the machine-readable files would be duplicative of the personalized cost-sharing information available through the internet-based self-service tool.[23] Nevertheless, the Departments anticipate that researchers, employers, and other file users will use the machine-readable file data to analyze and compare health care prices and that third-party developers will build tools and apps that make the information more accessible and useful to consumers and other purchasers of health care, thereby promoting greater transparency for the broader public benefit.

The Departments appreciate commenters' suggestion to create a national database of compiled machine-

[21] *See* PHS Act section 2723(a)(2) and (b)(1)(A); 45 CFR 150.203.

[22] PHS Act section 2723(b)(1)(B).

[23] 26 CFR 54.9815–2715A2(b)(2)(i), 29 CFR 2590.715–2715A2(b)(2)(i), and 45 CFR 147.211(b)(2)(i).

readable file negotiated rates and allowed amounts, but note that plans and issuers have been posting their files in an established manner for more than four years, creating consistency in their operations and for the public in finding the files. Additionally, findability will be further enhanced through the Text File as discussed in section III.C.8.d. of this preamble and the footer requirement as discussed in section III.C.10. of this preamble. Creating a new system to submit such information to the Departments would be overly burdensome in light of the other new requirements in these final rules. Further, rules regarding Medicaid managed-care and Medicare Advantage plans are beyond the scope of section 2715A of the PHS Act and these final rules.

A commenter noted that some payers have not meaningfully updated machine-readable file data in years and warned that without an enforcement mechanism tied to update frequency, the quarterly cadence risks allowing widespread noncompliance to persist.

A commenter recommended that the Departments clarify the distinct role of States and the Federal Government and their jurisdictions in enforcement responsibility. Another commenter recommended that the Departments assign primary enforcement authority to a Federal entity, such as the Center for Consumer Information and Insurance Oversight (CCIIO), to improve compliance with the Transparency in Coverage requirements. Another commenter encouraged the Departments to increase coordination with State departments of insurance.

A commenter requested that the Departments create a safe harbor or non-enforcement policy for employers who report non-compliance to the Departments, given that many health insurance purchasers hire service providers to handle their machine-readable file responsibilities. Another commenter wanted the Departments to require owners of the provider networks to share a complete and accurate set of health claims data with a self-insured plan sponsor and their service providers. A commenter requested that the Departments defer to States when regulating ERISA plans, as well as strengthen enforcement authority over ERISA plan administrators. A few commenters encouraged the Departments to establish new enforcement procedures, and one of these commenters criticized the Departments for relying on a discretion-based enforcement approach. A commenter encouraged the Departments to increase coordination with State departments of insurance.

The Departments look forward to the reforms put forth by these final rules helping achieve the promise of price transparency to empower Americans and lower costs. The Departments agree that enforcement of the Transparency in Coverage requirements is critical to the ongoing usefulness of the published data and share commenters' concerns about plans and issuers failing to maintain updated and accurate files as required. The Departments also recognize that there is continued public interest in learning about compliance and enforcement actions with respect to the Transparency in Coverage requirements.

The Departments have been engaged in compliance and enforcement efforts since the 2020 final rules requirements became effective. With the implementation of these final rules, the Departments will prioritize compliance and enforcement through existing authorities and will work to ensure that any enforcement actions will be transparent to the public.

Under chapter 100 of the Code, Part 7 of ERISA, and title XXVII of the PHS Act, as applicable, the Departments may require corrective actions and impose civil monetary penalties, or seek equitable or other forms of remedial relief[24] through voluntary compliance or otherwise, to the extent permitted under applicable law, when the Departments find violations through market conduct examinations and investigations of plans and issuers within their jurisdiction.

With respect to the commenter who requested clarity on which entities have enforcement authority, the Departments reiterate the applicable jurisdictions of enforcement authority stated at the beginning of section II.C. of this preamble. The Department of Labor has primary enforcement authority over ERISA plans. State regulators maintain enforcement authority over health insurance coverage offered by health insurance issuers in the group and individual markets unless the State notifies HHS that it has not enacted legislation to enforce or HHS determines that a State has failed to substantially enforce such requirements, as described in section 2723(a)(2) of the PHS Act and implementing regulations under 45 CFR 150 subpart B. HHS has direct enforcement authority over non-Federal governmental plans in all jurisdictions.

In response to the commenter who requested that the Departments require owners of provider networks to share a complete and accurate set of health claims data with a self-insured plan sponsor and their service providers, the Departments remind plans and issuers of the prohibitions on gag clauses under the Consolidated Appropriations Act, 2021. Specifically, section 9824 of the Code, section 724 of ERISA, and section 2799A–9(a)(1) of the PHS Act prohibit group health plans and health insurance issuers offering group health insurance coverage from entering into an agreement with a health care provider, network or association of providers, TPA, or other service provider offering access to a network of providers that would directly or indirectly restrict the plan or issuer from electronically accessing de-identified claims and encounter information or data for each participant, beneficiary, or enrollee in the plan or coverage upon request, consistent with certain Federal privacy regulations.[25]

With respect to the commenter who expressed concerns about employers' and self-insured plans' ability to comply with the requirements of these final rules, the Departments point to the special rules as finalized in this rule at 26 CFR 54.9815–2715A3(b)(5), 29 CFR 2590.715–2715A3(b)(5), and 45 CFR 147.212(b)(5), which articulate responsibility for group plans that enter into a written agreement with a health insurance issuer or a third party to provide the required machine-readable file information. If a self-insured plan sponsor is concerned that the plan's TPA may not be capable of fulfilling the requirements of the rule on its behalf, the plan should take all necessary steps to address such concern in its contract with the TPA.

The Departments received one comment seeking confirmation that, as stated in the preamble to the 2020 final rules,[26] ''denominational health plans'' are outside the scope of the Transparency in Coverage requirements. In the preamble to the 2020 final rules, the Departments stated that all plans subject to section 2715A of the PHS Act must comply with the rule's requirements. The Departments also stated that section 2715A of the PHS Act applies to group health plans and health insurance issuers offering group or individual health insurance coverage and not to, among others, ''denominational health plans,'' without defining the term. These final rules do not exclude denominational health plans that are church plans within the

[24] Including under ERISA section 502(a)(5).

[25] As added by section 201 of title II (Transparency) of division BB of the Consolidated Appropriations Act, 2021.

[26] 85 FR 72158, 72252 (November 12, 2020).

meaning of section 3(33) of ERISA and section 414(e) of the Code because church plans are group health plans and the Departments have concluded that the statute provides no authority to exclude them.

Many commenters wanted the Departments to focus enforcement not just on whether the machine-readable files are being made publicly available, but to ensure that the data contained within the files are complete and accurate. Another commenter recommended Department-hosted ''connectathon'' events to validate Transparency in Coverage data. Many commenters urged stronger accountability for the validity and accuracy of the data by including attestation requirements, with commenters stating that, without such safeguards, the data would be of limited value to consumers.

In addition to the above enforcement tools, the Departments are finalizing an attestation requirement as an additional step to address the concerns about the accuracy of the information provided and help ensure its validity. The Departments discuss this and respond to the above comments in more detail in section III.C.7. of this preamble.

Many commenters submitted comments that were not within the scope of the policies proposed under the proposed rules, including comments on requirements related to the 2019 Hospital Price Transparency rule,[27] Advanced Explanation of Benefits,[28] the claims review process and timeline, enforcement of the No Surprises Act balance billing protections,[29] price transparency for Medicare plans, future rulemaking plans on additional price transparency policies, and quality data transparency.

After reviewing the comments received, the Departments are finalizing the proposed rules, with some changes in response to comments, as described in more detail later in this preamble, to make pricing information more accurate, more accessible, and more actionable.

E. Technical Amendments

These final rules include a series of technical amendments to the way group health plans and health insurance issuers offering group or individual health insurance coverage are referenced in 26 CFR 54.9815–2715A2 and 54.9815–2715A3, 29 CFR 2590.715–2715A2 and 2590.715–2715A3, and 45 CFR 147.211 and 147.212. In the 2020 final rules, the Departments generally adopted the convention of referring to those entities using the terms ''group health plan'' and ''health insurance issuer'' throughout the regulations, except that where the Departments referred to those entities more than once in the same paragraph, the terms ''plan'' and ''issuer'' were used after the initial instance. However, that convention was not applied evenly.

Therefore, in the proposed rules, the Departments proposed technical amendments to align the terms used to describe those entities with that convention in paragraphs (b)(1)(i)(A), (b)(1)(i)(B), (b)(2)(ii), (b)(3)(i), and (b)(3)(ii) of the internet-based self-service tool disclosure requirements in 26 CFR 54.9815–2715A2, 29 CFR 2590.715–2715A2, and 45 CFR 147.211; and paragraphs (b)(1)(i)(D), (b)(5)(i), and (b)(5)(ii) the machine-readable file disclosure requirements in 26 CFR 54.9815–2715A3, 29 CFR 2590.715–2715A3, and 45 CFR 147.212. The Departments did not receive any comments on these technical amendments and are therefore finalizing them as proposed. These changes are technical in nature and do not affect the rights or obligations of any plan, issuer, or other entity.

In addition, the Departments proposed to modify 26 CFR 54.9815–2715A3(b)(3)(ii), 29 CFR 2590.715–2715A3(b)(3)(ii), and 45 CFR 147.212(b)(3)(ii) to clarify, as written elsewhere in paragraphs (b)(3)(i) and (b)(3)(iii), the machine-readable files being described are in paragraphs (b)(1) and (2) of the section.

For consistency with Department of the Treasury and Department of Labor regulations, HHS is amending the section heading of 45 CFR 147.211 to ''Transparency in coverage—required disclosures to participants, beneficiaries, and enrollees'' instead of ''Transparency in coverage—required disclosures to participants, beneficiaries, or enrollees.''

III. Overview of the Final Rules

A. Definitions

To support proposed amendments to the Allowed Amount File provision (discussed in more detail in section III.C.6. of this preamble) and to promote consistency in data organization, the Departments proposed to add new paragraphs 26 CFR 54.9815–2715A1(a)(2)(xi), 29 CFR 2590.715–2715A1(a)(2)(x), and 45 CFR 147.210(a)(2)(xi) to define the term ''health insurance market'' and to redesignate the paragraphs that follow accordingly.[30] The Departments proposed that ''health insurance market'' would mean, irrespective of State, one of the following:

- The individual market, as defined in 45 CFR 144.103 (other than short-term, limited-duration insurance or individual health insurance coverage that consists solely of excepted benefits).
- The large group market, as defined in 45 CFR 144.103 (other than coverage that consists solely of excepted benefits).
- The small group market, as defined in 45 CFR 144.103 (other than coverage that consists solely of excepted benefits).
- For purposes of self-insured group health plans (other than account-based plans, as defined in 26 CFR 54.9815–2711(d)(6)(i), 29 CFR 2590.715–2711(d)(6)(i), and 45 CFR 147.126(d)(6)(i), and plans that consist solely of excepted benefits), all self-insured group health plans maintained by the plan sponsor.

The Departments sought comment on this proposed definition. After consideration of public comments, the Departments are finalizing this definition with modifications that add cross-reference citations to the relevant definitions of excepted benefits for additional clarity. Specifically, the Departments are adding a cross-reference to the definition of excepted benefits in 45 CFR 148.220 to 26 CFR 54.9815–2715A1(a)(2)(xi)(A), 29 CFR 2590.715–2715A1(a)(2)(x)(A), and 45 CFR 147.210(a)(2)(xi)(A). This definition of the term applies to coverage in the individual health insurance market. The Departments also are adding a cross-reference to the definition of excepted benefits in 26 CFR 54.9831–1(c), 29 CFR 2590.732(c), or 45 CFR 146.145(b) to 26 CFR 54.9815–2715A1(a)(2)(xi)(B) through (D), 29 CFR 2590.715–2715A1(a)(2)(x)(B) through (D), and 45 CFR 147.210(a)(2)(xi)(B) through (D), respectively. This definition of the term applies to group health plans.

Several commenters supported the Departments' proposed definition of ''health insurance market'' for the purposes of the proposed amendments to the Allowed Amount File provision. These commenters expressed that clearly and consistently defining the health insurance market categories

[27] 83 FR 41141 (August 17, 2018).

[28] Public Law 116–260 (Dec. 27, 2020).

[29] Title I of Division BB of the Consolidated Appropriations Act, 2021.

[30] 90 FR 60432, 60442 (December 23, 2025) (proposing to redesignate paragraphs (a)(2)(xi) through (xxii) as paragraphs (a)(2)(xii) through (xxiii) under 26 CFR 54.9815–2715A1 and 45 CFR 147.210; and to redesignate paragraphs (a)(2)(x) through (xxi) as paragraphs (a)(2)(xi) through (xxii) under 29 CFR 2590.715–2715A1).

would reduce ambiguity and variability in reporting. A few commenters also noted that delineating four separate markets and requiring separate out-of-network Allowed Amount machine-readable files for each market would support the comparability of the files and enable more accurate evaluation of affordability, network adequacy, and cost drivers across the system. A few commenters highlighted that this proposed definition aligns concepts of the Transparency in Coverage requirements with requirements included in the No Surprises Act. Another commenter stated that the proposed definition would provide additional information to the public about negotiated rates as they are anchored in qualifying payment amount (QPA) calculations and provide better insight to the Federal agencies tasked with enforcing QPA calculation requirements.

The Departments agree with commenters that the definition of the term ''health insurance market'' promotes consistent data organization across plans and issuers in the market-level Allowed Amount Files, for which the Departments are finalizing requirements, as discussed in section III.C.6. of this preamble, with modifications to cross-reference the relevant definitions of excepted benefits for clarity. The Departments also agree that clearly delineating each market included in the definition and requiring separate machine-readable files for each market supports the analytic value of these files.

A commenter disagreed with the Departments' proposed definition of ''health insurance market.'' The commenter expressed that including self-insured group health plans in the definition would lead to confusion for those plans as well as file users given the variability in State definitions of this term. The commenter recommended that self-insured group health plans be defined as ''self-insured'' separately from ''health insurance market.'' Additionally, another commenter recommended that the Departments use the term ''health coverage market'' rather than ''health insurance market'' given that the proposed definition includes self-insured group health plans.

The Departments acknowledge the commenter's concern about confusion regarding the variability in State definitions of the term, ''health insurance market.'' However, these final rules specify that the definition of ''health insurance market'' for the purposes of organizing the Allowed Amount Files is established ''irrespective of the State.'' Additionally, the Departments are not aware of any confusion among self-insured group health plans based on a similar definition of ''insurance market'' included in the method for calculating the QPA at 26 CFR 54.9816–6(a)(8), 29 CFR 2590.716–6(a)(8), and 45 CFR 149.140(a)(8).[31] The Departments have determined that employing similar definitions for purposes of calculating the QPA under the No Surprises Act and for the Transparency in Coverage regulations reduces burden on interested parties that must fulfill reporting requirements under both regulatory frameworks. To further clarify the definition, the Departments have added cross-reference citations to the relevant definitions of excepted benefits. Therefore, the Departments are finalizing the definition with those modifications.

B. Requirements for Disclosing Cost-Sharing Information to Participants, Beneficiaries, and Enrollees

1. Balance Billing Protection Statement

The Departments proposed to amend the balance billing protection statement that plans and issuers are currently required to include along with the required cost-sharing disclosures to participants, beneficiaries, and enrollees under 26 CFR 54.9815–2715A2(b)(1)(vii)(A), 29 CFR 2590.715–2715A2(b)(1)(vii)(A), and 45 CFR 147.211(b)(1)(vii)(A). The proposed amendments would require language in the balance billing protection statement that the cost-sharing information in the self-service tool does not account for potential additional amounts in situations where applicable State and Federal law allow out-of-network providers to bill participants, beneficiaries, or enrollees for the difference between a provider's billed charges and the sum of the amount collected from the plan or issuer and the amount collected from the participant, beneficiary, or enrollee in the form of a copayment, coinsurance, or deductible amount (the difference referred to as balance billing). These changes were proposed to reflect the existence of the Federal balance billing protections set forth in the No Surprises Act, which were not yet enacted when the current balance billing protection statement language was finalized in the 2020 final rules. This balance billing protection statement would not be required if the State in which the item or service was furnished prohibits all out-of-network providers from balance billing for all items and services payable by the group health plan or health insurance issuer.

The Departments sought comment on this proposal. After consideration of public comments, the Departments are finalizing the amendments to the balance billing protection statement as proposed.

Several commenters supported the proposed amendment to the balance billing protection statement language for the self-service tool. These commenters mentioned that this amendment would clarify patients' No Surprises Act protections and any remaining balance billing risk, giving patients clearer, actionable information to support informed decisions.

The Departments agree with commenters that amending the balance billing protection statement clarifies the protections patients have at both the State and Federal level and informs them of the potential for additional cost-sharing when using the self-service tool for estimates from an out-of-network provider.

A commenter opposed requiring plans and issuers to amend the balance billing protection statement. The commenter noted that statements should inform rather than overwhelm consumers, as excessive notifications can obscure cost information and reduce comprehension. A few other commenters requested flexibility in the wording plans and issuers are allowed to use and recommended the Departments allow plans and issuers to continue using existing disclaimer language, which currently communicates the core point that cost-sharing estimates may not reflect additional amounts that an out-of-network provider may bill when permitted by applicable law.

The Departments have determined that this balance billing protection statement increases comprehension by informing patients of the limits of the balance billing protections they may have under State and Federal laws, which will help mitigate unexpected health care costs when seeing an out-of-network provider. The Departments also note that the balance billing protection statement is an existing requirement and these final rules only amend the existing language to more accurately reflect consumers' rights under the No Surprises Act, which was not yet enacted when the current language in this statement was finalized in the 2020 final rules. The Departments also recognize that plans and issuers have existing balance billing protection statement language. The Departments note that paragraph (b)(1)(vii) does not require disclaimers to be reproduced verbatim. Plans and issuers may

[31] 90 FR 60432, 60442 (December 23, 2025).

continue to use existing disclaimer language to the extent that the language includes the required balance billing information as set forth in these final rules and is written in plain language, as defined in 26 CFR 54.9815–2715A1(a)(2)(xxi), 29 CFR 2590.715–2715A1(a)(2)(xx), and 45 CFR 147.210(a)(2)(xxi). This requirement is designed to ensure that each plan's or issuer's balance billing protection statement accurately describe the scope of the No Surprises Act balance billing protections. The Departments have determined that the balance billing protection statement as amended by these final rules sufficiently informs patients of their potential for additional costs when seeing an out-of-network provider.

2. New Required Method and Format for Disclosing Information to Participants, Beneficiaries, and Enrollees

The Departments proposed to add new 26 CFR 54.9815–2715A2(b)(2)(iii), 29 CFR 2590.715–2715A2(b)(2)(iii), and 45 CFR 147.211(b)(2)(iii) to require plans and issuers to make available to participants, beneficiaries, and enrollees, at their request, the cost-sharing estimates and other disclosures required under 26 CFR 54.9815–2715A2(b)(1), 29 CFR 2590.715–2715A2(b)(1), and 45 CFR 147.211(b)(1) via a telephone number. Under the proposal, the information required via a telephone number would be required to be accurate at the time of the request and provided at the time of the request. Plans and issuers would be required to use the same telephone number that Code section 9816(e), ERISA section 716(e), and PHS Act section 2799A–1(e), as added by section 107 of the No Surprises Act, require be indicated on any physical or electronic plan or insurance identification card issued to participants, beneficiaries, and enrollees for obtaining customer assistance. The Departments also proposed to redesignate paragraph (b)(2)(ii)(D) as new paragraph (b)(2)(iv) and amend paragraph (b)(2)(iv) to remove phone as an example of an alternative means for providing the disclosures by which a participant, beneficiary, or enrollee may request the disclosures required in paragraph (b)(1), because providing the disclosures by telephone is newly required under these rules.

In the proposed rules, the Departments also indicated their intention for these proposals to satisfy the No Surprises Act requirement that plans and issuers provide price comparison guidance by telephone, as set forth in Code section 9819, ERISA section 719, and PHS Act section 2799A–4. The Departments further explained that implementing this requirement would respond to feedback the Departments have received from participants, beneficiaries, and enrollees since the publication of the 2020 final rules, indicating a limited ability to receive cost-sharing information over the phone when requested from plans and issuers. Requiring plans and issuers to provide cost-sharing information in this way would further promote the price transparency goals of providing accurate, real-time pricing to consumers, and making that information accessible to more consumers.

In addition, at paragraph (b)(2)(iii), the Departments proposed to allow group health plans and health insurance issuers to limit the number of providers, about which cost-sharing information for covered items and services is provided, to no fewer than 20 providers per day. The Departments also proposed to require plans and issuers that choose to apply the 20 providers-per-day limit to disclose such limitation to the participant, beneficiary, or enrollee when the request for information is made for disclosures by phone. A similar 20-provider limit was already in place with respect to paper requests at 26 CFR 54.9815–2715A2(b)(2)(ii), 29 CFR 2590.715–2715A2(b)(2)(ii), and 45 CFR 147.211(b)(2)(ii). The Departments noted in the proposed rules that nothing precludes a participant, beneficiary, or enrollee from obtaining cost-sharing information from more than one method, consistent with the requirements for each method. Similarly, for consistency with the requirements for the paper method of delivery under the 2020 final rules, the Departments proposed to require plans and issuers to satisfy requests for cost-sharing information over the phone at the time of the request, and in accordance with the method and format requirements in paragraphs (b)(2)(i)(A) through (C), to ensure that participants, beneficiaries, and enrollees receive information as quickly as possible.

The Departments clarify that the 20-provider limit applies separately to the paper and phone methods. Accordingly, a plan or issuer must disclose cost-sharing information for no fewer than 20 providers by paper per day and no fewer than 20 providers by phone per day, if both are requested. However, there may be overlap with respect to the provider information provided via either method, to the extent a participant requests cost-sharing information both on paper and by phone for any of the same providers. There is no additional requirement that a plan or issuer avoid duplicative responses in that situation.

The Departments requested comment on whether this proposal should include phone service standards to ensure that consumers have access to timely and reliable information, including, in particular, what such standards should include and what parameters should be applied to each criterion. The Departments also requested comment on whether there are other relevant Federal, State, or local standards for phone service quality or any industry practices that the Departments should consider. After consideration of public comments, the Departments are finalizing these requirements as proposed, with minor, non-substantive edits to improve clarity.

Many commenters supported the Departments' proposal to require plans and issuers to make available to participants, beneficiaries, and enrollees, at their request, cost sharing estimates and other required disclosures by phone, noting that this approach aligns with existing obligations under the No Surprises Act, enhances transparency, and supports consumers' ability to plan for out-of-pocket costs and make more informed decisions about their health care. Several commenters emphasized that adding a phone option would help address barriers faced by consumers with limited internet access or lower digital literacy, including individuals residing in rural areas, and appreciated the Departments' efforts to provide multiple ways for individuals to obtain cost sharing information as a means of promoting equity and reducing disparities in access to health care pricing information. A commenter, while supportive of the proposal, expressed concern that this requirement could lead to higher plan costs that may ultimately be passed on to consumers in the form of increased premiums, and encouraged the Departments to explore a unified data center to handle phone requests. Another commenter expressed support for multi-modal access to price comparison tools, including digital platforms and telephonic assistance, but recommended that such access relies on a shared data architecture rather than parallel compliance builds, with a unified information backbone that feeds both digital and phone-based interfaces without duplicating reporting structures.

The Departments agree that aligning the Transparency in Coverage and the No Surprises Act requirements reduces regulatory burden for group health plans and health insurance issuers and minimizes confusion among payers and consumers regarding two overlapping statutory obligations. The Departments

also agree that the phone method of disclosing cost-sharing estimates helps address access concerns by providing an additional method for participants, beneficiaries, and enrollees, including those with lower digital literacy, limited internet access, and disparate geographic location, to obtain cost-sharing information and other required disclosures. The Departments are not pursuing a unified data center to handle phone requests in order to allow each plan or issuer to pursue its own approach to providing cost-sharing estimates over the phone. The Departments acknowledge concerns about potential increases in plan costs but have determined that the benefits of improved access to cost-sharing information justify any potential increases in costs, which the Departments expect would be marginal given that plans and issuers can rely on existing customer service processes to satisfy the requirement.

The Departments further emphasize that nothing in these final rules requires plans and issuers to build separate data systems or back-end infrastructure to support the requirements of the Transparency in Coverage disclosures to participants, beneficiaries, and enrollees across the required methods. The cost-sharing information required to be disclosed via phone is the same information required to be disclosed through the internet-based self-service tool and in paper form. Plans and issuers may use the same underlying data systems to generate cost-sharing information across all three modalities, provided the information disclosed meets the requirements of paragraph (b)(1) and (2), including that it is accurate at the time of the request.

A few commenters expressed concerns about the proposed 20-provider-per-day limit for phone disclosures. These commenters stated that verbally conveying cost-sharing estimates for up to 20 providers during a single call would be impracticable and time-intensive, and could increase the likelihood of consumer confusion, undermining the intended consumer experience. One of those commenters further noted that the higher limit could trigger unpredictable call volumes that reduce service quality for all callers. Some other commenters recommended that the Departments limit the requests to no more than 3 to 5 providers per phone call, while another commenter recommended a limit of 10 providers per business day, stating that this approach would better align with the practical constraints of phone-based interactions while still providing a meaningful ability for participants, beneficiaries, and enrollees to compare provider options.

In the 2020 final rules, the Departments established a limit of no fewer than 20 providers per request for paper-based disclosures. The Departments have determined the phone disclosure limit should be consistent with the paper limit to ensure that these primary alternatives to the internet-based self-service tool ensure consumers receive the same level of access to cost-sharing information regardless of whether they request it by paper or phone because the information is likely sourced in the same manner and only shared differently with the requestor, by paper, or read over the phone. Reducing the phone limit below the paper limit would create a disparity in access to information between these two comparable request-based methods that would disadvantage consumers who rely on the phone-based method, including those with limited digital literacy or limited internet access. The Departments acknowledge the possibility of consumer confusion from having to navigate through up to 20 providers over the phone, but plans and issuers are encouraged to work with consumers to provide cost-sharing estimates in the best way for each individual consumer, including reminding them that information is available by paper, or email, upon request. The Departments further clarify that the 20-provider-per-day limit applies on a per-operational-day basis—that is, per day on which the plans or issuers customer service call center is open and available to receive calls.

The Departments emphasize that the 20-provider limit, if adopted by a plan or issuer, will not necessarily result in cost-sharing information being provided for 20 providers on every call. It represents a maximum limit plans and issuers may impose for participants, beneficiaries, and enrollees who request information. The Departments expect that most consumers will seek relatively straightforward information, such as their out-of-pocket costs for a service from a specific provider or within a limited geographic area. The Departments agree with commenters about the possibility that some phone interactions may result in longer engagements, depending on the number of providers requested. However, the direct engagement afforded through phone interaction also provides an opportunity to ensure the consumer better understands the data and how to use it.

Several commenters opposed adopting additional phone-based service standards, stating that plans and issuers are already subject to customer service expectations, contractual requirements, and applicable State and Federal oversight. A commenter noted the difficulty of evaluating this proposal given that the Departments did not specify the standards under consideration and expressed concern that additional prescriptive requirements could increase cost and complexity without improving consumer access to pricing estimates. The commenter recommended not requiring plans to provide cost estimates on a 24-hour basis but rather allow plans and issuers to align hours of operation with existing customer service hours. Another commenter stated that the ability to fulfill requests by phone varies widely based on plan scale, technical capabilities, and the complexity of requests, and that promulgating one-size-fits-all standards would cause unintended consequences, wasteful expenditure, and administrative burden. A commenter expressed confidence that plans would take reasonable steps to provide the required information within reasonable timelines taking into consideration the facts and circumstances of plan administration and capabilities. Conversely, another commenter encouraged the Departments to finalize additional phone-based service standards and consider establishing clear performance expectations, such as tracking and reporting call wait times, to ensure that phone-based access is reliable and meets consumer needs.

The Departments agree with commenters that plans and issuers are already subject to customer service expectations, contractual requirements, and State oversight applicable to their overall consumer assistance operations. The Departments therefore decline to finalize additional standards beyond those proposed. The Departments have determined that plans and issuers are best positioned to set their own additional customer service standards, including based on standards they may already have in place for handling calls to the customer assistance number on the plan's or policy's identification card. Requiring additional standards, such as hours of operation, would likely be duplicative and unnecessarily burdensome.

A commenter requested that the Departments clearly articulate what operational change is required, noting that the proposal appears to formalize, and potentially expand, expectations for providing phone-based cost-sharing information. The commenter urged the Departments to clarify whether the proposed regulatory change codifies

existing practice or creates new obligations, stating that such clarification would allow plans and issuers to assess whether they are already in compliance with this requirement.

In the 2020 final rules, the Departments finalized phone-based cost-sharing disclosure as an optional means of providing the information required under paragraph (b)(1). Following enactment of the No Surprises Act, which requires plans and issuers to offer price comparison guidance by phone under Code section 9819, ERISA section 719, and PHS Act section 2799A–4, the Departments stated in FAQs Part 49 [32] that they expected to propose rulemaking requiring that the same pricing information that is available through the online tool or in paper form also be provided over the telephone upon request. These final rules codify that expectation by incorporating the phone disclosure requirement into the Transparency in Coverage regulations. For plans and issuers already providing cost-sharing information by phone consistent with the No Surprises Act and the guidance set forth in FAQs Part 49, this rule provides regulatory clarity by establishing a single, consolidated set of requirements across the online, paper, and phone disclosure modalities.

A commenter highlighted potential challenges regarding the operational readiness of service providers to provide real-time, accurate cost-sharing information, including potential underestimation of call volumes. Additionally, the commenter cautioned that service providers are likely to pass compliance costs onto plans through increased administrative fees rather than absorbing these reasonable costs.

As stated in prior rulemaking, including the 2020 final rules, and reiterated in the proposed rules, the obligation to comply with the disclosure requirements under 26 CFR 54.9815–2715A2, 29 CFR 2590.715–2715A2, and 45 CFR 147.211 rests with the group health plan or health insurance issuer offering coverage, even when the plan or issuer contracts with a service provider to perform certain functions on its behalf. The Departments recognize that service providers operating on behalf of plans and issuers may incur costs associated with implementing these requirements and may recover those costs through administrative fees. As discussed in section IV.A. of this preamble, the Departments assume that self-insured group health plans will rely on service providers to implement these requirements and, accordingly, estimate the costs of these changes as costs to plans' service providers. In addition, the Departments expect any resulting increases in administrative fees to be limited because the final requirements largely build on existing infrastructure, systems, and processes, including internet-based self-service tools that many plans, issuers, and service providers have already developed.

A few commenters raised issues outside the scope of the phone-based disclosure provision. A commenter noted that the accuracy of consumer-facing tools ultimately depends on the quality of the underlying machine-readable file data. Another commenter recommended that these final rules establish dispute protections for insured individuals who rely on phone-based cost-sharing estimates, similar to the good faith estimate protections available to uninsured individuals under the No Surprises Act. An additional commenter recommended that the Departments acknowledge in this preamble that price transparency is a necessary but insufficient condition for cost discipline and that the competitive benefit of transparency data depends on incentive alignment among intermediaries.

The Departments appreciate these comments but note that they are outside the scope of the phone disclosure provision finalized in this rule.

3. Compliance With Code Section 9819, ERISA Section 719, and PHS Act Section 2799A–4

The Departments proposed to add new 26 CFR 54.9815–2715A2(c)(7), 29 CFR 2590.715–2715A2(c)(7), and 45 CFR 147.211(c)(7) stating that a group health plan or health insurance issuer satisfies the requirements of Code section 9819, ERISA section 719, and the PHS Act section 2799A–4, as added by section 114 of the No Surprises Act, by providing the information required under paragraph (b)(1) of this section to participants, beneficiaries, and enrollees in accordance with the method and format requirements specified in paragraph (b)(2) of this section.

The Departments also proposed that grandfathered health plans and issuers offering grandfathered individual and group health insurance coverage may comply with the requirements of PHS Act 2715A, as codified in 26 CFR 54.9815–2715A2, 29 CFR 2590.716–2715A2 and 45 CFR 147.211, to satisfy the requirements of Code section 9819, ERISA section 719, and PHS Act section 2799A–4.

The Departments sought comment on all aspects of this proposal. After consideration of public comments, the Departments are finalizing these provisions as proposed.

A few commenters strongly supported the Departments' proposal to treat compliance with the Transparency in Coverage cost-sharing disclosure requirements as satisfying the No Surprises Act price comparison tool obligations under Code section 9819, ERISA section 719, and PHS Act section 2799A–4. These commenters stated that requiring plans and issuers to build two separate self-service tools would impose significant unnecessary operational burdens and duplicate infrastructure costs. A commenter noted that a single, unified self-service tool would be an administrative simplification that would allow health plans and issuers to direct implementation resources toward improving the availability and accuracy of cost-sharing estimates made available through their existing self-service tools. Other commenters emphasized that a single tool would prevent considerable consumer confusion and support a more consistent consumer experience across channels. Another commenter supported the proposed alignment of the Federal statutory requirements and noted appreciation that State law variations need not be addressed within this provision.

The Departments agree that maintaining two functionally equivalent but separately administered self-service tools would impose significant burdens on plans and issuers without a corresponding benefit to consumers. The Departments also agree that subjecting plans and issuers to overlapping regulatory obligations to build separate tools offering substantially similar information would be administratively inefficient and contrary to the consumer-oriented goals of these statutes.

The Departments note that the policy finalized in this provision is limited to the alignment of Federal requirements, and specifically, that plans and issuers providing the information in accordance with the Transparency in Coverage cost-sharing disclosure requirement regulations satisfies the Federal price comparison tool mandates set forth in Code section 9819, ERISA section 719, and PHS Act section 2799A–4, including for grandfathered group health plans and health insurance issuers offering grandfathered group and individual health insurance coverage

[32] U.S. Department of Labor, U.S. Department of Health & Human Services & U.S. Department of the Treasury, *FAQs About Affordable Care Act and Consolidated Appropriations Act, 2021 Implementation Part 49* (August 20, 2021), available at *https://www.cms.gov/cciio/resources/fact-sheets-and-faqs/downloads/faqs-part-49.pdf* and *https://www.dol.gov/sites/dolgov/files/EBSA/about-ebsa/our-activities/resource-center/faqs/aca-part-49.pdf*.

that are not otherwise subject to such requirements. The Departments clarify that satisfying the overlapping Federal statutory requirements does not alter, address, or preempt applicable State laws. Pursuant to section 2724(a) of the PHS Act, and consistent with the framework established in the 2020 final rules, State laws regulating health insurance issuers are not preempted except to the extent they prevent the application of Federal requirements. Therefore, health insurance issuers must continue to independently comply with any applicable State laws.

A commenter recommended that the Departments expand the tool requirements to mandate the disclosure of policies regarding the treatment of cost-sharing assistance. Specifically, the commenter requested that the Departments require group health plans and health insurance issuers to disclose the use of accumulator adjustment programs (AAPs), copay maximizers, and alternative funding programs (AFPs). The commenter also stated that providing this information would help patients and employers avoid benefit designs that may negatively impact patient access, adherence, and outcomes.

The Departments have determined that adding new, substantive disclosure elements to the Transparency in Coverage and No Surprises Act requirements, such as specific flags for AAPs, copay maximizers, or AFPs, is outside the scope of this rulemaking. The purpose of this provision is to align the existing operational requirements of the Transparency in Coverage and No Surprises Act tools, not to introduce new data elements. The Departments note that, under existing Transparency in Coverage regulations, plans and issuers are already required to provide a notice in plain language with the internet-based self-service tool disclosures that includes a statement ''disclosing whether the plan counts copayment assistance and other third-party payments in the calculation of the participant's, beneficiary's, or enrollee's deductible and out-of-pocket maximum.'' [33]

4. Applicability

The Departments proposed to revise 26 CFR 54.9815–2715A2(c)(1), 29 CFR 2590.715–2715A2(c)(1), and 45 CFR 147.211(c)(1) to state that the proposed amendments to paragraphs (b)(1)(i)(A), (b)(1)(i)(B), (b)(1)(vii)(A), (b)(2)(ii), (b)(3)(i), and (b)(3)(ii) and new paragraphs (b)(2)(iii) and (iv), and (c)(7) of these sections would apply for plan years (in the individual market, policy years) beginning on or after January 1, 2027. Until such time, the current provisions of paragraph (b) of these sections would continue to apply.

The Departments sought comment on this proposed applicability date. After consideration of comments, the Departments are finalizing the proposed applicability date but modifying the proposed language at 26 CFR 54.9815–2715A2(c)(1), 29 CFR 2590.715–2715A2(c)(1), and 45 CFR 147.211(c)(1) to convey that all provisions of these sections apply for plan years (in the individual market, for policy years) beginning on or after January 1, 2027, and until such date, plans and issuers must comply with 26 CFR 54.9815–2715A3 revised as of April 1, 2025, 29 CFR 2590.715–2715A3 revised as of July 1, 2025, and 45 CFR 147.211, revised as of October 1, 2025.

A few commenters commented on this proposal. A commenter supported the proposed applicability date as providing adequate implementation time, while a few other commenters recommended the Departments extend the applicability date, which commenters variously recommended delaying an additional 6 months or 12 months, to allow sufficient time to implement the operations, systems, vendor, and training changes necessary to comply with the new requirements. A few additional commenters stated that a fixed applicability date of plan or policy years beginning on or after January 1, 2027—depending on when the final rule is published in 2026—could result in insufficient time for group health plans and health insurance issuers to update their workflows to implement these provisions.

The Departments considered the proposed applicability date in light of the timing of the publication of these final rules. The Departments have determined that because the balance billing protection statement changes required under this section add to a preexisting disclosure requirement in accordance with current paragraph (b)(1)(vii)(A) [34] they require minimal additional time and effort. Furthermore, because group health plans and health insurance issuers already have customer service phone infrastructure in place, the Departments have determined the applicability date in these final rules allows sufficient time for implementation.

With regard to the requirement that plans and issuers make available via phone the cost-sharing estimates and other disclosures required under paragraph (b)(1) of this section, the Departments acknowledge that plans and issuers will need to make operational changes and train customer service representatives to comply with these requirements. However, as the Departments stated in the preamble to the proposed rules, plans and issuers have been anticipating that this method of disclosure would be required since 2021, when the Departments announced their intention to propose rules requiring that the same pricing information that is available through the Transparency in Coverage internet-based self-service tool or in paper form, as described in 26 CFR 54.9815–2715A2(b)(2), 29 CFR 2590.715–2715A2(b)(2), and 45 CFR 147.211(b)(2), must also be provided over the phone upon request, pursuant to Code section 9819, ERISA section 719, and PHS Act section 2799A–4, as added by section 114 of the No Surprises Act.[35] Therefore, the Departments expect many plans and issuers have already made progress toward meeting this requirement since then.

Additionally, as the Departments noted in the preamble to the proposed rules, group health plans and health insurance issuers are already required to include a telephone number through which participants, beneficiaries, and enrollees may seek consumer assistance information on physical or electronic plan or insurance identification cards under Code section 9816(e), ERISA section 716(e), and PHS Act section 2799A–1(e), as added by section 107 of the No Surprises Act.[36] Because new paragraph (b)(2)(iii) requires plans and issuers to leverage that existing telephone number to provide the required cost-sharing estimates and other disclosures, the Departments expect that much of the operations and systems, as well as vendors associated with the existing telephone number can

[33] 26 CFR 54.9815–2715A2(b)(1)(vii)(D), 29 CFR 2590.715–2715A2(b)(1)(vii)(D), and 45 CFR 147.211(b)(1)(vii)(D).

be leveraged for this purpose as well. For these reasons, the Departments are finalizing the applicability date as proposed to ensure consumers can timely access price comparison information over the phone.

Therefore, after consideration of these comments, the Departments have determined that the proposed applicability date for the amendments to paragraphs (b)(1)(i)(A), (b)(1)(i)(B), (b)(1)(vii)(A), (b)(2)(ii), (b)(3)(i), and (b)(3)(ii) and new paragraphs (b)(2)(iii), (b)(2)(iv), and (c)(7), is appropriate and reasonable.

C. Requirements for Public Disclosure of In-Network Rates and Historical Allowed Amount Data for Covered Items and Services From In- and Out-of-Network Providers

1. Provider Network-Level Reporting for the In-Network Rate Files

The In-network Rate File provision in the 2020 final rules at 26 CFR 54.9815–2715A3(b)(1)(i), 29 CFR 2590.715–2715A3(b)(1)(i), and 45 CFR 147.212(b)(1)(i) requires plans and issuers to make available on an internet website a machine-readable file that discloses in-network provider rates for covered items and services, with the exception of prescription drugs that are subject to a fee-for-service reimbursement arrangement. The Departments proposed to amend the introductory language of paragraph (b)(1)(i) to require plans and issuers to make available an In-network Rate File for each provider network maintained or contracted by the group health plan or health insurance issuer instead of for each coverage option offered by a group health plan or health insurance issuer. This proposed change was intended to reduce the size and total number of In-network Rate Files, allow file users to more efficiently aggregate and analyze the data, and align reporting more closely to how data is typically reported by hospitals pursuant to the Hospital Price Transparency rules [37] under 45 CFR part 180.

To make it easier for file users to determine in advance of downloading a provider network-level In-network Rate File whether it contains data of interest to them, the Departments proposed to redesignate paragraphs (b)(1)(i)(A) through (C) as paragraphs (b)(1)(i)(B) through (D), respectively, and add a new paragraph (b)(1)(i)(A) requiring each In-network Rate File to report the common provider network name for which negotiated rate information is included. To allow file users to cross-reference a particular plan or policy of interest to its in-network rates, the Departments proposed to amend redesignated paragraph (b)(1)(i)(B) to require plans and issuers to identify, for each provider network for which the group health plan or health insurance issuer must publish an In-network Rate File, each of the plan's or issuer's coverage options that use that network. The Departments also proposed to amend redesignated paragraph (b)(1)(i)(C) to specify that each In-network Rate File must include a billing code and a plain language description for each covered item or service included in the file, rather than under each coverage option offered by plans and issuers. Finally, the Departments proposed to amend redesignated paragraph (b)(1)(i)(D) to specify that all applicable rates must be included for each covered item or service included in the file, rather than for all items or services the plan or issuer covers, since not all applicable rates for items or services the plan or issuer covers are negotiated under a given provider network.

The Departments solicited comment on all aspects of these proposed requirements. After consideration of public comments, the Departments are finalizing these provisions largely as proposed, except that the Departments are adding in new paragraph (b)(1)(i)(B) a requirement that group health plans and health insurance issuers report a provider network identifier, which further redesignates proposed paragraphs (b)(1)(i)(B) through (D) as paragraphs (b)(1)(i)(C) through (E), respectively.

Many commenters supported the proposal to require one In-network Rate File per provider network (instead of per plan or policy) because commenters believe network-level organization would eliminate duplicative rates repeated across many health plans, substantially reduce file size and file counts, make data easier to download and process, better reflect how negotiated rates are operationally managed, better align payer disclosures with Hospital Price Transparency files, improve usability for employers and purchasers, and help clinicians understand network structures and track rate changes over time.

The Departments agree that organizing the In-network Rate File by provider network instead of individual plan or policy will result in the benefits commenters identified. As stated in the proposed rules, the size of the In-network Rate File can be highly dependent on how it is organized. Where multiple plans share the same negotiated rates under an umbrella provider network, organizing the In-network Rate Files by provider network rather than by each individual plan or policy in most cases decreases the size of the files, often significantly, while still maintaining data integrity. It likely also reduces the total number of In-network Rate Files because research indicates that there are far more plans and policies offered than there are distinct, separately managed provider networks.[38] Together, these anticipated reductions are expected to ease the processing burden on both file producers and file users and increase the usability for employers and purchasers. The Departments also agree with the commenters' assertion that network-level organization better reflects how negotiated rates are operationally managed, better aligns with hospital machine-readable files' data, and could help the public understand network structures and track rate changes over time.

In the proposed rules, the Departments sought comment on whether additional limitations on what constitutes a separate provider network should be required. Many commenters recommended the Departments adopt a

[37] Medicare and Medicaid Programs: CY 2020 Hospital Outpatient PPS Policy Changes and Payment Rates and Ambulatory Surgical Center Payment System Policy Changes and Payment Rates. Price Transparency Requirements for Hospitals To Make Standard Charges Public, 84 FR 65524 (November 27, 2019); Medicare Program: Hospital Outpatient Prospective Payment and Ambulatory Surgical Center Payment Systems and Quality Reporting Programs; Price Transparency of Hospital Standard Charges; Radiation Oncology Model, 86 FR 63458 (November 16, 2021); Medicare Program: Hospital Outpatient Prospective Payment and Ambulatory Surgical Center Payment Systems; Quality Reporting Programs; Payment for Intensive Outpatient Services in Hospital Outpatient Departments, Community Mental Health Centers, Rural Health Clinics, Federally Qualified Health Centers, and Opioid Treatment Programs; Hospital Price Transparency; Changes to Community Mental Health Centers Conditions of Participation, Changes to the Inpatient Prospective Payment System Medicare Code Editor; Rural Emergency Hospital Conditions of Participation Technical Correction, 88 FR 81540 (November 22, 2023); Medicare Program: Hospital Outpatient Prospective Payment and Ambulatory Surgical Center Payment Systems; Quality Reporting Programs; Overall Hospital Quality Star Rating; Hospital Price Transparency; and Notice of Closure of a Teaching Hospital and Opportunity To Apply for Available Slots, 90 FR 53448 (November 25, 2025).

[38] *See* Jane M. Zhu, Yuehan Zhang, & Daniel Polsky, *Networks in ACA Marketplaces Are Narrower for Mental Health Care Than for Primary Care,* 36 Health Affairs 9 (September 5, 2017), available at *https://www.healthaffairs.org/doi/10.1377/hlthaff.2017.0325* (finding, based on 2016 *HealthCare.gov* data, 531unique provider networks were used by 281 different issuers, covering 5,022 qualified health plans in the Federally-facilitated Marketplaces). The proposed rules included citations with incorrect authors' names. Those citations have been corrected in these final rules.

clear, prescriptive definition of ''provider network'' (including what constitutes a distinct network) because they were concerned that inconsistent payer interpretations would undermine comparability, complicate enforcement, and limit the usability of network-level reporting. A few commenters provided examples of the variability in issuer network definitions and contracting practices to illustrate the potential impacts of inconsistent network definitions (for example, issuers may define networks at the product level, geographically, or by line of business). Other commenters expressed concern that, without guardrails and clear definitions, network-level reporting could become overly fragmented or otherwise inconsistent. These commenters suggested that over-segmentation could mean a proliferation of small network files (potentially increasing overall file volume), under-segmentation could mean the inclusion of rates that do not apply to many enrollees, and inconsistent naming could prevent reliable cross-payer comparison. A few commenters also recommended that the Departments require plans and issuers to clearly indicate whether a file represents a base network or a derived network, while another commenter recommended that the Departments require a standardized network hierarchy or precedence field and/or logic to be reported to resolve overlapping networks.

The Departments did not define ''provider network'' in the proposed rules but instead instructed plans and issuers to define what constitutes a separate provider network according to their current business practices.[39] This is because, while the Departments acknowledge the possibility of variability among provider network definitions and a potential reduction in comparability among files, these provisions are intended to facilitate analysis of the reported data based on the provider network structures as designed by plans and issuers, rather than require a one-size-fits-all approach.

However, the Departments also acknowledge the possibility of over- and under-segmentation where plans and issuers rely solely on their current business practices without further guidance. Thus, in response to commenters seeking more clarity on what constitutes a provider network, under these final rules, the Departments clarify that each network should represent a single collection of contracted providers and corresponding in-network rates within a defined structure and represent the providers and rates for any member who accesses services while in-network. If variations among either participating providers or in-network rates exist, those variations constitute a separate network (for example, a derived network, which is a separate provider network that is leased from another issuer) and should therefore be reflected in a separate In-network Rate File. Lastly, the Departments recognize that networks can be layered, necessitating that base and derived networks be identified appropriately, and that other network hierarchies can exist as well. The Departments will specify an approach for reporting these network variations through future technical implementation guidance.

Regarding the proposal to require plans and issuers to include the common provider network name as part of their In-network Rate Files, the Departments sought comment on whether there is another term or code, in addition to or instead of the common provider network name, that would help producers or file users identify specific provider networks. Several commenters supported the requirement to include the common provider network name but expressed concern that relying primarily on provider network names may create ambiguity because payers may use different names (for example, one internal and one external) for the same network or similar names for different networks. A few commenters agreed that the network naming conventions should align with the external, consumer-facing marketing name of the network rather than an internal or publicly unknown name. A commenter recommended that the Departments publish guidance on network naming conventions to reduce ambiguity and facilitate cross-payer analysis. Several commenters recommended that the Departments require a standardized network identifier (or require a supplemental network identifier in addition to the common provider network name), because an identifier would support accurate aggregation and comparison, prevent users from treating distinct networks as interchangeable, and improve the ability to link negotiated rates to plan design information and other datasets.

The Departments agree that the common provider network name should be an external name most familiar to participants, beneficiaries, enrollees, and the public, as currently described in technical implementation guidance.[40] As noted in the proposed rules, the purpose of this requirement is to help file users identify specific provider networks, and provider network names used solely within a plan or issuer's internal operations are unlikely to be meaningful or recognizable to file users.[41] The Departments acknowledge commenters' concerns that relying on provider network names alone would create ambiguity because plans and issuers may use different names for the same network or similar names for different networks. However, the Departments are not inclined to direct how plans and issuers must name their networks, and support allowing plans and issuers freedom to maintain existing provider network names and to create new ones within their own existing frameworks. Requiring changes to provider network naming could cause downstream confusion for group health plan sponsors and consumers.

The Departments agree that a second network identifier, in addition to the common provider network name, could help relieve ambiguity by allowing file users to identify distinct networks that use the same or similar names, thus supporting accurate aggregation of in-network rates across multiple plans or policies that use the same network, and linking to other datasets. To that end, the Departments are finalizing at new paragraph (b)(1)(i)(B) the requirement that plans and issuers disclose a provider network identifier, in addition to the common provider network name. The Departments expect plans and issuers to use the existing network identifier used for internal tracking, which the Departments expect would be minimally burdensome to disclose. Instructions on how a plan or issuer may report the network identifier if no network identifier already exists will be provided through future technical implementation guidance.

A few commenters recommended that CMS convene a working group to standardize a network-identification process for networks and associated plans, similar to how Vehicle Identification Numbers for cars are created and managed. Under this recommendation, commenters explained, CMS would create a standard for network identification and assign, register, and manage these identifiers. Creating, standardizing, and managing a network identifier process is beyond the scope of these final rules; however, the Departments acknowledge that there

[39] 90 FR 60432, 60448 (December 23, 2025).

[40] GitHub Users, *GitHub Discussion: In-Network File #897,* GitHub, available at *https://github.com/CMSgov/price-transparency-guide/blob/master/schemas/in-network-rates/README.md#provider-reference-object* (last updated January 8, 2026).

[41] 90 FR 60432, 60448 (December 23, 2025).

may be a benefit to having a standardized network identification process and may take it into further consideration.

Many commenters recommended a clear mapping of plans to provider networks, expressing concern that information could be lost in the transition from plan-level reporting to network-level reporting. Several of these commenters recommended requiring the Table of Contents File to identify the provider networks associated with a given plan. A few commenters suggested plans could be identified using the Employer Identification Number (EIN) and a few other commenters noted Health Insurance Oversight System (HIOS) identifiers (IDs) and group numbers could also identify correct plans and networks. Lastly, a few commenters suggested the Departments provide links to provider directories along with other required plan data.

The Departments agree that retaining plan-level data is essential to the usability of the In-network Rate File. The Table of Contents File is expected in the current technical implementation guidance (also referred to as Schema 2.0) if more than one plan or policy offered by an issuer or plan sponsor shares the same in-network rates. The Departments decline to require the Table of Contents File in regulation in order to maintain the Departments' flexibility to collaborate with industry on technical specifications for most efficiently reporting the required data under the In-network Rate file. For this new organization of the In-network Rate File by provider network as finalized in these rules, the Departments expect—and plan to clarify in future technical implementation guidance—that the In-network Rate File only includes data about contracted providers and their rates. All of the data for plans or policies that use that network (including HIOS, EINs, and group numbers, as appropriate) will be captured in the Table of Contents File, which serves as an external reference to the In-network Rate File. This approach allows seamless mapping of plans and policies to provider networks, while preventing inflated file sizes for the In-network Rate File. Lastly, while the Departments recognize the potential value in providing a link to provider directories because they can help consumers understand provider availability and access, the purpose of the In-network Rate File is to disclose contracted rates for providers by network, not to connect to consumer-facing provider directory information.

A commenter recommended that the In-network Rate Files explicitly exclude ''rental networks'' used solely to supplement a plan's primary network, stating that it would exponentially increase file size while providing information relevant to only a small fraction of utilization. The commenter requested the Departments clarify if plans may limit In-network Rate File disclosures to their primary contracted networks and if they are not required to include secondary rental network arrangements. Another commenter recommended the Departments specify which payer holds the contracts with providers for each network agreement represented by the In-network Rate Files, to help researchers understand each payer's relative market influence. Another commenter recommended the Departments clarify that network-level In-network Rate Files may be partitioned into multiple files or segments, suggesting that plans and issuers may face storage and bandwidth constraints when hosting files that represent large or national networks.

The Departments reiterate that an In-network Rate File must be published for each provider network maintained or contracted by the group health plan or health insurance issuer. Whether that network is rented or owned does not change the plan's or issuer's responsibility to publish rates for that provider network as the network is attached to the product(s) marketed by the plan or issuer and for which there is enrollment. This allows files to be developed independently across multiple provider networks—whether rented or owned—without expanding or increasing In-network Rate File size exponentially. The Departments also acknowledge the potential value to file users of disclosing when networks are owned versus rented but are not finalizing a requirement to include that data element at this time in order to maintain flexibility to engage with industry through GitHub on this issue. However, the Departments may consider adding an optional contextual ''rented vs. owned'' data element to identify network ownership in future technical implementation guidance. Further, both the 2020 final rules and these final rules, as well as Schema 2.0, allow plans and issuers to segment large files when necessary. The Departments recognize that this flexibility is particularly valuable for plans and issuers with large or national networks and intend to maintain it in future iterations of the schema.

Some commenters opposed the proposal to require an In-network Rate File for each provider network maintained or contracted by the group health plan or health insurance issuer. A commenter expressed concern that the proposal could require plans to create more machine-readable files as any change for a given plan, in either the in-network providers or their rates, would be seen as a new network and would require a new In-network Rate File. Another commenter stated that network-level files would reduce the precision of the data where the common provider network name is not granular enough to denote rate variation across employer-sponsored plans, narrow and tiered networks, point-solution carve-outs, and regional plan variants. Another commenter requested that the Departments permit voluntary reporting at the network level and allow plans and issuers to continue reporting In-network Rate Files at the plan level. Lastly, a commenter stated the network should be defined at the rate level as opposed to the provider level to better align with the hospital machine-readable files.

The Departments acknowledge that the proposal could cause plans to create more machine-readable files if they over-segment their provider networks; however, the Departments' clarification earlier in this section of this preamble that a provider network should reflect a single collection of contracted providers and corresponding in-network rates should guide appropriate segmentation. Similarly, this clarification should guide the approach to rate variations and—along with the required provider network identifier—should lessen the risk of reduced data precision due to relying on the common provider network name alone. In addition, organizing the In-network Rate File by provider network is a primary focus of these final rules, and all plans and issuers will be required to reorganize their In-network Rate Files in this manner to ensure consistency and comparability across the files, improve the usefulness of the data, and reduce file size. Lastly, the Hospital Price Transparency machine-readable files required under 45 CFR part 180 identify the standard charge rates a hospital has established with each payer. Aligning with the Hospital Price Transparency requirements would standardize price disclosures, allowing researchers and other file users to more accurately cross-reference and compare information. For these reasons, the Departments have determined this to be the preferred approach for reorganizing the In-network Rate File.

A few commenters made additional recommendations to the Departments regarding the In-network Rate File. A

commenter recommended that the Departments require plans and issuers to report data by provider type, stating that provider type data comparisons—such as assessing mental health and substance use care access and analyzing insurers' parity compliance—are necessary for understanding rates, but these comparisons are not possible without making provider types available. Another commenter expressed concern that many duplicate rates exist for the same service in the In-network Rate Files and recommended the Departments provide adequate differentiation of these rates. Several commenters also recommended contextual data elements to be added to the In-network Rate File that they believed would increase the precision of reported rates such as modifiers, multipliers, conditional clauses, outlier payment methodologies, outlier thresholds, carve-outs, bundled payment logic, capitation and global payment models, uniform service classifications, standard billing code types, and details on pricing and reimbursement methodologies especially for alternative reimbursement arrangements not supported by the schema. A few commenters asserted that inpatient outlier costs account for $100 billion in annual health care spending.

The Departments appreciate these commenters' recommendations and recognize that some of these contextual data elements could provide additional nuance to the rates, while others could address gaps in specificity. These suggested elements are implementation details best addressed in technical implementation guidance given they are highly fact specific. Current technical implementation guidance already addresses modifiers, multipliers, bundled arrangements, capitation and global payment models, uniform service classifications, standard billing code types, and details on pricing and reimbursement methodologies. Further technical guidance will be provided to instruct plans and issuers to provide individual rate details on items that could otherwise be obscured or inappropriately summarized within the In-network Rate Files, such as for certain multipliers and uniform service classifications. Conditional clauses are not currently captured within the structure of the machine-readable file schemas because they generally apply at the contract level rather than to a specific item or service. While the current technical implementation guidance does not address a standardized method for disclosure of outliers, wherein rates may change at high dollar thresholds, the Departments intend to provide additional guidance for Schema 3.0 to accommodate these arrangements, including stop-loss provisions, which are contractual terms designed to protect against excessively high billed charges. Disclosure of these provisions can provide greater transparency into how negotiated rates may be adjusted or applied in atypical or unusually high-cost scenarios.

The Departments also recognize the complexity of reporting carve-outs and are considering whether additional technical implementation guidance would improve consistency in reporting these arrangements. The Departments recognize that grouping provider types (for example, physician, nurse practitioner, etc.) together can make rates ambiguous. The Departments intend to address the means of referencing these provider types to their appropriate rates within the In-network Rate File through future technical implementation guidance in collaboration with industry to determine the most efficient approach. The Departments encourage interested parties to continue to engage the Departments on additional technical modifications to the In-network Rate File reporting on GitHub. Subsequent technical improvements will be addressed in future technical implementation guidance.

Lastly, as a clarification regarding plans without defined networks, as stated in the preamble to the 2020 rules, the Departments expect there will be no In-network Rate File for these types of arrangements because the plan or issuer does not have in-network providers as defined in these final rules.[42] Plans without defined networks will still be required to publish Allowed Amount Files.

2. HIOS Identifier and Product Type

In the proposed rules, the Departments proposed to amend the identifying coverage information that plans and issuers must disclose in the In-network Rate Files at redesignated 26 CFR 54.9815–2715A3(b)(1)(i)(B), 29 CFR 2590.715–2715A3(b)(1)(i)(B), and 45 CFR 147.212(b)(1)(i)(B), and in the Allowed Amount Files at 26 CFR 54.9815–2715A3(b)(1)(ii)(A), 29 CFR 2590.715–2715A3(b)(1)(ii)(A), and 45 CFR 147.212(b)(1)(ii)(A). Specifically, the Departments proposed to remove the requirement for plans and issuers to report the 14-digit HIOS ID or, if the 14-digit HIOS ID is not available, the 5-digit HIOS ID, and instead require them to report the HIOS ID associated with each coverage option for which data is being reported in a form and manner as specified in guidance issued by the Departments. The Departments did not propose to change the requirement that if no HIOS ID is available, plans and issuers must report the EIN. The Departments also proposed to add a requirement for plans and issuers to report the product type (for example, health maintenance organization (HMO) or preferred provider organization (PPO)) associated with the coverage option for which data is being reported. The Departments solicited comment on these proposed requirements. After consideration of comments, the Departments are finalizing these requirements largely as proposed, with the technical modification discussed in section III.C.1. of this preamble to redesignate proposed paragraph (b)(1)(i)(B) as paragraph (b)(1)(i)(C).The Departments are also adding a clarification that HMO and PPO are examples of product types and not an exhaustive list. Many commenters who submitted feedback on this proposal generally supported removing the 14-digit HIOS ID specificity from these final rules. A commenter interpreted the Departments' proposal to remove HIOS digit specificity as a proposal to remove the HIOS ID requirement altogether, stating that the 14-level HIOS ID is invaluable. Another commenter expressed concern that without the 14-digit HIOS ID, it would be hard to identify prices for individual health plans. The commenter recommended that plans and issuers include a crosswalk between networks and HIOS IDs in their Table of Contents Files, and when multiple rates exist within a network for the same service delivered by the same provider, the different HIOS IDs corresponding to each unique rate should be clearly identified. Yet another commenter requested that the Departments require plans and issuers to disclose the EIN of each company that purchases group health insurance coverage on the Small Business Health Options Program Marketplace, along with the HIOS Plan ID of coverage.

Under these final rules, plans and issuers are still required to report the HIOS ID, if they have a HIOS ID, to identify the plan or coverage. The Departments clarify that the addition of the common provider network name field, as discussed in section III.C.1. of this preamble, is a complement to the network-level reporting requirement for the In-network Rate Files and does not replace the HIOS ID as the primary identifier for group or individual health insurance coverage. The Departments

[42] 85 FR 72158, 72228 (November 12, 2020).

have determined that the 14-digit HIOS ID—the most granular identifier—is not always necessary to identify a coverage option. The Departments currently specify the number of HIOS digits in technical implementation guidance and plan to continue doing so at a level of granularity that best supports accurate plan identification while reducing duplicative data, which is a determination the Departments make in collaboration with the GitHub community. As explained in the proposed rules, the Departments have determined that this approach, rather than specifying the number of digits in regulation, better maintains the Departments' flexibility to determine appropriate technical reporting requirements and to make refinements in response to changes in technology or health care industry business practice.[43] The Departments anticipate limited risk that health plans will be unable to be identified, given that all plan data is currently captured in the Table of Contents File, which allows plans and issuers to combine common negotiated rates across multiple In-network Rate Files rather than publishing negotiated rates individually for each plan ID.

The Departments also acknowledge the value of capturing the EINs of small employers that purchase group health insurance coverage through the Small Business Health Options Program as the EIN would serve as the identifier when a HIOS ID may not be available but are not finalizing such a requirement at this time. The Departments are mindful that including additional requirements at this time could jeopardize plans' and issuers' ability to meet the implementation timelines being finalized in this rule and have determined it is appropriate to first assess the impact of the provisions being finalized before including additional data elements that could increase plan and issuer burden. The Departments will explore possible ways to implement this in the future.

With regard to the proposed requirement that plans and issuers include the product type of each plan or policy represented in an In-network Rate File, the Departments sought comment on whether possible inconsistency between State definitions of certain product types would present difficulties for plans and issuers in determining which product type to indicate or cause confusion among file users. The Departments also sought comment on whether self-insured plans generally identify benefit package options by product type, whether there is any existing nomenclature that self-insured plans could use to accurately identify the type of benefit arrangement being offered, and whether it is practical to extend this requirement to self-insured plans.

All commenters who provided feedback on the product type proposal supported it. A few commenters recommended that product type be included at the network level, not the plan or coverage option level, to minimize the likelihoods of duplicative data and increased file size. A few other commenters recommended that the Departments develop consistent definitions of different product types to ensure consistency in reporting. A commenter noted that terms like HMO or PPO can mean different things depending on context—in some cases, referring strictly to cost-sharing and referral mechanics at the plan level and, in others, reflecting a distinct network construct. The commenter recommended that the Departments clarify this distinction and provide a structured approach to ensure that product type is consistently represented as either a plan attribute, a network attribute, or both, where appropriate. Additionally, the commenter recommended that, with respect to self-funded employer plans, the Departments should encourage alignment with commonly accepted State-level product definitions to the extent feasible. The commenter shared that in the ERISA context, where self-insured plans are not formally required to be identified by product type, adopting a standardized nomenclature would improve consistency, reduce file user confusion, and enhance parity across fully-insured and self-funded arrangements.

The Departments acknowledge that group health plans and health insurance issuers may use product type inconsistently, as terms such as HMO or PPO can vary in meaning depending on context. Although HHS regulations at 45 CFR 144.103 (providing a definition for ''product'') and 45 CFR 147.106(e)(3)(ii) (providing exceptions to guaranteed renewability requirements for uniform modifications of coverage) reference ''product network types,'' such as HMO, PPO, exclusive provider organization (EPO), point of service (POS), or indemnity, the Departments consider product type for purposes of these final rules to be a coverage option designation rather than a network-level designation. While the Departments do not define product type in these final rules, the Departments clarify here that terms such as HMO and PPO are examples of product types and are meant to be illustrative and non-exhaustive, given that plans and issuers may use other terms consistent with their own business practices and as required by applicable State law. These terms serve as meaningful indicators of benefit design structure at the plan or policy level, even where the precise meaning of these terms may vary depending on context. The Departments also understand that the vast majority of self-insured ERISA plans, which are not subject to State law definitions, use common labels such as HMO and PPO to describe their benefit offerings, as these terms are widely recognized and readily understood by employees. To that end, the Departments intend to develop future technical implementation guidance that will allow plans and issuers to select from a list of common product types and determine an alternative for reporting if there is no common product type to accurately describe the benefit offering.

After considering the public comments received, the Departments are finalizing the amendment to redesignated 26 CFR 54.9815–2715A3(b)(1)(i)(C), 29 CFR 2590.715–2715A3(b)(1)(i)(C), and 45 CFR 147.212(b)(1)(i)(C), and 26 CFR 54.9815–2715A3(b)(1)(ii)(A), 29 CFR 2590.715–2715A3(b)(1)(ii)(A), and 45 CFR 147.212(b)(1)(ii)(A) with the minor technical and clarifying amendments described above.

3. Percentage-of-Billed-Charges Arrangements

The Departments proposed to amend redesignated 26 CFR 54.9815–2715A3(b)(1)(i)(D)(*1*), 29 CFR 2590.715–2715A3(b)(1)(i)(D)(*1*), and 45 CFR 147.212(b)(1)(i)(D)(*1*) to require that in-network rates must be reflected as dollar amounts except for contractual arrangements under which a plan or issuer agrees to pay an in-network provider a percentage of billed charges and is not able to assign a dollar amount to an item or service prior to a bill being generated. In such circumstances, plans and issuers would be required to report a percentage number, in lieu of a dollar amount, in the form and manner as specified in guidance issued by the Departments. The Departments solicited comment on this proposed requirement. After consideration of comments, the Departments are finalizing this requirement as proposed; however, other amendments to this section further redesignate this paragraph as paragraph (b)(1)(i)(E)(*1*).

In the proposed rules, the Departments explained that, although

[43] 90 FR 60432, 60449 (December 23, 2025).

the 2020 final rules [44] generally require rates to be reported as dollar amounts regardless of payment model, interested parties identified ongoing challenges with certain alternative reimbursement arrangements, most notably with ''percentage-of-billed-charges'' contracts, under which a dollar amount cannot be determined prospectively because payment is defined as a fixed percentage of charges that are not known until after a claim is generated. In FAQs Part 53, the Departments established an enforcement safe harbor permitting percentage-based reporting for such alternative payment arrangements when dollar amounts could not be derived with accuracy.[45] In FAQs Part 61, the Departments rescinded the statement of enforcement discretion provided in FAQs Part 53 and clarified that the ability to report dollar amounts is a fact-specific determination and that enforcement discretion would be exercised on a case-by-case basis, without a categorical safe harbor, while also directing plans and issuers to continue following existing technical implementation guidance.[46] In response to continued feedback and the need for greater clarity and consistency in reporting, the Departments proposed to amend the In-network Rate File requirements to permit plans and issuers to report a percentage of billed charges in limited circumstances in the form and manner specified in guidance, while continuing to require dollar-based reporting wherever a dollar amount can be determined prospectively.

Many commenters supported the proposal to require that in-network rates be reflected as dollar amounts except for contractual arrangements under which the plan or issuer agrees to pay an in-network provider a percentage of billed charges and is not able to assign a dollar amount to an item or service prior to a bill being generated. These commenters stated that the proposed exception would preserve contractual accuracy while providing a pragmatic solution that removes ambiguity and prevents the disclosure of misleading dollar figures. Additionally, commenters highlighted that this proposal aligns with current guidance that recognizes situations where a precise dollar amount cannot be determined in advance.

The Departments agree with commenters that requiring in-network rates to be reflected as dollar amounts except for certain specific arrangements can remove ambiguity, preserve contractual accuracy, and prevent the disclosure of misleading dollar figures. The goal of these transparency disclosures is to reveal how group health plans' and health insurance issuers' contractual arrangements are currently structured, rather than trying to standardize a one-size-fits-all approach.

Several commenters offered alternatives to reporting only a percentage under these arrangements, stating that the proposed exception would provide limited value and would be inconsistently implemented without additional context. A few commenters recommended requiring plans and issuers to pair any reported percentage with dollar-based context derived from historical experience, such as historical price averages, average and median paid amounts over a 12-month lookback period or percentile-based allowed amounts, and estimated dollar amounts as required in the Hospital Price Transparency rules,[47] to make the information usable and comparable. A commenter recommended that plans and issuers be required to provide the average billed amount for a particular provider group along with the percentage number. Another commenter recommended that the Departments allow reporting of percentages when historical claims data for a service does not meet the minimum volume threshold necessary to support a reliable dollar estimate, rather than publishing an estimated dollar amount that may not reflect an accurate payment experience and could confuse users and potentially erode data integrity.

The Departments acknowledge the limitations of reporting an in-network rate only as a percentage and appreciate the suggestions to add additional claims-based data elements to provide context and clarity for percentage-of-billed-charges reporting. The Departments also acknowledge the commenter's suggestion to allow plans and issuers to disclose percentage-based rates when historical claims data for a service does not meet a minimum volume threshold. However, the Departments have determined that calculating a dollar-based value derived from historical claims, such as averages, estimates, or medians, would add considerable complexity to the In-network Rate File. The In-network Rate File is intended to contain prospective data for a specific time period to accurately reflect what payer-provider contractual arrangements look like. If the Departments were to require plans and issuers to include retrospective claims data from other systems into the In-network Rate File, it would add considerable burden to create the file. In addition, the information could reduce the usability of the file, as it would result in the file including both prospective data and historical billed charges that may not reflect future billed charges. This could create confusion about which data in the In-network Rate File reflects current contractual arrangements, as historical claims data is meant to be reflected in the Allowed Amount File only. Additionally, in contrast with the Hospital Price Transparency reporting approach where there is a singular provider (the hospital), calculating averages or medians across a large volume of providers with different billed charges is unlikely to provide meaningful or actionable information for file users.

A few commenters did not support the proposal, asserting that allowing an exception to reporting a dollar amount would result in disclosures that are confusing and not actionable. These commenters indicated that percentages

are difficult to interpret without the underlying billed charge, which is often unavailable, and therefore this type of disclosure would limit meaningful comparisons across plans and providers. A commenter expressed that posting negotiated rates as a percentage of billed charges directly undermines the intended purpose of the price transparency goals and that for a percentage-of-billed-charges rate to be meaningful, hospitals would have to disclose the price for that same service in their hospital pricing files. Another commenter expressed concern that allowing percentage-only reporting would create a transparency loophole and shift the burden to users to cross-reference other sources to estimate actual prices.

The Departments acknowledge these comments regarding the interpretability of percentage-of-billed-charges reporting without the availability of a billed charge amount. The Departments have determined that it is appropriate to codify the exception to reporting a dollar amount as specified in existing technical implementation guidance.[48] Since issuing this guidance, the Departments have continued to receive feedback from interested parties that arrangements where a dollar amount is unable to be determined in advance are not uncommon and should be reflected in the data.[49] Requiring plans and issuers to generate estimated dollar amounts when only a percentage of billed charges is available prospectively would introduce significant variability and limit the accuracy of the reported amount given differing underlying payment methodologies. In turn, this limited accuracy may impose more burden on users to interpret these amounts. The Departments understand that disclosing percentages without billed charges limits users' ability to view the base dollar amount a plan or issuer agrees to pay a provider, and thus limits price transparency in that manner. However, the Departments have determined that permitting this exception offers more transparency into plan and issuer activity than potentially imprecise estimates derived through various means. The Departments reiterate that plans and issuers must disclose rates as a dollar amount whenever a dollar amount can be calculated in advance, and the exception only applies under this narrow circumstance.

Finally, a few commenters recommended that the Departments codify the open text field guidance as described in FAQs Part 53 for alternative reimbursement arrangements.[50] While the Departments are not codifying the ''additional information'' field—also known as the open text field—in these final rules because it is an optional field for use only when applicable, the Departments clarify that the additional information field remains in the schema to allow plans and issuers to describe additional context to their contracting arrangements, including payment formulas or methodologies, if they cannot otherwise be captured in the existing standardized data elements of the schema.

4. Enrollment Totals

The Departments proposed to add new 26 CFR 54.9815–2715A3(b)(1)(i)(E), 29 CFR 2590.715–2715A3(b)(1)(i)(E), and 45 CFR 147.212(b)(1)(i)(E) to require group health plans and health insurance issuers to include in each In-network Rate File, current numerical enrollment totals, as of the date the file is posted, for each coverage option offered by a plan or issuer represented in the In-network Rate File. Such numerical enrollment totals would include the number of participants, beneficiaries, and enrollees (including all dependents) in the coverage option offered by a plan or issuer. In the proposed rules, the Departments explained that in response to feedback received since the publication of the 2020 final rules, additional data elements, such as plan enrollment numbers, that would allow users to weigh different plans and coverage options to understand their relative influence on the overall landscape of pricing in health insurance, would be in line with the goals stated in the 2020 final rules.[51] The Departments solicited comment on the feasibility of including the enrollment total as of the date the file is posted, whether an enrollment total on a different specified date would be more feasible for file producers and more useful to data users, and on the proposal in general.

After consideration of comments, the Departments are not finalizing the proposal to include numerical enrollment totals in the In-network Rate File.

Several commenters supported requiring group health plans and health insurance issuers to include the number of participants, beneficiaries, and enrollees (including dependents) for each coverage option represented in the In-network Rate File. These commenters stated that such enrollment data would improve the analytical usefulness of the files by providing more consistent contextual information about the reach of benefit arrangements, supporting analysis of market power and pricing trends, enabling comparison across plans and coverage options, and helping purchasers identify appropriate benchmark groups.

A few commenters recommended that the Departments consider including county-level enrollment counts to help researchers, regulators, and businesses to better understand relative market power and act upon enrollment data. A commenter urged the Departments to review methodologies on county-level enrollment as used in Medicare Advantage plans to see how they could be applied to the In-network Rate Files. Commenters also recommended clarifying enrollment attribution by limiting the total to individuals directly enrolled with the reporting plan or issuer to help avoid confusion arising from collaborative agreements across separate payer entities who share provider networks, and that multiple plans and issuers can provide a single member with network access.

Several commenters recommended reporting enrollment totals in the Table of Contents File or other plan level metadata rather than within each In-network Rate File, stating that a centralized approach would provide a more consistent reporting location, reduce duplication and reconciliation burden, and simplify implementation for plans and service providers. A commenter further recommended quarterly updates to the Table of Contents File and adding a standardized enrollment total field to the reporting plan object.

Several commenters did not support requiring plans and issuers to include the number of participants, beneficiaries, and enrollees (including dependents) for each plan or coverage option represented in the In-network Rate File. The commenters noted that enrollment and rate data reside in separate, incompatible systems, making

[51] 85 FR 72158, 72161 (November 12, 2020); *see also* Gary Claxton, Lynne Cotter, & Shameek Rakshit, *Challenges with Effective Price Transparency Analyses,* Peterson-KFF Health System Tracker (February 25, 2025), *https://www.healthsystemtracker.org/brief/challenges-with-effective-price-transparency-analyses/.*

compliance operationally impracticable and adding complexity in reconciling the data since member-level systems are not available for machine-readable file generation. Another commenter expressed concern that requiring exact enrollment totals may create operational burden and reporting instability. The commenter noted that enrollment figures are inherently fluid and difficult to measure precisely at a single point in time and therefore recommended allowing rounded estimates to balance transparency goals with administrative feasibility, data consistency, and comparability across plans and issuers.

Finally, a commenter recommended that the Departments convene a structured workgroup of interested parties on enrollment reporting to support implementation and help troubleshoot operational issues prior to issuing final guidance for reporting enrollment totals.

The Departments agree with commenters' assessment of the operational difficulties in reporting enrollment numbers at the plan level and are also concerned that the differences in data systems, reporting methodologies, and reconciliation processes could increase the likelihood of inconsistent or inaccurate reporting across plans and issuers, thereby reducing the reliability and comparability of the data for users. After further consideration, the Departments are concerned that the potential value for certain uses of the enrollment counts are outweighed by the significant operational burden associated with implementing this requirement and updating the enrollment numbers quarterly, and potential unintended consequences to plans, issuers, and other businesses that could result from the disclosure of enrollment trends.

A few commenters supported requiring plans and issuers to include in each In-network Rate File current numerical enrollment totals ''as of'' the file posting date for each coverage option offered by a plan or issuer represented in the file. The commenters believed the ''as of'' file posting date is the clearest and most administratively feasible reference point for both file producers and data users. A few commenters recommended allowing a set date for reporting enrollment totals and recommended the date be the first day of the month preceding the filing quarter. The commenters believed this would reduce operational burden while still providing useful context for users. Another commenter urged the Departments to require annual enrollment reporting if it is infeasible or overly burdensome for plans and issuers to include enrollment totals as of the file posting date. A commenter recommended that the Departments set the enrollment total ''as of'' report date to the posting date of the previous In-network Rate File because they believed retrospective reporting would balance minimal uncertainty with offering users a more accurate representation.

Conversely, a few commenters did not support requiring plans and issuers to include enrollment totals as of any specific date for group health plans. The commenters noted that the enrollment total comprises multiple numbers that are built on separate data sources and requires time to compile, making near real-time reporting difficult.

A few commenters also expressed that enrollment numbers may be outdated by days or weeks which could mislead users, that enrollment totals are not necessary for an individual member to make provider cost comparisons, and that the information provides limited practical value for consumers. A few other commenters mentioned data accuracy concerns, which they believed would also increase the potential for misinterpretation. A commenter did not believe enrollment totals would fulfill the Departments' goal to enable users to build analytically sound and accurate comparisons of plans and issuers' enrollment data, nor would it reduce file size. Another commenter noted that enrollment data is already available for individual and small groups under the Unified Rate Review Template public use files.

The Departments have considered alternative reporting approaches, including in response to comments explaining that enrollment information is maintained in separate systems from other machine-readable file data and would need to be appended to the In-network Rate File. After consideration of those alternatives, the Departments agree with commenters who expressed concern that point-in-time enrollment reporting could quickly become outdated or misleading due to frequent enrollment fluctuations and retroactive eligibility adjustments. The Departments also agree that requiring the reporting of enrollment totals could increase operational complexity and create challenges related to data accuracy, consistency, and comparability across reporting entities. In addition, the Departments agree with commenters' concerns regarding the limited practical utility of enrollment information for consumers, while acknowledging that consumers are not typically the primary users of the In-network Rate Files. The Departments further recognize that publicly available sources may already provide certain enrollment-related information for portions of the health insurance market. For example, under the Prescription Drug Data Collection (RxDC) requirement, plans and issuers are required to report the number of participants, beneficiaries, and enrollees, as applicable, covered on the last day of the reference year for each plan or coverage.[52] The Departments acknowledge this requires only annual reporting of the previous year's enrollment totals, whereas the Transparency in Coverage proposed requirement would require quarterly reporting of enrollment numbers which would increase the operational complexity and data validity challenges as previously mentioned.

A few commenters recommended clarification regarding where enrollment totals should be reported in the machine-readable files to ensure consistency across plans and issuers and how the different machine-readable file production scenarios would handle the enrollment totals. A commenter urged the Departments to clarify which enrollment totals apply when an employer plan generates In-network Rate Files at a plan-level compared to when a vendor produces a network-level In-network Rate File that includes the employer health plan's information. Specifically, the commenter questioned whether plan-level reporting should reflect overall plan enrollment or enrollment for a particular plan design option.

The Departments acknowledge these requests for clarification but because the proposal to require numerical enrollment totals in the In-network Rate File is not being finalized in these rules, such clarification is not necessary.

A few commenters expressed concerns regarding how reporting enrollment totals could compromise sensitive business information and the ability for plans and issuers to negotiate fair rates. A commenter noted that providers and third parties already are using data from published machine-readable files in rate negotiations and expressed concern that adding enrollment data would increase the likelihood of that practice, allowing providers to further identify areas for leverage in rate negotiations. The commenter stated that increased costs related to such practices would be passed on to consumers, ultimately undermining the cost-containment goal of price transparency. A commenter

noted that without proper context, users of machine-readable files may incorrectly use enrollment figures to draw conclusions about provider networks or plan popularity, which could undermine, rather than enhance, meaningful transparency. A commenter expressed that the granularity of coverage-level enrollee reporting could raise privacy or competitive concerns for small employers. the commenter recommended a defined enrollment threshold to protect small populations without creating gaps in data for larger plans where privacy risk is negligible. A commenter recommended reporting enrollment at both the plan and network levels. Another commenter noted that network enrollment data information would better support employers with health benefit negotiations, which typically are done at the network level.

The Departments carefully considered commenters' concerns that reporting enrollment totals could have unintended consequences that expose business vulnerabilities such as limiting ability to negotiate effectively—especially for smaller entities—and lead to higher prices for consumers. The Departments note that the intention of the In-network Rate File is to reveal pricing by provider network. While enrollment counts might give context to prices, they are not directly price related. The Departments acknowledge comments recommending reporting at the network level instead of the coverage level, which could minimize the risk that parties would take advantage of enrollment information to negotiate higher rates. However, the Departments are persuaded that the operational, implementation, data reliability, and business vulnerability concerns raised by commenters outweigh the potential benefits of finalizing this proposal, regardless of how enrollment counts are reported. In particular, the Departments are concerned that requiring enrollment reporting could be unduly burdensome due to the separation of enrollment and rate data systems and may result in inconsistent or potentially misleading reporting. Accordingly, the Departments are not finalizing the proposed requirement to include enrollment totals in the In-network Rate Files.

5. Excluded Provider Information

The Departments proposed to add new 26 CFR 54.9815–2715A3(b)(1)(i)(F), 29 CFR 2590.715–2715A3(b)(1)(i)(F), and 45 CFR 147.212(b)(1)(i)(F) to the In-network Rate Files provision that would require group health plans and health insurance issuers to exclude from each In-network Rate File a provider and their negotiated rate (provider-rate combination) for an item or service, if the plan or issuer determines it is unlikely that such provider would be reimbursed for the item or service based on the scope of the provider's license or area of specialty. The Departments further proposed that plans and issuers must make such a determination using their internal provider taxonomy that is typically used during the claims adjudication process. The Departments determined that excluding provider-rate combinations that are not likely to result in a reimbursement is necessary to limit unnecessary information that inflates file size and limits the accessibility of the data in the In-network Rate File. The Departments also proposed to amend 26 CFR 54.9815–2715A3(b)(1)(i)(E)(*2*), 29 CFR 2590.715–2715A3(b)(1)(i)(E)(*2*), and 45 CFR 147.212(b)(1)(i)(E)(*2*) to direct plans and issuers not to include an in-network provider's National Provider Identifier (NPI), Tax Identification Number (TIN), and Place of Service Code if that in-network provider would be excluded as specified in paragraph (b)(1)(i)(F) of this section.

The proposed rules set forth at paragraph (b)(1)(i)(F) would require plans and issuers to use their internal provider taxonomy that is typically used during the claims adjudication process to determine which provider-rate combinations to exclude from the In-network Rate File. The internal provider taxonomy is part of the claims adjudication workflow, in which the plan or issuer assesses whether the billed item or service (represented by a billing code) aligns with the specialty of the rendering provider (represented by a provider taxonomy code). If the specialty does not meet the plan's or issuer's requirements for that item or service, the claim may be denied. For example, the Departments expect that a plan's or issuer's internal provider taxonomy would be unlikely to reimburse a claim submitted for a heart surgery submitted from a podiatrist because the billing code associated with a heart surgery would not match with a taxonomy code for a podiatrist.

The Departments understand that it is standard business practice for the internal provider taxonomy maintained by a plan or issuer to identify provider specialties using the standardized code set established by the National Uniform Claim Committee (NUCC) or their own model derived from it.[53] The NUCC maintains standard provider taxonomy codes, which are used to define a provider's area of specialty.[54] Provider taxonomy codes are ten characters in length structured into three distinct ''levels'' including provider grouping, classification, and area of specialization.[55] The Departments understand that when a provider submits a claim for reimbursement to a plan or issuer, the provider must include their NUCC code and the billing code for the item or service along with certain other information. Plans and issuers then compare the NUCC provider taxonomy code and billing code included from the claim against their internal provider taxonomy mappings to determine if the claim can proceed through the next step of the payment adjudication process.

The Departments sought comment on all aspects of this proposal and were particularly interested in feedback from interested parties on whether there are plans or issuers that do not map provider specialties to billing codes within their claims adjudication process or use different code sets, and whether there could be a way to standardize the provider specialty-mapping-to-billing-code process. The Departments also sought comment on whether there are alternative approaches to excluding any provider that has a rate for an item or service that interested parties consider not to be a meaningful rate. The Departments also requested feedback from interested parties on the relative burdens and benefits of alternative approaches to both producers and file users. The Departments were also interested in any concerns that parties may have with a proposal to require plans and issuers to make such exclusions at all.

After consideration of public comments, the Departments are finalizing the requirements set forth at 26 CFR 54.9815–2715A3(b)(1)(i)(F), 29 CFR 2590.715–2715A3(b)(1)(i)(F), and 45 CFR 147.212(b)(1)(i)(F) and 26 CFR 54.9815–2715A3(b)(1)(i)(E)(*2*), 29 CFR 2590.715–2715A3(b)(1)(i)(E)(*2*), and 45 CFR 147.212(b)(1)(i)(E)(*2*) as proposed, with one modification to require plans and issuers to exclude provider-rate combinations that are unlikely given the provider's specialty, according to either

[53] The NUCC establishes and maintains standard provider taxonomy codes, which are used to define a provider's area of specialty. Provider taxonomy codes are ten characters in length structured into three distinct ''levels'' including provider grouping, classification, and area of specialization. *See* National Uniform Claim Committee, *Health Care Provider Taxonomy,* available at *https://www.nucc.org/index.php/code-sets-mainmenu-41/provider-taxonomy-mainmenu-40* (last visited May 4, 2026).

the plan's or issuer's internal provider taxonomy or other internal rules used during the claims adjudication process.

Many commenters supported the proposals that would remove unlikely provider-rate combinations to decrease file size and increase data reliability and usability by removing ''noise.'' These commenters indicated that plans and issuers already utilize internal controls to map provider specialty or taxonomy to billing codes for the purposes of preventing payments when an item or service in a claim is inconsistent with the submitting provider's credentials. A few commenters asserted that removing unlikely provider-rate combinations should help employers make better purchasing decisions. A few other commenters added that finalizing this proposal would lead to reduced costs for compliance and system maintenance, and that a logical removal of implausible combinations represents a standardization that enhances usability without sacrificing transparency.

The Departments agree that requiring plans and issuers to exclude unlikely provider-rate combinations will lead to significant reductions in file size, increase the usability and reliability of the In-network Rate File data for providers, patients, and policymakers, and help employers make better purchasing decisions.

A few commenters, while supportive of the proposal, expressed concerns about implementation and emphasized the importance of clear instructions to plans and issuers on how to conduct the required provider-rate exclusions to avoid over-exclusion. A commenter noted that the exclusions would be administratively burdensome for owners of provider networks to implement and requested that the Departments provide technical assistance to these owners. Another commenter pointed out the potential for the provider-rate exclusion to appear in a non-standardized manner, given the potential differences in plans' and issuers' claims adjudication processes. A commenter requested that the Departments require plans and issuers to document the provider-rate combinations that are removed to increase the public's understanding of these exclusions. A few commenters encouraged the Departments to work with interested parties to identify the best way to design the parameters around provider-rate exclusions. Another commenter requested that the Departments go further and require plans and issuers to exclude negotiated rates from the In-network Rate File where plans or issuers have a reasonable belief that claims are no longer being submitted under the contract, including but not limited to instances where the plan or issuer has officially designated the contract as ''dormant'' or some other related term. However, a commenter recommended that the Departments permit plans and issuers to include a provider in the rate file for a specific service even if the provider has not historically performed the service within the network reflected in the file, which may be the case when the provider is in a multi-specialty group with combinations of TIN/EINs and NPIs. A commenter was concerned that implementor-defined taxonomy filters could result in data gaps, contributing to existing data usability issues.

The Departments intend to address many of these concerns through future technical implementation guidance to afford the Departments flexibility to determine appropriate technical reporting requirements and to make refinements in response to changes in technology and health care industry business practices. This future technical implementation guidance—in the form of contextual data attributes within schemas—will provide clear instructions to plans and issuers, and the iterative development process through community feedback on GitHub will allow file producers and file users to help the Departments minimize over-exclusions and address non-standard arrangements. The Departments have determined that requiring plans and issuers to separately document the provider-rate combinations that are excluded from the In-network Rate File is unnecessary given that file users can verify the exclusions through examining the Taxonomy and Utilization Files, as discussed in section III.C.8. of this preamble. The Departments emphasize that the provider-rate exclusion must be based on the plan's or issuer's determination that it is unlikely a provider would be reimbursed for an item or service given that provider's specialty. This does not include an unlikely reimbursement based on other reasons, such as a dormancy period. A claims adjudication system relying on taxonomic specialties may still be able to reimburse for a claim submitted by a previously dormant provider if it meets the provider specialty-billing code mapping, regardless of a lack of recent claims.

Additionally, the Departments note for clarity, that these final rules require a plan or issuer to exclude unlikely provider-rate combinations using its internal logic used during the claims adjudication process to determine whether to deny reimbursement for an item or service given the provider's specialty—whether that internal logic is an internal provider taxonomy or other internal rules used for this purpose. The ''internal provide taxonomy'' referenced in this requirement is distinct from the ''Taxonomy File'' referenced in the new requirement discussed in section III.C.8.c. of this preamble. The Taxonomy File must contain a plan's or issuer's internal logic used during the claims adjudication process to determine whether to deny reimbursement for an item or service given the provider's specialty—again, using an internal provider taxonomy or other internal rules used for this purpose—but reflected as pairings of billing codes and NUCC codes. The Departments therefore expect that plans and issuers may need to convert their internal rules into data suitable to be submitted in the Taxonomy File.

A commenter expressed concern that the proposed exclusion process would be used by issuers as a justification to improperly deny claims for the provision of services that may fall within a provider's lawful scope of practice but are not captured by the NUCC code set. The commenter requested that the Departments engage advanced practice provider organizations in reviewing and transparently validating the process used to determine which services are excluded for their respective specialties.

The Departments clarify that a plan's or issuer's determination of whether a provider is unlikely to be reimbursed for an item or service based on the provider's specialty must be made consistent with applicable law. This clarification recognizes that other provisions of Federal or State law may limit the circumstances in which a plan or issuer may distinguish among providers based on specialty, licensure, certification, or similar characteristics. For example, section 2706(a) of the PHS Act generally prohibits discrimination with respect to participation under a plan or coverage against a health care provider acting within the scope of the provider's license or certification under applicable State law. However, validating the process used to determine which services are excluded for their respective specialties is beyond the scope of these rules, which do not require plans and issuers to make any changes their claim adjudication processes or any rules they use to determine whether to deny reimbursement given the provider's specialty.

A commenter noted that the rule would prevent provider-rate combinations from other taxonomies being used as part of the process to

exclude unlikely provider-rate combinations but does not prevent posting a conversion factor or rate for procedures within the same specialty that are not performed and that this could lead to payers negotiating significantly lower rates with specialists for specific services they do not perform.

The Departments agree that a provider's taxonomy defines what they may be reimbursed for, not what they actually furnish. The Utilization File addresses this gap by identifying providers who submitted claims and received reimbursement (or would have been reimbursed but for cost-sharing liability) for items and services during the reporting period. This allows users to distinguish negotiated rates for items and services actually furnished from those that are not, without requiring plans to make service-level determinations about individual practices. The Departments will monitor whether the Utilization File serves this purpose effectively. The Departments also acknowledge that details about negotiated arrangements, such as conversion factors and rates, can vary among providers within the same specialty and could lead to ambiguous negotiated rates. To address this, the Departments continue to include an open text field in the schema to enable plans and issuers to clarify or account for these unique scenarios and will continue to evaluate the possibility of standardizing such arrangement details as the Departments monitor industry's implementation of the schema.

A few commenters cautioned against utilizing overly rigid filtering requirements to determine whether a specific provider is unlikely to be reimbursed for an item or service. This is because a highly granular NPI level reporting would require splitting apart NPI array values and would significantly fragment the provider references attribute, particularly where a multi-specialty physician group shares a set of negotiated rates and is represented by a single provider reference object in the file.
