Vol. 91 Friday,

No. 214 November 6, 2026

Pages 69955–70768

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 91 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Amendments to the ''Small Business'' and ''Small Organization'' Definitions for Investment Companies and Investment Advisers for Purposes of the Regulatory Flexibility Act

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Securities and Exchange Commission (the ''Commission'' or the ''SEC'') is amending the definitions of ''small business'' and ''small organization'' (collectively, ''small entities'') that are used in connection with Commission rulemaking under the Investment Company Act of 1940 (the ''Investment Company Act'') and the Investment Advisers Act of 1940 (the ''Advisers Act''). These definitions concern regulatory requirements applicable to registered investment companies and business development companies (collectively, ''funds'') as well as investment advisers. The definitions are used specifically for purposes of the Regulatory Flexibility Act (the ''RFA''), which requires the Commission to consider the impact of its regulations on small entities. The amendments are designed to modernize the definitions, by increasing certain asset-based thresholds, including a mechanism for periodic future inflation adjustments, and eliminating the threshold based on total assets for advisers. In connection with these amendments, the Commission is making conforming amendments to Form ADV as well as the rule that allows certain small SEC-registered advisers to apply for a continuing hardship exemption from making Advisers Act filings electronically.

DATES: This final rule was published in the **Federal Register** on November 6, 2026.

- Final amendments to 17 CFR 270.0–10 (''rule 0–10'') and 17 CFR 275.0–7 (''rule 0–7'') are effective February 4, 2027.
- Final amendments to 17 CFR 275.203–3 (''rule 203–3'') and 17 CFR 279.1 (''Form ADV'') are effective, and have a compliance date of, February 4, 2027.

FOR FURTHER INFORMATION CONTACT: Alexis Palascak, Senior Counsel, Sirimal R. Mukerjee, Senior Special Counsel, or Robert Holowka, Assistant Director, Investment Adviser Regulation Office, at (202) 551–6787, or Andrew Deglin, Senior Counsel, or Brian McLaughlin Johnson, Assistant Director, Investment Company Regulation Office, at (202) 551–6792, Division of Investment Management, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–8549.

SUPPLEMENTARY INFORMATION: The Commission is adopting amendments to the following rules and form:

[1] 15 U.S.C. 80a–1 *et seq.*

[2] 15 U.S.C. 80b–1 *et seq.*

I. Introduction

We are adopting amendments to Commission rules that define a ''small entity'' under the RFA for funds and investment advisers by raising the asset thresholds contained in both definitions.[3] Specifically, the amendments to the Investment Company Act rule (rule 0–10) will increase the net asset threshold for

[3] Unless otherwise specified, the term ''investment companies'' or ''funds'' in this release refers collectively to registered investment companies and business development companies but not entities excluded from the definition of investment company under the Investment Company Act such as private funds.

funds to be considered ''small'' from $50 million to $10 billion and replace the ''group of related investment companies'' definition in the rule with ''family of investment companies,'' as that term is currently used in Form N–CEN. We are also adopting amendments to the Advisers Act rule (rule 0–7) that will increase the amount of regulatory assets under management (''RAUM'') below which an adviser is considered small from $25 million to $1 billion, eliminate the $5 million total assets threshold provision from the definition, and make conforming amendments to the adviser control relationship threshold to reflect the increased adviser RAUM threshold in the definition. Additionally, the amendments to Investment Company Act rule 0–10 and Advisers Act rule 0–7 will provide a mechanism for future inflation adjustments to the thresholds. Finally, the Commission is making conforming amendments to Form ADV and Advisers Act rule 203–3(b) for hardship exemptions to implement the amended adviser RAUM threshold. The final rules reflect comments the Commission received on amendments it proposed in January 2026 and will help the Commission more appropriately promote the effectiveness and efficiency of its regulations, with the goal of minimizing significant economic impact on small entities, consistent with the RFA.[4]

A. Background

The Commission has a longstanding commitment to understanding and addressing the concerns of small entities and has established the Office of Small Business Policy in the Division of Corporation Finance, the Office of the Advocate for Small Business Capital Formation, and the Small Business Capital Formation Advisory Committee to be responsive to such concerns.[5] In the context of rulemaking, the Commission tailors its regulations to the relevant characteristics of regulated entities and weighs the impact of its rules on small entities, including through performing analyses under the RFA.[6] A purpose of the RFA is to promote the effectiveness and efficiency of regulations, including through consideration of alternative regulatory approaches, with the goal of minimizing the significant economic impact on small entities consistent with the stated objectives of applicable statutes.[7] The Commission is required to determine if a rulemaking is likely to have a ''significant economic impact on a substantial number of small entities'' under the RFA.[8] Unless the Commission certifies that the rulemaking will not have such an impact, the Commission is required to conduct a regulatory flexibility analysis both during the proposal and final stages of adopting a rule.[9]

The Small Business Act gives the Administrator of the U.S. Small Business Administration (the ''SBA'') authority to establish small business size standards for all Federal agencies, in the absence of other specific statutory authority.[10] An agency may nevertheless prescribe its own small business size standard pursuant to section 601(3) of the RFA if, as described in 13 CFR 121.903(c), the agency consults with the SBA Office of Advocacy and the size standard will be used for the sole purpose of performing an RFA analysis.[11] Allowing agencies to establish their own definitions for the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction'' for purposes of the RFA analyses gives agencies flexibility in applying the provisions of the RFA.[12]

In 1982, the Commission adopted rule 0–10 for investment companies and rule 0–7 for investment advisers to define ''small business'' and ''small organization'' for purposes of Commission rulemakings under the Investment Company Act and Advisers Act, respectively.[13] These definitions were last amended in 1998[14] and, in connection with outreach to small entities, the Commission has subsequently received requests to update the definitions.[15]

Under rule 0–10, an investment company is deemed a small entity if it, together with other investment companies in the same group of related investment companies, has net assets of $50 million or less as of the end of its most recent fiscal year.[16] A group of related investment companies is defined, with respect to management companies, as two or more management companies (including series thereof) that (i) hold themselves out to investors as related companies for purposes of investment and investor services; and (ii) either (1) have a common investment adviser or have investment advisers that are affiliated persons of each other; or (2) have a common administrator.[17] Under rule 0–7, an investment adviser is deemed a small entity if it: (i) has RAUM[18] of less than $25 million (the ''RAUM Threshold'');[19] (ii) did not have total assets[20] of $5 million or more on the last day of the most recent fiscal year (the ''Total Assets Threshold''); and (iii) does not control, is not controlled by, and is not under common control with (a ''control relationship'') another investment adviser that has assets under management of $25 million or more, or

[4] *See* Amendments to the ''Small Business'' and ''Small Organization'' Definitions for Investment Companies and Investment Advisers for Purposes of the Regulatory Flexibility Act, Investment Company Act Release No. 35864 (Jan. 7, 2026) [91 FR 1107 (Jan. 12, 2026)] (the ''Proposing Release''). The comment letters on the Proposing Release (File No. S7–2026–01) are available at *https://www.sec.gov/rules-regulations/public-comments/s7-2026-01*. *See also* Enhancement of Emerging Growth Company Accommodations and Simplification of Filer Status for Reporting Companies, Release No. 33–11419 (May 19, 2026) [91 FR 30086 (May 21, 2026)] (''2026 Filer Status Release'') (among other things, proposing amendments to the ''small entity'' definitions for purposes of the Securities Act of 1933 and the Securities Exchange Act of 1934 (the ''Exchange Act'')).

[5] *See* Proposing Release, at n.1 (discussing the history of these Commission offices and the committee).

[6] *See* Proposing Release, at section I.A.1.

[7] Public Law 96–354, 2, Sept. 19, 1980, 94 Stat. 1164; 5 U.S.C. 601–612.

[8] *See* 5 U.S.C. 605(b). The RFA does not define ''significant economic impact'' or ''substantial number of small entities.''

[9] *See* 5 U.S.C. 603–604; *see also* 5 U.S.C. 605(b).

[10] 15 U.S.C. 632(a)(2). 15 U.S.C. 632(a)(1) sets forth the default standard for a ''small business concern'' as ''one which is independently owned and operated and which is not dominant in its field of operation.''

[11] 13 CFR 121.903(c); *see also* Small Business Size Regulations; Size Standards for Programs of Other Agencies, 67 FR 13714 (Mar. 26, 2002).

[12] 5 U.S.C. 601. Under the RFA, the term ''small entity'' has the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction'' as defined under the RFA, unless the agency has established a definition of such term. In the latter case, the definition of the term is instead what was established by the agency.

any person (other than a natural person) that had total assets of $5 million or more on the last day of the most recent fiscal year (the ''Control Relationship Threshold'').

In January 2026, the Commission proposed amendments to the investment company and investment adviser ''small entity'' definitions. Specifically, the Commission proposed to:

- Amend rule 0–10 for funds to: (i) increase the net asset threshold for funds from $50 million to $10 billion; and (ii) refer, for purposes of aggregating the net assets of related funds, to a ''family of investment companies'' as that term is used in Item B.5 of Form N–CEN rather than to a ''group of related investment companies'' as used in the current rule;
- Amend rule 0–7 for investment advisers to increase the RAUM Threshold below which an investment adviser is considered to be a ''small entity'' from $25 million to $1 billion and to conform the assets under management threshold in the Control Relationship Threshold with the revisions made to the RAUM Threshold;
- Amend Form ADV to revise the instructions and Item 12 of Part 1A of Form ADV, including through making conforming changes to Form ADV, and amend rule 203–3 providing a continuing hardship exemption from electronic filing requirements; and
- Amend rule 0–10 and rule 0–7 to allow the Commission to make subsequent inflation adjustments to the asset thresholds in these rules by order every 10 years in accordance with an inflation adjustment mechanism.

The Commission also requested comment on whether to amend the Total Assets Threshold, as well as the total assets threshold contained in the Control Relationship Threshold, in rule 0–7.

The Commission received approximately 20 comments on the proposed amendments. Commenters generally supported the proposal's goal to modernize the ''small entity'' definitions.[21] These commenters noted that the current rules are out of date and stated that the proposed amendments would help calibrate the Commission's analysis of the regulatory and compliance costs for small entities under the RFA.[22] Some commenters suggested modifications to the proposal, such as a higher fund net asset threshold, alternative non-RAUM Thresholds, different mechanisms for future threshold adjustments, elimination of the adviser Total Assets Threshold, or different treatment of certain entities.[23] Some commenters expressed concern that the proposal would diminish investor protections and suggested lower asset thresholds.[24] After consideration of the comments received, and as discussed in more detail below, the Commission is adopting the amendments largely as proposed but with some modifications in response to comments.

B. Overview of the Final Amendments

We are amending the definitions of ''small business'' and ''small organization'' under the Investment Company Act and the Advisers Act for purposes of the RFA, largely as proposed, but with modifications:

- Raising the Fund Net Asset Threshold. As proposed, the Commission is raising the net asset threshold for funds from $50 million to $10 billion.[25]
- Amending the Fund Group Definition. As proposed, the Commission is, for purposes of aggregating the net assets of related funds, replacing the term ''group of related investment companies'' with ''family of investment companies'' as that term is used in Item B.5 of Form N–CEN.
- Raising the Adviser RAUM Threshold. As proposed, the Commission is raising the RAUM Threshold from $25 million to $1 billion, and making conforming amendments to the Control Relationship Threshold to reflect the increased RAUM Threshold.[26] In a change from the proposal, the Commission is amending the Control Relationship Threshold to help advisers understand how to calculate the threshold.
- Eliminating the Adviser Total Assets Threshold. In a change from the proposal, the Commission is eliminating the $5 million Total Assets Threshold, and making conforming amendments to the Control Relationship Threshold to reflect that the Commission is eliminating the Total Assets Threshold.
- Periodic Inflation Adjustments. As proposed, the Commission is amending rule 0–10 and rule 0–7 to allow the Commission to make subsequent inflation adjustments to the asset thresholds by order every 10 years in accordance with the inflation adjustment mechanism set forth in section II.C below (the ''Inflation Adjustment Mechanism'').
- Conforming Amendments to Form ADV and the Hardship Exemption Rule. As proposed, the Commission is making conforming amendments to Form ADV, the uniform application for investment adviser registration and report form by exempt reporting advisers, and rule 203–3(b), which sets forth conditions for certain small SEC-registered advisers to apply for a continuing hardship exemption from the requirement to make Advisers Act filings electronically with the Investment Adviser Registration Depository (the ''IARD'').[27] The amendments are designed to reflect the Commission's amendments to the RAUM Threshold, the Control Relationship Threshold, and their corresponding periodic Inflation Adjustment Mechanism. In a change from the proposal, the Commission is also making additional conforming amendments to Form ADV and rule 203–3(b) to reflect the determination at adoption to eliminate the Total Assets Threshold.

Smaller firms play an important role in the asset management industry.[28] We are mindful that smaller firms may face disproportionate compliance burdens compared to larger firms.[29] For example, compliance costs—such as staff time, recordkeeping, cybersecurity costs, and reliance on outside expertise or market data—often do not scale with firm size,[30] and have increased, while client fees have decreased.[31] We also are mindful that failure to consider the impact of regulations on small entities could risk reducing innovation, competitiveness, and new market

participants.[32] The Commission tailors its regulations to the relevant characteristics of regulated entities and weighs the impact of its rules on small entities, including through performing regulatory flexibility analysis under the RFA.

The final amendments are designed to help ensure the Commission's RFA analyses capture a more meaningful population of ''small entities'' so the Commission can continue to address the special concerns of small businesses. Updating the definitions of ''small business'' and ''small organization'' is appropriate to reflect the substantial growth in, and distribution of, regulatory assets under management and net assets over the decades since these thresholds were set.[33] The updates to the definitions reflect more reliable and consistent metrics for whether an adviser or fund is small, compared to those in the current rules.

Some commenters stated that the proposed amendments would classify too many funds or advisers as small (effectively leading the Commission to prioritize benefits of large funds and advisers instead of truly small funds and advisers),[34] or otherwise could result in regulatory arbitrage between investment advisers and broker-dealers [35] and diminish investor protections.[36] As explained below, the final amendments will not classify too many funds or advisers as small. The final amendments also will not diminish investor protections. Designating an entity as a small entity does not reduce investor protection. Investor protection is a concern regardless of the size of an entity. The purpose of the small entity definition is, in part, to ensure that the Commission considers whether its rules are appropriately calibrated so that smaller entities are not subject to regulations that may be disproportionately burdensome relative to the benefits or improvements in investor protection. The final amendments will enhance the Commission's rulemaking process by helping ensure the RFA analyses reflect current economic realities by incorporating the evolution of adviser and fund growth since the rules were first adopted, as other commenters stated.[37]

One commenter stated that the proposal did not appear to evaluate the investor-protection consequences of the proposed amendments and asserted the proposal focused primarily on industry size, rather than regulatory risk or compliance capacity. It outlined certain areas that the Commission should quantify and analyze in this regard, in particular to focus any regulatory relief on genuinely small entities and in a risk-based manner.[38] Because the final amendments primarily affect the process by which the Commission considers potential impacts on small entities, including benefits and costs of future rulemaking on small entities, the final amendments will not have any immediate impact on investor protection. Rather, the final amendments will require the Commission to consider and address the potential impacts of future rulemaking on small entities, including effects on investor protection.

Separately, the methodology for the proposed thresholds reflects that advisory fees are generally scaled with an adviser's assets under management, where greater advisory fees can support an increased compliance capacity. The updated thresholds also will allow the Commission to more appropriately address in future rulemakings, in a risk-based manner, concerns that are unique to those entities that should be deemed small entities in view of the growth in assets since the rules were adopted and the appropriateness of any regulatory accommodations that may be provided to small entities.

While conducting RFA analyses in future rulemakings, the Commission can take into account any potential for regulatory arbitrage between broker-dealers and investment advisers and adjust its future rules accordingly. The Commission carefully weighs the economic impact of its rules on all regulated entities, including small businesses, and tailors its regulations to the relevant characteristics of the particular entities regulated. In this way, the Commission works to meet its mandate under the Federal securities laws while at the same time considering any potentially disproportionate costs and regulatory burdens for small entities. The Commission intends to continue this careful, measured regulation that addresses small business concerns within the protections of the Federal securities laws.

II. Discussion

A. Amendments to Rule 0–10 Under the Investment Company Act

1. Raising the Net Asset Threshold

The Commission is amending the net asset threshold for small funds, as proposed. The final rule will amend paragraph (a) of rule 0–10 to increase the net asset threshold from $50 million to $10 billion and, as discussed in more detail in section II.C below, establish a mechanism to inflation-adjust this figure every ten years. The increase accounts for the overall growth in the fund industry since the $50 million threshold was originally set in 1982.[39] At that time, 62.4% of funds were deemed ''small entities,'' but by 2024, the share of funds deemed ''small entities'' had fallen to 0.6%.[40] Raising the net asset threshold in rule 0–10 to reflect growth in the investment company industry over the past decades will improve the utility of RFA analyses by more closely reflecting the population of funds that does not have the same competitive advantages as larger fund families (for instance, due to economies of scale when these larger families perform certain compliance and other operational functions in-house).[41] It also will more closely reflect the population of funds that does not have the same negotiating power as larger

[35] Comment Letter of the Securities Industry and Financial Markets Association (Mar. 13, 2026) (''SIFMA Comment Letter'') (noting the differences between the regulatory frameworks applicable to broker-dealers and investment advisers and stating that regulatory arbitrage is a contributing factor driving the shift from broker-dealer to registered investment adviser frameworks).

[36] PIABA Comment Letter.

[37] *See e.g.,* IAA Comment Letter. One commenter expressed concern that the proposal would be inconsistent with an Executive Order and other Federal efforts to make housing affordable. This commenter expressed concern that reclassifying billion-dollar advisers and multi-billion-dollar fund families as ''small'' for securities rulemaking works at cross purposes with efforts to curb large institutional purchases of single-family homes. *See* Comment Letter of Angela Dowell (Feb. 26, 2026) (''Dowell Comment Letter'') (citing, for example, ''Stopping Wall Street From Competing with Main Street Homebuyers,'' Donald J. Trump Executive Order, Jan. 20, 2026, *available at https://www.whitehouse.gov/presidential-actions/2026/01/stopping-wall-street-from-competing-with-main-street-homebuyers/*). We disagree that the final amendments will be inconsistent with the Executive Order or other Federal efforts to make housing affordable. The plain language of the current and final rules limits the application of the definitions, stating that the definitions of ''small business'' and ''small organization'' are for purposes of Commission rulemaking in accordance with the provisions of Chapter Six of the Administrative Procedure Act, unless otherwise defined for purposes of a particular rulemaking.

[41] Unless stated otherwise, the use of the term ''fund family'' or ''fund families'' in this release has the same meaning as ''family of investment companies.''

fund families when retaining service providers to perform compliance and operational functions.

In determining how to calibrate the amended threshold, the Commission considered the distribution of assets across individual funds and fund families, with the goal of ensuring that the proportion of funds that may face greater challenges in complying with Commission regulations due to their size be included in the small entity definition. Specifically, the Commission analyzed data reported on Form N–CEN to sort families of investment companies into percentiles according to their cumulative average total net assets. The Commission further analyzed this data to determine the percentage of individual funds and the percentage of average total net assets represented by each percentile.[42] At proposal, the Commission estimated that, as of December 2024, fund families at or below the 80th percentile threshold of $10.04 billion in net assets accounted for 22.91% of individual funds and only 2.13% of fund assets.[43] The analysis that formed the basis for the proposed threshold reflects that the assets of the investment company industry are heavily concentrated at the largest fund families, and these largest fund families not only manage a large majority of assets in the industry, but also account for a majority of the individual funds.[44]

Most commenters supported generally raising the net asset threshold from the current level to account for growth in the industry.[45] Several commenters supported raising the net asset threshold to $10 billion in particular, stating that this threshold appropriately reflects current market size and structure.[46] One of the commenters specifically expressed its support for the distribution-based methodology used to reach the proposed $10 billion threshold for funds.[47] This commenter, while supporting the proposal, further encouraged the Commission to adjust the threshold to $12 billion to account for growth in the industry since the date of the data underlying the proposal. Some other commenters expressed concerns that $10 billion is too high, one of whom requested that the Commission quantify and analyze the investor-protection consequences of the higher threshold and another expressed concerns about the effects of entities with billions of dollars in assets being deemed to be ''small'' (*i.e.,* very large firms could receive regulatory accommodations intended for smaller firms with limited regulatory capacity, which the commenter indicated could cause smaller firms to lose the advantages the RFA provides them and have negative investor protection consequences).[48] One commenter suggested adjusting the thresholds adopted in the 1998 amendments for inflation, resulting in a $100 million threshold, or alternatively using the SBA's small entity standard based on $40 million in gross receipts.[49] Another commenter, asserting that the proposed threshold is too high, suggested defining ''small entities'' as those at or below the 20th percentile of aggregate fund family net assets using a distribution methodology based on Form N–CEN data.[50]

After considering these comments, we are, as proposed, raising the net asset threshold to $10 billion for funds. We agree with commenters' statements that the increased threshold would better reflect the growth in the fund industry and aid the Commission's analysis of regulatory and compliance costs on small funds.[51] Based on analysis of the distribution of data discussed above, we are adopting a ''small entity'' definition that incorporates a $10 billion net asset threshold, which continues to correspond to the 80th percentile threshold in that distribution-based analysis.[52] While the amended threshold will deem some relatively large individual funds ''small'' for purposes of the RFA, such an outcome is consistent with the economies of scale rationale for aggregating funds within a family. A single large fund with no other related funds will bear similar regulatory costs to several smaller, related funds that collectively represent a similar level of net assets. Therefore, aggregating assets across fund families reflects the Commission's understanding that funds within a complex typically use the same administrative, management, and compliance systems to oversee all the funds within the complex, so fees imposed on the fund by the adviser or administrator typically reflect economies of scale that the adviser or administrator achieves from managing other funds.

While the Commission seeks to ensure that funds and fund families that may face greater challenges with regulatory compliance due to their size be deemed small entities, we are also mindful that setting the threshold too high has the potential to be counterproductive and to undermine the purpose of the Commission's RFA analyses. A higher threshold would result in a larger pool of small entities and therefore would increase the number of small entities needed to be affected by a rule for the rule to ''have a significant economic impact on a substantial number of small entities,'' which could lead to fewer RFA analyses being performed.[53] Setting the threshold too high might also inadvertently lead to the Commission overlooking issues that concern the smallest entities when the Commission attempts to tailor its rules, and instead focusing primarily on issues of more general concern to the industry. Such an outcome might have the potential to perpetuate larger funds' advantages in the market, to the detriment of the smaller funds that the RFA was designed to protect.[54] Accordingly, the Commission's amended threshold is meant to identify a level below which a meaningful proportion of funds would be deemed small entities, but above which the size of, and concentration of assets in, fund families increases to such an extent that treating individual funds within those families as small entities would not be consistent with the goals of the RFA. We are therefore not adopting a smaller threshold than the proposed $10 billion threshold. We are also therefore not adopting a threshold of $12 billion as one commenter suggested. We do not believe this change from the proposed

[42] *See* Proposing Release, at section II.A.1.

[43] *See* Proposing Release, at n.60; Table 1 and accompanying text. The data the Commission presented in the proposing release continues to represent the distribution of fund families, individual funds, and fund assets. *See also infra* footnote 52 and accompanying text.

[44] The SBA considers economic characteristics composing the structure of an industry such as degree of competition, average firm size, start-up costs and entry barriers, and distribution of firms by size in establishing size standards. *See* 13 CFR 121.102. We have focused our analysis on the distribution of firms by size, as that is the metric for which we have the best available data.

[51] *See e.g.,* IDC Comment Letter.

[52] Based on Form N–CEN data as of December 2025, fund families at or below the 80th percentile threshold of $10.59 billion in net assets similarly accounted for 22.6% of individual funds and 2.1% of fund assets.

[53] *See* 5 U.S.C. 605(b); *see also, e.g.,* 1982 Adopting Release, *supra* footnote 13, at n.41 and accompanying text (stating, in the context of the AUM threshold for investment advisers, ''the bigger the class, the greater the number of entities within it that must be adversely affected by a particular rulemaking before it can be said that the rulemaking affects a 'substantial' number of the class'').

[54] *See* discussion at *supra* footnotes 7–9 and accompanying text.

approach, based on one-year market movements, would be appropriate, as the proposed threshold was designed to be stable and flexible enough to guide Commission analysis for the next 10 years and not to reflect short-term market fluctuations.

We are not adjusting the current threshold for inflation, as some commenters suggested, but rather are retaining the proposed distribution-based methodology as the basis for the final rules' threshold adjustment. A net asset threshold of $100 million (the result of inflation-adjusting the current rule's threshold) would cover less than 3% of funds and less than .03% of fund assets and would constrain future Commission analysis of small entity issues to this limited group.[55] Further, we are not adopting a threshold based on a gross receipts analysis. As discussed in the Proposing Release, gross receipts are not well suited to the fund industry, primarily because the Commission does not have or collect data for gross receipts of registered investment companies.[56] As the Proposing Release also discussed, funds primarily generate revenue through capital appreciation and other investment returns rather than receipts from the sale of goods or services, and a fund's investment returns may be attributable primarily to its particular investment strategy, meaning that two funds of identical size but pursuing different investment strategies may produce vastly different returns.[57] Commenters did not address or dispute these rationales for using an approach other than a gross receipts analysis.

We are also not adopting an approach that defines small entities as fund families with net assets at or below the 20th percentile as determined annually. The $10 billion net asset threshold and corresponding percentile we are adopting were derived from a distribution analysis particular to that data and set of facts and, therefore, is not necessarily indicative of the proportion of funds that should be deemed small entities in the future. A fixed percentile may become stale over time as the size and distribution of fund family net assets changes. Additionally, as discussed above, we continue to believe that a lower net asset threshold would not appropriately define ''small entities'' for future Commission analysis.[58]

Some commenters recommended aligning the adviser and fund thresholds so that if either a fund or an adviser qualifies as small, both would be treated as small.[59] These commenters expressed concerns that a mismatch between the fund and adviser thresholds could produce anomalous outcomes where, for example, an adviser managing a few billion dollars is not considered ''small,'' while the funds it manages are. We continue to believe that independent asset thresholds for advisers and funds are appropriate. Advisers and funds are separate industries with different regulatory requirements and resources available to comply with these requirements. Therefore, the status of a fund as small and not dominant in its field is not indicative of its adviser being similarly situated, or vice versa.

2. Group Definition Amendments

As proposed, we are amending rule 0–10 to replace the term ''group of related investment companies'' with ''family of investment companies,'' as that term is used in Item B.5 of Form N–CEN.[60] Currently, while the ''small entity'' designation applies to individual funds, whether any individual fund is deemed small depends upon the aggregate net assets of all funds within its respective ''group of related investment companies.'' The change from using the term ''group of related investment companies'' to using ''family of investment companies'' in the small entity definition will enable the Commission to rely on information that is already reported on Form N–CEN to identify small entities for purposes of RFA analyses and to more efficiently consider whether future adjustments to the net asset threshold are warranted. For comparison, the table below provides the existing definition of ''group of related investment companies'' from rule 0–10 alongside the existing definition of ''family of investment companies'' from Form N–CEN:

[55] Proposing Release, at n.59 and accompanying text (table showing the distribution of assets across funds and fund families by percentile).

[56] Proposing Release, at n.63 and accompanying text.

[57] *See id.*

[58] *See supra* footnotes 52, 54–55 and accompanying text.

[59] *See* Federated Hermes Comment Letter; ICI Comment Letter; IDC Comment Letter.

[60] *See* final 17 CFR 270.0–10(a)–(b); proposed 17 CFR 270.0–10(a)–(b). Item B.5 of Form N–CEN requires investment companies to report whether they are part of a ''family of investment companies'' and, if so, to disclose the full name of the family of investment companies.

Table 1

"Group of Related Investment Companies"	"Family of Investment Companies"
(a) . . . (1) In the case of a management company, ***group of related investment companies*** means two or more management companies (including series thereof) that: (i) Hold themselves out to investors as related companies for purposes of investment and investor services; and (ii) Either: (A) Have a common investment adviser or have investment advisers that are affiliated persons of each other; or (B) Have a common administrator **(2)** In the case of a unit investment trust, the term ***group of related investment companies*** shall mean two or more unit investment trusts (including series thereof) that have a common sponsor. **(b)** ***Special rule for insurance company separate accounts.*** In determining whether an insurance company separate account is a *small business* or *small entity* pursuant to paragraph (a) of this section, the assets of the separate account shall be cumulated with the assets of the general account and all other separate accounts of the insurance company.	"Family of investment companies" means, except for insurance company separate accounts, any two or more registered investment companies that: (i) share the same investment adviser or principal underwriter; and (ii) hold themselves out to investors as related companies for purposes of investment and investor services. Insurance company separate accounts that may not hold themselves out to investors as related companies (products) for purposes of investment and investor services should consider themselves part of the same family if the operational or accounting or control systems under which these entities function are substantially similar.

Commenters expressed support for the proposed changes.[61] They agreed that the Commission should leverage data that is already collected in Form N–CEN, so as not to impose the additional burden of a new reporting requirement related to the ''group of related investment companies'' definition.[62] Some commenters, while expressing support for the proposed changes, also offered views on how the ''family of investment companies'' definition in Form N–CEN might be improved.[63]

After considering commenters' input, we are adopting a final definition that uses ''family of investment companies,'' as proposed. As described in the Proposing Release, the definition of ''family of investment companies'' serves a substantially similar purpose to the definition of ''group of related investment companies'' in seeking to group together funds that hold themselves out to investors as related (the ''holding out prong'') and that share an investment adviser or key service provider (an administrator for a ''group of related investment companies'' or underwriter for a ''family of investment companies'').[64] We acknowledge that specific differences from the ''group of related investment companies'' concept may produce different outcomes at the margins, such as the extent to which an insurance company's separate account is aggregated (with the insurance company's general account, as well as with other separate accounts) to determine whether individual separate accounts are small entities.[65] Notwithstanding the differences between the two terms, we continue to anticipate, as discussed in the Proposing Release, that funds that are part of the same ''family of investment companies'' are likely to experience similar economies of scale as those funds that are part of the same ''group of related investment companies.'' Examples of potential cost savings due to economies of scale might include complex-wide policies and procedures and recordkeeping systems, a shared chief compliance officer or board members, and one legal and compliance function that services the whole complex.

We are not amending the current definition of ''family of investment companies'' in Form N–CEN as some commenters have suggested. One commenter suggested amending the Form N–CEN definition so that it does not aggregate funds based on a shared principal underwriter, stating that funds that share an underwriter do not necessarily share compliance infrastructure.[66] This commenter, however, did not address the second prong of the Form N–CEN definition that requires registered investment companies to hold themselves out as related companies for purposes of investment and investor services in order to be grouped in the same family of investment companies, which in our view is likely indicative that two funds share compliance and operational infrastructure. Another commenter suggested that the Form N–CEN definition should aggregate separate accounts if they have the same insurance company sponsor or depositor, similar to the current ''group of related investment companies'' definition that aggregates assets of the general account and all other separate

[64] Proposing Release, at nn.69–71 and accompanying text.

[65] Proposing Release, at nn.74–75 and accompanying text (discussing the treatment of insurance company separate accounts under the current and proposed definitions); *see also* Proposing Release, at nn.72–73 and accompanying text (discussing the treatment of UITs under the current and proposed definitions).

[66] Sharma Comment Letter.

accounts of the insurance company.[67] While this commenter stated that this approach would be appropriate because the financial guarantees of variable contracts issued by the same insurance company are backed by the financial strength and claims-paying ability of the same general account, regardless of whether those contracts are supported by different separate accounts, the commenter did acknowledge that the suggested change would likely not significantly change how separate accounts are grouped for small entity definitional purposes.

As other commenters have noted, leveraging data from an existing definition does not impose an additional burden on registrants of having to amend their filings. If we were to amend Form N–CEN as these two commenters suggest, registrants would have to review and possibly amend their filings, reducing or eliminating the benefit of using existing data. Our final approach reflects a view that the burden on other registrants of amending Form N–CEN would not provide commensurate benefits in any incremental improvements to the Commission's analysis of small entities. Further, the ''family of investment companies'' definition from Form N–CEN and associated data collection have long been used in assisting the Commission's analysis of multiple funds across the same family of investment companies.[68]

B. Amendments To Rule 0–7 Under the Advisers Act

1. The RAUM Threshold

As proposed, the final amendments will raise the RAUM Threshold from $25 million to $1 billion and add the Inflation Adjustment Mechanism.[69] Rule 0–7 currently provides that an adviser is a small entity if it has assets under management of less than $25 million ''or such higher amount as the Commission may by rule deem appropriate under Section 203A(a)(1)(A) of the Act.'' [70] As proposed, the final amendments remove the phrase ''or such higher amount as the Commission may by rule deem appropriate under Section 203A(a)(1)(A) of the Act (15 U.S.C. 80b–3a(a)(1)(A)).'' [71] The final amendments are designed to update the RAUM Threshold to reflect the growth of advisers' assets under management over time.[72]

a. Consideration of Alternative Non-RAUM Thresholds

As proposed, the final amendments use an RAUM-based metric for threshold purposes. In the Proposing Release, we discussed feedback the Commission received suggesting alternatives to an asset-based approach to identifying small advisers and requested comment on alternatives to the RAUM Threshold.[73] Some commenters suggested the Commission should replace the RAUM Threshold with a non-RAUM threshold, such as a threshold based on revenue,[74] number of employees,[75] officers, owners, clients, non-accredited investors, or a combination thereof.[76] These commenters expressed concern that RAUM may not reflect the breadth of compliance resources that advisers may or may not have available.[77] According to these commenters, certain other non-RAUM-based thresholds would better evidence compliance burdens and risks of small advisers.[78] Other commenters opposed replacing the RAUM Threshold with a non-RAUM-based threshold.[79]

After considering comments, we are not persuaded to replace the RAUM Threshold with a non-RAUM-based threshold.[80] The Commission has long used RAUM to appropriately differentiate between small and other advisers to identify a universe of entities that are not dominant in the field, a principal element of the small entity status under the RFA.[81] As some commenters stated, RAUM is a meaningful proxy for business scale and compliance capacity,[82] and RAUM metrics directly correlate to the financial resources available for compliance.[83]

In contrast, a non-RAUM-based threshold would not be as reliable a metric to determine whether an adviser is small for RFA purposes as an RAUM-based threshold. An employee-based standard raises implementation challenges in appropriately addressing the use of service providers and outsourcing by investment advisers, which could distort the extent to which the number of an adviser's own employees reflects its actual resources and size. A commenter agreed, stating that an employee-based metric would penalize operational efficiency and outsourcing.[84] This commenter cautioned that moving to an employee-based metric would incentivize the misclassification of staff as contractors to maintain ''small entity'' status. Similarly, a threshold based on the number of clients or non-accredited investors also would not necessarily reflect an adviser's ability to devote resources towards compliance.[85] For example, while an adviser could have only one fund as a client, that fund could be large both by RAUM and number of investors resulting in the adviser maintaining the capacity to devote significant resources towards compliance-related matters. Conversely, an adviser may have a large number of clients, but those clients' assets could represent a small amount of RAUM, so that the adviser would not have economies of scale comparable to a larger adviser with significantly more RAUM. Likewise, we are not persuaded

[67] CAI Comment Letter. *See also* 17 CFR 270.0–10.

[68] *See* Proposing Release, at n.71 and accompanying text (explaining that this definition has been used by the Commission and registrants since 1985).

[69] We discuss the Inflation Adjustment Mechanism in section II.C; final 17 CFR 275.0–7(a)(1).

[70] 17 CFR 275.0–7(a)(1).

[71] In a change from the proposal, we are correcting an erroneous cite in 17 CFR 275.0–7(a)(1), so instead of erroneously citing to 15 U.S.C. 80b–3a(a)(2), it correctly cites to 15 U.S.C. 80b–3a(a)(3), which defines ''assets under management'' under the Advisers Act.

[72] Proposing Release at section II.B.1 for a discussion of the growth of advisers' assets under management over time.

[74] Garcia Hamilton Comment Letter (supporting a revenue-based threshold); *but see, e.g.,* IAA Comment Letter (opposing a revenue-based threshold).

[75] *See e.g.,* CFP Board Comment Letter (supporting an employee-based threshold), *but see, e.g.,* Sharma Comment Letter (opposing an employee-based threshold).

[76] *See e.g.,* Comment Letter of Neil Patrick Murphy (Feb. 8, 2026) (''Murphy Comment Letter'') (supporting a flexible non-RAUM-based threshold), *but see, e.g.,* Sharma Comment Letter (supporting an RAUM-based threshold). A commenter recommended that the Commission should consider ''risk-based threshold alternatives'' such as ''investor exposure,'' and appeared to define ''investor exposure'' as ''total investor assets managed by firms.'' *See* Scarborough Comment Letter. While it appears the commenter was recommending an RAUM-based threshold, given that the commenter suggested the Commission analyze investor exposure, which it defined as ''total investor assets managed by firms,'' the Commission also has considered a total assets based threshold, as well as other types of investor exposure-based thresholds, and we continue to believe that an RAUM-based threshold is the most reliable indicator of whether an adviser is small, for the reasons discussed in this release.

[77] *See e.g.,* CFP Board Comment Letter.

[78] *See e.g.,* CFP Board Comment Letter.

[79] *See e.g.,* Sharma Comment Letter.

[80] Given that the Commission is maintaining an RAUM-based threshold, we are not persuaded to impose additional reporting requirements such as data concerning revenue, as one commenter recommended. *See* Garcia Hamilton Comment Letter.

[81] *See* Proposing Release at section II.B.1.

[82] Proskauer Comment Letter (stating that for advisers, RAUM is a much more meaningful proxy for business scale and compliance capacity, not the amount of assets carried on the adviser's balance sheet).

[84] Sharma Comment Letter.

[85] Murphy Comment Letter.

that a threshold based on the number of officers or owners would be a meaningful measure of adviser size for RFA purposes, because those metrics do not directly relate to how an adviser would scale resources in connection with compliance. A revenue-based threshold also would not provide as meaningful a measure of adviser size for RFA purposes as an RAUM-based threshold. Advisers have diverse fee structures, and as a result, annual receipts may not correlate with firm scale, operational complexity, or available compliance resources. A commenter agreed, stating that revenue recognition practices may differ among firms depending on their accounting methods, further reducing comparability and administrative simplicity.[86]

The Commission has ready access to RAUM data for the types of advisers that are generally subject to our rules, not just those registered with us.[87] Commenters agreed, with one commenter stating that it supported the RAUM-based threshold, in part, because it was readily available to the Commission.[88] For example, while the Commission collects RAUM information from both SEC-registered advisers and exempt reporting advisers, it does not collect revenue information from either type of adviser, and it does not collect employee counts from exempt reporting advisers.[89]

Using RAUM to distinguish between advisers is an approach that is broadly consistent with size standards generally under the Advisers Act and the rules thereunder, as well as advisers' existing reporting and compliance obligations. Congress has repeatedly differentiated the regulations to which an adviser is subject by using assets under management thresholds as size standards under the Advisers Act. For example, Advisers Act section 203(m) sets forth an assets under management threshold for the private fund adviser exemption from registration, and Advisers Act section 203A(a)(2) sets forth an assets under management threshold for mid-sized advisers. Some commenters agreed.[90] For example, one commenter stated that it appreciated the Commission's explanation for proposing to maintain an RAUM-based threshold, including the view that RAUM aligns with existing regulatory frameworks.[91] Another commenter supported maintaining an RAUM metric, in part, because it is well understood and widely used.[92]

A commenter recommended that, no matter the approach, the Commission should establish a structured methodology that grounds any definition of ''small entity'' in empirical data.[93] The final amendments to the RAUM Threshold address this comment because they help ensure that rule 0–7 continues to use a structured methodology that grounds the definition of ''small entity'' in empirical data, namely RAUM, as discussed more fully in section II.B.1.b.

b. The $1 Billion RAUM Threshold

As proposed, we are raising the RAUM Threshold from $25 million to $1 billion. Commenters generally agreed that the current RAUM Threshold is too low.[94] Most commenters supported raising the RAUM Threshold to correct the misalignment between the current threshold and the current economic reality created by decades of industry growth,[95] the fact that capital has become concentrated among a small number of advisers,[96] and the structural changes in the investment management industry since the 1998 amendments, including that in 2010, the Dodd-Frank Act raised the SEC-registration threshold, resulting in fewer smaller advisers registering with the Commission.[97] In contrast, one commenter asserted it is counterintuitive that advisers' significantly increased RAUM supports their designation as small entities.[98] Another commenter stated that the Commission should not base the RAUM Threshold on the fact that there are some very large advisers.[99]

We continue to believe that the current RAUM Threshold is too low. The final RAUM Threshold is designed to capture the types and numbers of investment advisers that the Commission now considers to be ''small'' in light of industry growth since the 1998 amendments.[100] We disagree that industry asset growth or the presence of very large advisers undermines basing ''small entity'' status on an RAUM Threshold or the particular RAUM Threshold we are adopting.[101] It is appropriate to consider the size of the investment management industry as a whole, as well as how the size is distributed across advisers, in determining adviser size thresholds under the RFA, because it helps ensure that such size thresholds are relevant to the adviser industry. What is ''small'' is an inherently relative exercise, and in an industry that ranges to very large advisers managing trillions of dollars in assets, even small advisers may manage sizeable amounts of assets. As discussed below, the distribution of advisory assets skewing heavily towards large advisers only exacerbates this effect.

Most commenters supported raising the adviser RAUM Threshold specifically from $25 million to $1 billion, saying that the proposed threshold would better reflect current market realities.[102] Others expressed concern that the proposed threshold would be too high because it would classify too many advisers as small.[103] One commenter cautioned that the Commission should not raise the adviser RAUM Threshold any higher than the proposed $1 billion threshold because it would obscure the impacts of rulemaking on small entities and deprive the public of a clear articulation of, and opportunity to comment on, those impacts.[104]

Some commenters recommended increasing the RAUM Threshold by a lesser amount than proposed.[105] For example, a commenter recommended that the Commission should increase the current RAUM Threshold for inflation since the 1998 amendments, instead, raising it to about $50 million.[106] Another commenter recommended amending the RAUM Threshold to align with the lowest 20th

[106] Better Markets Comment Letter.

percentile of advisers.[107] We are not persuaded to increase the RAUM Threshold by a lesser amount than proposed because we are concerned that the commenters' recommended thresholds would not account for the fact that the distribution of RAUM across all advisers is highly uneven. As discussed in the Proposing Release, some advisers report having virtually zero RAUM, while a significant amount of the total RAUM is concentrated at the top 5 percent of advisers.[108] As discussed in the Proposing Release, the proposed $1 billion RAUM Threshold would represent 75 percent of advisers, but only under 3 percent of the total RAUM in the industry.[109] Therefore, we continue to believe that in light of the significant concentration of RAUM with the very largest advisers, the $1 billion RAUM Threshold will strike an appropriate balance between the level of RAUM per small adviser and the proportion of total RAUM in the industry.[110]

Some commenters recommended that the Commission provide certain data to support its proposal.[111] For example, a commenter recommended the Commission provide data concerning investor exposure, which the commenter appeared to define as total investor assets managed by firms that would newly qualify as small entities.[112] Another commenter expressed concern that the proposal did not provide details about why the RAUM Threshold should be $1 billion and not another number.[113] This commenter expressed concern that the Commission described the proposed amendment as seeking to separate those who are ''dominant in their field'' from those who are ''not dominant in'' their field, but did not explain the ''dominance'' test or why that test would be appropriate in this circumstance.

Other commenters, however, expressed appreciation that the Commission chose the $1 billion figure based on data, which demonstrated industry concentration.[114] Another commenter stated that it appreciated the Commission's thoughtful and well-reasoned analysis supporting the proposed $1 billion RAUM Threshold.[115] This commenter discussed how the Proposing Release carefully considered both the significant concentration of assets among the largest advisers and the RFA's requirement that a small entity be one that is not ''dominant in its field.'' The commenter stated that although the proposal would classify a substantial proportion of advisers as small entities, the Commission explained why this result would be appropriate given the comparatively modest amount of assets managed by these firms relative to the largest advisers.

The Commission proposed the $1 billion RAUM Threshold in light of the RFA's default definitions of the terms ''small business'' and ''small organization,'' which define such entities as those that are independently owned and operated and are not dominant in their field.[116] The RFA provides that an agency may establish its own definitions of ''small business'' and ''small organization'' under certain circumstances.[117] Rule 0–7's Control Relationship Threshold is designed to address the element of the RFA's default definitions that require the ''small business'' or ''small organization'' to be independently owned and operated,[118] whereas the Commission proposed the $1 billion RAUM Threshold to address the requirement that a ''small business'' or ''small organization'' not be dominant in its field.[119]

As discussed in the Proposing Release, the Commission used Form ADV reporting data from SEC-registered advisers and exempt reporting advisers to analyze the distribution of investment advisers and RAUM, including data concerning the percentile of advisers, individual RAUM of advisers at the percentile, the total number of all advisers at or below the percentile, and the total RAUM of all advisers at or below the percentile in millions and as a percent.[120] The Commission estimated that the proposed $1 billion RAUM Threshold would still represent under 3 percent of total RAUM in the industry.[121] The Commission published these summary statistics in the Proposing Release, showing the distribution of assets across firms, and the proportion of entities that would qualify under the proposed and other potential thresholds.[122] As discussed in the Proposing Release, these data revealed that the distribution of RAUM across all advisers is highly uneven, in part due to some advisers reporting zero or virtually zero RAUM, and more significantly because of the concentration of RAUM with the very largest advisers in the industry. The Commission compared data concerning the proposed RAUM Threshold to historical definitions, noting that the proposed RAUM Threshold would not result in the same proportion of advisers that were ''small entities'' as a result of the 1998 amendments.[123]

After considering comments, and in light of the RFA's default definitions and our data analysis, we continue to believe that a $1 billion RAUM Threshold is appropriate, and we do not believe that the final rules would inappropriately afford larger firms RFA accommodations that are intended for small entities.[124] A size standard threshold that is set too high could inadvertently cause Commission RFA analysis to mistakenly focus on issues of more general concern to the industry, instead of on issues that particularly impact smaller entities, as required by the RFA. Conversely, we are concerned that setting the RAUM Threshold too low would not be consistent with the RFA's default definition of ''small business'' and ''small organization,'' because it would exclude advisers that are not dominant in their field. We believe such advisers may have fewer compliance resources, and therefore, would benefit from being considered a ''small business'' or ''small organization'' under the RFA. Although using $1 billion as the RAUM Threshold would classify a large proportion of investment advisers as small, this is a reasonable and appropriate result for purposes of our analyses under the RFA, in part due to the relative amount of

[119] Proposing Release at II.B.1.

[120] *See* Proposing Release at n.82–83; Table 3 and accompanying text. The data the Commission presented in the Proposing Release continues to represent the distribution of investment advisers and RAUM.

[121] *See* Proposing Release at section II.B.1; Table 3 and accompanying text; *See* Scarborough Comment Letter, which requested such quantification and analysis. This commenter recommended the Commission should quantify and analyze investor exposure, which the commenter appeared to define as total investor assets managed by firms that would newly qualify as small entities. Therefore, it appears the commenter was recommending analysis of an RAUM-based threshold, which the Proposing Release analyzed.

[122] *See* Proposing Release at n.82–83; Table 3 and accompanying text; *see also* Logos Comment Letter, which requested such summary statistics.

[123] *See* Proposing Release at n.82–83; Table 3 and accompanying text; *see also* Logos Comment Letter, which requested such comparative historical analysis.

[124] Scarborough Comment Letter (requesting such analysis).

assets managed by these advisers compared to the largest advisers, *i.e.,* those dominant in their field. We continue to believe that a $1 billion RAUM Threshold strikes an appropriate balance between the level of RAUM per small adviser and the proportion of total RAUM in the industry captured by the new threshold.[125]

A commenter recommended that ''exempt reporting advisers'' should have a higher adviser RAUM Threshold than SEC-registered advisers.[126] An ''exempt reporting adviser'' is an investment adviser that qualifies for the exemption from registration under section 203(l) of the Advisers Act because it is an adviser solely to one or more venture capital funds, or under rule 203(m)–1 of the Advisers Act because it is an adviser solely to private funds and has assets under management in the United States of less than $150 million.[127] According to this commenter, Congress has chosen to subject exempt reporting advisers to different and generally less burdensome regulatory obligations and it would be inconsistent with the logic underlying the RFA and the Advisers Act to not assess the burden on exempt reporting advisers independently in recognition of Congress's intent to subject these businesses to different regulatory regimes. We are not persuaded to raise the RAUM Threshold higher for exempt reporting advisers than for SEC-registered advisers, because, in our experience, we do not believe exempt reporting advisers and SEC-registered advisers would be subject to different economies of scale that should impact their status as a small adviser. For example, in our experience, both types of advisers could have similar business models or operational structures that could allow them to achieve similar economies of scale to implement certain rules. If a future rulemaking, however, would have a different impact on exempt reporting advisers than on SEC-registered advisers, the Commission could address that in the future rulemaking.

As discussed above, some commenters recommended aligning the adviser and fund thresholds so that if either a fund complex or its adviser qualifies as small, both would be treated as small for purposes of the RFA.[128] We are not persuaded to implement this recommendation, for the reasons discussed above.

The current rule provides that an adviser is a small entity if it has assets under management of less than $25 million ''or such higher amount as the Commission may by rule deem appropriate under Section 203A(a)(1)(A) of the Act.'' Advisers Act section 203A(a)(1)(A) prohibits advisers from registering with the SEC if they have assets under management below a certain amount. The Commission originally adopted the phrase in 1998 so the RAUM Threshold could increase in tandem with any increase in the minimum threshold for SEC registration.[129] That has not happened in practice, however, despite the SEC registration threshold increasing in 2010.[130] Accordingly, we proposed to remove ''or such higher amount as the Commission may by rule deem appropriate under Section 203A(a)(1)(A) of the Act (15 U.S.C. 80b–3a(a)(1)(A)),'' because the revised RAUM Threshold would exceed and thus not align with the minimum threshold for adviser registration. The Commission did not receive any comments on this proposed change and is removing the phrase, as proposed.

2. The Total Assets Threshold

The final amendments eliminate the Total Assets Threshold, which currently excludes from the definition of small entity any adviser that has total assets of $5 million or more.[131] The Commission requested comment on whether to adjust or eliminate the Total Assets Threshold and proposed to amend the Total Assets Threshold to include an Inflation Adjustment Mechanism.[132]

The Total Assets Threshold was designed to enable the Commission to differentiate between small advisers and non-small advisers that may not have significant RAUM but do have significant assets related to a non-advisory line or component of their business.[133] The Total Assets Threshold also worked in concert with the Control Relationship Threshold in capturing common types of advisory industry affiliations.[134] The Commission had stated that an adviser in a control relationship with a large broker-dealer or other large financial services firm typically benefits from the financial and technical resources of the large firm, and that the large firm may handle much of the administrative and compliance needs of its affiliated adviser using resources not reflected in the adviser's client assets or business assets.[135]

Some commenters recommended eliminating the Total Assets Threshold, stating that total assets are not a reliable indicator of whether an adviser should be considered a small entity.[136] A commenter stated that total assets reflected on an adviser's balance sheet do not necessarily correlate with operational complexity, staffing levels, compliance capacity, or the scope of its advisory business.[137] This commenter stated that advisers may hold assets unrelated to their core advisory operations, including assets tied to non-advisory activities, temporary capital arrangements, or organizational structure, that do not meaningfully reflect firm size for RFA purposes. Another commenter stated that a balance sheet test can exclude advisers that are operationally small, while failing to meaningfully differentiate among advisers' ability to bear incremental compliance costs associated with Commission rulemakings.[138] According to this commenter, where an adviser has *de minimis* RAUM but substantial non-advisory assets, the adviser's investment advisory business is, by definition, not a meaningful component of the firm as a whole. The commenter indicated that in that circumstance, total assets may reflect the scale of the firm, taken as a whole, but does not reflect the resources that the firm is willing or able to allocate to an immaterial advisory business line. This commenter stated that when new adviser-specific requirements increase fixed compliance costs, an enterprise with substantial non-advisory assets but minimal RAUM may rationally choose to exit the advisory business rather than

[125] *See* Proposing Release at section II.B.1.

[127] Form ADV, Glossary of Terms.

[128] *See supra* footnote 59 and accompanying text.

[129] 1998 Adopting Release at n.48; Proposing Release at n.79.

[130] *Id.*

[131] To implement this amendment, the Commission is removing 17 CFR 275.0–7(a)(2), which sets forth the Total Assets Threshold. The Commission is redesignating the Control Relationship Threshold from 17 CFR 275.0–7(a)(3) to 17 CFR 275.0–7(a)(2) and making conforming amendments to remove references to total assets. The Commission also is removing 17 CFR 275.0–7(b)(2), which defines ''total assets,'' and redesignating the subparagraphs of 17 CFR 275.0–7(b), to account for that removal.

[132] Proposed 17 CFR 275.0–7(a)(2); Proposing Release at section II.B.2.

[133] Proposing Release at section II.B.2.

[134] *Id.*

[135] Definitions of ''Small Business'' or ''Small Organization'' Under the Investment Company Act of 1940, the Investment Advisers Act of 1940, the Securities Exchange Act of 1934, and the Securities Act of 1933, Securities Act Release No. 7383 (Jan. 22, 1997), [62 FR 4106 (Jan. 28, 1997)] (''1997 Proposing Release''), at text following n.51.

[136] Some commenters recommended that if the Commission retains the Total Assets Threshold, it should raise it to be commensurate with the proposed RAUM Threshold. *See e.g.,* Proskauer Comment Letter.

[137] IAA Comment Letter.

[138] Proskauer Comment Letter.

devote incremental resources to comply with the rules affecting an immaterial portion of its overall operations.

After considering comments, we are eliminating the Total Assets Threshold. It is not necessary to maintain the Total Assets Threshold, because the RAUM Threshold and Control Relationship Threshold, as amended, are more reliable indicators of whether an adviser is a small entity for purposes of the RFA. Balance sheet assets, such as leases and equipment, do not reflect the scope of an advisory business as well as regulatory assets under management.[139] Furthermore, we understand an adviser that has *de minimis* RAUM, but significant assets related to a non-advisory business may not be willing or able to allocate resources from the non-advisory line to an immaterial advisory business if the non-advisory line does not share comparable compliance requirements. For example, while advisers and broker-dealers may have some comparable compliance requirements under the Advisers Act and the Exchange Act, respectively, other compliance requirements are not easily scalable for both. For example, both advisers and broker-dealers must deliver 17 CFR 279.1, Part 3 and 17 CFR 249.641, respectively (''Form CRS'') to retail investors under the Advisers Act and the Exchange Act, respectively,[140] but only advisers must file Form ADV Part 1A, as applicable.[141] Therefore, a large broker-dealer under common control with an adviser with *de minimis* RAUM may be able to scale certain resources to the adviser concerning Form CRS, but not Form ADV Part 1A, because that requirement only concerns the adviser.

The RFA defines a ''small business'' and ''small organization'' as entities that are ''not dominant in their field.'' [142] The final rules will continue to be consistent with the Commission's efforts to take into account the structure of business concerns and organizations in the securities industry when defining the terms ''small business'' and ''small organization'' and to preclude entities with significant economic or financial resources from obtaining potential regulatory benefits under the RFA.[143] The Control Relationship Threshold will continue to prevent affiliates of large advisers from obtaining potential regulatory benefits under the RFA. Currently and under the final rules, the Control Relationship Threshold precludes advisers from being considered small if they have *de minimis* RAUM, but control, are controlled by, or are under common control with another adviser that has assets under management equal to or greater than the RAUM Threshold. In such a case, the adviser with *de minimis* RAUM would appropriately continue to be precluded from obtaining potential regulatory benefits under the RFA.

Although the Commission originally aligned the Total Assets Threshold with the total assets test used in the ''small entity'' definition in 17 CFR 240.0–10 (''Exchange Act rule 0–10''), it is not necessary to continue to align them through a total assets metric, as a commenter discussed.[144] Currently, Exchange Act rule 0–10(a) provides, among other things, that when used with reference to an ''issuer'' or a ''person,'' other than an investment company, the term ''small business'' or ''small organization'' means an ''issuer'' or ''person'' that, on the last day of its most recent fiscal year, had total assets of $5 million or less.[145] The Commission stated that it aligned the values of the ''small entity'' definitions under the Advisers Act and the Exchange Act in view of financial industry affiliations between advisers and other large financial services firms to which the Exchange Act definition would apply.[146] However, as discussed above, the RAUM Threshold is a more reliable indicator of whether an adviser is a small entity for purposes of the RFA. As indicated by a commenter, RAUM is a more meaningful proxy for business scale and compliance capacity for advisers, rather than the amount of assets carried on the adviser's balance sheet.[147] The ''small entity'' definitions under the Advisers Act and the Exchange Act will continue to be aligned in other ways, including by both having thresholds that concern control relationships.[148]

The Commission receives limited information regarding advisers' total assets that would allow it to analyze with specificity the impact of potential changes to the Total Assets Threshold over the distribution of investment advisers. The Commission only receives information in Item 1.O. of Part 1A of Form ADV regarding investment advisers with $1 billion or more in total assets as well as information in Item 12 from registered investment advisers with less than $25 million in RAUM regarding whether they have less than $5 million in total assets. Commenters did not support adopting additional reporting requirements to preserve this element of the definition of ''small entity.'' [149] Given that the RAUM Threshold and Control Relationship Threshold are more meaningful thresholds to determine whether an adviser is small for purposes of the RFA than the Total Assets Threshold, we are not persuaded that imposing new reporting burdens to calibrate the Total Assets Threshold would be justified.

3. The Control Relationship Threshold

The Commission is amending the Control Relationship Threshold, with modifications from the proposal. Currently, the Control Relationship Threshold disqualifies an adviser from being considered small if it is in a control relationship with an affiliated adviser exceeding an assets under management test that mirrors the current RAUM Threshold of $25 million.[150] To continue to maintain a consistent threshold between the Control Relationship Threshold and the RAUM Threshold, the Commission is amending the value of the Control Relationship Threshold to conform it to the revised $1 billion RAUM Threshold, including its corresponding Inflation Adjustment Mechanism, as proposed.[151] Also, as proposed, the Commission is removing ''(or such higher amount as the Commission may deem appropriate)'' to further conform the Control Relationship Threshold with the revised RAUM Threshold, for which the Commission removed a similar phrase.[152] In a change from the proposal, the Commission is removing from the Control Relationship Threshold the elements that concern the Total Assets Threshold, namely that an

adviser is disqualified from being considered a small entity if it has a control relationship with any person (other than a natural person) that had total assets of $5 million or more on the last day of the most recent fiscal year (as well as the proposed inflation adjustment to this amount).[153] As discussed above, an RAUM threshold is a more reliable indicator of whether an adviser is a small entity than a total assets threshold.[154] In another change from the proposal, the Commission is further amending the Control Relationship Threshold, after considering comments, to help advisers understand how to calculate the assets under management referenced in the Control Relationship Threshold, as discussed more fully below.[155] As a result, under the final amendments, an adviser would meet the Control Relationship Threshold if it does not control, is not controlled by, and is not under common control with another investment adviser that has assets under management equal to or greater than the RAUM Threshold.

The Control Relationship Threshold is designed to preclude entities with significant economic or financial resources from obtaining potential regulatory benefits under the RFA.[156] We continue to believe that Congress did not intend affiliates of large businesses to receive benefits under the RFA.[157] Only those businesses and organizations that are ''independently owned'' may qualify as small entities pursuant to the definitions contained in the RFA.[158] The final amendments to the Control Relationship Threshold are designed to help ensure the Control Relationship Threshold continues to preclude entities with significant economic or financial resources from their large business affiliates from obtaining potential regulatory benefits under the RFA.

Commenters supported the Commission's proposal to make conforming amendments to the Control Relationship Threshold to reflect the revised $1 billion RAUM Threshold, with its corresponding Inflation Adjustment Mechanism.[159] Commenters also offered recommendations concerning the Control Relationship Threshold. A commenter requested that the Commission confirm that RAUM as reported on Form ADV is the operative metric for adviser small entity status.[160] Under the current rule, the RAUM Threshold sets forth how to calculate assets under management: as defined under Advisers Act section 203A(a)(3) and reported on an adviser's annual updating amendment to Form ADV.[161] The current Control Relationship Threshold, however, only discusses assets under management, without detailing the calculation method.[162]

After considering the comments, the Commission is confirming that advisers must calculate assets under management for the Control Relationship Threshold using the same method as the RAUM Threshold: as defined under Advisers Act section 203A(a)(3) and reported on the adviser's annual updating amendment to Form ADV. In this regard, in a change from the proposal, the Commission is amending the Control Relationship Threshold so that instead of specifying the amount of assets under management of an affiliated investment adviser to surpass the threshold, as it currently does, it instead references rule 0–7 paragraph (a)(1), which sets forth the RAUM Threshold, including its corresponding Inflation Adjustment Mechanism and the calculation method.[163] This amendment does not change how the Control Relationship Threshold operates as compared to the current rule. Instead, it is designed to ensure that advisers understand how to calculate the assets under management in the Control Relationship Threshold.

A commenter recommended the Commission amend the Control Relationship Threshold to provide a special rule for insurance companies, so that an insurance company's affiliated institutional advisers would not be cumulated with an insurance company's affiliated retail advisers.[164] This commenter stated that institutional advisers and retail advisers involve substantially different infrastructures, systems, and regulatory requirements, they do not share management or advisory personnel, they have distinct costs and burdens, and there are few opportunities for economies of scale between them. The commenter expressed concern that a retail adviser may be disproportionately and unfairly impacted by changes in Commission regulation if its assets under management are cumulated with an institutional adviser merely due to common control.

We are not persuaded to provide a special rule for insurance companies, so that an insurance company's affiliated institutional advisers would not be cumulated with an insurance company's affiliated retail advisers. Currently, the requirements in rule 0–7 do not distinguish between retail advisers and institutional advisers. We are not persuaded that advisers should be treated differently under rule 0–7 solely based on the fact that they are affiliated with an insurance company. We disagree with this commenter's assertion that an adviser's retail and institutional advisory businesses involve substantially different regulatory requirements. Retail and institutional advisory businesses involve substantially similar regulatory requirements, because both are subject to the Advisers Act, and the rules thereunder, among other things which do not generally differentiate between the type of client. Even if affiliated advisers choose different infrastructures, systems, management, or advisory personnel, there remain opportunities for economies of scale concerning compliance with and operation under the Advisers Act and the rules thereunder, even if some particular provisions do not apply to each adviser. Therefore, we disagree with the commenter's assertion that a retail adviser would be disproportionately or unfairly impacted by changes in Commission regulation if its assets under management are cumulated with an institutional adviser due to common control.

4. Conforming Amendments to Form ADV and the Adviser Hardship Exemption Rule

The Commission is making conforming amendments to Form ADV, General Instruction 17, and Item 12 of Part 1A, as well as Advisers Act rule 203–3(b), with modifications from the proposal. Form ADV is the uniform application for investment adviser registration and report form by exempt reporting advisers. General Instruction 17 summarizes the conditions for certain small advisers to apply for an

[153] A commenter requested the Commission provide examples illustrating the application of the Control Relationship Threshold to common dual-registrant and holding company structures, stating that it was concerned large broker-dealer operations of dual registrants would cause an adviser to no longer be a small entity. This request appears to concern the element of the current Control Relationship Threshold that concerns total assets that we are removing, because only the total asset analysis considered non-advisory assets. Therefore, this request does not appear to be applicable to the final rules. *See* ASA Comment Letter; 17 CFR 275.0–7(a)(3); final 17 CFR 275.0–7(a).

exemption from filing Form ADV electronically with the IARD. Item 12 of Part 1A requires an eligible SEC-registered adviser to report how it qualifies as a ''small business'' or ''small organization'' under rule 0–7. It is designed to provide information to the public and the Commission about advisers, including information that enables the Commission to consider the effect of its regulations on small entities, as required by the RFA.[165] Rule 203–3(b) sets forth conditions for certain small SEC-registered advisers to apply for a continuing hardship exemption from the requirement to make Advisers Act filings electronically with the IARD, among other things.

As proposed, the Commission is making conforming amendments to Form ADV, including General Instruction 17 and Item 12, as well as rule 203–3(b) to reflect the final amendments to the RAUM Threshold, the Control Relationship Threshold, and their corresponding inflation adjustments. Currently, General Instruction 17 states, in part, that an adviser is a small business, and may be eligible for a continuing hardship exemption, if it is required to answer Item 12 of Part 1A ''(because you have assets under management of less than $25 million)'' and it is able to respond ''no'' to each question in Item 12. As proposed, the Commission is removing the parenthetical ''(because you have assets under management of less than $25 million).'' This parenthetical is implicit, given that the sentence also directs advisers to Item 12, which provides the relevant instructions. Removing this phrase will avoid requiring the Commission to update it periodically, as the Commission adjusts the RAUM Threshold for inflation. Also, as proposed, the Commission is revising General Instruction 17 and rule 203–3(b) so they explicitly apply to an adviser that is either a ''small business'' or ''small organization,'' as Item 12 does, rather than just a ''small business.''

In a change from the proposal, the Commission is making additional conforming amendments to Form ADV, Item 12 of Part 1A to remove references to the Total Assets Threshold, to reflect that the Commission is eliminating the Total Assets Threshold from rule 0–7. In connection with this change, the Commission also is amending rule 203–3(b)(5) to remove the phrase ''that you were required to answer'' because it is no longer relevant in light of the amendments to Item 12. In another change from the proposal, the Commission is revising the language of Form ADV Item 12, so that it refers to rule 0–7, rather than re-stating the threshold, as proposed. This amendment does not change the substance of Item 12 as compared to the proposal. The purpose of this amendment is to help ensure Item 12 remains operative, without additional rulemaking, in light of future Commission orders that may adjust rule 0–7's threshold for inflation.

One commenter supported the proposed amendments to Form ADV, discussing that the proposed amendments would help ensure internal consistency across Commission rules.[166] This commenter, along with another commenter, recommended not imposing any additional reporting requirements.[167] The Commission did not propose additional reporting requirements, and is not adopting additional reporting requirements at this time. A commenter requested the Commission quantify and analyze regulatory relief consequences, which the commenter described as Commission reporting, compliance, or procedural accommodations that would become newly available once firms qualify as small entities.[168] We are confirming that rule 203–3(b) provides such an accommodation and its continuing hardship accommodation will become newly available once firms qualify as small entities.[169]

C. Periodic Future Adjustments

The final amendments to rules 0–10 and 0–7 will, as proposed, provide an Inflation Adjustment Mechanism for periodic future adjustments of the asset-based thresholds used in these rules' small entity definitions.[170] Specifically, the amendments provide that the Commission will issue an order every ten years adjusting: (i) the net asset threshold in the investment company small entity definition; and (ii) in the investment adviser small entity definition, the RAUM Threshold (which will also now have the effect of adjusting the Control Relationship Threshold). As proposed, the final amendments to rule 0–10 and rule 0–7 will require that the adjustment of the asset-based thresholds be calculated by reference to the Personal Consumption Expenditures Chain-Type Price Index (the ''PCE Index'').[171] The final amendments providing the Inflation Adjustment Mechanism will require rounding the investment company small entity net asset threshold to the nearest multiple of $1,000,000,000 and rounding the investment adviser small entity RAUM Threshold (and thus the Control Relationship Threshold) to the nearest multiple of $100,000,000.[172]

In order to adjust the asset-based thresholds for the ''small entity'' definitions as discussed above, the Commission considered an analysis of the distribution of fund and adviser assets and the growth in these assets over time. As described in the Proposing Release, however, these amended thresholds may become less useful over time due to growth in markets and any subsequent changes in the fund and adviser industries. The proposed Inflation Adjustment Mechanism was designed to ensure that the thresholds are adjusted every ten years, because the adjustment would be required by rule and effected through a Commission order.

Some commenters supported the proposed inflation adjustments.[173] Other commenters supported the goal of periodic adjustments, but expressed concern about the details of the proposal.[174] For example, some commenters recommended the Commission use a shorter cadence for adjustments, such as five or seven years, to ensure that the thresholds remain reasonable.[175] Some commenters recommended using an adjustment mechanism they consider more relevant than inflation, such as a broad-based index of asset prices,[176] or the proposal's own asset-based distribution

[165] *See* Form ADV, Item 12 of Part 1A.

[166] IAA Comment Letter.

[167] IAA Comment Letter; Proskauer Comment Letter.

[168] *See* Scarborough Comment Letter.

[169] Currently, the Commission's definition of ''small entity'' under the RFA is incorporated into the Commission's other rules and regulations only in connection with an adviser's responses to Form ADV (and this release is implementing corresponding amendments to the form) and rule 203–3(b). *See infra* footnote 189, and accompanying text.

[170] Final 17 CFR 270.0–10(c); final 17 CFR 275.0–7(c).

[171] *See id.*

[172] Final 17 CFR 275.0–7(c)(2) and final 17 CFR 270.0–10(c)(2). Final 17 CFR 270.0–10 will require the net asset threshold for small entities be adjusted for inflation by dividing the year-end value of the PCE Index for the calendar year preceding the calendar year in which the order is being issued, by the year-end value of the PCE Index for the calendar year in which any final rule that is adopted becomes effective, multiplying $10 billion (*i.e.,* the final amendments' net asset threshold) by that quotient, and rounding the product to the nearest multiple of $1 billion. Final 17 CFR 275.0–7(c)(2) will adjust the RAUM Threshold (and thus the Control Relationship Threshold) by starting with the same quotient but will multiply that by $1 billion, rounded to the nearest multiple of $100 million.

[176] Proskauer Comment Letter.

analysis for RAUM and net asset percentiles.[177]

After considering comments, we are adopting the Inflation Adjustment Mechanism substantially as proposed.[178] Adjustments that the Commission makes mechanically by order could help maintain the thresholds at levels that reflect the buying power of money over time, without the need for Commission action through rulemaking.[179] We expect, as discussed in the Proposing Release and by commenters, that the Inflation Adjustment Mechanism will prevent the thresholds in the small entity definitions from becoming less meaningful over time on account of anticipated changes in dollar value.[180] Specifically, because a fund's or adviser's size is related to its ability to bear compliance costs, adjusting the asset-based thresholds is designed to account for potential increases in those compliance costs.

While certain comments recommended a shorter adjustment cadence, the final amendments' Inflation Adjustment Mechanism reflects the same ten-year cadence as proposed. Given the distributions of different-sized entities for funds and investment advisers, inflationary changes over shorter periods would generally not result in a meaningfully different set of funds and investment advisers being considered small entities under their respective definitions.[181]

Likewise, after considering comments recommending an adjustment mechanism based on a metric other than inflation, we are adopting this aspect of the Inflation Adjustment Mechanism as proposed. We acknowledge that inflation may not perfectly represent growth in the fund and adviser industries. Nevertheless, as discussed above, our view continues to be that inflation adjustment is the most appropriate mechanism for periodically and mechanically adjusting the asset thresholds and implementing the adjustments by order. Inflation, unlike the asset-based distribution analysis mechanisms described by commenters, is a known factor for which a precise value can reliably be derived from a defined index. Periodically adjusting the thresholds to a set percentile from a distribution analysis would similarly be inappropriate. The percentile that resulted from the distribution analysis performed in the Proposing Release is particular to that data and set of facts and, therefore, is not necessarily indicative of the proportion of funds or advisers that should be deemed small entities in the future. In addition, performing the same or similar analysis to determine a future percentile based on then-current data would involve a level of analysis that would require a future rulemaking rather than an adjustment by Commission order. Similarly, we do not consider using a broad-based index of asset prices as the basis for adjustment as suggested by commenters to be appropriate in light of the breadth of fund and adviser strategies. Any one particular index of asset prices would not be appropriate for certain strategies, and if multiple indexes were used, this could result in different levels of adjustment depending on the index, as well as operational complexity.

It is possible, but less predictable, that the asset-based thresholds may become less useful over time even taking the Inflation Adjustment Mechanism we are adopting into account (for example, with the advent of market events, changes in the makeup or distribution of size of the fund or adviser markets, or other industry changes). In this case, the Commission could consider performing appropriate analyses to propose amendments to the thresholds again in the future independent of the Inflation Adjustment Mechanism. Similarly, in the future, the Commission also could consider proposing a periodic adjustment approach using analysis other than one based on the Inflation Adjustment Mechanism.

D. Effective Date and Compliance Date

The effective dates and compliance dates are as follows:

- Final amendments to rule 0–10 and rule 0–7 are effective February 4, 2027, which is 90 days from the date of publication in the **Federal Register**.
- Final amendments to rule 203–3 and Form ADV are effective, and have a compliance date of, February 4, 2027, which is 90 days from the date of publication in the **Federal Register**.

One commenter recommended an implementation period of 180 days, so advisers can reassess their ''small entity'' status, update internal Form ADV filing procedures, train compliance and personnel on the revised Form ADV Item 12 logic and hardship exemption eligibility, and coordinate updates with third-party compliance vendors or filing service providers where applicable.[182] We are not persuaded to provide an implementation period of 180 days. While additional SEC-registered advisers will have to update their small entity status in Item 12 of Form ADV and will be newly eligible for the hardship exemption under rule 203–3(b), the information required to comply with the final amendments is readily available to advisers and the additional cost of the final amendments would be minimal. Also, as a practical matter, most advisers will have additional time to update their Form ADV because Form ADV does not require advisers to file an other-than-annual amendment to update Item 12; most advisers will update Item 12 as part of their regularly scheduled annual amendments.[183] The compliance period for rule 203–3 and Form ADV is designed to provide the Financial Industry Regulatory Authority (''FINRA'') sufficient time to update the IARD to reflect revised Item 12.[184]

In the event that FINRA is unable to update the IARD by the end of the compliance period, until the IARD is updated, advisers should leave Item 12 blank, and provide responses to revised Item 12 in the miscellaneous section of Schedule D of Form ADV.

We are adopting an effective date for rule 0–7, rule 203–3, and Form ADV that matches the compliance date for rule 203–3 and Form ADV, because these rules and form are connected to each other. We are adopting the same effective date for rule 0–10 for consistency.

III. Economic Analysis

The Commission is mindful of the economic effects, including the costs and benefits, of its rules. The Commission has a long-held focus on small entities when engaged in rulemaking. A purpose of the RFA is to promote the effectiveness and efficiency of regulations, including through consideration of alternative regulatory approaches, with the goal of minimizing

[177] *See, e.g.,* Proskauer Comment Letter; ICI Comment Letter.

[178] As discussed above, for advisers, we are removing the Total Assets Threshold and its corresponding inflation adjustment, and we are revising the Control Relationship Threshold to refer to the RAUM Threshold and its inflation adjustment in establishing the threshold under which an affiliated adviser may affect an adviser's small entity status. *See* sections II.B.2 and II.B.3.

[179] The Commission has historically incorporated periodic and mechanical adjustments to certain dollar-based thresholds in regulations affecting funds and investment advisers. These adjustments reflect that some level of change in dollar value is reasonably anticipated to occur in the future and help ensure that the rules' intended application remains consistent and relevant over time. *See, e.g.,* 17 CFR 270.3c–7; 17 CFR 275.205–3; *see also* Proposing Release, at n.128 (discussing Commission releases that have used the PCE Index for inflation adjustment).

[180] *See* Proposing Release at section II.C; *see also, e.g.,* CAI Comment Letter; IAA Comment Letter.

[181] *See, e.g., supra* footnotes 42–43 and 52 and accompanying text; *supra* footnotes 108–110 and accompanying text.

[182] Comment Letter of Charles Schwab & Co. (Mar. 13, 2026) (''Schwab Comment Letter'').

[183] *See* Form ADV, General Instruction 4.

[184] FINRA operates the IARD.

the significant economic impact on small entities consistent with the stated objectives of applicable statutes.[185] The Commission is required to determine if a rulemaking is likely to have a ''significant economic impact on a substantial number of small entities'' under the RFA.[186] In applicable rulemakings, the Commission's definitions of ''small entities'' determine the scope of the regulatory flexibility analyses conducted at the proposal and final stages. The updated definitions are expected to better tailor the Commission's analyses of the specific regulatory challenges faced by small entities by expanding the scope of the analyses that the Commission conducts under the RFA. These analyses, in turn, are expected to better inform the Commission of the regulatory impacts faced by small entities so that it may consider adapting its rulemaking accordingly.[187] To the extent such adaptations to future rulemakings will occur, the use of the amended definitions of ''small entities'' in RFA analyses could result in different benefits and costs of such rulemakings.[188] For example, if the Commission, informed by the more tailored RFA analyses, determined to scope fewer small entities into future rulemakings or tailor obligations imposed by such rulemakings differently for small entities, there could be lower compliance costs imposed on such entities.

In addition to these indirect effects, the final rule will have direct economic effects arising in situations where the updated small entity definitions affect the application of existing Commission rules and regulations. Currently, the Commission's definition of ''small entity'' under the RFA is incorporated into the Commission's other rules and regulations only in connection with an adviser's responses to Form ADV (and this release is implementing corresponding amendments to the form) and to rule 203–3(b). We thus consider the effects of the updated definition as it relates to the use of that definition in Form ADV, as well as the effects of the other associated changes to the form and to rule 203–3(b).[189]

First, we are amending Form ADV to revise General Instruction 17, which currently permits registered or registering investment advisers to receive a continuing hardship exemption from Form ADV electronic filing requirements, pursuant to rule 203–3(b), if such investment adviser is a small business and can demonstrate that filing Form ADV electronically would impose an undue hardship.[190] As proposed, we are revising General Instruction 17 to define an investment adviser as a ''small business'' or ''small organization'' if it is required to answer Item 12 (which itself relies on the definition in rule 0–7) and if it is able to respond ''no'' to each question in Item 12. Since the amendments to Item 12, in conformity with rule 0–7, reflect the removal of the Total Assets Threshold and that the RAUM Threshold is increasing from $25 million to $1 billion, General Instruction 17 will similarly reflect these changes for the availability of the continuing hardship exemption.

As a result, 10,180[191] additional registered investment advisers may be eligible for the exemption under the revised definition, as reflected in the amended General Instruction 17, before any future adjustment for inflation. However, we expect that the increased availability of the continuing hardship exemption to registered investment advisers meeting the updated definition will have minimal economic impact. Due to the ubiquity of inexpensive access to computers and the internet—both to advisers themselves and to the service providers they may employ—any newly eligible advisers are unlikely to be able to demonstrate that filing Form ADV electronically would impose an undue hardship.[192] We therefore anticipate that few, if any, additional advisers will be able to rely on the exemption.

Second, as proposed, we are amending Item 12 of Part 1A of Form ADV to align the RAUM threshold for completing the questions in that item with the final amendments to the definitions of ''small business'' and ''small organization'' under rule 0–7.[193] In a departure from the proposal, we are revising Item 12 and rule 203–3(b)(5) to reflect that the final amendments eliminate the Total Assets Threshold from rule 0–7.

As a result of the final amendments, approximately 10,180[194] additional registered investment advisers will be required to complete Item 12 of Part 1A (before any future adjustment for inflation). These advisers may incur costs associated with training their compliance personnel, updating internal procedures, and coordinating updates with third-party service

[185] *See supra* footnote 7.

[186] *See supra* footnote 8.

[187] Many commenters agreed that the updated definitions will better inform the Commission of the regulatory impacts faced by small entities. *See, e.g.,* IAA Comment Letter, MFA Comment Letter, Schwab Comment Letter. Other commenters stated that the updated definitions, as proposed, would not better inform the Commission in this regard. *See, e.g.,* Better Markets Comment Letter and PIABA Comment Letter. These and other comments received on the substance of the proposed changes to the definitions are discussed throughout *supra* section II.

[188] One commenter argued that the revised definitions may lengthen the rulemaking process. *See* Logos Comment Letter (stating that ''[b]roader inclusion may also increase frequency with which [RFA] analyses are required. This could lengthen the rulemaking process and require administrative resources. While these procedural costs are relatively modest compared to potential regulatory impacts on smaller firms, they represent an operational trade off.'') Our experience with conducting RFA analyses has been that they have not significantly lengthened the rulemaking process.

[189] The scope of the economic analysis therefore addresses the request by one commenter stating that the Commission ''should quantify and analyze [. . .] which SEC reporting, compliance, or procedural accommodations become newly available once firms qualify as small entities.'' *See* Scarborough Comment Letter.

[190] Also, as proposed, the Commission is revising General Instruction 17 and rule 203–3(b) so they explicitly apply to an adviser that is either a ''small business'' or ''small organization,'' as Item 12 does, rather than just a ''small business.''

[191] This estimate captures the number of registered investment advisers with RAUM equal to or above $25 million but below $1 billion. The estimate does not account for the number of such advisers in a control relationship with an affiliated adviser managing $1 billion or more, who would be disqualified from being eligible for the exemption. This estimate also excludes advisers with RAUM below $25 million who may newly qualify as small entities because the amendments eliminate the total-assets tests and increase the RAUM threshold for affiliated advisers.

[192] The Commission has not received applications for the continuing hardship exemption in recent years. In addition, registered advisers or advisers registering with the Commission may still be eligible for the temporary hardship exemption under 17 CFR 275.203–3(a), regardless of whether they are a small business or small organization, if they experience certain unanticipated technical difficulties. However, we acknowledge that any advisers that may consider applying for the exemption may incur costs to train their compliance personnel on the revised exemption eligibility. *See* Schwab Comment Letter (stating that ''the proposed updates will require advisors to [. . .] [t]rain their compliance and personnel on the revised [. . .] hardship exemption eligibility.'').

[193] *See supra* section II.B.4. In another change from the proposal, the Commission is revising the language of Form ADV Item 12, so that it refers to rule 0–7, rather than re-stating the threshold, as proposed. This amendment would help ensure Item 12 remains operative, without additional rulemaking, in light of future Commission orders that may adjust rule 0–7's threshold for inflation. This amendment thus does not have independent economic effects.

[194] *See supra* footnote 191.

providers,[195] and will incur costs associated with preparing the disclosure. Because the information needed to complete the corresponding questions will be readily available to advisers, we estimate the cost increase for each affected adviser will be minimal, averaging approximately $91 per adviser per year,[196] or $928,925 per year for the industry as a whole.[197]

Consistent with the requirements of Executive Order 12866, the Commission reports estimated total monetized benefits and costs for all affected entities in two additional ways specified in OMB Circular A–4.[198] The two presentations are intended to address the fact that the various benefits and costs of the final amendments will not accrue at the same point in time; rather, benefits and costs that accrue sooner are generally more valuable than those that occur later in time.[199] The following discussion focuses on the monetized costs presented in the Economic Analysis, given that the principal benefits of the final rule depend on future Commission action and are thus impossible to predict.

We report (1) the present values of expected costs that are monetized in our Economic Analysis, aggregated across all affected entities, over a 10-year time horizon, starting in 2026, as well as (2) the annualized values over the same time horizon that are derived from the present values. This time horizon represents the period over which the principal costs that are monetized in the Economic Analysis are expected to accrue.[200] The present values and annualized values account for the timing of costs through discounting, which is a procedure that accounts for the time value of money.[201]

Table 2 reports the present values of the aggregate monetized annual costs described above.[202] The analysis uses annual real discount rates of 3 percent and 7 percent over a 10-year time horizon, starting in 2026.[203] We estimate that the present value of total monetized costs is $7,126,602 using a 3 percent discount rate and $5,850,846 using a 7 percent discount rate.

Table 2: Present Value of Aggregate Monetized Benefits and Costs over 10 years from 2026 to 2035 (2026 Dollars)

Estimated Effects[a]	3% real discount rate	7% real discount rate
Benefits	not quantified	not quantified
Costs	$7,126,602	$5,850,846

Notes:

[a] For each discount rate, the present value calculations are based on the assumption that recurring annual monetized costs begin to accrue in 2027, which is the year in which affected entities first comply with the amendments to Form ADV. We further assume that monetized costs occur in a steady stream, and we use a mid-year discount rate. Monetized costs are $928,925 per year for the industry as a whole. (*See supra* footnote 198 and accompanying text.)

Table 3 reports annualized aggregate monetized costs using real discount rates of 3 percent and 7 percent over a 10-year horizon.[204] The lump sum present values of aggregate costs reported in Table 2 are converted in Table 3 into a constant stream of annualized costs over a 10-year time horizon, starting in 2026.[205] We estimate that annualized total monetized costs are $823,198 per year using a 3 percent discount rate and $805,319 per year using a 7 percent discount rate.

[195] *See* Schwab Comment Letter (stating that ''the proposed updates will require advisors to: [r]eassess their 'small entity' status using new thresholds; [u]pdate internal form ADV filing procedures; [t]rain their compliance and personnel on the revised Item 12 logic [. . .]; and [c]oordinate updates with third-party compliance vendors or filing service providers where applicable.'')

[196] The $91 is based on the following calculations: hourly rate of a Management Analyst in the securities industry at $365 for 0.25 hours ≈ $91. *See infra* Table PRA–1 and accompanying footnotes 5 and 7.

[197] $928,925 = $91.25 per adviser × 10,180 advisers.

[198] *See* E.O. 12866 (Sept. 30, 1993), 58 FR 51735, 51741 (Oct. 4, 1993) (requiring agencies to provide an analysis of benefits, costs, and regulatory alternatives to OIRA for significant regulatory actions); OMB, Circular A–4, at 31–34, 45 (Sept. 17, 2003) (providing guidance to agencies regarding compliance with E.O. 12866); *see also* E.O. 14215 (Feb. 18, 2025), 90 FR 10447, 10448 (Feb. 24, 2025) (requiring all Federal agencies, including the Securities and Exchange Commission to comply with E.O. 12866). In addition, E.O. 14192 requires agencies to provide their best approximation of the total costs or savings associated with each new regulation or repealed regulation consistent with the analyses required by E.O. 12866. *See* E.O. 14192 (Jan. 31, 2025), 90 FR 9065, 9066 (Feb. 6, 2025). For purposes of approximating the total cost savings and costs under E.O. 14192, the Commission uses the annualized monetized benefits and costs using a real discount rate of 7 percent. *See* Table 3 and accompanying discussion.

[199] *See* Circular A–4, at 32.

[200] *See id.* at 31 (stating that ''[t]he ending point should be far enough in the future to encompass all the significant benefits and costs likely to result from the rule''). The analysis uses a 2026–2035 analytical horizon and expresses monetary amounts in constant 2026 dollars. Present values are measured as of the beginning of 2026. We assume that recurring monetized compliance costs begin in 2027 and occur at mid-year in each year from 2027 through 2035. The analysis uses calendar years and accounts for the compliance periods included in the release (*see* note a in Table 2).

[201] *See id.* at 32 (''The Rationale for Discounting'') & 45 (''Treatment of Benefits and Costs over Time''); *see also* OIRA, Regulatory Impact Analysis: A Primer, at 11 (Aug. 15, 2011), *available at https://www.reginfo.gov/public/jsp/Utilities/circular-a-4_regulatory-impact-analysis-a-primer.pdf* (''To provide an accurate assessment of benefits and costs that occur at different points in time or over different time horizons, an agency should use discounting. Agencies should provide benefit and cost estimates using both 3 percent and 7 percent annual discount rates expressed as a present value as well as annualized.''); Harvey S. Rosen & Ted Gayer, Public Finance 151 (8th ed. 2008) (defining present value as ''the value today of a given amount of money to be paid or received in the future'').

[202] *See supra* footnote 197 and accompanying text.

[203] This approach is consistent with OMB Circular A–4. *See* Circular A–4, at 31–34 (stating that, ''[f]or regulatory analysis, [agencies] should provide estimates of net benefits using both 3 percent and 7 percent'' discount rates and discussing why those rates are reasonable default rates). Also, we use a mid-year discount rate. *See OMB, Circular* A–94, at 21–22 (Oct. 29, 1992) (stating that, ''When costs and benefits occur in a steady stream, applying mid-year discount factors is more appropriate.'').

[204] This approach is consistent with the recommended treatment of benefits and costs over time in Circular A–4. *See* Circular A–4 at 45 (''You should present annualized benefits and costs using real discount rates of 3 and 7 percent'').

[205] For each discount rate, the annualized monetized costs in Table 3 represent the constant annual stream of costs whose present value over the time horizon equals the corresponding present value in Table 2. *See* note a, Table 3 for additional calculation details. The annualized monetized costs present these values over the 10-year time horizon, starting in the year 2026.

Table 3: Annualized Aggregate Monetized Benefits and Costs
over 10 years from 2026 to 2035
(2026 Dollars)

Estimated Effects[a]	3% real discount rate	7% real discount rate
Benefits	not quantified	not quantified
Costs	$823,198	$805,319

Notes:

[a] For each discount rate, the annualized values are calculated by dividing the corresponding present values in Table 2 by the sum of discount factors over the time horizon. The discount factor in year *t* of the time horizon is equal to $1/(1 + discount\ rate)^{(t-0.5)}$.

We do not anticipate that the amendments will have any significant direct effects on efficiency, competition, or capital formation because, as discussed above, they will have minimal direct economic impact. But to the extent that the amended definitions of ''small entities'' contribute to the Commission better tailoring its rulemaking to account for the regulatory challenges faced by small entities, they could have indirect effects on efficiency, competition, and capital formation resulting from future rulemakings.[206] For example, if the Commission, informed by the more tailored RFA analyses, determined to tailor future rulemakings to reduce compliance costs for small entities, there could be benefits to competition.[207]

Lastly, the Commission considered alternatives to the amendments to Form ADV to align the form with the amended definition.[208] Specifically, we considered replacing Item 12 of Part 1A of Form ADV with a single question that would ask advisers to indicate whether they fall under the amended small entity definition, instead of providing the information in each question in Item 12 that would allow the Commission to continue to make that determination, under the amended definition. While the alternative may streamline the information reported in that item, we expect that it would not materially reduce costs for advisers because an adviser would still have to gather from its own records the information needed to apply the small entity definition.[209] In addition, the alternative may impose some transition costs for some advisers that would complete the item.[210] Finally, maintaining the requirement for advisers to report the information needed to apply the ''small entity'' definition will continue to provide the Commission with insight into the class of small entity advisers and how the individual parts of the definition affect whether advisers qualify as a small entity.

IV. Paperwork Reduction Act

A. Introduction

The final amendments revise part of an existing ''collection of information'' within the meaning of the Paperwork Reduction Act of 1995 (the ''PRA'').[211] The title for the collection of information is ''Form ADV'' (OMB control number 3235–0049).[212] An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The Commission solicited comments on the proposed revision to the collection of information and submitted it to OMB for review, in accordance with PRA requirements.[213] The Commission did not receive any comments on the PRA. The Commission is submitting the final collection of information to the OMB for review and approval in accordance with the PRA.[214]

B. Final Amendments

The final amendments in this release that will affect the collection of information titled ''Form ADV'' are the conforming amendments to Form ADV, Item 12 of Part 1A. Item 12 requires an SEC-registered adviser that is a ''small business'' or ''small organization'' to report how it qualifies as a ''small business'' or ''small organization'' under rule 0–7. Item 12 is designed to provide information to the public and the Commission about advisers, including information that enables the Commission to consider the effect of its regulations on small entities, as required by the RFA.[215] The final amendments affect a sub-set of respondents of the ''Form ADV'' collection of information, namely SEC-registered advisers that qualify as ''small businesses'' or ''small organizations'' under rule 0–7. Responses are mandatory and are not kept confidential.

As proposed, the Commission is making conforming amendments to Item 12 to reflect the final amendments to rule 0–7 concerning the amended RAUM Threshold, the amended Control Relationship Threshold, and their

[206] Some commenters agreed that the updated definitions may have indirect effects on competition and capital formation. *See, e.g.,* SBIA Comment Letter, IDC Comment Letter, and Logos Comment Letter.

[207] One commenter stated that '' . . . [T]he proposed amendments prioritize the hypothetical efficiencies, capital formation, and competitive benefits supposedly gained by mislabeling large advisers as 'small' entities. Historically, rules that focus on reducing industry costs harm investors.'' *See* PIABA Comment Letter. As noted above, we do not anticipate that the amendments will have any direct effects on efficiency, competition, or capital formation. Further, the Economic Analysis cannot predict the economic impact, including the impact on efficiency, competition, and capital formation, of any future rulemakings based on whether or how the Commission may adapt its policy choices as a result of the revised small entity definition; and thus such economic analysis of any future rulemakings is outside of the scope of the analysis in this rulemaking.

[208] Given the scope and context for this rulemaking, the Commission does not believe there are specific reasonable alternatives to the final conforming changes to the instruction for the continuing hardship exemption because these changes merely align the language in the instruction with the amended small entity definition and related changes to Item 12.

[209] While we anticipate that advisers would generate the necessary records in the ordinary course of their advisory businesses, we acknowledge that the alternative would impose some transition costs on advisers.

[210] *See* IAA Comment Letter (stating that ''Even incremental additions to Form ADV can require operational changes, compliance review, and ongoing monitoring.'')

[211] 44 U.S.C. 3501 *et seq.*

[212] The PRA is not applicable to the final amendments to 17 CFR 275.0–7, 17 CFR 270.0–10, or the amendments to 17 CFR 275.203–3(b) because they do not contain a ''collection of information'' requirement within the meaning of the PRA; they do not create any new filing, reporting, recordkeeping, or disclosure requirements. 44 U.S.C. 3502(3).

[213] 44 U.S.C. 3507(d); 5 CFR 1320.11; Proposing Release at section IV.

[214] 44 U.S.C. 3507(d); 5 CFR 1320.12.

[215] *See* Form ADV, Item 12 of Part 1A.

corresponding inflation adjustments.[216] In a change from the proposal, the Commission is making conforming amendments to Item 12 to reflect the removal of the Total Assets Threshold in final rule 0–7.

C. Estimated Burdens

Below is a table explaining the Commission's estimated annual burdens for the final amendments.

BILLING CODE 8011–01–P

Table PRA-1: Estimated Annual Burdens for the Final Amendments to Form ADV, Item 12 of Part 1A

	Proposed[1]	Final[3]	Difference[10]
Respondents	10,051 respondents[2]	10,180 respondents[4]	129 respondents
Aggregate Responses	10,051 responses	10,180 responses	129 responses
Time Burden Per Response	0.25 hours	0.25 hours[5]	No change
Aggregate Time Burden	2,512.75 hours	2,545 hours[6]	32.25 hours
Monetized Time Burden Per Response	$94.50	$91.25[7]	($3.25)
Aggregate Monetized Time Burden	$949,819.50	$928,925[8]	($20,894.50)
Aggregate Cost Burden	$0	$0[9]	No change

Notes:

[216] *See supra* section II.B.4.

1. *See* Proposing Release at section IV, based on IARD data as of December 31, 2024.

2. The Commission estimated that 10,850 advisers would complete Item 12 under the proposed amendments – 799 estimated advisers that already complete Item 12 = approximately 10,051 advisers that would newly complete Item 12 under the proposed amendments.

3. Estimates of respondents and aggregate responses are based on IARD data as of December 31, 2025. We continue to estimate one response per respondent.

4. We estimate that 11,017 advisers would complete Item 12 under the final amendments – 837 estimated advisers that already complete Item 12 = approximately 10,180 advisers that would newly complete Item 12 under the final amendments.

5. Although, in a change from the proposal, the final amendments remove requirements concerning the Total Assets Threshold, we continue to estimate that final Item 12 as a whole would take approximately 0.25 hours, as we estimated in the proposal.

6. Aggregate responses x time burden per response = aggregate time burden.

7. We expect a management analyst in the securities industry would complete Item 12, at an hourly wage rate of $365 per hour. 0.25 hours per response x $365 per hour wage rate = $91.25. To calculate the occupational hourly rate, the Commission uses the May 2025 occupational mean hourly wage data from the Occupational Employment and Wage Statistics (OEWS) program of the Bureau of Labor Statistics (BLS) for "Securities, Commodity Contracts, and Other Financial Investments and Related Activities" (NAICS 523). *See* Occupational Employment and Wage Statistics, U.S. BUREAU OF LABOR STATISTICS, https://www.bls.gov/oes/; *see also* Standard Occupational Classification, U.S. BUREAU OF LABOR STATISTICS, https://www.bls.gov/soc/ (describing occupational classification system used by BLS); EXEC. OFF. OF THE PRESIDENT, OFF. OF MGMT. & BUDGET, NORTH AMERICAN INDUSTRY CLASSIFICATION SYSTEM (2022), *available at* https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf (describing the industry classification system used by BLS and other agencies). The mean hourly wage for each occupation is multiplied by an employment cost index (ECI) factor of 1.0227, calculated as one plus the percentage change in the seasonally adjusted ECI for wages and salaries of private industry workers from the second quarter of 2025 (ECI=173.563), which contains the May 2025 OEWS reference period, to the first quarter of 2026 (ECI=177.498), which is the date of the most recently available ECI observations when the occupational hourly rates used in this release were calculated. See Employment Cost Index, U.S. BUREAU OF LABOR STATISTICS, Seasonal Data 2001-Present, available at https://www.bls.gov/eci/tables.htm. The adjusted mean hourly wage is then multiplied by a nonwage cost adjustment factor of 5.734, which accounts for nonwage costs borne by employers, such as bonuses, benefits, and overhead. This factor is calculated as the average, over 2016-2025, of the ratio of the Bureau of Economic Analysis's gross output for NAICS 523 to total annual wages across all occupations for NAICS 523 in the OEWS data. See Gross Output by Industry, U.S. BUREAU OF ECONOMIC ANALYSIS, https://www.bea.gov/data/industries/gross-output-by-industry; Occupational Employment and Wage Statistics, U.S. BUREAU OF LABOR STATISTICS, https://www.bls.gov/oes/. The $365 occupational hourly rate for a management analyst is calculated as $62.16 x 1.0227 x 5.734, or approximately $365 (where $62.16 is the May 2025 mean hourly wage for management analysts in NAICS 523). The final product is the occupational hourly rate. *See generally* UPDATED METHODOLOGY FOR CALCULATING OCCUPATIONAL HOURLY RATES (Dec. 19, 2025), *available at* https://www.sec.gov/files/method-occupational-hourly-rates.pdf.

8. Aggregate responses x monetized time burden per response = aggregate monetized time burden.

9. We continue to estimate $0 external cost burdens for the final amendments, because we expect advisers would generate the necessary records in the ordinary course of their advisory business.

10. The differences between the proposed and final estimates are due to using updated data. We estimate that the changes from the proposal would not result in burden changes. *See* note 5 above.

BILLING CODE 8011–01–C

V. Regulatory Flexibility Act Certification

Pursuant to section 605(b) of the RFA, the Commission certified that the proposed amendments to the rules would not, if adopted, have a significant economic impact on a substantial number of small entities. The Commission included this certification in section V of the Proposing Release.

As discussed in the Proposing Release, for purposes of the Advisers Act and the Regulatory Flexibility Act, currently an investment adviser generally is a small entity if it: (1) has assets under management having a total value of less than $25 million; (2) did not have total assets of $5 million or more on the last day of the most recent fiscal year; and (3) does not control, is not controlled by, and is not under common control with another investment adviser that has assets under management of $25 million or more, or any person (other than a natural person) that had total assets of $5 million or more on the last day of its most recent

fiscal year.[217] Currently, for the purposes of the Investment Company Act and the Regulatory Flexibility Act, funds are considered small entities if they, together with other funds in the same group of related funds, have net assets of $50 million or less as of the end of their most recent fiscal year.[218]

The Commission stated that the proposed amendments would ultimately affect its analyses under the RFA in future rulemakings but would not themselves impose an economic impact on funds or advisers. The proposed amendments to Advisers Act rule 203–3(b) are clarifying in nature and would not impose a significant economic impact on advisers. While additional advisers would have to complete Item 12 of Form ADV, the information required by this Item is readily available to advisers and the additional cost of this change would be minimal.[219] The Commission, therefore, stated that there would be no significant economic impact on a substantial number of small entities as a result of the proposed amendments.

The Commission requested comments on the certification, but did not receive any comments on the certification. We are adopting the amendments, with certain modifications from the proposal, as discussed above in section II. Such changes do not alter the basis of the Commission's certification in the Proposing Release. Accordingly, the Commission certifies that the final amendments will not have a significant economic impact on a substantial number of small entities.[220]

VI. Congressional Review Act

For purposes of Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (also known as the Congressional Review Act),[221] the Commission must seek the determination of the Office of Management and Budget (the ''OMB'') as to whether a final regulation constitutes a ''major rule.'' OMB has determined the final rule is not a ''major rule.''

VII. Other Matters

The Office of Management and Budget has determined that this action is not a significant regulatory action under Executive Order 12866, and therefore it was not subject to Executive Order 12866 review. This rule is not an Executive Order 14192 regulatory action because this rule is not significant under Executive Order 12866.

Statutory Authority

The Commission is adopting the rule and form amendments contained in this document under the authority set forth in chapter 6 of title 5 of the United States Code (particularly section 601 thereof [5 U.S.C. 601]), the Investment Company Act, particularly section 38 thereof [15 U.S.C. 80a–37], and the Advisers Act, particularly section 211 thereof [15 U.S.C. 80b–11].

List of Subjects in 17 CFR Parts 270, 275, and 279

Investment companies, Investment advisers, Reporting and recordkeeping requirements, Administrative practice and procedure.

Text of Rule and Form Amendments

For the reasons set out in the preamble, the Commission is amending title 17, chapter II of the Code of Federal Regulations as follows:

PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

■ 1. The authority citation for part 270 continues to read, in part, as follows:

Authority: 15 U.S.C. 80a–1 *et seq.,* 80a–34(d), 80a–37, 80a–39, 1681w(a)(1), 6801–6809, 6825, and Pub. L. 111–203, sec. 939A, 124 Stat. 1376 (2010), unless otherwise noted.

* * * * *

■ 2. Revise § 270.0–10 to read as follows:

§ 270.0–10 Small entities under the Investment Company Act for purposes of the Regulatory Flexibility Act.

(a) *General.* For purposes of Commission rulemaking in accordance with the provisions of Chapter Six of the Administrative Procedure Act (5 U.S.C. 601 *et seq.*) and unless otherwise defined for purposes of a particular rulemaking, the term *small business* or *small organization* for purposes of the Investment Company Act of 1940 shall mean an investment company that, together with other investment companies in the same family of investment companies, has net assets of $10 billion or less as of the end of its most recent fiscal year, or, following March 1, 2037, the dollar amount specified in the most recent order issued by the Commission in accordance with paragraph (c) of this section and as published in the **Federal Register**. For purposes of this section, family of investment companies has the same meaning and conditions as in Item B.5 of Form N–CEN.

(b) *Determination of net assets.* The Commission may calculate its determination of the net assets of a family of investment companies based on the net assets of each investment company in the family of investment companies as of the end of such company's fiscal year.

(c) *Future inflation adjustments.* The dollar amount specified in paragraph (a) of this section shall be adjusted by order of the Commission, issued on or about March 1, 2037, and approximately every ten years thereafter. The adjusted dollar amount established in such orders shall be computed by:

(1) Dividing the year-end value of the Personal Consumption Expenditures Chain-Type Price Index (or any successor index thereto), as published by the United States Department of Commerce, for the calendar year preceding the calendar year in which the order is being issued, by the year-end value of such index (or successor) for the calendar year 2027; and

(2) Multiplying $10 billion times the quotient obtained in paragraph (c)(1) of this section and rounding the product to the nearest multiple of $1 billion.

PART 275—RULES AND REGULATIONS, INVESTMENT ADVISERS ACT OF 1940

■ 3. The authority citation for part 275 continues to read, in part, as follows:

Authority: 15 U.S.C. 80b–2(a)(11)(G), 80b–2(a)(11)(H), 80b–2(a)(17), 80b–3, 80b–4, 80b–4a, 80b–6(4), 80b–6a, 80b–11, 1681w(a)(1), 6801–6809, and 6825, unless otherwise noted.

* * * * *

■ 4. Revise § 275.0–7 to read as follows:

§ 275.0–7 Small entities under the Investment Advisers Act for purposes of the Regulatory Flexibility Act.

(a) For purposes of Commission rulemaking in accordance with the provisions of Chapter Six of the Administrative Procedure Act (5 U.S.C. 601 *et seq.*) and unless otherwise defined for purposes of a particular rulemaking proceeding, the term *small business* or *small organization* for purposes of the Investment Advisers Act of 1940 shall mean an investment adviser that:

(1) Has assets under management, as defined under Section 203A(a)(3) of the Act (15 U.S.C. 80b–3a(a)(3)) and reported on its annual updating amendment to Form ADV (17 CFR 279.1), of less than $1 billion, or, following March 1, 2037, the dollar amount specified in the most recent order issued by the Commission in accordance with paragraph (c) of this

[217] 17 CFR 275.0–7.

[218] 17 CFR 270.0–10.

[219] *See* Proposing Release at n.140, and accompanying text.

[220] *See* 5 U.S.C. 605(b).

[221] *See* 5 U.S.C. chapter 8.

section and as published in the **Federal Register**; and

(2) Does not control, is not controlled by, and is not under common control with another investment adviser that has assets under management equal to or greater than the threshold in paragraph (a)(1) of this section.

(b) For purposes of this section, *control* means the power, directly or indirectly, to direct the management or policies of a person, whether through ownership of securities, by contract, or otherwise.

(1) A person is presumed to control a corporation if the person:

(i) Directly or indirectly has the right to vote 25 percent or more of a class of the corporation's voting securities; or

(ii) Has the power to sell or direct the sale of 25 percent or more of a class of the corporation's voting securities.

(2) A person is presumed to control a partnership if the person has the right to receive upon dissolution, or has contributed, 25 percent or more of the capital of the partnership.

(3) A person is presumed to control a limited liability company (LLC) if the person:

(i) Directly or indirectly has the right to vote 25 percent or more of a class of the interests of the LLC;

(ii) Has the right to receive upon dissolution, or has contributed, 25 percent or more of the capital of the LLC; or

(iii) Is an elected manager of the LLC.

(4) A person is presumed to control a trust if the person is a trustee or managing agent of the trust.

(c) The dollar amount specified in paragraph (a) of this section shall be adjusted by order of the Commission, issued on or about March 1, 2037, and approximately every ten years thereafter. The adjusted dollar amount established in such orders shall be computed by:

(1) Dividing the year-end value of the Personal Consumption Expenditures Chain-Type Price Index (or any successor index thereto), as published by the United States Department of Commerce, for the calendar year preceding the calendar year in which the order is being issued, by the year-end value of such index (or successor) for the calendar year 2027; and

(2) Multiplying $1 billion times the quotient obtained in paragraph (c)(1) of this section and rounding the product to the nearest multiple of $100 million.

■ 5. Amend § 275.203–3 by revising paragraphs (b)(1) and (5) to read as follows:

§ 275.203–3 Hardship exemptions.

* * * * *

(b) * * *

(1) *Eligibility for exemption.* If you are a ''small business'' or ''small organization'' (as described in paragraph (b)(5) of this section), you may apply for a continuing hardship exemption. The period of the exemption may be no longer than one year after the date on which you apply for the exemption.

* * * * *

(5) *Small business or small organization.* You are a ''small business'' or ''small organization'' for purposes of this section if you are required to answer Item 12 of Form ADV (17 CFR 279.1) and checked ''no'' to each question in Item 12.

* * * * *

PART 279—FORMS PRESCRIBED UNDER THE INVESTMENT ADVISERS ACT OF 1940

■ 6. The authority citation for part 279 continues to read as follows:

Authority: The Investment Advisers Act of 1940, 15 U.S.C. 80b–1, *et seq.,* Pub. L. 111–203, 124 Stat. 1376.

■ 7. Amend Form ADV (referenced in § 279.1) by:

■ a. In the General Instructions, revising the second bullet point paragraph of Instruction 17 related to continuing hardship exemptions; and

■ b. In Part 1A, revising Item 12.

Note: Form ADV is attached as Appendix A to this document. The text of Form ADV does not, and this amendment will not, appear in the Code of Federal Regulations.

By the Commission.

Dated: November 4, 2026.

Sherry R. Haywood,

Assistant Secretary.

Note: The following appendix will not appear in the Code of Federal Regulations.

Appendix A

FORM ADV (Paper Version)

Uniform Application for Investment Adviser Registration and Report by Exempt Reporting Advisers

Form ADV General Instructions

* * * * *

17. What if I am not able to file electronically?

If you are required to file electronically but cannot do so, you may be eligible for one of two types of hardship exemptions from the electronic filing requirements.

* * * * *

• A *continuing hardship exemption* may be granted if you are a small business or small organization and you can demonstrate that filing electronically would impose an undue hardship. You are a small business or small organization, and may be eligible for a continuing hardship exemption, if you are required to answer Item 12 of Part 1A *and* you are able to respond ''no'' to each question in Item 12. See SEC rule 0–7.

If you have been granted a continuing hardship exemption, you must complete and submit the paper version of Form ADV to FINRA. FINRA will enter your responses into the IARD. As discussed in General Instruction 16, FINRA will charge you a fee to reimburse it for the expense of data entry.

* * * * *

Part 1A

* * * * *

Item 12 Small Businesses

The SEC is required by the Regulatory Flexibility Act to consider the effect of its regulations on small entities. In order to do this, we need to determine whether you meet the definition of ''small business'' or ''small organization'' under rule 0–7.

Answer this Item 12 only if you are registered or registering with the SEC *and* you indicated in response to Item 5.F.(2)(c) that you have regulatory assets under management of the thresholds provided in rule 0–7. You are not required to answer this Item 12 if you are filing for initial registration as a state adviser, amending a current state registration, or switching from SEC to state registration.

For purposes of this Item 12 only, *control* means the power to direct or cause the direction of the management or policies of a *person,* whether through ownership of securities, by contract, or otherwise. Any *person* that directly or indirectly has the right to vote 25 percent or more of the voting securities, or is entitled to 25 percent or more of the profits, of another *person* is presumed to *control* the other *person.*

	Yes	No
A. Do you *control* another investment adviser that had regulatory assets under management equal to or greater than the threshold provided in rule 0–7(a)(1) on the last day of its most recent fiscal year?	☐	☐
B. Are you *controlled* by or under common *control* with another investment adviser that had regulatory assets under management equal to or greater than the threshold provided in rule 0–7(a)(1) on the last day of its most recent fiscal year?	☐	☐

BILLING CODE 8011–01–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

19 CFR Parts 110, 111, 141, 142 and 171

[USCBP–2026–1387; CBP Dec. 26–19]

RIN 1685–AA48

Heightened Requirements for Foreign Importers of Record

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: Interim final rule; request for comments.

SUMMARY: This document amends the U.S. Customs and Border Protection (CBP) regulations, consistent with Section 2 of Executive Order 14411, ''Strengthening Customs Enforcement,'' by establishing new requirements for foreign importers of record (IORs) when making entry, and corresponding responsibilities for licensed customs brokers with regard to their clients. The new regulations also set forth consequences for foreign IORs and customs brokers who fail to comply with the new requirements.

DATES: This interim final rule is effective on January 5, 2027. As explained in Section VII, licensed customs brokers may submit requests for delayed compliance with the changes in § 111.29 of title 19 of the Code of Federal Regulations (19 CFR 111.29) prior to January 5, 2027. All customs brokers are expected to be in full compliance with the requirements of this rule no later than May 6, 2027.

Comment date: Comments on the rule must be received on or before January 5, 2027.

ADDRESSES: You may submit comments, identified by docket number, through the Federal eRulemaking Portal: *http://www.regulations.gov.* Follow the instructions for submitting comments via docket number USCBP–2026–1387.

Instructions: All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. For detailed instructions on submitting comments and additional information on the rulemaking process, see the ''Public Participation'' heading of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: For access to the docket to read background documents and submitted comments, go to *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Anita Rivera, Branch Chief, Revenue Enforcement Branch, Trade Modernization Division, Trade Programs Directorate, Office of Trade, at (771) 233–2939 or *ForeignIOR@cbp.dhs.gov.*

I. Public Participation

Interested persons are invited to participate in this rulemaking by submitting written data, views, or arguments on any aspect of this rulemaking. U.S. Customs and Border Protection (CBP) also invites comments that relate to the economic or federalism effects that might result from this rule. If appropriate to a specific comment, the commenter should reference the specific portion of the rule, explain the reason for any recommended change, and include data, information, or authority that supports the recommended change.

II. Background

On June 3, 2026, the President signed Executive Order (E.O.) 14411 (Strengthening Customs Enforcement).[1] Section 1 of the E.O. emphasizes the importance of customs enforcement for purposes of national security, foreign policy, and the economy of the United States. It further states that effective customs enforcement prevents the importation of unlawful and dangerous goods, ensures importers of record (IORs) are correctly identified and held accountable for duties owed, and guarantees compliance with numerous Federal laws, including laws governing forced labor, rules of origin, origin marking, intellectual property, revenue collection, and product safety.

The E.O. calls for customs reform to remedy systemic inefficiencies, loopholes, insufficient enforcement mechanisms, and outdated processes that have created opportunities for malign actors to evade Federal law. IORs often use various arrangements and schemes to undervalue imports, withhold critical information about themselves and the goods being imported or its production process, and/or avoid payment of duties. These actions threaten national security, threaten product safety, undermine foreign relations, disadvantage domestic businesses, and harm Americans.

Sections 2(b) and (c) of E.O. 14411 direct the Secretary of the Department of Homeland Security, through the issuance or modification of relevant regulations, policy or guidance, to prohibit foreign IORs from making informal entry pursuant to 19 U.S.C. 1498 and to require foreign IORs who want to make formal entry to either be a Customs Trade Partnership Against Terrorism (CTPAT) validated participant or use a licensed customs broker who is a CTPAT validated participant. Section 10 of the E.O. provides definitions for certain terms, such as ''foreign IOR'' and ''U.S. IOR,'' that are intended to assist in the enforcement of the E.O.'s directives.

One of CBP's many critical mission sets is to facilitate legitimate trade that supports economic growth while shielding the American public and businesses from illicit trade, including unsafe products, intellectual property theft, and unfair trade practices. In particular, with respect to foreign IORs, CBP faces challenges enforcing their financial obligations to the U.S. government arising from lost revenue, such as from unpaid duties and taxes. In addition, CBP cannot easily ensure that foreign IORs are complying with U.S. customs and trade laws to prevent the importation of dangerous and

[1] 91 FR 35125 (June 10, 2026). A Fact Sheet accompanying the Executive Order, issued the same day, emphasizes the goal of comprehensive customs reform through various actions to be taken by the Department of Homeland Security (DHS) and CBP to strengthen the enforcement of U. S. customs laws and promote economic strength and national security by combatting customs fraud. *See https://www.whitehouse.gov/fact-sheets/2026/06/fact-sheet-president-donald-j-trump-strengthens-customs-enforcement/.*

unlawful goods. These challenges exist primarily because foreign IORs and their assets are primarily located outside the United States.

Consistent with the E.O. and governing statutes, this rulemaking addresses the challenges presented by foreign IORs. Section 2(b) of the E.O. instructs CBP to prohibit foreign IORs from filing informal entry because, among other reasons, such IORs are not similarly situated to U.S. IORs and may be less familiar with U.S. customs laws. Foreign IORs also present challenges when CBP pursues enforcement actions against them. Similarly, Section 2(c) of the E.O. instructs CBP to prohibit foreign IORs who have not been vetted by CBP through CTPAT validation from making formal entry, unless they rely on a CTPAT validated broker to file the entry. This is necessary to treat all IORs equally based on their individualized circumstances to protect the revenue and strengthen national security.

Through CTPAT validation of IORs, CBP is able to ensure proper vetting of foreign IORs that mitigates risks to revenue, domestic industry, American consumers, and national security—CTPAT validation allows CBP to pursue effective enforcement against foreign IORs and provides heightened visibility into their corporate structures and supply chains. Because CTPAT validation offers CBP stronger insight into foreign IORs, CBP is not prohibiting foreign IORs who are CTPAT validated from filing informal entry in this rulemaking. Similarly, CBP is not prohibiting foreign IORs from filing informal entry through a CTPAT validated broker in this rulemaking. However, as further detailed in section VI.G. below, CBP will be monitoring the informal entries filed by foreign IORs and their brokers following the effective date of the rule. If CBP determines that informal entries filed by foreign IORs present risks to the revenue, national security, or public health and safety, CBP will take action to fully prohibit foreign IORs from using informal entry to enter goods for consumption.

CBP will only allow a foreign IOR to enter goods for consumption [2] on its own behalf, *i.e.,* to serve as the IOR for the entry, whether an informal or formal entry,[3] if the foreign IOR is CTPAT validated. Further, consistent with Section (2)(c) of the E.O., the only way for a foreign IOR who is not CTPAT validated to secure the entry and release of goods is by designating a CTPAT validated and licensed customs broker to make entry on the foreign IOR's behalf.

This rulemaking implements these requirements for foreign IORs when filing entries pursuant to the authority in 19 U.S.C. 1484 and 1498. This rule will assist CBP in preventing foreign parties from evading U.S. customs and trade laws and will level the playing field for U.S. IORs by holding foreign IORs to the same standards and enforcement mechanisms to which U.S. IORs are currently held. Heightened requirements for foreign IORs will further CBP's mission to protect the American public and ensure the collection of revenue owed to the United States. With this rule, foreign IORs are prohibited from making informal entry of merchandise for consumption for which a CBP Form 3461 or 7501 must be filed unless the foreign IOR is either a CTPAT validated participant or uses a CTPAT validated and licensed customs broker. To make formal entry, a foreign IOR must also either be a CTPAT validated participant or use a CTPAT validated and licensed customs broker to enter merchandise for consumption. Foreign parties who are not CTPAT validated IORs must designate a licensed customs broker who is a CTPAT validated participant to file entry on their behalf. A designated licensed customs broker who is a CTPAT validated participant must act as the importer of record for the entry if such foreign parties are not the owner or purchaser of the merchandise being entered.

CBP is leveraging the CTPAT program to increase transparency as to foreign IORs transacting customs business in the United States and to better identify the merchandise they are importing. CTPAT validated participants have been vetted by CBP, have demonstrated that they are meeting certain security requirements, *i.e.,* the minimum security criteria (MSC), and have a known history of compliance, resulting in a higher degree of accountability and visibility into the foreign IOR's supply chain and security. Where a customs broker is acting on behalf of a foreign party, CBP is utilizing the existence of CTPAT validated and licensed brokers in the transaction to ensure transparency and accountability for a segment of the trade that presents higher risk than others.

III. Authority

Under section 66 of title 19 of the United States Code (19 U.S.C. 66), the Secretary of the Treasury [4] is authorized to prescribe regulations to be used in carrying out the provisions of laws relating to raising revenue from imports or to duties on imports, or to warehousing, and give directions to CBP officers and prescribe such rules and forms to be observed by them as may be necessary for the proper execution of the law. Section 1624 of title 19 (19 U.S.C. 1624) authorizes the Secretary of the Treasury to make such rules and regulations as may be necessary to carry out the provisions of the Tariff Act of 1930, codified at 19 U.S.C. 1001 *et seq.*

Section 4320 of title 19 (19 U.S.C. 4320) [5] authorizes the Secretary of the Department of Homeland Security (DHS) to establish, among other things, a program that ensures collection of sufficient information to allow CBP to verify the existence of an IOR (19 U.S.C. 4320(b)(1)(A)), sufficient information to allow CBP to identify linkages or other affiliations between importers (19 U.S.C. 4320(b)(1)(B)), and sufficient information to allow CBP to identify changes in address and corporate structure of an importer (19 U.S.C. 4320(b)(1)(C)). Section 4321 of title 19 (19 U.S.C. 4321) authorizes the Commissioner of CBP, as part of an importer risk assessment program, to develop risk assessment guidelines for

[2] Encompassing all entries for consumption (19 CFR 141.0a(f)), to include entries filed upon importation, and upon withdrawal from a bonded warehouse or a Foreign Trade Zone.

[3] As explained in more detail below, these requirements are applicable to merchandise for which an informal entry is required to be filed on CBP Form 3461 or 7501, or their electronic equivalents, and for which a formal entry is required to be filed.

[4] The Homeland Security Act of 2002 generally transferred the functions of the U.S. Customs Service from the Treasury Department to the Secretary of the Department of Homeland Security. *See* Public Law 107–296, 116 Stat. 2142; 6 U.S.C. 203 (''there shall be transferred to the Secretary [of Homeland Security] the functions . . . of (1) the United States Customs Service of the Department of the Treasury, including the functions of the Secretary of the Treasury relating thereto''). Nevertheless, pursuant to Section 412 of the HSA, the Treasury Department retained authority related to various customs revenue functions, including those functions found in the Tariff Act of 1930 [(Pub. L. 71–361, 46 Stat. 590, as amended (codified at 19 U.S.C. 1202 *et seq.*)). 6 U.S.C. 212(a)(1), (2). But the Secretary of the Treasury may delegate any such retained authority at the Treasury Secretary's discretion. 6 U.S.C. 212(a)(1). Consistent with this delegation authority, the Secretary of the Treasury issued Treasury Order 100–20 (available at *https://home.treasury.gov/about/general-information/orders-and-directives/treasury-order-100-20*), delegating the authorities contained in 6 U.S.C. 212 and 215 to the Secretary of Homeland Security. All further references to the ''Secretary of Treasury'' should be construed as referring to the Secretary of Homeland Security unless specified otherwise.

[5] On February 24, 2016, Congress enacted the Trade Facilitation and Trade Enforcement Act of 2015 (TFTEA), Public Law 114–125, 130 Stat. 122 (19 U.S.C. 4301 note). Sections 114 and 115 of TFTEA added sections 4320 (Importer of record program) and 4321 (Establishment of importer risk assessment program) to title 19 of the U.S. Code. Section 116 of TFTEA amended 19 U.S.C. 1641, adding paragraph (i) (Identification of importers).

IORs, including nonresident importers,[6] and procedures to ensure increased oversight of products imported by new nonresident importers relating to the enforcement of priority trade issues.[7] *See* 19 U.S.C. 4321(a) and (b). Section 4321(c) excludes validated Tier 2 and Tier 3 CTPAT participants from the requirements of 19 U.S.C. 4321.[8]

Sections 1484 and 1498 of title 19 (19 U.S.C. 1484 and 1498) authorize the Secretary of the Treasury to prescribe regulations for the declaration and entry of merchandise. All merchandise imported into the customs territory of the United States is subject to entry and clearance procedures, unless excepted. *See* section 141.4(a) of title 19 of the Code of Federal Regulations (19 CFR 141.4(a)). These procedures ensure the proper appraisement, valuation, and tariff classification of the merchandise for the purpose of collecting the lawful amount of duties owed, as well as ensuring compliance with all laws and regulations administered and enforced by CBP. Sections 1484 and 1498 provide for different procedures for the entry and clearance of merchandise depending upon the aggregate value of the shipment. There are ''formal entry'' procedures established by 19 U.S.C. 1484 and 1485, which are generally applicable to shipments of merchandise valued in excess of $2,500. Title 19 CFR part 142 implements 19 U.S.C. 1484, as amended, and prescribes formal entry procedures.

Section 1498 of title 19 (19 U.S.C. 1498) authorizes special rules and regulations for the entry of certain merchandise, which includes section 1498(a)(1)(A) concerning shipments of merchandise valued at $2,500 or less (referred to as ''informal entries''). Such entries may be, but are not required to be, subject to the requirements for formal entry prescribed at 19 U.S.C. 1484 and 1485. Informal entry regulations are found at 19 CFR part 143, subpart C. While informal entries are ''excepted'' from formal entry requirements, as noted, the Secretary of the Treasury may include any formal entry requirement in the rules and regulations governing informal entry. 19 U.S.C. 1498(b). The statutory framework of 19 U.S.C. 1498 authorizes, in effect, a less stringent entry process than under 19 U.S.C. 1484, which has developed into a process with fewer forms and procedures as compared to the formal entry process. As a result, informal entry procedures are generally less burdensome and complex than the formal entry procedures. However, CBP may require formal entry for any merchandise if deemed necessary for purposes of admissibility, revenue protection, or the efficient conduct of customs business. 19 CFR 143.22.

Section 1641 of title 19 (19 U.S.C. 1641) authorizes the Secretary of the Treasury to prescribe such regulations relating to the customs business of customs brokers as the Secretary considers necessary to protect importers and the revenue of the United States, including regulations relating to the furnishing of information to CBP, and to carry out the provisions of 19 U.S.C. 1641.

Section 1592 of title 19 (19 U.S.C. 1592) authorizes CBP to assess civil penalties against any person who, by fraud, gross negligence or negligence, enters or introduces, or attempts to enter or introduce, merchandise into commerce of the United States by means of a material false statement or omission.

The Security and Accountability for Every (SAFE) Port Act of 2006 (Pub. L. 109–347, 120 Stat. 1884 (2006), 6 U.S.C. 961 *et seq.*) authorizes the Secretary of DHS, acting through the Commissioner of CBP, to establish a voluntary government-business initiative to build cooperative relationships that strengthen and improve overall security of the international supply chain and U.S. border security, and facilitate the movement of secure cargo through the international supply chain, known as CTPAT. *See* 6 U.S.C. 962, 964 and 965. The CTPAT program plays a crucial role in safeguarding the economic and national security of the United States by acting as a vital component of CBP's multi-layered, risk-based security strategy. By securing international supply chains, the program helps prevent the entry of terrorist weapons, narcotics, and other contraband, thereby mitigating threats to national security. The CTPAT program contributes to the nation's prosperity by ensuring the free and fair flow of legitimate trade, preventing costly disruptions, and fostering a secure trade environment. The program's commitment to customs and trade enforcement provides an essential platform to combat trade fraud and protect American consumers and industries.

CBP encourages participation in this program by providing benefits to participants meeting or exceeding the CTPAT program requirements. An individual or company [9] that wishes to participate in the CTPAT program must complete an application in the CTPAT Portal [10] demonstrating that it meets the MSC [11] to establish eligibility for the program. Once a company is accepted into the program and receives ''certified'' status, the CTPAT participant will undergo a validation to verify the participant's supply chain security processes. 6 U.S.C. 964. At the conclusion of a successful validation, the participant will be granted ''certified—validated'' status. 6 U.S.C. 965. Upon becoming a participant in the CTPAT program, an individual or company enjoys a variety of benefits, which are listed on CBP's website at *https://www.cbp.gov/border-security/ports-entry/cargo-security/ctpat.*[12]

IV. Challenges Relating to Foreign Importers of Record

Unlike other countries that either do not allow foreign persons to act as an IOR or have strict processes for becoming a foreign IOR,[13] in the United

[6] Section 4321(e)(2) defines a ''nonresident importer'' as an importer who is (A) an individual who is not a citizen of the United States or an alien lawfully admitted for permanent residence in the United States; or (B) a partnership, corporation, or other commercial entity that is not organized under the laws of a jurisdiction within the customs territory of the United States (as such term is defined in General Note 2 of the Harmonized Tariff Schedule of the United States) or in the Virgin Islands of the United States.

[7] Section 4322 of title 19 (19 U.S.C. 4322) established seven ''priority trade issues,'' including import safety and revenue, and provided procedures for future changes to the list of priority trade issues.

[8] In this interim final rule, CBP is referring to the tier system of the CTPAT program only in the context of 19 U.S.C. 4321. Although initially referred to as Tier 1, Tier 2, and Tier 3 for CTPAT program participants, CBP has transitioned to using the terms ''certified,'' ''certified—validated,'' and ''certified—exceeding'' when referring to the various levels of the CTPAT program.

[9] *See* 6 U.S.C. 962. Businesses eligible to apply for CTPAT partnership include U.S. importers of record; non-resident Canadian importers; U.S./Canada highway carriers; U.S./Mexico highway carriers; air, rail and sea carriers; licensed U.S. customs brokers; U.S. marine port authority/terminal operators; certain third-party logistics providers (3PLs); U.S. freight consolidators; ocean transportation intermediaries and non-vessel operating common carriers (NVOCCs); Mexican and Canadian manufacturers; and Mexican long-haul highway carriers. In addition, CBP is conducting a pilot (90 FR 52690), Nov. 21, 2025)) for certain types of asset-based and non-asset-based 3PLs that are currently not eligible to participate in the CTPAT program, pursuant to the Customs Trade Partnership Against Terrorism Pilot Program Act of 2023 (Pub. L. 118–98, 138 Stat. 1575).

[10] *See trade.cbp.dhs.gov/ctpat/ctpat-portal-ui.*

[11] *See* 6 U.S.C. 963. *See also https://www.cbp.gov/border-security/ports-entry/cargo-security/ctpat-customs-trade-partnership-against-terrorism/apply/security-criteria.*

[12] This list may change as benefits are updated to improve the program.

[13] For example, Mexico, Brazil, India, South Korea, Vietnam, and China do not allow foreign persons to act as IORs. The European Union (EU) allows foreign IORs, however, the importer must obtain a unique identification number and in many EU Member States must obtain a local Value-Added Tax (VAT) registration. Japan requires all non-resident importers to utilize an attorney for customs procedure when importing into Japan to ensure proper compliance with customs rules.

States, a foreign individual or entity may become an IOR and make entry in the United States solely by submitting CBP Form 5106 (Create/Update Importer Identity Form) to request a CBP-assigned number, or by using an Internal Revenue Service (IRS) Employer Identification Number (EIN), which provides only basic contact and business information to CBP. Many of the foreign individuals and entities who become IORs appear to be U.S.-based in the Automated Commercial Environment (ACE) because they list a U.S. address, which may be the address of an agent or post office box for mail. In reality, these foreign individuals or entities have no physical presence and no assets beyond a mailing address in the United States and are considered shell companies. These shell companies obscure the real identity and corporate structure of their owner,[14] as well as ownership of the entity's assets, enabling tax evasion, financial fraud and other financial crimes. Due to the anonymity of a shell company's identity and the identity of its owner(s), it is difficult to track and verify the company's financial transactions, including customs entries, and to prevent the importation of potentially unsafe merchandise, such as counterfeit goods and precursor chemicals for the purposes of manufacturing illicit substances, into the United States. Thus, these shell companies pose a significant threat to national security, economic security, and public safety.

These shell companies may also engage in misclassification, undervaluation, or other duty evasion schemes, knowing that CBP's options for enforcement are limited when assets and individuals are located outside of the United States and that it is more difficult for CBP to detect linkages and affiliations. In such cases, when detected by CBP, these shell company IORs may be placed on live entry pursuant to 19 CFR 142.13(a)(3), which mandates the filing of an entry summary and deposit of all estimated duties, taxes, and fees owed to obtain the merchandise's release from CBP custody, and may have their immediate delivery privileges discontinued pursuant to 19 CFR 142.25(a). However, the shell company IOR may export the shipment rather than pay the estimated duties, taxes, and fees at that time, making collection efforts fruitless, and later attempt to re-enter the goods under a different shell company. Enforcement actions against shell companies are challenging because the foreign entity may simply shut down an existing shell company and begin importing as a new shell company. When an IOR is registered with CBP by submitting CBP Form 5106, CBP is only aware that the entity is a foreign IOR if the IOR lists its foreign address.[15] Once the IOR has begun importing and becomes liable for the payment of duties, penalties, or liquidated damages, CBP may later learn through its investigations and enforcement actions that an IOR who listed a U.S. address was in reality a shell company set up on behalf of a foreign company to avoid paying CBP debts that become due or evade other enforcement consequences. By this point, the economic damage undercutting U.S. domestic industry has already been completed.

The United States faces substantial challenges when seeking to enforce U.S. customs and trade laws against foreign IORs. One of these challenges is the enforcement of financial obligations to the U.S. government, including duties. Pursuing the collection of duties, penalties, and liquidated damages is often ineffective because these entities' operations are outside U.S. jurisdiction, and their assets and key individuals are located outside U.S. jurisdiction. While CBP can use tools such as ''live entry'' [16] and discontinuance of immediate delivery privileges pursuant to 19 CFR 142.13 and 142.25 to secure future obligations, amounts already owed to CBP often go uncollected if the entity is unwilling to pay. Data collected from October 2020 through the beginning of February 2026 shows that the unpaid bill amount per entry is $29.16 for foreign IORs as compared to $22.57 for U.S. IORs, which is 29% lower for U.S. IORs.[17] As of February 6, 2026, the total principal bill amount (not including interest) owed by non-CTPAT foreign IORs for uncollected bills that were opened on or after October 1, 2020, and remained unpaid, was $1.01 billion. After CBP audits uncovered $1.16 billion in lost revenue from foreign IORs between January 1, 2020, and August 27, 2026, CBP was able to recoup only $35.7 million, implying a collection rate of 3.1% for the missed payments.[18] For U.S. IORs, that collection rate was 15.2%. Additionally, live entry and discontinuance of immediate delivery privileges are limited in their effectiveness where foreign IORs reconstitute their identities and create new fake companies. These new shell companies operate under a different name and exist solely to evade enforcement consequences for violations of U.S. law. While CBP's enforcement authority extends to any individual or entity importing merchandise into the United States, enforcement is often more effective against individuals and entities located within the United States. When an IOR's operations and the majority if not all of its financial assets are located outside the United States, CBP's ability to compel compliance with U.S. customs and trade laws, conduct investigations, collect owed revenue, identify linkages and affiliations, or enforce penalties is significantly reduced. Moreover, the government's ability to pursue legal action against, or collect duties from, these foreign entities is more complex because they are not subject to U.S. jurisdiction due to the revenue rule.

The revenue rule is a longstanding common law doctrine that permits the courts of one country to refuse to entertain lawsuits that are initiated by a foreign country to enforce the foreign country's revenue laws. *Her Majesty the Queen* v. *Gilbertson,* 597 F.2d 1161, 1164–1165 (9th Cir. 1979); *see also Holman* v. *Johnson,* (1775) 98 Eng. Rep. 1120–1121 (K.B. 1775) (stating that ''no country ever takes notice of the revenue laws of another''). The rationale behind the rule is threefold: first, the international principle of comity precludes the courts of one nation from scrutinizing (and potentially bringing embarrassment upon) the public laws of another nation; second, one nation's utilization of another nation's court system to enforce its own revenue laws is an extension of the former nation's sovereign power, and that assertion of sovereign power within the territory of another nation violates national sovereignty principles; and third, permitting the courts of one nation to interpret the complex revenue laws of a

[14] While CBP Form 5106 includes a section (3J) for information regarding the beneficial owner and company officer of an entity, it is optional and frequently, an entity does not provide this information when submitting the form. For example, from July 2021 through June 2026, only 2.88% of IORs who are registered as foreign in ACE provided the company position title of a company officer, 3.17% provided the name of a beneficial owner or company officer, 1.52% provided an email and phone number of a company officer or beneficial owner, and 0.38% provided passport details of a company officer or beneficial owner.

[15] Foreign individuals or entities may indicate in section 1E of CBP Form 5106 that they are requesting a CBP-assigned number because they are not a U.S. resident but are not required to do so, as the data elements in this section are optional.

[16] The term ''live entry'' colloquially refers to the requirement of filing of an entry summary, with payment of any estimated duties, taxes, and fees owed, as a prerequisite to obtaining the release of imported merchandise from CBP custody. 19 CFR 142.13(a).

foreign nation would result in great administrative difficulties at great expense to the interpreting nation. *Gilbertson,* 597 F.2d at 1164 (quoting *Moore* v. *Mitchell,* 30 F.2d 600, 604 (2nd Cir. 1929)); *Gov't of India* v. *Taylor,* (1955) A.C. 491, 511–514 (H.L. 1955). Thus, the revenue rule protects the independent sovereignty of each nation and prevents the courts of one country from becoming an extension of the judicial branch of another. Lawsuits to recover U.S. customs duties, penalties, and liquidated damages are all within the jurisdiction of the federal courts. *See, e.g.,* 28 U.S.C. 1331, 1582. However, enforcement of such a judgment from a federal court in a foreign jurisdiction would likely be precluded by that jurisdiction's observance of the revenue rule, or at least time-consuming and exceedingly difficult to pursue.

Verification of the accuracy of import and entry documentation, conducting audits, or performing site visits of a foreign IOR's premises are all considerably more difficult and resource intensive for foreign IORs. CBP also faces challenges in enforcing CBP recordkeeping requirements on foreign IORs. Although all importers, foreign and U.S., are subject to recordkeeping requirements under 19 U.S.C. 1508, it is much easier and more straightforward for CBP to conduct document verification and examination of records for domestic entities. Communication barriers and lack of understanding of U.S. laws and regulations can further hamper CBP's enforcement ability and result in delays, difficulty in resolving issues, and a higher incidence of errors and non-compliance.

Generally speaking, it is inherently more complex for CBP to ensure compliance by foreign IORs, as compared to U.S. IORs. Foreign IORs may exploit U.S. customs and trade laws and refuse to pay their customs debts, knowing the challenges posed by international enforcement of domestic customs laws and regulations. Because of these challenges in holding foreign IORs accountable, there is decreased incentive for foreign IORs to comply with U.S. laws and regulations intended to ensure the safety of imported merchandise and to secure the revenue; foreign IORs avoid the consequences that U.S. IORs face, because their assets and key individuals may be beyond the reach of CBP and the U.S. courts. Principles such as the revenue rule reinforce why it is important for the United States to impose heightened requirements on foreign IORs, who can more easily evade payment of amounts owed and other consequences for noncompliance with U.S. customs and trade laws. These challenges are unique in the context of foreign IORs.

V. Addressing the Challenges Relating to Foreign Importers of Record

It is critical that CBP be able to counter the challenges discussed above through meaningful and effective enforcement actions. Thus, pursuant to the authorities set forth above, and consistent with E.O. 14411, CBP is implementing additional requirements for foreign IORs to make entry. This rule will require foreign IORs to be CTPAT validated, or to use a CTPAT validated and licensed customs broker to make entry. These new requirements will promote compliance and accountability. Licensed customs brokers will have new responsibilities corresponding with the new foreign IOR requirements to verify and declare that their client meets the qualifications to be considered a U.S. IOR before reporting as a U.S. IOR. Lastly, this rule will impose a new requirement on U.S. IORs to declare their qualification as a U.S. IOR.

To implement these new requirements, CBP is establishing a new part 110 (Importers of Record) in title 19 of the CFR. This new part contains two sections laying out the qualifications to be considered a ''U.S. importer of record,'' or ''foreign importer of record,'' as well as a new definitions section defining the terms ''beneficial owner,'' and ''physical domestic assets.'' This new part 110 provides predictability and standardization for trade members which previously did not exist.

First, CBP establishes the requirements that must be met to be considered a U.S. IOR in new 19 CFR 110.2(a), to allow CBP, IORs, and customs brokers to know who qualifies as a U.S. IOR and who does not. Pursuant to this new provision, a U.S. IOR is an individual who is a United States citizen or lawful permanent resident, or an entity that is organized under the laws of the United States, is located in the United States, and maintains at all times: (i) at least 51% of beneficial owner(s) who are United States citizens or lawful permanent residents and have control of the entity; or (ii) direct ownership of a significant amount of unencumbered real property in the United States. With respect to real property ownership, the property can be subject to some encumberment, but the net unencumbered value of the real property must be of a significant amount. Whether an individual or entity qualifies as a U.S. IOR is subject to verification by CBP as set forth in a new § 110.2(b). A foreign IOR is defined as an IOR who does not meet the criteria of a U.S. IOR, pursuant to § 110.3.

In the new § 110.2(b), CBP has set forth a verification process for confirming that a party meets the requirements to be considered a U.S. IOR. The determination of whether an entity qualifies as a U.S. IOR or a foreign IOR will vary depending upon the circumstances in each instance. To verify that an entity is located in the United States for qualification as a U.S. importer of record, CBP will take into account, among other considerations, the size and scale of the overall operations of the entity and whether it is an instrumentality of a foreign manufacturer without a substantial presence in the United States. Criteria which CBP may consider in its discretion and to the extent relevant, include, but are not limited to, whether: (1) the entity's principal place of business is in the United States; (2) the entity has a physical presence in the United States where substantial business transactions are conducted, such as paying employees, generating revenue, or operating retail locations; (3) the entity maintains sufficient unencumbered physical domestic assets, as defined in § 110.1; (4) the entity directly owns a sufficient amount of unencumbered real property in the United States; (5) the entity's gross sales generally exceed its cost of goods sold and the entity is structured in a manner that it is anticipated to generate its own profit; and (6) the entity is sufficiently capitalized. As good governance, CBP is providing this non-exhaustive list of criteria that CBP will consider when verifying the identity and status of an IOR. These criteria are flexible as CBP cannot predict all possible circumstances that may be relevant for verification purposes. Having the newly created criteria available will allow CBP to verify that an entity's declaration meets the requirements under § 110.2, which in turn increases supply chain security, revenue protection, and compliance with the customs law of the United States.

In its verification, CBP may review records, such as, proof of citizenship or lawful permanent residence, corporate charters, financial statements and records, purchase receipts, or documents of title, provided at the request of CBP. Pursuant to 19 U.S.C. 1508, an IOR, or other party who imports merchandise into the customs territory of the United States, or an agent of an IOR or person whose activities require the filing of a declaration or entry, or both, must make, keep, and render for examination and inspection records which pertain to

any such activity and are normally kept in the ordinary course of business.[19] To ensure CBP can adequately verify the status of IORs, the IOR must, pursuant to 19 U.S.C. 1508, comply with statutory recordkeeping and production requirements, and CBP retains the authority to request proof from the IOR as to its qualification as a U.S. IOR.

CBP is taking a comprehensive approach to distinguish the level of risk associated with foreign and U.S. IORs, to establish requirements commensurate with that risk, thus putting all importers (including nonresident importers as described in 19 U.S.C. 4321) on equal footing. These new regulatory provisions require consideration of both substance (such as ownership, physical presence, and U.S.-based assets) and form (such as place of incorporation or organization and address) as indicators of whether an individual or entity is a U.S. or foreign IOR. The existing references to a ''nonresident importer'' in CBP regulations (found in subparts B and C of part 141) capture importers who are not U.S. citizens or lawful permanent residents or not entities organized under the laws of the United States or its territories; that is, importers who have met a low threshold to qualify as nonresident importers. A nonresident importer could simply be an importer who is not incorporated within the customs territory of the United States (§ 141.18), whereas a foreign IOR is an individual or entity who has not satisfied a variety of specific criteria, such as at least 51% beneficial ownership or direct ownership of a significant amount of unencumbered real property in the United States. The existing references to a ''nonresident importer'' within CBP regulations are not in conflict with the new regulations for U.S. IORs and foreign IORs, as these new regulations create additional requirements for importers. The regulatory changes implemented by this rule that distinguish a U.S. IOR from a foreign IOR present a clearer framework for importers and a higher threshold to qualify as a U.S. IOR. Central to these new definitions is ensuring that physical assets of the importer are located in the United States, increasing the likelihood that CBP can collect revenue owed from all IORs and enabling CBP to better identify potential linkages and affiliations when an importer's assets are transferred.

In support of § 110.2(a)(2)(iii)(A) regarding U.S. IORs, CBP is defining the term ''beneficial owner'' in new § 110.1. CBP is including the ''beneficial owner'' condition in the requirements for a U.S. IOR because illicit actors often use corporate structures, such as shell companies, to conceal their identities, which undermines U.S. national security and threatens the domestic economy. Shell companies can shield identities of the beneficial owners, enabling them to transact business in the United States without facing legal consequences and evading enforcement mechanisms, creating an uneven playing field for U.S. businesses engaged in legitimate trade. Including a definition of ''beneficial owner'' enables CBP to identify the true individual or individuals exercising control over the entity responsible for the importation of goods. Also, by defining ''beneficial owner,'' CBP is providing clarity and transparency to trade members as to CBP's understanding of who qualifies as a beneficial owner. At the same time, CBP is facilitating compliance and revenue collection as a clear definition will reduce the ability of bad actors to use shell companies to evade duties and other customs and trade law requirements.

The term ''beneficial owner'' means, with respect to an entity, an individual who is a natural person, and directly or indirectly, through any contract, arrangement, understanding, relationship, or otherwise, either exercises substantial control over the entity, or owns or controls not less than 25 percent of the ownership interests of the entity. The ''beneficial owner'' definition includes circumstances where multiple layers of entity ownership exist between the natural person and the entity, such as a corporation that is owned by another corporation that is owned by a natural person, in which case the natural person is the beneficial owner despite the layers of entity ownership. The definition specifically excludes: (1) a minor child, as defined in the State in which the entity is formed, or in the case of an entity that was not formed in the United States an individual who has not yet attained the age of 18, if the parent or guardian of the minor child meets the definition of a beneficial owner; (2) an individual acting as a nominee, intermediary, custodian, or agent on behalf of another individual; (3) an individual acting solely as an employee of a corporation, limited liability company, or other similar entity and whose control over or economic benefits from such entity are derived solely from the employment status of the person, provided that such a person is not a senior officer; (4) an individual whose only interest in a corporation, limited liability company, or other similar entity is through a right of inheritance; or (5) a creditor of a corporation, limited liability company, or other similar entity, unless the creditor meets the requirements of an individual who, directly or indirectly, through any contract, arrangement, understanding, relationship or otherwise exercises substantial control over the entity or owns or controls not less than 25 percent of the ownership interests of the entity. For purposes of this definition, an individual might be a beneficial owner through substantial control, ownership interest, or both. Substantial control can be exercised by an individual who is either a senior officer (*e.g.,* the entity's president, or chief executive officer), has the authority to appoint or remove certain officers of the entity, or is an important decision-maker regarding the entity's business, finances and structure. Ownership interests that establish ownership rights in the entity include shares of equity, stock voting rights, or any other mechanism used to establish ownership. As all entities are substantially controlled by one or more individual(s), every entity must have at least one beneficial owner for purposes of determining as to whether an entity is a U.S. IOR. An entity may have multiple beneficial owners and there is no maximum number of beneficial owners.

To develop this definition, CBP reviewed a preexisting Financial Crimes Enforcement Network (FinCEN) definition (31 CFR 1010.380(d)), established by statute [20] to provide further consistency for the overall understanding of ''beneficial owner'' and expectations for trade members. This definition expands on the FinCEN definition by adding a paragraph to account for instances where an entity is incorporated/formed in the United States and is owned entirely by one or more other entities that are also incorporated/formed in the United States, but the natural persons who ultimately own the various layers of entities are not U.S. citizens or lawful permanent residents. This additional language is intended to clarify that natural persons must be identified as the beneficial owners, even where multiple layers of entity ownership exist

[19] *See* also 19 CFR part 163 for the recordkeeping requirements applicable to IORs, among other persons, listed in § 163.2.

[20] The Corporate Transparency Act, title LXIV of the William M. (Mac) Thornberry National Defense Authorization Act for Fiscal Year 2021, Public Law 116–283 (Jan. 1, 2021), established a definition for ''beneficial owner'' as part of the reporting requirement to FinCEN for U.S. and foreign entities, which was implemented in the regulation at 31 CFR 1010.380(d).

and that such multiple layers of entity ownership do not diminish the obligation to report the natural person beneficial owners. It is noteworthy that ''beneficial owner'' is defined in this document for the purpose of this rulemaking and CBP is not bound by FinCEN's interpretation of that term in other contexts, nor are these regulations impacted by whether FinCEN requires submission of beneficial ownership information.

Lastly, CBP is adding a definition of ''physical domestic assets,'' which becomes relevant when CBP verifies whether an IOR qualifies as a U.S. IOR pursuant to new § 110.2(b)(3). ''Physical domestic assets'' are defined as cash deposited in a U.S. bank account, U.S. Treasury bonds, and real property, inventory, machinery, and/or equipment that is physically located in the United States. It is important to note that CBP did not use the term ''tangible'' in this context as tangible assets may include accounts receivable which CBP purposefully excluded from this definition. Assets identified as physical domestic assets in CBP's definition are more readily capable of being traced and seized, which increases the likelihood of successful collection of customs debts. The physical nature of the assets is important for serving the purpose of these regulations. Valuation of intangible assets is often speculative and subject to manipulation, particularly in the context of IORs who may be structured as a separate entity from a retailer ultimately selling the product to the public. Additionally, receivables may be due from foreign parties, creating the potential for manipulation of their valuation and diminishing the likelihood of collection.

This definition of ''physical domestic assets'' covers a limited universe of assets that are relevant for the purpose of determining affiliations of entities. CBP needs to understand affiliations because foreign IORs can easily evade CBP requirements and verifications by creating new companies. By considering the types of assets covered under this definition, CBP is better able to identify shell companies that foreign actors use to evade U.S. customs laws. In addition, CBP's ability to pursue collection from successor companies, alter egos [21] or other parties when piercing the corporate veil [22] is increased, potentially reaching physical domestic assets improperly transferred to individuals tied to the shell company, such as corporate officers or shareholders.

CBP is adding two new sections to subpart B of part 141 (§ 141.21 and § 141.22), pertaining to the right to make entry and declarations on entry. Pursuant to paragraph (a) of new § 141.21, a foreign IOR, as defined in § 110.3, may not enter merchandise for consumption unless specific requirements are met. This restriction is applicable to merchandise entered for consumption (§ 141.0a(f)) for which a formal entry is required to be filed or, if an informal entry is filed, for which an informal entry is required to be filed on CBP Form 3461 and/or CBP Form 7501, or their electronic equivalents.[23]

Pursuant to § 141.21(b)(1), if the foreign IOR is CTPAT validated and has the right to make entry pursuant to § 143.26 for informal entry or 19 U.S.C. 1484(a)(2)(B) for formal entry, the foreign IOR may enter merchandise for consumption or designate a customs broker to make entry. A CTPAT validated foreign IOR choosing to hire a customs broker may elect to hire a CTPAT validated broker, or a non-CTPAT validated broker.

Pursuant to § 141.21(b)(2), a foreign IOR who is not CTPAT validated must designate a customs broker licensed under 19 U.S.C. 1641 who is validated through the CTPAT program to either make entry or to act as the importer of record on the entry.[24] If a customs broker acts as the importer of record for the entry on behalf of a principal on the power of attorney (§ 141.46) who is not an importer of record, and that principal would qualify as a foreign importer of record pursuant to § 110.3 of this chapter, the broker must also be validated through the CTPAT program. The designated customs broker who is validated through the CTPAT program must act as the IOR for the entry if the principal on the power of attorney (§ 141.46) is not the owner or purchaser of the merchandise.

It is important to note that, upon the effective date of this rule (January 5, 2027), being a licensed customs broker alone is not sufficient to file entry on behalf of a foreign IOR or a foreign principal on a broker's power of attorney, unless that foreign IOR is itself a CTPAT validated IOR. CBP has limited visibility into the information pertaining to a foreign party when a customs broker is filing the entries on behalf of the foreign party. A CTPAT validated broker has demonstrated to CBP that it has controls in place to give the broker insight into its client and the client's supply chain. As a result, CBP is requiring that a customs broker acting on behalf of a non-CTPAT validated foreign IOR be CTPAT validated, to ensure that a trusted party is filing the entry and entry summary. This places CBP in a better position to protect the revenue, ensure supply chain security, and guarantee the safety of the American public.

CTPAT is highly effective in securing international supply chains by requiring its participants to implement stringent security measures for their cargo, personnel, and facilities. This program encourages companies to proactively identify and mitigate risks such as terrorism, smuggling, and other illicit activities within their supply chains. By partnering with the private sector, CTPAT enables CBP to enhance cargo security and streamline legitimate trade, allowing enforcement resources to focus on higher-risk shipments. CTPAT's primary focus is on security and trade compliance, and its operational model inherently promotes transparency. The program requires participants to submit detailed security profiles and engage in a rigorous validation process with CBP to confirm compliance with established MSC, fostering a clear understanding of security practices between the government and the trade community. In addition, CBP is more likely to collect debt from CTPAT validated participants than from non-CTPAT participants. The analysis in section VIII.B. below shows that, on average, the uncollected bill amount per entry summary for CTPAT validated foreign IORs is much lower than for non-CTPAT foreign IORs, who more easily evade payment of outstanding bills, penalties, or claims for liquidated damages.

New § 141.22 regulates entry by a U.S. IOR and addresses the declaration requirement for U.S. IORs, including verification of the declaration by CBP. Pursuant to paragraph (a), a party who has the right to make entry and meets the requirements to be considered a U.S.

[21] *See* Black's Law Dictionary (12th ed. 2024) (defining ''*alter ego*'' as ''A corporation used by an individual or a subservient corporation in conducting personal business, the result being that a court may impose liability on the individual or subservient corporation by piercing the corporate veil when someone dealing with the corporation is a victim of fraud, illegality, or injustice.'').

[22] *See* Black's Law Dictionary (12th ed. 2024) (defining ''*piercing the corporate veil*'' as ''the judicial act of imposing personal liability on otherwise immune corporate officers, directors, or shareholders for the corporation's wrongful acts.''). This doctrine disregards the corporate entity's separate legal existence, treating corporate officers, directors, or shareholders as liable for corporate debts.

[23] Operationally, this new requirement is applicable to informal entry types 11, 12, and 13, and all formal entry types. For more information on entry types, please see *https://www.cbp.gov/trade/automated/catair.*

[24] Use of a CTPAT validated broker does not confer CTPAT benefits on the IOR or the principal on the broker's power of attorney.

IOR, as defined in § 110.2, may continue to enter merchandise without the need for CTPAT validation, subject to the existing requirements and applicable procedures for formal entry and informal entry in 19 CFR parts 142 and 143. U.S. IORs may also elect to designate a customs broker who is not CTPAT validated. At the time of filing an entry (§ 141.0a(a)) and entry summary (§ 141.0a(b)), qualification as a U.S. IOR must be declared. Before filing, the IOR, or the broker on behalf of the IOR, must review the requirements in § 110.2, as well as the definitions for ''beneficial owner,'' and ''physical domestic assets,'' and assess whether all the criteria of a U.S. IOR are met. If the party satisfies the criteria, the IOR or the broker on behalf of the IOR must select the checkbox [25] on CBP Forms 3461 and 7501, declaring the qualification as a U.S. IOR. CBP updated CBP Forms 3461 and 7501, and their electronic equivalents, by adding a checkbox for IORs (or customs brokers filing an entry on their behalf) to declare that the IOR or principal on the power of attorney (§ 141.46) meets the criteria of a U.S. IOR. Foreign IORs and principals who do not meet the requirements to be considered a U.S. IOR under § 110.2 should leave this checkbox blank, to indicate that they are instead covered by § 110.3. Beginning January 5, 2027 these updated forms, and their electronic equivalents, must be used for each entry and entry summary filing.

If a designated customs broker who is not CTPAT validated acts as the IOR for the entry on behalf of a client, § 141.22(a)(2) requires that the customs broker identify the principal on the power of attorney at the time of filing an entry (§ 141.0a(a)) and entry summary (§ 141.0a(b)). As a result, the principal must have a CBP Form 5106 on file with CBP. On the updated CBP Forms 3461 and 7501, and their electronic equivalents, the customs broker will select the checkbox indicating that the broker is acting as the IOR on behalf of a principal, and provide the principal's IOR number, if applicable, or other identifier linked to the CBP Form 5106 on file, if no IOR number exists. If the broker is not making entry on behalf of a principal and is instead identified as the IOR to make entry on their own behalf, no principal need be identified.

New § 141.22(b) states that for purposes of a verification conducted under § 110.2(b), the decision as to whether an individual or entity qualifies as a U.S. IOR will be made by the appropriate Center of Excellence and Expertise (Center) Director.[26] The appropriate Center is the importer's assigned Center, or if an importer has not yet been assigned to a Center, the appropriate Center is the Center that most closely aligns with the Harmonized Tariff Schedule of the United States classification of the highest in total value commodity imported by that importer.

In addition to these new provisions, CBP is also updating § 141.46, regarding the requirement to obtain an executed power of attorney before transacting customs business on behalf of a principal. CBP is amending § 141.46 to clarify that a power of attorney must be executed whenever a customs broker is transacting customs business on behalf of a client, even when the broker is acting as the IOR for an entry.[27]

CBP is also updating § 142.13 which sets forth the conditions under which CBP may require live entry and § 142.25 which sets forth the conditions under which CBP may discontinue immediate delivery privileges. Live entry conditions the release of merchandise upon the filing of an entry summary with a deposit of all estimated duties, taxes, and fees—release thus cannot occur until payment is tendered. Section 142.13 currently lists various conditions when CBP may require live entry, and § 142.25 currently lists various conditions when CBP may discontinue immediate delivery privileges. In this interim final rule, CBP is adding another condition for when live entry may be required and when immediate delivery privileges may be discontinued: when the IOR, including a broker acting as the IOR on behalf of a principal on the power of attorney, inaccurately declares to CBP its qualification as a U.S. IOR as required under § 141.22. *See* new § 142.13(a)(5) and § 142.25(a)(5). If the IOR inaccurately declares that it qualifies as a U.S. IOR, CBP now has the ability to require live entry and discontinue immediate delivery privileges. In addition to the changes in §§ 142.13(a) and 142.25(a), CBP is also adding a new paragraph (e) to § 142.13 and a new paragraph (c) to § 142.25 that state that CBP may impose the requirement of live entry and discontinue immediate delivery privileges pursuant to §§ 142.13(a) and 142.25(a) on importers making formal and informal entry under the provisions of either part 142 or part 143.

Finally, CBP is making changes to regulations in part 111 and in Appendix B to part 171 pertaining to a customs broker's responsibilities with respect to its clients and the consequences for failing to meet those responsibilities. Current § 111.29(a) sets forth a customs broker's responsibility to exercise due diligence in making financial settlements and answering correspondence, among other responsibilities. CBP is adding a new § 111.29(a)(2) to include the responsibility of a customs broker to verify that a client meets the qualifications to be considered a U.S. IOR, after redesignating existing paragraph (a) as paragraph (a)(1). A customs broker, prior to filing a declaration on behalf of a client pursuant to § 141.22, must verify that the client qualifies as a U.S. IOR. Verification requires a customs broker to request and review client records establishing that the criteria specified in the definition of U.S. IOR are met. As mentioned above, the client records may include, but are not limited to, proof of citizenship or lawful permanent residence, corporate charters, financial statements and records, purchase receipts, or documents of title. If a customs broker determines during the review of the client records that the client is not a U.S. IOR, the broker must cease filing entries on behalf of the client if the broker is not CTPAT validated. CBP has also updated § 111.21(a) and 111.23, to require that the broker maintain records related to the broker's verification for five years from the date of the verification.

These new provisions are in line with the statutory mandate of section 116 of TFTEA (19 U.S.C. 1641(i)). Brokers must ensure that they are filing accurate information on behalf of their clients, and that their clients are who they say they are. CBP recommends, as a good business practice, that customs brokers obtain information from their client at the time of obtaining a power of attorney, to allow sufficient time for the broker to complete the verification process before filing entry.

For verification purposes under § 141.22, CBP must have the ability to request proof from the broker that the broker has verified that the client is in

[25] In the electronic versions of CBP Form 3461 and CBP Form 7501, the filer will not make this declaration using a checkbox, but will instead indicate ''Yes'' or ''No'' to declare whether the IOR is a U.S. IOR. For simplicity in this document, CBP will refer to this as a checkbox as it appears on CBP Form 3461 and CBP Form 7501.

[26] *See https://www.cbp.gov/trade/centers-excellence-and-expertise-information/cee-directory.*

[27] This amendment revokes by operation of law any prior ruling issued by CBP to the extent that it conflicts with this new requirement. *See* 19 CFR 177.12(d)(1). For example, this amendment revokes the holding in Headquarters Ruling Letter 223772, dated August 6, 1992, that ''[n[o power of attorney is required . . . [when b]rokers will make entry in [their] own name as the importer of record.''

fact a U.S. IOR, and the customs broker must comply with the recordkeeping and production requirements in 19 U.S.C. 1508, as discussed above.

Additionally, CBP is revising paragraph (K) in Appendix B to part 171 which contains guidelines for the imposition and mitigation of penalties for violations of 19 U.S.C. 1592. These guidelines are used by CBP in arriving at a just and reasonable assessment and disposition of liabilities arising under 19 U.S.C. 1592 within the stated limitations. Paragraph (K) states that if a customs broker commits a section 1592 violation and the violation involves fraud, or the customs broker commits a grossly negligent or negligent violation and shares in the benefits of the violation to an extent over and above customary brokerage fees, the customs broker will be subject to the mitigation guidelines of Appendix B. However, if the broker commits either a grossly negligent or negligent violation of section 1592 (without sharing in the benefits of the violation as described above), CBP may proceed against the customs broker pursuant to the limited remedies provided under 19 U.S.C. 1641 (monetary penalty, suspension or revocation of a license or permit). CBP is updating this language to state that subject to CBP's discretion, if a customs broker commits a violation of 19 U.S.C. 1592, the customs broker may be subject to penalties under 19 U.S.C. 1592 or any other enforcement actions available under the law, including 19 U.S.C. 1641.

Economic security is national security, and customs law enforcement is essential to protect the economy of the United States and the health and safety of the American people. Customs law enforcement requires the ability to assess stringent penalties to ensure an adequate deterrent effect on customs brokers that fail to comply with the law. Historically, CBP has penalized brokers pursuant to 19 U.S.C. 1641, which sets a maximum monetary penalty amount of $30,000 for violations. Moreover, pursuant to existing paragraph (K) in Appendix B to part 171, CBP has assessed penalties against customs brokers pursuant to 19 U.S.C. 1592 only in those cases where the broker was involved in a violation with a culpability level of fraud or where the agency could demonstrate the broker benefited from the violation. Although penalties up to $30,000 are available under 19 U.S.C. 1641, customs brokers still commit violations and repeatedly represent foreign IORs who fail to comply with U.S. laws. With this amendment to paragraph (K), CBP is enhancing its enforcement options against brokers to include broader applicability of penalties under 19 U.S.C. 1592, for which a maximum penalty may be assessed at the domestic value of the merchandise. As such, CBP envisions that higher penalties will have a greater deterrent effect on customs brokers that fail to comply with the law.

VI. Explanation of Amendments to the CBP Regulations

A. Amendments to Part 110

CBP is creating a new part 110 in title 19 of the CFR, and adding subparts A and B. In new § 110.1, CBP has added new definitions for the terms ''beneficial owner,'' and ''physical domestic assets.'' In new § 110.2, CBP has laid out the requirements to be considered a U.S. importer of record, and the verification requirements associated with that status. In new § 110.3, CBP has explained that any IOR not qualified to be considered a U.S. IOR is considered a foreign IOR. Subpart B is reserved.

B. Amendments to Part 111

CBP is amending part 111, in accordance with the requirements discussed above. Specifically, CBP is amending §§ 111.21 and 111.23 by adding the requirement that brokers maintain records related to verifying that the client meets the threshold for a U.S. IOR under § 110.2. CBP is also amending § 111.29 by redesignating paragraph (a) as a new paragraph (a)(1) and adding a new paragraph (a)(2) to include a customs broker's responsibility for verifying a client's qualification as a U.S. IOR.

C. Amendments to Part 141

CBP is amending part 141, in accordance with the requirements discussed above. Specifically, CBP is adding two new sections (§ 141.21 and § 141.22). New § 141.21 states that a foreign IOR may not enter merchandise for consumption unless it is a CTPAT validated IOR or designates a customs broker who is CTPAT validated, and lays out associated requirements. New § 141.22 states that a U.S. IOR must submit a declaration as to its qualification as a U.S. IOR at the time of filing an entry and entry summary. CBP has also amended § 141.46 to clarify that a power of attorney is required even when the broker is acting as the IOR for an entry. In addition, the general authority citation for part 141 is revised to include 19 U.S.C. 4320 and 4321.

D. Amendments to Part 142

CBP is amending part 142, in accordance with the requirements discussed above. Specifically, CBP is amending § 142.13 by adding a new paragraph (a)(5) that states that CBP may impose a live entry requirement if the importer inaccurately declares to CBP its qualification as U.S. IOR pursuant to § 141.22. CBP is also adding a new § 142.13(e) to clarify that CBP may impose a live entry requirement on formal and informal entries under the provisions of part 142 and part 143.

E. Amendments to Part 171

CBP is amending Appendix B to part 171, which sets forth guidelines for the imposition and mitigation of penalties for violations under 19 U.S.C. 1592. Specifically, CBP is revising paragraph (K) in Appendix B, as discussed above.

F. Severability

CBP intends for the provisions contained in this rulemaking to be severable from each other and to be given effect to the maximum extent possible, such that if a court holds that any provision is invalid or unenforceable—whether in its entirety or as to a particular person or circumstance—the other provisions will remain in effect as to any other person or circumstance.[28] The various provisions in this IFR are designed to function sensibly without the others, and CBP intends for them to be severable so that each can operate independently.

G. Alternative and Request for Comments

As noted in Section II, above, although Section 2(b) of the E.O. directs CBP to prohibit foreign IORs from filing informal entry, CBP has not implemented that prohibition in this interim final rule. However, CBP will continue to monitor informal entries for consumption filed by CTPAT validated foreign IORs and CTPAT validated brokers on behalf of foreign IORs. If CBP determines that requiring that informal entries for foreign IORs be filed by a CTPAT validated party is insufficient to protect the revenue, national security, and the health and safety of the American people, CBP may prohibit informal entries for consumption filed by a foreign IOR or a broker acting on their behalf. CBP welcomes public comment on this alternative, in addition to the approach implemented by this interim final rule.

[28] Courts have uniformly held that the Administrative Procedure Act (APA), 5 U.S.C. 551 *et seq.*, 5 U.S.C. 706(2), authorizes courts to sever and set aside ''only the offending parts of the rule.'' *Carlson* v. *Postal Regulatory Comm'n,* 938 F.3d 337, 351 (D.C. Cir. 2019); *see, e.g., K Mart Corp.* v. *Cartier, Inc.,* 486 U.S. 281, 294 (1988).

VII. Delayed Compliance Date

In consideration of the business process changes needed for licensed customs brokers to verify whether a client meets the requirements to be considered a U.S. IOR, CBP will accept requests from brokers to delay compliance with the new verification requirement for customs brokers in § 111.29. Brokers who are currently subject to any of the following enforcement actions are ineligible for delayed compliance: removal from the CTPAT program, revocation of CBP Form 5106 filing privileges, suspension or debarment by a Federal agency and identified with an exclusion record in the System for Award Management Exclusions List on SAM.gov, entry filer code suspension, or broker license revocation proceedings. Such requests must be submitted by January 5, 2027 and must include an explanation of the need for delayed compliance. For additional details on how to submit a request for delayed compliance, see *www.cbp.gov/trade/strengthening-customs-enforcement/delayed-compliance*. If delayed compliance is approved, customs brokers must continue to make satisfactory progress toward compliance by demonstrating a good faith effort to comply with this rule to the extent of the broker's current ability during the compliance period. All customs brokers are expected to be in full compliance with the requirements of this rule no later than May 6, 2027.

VIII. Statutory and Regulatory Requirements

A. Administrative Procedure Act

The Administrative Procedure Act (APA), 5 U.S.C. 551 *et seq.,* generally requires agencies to publish a notice of proposed rulemaking in the **Federal Register**, and to provide interested persons the opportunity to submit comments prior to issuance of a final rule. As an initial matter, the requirements of the APA do not apply to the extent that the rulemaking involves a foreign affairs function of the United States. 5 U.S.C. 553(a)(1).[29]

This interim final rule addresses challenges resulting from importations by foreign IORs. Securing America's borders, regulating and vetting foreign actors, and protecting its citizens from external threats is a foreign affairs function of the United States. Importations into the United States across America's borders can pose threats to U.S. citizens, including threats from contraband and harmful materials that can flow across the border, as well as narcotics trafficking and other destabilizing or unlawful activities, including the flow of dangerous drugs, weapons, and technology. Further, ensuring foreign parties abide by U.S. trade law is a core foreign affairs function. Unchecked importations by foreign actors into the United States can undermine domestic markets and supply chains—for instance, foreign government assistance and subsidies, such as tax breaks to foreign manufacturers, enable them to sell cheaper goods and disadvantage domestic companies. In response, the U.S. may establish antidumping and/or countervailing duties to counteract foreign government assistance and subsidies. Tracking and vetting foreign importers is critical to counteracting bad actors in the trade space, preventing evasion of U.S. trade law, and upholding the integrity of domestic markets and supply chains. If customs and trade laws cannot be adequately enforced against foreign importers of record, it leaves American citizens vulnerable to foreign actors and foreign governments. Accordingly, this rule is clearly and directly involved in a core foreign affairs function.[30] Moreover, proceeding without notice and comment will allow the Department to timely address sensitive foreign-policy and national-security matters that affect relations with foreign governments. This rule directly impacts foreign actors, including foreign importers, manufacturers, and businesses. Foreign governments, especially those whose citizens and businesses this rule most affect, may seek to retaliate against the United States or United States exporters. Bypassing notice and comment will reduce the risk the United States suffers retaliation from foreign governments based on this rule. Therefore, this interim final rule involves the foreign affairs function of the United States and is not subject to notice and comment under the APA.[31]

Further, as discussed above, the revenue rule permits a court of one country to refuse to allow lawsuits initiated by another country to enforce the foreign country's revenue laws, absent an agreement between the two countries to enforce the collection of a foreign IOR's debt. The revenue rule is a means to avoid interfering with foreign relations and a country's national sovereignty by preventing another country from enforcing its own laws within the borders of another country. Therefore, this interim final rule involves the foreign affairs function of the United States.

Further, the APA provides an exception to advance notice and comment requirements ''when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public comment thereon are impracticable, unnecessary, or contrary to the public interest.'' 5 U.S.C. 553(b)(B). The good cause exception ''excuses notice and comment in emergency situations . . . or where delay could result in serious harm.'' [32]

Notice and comment is impracticable when the due and required execution of agency functions would be unavoidably prevented by undertaking public rulemaking proceedings.[33] Impracticability can occur when there is an imminent hazard to persons or property within the United States, or when immediate implementation of a rule might directly affect public safety.[34]

The public interest prong of the good cause exception applies when ordinary procedures of notice and comment, generally presumed to serve the public interest, would actually harm the public interest.[35] These interests include public safety and public health.[36] This prong is distinct from the need for immediacy under the impracticability prong and is ''appropriately invoked when the timing and disclosure requirements of the usual procedures would defeat the purpose of the proposal.'' [37]

CBP finds that good cause exists to issue this rule as an interim final rule. Delaying the publication of this interim final rule for purposes of providing public notice and comment would be impracticable. As mentioned above, non-CTPAT foreign IORs are importing

[37] *See Mack Trucks, Inc.* v. *EPA,* 682 F.3d 87, 95 (D.C. Cir. 2012).

goods that may be dangerous to the American public, such as narcotics and counterfeits. In the past, CBP has seized unsafe merchandise for failure to meet Consumer Product Safety Commission standards, unsafe merchandise that is not compliant with the Food and Drug Administration's regulations, and other imports such as counterfeit merchandise that threatens public safety. Data ranging from October 2020 through the beginning of February 2026 shows that the rate of seizure incidents is higher for non-CTPAT foreign IORs, which have 6.38 seizures per million entry summaries, than for CTPAT validated foreign IORs, which have 1.14 seizures per million entry summaries, as discussed in the analysis below. In recent years, CBP has seen an increase in the number of seizures of violative goods attempted to be imported by foreign IORs. Thus, CBP must act now to avoid further harm to persons and property in the United States.

Furthermore, under the ''contrary to public interest'' prong, advance notice of new requirements would significantly increase the incentive on the part of foreign IORs to ''flood the market'' by importing high volumes of illicit merchandise during a notice and comment period before the rule takes effect, thereby compounding the very challenges that CBP is addressing with this interim final rule. IOR accounts are being created with false or incomplete information, likely by shell companies who are attempting to disguise their identity. CBP's records show that between March 2019 and the end of September 2025, individuals and entities created approximately 55,000 accounts with fake phone numbers, such as 123456789, and 45,000 accounts with fake email addresses, such as emails beginning with ''noemail,'' or *abc@abc.com,* etc., hindering CBP's ability to contact an IOR for validation of entry information and enforcement and revenue collection purposes. If CBP provides notice and comment before implementing these new requirements, CBP anticipates a significant increase in new IOR accounts created with false information, further complicating CBP's enforcement efforts against IORs that are disguising their identity as a foreign IOR and attempting to import illicit merchandise prior to a final rule taking effect.

CBP is only able to identify IORs as foreign if they list a foreign address on CBP Form 5106, but there are likely many more foreign persons and entities using incorrect U.S. addresses or shell companies to import goods, preventing CBP from knowing the true importer's identity and location. Recently, CBP discovered over 870 unique CBP Form 5106 accounts sharing a single physical address, most of which were found to be linked to foreign entities. Because foreign IORs cannot be held accountable through the same mechanisms as U.S. IORs, CBP's debt collection and enforcement efforts can be frustrated as foreign IORs have less incentive to comply with U.S. law. If CBP provides advance notice of new requirements for foreign IORs, those foreign importers may create shell companies, and already existing shell companies may create new shell companies, to evade U.S. laws and the new requirements established by this interim final rule. Due to technological advances pertaining to duty collection and targeting, enforcement, and processing, CBP is now equipped to address the challenges relating to foreign IORs. Waiting to counter the above-mentioned challenges would harm CBP's ability to collect lawful revenue owed and take effective enforcement action to address violations of U.S. customs and trade laws, disadvantage the domestic industry, and would allow a gap that invites the importation of illegal and dangerous merchandise into the United States.

As discussed above, this interim final rule establishes new requirements for foreign IORs and U.S. IORs when making entry in the United States. Requiring CTPAT validated status of foreign IORs and customs brokers lowers the risk associated with foreign IORs as CBP has more visibility into CTPAT validated participants and assurances regarding the security of their supply chains compared to foreign IORs and customs brokers who are not CTPAT validated participants. These new requirements will allow CBP to more effectively focus its efforts on higher risk importers to interdict illicit drugs, intellectual property violative goods, misclassified merchandise, and other goods that pose risks to public safety. The new requirements will also enable CBP to better ensure the collection of duties, taxes, and fees from foreign IORs. Data ranging from October 2020 through the beginning of February 2026 shows, on average, that CTPAT foreign IORs owe CBP $1.21 in uncollected bills per entry summary, compared to non-CTPAT foreign IORs who owe $34.08 per entry summary. A prolonged rulemaking process would create uncertainty that would undermine the credibility and effectiveness of CBP's actions to limit entry by foreign IORs to CTPAT validated participants.

However, CBP recognizes that IORs and customs brokers need time to make adjustments to comply with this rule. Therefore, CBP is publishing this interim final rule with a 60-day delayed effective date to give IORs and brokers time to modify the relevant business processes that are affected by this interim final rule. Customs brokers are provided additional time to comply with the new due diligence responsibility of verifying a client's qualification as a U.S. IOR and maintaining the associated records. CBP is also soliciting public comments on this interim final rule and will consider all timely submitted comments in determining whether and how to revise the rule in a subsequent final rule. Given the public safety and revenue implications of continued imports by foreign IORs into the United States, CBP has attempted to strike a balance between its need to address these urgent requirements while still providing sufficient time for IORs and customs brokers to comply with the regulatory changes involved in this rulemaking, as well as providing for an opportunity to comment. For the reasons discussed above, this rule is exempt from the prior public notice and comment requirements of the APA under both the foreign affairs exception and the good cause exception.

B. Executive Orders 12866, 13563, and 14192

Executive Orders 12866 (Regulatory Planning and Review) and 13563 (Improving Regulation and Regulatory Review) direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. Executive Order 14192 (Unleashing Prosperity Through Deregulation) directs agencies to significantly reduce the private expenditures required to comply with Federal regulations and provides that ''any new incremental costs associated with new regulations shall, to the extent permitted by law, be offset by the elimination of existing costs associated with at least 10 prior regulations.''

The Office of Management and Budget (OMB) has designated this rule a ''significant regulatory action'' under section 3(f) of Executive Order 12866, although not economically significant under section 3(f)(1). Accordingly, the rule has been reviewed by the Office of Management and Budget.

This rule is not an Executive Order 14192 regulatory action because it is being issued with respect to a national

security or homeland security function of the United States. The benefit-cost analysis demonstrates that the regulation is anticipated to improve national or homeland security as its primary direct benefit or is issued with respect to foreign affairs related functions of the United States and OIRA and the promulgating agency agree the regulation qualifies for a 'good cause' exception under 5 U.S.C. 553(b)(B). See OMB Memorandum M–25–20, ''Guidance Implementing Section 3 of Executive Order 14192, titled 'Unleashing Prosperity Through Deregulation' '' (Mar. 26, 2025). Additionally, this proposed rule is exempt from Executive Order 14192 under section 5(c) of Executive Order 14192. Table 1 shows an accounting statement for the effects of the rule.

BILLING CODE 9111–14–P

Table 1: A-4 Accounting Statement for the Rule

Category	Annualized Estimate (in 2026 USD) over 2027 to 2036	
Benefits	**3% Discount Rate**	**7% Discount Rate**
Monetized benefits	None	None
Quantified, non-monetized benefits	None	None
Qualitative (unquantified) benefits	Stricter enforcement of duties, penalties, and liquidated damages, stronger protections against prohibited goods such as illicit drugs, and safer supply chains resulting from increased CTPAT participation or use of CTPAT brokers by foreign IORs.	
Costs	**3% Discount Rate**	**7% Discount Rate**
Monetized costs	$1,233,253 resulting from programming changes, the cost to CBP of increased CTPAT participation, and the burdens of submitting and processing brokers' delayed compliance requests.	$1,257,478 resulting from programming changes, the cost to CBP of increased CTPAT participation, and the burdens of submitting and processing brokers' delayed compliance requests.
Quantified, non-monetized costs	None	None
Qualitative (unquantified) costs	Costs to brokers and foreign IORs of increased CTPAT applications and participation. Cost to brokers and U.S. IORs of gathering documentation and maintaining records of U.S. IOR status. Cost to some foreign IORs of switching to CTPAT validated brokers.	
Cost Savings	**3% Discount Rate**	**7% Discount Rate**
Monetized cost savings	None	None
Quantified, non-monetized cost savings	None	None
Qualitative (unquantified) cost savings	None	None
Transfers	**3% Discount Rate**	**7% Discount Rate**
Monetized budgetary transfers	None	None
Other monetized transfers	None	None
Unquantified transfers	Transfers from foreign IORs to U.S. government resulting from improved collection rates of duties, penalties, and liquidated damages. Transfers from non-CTPAT validated brokers to CTPAT validated brokers.	
Distributional Effects	**3% Discount Rate**	**7% Discount Rate**

Effects on State, local, and/or tribal governments	Not anticipated	Not anticipated

Effects on wages	Not anticipated	Not anticipated
Effects on growth	Not anticipated	Not anticipated

BILLING CODE 9111–14–C

Background

To fulfill its mission, CBP must ensure that importers of record (IORs) pay the applicable duties, taxes, and fees for their imports as well as any monetary penalties issued by CBP. Sometimes, CBP discovers that an IOR underpaid its duties through misrepresentations such as undervaluation, false country of origin, transshipment, misclassification, or false invoices. Other times, an IOR will simply refuse to pay any duties in the first place. Upon discovery of underpayment, CBP can issue a penalty to the IOR, but the IOR may not cooperate in paying. CBP can collect on the basic importation and entry bond, but sometimes the bond saturates, meaning that it does not cover the full amount owed. In that case, CBP can try to seize the IOR's assets. This option can be difficult when the IOR is foreign, as a foreign IOR may have few if any real assets in the United States, and whatever assets the foreign IOR has in its home country may be unreachable to the U.S. government. CBP can require the IOR to file live entry and suspend immediate delivery privileges for all future importations until that IOR makes any outstanding payments to CBP, but foreign IORs may be able to evade these requirements through creation of shell companies. When an IOR is based outside the United States, CBP has less visibility into the IOR's operations and assets than it does with U.S. IORs, making it easier for the foreign IOR to conceal its identity and harder for CBP to hold the IOR and its affiliates accountable. As a result, foreign IORs that receive or anticipate enforcement or collection actions by CBP will sometimes switch to a new name to evade consequences for past actions. Foreign IORs can therefore avoid payments to CBP and other consequences more easily than U.S. IORs can, giving the former an unfair advantage.

While CBP has limited visibility into many foreign IORs' operations, IORs that are CTPAT validated are generally more transparent and trustworthy in their transactions and dealings with CBP. The CTPAT program ensures that participants meet minimum security criteria and abide by best practices. It also creates more visibility into the participants' supply chain and operations because the CTPAT participant must be in communication with its contact in CBP to show that it is continuing to meet the requisite standards. The CTPAT participant must also have visibility into the operations of businesses that it interacts with to ensure the supply chain is secure, as represented to CBP upon validation. Hence, if an IOR is not CTPAT validated, but uses a CTPAT validated broker, that broker will have obtained more information about the IOR's business than a non-CTPAT validated broker would have, and CBP will be better able to obtain information regarding the IOR from the broker if necessary. Requiring foreign IORs to be CTPAT validated or use CTPAT validated brokers will therefore strengthen CBP's ability to enforce collections on foreign IORs by increasing transparency into the foreign IORs' business and supply chain practices.

Purpose of the Rule

CBP faces challenges in enforcing collection of duties, penalties, and liquidated damages against foreign IORs because these IORs often have few, if any, physical assets in the United States and their bond does not fully cover amounts lawfully owed to CBP. This rule requires foreign IORs to either be CTPAT validated or to use a CTPAT validated broker so that the foreign IORs meet stricter standards of security and transparency. CTPAT validated brokers have more information about their clients' supply chains, and this information could improve CBP's ability to collect payments from the foreign IOR and identify other non-compliance with U.S. customs and trade laws. Furthermore, foreign entities will have more incentive to avoid exporting prohibited goods to the United States or otherwise violate CBP requirements if they are trying to maintain their CTPAT validated status. U.S. IORs will also have to provide documentation proving that they are a U.S. IOR at CBP's request, which will help CBP to determine which IORs claiming to be U.S. IORs are in fact foreign shell companies.

Baseline for the Rule

In this regulatory impact assessment (RIA), CBP analyzes the effects of the rule by comparing a baseline and an alternative scenario. Currently, foreign IORs import shipments into the United States without being CTPAT validated or using a CTPAT validated broker. Under this rule, foreign IORs would have to be CTPAT validated or use CTPAT validated brokers to enter merchandise into the United States. The effects of the rule are therefore the differences between the world under the current baseline and the world under this rule.

Population Affected

For the purposes of this analysis, CBP assessed whether IORs were foreign or U.S. based on the physical address provided on CBP Form 5106. However, there could be IORs that listed a U.S. address but who would more accurately be classified as foreign. Some of these IORs might be foreign shell companies being intentionally dishonest, while others might be self-labeling as U.S. IORs in good faith but not meet the standard to be considered a U.S. IOR that is laid out in this rule. As a result, this analysis may underestimate the true number of foreign IORs. There could also be some businesses that have given CBP a foreign address but could meet the standard to be considered a U.S. entity under the rule. To the extent that the number of foreign IORs differs from the estimates below, the true effects of the rule would differ from CBP's estimates. If more IORs are foreign than CBP estimates, then the true benefits and costs of the rule will both be higher than expected. The benefits would be

higher than CBP's estimate because CBP would be strengthening its enforcement capabilities for an even greater number of IORs than estimated, while the costs would be higher because a greater number of non-CTPAT validated foreign IORs would be disallowed from using a non-CTPAT validated broker than estimated.

IORs and brokers will be the main entities affected by the rule. Table 2 shows the number of IORs who made an entry summary between October 1, 2020, and February 6, 2026. Of those IORs, 16% were foreign, and 84% were U.S. IORs. CTPAT validated IORs are a small percentage of both foreign and U.S. IORs. Only 0.4% of foreign IORs are CTPAT validated, but, as shown in Table 3, 68% of foreign IORs already use CTPAT validated brokers. The remaining 32% of foreign IORs will not be able to continue importing into the United States unless they switch brokers or become CTPAT validated themselves.

Table 2: Number of Active IORs

	Count
Non-CTPAT validated foreign IORs	187,127
CTPAT validated foreign IORs	744
Non-CTPAT validated U.S. IORs	995,389
CTPAT validated U.S. IORs	4,549
Total	**1,187,809**

*Importers were counted as active if they made any entry summaries between October 1, 2020, and February 6, 2026. Source: Based on trade data from October 1, 2020, to February 6, 2026, from the CBP Automated Commercial Environment (ACE), obtained on February 17, 2026.

Table 3: Active Foreign IORs That Are CTPAT Validated or Using CTPAT Validated Brokers

	Count	Share of All Foreign IORs
Foreign IORs that are CTPAT validated	744	0.40%
Foreign IORs that used a CTPAT validated broker	127,691	67.97%
Foreign IORs that are CTPAT validated and/or used a CTPAT validated broker	127,724	67.98%

*Importers were counted as active if they made any entry summaries between October 1, 2020, and February 6, 2026. Source: Based on trade data from October 1, 2020, to February 6, 2026, from ACE, obtained on February 17, 2026. Note: the figures in the bottom row are less than the sum of the upper rows because some foreign IORs both have CTPAT validation and use a CTPAT validated broker.

Table 4 shows the number of active brokers, of which 21% are CTPAT validated, 1% are CTPAT certified, and 78% are not CTPAT validated. About two-thirds of brokers have submitted an entry summary for a foreign IOR.

Table 4: Number of Active Brokers

	Number of active* brokers		Number of active* brokers that filed entries for foreign IORs	
	Count	Share of Total	Count	Share of Total
Validated	643	21%	622	30%
Certified	29	1%	28	1%
Non-CTPAT	2,428	78%	1,401	68%
Total	**3,100**	**100%**	**2,051**	**100%**

*Brokers were counted as active if they submitted any entry summaries between October 1, 2020, and February 6, 2026. Source: Based on trade data from October 1, 2020, to February 6, 2026, from ACE, obtained on February 17, 2026.

As shown in Table 4, there were 3,100 brokers that filed entry summaries between October 1, 2020, and February 6, 2026. CBP uses this number as its estimate for the number of brokers that will make entry and be affected by the rule in the 5 years following the rule's effective date. The number of currently permitted brokers, as of October 2, 2026, is 2,600, but this figure underestimates the number of brokers who will be affected by the rule because it does not include brokers who are not yet permitted but will be in the future.[38] For the purposes of estimating the number of submissions of the Broker Delayed Compliance Request Form, however, CBP uses the number of currently permitted brokers, 2,600, because that form will only be accepted for a limited time.

Benefits

Under the rule, CBP will be better equipped to enforce payments for duties, penalties, and liquidated damages from foreign IORs, and CBP will have more knowledge of which IORs are foreign or domestic. One of CBP's many critical mission sets is to facilitate legitimate trade that supports economic growth while shielding the American public and businesses from illicit trade, including unsafe products, intellectual property theft, and unfair trade practices. However, CBP cannot easily ensure that foreign IORs are complying with U.S. customs and trade laws to prevent the importation of dangerous and unlawful goods, potentially unsafe merchandise, such as counterfeit goods and precursor chemicals for the purposes of manufacturing illicit substances, into the United States. This program encourages companies to proactively identify and mitigate these risks within their supply chains, and these new requirements will allow CBP to more effectively focus its efforts on higher risk importers to interdict illicit drugs, intellectual property violative goods, misclassified merchandise, and other goods that pose risks to public safety.

CBP

The rule will aid CBP in enforcing duty payments by foreign IORs. At present, foreign IORs are difficult to collect payments from, as a foreign IOR may have no physical offices, bank accounts, or assets in the United States that CBP can seize. Moreover, without a physical presence in the country, a foreign shell company may import merchandise and disappear—before a demand for payment is even issued. Therefore, when CBP discovers unpaid duties, fees, penalties, and liquidated damages, it is typically more successful at collecting from U.S. IORs than foreign IORs. From January 1, 2020, to August 27, 2026, CBP audits uncovered a loss of revenue from U.S. IORs totaling $4.3 billion and from foreign IORs totaling $1.16 billion.[39] The loss of revenue was higher for U.S. IORs because U.S. IORs imported roughly 10 times more by value than foreign IORs over that period.[40] Thus, proportionally, the loss of revenue as compared to total value of imports was 0.06% for foreign IORs, as compared to 0.02% for U.S. IORs.[41] Moreover, as discussed below, in terms of CBP's ability to collect, the gap becomes even wider. After identifying unpaid duties and other unpaid amounts owed to CBP, CBP was able to collect a portion of what the IORs owed. As shown in Table 4, CBP collected $654 million from U.S. IORs after identifying the loss of revenue, implying a collection rate of 15.2% for what had gone unpaid. For foreign IORs, CBP collected $35.7 million, a collection rate of only 3.1%.

Table 4: Total Identified Loss of Revenue and Subsequent Collections, January 2020 - July 2026

IOR Type	Amount Reported	Discovered Loss of Revenue	Collected Amount	Percent Collected
Domestic	Total	$4.3 billion	$654 million	15.2%
Foreign	Total	$1.16 billion	$35.7 million	3.1%
Domestic	Average annual	$645.6 million	$98.2 million	15.2%
Foreign	Average annual	$174.2 million	$5.4 million	3.1%

Note: CBP identified all audits of IORs from January 1, 2020, to August 27, 2026, and compiled the total identified loss of revenue and collections stemming from those audits.
Note: The top two rows of figures show the total amounts that accumulated over the full time period. The bottom two rows show the average annual amounts implied by the upper rows.
Source: received from OT on August 27, 2026. Obtained from Trade Regulatory Audit Management System.

Open bill statistics show that foreign IORs that are CTPAT validated are much more likely to pay what they owe. Many IORs have open bills with CBP, meaning that they have unpaid duties, taxes, and fees that are past due. Some of these IORs may be slow and untimely in making payments, while others have no intention of ever paying. Open bills are a more common problem for entries made by non-CTPAT validated IORs than by CTPAT validated IORs, possibly because CBP has more leverage and information when dealing with CTPAT validated IORs. By requiring non-CTPAT validated foreign IORs to either become CTPAT validated or use a CTPAT validated broker, the rule will increase visibility into the foreign IORs' supply chains and thereby help CBP enforce payment. The transparency gained through this interim final rule concerning an IOR's foreign IOR status is also anticipated to assist with CBP's

[38] Source for number of permitted brokers: CBP Office of Trade, October 2, 2026.

[39] Source: received from OT on August 27, 2026. Obtained from Trade Regulatory Audit Management System.

[40] Source: based on trade data from October 1, 2020, to February 6, 2026, from ACE and open bill data from Office of Finance, obtained on February 17, 2026.

[41] CBP scaled the total import values from October 1, 2020, to February 6, 2026 by 2,431/1,955 to estimate the total import values from January 1, 2020, to August 27, 2026, so that CBP could compare the total import values with the total loss of revenue over the same time period.

identification and enforcement against shell companies and to enhance CBP's understanding of linkages and affiliations among foreign IORs, and shell companies. Moreover, stricter penalty enforcement by CBP could motivate foreign IORs to give more accurate information, including classification and valuation, for their imports in the first place, reducing the need for CBP to issue penalties.

CTPAT validated foreign IORs are much more compliant in making payments to CBP than non-CTPAT validated foreign IORs are, as shown by open bill statistics. To calculate the amount owed by different categories of IORs, CBP looked at bills that were opened between October 1, 2020, and February 6, 2026, and that were still open on February 6, 2026.[42] As of February 6, 2026, the total amount owed by non-CTPAT validated foreign IORs for open bills was $1,015,627,712. CBP excluded interest when calculating the amount owed for the open bills. To compare CTPAT validated and non-CTPAT validated foreign IORs, CBP divided each group's total uncollected bill amount by the number of entry summaries made during that same period to calculate the average uncollected bill amount per entry summary. On average, CTPAT validated foreign IORs owe CBP $1.21 in uncollected bills per entry summary, while non-CTPAT validated foreign IORs owe $34.08 per entry summary. A comparison of non-CTPAT validated and CTPAT validated U.S. IORs yields similar results, shown in Table 5.

Table 5: Average Uncollected Bill Amount per Entry Summary

CTPAT Status of IOR	Foreign IORs	U.S. IORs	All IORs
Non-CTPAT validated	$34.08	$29.83	$30.55
CTPAT validated	$1.21	$3.48	$3.29

Calculated by dividing total uncollected bill amount by entry summary count for each category.
Source: Based on trade data from October 1, 2020, to February 6, 2026, from ACE and open bill data from Office of Finance, obtained on February 17, 2026.

The difference between CTPAT validated and non-CTPAT validated foreign IORs' average uncollected bill amount per entry can be decomposed into the difference between the average amount owed on an open bill and the number of open bills per entry summary. These different components are shown in Table 6. One can see that the number of open bills per 10,000 entry summaries[43] is only slightly higher for non-CTPAT validated foreign IORs, but the average open bill is much larger for non-CTPAT validated foreign IORs ($68,763) than for CTPAT validated foreign IORs ($2,501).

Table 6: Decomposition of Foreign IORs' Uncollected Bill Amount per Entry Summary

CTPAT Status	Total Uncollected Bill Amount/Entry Summaries	Total Uncollected Bill Amount/Open Bill	Open Bills/10,000 Entry Summaries
Non-CTPAT validated	$34.08	$68,763	4.96
CTPAT validated	$1.21	$2,501	4.85

Source: Based on trade data from October 1, 2020, to February 6, 2026, from ACE and open bill data from Office of Finance, obtained on February 17, 2026.

The above tables focus on the average open bill amount per entry summary. One could instead look at the average open bill amount per IOR. Dividing the total uncollected bill amount by the number of IORs in each category reveals that CTPAT validated foreign IORs actually have a larger uncollected bill amount per IOR than non-CTPAT validated foreign IORs do. To understand why, CBP decomposed the open bill amount per IOR into two statistics: (1) the open bill amount per IOR with an open bill and (2) the share of IORs with open bills. Table 7 shows that non-CTPAT validated foreign IORs with open bills have an open bill amount of $978,447, which is larger than CTPAT validated foreign IORs' average of $192,979. However, dividing the total number of open bills by the number of IORs, one sees that CTPAT validated foreign IORs have more open bills (4.44 per 100 IORs) than non-CTPAT validated foreign IORs (0.55 per 100 IORs).

[42] An open bill is created when an entry liquidates for an increase, and an open bill is considered delinquent at 31 days old and unpaid. If a bill is only partially paid, it remains open and delinquent until the remaining amount is paid in full or otherwise resolved.

[43] The number of open bills per entry summary is a very low number, and so CBP reports the number of open bills per 10,000 entry summaries for readability, even though the total uncollected bill amount per entry summary equals the total uncollected bill amount per open bill times the number of open bills per entry summary, not per 10,000 entry summaries.

Table 7: Decomposition of Foreign IORs' Uncollected Bill Amount per Foreign IOR

CTPAT Status	Total Uncollected Bill Amount/All IORs	Total Uncollected Bill Amount/IORs with Open Bills	Open Bills/100 IORs
Non-CTPAT validated	$5,427	$978,447	0.55
CTPAT validated	$8,560	$192,979	4.44

Source: Based on trade data from October 1, 2020, to February 6, 2026, from ACE and open bill data from Office of Finance, obtained on February 17, 2026.

One likely reason that CTPAT validated foreign IORs have more open bills than non-CTPAT validated foreign IORs is that CTPAT validated foreign IORs make many more entries. Between October 1, 2020, and February 6, 2026, the average CTPAT validated foreign IOR made 7,053 entry summaries, while the average non-CTPAT validated foreign IOR made 159 entry summaries. It is reasonable for CTPAT validated foreign IORs to have 8 times more open bills per IOR than non-CTPAT validated foreign IORs when the CTPAT validated foreign IORs also make 44 times more entry summaries per IOR than the non-CTPAT validated foreign IORs. Therefore, open bills per entry summary are a more reliable indicator of CBP's collection difficulties than open bills per IOR when comparing different categories of IORs. Once again, the average open bill per entry summary is starkly higher for non-CTPAT validated IORs ($34.08) than CTPAT validated IORs ($1.21).

Table 8: Foreign IORs' Entry Summaries per IOR

CTPAT Status	Entry Summaries per IOR
Non-CTPAT validated	159
CTPAT validated	7,053

Source: Based on trade data from October 1, 2020, to February 6, 2026, from ACE, obtained on February 17, 2026.

Not only is there a clear correlation between open bills and CTPAT validation, but there are also reasons why CTPAT validation actually causes IORs to have lower open bills. Most importantly, one of the requirements for CTPAT validation is that the importer ''maintain no evidence of financial debt to CBP for which the responsible party has exhausted all administrative and judicial remedies for relief, a final judgment or administrative disposition has been rendered, and the final bill or debt remains unpaid at the time of the initial application or annual renewal.'' [44] Moreover, participation in the CTPAT program gives CBP more visibility into the IOR's business, helping CBP to contact and enforce collections from the CTPAT validated IOR. Meeting the security requirements of CTPAT may also prevent the IOR from doing something (such as undervaluing imports) that would lead to a large duty increase in the first place.

CBP expects to collect more revenue under the rule as a result of stricter enforcement of duties, penalties, and liquidated damages. CBP cannot estimate the revenue increase because CBP cannot assume that the rule will lead to a 100% collection rate or that the foreign IORs that switch to using CTPAT validated brokers under the rule will become exactly as compliant as CTPAT validated IORs. Whatever the increase in revenue, part of that revenue will be a benefit of the rule, and part will be a transfer. While the increased revenue collected by the U.S. government would come directly from foreign IORs, those foreign IORs could pass on some share of the burden to U.S. individuals through price adjustments. To the extent that the revenue ultimately comes from U.S. individuals, the revenue is a transfer, not a benefit of the rule, as the gain to the U.S. government would equal the loss to the individuals. To the extent that the foreign IORs themselves bear the burden of increased payments to CBP, that share of the increased revenue is a benefit of the rule, as it entails a transfer from foreign entities to the U.S. government. However, revenue aside, the fact that CBP will be more strictly enforcing payments is a benefit in itself. Some IORs are already cooperative in paying what they owe, while other IORs try to avoid paying duties and other obligations. Hence, without strict enforcement, the cooperative IORs are at a disadvantage, especially against foreign IORs with no assets in the United States that try to evade payments. By helping CBP compel foreign IORs to pay duties, penalties, and liquidated damages, the rule will make the playing field more level between U.S. and foreign IORs.

The rule will help CBP with the collection of payments from foreign IORs because more foreign IORs will be using CTPAT validated brokers, who are more knowledgeable about their clients than non-CTPAT validated brokers are.[45] Foreign shell companies are

[44] Source: U.S. Customs and Border Protection, *Importers,* accessed August 20, 2025. Available at: *https://www.cbp.gov/border-security/ports-entry/cargo-security/ctpat/importers.*

[45] Some foreign IORs will become CTPAT validated themselves, which would also help with revenue collection, but this effect will be limited to a fraction of Canadian IORs, who are the only foreign IORs eligible for CTPAT validation.

particularly difficult for CBP to collect revenue from because they can disappear and reappear later with a new name and contact information. However, CTPAT validated brokers have additional information on their clients besides the bare contact information, as the CTPAT minimum security criteria require CTPAT validated brokers to screen new business partners and monitor current partners. The minimum security criteria suggest the following to CTPAT validated brokers as vetting elements that can help determine if a company is legitimate: verifying the company's business address and how long it has been at that address; conducting research on the internet on both the company and its principals; checking business references; and requesting a credit report.[46] CBP could request this information from the brokers if the foreign IOR gave it to them. Alternatively, if the foreign IOR refuses to give any information to CTPAT validated brokers for screening purposes, then the brokers may refuse to do business with the foreign IOR, which, under the rule, would prevent the foreign IOR from importing.

Besides increasing CBP's collection of revenue, the rule could also help prevent the shipment of prohibited goods to the United States. The number of seizures per million entries is over five times larger for non-CTPAT validated foreign IORs (6.38) than CTPAT validated foreign IORs (1.14). By requiring foreign IORs to either become CTPAT validated or use a CTPAT validated broker, the rule will increase transparency into foreign IORs' operations, making it more difficult for bad actors to export prohibited goods to the United States.

Table 9: Foreign IORs' Seizures per Million Entry Summaries

CTPAT Status	Seizures per Million Entry Summaries
Non-CTPAT validated	6.38
CTPAT validated	1.14

Source: Based on trade data from October 1, 2020, to February 6, 2026, from ACE and seizure data from SEACATS, obtained on February 17, 2026.

The rule will also help to keep the supply chain safer from terrorist threats. Under the rule, more brokers will choose to become CTPAT validated so that they can continue serving non-CTPAT validated foreign IORs, and some foreign IORs may choose to become CTPAT validated so that they are not required to hire a CTPAT validated broker, though only foreign IORs that are Canadian are currently eligible for CTPAT validation. The increase in CTPAT validated entities will make the supply chain safer because an entity seeking CTPAT validation must work with CBP to identify security gaps and implement specific security measures and best practices. If the entity does not meet the minimum security criteria, CBP will recommend that the company address specific weaknesses as a condition to obtain CTPAT validation. The entity must also develop an internal validation process that preserves the security measures documented in its supply chain security profile. Therefore, entities that become CTPAT validated will make their supply chains less vulnerable to intrusion by terrorists or terrorist organizations. Besides increasing the number of CTPAT validated entities, the rule will also make the supply chain more secure by causing more non-CTPAT foreign IORs to use CTPAT validated brokers. One of the minimum security criteria for CTPAT validated customs brokers is that personnel ''must review the information included in import/export documents to identify or recognize suspicious cargo shipments.'' CTPAT validated brokers are therefore more vigilant than non-CTPAT validated brokers with regard to the cargo that their clients are importing.

Costs

CBP

The increased participation in CTPAT under the rule will result in costs to CBP. When a company applies for CTPAT validation, CBP must review the company's application and security profile. If CBP certifies the company, CBP then conducts a validation to verify that the company's stated security measures are implemented. This process may include interviews, document review, and site visits to domestic or foreign locations. During a site visit, CBP supply chain security specialists (SCSS) review in detail the entity's import supply chain security procedures to determine whether the security procedures in place meet CTPAT standards. The SCSS later document their findings from the visit in a validation report. Even after a company receives CTPAT validation, CBP continues to incur costs from the company's CTPAT participation, such as the costs of revalidation. CBP estimates that the increase in CTPAT participation will result in costs to CBP totaling $10.9 million, including the costs of additional staffing, travel, equipment, and automation.[47] For this analysis, CBP assumes that the $10.9 million will be spread evenly across the regulatory period, implying an annual cost of $1.09 million per year.

The rule will also result in programming costs for CBP. Under the rule, CBP Forms 3461 and 7501 and their electronic equivalents will need to be updated to include two checkboxes. One checkbox would be checked if the broker is acting as the IOR on behalf of the principal on the power of attorney, with a field for identifying the principal by IOR number or other identifier tied to CBP Form 5106. The second

[46] Source: U.S. Customs and Border Protection, *Minimum Security Criteria—U.S. Customers Brokers,* accessed August 20, 2025. Available at: *https://www.cbp.gov/sites/default/files/assets/documents/2022-May/CTPAT%20U.S.%20Customs%20Brokers%20MSC%20October%202021%20%28508%29.pdf.*

[47] Source: cost estimate obtained from CBP Office of Field Operations on August 24, 2026.

checkbox would be checked if the IOR (or principal, if the broker is acting as the IOR on behalf of the principal) is a U.S. IOR. CBP estimates that making these updates will result in programming costs of $1,222,871 for the government.[48] For this analysis, CBP assumes that the programming costs will be incurred in the first year of the regulatory period, 2027. Combining the programming costs with the costs of increased CTPAT participation, the total costs to CBP under the rule will equal an estimated $12,122,871. Under a discount rate of 3%, the annualized costs to CBP are $1,229,182 per year. In addition to these quantified costs, CBP will also incur time costs from enforcing the rule. When investigating a particular IOR claiming to be a U.S. IOR, CBP may ask the broker to supply documentation from the IOR to prove the IOR is a U.S. IOR. Obtaining and verifying this documentation will carry a time burden for CBP.

Finally, CBP will incur costs from processing brokers' delayed compliance requests in the first year of the rule. When the rule is published, brokers will have 60 days after the publishing date to verify that their clients claiming to be U.S. IORs are indeed U.S. IORs. Brokers that expect to have difficulty meeting this deadline may submit a Broker Delayed Compliance Request Form, containing the broker's identifying information along with the reason the broker is requesting an extension. If CBP approves the form, the broker will have 6 months instead of 60 days after the publication date to verify its clients and thereby come into compliance with the rule. CBP expects that all 2,600 currently permitted brokers will submit a form and that the average time burden for CBP to process a form will be 0.5 minutes. Hence, the total time burden for CBP to process Broker Delayed Compliance Request Forms will be 21.67 hours. The average hourly wage of a CBP Trade and Revenue employee is $95.34.[49] Therefore, the cost of CBP's time burden of processing the forms would be $2,066.

Brokers

Non-CTPAT Validated Brokers

Under the rule, brokers that are not CTPAT validated will no longer be allowed to make entry for foreign IORs that are not CTPAT validated. This restriction will lead to a decrease in customers for those brokers, but CBP does not count those brokers' loss of business as a cost to society. CBP assumes non-CTPAT validated foreign IORs will switch to using CTPAT validated brokers and that the non-CTPAT validated brokers' loss will therefore equal the CTPAT validated brokers' gain. Thus, from a societal perspective, the shift in clients from some brokers to others is a transfer, not a cost, of the rule. CBP discusses this effect further in the Transfers section below.

Under the rule some non-CTPAT validated brokers will seek to become CTPAT validated and will incur costs in doing so. The costs of CTPAT validation do not come in the form of any fees that the applicants have to pay to CBP, but rather in the additional labor hours it takes for the applicants to complete the validation process and to meet and maintain the high standards of security required of CTPAT validated companies. Becoming and remaining CTPAT validated generally requires a company to apply to CBP's CTPAT program, implement the applicable minimum security criteria, complete a security profile, train personnel, maintain program eligibility and participate in CBP validation and revalidation activities.

Broadly, the minimum security criteria for CTPAT validation require a company to assess security risks across its international supply chain, including business partners, facilities, conveyances, cargo handling, personnel, cybersecurity, and procedural controls. To manage these risks, the company must vet and monitor relevant supply chain partners and encourage or require appropriate security practices. The company must keep its security profile current, address identified weaknesses, and cooperate with CBP reviews, validations, and revalidations. To ensure that its business practices will continue to meet the minimum security criteria, the company must maintain a documented supply chain security program aligned to CTPAT minimum security criteria for its business type.

After reviewing the minimum security criteria, an applicant for CTPAT validation must submit an application through the CTPAT portal and provide required company and supply chain information. The applicant then completes and submits a detailed security profile describing how the company meets CTPAT criteria. CBP reviews the application and security profile. If accepted, the company may receive certified status before validation, depending on the business type and CBP review. CBP then conducts a validation to verify that the company's stated security measures are implemented. This process may include interviews, document review, and site visits to domestic or foreign locations. If CBP identifies gaps, the company must take corrective action within required timeframes. To maintain CTPAT validation, the company must update its profile as operations change, perform periodic reviews, maintain records, and participate in CBP revalidation, typically on a recurring cycle.

CBP does not currently charge a direct application or membership fee for CTPAT participation. However, companies seeking CTPAT validation should expect indirect costs, which may include: staff time to prepare the application, security profile, risk assessments, and documentation; security upgrades, such as facility access controls, seals, cargo tracking, lighting, fencing, CCTV, cybersecurity controls, or personnel screening procedures; training for employees and relevant business partners; travel or hosting costs associated with validation or revalidation visits; consultant or third-party support costs, if the company chooses to use outside assistance; and ongoing program management costs to monitor partners, update procedures, maintain documentation, and respond to CBP findings. The companies that will choose to seek CTPAT validation under the rule will include foreign IORs and U.S. brokers.

CTPAT validation is not a one-time event but an ongoing supply chain security commitment. Therefore, being CTPAT validated entails both the upfront cost to become CTPAT validated and the recurring cost to maintain the high security standards. CBP estimates that the average time burden of applying for CTPAT validation is 20 hours.[50] Based on an hourly wage of $38.88,[51] CBP estimates

[48] Source: obtained from CBP Trade Transformation Office on August 27, 2026.

[49] CBP bases this wage on the FY 2025 salary and benefits of the national average of CBP Revenue Positions. Source: Email correspondence with CBP's Office of Finance on June 11, 2026.

[50] U.S. Customs and Border Protection. *Supporting Statement for Paperwork Reduction Act Submission OMB Number 1651–0077: Customs-Trade Partnership against Terrorism (CTPAT) and Trade Compliance.*

[51] To calculate this loaded wage rate CBP multiplied the Bureau of Labor Statistics' (BLS) 2025 median hourly wage rate for Cargo and Freight Agents ($25.13), which CBP assumes best represents the wage for brokers, by the ratio of BLS' Q4 2025 total compensation to wages and salaries for Office and Administrative Support occupations (1.497), the assumed occupational group for brokers, to account for non-salary employee benefits, ($37.62 in 2025 dollars). To adjust to 2026 dollars, CBP assumes an annual increase of 3.36% based on the December 2025 12-month percent change in the Employment Cost Index. Source of median wage rate: U.S. Bureau of Labor Statistics. Occupational Employment and Wage Statistics, 2025 National Occupational Employment and Wage Estimates United States, OCC_code 43–5011.

that the average cost of this time burden equals $777.60. Though CBP can estimate the average application cost, it cannot quantify the total cost of CTPAT validation applications under the rule because CBP cannot predict the number of applications that would be made. Regarding post-application costs, CBP is unable to quantify the costs of maintaining high security standards after the application but believes these costs could be significant for the brokers that choose to become CTPAT validated. Some brokers have more clients or deal with more complex supply chains than others, and these differences could create significant differences across brokers in the amount of labor required to maintain high security standards, which makes quantification difficult. Brokers may recover some of these costs from their clients in the form of higher fees for services. Hence, the rule could lead to higher broker fees as newly validated CTPAT brokers pass at least a portion of the costs on to their clients.

The number of non-CTPAT validated brokers is shown in Table 10. From October 1, 2020, to February 6, 2026, 1,401 non-CTPAT brokers served a foreign IOR. Some of those brokers may be motivated to become CTPAT validated as a result of this rule. There are also 28 brokers that are CTPAT certified but not CTPAT validated, and the additional cost of becoming CTPAT validated for them is probably much smaller than for the non-CTPAT brokers.

Table 10: Number of Active Brokers

CTPAT Status	Number of Active* Brokers	Number of Active* Brokers That Filed Entries for Foreign IOR
Validated	643	622
Certified	29	28
Non-CTPAT	2,428	1,401
Non-CTPAT validated's share	79%	70%

*Brokers were counted as active if they submitted any entry summaries between October 1, 2020, and February 6, 2026.
Source: Based on trade data from October 1, 2020, to February 6, 2026, from ACE, obtained on February 17, 2026.

Brokers Who Serve U.S. IORs

All brokers, both CTPAT validated and non-CTPAT validated, who serve U.S. IORs will incur additional costs under the rule because those brokers will need to obtain records from the U.S. IORs to confirm their domestic status. Such records may include, but are not limited to, proof of citizenship or lawful permanent residence, corporate charters, financial statements, purchase receipts, or documents of title. If circumstances suggest the IOR may be orchestrating U.S. assets simply for purposes of attaining U.S. IOR status without an intention for those assets to remain in the United States, then the broker should ask additional follow-up questions and request additional information. Ultimately, if the broker's concerns are not allayed, it should refuse to certify or re-certify the IOR as a U.S. IOR. The brokers will also need to present the documentation they obtain from U.S. IORs to CBP upon request. Therefore, brokers will be required to retain the documents for 5 years from the date the verification is conducted so that the information will be accessible to CBP when debt arises. All brokers are U.S.-based, per CBP regulations.[52]

As shown in Table 11, almost 1 million U.S. IORs were active between October 1, 2020, and February 6, 2026. These U.S. IORs made up the majority of IORs and were responsible for the majority of entries. Table 12 shows that there are 323 U.S. IORs per broker, meaning that the average broker will have to obtain documentation for about 323 IORs as a result of the rule. CBP cannot estimate the cost of collecting and maintaining this documentation but believes these costs could be substantial. The precise cost is difficult to quantify because there will be large variation in how long it takes brokers to verify that their U.S. IOR clients are U.S. IORs. An IOR can qualify as a U.S. IOR based either on its beneficial owners' status or on the IOR's U.S. assets, and some IORs will have more complex corporate structures or asset holdings than others. Therefore, providing documentation of one's status as a U.S. IOR to a broker will be straightforward for some IORs and laborious for others.

As discussed above, brokers will be required to verify their U.S. clients' status as U.S. IORs within 60 days of the rule's publication date, but they may submit a Broker Delayed Compliance Request Form to request an extension. If CBP approves the request, the broker will have 6 months after the rule's publication date to verify its clients. CBP estimates that the average time burden to submit the form will be 20 minutes and that all 2,600 currently permitted brokers will submit a form.[53] The total time burden will therefore be 866.67 hours. At an average hourly wage of $38.88, the cost of this time burden will equal $33,696.

Finally, two checkboxes and a field to provide the IOR number of the principal, if applicable, will be added to CBP Form 3461, CBP Form 7501, and their electronic equivalents. However, CBP expects the cost of simply checking the boxes and entering the IOR number of the principal to be negligible, as discussed in the PRA section below.

Updated May 15, 2026. Available at *https://www.bls.gov/oes/special-requests/oesm25nat.zip*. Accessed May 21, 2026. The total compensation to wages and salaries ratio is equal to the total compensation cost per hour worked for Office and Administrative Support occupations ($37.47) divided by the wages and salaries cost per hour worked for the same occupation category ($25.03). See ''Table 2. Employer Costs for Employee Compensation for civilian workers by occupational and industry group.'' Importers of Record

All IORs Who Use Brokers

The rule could increase the workload for CTPAT validated brokers, since some foreign IORs will need to switch from their current non-CTPAT validated broker to a CTPAT validated broker. If CTPAT validated brokers struggle to take on so many new clients in a short period of time, then IORs of all kinds could be negatively affected. CBP therefore examined whether CTPAT validated brokers are likely to have the capacity to handle the additional workload under the rule. Based on entry summary statistics, CBP expects that CTPAT validated brokers will be able to accommodate the new demand for their services, even in the short term, because foreign IORs make up a relatively small portion of the overall trade volume. The top row of Table 13 shows the number of non-CTPAT validated foreign IORs who did not use a CTPAT validated broker, as well as the number and value of entry summaries made by those IORs. The next two rows show those figures as a percentage of all foreign IORs and as a percentage of all IORs, respectively. About a third of foreign IORs are non-CTPAT validated IORs who use non-CTPAT validated brokers, meaning the rule will affect a significant share of foreign IORs. However, only 16% of IORs are foreign. Therefore, the share of all IORs who are non-CTPAT validated participants and use non-CTPAT validated brokers is much smaller than a third. As shown in the bottom row, these IORs make up only 5.4% of the total market and are responsible for 2.6% of entry summaries. Table 14 shows the number and share of IORs who used CTPAT validated brokers, as well as the number and value of the entry summaries. Using the numbers in these two tables, CBP estimated the percentage increase in broker services for CTPAT validated brokers if all of the non-CTPAT validated foreign IORs that currently use non-CTPAT validated brokers switch to CTPAT validated brokers under the rule. In that scenario, CTPAT validated brokers would see a 9.3% increase in clients and a 3.1% increase in the number of entries. If this increase in the quantity demanded for broker services were to be distributed evenly across all CTPAT validated brokers, CBP expects that the brokers would not have much difficulty handling the increase in business. Therefore, the overall broker market will probably be able to provide the same total amount of broker services under the rule as in the baseline. The relative increase in revenue for CTPAT validated brokers will most likely be close to the relative increase in entries handled by them, which is an estimated 3.1%. All brokers that do U.S. customs business are U.S.-based.

Non-CTPAT Validated Foreign IORs Using Non-CTPAT Validated Brokers

CBP expects that non-CTPAT validated foreign IORs using non-CTPAT validated brokers in the baseline will switch to a CTPAT validated broker under the rule. While there are plenty of CTPAT validated brokers available, this switch will not be frictionless. Each IOR will probably research different CTPAT validated brokers and perhaps contact several of them to get quotes for services. This process of searching for a new broker will take time. Moreover, these CTPAT validated brokers will have stricter information requirements for their customers than non-CTPAT validated brokers do, on average. CBP assumes that some if not most of the cost of the extra work done by the CTPAT validated brokers to maintain CTPAT compliance is passed on to the customers in the form of higher broker fees. Therefore, most of the cost of the extra work will fall on the IORs, and these costs will equal the difference between the new rates charged by the CTPAT validated brokers and the old rates charged by the non-CTPAT validated brokers, though CBP lacks an estimate for this rate difference.

There may also be foreign IORs under the rule that decide to apply for CTPAT validation so that they are not required to hire a CTPAT-validated broker, though only foreign IORs that are Canadian are currently eligible for CTPAT validation. Becoming and remaining CTPAT validated generally requires a company to apply to CBP's CTPAT program, implement the applicable minimum security criteria, complete a security profile, and participate in CBP validation and revalidation activities. While there is no fee charged for participation in the CTPAT program, obtaining CTPAT validation entails many indirect costs, which are discussed in more detail above in the subsection regarding the costs of the rule to non-CTPAT validated brokers. Per the discussion above, the cost of the average time burden of applying for CTPAT validation is $777.60,[54] but CTPAT validation entails post-application time burdens of maintaining high security standards as well.

U.S. IORs

Just as the brokers for U.S. IORs will incur the cost of obtaining documentation from U.S. IORs proving their U.S. residence, the U.S. IORs will incur the cost of gathering and providing the documentation to the brokers and keeping records afterward. While CBP is unable to estimate this cost, it could be substantial on aggregate. From October 1, 2020, to February 6, 2026, there were almost 1 million U.S. IORs who made entry. These IORs were 84.2% of IORs and responsible for 85.2% of entry summaries, as shown in the table below.

Table 16: Entry Summary Statistics for U.S. IORs

	IORs	Entry Summaries
Count	999,938	202,395,488
Share of all IORs	84.2%	85.2%

Source: Based on trade data from October 1, 2020, to February 6, 2026, from ACE, obtained on February 17, 2026.

[54] CBP assumes that IORs have the same average wage as brokers, and therefore the average value of the time burden would be the same for both parties.

Transfers

Under the rule, non-CTPAT validated foreign IORs who were previously using non-CTPAT validated brokers will need to switch to CTPAT validated brokers to continue importing into the United States. This movement in clients will result in a decrease in revenue for non-CTPAT validated brokers and an increase in revenue for CTPAT validated brokers. Any increased revenue received by CTPAT validated brokers would therefore constitute a transfer from non-CTPAT validated brokers. CBP discusses that transfer in this section.

As shown in Table 17, non-CTPAT validated brokers make up 79% of brokers that have filed an entry summary and 70% of brokers that have filed an entry summary for a foreign IOR.

Table 17: Number of Active Brokers

CTPAT Status	Number of Active Brokers	Number of Active Brokers That Filed Entries for Foreign
Validated	643	622
Non-CTPAT validated	2,457	1,429
Non-CTPAT validated's share of total	79%	70%

Note: We counted brokers as active if they filed an entry summary between October 1, 2020, and February 6, 2026. Source: Based on trade data from ACE, obtained on February 17, 2026.

Table 18 shows the number of IORs with entry summaries facilitated by non-CTPAT validated brokers, as well as the number of such entry summaries and their value. Though non-CTPAT validated brokers make up a majority of brokers, they are responsible for only 17.2% of entry summaries. Combining Table 18 and Table 13 from the Costs Section, CBP calculates that, overall, non-CTPAT validated brokers will see a decrease in clients of 12.5% and a decrease in entry summaries of 15.0%.

Table 18: Entry Summary Statistics for IORs Facilitated by Non-CTPAT Validated Brokers, October 1, 2020, to February 6, 2026

	IORs	Entry Summaries	Entry Summary Value
Total Amount	506,881	40,850,898	$4,715,794,152,360
Share of all IORs	42.7%	17.2%	26.7%

The negative effect of the rule on non-CTPAT validated brokers will not be evenly distributed. Some non-CTPAT validated brokers serve mostly U.S. IORs and will therefore not lose many clients under the rule, while other brokers get a larger share of their business from foreign IORs and will see a larger reduction in clients. To estimate the distribution of the rule's impact on non-CTPAT validated brokers, CBP took a random sample of 300 non-CTPAT brokers who made an entry summary between September 1, 2025, and February 6, 2026.[55] [56] For each broker, CBP calculated the share of the broker's clients that were foreign IORs, the share of entry summaries that were for foreign IORs, and the share of entry summary value for foreign IORs. For each of these three variables, CBP took the 1st through 9th deciles, plus the 95th, 98th, and 99th percentiles. These distribution statistics are shown in Table 20. The total number of active non-CTPAT validated brokers is 2,428, and CBP estimates in the second column the total number of brokers that are at or above the percentile in the first column.

[55] September 1 was chosen as the start because it was shortly after the *de minimis* exemption was suspended, which may have had an effect on demand for broker services.

[56] Choosing a sample size of 300 allowed us to construct a 95% confidence interval of the share of brokers for whom at least a fifth of their clients are foreign IORs with a margin of error of less than 5 percentage points. CBP calculates this share in the sample to be 9.47%, with a margin of error of 4.32%, yielding a 95% confidence interval of (13.34%, 21.99%). However, the main focus in this subsection is on the distribution of the share of IOR clients who are foreign across brokers, rather than a single proportion.

Looking at the 50th percentile in Table 20, one sees that more than half of non-CTPAT brokers rely very little on foreign IORs. These brokers will not be seriously affected by the rule. Further down the table, non-CTPAT brokers in the 90th percentile get about a quarter of their business from foreign IORs. CBP estimates that 243 brokers are at or above this level of reliance on foreign IORs as clients. Finally, the 2% of brokers (or approximately the top 50) who get the greatest share of business from foreign IORs file 72% of their entry summaries for foreign IORs. Under the rule, these brokers will need to either downsize significantly, find a new client base, or become CTPAT validated, which takes time. Once again, their loss will equal the CTPAT validated brokers' gain. As shown in Table 22 (borrowed from Table 14 in the Costs Section), CTPAT validated brokers will see an estimated increase of 3.1% in their entry summaries under the rule. The overall percentage increase for CTPAT validated brokers will be smaller than the percentage decrease for non-CTPAT validated brokers, as the former do more business in the baseline.

Table 20: Sample Distribution of Non-CTPAT Brokers' Share of Business from Foreign IORs.

Percentile	Estimated Number of Brokers at or above Percentile	Foreign IORs' Share of Brokers' IOR Clients	Foreign IORs' Share of Brokers' Total Entry Summaries	Foreign IORs' Share of Brokers' Total Entry Summary Value
10	2,185	0%	0%	0%
20	1,942	0%	0%	0%
30	1,700	0%	0%	0%
40	1,457	0%	0%	0%
50	1,214	3%	1%	0%

Because the rule will improve CBP's ability to collect duties, penalties, and liquidated damages, the U.S. government will see some increase in revenue under the rule. The increase in government revenue will be in the form of payments made by foreign IORs. However, these foreign IORs will not necessarily shoulder the entire burden of the payments. Through price changes, the foreign IORs could offload some of the burden of these payments onto the U.S. individuals that buy from them. To the extent that U.S. individuals bear some of the burden of increased payments, the increase in revenue will be a transfer, not a benefit of the rule, as the gain to the U.S. government will equal the loss to the U.S. consumers. To the extent that the foreign IORs themselves bear the burden of the increased payments, that increased revenue to the U.S. government is a benefit, as the gain to the U.S. government would be coming from foreign entities.

Net Effect

The net effect of the rule is the difference between the total benefits and the total costs. In this analysis, CBP quantified the populations affected by the rule and discussed the effects of the rule qualitatively, but CBP lacked the information needed to estimate quantitatively either the total benefits or total costs of the rule. Therefore, CBP is unable to calculate the quantified net impact of the rule. In qualitative terms, the benefits of the rule will be to make CBP better positioned to collect revenue and penalties from foreign IORs and to prevent the importation of prohibited goods by foreign IORs. Revenue collection and screening of prohibited goods will improve because CBP will have more visibility into foreign IORs once they become CTPAT validated or begin using CTPAT validated brokers. The costs of the rule will be incurred by CBP, IORs, and brokers. CBP will incur a time cost from enforcing the rule, along with $12.2 million in costs resulting from programming updates, increased CTPAT participation, and processing brokers' requests for delayed compliance. Foreign IORs who are not CTPAT validated and who do not use a CTPAT validated broker will no longer be allowed to enter imported merchandise for consumption. These IORs will have to incur the cost of switching to a CTPAT validated broker and will likely bear the cost of the stricter informational standards set by CTPAT validated brokers, with this cost passed on to the IORs in the form of higher broker fees. In the long run, some of these foreign IORs may join CTPAT and become validated participants in the program, which is free to join but involves indirect costs to meet the requirements of the program, such as additional labor. The IORs who need to find new brokers will not be the only ones affected by the rule. U.S. IORs and the brokers who serve them will face the paperwork burden of proving that they are U.S. IORs. These IORs will need to provide documentation of their domestic status to the brokers, who will store the documentation and present it to CBP when asked for it. Non-CTPAT validated brokers will see a reduction in clients as foreign IORs shift to using CTPAT validated brokers. This effect is a transfer, not a cost to society, because from a societal perspective the loss to the non-CTPAT validated brokers will be offset by the CTPAT validated brokers' gain.

Alternatives

In this section, CBP discusses two regulatory alternatives that are stricter and an alternative that is less strict than the interim final rule. The first stricter alternative would require not only foreign IORs but also U.S. IORs to be CTPAT validated or use a CTPAT validated broker. This alternative would increase transparency and security in U.S. IORs' operations and save brokers from having to review their clients' records to verify their foreign or U.S. status. However, because U.S. IORs have a physical presence in the country, CBP is already better positioned to enforce payments for U.S. IORs than for foreign IORs. Therefore, the relative improvement in enforcement would not be as large for U.S. IORs as for foreign IORs. Moreover, this stricter alternative would cause greater disruption to U.S. imports than the interim final rule would. From October 1, 2020, to February 6, 2026, only 2.6% of entry summaries were made by foreign IORs that were neither non-CTPAT validated nor using a CTPAT validated brokers, and the interim final rule would only affect the entry summaries in that category.[57] In that same time period, 17.2% of entry summaries were made by foreign or U.S. IORs that were not CTPAT validated or using a CTPAT validated broker. Thus, the stricter regulatory alternative would affect a more significant share of entry summaries. Among active brokers, 78% are non-CTPAT validated and would therefore no longer be able to offer their services until they became CTPAT validated, which is a time intensive task. The share of IORs that would be ineligible to enter merchandise for consumption with their current CTPAT status and broker would increase from 5.4% under the interim final rule to 42.7% under the stricter regulatory alternative. The brokers that are CTPAT validated could have difficulty taking on so many clients. If the ineligible U.S. IORs all switched to CTPAT validated brokers, those brokers would see an increase in their IOR clients of 74.4% and an increase in entry summaries of 20.8%. Due to the higher costs and limited benefit of this scenario, CBP is not pursuing the stricter regulatory alternative.

CBP is considering a second stricter alternative that would prohibit foreign IORs from filing informal entries for consumption, regardless of whether they are a CTPAT member or use a CTPAT member broker. The most common informal entry types for consumption are ET11 entry and postal informal entry. Foreign IORs file approximately 9 percent of ET11 entry summaries and approximately 23 percent of the value of ET11 entry summaries. The practical effect of this stricter alternative would be that importers of informal entries would shift from filing informal entries to filing formal entries. Historically, there has been a difference in the entry requirements for informal entries and formal entries, but CBP is proposing to reduce this difference for ET11 and postal informal entries in a separate rule—CBP is publishing a Notice of Proposed Rulemaking related to Low Value Shipments that would impose stricter entry requirements on ET11 and postal informal entries to more closely match the requirements for formal entry. If that rule becomes effective, there would be little difference in the cost of making formal entry versus ET11 or postal informal entry. Therefore, if, during the final rule for this rulemaking, CBP adopts this stricter alternative, the effects of this alternative on ET11 and postal informal entries would be the additional entry requirements of switching to formal entry during the time period before the Low Value Shipment rule enters into effect. Without knowing the relative timing of future rulemakings, it is impossible to estimate for how long this provision might have costs that are attributable to this rule versus the Low Value Shipments rule. If the Low Value Shipments rule never finalizes, the additional costs to foreign IORs of switching from ET11 or postal informal

[57] Source: Information obtained from ACE on February 17 and March 25, 2026, based on entry summary data between October 1, 2020, and February 6, 2026. ''U.S. IORs'' are IORs with a physical address in the U.S. according to CBP Form 5106.

entry to formal entry would be attributable to this rule. For more information on changes being made to ET11 and postal informal entry, see the analysis for the Low Value Shipments Notice of Proposed Rulemaking.

The less strict alternative would reduce the costs of the interim final rule but also the benefits. In the interim final rule, importers will be required to report whether they are a foreign or U.S. IOR on CBP Form 3461 and CBP Form 7501. Brokers will be expected to obtain documentation from the IORs proving the domestic status of the IOR and to supply this documentation to CBP upon request. The purpose of this new information requirement is to allow CBP to know which IORs are foreign so that CBP can require those foreign IORs to use a CTPAT validated broker if the IOR is not CTPAT validated itself. However, the new information requirement about IORs' domestic status will apply to all brokers, including CTPAT validated brokers. As CTPAT validated brokers will be allowed to make entry for any IOR, foreign or U.S., CBP could waive the new information requirement for CTPAT validated brokers and still be able to implement the rule.

If CTPAT validated brokers did not have to state whether their clients were U.S. or foreign IORs, then those brokers would not have to obtain documentation proving the domestic status of their clients that are U.S. IORs. This alternative would affect a majority of U.S. IORs, as 56% of U.S. IORs already use CTPAT validated brokers, based on figures in the top row of Table 23. If CTPAT validated brokers did not have to state whether the IOR was a U.S. IOR, then those IORs could avoid the paperwork burden of proving they are U.S. IORs. Furthermore, the bottom row of Table 23 shows that the average CTPAT validated broker serves a much larger number of U.S. IORs than the average non-CTPAT validated broker. Therefore, the change would also limit the burden per broker. Without this proposed alternative, the average CTPAT validated broker would need to obtain documentation of domestic status from 866 U.S. IORs. With the proposed alternative, CTPAT validated brokers would not need to obtain this documentation. Only non-CTPAT validated brokers would need to do so, with the average non-CTPAT validated broker needing to obtain documentation from 180 U.S. IORs.

Table 23: U.S. IOR and Broker Statistics

	All	Using CTPAT validated Broker	Using non-CTPAT validated Broker*
U.S. IORs	999,938	556,667	443,271
Brokers	3,100	643	2,457
U.S. IORs/broker	323	866	180

Source: Information obtained from ACE on February 17 and March 25, 2026, based on entry summary data between October 1, 2020, and February 6, 2026. "U.S. IORs" are IORs with a physical address in the U.S. according to CBP Form 5106.

Note: The third column shows the number of U.S. IORs using CTPAT validated brokers and the number of such brokers. The fourth column shows the number of U.S. IORs using non-CTPAT validated brokers and the number of such brokers.

*CBP's estimate for the number of U.S. IORs using non-CTPAT validated brokers equals the total number of U.S. IORs minus the number of U.S. IORs using CTPAT validated brokers. This estimate therefore assumes that all IORs are using brokers of some kind and that each IOR only uses one broker.

Compared to the main regulatory scenario, this proposed alternative would have the drawback of hampering efforts by CTPAT validated brokers to obtain information about their clients. In the main regulatory scenario, brokers will be required by regulations to ''request and review a client's records establishing that the criteria specified in § 110.2 of this chapter, to be considered a U.S. importer of record, are satisfied. Such records may include, but are not limited to, proof of citizenship or lawful permanent residence, corporate charters, financial statements, purchase receipts, or documents of title.'' Because of this regulatory requirement, brokers will have the leverage to demand this information from their clients. In the alternative version of the rule, a CTPAT validated broker may still want to review a client's detailed records for the purposes of inspecting the supply chain and thereby maintaining its CTPAT validated status. However, if verifying the client's records were not a regulatory requirement for CTPAT validated brokers, then the clients claiming to be U.S. IORs may be reluctant to provide this documentation to the brokers. As a result, CTPAT validated brokers would have less visibility into their clients' supply chain, or the brokers would have to exert more effort to achieve the desired level of visibility.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) (5 U.S.C. 603(b)), as amended by the Small Business Regulatory Enforcement and Fairness Act of 1996 (SBREFA), requires an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of a proposed rule on small entities (*i.e.,* small businesses, small organizations, and small governmental jurisdictions) when the agency is required ''to publish a general notice of proposed rulemaking for any proposed rule.'' Because this rule is being issued as an interim final rule, on the grounds set forth above, a regulatory flexibility analysis is not required under the RFA.

D. Paperwork Reduction Act

The Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3507) requires that CBP consider the impact of paperwork and other information collection burdens imposed on the public. An agency may not conduct, or sponsor, and an individual is not required to respond to, a collection of information unless the collection of information displays a valid Office of Management and Budget (OMB) control number. Implementing this IFR will require both CBP Form 3461 Entry/Immediate Delivery ACE and CBP Form 7501 Entry Summary (and their electronic

equivalents) to include two new checkboxes and a new field. One checkbox would be checked if the broker is acting as the IOR on behalf of the principal on the power of attorney. If the broker checks this box and the broker is not CTPAT validated, then the broker will also fill in a field for identifying the principal by IOR number or other identifier tied to CBP Form 5106. The second checkbox would be checked if the IOR (or principal, if the broker is acting as the IOR on behalf of the principal) is a U.S. IOR.

Customs brokers will also need to obtain documentation from their clients (IORs) proving that they are U.S. IORs. Customs brokers will incur costs in obtaining this information from U.S. IORs and keeping records, and U.S. IORs will also incur costs in gathering and providing the information to the customs brokers and keeping their own records.[58] However, CBP does not expect the time burden for CBP Form 3461, under OMB control number 1651–0024, or CBP Form 7501, under OMB control number 1651–0022, to increase. Once a customs broker has the needed documentation for a U.S. IOR, which is a one-time occurrence for that IOR, there is no additional time burden imposed on the public to submit an additional entry or entry summary form on behalf of the IOR. Furthermore, CBP does not anticipate any additional burden to the public for the time it takes to check the two checkboxes and provide the IOR number of the principal on the power of attorney, if applicable.

Brokers will be able to submit a Broker Delayed Compliance Request Form to request that the deadline to verify their U.S. clients be extended to 6 months after the publication date of this rulemaking. This form is being created for this rule, and the time burden estimates are as follows:

Broker Delayed Compliance Request Form

Estimated Number of Respondents: 2,600.

Estimated Number of Responses: 2,600.

Estimated Time per Response: 20 minutes (0.33 hours).

Estimated Total Annual Burden Hours: 867.

E. Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–38, UMRA) requires each Federal agency to prepare a written statement assessing the effects of any Federal mandate in a proposed rule or final rule for which the agency published a proposed rule, which includes any Federal mandate that may result in a $100 million or more expenditure (adjusted annually for inflation) in any one year by State, local, and tribal governments, in the aggregate, or by the private sector.

A written statement under UMRA is not required unless an agency has published a notice of proposed rulemaking. *See* 2 U.S.C. 1532(a). In addition, an action is exempt from UMRA if it is necessary for national security. *See* 2 U.S.C. 1503(5). As discussed under Section VIII.A., this rule is exempt from notice and comment rulemaking procedures and is necessary for national security. Accordingly, CBP has not prepared a written statement in connection with this rule.

IX. Signing Authority

In accordance with Treasury Order 100–20, the Secretary of the Treasury delegated to the Secretary of Homeland Security the authority related to the customs revenue functions vested in the Secretary of the Treasury as set forth in 6 U.S.C. 212 and 215, subject to certain exceptions. This regulation is being issued in accordance with DHS Delegation 07010.3, Revision 03.2, which delegates to the Commissioner of CBP the authority to prescribe and approve regulations related to customs revenue functions.

Rodney S. Scott, Commissioner, having reviewed and approved this document, has delegated the authority to electronically sign this document to Susan S. Thomas, Executive Assistant Commissioner, Office of Trade, for purposes of publication in the **Federal Register**.

List of Subjects

19 CFR Part 110

Administrative practice and procedure, Importers, Reporting and recordkeeping requirements.

19 CFR Part 111

Administrative practice and procedure, Brokers, Penalties, Reporting and recordkeeping requirements.

19 CFR Part 141

Reporting and recordkeeping requirements.

19 CFR Part 142

Canada, Mexico, Reporting and recordkeeping requirements.

19 CFR Part 171

Administrative practice and procedure, Law enforcement, Penalties, Seizures and forfeitures.

Amendments to the CBP Regulations

For the reasons set forth above, chapter I of title 19, Code of Federal Regulations (19 CFR chapter I), is amended as set forth below:

■ 1. Add part 110 to read as follows:

PART 110—IMPORTERS OF RECORD

Sec.
110.0 [Reserved]

Subpart A—General Provisions

110.1 Definitions.
110.2 U.S. importer of record.
110.3 Foreign importer of record.

Subpart B—[Reserved]

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States), 1484, 1498, 1623, 1624, 4320.

§ 110.0 [Reserved]

Subpart A—General Provisions

§ 110.1 Definitions.

Beneficial owner. The term ''beneficial owner'':

(1) Means, with respect to an entity, an individual who:

(i) Is a natural person; and

(ii) Directly or indirectly, through any contract, arrangement, understanding, relationship, or otherwise—

(A) Exercises substantial control over the entity; or

(B) Owns or controls not less than 25 percent of the ownership interests of the entity; and

(2) Includes circumstances where multiple layers of entity ownership exist between the natural person and the entity, such as a corporation that is owned by another corporation that is owned by a natural person, in which case the natural person is the beneficial owner of the entity despite the layers of entity ownership; and

(3) Does not include:

(i) A minor child, as defined in the State in which the entity is formed or, in the case of an entity that was not formed in the United States, an individual who has not yet attained the age of 18, if the parent or guardian of the minor child meets the definition of a beneficial owner;

(ii) An individual acting as a nominee, intermediary, custodian, or agent on behalf of another individual;

(iii) An individual acting solely as an employee of a corporation, limited liability company, or other similar entity and whose control over or

[58] *See* 19 CFR part 163 for the recordkeeping requirements applicable to IORs, among other persons, listed in section 163.2.

economic benefits from such entity are derived solely from the employment status of the person, provided that such a person is not a senior officer;

(iv) An individual whose only interest in a corporation, limited liability company, or other similar entity is through a right of inheritance; or

(v) A creditor of a corporation, limited liability company, or other similar entity, unless the creditor meets the requirements of paragraph (3)(i) of this definition.

(4) Beneficial ownership can be accomplished through substantial control, ownership interests, or both. Every entity must have at least one beneficial owner. An entity may have multiple beneficial owners.

Physical domestic assets. The term ''physical domestic assets'' means cash deposited in a U.S. bank account, U.S. Treasury bonds, and the following assets when physically located in the United States: real property, inventory, machinery, and/or equipment.

§ 110.2 U.S. importer of record.

(a) *Qualification as U.S. importer of record.* To be considered a U.S. importer of record, a party must be:

(1) An individual who is a United States citizen or lawful permanent resident; or

(2) An entity that meets the following requirements:

(i) The entity must be located in the United States;

(ii) The entity must be organized under the laws of the United States; and

(iii) Either:

(A) At all times, at least 51% of beneficial owner(s) of the entity, as defined in § 110.1, must be United States citizens or lawful permanent residents and have control of the entity; or

(B) The entity must maintain direct ownership of a significant amount of unencumbered real property in the United States at all times.

(b) *Verification.* Whether an individual or entity qualifies as a U.S. importer of record is subject to verification by CBP. The determination of whether an entity qualifies as a U.S. importer of record will vary depending upon the circumstances in each instance. To verify that an entity is located in the United States for qualification as a U.S. importer, CBP will take into account, among other considerations, the size and scale of the overall operations of the entity and whether it is an instrumentality of a foreign manufacturer without a substantial presence in the United States. Criteria that CBP may consider in its discretion and to the extent any are relevant, include, but are not limited to, the following:

(1) Whether the entity's principal place of business is in the United States;

(2) Whether the entity has a physical presence where substantial business transactions are conducted in the United States, including, but not limited to, paying employees, generating revenue, or operating retail locations;

(3) Whether the entity maintains sufficient unencumbered physical domestic assets, as defined in § 110.1;

(4) Whether the entity directly owns a significant amount of unencumbered real property in the United States;

(5) Whether the entity's gross sales generally exceed its cost of goods sold and the entity is structured in a manner that it is anticipated to generate its own profit; and

(6) Whether the entity is sufficiently capitalized.

§ 110.3 Foreign importer of record.

An importer of record who does not meet the criteria to be considered a U.S. importer of record pursuant to § 110.2 is a foreign importer of record.

Subpart B—[Reserved]

PART 111—CUSTOMS BROKERS

■ 2. The general authority citation for part 111 continues to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States), 1624; 1641.

* * * * *

■ 3. Revise § 111.21(a) to read as follows:

§ 111.21 Record of transactions.

(a) Each broker must keep current in a correct, orderly, and itemized manner records of account reflecting all his financial transactions as a broker. He must keep and maintain on file copies of all his correspondence and other records relating to his customs business, including records related to verifications conducted pursuant to § 111.29(a)(2).

* * * * *

■ 4. Revise § 111.23(b) to read as follows:

§ 111.23 Retention of records.

* * * * *

(b) *Period of retention.* The records described in this section, other than powers of attorney, must be retained for at least five years after the date of entry. Records related to a verification conducted pursuant to § 111.29(a)(2) must be retained for five years from the date the verification is conducted. Powers of attorney must be retained until revoked, and revoked powers of attorney and letters of revocation must be retained for five years after the date of revocation or for five years after the date the client ceases to be an ''active client'' as defined in § 111.29(b)(2)(ii), whichever period is later. When merchandise is withdrawn from a bonded warehouse, records relating to the withdrawal must be retained for five years from the date of withdrawal of the last merchandise withdrawn under the entry.

■ 5. In § 111.29, revise the section heading and paragraph (a) to read as follows:

§ 111.29 Diligence in correspondence, paying monies, and verification of U.S. importers of record.

(a) *Due diligence by broker.* Each broker must exercise due diligence in:

(1) Making financial settlements, in answering correspondence, and in preparing or assisting in the preparation and filing of records relating to any customs business matter handled by him as a broker. Payment of duty, tax, or other debt or obligation owing to the Government for which the broker is responsible, or for which the broker has received payment from a client, must be made to the Government on or before the date that payment is due. Payments received by a broker from a client after the due date must be transmitted to the Government within five working days from receipt by the broker. Each broker must provide a written statement to a client accounting for funds received for the client from the Government, or received from a client where no payment to the Government has been made, or received from a client in excess of the Governmental or other charges properly payable as part of the client's customs business, within 60 calendar days of receipt. No written statement is required if there is actual payment of the funds by a broker.

(2) Verifying that a client meets the requirements to be considered a U.S. importer of record prior to making a declaration to CBP pursuant to § 141.22 of this chapter. A broker, prior to filing a declaration on behalf of a client pursuant to § 141.22 of this chapter, must verify that the client meets the requirements to qualify as a U.S. importer of record pursuant to § 110.2 of this chapter. Each broker must request and review a client's records to determine that the criteria to be considered a U.S. importer of record as specified in § 110.2 of this chapter, are satisfied. Such records may include, but are not limited to, proof of citizenship or lawful permanent residence, corporate charters, financial statements

and records, purchase receipts, or documents of title.

* * * * *

PART 141—ENTRY OF MERCHANDISE

■ 6. The general authority citation for part 141 is revised to read as follows:

Authority: 19 U.S.C. 66, 1448, 1484, 1498, 1624, 4320 and 4321.

* * * * *

■ 7. Add §§ 141.21 and 141.22 to read as follows:

§ 141.21 Entry by foreign importer of record.

(a) A foreign importer of record, as defined in § 110.3 of this chapter, may not enter merchandise for consumption except pursuant to the requirements in paragraph (b) of this section. This restriction is applicable to merchandise entered for consumption (§ 141.0a(f)) for which a formal entry is required to be filed or, if an informal entry is filed, for which an informal entry is required to be filed on CBP Form 3461 or CBP Form 7501, or their electronic equivalents.

(b) Entry of merchandise for consumption by a party meeting the qualifications for a foreign IOR, as defined in § 110.3 of this chapter, is restricted to the following:

(1) If the foreign importer of record is validated through the Customs Trade Partnership Against Terrorism (CTPAT) program (6 U.S.C. 961(a)), and has the right to make entry pursuant to § 143.26 of this chapter for informal entry or 19 U.S.C. 1484(a)(2)(B) for formal entry, the foreign importer of record may enter merchandise for consumption or hire a customs broker licensed under 19 U.S.C. 1641 to make entry.

(2) If the foreign importer of record is not validated through the CTPAT program, the foreign importer of record must designate a customs broker licensed under 19 U.S.C. 1641 who is validated through the CTPAT program (6 U.S.C. 961(a)) to make entry or act as the importer of record for the entry. If a customs broker acts as the importer of record for the entry on behalf of a principal on the power of attorney (see § 141.46 of this chapter) who is not an importer of record, and that principal would qualify as a foreign importer of record pursuant to § 110.3 of this chapter, the broker must also be validated through the CTPAT program. The designated customs broker who is validated through the CTPAT program must act as the importer of record for the entry if the principal on the power of attorney (§ 141.46) is not the owner or purchaser of the merchandise

§ 141.22 Entry by U.S. importer of record.

(a) A party meeting the requirements in § 110.2 of this chapter may enter merchandise for consumption, as follows:

(1) A U.S. importer of record who has the right to make entry pursuant to § 143.26 of this chapter for informal entry or 19 U.S.C. 1484(a)(2)(B) for formal entry, and who meets the requirements in § 110.2 of this chapter, may enter merchandise subject to the more specific requirements and procedures set forth elsewhere in this chapter. At the time of filing an entry (§ 141.0a(a)) and entry summary (§ 141.0a(b)), the importer of record must declare its qualification as a U.S. importer of record as defined in § 110.2 of this chapter.

(2) If a party meeting the requirements of § 110.2 of this chapter designates a customs broker licensed under 19 U.S.C. 1641 who is not validated through the Customs Trade Partnership Against Terrorism (CTPAT) program (6 U.S.C. 961(a)) to make entry as the importer of record, at the time of filing the entry (141.0a(a)) and entry summary (141.0a(b)), the customs broker must identify the principal on the power of attorney (§ 141.46) and must declare that the principal would meet the requirements to be considered a U.S. importer of record. In this instance, the principal on the power of attorney must have a CBP Form 5106 on file with CBP, pursuant to § 24.5 of this chapter.

(b) For purposes of a verification conducted pursuant to § 110.2(b) of this chapter of the declaration in paragraph (a) of this section, the decision as to whether an individual or entity qualifies as a U.S. importer of record, as defined in § 110.2 of this chapter, will be made by the appropriate Center Director.

■ 8. Revise § 141.46 to read as follows:

§ 141.46 Power of attorney retained by customhouse broker.

Before transacting customs business on behalf of a principal, to include acting as an importer of record on behalf of the principal, a customs broker is required to obtain a valid power of attorney to do so. The customs broker is not required to file the power of attorney with CBP. Brokers shall retain powers of attorney with their records (§ 111.1), and make them available for examination as provided in subpart C of part 111 of this chapter.

PART 142—ENTRY PROCESS

■ 9. The authority citation for part 142 continues to read as follows:

Authority: 19 U.S.C. 66, 1448, 1484, 1624.

■ 10. In § 142.13, add paragraphs (a)(5) and (e) to read as follows:

§ 142.13 When entry summary must be filed at time of entry.

(a) * * *

(5) Inaccurately declares to CBP, as determined by CBP, that the importer, or principal on the power of attorney where the broker acts as the importer of record, meets the requirements to be considered a U.S. importer of record pursuant to § 141.22 of this chapter.

* * * * *

(e) CBP may impose the requirement in paragraph (a) of this section on importers making entry under the provisions of this part or part 143 of this chapter.

■ 11. In § 142.25, add paragraphs (a)(5) and (c) to read as follows:

§ 142.25 Discontinuance of immediate delivery privileges.

(a) * * *

(5) Inaccurately declares to CBP that the importer, or principal on the power of attorney where the broker acts as the importer of record, meets the requirements to be considered a U.S. importer of record pursuant to § 141.22 of this chapter, as determined by CBP.

* * * * *

(c) CBP may impose the requirement in paragraph (a) of this section on importers making entry under the provisions of this part or part 143 of this chapter.

PART 171—FINES, PENALTIES, AND FORFEITURES

■ 12. The general authority citation for part 171 continues to read as follows:

Authority: 18 U.S.C. 983; 19 U.S.C. 66, 1592, 1593a, 1618, 1624; 22 U.S.C. 401; 31 U.S.C. 5321.

* * * * *

■ 13. In appendix B to part 171, revise section (K) to read as follows:

Appendix B to Part 171—Customs Regulations, Guidelines for the Imposition and Mitigation of Penalties for Violations of 19 U.S.C. 1592

* * * * *

(K) Subject to CBP's discretion, if a customs broker commits a violation of 19 U.S.C. 1592, the customs broker may be subject to a penalty under 19 U.S.C. 1592 or may be subject to any other enforcement action available under the law, including, but

not limited to, the remedies provided under 19 U.S.C. 1641.

* * * * *

Susan S. Thomas,

Executive Assistant Commissioner, Office of Trade, U.S. Customs and Border Protection.

[FR Doc. 2026–22735 Filed 11–5–26; 8:45 am]

BILLING CODE 9111–14–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 571

[Docket No. FDA–2026–F–4956]

Food Additive Petitions; Change of Address

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule; technical amendment.

SUMMARY: The Food and Drug Administration (FDA or the Agency) is amending the regulations for food additive petitions (FAPs) to update addresses and simplify notification procedures. These technical amendments are being made to improve the accuracy of the Agency's regulations and are non-substantive.

DATES: This technical amendment is effective November 6, 2026.

FOR FURTHER INFORMATION CONTACT: Isabel Pocurull, Center for Veterinary Medicine, Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740, 240–402–5877, *Isabel.Pocurull@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: FDA is amending the animal food and drug regulations for food additive petitions (FAPs) at 21 CFR 571.1 to update addresses and Agency notification procedure. This technical amendment is being made to improve the accuracy of the Agency's regulations and is non-substantive.

Publication of this document constitutes final action on the changes under the Administrative Procedure Act (5 U.S.C. 553). FDA has determined that notice and public comment are unnecessary because this amendment to the regulations provides only technical or non-substantive, ministerial changes to update addresses and Agency notification procedure.

List of Subjects in 21 CFR Part 571

Administrative practice and procedure, Animal feeds, Animal food additives, Confidential business information, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 571 is amended as follows:

PART 571—FOOD ADDITIVE PETITIONS

■ 1. The authority citation for part 571 continues to read as follows:

Authority: 21 U.S.C. 321, 342, 348, 371; 42 U.S.C. 241.

■ 2. Amend § 571.1 by:
■ a. Revising paragraph (a);
■ b. In paragraph (c), revising the undesignated text above item A; and
■ c. Revising paragraph (d).

The revisions read as follows:

§ 571.1 Petitions.

(a) Petitions to be filed under the provisions of section 409(b) of the Federal Food, Drug, and Cosmetic Act (the Act) can be submitted using both CVM's eSubmitter program, *https://www.fda.gov/industry/fda-esubmitter/cvm-esubmitter-programs,* to generate the submission and FDA's electronic submission gateway to submit, *https://www.fda.gov/industry/electronic-submissions-gateway-next-generation-esg-nextgen,* or on compact disk with paper cover letter. If any part of the material submitted is in a foreign language, it shall be accompanied by an accurate and complete English translation. The petition shall state petitioner's mailing address and email address to which published notices or orders issued or objections filed pursuant to section 409 of the Act may be sent.

* * * * *

(c) * * *

21 CFR Part 874

[Docket No. FDA–2026–N–12125]

Medical Devices; Ear, Nose, and Throat Devices; Classification of the External Mechanical Stimulator for the Relief of Congestion

AGENCY: Food and Drug Administration, HHS.

ACTION: Final amendment; final order.

SUMMARY: The Food and Drug Administration (FDA) is classifying the external mechanical stimulator for the relief of congestion into class II (special controls). The special controls that apply to the device type are identified in this order and will be part of the codified language for classification of the external mechanical stimulator for the relief of congestion. We are taking this action because we have determined that classifying the device into class II will provide a reasonable assurance of the safety and effectiveness of the device. We believe this action will also enhance patients' access to beneficial innovative devices, in part by reducing regulatory burdens.

DATES: This order is effective November 6, 2026. The classification was applicable on December 4, 2023.

FOR FURTHER INFORMATION CONTACT: Payton Lin, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 1212, Silver Spring, MD 20993–0002, 240–402–6580, *Payton.Lin@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Upon request, FDA (the Agency or we) has classified the external mechanical stimulator for the relief of congestion into class II (special controls), which we have determined will provide a reasonable assurance of the safety and effectiveness of the

device. In addition, we believe this action will enhance patients' access to beneficial innovation, in part by reducing regulatory burdens by placing the device into a lower device class than the automatic class III assignment.

The automatic assignment of class III occurs by operation of law and without any action by FDA, regardless of the level of risk posed by the new device. Any device that was not in commercial distribution before May 28, 1976, is automatically classified into, and remains within, class III and requires premarket approval unless and until FDA takes an action to classify or reclassify the device (21 U.S.C. 360c(f)(1)). We refer to these devices as ''postamendments devices'' because they were not in commercial distribution prior to the date of enactment of the Medical Device Amendments of 1976, which amended the Federal Food, Drug, and Cosmetic Act (FD&C Act).

FDA may take a variety of actions in appropriate circumstances to classify or reclassify a device into class I or II. We may issue an order finding a new device to be substantially equivalent under section 513(i) of the FD&C Act (21 U.S.C. 360c(i)) to a predicate device that does not require premarket approval. We determine whether a new device is substantially equivalent to a predicate device by means of the procedures for premarket notification under section 510(k) of the FD&C Act (21 U.S.C. 360(k)) and part 807 (21 CFR part 807).

FDA may also classify a device through ''De Novo'' classification, a common name for the process authorized under section 513(f)(2) of the FD&C Act (see also part 860, subpart D (21 CFR part 860, subpart D)). Section 207 of the Food and Drug Administration Modernization Act of 1997 (Pub. L. 105–115) established the first procedure for De Novo classification. Section 607 of the Food and Drug Administration Safety and Innovation Act (Pub. L. 112–144) modified the De Novo classification process by adding a second procedure. A device sponsor may utilize either procedure for De Novo classification.

Under the first procedure, the person submits a premarket notification (510(k)) for a device that has not previously been classified. After receiving an order from FDA classifying the device into class III under section 513(f)(1) of the FD&C Act, the person then requests a classification under section 513(f)(2).

Under the second procedure, rather than first submitting a 510(k) and then a request for classification, if the person determines that there is no legally marketed device upon which to base a determination of substantial equivalence, that person requests a classification under section 513(f)(2) of the FD&C Act.

Under either procedure for De Novo classification, FDA is required to classify the device by written order within 120 days. The classification will be according to the criteria under section 513(a)(1) of the FD&C Act. Although the device was automatically placed within class III, the De Novo classification is considered to be the initial classification of the device.

We believe this De Novo classification will enhance patients' access to beneficial innovation, in part by reducing regulatory burdens. When FDA classifies a device into class I or II via the De Novo process, the device can serve as a predicate for future devices of that type, including for 510(k)s (see section 513(f)(2)(B)(i) of the FD&C Act). As a result, other device sponsors do not have to submit a De Novo request or premarket approval application to market a substantially equivalent device (see section 513(i) of the FD&C Act, defining ''substantial equivalence''). Instead, sponsors can use the less burdensome 510(k) process, when necessary, to market their device.

II. De Novo Classification

On June 16, 2023, FDA received Sound Health Systems, Inc.'s request for De Novo classification of the Sonu device. FDA reviewed the request in order to classify the device under the criteria for classification set forth in section 513(a)(1) of the FD&C Act.

We classify devices into class II if general controls by themselves are insufficient to provide reasonable assurance of the safety and effectiveness of the device, but there is sufficient information to establish special controls that, in combination with the general controls, provide reasonable assurance of the safety and effectiveness of the device for its intended use (see section 513(a)(1)(B) of the FD&C Act). After review of the information submitted in the request, we determined that the device can be classified into class II with the establishment of special controls. FDA has determined that these special controls, in addition to the general controls, will provide reasonable assurance of the safety and effectiveness of the device.

Therefore, on December 4, 2023, FDA issued an order to the requester classifying the device into class II. In this final order, FDA is codifying the classification of the device by adding 21 CFR 874.6010.[1] We have named the generic type of device ''external mechanical stimulator for the relief of congestion,'' and it is identified as a device that delivers vibrations to the sinus and nasal areas to relieve congestion.

FDA has identified the risks to health associated with this type of device and the measures required to mitigate these risks in table 1.

TABLE 1—RISKS TO HEALTH AND MITIGATION MEASURES FOR EXTERNAL MECHANICAL STIMULATORS FOR THE RELIEF OF CONGESTION

Identified risks to health	Mitigation measures
Injury from mechanical overstimulation on the face causing one or more of the following: • Skin irritation or redness • Pain • Discomfort • Headache • Vertigo • Hearing loss • Tinnitus	Non-clinical performance testing; Human factors testing; Software verification, validation, and hazard analysis; Electrical safety testing; Electromagnetic compatibility testing; Battery safety testing; and Labeling.

[1] FDA notes that the ''ACTION'' caption for this final order is styled as ''Final amendment; final order,'' rather than ''Final order.'' Beginning in December 2019, this editorial change was made to indicate that the document ''amends'' the Code of Federal Regulations. The change was made in accordance with the Office of Federal Register's (OFR) interpretations of the Federal Register Act (44 U.S.C. chapter 15), its implementing regulations (1 CFR 5.9 and parts 21 and 22), and the Document Drafting Handbook.

TABLE 1—RISKS TO HEALTH AND MITIGATION MEASURES FOR EXTERNAL MECHANICAL STIMULATORS FOR THE RELIEF OF CONGESTION—Continued

Identified risks to health	Mitigation measures
Adverse tissue reaction	Biocompatibility evaluation.
Ineffective treatment leading to worsening congestion	Labeling.

FDA has determined that special controls, in combination with the general controls, address these risks to health and provide reasonable assurance of the safety and effectiveness of the device. For a device to fall within this classification, and thus avoid automatic classification in class III, it would have to comply with the special controls named in this final order. The necessary special controls appear in the regulation codified by this final order.

Under the FD&C Act, submission of a premarket notification under section 510(k) is required to reasonably assure the safety and effectiveness of class II devices unless FDA determines that the device type should be exempt under section 510(m) of the FD&C Act. At this time FDA has not made this determination for external mechanical stimulators for the relief of congestion. This device is therefore subject to premarket notification requirements under section 510(k) of the FD&C Act.

III. Analysis of Environmental Impact

We have determined under 21 CFR 25.34(b) that this action is of a type that does not normally have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

IV. Paperwork Reduction Act of 1995

This final order establishes special controls that refer to previously approved collections of information found in other FDA regulations and guidance. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521). The collections of information in part 860, subpart D, regarding De Novo classification have been approved under OMB control number 0910–0844; the collections of information in 21 CFR part 814, subparts A through E, regarding premarket approval have been approved under OMB control number 0910–0231; the collections of information in part 807, subpart E, regarding premarket notification submissions have been approved under OMB control number 0910–0120; the collections of information in 21 CFR part 820 regarding quality management system regulation have been approved under OMB control number 0910–0073; and the collections of information in 21 CFR part 801 regarding labeling have been approved under OMB control number 0910–0485.

List of Subjects in 21 CFR Part 874

Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 874 is amended as follows:

PART 874—EAR, NOSE, AND THROAT DEVICES

■ 1. The authority citation for part 874 continues to read as follows:

Authority: 21 U.S.C. 351, 360, 360c, 360e, 360j, 360l, 371.

■ 2. Add § 874.6010 to subpart F to read as follows:

§ 874.6010 External mechanical stimulator for the relief of congestion.

(a) *Identification.* An external mechanical stimulator for the relief of congestion delivers vibrations to the sinus and nasal areas to relieve congestion.

(b) *Classification.* Class II (special controls). The special controls for this device are:

(1) Non-clinical performance testing must demonstrate that the device performs as intended under anticipated conditions of use, including verification of specified mechanical stimulation parameters.

(2) Performance data must demonstrate the electromagnetic compatibility, battery safety, and electrical safety of the device.

(3) Software verification, validation, and hazard analysis must be performed.

(4) The patient-contacting components of the device must be demonstrated to be biocompatible.

(5) Human factors testing must demonstrate that users can successfully use the device in the intended use environment based solely on its labeling and instructions for use.

(6) Labeling must include the following:

(i) Device specifications, including the frequency range, maximum output power, and power source; and

(ii) Explanation of the user interface.

Grace R. Graham,

Deputy Commissioner for Policy, Legislation, and International Affairs.

[FR Doc. 2026–22657 Filed 11–5–26; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1308

[Docket No. DEA–1768]

Specific Listing for 3-Chloromethcathinone, A Currently Controlled Schedule I Substance

AGENCY: Drug Enforcement Administration, Department of Justice.

ACTION: Final rule.

SUMMARY: The Drug Enforcement Administration (DEA) is establishing a specific listing and DEA Controlled Substances Code Number (drug code) for 1-(3-chlorophenyl)-2-(methylamino)propan-1-one (3-chloromethcathinone; 3–CMC) in schedule I of the Controlled Substances Act (CSA). Although 3-chloromethcathinone is not specifically listed in schedule I of the CSA with its own unique drug code, it is a schedule I controlled substances in the United States because it is a positional isomer of 4-chloromethcathinone, which is a schedule I hallucinogen. Therefore, DEA is simply amending the schedule I hallucinogenic substances list in its regulations to separately include 3-chloromethcathinone.

DATES: Effective November 6, 2026.

FOR FURTHER INFORMATION CONTACT: Dr. Terrence L. Boos, Drug and Chemical Evaluation, Diversion Control Division, Drug Enforcement Administration; Telephone: (571) 362–3249.

SUPPLEMENTARY INFORMATION:

3-Chloromethcathinone Control

3-Chloromethcathinone (also known as, 1-(3-chlorophenyl)-2-(methylamino)propan-1-one; and 3–CMC) is a chemical substance that is structurally related to 4-chloromethcathinone (also known as, 1-

(4-chlorophenyl)-2-(methylamino)propan-1-one; and 4–CMC). 4-Chloromethcathinone is listed as a hallucinogenic substance in schedule I at 21 CFR 1308.11(d)(106). As stated in subsection 21 CFR 1308.11(d), a listed hallucinogenic substance includes ''any of its salts, isomers, and salts of isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation,'' and the term ''isomer'' includes the ''optical, position[al], and geometric isomers.''

When compared to the chemical structure of 4-chloromethcathinone, 3-chloromethcathinone meets the definition of a ''positional isomer'' in 21 CFR 1300.01(b), which cross-references the term ''positional isomer'' in 21 CFR 1308.11(d). Both 4-chloromethcathinone and 3-chloromethcathinone possess the same molecular formula and core structure, and they have the same functional groups. 4-Chlorometh cathinone and 3-chloromethcathinone differ from one another by the position of the chloride atom on the same functional group (phenyl ring). This does not create new chemical functionalities or destroy existing chemical functionalities. Accordingly, under 21 CFR 1308.11(d), 3-chloro methcathinone, as a positional isomer of 4-chloromethcathinone, has been and continues to be a schedule I controlled substance.[1]

Legal Authority

This rule is prompted by a letter dated June 6, 2024, in which the Secretariat of the United Nations informed the United States government that 3-chlorometh cathinone have been added to Schedule II of the Convention on Psychotropic Substances of 1971 (1971 Convention), February 21, 1971, 32 U.S.T. 543, 1019 U.N.T.S. 175, as amended. This letter was prompted by decisions at the 67th Session of the Commission on Narcotic Drugs (CND) in March 2024 to schedule 3-chloromethcathinone under Schedule II of the 1971 Convention (CND Decision 67/2). Preceding these decisions, the Food and Drug Administration (FDA), on behalf of the Secretary of Health and Human Services and pursuant to 21 U.S.C. 811(d)(2), published two notices in the **Federal Register** with an opportunity to submit domestic information and opportunity to comment on this action.[2]

As discussed above in this final rule, 3-chloromethcathinone, by virtue of being a positional isomer of 4-chloro methcathinone, has been controlled in schedule I of the CSA since December 17, 2025.[3] Therefore, all regulations and criminal sanctions applicable to schedule I substances have been and remain applicable to 3-chloro methcathinone. Drugs controlled in schedule I of the CSA satisfy and exceed the required domestic controls of Schedule II under Article 2 of the 1971 Convention.

Effect of Action

As discussed above, this rule does not affect the continuing status of 3-chloromethcathinone as a schedule I controlled substances in any way. This action, as an administrative matter, merely establishes a separate, specific listing for 3-chloromethcathinone in schedule I of the CSA and assigns a DEA controlled substances code number (drug code) for this substance. This action will allow DEA to establish an aggregate production quota and grant individual manufacturing and procurement quotas to DEA-registered manufacturers of 3-chlorometh cathinone, who had previously been granted individual quotas for such purposes under the drug code for 4-chloromethcathinone.

Regulatory Analyses

Administrative Procedure Act

An agency may find good cause to exempt a rule from certain provisions of the Administrative Procedure Act (APA) including notice of proposed rulemaking and the opportunity for public comment, if it is determined to be unnecessary, impracticable, or contrary to the public interest.[4]

Pursuant to 5 U.S.C. 553(b)(B), DEA finds that notice-and-comment rulemaking is unnecessary, and that good cause exists to dispense with these procedures, as 3-chloromethcathinone is currently controlled in schedule I as a positional isomer of 4-chlorometh cathinone. The addition of a separate listing for 3-chloromethcathinone and its DEA controlled substances code number in the list of schedule I substances in 21 CFR 1308.11(d) makes no substantive difference in the status of this drug as a schedule I controlled substance, but instead is ''a minor or merely technical amendment in which the public is not particularly interested.''[5] This rule is a ''technical amendment'' to 21 CFR 1308.11(d) as it is ''insignificant in nature and impact, and inconsequential to the industry and public.'' Therefore, DEA finds that publishing a notice of proposed rulemaking and soliciting public comment are unnecessary and good cause exists to dispense with these procedures.

In addition, DEA is concerned that delaying the effective date of this rule potentially could cause confusion regarding the regulatory status of 3-chloromethcathinone. With 3-chloro methcathinone currently controlled under schedule I as a positional isomer, and with no additional requirements being imposed through this action, DEA finds good cause exists to make this rule effective immediately upon publication in accordance with 5 U.S.C. 553(d)(3).

Executive Orders 12866, 13563, 14192, and 14294 (Regulatory Review).

This regulation has been drafted and reviewed in accordance with the principles of Executive Orders (E.O.) 12866, 13563, and 14192. This rule is not a significant regulatory action under section 3(f) of E.O. 12866. 3-Chloro methcathinone is already a controlled substance in the United States under schedule I, as it is a positional isomer of the schedule I hallucinogen 4-chloromethcathinone. In this final rule, DEA is merely making an administrative change by amending its regulations to separately list 3-chloromethcathinone in schedule I and to assign a DEA controlled substances code number to this substance. A separate listing for 3-chloromethcathinone and its DEA controlled substances code number will not alter the status of this substance as a schedule I controlled substance. DEA scheduling actions are not subject to E.O. 14192, Unleashing Prosperity Through Deregulation, or E.O. 14294, Fighting Overcriminalization in Federal Regulations.

---

[1] 4-Chloromethcathinone (and its isomers) has been subject to schedule I controls since December 17, 2025. *See Schedules of Controlled Substances: Placement of 4-Chloromethcathinone in Schedule I,* 90 FR 51102 (Nov. 11, 2025).

[2] *See International Drug Scheduling; Convention on Psychotropic Substances; Single Convention on Narcotic Drugs; Bromazolam; Flubromazepam; Butonitazene; 3-Chloromethcathinone (3–CMC); Dipentylone; 2-Fluorodeschloroketamine (2–FDCK); Nitrous Oxide (N2O); Carisoprodol; Request for Comments,* 88 FR 52179 (Aug. 7, 2023)*; International Drug Scheduling; Convention on Psychotropic Substances; Single Convention on Narcotic Drugs; World Health Organization; Scheduling Recommendations; Butonitazene; 3-Chloromethcathinone; Dipentylone; 2-Fluorodesch loroketamine; Bromazolam; Request for Comments,* 89 FR 8683 (Feb. 8, 2024).

[3] *Schedules of Controlled Substances: Placement of 4-Chloromethcathinone in Schedule I,* 90 FR 51102 (Nov. 17, 2025).

[4] 5 U.S.C. 553(b)(B).

[5] *National Nutritional Foods Ass'n* v. *Kennedy,* 572 F.2d 377, 385 (2d Cir. 1978) (quoting S. Rep. No. 79–752, at 200 (1945)). *See also Utility Solid Waste Activities Group* v. *E.P.A.,* 236 F.3d 749, 755 (D.C. Cir. 2001) (the ''unnecessary'' prong ''is confined to those situations in which the administrative rule is a routine determination, insignificant in nature and impact, and inconsequential to the industry and public'') (internal quotations and citation omitted).

Executive Order 12988, Civil Justice Reform

This regulation meets the applicable standards set forth in sections 3(a) and 3(b)(2) of E.O. 12988 to eliminate drafting errors and ambiguity, provide a clear legal standard for affected conduct, and promote simplification and burden reduction.

Executive Order 13132, Federalism

This rulemaking does not have federalism implications warranting the application of E.O. 13132. The rule does not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

Executive Order 13175, Consultation and Coordination With Indian Tribal Governments

This rule does not have tribal implications warranting the application of E.O. 13175. It does not have substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) applies to rules that are subject to the notice-and-comment requirements under the APA or other laws.[6] As noted in the above section regarding the applicability of the APA, DEA determined that there was good cause to exempt this final rule from notice and comment. Consequently, the RFA does not apply.

Paperwork Reduction Act of 1995

This action does not impose a new collection of information requirement under the Paperwork Reduction Act of 1995.[7] This action would not impose recordkeeping or reporting requirements on State or local governments, individuals, businesses, or organizations. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid Office of Management and Budget control number.

Unfunded Mandates Reform Act of 1995

In accordance with the Unfunded Mandates Reform Act (UMRA) of 1995, 2 U.S.C. 1532, DEA has determined that this action would not result in any Federal mandate that may result ''in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more (adjusted annually for inflation) in any 1 year . . . .'' Therefore, neither a Small Government Agency Plan nor any other action is required under UMRA of 1995.

Congressional Review Act

This rule is not a major rule as defined by the Congressional Review Act (CRA), 5 U.S.C. 804. However, pursuant to the CRA, DEA is submitting a copy of this rule to both Houses of Congress and to the Comptroller General.

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Reporting and recordkeeping requirements.

For the reasons set out above, DEA amends 21 CFR part 1308 as follows:

PART 1308—SCHEDULES OF CONTROLLED SUBSTANCES

■ 1. The authority citation for part 1308 continues to read as follows:

Authority: 21 U.S.C. 811, 812, 871(b), 956(b), unless otherwise noted.

■ 2. Amend § 1308.11 by adding the new paragraph (d)(118) to read as follows:

§ 1308.11 Schedule I.

* * * * *

(d) * * *

*	*	*	*	*	*	*
(118) 3-Chloromethcathinone (3-CMC, 1-(3-chlorophenyl)-2-(methylamino)propan-1-one)						1241
*	*	*	*	*	*	*

* * * * *

Signing Authority

This document of the Drug Enforcement Administration was signed on November 2, 2026, by DEA Administrator Terrance C. Cole. That document with the original signature and date is maintained by DEA. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DEA Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of DEA. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Heather Achbach,

Federal Register Liaison Officer, Drug Enforcement Administration.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2026–0562]

RIN 1625–AA09

Drawbridge Operation Regulation; Wishkah River, Aberdeen, WA

AGENCY: Coast Guard, DHS.

ACTION: Final rule.

SUMMARY: The Coast Guard is changing the operating schedule that governs the Puget Sound and Pacific railroad bridge (PS&P) across the Wishkah River, mile 0.1 in Aberdeen, WA. This rule will change the PS&P railroad bridge draw position to the fully closed-to-navigation position. Furthermore, this rule requires 24-hour notice for all drawbridge openings and a bridge operator will no longer be required to be on site.

DATES: This rule is effective December 7, 2026.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *https://www.regulations.gov.* Type the docket number (USCG–2026–0562) in the ''SEARCH'' box and click ''SEARCH''. In

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
OMB Office of Management and Budget
NPRM Notice of Proposed Rulemaking (Advance, Supplemental)
§ Section
U.S.C. United States Code
GWRR Genesee & Wyoming Inc.
PS&P Puget Sound and Pacific railroad

II. Background Information and Regulatory History

On June 16, 2026, the Coast Guard published a Notice of Proposed Rule Making, with a request for comments, entitled ''Drawbridge Operation Regulation; Wishkah River, Aberdeen, WA'' in the **Federal Register** (91 FR 36105). There we stated why we issued the NPRM and invited comments on our proposed regulatory action related to this regulatory change. We received one unrelated comment during the comment period that ended July 16, 2026.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority 33 U.S.C. 499. The PS&P railroad bridge across the Wishkah River, mile 0.1, at Aberdeen, WA operates in accordance with 33 CFR 117.1065(b). Bridge logs have shown a significant reduction in bridge opening requests for ten years and the bridge is mostly cycled for maintenance. This rule is necessary to balance the needs of the railroad by reducing the need to frequently cycle the draw closed for rail traffic and back open for marine traffic while maintaining the reasonable needs of navigation.

This regulatory action is based on the ability for the PS&P railroad bridge to open on signal after the GWRR has received at least 24-hour notice by telephone or VHF radio. This rule allows any vessel that needs a draw opening to transit through the subject bridge with the proper advance notice during clear visibility or reduced visibility.

IV. Discussion of Comments, Changes and the Final Rule

The Coast Guard provided a comment period of 31 days and received one unrelated comment regarding sea lions in California. No changes were made to the content of the rule since publication of the NPRM.

This rule amends the operating schedule of the PS&P railroad bridge found in 33 CFR 117.1065(b) by allowing the bridge to be maintained in the closed-to-navigation position and requiring GWRR to fully open the swing span with a minimum of 24-hours' notice. When the draw is to be opened or closed the drawtender must sound one prolonged blast followed by one short blast. We will remove the text in 33 CFR 117.1065(b), ''When the draw of the bridge is closed and the visibility at the drawtender' s station is less than one mile up or down the channel, the drawtender shall sound two prolonged blasts every minute.''

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive Orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive Orders.

A. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard received no comments from the Small Business Administration on this rule. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities for the following reasons. While some owners or operators of vessels intending to transit the bridge may be small entities, the Coast Guard has not identified any vessel operators that will be caused significant economic impact as result of the proposed rule change. As noted earlier, only one or two vessels required openings of the drawbridge annually over the last 10 years. They would be able to continue to request openings of the drawbridge with a 24-hour notice.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule affects your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

B. Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

C. Federalism and Indian Tribal Government

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

D. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

E. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01, Rev.1, associated implementing instructions, and Environmental Planning Policy COMDTINST 5090.1 (series) which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f). The Coast Guard has determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule promulgates the operating regulations or procedures for drawbridges and is categorically excluded from further review, under paragraph L49, of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1.

Neither a Record of Environmental Consideration nor a Memorandum for the Record are required for this rule.

List of Subjects in 33 CFR Part 117

Bridges.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

■ 1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 33 CFR 1.05–1; and DHS Delegation No. 00170.1, Revision No. 01.4.

■ 2. Amend 117.1065 by revising paragraph (b) to read as follows:

§ 117.1065 Wishkah River.

* * * * *

(b) The draw of the Puget Sound and Pacific railroad bridge, mile 0.1 at Aberdeen, shall be maintained in the closed-to-navigation position. Vessels requesting the bridge's draw to be opened for navigation shall make a request at least 24 hours in advance by telephone or VHF radio channel 13. Please refer to the Coast Pilot in the Grays Harbor, Washington section for updated contact requirements. When the draw is to be opened or closed the drawtender shall sound one prolonged blast followed by one short blast.

* * * * *

Michael E. Campbell,

Rear Admiral, U. S. Coast Guard,Commander, Northwest Coast Guard District.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

[Docket No. FWS–R8–ES–2026–0530; FXES11130900000–267–FF09E41000]

RIN 1018–BB21

Endangered and Threatened Wildlife and Plants; Technical Corrections for 43 Wildlife and Plant Species on the Lists of Endangered and Threatened Wildlife and Plants

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Direct final rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce technical corrections for 43 wildlife and plant species under the Endangered Species Act of 1973, as amended (Act). For 7 wildlife species and 30 plant species that predominately occur in California and Nevada, we are revising the List of Endangered and Threatened Wildlife and the List of Endangered and Threatened Plants (''the Lists'') to reflect the current scientifically accepted taxonomy and nomenclature of these species. We are also making commensurate revisions to the applicable critical habitat sections. Further, for six wildlife species occurring within the United States and territories, we are correcting errors in the Lists made in previous publications. The taxonomic, nomenclatural, and orthographic revisions and the corrections of publication errors are editorial in nature and involve no substantive changes to the Lists or any applicable regulations.

DATES: This rule is effective February 4, 2027 without further action unless significant adverse comment is received by December 7, 2026. If significant adverse comment is received regarding taxonomic changes for any of these species, we will publish a timely withdrawal of the relevant portions of the rule in the **Federal Register**.

ADDRESSES: *Comment submission:* All submissions must include the docket number [FWS–R8–ES–2026–0530] for this document. You must submit comments using one of the following methods:

(1) *Electronically:* Go to the Federal eRulemaking Portal: *https://www.regulations.gov.* In the Search box, enter FWS–R8–ES–2026–0530, which is the docket number for this rulemaking. Then, click on the Search button. On the resulting page, in the Search panel on the left side of the screen, under the Document Type heading, click on the Rule box to locate this document. You may submit a comment by clicking on ''Comment.''

(2) *By hard copy:* Submit comments by U.S. mail or hand-delivery to: Public Comments Processing, Attn: FWS–R8–ES–2026–0530, U.S. Fish and Wildlife Service, MS: PRB/3W, 5275 Leesburg Pike, Falls Church, VA 22041–3803.

Comments submitted through any method not authorized in this document, or sent to an address not listed here, will not be considered. We will not accept comments via email, fax, or hand delivery. We are not required to consider comments that are submitted after the comment period ends or that are submitted via a method outside of these instructions. Comments containing profanity, vulgarity, threats, or other inappropriate content will not be considered.

We will post all comments at *https://www.regulations.gov.* You may request that we withhold personal identifying information from public review; however, we cannot guarantee that we will be able to do so. See Public Comments, below, for more information.

FOR FURTHER INFORMATION CONTACT: Angela Picco, Threatened and Endangered Species Lead, Ecological Services, U.S. Fish and Wildlife Service, Pacific Southwest Regional Office, 2800 Cottage Way, Suite W–2606; telephone 916–414–6490. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

See Species-specific Inquiries and Information in **SUPPLEMENTARY INFORMATION**, below, for relevant names and contact information.

SUPPLEMENTARY INFORMATION:

Public Comments

You may submit your comments and materials regarding the taxonomic revisions, identified below in table 1, by one of the methods listed in **ADDRESSES**. Please include sufficient information with your comments to allow us to verify any scientific or commercial information you include. We will not consider comments sent by email or fax, or to an address not listed in **ADDRESSES**.

We will post all comments on *https://www.regulations.gov.* Before including your address, phone number, email address, or other personal information

in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Comments and materials we receive, as well as supporting documentation we use in preparing this direct final rule, will be available for public inspection on the internet at *https://www.regulations.gov*. Please note that comments posted to *https://www.regulations.gov* are not immediately viewable. When you submit a comment, the system receives it immediately. However, the comment will not be publicly viewable until we post it, which might not occur until several days after submission. Information regarding this rule is available in alternative formats upon request (see **FOR FURTHER INFORMATION CONTACT**).

Species-Specific Inquiries and Information

For information pertaining to specific species, please contact our Ecological Services field offices as follows:

Common name	Contact information
· Western snowy plover [Pacific Coast Distinct Population Segment (DPS)]. · Kneeland Prairie pennycress.	Vicky Ryan, Field Supervisor, U.S. Fish and Wildlife Service, Arcata Fish and Wildlife Office, 1655 Heindon Road, Arcata, California 95521, 707–825–5123.
· El Segundo blue butterfly · Del Mar manzanita. · Laguna Beach dudleya. · Otay tarplant. · Salt marsh bird's-beak.	Jonathan Snyder, Acting Field Supervisor, U.S. Fish and Wildlife Service, Carlsbad Fish and Wildlife Office, 2177 Salk Avenue, Suite 250, Carlsbad, California 92008, 760–309–7993.
· Bakersfield cactus · Clara Hunt's milk-vetch. · Coyote ceanothus. · Lake County stonecrop. · Layne's butterweed. · Palmate-bracted bird's-beak. · Pine Hill flannelbush. · Presidio manzanita. · San Mateo thornmint. · Soft bird's-beak.	Kim Turner-Olah, Acting Field Supervisor, U.S. Fish and Wildlife Service, Sacramento Fish and Wildlife Office, 2800 Cottage Way, W–2606, Sacramento, California 95825, 916–414–6707.
· Ash Meadows gumplant · Ash-gray paintbrush. · Bear Valley sandwort. · Cushenbury oxytheca. · Desert slender salamander. · Eureka Valley dune grass. · Inyo California towhee. · San Bernardino kangaroo rat. · Santa Ana River woolly-star. · Southern mountain buckwheat. · Spring-loving centaury. · Stephens' kangaroo rat. · San Bernardino Mountains bladderpod.	Brian Croft, Field Supervisor, U.S. Fish and Wildlife Service, Palm Springs and Southern Nevada Fish and Wildlife Office, 4701 North Torrey Pines Drive, Las Vegas, Nevada 89130, 702–515–5244.
· Arroyo toad · Conejo dudleya. · Gambel's watercress. · Hoffmann's rockcress. · Island rush-rose. · Santa Monica dudleya. · Gowen cypress.	Cat Darst, Field Supervisor, U.S. Fish and Wildlife Service, Ventura Fish and Wildlife Office, 2493 Portola Rd., Suite B, Ventura, California 93003, 805–677–3333.

Background

The List of Endangered and Threatened Wildlife and the List of Endangered and Threatened Plants (''the Lists''), set forth in title 50 of the Code of Federal Regulations (CFR) at §§ 17.11 and 17.12, respectively, contain the names of endangered species and threatened species federally listed pursuant to the Act (16 U.S.C. 1531 *et seq.*). The regulations at 50 CFR 17.11(c) and 17.12(b) require us to use the most recently accepted scientific name of any wildlife or plant species, respectively, that we have determined to be an endangered or threatened species. As noted in 50 CFR 17.94(a), for species with critical habitat designations, the lists at §§ 17.11 and 17.12 refer to critical habitat designations presented in § 17.95 (fish and wildlife), § 17.96 (plants), and § 17.99 (plants on the Hawaiian Islands). For consistency in the references, the scientific and common names in critical habitat sections need to comport with the scientific and common names in the Lists.

Purpose of Direct Final Rule and Final Action

The purpose of this direct final rule is to notify the public that we are revising the Lists at 50 CFR 17.11(h) and 17.12(h) to reflect scientifically accepted taxonomy and nomenclature for 7 wildlife species and 30 plant species listed under section 4 of the Act. Changes to the Lists include one or both of the following: (1) revisions to certain entries in the scientific name columns to reflect the most recently accepted scientific names in accordance with 50

CFR 17.11(c) and 17.12(b), or (2) revisions to certain entries in the common name columns to better reflect current usage or to improve clarity. In some instances, changes in the Lists necessitate corresponding changes to the names used in 50 CFR 17.95, critical habitat for fish and wildlife, or 50 CFR 17.96, critical habitat for plants.

We are publishing this rule without a prior proposal because this is a noncontroversial action that is in the best interest of the public and should be undertaken in as timely a manner as possible. For the taxonomic and nomenclatural revisions provided below in table 1, this rule will be effective, as published in this document, on the effective date specified in **DATES**, unless we receive significant adverse comments on or before the comment due date specified in **DATES**. Significant adverse comments are comments that provide strong justifications as to why this rule should not be adopted for a particular species or why it should be changed to a name different from the one we have used.

If we receive significant adverse comments regarding the taxonomic changes for any of the species included in table 1, below, we will publish a document in the **Federal Register** withdrawing this rule for the appropriate species before the effective date, and we will publish a proposed rule to initiate promulgation of those changes to 50 CFR 17.11(h) and/or 17.12(h).

In addition, we are notifying the public that we have identified editorial errors in the Lists, and they will be corrected on the effective date of this rule (see **DATES**, above). The identified errors are provided below in table 2. While you may submit comments by one of the methods listed in **ADDRESSES** on the corrections provided below in table 2, we consider these corrections purely administrative, and we intend to make these editorial corrections on the effective date of this rule.

None of these changes are regulatory in nature; they are for accuracy and clarity. These revisions do not alter species' protections or status in any way, and this rule does not have a substantive effect on the public. Any actions altering a species' protection or status would require a separate rulemaking action following the procedures of 50 CFR part 424.

Brief Summary of Taxonomic and Nomenclatural Changes

Table 1 provides changes we are making to reflect the scientifically accepted taxonomy and nomenclature of 7 wildlife species and 30 plant species listed under section 4 of the Act. These changes reflect the most recently accepted scientific nomenclature in accordance with 50 CFR 17.11(c) and 17.12(b). We also provide updates to common names to conform with current usage, including the removal of synonyms that, per 50 CFR 17.11(b) and 17.12(c), are no longer needed for clarity.

TABLE 1—REVISIONS TO THE LISTS REFLECTING THE CURRENT SCIENTIFICALLY ACCEPTED TAXONOMY AND NOMENCLATURE FOR THESE SPECIES

Species name as currently listed	Corrected species name
§ 17.11 Endangered and Threatened Wildlife	
Common name (*scientific name*)	Common name (*scientific name*)
MAMMALS	
San Bernardino Merriam's kangaroo rat (*Dipodomys merriami parvus*) Stephens' kangaroo rat (*Dipodomys stephensi* (incl. *D. cascus*))	San Bernardino kangaroo rat (*Dipodomys merriami parvus*). Stephens' kangaroo rat (*Dipodomys stephensi*).
BIRDS	
Inyo California towhee (*Melozone crissalis eremophilus*) ..... Western snowy plover [Pacific Coast population DPS] (*Charadrius nivosus nivosus*).	Inyo California towhee (*Melozone crissalis eremophila*). Western snowy plover [Pacific coast DPS] (*Anarhynchus nivosus nivosus*).
AMPHIBIANS	
Arroyo (=arroyo southwestern) toad (*Anaxyrus californicus*) ..... Desert slender salamander (*Batrachoseps aridus*)	Arroyo toad (*Anaxyrus californicus*). Desert slender salamander (*Batrachoseps major aridus*).
INSECTS	
El Segundo blue butterfly (*Euphilotes battoides allyni*)	El Segundo blue butterfly (*Euphilotes allyni*).
§ 17.12 Endangered and Threatened Plants	
FLOWERING PLANTS	
Acanthomintha obovata ssp. *duttonii* (San Mateo thornmint) ..... *Arabis hoffmannii* (Hoffmann's rock-cress) ..... *Arctostaphylos glandulosa* ssp. *crassifolia* (Del Mar manzanita) ..... *Arctostaphylos hookeri* var. *ravenii* (Presidio manzanita) ..... *Arenaria ursina* (Bear Valley sandwort) ..... *Astragalus clarianus* (Clara Hunt's milk-vetch) ..... *Castilleja cinerea* (Ash-gray Indian paintbrush) ..... *Ceanothus ferrisae* (coyote ceanothus) ..... *Centaurium namophilum* (spring-loving centaury) ..... *Cordylanthus maritimus* ssp. *maritimus* (salt marsh bird's-beak) ..... *Cordylanthus mollis* ssp. *mollis* (soft bird's-beak) ..... *Cordylanthus palmatus* (palmate-bracted bird's-beak) ..... *Deinandra* (= *Hemizonia*) *conjugens* (Otay tarplant)	*Acanthomintha duttonii* (San Mateo thornmint). *Boechera hoffmannii* (Hoffmann's rockcress). *Arctostaphylos glandulosa* subsp. *crassifolia* (Del Mar manzanita). *Arctostaphylos montana* subsp. *ravenii* (Presidio manzanita). *Eremogone ursina* (Bear Valley sandwort). *Astragalus claranus* (Clara Hunt's milk-vetch). *Castilleja cinerea* (Ash-gray paintbrush). *Ceanothus ferrisiae* (coyote ceanothus). *Zeltnera namophila* (spring-loving centaury). *Chloropyron maritimum* subsp. *maritimum* (salt marsh bird's-beak). *Chloropyron molle* subsp. *molle* (soft bird's-beak). *Chloropyron palmatum* (palmate-bracted bird's-beak). *Deinandra conjugens* (Otay tarplant).

TABLE 1—REVISIONS TO THE LISTS REFLECTING THE CURRENT SCIENTIFICALLY ACCEPTED TAXONOMY AND NOMENCLATURE FOR THESE SPECIES—Continued

Species name as currently listed	Corrected species name
Dudleya abramsii ssp. *parva* (Conejo dudleya)	*Dudleya parva* (Conejo dudleya).
Dudleya cymosa ssp. *ovatifolia* (Santa Monica Mountains dudleya)	*Dudleya cymosa* subsp. *ovatifolia* (Santa Monica dudleya).
Dudleya stolonifera (Laguna Beach liveforever)	*Dudleya stolonifera* (Laguna Beach dudleya).
Eriastrum densifolium ssp. *sanctorum* (Santa Ana River woolly-star)	*Eriastrum densifolium* subsp. *sanctorum* (Santa Ana River woolly-star).
Eriogonum kennedyi var. *austromontanum* (southern mountain wild-buckwheat).	*Eriogonum kennedyi* var. *austromontanum* (southern mountain buck-wheat).
Fremontodendron californicum ssp. *decumbens* (Pine Hill flannelbush)	*Fremontodendron decumbens* (Pine Hill flannelbush).
Grindelia fraxino-pratensis (Ash Meadows gumplant)	*Grindelia fraxinipratensis* (Ash Meadows gumplant).
Helianthemum greenei (island rush-rose)	*Crocanthemum greenei* (island rush-rose).
Lesquerella kingii ssp. *bernardina* (San Bernardino Mountains bladderpod).	*Physaria kingii* subsp. *bernardina* (San Bernardino Mountains bladderpod).
Opuntia treleasei (Bakersfield cactus)	*Opuntia basilaris* var. *treleasei* (Bakersfield cactus).
Oxytheca parishii var. *goodmaniana* (Cushenbury oxytheca)	*Acanthoscyphus parishii* var. *goodmaniana* (Cushenbury oxytheca).
Parvisedum leiocarpum (Lake County stonecrop)	*Sedella leiocarpa* (Lake County stonecrop).
Rorippa gambellii (Gambel's watercress)	*Nasturtium gambelii* (Gambel's watercress).
Senecio layneae (Layne's butterweed)	*Packera layneae* (Layne's butterweed).
Swallenia alexandrae (Eureka dune grass, Eureka Valley dune grass, or Eureka dunegrass).	*Swallenia alexandrae* (Eureka Valley dune grass).
Thlaspi californicum (Kneeland Prairie penny-cress)	*Noccaea fendleri* subsp. *californica* (Kneeland Prairie pennycress).
CONIFERS AND ALLIES	
Cupressus goveniana ssp. *goveniana* (Gowen cypress)	*Hesperocyparis goveniana* (Gowen cypress).

Summary of Editorial Changes

Per 50 CFR 17.11(f)(2), entries in the ''Listing citations and applicable rules'' column in 50 CFR 17.11(h), should ''contain the volume, document starting page number, and publication date of the **Federal Register** publication(s) in which a species was given status, listed, or reclassified.'' The entries in this column are nonregulatory in nature and are provided for informational and navigational purposes only. For a given species on the Lists, it is helpful to have the citation for the earliest **Federal Register** publication that addressed the status of that species. We are changing the respective entries in the ''Listing citations and applicable rules'' column for six species to include ''34 FR 5034, 3/8/1969.'' The March 8, 1969, **Federal Register** publication was a notice from the Secretary of the Interior announcing the fish and wildlife species he had determined were threatened with extinction per the Endangered Species Preservation Act of 1966 (80 Stat. 926; 16 U.S.C. 668aa(c)). The list of species maintained under the Endangered Species Preservation Act served as the basis for the list of species maintained under the Endangered Species Conservation Act of 1969. This list, in turn, served as the basis for the list of species maintained under the Endangered Species Act of 1973. This provenance is helpful information, and this information was inadvertently omitted in previous iterations of the Lists. We are adding the citation for the March 8, 1969, **Federal Register** publication for the six species in table 2.

TABLE 2—EDITORIAL CORRECTIONS TO THE LISTS

Current listed name	Error	Correction
California least tern (*Sternula antillarum browni*)	Entry in the ''Listing citations'' column fails to include ''34 FR 5034, 3/8/1969''.	34 FR 5034, 3/8/1969; 35 FR 16047, 10/13/1970; 35 FR 8491, 6/2/1970.
Hawaiian coot (alae keokeo) (*Fulica alai*)	Entry in the ''Listing citations'' column fails to include ''34 FR 5034, 3/8/1969''.	34 FR 5034, 3/8/1969; 35 FR 16047, 10/13/1970.
Hawaiian stilt (*Himantopus mexicanus* (=*himantopus*) *knudseni*).	Entry in the ''Listing citations'' column fails to include ''34 FR 5034, 3/8/1969''.	34 FR 5034, 3/8/1969; 35 FR 16047, 10/13/1970.
Puerto Rican plain pigeon (*Patagioenas inornata wetmorei*).	Entry in the ''Listing citations'' column fails to include ''34 FR 5034, 3/8/1969''.	34 FR 5034, 3/8/1969; 35 FR 16047, 10/13/1970.
Puerto Rican boa (*Epicrates inornatus*)	Entry in the ''Listing citations'' column fails to include ''34 FR 5034, 3/8/1969''.	34 FR 5034, 3/8/1969; 35 FR 16047, 10/13/1970.
Houston toad (*Bufo houstonensis*)	Entry in the ''Listing citations'' column fails to include ''34 FR 5034, 3/8/1969''.	34 FR 5034, 3/8/1969; 35 FR 16047, 10/13/1970; 50 CFR 17.95(d).[CH]

Description of Taxonomic and Nomenclatural Revisions

Using the best available scientific information, this direct final rule documents taxonomic and nomenclatural changes to 7 entries on the List of Endangered and Threatened Wildlife (50 CFR 17.11(h)) and 30 entries on the List of Endangered and Threatened Plants (50 CFR 17.12(h)). The basis for these taxonomic changes is supported by the best scientific and commercial data available.

Accordingly, we revise the scientific names of five wildlife species under section 4 of the Act (16 U.S.C. 1531 *et seq.*) as follows: Stephens' kangaroo rat (*Dipodomys stephensi*), Inyo California towhee (*Melozone crissalis eremophila*), western snowy plover [Pacific coast DPS] (*Anarhynchus nivosus nivosus*), desert slender salamander (*Batrachoseps major aridus*), and El Segundo blue butterfly (*Euphilotes allyni*). We make these changes to the List of Endangered and Threatened Wildlife to reflect the most recently accepted scientific names in accordance with 50 CFR 17.11(c). Additionally,

common name entries for the following two wildlife species are revised to better reflect currently accepted usage: San Bernardino kangaroo rat (*Dipodomys merriami parvus*) and arroyo toad (*Anaxyrus californicus*).

Similarly, we revise the scientific names of the following 27 plant species under section 4 of the Act (16 U.S.C. 1531 *et seq.*) as follows: *Acanthomintha duttonii* (San Mateo thornmint), *Boechera hoffmannii* (Hoffmann's rockcress), *Arctostaphylos glandulosa* subsp. *crassifolia* (Del Mar manzanita), *Arctostaphylos montana* subsp. *ravenii* (Presidio manzanita), *Eremogone ursina* (Bear Valley sandwort), *Astragalus claranus* (Clara Hunt's milk-vetch), *Ceanothus ferrisiae* (coyote ceanothus), *Zeltnera namophila* (spring-loving centaury), *Chloropyron maritimum* subsp. *maritimum* (salt marsh bird's-beak), *Chloropyron molle* subsp. *molle* (soft bird's-beak), *Chloropyron palmatum* (palmate-bracted bird's-beak), *Deinandra conjugens* (Otay tarplant), *Dudleya parva* (Conejo dudleya), *Dudleya cymosa* subsp. *ovatifolia* (Santa Monica dudleya), *Eriastrum densifolium* subsp. *sanctorum* (Santa Ana River woolly-star), *Fremontodendron decumbens* (Pine Hill flannelbush), *Eriogonum kennedyi* var. *austromontanum* (southern mountain buckwheat), *Grindelia fraxinipratensis* (Ash Meadows gumplant), *Crocanthemum greenei* (island rush-rose), *Physaria kingii* subsp. *bernardina* (San Bernardino Mountains bladderpod), *Opuntia basilaris* var. *treleasei* (Bakersfield cactus), *Acanthoscyphus parishii* var. *goodmaniana* (Cushenbury oxytheca), *Sedella leiocarpa* (Lake County stonecrop), *Nasturtium gambelii* (Gambel's watercress), *Packera layneae* (Layne's butterweed), *Noccaea fendleri* subsp. *californica* (Kneeland Prairie pennycress), and *Hesperocyparis goveniana* (Gowen cypress). We make these changes to the List of Endangered and Threatened Plants to reflect the most recently accepted scientific names in accordance with 50 CFR 17.12(b).

Additionally, we revise the common names of the following eight plant species (including four of the above species) to better reflect currently accepted usage: *Boechera hoffmannii* (Hoffmann's rockcress), *Arctostaphylos montana* subsp. *ravenii* (Presidio manzanita), *Castilleja cinerea* (ash-gray paintbrush), *Dudleya cymosa* subsp. *ovatifolia* (Santa Monica dudleya), *Dudleya stolonifera* (Laguna Beach dudleya), *Eriogonum kennedyi* var. *austromontanum* (southern mountain buckwheat), *Swallenia alexandrae* (Eureka Valley dune grass), and *Noccaea fendleri* subsp. *californica* (Kneeland Prairie pennycress). All of these revisions are not regulatory in nature and do not alter the listed species as previously recognized.

Several species that are the subjects of the taxonomic or nomenclatural revisions in this direct final rule have designated critical habitat. For clarity and consistency, we are revising the text of the critical habitat at 50 CFR 17.95 where necessary to correct scientific or common names for the following two wildlife species: Inyo California towhee (*Melozone crissalis eremophila*) and western snowy plover [Pacific coast DPS] (*Anarhynchus nivosus nivosus*). We also revise the text of the critical habitat at 50 CFR 17.96 where necessary to correct scientific or common names for the following nine plant species: *Eremogone ursina* (Bear Valley sandwort), *Castilleja cinerea* (ash-gray paintbrush), *Zeltnera namophila* (spring-loving centaury), *Chloropyron molle* subsp. *molle* (soft bird's-beak), *Eriogonum kennedyi* var. *austromontanum* (southern mountain buckwheat), *Grindelia fraxinipratensis* (Ash Meadows gumplant), *Physaria kingii* subsp. *bernardina* (San Bernardino Mountains bladderpod), *Acanthoscyphus parishii* var. *goodmaniana* (Cushenbury oxytheca), and *Noccaea fendleri* subsp. *californica* (Kneeland Prairie pennycress). These revisions are not regulatory in nature and do not alter the boundaries of critical habitat or the protections of the Act in any way.

Specific Taxonomic and Nomenclatural Changes

We provide below, in the same sequence as in table 1, a species-by-species discussion supporting the changes in scientific name, common name, or both in the Lists.

In certain instances, in the following discussions, we address changes to a species' scientific name. Per 50 CFR 17.11(c) and 17.11(g) for wildlife and 50 CFR 17.12(b) and 17.12(g) for plants, to determine a species' scientific name, we are to rely, to the extent practicable, on the Integrated Taxonomic Information System (ITIS) (*https://www.itis.gov/*). ITIS is an online database used by the Service as a reference for Act-related taxonomic decisions. We have determined that, as a reviewer of current taxonomic literature, it maintains generally accepted lists of taxa that are both valid and verified (81 FR 51550 at 51555, August 4, 2016). However, ITIS is not a taxonomic authority; it compiles information from other sources. In our experience, the taxonomic treatment it recognizes for some taxa is not always consistent with the best scientific data available. We are required by the Act to use the best scientific and commercial data available. When conflict exists, we rely on our own best professional judgment, the expertise of the scientific community, and current taxonomic literature (especially, but not limited to, primary sources) to determine the most appropriate taxonomic treatment (see 81 FR 51550, August 4, 2016, citing 45 FR 13010 at 13012–13013, February 27, 1980).

Per section 3(16) of the Act (16 U.S.C. 1532(16)), the term ''species'' may include a taxon at the species rank, a taxon at the subspecies rank, or for vertebrates, a distinct population segment (DPS); a DPS is a non-taxonomic entity that is unique to the Act. In taxonomy, a species is indicated by the combination of two terms, the genus epithet and the species epithet, forming a binomial. A subspecies is a form of infraspecific taxon; that is, a taxon hierarchically below the species rank or level. In zoological nomenclature, a subspecies is indicated by the combination of three terms, the genus epithet, the species epithet, and the subspecies epithet, forming a trinomial. In botanical nomenclature, multiple forms of infraspecific taxa are used indicating various taxonomic ranks.

For our purposes implementing the Act with respect to plants, we focus on the infraspecific taxa of subspecies and variety. For the purposes of section 3(16) of the Act, we consider plant varieties to be equivalent to subspecies (43 FR 17910 at 17912, April 26, 1978). Consistent with the International Code of Nomenclature for algae, fungi, and plants (ICN), we use abbreviations to distinguish between the two categories. The ICN is the set of internationally agreed upon rules and recommendations that botanical taxonomists use in the naming of algae, fungi, and plants. As such, we use the abbreviation ''var.'' (punctuation included) to indicate a variety. However, the abbreviation for indicating a subspecies has changed in botanical nomenclature; it had long been ''ssp.'' (punctuation included), but the ICN now recommends ''subsp.'' (punctuation included). We note that ITIS currently uses ''ssp.'' as the abbreviation to indicate botanical subspecies. This contrasts with the recommendation of the ICN, and we consider the ICN to provide the best scientific information on this matter. Therefore, in instances where we are addressing subspecies of plants, we are shifting the abbreviation we use from ''ssp.'' to ''subsp.'' We are doing this on

a case-by-case basis, when appropriate, and not en masse.

Additionally, in certain instances in the following discussions, we address species that include synonyms. Per 50 CFR 17.11(b) for wildlife common names, 17.11(c) for wildlife scientific names, 17.12(b) for plant scientific names, or 17.12(c) for plant common names, we sometimes parenthetically include one or more synonyms as part of the common name or scientific name when confusion might arise from the use of different names for the same taxon. When there is little chance for confusion, we do not include synonyms.

San Bernardino Kangaroo Rat

We are changing ''San Bernardino Merriam's kangaroo rat'' to ''San Bernardino kangaroo rat.'' This is an editorial change, not a taxonomic change. The scientific name remains the same. We acknowledge that the listed entity is a subspecies of the associated species-level taxon, Merriam's kangaroo rat (*Dipodomys merriami*). We further acknowledge that by including ''Merriam's'' in the common name of the subspecies, it indicates a hierarchical taxonomic relationship with *Dipodomys merriami.* However, ''San Bernardino kangaroo rat'' is used much more widely in the scientific literature as the common name for *Dipodomys merriami parvus.* Because of this, we are changing the common name. This editorial change does not affect the range or the listing status of this subspecies; we continue to recognize the listed entity at the subspecies rank for the purposes of section 3(16) of the Act. Critical habitat has been designated for this species, but ''San Bernardino kangaroo rat'' is consistent with the common name we use in 50 CFR 17.95. As such, no changes are needed in that section.

Stephens' Kangaroo Rat

We are changing ''*Dipodomys stephensi* (incl. *D. cascus*)'' to ''*Dipodomys stephensi.*'' This is an editorial change, not a taxonomic change. The common name remains the same. We are removing the parenthetical synonym. The current scientific literature recognizes *Dipodomys stephensi* as the most appropriate name for this taxon; the name *Dipodomys cascus* was established later in time and does not have nomenclatural precedence (that is, it is a junior synonym, in part) (ITIS 2024r, unpaginated); it has not been used for many years. At this point, there is little chance for confusion. Therefore, for simplicity, we are removing the synonym. ITIS (2024s, unpaginated) recognizes *Dipodomys stephensi* as the current (valid) scientific name for this taxon. This editorial change does not affect the range or the listing status of the species; we continue to recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. A species-specific ''4(d)'' rule (a rule issued under the authority of section 4(d) of the Act) has been designated for this species, but it does not mention the parenthetical synonym; consequently, no changes are needed in 50 CFR 17.40(t). Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.95.

Inyo California Towhee

We are changing the scientific name from ''*Melozone crissalis eremophilus*'' to ''*Melozone crissalis eremophila.*'' This is an editorial change, not a taxonomic change. The common name remains the same. On July 31, 2023, we recognized the genus-level taxonomic realignment for this listed entity from *Pipilo* to *Melozone* (88 FR 49310). However, *Pipilo* is masculine, and *Melozone* is feminine (David and Gosselin 2002, p. 259). Consequently, the subspecific name or epithet (the third name in the trinomial) should be changed from *eremophilus* to *eremophila* to remain consistent with the grammatical gender of the newly recognized genus name (or genus epithet). Information in ITIS (2024ab, unpaginated) supports the feminine orthography; however, ITIS does not currently recognize the subspecies. As discussed in our 2024 5-year status review for the Inyo California towhee (Service 2024, pp. 5–7), we are continuing to recognize the subspecies at this time, contrary to ITIS. This nomenclatural revision does not affect the range or the listing status of this subspecies; we continue to recognize the listed entity at the subspecies rank for the purposes of section 3(16) of the Act. Critical habitat has been designated for this species, and we are making commensurate changes in the subspecies' scientific name in 50 CFR 17.95.

Western Snowy Plover [Pacific Coast DPS]

We are changing the scientific name from ''*Charadrius nivosus nivosus*'' to ''*Anarhynchus nivosus nivosus,*'' we are changing the common name ''western snowy plover [Pacific Coast population DPS]'' to ''western snowy plover [Pacific coast DPS],'' and we are changing the DPS's entry in the ''Where listed'' column in 50 CFR 17.11(h) from ''Pacific Coast population DPS—U.S.A. (CA, OR, WA), Mexico (within 50 miles of Pacific coast)'' to ''U.S.A. (CA, OR, WA), Mexico (Baja California, Baja California Sur); within 50 miles of Pacific coast.'' On April 21, 2006 (71 FR 20607 at 20618), we determined that the listed entity qualified as a DPS under our DPS policy (61 FR 4722, February 7, 1996). This DPS is a population of the western snowy plover, a taxon at the subspecies rank. We are changing the entry for the scientific name of the listed DPS to reflect a taxonomic change of the subspecies.

Analyses of molecular data and other characteristics indicate that *Charadrius* (broadly speaking) is paraphyletic (Barth et al. 2013, figure 1 therein; Dos Remedios et al. 2015, figure 1 therein; Černý and Natale 2022, figure 6 therein); that is, the genus, as it has been traditionally recognized, comprises more than one evolutionary lineage. To better reflect the snowy plover's evolutionary lineage, most authorities have transferred it (along with several other *Charadrius* species) to the genus *Anarhynchus* in their recent treatments (Clements et al. 2023, unpaginated; Medler 2023, unpaginated; Gill et al. 2024, unpaginated; but see Handbook of the Birds of the World (HBW) and BirdLife International 2024, unpaginated). Additionally, the North American Classification Committee (NACC) of the American Ornithological Society (AOS) (formerly the Committee on Classification and Nomenclature of the American Ornithologists' Union) also recently accepted the genus-level change for the snowy plover, recognizing the species as *Anarhynchus nivosus* (Chesser et al. 2024, p. 2). The AOS NACC is widely accepted as the leading authority of avian taxonomy in North America. While the AOS NACC no longer explicitly addresses taxa at the subspecies rank, because of the hierarchical structure of zoological taxonomy, changes at the genus level are also reflected at the species- and subspecies-levels as well. Thus, the best scientific information available indicates that the scientific name for the DPS's underlying taxon is now *Anarhynchus nivosus nivosus.*

The ITIS entry for the western snowy plover does not currently reflect the recent information in the scientific literature (ITIS 2024, unpaginated); the most recent references ITIS cites for this taxon are from 2022. We conclude that ITIS does not currently provide the best available scientific information for this subspecies. Based on our review of the scientific literature, we recognize *Anarhynchus nivosus nivosus* as the scientific name for the DPS. This taxonomic revision does not affect the range or the listing status of this DPS; we continue to recognize the listed

entity as a DPS of a vertebrate subspecies for the purposes of section 3(16) of the Act.

Additionally, as part of our review of the scientific name entry in 50 CFR 17.11, we reviewed the common name entry. We are changing two aspects of the common name. First, we conclude that it is not necessary to capitalize the ''c'' in ''coast.'' The ''Pacific Coast'' is not a widely recognized proper noun, and when it is used, it is typically equivalent to the ''West Coast,'' referring to the Pacific coastal region of the conterminous United States. The range of the DPS also includes a portion of the Pacific coastal region of the Baja California Peninsula, Mexico, and therefore, ''Pacific Coast'' does not adequately describe the DPS's range. Second, we conclude that including the word ''population'' in the common name for the DPS is redundant; clarity is diminished by including the first use of the term in the entity's common name when the DPS initialism is written out: western snowy plover [Pacific coast *population* distinct population segment]. We are removing the first instance of that word in that phrase. As such, we are changing the entry for the common name to ''western snowy plover [Pacific coast DPS].'' This common name revision does not affect the range or the listing status of this DPS. Critical habitat has been designated for this DPS, and we are making commensurate changes in the DPS's scientific name and common name in 50 CFR 17.95.

Moreover, as described in 50 CFR 17.11(d), the ''Where listed'' column in 50 CFR 17.11(h) sets forth the geographic area where the species is listed for purposes of the Act. Currently, the entry in this column for the DPS reads ''Pacific Coast population DPS—U.S.A. (CA, OR, WA), Mexico (within 50 miles of Pacific coast).'' This is somewhat unclear. We are changing it to ''U.S.A. (CA, OR, WA), Mexico (Baja California, Baja California Sur); within 50 miles of Pacific coast.'' This change addresses three potential sources of confusion. First, the phrase ''Pacific Coast population DPS—'' at the beginning of the entry is unnecessary. When similar phrases are used in the List of Endangered and Threatened Wildlife, they are used to distinguish between or among different DPSs of the same species. For example, compare with the various entries for DPSs of the humpback whale (*Megaptera novaeangliae*) or steelhead (*Oncorhynchus mykiss*). Second, the new wording better indicates that the ''within 50 miles of the Pacific coast'' phrase applies to California, Oregon, and Washington as well as the DPS's range in Mexico, including the Mexican States of Baja California and Baja California Sur. This clarification is consistent with how we have long considered the range of the DPS. For example, our description of the DPS's range in the recovery plan (Service 2007, p. 1) states, ''[t]he Pacific coast population [of the western snowy plover] is defined as those individuals that nest within 50 miles of the Pacific Ocean on the mainland coast, peninsulas, offshore islands, bays, estuaries, or rivers of the United States and Baja California, Mexico.'' While this definition is more complete, it is still not entirely accurate as written; it does not include the Mexican State of Baja California Sur. This oversight is inconsistent with mapped or described ranges in our earlier publications (71 FR 20607 at 20609, April 21, 2006; Service 2007, p. 2 (figure 1); Service 2019b, p. 2). Thus, to address the third potential source of confusion, we are also amending the ''Where listed'' column to explicitly include the Mexican States of Baja California and Baja California Sur. These editorial changes do not affect the range or the listing status of the DPS, and they have no bearing on 50 CFR 17.95.

Arroyo Toad

We are changing the common name ''arroyo (=arroyo southwestern) toad'' to ''arroyo toad.'' This is an editorial change, not a taxonomic change. We are removing the synonym in the common name entry. The scientific name remains the same. When we listed this species in 1994, it was recognized as the arroyo southwestern toad (*Bufo microscaphus californicus*) (59 FR 64859, December 16, 1994). With subsequent taxonomic revisions, as described in 74 FR 52612 (October 13, 2009), we now recognize the listed entity as the arroyo toad (*Anaxyrus californicus*). This combination is widely used in the scientific literature. At this point, there is little chance for confusion. Therefore, for simplicity, we are removing the synonym in the common name. This editorial revision does not affect the range or the listing status of the species; we continue to recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has been designated for this species; however, the synonym is not included and ''arroyo toad'' is consistent with the common name we use in 50 CFR 17.95. As such, no changes are needed in that section.

Desert Slender Salamander

We are changing the scientific name from ''*Batrachoseps aridus*'' to ''*Batrachoseps major aridus*.'' This reflects a taxonomic change. The common name remains the same. We provide the background for this change in our 2014 5-year review (Service 2014, pp. 5–6 and 14), which is updated in the following discussion. Southern California slender salamanders (genus *Batrachoseps*) show high genetic diversity and complex phylogenetic lineages, which results in taxonomic uncertainty in *Batrachoseps* taxa in this region, including the desert slender salamander (Jockusch et al. 2020, entire). Further, the extreme scarcity of desert slender salamanders has limited the extent to which the entity has been assessed by modern methods (Martínez-Solano et al. 2012, p. 147; Jockusch et al. 2015, p. 67). ITIS currently does not recognize the desert slender salamander as a taxon, either as a species or a subspecies (ITIS 2024g, unpaginated; 2024h, unpaginated); ITIS's treatment does not consider it distinguishable from the garden slender salamander (*B. major*) (ITIS 2024i, unpaginated). However, it is unclear how ITIS came to its conclusion because the references it cites are inconsistent. For example, one of its references, the Amphibian Species of the World online database (Frost 2024a, unpaginated; 2024b, unpaginated) currently notes that the distinguishability of the desert slender salamander is ambiguous, whether at the species level or subspecies level, but the Committee on Standard English and Scientific Names for Reptiles and Amphibians North of Mexico, another reference ITIS cites, has recognized *Batrachoseps major aridus* in the past three editions of its list, the first of which ITIS cites (Crother 2008, p. 15; Crother 2012, p. 25; Crother 2017, p. 27). We conclude that ITIS does not currently provide the best available scientific information for this taxon. In all, in our review of the scientific literature (primary sources and taxonomic authorities), we find no consensus in the taxonomic treatment. While few sources support recognizing the desert slender salamander at the species rank (*B. aridus*), some sources support recognizing it as a population of garden slender salamander (*B. major*) and not as distinguishable taxon, and other sources support recognizing it at the subspecies rank (*B. m. aridus*). Currently, we are recognizing the desert slender salamander as a subspecies, *B. m. aridus,* consistent with Crother et al. (2017, p. 27). This taxonomic revision does not affect the range or the listing

status of this entity; however, with this change, we now recognize the listed entity at the subspecies rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.95.

El Segundo Blue Butterfly

We are changing the scientific name from ''*Euphilotes battoides allyni*'' to ''*Euphilotes allyni.*'' This reflects a taxonomic change. The common name remains the same. As we noted in our 2021 5-year review (Service 2021a, pp. 2–3), an analysis of genetic data determined that the population of *Euphilotes battoides*-type butterflies sampled from coastal Los Angeles County was the most distinct of several populations of *Euphilotes battoides*-type butterflies sampled from within Southern California (Dupuis et al. 2020, p. 1911). This subsequently prompted recognition of the El Segundo blue butterfly at the species rank, *Euphilotes allyni* (Rubinoff et al. 2021, pp. 161–162). The genetic evaluation confirmed that the range of the El Segundo blue butterfly is limited to the area from the northern portion of the Palos Verdes Peninsula to the area near Ballona Lagoon (Service 2021a, p. 7). The genetic data also indicated that other populations of similar-looking blue butterflies elsewhere that were suspected to be El Segundo blue butterflies, are not *E. allyni* (see discussion in Dupuis et al. 2020, pp. 1899, 1914–1915). Currently, ITIS continues to recognize *Euphilotes battoides allyni* as the current (valid) scientific name for the El Segundo blue butterfly (ITIS 2024x, unpaginated). It appears that ITIS's entry for this taxon does not reflect the recent information in the scientific literature because the most recent reference it cites is from 2009. We conclude that ITIS does not currently provide the best available scientific information for this taxon.

We are recognizing the El Segundo blue butterfly as *Euphilotes allyni.* This taxonomic revision does not affect the range or the listing status of this entity; however, with this change, we now recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.95.

Acanthomintha duttonii (San Mateo thornmint)

We are changing the scientific name from ''*Acanthomintha obovata* ssp. *duttonii*'' to ''*Acanthomintha duttonii.*'' This reflects a taxonomic change. The common name remains the same. Based on a reevaluation of the species, Jokerst (1991, p. 278) elevated the taxon to species rank. This treatment was recognized and accepted in the Jepson eFlora (Miller and Jokerst 2012, unpaginated). The Jepson eFlora (Jepson Flora Project 2024, unpaginated) is the regularly updated online version of The Jepson Manual: Vascular Plants of California (Baldwin et al. 2012, entire). The Jepson Manual is the standard flora for California in which contributing authors provide systematic treatments of all the State's taxonomic groups; it is widely considered an authoritative source for botanical taxonomy in California. ITIS (2024a, unpaginated) also recognizes and accepts this combination. This taxonomic revision does not affect the range or the listing status of this entity; however, with this change, we now recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Boechera hoffmannii (Hoffmann's rockcress)

We are changing the scientific name from ''*Arabis hoffmannii*'' to ''*Boechera hoffmannii*'' and changing the common name from ''Hoffmann's rock-cress'' to ''Hoffmann's rockcress.'' The updated scientific name reflects a taxonomic change, and the common name change is to better reflect usage in the literature. As we discuss in our 2011 5-year review for this species (Service 2011a, p. 4), botanical taxonomists now recognize Hoffmann's rockcress in the genus *Boechera* (Al-Shehbaz 2003, p. 386). This treatment was recognized and accepted in the Jepson eFlora (Windham and Al-Shehbaz 2012, unpaginated). ITIS (2024j, unpaginated) also recognizes and accepts this combination. This taxonomic revision does not affect the range or the listing status of this entity; we continue to recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Arctostaphylos glandulosa subsp. crassifolia (Del Mar manzanita)

We are changing the scientific name from ''*Arctostaphylos glandulosa* ssp. *crassifolia*'' to ''*Arctostaphylos glandulosa* subsp. *crassifolia.*'' This is an editorial change. The common name remains the same. As discussed at the start of this section, we are changing ''ssp.'' to ''subsp.'' to be consistent with botanical nomenclatural norms. ITIS (2024c, unpaginated) has not adopted this convention at this time; we conclude that ITIS does not currently provide the best available scientific information for this taxon. This editorial revision does not affect the range or the listing status of this entity; we continue to recognize the listed entity at the subspecies rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Arctostaphylos montana subsp. ravenii (Presidio manzanita)

We are changing the scientific name from ''*Arctostaphylos hookeri* var. *ravenii*'' to ''*Arctostaphylos montana* subsp. *ravenii.*'' This reflects a taxonomic change that also corrects an earlier nomenclatural error. The current common name remains unchanged. The scientific and common names of this listed entity have been inconsistently applied in 50 CFR 17.12 (the List) over time. In 1979, we originally used ''*Arctostaphylos hookeri* ssp. *ravenii*'' for the scientific name and ''Raven's manzanita'' for the common name (44 FR 61910, October 26, 1979). In the 1986 edition of the Code of Federal Regulations, the scientific name in the List was ''*Arctostaphylos pungens* var. *ravenii* (=*A. hookeri* ssp. *ravenii*)'' and the common name was ''Presidio (=Raven's) manzanita''; however, it appears that there was no associated rule published in the **Federal Register** to explain these changes. In the 1995 edition, the scientific name in the List was ''*Arctostaphylos hookeri* (=*pungens*) var. *ravenii,*'' again, apparently without an associated published rule. Ignoring the inserted synonym ''(=*pungens*),'' the combination ''*Arctostaphylos hookeri* var. *ravenii*'' was incorrect; it should have been ''*Arctostaphylos hookeri* ssp. *ravenii*'' (indicating subspecies rather than variety). In the 2001 edition of the Code of Federal Regulations, the entity's scientific name in the List no longer included the ''(=pungens)'' synonym, and the common name lost the ''(=Raven's)'' synonym—again, apparently without a published explanation. While we used the correct scientific name combination in the 2003 multi-species recovery plan that included this species (Service 2003, entire), the scientific name in the List continued to refer to it as a variety.

Meanwhile, based on molecular work on the *Arctostaphylos hookeri* complex that included the listed entity, Markos et al. (1998, p. 194) determined that infraspecific taxa formerly included in *A. hookeri* were, in fact, not close relatives of that species. To

accommodate these findings, *A. montana* was returned to its original rank of species, and the Presidio manzanita was included as *A. montana* subsp. *ravenii* (Parker et al. 2007, p. 150). This treatment was recognized and accepted in the Jepson eFlora (Parker et al. 2023, unpaginated). ITIS (2024d, unpaginated) also recognizes and accepts this combination, although as previously noted, ITIS has not adopted the ''subsp.'' orthographic convention at this time. We are changing the scientific name in the List for the Presidio manzanita to ''*Arctostaphylos montana* subsp. *ravenii.*'' This taxonomic revision does not affect the range or the listing status of this entity; we continue to recognize the listed entity at the subspecies rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Eremogone ursina (Bear Valley sandwort)

We are changing the scientific name from ''*Arenaria ursina*'' to ''*Eremogone ursina.*'' This reflects a taxonomic change. The common name remains the same. As we discuss in our 2015 5-year review (Service 2015b, p. 10), portions of the genus *Arenaria* are now recognized as *Eremogone* (Harbaugh et al. 2010, p. 195). This treatment was recognized and accepted in the Jepson eFlora (Hartman and Rabeler 2012, unpaginated). ITIS (2024v, unpaginated) also recognizes and accepts this taxon. This taxonomic revision does not affect the range or the listing status of this entity; we continue to recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has been designated for this species, and we are making commensurate changes in 50 CFR 17.96. Additionally, when we designated critical habitat for this species, we did so in a rule that included two other co-occurring species (72 FR 73092, December 26, 2007). To distinguish the critical habitat units among the three species, we used species-specific identifiers; we used the four-letter code ''ARUR'' for ''*Arenaria ursina*'' (72 FR 73092 at 73097, December 26, 2007). To maintain consistency, we are adding text into the appropriate section of 50 CFR 17.96 indicating that ''ARUR'' remains the identifier for this species even though we are recognizing the species as ''*Eremogone ursina.*'' This clarifying text does not alter the critical habitat as it was designated.

Astragalus claranus (Clara Hunt's milk-vetch)

We are changing the scientific name from ''*Astragalus clarianus*'' to ''*Astragalus claranus.*'' This is an editorial change. The common name remains the same. Silva (1998, unpaginated) noted the orthographical error of the original spelling. Jepson (1925, p. 578) had originally published the species name with an incorrectly constructed specific epithet: *clarianus* should have been *claranus.* ITIS recognizes the taxon but uses the original spelling, *A. clarianus* (ITIS 2024e, unpaginated; 2024f, unpaginated); however, ITIS does not include any recent references for this taxon. The treatment with the corrected spelling was recognized and accepted in the Jepson eFlora (Wojciechowski and Spellenberg 2023, unpaginated). We conclude that ITIS does not currently provide the best available scientific information for this taxon. This editorial revision does not affect the range or the listing status of this entity; we continue to recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Castilleja cinerea (Ash-gray paintbrush)

We are changing the common name from ''Ash-gray Indian paintbrush'' to ''Ash-gray paintbrush.'' This is an editorial change. The scientific name remains the same. The revised common name is consistent with modern usage, including the Jepson eFlora (Wetherwax et al. 2012, unpaginated). This editorial revision does not affect the range or the listing status of this entity; we continue to recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has been designated for this species, and we are making commensurate changes in 50 CFR 17.96.

Ceanothus ferrisiae (Coyote ceanothus)

We are changing the scientific name from ''*Ceanothus ferrisae*'' to ''*Ceanothus ferrisiae.*'' This is an editorial change. The common name remains the same. Silva (1998, unpaginated) noted the orthographical error of the original spelling. McMinn (1933, p. 89) had originally published the species name with an incorrectly constructed specific epithet: *ferrisae* should have been *ferrisiae.* This treatment with the corrected spelling was recognized and accepted in the Jepson eFlora (Burge and Wilken 2020, unpaginated). ITIS (2024k, unpaginated) also recognizes and accepts this orthography. This editorial revision does not affect the range or the listing status of this entity; we continue to recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Zeltnera namophila (Spring-loving centaury)

We are changing the scientific name from ''*Centaurium namophilum*'' to ''*Zeltnera namophila.*'' This reflects a taxonomic change. The common name remains the same. As mentioned in our 2020 5-year review (Service 2020b, p. unpaginated), and based on a phylogenetic analysis of molecular data (Mansion and Struwe 2004, entire), Mansion (2004, p. 732) described a new genus, *Zeltnera,* for most North American species of *Centaurium,* forming the new combination *Zeltnera namophila* for this species. This treatment was recognized and accepted in the Jepson eFlora (Pringle 2012, unpaginated). ITIS (2024ai, unpaginated) also recognizes and accepts this combination. This taxonomic revision does not affect the range or the listing status of this entity; we continue to recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has been designated for this species, and we are making commensurate changes in 50 CFR 17.96.

Chloropyron maritimum subsp. maritimum (Salt marsh bird's-beak)

We are changing the scientific name from ''*Cordylanthus maritimus* ssp. *maritimus*'' to ''*Chloropyron maritimum* subsp. *maritimum.*'' This reflects a taxonomic change. The common name remains the same. As detailed in our 2009 5-year review (Service 2009b, pp. 13–14), Tank et al. (2009, p. 188) resurrected *Chloropyron,* forming the combination *Chloropyron maritimum,* which includes the nominate subspecies *C. m.* subsp. *maritimum.* This treatment was recognized and accepted in the Jepson eFlora (Wetherwax and Tank 2012a, unpaginated). ITIS (2024m, unpaginated) also recognizes the combination. However, it appears that ITIS did not correctly update the grammatical gender of the subspecies epithet when the genus epithet changed. *Cordylanthus* is masculine, *Chloropyron* is neuter. Specifically, the subspecific epithet *maritimus* should be *maritimum.* Additionally, as discussed at the start of this section, ITIS continues to use the ''ssp.'' abbreviation to indicate subspecies. We conclude that ITIS does not currently provide the

best available scientific information for this taxon. We are recognizing *Chloropyron maritimum* subsp. *maritimum.* This taxonomic revision does not affect the range or the listing status of this entity; we continue to recognize the listed entity at the subspecies rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Chloropyron molle subsp. molle (Soft bird's-beak)

We are changing the scientific name from ''*Cordylanthus mollis* ssp. *mollis*'' to ''*Chloropyron molle* subsp. *molle.*'' This reflects a taxonomic change. The common name remains the same. Like the preceding entity, this taxon reflects a nomenclatural change from *Cordylanthus* to *Chloropyron* and associated revisions in the species and subspecies epithets to reflect the difference in grammatical gender of the new genus epithet. The taxon is now recognized as *Chloropyron molle* subsp. *molle.* Details are presented in the Recovery Plan for Tidal Marsh Ecosystems of Northern and Central California (Service 2013, p. 68). This treatment was recognized and accepted in the Jepson eFlora (Wetherwax and Tank 2012b, unpaginated). ITIS also recognizes and accepts this combination (ITIS 2024n, unpaginated). However, as discussed at the start of this section, ITIS continues to use the ''ssp.'' abbreviation to indicate subspecies; we are using the ''subsp.'' abbreviation, *Chloropyron molle* subsp. *molle.* This taxonomic revision does not affect the range or the listing status of this entity; we continue to recognize the listed entity at the subspecies rank for the purposes of section 3(16) of the Act. Critical habitat has been designated for this species, and we are making commensurate changes in 50 CFR 17.96. Additionally, in the heading for the critical habitat description, the species' family is included; for this species, we are changing ''Scrophulariaceae'' to ''Orobanchaceae'' to be consistent with current treatments (Wetherwax and Tank 2012b, unpaginated; ITIS 2024n, unpaginated).

Chloropyron molle subsp. molle (Palmate-bracted bird's-beak)

We are changing the scientific name from ''*Cordylanthus palmatus*'' to ''*Chloropyron palmatum.*'' This reflects a taxonomic change. The common name remains the same. Similar to the preceding two entities, this taxon reflects a nomenclatural change from *Cordylanthus* to *Chloropyron* and the associated revision in the species epithet to reflect the difference in grammatical gender of the new genus epithet. The taxon is now recognized as *Chloropyron palmatum.* Details are presented in the 2009 5-year review for this species (Service 2009d, pp. 19–20). This treatment was recognized and accepted in the *Jepson eFlora* (Wetherwax and Tank 2012c, unpaginated). ITIS (2024o, unpaginated) also recognizes and accepts this combination. This taxonomic revision does not affect the range or the listing status of this entity; we continue to recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Deinandra conjugens (Otay tarplant)

We are changing the scientific name entry from ''*Deinandra* (= *Hemizonia*) *conjugens*'' to ''*Deinandra conjugens.*'' This is an editorial change, not a taxonomic change. The common name remains the same. The current scientific literature now recognizes *Deinandra conjugens;* it has been more than 20 years since this taxon was recognized under the genus *Hemizonia* in the scientific literature (see 67 FR 76030, December 10, 2002). At this point, there is little chance for confusion. Therefore, for simplicity, we are removing the synonym in the scientific name. Other than the parenthetical synonym, the species' scientific name remains unchanged and is consistent with the Jepson eFlora (Baldwin 2012, unpaginated) and ITIS (2024q, unpaginated). This editorial revision does not affect the range or the listing status of the species; we continue to recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has been designated for this species; however, the synonym is not included and ''*Deinandra conjugens*'' is consistent with the scientific name we use in 50 CFR 17.96. As such, no changes are needed in that section.

Dudleya parva (Conejo dudleya)

We are changing the scientific name from ''*Dudleya abramsii* ssp. *parva*'' to ''*Dudleya parva.*'' This reflects a taxonomic change. The common name remains the same. As described in our 2009 and 2015 5-year reviews (Service 2009c, p. 9; Service 2015a, p. 11), the taxon should not be considered within the circumscription of *Dudleya abramsii* and should best be considered at the species rank. This was also supported by an analysis of molecular phylogeny (Yost et al. 2013, figures 1 and 2 therein). This treatment was recognized and accepted in the Jepson eFlora (McCabe 2012b, unpaginated). ITIS (2024u, unpaginated) also recognizes and accepts this combination. This taxonomic revision does not affect the range or the listing status of this entity; however, with this change, we now recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Dudleya cymosa subsp. ovatifolia (Santa Monica dudleya)

We are changing the scientific name from ''*Dudleya cymosa* ssp. *ovatifolia*'' to ''*Dudleya cymosa* subsp. *ovatifolia,*'' and the common name from ''Santa Monica Mountains dudleya'' to ''Santa Monica dudleya.'' We recognize that the taxonomy of this subspecies complex is not fully resolved (Service 2021b, entire). We are not addressing the larger taxonomic questions currently; the current change is merely editorial. As we describe at the start of this section, the abbreviation ''subsp.'' is now preferred over ''ssp.,'' and we are using it even though ITIS has not adopted this orthography (ITIS 2024t, unpaginated). Additionally, we are adopting the common name that is consistent with usage in the Jepson eFlora (McCabe 2012a, unpaginated), although we recognize that the current common name is also widely used. This editorial revision does not affect the range or the listing status of the species; we continue to recognize the listed entity at the subspecies rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Dudleya stolonifera (Laguna Beach dudleya)

We are changing the common name from ''Laguna Beach liveforever'' to ''Laguna Beach dudleya.'' This is an editorial change. The scientific name remains the same. We are adopting the common name that is consistent with usage in the Jepson eFlora (McCabe 2012c, unpaginated), although we recognize that the current common name is also widely used. This editorial revision does not affect the range or the listing status of the species; we continue to recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Eriastrum densifolium subsp. sanctorum (Santa Ana River woolly-star)

We are changing the scientific name from ''*Eriastrum densifolium* ssp. *sanctorum*'' to ''*Eriastrum densifolium* subsp. *sanctorum*.'' This is an editorial change. The common name remains the same. As we describe at the start of this section, the abbreviation ''subsp.'' is now preferred over ''ssp.,'' and we are using it even though ITIS has not adopted this orthography (ITIS 2024w, unpaginated). This editorial revision does not affect the range or the listing status of the species; we continue to recognize the listed entity at the subspecies rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Eriogonum kennedyi var. austromontanum (southern mountain buckwheat)

We are changing the common name from ''southern mountain wild-buckwheat'' to ''southern mountain buckwheat.'' This is an editorial change. The scientific name remains the same. We are adopting the common name that is consistent with usage in the Jepson eFlora (Reveal and Rosatti 2012, unpaginated), although we recognize that the current common name is also widely used. This editorial revision does not affect the range or the listing status of the species; we continue to recognize the listed entity at the subspecies rank for the purposes of section 3(16) of the Act. Critical habitat has been designated for this species, and we are making commensurate changes in 50 CFR 17.96.

Fremontodendron decumbens (Pine Hill flannelbush)

We are changing the scientific name from ''*Fremontodendron californicum* ssp. *decumbens*'' to ''*Fremontodendron decumbens.*'' This reflects a taxonomic change. The common name remains the same. In a revision of the genus *Fremontodendron,* Kelman (1991, p. 16) elevated *F. californicum* subsp. *decumbens* to the species rank, *F. decumbens,* as it was originally described (Lloyd 1965, p. 382). This is supported by more recent work examining molecular markers of *F. decumbens* and *F. californicum* (Kelman et al. 2006, p. 383). This treatment was recognized and accepted in the Jepson eFlora (Preston et al. 2012, unpaginated). ITIS (2024y, unpaginated) also recognizes and accepts this combination. While we acknowledge that there is some taxonomic uncertainty associated with some flannelbush individuals that, if confirmed as this taxon, could result in a change in the taxon's range (Service 2019c, p. 3), the taxonomic treatment recognized herein, in and of itself, does not affect the range of the listed entity. This change does not affect the entity's listing status; however, with this change, we now recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Grindelia fraxinipratensis (Ash Meadows gumplant)

We are changing the scientific name from ''*Grindelia fraxino-pratensis*'' to ''*Grindelia fraxinipratensis.*'' This is an editorial change. The common name remains the same.

When Ash Meadows gumplant was described as a new species by Reveal and Beatley (1971, p. 334), they constructed an orthographically incorrect Latin specific epithet, *fraxino-pratensis.* Greenhouse (2007, unpaginated) subsequently noted that the specific epithet should have been spelled *fraxinipratensis.* This subsequent spelling was accepted by the Jepson eFlora (Moore 2012, unpaginated), and ITIS (2024z, unpaginated) also accepts this orthography. This editorial revision does not affect the range or the listing status of the species; we continue to recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has been designated for this species, and we are making commensurate changes in 50 CFR 17.96.

Crocanthemum greenei (Island rush-rose)

We are changing the scientific name from ''*Helianthemum greenei*'' to ''*Crocanthemum greenei.*'' This reflects a taxonomic change. The common name remains the same. As discussed in our 2019 5-year review (Service 2019a, pp. 2–3), several lines of evidence supported the segregation of *Helianthemum* species (broadly speaking) into two distinct genera, *Helianthemum* in the Old World and *Crocanthemum* in the New World, including *C. greenei.* This treatment was recognized and accepted in the Jepson eFlora (Sorrie and Rosatti 2013, unpaginated). ITIS (2024p, unpaginated) also recognizes and accepts this combination. This taxonomic revision does not affect the range or the listing status of the species; we continue to recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Physaria kingii subsp. bernardina (San Bernardino Mountains bladderpod)

We are changing the scientific name ''*Lesquerella kingii* ssp. *bernardina*'' to ''*Physaria kingii* subsp. *bernardina.*'' This reflects a taxonomic change. The common name remains the same. As discussed in our 2009 5-year review (Service 2009f, pp. 5–6), multiple lines of evidence indicated that the genus *Physaria* is nested within the genus *Lesquerella;* this necessitated the merger of the two genera and new nomenclatural combinations under the genus *Physaria* (Al-Shehbaz and O'Kane 2002, pp. 319–329). This treatment was recognized and accepted in the Jepson eFlora (Al-Shehbaz 2012c, unpaginated). ITIS (2024ag, unpaginated) also recognizes and accepts this combination. This taxonomic revision does not affect the range or the listing status of this entity; we continue to recognize the listed entity at the subspecies rank for the purposes of section 3(16) of the Act. Critical habitat has been designated for this species, and we are making commensurate changes in 50 CFR 17.96.

Opuntia basilaris var. treleasei (Bakersfield cactus)

We are changing the scientific name from ''*Opuntia treleasei*'' to ''*Opuntia basilaris* var. *treleasei.*'' This reflects a taxonomic change. The common name remains the same. As discussed in our 2011 and 2020 5-year reviews (Service 2011b, p. 16; 2020a, p. 2), available information suggests that the entity is best treated as an infraspecific taxon of *O. basilaris.* This treatment was recognized and accepted in the Jepson eFlora (Baker et al. 2019, unpaginated). ITIS (2024ae, unpaginated) also recognizes and accepts this combination. This taxonomic revision does not affect the range or the listing status of the species; however, with this change, we now recognize the listed entity at the subspecies rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Acanthoscyphus parishii var. goodmaniana (Cushenbury oxytheca)

We are changing the scientific name from ''*Oxytheca parishii* var. *goodmaniana*'' to ''*Acanthoscyphus parishii* var. *goodmaniana.*'' This reflects a taxonomic change. The

common name remains the same. As detailed in our 2009 5-year review (Service 2009a, p.6), several lines of evidence indicated that the taxonomy of the Cushenbury oxytheca did not align well with other *Oxytheca* species. Ultimately, Reveal (2004, p. 144) recognized the Cushenbury oxytheca under the combination *Acanthoscyphus parishii* var. *goodmaniana.* This treatment was recognized and accepted in the Jepson eFlora (Reveal and Rosatti 2012, unpaginated). ITIS (2024b, unpaginated) also recognizes and accepts this combination. This taxonomic revision does not affect the range or the listing status of this subspecies; we continue to recognize the listed entity at the subspecies rank for the purposes of section 3(16) of the Act. Critical habitat has been designated for this species, and we are making commensurate changes in 50 CFR 17.96.

Sedella leiocarpa (Lake County stonecrop)

We are changing the scientific name from ''*Parvisedum leiocarpum*'' to ''*Sedella leiocarpa.*'' This reflects a nomenclatural change. The common name remains the same. We mentioned the nomenclatural revision in our 2009 5-year review (Service 2009e, p. 10). It involves a perceived nomenclatural error in the genus *Sedella* that prompted Clausen (1946, p. 58) to describe the genus *Parvisedum* and to make the corresponding species combinations, including *Parvisedum leiocarpum.* However, it was later determined that the perceived error was incorrect and that the change to *Parvisedum* was unnecessary (Eggli 1992, p. 83). As such, *Sedella leiocarpa* was, in fact, valid under the rules of botanical nomenclature. The Jepson eFlora (Boyd 2012, unpaginated) recognized and accepted *Sedella leiocarpa.* ITIS (2024ah, unpaginated) also recognizes and accepts this combination. This nomenclatural revision (correction) does not affect the range or the listing status of the species; we continue to recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Nasturtium gambelii (Gambel's watercress)

We are changing the scientific name from ''*Rorippa gambellii*'' to ''*Nasturtium gambelii.*'' This reflects two changes, an editorial (orthographic) change and a taxonomic change. The common name remains the same. The incorrect spelling of the specific epithet can be traced to the original description of the species by Sereno Watson (Watson 1876, p. 147). Watson named the new species, *Cardamine gambelii,* in honor of its collector William Gambel, but Watson incorrectly spelled it as ''Gambell'' (Watson 1876, p. 147). Watson apparently caught and corrected this error by 1895 (Watson 1895, p. 158). However, the error has sporadically been carried through the botanical literature for many years, even as the taxon underwent several revisions under different but similar genera: *Cardamine, Nasturtium,* and *Rorippa* (see Al-Shehbaz and Rollins 1988, p. 69). Subsequently, molecular data prompted Al-Shehbaz and Price (1998, entire) to again recognize *Nasturtium* as distinct from *Rorippa,* including the listed entity. This taxonomic treatment and corrected spelling for the specific epithet were both recognized and accepted by the Jepson eFlora (Al-Shehbaz 2012a, unpaginated). ITIS (2024ac, unpaginated) also recognizes and accepts this combination. This taxonomic revision does not affect the range or the listing status of this species; we continue to recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Packera layneae (Layne's butterweed)

We are changing the scientific name from ''*Senecio layneae*'' to ''*Packera layneae.*'' This reflects a taxonomic change. The common name remains the same. Analyses of morphological, geographical, and cytological data yielded differences sufficient to segregate several species of *Senecio* into a genus, *Packera,* separate from other species of *Senecio* (Löve and Löve 1975, p. 520). This resulted in the combination *Packera layneae* for Layne's butterweed (Weber and Löve 1981, p. 47). This treatment was recognized and accepted in the Jepson eFlora (Trock 2012, unpaginated). ITIS (2024af, unpaginated) also recognizes and accepts this combination. This taxonomic revision does not affect the range or the listing status of the species; we continue to recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Swallenia alexandrae (Eureka Valley dune grass)

We are changing the common name from ''Eureka dune grass, Eureka Valley dune grass, or Eureka dunegrass'' to ''Eureka Valley dune grass.'' This is an editorial change. The scientific name remains the same. The List currently presents three common names for this species. Each name is applicable to the species and is regularly used. For simplicity and consistency, we are now using one name. Prior to 2018, when we reclassified the species from an endangered species to a threatened species (83 FR 8576, February 27, 2018), we had used ''Eureka Dune grass.'' The species is known to occur on the Eureka Dunes, a large dune system in the Eureka Valley. The species also occurs on two other nearby dune systems in the Eureka Valley. Therefore, we are choosing to use ''Eureka Valley dune grass'' as the common name. This is consistent with the common name used by the Jepson eFlora (Bell and Smith 2012, unpaginated). Although we are not explicitly including them on the List as such, we consider the other common names as synonyms for this species. This editorial revision does not affect the range or the listing status of the species; we continue to recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Noccaea fendleri subsp. californica (Kneeland Prairie pennycress)

We are changing the common name from ''Kneeland Prairie penny-cress'' to ''Kneeland Prairie pennycress''; the non-hyphenated orthography is more consistent with common usage (for example, Al-Shehbaz 2012b, unpaginated). We are also changing the scientific name from ''*Thlaspi californicum*'' to ''*Noccaea fendleri* subsp. *californica.*'' This reflects a taxonomic change. As discussed in our 2011 5-year review (Service 2011c, p. 7), a phylogenetic analysis of molecular data (Koch and Al-Shehbaz 2004, p. 379) indicated that North American representatives of genus *Thlaspi* should be reassigned to the genus *Noccaea* and that the Kneeland Prairie pennycress should be assigned as a subspecies under *Noccaea fendleri* (Koch and Al-Shehbaz 2004, p. 382). This treatment was recognized and accepted in the Jepson eFlora (Al-Shehbaz 2012b, unpaginated). ITIS (2024ad, unpaginated) also recognizes and accepts this combination. This taxonomic revision does not affect the range or the listing status of the taxon; however, with this change, we now recognize the listed entity at the subspecies rank for the purposes of section 3(16) of the Act. Critical habitat has been designated for this species, and

we are making commensurate changes in 50 CFR 17.96.

Hesperocyparis goveniana (Gowen cypress)

We are changing the scientific name from ''*Cupressus goveniana* ssp. *goveniana*'' to ''*Hesperocyparis goveniana*.'' This reflects a taxonomic change. The common name remains the same. When we listed the entity in 1998 (63 FR 43100, August 12, 1998), we recognized it at the subspecies rank (Bartel 1993, p. 112). Its taxonomic rank was based on a sister infraspecific taxon, *C. g.* subsp. *pigmaea* (Bartel 1993, p. 112). Subsequent phylogenetic analyses indicated that *C. g.* subsp. *pigmaea* was not closely related to *C. g.* subsp. *goveniana* (Bartel et al. 2003, p. 699; Adams et al. 2009, p. 182), and the entity previously recognized as *C. g.* subsp. *pigmaea* became recognized as a separate taxon at the species rank. Without a sister infraspecific taxon, the infraspecific epithet no longer applied to the Gowan cypress, and the entity previously recognized as *C. g.* subsp. *goveniana* became recognized at the species rank, *C. goveniana.* Additionally, as discussed in our 2012 5-year review (Service 2012, p. 4), Adams et al. (2009, pp. 179, 181) also found that the New World *Cupressus* species were sufficiently differentiated from Old World taxa to be recognized under a new, separate genus, *Hesperocyparis,* including *H. goveniana.* This treatment was recognized and accepted in the Jepson eFlora (Bartel 2012, unpaginated). ITIS (2024aa, unpaginated) also recognizes and accepts this combination. This taxonomic revision does not affect the range or the listing status of the species; however, with this change, we now recognize the listed entity at the species rank for the purposes of section 3(16) of the Act. Critical habitat has not been designated for this species, and no changes are needed in 50 CFR 17.96.

Required Determinations

Clarity of the Rule

We are required by Executive Orders 12866 and 12988 and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

(a) Be logically organized;

(b) Use the active voice to address readers directly;

(c) Use clear language rather than jargon;

(d) Be divided into short sections and sentences; and

(e) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in **ADDRESSES**. To help us to revise this rule, your comments should be as specific as possible.

National Environmental Policy Act

We have determined that environmental assessments and environmental impact statements, as defined under the authority of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), need not be prepared in connection with regulations issued pursuant to section 4(a) of the Act. We published a notice outlining our reasons for this determination in the **Federal Register** on October 25, 1983 (43 FR 49244).

Government-To-Government Relationship With Tribes

In accordance with the President's memorandum of April 29, 1994, ''Government-to-Government Relations with Native American Tribal Governments''' (59 FR 22951), Executive Order 13175, and the Department of the Interior's manual at 512 DM 2, we readily acknowledge our responsibility to communicate meaningfully with recognized Federal Tribes on a government-to-government basis. In accordance with Secretarial Order 3206 of June 5, 1997 (American Indian Tribal Rights, Federal-Tribal Trust Responsibilities, and the Endangered Species Act), we readily acknowledge our responsibilities to work directly with Tribes in developing programs for healthy ecosystems, to acknowledge that Tribal lands are not subject to the same controls as Federal public lands, to remain sensitive to Indian culture, and to make information available to Tribes. We have determined that this rule will not affect Tribes or Tribal lands.

List of Subjects in 50 CFR Part 17

Endangered and threatened species, Exports, Imports, Plants, Reporting and recordkeeping requirements, Transportation, Wildlife.

Regulation Promulgation

For the reasons given in the preamble, we amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

■ 1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 1531–1544; and 4201–4245, unless otherwise noted.

■ 2. In § 17.11, in paragraph (h), amend the List of Endangered and Threatened Wildlife, by:

■ a. Under MAMMALS, revising the entries for ''Kangaroo rat, San Bernardino Merriam's'' and ''Kangaroo rat, Stephens' '';

■ b. Under BIRDS, revising the entries for ''Coot, Hawaiian (alae keokeo)'', ''Pigeon, Puerto Rican plain'', ''Plover, western snowy [Pacific Coast population DPS]'', ''Stilt, Hawaiian'', ''Tern, California least'', and ''Towhee, Inyo California'';

■ c. Under REPTILES, revising the entry for ''Boa, Puerto Rican'';

■ d. Under AMPHIBIANS, revising the entries for ''Salamander, desert slender'', ''Toad, arroyo (=arroyo southwestern)'', and ''Toad, Houston''; and

■ e. Under INSECTS, revising the entry for ''Butterfly, El Segundo blue''.

The revisions read as follows:

§ 17.11 Endangered and threatened wildlife.

* * * * *

(h) * * *

Common name	Scientific name	Where listed	Status	Listing citations and applicable rules
		Mammals

■ 3. Amend § 17.12, in paragraph (h), the List of Endangered and Threatened Plants, by:

■ a. Under FLOWERING PLANTS:

■ i. Revising the entry for ''*Acanthomintha obovata* ssp. *duttonii*'';

■ ii. Adding, in alphabetical order, an entry for ''*Acanthoscyphus parishii* var. *goodmaniana*'';

■ iii. Removing the entry for ''*Arabis hoffmannii*'';

■ iv. Revising the entries for ''*Arctostaphylos glandulosa* ssp. *crassifolia*'', and ''*Arctostaphylos hookeri* var. *ravenii*'';

■ v. Removing the entry for ''*Arenaria ursina*'';

■ vi. Revising the entry for ''*Astragalus clarianus*'';
■ vii. Adding, in alphabetical order, an entry for ''*Boechera hoffmannii*'';
■ viii. Revising the entries for ''*Castilleja cinerea*'', and ''*Ceanothus ferrisae*'';
■ ix. Removing the entry for ''*Centaurium namophilum*'',
■ x. Adding, in alphabetical order, entries for ''*Chloropyron maritimum* subsp. *maritimum*'', ''*Chloropyron molle* subsp. *molle*'', and ''*Chloropyron palmatum*'';
■ xi. Removing the entries for ''*Cordylanthus maritimus* ssp. *maritimus*'', ''*Cordylanthus mollis* ssp. *mollis*'', and ''*Cordylanthus palmatus*'';
■ xii. Adding, in alphabetical order, an entry for ''*Crocanthemum greenei*'';
■ xiii. Revising the entry for ''*Deinandra* (= *Hemizonia*) *conjugens*'';
■ xiv. Removing the entry for ''*Dudleya abramsii* ssp. *parva*'';
■ xv. Revising the entry for ''*Dudleya cymosa* ssp. *ovatifolia*'';
■ xvi. Adding, in alphabetical order, an entry for ''*Dudleya parva*'';
■ xvii. Revising the entry for ''*Dudleya stolonifera*'';
■ xviii. Adding, in alphabetical order, an entry for ''*Eremogone ursina*'';
■ xix. Revising the entries for ''*Eriastrum densifolium* ssp. *sanctorum*'', ''*Eriogonum kennedyi* var. *austromontanum*'', ''*Fremontodendron californicum* ssp. *decumbens*'', and ''*Grindelia fraxino-pratensis*'';
■ xx. Removing the entries for ''*Helianthemum greenei*'' and ''*Lesquerella kingii* ssp. *bernardina*'';
■ xxi. Adding, in alphabetical order, entries for ''*Nasturtium gambelii*'' and ''*Noccaea fendleri* subsp. *californica*'';
■ xxii. Revising the entry for ''*Opuntia treleasei*'';
■ xxiii. Removing the entry for ''*Oxytheca parishii* var. *goodmaniana*'';
■ xxiv. Adding, in alphabetical order, an entry for ''*Packera layneae*'';
■ xxv. Removing the entry for ''*Parvisedum leiocarpum*'';
■ xxvi. Adding, in alphabetical order, an entry for ''*Physaria kingii* subsp. *bernardina*'';
■ xxvii. Removing the entry for ''*Rorippa gambellii*'';
■ xxviii. Adding, in alphabetical order, an entry for ''*Sedella leiocarpa*'';
■ xxix. Removing the entry for ''*Senecio layneae*'';
■ xxx. Revising the entry for ''*Swallenia alexandrae*'';
■ xxxi. Removing the entry for ''*Thlaspi californicum*''; and
■ xxxii. Adding, in alphabetical order, an entry for ''*Zeltnera namophila*''.
■ b. Under CONIFERS AND ALLIES:
■ i. Removing the entry for ''*Cupressus goveniana* ssp. *goveniana*'';
■ ii. Adding, in alphabetical order, an entry for ''*Hesperocyparis goveniana*''.

The revisions and additions read as follows:

§ 17.12 Endangered and threatened plants.

* * * * *

(h) * * *

■ 4. Amend § 17.95, in paragraph (b), by

■ a. In the entry ''Inyo California Towhee (*Melozone crissalis eremophilus*)'', removing the word ''*eremophilus*'' in the heading and adding, in its place, the word ''*eremophila*''; and

■ b. In the entry ''Western Snowy Plover (*Charadrius nivosus nivosus*)—Pacific Coast Population'':

■ i. Revising the heading;

■ ii. Revising the introductory text of paragraph (2); and
■ iii. Revising the introductory text of paragraphs (6), (13), (26), and (53).

These revisions read as follows:

§ 17.95 Critical habitat—fish and wildlife.

* * * * *

(b) * * *

* * * * *

Western Snowy Plover [Pacific Coast DPS] (*Anarhynchus nivosus nivosus*)

* * * * *

(2) Within these areas, the primary constituent elements of the physical or biological features essential to the conservation of the western snowy plover [Pacific coast DPS] are sandy beaches, dune systems immediately inland of an active beach face, salt flats, mud flats, seasonally exposed gravel bars, artificial salt ponds and adjoining levees, and dredge spoil sites, with:

■ 5. Amend § 17.96, in paragraph (a), by:
■ a. In the entry ''Family Caryophyllaceae: *Arenaria ursina* (Bear Valley sandwort)'':
■ i. Removing the word ''*Arenaria*'' in the heading and adding, in its place, the word ''*Eremogone*'';
■ ii. Revising paragraph (1);
■ iii. Revising the introductory text of paragraph (2); and
■ iv. Revising the introductory text of paragraphs (5), (6)(iii), (7)(iii), (8)(ii), (9)(iii), (10)(iv), (11)(iii), (12)(iii), (13)(ii), and (14)(iii); and
■ b. In the entry ''Family Orobanchaceae: *Castilleja cinerea* (ash-gray Indian paintbrush)'', removing the word ''Indian'' in the heading; and
■ c. In the entry ''Family Gentianaceae: *Centaurium namophilum* (spring-loving centaury)'', removing the words ''*Centaurium namophilum*'' in the heading and adding, in their place, the words ''*Zeltnera namophila*''; and
■ d. In the entry ''Family Scrophulariaceae: *Cordylanthus mollis* ssp. *mollis* (soft bird's-beak)'':
■ i. Removing the words in the heading ''Scrophulariaceae: *Cordylanthus mollis* ssp. *mollis*'' and adding, in their place, the words ''Orobanchaceae: *Chloropyron molle* subsp. *molle*'';
■ ii. In the introductory text of paragraph (2), removing the words ''*Cordylanthus mollis* ssp. *mollis*'' and adding, in their place, the words ''*Chloropyron molle* subsp. *molle*'';
■ iii. In the introductory text of paragraph (5), removing the words ''*Cordylanthus mollis* ssp. *mollis*'' and adding, in their place, the words ''*Chloropyron molle* subsp. *molle*'';
■ iv. In paragraphs (6) introductory text, (6)(ii), (7) introductory text, (7)(ii), (8) introductory text, (8)(ii), (9) introductory text, (9)(ii), (10) introductory text, and (10)(ii), removing the words ''*Cordylanthus mollis* ssp. *mollis*'' and adding, in their place, the words ''*Chloropyron molle* subsp. *molle*''; and
■ e. In the entry ''Family Polygonaceae: *Eriogonum kennedyi* var. *austromontanum* (Southern mountain wild-buckwheat)'',
■ i. Removing the hyphenated word ''wild-buckwheat'' in the heading and adding, in its place, the word ''buckwheat''; and
■ ii. Revising the introductory text of paragraphs (5), (6)(iii), (7)(ii), (8)(iii), (9)(iv), (10)(iii), (11)(iii), and (12)(ii); and
■ f. In the entry ''Family Asteraceae: *Grindelia fraxino-pratensis* (Ash Meadows gumplant)'', removing the hyphenated word ''*fraxino-pratensis*'' in the heading and adding, in its place, the word ''*fraxinipratensis*''; and
■ g. In the entry ''Family Brassicaceae: *Lesquerella kingii* ssp. *bernardina* (San Bernardino Mountains bladderpod)'':
■ i. Removing the words ''*Lesquerella kingii* ssp.'' in the heading and adding, in their place, the words ''*Physaria kingii* subsp.'';
■ ii. In the introductory text of paragraph (2), removing the words ''*Lesquerella kingii* ssp.'' and adding, in their place, the words ''*Physaria kingii* subsp.''; and
■ iii. Revising the introductory text of paragraph (5)(iv); and
■ h. In the entry ''Family Polygonaceae: *Oxytheca parishii* var. *goodmaniana* (Cushenbury oxytheca)'':
■ i. Removing the words ''*Oxytheca parishii*'' in the heading and adding, in their place, the words ''*Acanthoscyphus parishii*'';
■ ii. In the introductory text of paragraph (2), removing the word ''*Oxytheca*'' and adding, in its place, the word ''*Acanthoscyphus*''; and
■ iii. Revising the introductory text of paragraph (4)(xxxi); and
■ i. In the entry ''Family Brassicaceae: *Thlaspi californicum* (Kneeland Prairie penny-cress)'':
■ i. Revising the heading;
■ ii. In the introductory text of paragraph (2), removing the words ''*Thlaspi californicum*'' and adding, in their place, the words ''*Noccaea fendleri* subsp. *californica*'';
■ iii. In paragraph (2)(iv), removing the words ''*Thlaspi californicum*'' and adding, in their place, the words ''*Noccaea fendleri* subsp. *californica*''; and
■ iv. Revising introductory text of paragraph (4)(ii).

The revisions read as follows:

§ 17.96 Critical habitat—plants.

(a) * * *

* * * * *

Family Caryophyllaceae: *Eremogone ursina* (Bear Valley sandwort)

(1) Critical habitat units for *Eremogone ursina* are found in San Bernardino County, California. The maps provided are for informational purposes only. *Note:* The critical habitat units include ''ARUR'' as a unique identifier; ''ARUR'' is the identifier for *Eremogone ursina.*

(2) The primary constituent elements of critical habitat for *Eremogone ursina* are the habitat components that provide:

Brian Nesvik,

Director, U.S. Fish and Wildlife Service.

[FR Doc. 2026–22682 Filed 11–5–26; 8:45 am]

BILLING CODE 4333–15–P

Proposed Rules

Federal Register
Vol. 91, No. 214
Friday, November 6, 2026

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2026–13801; Project Identifier MCAI–2025–01538–T]

RIN 2120–AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2024–19–03, which applies to certain Airbus SAS Model A350–941 and –1041 airplanes. AD 2024–19–03 requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. Since the FAA issued AD 2024–19–03, the FAA has determined that new or more restrictive airworthiness limitations are necessary. This proposed AD would continue to require certain actions in AD 2024–19–03 and would require revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by December 21, 2026.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2026–13801; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For European Union Aviation Safety Agency (EASA) material identified in this proposed AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.* It is also available at *regulations.gov* under Docket No. FAA–2026–13801.
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

FOR FURTHER INFORMATION CONTACT: Camille Seay, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 817–222–5149; email: *camille.l.seay@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments using a method listed under the **ADDRESSES** section. Include ''Docket No. FAA–2026–13801; Project Identifier MCAI–2025–01538–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to regulations.gov, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Camille Seay, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 817–222–5149; email: *camille.l.seay@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2024–19–03, Amendment 39–22845 (89 FR 82493, October 11, 2024) (AD 2024–19–03), for Airbus SAS Model A350–941 and –1041 airplanes with an original airworthiness certificate or original export certificate of airworthiness issued on or before November 30, 2023. AD 2024–19–03 was prompted by an MCAI originated by EASA, which is the Technical Agent for the Member States of the European Union. EASA issued EASA AD 2024–0005, dated January 5, 2024 (EASA 2024–0005), to correct an unsafe condition.

AD 2024–19–03 requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. The FAA issued AD 2024–19–03 to address reduced structural integrity of the airplane. The unsafe condition, if not addressed, could result in loss of structural integrity of the airplane.

Actions Since AD 2024–19–03 Was Issued

Since the FAA issued AD 2024–19–03, EASA superseded EASA AD 2024–0005 with EASA AD 2025–0204, dated September 19, 2025 (EASA AD 2025–0204), for all Airbus SAS Model A350–941 and –1041 airplanes. EASA AD 2025–0204 states that new or more restrictive airworthiness limitations have been developed, as specified in Airbus A350 Airworthiness Limitations Section (ALS) Part 2, Damage Tolerant Airworthiness Limitation Items (DT–ALI), Revision 11, dated July 2, 2025.

EASA also issued EASA AD 2026–0034, dated February 23, 2026 (EASA AD 2026–0034), for all Airbus SAS Model A350–941 and –1041 airplanes. EASA AD 2026–0034 states that new or more restrictive airworthiness limitations have been developed, as specified in Airbus A350 ALS Part 2, Damage Tolerant Airworthiness Limitation Items (DT–ALI), Variation 11.1, dated December 1, 2025.

EASA AD 2026–0034 also specifies that it requires tasks (limitations) already required by EASA AD 2025–0204, and that incorporation of EASA AD 2026–0034 invalidates (terminates) prior instructions for those. Therefore, for this AD where EASA AD 2026–0034 affects the same airworthiness limitations as those in EASA AD 2025–0204, the airworthiness limitations referenced in EASA AD 2026–0034 prevail.

Airplanes with an original airworthiness certificate or original export certificate of airworthiness issued after December 1, 2025, must comply with the airworthiness limitations specified as part of the approved type design and referenced on the type certificate data sheet; this proposed AD therefore does not include those airplanes in the applicability.

The FAA is proposing this AD to address the unsafe condition on these products. You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2026–13801.

Material Incorporated by Reference Under 1 CFR Part 51

EASA AD 2025–0204 specifies new or more restrictive airworthiness limitations for airplane structures and safe life limits.

EASA AD 2026–0034 specifies additional new or more restrictive airworthiness limitations for airplane structures and safe life limits.

This proposed AD would also require EASA AD 2024–0005, which the Director of the Federal Register approved for incorporation by reference as of November 15, 2024 (89 FR 82493, October 11, 2024)..

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would retain certain requirements of AD 2024–19–03. This proposed AD would also require revising the existing maintenance or inspection program, as applicable, to incorporate additional new or more restrictive airworthiness limitations, which are specified in EASA AD 2025–0204 and EASA AD 2026–0034 already described, as proposed for incorporation by reference. Any differences with EASA AD 2025–0204 and EASA AD 2026–0034 are identified as exceptions in the regulatory text of this proposed AD.

This proposed AD would require revisions to certain operator maintenance documents to include new actions (*e.g.,* inspections). Compliance with these actions is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by this proposed AD, the operator may not be able to accomplish the actions described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an alternative method of compliance (AMOC) according to paragraph (m)(1) of this proposed AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to retain the Incorporation by Reference (IBR) of EASA AD 2024–0005 and incorporate EASA AD 2025–0204 and EASA AD 2026–0034 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2024–0005, EASA AD 2025–0204, and EASA AD 2026–0034 through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in EASA AD 2024–0005, EASA AD 2025–0204, or EASA AD 2026–0034 does not mean that operators need to comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this proposed AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in EASA AD 2024–0005, EASA AD 2025–0204, or EASA AD 2026–0034. Material required by EASA AD 2024–0005 is available at *regulations.gov* by searching for and locating Docket No. FAA–2024–1694, and material required by EASA AD 2025–0204 and EASA AD 2026–0034 for compliance will be available at *regulations.gov* by searching for and locating Docket No. FAA–2026–13801 after the FAA final rule is published.

Airworthiness Limitation ADs Using the New Process

The FAA's process of incorporating by reference MCAI ADs as the primary source of information for compliance with corresponding FAA ADs has been limited to certain MCAI ADs (primarily those with service bulletins as the primary source of information for accomplishing the actions required by the FAA AD). However, the FAA is now expanding the process to include MCAI ADs that require a change to airworthiness limitation documents, such as airworthiness limitation sections.

For these ADs that incorporate by reference an MCAI AD that changes airworthiness limitations, the FAA requirements are unchanged. Operators must revise the existing maintenance or inspection program, as applicable, to incorporate the information specified in the new airworthiness limitation document. The airworthiness limitations must be followed according to 14 CFR 91.403(c) and 91.409(e).

The previous format of the airworthiness limitation ADs included a paragraph that specified that no alternative actions (*e.g.,* inspections) or intervals may be used unless the actions and intervals are approved as an AMOC in accordance with the procedures

specified in the AMOCs paragraph under ''Additional AD Provisions.'' This new format includes a ''New Provisions for Alternative Actions and Intervals'' paragraph that does not specifically refer to AMOCs, but operators may still request an AMOC to use an alternative action or interval.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 38 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

The FAA estimates the total cost per operator for the retained actions from AD 2024–19–03 to be $7,650 (90 work-hours × $85 per work-hour).

The FAA has determined that revising the existing maintenance or inspection program takes an average of 90 work-hours per operator, although the agency recognizes that this number may vary from operator to operator. Since operators incorporate maintenance or inspection program changes for their affected fleet(s), the FAA has determined that a per-operator estimate is more accurate than a per-airplane estimate.

The FAA estimates the total cost per operator for the new proposed actions to be $7,650 (90 work-hours × $85 per work-hour).

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2024–19–03, Amendment 39–22845 (89 FR 82493, October 11, 2024); and

■ b. Adding the following new AD:

Airbus SAS: Docket No. FAA–2026–13801; Project Identifier MCAI–2025–01538–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by December 21, 2026.

(b) Affected ADs

This AD replaces AD 2024–19–03, Amendment 39–22845 (89 FR 82493, October 11, 2024) (AD 2024–19–03).

(c) Applicability

This AD applies to Airbus SAS Model A350–941 and –1041 airplanes, certificated in any category, with an original airworthiness certificate or original export certificate of airworthiness issued on or before December 1, 2025.

(d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks.

(e) Unsafe Condition

This AD was prompted by a determination that new or more restrictive airworthiness limitations are necessary. The FAA is issuing this AD to address reduced structural integrity of the airplane. The unsafe condition, if not addressed, could result in loss of structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Revision of the Existing Maintenance or Inspection Program, With a New Terminating Action

This paragraph restates the requirements of paragraph (n) of AD 2024–19–03, with a new terminating action. For airplanes with an original airworthiness certificate or original export certificate of airworthiness issued on or before November 30, 2023: Except as specified in paragraph (h) of this AD, comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2024–0005, dated January 5, 2024 (EASA AD 2024–0005). Accomplishing the revision of the existing maintenance or inspection program required by paragraph (j) of this AD terminates the requirements of this paragraph.

(h) Retained Exceptions to EASA AD 2024–0005, With No Changes

This paragraph restates the exceptions specified in paragraph (o) of AD 2024–19–03, with no changes.

(1) This AD does not adopt the requirements specified in paragraphs (1) and (2) of EASA AD 2024–0005.

(2) Paragraph (3) of EASA AD 2024–0005 specifies revising ''the approved AMP,'' within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, within 90 days after November 15, 2024 (the effective date of AD 2024–19–03).

(3) The initial compliance time for doing the tasks specified in paragraph (3) of EASA AD 2024–0005 is at the applicable ''limitations'' and ''associated thresholds'' as incorporated by the requirements of paragraph (3) of EASA AD 2024–0005, or within 90 days after November 15, 2024 (the effective date of AD 2024–19–03), whichever occurs later.

(4) This AD does not adopt the provisions specified in paragraphs (4) and (5) of EASA AD 2024–0005.

(5) This AD does not adopt the ''Remarks'' section of EASA AD 2024–0005.

(i) Retained Provisions for Alternative Actions and Intervals, With a New Exception

This paragraph restates the requirements of paragraph (p) of AD 2024–19–03, with a new exception. Except as required by paragraph (j) of this AD, after the existing maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (*e.g.,* inspections) and intervals are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2024–0005.

(j) New Revision of the Existing Maintenance or Inspection Program

Except as specified in paragraph (k) of this AD: Comply with all required actions and compliance times specified in, and in

accordance with, EASA AD 2025–0204, dated September 19, 2025 (EASA AD 2025–0204); and EASA AD 2026–0034, dated February 23, 2026 (EASA AD 2026–0034). Where EASA AD 2026–0034 affects the same airworthiness limitations as those in EASA AD 2025–0204, the airworthiness limitations referenced in EASA AD 2026–0034 prevail. Accomplishing the revision of the existing maintenance or inspection program required by this paragraph terminates the requirements of paragraph (g) of this AD.

(k) Exceptions to EASA AD 2025–0204 and EASA AD 2026–0034

(1) This AD does not adopt the requirements specified in paragraphs (1) and (2) of EASA AD 2025–0204 and of EASA AD 2026–0034.

(2) Paragraph (3) of EASA AD 2025–0204 and EASA AD 2026–0034 specifies revising the approved aircraft maintenance program (AMP) within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, within 90 days after the effective date of this AD.

(3) The initial compliance time for doing the tasks specified in paragraph (3) of EASA AD 2025–0204 and EASA AD 2026–0034 is at the applicable limitations and associated thresholds as incorporated by the requirements of paragraph (3) of EASA AD 2025–0204 and EASA AD 2026–0034, or within 90 days after the effective date of this AD, whichever occurs later.

(4) This AD does not adopt the provisions specified in paragraphs (4) and (5) of EASA AD 2025–0204.

(5) This AD does not adopt the provisions specified in paragraph (4) of EASA AD 2026–0034.

(6) This AD does not adopt the ''Remarks'' section of EASA AD 2025–0204 and EASA AD 2026–0034.

(l) New Provisions for Alternative Actions and Intervals

After the existing maintenance or inspection program has been revised as required by paragraph (j) of this AD, no alternative actions (*e.g.,* inspections) and intervals are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2025–0204 and EASA AD 2026–0034.

(m) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, AIR–520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (n) of this AD and email to: *AMOC@faa.gov*. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, AIR–520, Continued Operational Safety Branch, FAA; or EASA; or Airbus SAS's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(n) Additional Information

For more information about this AD, contact Camille Seay, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 817–222–5149; email: *camille.l.seay@faa.gov*.

(o) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following material was approved for IBR on [DATE 35 DAYS AFTER PUBLICATION OF THE FINAL RULE].

(i) European Union Aviation Safety Agency (EASA) AD 2025–0204, dated September 19, 2025.

(ii) EASA AD 2026–0034, dated February 23, 2026.

(4) The following material was approved for IBR on November 15, 2024 (89 FR 82493, October 11, 2024).

(i) EASA AD 2024–0005, dated January 5, 2024.

(ii) [Reserved]

(5) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu*. You may find this material on the EASA website at *ad.easa.europa.eu*.

(6) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(7) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov*.

Issued on November 3, 2026.

Brian Knaup,

Acting Deputy Director, Integrated Certificate Management Division, Aircraft Certification Service.

[Docket No. FAA–2026–13803; Project Identifier MCAI–2025–01036–T]

RIN 2120–AA64

Airworthiness Directives; Dassault Aviation Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2024–15–04, which applies to certain Dassault Aviation Model FALCON 7X airplanes. AD 2024–15–04 requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. Since the FAA issued AD 2024–15–04, the FAA has determined that new or more restrictive airworthiness limitations are necessary. This proposed AD would continue to require certain actions in AD 2024–15–04 and would require revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by December 21, 2026.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2026–13803; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For European Union Aviation Safety Agency (EASA) material identified in this proposed AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.* It is also available at *regulations.gov* under Docket No. FAA–2026–13803.
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

FOR FURTHER INFORMATION CONTACT: Christopher Spencer, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7332; email: *9-AVS-AIR-BACO-COS@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments using a method listed under the **ADDRESSES** section. Include ''Docket No. FAA–2026–13803; Project Identifier MCAI–2025–01036–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Christopher Spencer, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7332; email: *9-AVS-AIR-BACO-COS@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2024–15–04, Amendment 39–22795 (89 FR 73264, September 10, 2024) (AD 2024–15–04), for certain Dassault Aviation Model FALCON 7X airplanes. AD 2024–15–04 was prompted by an MCAI originated by EASA, which is the Technical Agent for the Member States of the European Union. EASA issued EASA AD 2024–0033, dated January 31, 2024 (EASA AD 2024–0033), to correct an unsafe condition.

AD 2024–15–04 requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations, as specified in Dassault Falcon 7X Maintenance Manual, Airworthiness Limitations, Chapter 5–40 (DGT 107838), Revision 12, dated June 2023. The FAA issued AD 2024–15–04 to address reduced structural integrity and reduced control of the airplane due to the failure of system components.

AD 2024–15–04 specifies that accomplishing the revision required by that AD terminates certain requirements of AD 2014–16–23, Amendment 39–17947 (79 FR 52545, September 4, 2014) (AD 2014–16–23). This proposed AD would therefore continue to allow that terminating action.

Actions Since AD 2024–15–04 Was Issued

Since the FAA issued AD 2024–15–04, EASA superseded EASA AD 2024–0033 with EASA AD 2025–0122, dated May 28, 2025, which in turn was superseded by EASA AD 2025–0229, dated October 20, 2025 (EASA AD 2025–0229). Subsequently, EASA superseded EASA AD 2025–0229 with EASA AD 2026–0171, dated September 4, 2026 (EASA AD 2026–0171) (also referred to as the MCAI), for all Dassault Aviation Model FALCON 7X airplanes. Airplanes with an original airworthiness certificate or original export certificate of airworthiness issued after September 1, 2026, must comply with the airworthiness limitations specified as part of the approved type design and referenced on the type certificate data sheet; this proposed AD therefore does not include those airplanes in the applicability. The MCAI states that new or more restrictive airworthiness limitations have been developed, as specified in Dassault Falcon 7X Maintenance Manual, Airworthiness Limitations, Chapter 5–40 (DGT 107838), Revision 15, dated June 2026.

The FAA is proposing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2026–13803.

Material Incorporated by Reference Under 1 CFR Part 51

EASA AD 2026–0171 specifies new or more restrictive airworthiness limitations for airplane structures and safe life limits.

This proposed AD would also require EASA AD 2024–0033, which the Director of the Federal Register approved for incorporation by reference as of October 15, 2024 (89 FR 73264, September 10, 2024).

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would retain certain requirements of AD 2024–15–04. This proposed AD would also require revising the existing maintenance or inspection program, as applicable, to incorporate additional new or more restrictive airworthiness limitations, which are specified in EASA AD 2026–0171 already described, as proposed for incorporation by reference. Any differences with EASA AD 2026–0171 are identified as exceptions in the regulatory text of this proposed AD.

This proposed AD would require revisions to certain operator

maintenance documents to include new actions (*e.g.,* inspections) and Critical Design Configuration Control Limitations (CDCCLs). Compliance with these actions and CDCCLs is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by this proposed AD, the operator may not be able to accomplish the actions described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an alternative method of compliance (AMOC) according to paragraph (n)(1) of this proposed AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to retain the Incorporation by Reference (IBR) of EASA AD 2024–0033 and incorporate EASA AD 2026–0171 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2024–0033 and EASA AD 2026–0171 through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in EASA AD 2024–0033 or EASA AD 2026–0171 does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this proposed AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in EASA AD 2024–0033 or EASA AD 2026–0171. Material required by EASA AD 2024–0033 is available at *regulations.gov* by searching for and locating Docket No. FAA–2024–1290, and material required by EASA AD 2026–0171 for compliance will be available at *regulations.gov* by searching for and locating Docket No. FAA–2026–13803 after the FAA final rule is published.

Airworthiness Limitation ADs Using the New Process

The FAA's process of incorporating by reference MCAI ADs as the primary source of information for compliance with corresponding FAA ADs has been limited to certain MCAI ADs (primarily those with service bulletins as the primary source of information for accomplishing the actions required by the FAA AD). However, the FAA is now expanding the process to include MCAI ADs that require a change to airworthiness limitation documents, such as airworthiness limitation sections.

For these ADs that incorporate by reference an MCAI AD that changes airworthiness limitations, the FAA requirements are unchanged. Operators must revise the existing maintenance or inspection program, as applicable, to incorporate the information specified in the new airworthiness limitation document. The airworthiness limitations must be followed according to 14 CFR 91.403(c) and 91.409(e).

The previous format of the airworthiness limitation ADs included a paragraph that specified that no alternative actions (*e.g.,* inspections), intervals, or CDCCLs may be used unless the actions, intervals, and CDCCLs are approved as an AMOC in accordance with the procedures specified in the AMOCs paragraph under ''Additional AD Provisions.'' This new format includes a ''New Provisions for Alternative Actions, Intervals, and CDCCLs'' paragraph that does not specifically refer to AMOCs, but operators may still request an AMOC to use an alternative action, interval, or CDCCL action or interval.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 161 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

The FAA estimates the total cost per operator for the retained actions from AD 2024–15–04 to be $7,650 (90 work-hours × $85 per work-hour).

The FAA has determined that revising the existing maintenance or inspection program takes an average of 90 work-hours per operator, although the agency recognizes that this number may vary from operator to operator. Since operators incorporate maintenance or inspection program changes for their affected fleet(s), the FAA has determined that a per-operator estimate is more accurate than a per-airplane estimate.

The FAA estimates the total cost per operator for the new proposed actions to be $7,650 (90 work-hours × $85 per work-hour).

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2024–15–04, Amendment 39–22795 (89 FR 73264, September 10, 2024); and

■ b. Adding the following new AD:

Dassault Aviation: Docket No. FAA–2026–13803; Project Identifier MCAI–2025–01036–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by December 21, 2026.

(b) Affected ADs

(1) This AD replaces AD 2024–15–04, Amendment 39–22795 (89 FR 73264, September 10, 2024) (AD 2024–15–04).

(2) This AD affects AD 2014–16–23, Amendment 39–17947 (79 FR 52545, September 4, 2014) (AD 2014–16–23).

(c) Applicability

This AD applies to Dassault Aviation Model FALCON 7X airplanes, certificated in any category, with an original airworthiness certificate or original export certificate of airworthiness issued on or before September 1, 2026.

Note 1 to paragraph (c): Model FALCON 7X airplanes with modification M1000 incorporated are commonly referred to as ''Model FALCON 8X'' airplanes as a marketing designation.

(d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks.

(e) Unsafe Condition

This AD was prompted by a determination that new or more restrictive airworthiness limitations are necessary. The FAA is issuing this AD to address reduced structural integrity and reduced control of the airplane due to the failure of system components.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Revision of the Existing Maintenance or Inspection Program, With a New Terminating Action

This paragraph restates the requirements of paragraph (j) of AD 2024–15–04, with a new terminating action. For airplanes with an original airworthiness certificate or original export certificate of airworthiness issued on or before September 7, 2023, except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2024–0033, dated January 31, 2024 (EASA AD 2024–0033). Accomplishing the revision of the existing maintenance or inspection program required by paragraph (j) of this AD terminates the requirements of this paragraph.

(h) Retained Exceptions to EASA AD 2024–0033, With No Changes

This paragraph restates the exceptions specified in paragraph (k) of AD 2024–15–04, with no changes.

(1) This AD does not adopt the requirements specified in paragraphs (1) and (2) of EASA AD 2024–0033.

(2) Paragraph (3) of EASA AD 2024–0033 specifies revising ''the approved AMP'' within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, within 90 days after October 15, 2024 (the effective date of AD 2024–15–04).

(3) The initial compliance time for doing the tasks specified in paragraph (3) of EASA AD 2024–0033 is at the applicable ''limitations'' and ''associated thresholds'' as incorporated by the requirements of paragraph (3) of EASA AD 2024–0033, or within 90 days after October 15, 2024 (the effective date of AD 2024–15–04), whichever occurs later.

(4) This AD does not adopt the provisions specified in paragraphs (4) and (5) of EASA AD 2024–0033.

(5) This AD does not adopt the ''Remarks'' section of EASA AD 2024–0033.

(i) Retained Restrictions on Alternative Actions, Intervals, and Critical Design Configuration Control Limitations (CDCCLs), With a New Exception

This paragraph restates the requirements of paragraph (l) of AD 2024–15–04, with a new exception. Except as required by paragraph (j) of this AD, after the maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (*e.g.,* inspections), intervals, or CDCCLs are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2024–0033.

(j) New Revision of the Existing Maintenance or Inspection Program

Except as specified in paragraph (k) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2026–0171, dated September 4, 2026 (EASA AD 2026–0171). Accomplishing the revision of the existing maintenance or inspection program required by this paragraph terminates the requirements of paragraph (g) of this AD.

(k) Exceptions to EASA AD 2026–0171

(1) This AD does not adopt the requirements specified in paragraphs (1) and (2) of EASA AD 2026–0171.

(2) Paragraph (3) of EASA AD 2026–0171 specifies revising the approved aircraft maintenance program (AMP) within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, within 90 days after the effective date of this AD.

(3) The initial compliance time for doing the tasks specified in paragraph (3) of EASA AD 2026–0171 is at the applicable ''limitations'' and ''associated thresholds'' as incorporated by the requirements of paragraph (3) of EASA AD 2026–0171, or within 90 days after the effective date of this AD, whichever occurs later.

(4) This AD does not adopt the provisions specified in paragraphs (4) and (5) of EASA AD 2026–0171.

(5) This AD does not adopt the ''Remarks'' section of EASA AD 2026–0171.

(l) New Provisions for Alternative Actions, Intervals, and CDCCLs

After the existing maintenance or inspection program has been revised as required by paragraph (j) of this AD, no alternative actions (*e.g.,* inspections), intervals, and CDCCLs are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2026–0171.

(m) Terminating Action for Certain Requirements of AD 2014–16–23

Accomplishing the actions required by paragraphs (g) or (j) of this AD terminates the requirements of paragraph (q) of AD 2014–16–23.

(n) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (o) of this AD and email to: *AMOC@faa.gov.*

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or EASA; or Dassault's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(o) Additional Information

For more information about this AD, contact Christopher Spencer, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7332; email: *9-AVS-AIR-BACO-COS@faa.gov.*

(p) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following material was approved for IBR on [DATE 35 DAYS AFTER PUBLICATION OF THE FINAL RULE].

(i) European Union Aviation Safety Agency (EASA) AD 2026–0171, dated September 4, 2026.

(ii) [Reserved]

(4) The following material was approved for IBR on October 15, 2024 (89 FR 73264, September 10, 2024).

(i) EASA AD 2024–0033, dated January 31, 2024.

(ii) [Reserved]

(5) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.*

(6) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des

Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(7) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov*.

Issued on November 3, 2026.

Steven W. Thompson,

Acting Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2026–12541; Airspace Docket No. 26–AWP–11]

RIN 2120–AA66

Establishment of Class E Airspace, Shelter Cove Airport, Shelter Cove, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to establish a Class E airspace area extending upwards from 700 feet above the surface of the earth at Shelter Cove Airport (K0Q5), Shelter Cove, CA. K0Q5 is transitioning from a visual flight rules (VFR) to an instrument flight rules (IFR) airport. Additionally, this action would establish a controlled airspace area for the airport, providing coverage to arriving IFR aircraft descending below 1,500 feet above the surface and departing IFR aircraft until reaching 1,200 feet above the surface.

DATES: Comments must be received on or before December 21, 2026.

ADDRESSES: Send comments identified by FAA Docket No. FAA–2026–12541 and Airspace Docket No. 26–AWP–11 using any of the following methods:

* *Federal eRulemaking Portal:* Go to *www.regulations.gov* and follow the online instructions for sending your comments electronically.

* *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W58–213, West Building, 5th Floor, Washington, DC 20590–0001.

* *Hand Delivery or Courier:* Take comments to Docket Operations in Room W58–213 of the West Building, 5th Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

* *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at *www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W58–213 of the West Building, 5th Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FAA Order JO 7400.11M, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications/*. You may also contact the Airspace Regulation Group, Policy Directorate, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20597; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Keith T. Adams, Federal Aviation Administration, Western Service Center, Operations Support Group, 2200 S 216th Street, Des Moines, WA 98198; telephone (206) 231–2428.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes Class E Airspace area for Shelter Cove Airport, Shelter Cove, CA.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy*.

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments/*.

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Operations office (see **ADDRESSES** section for address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the office of the Northwest Mountain Regional Office of the Federal Aviation Administration, Air Traffic Organization, Western Service Center, Operations Support Group, 2200 S 216th Street, Des Moines, WA 98198.

Incorporation by Reference

Class E5 airspace areas are published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11M, dated July 30, 2026, and effective September 15, 2026. These updates would be published in the next update to FAA Order JO 7400.11. FAA Order JO

7400.11M, which lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points, is publicly available as listed in the **ADDRESSES** section of this document.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 to establish a Class E airspace area extending upward from 700 feet above the surface of the earth at Shelter Cove Airport, Shelter Cove, CA.

K0Q5 is establishing an Area Navigation (RNAV) (Global Positioning System [GPS])-A approach procedure to allow IFR operations at the airport below basic VFR weather minimums. The FAA proposes to establish a Class E airspace area extending upward from 700 feet above the surface to assist IFR aircraft on the instrument approach procedure descending below 1,500 feet above the surface. The proposed Class E airspace area would also accommodate the RNAV (GPS)-A approach missed approach segment until the aircraft reaches 1,200 feet above the surface.

Additionally, K0Q5 is establishing an instrument obstacle departure procedure allowing IFR aircraft to depart between the northwest counterclockwise to the south of the airport. The FAA proposes to establish a Class E airspace area extending upwards from 700 feet above the surface to accommodate departing IFR aircraft climbing to 1,200 feet above the surface.

The establishment of the proposed K0Q5's Class E airspace area would assist IFR aircraft transitioning within the enroute and terminal environments of the national airspace system.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Order 2100.6B, ''Rulemaking and Guidance Procedure'' (March 10, 2025); and (3) is expected to result in, at most, de minimis costs from compliance with applicable operating requirements or minor flight rerouting for operators choosing to navigate around the controlled airspace. Since these proposed amendments are routine and the expected impact to operators is de minimis, the FAA certifies that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1G, ''FAA National Environmental Policy Act Implementing Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11M, Airspace Designations and Reporting Points, dated July 30, 2026, and effective September 15, 2026, is amended as follows:

Paragraph 6005 Class E Airspace Area Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

AWP CA E5 Shelter Cove, CA [New]

Shelter Cove Airport, CA
(Lat. 40°01′41″ N, long. 124°04′28″ W)

That airspace extending upward from 700 feet above the surface within a 3.7-mile radius of the airport, within a 5.8-mile radius between the airport's 149° bearing clockwise to 300° bearing, and within 1 mile north and 1.1 miles either side of the airport's 149° bearing extending 6.6 miles southeast.

Coast Guard

33 CFR Part 117

[Docket No. USCG–2026–1338]

RIN 1625–AA09

Drawbridge Operation Regulation; Harlem River, Between the Boroughs of Manhattan and the Bronx, New York City, New York

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to temporarily modify the operating regulation that governs the Macombs Dam Bridge across the Harlem River, mile 3.2, between the Boroughs of Manhattan and the Bronx, New York City, New York. The bridge owner, New York City Department of Transportation (NYCDOT), submitted a request on August 31, 2026, to allow the bridge to remain in the closed position from February 1, 2027, through November 30, 2027, and facilitate rehabilitation of the bridge structure. We invite your comments on this proposed rulemaking.

DATES: Comments and related material must be received by the Coast Guard on or before December 7, 2026.

The Coast Guard anticipates that this proposed rule will be effective from 12:01 a.m. on February 1, 2027, through 11:59 p.m. on November 30, 2027.

ADDRESSES: You may submit comments identified by docket number USCG–2026–1338 at *https://www.regulations.gov.*

See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section below for instructions on submitting comments. This notice of proposed rulemaking with its plain-language, 100-word-or-less proposed rule summary will be available in this same docket.

FOR FURTHER INFORMATION CONTACT: If you have questions on this proposed rule, call or email Donna D. Leoce, Northeast Coast Guard District, Bridge Management Specialist, telephone number (571) 613–2415, email *Donna.D.Leoce@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
OMB Office of Management and Budget
NPRM Notice of Proposed Rulemaking
§ Section
U.S.C. United States Code

NYCDOT New York City Department of Transportation

II. Background, Purpose and Legal Basis

The Macombs Dam Bridge across the Harlem River, between the Boroughs of the Bronx and Manhattan, New York, at mile 3.2, owned and operated by NYCDOT, has a vertical clearance of 28.2 feet above mean high water when closed, unlimited when open, and a horizontal clearance of 164 feet. The proposed temporary regulation will allow the bridge to remain in the closed position from 12:01 a.m. February 1, 2027, through 11:59 p.m. November 30, 2027. The modification of the bridge schedule will allow NYCDOT to perform necessary rehabilitation to the structure of the 131-year-old bridge to ensure its safety.

Commercial vessels, including small passenger vessels and marine construction support vessels, and recreational vessels transit the Harlem River in the vicinity of the bridge. Under this proposed rule, commercial and recreational vessels that regularly use the Harlem River can still transit under the bridge in the closed position. Vessels requiring higher vertical clearance can also access the Harlem River through the waterway's confluences with the East River to the east and the Hudson River to the west. NYCDOT briefed their proposed modification of the bridge's operating schedule to the Port of New York and New Jersey Harbor Safety, Navigation, and Operations Committee. This committee, comprised of representatives of major segments of waterway users, did not object to NYCDOT's proposal.

The existing operating schedule is listed in 33 CFR 117.789(b)(1). Currently, the Macombs Dam Bridge opens on signal with at least a four-hour advance notice and does not need to open for the passage of vessel traffic from 6 a.m. to 9 a.m. and 5 p.m. to 7 p.m. Monday through Friday except federal holidays.

NYCDOT requests a modification of 33 CFR 117.789(b)(1) to allow the bridge to remain in the closed position from February 1, 2027, through November 30, 2027, while a work platform system is in place under the bridge deck to perform necessary structural rehabilitation. The work platform will reduce the vertical clearance of the bridge to no less than 24.5 feet above Mean High Water in the closed position. The platform will not obstruct the operation of the bridge's navigation lights.

III. Discussion of Proposed Rule

We propose to temporarily modify the drawbridge operating schedule in 33 CFR 117.789(b)(1) for the Macombs Dam Bridge, at mile 3.2. The proposed rule would allow the bridge to remain in the closed position from February 1, 2027, through November 30, 2027, while a work platform system is in place under the bridge deck to perform necessary structural rehabilitation. Commercial and recreational vessels that regularly use the Harlem River can still transit under the bridge given in the closed position. Vessels requiring higher vertical clearance can also access the Harlem River through the waterway's confluences with the East River to the east and the Hudson River to the west.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive Orders related to rulemaking. Below we summarize our analyses based on these statutes and Executive Orders.

A. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities for the following reasons. Commercial and recreational vessels that regularly use the Harlem River can still transit under the bridge given in the closed position. Vessels requiring higher vertical clearance can also access the Harlem River through the waterway's confluences with the East River to the east and the Hudson River to the west.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

B. Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520.).

C. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132 (Federalism), if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this proposed rule does not have tribal implications under Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments) because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

D. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule will not result in such an expenditure, we do discuss the effects of this proposed rule elsewhere in this preamble.

E. Environment

We have analyzed this rule under Department of Homeland Security

Management Directive 023–01, Rev.1, associated implementing instructions, and Environmental Planning Policy COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f). The Coast Guard has determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule promulgates the operating regulations or procedures for drawbridges. Normally such actions are categorically excluded from further review, under paragraph L49, of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1.

Neither a Record of Environmental Consideration nor a Memorandum for the Record are required for this rule. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

Submitting comments. We encourage you to submit comments at *https://www.regulations.gov.* To do so, go to *https://www.regulations.gov,* type USCG–2026–1338 in the search box and click ''Search.'' Next, look for this document in the Search Results column, and click on it. Then click on the Comment option. If your material cannot be submitted using *https://www.regulations.gov,* contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

Viewing material in docket. To view documents mentioned in this proposed rule as being available in the docket, find the docket as described in the previous paragraph, and then select ''Supporting & Related Material'' in the Document Type column. Public comments will also be placed in our online docket and can be viewed by following instructions on the *https://www.regulations.gov* Frequently Asked Questions web page. Also, if you go to the online docket and sign up for email alerts through the ''Subscribe'' option, you will be notified when comments/updates are posted, or a final rule is published.

Personal information. We accept anonymous comments. Comments we post to *https://www.regulations.gov* will include any personal information you have provided. For more about privacy and submissions in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

List of Subjects in 33 CFR Part 117

Bridges.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

■ 1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 33 CFR 1.05–1; and DHS Delegation No. 00170.1. Revision No. 1.04.

■ 2. Revise § 117.789 by adding paragraph (e) to read as follows:

§ 117.789 Harlem River

* * * * *

(e) The draw of the Macombs Dam Bridge, mile 3.2, need not open for the passage of vessels from 12:01 a.m. on February 1, 2027, through 11:59 p.m. on November 30, 2027.

Matthew Lake,

Rear Admiral (lower half), U.S. Coast Guard, Commander, Northeast Coast Guard District.

BILLING CODE 9110–04–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

RIN 0648–BO62

Fisheries of the Exclusive Economic Zone Off Alaska; Amendment 128 to the FMP for Groundfish of the Bering Sea and Aleutian Islands Management Area and Amendment 116 to the FMP for the Groundfish Fisheries of the Gulf of Alaska; Small Sablefish Release

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability; request for comments.

SUMMARY: The North Pacific Fishery Management Council (Council) submitted amendment 128 to the Fishery Management Plan (FMP) for Groundfish of the Bering Sea and Aleutian Islands Management Area (BSAI FMP) and amendment 116 to the FMP for Groundfish fisheries of the Gulf of Alaska (GOA FMP) to the Secretary of Commerce for review. If approved, these amendments would increase operational flexibility to allow vessels fishing for sablefish with fixed gear under the Individual Fishing Quota (IFQ) Program or Western Alaska Community Development (CDQ) Program to release sablefish and would revise the annual allocation process to account for sablefish discards. This action is intended to promote the goals and objectives of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), the BSAI and GOA FMPs, and other applicable laws.

DATES: Submit comments on or before January 5, 2027.

ADDRESSES: A plain language summary of this proposed action is available at *https://www.regulations.gov/docket/NOAA-NMFS-2026-2542.* You may submit comments on this document, identified by NOAA–NMFS–2026–2542, by either of the following methods:

- *Electronic Submission:* Submit electronic public comments via the Federal e-Rulemaking Portal. Visit *https://www.regulations.gov* and type NOAA–NMFS–2026–2542 in the Search box. Click on the ''Comment'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Submit written comments to Gretchen Harrington, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region NMFS. Mail comments to P.O. Box 21668, Juneau, AK 99802–1668.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *https://www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments. Enter ''N/A'' in the required fields if you wish to remain anonymous.

Electronic copies of amendment 128 to the BSAI FMP, amendment 116 to the GOA FMP, the Draft Environmental

Assessment/Regulatory Impact Analysis for Proposed Amendment 128 to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area and Proposed Amendment 116 to the Fishery Management Plan for Groundfish fisheries of the Gulf of Alaska Release of IFQ/CDQ Sablefish (referred to as the ''Analysis''), and the draft finding of no significant impact prepared for this action are available from *https://www.regulations.gov* with a search for 0648–BO62 or from the NMFS Alaska Region website at *https://www.fisheries.noaa.gov/region/alaska.*

FOR FURTHER INFORMATION CONTACT: Mason Smith, 907–586–7228, *mason.smith@noaa.gov*.

SUPPLEMENTARY INFORMATION: The Magnuson-Stevens Act requires that each regional fishery management council submit any FMP amendment it prepares to NMFS for review and approval, disapproval, or partial approval by the Secretary of Commerce. The Magnuson-Stevens Act also requires that NMFS, after a council's transmittal of an FMP amendment, immediately publish a notice in the **Federal Register** announcing that the amendment is available for public review and comment. This notice announces that proposed amendment 128 to the BSAI FMP and proposed amendment 116 to the GOA FMP are available for public review and comment.

Sablefish (*Anoplopoma fimbria*) is managed as a groundfish species under the BSAI FMP and GOA FMP. The Council prepared, and the Secretary of Commerce (Secretary) approved, the BSAI FMP and GOA FMP under the authority of the Magnuson-Stevens Act, 16 U.S.C. 1801 *et seq.* Regulations governing U.S. fisheries and implementing the BSAI FMP and GOA FMP appear at 50 CFR parts 600 and 679.

The directed sablefish fishery in Alaska is managed under the IFQ Program established in 1995 (58 FR 59375, November 9, 1993). The IFQ Program allocates a specific portion of the non-trawl total allowable catch (TAC) to individual fishermen or groups, known as quota share owners. Fishermen are then issued individual quotas, dictating the amount of sablefish they are allowed to catch over the fishing season. Issuance of quota shares under the IFQ Program was originally based on participation in the fisheries during historical qualifying periods. However, quota share is transferable and new fishery participants can purchase quota share or lease IFQ. Quota shares and the resulting IFQ are designated for specific geographic IFQ regulatory areas and vessel categories, which authorize harvest by vessels of different size categories or harvesting and processing activity as specified in regulations at § 679.40(a)(5). This system aims to prevent overfishing, reduce bycatch, and provide economic stability for fishermen.

The CDQ Program is an economic development program associated with federally managed fisheries in the BSAI management area (57 FR 54936, November 23, 1992). The purposes of the CDQ Program are (1) to provide eligible western Alaska villages with the opportunity to participate and invest in fisheries in the BSAI management area; (2) to support economic development in western Alaska; (3) to alleviate poverty and provide economic and social benefits for residents of western Alaska; and (4) to achieve sustainable and diversified local economies in western Alaska (16 U.S.C. 1855(i)(1)(A)). The CDQ Program consists of six different non-profit managing organizations (CDQ groups) representing different geographical regions in Alaska. The CDQ Program receives annual allocations of TAC for a variety of commercially valuable species in the BSAI groundfish, crab, and halibut fisheries, which are in turn allocated among the CDQ groups. Each year, prior to establishing the IFQ allocations, NMFS allocates a percentage of the fixed gear TAC in the BSAI to the CDQ Program for use in each subarea.

Beginning in 2014, there have been several years with record-breaking year classes of Alaska sablefish. By 2017, these fish had grown large enough to be caught by the commercial fleet as an overwhelming number of small fish. Juvenile sablefish tend to be smaller in size and yield a lower commercial value by weight than large fish, particularly under current market conditions. Because of the lower prices resulting from large catches of small sablefish, stakeholders appealed for management action to provide relief from the prohibition on discarding sablefish in the fixed gear sablefish IFQ fleet. Sections 3.7.1.7 of the BSAI and GOA FMPs prohibit discarding of sablefish by persons holding sablefish IFQs and those fishing under the CDQ Program.

The Council recommended amendment 128 to the BSAI FMP and amendment 116 to the GOA FMP in April 2025. These amendments would (1) revise retention requirements to allow discards of small sablefish by catcher vessels (CVs) in the IFQ and CDQ programs as authorized in regulations, (2) revise retention requirements to allow discards of sablefish by catcher/processors (C/Ps) in the CDQ Program, (3) require all sablefish discarded by vessels in the IFQ and CDQ Programs to be carefully released as specified in regulation, (4) revise the methods for determining annual IFQs to account for a sablefish discard allowance (SDA) for the BSAI and an SDA for the GOA, and (5) make non-substantive technical edits to revise the use of ''freezer longliner'' language to refer to category A quota shares and C/Ps to increase alignment with Federal regulations. As a housekeeping measure, Amendment 116 would additionally remove unnecessary language referring to the CDQ Program in the GOA FMP.

These amendments would modify the sablefish discard prohibition to allow discards of small sablefish by CVs using fixed gear. These amendments would allow C/Ps participating in the fixed gear sablefish CDQ fishery to discard sablefish by excluding them from the revised prohibition on discarding, while retaining the status quo for C/Ps participating in the fixed gear sablefish IFQ fishery to continue to discard sablefish. These amendments would establish an SDA for the BSAI and an SDA for the GOA to account for projected discard mortality of sablefish by fixed gear vessels engaged in fishing for sablefish in the IFQ and CDQ programs. Annually, the SDA would be deducted from the fixed gear TAC after any CDQ adjustments, as described in regulations, and prior to deriving sablefish IFQ. A discard mortality rate (DMR) would be recommended by the Council's Scientific and Statistical Committee and would be used to account for discard mortality towards the SDA throughout the fishery season. DMRs are estimates of the proportion of sablefish bycatch that do not survive after being returned to the sea. The cumulative sablefish mortality that accrues to the SDA is the product of a DMR multiplied by the estimated number of discarded sablefish.

These amendments are expected to have a positive impact on private sector harvesters participating in the fixed gear IFQ or CDQ sablefish fisheries due to the increased flexibility in retaining higher value fish. Because the fixed gear sablefish TAC has historically been fully allocated to the IFQ and CDQ sablefish fisheries due to the full retention requirements, the proportional SDA deductions from the regulatory area TACs would be necessary to provide a buffer mechanism to avoid exceeding the TACs. It is necessary to establish a separate SDA to account for vessel level discard estimates because accounting

for discards against IFQ permits issued is not possible.

These amendments would make housekeeping changes to revise the use of ''Freezer Longliner'' language to refer instead to category A quota shares and C/Ps, and update initial issuance language from the 1990s. These non-substantive technical changes would update language used in the FMP to increase alignment with Federal regulations. Currently, the BSAI and GOA FMPs define ''Freezer Longliner'' as, ''any vessel engaged in fishing in the fixed gear fishery which, during a given trip, utilizes freezer capacity and delivers some or all of its groundfish catch in a frozen state,'' and designates vessel categories, transfer provisions, and use and ownership provisions based on that term. To align with Federal regulations and common usage, the term ''Freezer Longliner'' would be expanded to include the term ''Catcher/processor,'' which is defined in regulations as a vessel that is used for catching fish and processing that fish (50 CFR 679.2). Additionally, for these vessels, the designation of vessel categories, transfer provisions, and use and ownership provisions will be specified as ''category A quota shares,'' which authorize an IFQ permit holder to harvest and process IFQ species on a vessel of any length (50 CFR 679.40(a)(5)(ii)(A)).

NMFS is soliciting public comments on the proposed amendment 128 to the BSAI FMP and proposed amendment 116 to the GOA FMP through the end of the comment period (see **DATES**). NMFS intends to publish in the **Federal Register** and seek public comment on a proposed rule that would implement amendments 128 and 116, following NMFS's evaluation of the proposed rule under the Magnuson-Stevens Act.

Respondents do not need to submit the same comments on amendment 128 to the BSAI FMP and amendment 116 to the GOA FMP and the proposed rule. All relevant written comments received by the end of the comment period for this notice will be considered by NMFS in the approval/disapproval decision for amendment 128 to the BSAI FMP and amendment 116 to the GOA FMP and also considered in the decision on the proposed rule and addressed in the response to comments in the final decision on the proposed rule. Comments received after the end of the comment period for this rule will not be considered in the approval/disapproval decision on amendment 128 to the BSAI FMP and amendment 116 to the GOA FMP. To be considered, comments must be received, not just postmarked or otherwise transmitted, by the last day of the comment period (see **DATES**).

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 4, 2026.

Shannon Bettridge,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Vol. 91, No. 214
Friday, November 6, 2026

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by December 7, 2026 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Food and Nutrition Administration

Title: USDA Professional Standards Training Tracker Tool (PSTTT).

OMB Control Number: 0584–0626.

Summary of Collection: This is a reinstatement of an expired information collection request. Section 306 of the Healthy Hunger-Free Kids Act of 2010 (HHFKA) requires Professional Standards for state and local school district nutrition professionals. In addition to hiring standards, mandatory annual training is required for all individuals involved in preparing school meals. To meet the training requirements and assist in locating and keeping track of training, the USDA FNA's web-based application tool with a SQL-server database is available to local educational agencies and school food authorities through the FNA public website. While training requirements are mandatory, using the USDA PSTTT to track the training is voluntary. State and local school district nutrition professionals can use any method to track and manage their training. These resources facilitate compliance with HHFKA requirements and are provided at no cost to the state, district, or school nutrition professionals.

Need and Use of the Information: State and school nutrition professionals can use the PSTTT to keep track of their training courses, learning objectives, and training hours, in accordance with HHFKA requirements. State reviewers can run reports from the PSTTT that they can use in preparation for Administrative Reviews that are conducted onsite at the school food authorities.

Description of Respondents: State, Local, or Tribal Government.

Number of Respondents: 10,006.

Frequency of Responses: Reporting: On occasion; Quarterly; Annually; Weekly; Monthly.

Total Burden Hours: 17,090.

Food and Nutrition Administration

Title: Federal Collection Methods for Supplemental Nutrition Assistance Program Recipient Claims.

OMB Control Number: 0584–0446.

Summary of Collection: This is a reinstatement of an expired information collection request. FNA is still legally required to collect this data and thereby continuing to collect it in violation of the Paperwork Reduction Act. Section 13(b) of the Food and Nutrition Act of 2008 (the Act), as amended (7 U.S.C. 2022(b)), and SNAP regulations at 7 CFR 273.18 require State agencies to refer all delinquent SNAP debts to another Federal government entity as third-party disclosure reporting to U.S. Department of the Treasury (Treasury) for collection. The Debt Collection Improvement Act of 1996 (DCIA) (Pub. L. 104–134), as amended by the Digital Accountability and Transparency Act of 2014 (Pub. L. 113–101), requires that these debts be referred to Treasury for collection when they are 120 days or more delinquent. The Treasury Offset Program (TOP), 31 CFR part 285, intercepts and offsets payments such as Federal income tax refunds and Federal salaries and applies the offset to the delinquent debt. The amount or percentage that can be offset from any payment type is set by.

Need and Use of the Information: The information is used to satisfy the requirements at Section 13(b) of the Act, as amended (7 U.S.C. 2022(b)), and SNAP regulations at 7 CFR 273.18, which requires State agencies to refer delinquent SNAP debts to Treasury for collection and notify debtors.

SNAP regulations at 7 CFR 273.18 require that State agencies establish, collect, and efficiently manage SNAP recipient claims within 120 days. Text at 7 CFR 273.18(n)(1) states that State agencies must submit debts to TOP when they are 180 days delinquent or more. However, DCIA updated this timeframe to require that eligible delinquent debts be referred to TOP within 120 days. While SNAP regulations have not yet been updated to reflect this change, States must comply with the 120-day timeframe. State agencies must submit files containing these delinquent debts to FNA weekly, which FNA then consolidates into one file and sends to Treasury each week.

The information collected under this request is used to assist:

(1) State agencies to identify eligible debts to send to TOP, request addresses for TOP notices, send TOP notices to debtors, and give due process,

(2) FNS forward files to Treasury for action and to provide Federal-level due process, and to ensure that collections are received and applied to the appropriate debt,

(3) Treasury to intercept Federal payments and offset debts, and

(4) Debtors receive, read, and respond to TOP notices.

Description of Respondents: State, Local, or Tribal Government.

Number of Respondents: 272,214.

Frequency of Responses: Reporting: On occasion; Quarterly; Annually; Weekly; Monthly.

Total Burden Hours: 46,490.

Rachelle Ragland-Greene,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–30–P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are required regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by December 7, 2026 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Farm Service Agency

Title: Farm Loan Programs—Guaranteed Farm Loan.

OMB Control Number: 0560–0155.

Summary of Collection: FSA requests a revision of the currently approved information collection to include automated data collection of information through the ProsperUS Platform. FLP administers to make and service loans guaranteed to the eligible farmers and ranchers to comply with the regulations of 7 CFR part 762, Guaranteed Farm Loans and 7 CFR part 763, Land Contract Guaranteed Loans. The loans made and serviced include farm operating and farm ownership loans. FSA also provides guarantees of loans made by private sellers of a farm or ranch on a land contract sales basis; although this program is rarely used. The reporting requirements imposed on the public by the regulations at 7 CFR part 762 and 7 CFR part 763 are necessary to administer the Farm Loan Program guaranteed loan program. For the following estimated total annual burden on respondents, the formula used to calculate the total burden hours is the estimated average time per response multiplied by the estimated total annual responses.

Need and Use of the Information: FSA uses the forms and written evidence to collect needed information. The objective of the guaranteed loan program is to provide credit to applicants who are unable to obtain credit from lending institutions without a guarantee. The information collected is used to determine lender and loan applicant eligibility for farm loan guarantees, and to ensure the lender protects the Government's financial interest. The information FSA collects is needed to effectively administer the FSA guaranteed farm loan programs. The information is collected by the FSA loan official in consultation with participating lenders.

Description of Respondents: Businesses or other for-profits and Farms.

Estimated Number of Respondents: 5,072.

Frequency of Responses: Reporting: Other (when applying for loans).

Estimated Total Annual Burden on Respondents: 125,311 hours.

Rachelle Ragland-Greene,

Departmental Information Collection Clearance Officer.

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Section 232 National Security Adjustments to Imports of Specialty Pharmaceuticals and Associated Ingredients

AGENCY: Bureau of Industry and Security, Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment on the OMB approved emergency collection for the Temporary Final Rule ''*Section 232 National Security Adjustments to Imports of Specialty Pharmaceuticals and Associated Ingredients*'' September 23, 2026, (91 FR 60360).

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before January 5, 2027.

ADDRESSES: Interested persons are invited to submit comments by email to Nancy Kook, IC Liaison, Bureau of Industry and Security, at *PRA@bis.doc.gov* or to *PRAcomments@doc.gov.* Please reference OMB Control Number 0694–0150 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Nancy Kook, IC Liaison, Bureau of Industry and Security, phone 202–482–2440 or by email at *PRA@bis.doc.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

On April 1, 2025, Commerce initiated an investigation to determine the effects on the national security of imports of pharmaceuticals and pharmaceutical ingredients under Section 232 of the Trade Expansion Act of 1962, as amended (19 U.S.C. 1862). Section 232 provides authority for Commerce to

conduct investigations to determine the effects of imports of an article on the national security of the United States and for the President to adjust the imports of the article and its derivatives based on such an investigation and an affirmative determination that the article is being importing into the United States in such quantities or under such circumstances as to threaten to impair the national security of the United States.

On April 2, 2026, following the completion of the above investigation, the President issued Presidential Proclamation 11020 entitled ''Adjusting Imports of Pharmaceuticals and Pharmaceutical Ingredients Into the United States'' which imposed ad valorem tariffs on imports of certain patented pharmaceuticals and associated pharmaceutical ingredients. The Proclamation also directed a tariff rate of zero percent for certain designated specialty pharmaceutical products and their associated pharmaceutical ingredients, provided that Commerce (in consultation with the Office of the U.S. Trade Representative and Health & Human Services) determines that the products are either products of a jurisdiction that has a current or forthcoming trade and security framework agreement with the United States or otherwise meet an urgent health need in the United States. The President determined that these actions were necessary to address the affirmative determination by Commerce that imports of pharmaceuticals and pharmaceutical ingredients posed a threat to the national security of the United States.

Commerce will be required to collect certain critical information from companies seeking to obtain the ad valorem tariff rate of zero percent for imports of specialty pharmaceutical products and their associated pharmaceutical ingredients that meet an urgent health need in the United States. These collection requirements include organization information, a description of the imported product (including HTSUS Classification, Country of Origin, and Importer of Record) and a detailed rationale of how the imported product meets an urgent health need in the United States (including information such as the type of disease treated and an assessment of alternative therapies or lack of alternative therapies for the type of disease the product treats, the number of domestic patients) as well as other information required to substantiate the applications under Section 232, hereby referenced as Urgent Health Need Requests. This information will be submitted via email to Commerce. The materials are reviewed by Commerce before receiving a final determination by the Secretary.

II. Method of Collection

Electronic

III. Data

OMB Control Number: 0694–0150.

Type of Information Collection: Regular submission.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 250.

Average Responses per Year: 1.

Average Number of Responses: 250.

Estimated Time per Response: 8 hours.

Estimated Total Annual Burden Hours: 2,000 hours.

Respondent's Obligation: Voluntary.

Legal Authority: Section 232 of the Trade Expansion Act of 1962 (19 U.S.C. 1862).

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Departmental PRA Compliance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

BILLING CODE 3510–33–P

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Application Process To Waive the Import Qualification Criteria Measures To Restrict Stockpiling of Polysilicon and Polysilicon Derivatives

AGENCY: Bureau of Industry and Security, Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment on the OMB approved emergency collection for the Temporary Final Rule ''*Measures To Restrict Stockpiling of Polysilicon and Polysilicon Derivatives Under Proclamation 11052*'' (September 24, 2026, 91 FR 60505).

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before January 5, 2027.

ADDRESSES: Interested persons are invited to submit comments by email to Nancy Kook, IC Liaison, Bureau of Industry and Security, at *PRA@bis.doc.gov* or to *PRAcomments@doc.gov*). Please reference OMB Control Number 0694–0149 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Nancy Kook, IC Liaison, Bureau of Industry and Security, phone 202–482–2440 or by email at *PRA@bis.doc.gov*.

SUPPLEMENTARY INFORMATION:

I. Abstract

On August 6, 2026, the President issued Proclamation 11052 (91 FR 51975), ''Adjusting Imports of Polysilicon and Its Derivatives into the United States,'' finding that imports of polysilicon and polysilicon derivatives threatened to impair the national security of the United States. Based on

that finding, the President imposed minimum import prices (MIP) and tariffs on imports of Polysilicon Products pursuant to Section 232 of the Trade Expansion Act of 1962, as amended, 19 U.S.C. 1862 (Section 232).

Consistent with Proclamation 11052, Commerce established an import qualification process for all existing importers of record (IOR) of these polysilicon and polysilicon derivatives. Commerce is requiring IORs seeking to apply for waivers of the Polysilicon Product import qualification criteria to submit details on the usages of Polysilicon Products, estimates of the anticipated type and volume of imports into the United States, and other information required to substantiate the applications for relief. This information is submitted via email to Commerce and the material is reviewed by Commerce before receiving a final determination by the Secretary.

Northwestern University and Cornell University et. al, Notice of Decision on Application for Duty-Free Entry of Scientific Instruments

This is a decision pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, as amended by Pub. L. 106–36; 80 Stat. 897; 15 CFR part 301). On September 4, 2026, the Department of Commerce published a notice in the **Federal Register** requesting public comment on whether instruments of equivalent scientific value, for the purposes for which the instruments identified in the docket(s) below are intended to be used, are being manufactured in the United States. *See Northwestern University and Cornell University et. al; Application(s) for Duty-Free Entry of Scientific Instruments* 91 FR 56858, September 4, 2026. We received no public comments.

Comments: None received. Decision: Approved. We know of no instrument of equivalent scientific value to the foreign instrument described below, for such purposes as this is intended to be used, that was being manufactured in the United States at the time of order.

Docket No.	Applicant	Instrument
26–008	Northwestern University and Cornell University	Upgrade Parts for Cryostat.
26–019	The University of Michigan, Ann Arbor	Single frequency 652 nm VECSEL laser.
26–035	The University of Texas at Austin	Dilution refrigerator system LD400.
26–041	Rice University	Model BF–LD250 Cryogen-free refrigerator system.
26–049	Cornell University	Dilution refrigerator.
26–054	Vanderbilt University	Widely Tunable OPO Laser Source based near-field illumination unit for neaSCOPE microscope.
26–059	University of California Berkeley	Dilution Refrigerator.
26–064	University of Illinois Urbana-Champaign	ProteoxMX Dilution Refrigerator.
26–075	University of California Berkeley	Custom Dilution Refrigerator with optical access and low vibrations.
26–076	New York University	Dilution Refrigerator.
26–083	University of California Berkeley	LD250He Refrigerator System.
26–087	Purdue University	Optical Cryostat—attoDRY2100.
26–091	Purdue University	Dilution Refrigerator and 12T Magnet.
26–092	University of Illinois Urbana-Champaign	TeslatronPT with 14T Magnet.
26–094	Purdue University	Optical Cryostat—attoDRY800.
26–104	University of California, Riverside	Pharos PH2–20W–SP Laser A.
26–107	California Institute of Technology	Tunable Low-Noise Laser.
26–113	Boston University	Femtosecond Laser.
26–115	University of Wisconsin-Madison	Dilution Refrigerator.

Certain Frozen Warmwater Shrimp From the Socialist Republic of Vietnam: Final Results of Antidumping Duty Administrative Review; 2024–2025

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that producers/exporters subject to this administrative review made sales of certain frozen warmwater shrimp (shrimp) from the Socialist Republic of Vietnam (Vietnam) at prices below normal value (NV) during the period of review (POR), February 1, 2024, through January 31, 2025. Additionally, Commerce determines that 29 exporters are eligible for separate rates.

DATES: Applicable November 6, 2026.

FOR FURTHER INFORMATION CONTACT: Jonathan Schueler or Matthew Lipka, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–9175 or (202) 482–7976, respectively.

SUPPLEMENTARY INFORMATION:

Background

On May 13, 2026, Commerce published the *Preliminary Results* of this administrative review and invited interested parties to comment.[1] On August 18, 2026, Commerce extended the deadline to issue these final results by 53 days.[2] Accordingly, the deadline for these final results is now November 2, 2026.

For the events subsequent to the *Preliminary Results, see* the Issues and Decision Memorandum.[3] The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *https://access.trade.gov/frnotices.*

Commerce conducted this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of the Order [4]

The merchandise subject to the *Order* is shrimp from Vietnam. For a full description of the scope of the *Order, see* the Issues and Decision Memorandum.[5]

Analysis of Comments Received

All issues raised by interested parties in the case and rebuttal briefs are addressed in the Issues and Decision Memorandum. A list of the issues addressed in the Issues and Decision Memorandum is provided in Appendix I to this notice.

Changes Since the Preliminary Results

Based on a review of the record and our analysis of comments received from interested parties, and for the reasons explained in the Issues and Decision Memorandum, we made certain changes to the weighted-average dumping margins applied to the two mandatory respondents, Sao Ta Foods Joint Stock Company/FIMEX VN/Sao Ta Seafood Factory/Khang An Foods Joint Stock Company (collectively, Fimex Group) [6] and Soc Trang Seafood Joint Stock Company; STAPIMEX (STAPIMEX), and the weighted-average dumping margin applicable to the non-examined companies that are eligible for a separate rate.

Use of Adverse Facts Available

For these final results, we are relying on adverse facts available (AFA), pursuant to sections 776(a) and (b) of the Act, in part, to value certain of STAPIMEX's chemical factors of production (FOP).[7] This is because STAPIMEX failed to cooperate by not acting to the best of its abilities to comply with our requests to provide descriptions of these chemical FOPs.[8] As partial AFA, we used the highest reported chemical surrogate value on

[1] *See Certain Frozen Warmwater Shrimp from the Socialist Republic of Vietnam: Preliminary Results and Rescission, in Part, of Antidumping Duty Administrative Review; 2024–2025,* 91 FR 27002 (May 13, 2026) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum (PDM).

[2] *See* Memorandum, ''Extension of Deadline for Final Results of Antidumping Duty Administrative Review,'' dated August 18, 2026.

[3] *See* Memorandum, ''Issues and Decision Memorandum for the Final Results of Antidumping Duty Administrative Review of Certain Frozen Warmwater Shrimp from the Socialist Republic of Vietnam; 2024–2025,'' dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

[4] *See Notice of Amended Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order: Certain Frozen Warmwater Shrimp from the Socialist Republic of Vietnam,* 70 FR 5152 (February 1, 2005) (*Order*).

[5] *See* Issues and Decision Memorandum; *see also Preliminary Results* PDM at 3–4.

[6] In the thirteenth administrative review, Commerce determined that that Sao Ta Foods Joint Stock Company, aka Fimex VN and Sao Ta Seafood Factory are affiliated within the meaning of section 771(33) of the Act and comprise a single entity pursuant to 19 CFR 351.401(f). *See Certain Frozen Warmwater Shrimp from the Socialist Republic of Vietnam: Final Results of Antidumping Duty Administrative Review, 2017–2018,* 84 FR 44859, 44860 (August 27, 2019). In the *Preliminary Results,* Commerce preliminarily determined that Khanh An Foods Joint Stock Company is affiliated with Sao Ta Foods Joint Stock Company, aka Fimex VN and Sao Ta Seafood Factory within the meaning of section 771(33) of the Act and compromises a single entity pursuant to 19 CFR 351.401(f). We find no evidence to change our decision, and we therefore continue to treat these companies as a single entity pursuant to 19 CFR 351.401(f) for these final results.

[7] *See* Issues and Decision Memorandum at Comment 4.

[8] *Id.; see also Preliminary Results* PDM at 5–9.

the record of this review as the surrogate value for the five chemical FOPs with inadequate descriptions.[9]

Separate Rates

Commerce received comments from the Fimex Group on Commerce's preliminary separate rate determinations.[10] Commerce addressed these comments in the Issues and Decision Memorandum and continues to find that the 29 companies listed in Appendix II are eligible for a separate rate, including the two mandatory respondents (*i.e.,* the Fimex Group and STAPIMEX).

The Act and Commerce's regulations do not address the establishment of a separate rate to be applied to companies not selected for individual examination when Commerce limits its examination in an administrative review pursuant to section 777A(c)(2) of the Act. Generally, Commerce looks to section 735(c)(5) of the Act, which provides instructions for calculating the all-others rate in an investigation, for guidance when calculating the rate for separate-rate respondents which Commerce did not examine individually in an administrative review.

For the final results of this review, Commerce has determined the weighted-average dumping margin for the Fimex Group to be 10.71 percent, and for STAPIMEX to be 6.36 percent.[11] For the reasons explained in the Issues and Decision Memorandum, we are assigning the weighted-average of the dumping margins calculated for the Fimex Group and STAPIMEX to the non-examined respondents which qualify for a separate rate in this review.[12]

Vietnam-Wide Entity

In our *Preliminary Results,* we found that 132 companies failed to establish their eligibility for a separate rate and are considered to be part of the Vietnam-wide entity.[13] Commerce received comments from the Fimex Group on the list of companies that were preliminarily considered to be part of the Vietnam-wide entity.[14] Commerce addressed these comments in the Issues and Decision Memorandum and continues to find that 131 companies listed in Appendix III, which includes all companies listed in the *Preliminary Results* except for Khang An Foods Joint Stock Company, to be part of the Vietnam-wide entity.[15]

Because no party requested a review of the Vietnam-wide entity, and Commerce no longer considers the Vietnam-wide entity as an exporter conditionally subject to administrative reviews,[16] we did not conduct a review of the Vietnam-wide entity. Thus, the weighted-average dumping margin for the Vietnam-wide entity (*i.e.,* 25.76 percent), is not subject to change as a result of this review.

Final Results of Administrative Review

Commerce determines that the following estimated weighted-average dumping margins exist for the period February 1, 2024, through January 31, 2025:

Exporter	Weighted-average dumping margin (percent)
Sao Ta Foods Joint Stock Company/FIMEX VN/Sao Ta Seafood Factory/Khang An Foods Joint Stock Company	10.71
Soc Trang Seafood Joint Stock Company; STAPIMEX	6.36
Separate Rate Companies [17]	7.59

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties for these preliminary results within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Assessment Rates

Pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.212(b)(1), Commerce has determined, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the final results of this review.

For the Fimex Group and STAPIMEX, because the weighted-average dumping margins are not zero or *de minimis* (*i.e.,* less than 0.50 percent) in these final results, Commerce calculated importer-specific assessment rates on the basis of the ratio of the total amount of dumping calculated for each importer's examined sales to the total entered value of those sales. Where we do not have entered values for all U.S. sales to a particular importer, we will calculate an importer-specific, per-unit assessment rate on the basis of the ratio of the total amount of dumping calculated for the importer's examined sales to the total quantity of those sales.[18] To determine whether an importer-specific, per-unit assessment rate is *de minimis,* in accordance with 19 CFR 351.106(c)(2), we also will calculate an importer-specific *ad valorem* ratio based on estimated entered values.

For the 27 separate rate applicants that were not selected for individual examination in this administrative review but qualified for a separate rate, which have been assigned a weighted-average dumping margin that is not zero or *de minimis* (*i.e.,* less than 0.50 percent), Commerce will instruct, and CBP shall assess, antidumping duties on all appropriate entries of subject merchandise at the liquidation rates specified in the table above.

For sales that were not reported in the U.S. sales data submitted by the mandatory respondents, we will instruct CBP to liquidate entries associated with those sales at the rate for the Vietnam-wide entity (*i.e.,* 25.76 percent). For entries of subject merchandise during the POR produced by the mandatory respondents for which they did not know their merchandise was destined for the United States, we intend to instruct CBP to liquidate such entries at

[9] *See Preliminary Results* PDM at 9; *see also* Memorandum, ''Analysis for the Preliminary Results for Soc Trang Seafood Joint Stock Company,'' dated May 7, 2026; and Memorandum, ''Surrogate Values for the Preliminary Results,'' dated May 7, 2026.

[10] *See* Fimex Group's Letter, ''Case Brief,'' dated June 12, 2026 (Fimex's Case Brief), at 25–26.

[11] *See* Memorandum, ''Final Results Analysis Memorandum for the Fimex Group,'' dated concurrently with this notice; *see also* Memorandum, ''Final Results Analysis Memorandum for STAPIMEX,'' dated concurrently with this notice.

[12] *See* Memorandum, ''Calculation of the Final Dumping Margin for Respondents Not Selected for Individual Examination,'' dated concurrently with this notice.

[13] *See Preliminary Results* at Appendix III.

[14] *See* Fimex's Case Brief at 25–26.

[15] *See* Appendix III.

[16] *See Antidumping Proceedings: Announcement of Change in Department Practice for Respondent Selection in Antidumping Duty Proceedings and Conditional Review of the Nonmarket Economy Entity in NME Antidumping Duty Proceedings,* 78 FR 65969–70 (November 4, 2013).

[17] *See* Appendix II.

[18] *See* 19 CFR 351.212(b)(1).

the Vietnam-wide rate if there is no rate for the intermediate company or companies involved in the transaction.

With regard to the 131 companies identified in Appendix III to this notice as part of the Vietnam-wide entity, we will instruct CBP to apply an *ad valorem* assessment rate of 25.76 percent to all POR entries of subject merchandise which were exported by those companies.

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(2)(C) of the Act: (1) for the mandatory respondents listed above, which have a separate rate, the cash deposit rate will be equal to the weighted-average dumping margin established in the final results of this review and listed in the table above; (2) for previously-examined Vietnamese and non-Vietnamese exporters not listed in Appendix II that received a separate rate in a prior completed segment of this proceeding, the cash deposit rate will continue to be the existing exporter-specific cash deposit rate; (3) for all non-Vietnamese exporters of subject merchandise which have not received their own separate rate, the cash deposit rate will be the rate applicable to the Vietnamese exporter that supplied that non-Vietnamese exporter; and (4) for all Vietnamese exporters of subject merchandise that have not been found to be entitled to a separate rate, the cash deposit rate will be the rate for the Vietnam-wide entity, (*i.e.,* 25.76 percent). These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers Regarding the Reimbursement of Duties

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping and/or countervailing duties prior to liquidation of the relevant entries during this POR. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping and/or countervailing duties has occurred and the subsequent assessment of double antidumping duties, and/or an increase in the amount of antidumping duties by the amount of the countervailing duties.

Administrative Protective Order (APO)

This notice also serves as a reminder to parties subject to APO of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

We are issuing and publishing these final results of administrative review and notice in accordance with sections 751(a)(1) and 777(i) of the Act.

Dated: November 2, 2026.

Scot Fullerton,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Appendix I

List of Topics Discussed in the Issues and Decision Memorandum

I. Summary
II. Background
III. Scope of the *Order*
IV. Separate Rates
V. Application of Facts Available and Use of Adverse Inference
VI. Discussion of the Issues
  Comment 1: Whether to Revise the Surrogate Value for Shrimp Feed
  Comment 2: Whether to Apply the Average-to-Average Method to Calculate the Fimex Group's Dumping Margin
  Comment 3: Whether to Correct an Error in the Fimex Group's Raw Shrimp Surrogate Value Calculation
  Comment 4: Whether to Apply Partial Facts Available to Some of STAPIMEX's Chemicals
  Comment 5: Whether to Grant a By-Product Offset for STAPIMEX
  Comment 6: Whether to Revise the Export Subsidy Offset
  Comment 7: Whether Khang An Foods Joint Stock Company Is Part of the Vietnam-Wide Entity
VII. Recommendation

Appendix II

Companies Eligible for Separate Rate Status [19]

1. Bac Lieu Fisheries Joint Stock Company; Bac Lieu Fis
2. Camau Seafood Processing and Service Joint Stock Corporation; Camau Seafood Processing and Joint-Stock Corporation; CASES
3. Camimex Group Joint Stock Company; Camimex Group [20]
4. Cantho Import Export Fishery Limited Company; CAFISH
5. Cuulong Seaproducts Company; Cuulong Seapro
6. Hai Viet Corporation; HAVICO
7. Khanh Sung Company, Ltd.; Khanh Sung Co., LTD
8. Minh Hai Joint-Stock Seafoods Processing Company; Seaprodex Minh Hai; Sea Minh Hai
9. Ngoc Tri Seafood Joint Stock Company; Ngoc Tri Seafood Company
10. Q N L Company Limited
11. Sao Ta Foods Joint Stock Company; FIMEX VN; Sao Ta Seafood Factory; Khang An Foods Joint Stock Company [21]
12. Seaprimexco Vietnam; Seaprimexco
13. Seavina Joint Stock Company; Seavina
14. Soc Trang Seafood Joint Stock Company; STAPIMEX
15. Thong Thuan Company Limited; T&T Co., LTD; Thong Thuan Cam Ranh Seafood Joint Stock Company [22]
16. Tai Kim Anh Seafood Joint Stock Corporation; TAIKA Seafood Corporation
17. Thuan Phuoc Seafoods and Trading Corporation; Thuan Phuoc Corp
18. Frozen Seafoods Factory No. 32
19. Seafoods and Foodstuff Factory
20. Trang Khanh Trading Company Limited.; Trang Khanh Seafood Co., Ltd.
21. Trong Nhan Seafood Company Limited; Trong Nhan Seafood
22. UTXI Aquatic Products Processing

[19] We have included in this list certain name variations that are included in the separate rate application/certification, and, thus are included in the separate rate, but were listed separately in the *Initiation Notice,* or not at all.

[20] Interested parties requested a review of, and we listed in the *Initiation Notice,* Camau Frozen Seafood Processing Import Export Corporation, but Commerce has previously determined that Camimex Group Joint Stock Company is the successor-in-interest to Camau Frozen Seafood Processing Import Export Corporation, so has only listed Camimex Group Joint Stock Company in this notice. *See Certain Frozen Warmwater Shrimp from the Socialist Republic of Vietnam: Notice of Final Results of Antidumping Duty Changed Circumstances Review,* 86 FR 47617, (August 26, 2021).

[21] As noted above, Commerce has determined that these entities are affiliated within the meaning of section 771(33) of the Act and comprise a single entity pursuant to 19 CFR 351.401(f).

Certain Carbon and Alloy Steel Cut-to-Length Plate From the Republic of Korea: Notice of Court Decision Not in Harmony With the Results of Countervailing Duty Administrative Review; Notice of Amended Final Results

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On October 27, 2026, the U.S. Court of International Trade (CIT) issued its final judgment in *POSCO* v. *United States* Consol. Court No. 24–00006, Slip Op. 26–131, sustaining the U.S. Department of Commerce (Commerce)'s second remand results pertaining to the administrative review of the countervailing duty (CVD) order on of certain carbon and alloy steel cut-to-length plate (CTL Plate) from the Republic of Korea (Korea) covering the period January 1, 2021, through December 31, 2021. Commerce is notifying the public that the CIT's final judgment is not in harmony with Commerce's final results of the administrative review, and that Commerce is amending the final results with respect to countervailable subsidy rate assigned to POSCO Co., Ltd. (POSCO).

DATES: Applicable November 6, 2026.

FOR FURTHER INFORMATION CONTACT: Rachel Accorsi or Joshua Nixon, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–7472 or (202) 482–8361, respectively.

SUPPLEMENTARY INFORMATION:

Background

On December 13, 2023, Commerce published its *Final Results* in the 2021 CVD administrative review of CTL Plate from Korea.[1] In the *Final Results,* Commerce found that POSCO, the sole mandatory respondent, received countervailable subsidies from the Government of Korea (GOK) during the period of review (POR). Commerce calculated an overall net subsidy rate of 0.87 percent *ad valorem*.[2]

POSCO appealed Commerce's *Final Results.* On August 8, 2025, the CIT remanded the *Final Results* to Commerce, directing Commerce to reconsider the following: (1) Commerce's finding that the provision of electricity for less than adequate renumeration (LTAR) in Korea was *de facto* specific under section 771(5A)(D)(iii)(III) of the Tariff Act of 1930, as amended (the Act); (2) Commerce's finding that the provision of Korean Emission Trading System (K–ETS) permits provided a financial contribution in the form of revenue forgone within the meaning of 771(5)(D) of the Act; and (3) Commerce's finding that the provision of K–ETS permits is specific under section 771(5A)(D)(i) of the Act.[3]

In the *First Final Remand Redetermination,* issued on December 9, 2025, Commerce determined that: (1) there was a lack of evidence on the record to find the provision of electricity for LTAR *de facto* specific under section 771(5A)(D)(iii)(III) of the Act and therefore found the provision of electricity for LTAR not countervailable; (2) the provision of K–ETS permits by the GOK provided a financial contribution in the form of a direct transfer of funds within the meaning of section 771(5)(D)(i) of the Act; and (3) the provision of K–ETS permits is contingent upon export performance in accordance with sections 771(5A)(A) and (B) of the Act.[4]

On April 17, 2026, the CIT issued its *Second Remand Order*[5] which sustained Commerce on its findings regarding (1) provision of electricity for LTAR and (2) the financial contribution of K–ETS permits. However, the CIT found that Commerce's determination that the provision of K–ETS permits was export contingent was not in accordance with law and remanded the third issue, Commerce's specificity finding for the provision of K–ETS permits, to Commerce for further consideration.[6]

In the *Second Final Remand Redetermination,*[7] issued on July 11,

[1] *See Carbon and Alloy Steel Cut-to-Length Plate from the Republic of Korea: Final Results of Countervailing Duty Administrative Review; 2021,* 88 FR 86318 (December 13, 2023) (*Final Results*), and accompanying Issues and Decision Memorandum.

[2] *See Final Results,* 88 FR at 86319.

[3] *See POSCO* v. *United States,* 794 F.Supp.3d 1402 (CIT 2025) (*Remand Order*).

[4] *See Final Results of Redetermination Pursuant to Second Court Remand: POSCO* v. *United States,* Court No. 24 00006, Slip Op. 25–100, dated December 9, 2025 (*First Final Remand Redetermination*), available at *https://access.trade.gov/FinalRemandRedetermination.*

[5] *See POSCO* v. *United States,* 829 F.Supp.3d 1298 (CIT 2026) (*Second Remand Order*).

[6] *Id.* at 15–17.

[7] *See Final Results of Redetermination Pursuant to Second Court Remand: POSCO* v. *United States,* Court No. 24 00006, Slip Op. 26–36, dated July 22,

2026, Commerce determined that the provision of K–ETS permits is *de facto* specific, pursuant to section 771(5A)(D)(iii)(I) of the Act. Based on this analysis, Commerce calculated a revised 0.80 percent total *ad valorem* subsidy rate for POSCO. On October 27, 2026, the CIT sustained Commerce's *Second Final Remand Redetermination*.[8]

Timken Notice

In its decision in *Timken,*[9] as clarified by *Diamond Sawblades,*[10] the U.S. Court of Appeals for the Federal Circuit held that, pursuant to section 516A(c) and (e) of the Act, Commerce must publish a notice of court decision that is not ''in harmony'' with a Commerce determination and must suspend liquidation of entries pending a ''conclusive'' court decision. The CIT's October 27, 2026, judgment constitutes a final decision of the CIT that is not in harmony with Commerce's *Final Results.* Thus, this notice is published in fulfillment of the publication requirements of *Timken.*

Amended Final Results

Because there is now a final court judgment, Commerce is amending its *Final Results* with respect to POSCO as follows:

Producer/exporter	Subsidy rate for January 1, 2021, to December 31, 2021 (percent *ad valorem*)
POSCO Co., Ltd.[11]	0.80

Cash Deposit Requirements

Because POSCO has a superseding cash deposit rate, *i.e.,* there have been final results published in a subsequent administrative review, we will not issue revised cash deposit instructions to CBP. This notice will not affect the current cash deposit rate.

Liquidation of Suspended Entries

At this time, Commerce remains enjoined by CIT order from liquidating entries that: were produced by POSCO and exported by POSCO International and were entered, or withdrawn from warehouse, for consumption during the period January 1, 2021, through December 31, 2021. These entries will remain enjoined pursuant to the terms of the injunction during the pendency of any appeals process.

In the event the CIT's ruling is not appealed, or, if appealed, upheld by a final and conclusive court decision, Commerce intends to instruct CBP to assess countervailing duties on unliquidated entries of subject merchandise produced and/or exported by POSCO in accordance with 19 CFR 351.212(b). We will instruct CBP to assess countervailing duties on all appropriate entries covered by this review when the *ad valorem* rate is not zero or *de minimis.* Where an *ad valorem* subsidy rate is zero or *de minimis,*[12] we will instruct CBP to liquidate the appropriate entries without regard to countervailing duties.

Notification to Interested Parties

This notice is issued and published in accordance with sections 516A(c) and (e) and 777(i)(1) of the Act.

Dated: November 3, 2026.

Scot Fullerton,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

[FR Doc. 2026–22706 Filed 11–5–26; 8:45 am]

BILLING CODE 3510–DS–P

2026 (*Second Final Remand Redetermination*), available at *https://access.trade.gov/FinalRemand Redetermination.*

[8] *See POSCO* v. *United States,* Consol. Court No. 24–00006, Slip Op. 26–131 (October 27, 2026).

[10] *See Diamond Sawblades Manufacturers Coalition* v. *United States,* 626 F.3d 1374 (Fed. Cir. 2010) (*Diamond Sawblades*).

[11] As discussed in *Certain Carbon and Alloy Steel Cut-to-Length Plate from the Republic of Korea: Preliminary Results and Partial Rescission of Countervailing Duty Administrative Review; 2021,* 88 FR 37019 (June 6, 2023), Commerce found the following companies to be cross-owned with POSCO: Pohang Scrap Recycling Distribution Center Co. Ltd.; POSCO Chemical Co., Ltd.; POSCO M-Tech Co., Ltd.; POSCO Nippon Steel RHF Joint Venture Co., Ltd.; POSCO SPS Co., Ltd.; and POSCO Terminal Co., Ltd. The subsidy rate applies to all cross-owned companies. We note that POSCO has an affiliated trading company through which it exported certain subject merchandise during the POR, POSO International (aka POSCO International Corporation). POSCO International was not selected as a mandatory respondent but was examined in the context of POSCO. Therefore, there is not an established countervailing duty rate for POSCO International; POSCO International's subsidies are accounted for in POSCO's total subsidy rate. Instead, entries of subject merchandise exported by POSCO International will receive the rate of the producer listed on the U.S. Customs and Border Protection (CBP) entry form. Thus, the subsidy rate applied to POSCO and POSCO's cross-owned companies is also applied to POSCO International for entries of subject merchandise produced by POSCO.

N-Cyclohexylbenzothiazole-2-Sulfenamide From the People's Republic of China: Preliminary Affirmative Determination of Sales at Less Than Fair Value and Preliminary Affirmative Determination of Critical Circumstances

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATE: Applicable November 6, 2026.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that N-Cyclohexylbenzothiazole-2-Sulfenamide (CBS) from the People's Republic of China (China) is being, or is likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2025, through March 31, 2026. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable November 6, 2026.

FOR FURTHER INFORMATION CONTACT: Allison Hollander or Caroline Carroll, AD/CVD Operations, Office IX, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2805 and (202) 482–4948, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on June 2, 2026.[1] On September 24, 2026, Commerce postponed the preliminary determination of this investigation and the revised deadline is now October 28, 2026.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics

[1] *See N-Cyclohexylbenzothiazole-2-Sulfenamide from the People's Republic of China: Initiation of Less-Than-Fair-Value Investigation,* 91 FR 32941 (June 2, 2026) (*Initiation Notice*).

[3] *See* Memorandum, ''Decision Memorandum for the Preliminary Determination in the Less-Than-Fair-Value Investigation of N-

Continued

included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/frnotices.*

Scope of the Investigation

The product covered by this investigation is CBS from China. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage (scope).[5] No interested party commented on the scope of the investigation as it appeared in the *Initiation Notice.* Commerce is not preliminarily modifying the scope language as it appeared in the *Initiation Notice. See* the scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with sections 731 and 733(b) of the Act. Pursuant to sections 776(a) and (b) of the Act, Commerce preliminarily has relied upon facts otherwise available, with adverse inferences, for the China-wide entity, which includes the companies that did not respond to Commerce's quantity and value questionnaire, separate rate application, or Commerce's initial questionnaire. For a full description of the methodology underlying Commerce's preliminary determination, *see* the Preliminary Decision Memorandum.

Preliminary Affirmative Determination of Critical Circumstances

In accordance with section 733(e) of the Act and 19 CFR 351.206, Commerce preliminarily determines that critical circumstances exist with respect to imports of CBS from China for the China-wide entity. For a full description of the methodology and results of Commerce's critical circumstances analysis, *see* the Preliminary Decision Memorandum.

Combination Rates

In the *Initiation Notice,*[6] Commerce stated that it would calculate producer/exporter combination rates for the respondents that are eligible for a separate rate in this investigation. Policy Bulletin 05.1 describes this practice.[7] In this case, because no respondent qualified for a separate rate, producer/exporter combination rates were not calculated.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Producer/exporter	Weighted-average dumping margin (percent)	Cash deposit rate (adjusted for subsidy offset) (percent)
China-Wide Entity	* 285.94	281.69

* Rate based on facts available with adverse inferences.

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of subject merchandise as described in the scope of the investigation section entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**, as discussed below. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the weighted average amount by which normal value exceeds U.S. price, as indicated in the chart above as follows: (1) for all Chinese producers/exporters of merchandise under consideration that have not established eligibility for their own separate rates, the cash deposit rate will be equal to the estimated weighted-average dumping margin established for the China-wide entity; and (2) for all third-county exporters of merchandise under consideration not listed in the table above, the cash deposit rate is the cash deposit rate applicable to the China-wide entity that supplied that third-country exporter.

Section 733(e)(2) of the Act provides that, given an affirmative determination of critical circumstances, any suspension of liquidation shall apply to unliquidated entries of merchandise entered, or withdrawn from warehouse, for consumption on or after the later of: (a) the date which is 90 days before the date on which the suspension of liquidation was first ordered; or (b) the date on which notice of initiation of the investigation was published. Commerce preliminarily finds that critical circumstances exist for imports of subject merchandise from the China-wide entity. In accordance with section 733(e)(2)(A) of the Act, the suspension of liquidation shall apply to all unliquidated entries of merchandise from the producer/exporter combinations identified in this paragraph that were entered, or withdrawn from warehouse, for consumption on or after the date which is 90 days before the publication of this notice.

To determine the cash deposit rate, Commerce normally adjusts the estimated weighted-average dumping margin by the amount of domestic subsidy pass-through and export subsidies determined in a companion countervailing duty (CVD) proceeding when CVD provisional measures are in effect. Accordingly, where Commerce has made a preliminary affirmative determination for domestic subsidy pass-through or export subsidies, Commerce has offset the calculated estimated weighted-average dumping margin by the appropriate rate(s). Any such adjusted rates may be found in the ''Preliminary Determination'' section's chart of estimated weighted-average dumping margins above.

Should provisional measures in the companion CVD investigation expire prior to the expiration of provisional measures in this LTFV investigation, Commerce will direct CBP to begin collecting cash deposits at a rate equal to the estimated weighted-average dumping margins calculated in this preliminary determination unadjusted for the passed-through domestic subsidies or for export subsidies at the time the CVD provisional measures expire.

These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Normally, Commerce discloses to interested parties the calculations performed in connection with a preliminary determination within five

Cyclohexylbenzothiazole-2-Sulfenamide from the People's Republic of China,'' dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

[4] *See Antidumping Duties; Countervailing Duties, Final Rule,* 62 FR 27296, 27323 (May 19, 1997).

[5] *See Initiation Notice,* 91 FR at 32942.

[6] *See Initiation Notice,* 91 FR at 32945.

[7] *See* Enforcement and Compliance's Policy Bulletin No. 05.1, regarding, ''Separate-Rates Practice and Application of Combination Rates in Antidumping Investigations involving Non-Market Economy Countries,'' (April 5, 2005) (Policy Bulletin 05.1), available on Commerce's website at *https://www.trade.gov/enforcement-and-compliance-policy-bulletins-0.*

days of its public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b). However, because Commerce preliminarily applied adverse facts available (AFA) to the China-wide entity in this investigation in accordance with section 776 of the Act, and the applied AFA rate is based solely on the petition, there are no calculations to disclose.

Verification

Because the mandatory respondents in this investigation did not provide information requested by Commerce, withdrew from participating in this proceeding, and Commerce preliminarily determines each of the mandatory respondents to have been uncooperative, verification will not be conducted.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than 14 days after the date of publication of the preliminary determination, unless the Secretary alters the time limit. Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[8] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[9]

As provided under 19 CFR 351.309(c)(2)(iii) and (d)(2)(iii), we request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[10] Further, we request that interested parties limit their executive summary of each issue to no more than 450 words, not including citations. We intend to use the executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[11]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants and whether any participant is a foreign national; and (3) a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined.

Final Determination

Section 735(a)(1) of the Act and 19 CFR 351.210(b)(1) provide that Commerce will issue the final determination within 75 days after the date of its preliminary determination. Accordingly, Commerce will make its final determination no later than 75 days after the signature date of this preliminary determination.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination of sales at LTFV. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether imports of the subject merchandise are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: October 28, 2026.

Scot Fullerton,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Appendix I

Scope of the Investigation

The product subject to this investigation is N-Cyclohexylbenzothiazole-2-sulfenamide (CBS), an organic compound also known as N-cyclohexyl-2-benzothiazolesulfenamide, N-(1,3- benzothiazol-2-ylsulfanyl) cyclohexanamine and N-cyclohexylbenzothiazol-2-sulphenamide. It may additionally be termed Accelerator CZ, CBTS, Thiohexam, HIP4, Curax, DURAX, Conaca, Conach, Conacs, or Celacs. A CBS assay or sample most commonly reflects a concentration of 94 to 99 percent.

CBS is most commonly in the form of an off-white or light gray powder, oiled powder, or granule, though CBS imported in a different color or form is included in the scope. CBS typically has a melting point of 90 to 110°C and a molecular weight of 264.4 g/mol. CBS may be imported in a solution of benzene, ethanol, or acetone. CBS has the chemical formula C13H16N2S2 and is assigned the Chemical Abstract Service (CAS) registry No. 95–33–0.

The scope also includes CBS that is commingled with CBS from sources not subject to this investigation.

CBS powder, oiled powder, and granules are classified under subheading 2934.20.8000, Harmonized Tariff Schedule of the United States (HTSUS). Imports of CBS may also be classified under subheadings 3812.10.1000 and 3812.10.5000, HTSUS. Although the HTSUS and CAS numbers are provided for convenience and customs purposes, the written description of the scope is dispositive.

Steel Wire Garment Hangers From the People's Republic of China and the Socialist Republic of Vietnam: Final Affirmative Determination of Circumvention of the Antidumping Duty Order on Steel Wire Garment Hangers From the People's Republic of China and the Antidumping and Countervailing Duty Orders on Steel Wire Garment Hangers From the Socialist Republic of Vietnam

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that imports of steel wire garment hangers (hangers), completed in Cambodia using: (1) steel wire or (2) steel wire and

paper accessories, produced in the People's Republic of China (China) or the Socialist Republic of Vietnam (Vietnam), are circumventing the antidumping duty (AD) order on hangers from China, or the AD and countervailing duty (CVD) orders on hangers from Vietnam.

DATES: Applicable November 6, 2026.

FOR FURTHER INFORMATION CONTACT: Braeden Lowe, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–9124.

SUPPLEMENTARY INFORMATION:

Background

On October 6, 2008 and February 5, 2013, Commerce published in the **Federal Register** the AD order on hangers from China,[1] and the AD and CVD orders on hangers from Vietnam, respectively.[2] On August 12, 2025, Commerce initiated country-wide circumvention inquiries pursuant to section 781(b) of the Tariff Act of 1930, as amended (the Act), to determine whether imports of hangers completed in Cambodia using: (1) steel wire or (2) steel wire and paper accessories, produced in China or Vietnam, are circumventing the *China Order* or the *Vietnam Orders* and, accordingly, should be covered by the scope of the *China Order* or the scope of the *Vietnam Orders*.[3] On September 22, 2026, Commerce published the affirmative *Preliminary Determination* of these circumvention inquiries.[4] Concurrent with the *Preliminary Determination,* we also extended the deadline to issue this final determination until October 30, 2026.[5] We invited parties to comment on the *Preliminary Determination* of these inquiries. We received no comments.

Scope of the Orders

For a complete description of the scope of the *China Order* and the scope of the *Vietnam Orders, see* Appendix I and II of this notice.[6]

Merchandise Subject to the Circumvention Inquiries

These circumvention inquiries cover hangers completed in Cambodia using either: (1) steel wire; or (2) steel wire and paper accessories produced in China or Vietnam, where the hangers are subsequently exported from Cambodia to the United States.

Affirmative Final Determination of Circumvention

Because we received no comments from any interested party, this final determination of circumvention remains unchanged from the *Preliminary Determination* and no decision memorandum accompanies this notice. Consistent with the *Preliminary Determination,* Commerce continues to determine that hangers completed in Cambodia using Chinese-origin or Vietnamese origin inputs, *i.e.,* steel wire or steel wire and paper accessories, are circumventing the *China Order* or the *Vietnam Orders,* each on a country-wide basis.[7] As a result, in accordance with section 781(b) of the Act, we determine that this merchandise should be included within the scope of the *China Order* or the scope of the *Vietnam Orders.*

Continuation of Suspension of Liquidation and Cash Deposit Requirements

Based on this affirmative final country-wide determination of circumvention with respect to hangers exported from Cambodia, in accordance with 19 CFR 351.226(I)(3), we will direct U.S. Customs and Border Protection (CBP) to continue to suspend liquidation and require a cash deposit of estimated antidumping or countervailing duties on unliquidated entries of hangers from Cambodia that were entered, or withdrawn from warehouse, for consumption, on or after August 12, 2025, the date of publication of the initiation of this circumvention inquiry in the **Federal Register**.

The suspension of liquidation and cash deposit requirements will remain in effect until further notice.[8]

For this final determination, we continue to implement the cash deposit requirements and certification process outlined in the *Preliminary Determination*.[9] Specifically, Commerce found that no exporter of hangers from Cambodia is eligible to certify the origin of the steel or steel and paper inputs used to produce hangers in Cambodia. However, we established a certification program that allows parties (excluding parties to which Commerce applied adverse facts available) to certify that entries of hangers exported from Cambodia were produced using Chinese, rather than Vietnamese, steel wire or steel wire and paper accessories. In order to certify that shipments were not subject to the *Vietnam Orders,* the importer, exporter, and producer are required to provide documentation to CBP at the time of entry supporting the claim that the steel wire or steel wire and paper accessories were sourced from China. Should we determine at a later date that a more general certification program (*e.g.,* one where parties can certify that the imported hangers are not produced with Chinese- or Vietnamese inputs) is appropriate,

[3] *See Steel Wire Garment Hangers from the People's Republic of China and the Socialist Republic of Vietnam: Initiation of Circumvention Inquiries of the Antidumping and Countervailing Duty Orders,* 90 FR 38723 (August 12, 2025) (*Initiation Notice*), and accompanying Initiation Checklists, ''Steel Wire Garment Hangers from the People's Republic of China: Circumvention Initiation Checklist'' and ''Steel Wire Garment Hangers from the Socialist Republic of Vietnam: Circumvention Initiation Checklist.''

[4] *See Steel Wire Garment Hangers from the People's Republic of China and the Socialist Republic of Vietnam: Preliminary Affirmative Determination of Circumvention of the Antidumping Duty Order on Steel Wire Garment Hangers from the People's Republic of China and the Antidumping and Countervailing Duty Orders on Steel Wire Garment Hangers from the Socialist Republic of Vietnam,* 91 FR 60086 (September 22, 2026) (*Preliminary Determination*); *see also* Memoranda, ''Decision Memorandum for the Preliminary Affirmative Determination of Circumvention of the Antidumping Duty Order on Steel Wire Garment Hangers from the People's Republic of China,'' and ''Decision Memorandum for the Preliminary Affirmative Determination of Circumvention of the Antidumping and Countervailing Duty Orders on Steel Wire Garment Hangers from the Socialist Republic of Vietnam,'' dated September 18, 2026 (collectively, Preliminary Decision Memoranda).

[5] *See* Memorandum, ''Extension of Deadline for the Final Determinations in the Circumvention Inquiries Pertaining to Cambodia,'' dated September 17, 2026.

[6] *See* Appendix I (Scope of the *China Order*) and Appendix II (Scope of the *Vietnam Orders*).

[7] *See Preliminary Determination,* 91 FR at 60087; *see also* Preliminary Decision Memoranda.

[8] *See Preliminary Determination,* 91 FR at 60087.

[9] Consistent with our recent determinations, where AD/CVD orders from two countries (*i.e.,* here, China and Vietnam) potentially apply to an entry, Commerce instructed CBP to suspend the entry and collect cash deposits at the rates applicable to the *Vietnam Orders* (*i.e.,* the AD cash deposit rate established for the Vietnam-wide entity (220.68 percent) and the CVD cash deposit rate established for all other companies (31.58 percent)) under the following third-country case numbers: A–555–812 (Vietnam AD), and C–555–813 (Vietnam CVD). For entries of hangers from Cambodia for which the producer, exporter, and importer have certified in Commerce's dual circumvention certification program that the merchandise was produced using Chinese-origin steel wire or steel wire and paper accessories, Commerce directed CBP to suspend liquidation and require a cash deposit at the AD cash deposit rate established for hangers from China under the following third-country case number: A–555–918. *See Preliminary Determination,* 91 FR at 60087; *see also* certification requirements and certifications at Appendix III and IV.

Commerce will release the required certification language, and establish such a certification program, at that time.

Administrative Protective Order

This notice will serve as the only reminder to all parties subject to an administrative protective order (APO) of their responsibility concerning the destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

Notification to Interested Parties

This determination is issued and published in accordance with sections 781(b) of the Act 19 CFR 351.226(g)(1).

Dated: October 30, 2026.

Scot Fullerton,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Appendix I

Scope of the China Order

The merchandise subject to the *Order* is steel wire garment hangers, fabricated from carbon steel wire, whether or not galvanized or painted, whether or not coated with latex or epoxy or similar gripping materials, and/or whether or not fashioned with paper covers or capes (with or without printing) and/or nonslip features such as saddles or tubes. These products may also be referred to by a commercial designation, such as shirt, suit, strut, caped, or latex (industrial) hangers.

On October 30, 2026, Commerce determined that steel wire garment hangers that are completed in Cambodia using Chinese-origin (1) steel wire or (2) steel wire and paper accessories and subsequently exported to the United States are subject to the *Order.*

Specifically excluded from the scope of the *Order* are wooden, plastic, and other garment hangers that are not made of steel wire. Also excluded from the scope of the *Order* are chrome-plated steel wire garment hangers with a diameter of 3.4 mm or greater.

The products subject to the *Order* are currently classified under U.S. Harmonized Tariff Schedule (HTSUS) subheadings 7326.20.0020, 7323.99.9060, and 7323.99.9080. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise is dispositive.

Appendix II

Scope of the Vietnam Orders

The merchandise subject to the *Orders* is steel wire garment hangers, fabricated from carbon steel wire, whether or not galvanized or painted, whether or not coated with latex or epoxy or similar gripping materials, and whether or not fashioned with paper covers or capes (with or without printing) or nonslip features such as saddles or tubes. These products may also be referred to by a commercial designation, such as shirt, suit, strut, caped, or latex (industrial) hangers.

On October 30, 2026, Commerce determined that steel wire garment hangers that are completed in Cambodia using Vietnamese-origin (1) steel wire or (2) steel wire and paper accessories and subsequently exported to the United States are subject to the *Orders.*

Specifically excluded from the scope of the *Orders* are (a) wooden, plastic, and other garment hangers that are not made of steel wire; (b) steel wire garment hangers with swivel hooks; (c) steel wire garment hangers with clips permanently affixed; and (d) chrome plated steel wire garment hangers with a diameter of 3.4 millimeters (mm) or greater.

The products subject to the *Orders* are currently classified under U.S. Harmonized Tariff Schedule (HTSUS) subheadings 7326.20.0020 and 7323.99.9080. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise is dispositive

Appendix III

Certification Program Requirements

The importer is required to complete and maintain the applicable importer certification, and maintain a copy of the applicable producer certification, and retain all supporting documentation for both certifications. With the exception of the entries described below, the importer certification must be completed, signed, and dated by the time the entry summary is filed for the relevant entry.

If the producing company and the exporting company are the same, the importer, or the importer's agent, must submit the importer's certification, the producer/exporter certification, and documentation demonstrating that the country-of-origin of the (1) steel wire or (2) steel wire and paper accessories used in the production of the exported steel wire garment hangers was Chinese. Such certifications and documentation must be submitted to CBP at the time that the entry summary is filed by uploading these documents into the document imaging system (DIS) in the Automated Customs Environment (ACE).

If the producing company and the exporting company are different, the importer, or the importer's agent, must submit the importer's certification, the producer's certification, and the exporter's certification, and documentation demonstrating the Chinese-origin of the (1) steel wire or (2) steel wire and paper accessories used in the production of the exported steel wire garment hangers. Such certifications and documentation must be submitted to CBP at the time that the entry summary is filed by uploading these documents into DIS in ACE.

Where the importer uses a broker to facilitate the entry process, the importer should obtain the entry summary number from the broker. Agents of the importer, such as a broker, however, are not permitted to certify on behalf of the importer. Consistent with CBP's procedures, an importer shall identify certified entries by using the importer's additional declaration (record 54), AD/CVD Certification Designation (type code 6) when filing an entry summary.

Where the producer and the exporter are the same entity, the producer/exporter is required to complete and maintain the applicable producer/exporter certification and provide the importer with a copy of that certification and all supporting documentation (*e.g.,* invoice, purchase order, production records, etc.). With the exception of the entries described below, the producer certification must be completed, signed, and dated by the time of shipment of the relevant entry. The producer/exporter certification should be completed by the party producing and exporting the steel wire garment hangers that were manufactured in Cambodia to the United States.

Where the producer and exporter are different entities, (1) the producer is required to complete and maintain the applicable producer certification and provide the importer with a copy of that certification and all supporting documentation (*e.g.,* invoice, purchase order, production records, etc.), and (2) the exporter is required to complete and maintain the applicable exporter certification and provide the importer with a copy of that certification and all supporting documentation (*e.g.,* invoice, purchase order, production records, etc.).

Additionally, the claims made in the certifications and supporting documentation are subject to verification by Commerce or CBP. Importers and producers are required to maintain the certifications and supporting documentation until the later of: (1) the date that is five years after the latest entry date of the entries covered by the certification; or (2) the date that is three years after the conclusion of any litigation in the United States courts regarding such entries.

For all steel wire garment hangers that were entered, or withdrawn from warehouse, for consumption during the period August 12, 2025 (the date of publication of the initiation of these circumvention inquiries), through 45 days from the date on which Commerce published its preliminary circumvention findings in the **Federal Register**, where the entry has not been liquidated (and entries for which liquidation has not become final), the importer and producer certifications should be completed and signed as soon as practicable, but not later than 45 days of the date on which Commerce published its preliminary circumvention findings in the **Federal Register** . The importer's certification, the producer's certification, the commercial invoice, and documentation supporting the country of origin of the steel wire or type of input if not steel wire used to produce the steel wire garment hangers should be uploaded to the DIS in ACE as soon as practicable, but not later than 45 days of the date on which Commerce published its preliminary circumvention findings in the **Federal Register**. For such unliquidated

entries made prior to the publication of these preliminary determinations which are suspended under the antidumping and countervailing duty orders, the importer or producer each have the option to complete a blanket certification covering multiple entries, individual certifications for each entry, or a combination thereof.

As discussed in the Preliminary Decision Memoranda, this dual circumvention certification program is not available for companies to which Commerce has applied facts available with adverse inferences. Accordingly, as discussed in the Preliminary Decision Memoranda, Commerce preliminarily determines that Alpha Hanger, Everbrit and Kaining are ineligible to certify that any entries of hangers are made of Chinese-origin (1) steel wire or (2) steel wire and paper accessories.

Appendix IV

Importer Certification

I hereby certify that:

A. My name is {IMPORTING COMPANY OFFICIAL'S NAME} and I am an official of {IMPORTING COMPANY}, located at {ADDRESS OF IMPORTING COMPANY}.

B. I have direct personal knowledge of the facts regarding the importation into the Customs territory of the United States of the steel wire garment hangers assembled in Cambodia that entered under entry summary number(s), identified below, and are covered by this certification. ''Direct personal knowledge'' refers to facts the certifying party is expected to have in its own records. For example, the importer should have direct personal knowledge of the importation of steel wire garment hangers, including the producer, exporter and/or foreign seller's identity and location.

C. If the importer is acting on behalf of the first U.S. customer, include the following sentence as paragraph C of this certification:

The steel wire garment hangers covered by this certification were imported by {IMPORTING COMPANY} on behalf of {U.S. CUSTOMER}, located at {ADDRESS OF U.S. CUSTOMER}.

If the importer is not acting on behalf of the first U.S. customer, include the following sentence as paragraph C of this certification:

{NAME OF IMPORTING COMPANY} is not acting on behalf of the first U.S. customer.

D. The steel wire garment hangers covered by this certification were shipped to {NAME OF PARTY IN THE UNITED STATES TO WHOM THE MERCHANDISE WAS FIRST SHIPPED}, located at {U.S. ADDRESS TO WHICH MERCHANDISE WAS SHIPPED}.

E. I have personal knowledge of the facts regarding the assembly of the imported products covered by this certification. ''Personal knowledge'' includes facts obtained from another party, (*e.g.,* correspondence received by the importer (or exporter) from the producer regarding the Chinese inputs used to produce the imported products).

F. This certification applies to the following entries (repeat this block as many times as necessary):

Entry Summary #:
Entry Summary Line Item #:
Foreign Seller's Address:
Foreign Seller's Invoice #:
Foreign Seller's Invoice Line Item #:
Country of Origin of steel wire:
Country of Origin of paper accessories (if applicable):
Producer:
Producer's Address:

G. The steel wire garment hangers covered by this certification contain only steel wire or steel wire and paper accessories produced in China.

H. I understand that {IMPORTING COMPANY} is required to maintain a copy of this certification and sufficient documentation supporting this certification (*i.e.,* documents maintained in the normal course of business, or documents obtained by the certifying party, for example, certificates of origin, product data sheets, productions records, invoices, *etc.*) until the later of (1) the date that is five years after the latest entry date of the entries covered by the certification or (2) the date that is three years after the conclusion of any litigation in the United States courts regarding such entries.

I. I understand that, if the producer and the exporter are not the same entity, {IMPORTING COMPANY} is required to maintain a copy of the producer certification (attesting to the assembly of the imported merchandise identified above, if the producing company and the exporting company are not the same), and any supporting documentation provided to the importer by the producer, until the later of (1) the date that is five years after the latest entry date of the entries covered by the certification or (2) the date that is three years after the conclusion of any litigation in the United States courts regarding such entries.

J. I understand that, if the producer and the exporter are not the same entity, {IMPORTING COMPANY} is required to maintain a copy of the exporter certification (attesting to the assembly and exportation of the imported merchandise identified above, if the producing company and the exporting company are not the same), and any supporting documentation provided to the importer by the exporter, until the later of (1) the date that is five years after the latest entry date of the entries covered by the certification or (2) the date that is three years after the conclusion of any litigation in United States courts regarding such entries.

K. I understand that, if the producer and the exporter are the same entity, {IMPORTING COMPANY} is required to maintain a copy of the producer/exporter certification (attesting to the assembly/exportation of the imported merchandise identified above, if the producing company and the exporting company are the same), and any supporting documentation provided to the importer by the exporter, until the later of (1) the date that is five years after the latest entry date of the entries covered by the certification or (2) the date that is three years after the conclusion of any litigation in United States courts regarding such entries.

L. I understand that {IMPORTING COMPANY} is required to submit a copy of the importer, exporter (as applicable), producer (as applicable), and exporter/producer certifications (as applicable) as part of the entry summary by uploading them into the document imaging system (DIS) in ACE, and to provide U.S. Customs and Border Protection (CBP) and/or the U.S. Department of Commerce (Commerce) with the importer certification, and any supporting documentation, and a copy of the exporter, producer, or exporter/producer's certification, and any supporting documentation provided to the importer by such parties, upon request of either agency. Consistent with CBP's procedures, importers shall identify certified entries by using importers' additional declaration (record 54) AD/CVD Certification Designation (type code 06) when filing entry summary.

M. I understand that the claims made herein, and the substantiating documentation, are subject to verification by CBP and/or Commerce.

N. I understand that failure to maintain the required certification and supporting documentation, or failure to substantiate the claims made herein, or not allowing CBP and/or Commerce to verify the claims made herein, may result in a *de facto* determination that all entries to which this certification applies are within the scope of the antidumping duty (AD) and countervailing duty (CVD) orders on steel wire garment hangers from Vietnam. I understand that such finding will result in:

(i) suspension of liquidation at the AD and CVD rates applicable to the Vietnam Order of all unliquidated entries (and entries for which liquidation has not become final) for which these requirements were not met;

(ii) the importer being required to post the AD and CVD cash deposits determined by Commerce; and

(iii) the importer no longer being allowed to participate in the certification process.

O. I understand that agents of the importer, such as brokers, are not permitted to make this certification. When a broker or other party was used to facilitate the entry process, {NAME OF IMPORTING COMPANY} obtained the entry summary number and date of entry summary from that party.

P. This certification was completed by the time of filing the entry summary or within 45 days of the date on which Commerce published its preliminary circumvention findings in the **Federal Register**.

Q. I am aware that U.S. law (including, but not limited to, 18 U.S.C. 1001) imposes criminal sanctions on individuals who knowingly and willfully make material false statements to the U.S. government.

Exporter Certification

The party that made the sale to the United States, if different from the party that produced the merchandise, should fill out the exporter certification.

I hereby certify that:

A. My name is {COMPANY OFFICIAL'S NAME} and I am an official of {NAME OF FOREIGN COMPANY THAT MADE THE SALE TO THE UNITED STATES}, located at

{ADDRESS OF FOREIGN COMPANY THAT MADE THE SALE TO THE UNITED STATES}.

B. I have direct personal knowledge of the facts regarding the assembly and exportation of the steel wire garment hangers for which sales are identified below. ''Direct personal knowledge'' refers to facts the certifying party is expected to have in its own records. For example, an exporter should have direct personal knowledge of the use of Chinese inputs in the assembly of hangers imported into the United States, the exportation of steel wire garment hangers, as well as the producer's identity and location.

C. The steel wire garment hangers covered by this certification were shipped to {NAME OF PARTY IN THE UNITED STATES TO WHOM MERCHANDISE WAS FIRST SHIPPED}, located at {U.S. ADDRESS TO WHICH MERCHANDISE WAS SHIPPED}.

D. The steel wire garment hangers covered by this certification contain only steel wire or steel wire and paper accessories produced in China.

E. This certification applies to the following sales to {NAME OF U.S. CUSTOMER}, located at {ADDRESS OF U.S. CUSTOMER} (repeat this block as many times as necessary):

Foreign Seller's Invoice # to U.S. Customer:
Foreign Seller's Invoice to U.S. Customer Line item #:
Producer Name:
Producer's Address:
Producer's Invoice # to Foreign Seller:

F. I understand that {NAME OF FOREIGN COMPANY THAT MADE THE SALE TO THE UNITED STATES} is required to maintain a copy of this certification and the producer certification (attesting to the assembly of the imported merchandise identified above, if the producing company and the exporting company are not the same), and sufficient documentation supporting these certifications (*i.e.,* documents maintained in the normal course of business, or documents obtained by the certifying party, for example, product data sheets, productions records, invoices, *etc.*) until the later of: (1) the date that is five years after the latest date of the entries covered by the certification; or (2) the date that is three years after the conclusion of any litigation in the United States courts regarding such entries.

G. I understand that {NAME OF FOREIGN COMPANY THAT MADE THE SALE TO THE UNITED STATES} is required to provide the U.S. importer with a copy of both this certification and the producer certification, and is required to provide U.S. Customs and Border Protection (CBP) and/or the U.S. Department of Commerce (Commerce) with this certification and the producer certification, and any supporting documents, upon request of either agency.

H. I understand that the claims made herein, and the substantiating documentation, are subject to verification by CBP and/or Commerce.

I. I understand that failure to maintain the required certification and supporting documentation, or failure to substantiate the claims made herein, or not allowing CBP and/or Commerce to verify the claims made herein, may result in a *de facto* determination that all sales to which this certification applies are within the scope of the antidumping duty and countervailing duty orders on steel wire garment hangers from Vietnam. I understand that such a finding will result in:

(i) suspension of all unliquidated entries at the AD and CVD rates applicable to the Vietnam Order (and entries for which liquidation has not become final) for which these requirements were not met;

(ii) the importer being required to post the antidumping duty and countervailing duty cash deposits determined by Commerce; and

(iii) the seller/exporter no longer being allowed to participate in the certification process.

J. I understand that agents of the seller/exporter, such as freight forwarding companies or brokers, are not permitted to make this certification.

K. This certification was completed at time of shipment or within 45 days of the date on which Commerce published its preliminary circumvention findings in the **Federal Register**.

L. I am aware that U.S. law (including, but not limited to, 18 U.S.C. 1001) imposes criminal sanctions on individuals who knowingly and willfully make material false statements to the U.S. government.

Oakland University, et.al; Application(s) for Duty-Free Entry of Scientific Instruments

Pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, asamended by Pub. L. 106–36; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.Further information on the application can be found here: *https://www.trade.gov/sips-florence-frs.*

Comments must comply with 15 CFR 301.5(a)(3) and (4) of the regulations and be postmarked on or before November 27, 2026. Address written comments to Statutory Import Programs Staff, Room 40005, U.S. Department of Commerce, Washington, DC 20230. Please also email a copy of those comments to *SIPS-Florence@trade.gov.*

Docket No.	Applicant	Instrument
26–125	Oakland University	JSM–1T710HKLV Low Vacuum Scanning Electron Microscope.
26–127	University of Virginia	Radio Telescope.
26–129	University of Iowa	Leica Confocal Microscope.
26–130	University of Miami	FluoTime 300.
26–136	UChicago Argonne LLC	RF Power Amplifier.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XG147]

Atlantic Highly Migratory Species; Advisory Panel

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; solicitation of nominations.

SUMMARY: NMFS solicits nominations for the Atlantic Highly Migratory Species (HMS) Advisory Panel (AP). NMFS consults with and considers the comments and views of the HMS AP when preparing and implementing fishery management plans (FMPs) or FMP amendments for Atlantic swordfish, sharks, tunas, and billfish. Nominations are being sought to fill approximately one third (10) of the seats on the HMS AP, each with a 3-year appointment. NMFS will consider individuals with definable interests in recreational and commercial fishing and related industries, including those from the environmental community and non-governmental organizations, for membership on the HMS AP.

DATES: Submit nominations on or before December 7, 2026.

ADDRESSES: You may submit nominations and requests for the AP Statement of Organization, Practices, and Procedures by email to *HMSAP.Nominations@noaa.gov*. Include in the subject line the following identifier: ''HMS AP Nominations.''

FOR FURTHER INFORMATION CONTACT: Anna Quintrell at 301–427–8503 or via email at *HMSAP.Nominations@noaa.gov*.

SUPPLEMENTARY INFORMATION: HMS fisheries (swordfish, sharks, tunas, and billfish) are managed under the 2006 Consolidated HMS FMP and its amendments pursuant to the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*) and consistent with the Atlantic Tunas Convention Act (16 U.S.C. 971 *et seq.*). HMS implementing regulations are at 50 CFR part 635.

The Magnuson-Stevens Act requires NMFS to establish an AP for each HMS FMP (16 U.S.C. 1854(g)(1)(A)–(B)). Since the inception of the AP in 1998, NMFS has consulted with and considered the comments and views of AP members when preparing and implementing HMS FMPs or FMP amendments. In this notice, NMFS solicits nominations for the HMS AP.

Nominations are being sought to fill approximately one third (10) of the seats on the HMS AP for 3-year appointments. NMFS will consider individuals with definable interests in recreational and commercial fishing and related industries, including those from the environmental community and non-governmental organizations for membership on the HMS AP as described below.

Procedures and Guidelines

Nomination Procedures for Appointments to the AP

Nomination packages should include:

1. The name and contact information, including mailing address, email address, and phone number of the nominee;

2. A description of the nominee's interest in HMS or HMS fisheries, or in particular species of swordfish, sharks, tunas, or billfish;

3. A statement of the nominee's background and/or qualifications;

4. A list of outreach resources that the nominee has at their disposal; and

5. A written commitment that the nominee shall actively participate in good faith in the meetings and tasks of the HMS AP.

Advisory Panel members will be required to comply with applicable rules of conduct, including all ethics requirements. Qualification for membership includes experience in one or more of the following:

1. HMS recreational fisheries;

2. HMS commercial fisheries;

3. Fishery-related industries (*e.g.,* marinas, bait and tackle shops);

4. The scientific community working with HMS; and/or

5. Representation of a private, non-governmental, regional, national, or international organization that represents marine fisheries, or environmental, governmental, or academic interests regarding HMS.

HMS AP Tenure

Members are appointed for 3-year terms. Approximately one third of the members' terms expire on December 31 of each year. NMFS is seeking nominations for terms beginning January 2027 and expiring December 2029.

Members can serve a maximum of three consecutive terms (a total of 9 consecutive years). Afterwards, a member must then sit off the HMS AP for a single year before becoming eligible to apply for a new term.

Participants

NMFS will accept nominations for the HMS AP that allow for representation from commercial and recreational fishing interests, scientific interests, and the environmental/non-governmental organization community, for individuals who are knowledgeable about HMS and/or HMS fisheries. Current representation on the HMS AP, as shown in table 1, consists of 12 members representing commercial interests, 12 members representing recreational interests, 4 members representing environmental interests, 4 academic representatives, and the International Commission for the Conservation of Atlantic Tunas Advisory Committee Chair. NMFS seeks to fill five commercial, three recreational, one academic, and one environmental sector vacancies for terms starting in 2027.

In filling vacancies, NMFS will seek to maintain the current representation from each of the sectors. NMFS also considers species expertise and representation from the fishing regions (Northeast, Mid-Atlantic, Southeast, Gulf of America, and Caribbean) to ensure the balance of the HMS AP. Table 1 includes the current representation on the HMS AP by sector, region, and species with terms that are expiring identified in the ''Member Status'' column. It is not meant to indicate that NMFS will only consider persons who have expertise in the species or fishing regions that are listed. Rather, NMFS will aim toward having as balanced an AP as possible. The intent is to have a group that, as a whole, reflects an appropriate and equitable balance and mix of interests given the responsibilities of the HMS AP.

TABLE 1—CURRENT REPRESENTATION ON THE HMS AP BY SECTOR, REGION, AND SPECIES

Sector	Fishing region	Species	Date appointed	Date term expires	Member status
Academic	All	Billfish/HMS	1/1/2024	12/31/2026	Expiring.
Academic	NE/Mid-Atlantic	Tuna/Shark	1/1/2025	12/31/2027	Active.
Academic	SE/Gulf	Sharks	1/1/2025	12/31/2027	Active.
Academic	Northeast	HMS	1/1/2025	12/31/2027	Active.
Commercial	Gulf	Tuna	1/1/2026	12/31/2028	Active.
Commercial	Southeast	Swordfish	1/1/2026	12/31/2028	Active.
Commercial	Mid-Atlantic/SE	Tuna	1/1/2026	12/31/2028	Active.
Commercial	Northeast	HMS	1/1/2024	12/31/2026	Expiring.
Commercial	Northeast	Tuna	1/1/2024	12/31/2026	Expiring.
Commercial	Northeast	Tuna	1/1/2024	12/31/2026	Expiring.
Commercial	Gulf of America	HMS	1/1/2024	12/31/2026	Expiring.
Commercial	Southeast/Gulf	HMS	1/1/2025	12/31/2027	Active.
Commercial	Northeast	Tuna	1/1/2024	12/31/2026	Expiring.
Commercial	All	HMS/Tuna	1/1/2025	12/31/2027	Active.
Commercial	Southeast	Sharks	1/1/2025	12/31/2027	Active.
Commercial	Northeast	Swordfish/Tuna	1/1/2025	12/31/2027	Active.
Environmental	All	Shark	1/1/2026	12/31/2028	Active.
Environmental	Gulf	HMS	1/1/2026	12/31/2028	Active.
Environmental	All	HMS	1/1/2024	12/31/2026	Expiring.
Environmental	Caribbean	HMS	1/1/2025	12/31/2027	Active.
Recreational	Mid-Atlantic	Tuna/Billfish	1/1/2024	12/31/2026	Expiring.
Recreational	Mid-Atlantic	Shark	1/1/2024	12/31/2026	Expiring.
Recreational	Northeast	Tuna/Sharks	1/1/2026	12/31/2028	Active.
Recreational	All	HMS	1/1/2026	12/31/2028	Active.
Recreational	Gulf	HMS	1/1/2026	12/31/2028	Active.
Recreational	All	HMS	1/1/2026	12/31/2028	Active.
Recreational	Southeast	HMS/Billfish	1/1/2026	12/31/2028	Active.
Recreational	Southeast	HMS/Billfish	1/1/2026	12/31/2028	Active.
Recreational	All	Billfish	1/1/2024	12/31/2026	Expiring.

TABLE 1—CURRENT REPRESENTATION ON THE HMS AP BY SECTOR, REGION, AND SPECIES—Continued

Sector	Fishing region	Species	Date appointed	Date term expires	Member status
Recreational	NE/Mid-Atlantic	HMS	1/1/2025	12/31/2027	Active.
Recreational	NE/Mid-Atlantic	Tuna/Shark	1/1/2025	12/31/2027	Active.
Recreational	Northeast	Tuna/Shark	1/1/2025	12/31/2027	Active.

Note: Terms that are expiring or associated with current members stepping down are marked as ''Expiring.''

Five additional members on the HMS AP include one member representing each of the following Fishery Management Councils: the New England Fishery Management Council, the Mid-Atlantic Fishery Management Council, the South Atlantic Fishery Management Council, the Gulf Fishery Management Council, and the Caribbean Fishery Management Council. The HMS AP also includes 22 ex-officio participants: 20 representatives of the coastal states and 2 representatives of the interstate commissions (the Atlantic States Marine Fisheries Commission and the Gulf States Marine Fisheries Commission).

NMFS will provide the necessary administrative support, including technical assistance, for the HMS AP. However, NMFS will not compensate participants with monetary support of any kind. Depending on availability of funds, members may be reimbursed for travel costs related to the HMS AP meetings.

Meeting Schedule

NMFS will hold meetings of the HMS AP as frequently as necessary and, at a minimum, twice each year. In recent years, NMFS held meetings once in the spring and once in the fall. The meetings may be held in conjunction with public hearings.

Dated: November 3, 2026.

Shannon Bettridge,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XG156]

Fisheries of the South Atlantic; Southeast Data, Assessment, and Review; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of webinar.

SUMMARY: The Southeast Data Assessment and Review (SEDAR) 90 assessment process of South Atlantic Red Snapper will consist of a Data Workshop, a series of Assessment Webinars, and a Review Workshop. See **SUPPLEMENTARY INFORMATION**.

DATES: The SEDAR 90 Assessment Webinar 13 will be held from 1 p.m. until 4 p.m. EDT on December 4, 2026.

ADDRESSES:

SEDAR address: 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405.

Meeting address: The SEDAR 90 Assessment Webinar 13 will be held via webinar. The webinar is open to members of the public. The established times may be adjusted as necessary to accommodate the timely completion of discussion relevant to the assessment process. Such adjustments may result in the meeting being extended from or completed prior to the time established by this notice. *https://www.sedarweb.org.*

FOR FURTHER INFORMATION CONTACT: Emily Ott, SEDAR Coordinator; (843) 302–8434. Email: *Emily.Ott@safmc.net.*

SUPPLEMENTARY INFORMATION: The Gulf, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with the NMFS and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the SEDAR process. SEDAR is a participatory process for developing, evaluating and reviewing information used for fisheries management advice. This multi-step process for determining the status of fish stocks in the Southeast Region may include (1) a data stage, (2) an assessment stage, and (3) a review stage. Each stage produces a report summarizing decisions made during that stage. A final stock assessment report is produced at the end of a SEDAR process documenting data sets used, model configurations, and the opinions from the independent peer review. Participants for SEDAR projects are appointed by the Gulf, South Atlantic, and Caribbean Fishery Management Councils and National Marine Fisheries Service Southeast Regional Office, Highly Migratory Species Management Division, and Southeast Fisheries Science Center. Participants may include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations; International experts; and staff of Councils, Commissions, and State and Federal agencies.

The items of discussion in the SEDAR 90 Assessment Webinar 13 are as follows:

Participants will review recommendations made on Assessment Webinar 11 and continue discussion of new modeling topics. Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 5 business days prior to each workshop.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 4, 2026.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

U.S. Integrated Ocean Observing System (IOOS®) Advisory Committee

AGENCY: U.S. Integrated Ocean Observing System (IOOS®), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Notice of new member solicitation for the United States Integrated Ocean Observing System (U.S. IOOS) Advisory Committee.

SUMMARY: NOAA is soliciting applications for membership on the United States Integrated Ocean Observing System Advisory Committee (the Committee), which is a Federal Advisory Committee. The Committee is mandated by the Integrated Coastal and Ocean Observation System Act of 2009 (the Act), part of the Omnibus Public Land Management Act of 2009 (Pub. L. 111–11), and the Coordinated Ocean Observations and Research Act of 2020 (Pub. L. 116–271) to provide advice to the NOAA Administrator and to the Interagency Ocean Observation Committee on the planning, integrated design, operation, maintenance, enhancement, and expansion of the United States Integrated Ocean Observing System (U.S. IOOS). NOAA is accepting applications for membership on the Committee to fill vacancies that will occur on September 14, 2027. NOAA encourages applications from individuals with expertise and/or experience in the following areas: coastal and ocean observing; data management and architecture; coastal and ocean modeling; Great Lakes; philanthropy; Non-Governmental Organization; scientific institutions (Academic); IOOS regional interests; State, local and tribal interests; blue economy; social science; public-private partnerships; marine technologies industries; ocean and coastal leadership; and other science-related fields.

DATES: Applications should be submitted no later than January 5, 2027. Applications received after January 5, 2027 may not be considered during this membership application cycle, but may be considered for future membership cycles.

ADDRESSES: Applications and questions about applications should be submitted via email *ioos.ac.staff@noaa.gov.*

FOR FURTHER INFORMATION CONTACT: Krisa Arzayus, Designated Federal Official, U.S. IOOS Advisory Committee, U.S. IOOS Office, *krisa.arzayus@noaa.gov* or visit the U.S. IOOS Advisory Committee website at *https://ioos.noaa.gov/community/u-s-ioos-advisory-committee/.*

SUPPLEMENTARY INFORMATION:

I. Background

U.S. IOOS (*https://ioos.noaa.gov*) is an integrated network of people and technology gathering coastal data and developing tracking and predictive tools to benefit the economy, the environment, and public safety at home, across the nation, and around the globe. U.S. IOOS promotes research to develop, test, and deploy innovations and improvements in coastal and ocean observation technologies and modeling systems, addresses regional and national needs for ocean information, gathers data on key coastal, ocean, and Great Lakes variables and ensures timely and sustained dissemination and availability of these data for societal benefits. U.S. IOOS benefits national safety, the economy, and the environment through support for national defense, marine commerce and forecasting, navigation safety, weather, economic development, ecosystem-based management of marine and coastal areas, conservation of ocean and coastal resources and public safety. This notice responds to the Act (Pub. L. 111–11, section 12304), which requires the Under Secretary of Commerce for Oceans and Atmosphere to solicit nominations for Committee membership. The Committee advises the NOAA Administrator and Interagency Ocean Observation Committee on matters related to the responsibilities and authorities set forth in section 12302 of the Act and other appropriate matters as the Under Secretary refers to the Committee for review and advice. The Committee has approximately fifteen voting members. For additional information about the Committee responsibilities, see *https://ioos.noaa.gov/community/u-s-ioos-advisory-committee/.*

II. Eligibility and Criteria

Membership is open to individuals from academia; local, state or tribal government; industry; non-governmental not-for-profit, and other ocean-related institutions. Full-time officers or employees of the United States are not eligible. Race or sex shall not be considered in selection of Committee members. Members shall be qualified by education, training, and experience to evaluate scientific, technical, and programmatic information related to the design, operation, maintenance, or use of the U.S. IOOS, or use of data products provided through the U.S. IOOS.

III. Terms of Service

The NOAA Administrator shall appoint new Committee members for three-year terms, renewable once for an additional three-year term. The next term will begin on September 14, 2027.

IV. Expectations

The Committee will meet at least once each year in-person, with additional virtual meetings throughout the year. In a typical year, a committee member is expected to attend at least one in-person meeting (2–4 days including travel) and commit approximately 20–25 additional hours to attend virtual meetings and draft recommendation reports. Members of the Committee will not be compensated for service on the Committee, but they may be allowed travel expenses, including per diem in lieu of subsistence, in accordance with subchapter I of chapter 57 of title 5, United States Code.

V. Application

To apply for membership, applicants must submit the following items. The entire package should not exceed eight pages.

(1) A cover letter that serves as a statement of interest to serve on the Committee and provides the requested information listed below.

(a) Applicant's area(s) of expertise, as aligned with the expertise requested in the **SUMMARY** section above.

(b) The geographic region(s) of the country most closely associated with the applicant's area of expertise. This does not need to be the region the applicant currently resides in.

(c) Previous/current leadership or professional experience that may contribute to the effectiveness of the Committee.

(d) Familiarity and experience with U.S. IOOS data, products, and services.

(e) Breadth and scope of knowledge of stakeholders, users, or other groups who interact with NOAA or other U.S. IOOS agencies and whose views and input applicant believes they can share with the panel.

(2) A short biography of 300 to 400 words.

(3) A current resume.

(4) The nominee's full name, title, institutional affiliation, mailing address, email, and phone.

VI. Selection

Nominations will be reviewed and evaluated based on expertise, Committee needs, and balance considerations. Final appointments are made by the NOAA Administrator. Individuals selected for membership become a Special Government

Employee (SGE) of the United States Government. An SGE is an officer or employee of an agency who is retained, designated, appointed, or employed to perform temporary duties, with or without compensation, for not to exceed 130 days during any period of 365 consecutive days, either on a full- time or intermittent basis. Applicants who are selected to serve on the Committee must complete the following actions before they can serve as a committee member:

(1) Security Clearance (on-line Background Check and fingerprinting).

(2) Confidential Financial Disclosure Report—SGEs are required to file annually a Confidential Financial Disclosure Report to avoid involvement in a real or apparent conflict of interest.

(3) Attend annual ethics briefings to comply with government ethics standards.

Authority: Integrated Coastal and Ocean Observation System Act, part of the Omnibus Public Land Management Act of 2009 (Public Law 111–11), and the Coordinated Ocean Observations and Research Act of 2020 (Public Law 116–271).

Krisa M. Arzayus,

Acting Director, U.S. IOOS Office, National Ocean Service, National Oceanic and Atmospheric Administration.

[FR Doc. 2026–22681 Filed 11–5–26; 8:45 am]

BILLING CODE 3510–NE–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Notice of Public Hearings and Availability of the Draft Environmental Impact Statement and Draft Management Plan for the Proposed Designation of the Green Bay National Estuarine Research Reserve

AGENCY: Office for Coastal Management (OCM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce.

ACTION: Notice of availability; public hearings.

SUMMARY: Notice is hereby given that, pursuant to the Coastal Zone Management Act, as amended (CZMA), the National Oceanic and Atmospheric Administration (NOAA) Office for Coastal Management is announcing a 45-day public comment period and public hearings to solicit comments on the draft management plan (DMP) and draft environmental impact statement (DEIS) for the proposed designation of the Green Bay National Estuarine Research Reserve (Green Bay Reserve). The DMP addresses research, monitoring, education, and stewardship needs for the proposed Green Bay Reserve, and the DEIS evaluates alternatives to the proposed action, along with the potential environmental impacts of these alternatives.

DATES: NOAA is accepting written public comments on the adequacy of the DMP and DEIS for the proposed designation of the Green Bay Reserve through 11:59 p.m. Central Time (CT) on December 21, 2026. In addition, NOAA will accept oral public comments on the adequacy of the DMP and DEIS for the proposed designation of the Green Bay Reserve during a virtual public hearing held from 10 a.m. to 11:30 a.m. CT via Zoom and an in-person public hearing held from 2:30 p.m. to 4 p.m. CT on Thursday, December 10, 2026. All comments received at the December 10 public hearings and during the 45-day public comment period will be considered in preparing the final management plan and final environmental impact statement for the proposed designation of the Green Bay Reserve.

ADDRESSES: Hearing documents are available on the federal eRulemaking portal at *www.regulations.gov* (enter NOAA–NOS–2024–0006 in the *Search* box). Written comments may be submitted using the following methods:

- *Electronic Submission:* Submit all electronic public comments via the federal eRulemaking portal. Go to *www.regulations.gov* and enter NOAA–NOS–2024–0006 in the *Search* box. Click the *Comment* icon, complete the required fields, and enter or attach your comment. Written comments provided electronically must be submitted no later than 11:59 p.m. CT on December 21, 2026.
- *Mail:* Submit written comments to Erica Seiden, NOAA Office for Coastal Management, 1305 East-West Highway, 10th Floor, Silver Spring, Maryland 20910; ATTN: Green Bay NERR. Written comments provided by mail must be postmarked no later than December 21, 2026.

Instructions: All comments received are part of the public record and will be posted for public viewing on *https://regulations.gov/docket?D=NOAA-NOS-2024-0006* with no changes. All personally identifiable information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the commenter will be publicly accessible and maintained by NOAA as part of the public record. NOAA will accept anonymous comments. To do so, on the *eRulemaking Portal,* enter ''N/A'' in the required fields if you wish to remain anonymous. If you would like to submit an anonymous comment during the in-person meeting, a comment box, along with paper and writing implements, will be provided. If you would like to provide an anonymous comment during the virtual public scoping meeting, type your comment into the question box, and state that you would like to remain anonymous when your comment is read. Multimedia submissions (*i.e.,* audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. NOAA will generally not consider comments, or comment contents, located outside of the primary submission sites or addresses (*i.e.,* those posted on the web, cloud, or other file-sharing system).

Public Hearings

- The virtual public hearing will be held via Zoom at the following link: *https://wisconsin-edu.zoom.us/j/96577868965* on December 10, 2026, at 10 a.m. CT. If requested upon joining the virtual hearing, the meeting ID is 965 7786 8965. This virtual public hearing may also be joined via telephone. The telephone number is (301) 715–8592, and the access code is 96577868965#.
- The in-person public hearing will be conducted on December 10, 2026, at 2:30 p.m. CT in Room 136 of the S.T.E.M. Innovation Center at the University of Wisconsin–Green Bay campus, located at 2019 Technology Way, Green Bay, Wisconsin 54311. This hearing will be in-person only and not broadcast.

Participants can provide comments during both the virtual and in-person hearings. Both public hearings will present the same information. To ensure full consideration by NOAA, oral comments must be in English. The public hearings will be transcribed.

FOR FURTHER INFORMATION CONTACT: Erica Seiden, NOAA Office for Coastal Management, 1305 East-West Highway, 10th Floor, Silver Spring, Maryland 20910; ATTN: Green Bay NERR; (240) 429–5166; *erica.seiden@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

The National Estuarine Research Reserve System (Reserve System) is a federal-state partnership program authorized under the Coastal Zone Management Act, as amended (16 U.S.C.

1461). The Reserve System protects a representative system of estuaries across the nation and is dedicated to improving estuarine science, education, and stewardship. Reserve activities directly inform the local and national management of the nation's coasts and increase the resilience of coastal communities. There are currently 30 reserves across 25 different U.S. states and territories. Together, the national reserves protect more than 1.4 million acres of estuarine habitat for long-term research, monitoring, education, and stewardship.

Each reserve is managed by a lead state agency or university and brings together local stakeholders, scientists, land management professionals, and educators to understand coastal management issues and generate local, integrated solutions. NOAA administers the Reserve System but does not own or manage the land within a reserve. Instead, NOAA provides strategic direction, national coordination, technical assistance, and funding to states to implement reserves at the local level. The designation of a reserve does not add new state or federal regulations. Memoranda of Agreement are used to articulate roles and responsibilities among relevant partners and landowners in the state and NOAA.

The Green Bay Reserve nomination process formally began on March 25, 2019, when the governor of Wisconsin submitted a letter of interest to NOAA. NOAA responded affirmatively on July 19, 2019. Between September 2020 and September 2022, the University of Wisconsin–Green Bay, with guidance from NOAA, undertook a comprehensive site selection process for the proposed Green Bay Reserve. This process was informed by input from the public, affected landowners, state and federal agency representatives, Tribal nations, academia, nongovernmental organizations, and local government units. Through this collaborative process, the state selected a site for the proposed reserve comprising three components (Peshtigo River, Lower Bay, and Sturgeon Bay) and consisting entirely of publicly owned or land trust-held areas. NOAA received the state's nomination of the proposed multicomponent site for the Green Bay Reserve on December 29, 2022. NOAA evaluated the nomination package and found that the proposed site met the Reserve System's requirements. (See 16 U.S.C. 1461(b).)

On January 25, 2024, NOAA informed the State of Wisconsin of its accepted nomination and started the formal designation process by publishing a notice of intent to prepare a draft environmental impact statement and hold scoping meetings on the proposed designation. Public hearings were held on March 19, 2024, and written comments were accepted until April 19, 2024.

The National Estuarine Research Reserve System's implementing regulations require the preparation of both a draft management plan and environmental impact statement as part of the designation process. (15 CFR 921.13.)

II. Draft Environmental Impact Statement

The purpose of the Green Bay Reserve DEIS is to inform decision-makers and the public about the potential environmental impacts of designating the proposed Green Bay Reserve as the 31st reserve in the nation. NOAA prepared this document pursuant to the National Environmental Policy Act. (NEPA; 42 U.S.C. 4321 *et seq.*) Three alternatives were evaluated as part of this DEIS:

- *No Action Alternative:* As required by the National Environmental Policy Act, a ''no action alternative'' must be considered. The no action alternative represents the scenario in which NOAA does not proceed with the proposed action. In this case, the no action alternative is the result of declining to designate the Green Bay Reserve and implement its draft management plan.
- *Alternative A:* Under this alternative, NOAA would designate the originally nominated site as a reserve. Alternative A, including upland, wetland, and open waters, is approximately 37,714 acres in size. The proposed land and waters are organized into three component areas by geography: the Peshtigo Component, the Lower Bay Component, and the Sturgeon Bay Component.
- *Alternative B:* Under this alternative, NOAA would designate a revised nominated site as a reserve. Alternative B is similar to Alternative A, though with minor modifications. Specifically, additional lands adjacent to the originally nominated site acquired by landholding partners are integrated into the proposed reserve boundary; meanwhile, small parcels that are not closely aligned with the mission of the Reserve System are removed, and the delineation of core and buffer areas are revised. Alternative B is approximately 36,502 acres in size.

These alternatives allow NOAA to evaluate environmental impacts while addressing the proposed action's purpose and need.

Designating and implementing the proposed Green Bay Reserve, under any of the analyzed alternatives, is not expected to result in significant adverse impacts to the natural or human environment. Designating the proposed Green Bay Reserve and implementing its draft management plan provides multiple benefits. First, the reserve would support existing efforts and establish new research, monitoring, education, and stewardship programs to address priority coastal management issues in the Green Bay estuary. Additionally, the reserve would leverage existing authorities to ensure a stable environment for long-term research and provide a framework for coordination and oversight to achieve its goals. Finally, the designation would bring additional financial and staff resources to support estuary management.

Once designated, the Green Bay Reserve would commence operations, with associated education, research, training, stewardship, and monitoring opportunities and activities. The draft management plan highlights activities that, independently or when aggregated with other factors, may contribute to reasonably foreseeable impacts on the affected environment. If a reserve is designated, future federal actions (including actions funded through NOAA cooperative agreements) will be evaluated individually to comply with applicable environmental laws and policies.

III. Draft Management Plan

The purpose of the draft management plan is to set a course for operating the proposed Green Bay Reserve upon designation. The plan provides for administration, research, education, training, stewardship, facilities, and management of the proposed site. (15 CFR 921.13.) The draft management plan for the proposed Green Bay Reserve supports the goals of the Reserve System (15 CFR 921.1(b)) and addresses issues relevant to northeastern Wisconsin. Specifically, the plan defines four key issues relevant to Northeast Wisconsin and the Green Bay estuary to focus on over the next five years, should the reserve be designated:

- Preparing Great Lakes communities for long-term ecosystem change and variability
- Restoring sustainable and holistic land-water connections
- Preserving biodiversity through improved ecological integrity and ecosystem resilience
- Enhancing the Bay of Green Bay's sense of place and connection to quality of life

The draft plan also defines goals that reflect the priorities of the proposed reserve during the first five years after designation:

- *Goal 1:* Strengthen community adaptation and preparation for projected impacts of climate-driven hydrologic shifts and changing lake levels
- *Goal 2:* Reduce excessive sediment, nutrient, and contaminant loadings into the Bay from watershed inputs
- *Goal 3:* Strengthen the ability of native and noninvasive species to access terrestrial, wetland, and aquatic habitats and improve interconnectedness of ecosystem components
- *Goal 4:* Restore healthy wetland, submerged aquatic, and benthic habitats and promote diverse species assemblages
- *Goal 5:* Foster historical awareness and contemporary connections between people and the Green Bay estuary
- *Goal 6:* Promote sustainable, beneficial uses of the Bay for regional communities

If designated, the Green Bay Reserve—like all reserves in the system—would be responsible for the implementation of programs related to education, research, training, stewardship, and monitoring in service to communities surrounding the Green Bay estuary. The draft management plan for the Green Bay Reserve includes information on its core programs as well as program-specific focal areas, potential for partnerships, needs, and opportunities. If designated, the development and implementation of these reserve programs would be led by the University of Wisconsin–Green Bay, the lead state agency for the proposed Green Bay Reserve.

As previously noted, the Coastal Zone Management Act's implementing regulations for the Reserve System require NOAA to provide notice in the **Federal Register** of the availability of the DEIS (15 CFR 921.13), the draft management plan (15 CFR 921.20(h)), and associated public hearing(s).

Authority: 16 U.S.C. 1461; 15 CFR 921.13.

Keelin S. Kuipers,

Acting Director, Office for Coastal Management, National Ocean Service, National Oceanic and Atmospheric Administration.

BILLING CODE 3510–08–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XF955]

Marine Mammals; File No. 29841

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application.

SUMMARY: Notice is hereby given that Rutgers University (Responsible Party: John Wiedenmann, Ph.D.), 14 College Farm Rd., New Brunswick, NJ 08901, has applied in due form for a permit to conduct research on cetaceans.

DATES: Written comments must be received on or before December 7, 2026.

ADDRESSES: The application and related documents are available for review upon written request via email to *NMFS.Pr1Comments@noaa.gov.*

Written comments on this application should be submitted via email to *NMFS.Pr1Comments@noaa.gov.* Please include File No. 29841 in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request via email to *NMFS.Pr1Comments@noaa.gov.* The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Courtney Smith, Ph.D., or Shasta McClenahan, Ph.D., (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

The applicant proposes assessing the habitat use and behavior of baleen whales within planned offshore wind construction sites and shipping areas off New Jersey with a focus on humpback (*Megaptera novaeangliae*) and endangered fin whales (*Balaenoptera physalus*). Up to 85 whales of these species may be taken annually during vessel surveys involving observations, photo-identification or video, and tagging (dart/barb and deep-implant). Minke whales (*Balaenoptera acutorostrata*), short-beaked common dolphins (*Delphinus delphis*), and endangered North Atlantic right whales (*Eubalaena glacialis*) may be unintentionally harassed and opportunistically studied. The permit is requested for 5 years.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: November 3, 2026.

Larissa Plants,

Deputy Director, Office of Protected Resources, National Marine Fisheries Service.

CONSUMER FINANCIAL PROTECTION BUREAU

Fair Lending Report of the Consumer Financial Protection Bureau

AGENCY: Consumer Financial Protection Bureau.

ACTION: Fair Lending Report of the Consumer Financial Protection Bureau.

SUMMARY: The Consumer Financial Protection Bureau (CFPB or Bureau) is issuing its Fair Lending Report of the Consumer Financial Protection Bureau (Fair Lending Report) to Congress. This report describes our fair lending activities in rulemaking; supervision and enforcement; interagency coordination; and stakeholder engagement for calendar year 2025.

DATES: The CFPB released the 2025 Fair Lending Report on its website on October 1, 2026.

FOR FURTHER INFORMATION CONTACT: Dave Gettler, Paralegal Specialist, Office of Regulations, at 202–435–7700 or *https://reginquiries.consumerfinance.gov/.* If you require this document in an alternative electronic format, please contact *CFPB_Accessibility@cfpb.gov.*

SUPPLEMENTARY INFORMATION:

1. Introduction

In 2025, the CFPB transformed its fair lending program by refocusing its regulatory, supervisory, and enforcement activities on its statutory authority and identified consumer harm. Under previous administrations, the CFPB was weaponized and had gone beyond its statutory mandate. In the area of fair lending specifically, CFPB

leadership uncovered egregious examples of companies being targeted for protected political speech and exercising their constitutional rights. Throughout the reporting period, the CFPB worked to correct its course and reverse the previous administrations' abuses and overreach of its statutory mandates.

Under President Trump, the CFPB shifted the way it regulates, supervises, and enforces the laws as required under the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act). The CFPB's fair lending efforts now focus on proven, intentional racial discrimination with actual identifiable victims. The CFPB does not engage in or facilitate unconstitutional racial classification or discrimination in its enforcement of fair lending laws. The Bureau employs its resources [1] on pressing threats to consumers and in the areas that are clearly within the CFPB's statutory authority, without duplicating work of other regulators. Enforcement also is being guided by a new set of principles so that the CFPB focuses on addressing actual harm to consumers, ensuring due process, seeking collaboration when appropriate, and promoting efficiency.

To guide its fair lending efforts, CFPB leadership prioritized implementation of several executive orders, including directives prohibiting unlawful debanking,[2] terminating all discriminatory and illegal preferences,[3] and ending use of disparate impact liability in the enforcement of civil rights laws.[4] Accordingly, during the reporting period, the CFPB stopped using disparate impact in its supervision and enforcement of fair lending laws and undid previous actions relying on disparate impact. The CFPB also stopped consulting with institutions regarding special purpose credit programs (SPCPs) based on race, color, national origin, or sex and prioritized addressing unlawful debanking.

In support of the President's deregulatory agenda, the CFPB worked diligently to reverse regulatory overreach, reduce unjustified regulatory burdens, and streamline and clarify existing regulations. In 2025, the CFPB prioritized two rulemakings related to fair lending. Both rules were finalized in 2026. The first rulemaking amended Regulation B, subpart A, implementing the Equal Credit Opportunity Act (ECOA) to affirm that ECOA does not authorize disparate impact liability. The rule also prohibits use of race, color, national origin, or sex as eligibility criteria for SPCPs and clarifies the discouragement provisions, protecting targeted advertising from discouragement claims under ECOA. We made these important regulatory changes to align with the best reading of the law and to minimize risks of impermissible and unconstitutional discrimination. Importantly, the changes help ensure that credit is made available to all without regard to protected class status.

The second rulemaking amended Regulation B, subpart B, implementing section 1071 of the Dodd-Frank Act. It amended the scope of what constitutes a covered financial institution and covered credit transaction, modified the gross annual revenue threshold in the rule's definition of small business from $5 million or less to $1 million or less, removed certain data points not required by the statute, and altered certain requirements related to how data is collected. The 2023 rule had imposed a significant number of requirements that are unnecessary to advance the purposes of section 1071, and the CFPB now asks for only what the statute requires. These updates both reduce unnecessary compliance burdens and result in a substantial cost savings for impacted institutions, including a one-time savings of nearly $100M and an annual ongoing savings between $166M and $181M per year.

As this report reflects, we have made great progress implementing the President's agenda in 2025, and we are very proud of our fair lending accomplishments. These are only a few examples of the CFPB's fair lending work in 2025, as described in this report. Although the reporting period for this report is calendar year 2025, we have also included some activity that took place outside of the reporting period due to its importance and relevance to the covered topics.

2. Shifts in Fair Lending Priorities

During the reporting period, the CFPB made significant shifts in its fair lending work consistent with the current administration and CFPB leadership's fair lending policies and priorities. As explained in further detail in the subsections that follow, these changes were also guided by several executive orders, including Executive Order (E.O.) 14281, ''Restoring Equality of Opportunity and Meritocracy''; [5] E.O. 14173, ''Ending Illegal Discrimination and Restoring Merit-Based Opportunity''; [6] and E.O. 14331, ''Guaranteeing Fair Banking for all Americans.'' [7]

2.1 Terminating Disparate Impact

On April 23, 2025, President Trump issued E.O. 14281, ''Restoring Equality of Opportunity and Meritocracy,'' which directs Federal agencies to stop using disparate impact liability in the enforcement of civil rights laws.

Consistent with E.O. 14281, the CFPB no longer uses disparate impact in its supervision or enforcement of fair lending laws. Also, as described in section 5 of this report, the CFPB engaged in rulemaking consistent with these priorities.[8] In addition, the CFPB has closed all elements of open supervision exams and enforcement investigations that relied on disparate impact liability and terminated CFPB orders that relied on disparate impact liability.

Additional activity related to disparate impact occurred since the end of the reporting period. As discussed in more detail in section 5.1.2 of this report, on April 22, 2026, the CFPB issued a final rule amending Regulation B. Among other things, the final rule removed the longstanding ''effects test'' language from Regulation B and its commentary and replaced it with statements affirming that ECOA does not authorize disparate impact liability.

2.2 Terminating Consultations on Special Purpose Credit Programs

On January 21, 2025, President Trump issued E.O. 14173, ''Ending Illegal Discrimination and Restoring Merit-Based Opportunity,'' which obligates executive departments and agencies ''to terminate all discriminatory and illegal preferences'' and ''to combat illegal

[5] E.O. 14281.

[6] E.O. 14173, Ending Illegal Discrimination and Restoring Merit-Based Opportunity, 90 FR 8633 (Jan. 31, 2025), *https://www.federalregister.gov/documents/2025/01/31/2025-02097/ending-illegal-discrimination-and-restoring-merit-based-opportunity.*

[7] E.O. 14331.

[8] *See* 91 FR 21620 (Apr. 22, 2026).

private sector'' race- and sex-conscious programs.

Accordingly, the CFPB no longer consults with institutions regarding any SPCPs that rely on race, color, national origin, or sex. Consistent with E.O. 14173 and recognizing the broader statutory and constitutional concerns raised by such programs, the CFPB amended subpart A of Regulation B, the regulation implementing the ECOA, to prohibit creditors from offering programs that rely on the race, color, national origin, or sex of the applicant in making eligibility determinations.[9]

2.3 Debanking

On August 7, 2025, President Trump signed E.O. 14331, ''Guaranteeing Fair Banking for All Americans,'' stating that no American should be denied access to financial services because of their political or religious beliefs.

Combating unlawful debanking is a priority, and the CFPB has dedicated resources across the Bureau to implement E.O. 14331 to ensure banking decisions are made consistent with the law and do not substitute unlawful practices for ''individualized, objective, and risk-based analyses.'' [10]

Consistent with the E.O., in 2025, the CFPB reviewed its Examination Manual and confirmed that it does not reference reputation risk. The CFPB also reviewed its guidance, regulations, and other materials used to regulate or examine financial institutions under its authority for reputation risk concepts that could result in unlawful debanking. Additionally, the CFPB reviewed consumer complaints, as well as supervisory and enforcement data, for evidence of potential unlawful debanking.

In the debanking context, the CFPB evaluates financial institutions for compliance with ECOA and the Fair Credit Reporting Act (FCRA), particularly the adverse action notice requirements under those laws. The CFPB's debanking efforts also focus on religious discrimination. In addition, the CFPB is working with other regulatory partners, including the Department of Justice (DOJ), as part of the DOJ's Equal Access to Banking Task Force, to address debanking issues more broadly.

3. Correcting Previous Administrations' Regulatory Overreach

The previous administrations' regulatory overreach affected many businesses and necessitated a course correction by the Trump administration. In the area of fair lending, CFPB leadership uncovered egregious examples of companies being targeted for protected political speech and exercising their constitutional rights. In line with new fair lending priorities, and implementing the administration's agenda, including executive orders, the CFPB's focus in 2025 was to undo the regulatory overreach of the previous administrations, including actions relying on disparate impact and other fair lending matters. The actions are listed below.

- *Bureau of Consumer Financial Protection* v. *Townstone Financial, Inc. and Barry Sturner* (N.D. Ill. 1:20–cv–04176) (not a credit union or depository institution). On July 15, 2020, the CFPB filed a lawsuit against Townstone Financial, Inc., a small Midwest firm with about ten employees and a radio program called Townstone Financial. The CFPB alleged that Townstone violated ECOA, Regulation B, and the Consumer Financial Protection Act (CFPA). The CFPB targeted Townstone based solely on perceived racial disparities in mortgage application and origination statistics. Townstone was targeted for protected free speech. CFPB used an audio mining software to search Townstone's radio show and podcasts finding that they engaged in political speech with which the CFPB's enforcement disagreed. The CFPB identified only 16 minutes out of nearly 79 hours of radio content (.33 percent) that it deemed ''disconcerting'' and that ''could be interpreted as inappropriate, incorrect, or insensitive.'' The ''disconcerting'' conduct was talking about local crime, political issues around freedom of speech, supporting local law enforcement, and telling people to check out a neighborhood before buying a home. There was no evidence of any potential customers reporting Townstone to the CFPB or finding their content offensive. The action was resolved by stipulated final judgment and order on November 7, 2024.

On March 26, 2025, shortly after the new leadership came in, the CFPB filed a motion to vacate a consent order and to return a $100K fine to Townstone, on the grounds that the CFPB discovered within its internal case files indications that the CFPB commenced and continued its investigation and litigation without a substantial predicate of actionable facts and targeted co-defendants Townstone and Townstone President and CEO, Barry Sturner, based on constitutionally protected speech. Although the court denied the CFPB's motion to vacate on June 12, 2025, the CFPB's leadership believes this fair lending case is prime example of the prior administration's weaponization of the Bureau.

- *Consumer Financial Protection Bureau Investigation of Credova Financial, LLC.* The CFPB terminated its investigation into Credova because the CFPB had determined that the investigation was a weaponization against disfavored industries and individuals. Credova's use of innovative financial technology solutions to provide consumer financing to facilitate Americans exercising their Second Amendment rights made it a target for the CFPB. The CFPB's demands were also inconsistent with the realities of how such businesses are run. The investigation is one of numerous regulation-by-enforcement actions for which the CFPB became infamous under former Director Chopra. The investigation was aimed at suppressing activities protected by the First and Second Amendment. It also represents precisely the kind of unconstitutional targeting prohibited by E.O. 14331, ''Guaranteeing Fair Banking for All Americans.''
- *Consumer Financial Protection Bureau and United States of America* v. *Colony Ridge Development, LLC; Colony Ridge BV, LLC; Colony Ridge Land, LLC; and Loan Originator Services, LLC* (S.D. Tex. No. 4:23–cv–04729) (not a credit union or depository institution). On December 20, 2023, the CFPB, together with the DOJ, filed a complaint against land development companies Colony Ridge Development, LLC and Colony Ridge BV, LLC, affiliate mortgage company Colony Ridge Land, LLC (collectively, the Colony Ridge defendants), and loan origination company Loan Originator Services, LLC (LOS). The CFPB and the DOJ alleged that defendants violated ECOA by targeting Hispanic consumers with a predatory loan product. The CFPB separately alleged violations of the CFPA and Interstate Land Sales Full Disclosure Act. The DOJ further alleged defendants' conduct violated the Fair Housing Act (FHA). On February 10, 2026, pursuant to a joint stipulation of voluntary dismissal, the CFPB dismissed its claims with prejudice. That same day, the DOJ notified the court in a joint motion for dismissal that the DOJ, along with the State of Texas, had reached a settlement resolving the DOJ's claims and the State of Texas's claims in a related matter. Following a hearing on the motion, on April 10, 2026, the remaining parties filed a joint stipulation of dismissal, dismissing the action with prejudice and withdrawing their request for continuing jurisdiction. On April 28, 2026, the court dismissed

[9] *Id.*

[10] E.O. 14331.

the action with prejudice and denied the joint motion for dismissal as moot.

■ *In re Washington Federal Bank, N.A.* (2020–BCFP–0019). On October 27, 2020, the CFPB issued an order against Washington Federal Bank, N.A., a federally insured, for-profit national bank headquartered in Seattle, Washington, to address violations of the Home Mortgage Disclosure Act (HMDA). On September 22, 2025, pursuant to the CFPB's authority under 12 U.S.C. 5563(b)(3) and under Paragraph 75 of the order, the CFPB terminated the order. Washington Federal has fulfilled several obligations under the order, including paying a civil money penalty of $200,000, and creating and implementing a compliance plan designed to ensure that its collection, recording, and reporting of HMDA data complies with applicable Federal consumer financial laws and the terms of the order.

■ *In re Washington Federal* (2013–CFPB–0005). On October 9, 2013, the CFPB issued an order against Washington Federal, a bank headquartered in Seattle, Washington, to address violations of HMDA. On September 22, 2025, pursuant to the CFPB's authority under 12 U.S.C. 5563(b)(3) and under paragraph 3 of article XII of the order, the CFPB terminated the order. Washington Federal has fulfilled several obligations under the order, including paying a civil money penalty of $34,000.

■ *In re Citibank, N.A.* (2023–CFPB–0013). On November 8, 2023, the CFPB issued an order against Citibank, N.A., which is a national bank headquartered in New York City, New York. The CFPB found that Citibank violated ECOA and Regulation B. As CFPB was aware, there was a large-scale fraud perpetuated by a crime ring of Armenians in Southern California. At the time, several rogue underwriters in one location in Citi Retail Services looked at Armenian surnames as they evaluated credit card applications and credit line increases coming from Glendale, California. As soon as Citi learned of these isolated occurrences, Citi terminated the employees, re-trained its underwriting staff, and began monitoring employee communications to ensure their decision-making was not improperly influenced by an applicant's national origin. This issue affected a very small number of applications and there has been no recurrence of the issue since these measures were implemented in 2021. On October 16, 2025, pursuant to the CFPB's authority under 12 U.S.C. 5563(b)(3) and under paragraph 74 of the order, the CFPB terminated the order and waived any alleged non-compliance therewith. Citibank has fulfilled certain obligations under the order, including paying a civil money penalty of $24,500,000 to the CFPB as required by section X, making redress payments of nearly $1.4 million required by section IX, and taking steps to implement injunctive relief to prevent future violations required by the ''Conduct Provisions.''

■ *In re Bank of America, N.A.* (2023–CFPB–0016). On November 28, 2023, the CFPB issued an order against Bank of America, N.A., which is a national bank headquartered in Charlotte, North Carolina, with branches and ATMs located in 38 States and the District of Columbia. The CFPB found that Bank of America violated HMDA and Regulation C. On June 5, 2025, pursuant to the CFPB's authority under 12 U.S.C. 5563(b)(3) and under paragraph 72 of the order, the CFPB terminated the order. Bank of America has fulfilled the obligations under the order, including payment of a civil money penalty of $12,000,000, development of a compliance plan and an annual report, and implementation of improvements to its HMDA compliance management system.

■ *Consumer Financial Protection Bureau and United States of America* v. *Trident Mortgage Company, LP* (E.D. Pa. No. 2:22–cv–02936) (not a credit union or depository institution). On July 27, 2022, the CFPB, together with DOJ, filed a complaint and proposed consent order to resolve allegations that Trident Mortgage Company, LP, violated ECOA. The court entered the consent order on September 14, 2022. On May 23, 2025, the CFPB and the DOJ filed an unopposed motion to terminate the consent order and dismiss with prejudice. On June 2, 2025, the court terminated the consent order and dismissed the case with prejudice. Trident has demonstrated a commitment to remediation, having fully disbursed the loan subsidy fund of $18,400,000 under the terms of the consent order; paid a $4,000,000 civil money penalty; and substantially complied with the other monetary and injunctive terms of the consent order.

■ *United States of America and Consumer Financial Protection Bureau* v. *Trustmark National Bank* (W.D. Tenn. No. 2:21–cv–02664). On October 22, 2021, the CFPB, together with the DOJ, filed a complaint and proposed consent order to resolve allegations that Trustmark National Bank, which is headquartered in Jackson, Mississippi, violated ECOA. The court entered the consent order on October 27, 2021. On May 20, 2025, the CFPB and the DOJ filed an unopposed motion to terminate the consent order and dismiss with prejudice. On May 21, 2025, the court vacated the judgment and dismissed the case with prejudice. Trustmark has demonstrated a commitment to remediation, having fully disbursed the loan subsidy fund of $3,850,000 under the terms of the consent order; paid a $5,000,000 civil money penalty, of which $1,000,000 was paid to the CFPB; and substantially complied with the other monetary and injunctive terms of the consent order.

■ *Consumer Financial Protection Bureau* v. *Draper & Kramer Mortgage Corporation* (N.D. Ill. No. 1:25–cv–00605) (not a credit union or depository institution). On January 17, 2025, the CFPB filed a complaint against Draper & Kramer Mortgage Corporation, along with a proposed consent order, alleging violations of ECOA. On January 24, 2025, the court entered the consent order. On May 15, 2025, the CFPB issued a no-action letter, pursuant to which the CFPB has ceased monitoring compliance with the order, is not engaging in any supervisory activity to assess compliance with the order and will take no steps to enforce the consent order. Draper & Kramer has already paid the civil money penalty required by the order and has ceased originating residential mortgage loans, making expending resources on monitoring the order unnecessary. The CFPB took this step in the interest of focusing resources on supporting U.S. taxpayers, servicemembers, veterans, and small businesses. Also, pursuant to E.O. 14281 on ''Restoring Equality of Opportunity and Meritocracy,'' the CFPB is focusing its supervisory and enforcement resources on fair lending matters with direct evidence of intentional racial discrimination and identified victims, which were not present in this matter.

■ *In re Synchrony Bank; f/k/a GE Capital Retail Bank* (2014–CFPB–0007). On June 19, 2014, the CFPB issued an order against Synchrony Bank, to address violations of ECOA and the CFPA's prohibition on deceptive acts or practices. On May 12, 2025, pursuant to the CFPB's authority under 12 U.S.C. 5563(b)(3) and under paragraph 95 of the consent order, the CFPB terminated the order. Synchrony has fulfilled its obligations under the order, including providing at least $259,000,000 in redress to affected consumers, and paying a civil money penalty of $3,500,000. In addition, the Bank ceased engaging in the practices cited in the order dated June 19, 2014. Furthermore, E.O. 14281 mandates that the CFPB eliminate the ''use of disparate-impact liability in all contexts to the maximum degree possible'' and requires that the

CFPB ''evaluate existing consent judgments and permanent injunctions that rely on theories of disparate-impact liability and take appropriate action.'' Because this order relied in part on a disparate impact theory of liability, its termination was appropriate to align with E.O. 14281.

4. This Administration's Fair Lending Supervision and Enforcement

4.1 Supervision

Title X of the Dodd-Frank Act authorizes the CFPB to supervise certain consumer financial services companies and large depository institutions and their affiliates for consumer protection purposes.[11] The CFPB's Supervision program assesses compliance with Federal consumer financial protection laws and regulations at banks and nonbanks over which the CFPB has supervisory authority.

During the reporting year, the CFPB rescinded its prior supervisory priorities and redirected its supervision efforts. Consistent with new priorities, including its focus on debanking, the CFPB reviewed supervisory data that included complaints received by institutions, for evidence of potential unlawful debanking.

While redirecting its supervisory resources, the CFPB closed 76 percent of its supervisory actions (nearly 1,500) and a substantial majority of its outstanding open examinations. Approximately 12 percent of the supervisory actions closed related to fair lending.

The CFPB's fair lending supervisory activities focus on financial institutions' compliance with ECOA and the HMDA. ECOA examination work focuses on uncovering direct evidence of intentional discrimination on a prohibited basis, systemic failures to provide applicants with legally required notices of adverse actions, and lenders' systems for identifying risks of non-compliance with ECOA and Regulation B. HMDA examination work focuses on validating the accuracy of key data points collected and submitted by lenders.

During the reporting period, the CFPB did not initiate supervisory activities or cite any fair lending violations.

4.1.1 Supervision Related Litigation

In September 2022, the CFPB was sued in the U.S. District Court for the Eastern District of Texas by the U.S. Chamber of Commerce *et al.*, challenging an update to the Unfair, Deceptive, or Abusive Acts or Practices (UDAAP) section of the CFPB's examination manual.[12] The updated manual stated that discriminatory conduct may violate the CFPA's prohibition on unfair practices and provided guidance to examiners on how discriminatory conduct should be examined to determine whether it violates the unfairness prohibition. The manual update was an example of the type of expansion of the CFPB's authority well beyond the statutory mandate under its prior leadership that the current leadership seeks to curb. The court granted plaintiffs' motion for summary judgment, vacated the manual update, and permanently enjoined the CFPB from engaging in any examination, supervision, or enforcement action against any member of the plaintiff associations based on the CFPB's interpretation of its unfairness authority set forth in the updated manual. The CFPB filed a notice of appeal in November 2023, and the appeal was stayed by the Fifth Circuit pending the Supreme Court's resolution of *CFPB* v. *CFSA*.[13] After the Supreme Court issued its decision in *CFPB* v. *CFSA,* the matter was fully briefed before the Fifth Circuit. On April 30, 2025, the parties filed a joint stipulation to dismiss the CFPB's appeal. The Fifth Circuit granted the parties' request and issued its mandate dismissing the appeal on May 1, 2025.[14]

4.2 Fair Lending Enforcement

Through enactment of the Dodd-Frank Act, Congress authorized the CFPB to bring actions to enforce Federal consumer financial law, including ECOA and HMDA.

Under this administration, the CFPB has focused its fair lending enforcement resources on matters with direct evidence of intentional racial discrimination and identified victims and has not engaged in or facilitated unconstitutional racial classification or discrimination in its enforcement of fair lending laws.

By law, the CFPB must refer to DOJ any matter when it has reason to believe that a creditor has engaged in a pattern or practice of lending discrimination in violation of ECOA.[15] The CFPB may refer other potential ECOA violations to DOJ as well.[16] In 2025, the CFPB did not refer any matters to DOJ pursuant to 15 U.S.C. 1691e(g).

5. Regulatory Actions To Advance This Administration's Agenda

In support of President Trump's economic strategy, during the reporting period, the CFPB adopted a robust deregulatory agenda focused on reversing instances of regulatory overreach.

Regulatory actions for this administration have been guided by several executive orders. For example, E.O. 14219, titled ''Ensuring Lawful Governance and Implementing the President's 'Department of Government Efficiency' Deregulatory Initiative,''[17] seeks to end Federal overreach by rescinding unlawful regulations and regulations that undermine the national interest. Consistent with E.O. 14219, in 2025, the CFPB embarked on several rulemaking projects to streamline existing regulations and reduce unjustified burdens.

The CFPB's regulatory priorities in 2025 included two fair lending related rulemakings to amend (1) Regulation B, subpart B, implementing section 1071 of the Dodd-Frank Act, and (2) Regulation B, subpart A, implementing ECOA. The CFPB also withdrew non-binding policy guidance issued by prior administrations.

For more information about the CFPB's regulatory actions, the CFPB publishes an agenda of its planned regulatory activity as part of the Unified Agenda of Federal Regulatory and Deregulatory Actions, which is coordinated by the Office of Management and Budget (OMB).[18]

5.1 Rulemaking

5.1.1 Section 1071, Small Business Lending

In April 2025, the CFPB announced its plans to reconsider certain aspects of a final rule published in May 2023 that implemented changes to ECOA made by 15 U.S.C. 1691c–2, also known as section 1071 of the Dodd-Frank Act. In light of court orders in ongoing litigation and to help effectuate this reconsideration, the CFPB published an interim final rule[19] and then a final rule[20] that extended the compliance dates of the 1071 rule by approximately one year. In November 2025, the CFPB

[19] 90 FR 25874 (June 18, 2025).

[20] 90 FR 47514 (Oct. 2, 2025).

published a proposed rule [21] to change the scope of what constitutes a covered financial institution and covered credit transaction, to modify the gross annual revenue threshold in the rule's definition of small business, to remove certain data points not required by the statute, and to alter certain requirements related to how data is collected. The CFPB also proposed extending the rule's compliance date to January 1, 2028. The CFPB believed these proposed changes would streamline the rule, reduce complexity for lenders, and improve data quality, thereby advancing the purposes of section 1071 and complying with recent executive directives.

Additional activity has occurred since the end of the reporting period. On May 1, 2026, the CFPB issued the final rule.[22] The rule reduces the scope of ''covered credit transactions'' by limiting the types of transactions subject to reporting in order to focus data collection efforts on core lending products—loans, lines of credit, and credit cards—that are most utilized by small businesses. Accordingly, the rule sets forth certain exclusions: merchant cash advances, agricultural lending, and small-dollar business credit. The rule also narrows the definition of ''covered financial institutions'' by raising the loan origination threshold from 100 to 1,000 loans annually and excluding Farm Credit System lenders.

In addition, the rule revises the definition of ''small business'' by reducing the gross annual revenue threshold from $5 million to $1 million. This will allow the CFPB to focus on collecting data related to micro and small enterprises, which are most relevant to section 1071's goals. The rule also reduces the number of collected data points, extends and adopts a uniform compliance date of January 1, 2028, and simplifies the time and manner of data collection in order to allow institutions flexibility in how they comply with statutory requirements.

The rule updates are necessary to ensure reasonable implementation that does not restrict credit availability for America's small businesses. The 2023 rule imposed a significant number of requirements that were not needed to advance the purposes of section 1071 of the Dodd-Frank Act. This rule recognizes those concerns and takes a more reflective approach, including just what the statute requires. The updates will result in cost savings for institutions and reduce the burden of data collection without sacrificing data availability.

More information is available on our website, including a page compiling key materials related to the CFPB's small business lending rulemaking.[23]

5.1.2 Section 1071 Rulemaking Related Litigation

During the reporting period, there were four cases pending related to the previous section 1071 rule issued in March 2023. Following the revised 1071 rule issued on May 1, 2026, three of those cases have been dismissed. One remains pending.

- *Texas Bankers Assoc.* v. *CFPB.* On April 26, 2023, the Texas Bankers Association and Rio Bank sued the CFPB in the U.S. District Court for the Southern District of Texas challenging the validity of the old 1071 rule.[24] On August 26, 2024, the court granted summary judgment to the CFPB, upholding the rule in full and rejecting Plaintiffs' challenges.[25] Plaintiffs appealed. On February 7, 2025, after briefings from the parties to update the court on the agency's current priorities and position, the Fifth Circuit stayed the rule for plaintiffs and intervenors in the case pending further order from the court.[26] Since the close of this reporting period, the parties filed a joint stipulation to dismiss the appeal as moot and vacate the judgment of the district court in light of the mootness of this case.[27]
- *Monticello Banking Co.* v. *CFPB.* On August 11, 2023, the Kentucky Bankers Association and several Kentucky banks sued to challenge the old rule in the U.S. District Court for the Eastern District of Kentucky.[28] During the reporting period, the CFPB moved to stay the case while it engaged in a new rulemaking to reconsider its rule implementing section 1071.[29] Granting the motion, the court extended the stay until December 1, 2025.[30] The court subsequently extended the stay until the earlier of 21 days following the issuance of the new rulemaking on section 1071, or March 20, 2026.[31] Since the end of the reporting period, in light of the new 1071 rule, plaintiffs filed a notice of voluntary dismissal and the case was closed on July 1, 2026.[32]
- *Revenue Based Finance Coalition* v. *CFPB.* Revenue Based Finance Coalition, a trade association representing merchant cash advance providers, challenged the old 1071 rule on December 26, 2023, in the U.S. District Court for the Southern District of Florida.[33] In March 2025, the CFPB informed the court that it intended to initiate a notice of proposed rulemaking revising the challenged 1071 rule in a way that better aligns with current CFPB priorities as expeditiously as reasonably possible.[34] In May 2025, the court stayed the case and rule and tolled the rule's compliance deadlines for plaintiff and its members for the length of time that the Fifth Circuit's stay order in *Texas Bankers Association* was in effect.[35] Since the end of the reporting period, in light of the new 1071 rule the parties filed a joint stipulation of dismissal. The case was closed on July 1, 2026.[36]
- *Rise Economy* v. *Vought.* On June 23, 2025, Rise Economy, along with several small businesses and equitable investment nonprofits, filed a lawsuit against the CFPB regarding its interim final rule extending the old section 1071 rule's compliance dates and a press release regarding the CFPB's enforcement priorities.[37] Since the end of the reporting period, following issuance of the CFPB's revisions to its rule implementing section 1071, plaintiffs filed a notice of voluntary dismissal, which the court granted.[38]

5.1.3 Regulation B, ECOA

On November 13, 2025, the CFPB published a proposal to amend provisions of Regulation B, subpart A, implementing ECOA to facilitate compliance with ECOA by clarifying the obligations imposed by the statute.[39]

The proposed rule provided that ECOA does not authorize disparate impact claims. It proposed to amend the prohibition on discouraging applicants or prospective applicants to clarify that it prohibits statements of intent to discriminate in violation of ECOA and is not triggered merely by negative consumer impressions. It also proposed to clarify that encouraging statements by creditors directed at one group of

consumers is not prohibited discouragement as to applicants or prospective applicants who were not the intended recipients of the statements. The proposed rule would also amend the standards for SPCPs offered or participated in by for-profit organizations to include new standards and restrictions.

Additional activity has occurred since the end of the reporting period. On April 22, 2026, the CFPB issued a final rule amending Regulation B as proposed.[40] The final rule removes the longstanding ''effects test'' language from Regulation B and its commentary and replaced it with statements affirming that ECOA does not authorize disparate impact liability. Disparate impact was first read into ECOA based solely on the law's legislative history. However, under the plain meaning of ECOA's text, disparate impact is not a cognizable theory of liability under the statute and is contrary to the principles of Equal Protection.

The rule also changes the anti-discouragement provision to limit prohibited ''statements'' to spoken or written words or visual images as opposed to broader ''acts or practices'' such as branch placement or advertisement targeting. Liability also only attaches to statements that a creditor knows or should know would cause a reasonable person to believe the creditor would deny, or offer worse terms on, a credit application because of a prohibited basis characteristic. This change was designed to protect targeted advertising from discouragement claims, specifically providing that encouraging messages directed at one audience would not be treated as discouraging to others who were not the intended recipients of such messages. Merely controversial or provocative speech is to be distinguished from statements that do convey discriminatory exclusion.

In addition, the new rule prohibits for-profit creditors from using race, color, national origin, or sex (or any combination thereof) as eligibility criteria for SPCPs. For any SPCPs that still use other protected classes as eligibility criteria (such as religion, marital status, age, or public assistance income), the creditor would face new restrictions, including stringent documentation and evidence requirements. The stringent new conditions help ensure that Congress's intent to make these SPCPs available for certain credit transactions ''when it has been clearly demonstrated on the public record that without such exemption the consumers involved would effectively be denied credit.'' [41] The regulatory changes to SPCPs now align with the law's intended purpose and minimize risks of impermissible and unconstitutional discrimination.

5.1.4 Rescission of 2020 Advisory Opinion Related to ECOA (Regulation B); Special Purpose Credit Programs

Additional special purpose credit program-related activity has occurred since the end of the reporting period. On June 17, 2026, the CFPB rescinded an advisory opinion issued in December 2020 regarding Regulation B, as it applies to certain aspects of SPCPs designed and implemented by for-profit organizations to meet special social needs. Specifically, the 2020 advisory opinion clarified the content that a for-profit organization must include in a written plan that establishes and administers an SPCP under Regulation B. The advisory opinion also clarified the type of research and data that may be appropriate to inform a for-profit organization's determination that an SPCP is needed to benefit a certain class of persons.

The CFPB rescinded the advisory opinion because it contained statements that conflicted with recent amendments to Regulation B and to avoid any confusion about the appropriate standards and related conditions for SPCPs offered or participated in by for-profit organizations. For example, the advisory opinion stated that all program participants in an SPCP offered or participated in by a for-profit organization may be required ''to share one or more common characteristics (for example, race, national origin, or sex)''; the April 2026 final rule, however, prohibits any SPCP offered or participated in by a for-profit organization from using the common characteristic of race, color, national origin, or sex, or any combination thereof, as a factor in determining eligibility for the program.

Relatedly, on August 25, 2026, the CFPB along with its interagency partners rescinded [42] the interagency statement on SPCPs that was issued in 2022.[43]

5.2 Withdrawing Non-Binding Policy Guidance

In E.O. 13891, titled ''Promoting the Rule of Law Through Improved Agency Guidance Documents,'' President Trump directed Federal agencies to not use guidance documents to attempt to create new rights or obligations binding on persons or financial institutions outside of the Federal Government.

In accordance with E.O. 13891, and a realignment of priorities, the CFPB withdrew 67 guidance documents in May 2025.[44] The CFPB has previously issued non-binding policy guidance in myriad forms over its history, including advisory opinions, other interpretive rules, and policy statements. The CFPB's current policy is to avoid issuing guidance except where necessary and where such guidance would reduce rather than increase compliance burdens.

The Fair lending-related guidance withdrawn during the reporting period includes:

- Bulletin 2012–04 re: lending discrimination (Apr. 18, 2012);
- Bulletin 2013–01 re: indirect auto lending and compliance with the Equal Credit Opportunity Act (Mar. 21, 2013);
- Bulletin 2015–02 re: section 8 housing choice voucher homeownership program (May 11, 2015);
- Equal Credit Opportunity (Regulation B); Discrimination on the Bases of Sexual Orientation and Gender Identity, 86 FR 14363 (Mar. 16, 2021);
- Equal Credit Opportunity (Regulation B); Revocations or Unfavorable Changes to the Terms of Existing Credit Arrangements, 87 FR 30097 (May 18, 2022);
- Limited Applicability of Consumer Financial Protection Act's 'Time or Space' Exception to Digital Marketers, 87 FR 50556 (Aug. 17, 2022); and
- Statement on Enforcement and Supervisory Practices Relating to the Small Business Lending Rule Under the Equal Credit Opportunity Act and Regulation B, 88 FR 34833 (May 31, 2023).

6. Stakeholder Engagement

Pursuant to the CFPA, the Office of Fair Lending works with private industry and fair lending, civil rights, consumer, and community advocates to promote fair lending compliance and education.[45]

In 2025, the CFPB engaged with external stakeholders to promote its new fair lending policy priorities through webinars, advisory board meetings, and coordination with other government agencies. During the reporting year, the CFPB also published the 2024 HMDA data and several HMDA data products and resources to serve a variety of data users.

6.1 Fair Lending Outreach

In 2025, the CFPB participated in the Federal Reserve System's 2025 Interagency Fair Lending Webinar,[46] an annual webinar dedicated to fair lending compliance issues. During the webinar, the CFPB highlighted the administration's fair lending priorities, including debanking efforts and fair lending-related rulemakings.

The CFPB also convened a public meeting of its Consumer Advisory Board (CAB)[47] focused on fair lending and unlawful debanking, as well as the previous administration's regulatory overreach and how the current administration is rectifying these issues. The meeting featured discussions on the *Townstone* and *Credova* enforcement cases, two examples of the prior weaponization of the CFPB. As discussed previously, Townstone was targeted for their protected speech, whereas Credova's use of innovative financial technology solutions to provide consumer financing to facilitate the exercise of Americans' Second Amendment rights made it a target for the CFPB. During the CAB meeting, the CFPB also highlighted the administration's shifts in fair lending policy and fair lending enforcement and supervision priorities.

For more information about the CFPB's work on debanking and its fair lending enforcement and supervision efforts, see this report's sections 2.3 and 4, respectively.

6.2 Availability of 2024 HMDA Data & Resources

On March 31, 2025, the CFPB announced the availability of the 2024 HMDA modified loan application register data on the Federal Financial Institutions Examination Council's (FFIEC)[48] HMDA Platform for approximately 4,898 HMDA filers.[49] These data contain loan-level information filed by financial institutions, modified to protect consumer privacy.

On July 7, 2025, the CFPB, on behalf of the FFIEC, announced the availability of ''Snapshot'' National Loan-Level HMDA data, a static dataset of 2024 mortgage lending transactions at 4,908 financial institutions reported under HMDA as of May 19, 2025.[50] The FFIEC also released derivative data products, including Aggregate and Disclosure Reports, the HMDA Maps tool, and the 2024 HMDA Data Browser. Lastly, the FFIEC released the 2024 HMDA Dynamic National Loan-Level Dataset, One-Year National Loan-Level Dataset for 2023, and the Three-Year National Loan-Level Dataset for 2021 on the same day.

Together with the FFIEC, the CFPB updates its HMDA resources throughout the year to ensure HMDA reporters have the most up-to-date information. For example, in October 2025, the CFPB released the 2026 Filing Instructions Guide[51] (an interactive online guide) and the 2025 Supplemental Guide for Quarterly Filers.[52] The CFPB also works with the FFIEC to publish data submission resources for HMDA filers and vendors on its Resources for HMDA Filers website, *https://ffiec.cfpb.gov*.

The CFPB maintains a comprehensive suite of resources pertaining to the reporting and use of HMDA data, in addition to the annual HMDA filing guides released annually by FFIEC. These resources include Executive Summaries of HMDA rule changes;[53] Small Entity Compliance Guide;[54] Institutional and Transactional Coverage Charts;[55] a sample data collection form;[56] FAQs;[57] a Beginner's Guide to Accessing and Using HMDA Data;[58] and downloadable webinars,[59] which provide an overview of the HMDA rule.

In addition, HMDA filers can ask questions about HMDA and Regulation C, including how to submit HMDA data, by emailing the CFPB's HMDA Help at *HMDAHelp@cfpb.gov*. The CFPB also offers financial institutions, service providers, and others informal staff guidance on specific questions about the statutes and rules the CFPB implements, including ECOA and Regulation B and HMDA and Regulation C, through its Regulatory Inquiries platform.[60]

7. Interagency Engagement

Pursuant to section 1013(c)(2)(B) of the CFPA, the Office of Fair Lending is charged with coordinating with Federal and State regulators to promote consistent, efficient, and effective enforcement of Federal fair lending laws. As part of this coordination, the CFPB shares information, coordinates activity, and promotes best practices with fellow supervisory and law enforcement agencies to ensure the most effective use of resources. Proper coordination also helps prevent regulatory overreach and minimizes regulatory burden by eliminating supervision outside of the CFPB's authority or duplicative supervision.

In 2025, the CFPB coordinated its fair lending regulatory, supervisory, and enforcement activities through interagency organizations and

taskforces. Specifically, the CFPB coordinated with the DOJ in connection with the DOJ's Equal Access to Banking Task Force.

Additionally, through the FFIEC, the CFPB has robust engagements with other partner agencies that focus on fair lending issues. For example, throughout the reporting period, the CFPB continued to chair the HMDA Subcommittee, a subcommittee of the FFIEC Task Force on Consumer Compliance (TFCC). This subcommittee oversees FFIEC projects and programs involving HMDA data collection, processing, and publication, the preparation of the annual FFIEC HMDA data processing budget, and the development and implementation of other related HMDA processing projects as directed by the TFCC. The CFPB also operates and maintains the HMDA Platform with costs shared equally among the FFIEC agencies and the Department of Housing and Urban Development (HUD).

CFPB personnel also meet with personnel from other agencies, including DOJ and the prudential regulators, to coordinate on and discuss fair lending issues.

8. Statutory Reporting on Interagency ECOA Enforcement

The CFPB is statutorily required to file a report to Congress annually describing the administration of its functions under ECOA, summarizing public enforcement actions taken by other agencies with administrative enforcement responsibilities under ECOA, and providing an assessment of the extent to which compliance with ECOA has been achieved.[61]

8.1 Reporting on ECOA Enforcement

This section covers the enforcement, compliance efforts, and assessments conducted by the eleven agencies with enforcement authority under section 704 of ECOA,[62] as reported by the agencies.

TABLE 1: FFIEC AGENCIES WITH ADMINISTRATIVE ENFORCEMENT OF ECOA

FFIEC Agencies with Administrative Enforcement of ECOA				
Consumer Financial Protection Bureau (CFPB)	Federal Deposit Insurance Corporation (FDIC)	Federal Reserve Board (FRB)	National Credit Union Administration (NCUA)	Office of the Comptroller of the Currency (OCC)

Non-FFIEC Agencies with Administrative Enforcement of ECOA					
Agricultural Marketing Service (AMS) of the U.S. Department of Agriculture (USDA)	Department of Transportation (DOT)	Farm Credit Administration (FCA)	Federal Trade Commission (FTC)	Securities and Exchange Commission (SEC)	Small Business Administration (SBA)

[61] 15 U.S.C. 1691f.

[62] 15 U.S.C. 1691c.

8.1.1 Public Enforcement Actions

In 2025, none of the Federal agencies with ECOA enforcement authority brought public enforcement actions for violations of ECOA.

Some agencies undertook action consistent with applicable executive orders. The FTC reported that following E.O. 14281, in the FTC's administrative action against a large automotive dealer group, Asbury Automotive, three Texas dealerships it owns, and general manager Ali Benli, the FTC amended the complaint and removed all references to allegations of disparate impact under the ECOA and Regulation B.[63] The remaining aspects of the complaint pertain to the respondents allegedly engaging in a variety of deceptive and unfair practices to impose hidden fees for unwanted add-ons on consumers, in violation of the FTC Act.[64] Litigation in this administrative matter is currently stayed, in view of ongoing litigation in a collateral Federal court matter.[65]

In addition, in 2025, the CFPB resolved several fair lending-related public enforcement actions that are described in more detail in section 4.2 above.

8.1.2 Number of Institutions Cited for ECOA and Regulation B Violations

In 2025, the CFPB and the other agencies collectively reported citing 140 institutions with violations of ECOA or Regulation B, or both.

8.1.3 Violations Cited During ECOA Examinations

Among institutions examined for compliance with ECOA and Regulation B, the FFIEC agencies reported that the most frequently cited violations were as follows:

TABLE 3—REGULATION B VIOLATIONS CITED BY FFIEC AGENCIES ENFORCING ECOA, 2025

Regulation B violations cited in 2025	Agency
12 CFR 1002.4(a); 1002.7(a): *Discrimination*—Discrimination on a prohibited basis in a credit transaction in violation of 1002.4(a); refused to grant credit to a creditworthy applicant on a prohibited basis in violation of 1002.7(a).	NCUA.
12 CFR 1002.5(d)(1): *Rules concerning requests for information*—Failure to comply with limitations on inquiring about an applicant's marital status.	OCC.
12 CFR 1002.7(d)(1): *Rules concerning extensions of credit*—Improperly required the signature of the applicant's spouse or other person without first determining that the applicant alone did not qualify for the credit requested.	FRB.
12 CFR 1002.9(a)(1); (a)(2); (a)(2)(i); (a)(3)(i); (b)(1); (b)(2); (c)(1)(ii): *Adverse Action*—Failure to provide notice to the applicant 30 days after receiving a completed application concerning the creditor's approval of, counteroffer to, or adverse action on the application in violation of (a)(1); failure to provide a written adverse action notification containing all required elements, including a statement of the action taken, the creditor's name and address, the ECOA notice required under 701(a), the name and address of the administering Federal Agency, and specific reasons for the adverse action or disclosure of the applicants right to request them in violation of (a)(2); failure to provide a statement of the specific reasons for the adverse action taken in violation of (a)(2)(i); failure to notify the applicant of action taken within a reasonable time on an application for business credit with gross revenues of 1 million or less in violation of (a)(3)(i); failure to provide certain information about ECOA in adverse action notices, including the name and address of the Federal agency that administers compliance with ECOA concerning the creditor in violation of (b)(1); failure to provide a statement of reasons for adverse action that was specific and indicated the principal reason(s) for the adverse action in violation of (b)(2); failure to provide notice of incomplete application regarding matters that an applicant can complete in violation of (c)(1)(ii).	OCC,[66] NCUA,[67] FDIC,[68] FRB.[69]
12 CFR 1002.14 (a)(1); (a)(2): *Appraisals and Valuations*—Failure to provide appraisals and other valuations.	FRB,[70] OCC.[71]

Among institutions examined for compliance with ECOA and Regulation B, the Non-FFIEC agencies reported that the most frequently cited violations were as follows:

[63] *See Asbury Auto. Grp., Inc.,* No. D–9436 (F.T.C. filed Aug. 16, 2024), Order Granting Complaint Counsel's Motion to Partially Lift Stay of Administrative Proceedings to Amend Administrative Complaint (with attached amended complaint and notice) (July 17, 2025), *https://www.ftc.gov/legal-library/browse/cases-proceedings/222-3135-asbury-automotive-group-inc-et-al-matter.* These changes occurred in paras. 32–35, 48–52, and corresponding material in the introductory paragraph and paras. 1 and 10 of the Amended Complaint. *See also* Complaint Counsel's Motion to Partially Lift Stay of Administrative Proceedings to Amend Administrative Complaint (May 6, 2025)—with attached amended complaint and notice, *https://www.ftc.gov/legal-library/browse/cases-proceedings/222-3135-asbury-automotive-group-inc-et-al-matter.*

TABLE 4—REGULATION B VIOLATIONS CITED BY NON-FFIEC AGENCIES ENFORCING ECOA, 2025

Regulation B violations cited in 2025	Agency
12 CFR 1002.9(a)(1)(i); (b)(2): *Adverse Action*—Failure to provide notice to the applicant 30 days after receiving a completed application concerning the creditor's approval of, counteroffer to, or adverse action on the application in violation of (a)(1)(i); failure to provide sufficient information in an adverse action notification, including the specific reasons for the action taken in violation of (b)(2).	FCA.
12 CFR 1002.13: *Failure to request and collect information for monitoring purposes*; Failure to obtain information for monitoring purposes.	FCA.

The AMS, SEC, Office of Aviation Consumer Protection (OACP), and the SBA reported that they received no complaints based on ECOA or Regulation B in 2025. The FTC is an enforcement agency and does not conduct compliance examinations.

8.1.4 Referrals to the DOJ

The agencies assigned enforcement authority under section 704 of ECOA must refer a matter to DOJ when there is reason to believe that a creditor has engaged in a pattern or practice of lending discrimination in violation of ECOA.[72] They also may refer other potential ECOA violations to DOJ.[73] In 2025, NCUA made four referrals to DOJ involving violations of ECOA or Regulation B. Two referrals involved discrimination based on receipt of public assistance, one involved discrimination based on age and marital status, and one involved discrimination based on age alone. The OCC made one referral to DOJ involving violations of ECOA, Regulation B, and the FHA. The matter involved discrimination on the basis of race, color, or national origin in mortgage lending.

In 2025, the CFPB, FDIC, and FRB did not refer any ECOA matters to DOJ.

9. Statutory Reporting on HMDA

Pursuant to HMDA, the CFPB in consultation with HUD, must report annually on the utility of HMDA's requirement that covered lenders report the number and dollar amount of certain mortgage loans and applications grouped according to census tract, income level, racial characteristics, age, and gender.[74]

The CFPB is currently assessing the utility of this data and expects to publish a separate report to Congress in late 2026.

Mark Paoletta,

Acting Director, Consumer Financial Protection Bureau.

BILLING CODE 6355–01–P

DEPARTMENT OF DEFENSE

Department of the Navy

Meeting of the U.S. Naval Academy Board of Visitors

AGENCY: Department of the Navy (DoN), Department of Defense (DoD).

ACTION: Notice of partially closed meeting.

SUMMARY: The DoD is publishing this notice to announce that the following Federal Advisory Committee meeting of the U.S. Naval Academy Board of Visitors, hereafter ''Board,'' will take place.

DATES: Open to the public, November 30, 2026, from 09:00 a.m. to 11:00 a.m. Eastern Time Zone (ET). Closed to the public, November 30, 2026, from 11:00 a.m. to 12:00 p.m. ET.

ADDRESSES: This meeting will be held at the United States Naval Academy. The meeting will be handicap accessible.

FOR FURTHER INFORMATION CONTACT: Major Shawn C. Wehrle, USMC, Executive Secretary to the Board of Visitors, Office of the Superintendent, U.S. Naval Academy, Annapolis, MD 21402–5000, 410–293–1503, *wehrle@usna.edu.*

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of the Federal Advisory Committee Act (FACA) (5 U.S.C. 1001–1014), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and the General Services Administration's Federal Advisory Committee Management Final Rule (41 CFR part 102–3).

Purpose of Meeting: The U.S. Naval Academy Board of Visitors will meet to make such inquiry, as the Board deems necessary, into the state of morale and discipline, the curriculum, instruction, physical equipment, fiscal affairs, and academic methods of the Naval Academy.

Agenda

Proposed meeting agenda for November 30, 2026.

9:00 a.m.–Call to Order (Open to Public)
9:00–10:50 a.m.—Opening Meeting (Open to Public)
10:50–11:00 a.m.—Break
11:00–12:00 p.m.—Closed Meeting (Closed to Public)

The closed meeting from 11:00–12:00 p.m. ET will consist of discussions of new and pending administrative or minor disciplinary infractions and non-judicial punishments involving midshipmen attending the Naval Academy to include but not limited to, individual honor or conduct violations within the Brigade, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. For this reason, a portion of this meeting will be closed to the public, as the discussion of such information cannot be adequately segregated from other topics, which precludes opening the closed meeting to the public. The Principal Deputy General Counsel has determined in writing that the meeting shall be partially closed to the public because the discussions during the closed meeting from 11:00 a.m.–12:00 p.m. ET will be concerned with matters protected under sections 552b(c)(5), (6), and (7) of title 5, U.S.C.

Authority: 5 U.S.C. 552b.

Meeting Accessibility: Pursuant to FACA and 41 CFR 102–3.140, this meeting is open to the public. Please contact the Executive Secretary five business days prior to the meeting at *Admin-Routing@usna.edu* to coordinate access to the meeting.

Written Statements: Pursuant to 5 U.S.C. 1009(a)(3), interested persons may submit a written statement for consideration at any time, but it should be received by the Designated Federal Officer at least five business days prior to the meeting date so that the comments may be made available to the Board for their consideration prior to the meeting. Written statements should be submitted via mail to 121 Blake Rd., Annapolis, MD 21402. Please note that since the Board operates under the provisions of the FACA, as amended, all submitted comments and public presentations may be treated as public documents and may be made available for public inspection, including, but not limited to, being posted on the board website.

M.A. Tabach,

Lieutenant Commander, Judge Advocate General's Corps, U.S. Navy, Federal Register Liaison Officer.

BILLING CODE 3810–FF–P

ELECTION ASSISTANCE COMMISSION

Agency Information Collection Activities

AGENCY: Election Assistance Commission.

ACTION: Notice; request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the U.S. Election Assistance Commission (EAC) gives notice that it is requesting from the Office of Management and Budget (OMB) an extension of the previously approved information collection OMB Control Number 3265–0026 EAC Progress Report (EAC–PR).

DATES: Comments must be received by 5 p.m. Eastern on Wednesday, December 9, 2026.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: For further information, please contact Risa Garza, Office of Grants Management, Election Assistance Commission, by email at: *grants@eac.gov.*

SUPPLEMENTARY INFORMATION:

Title and OMB Number: EAC Progress Report (EAC–PR); OMB Control Number: 3265–0026.

Purpose: This proposed information collection was previously published in the **Federal Register** on August 3, 2026 (91 FR, pp. 48847–48848) and allowed 60 days for public comment. The purpose of this notice is to allow an additional 30 days for public comment from all interested individuals and organizations.

The EAC–PR is employed for both interim and final progress reports for grants issued under HAVA authority. This format contains no changes to the report or instructions since the approved standard request in November 2023. The PR directly benefits award recipients by making it easier for them to administer federal grant and cooperative agreement programs through standardization of the types of information required in progress reporting, thereby reducing their administrative effort and costs.

The requirement for grantees to report on performance is the OMB grants policy. Specific citations are contained inCode of Federal Regulations TITLE 2, PART 200—UNIFORM ADMINISTRATIVE REQUIREMENTS, COST PRINCIPLES, AND AUDIT REQUIREMENTS FOR FEDERAL AWARDS.

Public Comments

Comments are invited on (a) ways to enhance the quality, utility, and clarity of the information collected from respondents, including through the use of automated collection techniques or other forms of information technology; and (b) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Annual Reporting Burden

*Respondents:*All EAC grantees and state governments.

EAC grant	Instrument	Total number of respondents	Total number of responses per year	Average burden hours per response	Annual burden hours
251	EAC–PR	29	2	1	58
101	EAC–PR	12	2	1	24
Election Security	EAC–PR	56	1	1	56
Total					138

The estimated annualized cost of this burden is $3,576.96, calculated by multiplying the annualized burden (138 hours) by an hourly rate of $25.92 (GS–8/Step 5 hourly basic rate).

Seton Parsons,

Senior Associate Counsel, U.S. Election Assistance Commission.

[FR Doc. 2026–22712 Filed 11–5–26; 8:45 am]

BILLING CODE 4810–71–P

DEPARTMENT OF ENERGY

President's Council of Advisors on Science and Technology (PCAST)

AGENCY: Department of Energy.

ACTION: Notice of rescheduled open meeting.

SUMMARY: This notice announces a rescheduled virtual/livestreamed meeting of the President's Council of Advisors on Science and Technology (PCAST), originally scheduled for Friday, November 6, 2026, and published in the **Federal Register** on Thursday, October 22, 2026. The Federal Advisory Committee Act requires that public notice of this meeting be announced in the **Federal Register**.

DATES: Friday, November 13, 2026; 12:00–1:00 p.m. EST.

ADDRESSES: Registration for the livestream can be found here: *https://www.zoomgov.com/webinar/register/WN_LkiBqVceRbmUKWGtawc1_g#/registration.*

FOR FURTHER INFORMATION CONTACT: Kristen Ellis, PCAST Designated Federal Officer, U.S. Department of Energy, 1000 Independence Ave. SW, Washington, DC 20585; Phone: (202) 586–5810; or Email: *pcast@doe.gov*.

SUPPLEMENTARY INFORMATION:

Purpose of the Board: PCAST advises the President on matters involving science, technology, education, and innovation policy. The Committee provides the President with scientific and technical information that is needed to inform public policy relating to the American economy, the American worker, national and homeland security, and other topics. PCAST responds to requests from the President or co-chairs for information, analysis, evaluation, or advice. In addition, PCAST solicits information and ideas from a broad range of stakeholders including the research community; private sector; universities; national laboratories; state, local and Tribal governments; foundations; and non-profit organizations. PCAST also provides advice in response to requests from the Super Intelligence Force.

Tentative Agenda: (agenda topics are subject to change; please contact Kristen Ellis at: *pcast@doe.gov* for the most current agenda)

- Chair Update
- Charges to the Board
- Board Business
- Public Comments
- Closing Remarks

Public Participation: The meeting is open to the public and public comment can be given orally or in writing. Fifteen minutes are allocated during the meeting for public comment and those wishing to make oral comment will be given maximum timeframe of two minutes. To register to speak, please contact *pcast@doe.gov* not later than seven days in advance of the meeting.

Written comments received at least two working days prior to the meeting will be provided to the members and included in the meeting minutes. Written comments received within two working days after the meeting will be included in the minutes. For additional information on public comment and to submit written comment, please contact *pcast@doe.gov*. The PCAST welcomes the attendance of the public at its meetings and will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact *pcast@doe.gov* at least seven days in advance of the meeting.

Meeting conduct: The Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Questioning of board members or presenters by the public is not permitted.

Minutes: Minutes will be available at the following website: *https://www.whitehouse.gov/ostp/presidents-council-of-advisors-on-science-and-technology/*.

Signing Authority: This document of the Department of Energy was signed on November 3, 2026, by David Borak, Committee Management Officer, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on November 4, 2026.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RM98–1–000]

Records Governing Off-the-Record Communications; Public Notice

This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt of prohibited and exempt off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive a prohibited or exempt off-the-record communication relevant to the merits of a contested proceeding, to deliver to the Secretary of the Commission, a copy of the communication, if written, or a summary of the substance of any oral communication.

Prohibited communications are included in a public, non-decisional file associated with, but not a part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become a part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications are included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of off-the-record communications recently received by the Secretary of the Commission. Each filing may be viewed on the Commission's website at *http://www.ferc.gov* using the eLibrary link. Enter the docket number, excluding the last three digits, in the docket number field to access the document. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659.

Comment Date: 5 p.m. ET 12/2/26.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502–6595 or *OPP@ferc.gov.*

Dated: November 3, 2026.

Carlos D. Clay,

Deputy Secretary.

Federal Energy Regulatory Commission

[Project No. 3071–008]

Blue Earth County, Minnesota; Notice of Reasonable Period of Time for Water Quality Certification Application

On October 30, 2026, Minnesota Pollution Control Agency (Minnesota PCA) submitted to the Federal Energy Regulatory Commission (Commission) notice that it received a request for a Clean Water Act section 401(a)(1) water quality certification as defined in 40 CFR 121.5, from Blue Earth County, Minnesota, in conjunction with the above captioned project on October 9, 2026. Pursuant to the Commission's regulations,[1] we hereby notify the Minnesota PCA of the following:

Date of Receipt of the Certification Request: October 9, 2026.

Reasonable Period of Time to Act on the Certification Request: October 9, 2027.

If Minnesota PCA fails or refuses to act on the water quality certification request on or before the above date, then the certifying authority is deemed waived pursuant to section 401(a)(1) of the Clean Water Act, 33 U.S.C. 1341(a)(1).

(Authority: 18 CFR 2.1)

Dated: November 3, 2026.

Filing Process and Data Collection for the Electric Quarterly Report Notice of Technical Conference

Take notice that Commission staff will convene a technical conference in the above-referenced proceeding on Tuesday, February 9, and Wednesday, February 10, 2027, from 10:00 a.m. to 4:00 p.m. Eastern Standard Time. The conference will be held at the Commission's headquarters at 888 First Street NE, Washington, DC 20426 in the Kevin J. McIntyre Commission Meeting Room.

The conference will take place in hybrid format to allow both in-person and virtual attendance. Prior to the technical conference, a detailed agenda and registration information will be published in a supplemental notice in this proceeding and posted on the Commission's Order No. 917 web page.

Interested parties may use the Commission's eSubscription web page to receive email notifications of issuances in a subscribed docket. For assistance with any FERC Online service, please email *FERC OnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

FERC conferences are accessible under section 508 of the Rehabilitation Act of 1973. For accessibility

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP27–9–000]

Columbia Gulf Transmission, LLC; Notice of Application and Establishing Intervention Deadline

Take notice that on October 20, 2026, Columbia Gulf Transmission, LLC (Columbia Gulf), 700 Louisiana Street, Suite 1300, Houston, Texas 77002, filed an application under section 7(c) of the Natural Gas Act (NGA) and Part 157 of the Commission's regulations requesting authorization for its Clark Project (Project). The Project consists of constructing: (1) approximately 8.68 miles of new 30-inch-diameter greenfield pipeline; (2) an aboveground tie-in to Columbia Gulf's existing mainline, including a new launcher/receive assembly; and (3) an aboveground meter station with launcher/receiver assembly, all located in Estill and Clark Counties, Kentucky. The Project will provide approximately 250,000 dekatherms per day of firm transportation service to East Kentucky Power Cooperative, Inc. to serve its existing J.K. Smith electric generation plant. Columbia Gulf proposes to apply the existing FTS–1 base system recourse reservation and commodity rates for the Project and requests a predetermination of rolled-in rate treatment. Columbia Gulf estimates the total cost of the Project to be $95,204,268, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at (202) 502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

Any questions regarding the application should be directed to David A. Alonzo, Director, Certificates, Columbia Gulf Transmission, LLC, 700 Louisiana Street, Suite 1300, Houston, Texas 77002–2700, by phone at (832) 320–5477 or by email at *david_alonzo@tcenergy.com.*

Pursuant to section 157.9 of the Commission's Rules of Practice and Procedure,[1] within 90 days of this Notice the Commission staff will either: complete its environmental review and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or environmental assessment (EA) for this proposal. The filing of an EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

Water Quality Certification

Columbia Gulf stated that a water quality certificate under section 401 of the Clean Water Act is required for the project from Kentucky Energy and Environment Cabinet, Department of Environmental Protection. When available, Columbia Gulf should submit to the Commission a copy of the request for certification for the Commission authorization, including the date the request was submitted to the certifying agency, and either (1) a copy of the certifying agency's decision or (2) evidence of waiver of water quality certification.

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file comments on the project, you can protest the filing, and you can file a motion to intervene in the proceeding. There is no fee or cost for filing comments or intervening. The deadline for filing a motion to intervene is 5:00 p.m. Eastern Time on November 24, 2026. How to file protests, motions to intervene, and comments is explained below.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation (OPP) at (202) 502–6595 or *OPP@ferc.gov.*

Comments

Any person wishing to comment on the project may do so. Comments may include statements of support or objections, to the project as a whole or specific aspects of the project. The more specific your comments, the more useful they will be.

Protests

Pursuant to sections 157.10(a)(4)[2] and 385.211[3] of the Commission's regulations under the NGA, any person[4] may file a protest to the application. Protests must comply with the requirements specified in section 385.2001[5] of the Commission's regulations. A protest may also serve as a motion to intervene so long as the protestor states it also seeks to be an intervenor.

To ensure that your comments or protests are timely and properly recorded, please submit your comments on or before 5:00 p.m. Eastern Time on November 24, 2026.

There are three methods you can use to submit your comments or protests to the Commission. In all instances, please reference the Project docket number CP27–9–000 in your submission.

(1) You may file your comments electronically by using the eComment feature, which is located on the Commission's website at *www.ferc.gov* under the link to Documents and Filings. Using eComment is an easy method for interested persons to submit brief, text-only comments on a project;

[1] 18 CFR 157.9.

[2] 18 CFR 157.10(a)(4).

[3] 18 CFR 385.211.

[4] Persons include individuals, organizations, businesses, municipalities, and other entities. 18 CFR 385.102(d).

[5] 18 CFR 385.2001.

(2) You may file your comments or protests electronically by using the eFiling feature, which is located on the Commission's website (*www.ferc.gov*) under the link to Documents and Filings. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''eRegister.'' You will be asked to select the type of filing you are making; first select ''General'' and then select ''Comment on a Filing''; or

(3) You can file a paper copy of your comments or protests by mailing them to the following address below. Your written comments must reference the Project docket number (CP27–9–000).

To file via USPS: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other courier: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission encourages electronic filing of comments (options 1 and 2 above) and has eFiling staff available to assist you at (202) 502–8258 or *FercOnlineSupport@ferc.gov.*

Persons who comment on the environmental review of this project will be placed on the Commission's environmental mailing list, and will receive notification when the environmental documents (EA or EIS) are issued for this project and will be notified of meetings associated with the Commission's environmental review process.

The Commission considers all comments received about the project in determining the appropriate action to be taken. However, the filing of a comment alone will not serve to make the filer a party to the proceeding. To become a party, you must intervene in the proceeding. For instructions on how to intervene, see below.

Interventions

Any person, which includes individuals, organizations, businesses, municipalities, and other entities,[6] has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders issued in this proceeding and to subsequently challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and Procedure[7] and the regulations under the NGA[8] by the intervention deadline for the project, which is 5:00 p.m. Eastern Time on November 24, 2026. As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as your interest in the proceeding. For an individual, this could include your status as a landowner, ratepayer, resident of an impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at *https://www.ferc.gov/resources/guides/how-to/intervene.asp.*

There are two ways to submit your motion to intervene. In both instances, please reference the Project docket number CP27–9–000 in your submission.

(1) You may file your motion to intervene by using the Commission's eFiling feature, which is located on the Commission's website (*www.ferc.gov*) under the link to Documents and Filings. New eFiling users must first create an account by clicking on ''eRegister.'' You will be asked to select the type of filing you are making; first select ''General'' and then select ''Intervention.'' The eFiling feature includes a document-less intervention option; for more information, visit *https://www.ferc.gov/docs-filing/efiling/document-less-intervention.pdf.;* or

(2) You can file a paper copy of your motion to intervene, along with three copies, by mailing the documents to the address below. Your motion to intervene must reference the Project docket number CP27–9–000.

To file via USPS: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 204263.

To file via any other courier: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission encourages electronic filing of motions to intervene (option 1 above) and has eFiling staff available to assist you at (202) 502–8258 or *FercOnlineSupport@ferc.gov.*

Protests and motions to intervene must be served on the applicant either by mail at: David A. Alonzo, Director, Certificates, Columbia Gulf Transmission, LLC, 700 Louisiana Street, Suite 1300, Houston, Texas 77002–2700 or by email (with a link to the document) at *david_alonzo@tcenergy.com.* Any subsequent submissions by an intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online. Service can be via email with a link to the document.

All timely, unopposed[9] motions to intervene are automatically granted by operation of Rule 214(c)(1).[10] Motions to intervene that are filed after the intervention deadline are untimely, and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations.[11] A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from OPP at (202) 502–6595 or on the FERC website at *www.ferc.gov* using the ''eLibrary'' link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to *www.ferc.gov/docs-filing/esubscription.asp.*

Intervention Deadline: 5:00 p.m. Eastern Time on November 24, 2026.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP26–576–000]

Transcontinental Gas Pipe Line Company, LLC; Notice of Schedule for the Preparation of an Environmental Assessment for the Leidy Access Expansion Project

On September 4, 2026, Transcontinental Gas Pipe Line Company, LLC (Transco) filed an application in Docket No. CP26–576–000 requesting a Certificate of Public Convenience and Necessity pursuant to Section 7(c) of the Natural Gas Act to construct and operate certain natural gas pipeline facilities. The proposed project is known as the Leidy Access Expansion Project (Project) and would enable Transco to provide an incremental 183,100 dekatherms per day of year-round firm transportation capacity from the Marcellus Shale production area in northeastern Pennsylvania to a new transfer point east of Compressor Station 515 in Luzerne County, Pennsylvania.

On September 21, 2026, the Federal Energy Regulatory Commission (Commission or FERC) issued its Notice of Application for the Project. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization within 90 days of the date of issuance of the Commission staff's environmental document for the Project.

This notice identifies Commission staff's intention to prepare an environmental assessment (EA) for the Project and the planned schedule for the completion of the environmental review.[1] The EA will be issued for a 30-day comment period.

Schedule for Environmental Review

Issuance of EA—March 26, 2027
90-day Federal Authorization Decision Deadline[2]—June 24, 2027

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the Project's progress.

Project Description

The Project will consist of the following components, all within Luzerne County, Pennsylvania:

- about 3.4 miles of 42-inch-diameter pipeline (Diamond Loop), all of which would be collocated with Transco's Leidy Loop Lines B and C;
- addition of pig launcher/receiver[3] and tie-in facilities at Transco's existing Compressor Station 515;
- a new mainline valve site that includes a tie-in and pig launcher/receiver at the terminus of the proposed Diamond Loop; and
- additional ancillary facilities, such as cathodic protection.

Background

On October 1, 2026, the Commission issued a *Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Leidy Access Expansion Project* (Notice of Scoping). The Notice of Scoping was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers. In response to the Notice of Scoping, the Commission received comments from one landowner. The primary issues raised by the commenter include temporary construction effects (such as vegetation), adequate erosion control, property access, protection of future property use, and potential future changes. All substantive comments will be addressed in the EA.

Additional Information

In order to receive notification of the issuance of the EA and to keep track of formal issuances and submittals in specific dockets, the Commission offers a free service called eSubscription. This service provides automatic notification of filings made to subscribed dockets, document summaries, and direct links to the documents. Go to *https://www.ferc.gov/ferc-online/overview* to register for eSubscription.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502–6595 or *OPP@ferc.gov.*

Additional information about the Project is available from the FERC website (*www.ferc.gov*). Using the ''eLibrary'' link, select ''General Search'' from the eLibrary menu, enter the selected date range and ''Docket Number'' excluding the last three digits (*i.e.,* CP26–576), and follow the instructions. For assistance with access to eLibrary, the helpline can be reached at (866) 208–3676, TTY (202) 502–8659, or at *FERCOnlineSupport@ferc.gov.* The eLibrary link on the FERC website also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rule makings.

(Authority: 18 CFR 2.1.)

Dated: November 3, 2026.

Carlos D. Clay,

Deputy Secretary.

[FR Doc. 2026–22721 Filed 11–5–26; 8:45 am]

BILLING CODE 6717–01–P

[1] For tracking purposes under the National Environmental Policy Act, the unique identification number for documents relating to this environmental review is EAXX–019–20–000–1790772793.

[2] The Commission's deadline applies to the decisions of other federal agencies, and state agencies acting under federally delegated authority, that are responsible for federal authorizations, permits, and other approvals necessary for proposed projects under the Natural Gas Act. Per 18 CFR 157.22(a), the Commission's deadline for other agency's decisions applies unless a schedule is otherwise established by federal law.

[3] A ''pig'' is a tool that the pipeline company inserts into and pushes through the pipeline for cleaning, conducting internal inspections, or other purposes. A pig launcher/receiver is where pigs are inserted/retrieved from the pipeline.

[Docket No. CP26–560–000]

Dauphin Island Gathering Partners; Notice of Schedule for the Preparation of an Environmental Assessment for the Dauphin Island Gathering Partners Abandonment Project

On July 31, 2026, Dauphin Island Gathering Partners (DIGP) filed an application in Docket No. CP26–560–000 requesting Authorization pursuant to Section 7(b) of the Natural Gas Act to abandon certain natural gas pipeline facilities. The proposed project is known as the Dauphin Island Gathering Partners Abandonment Project (Project) and would involve DIGP to abandon a total of about 119.3 miles of existing interstate natural gas pipeline and related appurtenances in Mobile County, Alabama, Alabama state waters, and federal offshore waters.

On August 7, 2026, the Federal Energy Regulatory Commission (Commission or FERC) issued its Notice of Application for the Project. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization within 90 days of the date of issuance of the Commission staff's environmental document for the Project.

This notice identifies Commission staff's intention to prepare an environmental assessment (EA) for the Project and the planned schedule for the

completion of the environmental review.[1]

Schedule for Environmental Review

Issuance of EA—February 5, 2027

90-day Federal Authorization Decision Deadline[2]—May 6, 2027

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the Project's progress.

Project Description

DIGP seeks authorization to abandon its entire offshore natural gas pipeline gathering and transportation system, consisting of about 119.3 miles of 20-inch-diameter and 24-inch-diameter pipeline and all associated appurtenances in Mobile County, Alabama, Alabama state waters, and federal offshore waters. According to DIGP its system is no longer economically feasible due to the depletion of attached reserves and the lack of new lease activity in the vicinity. DIGP also states that abandonment is needed to eliminate environmental and safety risks due to aging energy infrastructure and harsh offshore environment conditions.

Background

On September 15, 2026, the Commission issued a *Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Dauphin Island Gathering Partners Abandonment Project* (Notice of Scoping). The Notice of Scoping was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers. The U.S. Fish and Wildlife Service filed a letter concurring with the applicant's determinations on federally listed species in the project area. The U.S. Environmental Protection Agency filed a comment letter stating it has no comments.

[1] For tracking purposes under the National Environmental Policy Act, the unique identification number for documents relating to this environmental review is EAXX–019–20–000–1787659366.

[2] The Commission's deadline applies to the decisions of other federal agencies, and state agencies acting under federally delegated authority, that are responsible for federal authorizations, permits, and other approvals necessary for proposed projects under the Natural Gas Act. Per 18 CFR 157.22(a), the Commission's deadline for other agency's decisions applies unless a schedule is otherwise established by federal law.

Additional Information

In order to receive notification of the issuance of the EA and to keep track of formal issuances and submittals in specific dockets, the Commission offers a free service called eSubscription. This service provides automatic notification of filings made to subscribed dockets, document summaries, and direct links to the documents. Go to *https://www.ferc.gov/ferc-online/overview* to register for eSubscription.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202)502–6595 or *OPP@ferc.gov*.

Additional information about the Project is available from the FERC website (*www.ferc.gov*). Using the ''eLibrary'' link, select ''General Search'' from the eLibrary menu, enter the selected date range and ''Docket Number'' excluding the last three digits (*i.e.,* CP26–560), and follow the instructions. For assistance with access to eLibrary, the helpline can be reached at (866) 208–3676, TTY (202) 502–8659, or at *FERCOnlineSupport@ferc.gov.* The eLibrary link on the FERC website also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rule makings.

(Authority: 18 CFR 2.1.)

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (Act) (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the applications are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at *https://www.federalreserve.gov/foia/request.htm.* Interested persons may express their views in writing on the standards enumerated in paragraph 7 of the Act.

Comments received are subject to public disclosure. In general, comments received will be made available without change and will not be modified to remove personal or business information including confidential, contact, or other identifying information. Comments should not include any information such as confidential information that would not be appropriate for public disclosure.

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Benjamin W. McDonough, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551–0001, not later than November 23, 2026.

A. Federal Reserve Bank of Kansas City (Jeffrey Imgarten, Assistant Vice President) 1 Memorial Drive, Kansas City, Missouri 64198–0001. Comments can also be sent electronically to *KCApplicationComments@kc.frb.org:*

1. *Richard Albers, Battle Creek, Nebraska; and Starlee Johnson, Gilbert, Arizona;* to join the Rossiter/Schrempp Family Control Group, a group acting in concert, to acquire voting shares of Cedar Bancorp, Hartington, Nebraska, and thereby indirectly acquire voting shares of Bank of Hartington, both of Hartington, Nebraska.

B. Federal Reserve Bank of Dallas (Lindsey Wieck, Director, Mergers & Acquisitions) 2200 North Pearl Street,

Dallas, Texas 75201–2272. Comments can also be sent electronically to *Comments.applications@dal.frb.org:*

1. *Elizabeth Ricks, San Antonio, Texas, individually, and as a co-trustee, of the First Commercial Financial Corporation Employee Stock Ownership Trust (ESOP), Seguin, Texas; and James Long, as co-trustee of the ESOP, New Braunfels, Texas;* as a group acting in conert, to acquire voting shares of First Commercial Financial Corporation, and thereby indirectly acquire voting shares of First Commercial Bank, N.A., both of Seguin, Texas.

Board of Governors of the Federal Reserve System.

Benjamin W. McDonough,

Secretary of the Board.

BILLING CODE P

OFFICE OF GOVERNMENT ETHICS

Potential Improvements to the OGE Form 278e (Executive Branch Personnel Public Financial Disclosure Report) and the OGE Form 450 (Executive Branch Confidential Financial Disclosure Report)

AGENCY: Office of Government Ethics (OGE).

ACTION: Notice of public meeting.

SUMMARY: The U.S. Office of Government Ethics (OGE) is hosting a public meeting to obtain input from interested parties regarding potential improvements to the OGE Form 278e and the OGE Form 450 as part of a form revision planning process that will precede the next requested renewal of these forms under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* The next scheduled renewal is in 2027.

DATE:

Public Meeting Date: The public meeting will be held virtually via Microsoft Teams on December 10, 2026, from 1:00 p.m. to 2:30 p.m., Eastern time.

Registration: By close of business on December 3, 2026.

Written Comment Period Dates: For written comments to be discussed at the meeting, they must be received by December 3, 2026.

Information on how to register for this meeting and to submit a written comment may be found in the **SUPPLEMENTARY INFORMATION** section of this notice.

ADDRESSES: The public meeting will be held via TEAMS Meetings.

FOR FURTHER INFORMATION CONTACT: Jody Keegan or Jack MacDonald; Program Analyst, Ethics Law and Disclosure Division, Office of Government Ethics, 250 E Street SW, Suite 750, Washington, DC 20024–3249; Telephone: (202) 482–9300; TTY: (800) 877–8339.

SUPPLEMENTARY INFORMATION: On September 10, 2026, OGE held a listening session to seek agency input on issues specifically related to potential language and formatting changes to the OGE Form 278e and the OGE Form 450. OGE is now inviting all interested members of the public to share ideas, provide information, and express concerns about potential changes to the forms. This meeting will allow stakeholders and members of the public to both hear and respond to the concerns of other participants and for OGE to further develop its understanding of the views of various stakeholders. The goal of this meeting is for OGE to receive input regarding possible changes to the forms rather than come to a consensus about what changes to make.

Commenters may make any suggestions that they believe will improve the OGE Form 278e or the OGE Form 450. However, the public financial disclosure requirements are dictated by the Ethics in Government Act (EIGA), 5 U.S.C. 13101 *et seq.,* and 5 CFR part 2634 of the OGE regulations. OGE will be unable to consider any suggested change that would require a statutory or regulatory change as part of this form revision cycle. Additionally, when considering suggested changes, OGE will consider any potential cost burden, particularly if the change will require reprogramming of agency or Government-wide electronic filing systems. Generally, text changes within the instructions impose substantially fewer costs than changes to the look or order of the data entry grids. Commenters should consider and explain how the changes they are proposing provide concrete benefits, such as easier identification of potential conflicts of interest or ease of use of the forms.

To facilitate discussion at the public meeting, OGE welcomes input on issues related to suggested changes to the OGE Form 278e and the OGE Form 450 including, but not limited to, the following topics on which OGE has previously received comments:

Potential Areas for Comment on the OGE Form 278e

1. General Information Fields

The OGE Form 278e includes certain general information fields on the first page, such as the filer's name and position. These fields are not specifically authorized in the controlling statutory and regulatory authorities but are deemed permissible because they are necessary to provide an adequate understanding and processing of the form and do not impose any undue privacy or data entry burdens on filers.

(a) Filing Extensions, Late Fee Waivers and Payments

OGE received a suggestion for providing multiple spaces on the cover of the form in which the agency can document filing extensions, late filing fee waivers, and late filing fee payments. OGE is interested in views on whether such additions would be useful. Feedback that OGE has received indicates that adding such fields for agencies to complete can benefit the agencies themselves and does not contribute to the public burden from completing the forms.

2. Excepted Investment Fund (EIF) Field

OGE is considering changing the EIF field. The EIF field currently contains three choices: Yes (the item is an asset with underlying portfolio holdings but the item qualifies as an excepted investment fund); No (the item is an asset with underlying portfolio holdings and the asset does not qualify as an excepted investment fund); and N/A (the item is a source of non-investment income or the item is an asset without underlying portfolio assets). OGE is considering providing a two-step process that first inquires whether the asset has underlying holdings and second, if it does, whether it qualifies as an EIF. OGE is interested in ideas and views on how the EIF two-step process should appear on the form such that it will provide clarity to filers, agency reviewers, and the general public. Alternatively, OGE is considering changing to a simple Yes or No field. OGE is interested in whether this would reduce the accuracy of the reporting and reduce the information available to the public.

3. Definitions

OGE has received comments requesting clarification to the instructions and expansion of the list of terms to include, but are not limited to, honorarium, personal residence, relative, asset valuation, purchase, sale, exchange, and security. OGE is interested in views on specific text suggestions outside of those provided and as currently stated in the Public Financial Disclosure Guide. OGE seeks comments on whether the instructions to any part of the form should include additional definitions of key terms and

whether there are specific terms that need further definition.

4. Instructions

OGE has received comments requesting that OGE clarify the instructions and make them consistent with the statutory and regulatory reporting exclusions, and exceptions in the Public Financial Disclosure Guide (the ''guide''), specifically as it relates to the use of ''description'' in each part, permitted asset valuation, retention or disposition of employer-awarded equity, sharing in profits, and carried interests (*e.g.,* vested or unvested stock options, restricted stock, future sale of a company's profits). OGE is interested in views on specific text suggestions in the forms and seeks comments on whether the instructions to any part of the form should include additional reporting concepts and/or key terms. OGE is considering expanding the current instructions for each part of the report and providing helpful hyperlinks to the guide.

5. Examples

OGE is considering adding a list of examples to the OGE Form 278e applicable to each section, similar to the OGE Form 450 examples. OGE is interested in views on whether there are specific topic areas for which an example would be particularly useful.

Potential Areas for Comment on the OGE Form 450

1. Definitions and Examples

The last page of the OGE Form 450 includes examples for each Part. OGE seeks comments on whether any of these examples should be revised or removed, what new examples would be of value for the typical filer, and whether any new definitions should be added to the instructions.

2. Asset Ownership Identification

OGE has received comments requesting the addition of a column reflecting asset ownership. OGE is considering adding this column to the report and seeks comment on whether inclusion of this optional information in the form would provide any added benefit or clarity.

3. Asset Valuation Threshold Identification

OGE has received comments requesting the addition of a column reflecting asset valuation threshold identification. OGE is considering adding a question with a ''Yes'' or ''No'' response to whether an asset is above the relevant regulatory *de minimis* level to ease time spent by agency reviewers reaching back to filers. OGE seeks comments on whether inclusion of this optional information in the form would provide any added benefit or clarity.

4. Redesign of the Form

OGE has received comments and suggestions requesting that OGE include more and/or clarify certain definitions and examples that appear on the hard-copy PDF and Excel versions. OGE is considering re-designing the form by removing the instructions, examples, and definitions from the top of each Part, and instead creating new instructions, definitions, and examples pages at the beginning of the form, similar to how the current OGE Form 278e is structured. OGE is also considering providing hyper-links to a new user-friendly HTML version of the OGE Form 450 Reviewers Guide to make preparation and review of the form easier for the filers and agency reviewers.

(a) Addition of an EIF Column

OGE has received comments and requests to provide EIF information on the form, which would clarify whether an asset itself is an EIF or holds underlying assets that are EIFs. OGE seeks comments on whether inclusion of an optional EIF column/field would provide any added benefit or clarity.

Registration: Individuals wishing to attend the public meeting must register at *https://events.gcc.teams.microsoft.com/event/6e6ab2cf-348e-4d4d-bc92-316cb46fdbad@c0abca44-0182-40a9-8010-01ec94254f77?source=copyLinkLegacyShareLinkDialog.*

Meeting information will be provided at the time of registration.

Written Comments: You may submit comments in writing to OGE by use of the following methods:

Email: Forms@OGE.gov. Include ''OGE PRA Form 278e and OGE Form 450 Review'' in the subject line. *Mail:* Office of Government Ethics, 250 E Street SW, Suite 750, Washington, DC 20024–3249, Attention: ''OGE PRA Form 278e and OGE Form 450 Review.''

Instructions: Comments may be posted on OGE's website, *https://www.oge.gov*. Sensitive personal information, such as account numbers or Social Security numbers, should not be included. Comments generally will not be edited to remove any identifying or contact information.

Authority: Ethics in Government Act (EIGA), 5 U.S.C. 13122.

Approved: November 3, 2026.

Keith Sonderling,

Acting Director, U.S. Office of Government Ethics.

BILLING CODE 6345–04–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

[Assistance Listing Number: 93.576]

Announcement of the Intent To Award a Single-Source Cooperative Agreement to the Welcoming Initiative for Newcomers in San Diego, California

AGENCY: Refugee Program Bureau, Office of Refugee Resettlement (ORR), Administration for Children and Families (ACF), Department of Health and Human Services (HHS).

ACTION: Notice of issuance of a single-source cooperative agreement.

SUMMARY: The ACF, ORR announces the intent to award a single-source cooperative agreement in the amount of up to $3,500,000 to the Welcoming Initiative for Newcomers (WIN) in San Diego, California, for the next phase of the State Capacity and Readiness Initiative. Building on the nationwide baseline assessment and related readiness products completed under WIN's prior cooperative agreement, the proposed project will support an updated assessment of state capacity, support development of training and technical assistance resources, support for pilot implementation and learning, and engagement with states not participating in the pilots. The project will also identify service and capacity gaps and provide recommendations concerning additional grants, contracts, technical assistance, or other resources ORR may need to support a state-centered refugee resettlement model.

DATES: The proposed period of performance is November 1, 2026, through October 31, 2027.

FOR FURTHER INFORMATION CONTACT: Miro Marinovich, Office of Refugee Resettlement, Administration for Children and Families, 330 C Street SW, Washington, DC 20201. Telephone: (202) 729–3638; Email: *RBfrontoffice@acf.hhs.gov.*

SUPPLEMENTARY INFORMATION: ORR intends to undertake the next phase of the State Capacity and Readiness Initiative to support implementation of a state-centered refugee resettlement

model. Under a prior cooperative agreement, WIN conducted a nationwide baseline assessment of state readiness and capacity and developed related assessment and planning products. The proposed award will build on that foundational work by moving the initiative from baseline assessment to implementation support, pilot learning, and state and local capacity building.

Under the proposed cooperative agreement, WIN will conduct a nationwide assessment of local resettlement partners and identify the support they will need from states, ORR, training and technical assistance providers, and other entities to deliver services effectively. WIN will also update the assessment of state capacity and readiness to reflect current infrastructure, staffing, partnerships, service-delivery capabilities, and implementation needs.

WIN will collaborate with Switchboard, or another ORR-designated training and technical assistance provider, to inform the development and delivery of training, tools, templates, and other resources that strengthen state readiness and implementation capacity. WIN will support ORR's pilot activities by recommending approaches for information collection and pilot assessment, coordinating regular engagement with participating states and partners, documenting implementation experience, and synthesizing findings and lessons learned. WIN will develop a national data dashboard to support capacity planning.

For states not participating in the pilots, WIN will support ORR and ORR regional staff with meeting coordination, agenda development, briefing materials, and other state-engagement activities. WIN will also identify service gaps, capacity limitations, and unmet implementation needs and provide recommendations concerning additional federal assistance that may be needed to support broader implementation of the state-centered model.

Expected project products will include updated state and local capacity findings, analyses of service and support gaps, pilot-learning summaries, recommendations for training and technical assistance resources, state-engagement materials, and recommendations to inform future ORR program and funding decisions.

ORR will be substantially involved in the project by refining the work plan, identifying priority questions, coordinating engagement with pilot and non-pilot states, reviewing assessment tools and project products, and determining how findings will inform implementation and future federal assistance. This level of federal participation supports use of a cooperative agreement.

ORR proposes to issue the single-source cooperative agreement to WIN because WIN was the recipient of the prior cooperative agreement and developed the baseline assessment, readiness products, analytical approaches, and stakeholder relationships upon which the proposed work will directly build. Through that work, WIN acquired detailed knowledge of the initiative's methodology, findings, implementation context, and state and local capacity needs.

WIN's institutional knowledge and established relationships with state and local refugee-resettlement stakeholders will allow the next phase to begin without requiring ORR and its partners to reconstruct project history, reestablish working relationships, or repeat previously completed engagement and data-gathering activities. Selecting WIN will preserve continuity between the assessment and implementation phases, reduce duplicative start-up activities and information requests, and support timely use of Fiscal Year (FY) 2027 pilot findings in FY 2028 program and resource planning.

The proposed project will strengthen federal, state, and local coordination; provide practical implementation support to states and local resettlement partners; and help ORR target future grants, contracts, and technical assistance toward demonstrated service and capacity needs.

Statutory Authority: Under section 8 U.S.C. 1522(b)(1) of the Refugee Act, ORR is authorized to make grants to and contracts with public or private nonprofit agencies for the initial resettlement of refugees in the United States. This action further advances the intent of 8 U.S.C. 1522(a)(2) by creating mechanisms through which ORR can, to the maximum extent possible, incorporate state recommendations into refugee placement and capacity planning decisions.

Elizabeth A. Leo,

Grants Policy Branch Chief, Office of Grants Policy, Office of Administration.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel; PAR Panel: Innovation Grants to Nurture Initial Translational Efforts (IGNITE).

Date: December 2, 2026.

Time: 9:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Baskaran Thyagarajan, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 800B, Bethesda, MD 20892, (301) 594–0331, *thyagarajanb2@csr.nih.gov*.

Name of Committee: Center for Scientific Review Special Emphasis Panel; RFA Panel: HeartShare 2.0.

Date: December 2, 2026.

Time: 9:00 a.m. to 9:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Vivian Tang, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (301) 594–6208, *tangvw@csr.nih.gov*.

Name of Committee: Center for Scientific Review Special Emphasis Panel; RFA Panel: Limited Competition U01 and U24 Applications for the Adolescent Brain Cognitive Development—Extended (ABCD–E) Study Renewal.

Date: December 2, 2026.

Time: 9:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: DeAnna L. Adkins, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (301) 402–6022, *deanna.adkins@nih.gov*.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Clinical Oncology and Radiation Therapies.

Date: December 2–3, 2026.

Time: 9:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Amr M. Ghaleb, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 812, Bethesda, MD 20892, (301) 443–5851, *amr.ghaleb@nih.gov*.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Small Business: Therapeutic Development for Developmental, Psychiatric, and Substance Use Disorders.

Date: December 2, 2026.

Time: 9:00 a.m. to 9:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Sudhirkumar U. Yanpallewar, MD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Dr., Bethesda, MD 20892, (301) 594–7593, *yanpalls@mail.nih.gov*.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Program Project: Cancer Research.

Date: December 2–3, 2026.

Time: 9:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Michael M. Opata, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (301) 594–3074, *michael.opata@nih.gov*.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Topics on Gene Regulation and Signaling Pathways in Cancer.

Date: December 2–3, 2026.

Time: 9:30 a.m. to 6:30 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Leila Bahadori Toulabi, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (301) 402–8951, *leila.toulabi@nih.gov*.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Cancer Management and Treatment.

Date: December 2, 2026.

Time: 9:30 a.m. to 9:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Erica C. Spears, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (301) 480–3211, *spearsec@csr.nih.gov*.

Name of Committee: Center for Scientific Review Special Emphasis Panel; RFA Panel: BRAIN Initiative—Next Generation Sensor Technology and Neurotechnology Partnerships.

Date: December 2, 2026.

Time: 10:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

BILLING CODE 4167–05–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs & Border Protection

Document Image System (DIS) Pilot for Used Self-Propelled Vehicles Export Document Submission: Renewal of Test

AGENCY: U.S. Customs and Border Protection, DHS.

ACTION: General notice.

SUMMARY: This notice announces that U.S. Customs and Border Protection (CBP) is renewing the Document Image System (DIS) Pilot for Used Self-Propelled

Vehicles (USPV) Export Document Submission (DIS USPV Test) for an additional two years. This voluntary pilot evaluates the feasibility of using the DIS to allow participants to submit the required vehicle ownership documentation for USPVs to CBP. This notice includes a description of the pilot, the eligibility requirements for participation, and invites public comment on any aspect of the pilot.

DATES: The voluntary pilot initially began on January 9, 2023. This renewal is effective November 6, 2026. The renewed test will run for an additional two years from the date of publication of this notice in the **Federal Register**.

ADDRESSES: Interested parties should contact their local CBP vehicle export processing office and express their interest and intent to participate in the DIS pilot. Written comments concerning the program, policy, and technical issues may be submitted at *UsedVehicleDISTEST@cbp.dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Peter Russell, Outbound Enforcement and Policy (OEP), Cargo and Conveyance Security (CCS), Office of Field Operations (OFO), CBP, at *Peter.M.Russell@cbp.dhs.gov,* and David Garcia, CCS, OFO, CBP at *David.USCS.Garcia@cbp.dhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

A. Current Requirements for Export of Used Self-Propelled Vehicles

The current regulations are set forth in part 192 of title 19 of the Code of Federal Regulations (19 CFR part 192). Among other things, part 192 includes regulations pertaining to procedures for the lawful exportation of Used Self-Propelled Vehicles (USPVs). Currently, 19 CFR 192.2 requires that in the case of a vehicle being exported by vessel or aircraft, both the required documentation describing the vehicle

and the vehicle must be presented to CBP at least 72 hours prior to export, and in the case of a vehicle being exported at a land border crossing (by rail, highway, or under its own power), the required documentation must be submitted at least 72 hours prior to export, and the vehicle must be presented at the time of export. The required documentation includes the vehicle identification number (VIN) or, if the vehicle does not have a VIN, the product information number (PIN). Section 192.2(b) specifies the types of documents that must be submitted in different circumstances. Exportation of a vehicle is permitted only upon compliance with these requirements unless, as per section 192.2(a), the vehicle was entered into the United States under an in-bond procedure, or under a carnet or Temporary Importation Bond (TIB). Such vehicles are exempt from these requirements. As a matter of policy, CBP also recognizes as exempt a vehicle entered under a personal exemption for non-residents who entered the vehicle for a one-year period. *See www.cbp.gov/trade/basic-import-export/export-docs/motor-vehicle#.*

B. Description and Purpose of Pilot

CBP announced the DIS USPV Test by a **Federal Register** notice published on May 10, 2022 (87 FR 28022) (the 2022 Test Notice) and began the test on January 9, 2023. The DIS USPV test is intended to evaluate the process and whether this process will expedite and modernize the document submission and review process for the export of USPVs. CBP is renewing this DIS USPV Test to continue its evaluation. All procedures and criteria announced in the 2022 Test Notice remain applicable to this renewal.

In this voluntary pilot, participants submit the required ownership documentation as set forth in 19 CFR part 192 through the DIS in CBP's Automated Commercial Environment (ACE), using either the Electronic Data Interchange (EDI) via an Automated Broker Interface (ABI), or via email at *docs@cbp.dhs.gov.* Participants are required to submit the documentation in accordance with existing regulatory timeframes which vary by type of vehicle,[1] and the timeframes for presenting the documents and vehicle vary by manner of export.[2] The DIS USPV Test changes only the *manner* in which the required documents are submitted to CBP. For pilot participants, CBP will waive the requirement in 19 CFR 192.2 to present original physical copies of the documents and require the documents to be submitted electronically using the DIS (EDI or email) instead. However, CBP will retain the right to request original documents on an as-needed basis. All other requirements of 19 CFR part 192, including the requirement to present the vehicle, will remain unchanged.[3]

Under the pilot, the electronically submitted documents are linked to the Electronic Export Information (EEI)[4] filing in the Automated Export System (AES) via the Internal Transaction Number (ITN) generated at the time of the EEI submission. Participants are required to transmit a valid ITN number to CBP with the DIS submission. Participants must submit EEI prior to submitting the vehicle documents to DIS. CBP will request original documentation and conduct a physical examination of the vehicle when necessitated by the results of targeting and risk assessment.

Participants will receive an automated response in the format in which the required documents were submitted, EDI or email, confirming that the document submission was received.[5] The participants will be able to use the automated response together with the AES-generated ITN to show that they complied with CBP's reporting requirements. The documentation submitted via the DIS will be used by CBP to review and process vehicles pending export to ensure compliance with U.S. laws and regulations. CBP reserves the right to request original (paper) documentation at any time. Consequently, pilot participants must continue to have access to the documentation in its original form for the entire time from submission to clearance by CBP, in the same manner as required by 19 CFR part 192.

Participation in the pilot does not alter participants' obligations to comply with any other applicable statutory or regulatory requirements. Participants will continue to be subject to applicable penalties for non-compliance with CBP or other U.S. Government agency program requirements or any statutory sanctions if a violation of U.S. export control laws occurs or prohibited articles are discovered with a vehicle presented for export from the United States.

C. Renewal of Pilot

As noted, CBP has been conducting this pilot since 2023. Renewing the pilot will allow CBP to continue to conduct targeting electronically, facilitate legitimate exportation of USPVs, and allow for greater participation in the pilot.

Continuing the pilot will allow CBP to test the mechanisms through which the required documentation may be submitted electronically, as a preliminary step towards moving to a more automated and efficient export reporting system for export of used self-propelled vehicles. Having the required documentation available electronically will enable CBP to institute better risk-based targeting of exports. This will be accomplished by making electronic document and information submission the primary means for meeting export reporting requirements and reserving field inspection of vehicles and examination of original ownership documentation only for cases where targeting and risk assessment have identified a need for additional scrutiny. The receipt of the electronic ownership documentation will also improve CBP's ability to target and identify high-risk vehicle exports pre-departure while facilitating the process for legitimate exportation through a more streamlined and efficient port procedure. Considering the high volume of vehicle exports, it is expected that the electronic submission of the required documentation will have a significant impact on the speed and efficiency of vehicle export processing.

From 2023–2025, there was an annual average of 1.3 million USPVs exported from the United States.[6] During that timeframe, approximately one third of all document submissions were

[1] For example, U.S.-titled vehicles, vehicles with title that evidences third-party ownership/claims, foreign-titled vehicles, etc. *See* 19 CFR 192.2(b).

[2] *See* 19 CFR 192.2(c).

[3] The pilot does not change the specific documents required for any particular type of vehicle, nor does it change the timeframes by which the documentation must be submitted. The pilot also does not change the requirement to present the vehicle to CBP, as set forth in 19 CFR.192.2(c) and (d). 19 CFR part 192 exempts certain categories of vehicles from the EEI filing requirement of the Census Foreign Trade Regulations (15 CFR part 30, subpart E). The EEI filing requirements remain unchanged under this pilot.

[4] The EEI is required pursuant to the Census Foreign Trade Regulations (FTR). 15 CFR part 30, subpart E. 19 CFR part 192 also sets forth CBP's requirements pertaining to the AES, implemented by FTR. The AES is the electronic system of record for collecting EEI from persons exporting goods from the United States to foreign countries. The EEI for all used self-propelled vehicles must be filed via AES regardless of value or country of destination 72 hours prior to export. 15 CFR 30.2(a)(1)(iv)(H), (b)(5).

[5] This is different from the current process whereby CBP ports of export stamp the original documentation provided by the exporter and the exporter then uses the stamped documentation as evidence that CBP cleared the vehicle prior to departure from the United States.

[6] Information provided by CBP Cargo and Conveyance Security Directorate, Office of Field Operations subject matter expert on May 26, 2026.

tendered via DIS as part of this DIS USPV Test.[7] Under the current regulatory export procedures, the person who is attempting to export a USPV must present to CBP both the vehicle and specified paper documents. This paper process is a drain on limited CBP staffing resources at ports with significant traffic because it requires CBP to devote numerous hours to review vehicle export paperwork. The pilot will allow CBP to assess the effectiveness of these electronic procedures and will allow the agency to test the functionality of the systems required for electronic submission. The results of the pilot will help CBP determine whether to eventually require, through rulemaking, the electronic submission of vehicle ownership documentation using the DIS.

The pilot will continue to run for approximately two years from the date of publication of this notice in the **Federal Register**.

D. Eligibility Requirements

Eligibility is limited to parties who are responsible for submitting the documentation required by 19 CFR 192.2 as part of the export transaction and who have access to the ITN for the AES commodity filing. In addition, participants must agree to submit the required documentation via the DIS, as described above.

E. Application Process and Acceptance

Parties interested in participating in this pilot should, as a preliminary matter, submit a request to receive export updates via the Cargo Systems Messaging Service (CSMS). Requests may be made at *https://www.cbp.gov/trade/automated/cargo-systems-messaging-service.* The CSMS is used to provide pilot participants with technical and operational updates and guidance throughout the pilot, and may be used to announce technical, non-substantive changes to the pilot.

Detailed instructions for participation in the pilot can be found in the DIS Instructional Guide for the Exportation of Used Self-Propelled Vehicles located on the CBP website, at *https://www.cbp.gov/trade/basic-import-export/export-docs/motor-vehicle.* There is no specific application for participation in the pilot. However, interested participants must communicate their interest and intent to the relevant port before taking any other action. The port will further direct potential pilot participants regarding next steps. Prospective participants will be asked to submit the first submission of ownership documents and contact their local CBP vehicle processing office to verify that their first transmission of ownership documents is successful, prior to being granted participation in the pilot. Once this review and verification are complete, participants will be permitted to participate fully in the pilot.

Participation in the pilot is open to all eligible parties that have been approved to participate, subject to the discretion of the Port Director at the port from which parties intend to export the USPVs.

F. Technical Specifications

Ownership documents must be submitted via the DIS, either using the EDI via an approved ABI or via email at *docs@cbp.dhs.gov* in a PDF format up to 10MB. Detailed instructions for participation in the pilot can be found in a document named DIS Instructional Guide for the Exportation of Used Self-Propelled Vehicles located on the CBP website, at *https://www.cbp.gov/trade/basic-import-export/export-docs/motor-vehicle.*

G. Evaluation of the Pilot

While the pilot is ongoing, CBP will evaluate the effectiveness of using the DIS and will determine if any extensions or modifications are needed. Technical modifications will be announced using the CSMS. Any substantive changes to the pilot, including extensions, will be announced in the **Federal Register**.

The results of the pilot will help CBP analyze and evaluate the effectiveness of using the DIS or some other method to collect export documentation for USPVs. When sufficient analysis and evaluation have been conducted, CBP will decide whether to require electronic submission of ownership documentation using the DIS or some other method. Any changes to the regulations will be made through rulemaking.

H. Confidentiality

All data submitted into ACE is subject to the Trade Secrets Act (18 U.S.C. 1905) and is considered confidential, except to the extent otherwise provided by law. However, participation in this or any ACE pilot is not confidential and upon a written Freedom of Information Act (FOIA) request, the name(s) of an approved participant(s) will be disclosed by CBP in accordance with 5 U.S.C. 552.

[7] Information provided by CBP Cargo and Conveyance Security Directorate, Office of Field Operations subject matter expert on May 26, 2026.

II. Applicability of Initial Test Notice

All provisions in the 2022 Test Notice remain applicable, subject to the extension of the time provided in this renewal.

III. Privacy

CBP will ensure that all Privacy Act requirements and applicable policies are adhered to during the implementation of this pilot.

IV. Paperwork Reduction Act

The Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3507(a)) requires that CBP consider the impact of paperwork and other information collection burdens imposed on the public. An agency may not conduct, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number assigned by the Office of Management and Budget (OMB). The collection of information regarding Exportation of Self-Propelled Vehicles was previously reviewed and approved by OMB in accordance with the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3507) under OMB Control Number 1651–0054. No new information is collected under this pilot. Therefore, no new information collection or update to the existing information collection is required.

Diane J. Sabatino,

Executive Assistant Commissioner, Office of Field Operations, U.S. Customs and Border Protection.

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2026–0001]

Notice of Adjustment of Statewide Per Capita Impact Indicator

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: FEMA gives notice that the statewide per capita impact indicator under the Public Assistance program for disasters with an incident start date on or after October 1, 2026, will be increased.

DATES: This adjustment applies to major disasters with an incident start date on or after October 1, 2026.

FOR FURTHER INFORMATION CONTACT: Robert M. Pesapane, Recovery Directorate, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–3834.

SUPPLEMENTARY INFORMATION: FEMA regulations at 44 CFR 206.48 provides that FEMA will adjust the statewide per capita impact indicator under the Public Assistance program to reflect changes in the Consumer Price Index for All Urban Consumers published by the Department of Labor.

FEMA gives notice that the statewide per capita impact indicator will be increased to $2.01 for all disasters with an incident start date on or after October 1, 2026.

FEMA bases the adjustment on an increase in the Consumer Price Index for All Urban Consumers of 3.4 percent for the 12-month period that ended in August 2026. The Bureau of Labor Statistics of the U.S. Department of Labor released the information on September 11, 2026.

FOR FURTHER INFORMATION CONTACT: Zachary Usher, Recovery Directorate, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 212–1000.

SUPPLEMENTARY INFORMATION: Section 408 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (the Stafford Act), 42 U.S.C. 5174, prescribes that FEMA must annually adjust the maximum amount for assistance provided under the Individuals and Households Program (IHP). FEMA gives notice that the maximum amount of IHP financial assistance provided to an individual or household under section 408 of the Stafford Act with respect to any single emergency or major disaster is $46,400 for housing assistance and $46,400 for other needs assistance. The increase in award amount is for any single emergency or major disaster declared on or after October 1, 2026. In addition, in accordance with 44 CFR 61.17(c), this increases the maximum amount of available coverage under any Group Flood Insurance Policy (GFIP) issued.

FEMA bases the adjustment on an increase in the Consumer Price Index for All Urban Consumers of 3.4 percent for the 12-month period, which ended in August 2026. The Bureau of Labor Statistics of the U.S. Department of Labor released the information on September 11, 2026.

(Catalog of Federal Domestic Assistance No. 97.048, Federal Disaster Assistance to Individuals and Households in Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs).

Cameron Hamilton,

Administrator, Federal Emergency Management Agency.

BILLING CODE 9111–23–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2026–0001]

Notice of Adjustment of Disaster Grant Amounts

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: FEMA gives notice of an adjustment to the threshold for Small Project subgrants made to state, tribal, and local governments and private nonprofit facilities for disasters declared on or after October 1, 2026.

DATES: This adjustment applies to major disasters and emergencies declared on or after October 1, 2026.

FOR FURTHER INFORMATION CONTACT: Robert M. Pesapane, Recovery Directorate, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–3834.

SUPPLEMENTARY INFORMATION: The Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121–5207, as amended by the Sandy Recovery Improvement Act, Public Law 113–2, provides that FEMA will annually adjust the threshold for assistance provided under section 422, Simplified Procedures, relating to the Public Assistance program, to reflect changes in the Consumer Price Index for All Urban Consumers published by the Department of Labor.

FEMA gives notice that $1,130,900 is the threshold for any Small Project subgrant made to state, tribal, and local governments or to the owner or operator of an eligible private nonprofit facility under section 422 of the Stafford Act for all major disasters or emergencies declared on or after October 1, 2026.

FEMA bases the adjustment on an increase in the Consumer Price Index for All Urban Consumers of 3.4 percent for the 12-month period that ended in August 2026. This is based on information released by the Bureau of Labor Statistics at the U.S. Department of Labor on September 11, 2026.

(Catalog of Federal Domestic Assistance No. 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters)

BILLING CODE 9111–23–P

DEPARTMENT OF HOMELAND SECURITY

[Docket No. CISA–2026–0166]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; The Department of Homeland Security, Emergency Communications Division, Communications Assets Survey and Mapping (CASM) Tool Registration Tool

AGENCY: Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security (DHS).

ACTION: 30-Day notice of information collection; request for comment; OMB Control Number: 1670–0043.

SUMMARY: The Emergency Communications Division (ECD) within the Cybersecurity and Infrastructure Security Agency (CISA) submits the following information collection request (ICR) to the Office of Management and Budget (OMB) for review and clearance. CISA previously published this information collection request (ICR) in the **Federal Register** on 08/19/2026 for a 60-day public comment period. The control number for this collection is 1670–0043. No comments were received by CISA. The purpose of this notice is

to allow additional 30 days for public comments.

DATES: Comments are encouraged and will be accepted until December 7, 2026. Submissions received after the deadline for receiving comments may not be considered.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

The Office of Management and Budget is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

FOR FURTHER INFORMATION CONTACT: If additional information is required contact: Anais Azoulay, 202–704–5829, *anais.azoulay@cisa.dhs.gov*.

SUPPLEMENTARY INFORMATION: The Department of Homeland Security (DHS) Cybersecurity and Infrastructure Security Agency (CISA) Emergency Communications Division (ECD), formed under Title XVIII of the Homeland Security Act of 2002, 6 U.S.C. 571 *et seq.,* as amended, is required, pursuant to 6 U.S.C. 571(c)(5) to conduct extensive, nationwide outreach and foster the development of interoperable emergency communications capabilities by state, regional, local, and tribal governments and public safety agencies, and by regional consortia thereof. To achieve this, ECD provides the communications assets and survey mapping (CASM) tool. The CASM tool is the primary resource nationwide for the emergency communications community to inventory and share asset and training information for the purpose of planning public safety communications operability and interoperability.

ECD provides the communications assets survey and mapping (CASM) tool as a secure and free nationwide database to contain communications capabilities for use by federal, state, local, territorial, and tribal (SLTT) emergency personnel. CASM allows federal employees and SLTT statewide interoperability coordinators (SWIC) to inventory emergency communication equipment and resources. The information entered is voluntary and used by SWIC to support tactical planning and coordination during emergencies. ECD does not utilize the information entered into CASM. ECD only provides, maintains, and stores the information entered in the CASM database and only has administrative access to the information entered.

CASM Registration

To get access to the CASM tool, users click on the ''request new access'' link on the CASM login page (*https://login.CASM.cisa.dhs.gov/*). The registration requires that users enter their name, contact information, reason for their access request, type of data to access, and access level. Once entered, the access request is routed to their organization's approving authority. Once the organization's approving authority vets and authorizes the access request, the user account is automatically created, and users are notified via an auto-generated email.

CASM Modules

The CASM consists of voluntary modules related to the different types of capabilities. There is a module for assets, which contains information about emergency equipment, the equipment capabilities and location. There is a personnel module, which contains personnel name, contact information and information about their communications unit (COMU) training. The personnel module allows SWICs to track their personnel's COMU training.

All information is collected via electronic means. The CASM registration and database tool is available online via *https://login.CASM.cisa.dhs.gov/*. Users can also access and enter information via the CASM resource finder mobile app.

This information collection does not impact small businesses or other small entities.

This database allows ECD to execute its statutory authority under 6 U.S.C. 571 to conduct extensive, nationwide outreach to support and promote the ability of emergency response providers and relevant government officials to continue to communicate in the event of natural disasters, acts of terrorism, and other man-made disasters. Without CASM and the federal government's ability to empower the states, ECD would not have an organic way for states to create a centralized and secure emergency assets and equipment database. Information is protected by the Privacy Act of 1974 and is kept private or anonymous to the extent allowable by law.

The DHS Privacy Office review finds that this is a privacy sensitive collection requiring a privacy impact assessment (PIA) and system of records notice (SORN). The collection is covered by PIA—DHS/ALL/PIA–006 DHS general contacts list and SORN—DHS/ALL–002 DHS mailing and other lists system, 73 FR 71659 (NOV 25, 2008) and SORN—DHS/ALL–004 general information technology access account records system (GITAARS), 77 FR 70792 (NOV. 27, 2012).

This is an extension of a currently approved collection without change.

Analysis

Agency: Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security (DHS).

Title: Communications Assets Survey and Mapping (CASM) Tool Registration Form.

OMB Number: 1670–0043.

Frequency: Annually.

Affected Public: Emergency Communication Personnel.

Number of Respondents: 56 Annually.

Estimated Time per Respondent: 0.08 hours (5 minutes) per Registration, 0.5 Hours (30 Minutes) per Module.

Total Burden Hours: 341 Hours Annually.

Total Annual Burden Cost: $19,981.

Total Annual Government Burden Cost: $3,000,000.

Winfield P. Werntz,

Acting Chief Information Officer, Department of Homeland Security, Cybersecurity and Infrastructure Security Agency.

BILLING CODE 9111–LF–P

DEPARTMENT OF HOMELAND SECURITY

[Docket No. CISA–2026–0265]

Agency Information Collection Activities: Incident Communications Activity Report

AGENCY: Cybersecurity and Infrastructure Security Agency (CISA),

Department of Homeland Security (DHS).

ACTION: 60-Day notice and request for comments; extension of a previously approved collection.

SUMMARY: The Emergency Communications Division (ECD) within Cybersecurity and Infrastructure Security Agency (CISA) submits the following Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and clearance.

DATES: Comments are encouraged and will be accepted until January 5, 2027. Submissions received after the deadline for receiving comments may not be considered.

ADDRESSES: You may submit comments, identified by docket number Docket # CISA–2026–0265, by following the instructions below for submitting comment via the Federal eRulemaking Portal at *http://www.regulations.gov.*

Instructions: All comments received must include the agency name and docket number Docket #CISA–2026–0265. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Kylie-Anne Noreiga at 202–329–5161 or at *kylie-anne.noreiga@cisa.dhs.gov*.

SUPPLEMENTARY INFORMATION: The Cybersecurity and Infrastructure Security Agency (CISA) Emergency Communications Division (ECD) is mandated by The Cybersecurity and Infrastructure Security Act of 2018, 6 U.S.C. 652(f) under Sections (9) carry out emergency communications responsibilities, in accordance with subchapter XIII; (10) carry out cybersecurity, infrastructure security, and emergency communications stakeholder outreach and engagement and coordinate that outreach and engagement with critical infrastructure Sector Risk Management Agencies, as appropriate; and (11) provide education, training, and capacity development to Federal and non-Federal entities to enhance the security and resiliency of domestic and global cybersecurity and infrastructure security.

This information collection is requested to be completed by ECD stakeholders, including state and local emergency communications professionals—through The Incident Communications Activity Report (ICAR) form. The ICAR was developed with the intention of capturing and documenting the emergency communications activity and utilization of public safety communications technologies controlled by state or local emergency response officials organized to provide command and coordination for an incident, planned event, or exercise. As a result, CISA/ECD seeks to renew a standard request from the Paper Reduction Act (PRA) to review, analyze, and revise current Incident Communication Activity.

The Emergency Communications Division (ECD) is a division within the Cybersecurity and Infrastructure Security Agency (CISA) which serves under the direction of the Department of Homeland Security (DHS). ECD coordinates with National Security and Emergency Preparedness (NS/EP) communications stakeholders to enable use of technical assistance and information sharing to reduce communications system impacts or vulnerabilities. CISA has authority to perform assessments and evaluations for federal and non-federal entities, with consent and upon request. CISA responds to 6 U.S.C. 571(c) to enhance interoperable communications capabilities, training, planning, and implementation across federal, state, local, tribal, and territorial (FSLTT) entities and critical infrastructure key resources. The information collected will provide on-the-ground data on emergency communications activity and utilization of public safety communications technologies controlled by state or local emergency response officials organized to provide command and coordination for an incident, planned event, or exercise. The information captured focuses on several key areas: incident complexity, command and coordination systems, and all-hazards information and communications technology positions, resources (*e.g.,* voice and data systems, interoperability techniques, and planning references), challenges and general conditions encountered during the incident.

ICAR will be submitted electronically by the emergency responder with overall information and communications technology responsibilities within the identified command and coordination organization, for a reporting period.

This information will inform other jurisdictions on best practices while permitting data-driven decisions on future policy improvements. CISA, in support of the National Council of Statewide Interoperability Coordinators (NCSWIC) and the CISA interoperable-communications program known as SAFECOM, will collect data through a two-page report to capture the emergency communications activity and utilization of public safety communications technologies controlled by state or local emergency response officials organized to provide command and coordination for an incident, planned event, or exercise. CISA's goal is to identify lessons learned to drive strategy and improve existing or offer new technical assistance within the scope of emergency communications activity for Incidents, Planned Events, or Exercises. The ICAR is completed by the person with overall information and communications technology responsibilities with the identified command and coordination organization, for the indicated reporting period. The reporting period is flexible to meet agency or jurisdictional program needs. The report is designed to accommodate a single report for the incident or event duration, or multiple reports for smaller time periods within the same incident or event. State, local, territorial, or tribal incident communications, organizational and technical challenges and best practices will be captured. Collecting and summarizing this data will drive our nationwide response, drive strategy, and goal development subsequently improving existing and/or offer new Technical Assistance options to stakeholders.

The ICAR is an electronically submitted form to populate the data sets which will be loaded, stored, and analyzed in the division's data analytics system. Electronic data collection enables an efficient and straightforward submission process to submit, reducing the time and effort for the submitter while also reducing errors.

ICAR form is voluntarily submitted using a Microsoft Teams Form link. The ICAR form will require a total effort of approximately five minutes for completion. The ICAR form will be completed per incident. Leveraging the MS Forms and a fillable PDF there will be no printing of forms needed, no preparing and sending emails or memos per incident. Participants will be able to input free form information in addition to drop down type questions.

The current existing collection approved by OMB is set to expire on December 31, 2026.

There are no changes to the burden or information being collected.

The Office of Management and Budget is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary

for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

Analysis

Agency: Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security (DHS).

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NRNHL–DTS#–44163; PPWOCRADI0, PCU00RP14.R50000]

National Register of Historic Places; Notification of Pending Nominations and Related Actions

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service is soliciting electronic comments on the significance of properties nominated before October 24, 2026, for listing or related actions in the National Register of Historic Places.

DATES: Comments should be submitted by November 23, 2026.

ADDRESSES: Comments are encouraged to be submitted electronically to *National_Register_Submissions@nps.gov* with the subject line ''Public Comment on <property or proposed district name, (County) State>.'' If you have no access to email, you may send them via U.S. Postal Service and all other carriers to the National Register of Historic Places, National Park Service, 1849 C Street NW, MS 2013, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Sherry A. Frear, Chief, National Register of Historic Places/National Historic Landmarks Program, 1849 C Street NW, MS 2013, Washington, DC 20240, *sherry_frear@nps.gov,* 202–913–3763.

SUPPLEMENTARY INFORMATION: The properties listed in this notice are being considered for listing or related actions in the National Register of Historic Places. Nominations for their consideration were received by the National Park Service before October 24, 2026. Pursuant to 36 CFR 60.13, comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Nominations submitted by State or Tribal Historic Preservation Officers.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA–2027–008]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice.

SUMMARY: We are proposing renewal from the Office of Management and Budget (OMB) of an approved information collection, Facility Access Media (FAM) Request, NA Form 6006, used by all individuals requesting recurring access to non-public areas of NARA's facilities and IT network. We invite you to comment on the proposed information collections.

DATES: OMB must receive written comments on or before December 7, 2026.

ADDRESSES: Send any comments and recommendations on the proposed information collection in writing to *www.reginfo.gov/public/do/PRAMain.* You can find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Kristin Phillips, Paperwork Reduction Act Officer, by email at *kristin.phillips@nara.gov* or by telephone at 616–254–0405 with requests for additional information or copies of the proposed information collection and supporting statement.

SUPPLEMENTARY INFORMATION: Pursuant to the Paperwork Reduction Act of 1995 (Pub. L. 104–13), we invite the public and other Federal agencies to comment on proposed information collections. We published a notice of proposed collection for these information collections on August 12, 2026 (91 FR 52085) and we received no comments. In the 60-day notice the respondents and burden hours were represented for three years. We've corrected those figures in this notice with the actual annual respondents and burden hours. We are therefore submitting the described information collections to OMB for approval.

If you have comments or suggestions, they should address one or more of the following points: (a) whether the proposed information collections are necessary for NARA to properly perform its functions; (b) our estimate of the burden of the proposed information collections and its accuracy; (c) ways we could enhance the quality, utility, and clarity of the information we collect; (d) ways we could minimize the burden on respondents of collecting the information, including through information technology; and (e) whether these collections affect small businesses.

In this notice, we solicit comments concerning the following information collection:

Title: Facility Access Media (FAM) Request.

OMB number: 3095–0057.

Agency form number: NA Form 6006.

Type of review: Regular.

Affected public: Individuals or households.

Estimated number of respondents: 1,500.

Estimated time per response: 3 minutes.

Frequency of response: On occasion.

Estimated total annual burden hours: 75 hours.

Abstract: The Facility Access Media (FAM) Request, NA Form 6006, is completed by all individuals requiring recurring access to non-public areas of NARA's facilities and IT network (such as NARA employees, contractors, volunteers, NARA-related foundation employees, volunteers, interns, and other non-NARA federal employees, such as federal agency reviewers) herein referred to as ''applicants,'' in order to obtain NARA Facility Access Media (FAM). After approval of the request, the applicant is given a FAM, if approved, and is then able to access non-public areas of NARA facilities and IT network. The collection of information is necessary to comply with Homeland Security Presidential Directive (HSPD) 12 requirements for secure and reliable forms of personal identification issued by federal agencies to their employees, contractors, and other individuals requiring recurring access to non-public areas of government facilities and information services. This form was developed to comply with this requirement.

Gulam Shakir,

Executive for Information Services/CIO.

BILLING CODE 7515–01–P

NATIONAL SCIENCE FOUNDATION

Proposal Review; Notice of Meetings

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces its intent to hold proposal review meetings throughout the year. The purpose of these meetings is to provide advice and recommendations concerning proposals submitted to the NSF for financial support. The agenda for each of these meetings is to review and evaluate proposals as part of the selection process for awards. The review and evaluation may also include an assessment of the progress of awarded proposals. These meetings will primarily take place at NSF's headquarters, 401 Dulany Street, Alexandria, VA 22314.

These meetings will be closed to the public. The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act. NSF will continue to review the agenda and merits of each meeting for overall compliance of the Federal Advisory Committee Act.

These closed proposal review meetings will not be announced on an individual basis in the **Federal Register**. NSF intends to publish a notice similar to this on a quarterly basis. For an advance listing of the closed proposal review meetings that include the names of the proposal review panel and the time, date, place, and any information on changes, corrections, or cancellations, please visit the NSF website: *https://nsf.gov/events/proposal-review-panels.* This

information may also be requested by telephone, 703/292–8687.

Dated: November 4, 2026.

Crystal Robinson,

Committee Management Officer.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–368; NRC–2026–5215]

Entergy Operations Inc.; Arkansas Nuclear One, Unit 2; License Amendment Application

AGENCY: Nuclear Regulatory Commission.

ACTION: Opportunity to comment, request a hearing, and petition for leave to intervene.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC, the Commission) is considering issuance of an amendment to Renewed Facility Operating License No. NPF–6, issued to Entergy Operations, Inc. (Entergy, the licensee), for operation of Arkansas Nuclear One, Unit 2 (ANO–2). The proposed amendment would revise the technical specifications (TSs) for ANO–2, by modifying the note associated with Surveillance Requirement (SR) 4.1.3.1.2 to permit Control Element Assembly (CEA) 29 to be excluded from exercising for the remainder of Cycle 32. This change would allow CEA 29 to remain out of the exercising surveillance until the planned refueling outage 2R32, currently scheduled for September 2027.

DATES: Submit comments by November 20, 2026. Request for a hearing or petitions for leave to intervene must be filed by January 5, 2027.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website.

- *Federal rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2026–5215. Address questions about Docket IDs in *Regulations.gov* to Bridget Curran; telephone: 301–415–1003; email: *Bridget.Curran@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Office of Nuclear Material Safety and Safeguards, Mail Stop: TWFN–5–A85, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Guidance and Publications Branch.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: M. Elena Herrera, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–8208; email: *Maria.Herrera@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2026–5215 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2026–5215.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin ADAMS Public Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The license amendment request to exclude exercising CEA 29 from SR 4.1.3.1.2 is available in ADAMS under Accession No. ML26260A338, and a supplement to the license amendment request is available in ADAMS under Accession No. ML26281A182.
- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2026–5215 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Introduction

The NRC is considering issuance of an amendment to Renewed Facility Operating License No. NPF–6, issued to Entergy, for operation of ANO–2, located in Pope County, Arkansas.

The proposed amendment would revise the technical specifications for ANO–2 by modifying the note associated with SR 4.1.3.1.2 to permit CEA 29 to be excluded from exercising for the remainder of Cycle 32. This change would allow CEA 29 to remain out of the exercising surveillance until the planned refueling outage 2R32, currently scheduled for September 2027.

Pursuant to the requirements of sections 50.91 and 50.92 of title 10 of the *Code of Federal Regulations* (10 CFR), the licensee requested approval of the amendment under exigent circumstances. In its application, the licensee explained that it submitted this application under exigent circumstances due to the need for NRC review and, if pertinent requirements are met, approval of the amendment before the next required surveillance date, scheduled for December 16, 2026, to avoid a required plant shutdown and to prevent an unnecessary transient or reactivity excursion while deferring CEA 29 repair until the planned refueling outage 2R32.

Before any issuance of the proposed license amendment, the NRC will need to make the findings required by the Atomic Energy Act of 1954, as amended (the Act), and NRC's regulations.

Pursuant to 10 CFR 50.91(a)(6), for amendments to be granted under exigent circumstances, the NRC has made a proposed determination that the license amendment request involves no significant hazards consideration (NSHC). Under the NRC's regulations in 10 CFR 50.92, this means that operation

of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of NSHC, which is presented below:

(1) Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

One function of the CEAs is to provide a means of rapid negative reactivity addition into the core. This occurs upon receipt of a signal from the Reactor Protection System (RPS). This function will continue to be accomplished with the approval of the proposed change. Typically, once per 184 days, each CEA is moved at least five inches to ensure the CEA is free to move. CEA 29 remains trippable (free to move) as illustrated by startup during spring of 2026 and during power restoration following installation of the temporary modification in June 2026. However, due to failure of the pull-down coil, future exercising of the CEA could result in the CEA inadvertently inserting into the core during CEA movement. Undesired operation of a CEA, which includes a CEA drop event, is an abnormal occurrence and has been previously evaluated as part of the ANO–2 accident analysis. Inadvertent CEA insertion will result in a reactivity transient and power reduction and could lead to a reactor shutdown if the CEA is deemed to be unrecoverable. The proposed change would minimize the potential for inadvertent insertion of CEA 29 into the core by maintaining the CEA in place. The proposed change will not affect the CEAs ability to insert fully into the core upon receipt of a reactor trip signal.

No additional modifications are proposed to the RPS or associated Control Element Drive Mechanism Control System (CEDMCS) logic regarding the ability of CEA 29 to remain available for immediate insertion due to a trip signal. The accident mitigation features of the plant are not affected by the proposed amendment. Because CEA 29 remains trippable, no additional reactivity considerations need to be taken into consideration. Nevertheless, Entergy has evaluated the reactivity consequences associated with failure of CEA 29 to insert upon a reactor trip in accordance with TS requirements for Shutdown Margin (SDM) and has determined that SDM requirements would be met should such an event occur at any time during the remainder of Cycle 32 operation.

Therefore, this change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

(2) Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

CEA 29 remains trippable. The proposed change will not introduce any new design changes or systems that can prevent the CEA from performing its specified safety function. As discussed previously, CEA mis-operation has been previously evaluated in the ANO–2 accident analysis. Furthermore, SDM has been shown to remain within limits should an event occur at any time during the remainder of operating Cycle 32 such that CEA 29 fails to insert into the core upon receipt of a reactor trip signal. Therefore, this change does not create the possibility of a new or different kind of accident from an accident previously evaluated.

(3) Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

SR 4.1.3.1.2 is intended to verify CEAs are free to move (*i.e.,* not mechanically bound). The physical and electrical design of the CEAs, and past operating experience provides high confidence that CEAs remain trippable whether or not exercised during each SR interval. Excluding further exercising of CEA 29 for the remainder of Cycle 32 operation does not directly relate to the potential for CEA binding to occur. No mechanical binding has been previously experienced at ANO–2. In addition, Entergy has concluded that required SDM will be maintained should CEA 29 fail to insert following a reactor trip at any point during the remainder of Cycle 32 operation.

Therefore, this change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the license amendment request involves a NSHC.

In accordance with 10 CFR 50.91(a)(6), where the Commission finds that exigent circumstances exist, in that a licensee and the Commission must act quickly and that time does not permit the Commission to publish a **Federal Register** notice allowing 30 days for prior public comment, and it also determines that the amendment involves NSHCs, it can issue a **Federal Register** notice providing notice of an opportunity for hearing and allowing at least two weeks from the date of the notice for prior public comment. Therefore, in accordance with 10 CFR 50.91(a)(6)(i)(A), the NRC staff is providing a 14-day notice period for public comment.

The NRC is seeking public comments on this proposed determination that the license amendment request involves NSHC. Any comments received within 14 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 14-day notice period. However, if circumstances change during the notice period, such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the notice period, provided that its final determination is that the amendment involves NSHC. The final determination will consider all public and State comments received. The Commission expects that the need to take this action will occur very infrequently.

III. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any person (petitioner) whose interest may be affected by this action may file a request for a hearing and petition for leave to intervene (petition) with respect to the action. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult 10 CFR 2.309. If a petition is filed, the Commission or a presiding officer will rule on the petition and, if appropriate, a notice of a hearing will be issued.

Petitions must be filed no later than 60 days from the date of publication of this notice in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document. Petitions and motions for leave to file new or amended contentions that are filed after the deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii).

If a hearing is requested, and the Commission has not made a final

determination on the issue of NSHC, the Commission will make a final determination on the issue of NSHC, which will serve to establish when the hearing is held. If the final determination is that the license amendment request involves NSHC, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing would take place after issuance of the amendment. If the final determination is that the license amendment request involves a significant hazards consideration, then any hearing held would take place before the issuance of the amendment unless the Commission finds an imminent danger to the health or safety of the public, in which case it will issue an appropriate order or rule under 10 CFR part 2.

A State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h) no later than 60 days from the date of publication of this notice. Alternatively, a State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof, may participate as a non-party under 10 CFR 2.315(c).

For information about filing a petition and about participation by a person not a party under 10 CFR 2.315, see ADAMS Accession No. ML20340A053 (*https://adamswebsearch2.nrc.gov/webSearch2/main.jsp?AccessionNumber=ML20340A053*) and the NRC's public website (*https://www.nrc.gov/about-nrc/regulatory/adjudicatory/hearing.html#participate*).

IV. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings, including documents filed by an interested State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof that requests to participate under 10 CFR 2.315(c), must be filed in accordance with 10 CFR 2.302. The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases, to mail copies on electronic storage media, unless an exemption permitting an alternative filing method, as further discussed, is granted. Detailed guidance on electronic submissions is located in the ''Guidance for Electronic Submissions to the NRC'' (ADAMS Accession No. ML13031A056), and on the NRC's public website (*https://www.nrc.gov/site-help/e-submittals.html*).

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *Hearing.Docket@nrc.gov,* or by telephone at 301–415–1677, to: (1) request a digital identification (ID) certificate, which allows the participant (or their counsel or representative) to digitally sign submissions and access the E-Filing system for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition or other adjudicatory document (even in instances in which the participant, or their counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public website (*https://www.nrc.gov/site-help/e-submittals/getting-started.html*). After a digital ID certificate is obtained and a docket is created, the participant must submit adjudicatory documents in the Portable Document Format. Guidance on submissions is available on the NRC's public website (*https://www.nrc.gov/site-help/electronic-sub-ref-mat.html*). A filing is considered complete at the time the document is submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. ET on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email confirming receipt of the document. The E-Filing system also distributes an email that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed in order to obtain access to the documents via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC's Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public website (*https://www.nrc.gov/site-help/e-submittals.html*), by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., ET, Monday through Friday, except Federal holidays.

Participants who believe that they have good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted in accordance with 10 CFR 2.302(b)–(d). Participants filing adjudicatory documents in this manner are responsible for serving their documents on all other participants. Participants granted an exemption under 10 CFR 2.302(g)(2) must still meet the electronic formatting requirement in 10 CFR 2.302(g)(1), unless the participant also seeks and is granted an exemption from 10 CFR 2.302(g)(1).

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket, which is publicly available on the NRC's public website (*https://ehd.nrc.gov*), unless otherwise excluded pursuant to an order of the presiding officer. If you do not have an NRC-issued digital ID certificate as previously described, click ''cancel'' when the link requests certificates and you will be automatically directed to the NRC's electronic hearing docket where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal privacy information such as social security numbers, home addresses, or personal phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants should not include copyrighted materials in their submission.

For further details with respect to this action, see the application for license amendment dated September 17, 2026, as supplemented by letter dated October 8, 2026 (ADAMS Accession Nos. ML26260A338 and ML26281A182, respectively).

POSTAL REGULATORY COMMISSION

[Docket Nos. K2026–328; MC2027–25 and K2027–26; MC2027–26 and K2027–27]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* November 12, 2026.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *https://www.prc.gov*. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Public Proceeding(s)
III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). The Public Representative does not represent any individual person, entity or particular point of view, and, when Commission attorneys are appointed, no attorney-client relationship is established. Section II also establishes comment deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s) identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041. Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. *See* 39 CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR 3041.405(c)–(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests.

II. Public Proceeding(s)

1. *Docket No(s).:* K2026–328; *Filing Title:* USPS Request Concerning Amendment One to Priority Mail & USPS Ground Advantage Contract 1059 and Materials Under Seal; *Filing Acceptance Date:* November 3, 2026; *Filing Authority:* 39 CFR. 3035.105 and 39 CFR 3041.505; *Public Representative:* Kenneth Moeller; *Comments Due:* November 12, 2026.

2. *Docket No(s).:* MC2027–25 and K2027–26; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 1123 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 3, 2026; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Jennaca Upperman; *Comments Due:* November 12, 2026.

III. Summary Proceeding(s)

1. *Docket No(s).:* MC2027–26 and K2027–27; *Filing Title:* USPS Request to Add New Fulfillment Standardized Distinct Product, PM–GA Contract 1124, and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 3, 2026; *Filing Authority:* 39 U.S.C. 3642 and 3633, 39 CFR 3035.105, and 39 CFR 3041.325.

This Notice will be published in the **Federal Register**.

Danielle LeFlore,

Legal Assistant.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106803; File No. SR–CboeEDGX–2026–074]

Self-Regulatory Organizations; Cboe EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Introduce a Trade by Trade Report for EDGX Options and To Amend Its Fee Schedule To Adopt Fees for the Trade by Trade Report

November 3, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 21, 2026, Cboe EDGX Exchange, Inc. (''Exchange'' or ''EDGX'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[3] and Rule 19b–4(f)(6) thereunder.[4] The Commission is

[1] *See* Docket No. RM2018–3, Order Adopting Final Rules Relating to Non-Public Information, June 27, 2018, Attachment A at 19–22 (Order No. 4679).

[1] 15 U.S.C. 78s(b)(1).

[3] 15 U.S.C. 78s(b)(3)(A)(iii).

[4] 17 CFR 240.19b–4(f)(6).

publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGX Exchange, Inc. (''EDGX'' or the ''Exchange'') proposes to introduce a Trade by Trade report for EDGX Options and to amend its fee schedule to adopt fees for the Trade by Trade report. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Commission's website (*https://www.sec.gov/rules/sro.shtml*), the Exchange's website (*https://www.cboe.com/us/equities/regulation/rule_filings/edgx/*), and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to introduce a Trade by Trade report (''TBT Report'') for its equity options platform (''EDGX Options''), which will be available for purchase by Options Members and non-Options Members, and to amend the EDGX Options fee schedule to adopt fees for the TBT Report, including a free sample. The proposed TBT Report is based on the TBT Report recently adopted by the Exchange's affiliated options exchange, Cboe Exchange, Inc. (''Cboe Options'').[5]

Trade by Trade Report

The TBT Report will provide subscribers with comprehensive trade-by-trade level detail for each options transaction executed on EDGX Options. The TBT Report will be produced and updated at the end of each trading day and be made available to subscribers overnight after midnight Eastern Time (*i.e.,* T+1), ensuring that the data is strictly historical and cannot be used to influence intraday trading decisions.

Specifically, each row in the TBT Report will represent a single trade event and will include transaction time, underlying symbol, Options Symbology Initiative (''OSI'') details (*e.g.,* root, expiry, strike, call/put), trade size, trade price, market context indicators (*e.g.,* National Best Bid/National Best Offer, EDGX Options best bid/best offer), side of the market (*i.e.,* buy or sell), transaction type (opening or closing), and origin (*i.e.,* the Capacity of the order, such as Priority Customer, Professional, broker-dealer, and Market Maker),[6] as well as, for a subscriber that is an Options Member, that Options Member's execution IDs for both Simple Book[7] and Complex Order Book[8] trades, which will better allow for accurate linkage and reconstruction of trading activity.

The Exchange anticipates a wide variety of market participants would purchase the TBT Report, including, but not limited to, individual customers, buy-side investors, and investment banks. The Exchange believes the proposed TBT Report will aid subscribers in performing detailed transaction-level analysis, compliance checks, and historical market reconstruction. The TBT Report may also serve as a foundation for analytics on liquidity, price formation, and trade behavior at a trade-by-trade level. The proposed TBT Report is a completely voluntary product, in that the Exchange is not required by any rule or regulation to make this data available, and potential subscribers are not required to purchase the TBT Report and may do so only if they voluntarily choose to.

Proposed Fees

The Exchange proposes to provide in the EDGX Options fee schedule that firms may purchase the TBT Report on a subscription basis or by ad hoc request for a specified month.[9] The Exchange proposes to assess a monthly fee of $6,000 for subscribing to the TBT Report. The Exchange also proposes to adopt a fee of $4,000 per month for ad hoc requests of the TBT Report. An ad hoc request can be for any number of months for which the data is available, beginning with March 1, 2019.

The Exchange also proposes to offer a free sample consisting of End-of-Day Trade by Trade Historical Data for the period July 1, 2022 through July 31, 2022. The free sample will be available to both Options Members and non-Options Members who have not previously purchased the TBT Report or previously received a free sample. The Exchange believes the proposed free sample will serve as an incentive for new subscribers to start purchasing such data. Particularly, the Exchange believes it will give potential subscribers the ability to evaluate historical options trading data before purchasing the TBT Report. The Exchange notes that Cboe Options is concurrently filing a proposed rule change to adopt the same free sample for its TBT Report. The Exchange also notes that another exchange offers a free trial for new subscribers of a similar data product.[10]

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[11] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[12] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[13] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed fees are consistent with Section 6(b)(4) of the Act,[14] which

[5] *See* Securities Exchange Act Release No. 104415 (December 16, 2025), 90 FR 59603 (December 19, 2025) (SR–CBOE–2025–088); Securities Exchange Act Release No. 104795 (February 10, 2026), 91 FR 6940 (February 13, 2026) (SR–CBOE–2026–010).

[6] The term ''Capacity'' means the capacity in which a User submits an order, which the User specifies by applying the corresponding code to the order. *See* EDGX Rule 16.1.

[7] The term ''Simple Book'' means the Exchange's regular electronic book of orders. *See* Rule 21.20(a).

[8] *See* Rule 21.20(a) (defining the Complex Order Book).

[9] The Exchange proposes to make clear in the fee schedule that a mid-month subscription or an ad hoc historical request for specific dates (*e.g.,* March 17, 2023–March 31, 2023) will be prorated.

[10] *See* Nasdaq ISE, Options 7 Pricing Schedule, Section 10A, Market Data.

[11] 15 U.S.C. 78f(b).

[12] 15 U.S.C. 78f(b)(5).

[13] *Id.*

[14] 15 U.S.C. 78f(b)(4).

requires that the rules of an exchange provide for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities.

In adopting Regulation NMS, the Commission granted self-regulatory organizations (''SROs'') and broker-dealers increased authority and flexibility to offer new and unique market data to the public. It was believed that this authority would expand the amount of data available to consumers, and also spur innovation and competition for the provision of market data. The Exchange believes that the proposed TBT Report would further broaden the availability of U.S. options market data to investors consistent with the principles of Regulation NMS. The proposal also promotes increased transparency through the dissemination of the TBT Report. The proposed rule change would benefit investors by providing access to the TBT Report, which, as noted above, may aid subscribers in performing detailed transaction-level analysis, compliance checks, and historical market reconstruction. The TBT Report may also serve as a foundation for analytics on liquidity, price formation, and trade behavior at a trade-by-trade level. Additionally, trade-by-trade information regarding opening and closing activity across different option series may indicate investor sentiment, which can be helpful trading information. The Exchange emphasizes, however, that such data is not necessary for trading.

The proposed TBT Report is also similar to an existing EDGX Options data product, Open-Close Data. Open-Close Data is a data product that summarizes volume (contracts traded on EDGX Options) by origin (customer and firm orders), original order size, and the opening or closing position of the order, and is available on an end-of-day and intraday basis.[15] While there are some differences between Open-Close Data and the TBT Report (*e.g.,* level of detail and timing of delivery), the products serve similar purposes. Specifically, the TBT Report and Open-Close Data both provide information regarding options trading activity on EDGX Options, which, in turn, may be used by subscribers to create and test trading models and analytical strategies and provide comprehensive insight into trading on the Exchange. The functional differences are the level of granularity at which a subscriber may view executed options transactions and the timeline on which each product is delivered, *i.e.,* on an aggregated, summary level on an end-of-day or intraday basis (Open-Close Data), or, as proposed, on a trade-by-trade level delivered on a T+1 basis (the TBT Report). By offering the TBT Report as well as Open-Close Data, the Exchange will give subscribers an additional choice for historical trade data, and subscribers may choose to purchase the data that best suits their business needs. Given these similarities, and because the TBT Report is substantively identical to the TBT Report offered by Cboe Options,[16] the Exchange believes that the proposal does not present any new or novel issues.

The Exchange believes the proposed fees are reasonable. A subscriber may purchase a subscription to the TBT Report for $6,000 per month, and may purchase the TBT Report on an ad hoc basis for $4,000 per month of data. The Exchange currently assesses a fee of $500 per month for a subscription to Open-Close Data, which is the most comparable data product the Exchange offers, and $400 per month for ad hoc requests of historical Open-Close Data. The Exchange believes the higher proposed fees for the TBT Report are reasonable in light of the substantially greater content of the TBT Report. The TBT Report provides data on a trade-by-trade basis, while Open-Close Data provides data on an aggregated basis. While a subscriber to the TBT Report will not receive data intraday, the subscriber will receive additional data points because the data is not aggregated but covers every trade executed on EDGX Options, including the time, price, size, market context, side, transaction type, and origin of each trade. Further, the relationship between the proposed subscription fee and the proposed ad hoc fee for the TBT Report is consistent with the relationship between the corresponding Open-Close Data fees, in that the ad hoc fee for each product is lower than the subscription fee. The proposed fees are also lower than the fees Cboe Options assesses for its substantively identical TBT Report.[17] Furthermore, setting fees for the TBT Report that are not commensurate with its value relative to established fees for similar data products would simply serve to reduce demand for the Exchange's data product, which, as noted, is entirely optional. If a market participant views Open-Close Data as a more attractive offering for its specific business needs, then such market participant can merely choose to purchase Open-Close Data instead.

The Exchange also believes the proposed fees are reasonable as they would support the introduction of a new market data product that is designed to aid investors by providing further insight into trading on the Exchange. The Exchange believes the proposed fees are equitable and not unfairly discriminatory because they will apply uniformly to all subscribers, whether Options Members or non-Options Members.

The Exchange believes that the proposed free sample for Options Members and non-Options Members who have not previously purchased the TBT Report or previously received a free sample is reasonable because such users would not be subject to fees for End-of-Day Trade by Trade Historical Data for the period July 1, 2022 through July 31, 2022. The proposed free sample is also reasonable as it will give potential subscribers the ability to evaluate historical options trading data prior to purchasing the TBT Report and will therefore encourage and promote new users to purchase the TBT Report. The Exchange believes that the proposed free sample is equitable and not unfairly discriminatory because it will apply equally to all Options Members and non-Options Members who have not previously purchased the TBT Report or previously received a free sample. As noted above, Cboe Options is concurrently proposing the same free sample, and another exchange offers a free trial to new users of a similar data product.[18] Lastly, the purchase of this data product is discretionary and not compulsory.

The Exchange reiterates that the decision whether to purchase the TBT Report is entirely optional for all potential subscribers. No market participant is required to purchase the TBT Report, and the Exchange is not required to make the TBT Report available to all investors. Rather, the Exchange is voluntarily making the TBT Report available, as requested by customers, and market participants may choose to receive (and pay for) this data based on their own business needs. Potential purchasers may request the data at any time if they believe it to be valuable or may decline to purchase such data.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Specifically,

[15] *See* Rule 21.15(b)(6).

[16] *See supra* note 5.

[17] *See supra* note 5.

[18] *See supra* note 10.

the Exchange notes that both Nasdaq PHLX LLC (''PHLX'') and The Nasdaq Stock Market LLC (''Nasdaq'') offer the PHLX Options Trade Outline (''PHOTO'') and Nasdaq Options Trade Outline (''NOTO'') products,[19] respectively, and that Cboe Options offers a substantively identical TBT Report.[20] In this regard, the Exchange believes that its proposal will promote competition by permitting the Exchange to offer a data product similar to those offered by other options exchanges, but that contains more granular data reporting details on a trade-by-trade basis, rather than on an aggregated basis. The Exchange believes the TBT Report represents the type of innovation and competition that Regulation NMS sought to create, and is proposing the TBT Report to keep pace with changes in the industry and evolving customer needs.

The Exchange also does not believe the proposed fees would cause any unnecessary or inappropriate burden on intermarket competition, as other exchanges are free to introduce their own comparable reports with additional data points and lower prices to better compete with the Exchange's offerings. The Exchange operates in a highly competitive environment, and its ability to price the TBT Report is constrained by competition among exchanges that offer similar products. Setting fees that are not commensurate with the value of the TBT Report relative to fees for similar data products would simply serve to reduce demand for the TBT Report, which market participants are under no obligation to purchase. In this competitive environment, potential purchasers are free to choose which, if any, similar product to purchase to satisfy their need for market information. As a result, the Exchange believes this proposed rule change permits fair competition among national securities exchanges.

The Exchange does not believe the proposed rule change would cause any unnecessary or inappropriate burden on intramarket competition. The TBT Report is entirely optional and available to anyone who believes the data will be helpful for their purposes, and the proposed fees apply uniformly to any purchaser, in that the Exchange does not differentiate between the different market participants that may purchase the report, other than through the free sample, which is available on equal terms to all eligible purchasers.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not:

A. significantly affect the protection of investors or the public interest;

B. impose any significant burden on competition; and

C. become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[21] and Rule 19b–4(f)(6)[22] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–CboeEDGX–2026–074 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CboeEDGX–2026–074. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CboeEDGX–2026–074 and should be submitted on or before November 27, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[23]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 36377; File No. 812–15955]

83 Investment Group Income Fund, *et al.*

November 3, 2026.

AGENCY: Securities and Exchange Commission (''Commission'' or ''SEC'').

ACTION: Notice.

Notice of application for an order under sections 17(d) and 57(i) of the Investment Company Act of 1940 (the ''Act'') and rule 17d–1 under the Act to permit certain joint transactions otherwise prohibited by sections 17(d) and 57(a)(4) of the Act and rule 17d–1 under the Act.

Summary of Application: Applicants request an order to permit certain business development companies (''BDCs''), closed-end management investment companies, and open-end

management investment companies to co-invest in portfolio companies with each other and with certain affiliated investment entities.

Applicants: 83 Investment Group Income Fund, Morton Capital Management, LLC, RBE Capital Partners Fund LP and M83 Investment Group, LLC.

Filing Dates: The application was filed on December 16, 2025, and amended on June 11, 2026, and September 18, 2026.

Hearing or Notification of Hearing: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at *Secretarys-Office@sec.gov* and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant Applicant below. The email should include the file number referenced above. Hearing requests should be received by the Commission by 5:30 p.m., Eastern time, on November 30, 2026, and should be accompanied by proof of service on the Applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary at *Secretarys-Office@sec.gov.*

ADDRESSES: The Commission: *Secretarys-Office@sec.gov.* Applicants: Menachem Striks, *mstriks@mortonwealth.com;* Terrence Davis, Esq. and Tanya Boyle, Esq., DLA Piper, LLP, *terrence.davis@us.dlapiper.com* and *tanya.boyle@us.dlapiper.com.*

FOR FURTHER INFORMATION CONTACT: Rachel Loko, Senior Special Counsel, or Laura L. Solomon, Senior Counsel at (202) 551–6720 or *IMOCC@sec.gov* (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: For Applicants' representations, legal analysis, and conditions, please refer to Applicants' second amended application, filed September 18, 2026, which may be obtained via the Commission's website by searching for the file number at the top of this document, or for an Applicant using the Company name search field, on the SEC's EDGAR system. The SEC's EDGAR system may be searched at *https://www.sec.gov/search-filings.* You may also call the SEC's Office of Investor Education and Assistance at (202) 551–8090.

For the Commission, by the Division of Investment Management, under delegated authority.

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106808; File No. SR–NasdaqTX–2026–051]

Self-Regulatory Organizations; Nasdaq Texas, LLC; Notice of Filing and Immediate Effectiveness of a Proposal To Amend Equity 4 To Remove All References to the CORE FIX Order Entry Protocol

November 3, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 22, 2026, Nasdaq Texas, LLC (''Nasdaq Texas'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Equity 4 to remove all references to the CORE FIX order entry protocol.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/nasdaqtx/rulefilings,* and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

In September 2025 the Exchange added CORE FIX to its rulebook in Equity 4, in anticipation of making this new order entry protocol available to Exchange Participants in October of 2025.[3] In December 2025 the Exchange extended the implementation date for CORE FIX to the first quarter of 2026.[4] In March 2026 the Exchange extended the implementation date for CORE FIX to the end of 2026.[5]

In spite of its best efforts, the Exchange has been unable to generate interest in CORE FIX among Exchange Participants. Therefore, rather than deploy an order entry protocol that Participants are not even interested in testing, the Exchange proposes to abandon its plans to deploy CORE FIX.[6] This will allow the Exchange to better allocate its technological development resources. The Exchange notes that it will continue to offer all the order entry protocols that are currently available and operative on the Exchange—namely, OUCH, RASH, FLITE, and FIX.[7]

The Exchange proposes to eliminate all references to CORE FIX that are currently present in Equity 4.[8]

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 103891 (Sept. 5, 2025), 90 FR 43705 (Sept. 10, 2025) (''Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Add the CORE FIX Order Entry Protocol and To Amend Nasdaq BX Equity 4, Rules 4120, 4702, 4703, and 4757'') (File No. SR–BX–2025–017). At the time of that filing, the Exchange was known by the name ''Nasdaq BX.''

[4] *See* Securities Exchange Act Release No. 104291 (Dec. 2, 2025), 90 FR 56218 (Dec. 5, 2025) (''Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend BX Equity 4, Rule 4702(b)(4)(C) To Specify That the 'Time-in-Force' Order Attribute of 'Immediate-or-Cancel' Is Not Available to Post-Only Orders Entered Through the CORE FIX protocol'') (File No. SR–BX–2025–029). At the time of that filing, the Exchange was known by the name ''Nasdaq BX.''

[5] *See* Securities Exchange Act Release No. 105128 (Mar. 31, 2025), 91 FR 17024 (Apr. 3, 2026) (''Notice of Filing and Immediate Effectiveness of a Proposal To Amend the Exchange's Anti-Internalization Functionality in Equity 4, Rule 4757, and To Extend the Implementation Date of the CORE FIX Order Entry Protocol'') (File No. SR–NasdaqTX–2026–012).

[6] The Exchange will also submit, in short order, a separate fee filing to remove references to CORE FIX found in Equity 7 (Pricing Schedule).

[7] *See* Equity 4, Rule 4702(a).

[8] The Exchange notes that its rulebook online, under the headings for Rules 4702, 4703, and 4757, contains the following disclaimer: 'References to ''CORE FIX'' will be implemented in 2026.'

Specifically, these references are found in Rules 4702 (Order Types), 4703 (Order Attributes), and 4757 (Book Processing).[9]

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[10] in general, and furthers the objectives of Section 6(b)(5) of the Act,[11] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The Exchange believes that the proposed rule change is designed to promote just and equitable principles of trade because it will ensure that the Exchange's rulebook accurately reflects the order entry protocols that are available and operative on the Exchange. Removing references to CORE FIX, which the Exchange will not deploy, will avoid confusion among Participants and other market participants regarding the protocols available for order entry. The proposed rule change will not alter the operation of the Exchange's market, the treatment of orders, or the rights or obligations of Participants; the Exchange will continue to offer the OUCH, RASH, FLITE, and FIX protocols. Accordingly, the proposal will remove impediments to and perfect the mechanism of a free and open market and a national market system, and will protect investors and the public interest by providing clear and accurate information concerning the Exchange's order entry protocols.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issue; instead, its purpose is to ensure that the Exchange's rulebook accurately reflects the protocols that are available and operative on the Exchange. Removing references to CORE FIX will not deprive any Participant of an available order entry protocol, because CORE FIX has not been deployed on the Exchange. Participants will continue to be able to choose among the OUCH, RASH, FLITE, and FIX protocols based on their trading needs. Accordingly, the proposal will not impose any burden on competition, either among Exchange Participants or between the Exchange and other trading venues.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[12] and subparagraph (f)(6) of Rule 19b–4 thereunder.[13]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include file number SR–NasdaqTX–2026–051 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NasdaqTX–2026–051. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NasdaqTX–2026–051 and should be submitted on or before November 27, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[14]

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2026–22656 Filed 11–5–26; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106807; File No. SR–NASDAQ–2026–092]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of a Proposal To Amend Equity 4 to Remove All References to the CORE FIX Order Entry Protocol

November 3, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 22, 2026, The Nasdaq Stock Market LLC

However, those are only online disclaimers that the Exchange did not add to its rule text. Those online-only disclaimers will be deleted once the other references to CORE FIX are deleted from the Exchange's rule text, pursuant to this filing.

[9] References to CORE FIX in Equity 4, Rule 4120 (Limit Up-Limit Down Plan and Trading Halts) are being deleted through a separate immediately effective filing that the Exchange filed on October 22, 2026 (File No. SR–NasdaqTX–2026–050). That other filing completely replaces Rule 4120, and the new text of that rule does not contain any references to CORE FIX.

[10] 15 U.S.C. 78f(b).

[11] 15 U.S.C. 78f(b)(5).

[12] 15 U.S.C. 78s(b)(3)(A)(iii).

[13] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[14] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

(''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Equity 4 to remove all references to the CORE FIX order entry protocol.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/nasdaq/rulefilings,* and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

In March 2025 the Exchange added CORE FIX to its rulebook in Equity 4, in anticipation of making this new order entry protocol available to Exchange Participants by the third quarter of 2025.[3] In March 2026 the Exchange extended the implementation date for CORE FIX to the end of 2026.[4]

In spite of its best efforts, the Exchange has been unable to generate interest in CORE FIX among Exchange Participants. Therefore, rather than deploy an order entry protocol that Participants are not even interested in testing, the Exchange proposes to abandon its plans to deploy CORE FIX.[5] This will allow the Exchange to better allocate its technological development resources. The Exchange notes that it will continue to offer all the order entry protocols that are currently available and operative on the Exchange—namely, OUCH, RASH, FLITE, and FIX.[6]

The Exchange proposes to eliminate all references to CORE FIX that are currently present in Equity 4. Specifically, these references are found in Rules 4120 (Limit Up-Limit Down Plan and Trading Halts), 4702 (Order Types), 4703 (Order Attributes), and 4757 (Book Processing).[7]

Finally, the Exchange proposes to use this filing to make a technical correction to Equity 4, Rule 4120(b)(1)(C)(ii)(e)(2). That rule provides that following a regulatory halt pursuant to the Limit Up-Limit Down Mechanism, ''limit-priced orders entered via the OUCH or CORE FIX protocols which are not assigned a Managed Pegging, Discretionary, or Reserve Order Attribute, the order shall be repriced upon entry only if the Price Bands are such that the price of the limit-priced interest to buy (sell) would be above (below) the Upper (Lower) Price Band.'' The reference to CORE FIX in that rule will be deleted as part of this filing. But the Exchange also wishes to correct this rule by adding the FLITE protocol, alongside the OUCH protocol. This is to reflect current Exchange functionality. In other words, the Exchange currently applies this rule to limit-priced orders entered via the OUCH of FLITE protocols, even though the FLITE protocol is not currently included in this rule. The Exchange proposes to correct this oversight in this filing. Therefore, pursuant to this filing, Equity 4, Rule 4120(b)(1)(C)(ii)(e)(2) will state that ''limit-priced orders entered via the OUCH or FLITE protocols which are not assigned a Managed Pegging, Discretionary, or Reserve Order Attribute, the order shall be repriced upon entry only if the Price Bands are such that the price of the limit-priced interest to buy (sell) would be above (below) the Upper (Lower) Price Band.''

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[8] in general, and furthers the objectives of Section 6(b)(5) of the Act,[9] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The Exchange believes that the proposed rule change is designed to promote just and equitable principles of trade because it will ensure that the Exchange's rulebook accurately reflects the order entry protocols that are available and operative on the Exchange. Removing references to CORE FIX, which the Exchange will not deploy, will avoid confusion among Participants and other market participants regarding the protocols available for order entry. The proposed technical correction to Rule 4120(b)(1)(C)(ii)(e)(2) will likewise make the rule text accurately reflect current Exchange functionality by adding the FLITE protocol alongside the OUCH protocol. The proposed rule change will not alter the operation of the Exchange's market, the treatment of orders, or the rights or obligations of Participants; the Exchange will continue to offer the OUCH, RASH, FLITE, and FIX protocols. Accordingly, the proposal will remove impediments to and perfect the mechanism of a free and open market and a national market system, and will protect investors and the public interest by providing clear and accurate information concerning the Exchange's order entry protocols and order handling functionality.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issue; instead, its purpose is to ensure that the Exchange's rulebook accurately reflects the protocols that are available and

[3] *See* Securities Exchange Act Release No. 102661 (Mar. 13, 2025), 90 FR 12858 (Mar. 19, 2025) (''Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Equity 4, Rules 4120, 4702 4703, and 4757'') (File No. SR–NASDAQ–2025–027).

[4] *See* Securities Exchange Act Release No. 105129 (Mar. 31, 2026), 91 FR 17010 (Apr. 3, 2026) (''Notice of Filing and Immediate Effectiveness of a Proposal To Amend the Exchange's Anti-Internalization Functionality in Equity 4, Rule 4757, and To Extend the Implementation Date of the CORE FIX Order Entry Protocol'') (File No. SR–NASDAQ–2026–023).

[5] The Exchange will also submit, in short order, a separate fee filing to remove references to CORE FIX found in Equity 7 (Pricing Schedule).

[6] *See* Equity 4, Rule 4702(a).

[7] Additionally, in a recent filing, the Exchange added to the rule text of Equity 4, Rule 4120, the online rulebook disclaimer that 'References to ''CORE FIX'' will be implemented in 2026.' *See* Securities Exchange Act Release No. 106139 (Aug. 14, 2026), 91 FR 53677 (Aug. 19, 2026) (''Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Equity 4, Rule 4120 Regarding Trading Halts'') (File No. SR–NASDAQ–2026–064). Therefore, as part of this filing, the Exchange proposes to delete this disclaimer in Rule 4120. The same disclaimer is also found at the top of Rules 4702, 4703, and 4757. However, those are only online disclaimers that the Exchange did not add to its rule text. Those online-only disclaimers will be deleted once the other references to CORE FIX are deleted from the Exchange's rule text, pursuant to this filing.

[8] 15 U.S.C. 78f(b).

[9] 15 U.S.C. 78f(b)(5).

operative on the Exchange and the functionality currently provided through those protocols. Removing references to CORE FIX will not deprive any Participant of an available order entry protocol, because CORE FIX has not been deployed on the Exchange. The technical correction adding FLITE to Rule 4120(b)(1)(C)(ii)(e)(2) will not change the functionality available to Participants and will apply equally to all Participants. Participants will continue to be able to choose among the OUCH, RASH, FLITE, and FIX protocols based on their trading needs. Accordingly, the proposal will not impose any burden on competition, either among Exchange Participants or between the Exchange and other trading venues.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act [10] and subparagraph (f)(6) of Rule 19b–4 thereunder.[11]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NASDAQ–2026–092 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NASDAQ–2026–092. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NASDAQ–2026–092 and should be submitted on or before November 27, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[12]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106802; File No. SR–CboeBZX–2026–089]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Introduce a Trade-by-Trade Report for BZX Options and To Amend Its Fee Schedule To Adopt Fees for the Trade-by-Trade Report

November 3, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 21, 2026, Cboe BZX Exchange, Inc. (''Exchange'' or ''BZX'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [3] and Rule 19b–4(f)(6) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (''BZX'' or the ''Exchange'') proposes to introduce a Trade-by-Trade report for BZX Options and to amend its fee schedule to adopt fees for the Trade-by-Trade report. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Commission's website (*https://www.sec.gov/rules/sro.shtml*), the Exchange's website (*https://www.cboe.com/us/equities/regulation/rule_filings/bzx/*), and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to introduce a Trade-by-Trade report (''TBT Report'') for its equity options platform (''BZX Options''), which will be available for purchase by Options Members and non-Options Members, and to amend the

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(iii).

[4] 17 CFR 240.19b–4(f)(6).

BZX Options fee schedule to adopt fees for the TBT Report, including a free sample. The proposed TBT Report is based on the TBT Report recently adopted by the Exchange's affiliated options exchange, Cboe Exchange, Inc. (''Cboe Options'').[5]

Trade-by-Trade Report

The TBT Report will provide subscribers with comprehensive trade-by-trade level detail for each options transaction executed on BZX Options. The TBT Report will be produced and updated at the end of each trading day and be made available to subscribers overnight after midnight Eastern Time (*i.e.,* T+1), ensuring that the data is strictly historical and cannot be used to influence intraday trading decisions.

Specifically, each row in the TBT Report will represent a single trade event and will include transaction time, underlying symbol, Options Symbology Initiative (''OSI'') details (*e.g.,* root, expiry, strike, call/put), trade size, trade price, market context indicators (*e.g.,* National Best Bid/National Best Offer, BZX Options best bid/best offer), side of the market (*i.e.,* buy or sell), transaction type (opening or closing), and origin (*i.e.,* the Capacity of the order, such as Priority Customer, Professional, broker-dealer, and Market-Maker),[6] as well as, for a subscriber that is an Options Member, that Options Member's execution IDs for both Simple Book[7] and Complex Order Book[8] trades, which will better allow for accurate linkage and reconstruction of trading activity.

The Exchange anticipates a wide variety of market participants would purchase the TBT Report, including, but not limited to, individual customers, buy-side investors, and investment banks. The Exchange believes the proposed TBT Report will aid subscribers in performing detailed transaction-level analysis, compliance checks, and historical market reconstruction. The TBT Report may also serve as a foundation for analytics on liquidity, price formation, and trade behavior at a trade-by-trade level. The proposed TBT Report is a completely voluntary product, in that the Exchange is not required by any rule or regulation to make this data available, and potential subscribers are not required to purchase the TBT Report and may do so only if they voluntarily choose to.

Proposed Fees

The Exchange proposes to provide in the BZX Options fee schedule that firms may purchase the TBT Report on a subscription basis or by ad hoc request for a specified month.[9] The Exchange proposes to assess a monthly fee of $6,000 for subscribing to the TBT Report. The Exchange also proposes to adopt a fee of $4,000 per month for ad hoc requests of the TBT Report. An ad hoc request can be for any number of months for which the data is available, beginning with March 1, 2019.

The Exchange also proposes to offer a free sample consisting of End-of-Day Trade by Trade Historical Data for the period July 1, 2022 through July 31, 2022. The free sample will be available to both Options Members and non-Options Members who have not previously purchased the TBT Report or previously received a free sample. The Exchange believes the proposed free sample will serve as an incentive for new subscribers to start purchasing such data. Particularly, the Exchange believes it will give potential subscribers the ability to evaluate historical options trading data before purchasing the TBT Report. The Exchange notes that Cboe Options is concurrently filing a proposed rule change to adopt the same free sample for its TBT Report. The Exchange also notes that another exchange offers a free trial for new subscribers of a similar data product.[10]

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[11] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[12] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[13] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed fees are consistent with Section 6(b)(4) of the Act,[14] which requires that the rules of an exchange provide for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities.

In adopting Regulation NMS, the Commission granted self-regulatory organizations (''SROs'') and broker-dealers increased authority and flexibility to offer new and unique market data to the public. It was believed that this authority would expand the amount of data available to consumers, and also spur innovation and competition for the provision of market data. The Exchange believes that the proposed TBT Report would further broaden the availability of U.S. options market data to investors consistent with the principles of Regulation NMS. The proposal also promotes increased transparency through the dissemination of the TBT Report. The proposed rule change would benefit investors by providing access to the TBT Report, which, as noted above, may aid subscribers in performing detailed transaction-level analysis, compliance checks, and historical market reconstruction. The TBT Report may also serve as a foundation for analytics on liquidity, price formation, and trade behavior at a trade-by-trade level. Additionally, trade-by-trade information regarding opening and closing activity across different option series may indicate investor sentiment, which can be helpful trading information. The Exchange emphasizes, however, that such data is not necessary for trading.

The proposed TBT Report is also similar to an existing BZX Options data product, Open-Close Data. Open-Close Data is a data product that summarizes volume (contracts traded on BZX Options) by origin (customer and firm orders), original order size, and the opening or closing position of the order, and is available on an end-of-day and

[5] *See* Securities Exchange Act Release No. 104415 (December 16, 2025), 90 FR 59603 (December 19, 2025) (SR–CBOE–2025–088); Securities Exchange Act Release No. 104795 (February 10, 2026), 91 FR 6940 (February 13, 2026) (SR–CBOE–2026–010).

[6] The term ''Capacity'' means the capacity in which a User submits an order, which the User specifies by applying the corresponding code to the order. *See* BZX Rule 16.1.

[13] *Id.*

[14] 15 U.S.C. 78f(b)(4).

intraday basis.[15] While there are some differences between Open-Close Data and the TBT Report (*e.g.,* level of detail and timing of delivery), the products serve similar purposes. Specifically, the TBT Report and Open-Close Data both provide information regarding options trading activity on BZX Options, which, in turn, may be used by subscribers to create and test trading models and analytical strategies and provide comprehensive insight into trading on the Exchange. The functional differences are the level of granularity at which a subscriber may view executed options transactions and the timeline on which each product is delivered, *i.e.,* on an aggregated, summary level on an end-of-day or intraday basis (Open-Close Data), or, as proposed, on a trade-by-trade level delivered on a T+1 basis (the TBT Report). By offering the TBT Report as well as Open-Close Data, the Exchange will give subscribers an additional choice for historical trade data, and subscribers may choose to purchase the data that best suits their business needs. Given these similarities, and because the TBT Report is substantively identical to the TBT Report offered by Cboe Options,[16] the Exchange believes that the proposal does not present any new or novel issues.

The Exchange believes the proposed fees are reasonable. A subscriber may purchase a subscription to the TBT Report for $6,000 per month, and may purchase the TBT Report on an ad hoc basis for $4,000 per month of data. The Exchange currently assesses a fee of $500 per month for a subscription to Open-Close Data, which is the most comparable data product the Exchange offers, and $400 per month for ad hoc requests of historical Open-Close Data. The Exchange believes the higher proposed fees for the TBT Report are reasonable in light of the substantially greater content of the TBT Report. The TBT Report provides data on a trade-by-trade basis, while Open-Close Data provides data on an aggregated basis. While a subscriber to the TBT Report will not receive data intraday, the subscriber will receive additional data points because the data is not aggregated but covers every trade executed on BZX Options, including the time, price, size, market context, side, transaction type, and origin of each trade. Further, the relationship between the proposed subscription fee and the proposed ad hoc fee for the TBT Report is consistent with the relationship between the corresponding Open-Close Data fees, in that the ad hoc fee for each product is lower than the subscription fee. The proposed fees are also lower than the fees Cboe Options assesses for its substantively identical TBT Report.[17] Furthermore, setting fees for the TBT Report that are not commensurate with its value relative to established fees for similar data products would simply serve to reduce demand for the Exchange's data product, which, as noted, is entirely optional. If a market participant views Open-Close Data as a more attractive offering for its specific business needs, then such market participant can merely choose to purchase Open-Close Data instead.

The Exchange also believes the proposed fees are reasonable as they would support the introduction of a new market data product that is designed to aid investors by providing further insight into trading on the Exchange. The Exchange believes the proposed fees are equitable and not unfairly discriminatory because they will apply uniformly to all subscribers, whether Options Members or non-Options Members.

The Exchange believes that the proposed free sample for Options Members and non-Options Members who have not previously purchased the TBT Report or previously received a free sample is reasonable because such users would not be subject to fees for End-of-Day Trade by Trade Historical Data for the period July 1, 2022 through July 31, 2022. The proposed free sample is also reasonable as it will give potential subscribers the ability to evaluate historical options trading data prior to purchasing the TBT Report and will therefore encourage and promote new users to purchase the TBT Report. The Exchange believes that the proposed free sample is equitable and not unfairly discriminatory because it will apply equally to all Options Members and non-Options Members who have not previously purchased the TBT Report or previously received a free sample. As noted above, Cboe Options is concurrently proposing the same free sample, and another exchange offers a free trial to new users of a similar data product.[18] Lastly, the purchase of this data product is discretionary and not compulsory.

The Exchange reiterates that the decision whether to purchase the TBT Report is entirely optional for all potential subscribers. No market participant is required to purchase the TBT Report, and the Exchange is not required to make the TBT Report available to all investors. Rather, the Exchange is voluntarily making the TBT Report available, as requested by customers, and market participants may choose to receive (and pay for) this data based on their own business needs. Potential purchasers may request the data at any time if they believe it to be valuable or may decline to purchase such data.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange notes that both Nasdaq PHLX LLC (''PHLX'') and The Nasdaq Stock Market LLC (''Nasdaq'') offer the PHLX Options Trade Outline (''PHOTO'') and Nasdaq Options Trade Outline (''NOTO'') products,[19] respectively, and that Cboe Options offers a substantively identical TBT Report.[20] In this regard, the Exchange believes that its proposal will promote competition by permitting the Exchange to offer a data product similar to those offered by other options exchanges, but that contains more granular data reporting details on a trade-by-trade basis, rather than on an aggregated basis. The Exchange believes the TBT Report represents the type of innovation and competition that Regulation NMS sought to create, and is proposing the TBT Report to keep pace with changes in the industry and evolving customer needs.

The Exchange also does not believe the proposed fees would cause any unnecessary or inappropriate burden on intermarket competition, as other exchanges are free to introduce their own comparable reports with additional data points and lower prices to better compete with the Exchange's offerings. The Exchange operates in a highly competitive environment, and its ability to price the TBT Report is constrained by competition among exchanges that offer similar products. Setting fees that are not commensurate with the value of the TBT Report relative to fees for

[15] *See* Rule 21.15(b)(5).

[16] *See supra* note 5.

[17] *See supra* note 5.

[18] *See supra* note 10.

[19] PHOTO and NOTO include periodic, cumulative data for a particular trading session for a particular option series. Both reports include information regarding the aggregate number of trades to open a position, aggregate number of trades to close a position, and the origin of the trades based on the specific categories of market participants (*i.e.,* customers, broker-dealers, market makers, etc.). *See* Nasdaq PHLX Options—Trade Outline (PHOTO) Intraday, available at: *https://data.nasdaq.com/databases/PHOTO*; *see also* Nasdaq Options Market—Trade Outline (NOTO) Intraday, available at: *https://data.nasdaq.com/databases/NOTOI.*

[20] *See supra* note 5.

similar data products would simply serve to reduce demand for the TBT Report, which market participants are under no obligation to purchase. In this competitive environment, potential purchasers are free to choose which, if any, similar product to purchase to satisfy their need for market information. As a result, the Exchange believes this proposed rule change permits fair competition among national securities exchanges.

The Exchange does not believe the proposed rule change would cause any unnecessary or inappropriate burden on intramarket competition. The TBT Report is entirely optional and available to anyone who believes the data will be helpful for their purposes, and the proposed fees apply uniformly to any purchaser, in that the Exchange does not differentiate between the different market participants that may purchase the report, other than through the free sample, which is available on equal terms to all eligible purchasers.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not:

A. significantly affect the protection of investors or the public interest;

B. impose any significant burden on competition; and

C. become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [21] and Rule 19b–4(f)(6) [22] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include file number SR–CboeBZX–2026–089 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CboeBZX–2026–089. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CboeBZX–2026–089 and should be submitted on or before November 27, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[23]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106800; File No. SR–C2–2026–029]

Self-Regulatory Organizations; Cboe C2 Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Introduce a Trade-by-Trade Report for C2 Options and To Amend Its Fee Schedule To Adopt Fees for the Trade-by-Trade Report

November 3, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 27, 2026, Cboe C2 Exchange, Inc. (''Exchange'' or ''C2'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [3] and Rule 19b–4(f)(6) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe C2 Exchange, Inc. (''C2'' or the ''Exchange'') proposes to introduce a Trade-by-Trade report for C2 Options and to amend its fee schedule to adopt fees for the Trade-by-Trade report. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Commission's website (*https://www.sec.gov/rules/sro.shtml*), the Exchange's website (*https://www.cboe.com/us/options/regulation/rule_filings/ctwo/*), and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(iii).

[4] 17 CFR 240.19b–4(f)(6).

Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to introduce a Trade-by-Trade report (''TBT Report'') for its equity options platform (''C2 Options''), which will be available for purchase by Trading Permit Holders (''TPHs'') and non-TPHs, and to amend the C2 Options fee schedule to adopt fees for the TBT Report, including a free sample. The proposed TBT Report is based on the TBT Report recently adopted by the Exchange's affiliated options exchange, Cboe Exchange, Inc. (''Cboe Options'').[5]

Trade-by-Trade Report

The TBT Report will provide subscribers with comprehensive trade-by-trade level detail for each options transaction executed on C2 Options. The TBT Report will be produced and updated at the end of each trading day and be made available to subscribers overnight after midnight Eastern Time (*i.e.,* T+1), ensuring that the data is strictly historical and cannot be used to influence intraday trading decisions.

Specifically, each row in the TBT Report will represent a single trade event and will include transaction time, underlying symbol, Options Symbology Initiative (''OSI'') details (*e.g.,* root, expiry, strike, call/put), trade size, trade price, market context indicators (*e.g.,* National Best Bid/National Best Offer, C2 Options best bid/best offer), side of the market (*i.e.,* buy or sell), transaction type (opening or closing), and origin (*i.e.,* the Capacity of the order, such as Public Customer, Professional, broker-dealer, and Market-Maker),[6] as well as, for a subscriber that is a TPH, that TPH's execution IDs for both Simple Book[7] and Complex Order Book[8] trades, which will better allow for accurate linkage and reconstruction of trading activity.

The Exchange anticipates a wide variety of market participants would purchase the TBT Report, including, but not limited to, individual customers, buy-side investors, and investment banks. The Exchange believes the proposed TBT Report will aid subscribers in performing detailed transaction-level analysis, compliance checks, and historical market reconstruction. The TBT Report may also serve as a foundation for analytics on liquidity, price formation, and trade behavior at a trade-by-trade level. The proposed TBT Report is a completely voluntary product, in that the Exchange is not required by any rule or regulation to make this data available, and potential subscribers are not required to purchase the TBT Report and may do so only if they voluntarily choose to.

Proposed Fees

The Exchange proposes to provide in the C2 Options fee schedule that firms may purchase the TBT Report on a subscription basis or by ad hoc request for a specified month.[9] The Exchange proposes to assess a monthly fee of $5,000 for subscribing to the TBT Report. The Exchange also proposes to adopt a fee of $3,000 per month for ad hoc requests of the TBT Report. An ad hoc request can be for any number of months for which the data is available, beginning with March 1, 2019.

The Exchange also proposes to offer a free sample consisting of End-of-Day Trade by Trade Historical Data for the period July 1, 2022 through July 31, 2022. The free sample will be available to both TPHs and non-TPHs who have not previously purchased the TBT Report or previously received a free sample. The Exchange believes the proposed free sample will serve as an incentive for new subscribers to start purchasing such data. Particularly, the Exchange believes it will give potential subscribers the ability to evaluate historical options trading data before purchasing the TBT Report. The Exchange notes that Cboe Options is concurrently filing a proposed rule change to adopt the same free sample for its TBT Report. The Exchange also notes that another exchange offers a free trial for new subscribers of a similar data product.[10]

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[11] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[12] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[13] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed fees are consistent with Section 6(b)(4) of the Act,[14] which requires that the rules of an exchange provide for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities.

In adopting Regulation NMS, the Commission granted self-regulatory organizations (''SROs'') and broker-dealers increased authority and flexibility to offer new and unique market data to the public. It was believed that this authority would expand the amount of data available to consumers, and also spur innovation and competition for the provision of market data. The Exchange believes that the proposed TBT Report would further broaden the availability of U.S. options market data to investors consistent with the principles of Regulation NMS. The proposal also promotes increased transparency through the dissemination of the TBT Report. The proposed rule change would benefit investors by providing access to the TBT Report, which, as noted above, may aid subscribers in performing detailed transaction-level analysis, compliance checks, and historical market reconstruction. The TBT Report may also serve as a foundation for analytics on liquidity, price formation, and trade

behavior at a trade-by-trade level. Additionally, trade-by-trade information regarding opening and closing activity across different option series may indicate investor sentiment, which can be helpful trading information. The Exchange emphasizes, however, that such data is not necessary for trading.

The proposed TBT Report is also similar to an existing C2 Options data product, Open-Close Data. Open-Close Data is a data product that summarizes volume (contracts traded on C2 Options) by origin (customer and firm orders), original order size, and the opening or closing position of the order, and is available on an end-of-day and intraday basis.[15] While there are some differences between Open-Close Data and the TBT Report (*e.g.,* level of detail and timing of delivery), the products serve similar purposes. Specifically, the TBT Report and Open-Close Data both provide information regarding options trading activity on C2 Options, which, in turn, may be used by subscribers to create and test trading models and analytical strategies and provide comprehensive insight into trading on the Exchange. The functional differences are the level of granularity at which a subscriber may view executed options transactions and the timeline on which each product is delivered, *i.e.,* on an aggregated, summary level on an end-of-day or intraday basis (Open-Close Data), or, as proposed, on a trade-by-trade level delivered on a T+1 basis (the TBT Report). By offering the TBT Report as well as Open-Close Data, the Exchange will give subscribers an additional choice for historical trade data, and subscribers may choose to purchase the data that best suits their business needs. Given these similarities, and because the TBT Report is substantively identical to the TBT Report offered by Cboe Options,[16] the Exchange believes that the proposal does not present any new or novel issues.

The Exchange believes the proposed fees are reasonable. A subscriber may purchase a subscription to the TBT Report for $5,000 per month, and may purchase the TBT Report on an ad hoc basis for $3,000 per month of data. The Exchange currently assesses a fee of $500 per month for a subscription to Open-Close Data, which is the most comparable data product the Exchange offers, and $400 per month for ad hoc requests of historical Open-Close Data. The Exchange believes the higher proposed fees for the TBT Report are reasonable in light of the substantially greater content of the TBT Report. The TBT Report provides data on a trade-by-trade basis, while Open-Close Data provides data on an aggregated basis. While a subscriber to the TBT Report will not receive data intraday, the subscriber will receive additional data points because the data is not aggregated but covers every trade executed on C2 Options, including the time, price, size, market context, side, transaction type, and origin of each trade. Further, the relationship between the proposed subscription fee and the proposed ad hoc fee for the TBT Report is consistent with the relationship between the corresponding Open-Close Data fees, in that the ad hoc fee for each product is lower than the subscription fee. The proposed fees are also lower than the fees Cboe Options assesses for its substantively identical TBT Report.[17] Furthermore, setting fees for the TBT Report that are not commensurate with its value relative to established fees for similar data products would simply serve to reduce demand for the Exchange's data product, which, as noted, is entirely optional. If a market participant views Open-Close Data as a more attractive offering for its specific business needs, then such market participant can merely choose to purchase Open-Close Data instead.

The Exchange also believes the proposed fees are reasonable as they would support the introduction of a new market data product that is designed to aid investors by providing further insight into trading on the Exchange. The Exchange believes the proposed fees are equitable and not unfairly discriminatory because they will apply uniformly to all subscribers, whether TPHs or non-TPHs.

The Exchange believes that the proposed free sample for TPHs and non-TPHs who have not previously purchased the TBT Report or previously received a free sample is reasonable because such users would not be subject to fees for End-of-Day Trade by Trade Historical Data for the period July 1, 2022 through July 31, 2022. The proposed free sample is also reasonable as it will give potential subscribers the ability to evaluate historical options trading data prior to purchasing the TBT Report and will therefore encourage and promote new users to purchase the TBT Report. The Exchange believes that the proposed free sample is equitable and not unfairly discriminatory because it will apply equally to all TPHs and non-TPHs who have not previously purchased the TBT Report or previously received a free sample. As noted above, Cboe Options is concurrently proposing the same free sample, and another exchange offers a free trial to new users of a similar data product.[18] Lastly, the purchase of this data product is discretionary and not compulsory.

The Exchange reiterates that the decision whether to purchase the TBT Report is entirely optional for all potential subscribers. No market participant is required to purchase the TBT Report, and the Exchange is not required to make the TBT Report available to all investors. Rather, the Exchange is voluntarily making the TBT Report available, as requested by customers, and market participants may choose to receive (and pay for) this data based on their own business needs. Potential purchasers may request the data at any time if they believe it to be valuable or may decline to purchase such data.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange notes that both Nasdaq PHLX LLC (''PHLX'') and The Nasdaq Stock Market LLC (''Nasdaq'') offer the PHLX Options Trade Outline (''PHOTO'') and Nasdaq Options Trade Outline (''NOTO'') products,[19] respectively, and that Cboe Options offers a substantively identical TBT Report.[20] In this regard, the Exchange believes that its proposal will promote competition by permitting the Exchange to offer a data product similar to those offered by other options exchanges, but that contains more granular data reporting details on a trade-by-trade basis, rather than on an aggregated basis. The Exchange believes the TBT Report represents the type of innovation and competition that Regulation NMS sought to create, and is proposing the TBT Report to keep pace with changes

[15] *See* Cboe C2 Fees Schedule, Cboe LiveVol, LLC Market Data Fees, Open-Close Data.

[16] *See supra* note 5.

[17] *See supra* note 5.

[18] *See supra* note 10.

[19] PHOTO and NOTO include periodic, cumulative data for a particular trading session for a particular option series. Both reports include information regarding the aggregate number of trades to open a position, aggregate number of trades to close a position, and the origin of the trades based on the specific categories of market participants (*i.e.,* customers, broker-dealers, market makers, etc.). *See* Nasdaq PHLX Options—Trade Outline (PHOTO) Intraday, available at: *https://data.nasdaq.com/databases/PHOTO; see also* Nasdaq Options Market—Trade Outline (NOTO) Intraday, available at: *https://data.nasdaq.com/databases/NOTOI.*

[20] *See supra* note 5.

in the industry and evolving customer needs.

The Exchange also does not believe the proposed fees would cause any unnecessary or inappropriate burden on intermarket competition, as other exchanges are free to introduce their own comparable reports with additional data points and lower prices to better compete with the Exchange's offerings. The Exchange operates in a highly competitive environment, and its ability to price the TBT Report is constrained by competition among exchanges that offer similar products. Setting fees that are not commensurate with the value of the TBT Report relative to fees for similar data products would simply serve to reduce demand for the TBT Report, which market participants are under no obligation to purchase. In this competitive environment, potential purchasers are free to choose which, if any, similar product to purchase to satisfy their need for market information. As a result, the Exchange believes this proposed rule change permits fair competition among national securities exchanges.

The Exchange does not believe the proposed rule change would cause any unnecessary or inappropriate burden on intramarket competition. The TBT Report is entirely optional and available to anyone who believes the data will be helpful for their purposes, and the proposed fees apply uniformly to any purchaser, in that the Exchange does not differentiate between the different market participants that may purchase the report, other than through the free sample, which is available on equal terms to all eligible purchasers.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Trading Permit Holders or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not:

A. significantly affect the protection of investors or the public interest;

B. impose any significant burden on competition; and

C. become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[21] and Rule 19b–4(f)(6)[22] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–C2–2026–029 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–C2–2026–029. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–C2–2026–029 and should be submitted on or before November 27, 2026.

BILLING CODE 8011–01–P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36958 (Sub-No. 1)]

Wilkes-Barre Terminal Railway Company—Acquisition, Operation and Change of Operator Exemption—Luzerne County Redevelopment Authority and Luzerne County Rail Corporation, and R.J. Corman Railroad Company/Luzerne & Susquehanna Line, LLC

Wilkes-Barre Terminal Railway Company (WBT), a noncarrier, has filed a supplemented and restated verified notice of exemption under 49 CFR 1150.31 to acquire approximately 59.65 miles of rail line (the Line) from the Luzerne County Redevelopment Authority (LCRA) and the operating rights from LCRA's non-operating subsidiary Luzerne County Rail Corporation (LCRC), in Luzerne County, Pa. WBT also seeks authority to terminate the leasehold common carrier operations for the incumbent operator, R.J. Corman Railroad Company/Luzerne & Susquehanna Line, LLC (RJLS), for a portion of the Line that it operates. *See R.J. Corman R.R. Co./Luzerne & Susquehanna Line—Change in Operators, Lease and Operation Exemption—Luzerne and Susquehanna Ry. Co. and Luzerne Cnty. Rail Corp.,* Docket No. FD 36429 (STB served Nov. 6, 2020).[1] The Line consists of the following in-service segments: (1) the Dunmore Secondary Track, between milepost 6.5, at Avoca, Pa., and milepost 10+/− North side Montage Road Crossing, a distance of 4.5 miles;[2] (2) the Avoca Industrial Track, between milepost 1.8, at Number 7 Junction, and milepost 6.5, at Avoca, a distance of 4.7

[23] 17 CFR 200.30–3(a)(12).

[1] WBT previously filed a verified notice of exemption for the acquisition and operation of the Line in Docket No. FD 36958. *See Wilkes-Barre Terminal Ry.—Acquis. & Operation Exemption—Luzerne Cnty. Redevelopment Auth. & Luzerne Cnty. Rail Corp.,* FD 36958 (STB served Oct. 15, 2026). The supplemented and restated verified notice adds the change in operator authority for WBT to replace RJLS as a common carrier on a portion of the Line.

[2] The portion of the Dunmore Secondary Track, between milepost 8.6, at Rocky Glen, Pa., and milepost 10+/− north side Montage Road crossing, a distance of 1.4 miles, is out of service.

miles,[3] including the connection with the track of Reading Blue Mountain & Northern Railroad Company (RBMN) between LB Junction and the switch of the Dunmore Secondary Track, a distance of 0.123 miles, and the Langcliff Connecting Track, between milepost 0.0, at Duryea, Pa., and the connection with Norfolk Southern Railway in the middle of York Avenue, at milepost 0.867, a distance of 0.867 miles; (3) the Suscon Industrial Track, between milepost 154.5, at Suscon, Pa., and milepost 158.7, at Hillside, Pa., a distance of 4.2 miles; (4) the Wilkes-Barre Secondary, between milepost 169.2, at Ashley, Pa., and milepost 185.5, at Pittston, Pa., a distance of 16.3 miles; (5) the GWBP Industrial Track, between milepost 0.0, at Ashley, and milepost 0.5, at Hanover Industrial Track, a distance of 0.5 miles; (6) the Brownsville Industrial Track, between milepost 0.0, at Hillside, and milepost 1.0, at Brownsville, Pa., a distance of 1.0 miles; (7) the Wilkes-Barre Industrial Track, between milepost 59.9, at Ferry Street, and milepost 62.9, at Wilkes-Barre, Pa., a distance of 3.0 miles; (8) the Kingston Industrial Track, between milepost 142.7, at Pittston Junction, and Railroad Station 8594+58, a distance of 8.1 miles; (9) the D&H Wilkes-Barre Connector, from milepost A–208.08, Hudson Yard, to Conyngham Avenue, City of Wilkes-Barre, Pa., a distance of 2.5 miles; and (10) the APC line, between milepost 0.0 and 0.6 in Wilkes-Barre, a distance of 0.6 miles.

The Line consists of the following out-of-service segments: (1) the West Pittston Running Track, between milepost 0.0, at West Pittston, Pa., and milepost 3.0, at Harding, Pa., a distance of 3.0 miles, and between milepost 186.4, at West Pittston, and milepost 190.2, at Wyoming, Pa., a distance of 3.8 miles, and between milepost 194.2, at Wyoming, and milepost 194.4, in Kingston, Pa., a distance of 0.2 miles; (2) the Nanticoke Industrial Track, between milepost 0.0, at Ashley, and milepost 2.6 at Central Scrap, a distance of 2.6 miles; (3) the Harry E. Breaker Spur, between milepost 0.1, at Maltby Junction, and milepost 0.5, a distance of 0.4 miles; (4) the Miner's Mills Industrial Track, between milepost 173.6, at North Wilkes-Barre, and milepost 176.1, at Hudson, Pa., a distance of 2.5 miles; and (5) the Pettibone Branch, between milepost 0.0 and milepost 0.759, at Dorranceton, Pa., a distance of 0.759 miles.[4]

According to the supplemented and restated verified notice, WBT will enter into an agreement with LCRA and LCRC for the acquisition of the Line and operating rights to ensure continued rail service to customers. WBT states that RJLS is currently the common carrier operator for approximately 41.19 miles of the Line pursuant to a lease that has expired. According to the supplemented and restated verified notice, RJLS will be replaced as the common carrier operator, and RJLS's common carrier status over the 41.9-mile portion will terminate.

According to the supplemented and restated verified notice, WBT will grant local trackage rights to RBMN to provide immediate rail service to customers on the Line following the expiration of the incumbent operator's lease. *See Reading Blue Mountain & Northern R.R.—Trackage Rights Exemption—Wilkes-Barre Terminal Ry.,* Docket No. FD 36959 (STB served Oct. 15, 2026), (authorizing RBMN to acquire local trackage rights over the in-service segments of the Line).[5]

According to WBT, the proposed transaction does not contain an interchange commitment. WBT certifies that its projected annual revenues resulting from the transaction will not exceed $5 million and will not result in WBT's becoming a Class I or Class II rail carrier.

Under 49 CFR 1150.32(b), a change in operator requires that notice be given to shippers. WBT certifies that it has contacted all customers on the Lines to advise them of the planned change in operators.[6] WBT also certifies that it conferred with RJLS concerning the termination of RJLS's common carrier status and that RJLS consents to the change of operator arrangement.

The earliest this transaction may be consummated is November 22, 2026, the effective date of the exemption (30 days after the verified notice was filed).

If the verified notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed no later than November 13, 2026 (at least seven days before the exemption becomes effective).

All pleadings, referring to Docket No. FD 36958 (Sub-No. 1), must be filed with the Surface Transportation Board either via e-filing on the Board's website or in writing addressed to 395 E Street SW, Washington, DC 20423–0001. In addition, a copy of each pleading must be served on WBT's representative, Justin J. Marks, Clark Hill PLC., 601 13th Street NW, Suite 600, Washington, DC 20005.

According to WBT, this action is categorically excluded from environmental review under 49 CFR 1105.6(c) and from historic preservation reporting requirements under 49 CFR 1105.8(b).

Board decisions and notices are available at *www.stb.gov.*

Decided: November 3, 2026.

By the Board, Anika S. Cooper, Chief Counsel, Office of Chief Counsel.

Stefan Rice,

Clearance Clerk.

[FR Doc. 2026–22666 Filed 11–5–26; 8:45 am]

BILLING CODE 4915–01–P

[3] The portion of the Avoca Industrial Track, between milepost 1.8, at Number 7 Junction, and milepost 4, at Rock Street, a distance of 2.2 miles, is out of service.

[4] According to the verified notice, the out-of-service segments are included as part of the proposed transaction because WBT has found no regulatory history to suggest that these segments have been abandoned. WBT states that, although these segments are unlikely to be placed back into active service, WBT recognizes that it will have a common carrier obligation over the out-of-service segments.

[5] Upon consummation of its acquisition authority in this docket, WBT will become a Class III rail carrier. The trackage rights authority in Docket No. FD 36959 cannot be consummated until WBT has exercised its acquisition authority.

[6] WBT also states in its verified notice that it served each affected customer with a copy of the verified notice.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No: FAA–2026–13267]

Deadline for Submitting Intent To Use Airport Improvement Program (AIP) Apportioned Funds for Fiscal Year (FY) 2027

AGENCY: Federal Aviation Administration (FAA), U.S. Department of Transportation.

ACTION: Notice.

SUMMARY: Title 49 U.S.C. 47105(f) provides that every sponsor of an airport for which AIP funds are apportioned shall notify the Secretary, by such time and in a form prescribed by the Secretary, of its intent to submit a grant application for its available entitlement funds. This notice establishes the annual national deadline and requirements for every airport sponsor to signal their intent to submit applications for FY 2027 AIP entitlement funds. This is necessary to ensure the FAA has sufficient time to convert and carry over (protect) undeclared apportionment funds.

FOR FURTHER INFORMATION CONTACT: Airports AIP Program Branch, at *9-ASE-ARP-AIP-Airports@faa.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to 49 U.S.C. 47105(f), each airport sponsor receiving apportioned funds must inform the Secretary of its intention to apply for these funds, including any unused funds from previous years (protected carryover). Each airport sponsor must submit notifications for each airport receiving an entitlement amount to their FAA Regional Airports Division/Airports District Office by the national deadline of February 26, 2027. This notification is essential for the efficient planning and management of the AIP. The FAA will carry over and protect any undeclared apportioned funds after this date. Undeclared apportioned funds will be unavailable to the sponsor until the next fiscal year.

The notification must be in writing and include the total amount planned for eligible projects during the FY and confirmation of which projects listed in their Capital Improvement Plans for the current FY will proceed.

State aviation agencies in the FAA's State Block Grant Program must also notify the FAA by this date, with information consistent with the latest Memorandum of Agreement. This should include a plan for both entitlement and state apportionment funds.

Funds from previous FYs that are still available may not be immediately accessible to sponsors when the FAA initiates the AIP for a new fiscal year. The FAA can only issue grants when sufficient funds are appropriated.

Airport sponsors must submit applications for entitlement-only grants on or before April 30, 2027. These applications should be based on construction bids (or negotiated agreements) but may be based on estimates. Final bid dates should be coordinated with your local Region or Airport District Office (ADO), as appropriate, to ensure all grants can be issued based on bids. The submitted applications must comply with statutory pre-grant requirements, including the National Environmental Policy Act and Buy American requirements. If you are unable to meet the required dates, please contact your ADO.

Issued in Washington, DC, on October 29, 2026.

William C. Garrison,

Director, Office of Airport Planning and Programming,

[FR Doc. 2026–22651 Filed 11–5–26; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent of Waiver With Respect to Land; Watertown Regional Airport, Watertown, South Dakota

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice.

SUMMARY: The FAA is considering a proposal to change approximately 4.99 acres of airport land from aeronautical use to non-aeronautical use and to authorize the sale of airport property located at the Watertown Regional Airport, Watertown, SD. The aforementioned land is not needed for aeronautical use. The subject property is made up of two parcels of airport property known as the Lot 4 (2.0 acres) and Dakota Tube (2.99 acres) parcels. These parcels are located north of the airport, along the east side of Airport Drive. Both properties are currently being used for industrial purposes and will continue to be used for the same purpose in the future.

DATES: Comments must be received on or before December 7, 2026.

ADDRESSES: All requisite and supporting documentation will be made available for review by appointment at the FAA Dakota-Minnesota Airports District Office, David Ferrell, Program Manager, 2301 University Drive, Building 23B, Bismarck, ND 58504, Telephone: (701) 323–7380.

Written comments on the Sponsor's request may be submitted using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov* and follow the instructions for sending your comments electronically.
- *Mail:* David Ferrell, Program Manager, Federal Aviation Administration, Dakota-Minnesota Airports District Office, 2301 University Drive, Building 23B, Bismarck, ND 58504.
- *Hand Delivery:* Deliver to mail address above between 8 a.m. and 4 p.m. Monday through Friday, excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: David Ferrell, Program Manager, Federal Aviation Administration, Dakota-Minnesota Airports District Office, 2301 University Drive, Building 23B, Bismarck, ND 58504. Telephone: (701) 323–7380.

SUPPLEMENTARY INFORMATION: In accordance with section 47107(h) of Title 49, United States Code, this notice is required to be published in the **Federal Register** 30 days before modifying the land-use assurance that requires the property to be used for an aeronautical purpose.

On November 4, 1947, the United States of America, acting by and through the War Assets Administrator, transferred the subject properties to the City of Watertown via quitclaim deed as surplus property. The properties are not needed for aeronautical purposes and are currently being used for commercial industrial purposes. They will continue to be used for commercial industrial purposes after the proposed sale of the properties. The Airport Sponsor will receive fair market value for the sale of the subject properties.

The disposition of proceeds from the sale of this airport property will be in accordance with sections 47125 and 47151 of Title 49, United States Code and 14 CFR part 155, Release of Airport Property From Surplus Property Disposal Restrictions.

This notice announces that the FAA is considering the release of the subject airport property at the Watertown Regional Airport, Watertown, SD, from federal land covenants, subject to a reservation for continuing right of flight as well as restrictions on the released property as required in FAA Order 5190.6C, section 22.13. Approval does not constitute a commitment by the FAA to financially assist in the disposal of the subject airport property nor a determination of eligibility for grant-in-aid funding from the FAA.

Property Descriptions

Plat of Lot 4 of Airport Industrial Addition to the Municipality of Watertown, South Dakota, Located in the South Half of Section 23—T117N–R53W of the 5th PM, Codington County, South Dakota.

Plat of Dakota Tube Airport Industrial Addition to the Municipality of Watertown, Located in the South half of Section 23—T117N–R53W, Codington County, South Dakota.

Issued in Minneapolis, Minnesota, on October 26, 2026.

E. Lindsay Terry,

Manager, Dakota-Minnesota Airports District Office, FAA, Great Lakes Region.

Maritime Administration

[Docket No. MARAD–2026–1784]

Request Notice: Use of Foreign-Built Small Passenger Vessel in United States Coastwise Trade, M/V JULIANA

AGENCY: Maritime Administration (MARAD), U.S. Department of Transportation (DOT).

ACTION: Notice and request for comments.

SUMMARY: The Secretary of Transportation, as represented by MARAD, is authorized to make determinations regarding the coastwise use of foreign built; certain U.S. built; and U.S. and foreign rebuilt vessels that solely carry no more than twelve passengers for hire. MARAD has received such a determination request and is publishing this notice to solicit comments to assist with determining whether the proposed use of the vessel set forth in the request would have an adverse effect on U.S. vessel builders or U.S. coastwise trade businesses that use U.S.-built vessels in those businesses. Information about the requestor's vessel, including a description of the proposed service, is in the **SUPPLEMENTARY INFORMATION** section below.

DATES: Submit comments on or before December 7, 2026.

ADDRESSES: You may submit comments identified by DOT Docket Number MARAD–2026–1784 by any one of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov.* Search the above DOT Docket Number and follow the instructions for submitting comments.
- *Mail or Hand Delivery:* Docket Management Facility is in the West Building, Ground Floor of the U.S. Department of Transportation. The Docket Management Facility location address is U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays.

Note: If you mail or hand-deliver your comments, we recommend that you include the DOT Docket Number, your name and a mailing address, an email address or a telephone number in the body of your document so that we can contact you if we have questions regarding your submission.

Instructions: All submissions received must include the agency name and specific DOT Docket Number. All comments received will be posted without change to the docket at *www.regulations.gov,* including any personal information provided. For detailed instructions on submitting comments, or to submit comments that are confidential in nature, see the section entitled Public Participation.

FOR FURTHER INFORMATION CONTACT: Ye Tian, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE, Mail Stop 2, MAR–620, Washington, DC 20590. Telephone: (202) 366–5400. Email: *smallvessels@dot.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to 46 U.S.C. 12121(b), the U.S. Coast Guard may issue a certificate of documentation with a coastwise trade endorsement for eligible, small passenger vessels authorized to carry no more than 12 passengers for hire if MARAD, after notice and an opportunity for public comment, determines the use of the small passenger vessel in the coastwise trade will not adversely affect United States vessel builders or the coastwise trade business of any person that employs vessels built in the United States in that business.[1]

MARAD has received an eligibility determination request. Further details about the requester's vessel and its proposed operations may be found in the determination request posted in the DOT Docket Number listed in the **ADDRESSES** section above at *https://www.regulations.gov.* Interested parties may comment on the undue adverse effect this action may have on U.S. vessel builders or coastwise trade businesses in the U.S. that employ U.S.-built vessels in those businesses. Comments should refer to the vessel name, state the commenter's interest in the request, and demonstrate, with supporting documentation, the undue adverse effect on U.S. vessel builders and coastwise trade businesses.

Public Participation

How do I submit comments?

Please submit comments, including the attachments, following the instructions provided under the above heading entitled **ADDRESSES**. It may take a few hours or even days for comments to be reflected on the docket. Comments must be written in English. Provide concise comments and attach additional documents as necessary. There is no limit on the length of the attachments.

Where do I go to read public comments, and find supporting information?

The docket online is located at *https://www.regulations.gov,* keyword search the DOT Docket Number list in the **ADDRESSES** section above or visit the Docket Management Facility (see **ADDRESSES** for hours of operation). Please periodically check the Docket for new submissions and supporting material.

Will my comments be made available to the public?

Yes. Your entire comment, including your personal identifying information, will be made publicly available.

May I submit comments confidentially?

You may request that MARAD treat your comments as commercially confidential by submitting them to *SmallVessels@dot.gov.* Include in the email subject heading ''Contains Confidential Commercial Information'' or ''Contains CCI'' and state in your submission, with specificity, the basis for any such confidential treatment highlighting the CCI portions. If possible, please provide a summary of your submission that can be made available to the public.

If MARAD receives a Freedom of Information Act (FOIA) request for the information, procedures described in the Department's FOIA regulation at 49 CFR 7.29 will be followed. Only information that is ultimately determined to be confidential under those procedures will be exempt from disclosure under FOIA.

Privacy Act

Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). For information on DOT's compliance with the Privacy Act, please visit *https://www.transportation.gov/privacy.*

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD–2026–1750]

Request Notice: Use of Foreign-Built Small Passenger Vessel in United States Coastwise Trade, M/V ISLAND VIBEZ

AGENCY: Maritime Administration (MARAD), U.S. Department of Transportation (DOT).

ACTION: Notice and request for comments.

SUMMARY: The Secretary of Transportation, as represented by MARAD, is authorized to make determinations regarding the coastwise use of foreign built; certain U.S. built; and U.S. and foreign rebuilt vessels that solely carry no more than twelve passengers for hire. MARAD has received such a determination request and is publishing this notice to solicit comments to assist with determining whether the proposed use of the vessel set forth in the request would have an adverse effect on U.S. vessel builders or U.S. coastwise trade businesses that use U.S.-built vessels in those businesses. Information about the requestor's vessel, including a description of the proposed service, is in the **SUPPLEMENTARY INFORMATION** section below.

DATES: Submit comments on or before December 7, 2026.

ADDRESSES: You may submit comments identified by DOT Docket Number MARAD–2026–1750 by any one of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov.* Search the above DOT Docket Number and follow the instructions for submitting comments.
- *Mail or Hand Delivery:* Docket Management Facility is in the West Building, Ground Floor of the U.S. Department of Transportation. The Docket Management Facility location address is U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays.

Note: If you mail or hand-deliver your comments, we recommend that you include the DOT Docket Number, your name and a mailing address, an email address or a telephone number in the body of your document so that we can contact you if we have questions regarding your submission.

Instructions: All submissions received must include the agency name and specific DOT Docket Number. All comments received will be posted without change to the docket at *www.regulations.gov,* including any personal information provided. For detailed instructions on submitting comments, or to submit comments that are confidential in nature, see the section entitled Public Participation.

FOR FURTHER INFORMATION CONTACT: Ye Tian, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE, Mail Stop 2, MAR–620, Washington, DC 20590. Telephone: (202) 366–5400. Email: *smallvessels@dot.gov*

SUPPLEMENTARY INFORMATION: Pursuant to 46 U.S.C. 12121(b), the U.S. Coast Guard may issue a certificate of documentation with a coastwise trade endorsement for eligible, small passenger vessels authorized to carry no more than 12 passengers for hire if MARAD, after notice and an opportunity for public comment, determines the use of the small passenger vessel in the coastwise trade will not adversely affect United States vessel builders or the coastwise trade business of any person that employs vessels built in the United States in that business.[1]

MARAD has received an eligibility determination request. Further details about the requester's vessel and its proposed operations may be found in the determination request posted in the DOT Docket Number listed in the **ADDRESSES** section above at *https://www.regulations.gov.* Interested parties may comment on the undue adverse effect this action may have on U.S. vessel builders or coastwise trade businesses in the U.S. that employ U.S.-built vessels in those businesses. Comments should refer to the vessel name, state the commenter's interest in the request, and demonstrate, with supporting documentation, the undue adverse effect on U.S. vessel builders and coastwise trade businesses.

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD–2026–1816]

Request for Comments on the Renewal of a Previously Approved Information Collection: Generic Clearance of Customer Satisfaction Surveys

AGENCY: Maritime Administration (MARAD), U.S. Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: MARAD invites public comments on its intention to request Office of Management and Budget (OMB) approval to renew an information collection in accordance with the Paperwork Reduction Act of 1995. The proposed collection OMB 2133–0546 (Generic Clearance of Customer Satisfaction Surveys) is used to obtain feedback about customer service delivery. MARAD is required to publish this notice in the **Federal Register** to obtain comments from the public and affected agencies.

ADDRESSES: Written comments and recommendations for the proposed information collections should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Tamelia Bolton, 202–366–4623, Office of Management and Administrative Services, Maritime Administration, Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590, Email: *Tamelia.Bolton@dot.gov.*

SUPPLEMENTARY INFORMATION:

Title: Generic Clearance of Customer Satisfaction Surveys.

OMB Control Number: 2133–0546.

Type of Request: Extension without change of currently approved information collection.

Abstract: OMB 2133–0546 (Generic Clearance Customer Satisfaction Surveys) enables MARAD to garner customer and stakeholder feedback in an efficient and timely manner, in accordance with our commitment to improve service delivery. The collected information ensures that users have an effective, efficient, and satisfying experience with the agency's programs. This feedback also provides insight into customer or stakeholder perceptions, identifies issues with service delivery, and focuses attention on areas where communication, training, and/or changes in operations might improve customer service experience. Additionally, this collection will facilitate ongoing, collaborative, and actionable communication between MARAD and its customers and stakeholders. Public feedback is also expected to contribute directly to the improvement of program operations that directly affect the public.

Respondents: Individuals and households, business and organizations, State, local or Tribal government.

Estimated Number of Respondents: 5,900.

Estimated Number of Responses: 5,900.

Annual Estimated Total Annual Burden Hours: 1,758.

Frequency of Response: per request.

A 60-day **Federal Register** Notice soliciting comments on this information collection was published on September 3, 2026 (91 FR 56719). The posting received one non-substantive comment that the publication dates for the 60-day **Federal Register** Notice were incorrect. However, MARAD reviewed and verified the publication date for the **Federal Register** Notice and notified the commenter that no correction was needed.

(Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.49.)

By Order of the Maritime Administrator.

T. Mitchell Hudson, Jr.

Secretary, Maritime Administration.

BILLING CODE 4910–81–P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD–2026–1783]

Request Notice: Use of Foreign-built Small Passenger Vessel in United States Coastwise Trade, M/V NIUHI 2

AGENCY: Maritime Administration (MARAD), U.S. Department of Transportation (DOT).

ACTION: Notice and request for comments.

SUMMARY: The Secretary of Transportation, as represented by MARAD, is authorized to make determinations regarding the coastwise use of foreign built; certain U.S. built; and U.S. and foreign rebuilt vessels that solely carry no more than twelve passengers for hire. MARAD has received such a determination request and is publishing this notice to solicit comments to assist with determining whether the proposed use of the vessel set forth in the request would have an adverse effect on U.S. vessel builders or U.S. coastwise trade businesses that use U.S.-built vessels in those businesses. Information about the requestor's vessel, including a description of the proposed service, is in the **SUPPLEMENTARY INFORMATION** section below.

DATES: Submit comments on or before December 7, 2026.

ADDRESSES: You may submit comments identified by DOT Docket Number MARAD–2026–1783 by any one of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov.* Search the above DOT Docket Number and follow the instructions for submitting comments.
- *Mail or Hand Delivery:* Docket Management Facility is in the West Building, Ground Floor of the U.S. Department of Transportation. The Docket Management Facility location address is U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays.

Note: If you mail or hand-deliver your comments, we recommend that you include the DOT Docket Number, your name and a mailing address, an email address or a telephone number in the body of your document so that we can contact you if we have questions regarding your submission.

Instructions: All submissions received must include the agency name and specific DOT Docket Number. All comments received will be posted without change to the docket at *www.regulations.gov,* including any personal information provided. For detailed instructions on submitting comments, or to submit comments that are confidential in nature, see the section entitled Public Participation.

FOR FURTHER INFORMATION CONTACT: Ye Tian, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE, Mail Stop 2, MAR–620, Washington, DC 20590. Telephone: (202) 366–5400. Email: *smallvessels@dot.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to 46 U.S.C. 12121(b), the U.S. Coast Guard may issue a certificate of documentation with a coastwise trade endorsement for eligible, small passenger vessels authorized to carry no more than 12 passengers for hire if MARAD, after notice and an opportunity for public comment, determines the use of the small passenger vessel in the coastwise trade

will not adversely affect United States vessel builders or the coastwise trade business of any person that employs vessels built in the United States in that business.[1]

MARAD has received an eligibility determination request. Further details about the requester's vessel and its proposed operations may be found in the determination request posted in the DOT Docket Number listed in the **ADDRESSES** section above at *https://www.regulations.gov.* Interested parties may comment on the undue adverse effect this action may have on U.S. vessel builders or coastwise trade businesses in the U.S. that employ U.S.-built vessels in those businesses. Comments should refer to the vessel name, state the commenter's interest in the request, and demonstrate, with supporting documentation, the undue adverse effect on U.S. vessel builders and coastwise trade businesses.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Agency Information Collection Activities; Comment Request Concerning Procedures for Requesting Competent Authority Assistance Under Tax Treaties

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of information collection; request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the IRS is inviting comments on the information collection request outlined in this notice.

DATES: Written comments should be received on or before January 5, 2027 to be assured of consideration.

ADDRESSES: Direct all written comments to Andres Garcia, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224, or by email to *pra.comments@irs.gov.* Include ''OMB Control No. 1545–2044'' in the subject line of the message.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of this collection should be directed to Jason Schoonmaker, (801) 620–6008.

SUPPLEMENTARY INFORMATION: The IRS, in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the IRS assess the impact and minimize the burden of its information collection requirements. Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record, and viewable on relevant websites. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Title: Procedures for Requesting Competent Authority Assistance Under Tax Treaties.

OMB Control Number: 1545–2044.

Regulation: Revenue Procedure 2015–40.

Abstract: Taxpayers who believe that the actions of the United States, a treaty country, or both, result or will result in taxation that is contrary to the provisions of an applicable tax treaty are required to submit the requested information in order to received assistance from the IRS official acting as the U.S. competent authority. The information is used to assist the taxpayer in reaching a mutual agreement with the IRS and the appropriate foreign competent authority.

Current Actions: There is no change to the previously approved information collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or households, business or other for-profit organizations.

Estimated Number of Responses: 280.

Estimated Time per Response: 30 hours.

Estimated Total Annual Burden Hours: 8,400.

Dated: November 4, 2026.

Jason M. Schoonmaker,

Tax Analyst.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Agency Information Collection Activities; Requesting Comment Notice of Taxpayer Statement Regarding Refund

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of information collection; request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the IRS is inviting comments on the information collection request outlined in this notice.

DATES: Written comments should be received on or before January 5, 2027 to be assured of consideration.

ADDRESSES: Direct all written comments to Andres Garcia, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224, or by email to *pra.comments@irs.gov.* Include ''OMB Control No. 1545–1384'' in the subject line of the message.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of this collection should be directed to Jason Schoonmaker, (801) 620–6008.

SUPPLEMENTARY INFORMATION: The IRS, in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the IRS assess the impact and minimize the burden of its information collection requirements. Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record, and viewable on relevant websites. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Title: Taxpayer Statement Regarding Refund.

OMB Control Number: 1545–1384.

Form Number: 3911.

Abstract: Form 3911 is used by taxpayers to notify the IRS that a tax refund previously claimed has not been received. The form is normally completed by the taxpayer as the result of an inquiry in which the taxpayer claims non-receipt, loss, theft, or destruction of a tax refund and IRS research shows that the refund has been issued. The information on the form is needed to clearly identify the refund to be traced.

Current Actions: There is no change to the previously approved information collection. However, the time burden has been recalculated for a better estimate.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or households, business or other for-profit organizations, and not-for-profit institutions.

Estimated Number of Responses: 200,000.

Estimated Time per Response: 13 minutes.

Estimated Total Annual Burden Hours: 46,000.

Dated: November 3, 2026.

Jason M. Schoonmaker,

Tax Analyst.

BILLING CODE 4831–GV–P

FEDERAL REGISTER

Vol. 91 Friday,
No. 214 November 6, 2026

Part II

Environmental Protection Agency

40 CFR Part 52
Air Plan Approval; California; Revised Format for Materials Incorporated by Reference; Final Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2024–0527; FRL–13582–01–R9]

Air Plan Approval; California; Revised Format for Materials Incorporated by Reference

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; administrative change.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is revising the format for materials submitted by the State of California that are incorporated by reference into the California State Implementation Plan (SIP). The regulations and other materials affected by this format change have all been previously submitted by the State of California and approved by the EPA. This format revision will primarily affect the ''Identification of plan—in part'' sections, as well as the format of the SIP materials that will be available for public inspection at the EPA Regional Office and the National Archives and Records Administration (NARA). This action, which only relates to rules applicable within six California air districts, is the fifth and final of a series of actions intended to change the format for the entire California SIP.

DATES: This rule is effective on November 6, 2026.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R09–OAR–2024–0527. SIP materials which are incorporated by reference into 40 CFR part 52 are available for inspection by appointment at Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901. For information on the availability of this material at the EPA Regional Office, please contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document.

FOR FURTHER INFORMATION CONTACT: Doris Lo, EPA Region IX, 75 Hawthorne St., San Francisco, CA; telephone number: (415) 972–3959; email address: *lo.doris@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, the terms ''we'', ''us,'' and ''our'' refer to the EPA. This **SUPPLEMENTARY INFORMATION** section is organized as follows:

Table of Contents

I. Background
A. Description of a SIP
B. How the EPA Enforces SIPs
C. How the State and the EPA Update the SIP
D. How the EPA Compiles the SIPs
E. How the EPA Organizes the SIP Compilation
F. Where You Can Find a Copy of the SIP Compilation
G. The Format of the California Identification of Plan Sections
H. When a SIP Revision Becomes Federally Enforceable
I. The Historical Record of SIP Revision Approvals
II. What the EPA Is Doing in This Action
III. Incorporation by Reference
IV. Statutory and Executive Order Reviews

I. Background

A. Description of a SIP

Each State has a SIP containing, among other things, the control measures and strategies used to attain and maintain the national ambient air quality standards (NAAQS). The SIP is extensive, containing such elements as air pollution control regulations, emission inventories, monitoring networks, attainment demonstrations, and enforcement mechanisms.

B. How the EPA Enforces SIPs

Each State must formally adopt the control measures and strategies to attain and maintain the NAAQS after the public has had an opportunity to comment on them. They are then submitted to the EPA as requested SIP revisions upon which the EPA must formally act. Once these control measures and strategies are approved by the EPA, after notice and comment rulemaking, they are incorporated into the federally approved SIP and are identified in part 52 (Approval and Promulgation of Implementation Plans), title 40 of the Code of Federal Regulations (40 CFR part 52). The EPA uses the process of incorporation by reference (IBR) to incorporate material into the CFR by referencing the original document(s) without publishing the full text of the material. The actual State regulations approved by the EPA are not reproduced in their entirety in 40 CFR part 52 but are ''incorporated by reference,'' which means that the EPA has approved a given State regulation with a specific effective date. This format allows both the EPA and the public to know which measures are contained in a given SIP and to help determine whether the State is enforcing the regulations. This format also assists the EPA and the public in taking enforcement action, should a State not enforce its SIP-approved regulations.

C. How the State and the EPA Update the SIP

The SIP is a dynamic document, which the State can revise as necessary to address the unique air pollution problems in the State. Therefore, the EPA must periodically take action on State SIP revisions containing new and/or revised regulations and other materials in order to make them part of the federally-approved SIP. The EPA establishes a docket for its actions using a unique Docket Identification Number, which is listed in each action. These dockets and the complete submissions are available for viewing on *http://www.regulations.gov.*

On May 22, 1997 (62 FR 27968), the EPA revised the formatting procedures for incorporating by reference federally-approved SIP revisions, as a result of consultations between the EPA and the Office of the Federal Register. These procedures include: (1) a revised SIP document for each State that would use the IBR process under the provisions of title 1 CFR part 51; (2) a revised mechanism for announcing the EPA's approval of revisions to an applicable SIP and updating both the document that has gone through the IBR process and the CFR; and (3) a revised format of the ''Identification of Plan'' sections for each applicable subpart in 40 CFR part 52 to reflect these revised IBR procedures. The description of the revised SIP document, IBR procedures, and ''Identification of plan'' format are discussed in further detail in the May 22, 1997 (62 FR 27968) **Federal Register** document. We have taken action to revise the format for many State SIPs, *see, e.g.,* 40 CFR 52.1470 and 52.1490 (''Identification of plan'' and ''Original identification of plan'' sections for the State of Nevada SIP), and take a fifth and final step today toward revising the format of the California SIP.

D. How the EPA Compiles the SIPs

Under the revised SIP format, the federally-approved regulations, source-specific requirements, and nonregulatory provisions (entirely or portions of) submitted by each State agency have been compiled by the EPA into a ''SIP compilation.'' The SIP compilation contains the regulations, source-specific requirements, and nonregulatory and quasi-regulatory provisions approved by the EPA through previous rulemaking actions published in the **Federal Register**.

E. How the EPA Organizes the SIP Compilation

Each compilation contains three parts. Part one contains the regulations, part

two contains the source-specific requirements, and part three contains the nonregulatory and quasi-regulatory provisions that have been approved by the EPA as part of the SIP. Each part consists of a table or tables of identifying information for each SIP-approved regulation, each SIP-approved source-specific requirement, and each nonregulatory or quasi-regulatory SIP provision. The EPA Regional Offices have the primary responsibility for updating the compilations and ensuring their accuracy.

F. Where You Can Find a Copy of the SIP Compilation

EPA Region IX has developed and will maintain the SIP compilation for California. A copy of the full text of California's regulatory and source-specific SIP compilation will also be maintained at NARA.

G. The Format of the California Identification of Plan Sections

Given the size of the California SIP, the EPA is revising the format of the California SIP in a phased manner. On May 26, 2016 (81 FR 33397), the EPA took the first action to revise the format of the ''Identification of plan'' section in subpart F in accordance with the revised format described in section I.C. of this document. Through the first action, we revised the heading of 40 CFR 52.220 to read, ''Identification of plan—in part,'' and added an introductory paragraph to convey our division of the California ''Identification of plan'' section into two sections:

- Amended 40 CFR 52.220 (renamed ''Identification of plan—in part''), which would continue for the time being to function as it has in the past to list past and newly-approved air district rules, local ordinances, source-specific requirements, and nonregulatory and quasi-regulatory provisions and which lists State statutes and State regulations approved on or prior to April 1, 2016; and
- New 40 CFR 52.220a (''Identification of plan—in part''), which lists the State statutes and State regulations approved as part of the California SIP as of April 1, 2016, using the new table format.

This meant that subsequent EPA approvals of air district rules, local ordinances, source-specific requirements, and nonregulatory and quasi-regulatory provisions would continue to be promulgated in 40 CFR 52.220 using the paragraph format whereas subsequent EPA approvals of State statutes and State regulations would be promulgated in 40 CFR 52.220a using the table format. In preparation for future actions to revise the format of the remaining portions of the California SIP, the May 26, 2016 action also organized 40 CFR 52.220a into five paragraphs: (a) Purpose and scope; (b) Incorporation by reference; (c) EPA-approved regulations; (d) EPA-approved source-specific requirements; and (e) EPA-approved nonregulatory provisions and quasi-regulatory measures. ''Nonregulatory provisions and quasi-regulatory measures'' refers to items such as transportation control measures, certain nonregulatory statutory provisions, control strategies, and monitoring networks.

Our phased approach to converting the format of the California SIP anticipated that, over time, as the EPA completes further rulemaking actions to convert the format of the California SIP, 40 CFR 52.220a would include a growing number of air district rules, local ordinances, source-specific requirements, and nonregulatory and quasi-regulatory provisions. On June 4, 2025 (90 FR 23618), the EPA took a second action to revise the format of the California SIP by converting the format for local ordinances and air district rules approved on or prior to April 17, 2025, for the following air districts: Amador Air District, Antelope Valley Air Quality Management District (AQMD), Bay Area AQMD, Butte County AQMD, Calaveras County Air Pollution Control District (APCD), Colusa County APCD, Eastern Kern APCD, and El Dorado County AQMD.

A third action was taken on July 7, 2025 (90 FR 29934) that converted the format for the nonregulatory provisions and quasi-regulatory measures portion of the California SIP approved on or prior to July 3, 2025. On August 21, 2025 (90 FR 40896), the EPA took a fourth action to revise the format of the California SIP by converting the format for source-specific requirements and air district rules approved on or prior to June 30, 2025, for the following air districts: Feather River Air Quality Management District (AQMD), Glenn County Air Pollution Control District (APCD), Great Basin Unified APCD, Imperial County APCD, Lake County AQMD, Lassen County APCD, Mariposa County APCD, Mendocino County AQMD, Modoc County APCD, Monterey Bay Air Resources District, North Coast Unified AQMD, Northern Sierra AQMD, Northern Sonoma County APCD, San Diego County APCD, San Luis Obispo County APCD, Santa Barbara County APCD, Shasta County AQMD, Siskiyou County APCD, Tehama County APCD, Tuolumne County APCD, and Yolo-Solano County AQMD.

In this fifth action to revise the format of the California SIP, we are converting the format and publishing the tables listing EPA-approved rules adopted by the following six California air districts: Mojave Desert AQMD, Placer County APCD, Sacramento Metropolitan AQMD, San Joaquin Valley Unified APCD, South Coast AQMD, and Ventura County APCD. This format revision involves materials approved on or before August 31, 2026 that are part of the current applicable SIP.

Through this fifth and final action, the EPA is completing the conversion process for the California SIP. As anticipated in the earlier actions, the EPA is redesignating 40 CFR 52.220a as 40 CFR 52.220 and renaming it simply ''Identification of plan.'' All subsequent actions by the EPA to approve California SIP revisions will be promulgated using the new table format. The revised format does not affect federal enforceability of the SIP and is consistent with the requirements of section 110(h)(1) of the Clean Air Act (CAA) concerning comprehensive SIP publication.

H. When a SIP Revision Becomes Federally Enforceable

All revisions to the applicable SIP become federally enforceable as of the effective date of the revisions to paragraphs (c), (d), or (e) of the applicable Identification of Plan section found in each subpart of 40 CFR part 52.

I. The Historical Record of SIP Revision Approvals

To facilitate enforcement of previously-approved SIP provisions and provide a smooth transition to the new SIP processing system, the EPA is redesignating the ''Identification of plan—in part'' section for California appearing in 40 CFR 52.220 as 40 CFR 52.250 and renaming the newly-redesignated section as ''Original identification of plan.'' After an initial one or two-year period, the EPA will review its experience with the new SIP processing system and decide whether to retain the ''Original identification of plan'' section for some further period.

II. What the EPA Is Doing in This Action

In this action, the EPA is revising the format for portions of the applicable California SIP related to the rules from the following six air districts: Mojave Desert AQMD, Placer County APCD, Sacramento Metropolitan AQMD, San Joaquin Valley Unified APCD, South Coast AQMD, and Ventura County APCD. This format revision involves materials approved on or before August

31, 2026, that are part of the current applicable SIP.

This action constitutes a ''housekeeping'' exercise to ensure that all EPA-approved revisions to the State programs that have occurred are accurately reflected in 40 CFR part 52. The requirements that apply to States and that relate to SIPs and SIP revisions are set forth in the Clean Air Act and in the EPA's regulations at 40 CFR part 51. When the EPA receives a formal SIP revision request, the Agency must publish the proposed revision in the **Federal Register** and provide for public comment before approval.

The EPA has determined that this rule falls under the ''good cause'' exemption in section 553(b)(B) of the Administrative Procedure Act (APA) which, upon finding ''good cause,'' authorizes agencies to dispense with public participation and section 553(d)(3) which allows an agency to make a rule effective immediately, thereby avoiding the 30-day delayed effective date otherwise provided for in the APA. This action simply reformats and recodifies provisions which are already in effect as a matter of law in Federal and approved State programs. Under section 553 of the APA, an agency may find good cause where notice and public procedure are ''impractical, unnecessary, or contrary to the public interest.'' Public comment is ''unnecessary'' and ''contrary to the public interest'' for this action because the EPA is merely reformatting and recodifying existing law. Immediate notice in the CFR benefits the public by removing outdated citations and making the IBR format clearer and more user-friendly.

III. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is reformatting the materials incorporated by reference in previous rulemakings on submittals of the California SIP and SIP revisions, as described in section II of this preamble. The EPA has made, and will continue to make, these documents generally available through *www.regulations.gov* and at the appropriate EPA office (see the **ADDRESSES** section of this preamble for more information).

IV. Statutory and Executive Order Reviews

A. General Requirements

This action does not impose additional requirements beyond those previously approved into the SIP and already imposed by State law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Is not an Executive Order 14192 (90 FR 9065, February 6, 2025) regulatory action because this action is not significant under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it is an administrative action related to State program approval;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have Tribal implications and will not impose substantial direct costs on Tribal governments or preempt Tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

B. Submission to Congress and the Comptroller General

The Congressional Review Act (5 U.S.C. 801 *et seq.*), as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. 5 U.S.C. 808 allows the issuing agency to make a rule effective sooner than otherwise provided by the CRA if the agency makes a good cause finding that notice and public procedure is impracticable, unnecessary or contrary to the public interest. This action simply reformats and recodifies provisions that are already in effect as a matter of law in Federal and approved State programs (*See* 5 U.S.C. 802(2)). As stated previously, the EPA has made such a good cause finding, including the basis for that finding, and established an effective date of November 6, 2026. The EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

C. Petitions for Judicial Review

The EPA has also determined that the provisions of section 307(b)(1) of the CA A pertaining to petitions for judicial review are not applicable to this action. Prior EPA rulemaking actions for each individual component of the California SIP compilation had previously afforded interested parties the opportunity to file a petition for judicial review in the United States Court of Appeals for the appropriate circuit within 60 days of such rulemaking action. Thus, the EPA believes judicial review of this action under section 307(b)(1) is not available.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon oxides, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen oxides, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: October 29, 2026.

Michael Martucci,

Acting Regional Administrator, Region IX.

For the reasons stated in the preamble, the Environmental Protection Agency amends part 52, chapter I, title 40 of the Code of Federal Regulations as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

■ 2. Section 52.220 is redesignated as § 52.250 and the newly-redesignated section is amended by:

■ a. Revising the section heading;
■ b. Removing the introductory text; and
■ c. Revising paragraph (a).
The revisions read as follows:

§ 52.250 Original identification of plan.

(a) This section identified the original ''The State of California Implementation Plan for Achieving and Maintaining the National Ambient Air Quality Standards'' and all revisions to California statutes and State regulations submitted by the State of California and approved as part of the California State implementation plan on or prior to April 1, 2016; all new or amended local ordinances approved on or prior to April 17, 2025; all new or amended air district rules approved on or prior to April 17, 2025 for the following air districts: Amador Air District, Antelope Valley Air Quality Management District, Bay Area Air Quality Management District, Butte County Air Quality Management District, Calaveras County Air Pollution Control District, Colusa County Air Pollution Control District, Eastern Kern Air Pollution Control District, and El Dorado County Air Quality Management District; all new or amended nonregulatory materials approved on or prior to July 3, 2025; all new or amended source-specific requirements approved on or prior to June 30, 2025; all new or amended air district rules approved on or prior to June 30, 2025 for the following air districts: Feather River Air Quality Management District, Glenn County Air Pollution Control District, Great Basin Unified Air Pollution Control District, Imperial County Air Pollution Control District, Lake County Air Quality Management District, Lassen County Air Pollution Control District, Mariposa County Air Pollution Control District, Mendocino County Air Quality Management District, Modoc County Air Pollution Control District, Monterey Bay Air Resources District, North Coast Unified Air Quality Management District, Northern Sierra Air Quality Management District, Northern Sonoma County Air Pollution Control District, San Diego County Air Pollution Control District, San Luis Obispo County Air Pollution Control District, Santa Barbara County Air Pollution Control District, Shasta County Air Quality Management District, Siskiyou County Air Pollution Control District, Tehama County Air Pollution Control District, Tuolumne County Air Pollution Control District, and Yolo-Solano County Air Quality Management District; and all new or amended air district rules approved on or prior to August 31, 2026 for the following air districts: Mojave Desert Air Quality Management District, Placer County Air Pollution Control District, Sacramento Metropolitan Air Quality Management District, San Joaquin Valley Unified Air Pollution Control District, South Coast Air Quality Management District, and Ventura County Air Pollution Control District.

* * * * *

■ 3. Section 52.220a is redesignated as § 52.220 and the newly redesignated section is amended by:
■ a. Revising the section heading;
■ b. Revising paragraphs (b)(1) introductory text, (b)(1)(xxi), (b)(1)(xxvi), (b)(1)(xxvii), (b)(1)(xxix), (b)(1)(xxxiv) and (b)(1)(xxxvii);
■ c. Adding paragraph (b)(1)(xxxix);
■ d. Revising paragraph (c) introductory text, and tables 21, 26, 27, 29, 34 and 37 to paragraph (c); and
■ e. Revising paragraphs (d) introductory and (e) introductory text.
The revisions and addition read as follows:

§ 52.220 Identification of plan.

* * * * *

(b) * * *

(1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date on or prior to the dates listed in this paragraph (b)(1) was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of the approval and notice of any change in the material will be published in the **Federal Register**. Entries in tables 1 through 38 to paragraph (c) of this section and paragraph (d) of this section with EPA approval dates after the dates listed in this paragraph (b)(1) have been approved by the EPA for inclusion in the State implementation plan and will be incorporated by reference in the next update to the SIP compilation.

* * * * *

(xxi) *EPA-Approved Mojave Desert Air Quality Management District Regulations (District-Wide, Riverside County Portion of District, And San Bernardino County Portion of District).* Material listed in Table 21 to paragraph (c) of this section was approved by EPA for inclusion in the SIP on August 31, 2026.

* * * * *

(xxvi) *EPA-Approved Placer County Air Pollution Control District Regulations.* Material listed in Table 26 to paragraph (c) of this section was approved by EPA for inclusion in the SIP on August 31, 2026.

(xxvii) *EPA-Approved Sacramento Metropolitan Air Quality Management District Regulations.* Material listed in Table 27 to paragraph (c) of this section was approved by EPA for inclusion in the SIP on April 22, 2026.

* * * * *

(xxix) *EPA-Approved San Joaquin Valley Unified Air Pollution Control District Regulations; Fresno County Air Pollution Control District Regulations; Kern County Air Pollution Control District Regulations; Kings County Air Pollution Control District Regulations; Madera County Air Pollution Control District Regulations; Merced County Air Pollution Control District Regulations; San Joaquin County Air Pollution Control District Regulations; Stanislaus County Air Pollution Control District Regulations; Tulare County Air Pollution Control District Regulations.* Material listed in Table 29 to paragraph (c) of this section was approved by EPA for inclusion in the SIP on August 31, 2026.

* * * * *

(xxxiv) *EPA-Approved South Coast Air Quality Management District Regulations; Los Angeles County Air Pollution Control District Regulations; Orange County Air Pollution Control District Regulations; Riverside County Air Pollution Control District Regulations; San Bernardino County Air Pollution Control District Regulations.* Material listed in Table 34 to paragraph (c) of this section was approved by EPA for inclusion in the SIP on August 31, 2026.

* * * * *

(xxxvii) *EPA-Approved Ventura County Air Pollution Control District Regulations.* Material listed in Table 37 to paragraph (c) of this section was approved by EPA for inclusion in the SIP on August 31, 2026.

* * * * *

(xxxix) *EPA-Approved Source-Specific Requirements.* Material listed in paragraph (d) of this section was approved by EPA for inclusion in the SIP on June 30, 2025.

* * * * *

(c) *EPA-approved regulations.* References to paragraphs in 40 CFR 52.220 in entries in tables 1 through 38 to paragraph (c) should be understood to refer to the corresponding paragraphs in 40 CFR 52.250.

* * * * *

TABLE 21—EPA-APPROVED MOJAVE DESERT AIR QUALITY MANAGEMENT DISTRICT REGULATIONS

[District-Wide, Riverside County Portion of District, and San Bernardino County Portion of District]

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Rules and Regulations (District-Wide)				
Regulation I—General Provisions				
102	Definition of Terms	September 28, 2020	January 8, 2026, 91 FR 607.	Submitted on March 12, 2021 as an attachment to a letter dated March 10, 2021. See 40 CFR 52.220(c)(587)(i)(B)(*1*).
103	Description of District Boundaries	June 28, 1995	June 3, 1999, 64 FR 29790.	Submitted by CARB on August 10, 1995. See 40 CFR 52.220(c)(224)(i)(C)(*2*).
104	Reporting of Source Test Data and Analyses.	December 19, 1988	December 4, 2024, 89 FR 96103.	Submitted by CARB on October 13, 2023. See 40 CFR 52.220(c)(622)(i)(A)(*1*).
Regulation II—Permits				
206	Posting of Permit to Operate	February 22, 2021	June 30, 2023, 88 FR 42258.	Submitted by CARB on October 15, 2021 as an attachment to a letter dated October 14, 2021. See 40 CFR 52.220(c)(601)(i)(A)(*1*).
219	Equipment Not Requiring a Permit	January 25, 2021	June 30, 2023, 88 FR 42258.	Submitted by CARB on July 23, 2021 as an attachment to a letter dated July 22, 2021. See 40 CFR 52.220(c)(600)(i)(A)(*1*).
221	Federal Operating Permit Requirement.	December 21, 1994	February 5, 1996, 61 FR 4217.	Submitted by CARB on March 31, 1995. See 40 CFR 52.220(c)(216)(i)(A)(*2*).
222	Limitations on Potential to Emit	July 31, 1995	August 31, 2004, 69 FR 53005.	Submitted by CARB on October 13, 1995. See 40 CFR 52.220(c)(225)(i)(H)(*1*).
Regulation IV—Prohibitions				
403.1	Fugitive Dust Control for the Searles Valley Planning Area.	November 25, 1996	August 13, 2009, 74 FR 40750.	Submitted by CARB on March 3, 1997. See 40 CFR 52.220(c)(244)(i)(C)(*2*).
404	Particulate Matter—Concentration	July 25, 1977	December 4, 2024, 89 FR 96103.	Submitted electronically by CARB on May 11, 2023 as an attachment to a letter dated May 10, 2023. See 40 CFR 52.220(c)(610)(i)(D)(*1*).
405	Solid Particulate Matter—Weight	July 25, 1977	December 4, 2024, 89 FR 96103.	Submitted electronically by CARB on May 11, 2023 as an attachment to a letter dated May 10, 2023. See 40 CFR 52.220(c)(610)(i)(D)(*2*).
407	Liquid and Gaseous Air Contaminants	July 25, 1977	December 4, 2024, 89 FR 96103.	Submitted by CARB on September 23, 2022. See 40 CFR 52.220(c)(620)(i)(A)(*1*).
408	Circumvention	July 25, 1977	December 4, 2024, 89 FR 96103.	Submitted electronically by CARB on May 11, 2023 as an attachment to a letter dated May 10, 2023. See 40 CFR 52.220(c)(610)(i)(D)(*3*).
409	Combustion Contaminants	July 25, 1977	December 4, 2024, 89 FR 96103.	Submitted electronically by CARB on May 11, 2023 as an attachment to a letter dated May 10, 2023. See 40 CFR 52.220(c)(610)(i)(D)(*4*).
442	Usage of Solvents	February 27, 2006	September 17, 2007, 72 FR 52791.	Submitted by CARB on October 5, 2006. See 40 CFR 52.220(c)(347)(i)(C)(*1*).
443	Labeling of Solvents	July 25, 1977	December 4, 2024, 89 FR 96103.	Submitted electronically by CARB on May 11, 2023 as an attachment to a letter dated May 10, 2023. See 40 CFR 52.220(c)(610)(i)(D)(*5*).
444	Open Outdoor Fires	September 25, 2006	October 31, 2007, 72 FR 61525.	Submitted by CARB on May 8, 2007. See 40 CFR 52.220(c)(350)(i)(B)(*1*).
461	Gasoline Transfer and Dispensing	January 22, 2018	May 1, 2020, 85 FR 25293.	Submitted by CARB on May 23, 2018. See 40 CFR 52.220(c)(518)(i)(A)(*3*).
462	Organic Liquid Loading	January 22, 2018	May 1, 2020, 85 FR 25293.	Submitted by CARB on May 23, 2018. See 40 CFR 52.220(c)(518)(i)(A)(*4*).
463	Storage of Organic Liquids	January 22, 2018	May 1, 2020, 85 FR 25293.	Submitted by CARB on May 23, 2018. See 40 CFR 52.220(c)(518)(i)(A)(*5*).
464	Oil-Water Separators	June 23, 2014	June 5, 2015, 80 FR 32026.	Submitted by CARB on November 6, 2014. See 40 CFR 52.220(c)(457)(i)(B)(*1*).
468	Sulfur Recovery Units	July 25, 1977	December 4, 2024, 89 FR 96103.	Submitted electronically by CARB on November 30, 2022 as an attachment to a letter dated November 22, 2022. See 40 CFR 52.220(c)(621)(i)(A)(*1*).
469	Sulfur Acid Units	July 25, 1977	December 4, 2024, 89 FR 96103.	Submitted electronically by CARB on November 30, 2022 as an attachment to a letter dated November 22, 2022. See 40 CFR 52.220(c)(621)(i)(A)(*2*).
471	Asphalt Roofing Operations	December 21, 1994	February 29, 1996, 61 FR 7706.	Submitted by CARB on December 22, 1994. See 40 CFR 52.220(c)(210)(i)(C)(*2*).
472	Reduction of Animal Matter	July 25, 1977	December 4, 2024, 89 FR 96103.	Submitted electronically by CARB on May 11, 2023 as an attachment to a letter dated May 10, 2023. See 40 CFR 52.220(c)(610)(i)(D)(*6*).
474	Fuel Burning Equipment	August 25, 1997	January 11, 1999, 64 FR 1517.	Submitted by CARB on March 10, 1998. See 40 CFR 52.220(c)(254)(i)(H)(*1*).
475	Electric Power Generating Equipment	August 25, 1997	January 11, 1999, 64 FR 1517.	Submitted by CARB on March 10, 1998. See 40 CFR 52.220(c)(254)(i)(H)(*1*).
476	Steam Generating Equipment	August 25, 1997	January 11, 1999, 64 FR 1517.	Submitted by CARB on March 10, 1998. See 40 CFR 52.220(c)(254)(i)(H)(*1*).

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Regulation VII—Emergencies				
701	Air Pollution Emergency Contingency Actions.	September 26, 2022	January 8, 2026, 91 FR 613.	Submitted electronically on May 11, 2023 as an attachment to a letter dated May 10, 2023. See 40 CFR 52.220(c)(610)(i)(D)(7).
Regulation XI—Source Specific Standards				
1102	Fugitive Emissions of VOCs from Components at Pipeline Transfer Stations.	October 26, 1994	September 27, 1995, 60 FR 49772.	Submitted by CARB on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(D)(*1*).
1103	Cutback and Emulsified Asphalt	December 21, 1994	February 5, 1996, 61 FR 4215.	Submitted by CARB on December 22, 1994. See 40 CFR 52.220(c)(210)(i)(C)(*1*).
1104	Organic Solvent Degreasing Operations.	April 23, 2018	July 2, 2019, 84 FR 31682.	Submitted by CARB on July 16, 2018. See 40 CFR 52.220(c)(519)(i)(A)(*1*).
1106	Marine Coating Operations	October 24, 2016	February 12, 2018, 83 FR 5940.	Submitted by CARB on May 8, 2007. See 40 CFR 52.220(c)(498)(i)(B)(*1*).
1113	Architectural Coatings	April 23, 2012	January 3, 2014, 79 FR 364.	Submitted by CARB on February 6, 2013. See 40 CFR 52.220(c)(428)(i)(C)(*1*).
1114	Wood Products Coating Operations	August 24, 2020	July 28, 2021, 86 FR 40335.	Submitted on November 18, 2020 by CARB as an attachment to a letter dated November 17, 2020. See 40 CFR 52.220(c)(558)(i)(A)(*1*).
1115	Metal Parts and Products Coating Operations.	June 8, 2020	May 9, 2022, 87 FR 27526.	Submitted on July 24, 2020 by the Governor's designee as an attachment to a letter dated July 23, 2020. See 40 CFR 52.220(c)(571)(i)(A)(*1*).
1116	Automotive Refinishing Operations	August 23, 2010	August 9, 2012, 77 FR 47536.	Submitted by CARB on April 5, 2011. See 40 CFR 52.220(c)(388)(i)(F)(*1*).
1117	Graphic Arts and Paper, Film, Foil and Fabric Coatings.	September 28, 2009	March 1, 2012, 77 FR 12495.	Submitted by CARB on July 20, 2010. See 40 CFR 52.220(c)(381)(i)(H)(*1*).
1118	Aerospace Assembly, Rework and Component Manufacturing Operations.	October 26, 2015	June 21, 2017, 82 FR 28240.	Submitted by CARB on April 21, 2016. See 40 CFR 52.220(c)(485)(i)(B)(*1*).
1157	Boilers and Process Heaters	September 25, 2023	May 19, 2025, 90 FR 21236.	Submitted electronically on January 10, 2024, as an attachment to a letter dated December 27, 2023. See 40 CFR 52.220(c)(626)(i)(A)(*1*).
1158	Electric Power Generating Facilities	August 25, 1997	July 20, 1999, 64 FR 38832.	Submitted by CARB on March 10, 1998. See 40 CFR 52.220(c)(254)(i)(H)(*2*).
1159	Stationary Gas Turbines	September 28, 2009	October 25, 2012, 77 FR 65133.	Submitted by CARB on May 17, 2010. See 40 CFR 52.220(c)(379)(i)(E)(*1*).
1160	Internal Combustion Engines	January 23, 2023	August 28, 2025, 90 FR 41895.	Submitted electronically on March 3, 2023, as an attachment to a letter dated February 17, 2023. See 40 CFR 52.220(c)(628)(i)(A)(1).
1161	Portland Cement Kilns	January 22, 2018	June 2, 2023, 88 FR 36249.	Submitted by CARB on May 23, 2018. See 40 CFR 52.220(c)(518)(i)(A)(*9*).
1162	Polyester Resin Operations	April 23, 2018	February 27, 2020, 85 FR 11812.	Submitted by CARB on July 16, 2018. See 40 CFR 52.220(c)(519)(i)(A)(*2*).
1165	Glass Melting Furnaces	August 25, 2008	July 2, 2012, 77 FR 39181.	Submitted by CARB on December 23, 2008. See 40 CFR 52.220(c)(364)(i)(D)(*1*).
Regulation XIII—New Source Review				
1300	New Source Review General	March 22, 2021	June 30, 2023, 88 FR 42258.	Submitted by CARB on July 23, 2021 as an attachment to a letter dated July 22, 2021. See 40 CFR 52.220(c)(600)(i)(A)(*2*).
1301	New Source Review Definitions	March 25, 2024	March 23, 2026, 91 FR 13774.	Submitted by CARB on August 7, 2024. See 40 CFR 52.220(c)(631)(i)(A)(*1*).
1302 (except subsections 1302(C)(5) and 1302(C)(7)(c)).	New Source Review Procedure	March 25, 2024	March 23, 2026, 91 FR 13774.	Submitted by CARB on August 7, 2024. See 40 CFR 52.220(c)(631)(i)(A)(*2*).
1303	New Source Review Requirements	March 25, 2024	March 23, 2026, 91 FR 13774.	Submitted by CARB on August 7, 2024. See 40 CFR 52.220(c)(631)(i)(A)(*3*).
1304	New Source Review Emissions Calculations.	March 25, 2024	March 23, 2026, 91 FR 13774.	Submitted by CARB on August 7, 2024. See 40 CFR 52.220(c)(631)(i)(A)(*4*).
1305	New Source Review Emissions Offsets.	March 25, 2024	March 23, 2026, 91 FR 13774.	Submitted by CARB on August 7, 2024. See 40 CFR 52.220(c)(631)(i)(A)(*5*).
1306	New Source Review for Electric Energy Generating Facilities.	March 22, 2021	June 30, 2023, 88 FR 42258.	Submitted by CARB on July 23, 2021 as an attachment to a letter dated July 22, 2021. See 40 CFR 52.220(c)(600)(i)(A)(*8*).
Regulation XIV—Emission Reduction Credit Banking				
1400	General	June 28, 1995	January 22, 1997, 62 FR 3215.	Submitted by CARB on August 10, 1995. See 40 CFR 52.220(c)(224)(i)(C)(*1*).
1401	Definitions	June 28, 1995	January 22, 1997, 62 FR 3215.	Submitted by CARB on August 10, 1995. See 40 CFR 52.220(c)(224)(i)(C)(*1*).
1402	Emission Reduction Credit Registry	May 19, 1997	June 30, 2023, 88 FR 42258.	Submitted by CARB on August 1, 1997. See 40 CFR 52.220(c)(248)(i)(D)(*3*).

TABLE 21—EPA-APPROVED MOJAVE DESERT AIR QUALITY MANAGEMENT DISTRICT REGULATIONS—Continued
[District-Wide, Riverside County Portion of District, and San Bernardino County Portion of District]

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
1404	Emission Reduction Credit Calculation	June 28, 1995	January 22, 1997, 62 FR 3215.	Submitted by CARB on August 10, 1995. See 40 CFR 52.220(c)(224)(i)(C)(*1*).
Regulation XX—Conformity				
2002	General Federal Actions Conformity	October 26, 1994	April 23, 1999, 64 FR 19916.	Submitted by CARB on May 10, 1996. See 40 CFR 52.220(c)(231)(i)(C)(*1*).
Rules and Regulations (Applicable within the Riverside County portion of District only)				
Original Codification of Rules and Regulations				
53	Specific Air Contaminants	June 10, 1975	June 14, 1978, 43 FR 25684.	Adopted by the Riverside County APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on July 22, 1975. See 40 CFR 52.220(c)(28)(x)(A).
56	Scavenger Plants	June 13, 1972	September 22, 1972, 37 FR 19812.	Adopted by the Riverside County APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on June 30, 1972. See 40 CFR 52.220(c)(6).
58	Disposal of Solid and Liquid Wastes	March 28, 1972	September 22, 1972, 37 FR 19812.	Adopted by the Riverside County APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on June 30, 1972. See 40 CFR 52.220(c)(6).
Recodification of Rules and Regulations				
Regulation I—General Provisions				
101	Title	April 1, 1977	December 19, 1978, 43 FR 59065.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on October 13, 1977. See 40 CFR 52.220(c)(41)(xiv)(A).
106	Increments of Progress	January 9, 1976	June 14, 1978, 43 FR 25684.	Adopted by the Southern California APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(B).
107	Determination of Volatile Organic Compounds in Coating Material.	January 8, 1982	October 11, 1983, 48 FR 46046.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on March 1, 1982. See 40 CFR 52.220(c)(121)(i)(B).
108	Alternative Emission Control Plans (AECPs).	April 6, 1990	August 30, 1993, 58 FR 45445.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on December 31, 1990. See 40 CFR 52.220(c)(182)(i)(A)(*3*).
109	Recordkeeping for Volatile Organic Compound Emissions.	May 5, 1989	August 30, 1993, 58 FR 45444.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on December 31, 1990. See 40 CFR 52.220(c)(182)(i)(A)(*2*).
Regulation II—Permits				
201	Permit to Construct	January 9, 1976	November 9, 1978, 43 FR 52237.	Adopted by the Southern California APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(C).
202(a) and (b)	Temporary Permit to Operate	January 9, 1976	November 9, 1978, 43 FR 52237.	Adopted by the Southern California APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(C).
202(c)	Temporary Permit to Operate	May 7, 1976	November 9, 1978, 43 FR 52237.	Adopted by the Southern California APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on August 2, 1976. See 40 CFR 52.220(c)(32)(iv)(C).
203	Permit to Operate	January 9, 1976	November 9, 1978, 43 FR 52237.	Adopted by the Southern California APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(C).
204	Permit Conditions	January 9, 1976	November 9, 1978, 43 FR 52237.	Adopted by the Southern California APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(C).
205	Cancellation of Applications	January 9, 1976	November 9, 1978, 43 FR 52237.	Adopted by the Southern California APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(C).

TABLE 21—EPA-APPROVED MOJAVE DESERT AIR QUALITY MANAGEMENT DISTRICT REGULATIONS—Continued
[District-Wide, Riverside County Portion of District, and San Bernardino County Portion of District]

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
207	Altering or Falsifying of Permit	January 9, 1976	November 9, 1978, 43 FR 52237.	Adopted by the Southern California APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(C).
208	Permit for Open Burning	October 8, 1976	September 8, 1978, 43 FR 40011.	Adopted by the Southern California APCD but submitted on behalf of the Riverside County APCD. Submitted on June 6, 1977. See 40 CFR 52.220(c)(39)(iv)(C).
209	Transfer and Voiding of Permits	January 9, 1976	November 9, 1978, 43 FR 52237.	Adopted by the Southern California APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(C).
210	Applications	January 9, 1976	November 9, 1978, 43 FR 52237.	Adopted by the Southern California APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(C).
211	Action on Permits	January 9, 1976	November 9, 1978, 43 FR 52237.	Adopted by the Southern California APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(C).
212	Standards for Approving Permits	May 1, 1987	February 3, 1989, 54 FR 5448.	Adopted by the SCAQMD and applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on September 1, 1987. See 40 CFR 52.220(c)(174)(i)(A)(1).
214	Denial of Permits	January 9, 1976	November 9, 1978, 43 FR 52237.	Adopted by the Southern California APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(C).
215	Permits Deemed Denied	January 9, 1976	November 9, 1978, 43 FR 52237.	Adopted by the Southern California APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(C).
216	Appeals	January 9, 1976	November 9, 1978, 43 FR 52237.	Adopted by the Southern California APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(C).
217	Provision for Sampling and Testing Facilities.	January 9, 1976	November 9, 1978, 43 FR 52237.	Adopted by the Southern California APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(C).
218	Stack Monitoring	August 7, 1981	July 6, 1982, 47 FR 29231.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on October 23, 1981. See 40 CFR 52.220(c)(103)(xviii)(A).
220	Exemption—Net Increase in Emissions.	August 7, 1981	July 6, 1982, 47 FR 29231.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on October 23, 1981. See 40 CFR 52.220(c)(103)(xviii)(A).
221	Plans	January 4, 1985	April 17, 1987, 52 FR 12522.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on November 12, 1985. See 40 CFR 52.220(c)(165)(i)(B)(*1*).
	Regulation IV—Prohibitions			
401	Visible Emissions	March 2, 1984	January 29, 1985, 50 FR 3906.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on July 10, 1984. See 40 CFR 52.220(c)(155)(iv)(B).
403	Fugitive Dust	May 7, 1976	June 14, 1978, 43 FR 25684.	Adopted by the Southern California APCD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on August 2, 1976. See 40 CFR 52.220(c)(32)(iv)(A).
404	Particulate Matter—Concentration	October 5, 1979	September 28, 1981, 46 FR 47451.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on December 17, 1979. See 40 CFR 52.220(c)(58)(ii)(B).
407	Liquid and Gaseous Contaminants	April 2, 1982	November 10, 1982, 47 FR 50864.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on August 6, 1982. See 40 CFR 52.220(c)(124)(iv)(A).
431.1	Sulfur Content of Gaseous Fuels	May 6, 1983	October 19, 1984, 49 FR 41028.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on July 19, 1983. See 40 CFR 52.220(c)(137)(vii)(B).

TABLE 21—EPA-APPROVED MOJAVE DESERT AIR QUALITY MANAGEMENT DISTRICT REGULATIONS—Continued
[District-Wide, Riverside County Portion of District, and San Bernardino County Portion of District]

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
431.2	Sulfur Content of Liquid Fuels	October 20, 1978	September 28, 1981, 46 FR 47451.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on July 25, 1979. See 40 CFR 52.220(c)(65)(ii).
431.2(c)(5)	Sulfur Content of Liquid Fuels	February 2, 1979	September 28, 1981, 46 FR 47451.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 23, 1980. See 40 CFR 52.220(c)(69)(ii).
431.3	Sulfur Content of Fossil Fuels	December 2, 1977	September 28, 1981, 46 FR 47451.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on July 25, 1979. See 40 CFR 52.220(c)(65)(ii).
465	Vacuum Producing Devices or Systems.	December 7, 1990	August 11, 1992, 57 FR 35758.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(*2*).
481	Spray Coating Operations	May 5, 1978	January 21, 1981, 46 FR 5965.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on January 2, 1979. See 40 CFR 52.220(c)(47)(i)(B).
	Regulation XI—Source-Specific Standards			
1102	Petroleum Solvent Dry Cleaners	December 7, 1990	March 24, 1992, 57 FR 10136.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(1).
1102.1	Perchloroethylene Cry Cleaning Systems.	December 7, 1990	March 24, 1992, 57 FR 10136.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(*1*).
1103	Pharmaceuticals and Cosmetic Manufacturing Operations.	April 4, 1980	July 8, 1982, 47 FR 29668.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 23, 1980. See 40 CFR 52.220(c)(69)(iii).
1105	Fluid Catalytic Cracking Units—Oxides of Sulfur.	September 21, 1984	July 12, 1990, 55 FR 28624.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on February 6, 1985. See 40 CFR 52.220(c)(159)(v)(C).
1111	NO_X Emissions from Natural-Gas-Fired, Fan-Type Central Furnaces.	July 8, 1983	May 3, 1984, 49 FR 18830.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on October 27, 1983. See 40 CFR 52.220(c)(148)(vi)(A).
1115	Motor Vehicle Assembly Line Coating Operations.	March 6, 1992	December 20, 1993, 58 FR 66282.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on September 14, 1992. See 40 CFR 52.220(c)(189)(i)(A)(*1*).
1119	Petroleum Coke Calcining Operations—Oxides of Sulfur.	March 2, 1979	September 28, 1981, 46 FR 47451.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on July 25, 1980. See 40 CFR 52.220(c)(88)(iii)(A).
1120	Asphalt Pavement Heaters	August 4, 1978	September 28, 1981, 46 FR 47451.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on July 25, 1979. See 40 CFR 52.220(c)(65)(ii).
1121	Control of Nitrogen Oxides from Residential Type Natural Gas-Fired Water Heaters.	December 1, 1978	September 28, 1981, 46 FR 47451.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 2, 1980. See 40 CFR 52.220(c)(67)(i)(B).
1123	Refinery Process Turnarounds	December 7, 1990	August 11, 1992, 57 FR 35758.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(*2*).
1125	Metal Container, Closure, and Coil Coating Operations.	August 2, 1991	April 14, 1994, 59 FR 17697.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on May 13, 1993. See 40 CFR 52.220(c)(189)(i)(A)(*4*), but note that approval should have promulgated under 40 CFR 52.220(c)(193) rather than 40 CFR 52.220(c)(189).
1126	Magnet Wire Coating Operations	March 6, 1992	December 20, 1993, 58 FR 66285.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on September 14, 1992. See 40 CFR 52.220(c)(189)(i)(A)(*2*).
1140	Abrasive Blasting	February 1, 1980	September 28, 1981, 46 FR 47451.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on April 2, 1980. See 40 CFR 52.220(c)(67)(i)(B).

TABLE 21—EPA-APPROVED MOJAVE DESERT AIR QUALITY MANAGEMENT DISTRICT REGULATIONS—Continued
[District-Wide, Riverside County Portion of District, and San Bernardino County Portion of District]

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
1141	Control of Volatile Organic Compound Emissions from Resin Manufacturing.	April 3, 1992	December 20, 1993, 58 FR 66286.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on September 14, 1992. See 40 CFR 52.220(c)(189)(i)(A)(*3*).
1141.1	Coatings and Ink Manufacturing	November 4, 1983	January 24, 1985, 50 FR 3338.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on March 14, 1984. See 40 CFR 52.220(c)(153)(vii)(A).
1141.2	Surfactant Manufacturing	July 6, 1984	January 15, 1987, 52 FR 1627.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on October 19, 1984. See 40 CFR 52.220(c)(156)(vii)(A).
1145	Plastic, Rubber, and Glass Coating Operations.	January 10, 1992	December 20, 1993, 58 FR 66286.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on January 11, 1993. See 40 CFR 52.220(c)(191)(i)(A)(*1*).
1148	Thermally Enhanced Oil Recovery Wells.	November 5, 1982	October 19, 1984, 49 FR 41028.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on February 3, 1983. See 40 CFR 52.220(c)(127)(vii)(C).
1151	Motor Vehicle and Mobile Equipment Non-Assembly Line Coating Operations.	September 6, 1991	December 20, 1993, 58 FR 66285.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on May 13, 1993. See 40 CFR 52.220(c)(193)(i)(A)(*1*).
1153	Commercial Bakery Ovens	January 4, 1991	September 29, 1993, 58 FR 50850.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(*3*).
1158	Storage, Handling, and Transport of Petroleum Coke.	December 2, 1983	January 15, 1987, 52 FR 1627.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on March 14, 1984. See 40 CFR 52.220(c)(153)(vii)(B).
1159	Nitric Acid Units—Oxides of Nitrogen	December 6, 1985	July 12, 1990, 55 FR 28622.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(H)(*1*).
1164	Semiconductor Manufacturing Operations.	December 7, 1990	September 29, 1993, 58 FR 50850.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(*3*).
1173	Fugitive Emissions of Volatile Organic Compounds.	December 7, 1990	October 26, 1992, 57 FR 48457; corrected on January 16, 2004, 69 FR 2509.	Adopted by the SCAQMD. Applicable within the Riverside County portion of the Mojave Desert AQMD. Submitted by CARB on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(*10*).
Rules and Regulations (Applicable within the San Bernardino County portion of District only)				
Original Codification of Rules and Regulations				
5(a)	Public Availability of Emission Data	February 13, 1973	June 14, 1978, 43 FR 25684.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on July 25, 1973. See 40 CFR 52.220(c)(21)(xv)(A).
53A, paragraph (c) only	Specific Contaminants	February 13, 1973	June 14, 1978, 43 FR 25684.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on July 25, 1973. See 40 CFR 52.220(c)(21)(xv)(A). Paragraphs (a) and (b) were superseded by approval of San Bernardino County APCD Rule 53–A(a) (Specific Contaminants) (later Rule 406(a)) and Rule 409 (Combustion Contaminants).
73	Dry Sandblasting	January 28, 1975	June 14, 1978, 43 FR 25684.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on April 10, 1975. See 40 CFR 52.220(c)(27)(v)(A).
Recodification of Rules and Regulations				
Regulation I—General Provisions				
101	Title	December 19, 1988	November 27, 1990, 55 FR 49281.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on March 26, 1990. See 40 CFR 52.220(c)(179)(i)(B)(*1*).

TABLE 21—EPA-APPROVED MOJAVE DESERT AIR QUALITY MANAGEMENT DISTRICT REGULATIONS—Continued
[District-Wide, Riverside County Portion of District, and San Bernardino County Portion of District]

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
106	Increments of Progress	December 19, 1988	November 27, 1990, 55 FR 49281.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on March 26, 1990. See 40 CFR 52.220(c)(179)(i)(B)(*1*).
107	Certifications and Emission Statements.	September 14, 1992	May 26, 2004, 69 FR 29880.	Adopted by the San Bernardino County APCD. Submitted by CARB on November 12, 1992 prior to the date (July 1, 1994) on which the Palo Verde Valley area in Riverside County joined the MDAQMD. See 40 CFR 52.220(c)(190)(i)(F)(*1*).
Regulation II—Permits				
201	Permit to Construct	February 1, 1977	November 9, 1978, 43 FR 52237.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on June 6, 1977. See 40 CFR 52.220(c)(39)(ii)(B).
202	Temporary Permit to Operate	February 1, 1977	November 9, 1978, 43 FR 52237.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on June 6, 1977. See 40 CFR 52.220(c)(39)(ii)(B).
203	Permit to Operate	February 1, 1977	November 9, 1978, 43 FR 52237.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on June 6, 1977. See 40 CFR 52.220(c)(39)(ii)(B).
204	Permit Conditions	February 1, 1977	November 9, 1978, 43 FR 52237.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on June 6, 1977. See 40 CFR 52.220(c)(39)(ii)(B).
205	Cancellation of Applications	February 1, 1977	November 9, 1978, 43 FR 52237.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on June 6, 1977. See 40 CFR 52.220(c)(39)(ii)(B).
207	Altering or Falsifying of Permit	February 1, 1977	November 9, 1978, 43 FR 52237.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on June 6, 1977. See 40 CFR 52.220(c)(39)(ii)(B).
208	Permit for Open Burning	February 1, 1977	September 8, 1978, 43 FR 40011.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on June 6, 1977. See 40 CFR 52.220(c)(39)(ii)(C).
209	Transfer and Voiding of Permits	February 1, 1977	November 9, 1978, 43 FR 52237.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on June 6, 1977. See 40 CFR 52.220(c)(39)(ii)(B).
212	Standard for Approving Permits	February 1, 1977	November 9, 1978, 43 FR 52237.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on June 6, 1977. See 40 CFR 52.220(c)(39)(ii)(B).
217	Provision for Sampling and Testing Facilities.	February 1, 1977	November 9, 1978, 43 FR 52237.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on June 6, 1977. See 40 CFR 52.220(c)(39)(ii)(B).
218	Stack Monitoring	February 1, 1977	September 8, 1978, 43 FR 40011.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on June 6, 1977. See 40 CFR 52.220(c)(39)(ii)(C).
Regulation IV—Prohibitions				
401	Visible Emissions	February 1, 1977	September 8, 1978, 43 FR 40011.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on June 6, 1977. See 40 CFR 52.220(c)(39)(ii)(C).

TABLE 21—EPA-APPROVED MOJAVE DESERT AIR QUALITY MANAGEMENT DISTRICT REGULATIONS—Continued
[District-Wide, Riverside County Portion of District, and San Bernardino County Portion of District]

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
403	Fugitive Dust	February 1, 1977	September 8, 1978, 43 FR 40011.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on June 6, 1977. See 40 CFR 52.220(c)(39)(ii)(C).
406(a)	Specific Contaminants	July 25, 1977	December 21, 1978, 43 FR 59489.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. No action was taken on paragraph (b) at 43 FR 59489 (December 21, 1978). Submitted by CARB on November 4, 1977. See 40 CFR 52.220(c)(42)(xiii)(A).
431	Sulfur Content of Fuels	February 1, 1977	September 8, 1978, 43 FR 40011.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on June 6, 1977. See 40 CFR 52.220(c)(39)(ii)(C).
465	Vacuum Producing Devices or Systems.	February 1, 1977	September 8, 1978, 43 FR 40011.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on June 6, 1977. See 40 CFR 52.220(c)(39)(ii)(C).
473	Disposal of Liquid and Solid Wastes ..	February 1, 1977	September 8, 1978, 43 FR 40011.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on June 6, 1977. See 40 CFR 52.220(c)(39)(ii)(C).
Regulation VII—Emergencies				
707	Plans	February 1, 1977	June 3, 1980, 45 FR 37428.	Adopted by the San Bernardino County APCD and applicable within the San Bernardino County portion of the Mojave Desert AQMD. Submitted by CARB on June 6, 1977. See 40 CFR 52.220(c)(39)(ii)(E).

TABLE 26—EPA-APPROVED PLACER COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
RULES AND REGULATIONS (DISTRICT–WIDE APPLICABILITY)				
Regulation 1—General Provisions				
101	Title	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
102	Definitions	November 12, 1974	June 14, 1978, 43 FR 25684.	Submitted on January 10, 1975. See 40 CFR 52.220(c)(26)(xvii)(A). Most of the definitions have been superseded by subsequent approvals of Rule 102 but not all.
102	Definitions	June 11, 2020	May 9, 2022, 87 FR 27526.	Submitted on July 24, 2020 by the Governor's designee as an attachment to a letter dated July 23, 2020. See 40 CFR 52.220(c)(571)(i)(B)(*1*).
103	Validity	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
Regulation 2—Prohibitions				
201	Coverage	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
202	Visible Emissions	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
203	Exceptions to Rule 202	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
204	Wet Plumes	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
206	Incinerator Burning	October 13, 2016	December 19, 2017, 82 FR 60119.	Submitted on January 24, 2017. See 40 CFR 52.220(c)(497)(i)(B)(*1*).
208	Orchard or Citrus Heaters	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
209	Fossil Fuel-Steam Facility	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
210	Specific Contaminants	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).

TABLE 26—EPA-APPROVED PLACER COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS—Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
211	Process Weight	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
212	Storage of Organic Liquids	June 19, 1997	June 11, 2009, 74 FR 27714.	Submitted on July 18, 2008. See 40 CFR 52.220(c)(359)(i)(C)(*1*).
213	Gasoline Transfer into Stationary Storage Containers.	February 21, 2013	February 10, 2015, 80 FR 7345.	Submitted on February 10, 2014. See 40 CFR 52.220(c)(442)(i)(D)(*1*).
214	Transfer of Gasoline into Vehicle Fuel Tanks.	February 21, 2013	February 10, 2015, 80 FR 7345.	Submitted on February 10, 2014. See 40 CFR 52.220(c)(442)(i)(D)(*2*).
215	Transfer of Gasoline Into Trucks, Trailers, and Railroad Tank Cars at Loading Facilities.	June 19, 1997	January 31, 2011, 76 FR 5277.	Submitted on July 18, 2008. See 40 CFR 52.220(c)(359)(i)(C)(*3*).
216	Organic Solvent Cleaning and Degreasing Operations.	December 11, 2003	May 5, 2010, 75 FR 24406.	Submitted on July 18, 2008. See 40 CFR 52.220(c)(359)(i)(C)(*2*).
217	Cutback and Emulsified Asphalt Paving Materials.	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
218	Architectural Coatings	October 14, 2010	December 5, 2011, 76 FR 75795.	Submitted on April 5, 2011. See 40 CFR 52.220(c)(388)(i)(E)(*3*).
219	Organic Solvents	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
220	Abrasive Blasting	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
221	Compliance Tests	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
222	Reduction of Animal Matter	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
223	Metal Container Coating	October 6, 1994	March 23, 1995, 60 FR 15241.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*1*).
225	Wood Fired Appliances	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*). Applies within the Squaw Valley portion of the district.
226	Sulfur Content of Fuels—Lake Tahoe Air Basin.	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
228	Fugitive Dust—Lake Tahoe Air Basin	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
231	Industrial, Institutional and Commercial Boiler, Steam Generator and Process Heaters.	October 9, 1997	November 1, 2011, 76 FR 67366.	Submitted on March 17, 2009. See 40 CFR 52.220(c)(363)(i)(D)(*1*).
233	Biomass Boilers	June 14, 2012	August 29, 2013, 78 FR 53249.	Submitted on September 21, 2012. See 40 CFR 52.220(c)(423)(i)(A)(*7*).
234	Automotive Refinishing Operations	July 1, 2011	December 5, 2011, 76 FR 75795.	Submitted on April 5, 2011. See 40 CFR 52.220(c)(388)(i)(E)(*4*).
235	Adhesives	October 11, 2012	August 30, 2013, 78 FR 53680.	Submitted on February 6, 2013. See 40 CFR 52.220(c)(428)(i)(A)(*1*).
236	Wood Products and Coating Operations.	July 1, 2011	November 21, 2011, 76 FR 71886.	Submitted on April 5, 2011. See 40 CFR 52.220(c)(388)(i)(E)(*1*).
238	Factory Coating of Flat Wood Paneling.	July 1, 2011	November 21, 2011, 76 FR 71886.	Submitted on April 5, 2011. See 40 CFR 52.220(c)(388)(i)(E)(*2*).
239	Graphic Arts Operations	October 11, 2012	March 13, 2014, 79 FR 14178.	Submitted on February 6, 2013. See 40 CFR 52.220(c)(428)(i)(A)(*2*).
240	Surface Preparation and Cleanup	December 11, 2003	March 13, 2014, 79 FR 14178.	Submitted on September 24, 2013. See 40 CFR 52.220(c)(434)(i)(A)(*1*).
242	Stationary Internal Combustion Engines.	April 10, 2003	November 1, 2011, 76 FR 67366.	Submitted on December 7, 2010. See 40 CFR 52.220(c)(389)(i)(B)(*2*).
243	Polyester Resin Operations	April 10, 2003	October 3, 2011, 76 FR 61057.	Submitted on December 7, 2010. See 40 CFR 52.220(c)(389)(i)(B)(*5*). Also see 85 FR 42728 (July 15, 2020).
244	Semiconductor Manufacturing Operations.	February 9, 1995	July 25, 1996, 61 FR 38571.	Submitted on May 24, 1995. See 40 CFR 52.220(c)(220)(i)(B)(*3*).
245	Surface Coating of Metal Parts and Products.	August 20, 2009	May 24, 2011, 76 FR 30025.	Submitted on January 10, 2010. See 40 CFR 52.220(c)(378)(i)(B)(*1*).
246	Natural Gas-Fired Water Heaters	June 19, 1997	November 1, 2011, 76 FR 67366.	Submitted on December 7, 2010. See 40 CFR 52.220(c)(389)(i)(B)(*3*).
247	Natural Gas-Fired Water Heaters, Small Boilers and Process Heaters.	February 13, 2014	October 7, 2014, 79 FR 60347.	Submitted on May 13, 2014. See 40 CFR 52.220(c)(441)(i)(B)(*2*).
249	Surface Coating of Plastic Parts and Products.	August 8, 2013	March 27, 2015, 80 FR 16289.	Submitted on May 13, 2014. See 40 CFR 52.220(c)(441)(i)(B)(*3*).
250	Stationary Gas Turbines	October 8, 2015	August 1, 2016, 81 FR 50348.	Submitted on March 11, 2016. See 40 CFR 52.220(c)(474)(i)(A)(*1*).
	Regulation 3—Open Burning			
301	Nonagricultural Burning Smoke Management.	August 9, 2018	July 28, 2021, 86 FR 40336.	Submitted on November 21, 2018. See 40 CFR 52.220(c)(527)(i)(C)(*1*).
302	Agricultural Waste Burning Smoke Management.	August 9, 2018	July 28, 2021, 86 FR 40336.	Submitted on November 21, 2018. See 40 CFR 52.220(c)(527)(i)(C)(*2*).
303	Prescribed Burning Smoke Management.	February 9, 2012	January 31, 2013, 78 FR 6736.	Submitted on September 21, 2012. See 40 CFR 52.220(c)(423)(i)(A)(*3*).
304	Land Development Burning Smoke Management.	February 9, 2012	January 31, 2013, 78 FR 6736.	Submitted on September 21, 2012. See 40 CFR 52.220(c)(423)(i)(A)(*4*).

TABLE 26—EPA-APPROVED PLACER COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS—Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
305	Residential Allowable Burning	October 11, 2018	July 28, 2021, 86 FR 40336.	Submitted on January 31, 2019 by CARB as an attachment to a letter dated January 23, 2019. See 40 CFR 52.220(c)(545)(i)(C)(*1*).
306	Open Burning of Nonindustrial Wood Waste at Designated Disposal Sites.	February 9, 2012	January 31, 2013, 78 FR 6736.	Submitted on September 21, 2012. See 40 CFR 52.220(c)(423)(i)(A)(*6*).
Regulation 4—Miscellaneous Provisions				
401	Responsibility	May 24, 1977	November 15, 1978, 43 FR 53035.	Submitted on October 13, 1977. See 40 CFR 52.220(c)(41)(x)(A).
405	Separation of Emissions	November 12, 1974	June 14, 1978, 43 FR 25684.	Submitted on January 10, 1975. See 40 CFR 52.220(c)(26)(xvii)(A).
406	Combination of Emissions	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
407	Circumvention	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
408	Source Record Keeping and Reporting.	October 19, 1993	April 30, 1997, 62 FR 23365.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(A)(*2*).
409	Public Records	May 24, 1977	November 15, 1978, 43 FR 53035.	Submitted on October 13, 1977. See 40 CFR 52.220(c)(41)(x)(A).
410	Recordkeeping for Volatile Organic Compound Emissions.	November 3, 1994	May 23, 1995, 60 FR 15241.	Submitted on December 19, 1994. See 40 CFR 52.220(c)(208)(i)(A)(*1*).
Regulation 5—Permits				
501	General Permit Requirements	April 8, 2021	September 26, 2023, 88 FR 65816.	Submitted on October 6, 2021. See 40 CFR 52.220(c)(495)(i)(A)(*1*).
502	New Source Review	June 13, 2024	January 6, 2026, 91 FR 337.	Submitted electronically on November 15, 2024 as an attachment to a letter dated November 13, 2024. See 40 CFR 52.220(c)(630)(i)(A)(*1*).
503	Emission Statement	October 8, 2020	July 29, 2022, 87 FR 45657.	Submitted on December 15, 2020 as an attachment to a letter dated December 14, 2020. See 40 CFR 52.220(c)(576)(i)(B)(*1*).
508	General Conformity	November 3, 1994	April 23, 1999, 64 FR 19916.	Submitted on December 22, 1994. See 40 CFR 52.220(c)(210)(i)(G)(*1*).
515	Stationary Rail Yard Control Emission Reduction Credits.	February 19, 2015	November 6, 2015, 80 FR 68766.	Submitted on June 26, 2015. See 40 CFR 52.220(c)(463)(i)(A)(*1*).
516	Rice Straw Emission Reduction Credits.	February 19, 2009	July 3, 2014, 79 FR 37956.	Submitted on April 6, 2009. See 40 CFR 52.220(c)(366)(i)(D)(*1*).
518	Prevention of Significant Deterioration (PSD) Permit Program.	October 13, 2016	August 28, 2018, 83 FR 43765.	Submitted on January 24, 2017. See 40 CFR 52.220(c)(497)(i)(A))(*2*).
Ozone Emergency Episode Plan				
No Citation	Ozone Emergency Episode Plan	June 11, 2015	December 8, 2015, 80 FR 76230.	Submitted on July 15, 2015. See 40 CFR 52.220(c)(465)(i)(A)(*1*).
RULES AND REGULATIONS (LAKE TAHOE AIR BASIN PORTION OF DISTRICT)				
Regulation 2—Prohibitions				
206	Incinerator Burning and Pathological Incinerator.	June 19, 1979	May 18, 1981, 46 FR 27115.	Paragraph A is titled ''Incinerator Burning'' and paragraph B is titled ''Pathological Incinerator.'' Submitted on August 21, 1979. See 40 CFR 52.220(c)(80)(i)(A).
207	Particulate Matter	June 19, 1979	May 18, 1981, 46 FR 27115.	Submitted on August 21, 1979. See 40 CFR 52.220(c)(80)(i)(A).
RULES AND REGULATIONS (MOUNTAIN COUNTIES AIR BASIN AND SACRAMENTO VALLEY AIR BASIN PORTION OF DISTRICT)				
Regulation 2—Prohibitions				
207	Particulate Matter	May 24, 1977	November 15, 1978, 43 FR 53035.	Submitted on October 13, 1977. See 40 CFR 52.220(c)(41)(x)(A). Originally adopted for district-wide applicability but superseded in the Lake Tahoe Air Basin portion of the county by approval of Rule 207 at 46 FR 27115 (May 18, 1981).

TABLE 27—EPA-APPROVED SACRAMENTO METROPOLITAN AIR QUALITY MANAGEMENT DISTRICT REGULATIONS

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Original Codification of Rules and Regulations				
7	Ringelmann Chart	April 19, 1983	February 1, 1984, 49 FR 3987.	Submitted on July 19, 1983. See 40 CFR 52.220(c)(137)(iii)(A).
22a	Open Fires	August 3, 1977	August 4, 1978, 43 FR 34468.	Submitted on November 4, 1977. See 40 CFR 52.220(c)(42)(ii)(A).
Re-Codification of Rules and Regulations				
Regulation 1—General				
101	General Provisions and Definitions	October 27, 2011	August 9, 2012, 77 FR 47535.	Submitted on February 23, 2012. See 40 CFR 52.220(c)(411)(i)(A)(*2*).
102	Circumvention	November 29, 1983	December 5, 1984, 49 FR 47490.	Submitted on April 19, 1984. See 40 CFR 52.220(c)(154)(iii)(A).
103	Exceptions	November 29, 1983	December 5, 1984, 49 FR 47490.	Submitted on April 19, 1984. See 40 CFR 52.220(c)(154)(iii)(A).
104	General Conformity	November 3, 1994	April 23, 1999, 64 FR 19916.	Submitted on December 22, 1994. See 40 CFR 52.220(c)(210)(i)(H)(*1*).
105	Emission Statement	September 5, 1996	June 6, 2008, 73 FR 32240.	Submitted on May 18, 1998. See 40 CFR 52.220(c)(255)(i)(A)(*6*).
Regulation 2—Permits				
201	General Permit Requirements	November 20, 1984	July 13, 1987, 52 FR 26148.	Submitted on February 6, 1985. See 40 CFR 52.220(c)(159)(iv)(A).
203	Prevention of Significant Deterioration	January 27, 2011	July 20, 2011, 76 FR 43183.	Submitted on January 28, 2011. See 40 CFR 52.220(c)(390)(i)(A)(*1*).
214	Federal New Source Review	August 23, 2012	August 29, 2013, 78 FR 53270.	Submitted on September 26, 2012. See 40 CFR 52.220(c)(427)(i)(A)(*1*).
217	Public Notice Requirements for Permits.	August 23, 2012	August 29, 2013, 78 FR 53270.	Submitted on September 26, 2012. See 40 CFR 52.220(c)(427)(i)(A)(*2*).
Regulation 3—Fees				
307	Clean Air Act Penalty Fees	March 23, 2023	March 6, 2024, 89 FR 15962.	Submitted electronically on May 11, 2023 as an attachment to a letter dated May 10, 2023. See 40 CFR 52.220(c)(610)(i)(A)(*1*).
Regulation 4—Prohibitory Rules				
403	Fugitive Dust	November 29, 1983	December 5, 1984, 49 FR 47490.	Submitted on April 19, 1984. See 40 CFR 52.220(c)(154)(iii)(A).
404	Particulate Matter	November 20, 1984	July 13, 1987, 52 FR 26148.	Submitted on February 6, 1985. See 40 CFR 52.220(c)(159)(iv)(A).
405	Dust and Condensed Fumes	November 29, 1983	December 5, 1984, 49 FR 47490.	Submitted on April 19, 1984. See 40 CFR 52.220(c)(154)(iii)(A).
406	Specific Contaminants	November 29, 1983	December 5, 1984, 49 FR 47490.	Submitted on April 19, 1984. See 40 CFR 52.220(c)(154)(iii)(A).
407	Open Burning	November 29, 1983	December 5, 1984, 49 FR 47490.	Submitted on April 19, 1984. See 40 CFR 52.220(c)(154)(iii)(A).
408	Incinerator Burning	November 29, 1983	December 5, 1984, 49 FR 47490.	Submitted on April 19, 1984. See 40 CFR 52.220(c)(154)(iii)(A).
409	Orchard Heaters	November 29, 1983	December 5, 1984, 49 FR 47490.	Submitted on April 19, 1984. See 40 CFR 52.220(c)(154)(iii)(A).
410	Reduction of Animal Matter	November 29, 1983	December 5, 1984, 49 FR 47490.	Submitted on April 19, 1984. See 40 CFR 52.220(c)(154)(iii)(A).
411	NO_X from Boilers, Process Heaters and Steam Generators.	August 23, 2007	May 6, 2009, 74 FR 20880.	Submitted on March 7, 2008. See 40 CFR 52.220(c)(354)(i)(C)(*1*).
412	Stationary Internal Combustion Engines Located at Major Stationary Sources of NO_X.	June 1, 1995	April 30, 1996, 61 FR 18959.	Submitted on June 16, 1995. See 40 CFR 52.220(c)(222)(i)(C)(*3*).
413	Stationary Gas Turbines	March 24, 2005	January 10, 2008, 73 FR 1819.	Submitted on September 5, 2007. See 40 CFR 52.220(c)(352)(i)(A)(*1*).
414	Water Heaters, Boilers and Process Heaters Rated Less Than 1,000,000 BTU per hour.	October 25, 2018	July 13, 2021, 86 FR 36665.	Submitted on January 31, 2019 as an attachment to a letter dated January 23, 2019. See 40 CFR 52.220(c)(545)(i)(B)(*1*).
417	Wood Burning Appliances	October 26, 2006	April 11, 2013, 78 FR 21540.	Submitted on September 21, 2012. See 40 CFR 52.220(c)(423)(i)(B)(*1*).
420	Sulfur Content of Fuels	November 29, 1983	December 5, 1984, 49 FR 47490.	Submitted on April 19, 1984. See 40 CFR 52.220(c)(154)(iii)(A).
421 (excluding section 402).	Mandatory Episodic Curtailment of Wood and Other Solid Fuel Burning.	September 24, 2009	March 16, 2015, 80 FR 13495.	Approval of Rule 421 excludes section 402 (''Penalties''). Submitted on September 21, 2012. See 40 CFR 52.220(c)(423)(i)(B)(*2*). The Financial Hardship Exemption Decision Tree, dated December 12, 2007, was also approved and is included in the tables in paragraph (e) listing the nonregulatory and quasi-regulatory portion of the California SIP.

TABLE 27—EPA-APPROVED SACRAMENTO METROPOLITAN AIR QUALITY MANAGEMENT DISTRICT REGULATIONS—Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
441	Organic Solvents	November 29, 1983	January 24, 1985, 50 FR 3338.	Submitted on April 19, 1984. See 40 CFR 52.220(c)(154)(iii)(B).
442	Architectural Coatings	September 24, 2015	October 4, 2016, 81 FR 68320.	Submitted on March 11, 2016. See 40 CFR 52.220(c)(474)(i)(B)(*1*).
443	Leaks from Synthetic Organic Chemical and Polymer Manufacturing.	September 5, 1996	November 9, 1998, 63 FR 60214.	Submitted on May 18, 1998. See 40 CFR 52.220(c)(255)(i)(A)(*2*).
444	Petroleum Solvent Dry Cleaning	November 29, 1983	January 24, 1985, 50 FR 3338.	Submitted on April 19, 1984. See 40 CFR 52.220(c)(154)(iii)(B).
446	Storage of Petroleum Products	November 16, 1993	September 16, 1994, 59 FR 47544.	Submitted on March 29, 1994. See 40 CFR 52.220(c)(196)(i)(A)(*1*).
447	Organic Liquid Loading	April 2, 1998	November 26, 1999, 64 FR 66393.	Submitted on June 23, 1998. See 40 CFR 52.220(c)(256)(i)(G)(*1*).
448	Gasoline Transfer into Stationary Storage Containers.	February 26, 2009	January 7, 2013, 78 FR 897.	Submitted on April 5, 2011. See 40 CFR 52.220(c)(388)(i)(D)(*4*).
449	Transfer of Gasoline into Vehicle Fuel Tanks.	February 26, 2009	January 7, 2013, 78 FR 897.	Submitted on April 5, 2011. See 40 CFR 52.220(c)(388)(i)(D)(*5*).
450	Graphic Arts Operations	October 23, 2008	April 9, 2010, 75 FR 18068.	Submitted on April 29, 2009. See 40 CFR 52.220(c)(362)(i)(C)(*1*).
451	Surface Coating of Miscellaneous Metal Parts and Products.	October 28, 2010	November 21, 2011, 76 FR 71886.	Submitted on April 5, 2011. See 40 CFR 52.220(c)(388)(i)(D)(*3*).
452	Can Coating	September 25, 2008	April 9, 2010, 75 FR 18068.	Submitted on September 15, 2009. See 40 CFR 52.220(c)(377)(i)(A)(*1*).
453	Cutback and Emulsified Asphalt Paving Materials.	November 29, 1983	January 24, 1985, 50 FR 3338.	Submitted on April 19, 1984. See 40 CFR 52.220(c)(154)(iii)(B).
454	Degreasing Operations	September 25, 2008	April 9, 2010, 75 FR 18068.	Submitted on September 15, 2009. See 40 CFR 52.220(c)(377)(i)(A)(*1*).
456	Aerospace Assembly and Component Coating Operations.	October 23, 2008	July 14, 2010, 75 FR 40726.	Submitted on September 15, 2009. See 40 CFR 52.220(c)(377)(i)(A)(*3*).
458	Large Commercial Bread Bakeries	September 5, 1996	November 9, 1998, 63 FR 60214.	Submitted on May 18, 1998. See 40 CFR 52.220(c)(255)(i)(A)(*2*).
459	Automotive, Mobile Equipment, and Associated Parts and Components Coating Operations.	August 25, 2011	August 9, 2012, 77 FR 47536.	Submitted on February 23, 2012. See 40 CFR 52.220(c)(411)(i)(A)(*1*).
463	Wood Products Coatings	September 25, 2008	April 9, 2010, 75 FR 18068.	Submitted on September 15, 2009. See 40 CFR 52.220(c)(377)(i)(A)(*1*).
464	Organic Chemical Manufacturing Operations.	April 28, 2016	December 4, 2017, 82 FR 57123.	Submitted on August 22, 2016. See 40 CFR 52.220(c)(488)(i)(C)(*1*).
465	Polyester Resin Operations	September 25, 2008	July 26, 2011, 76 FR 44493.	Submitted on September 15, 2009. See 40 CFR 52.220(c)(377)(i)(A)(*4*).
466	Solvent Cleaning	October 28, 2010	September 29, 2011, 76 FR 60376.	Submitted on April 5, 2011. See 40 CFR 52.220(c)(388)(i)(D)(*1*).
468	Surface Coating of Plastic Parts and Products.	March 22, 2018	November 19, 2020, 85 FR 73640.	Submitted on May 23, 2018. See 40 CFR 52.220(c)(518)(i)(C)(*1*).
Regulation 5—Agricultural Burning				
501	Agricultural Burning	November 29, 1983	December 5, 1984, 49 FR 47490.	Submitted on April 19, 1984. See 40 CFR 52.220(c)(154)(iii)(A).
Regulation 7—Emergency Episode Plan				
701	Emergency Episode Plan	May 27, 1999	September 5, 2000, 65 FR 53602.	Submitted on March 28, 2000. See 40 CFR 52.220(c)(277)(i)(B)(*1*).

Original Codification of Rules and Regulations				
461.2	Vegetable Oil Processing Operations	April 11, 1991	January 18, 1994, 59 FR 2535.	Submitted on May 30, 1991. See 40 CFR 52.220(c)(185)(i)(C)(*5*).
Recodification of Rules and Regulations				
Regulation I—General Provisions				
1010	Title	June 18, 1992	June 3, 1999, 64 FR 29790; corrected on June 30, 1999, 64 FR 35002.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*5*).
1020	Definitions	February 21, 2013	October 2, 2014, 79 FR 59433.	Submitted on February 10, 2014. See 40 CFR 52.220(c)(442)(i)(B)(*1*).
1040	Enforcement	December 17, 1992	July 1, 2014, 79 FR 37224.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*10*).
1050	Order of Abatement	December 17, 1992	July 1, 2014, 79 FR 37224.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*10*).
1070	Inspections	December 17, 1992	July 1, 2014, 79 FR 37224.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*10*).
1080	Stack Monitoring	December 17, 1992	April 26, 2004, 69 FR 22441.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*8*).
1081	Source Sampling	December 16, 1993	April 26, 2004, 69 FR 22441.	Submitted on May 24, 1994. See 40 CFR 52.220(c)(197)(i)(C)(*5*).
1090	Penalty	December 17, 1992	July 1, 2014, 79 FR 37224.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*10*).
1110	Circumvention	December 17, 1992	July 23, 1999, 64 FR 39920.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*6*).
1130	Severability	December 17, 1992	June 3, 1999, 64 FR 29790; corrected on June 30, 1999, 64 FR 35002.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*5*).
1140	Applicability of Emission Limits	December 17, 1992	July 23, 1999, 64 FR 39920.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*6*).
1150	Separation and Combination	December 17, 1992	July 23, 1999, 64 FR 39920.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*6*).
1160	Emission Statements	November 18, 1992	February 12, 2019, 84 FR 3302.	Submitted on January 11, 1993. See 40 CFR 52.220(c)(191)(i)(E)(*1*).
Regulation II—Permits				
2010	Permits Required	December 17, 1992	July 23, 1999, 64 FR 39920.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*6*).
2020	Exemptions	August 18, 2011	September 17, 2014, 79 FR 55637.	Submitted on September 28, 2011. See 40 CFR 52.220(c)(440)(i)(A)(*1*).
2021	Experimental Research Operations	December 17, 1992	November 17, 2021, 86 FR 64071.	Submitted on November 18, 1993. See 40 CFR 52.220(c)(194)(i)(C)(*6*).
2031	Transfer of Permits	December 17, 1992	July 23, 1999, 64 FR 39920.	Submitted on November 18, 1993. See 40 CFR 52.220(c)(194)(i)(C)(*4*).
2050	Cancellation of Application	December 16, 1993	October 24, 2008, 73 FR 63382.	Submitted on May 24, 1994. See 40 CFR 52.220(c)(197)(i)(C)(*6*).
2070	Standards for Granting Applications	December 17, 1992	July 23, 1999, 64 FR 39920.	Submitted on November 18, 1993. See 40 CFR 52.220(c)(194)(i)(C)(*4*).
2080	Conditional Approval	December 17, 1992	July 23, 1999, 64 FR 39920.	Submitted on November 18, 1993. See 40 CFR 52.220(c)(194)(i)(C)(*4*).
2092	Standards for Permits to Operate	December 17, 1992	July 23, 1999, 64 FR 39920.	Submitted on November 18, 1993. See 40 CFR 52.220(c)(194)(i)(C)(*4*).
2201	New and Modified Stationary Source Review Rule.	August 15, 2019	July 10, 2023, 88 FR 43434.	Submitted on November 20, 2019 as an attachment to a letter dated November 15, 2019. See 40 CFR 52.220(c)(598)(i)(A)(*1*).
2250	Permit-Exempt Equipment Registration.	October 19, 2006	September 14, 2020, 85 FR 56521.	Submitted on April 30, 2020. See 40 CFR 52.220(c)(540)(i)(A)(*1*).

TABLE 29—EPA-APPROVED SAN JOAQUIN VALLEY UNIFIED AIR POLLUTION CONTROL DISTRICT REGULATIONS; FRESNO COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; KERN COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; KINGS COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; MADERA COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; MERCED COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; SAN JOAQUIN COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; STANISLAUS COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; TULARE COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS—Continued

2410	Prevention of Significant Deterioration	November 26, 2012	October 26, 2012, 77 FR 65305.	Submitted on August 23, 2011. See 40 CFR 52.220(c)(415)(i)(A)(*1*). Final approval of this rule is based, in part, on the clarifications contained in a May 18, 2012 letter from the San Joaquin Valley Unified Air Pollution Control District regarding specific implementation of parts of the Prevention of Significant Deterioration program. The letter is included in the table listing the nonregulatory portions of the California SIP.
2530	Federally Enforceable Potential to Emit.	June 10, 2010	May 11, 2010, 75 FR 26102.	Submitted on March 17, 2009. See 40 CFR 52.220(c)(363)(i)(A)(*6*).
Regulation III—Fees				
3170	Federally Mandated Ozone Nonattainment Fee.	May 19, 2011	August 20, 2012, 77 FR 50021.	Submitted on June 14, 2011. See 40 CFR 52.220(c)(412)(i)(A)(*1*).
3171	Federally Mandated Ozone Nonattainment Fee—1997 8-Hour Standard.	October 19, 2023	January 6, 2026, 91 FR 336.	Submitted electronically on January 10, 2024 as an attachment to a letter dated December 27, 2023. See 40 CFR 52.220(c)(626)(i)(C)(*1*).
3172	Federally Mandated Ozone Nonattainment Fee—2008 8-Hour Standard.	December 21, 2023	July 30, 2026, 91 FR 47962.	Submitted electronically on March 13, 2024 as an attachment to a letter dated March 7, 2024. See 40 CFR 52.220(c)(632)(i)(A)(1).
3173	Federally Mandated Ozone Nonattainment Fee—2015 8-Hour Standard.	December 21, 2023	July 30, 2026, 91 FR 47962.	Submitted electronically on March 13, 2024 as an attachment to a letter dated March 7, 2024. See 40 CFR 52.220(c)(632)(i)(A)(2).
Regulation IV—Prohibitions				
4101	Visible Emissions	February 17, 2005	August 11, 2005, 70 FR 46770.	Submitted on April 26, 2005. See 40 CFR 52.220(c)(336)(i)(A)(*1*).
4103	Open Burning	June 1, 2010	January 4, 2012, 77 FR 214.	Submitted on April 5, 2011. See 40 CFR 52.220(c)(388)(i)(B)(*2*).
4104	Reduction of Animal Matter	December 17, 1992	March 9, 2010, 75 FR 10690.	Submitted on August 24, 2007. See 40 CFR 52.220(c)(351)(i)(C)(*1*).
4106	Prescribed Burning and Hazard Reduction Burning.	June 21, 2001	February 27, 2002, 67 FR 8894.	Submitted on October 30, 2001. See 40 CFR 52.220(c)(288)(i)(A)(*1*).
4201	Particulate Matter Concentration	December 17, 1992	April 4, 2002, 67 FR 16026.	Submitted on November 18, 1993. See 40 CFR 52.220(c)(194)(i)(C)(*5*).
4202	Particulate Matter—Emission Rate	December 17, 1992	April 21, 2000, 65 FR 21347.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*7*).
4204	Cotton Gins	February 17, 2005	November 9, 2006, 71 FR 65740.	Submitted on July 15, 2005. See 40 CFR 52.220(c)(337)(i)(A)(*3*).
4301	Fuel Burning Equipment	December 17, 1992	May 18, 1999, 64 FR 26876.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*4*).
4302	Incinerator Burning	December 16, 1993	August 19, 1999, 64 FR 45170.	Submitted on May 24, 1994. See 40 CFR 52.220(c)(197)(i)(C)(*3*).
4303	Orchard Heaters	December 16, 1993	August 19, 1999, 64 FR 45170.	Submitted on May 24, 1994. See 40 CFR 52.220(c)(197)(i)(C)(*3*).
4304	Equipment Tuning Procedure for Boilers, Steam Generators and Process Heaters.	October 19, 1995	November 16, 2001, 66 FR 57666.	Submitted on March 26, 1996. See 40 CFR 52.220(c)(230)(i)(D)(*2*).
4305	Boilers, Steam Generators and Process Heaters—Phase 2.	August 21, 2003	May 18, 2004, 69 FR 28061.	Submitted on September 29, 2003. See 40 CFR 52.220(c)(325)(i)(A)(*1*).
4306	Boilers, Steam Generators and Process Heaters-Phase 3.	October 16, 2008	January 13, 2010, 75 FR 1715.	Submitted on March 17, 2009. See 40 CFR 52.220(c)(363)(i)(A)(*3*).
4307	Boilers, Steam Generators, and Process Heaters—2.0 MMBtu/hr to 5.0 MMBtu/hr.	April 21, 2016	August 14, 2017, 82 FR 37817.	Submitted on August 22, 2016. See 40 CFR 52.220(c)(488)(i)(B)(*1*).
4308	Boilers, Steam Generators, and Process Heaters-0.075 MMBtu/hr to less than 2.0 MMBtu/hr.	November 14, 2013	February 12, 2015, 80 FR 7803.	Submitted on May 13, 2014. See 40 CFR 52.220(c)(441)(i)(D)(*3*).
4309	Dryers, Dehydrators and Ovens	December 15, 2005	May 30, 2007, 72 FR 29886.	Submitted on March 10, 2006. See 40 CFR 52.220(c)(344)(i)(C)(*1*).
4311	Flares	December 17, 2020	December 28, 2022, 87 FR 79806.	Submitted on March 12, 2021 as an attachment to a letter dated March 10, 2021. See 40 CFR 52.220(c)(587)(i)(A)(*1*).
4313	Lime Kilns	March 27, 2003	September 4, 2003, 68 FR 52510.	Submitted on June 5, 2003. See 40 CFR 52.220(c)(316)(i)(B)(*1*).
4320	Advanced Emission Reduction Options for Boilers, Steam Generators and Process Heaters greater than 5.0 MMbtu/hr.	October 16, 2008	March 25, 2011, 76 FR 16696.	Submitted on March 17, 2009. See 40 CFR 52.220(c)(363)(i)(A)(*7*).
4351	Boilers, Steam Generators and Process Heaters—Phase 1.	August 21, 2003	May 18, 2004, 69 FR 28061.	Submitted on September 29, 2003. See 40 CFR 52.220(c)(325)(i)(A)(*1*).

TABLE 29—EPA-APPROVED SAN JOAQUIN VALLEY UNIFIED AIR POLLUTION CONTROL DISTRICT REGULATIONS; FRESNO COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; KERN COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; KINGS COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; MADERA COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; MERCED COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; SAN JOAQUIN COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; STANISLAUS COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; TULARE COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS—Continued

Regulation VI—Air Pollution Emergency Contingency Plan				
6010	General Statement	December 17, 1992	March 18, 1999, 64 FR 13351.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*3*).
6020	Applicable Areas	December 17, 1992	March 18, 1999, 64 FR 13351.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*3*).
6030	Episode Criteria Levels	November 13, 1996	March 18, 1999, 64 FR 13351.	Submitted on March 3, 1997. See 40 CFR 52.220(c)(244)(i)(E)(*1*).
6040	Episode Stages	December 17, 1992	March 18, 1999, 64 FR 13351.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*3*).
6050	Division of Responsibility	December 17, 1992	March 18, 1999, 64 FR 13351.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*3*).
6060	Administration of Emergency Program	December 17, 1992	March 18, 1999, 64 FR 13351.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*3*).
6070	Advisory of High Air Pollution Potential.	December 17, 1992	March 18, 1999, 64 FR 13351.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*3*).
6080	Declaration of Episode	December 17, 1992	March 18, 1999, 64 FR 13351.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*3*).
6081	Episode Action—Health Advisory	December 17, 1992	March 18, 1999, 64 FR 13351.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*3*).
6090	Episode Action Stage 1 (Health Advisory—Alert).	December 17, 1992	March 18, 1999, 64 FR 13351.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*3*).
6100	Episode Action Stage 2 (Warning)	December 17, 1992	March 18, 1999, 64 FR 13351.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*3*).
6110	Episode Action Stage 3 (Emergency)	December 17, 1992	March 18, 1999, 64 FR 13351.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*3*).
6120	Episode Termination	December 17, 1992	March 18, 1999, 64 FR 13351.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*3*).
6130	Stationary Source Curtailment Plans and Traffic Abatement Plans.	December 17, 1992	March 18, 1999, 64 FR 13351.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*3*).
6140	Episode Abatement Plan	December 17, 1992	March 18, 1999, 64 FR 13351.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*3*).
6150	Enforcement	December 17, 1992	March 18, 1999, 64 FR 13351.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(D)(*3*).
Regulation VIII—Fugitive PM_{10} Prohibitions				
8011	General Requirements	August 19, 2004	February 17, 2006, 71 FR 8461.	Submitted on September 23, 2004. See 40 CFR 52.220(c)(334)(i)(B)(*2*).
8021	Construction, Demolition, Excavation, Extraction, and Other Earthmoving Activities.	August 19, 2004	February 17, 2006, 71 FR 8461.	Submitted on September 23, 2004. See 40 CFR 52.220(c)(334)(i)(B)(*2*).
8031	Bulk Materials	August 19, 2004	February 17, 2006, 71 FR 8461.	Submitted on September 23, 2004. See 40 CFR 52.220(c)(334)(i)(B)(*2*).
8041	Carryout and Trackout	August 19, 2004	February 17, 2006, 71 FR 8461.	Submitted on September 23, 2004. See 40 CFR 52.220(c)(334)(i)(B)(*2*).
8051	Open Areas	September 21, 2023	October 4, 2024, 89 FR 80749.	Submitted electronically on October 16, 2023, as an attachment to a letter dated October 13, 2023. See 40 CFR 52.220(c)(619)(i)(A)(*1*).
8061	Paved and Unpaved Roads	August 19, 2004	February 17, 2006, 71 FR 8461.	Submitted on September 23, 2004. See 40 CFR 52.220(c)(334)(i)(B)(*2*).
8071	Unpaved Vehicle/Equipment Traffic Areas.	September 16, 2004	February 17, 2006, 71 FR 8461.	Submitted on September 23, 2004. See 40 CFR 52.220(c)(334)(i)(B)(*2*).
8081	Agricultural Sources	September 16, 2004	February 17, 2006, 71 FR 8461.	Submitted on September 23, 2004. See 40 CFR 52.220(c)(334)(i)(B)(*2*).
Regulation IX—Mobile and Indirect Sources				
9110	General Conformity	October 20, 1994	April 23, 1999, 64 FR 19916.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(G)(*1*).
9310	School Bus Fleets	September 21, 2006	March 8, 2010, 75 FR 10420.	Submitted on December 29, 2006. See 40 CFR 52.220(c)(348)(i)(A)(*2*).
9410	Employer Based Trip Reduction	December 17, 2009	February 9, 2016, 81 FR 6761.	Submitted on May 17, 2010. See 40 CFR 52.220(c)(379)(i)(C)(*7*).
9510	Indirect Source Review (ISR)	March 21, 2018	June 25, 2021, 86 FR 33542.	Amended by the District on December 21, 2017. Submitted by CARB on May 23, 2018. See 40 CFR 52.220(c)(518)(i)(E)(*1*).
9610	State Implementation Plan Credit for Emission Reductions Generated through Incentive Programs.	June 20, 2013	April 9, 2015, 80 FR 19020.	Submitted on June 26, 2013. See 40 CFR 52.220(c)(455)(i)(A)(*1*).

408.1	Fuel Burning Equipment—Oxides of Nitrogen.	June 1, 1976	June 14, 1978, 43 FR 25689.	Submitted on August 2, 1976. See 40 CFR 52.220(c)(32)(iii)(C).
421 (paragraph (a))	Burning Reports	June 1, 1976	June 14, 1978, 43 FR 25689.	Submitted on August 2, 1976. See 40 CFR 52.220(c)(32)(iii)(C).
Rules and Regulations (San Joaquin County portion of the District)				
Original Codification of Rules and Regulations				
4.1	Prohibitions under State Law	January 1, 1970	May 31, 1972, 37 FR 10842.	Submitted on February 21, 1972. See 40 CFR 52.220(b).
Recodification of Rules and Regulations				
103	Confidential Information	July 6, 1976	October 4, 1977, 42 FR 53961.	Submitted on November 10, 1976. See 40 CFR 52.220(c)(35)(v)(A).
103.1	Inspection of Public Records	July 6, 1976	October 4, 1977, 42 FR 53961.	Submitted on November 10, 1976. See 40 CFR 52.220(c)(35)(v)(A).
106	Land Use	May 30, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
110	Equipment Breakdown	September 27, 1983	December 5, 1984, 49 FR 47490.	Submitted on March 14, 1984. See 40 CFR 52.220(c)(153)(iv)(A).
209.4	Implementation Plans	May 29, 1979	June 18, 1982, 47 FR 26384.	Submitted on October 15, 1979. See 40 CFR 52.220(c)(52)(vii)(C).
407	Sulfur Compounds	September 27, 1983	December 5, 1984, 49 FR 47490.	Submitted on March 14, 1984. See 40 CFR 52.220(c)(153)(iv)(A).
407.1	Disposal of Solid or Liquid Waste	May 30, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
408.1	Fuel Burning Equipment—Oxides of Nitrogen.	January 1, 1975	August 22, 1977, 42 FR 42219.	Submitted on October 23, 1974. See 40 CFR 52.220(c)(25)(ii)(A).
420.1	Burning Reports	January 1, 1975	August 22, 1977, 42 FR 42219.	Submitted on October 23, 1974. See 40 CFR 52.220(c)(25)(ii)(A).
Rules and Regulations (Stanislaus County portion of the District)				
Original Codification of Rules and Regulations				
I	Introduction	January 20, 1970	May 31, 1972, 37 FR 10842.	Submitted on February 21, 1972. See 40 CFR 52.220(b).
Recodification of Rules and Regulations				
103	Confidential Information	June 17, 1980	December 9, 1981, 46 FR 60202.	Submitted on July 25, 1980. See 40 CFR 52.220(c)(88)(i)(B).
103.1	Inspection of Public Records	July 19, 1977	August 18, 1978, 43 FR 36624.	Submitted on November 4, 1977. See 40 CFR 52.220(c)(42)(iv)(A).
106	Land Use	April 25, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
213	Violation of Permit Prohibited	July 12, 1983	May 3, 1984, 49 FR 18824.	Submitted on August 30, 1983. See 40 CFR 52.220(c)(140)(iii)(A).
407	Sulfur Compounds	April 25, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
407.1	Disposal of Solid and Liquid Wastes	May 4, 1976	May 18, 1977, 42 FR 25501; corrected on August 22, 1977, 42 FR 42219.	Submitted on August 2, 1976. See 40 CFR 52.220(c)(32)(ii)(A).
Rules and Regulations (Tulare County portion of the District)				
Original Codification of Rules and Regulations				
203	Referrals by Planning Department	February 10, 1970	May 31, 1972, 37 FR 10842.	Submitted on February 21, 1972. See 40 CFR 52.220(b).
306 (paragraph (b))	Sulfur and Fluorine Compounds	February 10, 1970	May 31, 1972, 37 FR 10842.	Submitted on February 21, 1972. See 40 CFR 52.220(b). Paragraph (a) establishes a sulfur compound emission limit, and it was superseded by approval of Rule 407 (Sulfur Compounds) at 37 FR 19812 (September 22, 1972).

TABLE 29—EPA-APPROVED SAN JOAQUIN VALLEY UNIFIED AIR POLLUTION CONTROL DISTRICT REGULATIONS; FRESNO COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; KERN COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; KINGS COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; MADERA COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; MERCED COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; SAN JOAQUIN COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; STANISLAUS COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; TULARE COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS—Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Recodification of Rules and Regulations				
103	Confidential Information	August 31, 1976	September 21, 1977, 42 FR 47556.	Submitted on November 10, 1976. See 40 CFR 52.220(c)(35)(vi)(A).
103.1	Inspection of Public Records	August 31, 1976	September 21, 1977, 42 FR 47556.	Submitted on November 10, 1976. See 40 CFR 52.220(c)(35)(vi)(A).
106	Land Use	May 18, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
406	Process Weight—Portland Cement Plants.	October 23, 1974	August 22, 1977, 42 FR 42219.	Submitted on October 23, 1974. See 40 CFR 52.220(c)(25)(iv)(A).
407	Sulfur Compounds	May 18, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
407.1 (excluding paragraph (b)).	Disposal of Solid or Liquid Waste	August 31, 1976	September 21, 1977, 42 FR 47556.	Paragraph (b) was disapproved at 42 FR 47556 (September 21, 1977). Submitted on November 10, 1976. See 40 CFR 52.220(c)(35)(vi)(A).
409	Fuel Burning Equipment—Oxides of Nitrogen.	August 31, 1976	September 21, 1977, 42 FR 47556.	Submitted on November 10, 1976. See 40 CFR 52.220(c)(35)(vi)(A).

Rules and Regulations (District-Wide Applicability)				
Regulation I—General Provisions				
101	Title	April 1, 1977	December 19, 1978, 43 FR 59065.	Submitted on October 13, 1977. See 40 CFR 52.220(c)(41)(xiv)(A).
102	Definition of Terms	January 10, 2020	July 9, 2021, 86 FR 36227.	Submitted on September 16, 2020. See 40 CFR 52.220(c)(556)(i)(A)(1).
103	Definition of Geographical Areas	January 9, 1976	June 14, 1978, 43 FR 25684.	Adopted by the Southern California Air Pollution Control District and remains applicable throughout the SCAQMD. Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(B).
104	Reporting of Source Test Data and Analyses.	January 9, 1976	June 14, 1978, 43 FR 25684.	Adopted by the Southern California Air Pollution Control District and remains applicable throughout the SCAQMD. Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(B).
106	Increments of Progress	January 9, 1976	June 14, 1978, 43 FR 25684.	Adopted by the Southern California Air Pollution Control District and remains applicable throughout the SCAQMD. Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(B).
108	Alternative Emission Control Plans	April 6, 1990	August 30, 1993, 58 FR 45445.	Submitted on December 31, 1990. See 40 CFR 52.220(c)(182)(i)(A)(3).
109	Recordkeeping for Volatile Organic Compound Emissions.	May 2, 2003	January 22, 2004, 69 FR 3018.	Submitted on August 11, 2003. See 40 CFR 52.220(c)(320)(i)(B)(1).
Regulation II—Permits				
201	Permit to Construct	January 5, 1990	May 13, 1999, 64 FR 25828.	Submitted on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(7).
201.1	Permit Conditions in Federally Issued Permits to Construct.	January 5, 1990	May 13, 1999, 64 FR 25828.	Submitted on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(7).
202 (excluding paragraph (c)).	Temporary Permit to Operate	January 9, 1976	November 9, 1978, 43 FR 52237.	Adopted by the Southern California Air Pollution Control District and remains applicable throughout the SCAQMD. Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(C).

TABLE 34—EPA-APPROVED SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT REGULATIONS; LOS ANGELES COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; ORANGE COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; RIVERSIDE COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; SAN BERNARDINO COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS—Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
202 (paragraph (c))	Temporary Permit to Operate	May 7, 1976	November 9, 1978, 43 FR 52237.	Adopted by the Southern California Air Pollution Control District and remains applicable throughout the SCAQMD. Submitted on August 2, 1976. See 40 CFR 52.220(c)(32)(iv)(C).
203	Permit to Operate	January 5, 1990	May 13, 1999, 64 FR 25828.	Submitted on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(7).
204	Permit Conditions	October 8, 1993	May 13, 1999, 64 FR 25828.	Submitted on February 28, 1994. See 40 CFR 52.220(c)(217)(i)(C)(1).
205	Expiration of Permits to Construct	January 5, 1990	May 13, 1999, 64 FR 25828.	Submitted on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(7).
206	Posting of Permit to Operate	October 8, 1993	May 13, 1999, 64 FR 25828.	Submitted on February 28, 1994. See 40 CFR 52.220(c)(217)(i)(C)(1).
207	Altering or Falsifying of Permit	January 9, 1976	November 9, 1978, 43 FR 52237.	Adopted by the Southern California Air Pollution Control District and remains applicable throughout the SCAQMD. Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(C).
208	Permit and Burn Authorization for Open Burning.	December 21, 2001	April 8, 2002, 67 FR 16644.	Submitted on January 22, 2002. See 40 CFR 52.220(c)(293)(i)(A)(1).
209	Transfer and Voiding of Permits	January 5, 1990	May 13, 1999, 64 FR 25828.	Submitted on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(7).
210	Applications	October 8, 1993	May 13, 1999, 64 FR 25828.	Submitted on February 28, 1994. See 40 CFR 52.220(c)(217)(i)(C)(1).
212	Standards for Approving Permits	December 7, 1995	December 4, 1996, 61 FR 64291.	Submitted on August 28, 1996. See 40 CFR 52.220(c)(240)(i)(A)(1).
217	Provision for Sampling and Testing Facilities.	January 5, 1990	May 13, 1999, 64 FR 25828.	Submitted on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(7).
218	Continuous Emission Monitoring	May 14, 1999	June 8, 2010, 75 FR 32293.	Submitted on July 23, 1999. See 40 CFR 52.220(c)(268)(i)(A)(2).
218.1	Continuous Emission Monitoring Performance Specifications.	May 14, 1999	June 8, 2010, 75 FR 32293.	Submitted on July 23, 1999. See 40 CFR 52.220(c)(268)(i)(A)(3).
219	Equipment Not Requiring a Written Permit Pursuant to Regulation II.	September 4, 1981	July 6, 1982, 47 FR 29231.	Submitted on October 23, 1981. See 40 CFR 52.220(c)(103)(xviii)(A).
220	Exemption—Net Increase in Emissions.	August 7, 1981	July 6, 1982, 47 FR 29231.	Submitted on October 23, 1981. See 40 CFR 52.220(c)(103)(xviii)(A).
221	Plans	January 4, 1985	April 17, 1987, 52 FR 12522.	Submitted on November 12, 1985. See 40 CFR 52.220(c)(165)(i)(B)(1).
223	Emission Reduction Permits for Large Confined Animal Facilities.	June 2, 2006	July 13, 2015, 80 FR 39966.	Submitted on March 17, 2009. See 40 CFR 52.220(c)(363)(i)(F)(1).
	Regulation III—Fees			
301 (paragraphs (e)(1), except (e)(1)(C), (e)(2), (5) and (8) only).	Permitting and Associated Fees	July 12, 2019	October 1, 2019, 84 FR 52005.	Submitted on August 5, 2019. See 40 CFR 52.220(c)(526)(i)(A)(1).
317	Clean Air Act Non-Attainment Fees	February 4, 2011	December 14, 2012, 77 FR 74372.	Submitted on April 22, 2011. See 40 CFR 52.220(c)(418)(i)(A)(1).
317.1	Clean Air Act Nonattainment Fees For 8-Hour Ozone Standards	June 7, 2024	December 11, 2025, 90 FR 57364.	Submitted on August 13, 2024. See 40 CFR 52.220(c)(629)(i)(A)(1).
	Regulation IV—Prohibitions			
401	Visible Emissions	March 2, 1984	January 29, 1985, 50 FR 3906.	Submitted on July 10, 1984. See 40 CFR 52.220(c)(155)(iv)(B).
403	Fugitive Dust	June 3, 2005	March 10, 2008, 73 FR 12639.	Submitted on October 20, 2005. See 40 CFR 52.220(c)(342)(i)(C)(4).
403 Implementation Handbook (Chapters 5, 7 and 8).	Fugitive Dust	April 2, 2004	November 14, 2005, 70 FR 69081.	Submitted on November 16, 2004. See 40 CFR 52.220(c)(340)(i)(A)(1).
403.1 (excluding paragraph (j)).	Supplemental Fugitive Dust Control Requirements for Coachella Valley Sources.	April 2, 2004	November 14, 2005, 70 FR 69081.	Paragraph (j) relates to fees. Submitted on July 29, 2004. See 40 CFR 52.220(c)(333)(i)(A)(2).
403.1 Implementation Handbook (Chapters 2, 3, 4 and 7).	Supplemental Fugitive Dust Control Requirements for Coachella Valley Sources.	April 2, 2004	November 14, 2005, 70 FR 69081.	Submitted on November 16, 2004. See 40 CFR 52.220(c)(340)(i)(A)(1).
404 (excluding table 404(a)).	Particulate Matter—Concentration	February 7, 1986	September 2, 1998, 63 FR 46659.	Submitted on June 4, 1986. See 40 CFR 52.220(c)(169)(i)(A)(1). The submittal did not include table 404(a).
404 (table 404(a))	Particulate Matter—Concentration	October 15, 1979	September 28, 1981, 46 FR 47451.	Submitted on December 17, 1979. See 40 CFR 52.220(c)(58)(ii)(B).
405 (excluding table 405(a)).	Solid Particulate Matter—Weight	February 7, 1986	September 2, 1998, 63 FR 46659.	Submitted on June 4, 1986. See 40 CFR 52.220(c)(169)(i)(A)(1). The submittal did not include table 405(a).
405 (table 405(a))	Solid Particulate Matter—Weight	May 7, 1976	September 28, 1981, 46 FR 47451.	Submitted on April 23, 1980. See 40 CFR 52.220(c)(69)(ii).

TABLE 34—EPA-APPROVED SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT REGULATIONS; LOS ANGELES COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; ORANGE COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; RIVERSIDE COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; SAN BERNARDINO COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS—Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
407	Liquid and Gaseous Air Contaminants	April 2, 1982	November 10, 1982, 47 FR 50864.	Submitted on August 6, 1982. See 40 CFR 52.220(c)(124)(iv)(A).
408	Circumvention	May 7, 1976	June 14, 1978, 43 FR 25684.	Adopted by the Southern California Air Pollution Control District and remains applicable throughout the SCAQMD. Submitted on August 2, 1976. See 40 CFR 52.220(c)(32)(iv)(A).
409	Combustion Contaminants	August 7, 1981	July 6, 1982, 47 FR 29231.	Submitted on October 23, 1981. See 40 CFR 52.220(c)(103)(xviii)(A).
431.1	Sulfur Content of Gaseous Fuels	June 12, 1998	December 3, 1999, 64 FR 67787.	Submitted on September 29, 1998. See 40 CFR 52.220(c)(266)(i)(A)(2).
431.2	Sulfur Content of Liquid Fuels	May 4, 1990	June 8, 1999, 64 FR 30396.	Submitted on December 31, 1990. See 40 CFR 52.220(c)(182)(i)(A)(5).
431.3	Sulfur Content of Fossil Fuels	December 2, 1977	September 28, 1981, 46 FR 47451.	Submitted on July 25, 1979. See 40 CFR 52.220(c)(65)(ii).
442	Usage of Solvents	December 15, 2000	May 23, 2002, 67 FR 36105.	Submitted on May 8, 2001. See 40 CFR 52.220(c)(284)(i)(B)(3).
443	Labeling of Solvents	January 1, 1977	June 14, 1978, 43 FR 25684.	Adopted by the Southern California Air Pollution Control District and remains applicable throughout the SCAQMD. Submitted on August 2, 1976. See 40 CFR 52.220(c)(32)(iv)(A).
443.1	Labeling of Materials Containing Organic Solvents.	December 5, 1986	September 12, 2001, 66 FR 47392.	Submitted on June 9, 1987. See 40 CFR 52.220(c)(173)(i)(F)(1).
444 (excluding paragraph (g)).	Open Burning	May 3, 2013	September 26, 2013, 78 FR 59249.	Paragraph (g) (''Fees'') was not included as part of the SIP revision. Submitted on June 11, 2013. See 40 CFR 52.220(c)(430)(i)(A)(1).
445 (excluding paragraph (g), ''Ozone Contingency Measures,'' and paragraph (k), ''Penalties'').	Wood-Burning Devices	October 27, 2020	March 8, 2022, 87 FR 12866.	Submitted on October 29, 2020. See 40 CFR 52.220(c)(570)(i)(A)(1).
461	Gasoline Transfer and Dispensing	April 6, 2012	April 11, 2013, 78 FR 21542.	Submitted on September 21, 2012. See 40 CFR 52.220(c)(423)(i)(C)(1).
462	Organic Liquid Loading	May 14, 1999	July 21, 1999, 64 FR 39037.	Submitted on June 3, 1999. See 40 CFR 52.220(c)(264)(i)(A)(1).
463	Organic Liquid Storage	May 5, 2023	May 29, 2026, 91 FR 31918.	Submitted electronically on October 16, 2023 as an attachment to a letter dated October 13, 2023. See 40 CFR 52.220(c)(619)(i)(B)(1).
464	Wastewater Separators	December 7, 1990	February 24, 1997, 62 FR 8171.	Submitted on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(6).
465	Refinery Vacuum-Producing Devices or Systems.	August 13, 1999	March 1, 2000, 65 FR 10944.	Submitted on October 29, 1999. See 40 CFR 52.220(c)(270)(i)(C)(1).
466	Pumps and Compressors	October 7, 1983	January 15, 1987, 52 FR 1627.	Submitted on December 2, 1983. See 40 CFR 52.220(c)(166)(i)(A)(1).
466.1	Valves and Flanges	May 2, 1980	July 8, 1982, 47 FR 29668.	Submitted on June 2, 1980. See 40 CFR 52.220(c)(79)(iv)(B).
467	Pressure Relief Devices	March 5, 1982	November 16, 1983, 58 FR 52054.	Submitted on May 20, 1982. See 40 CFR 52.220(c)(125)(ii)(D).
468	Sulfur Recovery Units	October 8, 1976	June 14, 1978, 43 FR 25684.	Adopted by the Southern California Air Pollution Control District and remains applicable throughout the SCAQMD. Submitted on February 10, 1977. See 40 CFR 52.220(c)(37)(i)(A).
469	Sulfuric Acid Units	October 8, 1976	June 14, 1978, 43 FR 25684.	Adopted by the Southern California Air Pollution Control District and remains applicable throughout the SCAQMD. Submitted on February 10, 1977. See 40 CFR 52.220(c)(37)(i)(A).
470	Asphalt Air Blowing	May 7, 1976	June 14, 1978, 43 FR 25684.	Adopted by the Southern California Air Pollution Control District and remains applicable throughout the SCAQMD. Submitted on August 2, 1976. See 40 CFR 52.220(c)(32)(iv)(A).
472	Reduction of Animal Matter	May 7, 1976	June 14, 1978, 43 FR 25684.	Adopted by the Southern California Air Pollution Control District and remains applicable throughout the SCAQMD. Submitted on August 2, 1976. See 40 CFR 52.220(c)(32)(iv)(A).
474	Fuel Burning Equipment—Oxides of Nitrogen.	December 4, 1981	July 6, 1982, 47 FR 29231.	Submitted on March 1, 1982. See 40 CFR 52.220(c)(121)(i)(A).
475	Electric Power Generating Equipment	October 8, 1976	June 14, 1978, 43 FR 25684.	Adopted by the Southern California Air Pollution Control District and remains applicable throughout the SCAQMD. Submitted on February 10, 1977. See 40 CFR 52.220(c)(37)(i)(A).
476	Steam Generating Equipment	October 8, 1976	June 14, 1978, 43 FR 25684.	Adopted by the Southern California Air Pollution Control District and remains applicable throughout the SCAQMD. Submitted on February 10, 1977. See 40 CFR 52.220(c)(37)(i)(A).

TABLE 34—EPA-APPROVED SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT REGULATIONS; LOS ANGELES COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; ORANGE COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; RIVERSIDE COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; SAN BERNARDINO COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS—Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
481	Spray Coating Operations	January 11, 2002	August 26, 2003, 68 FR 51181.	Submitted on May 21, 2002. See 40 CFR 52.220(c)(310)(i)(B)(1).
Regulation V—Procedure Before the Hearing Board				
518.2	Federal Alternative Operating Conditions.	December 21, 2001	September 13, 2002, 67 FR 57954.	Submitted on March 15, 2002. See 40 CFR 52.220(c)(297)(i)(C)(2).
Regulation VII—Emergencies				
701	Air Pollution Emergency Contingency Actions.	June 13, 1997	March 25, 1999, 64 FR 14391.	Submitted on September 8, 1997. See 40 CFR 52.220(c)(249)(i)(A)(2).
Regulation XI—Source Specific Standards				
1101	Secondary Lead Smelters—Sulfur Oxides.	October 7, 1977	September 2, 1981, 46 FR 43968.	Submitted on August 15, 1980. See 40 CFR 52.220(c)(70)(i)(B).
1102	Dry Cleaners Using Solvent Other Than Perchloroethylene.	November 17, 2000	July 17, 2002, 67 FR 46876.	Submitted on May 8, 2001. See 40 CFR 52.220(c)(284)(i)(B)(4).
1102.1	Perchloroethylene Dry Cleaning Systems.	December 7, 1990	March 24, 1992, 57 FR 10136.	Submitted on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(1).
1103	Pharmaceuticals and Cosmetics Manufacturing Operations.	March 12, 1999	July 21, 1999, 64 FR 39037.	Submitted on May 13, 1999. See 40 CFR 52.220(c)(263)(i)(A)(1).
1104	Wood Flat Stock Coating Operations	August 13, 1999	March 22, 2000, 65 FR 15240.	Submitted on October 29, 1999. See 40 CFR 52.220(c)(270)(i)(C)(2).
1105	Fluid Catalytic Cracking Units—Oxides of Sulfur.	September 21, 1984	July 12, 1990, 55 FR 28624.	Submitted on February 6, 1985. See 40 CFR 52.220(c)(159)(v)(C).
1105.1	Reduction of PM_{10} and Ammonia Emissions from Fluid Catalytic Cracking Units.	November 7, 2003	January 4, 2006, 71 FR 241.	Submitted on June 3, 2004. See 40 CFR 52.220(c)(331)(i)(B)(2).
1106	Marine Coating Operations	January 13, 1995	July 14, 1995, 60 FR 36227.	Submitted on February 24, 1995. See 40 CFR 52.220(c)(215)(i)(A)(3).
1106.1	Pleasure Craft Coating Operations	February 12, 1999	August 31, 1999, 64 FR 47392.	Submitted on June 3, 1999. See 40 CFR 52.220(c)(264)(i)(A)(2).
1107	Coating of Metal Parts and Products	January 6, 2006	November 24, 2008, 73 FR 70883.	Submitted on May 8, 2007. See 40 CFR 52.220(c)(350)(i)(D)(1).
1108	Cutback Asphalt	February 1, 1985	July 12, 1990, 55 FR 28624.	Submitted on April 12, 1985. See 40 CFR 52.220(c)(160)(i)(E)(1).
1108.1	Emulsified Asphalt	November 4, 1983	January 24, 1985, 50 FR 3338.	Submitted on March 14, 1984. See 40 CFR 52.220(c)(153)(vii)(A).
1110.2	Emissions from Gaseous- and Liquid-Fueled Engines.	February 1, 2008	April 27, 2009, 74 FR 18995.	Submitted on May 20, 2008. See 40 CFR 52.220(c)(360)(i)(A)(1).
1111	Reduction of NO_X Emissions From Natural-Gas-Fired, Fan-Type Central Furnaces.	September 5, 2014	March 29, 2016, 81 FR 17390.	Submitted on April 7, 2015. See 40 CFR 52.220(c)(461)(i)(C)(2).
1112.1	Emissions of Particulate Matter and Carbon Monoxide from Cement Kilns.	December 4, 2009	March 13, 2014, 79 FR 14176.	Submitted on July 20, 2010. See 40 CFR 52.220(c)(381)(i)(K)(1).
1113 (excluding the final sentence of paragraphs (b)(8), and (b)(25)).	Architectural Coatings	February 5, 2016	November 29, 2018, 83 FR 61326.	Submitted on August 22, 2016. See 40 CFR 52.220(c)(488)(i)(D)(1).
1114	Petroleum Refinery Coking Operations.	May 3, 2013	January 20, 2015, 80 FR 2609.	Submitted on February 10, 2014. See 40 CFR 52.220(c)(442)(i)(C)(1).
1115	Motor Vehicle Assembly Line Coating Operations.	May 12, 1995	July 14, 1995, 60 FR 36227.	Submitted on June 16, 1995. See 40 CFR 52.220(c)(222)(i)(A)(1).
1117	Emissions of Oxides of Nitrogen from Glass Melting Furnaces.	January 6, 1984	July 12, 1990, 55 FR 28624.	Submitted on February 6, 1985. See 40 CFR 52.220(c)(159)(v)(D).
1118	Control of Emissions from Refinery Flares.	January 6, 2023	October 21, 2024, 89 FR 84083.	Submitted on May 11, 2023 as an attachment to a letter dated May 10, 2023. See 40 CFR 52.220(c)(610)(i)(B)(1).
1118.1	Control of Emissions from Non-Refinery Flares.	January 4, 2019	December 28, 2022, 87 FR 79806.	Submitted on April 24, 2019. See 40 CFR 52.220(c)(564)(i)(A)(2).
1119	Petroleum Coke Calcining Operations—Oxides of Sulfur.	March 2, 1979	September 28, 1981, 46 FR 47451.	Submitted on July 25, 1980. See 40 CFR 52.220(c)(88)(iii)(A).
1120	Asphalt Pavement Heaters	August 4, 1978	September 28, 1981, 46 FR 47451.	Submitted on July 25, 1979. See 40 CFR 52.220(c)(65)(ii).
1121	Control of Nitrogen Oxides from Residential Type, Natural Gas-Fired Water Heaters.	September 3, 2004	May 6, 2009, 74 FR 20880.	Submitted on July 18, 2008. See 40 CFR 52.220(c)(359)(i)(B)(1).
1122	Solvent Degreasers	October 1, 2004	February 8, 2006, 71 FR 6350.	Submitted on January 13, 2005. See 40 CFR 52.220(c)(335)(i)(D)(1).
1123	Refinery Process Turnarounds	December 7, 1990	August 11, 1992, 57 FR 35758.	Submitted on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(2).

TABLE 34—EPA-APPROVED SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT REGULATIONS; LOS ANGELES COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; ORANGE COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; RIVERSIDE COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; SAN BERNARDINO COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS—Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
1124	Aerospace Assembly and Component Manufacturing Operations.	September 21, 2001	August 13, 2002, 67 FR 52611.	Submitted on January 22, 2002. See 40 CFR 52.220(c)(293)(i)(A)(2).
1125	Metal Container, Closure, and Coil Coating Operations.	March 7, 2008	December 21, 2009, 74 FR 67821.	Submitted on April 6, 2009. See 40 CFR 52.220(c)(366)(i)(B)(1).
1126	Magnet Wire Coating Operations	January 13, 1995	June 13, 1995, 60 FR 31081.	Submitted on February 24, 1995. See 40 CFR 52.220(c)(215)(i)(A)(1).
1127	Emissions Reductions from Livestock Waste.	August 6, 2004	May 23, 2013, 78 FR 30768.	Submitted on October 5, 2006. See 40 CFR 52.220(c)(347)(i)(B)(2).
1128	Paper, Fabric, and Film Coating Operations.	March 8, 1996	May 4, 1999, 64 FR 23774.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(B)(1).
1130	Graphic Arts	May 2, 2014	July 14, 2015, 80 FR 40915.	Submitted on November 6, 2014. See 40 CFR 52.220(c)(457)(i)(E)(1).
1130.1	Screen Printing Operations	December 13, 1996	August 21, 1998, 63 FR 44792.	Submitted on March 3, 1997. See 40 CFR 52.220(c)(244)(i)(D)(1).
1131	Food Product Manufacturing and Processing Operations.	June 6, 2003	January 22, 2004, 69 FR 3018.	Submitted on August 11, 2003. See 40 CFR 52.220(c)(320)(i)(B)(1).
1132	Further Control of VOC Emissions From High-Emitting Spray Booth Facilities.	May 5, 2006	July 26, 2011, 76 FR 44493.	Submitted on January 10, 2010. See 40 CFR 52.220(c)(378)(i)(A)(2).
1133	Composting and Related Operations—General Administrative Requirements.	January 10, 2003	July 21, 2004, 69 FR 43518.	Submitted on June 5, 2003. See 40 CFR 52.220(c)(316)(i)(D)(1).
1133.1	Chipping and Grinding Activities	July 8, 2011	November 29, 2012, 77 FR 71129.	Submitted on November 18, 2011. See 40 CFR 52.220(c)(416)(i)(B)(1).
1133.2	Emission Reductions from Co-Composting Operations.	January 10, 2003	July 21, 2004, 69 FR 43518.	Submitted on June 5, 2003. See 40 CFR 52.220(c)(316)(i)(D)(1).
1133.3	Emission Reductions from Greenwaste Composting Operations.	July 8, 2011	November 29, 2012, 77 FR 71129.	Submitted on November 18, 2011. See 40 CFR 52.220(c)(416)(i)(B)(2).
1134	Emissions of Oxides of Nitrogen from Stationary Gas Turbines.	August 8, 1997	August 1, 2000, 65 FR 46873.	Submitted on March 10, 1998. See 40 CFR 52.220(c)(254)(i)(D)(4).
1135	Emissions of Oxides of Nitrogen from Electric Power Generating Systems.	July 19, 1991	August 11, 1998, 63 FR 42721.	Submitted on January 28, 1992. See 40 CFR 52.220(c)(187)(i)(C)(2).
1136	Wood Products Coatings	June 14, 1996	August 18, 1998, 63 FR 44132.	Submitted on August 28, 1996. See 40 CFR 52.220(c)(240)(i)(A)(5).
1137	PM_{10} Emission Reductions from Woodworking Operations.	February 1, 2002	January 22, 2004, 69 FR 3018.	Submitted on November 19, 2002. See 40 CFR 52.220(c)(307)(i)(D)(1).
1138	Control of Emissions from Restaurant Operations.	November 14, 1997	July 11, 2001, 66 FR 36170.	Submitted on March 10, 1998. See 40 CFR 52.220(c)(254)(i)(D)(5).
1140	Abrasive Blasting	August 2, 1985	December 10, 2014, 79 FR 73203.	Submitted on November 12, 1985. See 40 CFR 52.220(c)(165)(i)(B)(2).
1141	Control of Volatile Organic Compound Emissions from Resin Manufacturing.	November 17, 2000	August 13, 2002, 67 FR 52611.	Submitted on March 14, 2001. See 40 CFR 52.220(c)(286)(i)(A)(3).
1141.1	Coatings and Ink Manufacturing	November 17, 2000	February 12, 2002, 67 FR 6410.	Submitted on March 14, 2001. See 40 CFR 52.220(c)(286)(i)(A)(1).
1141.2	Surfactant Manufacturing	January 11, 2002	August 26, 2003, 68 FR 51181.	Submitted on May 21, 2002. See 40 CFR 52.220(c)(310)(i)(B)(1).
1142	Marine Tank Vessel Operations	July 19, 1991	December 13, 1994, 59 FR 64132.	Submitted on January 28, 1992. See 40 CFR 52.220(c)(187)(i)(C)(1).
1143	Consumer Paint Thinners & Multi-Purpose Solvents.	December 3, 2010	November 16, 2011, 76 FR 70888.	Submitted on April 5, 2011. See 40 CFR 52.220(c)(388)(i)(A)(1).
1144	Metal Working Fluids and Direct-Contact Lubricants.	July 9, 2010	November 16, 2011, 76 FR 70888.	Submitted on April 5, 2011. See 40 CFR 52.220(c)(388)(i)(A)(2).
1145	Plastic, Rubber, Leather, and Glass Coatings.	December 4, 2009	July 14, 2010, 75 FR 40726.	Submitted on May 17, 2010. See 40 CFR 52.220(c)(379)(i)(A)(2).
1146	Emissions of Oxides of Nitrogen from Industrial, Institutional, and Commercial Boilers, Steam Generators, and Process Heaters.	November 1, 2013	September 25, 2014, 79 FR 57442.	Submitted on May 13, 2014. See 40 CFR 52.220(c)(441)(i)(A)(1).
1146.1	Emissions of Oxides of Nitrogen from Small Industrial, Institutional, and Commercial Boilers, Steam Generators, and Process Heaters.	November 1, 2013	September 25, 2014, 79 FR 57442.	Submitted on May 13, 2014. See 40 CFR 52.220(c)(441)(i)(A)(2).
1146.2	Emissions of Oxides of Nitrogen From Large Water Heaters and Small Boilers and Process Heaters.	May 5, 2006	December 5, 2008, 73 FR 74027.	Submitted on March 7, 2008. See 40 CFR 52.220(c)(354)(i)(A)(4).
1147	NO_X Reductions from Miscellaneous Sources.	September 9, 2011	December 28, 2016, 81 FR 95472.	Submitted on February 6, 2013. See 40 CFR 52.220(c)(428)(i)(D)(2).
1148	Thermally Enhanced Oil Recovery Wells.	November 5, 1982	October 19, 1984, 49 FR 41028.	Submitted on February 3, 1983. See 40 CFR 52.220(c)(127)(vii)(C).
1148.1	Oil and Gas Production Wells	March 5, 2004	September 29, 2011, 76 FR 60376.	Submitted on January 10, 2010. See 40 CFR 52.220(c)(378)(i)(A)(3).
1149	Storage Tank and Pipeline Cleaning and Degassing.	May 2, 2008	December 21, 2009, 74 FR 67821.	Submitted on April 6, 2009. See 40 CFR 52.220(c)(366)(i)(B)(2).

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
1150.1	Control of Gaseous Emissions from Municipal Solid Waste Landfills.	April 1, 2011	May 23, 2013, 78 FR 30768.	Submitted on September 27, 2011. See 40 CFR 52.220(c)(404)(i)(A)(4).
1151	Motor Vehicle and Mobile Equipment Non-Assembly Line Coating Operations.	September 5, 2014	December 8, 2015, 80 FR 76219.	Submitted on April 7, 2015. See 40 CFR 52.220(c)(461)(i)(C)(1).
1153	Commercial Bakery Ovens	January 13, 1995	August 8, 1995, 60 FR 40285.	Submitted on February 24, 1995. See 40 CFR 52.220(c)(215)(i)(A)(2).
1153.1	Emissions of Oxides of Nitrogen from Commercial Food Ovens.	November 7, 2014	December 28, 2016, 81 FR 95472.	Submitted on April 7, 2015. See 40 CFR 52.220(c)(461)(i)(C)(3).
1155	Particulate Matter (PM) Control Devices.	May 2, 2014	March 16, 2015, 80 FR 13495.	Submitted on July 25, 2014. See 40 CFR 52.220(c)(447)(i)(C)(1).
1156	Further Reductions of Particulate Emissions from Cement Manufacturing Facilities.	March 6, 2009	September 4, 2012, 77 FR 53773.	Submitted on April 29, 2009. See 40 CFR 52.220(c)(362)(i)(B)(2).
1157	PM_{10} Emission Reductions from Aggregate and Related Operations.	September 8, 2006	March 7, 2012, 77 FR 13495.	Submitted on May 17, 2010. See 40 CFR 52.220(c)(379)(i)(A)(5).
1158	Storage, Handling, and Transport of Coke, Coal and Sulfur.	July 11, 2008	November 10, 2009, 74 FR 57907.	Submitted on December 23, 2008. See 40 CFR 52.220(c)(364)(i)(B)(1).
1159	Nitric Acid Units—Oxides of Nitrogen	December 6, 1985	July 12, 1990, 55 FR 28622.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(H)(1).
1162	Polyester Resin Operations	July 8, 2005	July 26, 2011, 76 FR 44493.	Submitted on April 6, 2009. See 40 CFR 52.220(c)(366)(i)(B)(3).
1164	Semiconductor Manufacturing	January 13, 1995	February 1, 1996, 61 FR 3579.	Submitted on February 24, 1995. See 40 CFR 52.220(c)(215)(i)(A)(4).
1166	Volatile Organic Compound Emissions from Decontamination of Soil.	July 14, 1995	August 17, 1998, 63 FR 43881.	Submitted on October 13, 1995. See 40 CFR 52.220(c)(225)(i)(A)(3).
1168	Adhesive and Sealant Applications	October 6, 2017	February 24, 2021, 86 FR 11130; corrected on March 11, 2021, 86 FR 13819.	Submitted on May 23, 2018. See 40 CFR 52.220(c)(518)(i)(D)(1).
1171	Solvent Cleaning Operations	February 1, 2008	September 29, 2011, 76 FR 60376.	Submitted on April 5, 2011. See 40 CFR 52.220(c)(388)(i)(A)(5).
1173	Control of Volatile Organic Compound Leaks and Releases from Components at Petroleum Facilities and Chemical Plants.	February 6, 2009	May 5, 2010, 75 FR 24406.	Submitted on January 10, 2010. See 40 CFR 52.220(c)(378)(i)(A)(1).
1174	Control of Volatile Organic Compound Emissions from the Ignition of Barbeque Charcoal.	October 5, 1990	October 4, 1994, 59 FR 50498.	Submitted on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(4).
1175	Control of Emissions from the Manufacture of Polymeric Cellular (Foam) Products.	November 5, 2010	August 4, 2011, 76 FR 47074.	Submitted on April 5, 2011. See 40 CFR 52.220(c)(388)(i)(A)(3).
1176	VOC Emissions from Wastewater Systems.	September 13, 1996	October 7, 2002, 67 FR 62376.	Submitted on November 26, 1996. See 40 CFR 52.220(c)(242)(i)(B)(2).
1177	Liquefied Petroleum Gas Transfer and Dispensing.	June 1, 2012	January 3, 2014, 79 FR 364.	Submitted on February 6, 2013. See 40 CFR 52.220(c)(428)(i)(D)(1).
1178	Further Reductions of VOC Emissions from Storage Tanks at Petroleum Facilities.	September 1, 2023	May 29, 2026, 91 FR 31918.	Submitted electronically on February 14, 2024 as an attachment to a letter dated February 9, 2024. See 40 CFR 52.220(c)(612)(i)(B)(1).
1179	Publicly Owned Treatment Works Operations.	March 6, 1992	October 4, 1994, 59 FR 50498.	Submitted on September 14, 1992. See 40 CFR 52.220(c)(189)(i)(A)(5).
1186	PM_{10} Emissions from Paved and Unpaved Roads, and Livestock Operations.	July 11, 2008	March 7, 2012, 77 FR 13495.	Submitted on December 23, 2008. See 40 CFR 52.220(c)(364)(i)(B)(2).
1189	Emissions from Hydrogen Plant Process Vents.	January 21, 2000	June 8, 2001, 66 FR 30815.	Submitted on July 26, 2000. See 40 CFR 52.220(c)(280)(i)(A)(1).
	Regulation XIII—New Source Review			
1301	General	December 7, 1995	December 4, 1996, 61 FR 64291.	Submitted on August 28, 1996. See 40 CFR 52.220(c)(240)(i)(A)(1).
1302	Definitions	June 13, 1997	March 19, 1999, 64 FR 13514.	Submitted on March 10, 1998. See 40 CFR 52.220(c)(254)(i)(D)(3).
1303	Requirements	May 10, 1996	December 4, 1996, 61 FR 64291.	Submitted on August 28, 1996. See 40 CFR 52.220(c)(240)(i)(A)(1).
1304	Exemptions	June 14, 1996	December 4, 1996, 61 FR 64291.	Submitted on August 28, 1996. See 40 CFR 52.220(c)(240)(i)(A)(1).
1306	Emission Calculations	June 14, 1996	December 4, 1996, 61 FR 64291.	Submitted on August 28, 1996. See 40 CFR 52.220(c)(240)(i)(A)(1).
1309	Emission Reduction Credits	December 7, 1995	December 4, 1996, 61 FR 64291.	Submitted on August 28, 1996. See 40 CFR 52.220(c)(240)(i)(A)(1).
1309.1	Priority Reserve	May 3, 2002	June 19, 2006, 71 FR 35157.	Submitted on December 23, 2002. See 40 CFR 52.220(c)(311)(i)(A)(3).
1310	Analysis and Reporting	December 7, 1995	December 4, 1996, 61 FR 64291.	Submitted on August 28, 1996. See 40 CFR 52.220(c)(240)(i)(A)(1).

TABLE 34—EPA-APPROVED SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT REGULATIONS; LOS ANGELES COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; ORANGE COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; RIVERSIDE COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; SAN BERNARDINO COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS—Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
1313	Permits to Operate	December 7, 1995	December 4, 1996, 61 FR 64291.	Submitted on August 28, 1996. See 40 CFR 52.220(c)(240)(i)(A)(1).
1315 (excluding paragraph (b)(2) and subdivisions (g) and (h)).	Federal New Source Review Tracking System.	February 4, 2011	May 25, 2012, 77 FR 31200.	Submitted on March 2, 2011. See 40 CFR 52.220(c)(403)(i)(A)(1).
1325	Federal $PM_{2.5}$ New Source Review Program.	January 4, 2019	October 22, 2021, 86 FR 58592.	Submitted on April 24, 2019. See 40 CFR 52.220(c)(564)(i)(A)(1).
Regulation XIV—Toxics and Other Non-Criteria Pollutants				
1420.1	Emissions Standard For Lead From Large Lead-Acid Battery Recycling Facilities.	November 5, 2010	January 25, 2013, 78 FR 5305.	Submitted on September 27, 2011. See 40 CFR 52.220(c)(404)(i)(A)(2).
Regulation XVI—Mobile Source Offset Programs				
1612.1	Mobile Source Credit Generation Pilot Program.	March 16, 2001	February 7, 2002, 67 FR 5729.	Submitted on May 8, 2001. See 40 CFR 52.220(c)(284)(i)(B)(1).
1631	Pilot Credit Generation Program for Marine Vessels.	October 4, 2002	November 24, 2003, 68 FR 65845.	Submitted on December 12, 2002. See 40 CFR 52.220(c)(308)(i)(D)(1).
1632	Pilot Credit Generation Program for Hotelling Operations.	May 11, 2001	February 7, 2002, 67 FR 5729.	Submitted on May 31, 2001. See 40 CFR 52.220(c)(282)(i)(A)(1).
1633	Pilot Credit Generation Program for Truck/Trailer Refrigeration Units.	May 11, 2001	February 7, 2002, 67 FR 5729.	Submitted on May 31, 2001. See 40 CFR 52.220(c)(282)(i)(A)(1).
1634	Pilot Credit Generation Program for Truck Stops.	November 9, 2001	November 24, 2003, 68 FR 65845.	Submitted on January 22, 2002. See 40 CFR 52.220(c)(293)(i)(A)(3).
Regulation XVII—Prevention of Significant Deterioration (PSD)				
1714	Prevention of Significant Deterioration for Greenhouse Gases.	November 5, 2010	December 10, 2012, 77 FR 73320.	Submitted on December 30, 2010. See 40 CFR 52.220(c)(421)(i)(A)(1). The approval is based on clarifications provided in a letter dated August 15, 2012 from Mohsen Nazemi, SCAQMD, to Gerardo Rios, EPA Region 9, which is listed in the tables for the nonregulatory portions of the applicable California SIP.
Regulation XIX—Federal Conformity Regulations				
1901	General Conformity	September 9, 1994	April 23, 1999, 64 FR 19916.	Submitted on November 30, 1994. See 40 CFR 52.220(c)(207)(i)(I)(1).
Regulation XX—Regional Clean Air Incentives Market (RECLAIM)				
2000	General	May 6, 2005	August 29, 2006, 71 FR 51120.	Submitted on October 20, 2005. See 40 CFR 52.220(c)(342)(i)(C)(2).
2001	Applicability	December 4, 2015	September 14, 2017, 82 FR 43176.	Submitted on March 17, 2017. See 40 CFR 52.220(c)(491)(i)(A)(1).
2002	Allocations for Oxides of Nitrogen (NO_X) and Oxides of Sulfur (SO_X).	October 7, 2016	September 14, 2017, 82 FR 43176.	Submitted on March 17, 2017. See 40 CFR 52.220(c)(491)(i)(A)(2).
2004	Requirements	April 6, 2007	July 3, 2008, 73 FR 38122.	Submitted on March 7, 2008. See 40 CFR 52.220(c)(354)(i)(A)(1).
2005	New Source Review for RECLAIM	December 4, 2015	September 14, 2017, 82 FR 43176.	Submitted on March 17, 2017. See 40 CFR 52.220(c)(491)(i)(A)(3).
2006	Permits	May 11, 2001	September 4, 2003, 68 FR 52512.	Submitted on May 31, 2001. See 40 CFR 52.220(c)(282)(i)(A)(2).
2007	Trading Requirements	April 6, 2007	July 3, 2008, 73 FR 38122.	Submitted on March 7, 2008. See 40 CFR 52.220(c)(354)(i)(A)(2).
2008	Mobile Source Credits	October 15, 1993	November 8, 1996, 61 FR 57775.	Submitted on March 21, 1994. See 40 CFR 52.220(c)(232)(i)(A)(1).
2010	Administrative Remedies and Sanctions.	April 6, 2007	July 3, 2008, 73 FR 38122.	Submitted on March 7, 2008. See 40 CFR 52.220(c)(354)(i)(A)(3).
2011	Requirements for Monitoring, Reporting, and Recordkeeping for Oxides of Sulfur (SO_X) Emissions.	January 7, 2005	August 29, 2006, 71 FR 51120.	Submitted on July 15, 2005. See 40 CFR 52.220(c)(337)(i)(C)(1).
2011 Protocol—Appendix A, Chapter 1.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Sulfur (SO_X) Emissions.	May 6, 2005	August 29, 2006, 71 FR 51120.	Chapter 1 is titled ''Overview.'' Submitted on October 20, 2005. See 40 CFR 52.220(c)(342)(i)(C)(2).
2011 Protocol—Appendix A, Chapter 2.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Sulfur (SO_X) Emissions.	January 7, 2005	August 29, 2006, 71 FR 51120.	Chapter 2 is titled ''Major Sources—Continuous Emission Monitoring System (CEMS).'' Submitted on July 15, 2005. See 40 CFR 52.220(c)(337)(i)(C)(1).

TABLE 34—EPA-APPROVED SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT REGULATIONS; LOS ANGELES COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; ORANGE COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; RIVERSIDE COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; SAN BERNARDINO COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS—Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
2011 Protocol—Appendix A, Chapter 3.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Sulfur (SO_X) Emissions.	December 4, 2015	September 14, 2017, 82 FR 43176.	Chapter 3 is titled ''Process Units—Periodic Reporting and Rule 219 Equipment.'' Submitted on March 17, 2017. See 40 CFR 52.220(c)(491)(i)(A)(5).
2011 Protocol—Appendix A, Chapters 4, 5 and 6.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Sulfur (SO_x) Emissions.	January 7, 2005	August 29, 2006, 71 FR 51120.	Chapters 4, 5 and 6 are titled ''Process Units—Source Testing,'' ''Remote Terminal Unit (RTU)—Electronic Reporting'' and ''Reference Methods,'' respectively. Submitted on July 15, 2005. See 40 CFR 52.220(c)(337)(i)(C)(1).
2011 Protocol—Appendix A, Attachments A and B.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Sulfur (SO_x) Emissions.	January 7, 2005	August 29, 2006, 71 FR 51120.	Attachments A, B, D and F are titled ''1 N Procedure,'' and ''Bias Test,'' respectively. Submitted on July 15, 2005. See 40 CFR 52.220(c)(337)(i)(C)(1).
2011 Protocol—Appendix A, Attachment C.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Sulfur (SO_x) Emissions.	December 4, 2015	September 14, 2017, 82 FR 43176.	Attachment C is titled ''Quality Assurance and Quality Control Procedures.'' Submitted on March 17, 2017. See 40 CFR 52.220(c)(491)(i)(A)(4).
2011 Protocol—Appendix A, Attachment D.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Sulfur (SO_x) Emissions.	January 7, 2005	August 29, 2006, 71 FR 51120.	Attachment D is titled ''List of Acronyms and Abbreviations.'' Submitted on July 15, 2005. See 40 CFR 52.220(c)(337)(i)(C)(1).
2011 Protocol—Appendix A, Attachment E.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Sulfur (SO_x) Emissions.	February 5, 2016	September 14, 2017, 82 FR 43176.	Attachment E is titled ''Definitions.'' Submitted on March 17, 2017. See 40 CFR 52.220(c)(491)(i)(A)(8).
2011 Protocol—Appendix A, Attachment F.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Sulfur (SO_x) Emissions.	January 7, 2005	August 29, 2006, 71 FR 51120.	Attachment F is titled ''Supplemental and Alternative CEMS Performance Requirements for Low SO_x Concentrations.'' Submitted on July 15, 2005. See 40 CFR 52.220(c)(337)(i)(C)(1).
2012	Requirements for Monitoring, Reporting, and Recordkeeping for Oxides of Nitrogen (NO_X) Emissions.	January 7, 2005	August 29, 2006, 71 FR 51120.	Submitted on July 15, 2005. See 40 CFR 52.220(c)(337)(i)(C)(1).
Rule 2012(j)(3)—Testing Guidelines (Protocol).	Rule 2012(j)(3)—Testing Guidelines (Protocol) for Alternative Nitrogen Oxides Emission Rate Determination at Process Units.	December 7, 1995	June 15, 1998, 63 FR 32621.	The Protocol is dated March 31, 1994. Submitted on August 28, 1996. See 40 CFR 52.220(c)(240)(i)(A)(3).
2012 Protocol—Appendix A, Chapter 1.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Nitrogen (NO_X) Emissions.	May 6, 2005	August 29, 2006, 71 FR 51120.	Chapter 1 is titled ''Overview.'' Submitted on October 20, 2005. See 40 CFR 52.220(c)(342)(i)(C)(2).
2012 Protocol—Appendix A, Chapters 2 and 3.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Nitrogen (NO_X) Emissions.	January 7, 2005	August 29, 2006, 71 FR 51120.	Chapters 2 and 3 are titled ''Major Sources—Continuous Emission Monitoring System (CEMS)'' and ''Large Sources—Continuous Process Monitoring System (CPMS),'' respectively. Submitted on July 15, 2005. See 40 CFR 52.220(c)(337)(i)(C)(1).
2012 Protocol—Appendix A, Chapter 4.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Nitrogen (NO_X) Emissions.	December 4, 2015	September 14, 2017, 82 FR 43176.	Chapter 4 is titled ''Process Units—Periodic Reporting and Rule 219 Equipment.'' Submitted on March 17, 2017. See 40 CFR 52.220(c)(491)(i)(A)(7).
2012 Protocol—Appendix A, Chapters 5, 6, 7 and 8.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Nitrogen (NO_X) Emissions.	January 7, 2005	August 29, 2006, 71 FR 51120.	Chapters 5, 6, 7 and 8 are titled ''Large Sources and Process Units—Source Testing,'' ''All Sources and Units—Determining Source Category Status,'' ''Remote Terminal Unit (RTU)—Electronic Reporting'' and ''Reference Methods,'' respectively. Submitted on July 15, 2005. See 40 CFR 52.220(c)(337)(i)(C)(1).
2012 Protocol—Appendix A, Attachments A and B.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Nitrogen (NO_X) Emissions.	January 7, 2005	August 29, 2006, 71 FR 51120.	Attachments A and B are titled ''1 N Procedures'' and ''Bias Test,'' respectively. Submitted on July 15, 2005. See 40 CFR 52.220(c)(337)(i)(C)(1).
2012 Protocol—Appendix A, Attachment C.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Nitrogen (NO_X) Emissions.	December 4, 2015	September 14, 2017, 82 FR 43176.	Attachment C is titled ''Quality Assurance and Quality Control Procedures.'' Submitted on March 17, 2017. See 40 CFR 52.220(c)(491)(i)(A)(6).
2012 Protocol—Appendix A, Attachments D and E.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Nitrogen (NO_X) Emissions.	January 7, 2005	August 29, 2006, 71 FR 51120.	Attachments D and E are titled ''Equipment Tuning Procedures,'' and ''List of Acronyms and Abbreviations,'' respectively. Submitted on July 15, 2005. See 40 CFR 52.220(c)(337)(i)(C)(1).
2012 Protocol—Appendix A, Attachment F.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Nitrogen (NO_X) Emissions.	February 5, 2016	September 14, 2017, 82 FR 43176.	Attachment F is titled ''Definitions.'' Submitted on March 17, 2017. See 40 CFR 52.220(c)(491)(i)(A)(9).
2012 Protocol—Appendix A, Attachment G.	Protocol for Monitoring, Reporting, and Recordkeeping for Oxides of Nitrogen (NO_X) Emissions.	January 7, 2005	August 29, 2006, 71 FR 51120.	Attachment G is titled ''Supplemental and Alternative CEMS Performance Requirements for Low NO_X Concentrations.'' Submitted on July 15, 2005. See 40 CFR 52.220(c)(337)(i)(C)(1).
2015	Backstop Provisions	June 4, 2004	December 21, 2004, 69 FR 76417.	Submitted on July 29, 2004. See 40 CFR 52.220(c)(333)(i)(A)(1).
2020	RECLAIM Reserve	May 11, 2001	September 4, 2003, 68 FR 52512.	Submitted on May 31, 2001. See 40 CFR 52.220(c)(282)(i)(A)(2).

TABLE 34—EPA-APPROVED SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT REGULATIONS; LOS ANGELES COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; ORANGE COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; RIVERSIDE COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS; SAN BERNARDINO COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS—Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Regulation XXIII—Facility Based Mobile Source Measures				
2305	Warehouse Indirect Source Rule—Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program.	May 7, 2021	September 11, 2024, 89 FR 73568.	Submitted on August 13, 2021. See 40 CFR 52.220(c)(616)(i)(A)(1).
Regulation XXIV—In-Use Mobile Source Emission Reduction Programs				
2449	Control of Oxides of Nitrogen Emissions from Off-Road Diesel Vehicles.	July 11, 2014	November 21, 2016, 81 FR 83154.	Submitted on September 5, 2014. See 40 CFR 52.220(c)(482)(i)(A)(1).
Regulation XXV—Intercredit Trading				
2507	Pilot Credit Generation Program for Agricultural Pumps.	May 11, 2001	February 7, 2002, 67 FR 5729.	Submitted on May 31, 2001. See 40 CFR 52.220(c)(282)(i)(A)(1).
Rules and Regulations (Los Angeles County portion of the District)				
53	Sulfur Compounds—Concentration	June 30, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
58	Disposal of Solid and Liquid Wastes	June 30, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
67	Fuel Burning Equipment	June 30, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6). Deletion approved in part at 46 FR 27116 (May 18, 1981). The emission limits of Rule 67 are partially retained, applicable only to (existing) sources, granted permits prior to June 17, 1981—see 40 CFR 52.280(c)(1)(i).
Rules and Regulations (Orange County portion of the District)				
53 (paragraph (c))	Specific Contaminants	May 24, 1967	May 31, 1972, 37 FR 10842.	Submitted on February 21, 1972. See 40 CFR 52.220(b). Paragraph (a) was superseded by approval of Rule 53 (Sulfur Compounds—Concentration) at 37 FR 19812 (September 22, 1972). Paragraph (b) was disapproved at 37 FR 10842, at 10852 (May 31, 1972). Paragraph (c) relates to fluorine emissions.
53	Sulfur Compounds—Concentration	June 18, 1975	September 8, 1978, 43 FR 40011.	Submitted on July 22, 1975. See 40 CFR 52.220(c)(28)(xi)(A).
58	Disposal of Solid and Liquid Wastes	April 25, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
67	Fuel Burning Equipment	December 23, 1969	May 31, 1972, 37 FR 10842.	Submitted on February 21, 1972. See 40 CFR 52.220(b). Deletion approved in part at 46 FR 27116 (May 18, 1981). The emission limits of Rule 67 are partially retained, applicable only to (existing) sources, granted permits prior to June 17, 1981—see 40 CFR 52.280(c)(1)(i).
74	Lead Content of Motor Fuels	October 27, 1971	May 31, 1972, 37 FR 10842.	Submitted on February 21, 1972. See 40 CFR 52.220(b).
Rules and Regulations (Riverside County portion of the District)				
53	Specific Air Contaminants	June 10, 1975	June 14, 1978, 43 FR 25684.	Submitted on July 22, 1975. See 40 CFR 52.220(c)(28)(x)(A).
56	Scavenger Plants	June 13, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
58	Disposal of Solid and Liquid Wastes	March 28, 1972	September 22, 1972, 37 FR 19812.	Paragraphs (b), (c), (d) are effective on January 1, 1974. Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
72	Fuel Burning Equipment	May 8, 1970	May 31, 1972, 37 FR 10842.	Submitted on February 21, 1972. See 40 CFR 52.220(b). Deletion approved in part at 46 FR 27116 (May 18, 1981). The emission limits of Rule 72 are partially retained, applicable only to (existing) sources, granted permits prior to June 17, 1981—see 40 CFR 52.280(c)(1)(i).

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Rules and Regulations (San Bernardino County portion of the District)				
2	Definitions	November 17, 1970	May 31, 1972, 37 FR 10842.	Part of Regulation I (General Provisions). Submitted on February 21, 1972. See 40 CFR 52.220(b). Superseded except for the definitions for the terms used in Regulation VI (Orchard or Citrus Grove Heaters), which remains part of the applicable SIP.
5 (paragraph (a))	Public Availability of Emission Data	May 30, 1972	June 14, 1978, 43 FR 25684.	Submitted on July 25, 1973. See 40 CFR 52.220(c)(21)(xv)(A).
53A	Specific Contaminants	May 30, 1972	June 14, 1978, 43 FR 25684.	Submitted on July 25, 1973. See 40 CFR 52.220(c)(21)(xv)(A).
53.1	Scavenger Plants	May 30, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
58–A	Disposal of Solid and Liquid Wastes—South Coast Air Basin.	May 30, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
67	Fuel Burning Equipment	December 23, 1969	May 31, 1972, 37 FR 10842.	Submitted on February 21, 1972. See 40 CFR 52.220(b). Deletion approved in part at 46 FR 27116 (May 18, 1981). The emission limits of Rule 67 are partially retained, applicable only to (existing) sources, granted permits prior to June 17, 1981—see 40 CFR 52.280(c)(1)(i).
100	Definition	November 17, 1970	May 31, 1972, 37 FR 10842.	Part of Regulation VI (Orchard or Citrus Grove Heaters). Submitted on February 21, 1972. See 40 CFR 52.220(b). Cites the definitions in Rule 2.
101	Exceptions	November 17, 1970	May 31, 1972, 37 FR 10842.	Part of Regulation VI (Orchard or Citrus Grove Heaters). Submitted on February 21, 1972. See 40 CFR 52.220(b). Cites the definitions in Rule 2.
102	Permits Required	November 17, 1970	May 31, 1972, 37 FR 10842.	Part of Regulation VI (Orchard or Citrus Grove Heaters). Submitted on February 21, 1972. See 40 CFR 52.220(b). Cites the definitions in Rule 2.
104	Standards for Granting Permits	November 17, 1970	May 31, 1972, 37 FR 10842.	Part of Regulation VI (Orchard or Citrus Grove Heaters). Submitted on February 21, 1972. See 40 CFR 52.220(b). Cites the definitions in Rule 2.
109	Denial of Applications	November 17, 1970	May 31, 1972, 37 FR 10842.	Part of Regulation VI (Orchard or Citrus Grove Heaters). Submitted on February 21, 1972. See 40 CFR 52.220(b). Cites the definitions in Rule 2.
110	Appeals	November 17, 1970	May 31, 1972, 37 FR 10842.	Part of Regulation VI (Orchard or Citrus Grove Heaters). Submitted on February 21, 1972. See 40 CFR 52.220(b). Cites the definitions in Rule 2.
130	Classification of Orchard Heaters	November 17, 1970	May 31, 1972, 37 FR 10842.	Part of Regulation VI (Orchard or Citrus Grove Heaters). Submitted on February 21, 1972. See 40 CFR 52.220(b). Cites the definitions in Rule 2.
131	Class I Heaters Designated	November 17, 1970	May 31, 1972, 37 FR 10842.	Part of Regulation VI (Orchard or Citrus Grove Heaters). Submitted on February 21, 1972. See 40 CFR 52.220(b). Cites the definitions in Rule 2.
132	Class II Heaters Designated	November 17, 1970	May 31, 1972, 37 FR 10842.	Part of Regulation VI (Orchard or Citrus Grove Heaters). Submitted on February 21, 1972. See 40 CFR 52.220(b). Cites the definitions in Rule 2.
133	Identification of Heaters	November 17, 1970	May 31, 1972, 37 FR 10842.	Part of Regulation VI (Orchard or Citrus Grove Heaters). Submitted on February 21, 1972. See 40 CFR 52.220(b). Cites the definitions in Rule 2.
134	Use of Incomplete Heaters Prohibited	November 17, 1970	May 31, 1972, 37 FR 10842.	Part of Regulation VI (Orchard or Citrus Grove Heaters). Submitted on February 21, 1972. See 40 CFR 52.220(b). Cites the definitions in Rule 2.
135	Cleaning, Repairs	November 17, 1970	May 31, 1972, 37 FR 10842.	Part of Regulation VI (Orchard or Citrus Grove Heaters). Submitted on February 21, 1972. See 40 CFR 52.220(b). Cites the definitions in Rule 2.
136	Authority to Classify Orchard Heaters	November 17, 1970	May 31, 1972, 37 FR 10842.	Part of Regulation VI (Orchard or Citrus Grove Heaters). Submitted on February 21, 1972. See 40 CFR 52.220(b). Cites the definitions in Rule 2.

TABLE 37—EPA-APPROVED VENTURA COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Regulation I—General				
1	Title	July 2, 1968	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
2	Definitions	April 9, 2019	November 12, 2020, 85 FR 71846.	Submitted on August 19, 2019. See 40 CFR 52.220(c)(542)(i)(B)(1).
4	Rules Supplemental	March 9, 1976	August 15, 1977, 42 FR 41121.	Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(xiii)(A).
5	Effective Date	April 13, 2004	May 19, 2014, 79 FR 28612.	Submitted on July 19, 2004. See 40 CFR 52.220(c)(332)(i)(B)(4).
6	Severability	November 21, 1978	June 18, 1982, 47 FR 26388.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xx)(A).
7	Zone Boundaries	June 14, 1977	March 20, 1979, 44 FR 16912.	Submitted on June 22, 1978. See 40 CFR 52.220(c)(44)(iii)(A).
Regulation II—Permits				
10	Permits Required	April 13, 2004	December 3, 2019, 84 FR 66074.	Submitted on July 19, 2004. See 40 CFR 52.220(c)(332)(i)(B)(5).
11	Definitions for Regulation II	March 14, 2006	October 24, 2008, 73 FR 63382.	Submitted on June 16, 2006. See 40 CFR 52.220(c)(345)(i)(C)(1).
12	Applications for Permits	June 13, 1995	December 7, 2000, 65 FR 76567.	Submitted on October 13, 1995. See 40 CFR 52.220(c)(225)(i)(G)(2).
13	Action on Applications for an Authority to Construct.	June 13, 1995	December 7, 2000, 65 FR 76567.	Submitted on October 13, 1995. See 40 CFR 52.220(c)(225)(i)(G)(2).
14	Action on Applications for a Permit to Operate.	June 13, 1995	December 7, 2000, 65 FR 76567.	Submitted on October 13, 1995. See 40 CFR 52.220(c)(225)(i)(G)(2).
15	Standards for Permit Issuance	June 13, 1995	December 7, 2000, 65 FR 76567.	Submitted on October 13, 1995. See 40 CFR 52.220(c)(225)(i)(G)(2).
15.1	Sampling and Testing Facilities	October 12, 1993	December 7, 2000, 65 FR 76567.	Submitted on March 29, 1994. See 40 CFR 52.220(c)(196)(i)(B)(2).
16	BACT Certification	June 13, 1995	December 7, 2000, 65 FR 76567.	Submitted on October 13, 1995. See 40 CFR 52.220(c)(225)(i)(G)(2).
19	Posting of Permits	May 23, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
20	Transfer of Permit	May 23, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
23	Exemptions from Permit	November 12, 2013	July 14, 2015, 80 FR 40909.	Submitted on May 13, 2014. See 40 CFR 52.220(c)(441)(i)(C)(3).
24	Source Recordkeeping, Reporting and Emission Statements.	September 15, 1992	December 7, 2000, 65 FR 76567.	Submitted on November 12, 1992. See 40 CFR 52.220(c)(190)(i)(A)(3).
26	New Source Review—General	March 14, 2006	January 11, 2010, 75 FR 1282.	Submitted on June 16, 2006. See 40 CFR 52.220(c)(345)(i)(C)(2).
26.1	New Source Review—Definitions	November 14, 2006	January 11, 2010, 75 FR 1282.	Submitted on May 8, 2007. See 40 CFR 52.220(c)(350)(i)(E)(1).
26.2	New Source Review—Requirements	March 14, 2006	January 11, 2010, 75 FR 1282.	Submitted on June 16, 2006. See 40 CFR 52.220(c)(345)(i)(C)(2).
26.3	New Source Review—Exemptions	March 14, 2006	January 11, 2010, 75 FR 1282.	Submitted on June 16, 2006. See 40 CFR 52.220(c)(345)(i)(C)(2).
26.4	New Source Review—Emission Banking.	March 14, 2006	January 11, 2010, 75 FR 1282.	Submitted on June 16, 2006. See 40 CFR 52.220(c)(345)(i)(C)(2).
26.5	New Source Review—Essential Public Service Bank.	March 14, 2006	January 11, 2010, 75 FR 1282.	Submitted on June 16, 2006. See 40 CFR 52.220(c)(345)(i)(C)(2).
26.6	New Source Review—Calculations	March 14, 2006	January 11, 2010, 75 FR 1282.	Submitted on June 16, 2006. See 40 CFR 52.220(c)(345)(i)(C)(2).
26.7	New Source Review—Notification	December 22, 1992	December 7, 2000, 65 FR 76567.	Submitted on May 13, 1993. See 40 CFR 52.220(c)(193)(i)(E)(1).
26.8	New Source Review—Permit to Operate.	October 22, 1991	December 7, 2000, 65 FR 76567.	Submitted on January 28, 1992. See 40 CFR 52.220(c)(187)(i)(B)(4).

TABLE 37—EPA-APPROVED VENTURA COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS—Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
26.9	New Source Review—Power Plants ..	October 22, 1991 ...	December 7, 2000, 65 FR 76567.	Submitted on January 28, 1992. See 40 CFR 52.220(c)(187)(i)(B)(4).
26.11	New Source Review—ERC Evaluation at Time of Use.	May 14, 2002	February 28, 2003, 68 FR 9561.	Submitted on May 20, 2002. See 40 CFR 52.220(c)(305)(i)(A)(1).
26.13	New Source Review—Prevention of Significant Deterioration (PSD).	November 10, 2015	March 10, 2017, 82 FR 13243.	Submitted on March 11, 2016. See 40 CFR 52.220(c)(474)(i)(D)(1).
28	Revocation of Permits	May 23, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
29	Conditions on Permits	March 14, 2006	October 24, 2008, 73 FR 63382.	Submitted on June 16, 2006. See 40 CFR 52.220(c)(345)(i)(C)(1).
30	Permit Renewal	May 30, 1989	December 7, 2000, 65 FR 76567.	Submitted on March 26, 1990. See 40 CFR 52.220(c)(179)(i)(D)(2).
31	Public Disclosure of Data	January 29, 1974 ...	August 15, 1977, 42 FR 41121.	Submitted on July 19, 1974. See 40 CFR 52.220(c)(24)(x)(A).
34	Acid Deposition Control	March 14, 1995	May 20, 2004, 69 FR 29074.	Submitted on May 24, 1995. See 40 CFR 52.220(c)(220)(i)(E)(1).
	Regulation IV—Prohibitions			
50	Opacity	April 13, 2004	August 9, 2005, 70 FR 46090.	Submitted on July 19, 2004. See 40 CFR 52.220(c)(332)(i)(B)(2).
52	Particulate Matter—Concentration (Grain Loading).	April 13, 2004	August 9, 2005, 70 FR 46090.	Submitted on July 19, 2004. See 40 CFR 52.220(c)(332)(i)(B)(2).
53	Particulate Matter—Process Weight ...	April 13, 2004	August 9, 2005, 70 FR 46090.	Submitted on July 19, 2004. See 40 CFR 52.220(c)(332)(i)(B)(2).
54	Sulfur Compounds	January 14, 2014 ...	January 20, 2015, 80 FR 2609.	Submitted on May 13, 2014. See 40 CFR 52.220(c)(441)(i)(C)(1).
56	Open Burning	November 11, 2003	February 22, 2005, 70 FR 8516.	Submitted on January 15, 2004. See 40 CFR 52.220(c)(328)(i)(A)(2).
57	Incinerators	January 11, 2005 ...	November 9, 2006, 71 FR 65740.	Submitted on July 15, 2005. See 40 CFR 52.220(c)(337)(i)(B)(2).
57.1	Particulate Matter Emissions from Fuel Burning Equipment.	January 11, 2005 ...	November 9, 2006, 71 FR 65740.	Submitted on July 15, 2005. See 40 CFR 52.220(c)(337)(i)(B)(2).
58	Reduction of Animal Matter	May 23, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
59	Electrical Power Generating Equipment—Oxides of Nitrogen Emissions.	July 15, 1997	July 20, 1999, 64 FR 38832.	Submitted on March 10, 1998. See 40 CFR 52.220(c)(254)(i)(K)(1).
62	Hazardous Materials	May 23, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
62.6	Ethylene Oxide—Sterilization and Aeration.	July 16, 1991	August 4, 1994, 59 FR 39690.	Submitted on October 25, 1991. See 40 CFR 52.220(c)(186)(i)(D)(1).
63	Separation and Combination of Emissions.	November 21, 1978	June 18, 1982, 47 FR 26388.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xx)(A).
64	Sulfur Content of Fuels	April 13, 1999	December 3, 1999, 64 FR 67787.	Submitted on June 3, 1999. See 40 CFR 52.220(c)(264)(i)(C)(1).
68	Carbon Monoxide	April 13, 2004	August 9, 2005, 70 FR 46090.	Submitted on July 19, 2004. See 40 CFR 52.220(c)(332)(i)(B)(3).
69	Asphalt Air Blowing	July 5, 1983	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(C)(1).
70	Storage and Transfer of Gasoline	April 1, 2009	January 31, 2011, 76 FR 5277.	Submitted on September 15, 2009. See 40 CFR 52.220(c)(377)(i)(C)(1).
71	Crude Oil and Reactive Organic Compound Liquids.	May 11, 2021	August 15, 2024, 89 FR 66232.	Submitted on October 15, 2021 as an attachment to a letter dated October 14, 2021. See 40 CFR 52.220(c)(601)(i)(B)(1).
71.1	Crude Oil Production and Separation	July 11, 2023	May 29, 2026, 91 FR 31918.	Submitted on January 10, 2024. See 40 CFR 52.220(c)(626)(i)(B)(1).
71.2	Storage of Reactive Organic Compound Liquids.	September 26, 1989	December 6, 1993, 58 FR 64157.	Submitted on October 16, 1990. See 40 CFR 52.220(c)(181)(i)(A)(1).
71.3	Transfer of Reactive Organic Compound Liquids.	June 16, 1992	August 4, 1994, 59 FR 39690.	Submitted on September 14, 1992. See 40 CFR 52.220(c)(189)(i)(B)(1).
71.4	Petroleum Sumps, Pits, Ponds and Well Cellars.	June 8, 1993	December 14, 1994, 59 FR 64330.	Submitted on November 18, 1993. See 40 CFR 52.220(c)(194)(i)(A)(1).
71.5	Glycol Dehydrators	December 13, 1994	February 29, 1996, 61 FR 7706.	Submitted on February 24, 1995. See 40 CFR 52.220(c)(215)(i)(B)(2).
74.1	Abrasive Blasting	November 12, 1991	December 7, 1998, 63 FR 67419.	Submitted on January 28, 1992. See 40 CFR 52.220(c)(187)(i)(B)(2).
74.2	Architectural Coatings	November 10, 2020	March 6, 2023, 88 FR 13713.	Submitted on July 26, 2021. See 40 CFR 52.220(c)(569)(i)(A)(3).
74.3	Paper, Fabric and Film Coating Operations.	December 10, 1991	September 7, 1995, 60 FR 46535.	Submitted on June 19, 1992. See 40 CFR 52.220(c)(188)(i)(D)(3).
74.4	Cutback Asphalt	July 5, 1983	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(C)(1).
74.5.1	Petroleum Solvent Dry Cleaning	December 4, 1990	March 24, 1992, 57 FR 10136.	Submitted on April 5, 1991. See 40 CFR 52.220(c)(183)(i)(B)(1).
74.5.2	Synthetic Solvent Dry Cleaning	May 9, 1995	April 5, 2000, 65 FR 17768.	Submitted on August 10, 1995. See 40 CFR 52.220(c)(224)(i)(B)(3).

TABLE 37—EPA-APPROVED VENTURA COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS—Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
74.6	Surface Cleaning and Degreasing	November 10, 2020	February 24, 2022, 87 FR 10311.	Submitted on July 26, 2021. See 40 CFR 52.220(c)(569)(i)(A)(1).
74.6.1	Batch Loaded Vapor Degreasers	November 10, 2020	February 24, 2022, 87 FR 10311.	Submitted on July 26, 2021. See 40 CFR 52.220(c)(569)(i)(A)(2).
74.7	Fugitive Emissions of Reactive Organic Compounds (ROC) at Petroleum Refineries and Chemical Plants.	October 10, 1995	July 25, 1996, 61 FR 38571.	Submitted on March 26, 1996. See 40 CFR 52.220(c)(230)(i)(A)(1).
74.8 (paragraphs (A) and (B)).	Refinery Vacuum Producing Systems, Wastewater Separators and Process Turnarounds.	June 19, 1979	July 1, 1982, 47 FR 28617.	Submitted on October 18, 1979. See 40 CFR 52.220(c)(77)(ii)(B). Paragraphs (C) and (D) were superseded by approval of amended Rule 74.8 at 52 FR 12522 (April 17, 1987).
74.8 (paragraphs (C) and (D)).	Refinery Vacuum Producing Systems, Wastewater Separators and Process Turnarounds.	July 5, 1983	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(C)(1).
74.9	Stationary Internal Combustion Engines.	November 8, 2005	July 30, 2008, 73 FR 44155.	Submitted on March 10, 2006. See 40 CFR 52.220(c)(344)(i)(D)(1).
74.10	Components at Crude Oil and Natural Gas Production and Processing Facilities.	March 10, 1998	August 19, 1999, 64 FR 45175.	Submitted on June 23, 1998. See 40 CFR 52.220(c)(256)(i)(F)(1).
74.11	Natural Gas-Fired Water Heaters	May 11, 2010	October 29, 2019, 84 FR 57826.	Submitted on June 21, 2011. See 40 CFR 52.220(c)(391)(i)(D)(1).
74.11.1	Large Water Heaters and Small Boilers.	September 11, 2012	May 19, 2014, 79 FR 28612.	Submitted on April 22, 2013. See 40 CFR 52.220(c)(429)(i)(A)(2).
74.12	Surface Coating of Metal Parts and Products.	April 8, 2008	May 24, 2011, 76 FR 30025.	Submitted on January 10, 2010. See 40 CFR 52.220(c)(378)(i)(C)(1).
74.13	Aerospace Assembly and Component Manufacturing Operations.	September 11, 2012	July 1, 2014, 79 FR 37222.	Submitted on April 22, 2013. See 40 CFR 52.220(c)(429)(i)(A)(4).
74.14	Polyester Resin Material Operations	April 12, 2005	February 1, 2006, 71 FR 5172.	Submitted on July 15, 2005. See 40 CFR 52.220(c)(337)(i)(B)(1).
74.15	Boilers, Steam Generators, and Process Heaters.	November 8, 1994	February 9, 1996, 61 FR 4887.	Submitted on January 24, 1995. See 40 CFR 52.220(c)(214)(i)(D)(1).
74.15.1	Boilers, Steam Generators, and Process Heaters.	June 23, 2015	August 1, 2016, 81 FR 50348.	Submitted on November 13, 2015. See 40 CFR 52.220(c)(472)(i)(B)(1).
74.16	Oilfield Drilling Operations	January 8, 1991	April 20, 1999, 64 FR 19277.	Submitted on April 5, 1991. See 40 CFR 52.220(c)(183)(i)(B)(4).
74.18	Motor Vehicle and Mobile Equipment Coating Operations.	November 11, 2008	September 24, 2013, 78 FR 58459.	Submitted on March 17, 2009. See 40 CFR 52.220(c)(363)(i)(E)(1).
74.19	Graphic Arts	June 14, 2011	September 24, 2013, 78 FR 58459.	Submitted on September 27, 2011. See 40 CFR 52.220(c)(404)(i)(C)(2).
74.19.1	Screen Printing Operations	November 11, 2003	October 25, 2005, 70 FR 61561.	Submitted on April 26, 2005. See 40 CFR 52.220(c)(336)(i)(B)(1).
74.20	Adhesives and Sealants	October 9, 2018	February 24, 2021, 86 FR 11130.	Submitted on January 23, 2019. See 40 CFR 52.220(c)(545)(i)(A)(1).
74.21	Semiconductor Manufacturing	April 6, 1993	February 29, 1996, 61 FR 7706.	Submitted on November 18, 1993. See 40 CFR 52.220(c)(194)(i)(A)(4).
74.22	Natural Gas-Fired, Fan-Type Central Furnaces.	November 9, 1993	April 30, 1996, 61 FR 18959.	Submitted on February 11, 1994. See 40 CFR 52.220(c)(195)(i)(B)(1).
74.23	Stationary Gas Turbines	January 8, 2002	June 3, 2003, 68 FR 33018.	Submitted on March 15, 2002. See 40 CFR 52.220(c)(297)(i)(A)(4).
74.24	Marine Coating Operations	September 11, 2012	July 1, 2014, 79 FR 37222.	Submitted on April 22, 2013. See 40 CFR 52.220(c)(429)(i)(A)(5).
74.24.1	Pleasure Craft Coating and Commercial Boatyard Operations.	January 8, 2002	August 13, 2002, 67 FR 52611.	Submitted on March 15, 2002. See 40 CFR 52.220(c)(297)(i)(A)(3).
74.25	Restaurant Cooking Operations	October 12, 2004	August 9, 2005, 70 FR 46090.	Submitted on January 13, 2005. See 40 CFR 52.220(c)(335)(i)(C)(1).
74.26	Crude Oil Storage Tank Degassing Operations.	November 8, 1994	May 6, 1996, 61 FR 20145.	Submitted on January 24, 1995. See 40 CFR 52.220(c)(214)(i)(D)(2).
74.27	Gasoline and ROC Liquid Storage Tank Degassing Operations.	November 8, 1994	May 6, 1996, 61 FR 20145.	Submitted on January 24, 1995. See 40 CFR 52.220(c)(214)(i)(D)(2).
74.28	Asphalt Roofing Operations	January 1, 1995	February 29, 1996, 61 FR 7706.	Submitted on July 13, 1994. See 40 CFR 52.220(c)(198)(i)(J)(1).
74.29	Soil Decontamination Operations	July 1, 2008	October 3, 2011, 76 FR 61057.	Submitted on January 10, 2010. See 40 CFR 52.220(c)(378)(i)(C)(2).
74.30	Wood Products Coatings	June 27, 2006	July 16, 2008, 73 FR 40754.	Submitted on October 5, 2006. See 40 CFR 52.220(c)(347)(i)(D)(1).
74.31	Metalworking Fluids and Direct-Contact Lubricants.	November 12, 2013	March 27, 2015, 80 FR 16289.	Submitted on May 13, 2014. See 40 CFR 52.220(c)(441)(i)(C)(2).
74.33	Liquefied Petroleum Gas Transfer or Dispensing.	January 13, 2015	September 25, 2015, 80 FR 57725.	Submitted on April 7, 2015. See 40 CFR 52.220(c)(461)(i)(B)(1).
74.34	NO_X Reductions from Miscellaneous Sources.	December 13, 2016	December 19, 2017, 82 FR 60119.	Submitted on February 24, 2017. See 40 CFR 52.220(c)(498)(i)(A)(1).
75	Circumvention	November 21, 1978	June 18, 1982, 47 FR 26388.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xx)(A).

No. 214 November 6, 2026

Part III

Department of Labor

29 CFR Parts 29 and 30
Prohibiting Illegal Discrimination in Registered Apprenticeship Programs; Final Rule

DEPARTMENT OF LABOR

29 CFR Parts 29 and 30

[Docket No. ETA–2025–0006]

RIN 1205–AC21

Prohibiting Illegal Discrimination in Registered Apprenticeship Programs

AGENCY: Employment and Training Administration, Labor.

ACTION: Final rule.

SUMMARY: The Department of Labor (DOL or the Department) is issuing this final rule to remove the onerous and legally questionable affirmative action requirements that were previously imposed by the Department on Registered Apprenticeship program sponsors. This final rule also streamlines and simplifies nondiscrimination obligations for all program sponsors, while clarifying that sponsors are accountable for compliance with Federal and State nondiscrimination protections. It also makes conforming, technical changes to the Department's regulation that addresses Labor Standards for the Registration of Apprenticeship Programs.

DATES: This final rule is effective January 5, 2027.

FOR FURTHER INFORMATION CONTACT: Luke Murren, Acting Administrator, Office of Policy Development and Research, U.S. Department of Labor, Employment and Training Administration, 200 Constitution Avenue NW, Room N–5641, Washington, DC 20210, Telephone: 202–693–3700 (voice) (this is not a toll-free number). For persons with a hearing or speech disability who need assistance using the telephone system, please dial 711 to access telecommunications relay services.

I. Executive Summary

This final rule, *Prohibiting Illegal Discrimination in Registered Apprenticeship Programs,* removes burdensome requirements for Registered Apprenticeship program sponsors contained in the regulation at 29 CFR part 30, and replaces the part 30 regulation's complicated array of apprenticeship-specific nondiscrimination requirements with a more straightforward requirement that all Registered Apprenticeship program sponsors comply with all Federal and State laws and regulations prohibiting discrimination. In addition, the final rule provides clarity to apprenticeship stakeholders regarding the appropriate forums for advancing and remediating issues relating to alleged discrimination in Registered Apprenticeship programs.

Under this final rule, Registered Apprenticeship program sponsors will no longer be required to comply with the burdensome administrative requirements contained in the part 30 regulation, which included a general duty for all sponsors to engage in affirmative action and meet equal employment opportunity (EEO) obligations. The part 30 regulation's general duty to engage in affirmative action included mandates to designate an individual to manage the program's EEO policy, to conduct anti-harassment training, and to post an equal opportunity pledge, among other burdensome requirements. The final rule also removes the burdensome and legally questionable regulatory mandate that sponsors with five or more apprentices comply with more extensive affirmative action requirements, which included conducting utilization analyses and setting numerical goals for hiring apprentices based upon their race, sex, and ethnicity. The Department expects that removing these obligations will significantly reduce administrative burdens for sponsors and will also support the growth of Registered Apprenticeship programs, in alignment with the Department's and Administration's goals and priorities.

In their place, this final rule substitutes a streamlined requirement that all Registered Apprenticeship program sponsors comply fully with all applicable Federal and State laws and regulations prohibiting illegal

discrimination. This requirement, along with a revised regulatory framework for discrimination-related complaints, provides needed clarity to apprenticeship stakeholders on the most appropriate and effective course of action for apprentices to raise and seek remediation of discrimination-related issues. Finally, the final rule includes a requirement that any State seeking new or continued recognition from the Department's Office of Apprenticeship (OA) as a State Apprenticeship Agency (SAA) must establish State laws and regulations that conform to the revised part 30 regulation, so that Registered Apprenticeship programs throughout the National Apprenticeship System are subject to a consistent set of requirements related to nondiscrimination in apprenticeship.

II. Background and Purpose of the Revised Part 30 Regulation

A. Legal Authority To Promulgate Registered Apprenticeship Regulations

The National Apprenticeship Act (NAA) (also known as the Fitzgerald Act), 50 Stat. 664,[1] was enacted by Congress in 1937. Among other things, the NAA authorizes the Secretary of the Department of Labor to ''formulate and promote the furtherance of labor standards necessary to safeguard the welfare of apprentices, to extend the application of such standards by inclusion thereof in contracts of apprenticeship, to bring together employers and labor for the formulation of programs of apprenticeship, [and] to cooperate with State agencies engaged in the formulation and promotion of standards of apprenticeship.'' 50 Stat. 664.[2] The NAA forms the basis of the Department's legal authority to oversee the National Apprenticeship System and develop and advance labor standards, in conjunction with apprenticeship stakeholders throughout industry, labor, and State and local jurisdictions, for Registered Apprenticeship programs. Pursuant to this statutory authority, the Department has designated OA, within the Department's Employment and Training Administration (ETA), as the office responsible for conducting oversight, establishing rules and policies related to Registered Apprenticeship, and promoting the success and expansion of the Registered Apprenticeship model.

To implement the aims of the NAA, OA has promulgated regulations, found at 29 CFR parts 29 and 30, to formalize labor standards that all Registered Apprenticeship programs must meet, and establish processes to conduct National Apprenticeship System oversight in coordination with State and local jurisdictions. The Department's legal authority to promulgate regulations related to Registered Apprenticeship, as well as the scope and content of such regulations, is rooted in the NAA. Under such authority, the Department must also periodically revisit the governing regulations at 29 CFR parts 29 and 30 in light of evolving economic conditions, changes impacting the labor market, or other developments impacting workforce development and apprenticeship.

The regulation at 29 CFR part 29 (part 29) implements the NAA's statutory directive to the Department to establish labor standards for Registered Apprenticeship programs and safeguard the welfare of apprentices. The first version of a regulation that set forth standards of apprenticeship was issued by the Department in 1977, and the last major revision to the part 29 regulations was issued in 2008. The part 29 regulation, and the labor standards that it established, serve as the primary regulatory framework for Registered Apprenticeship programs. The part 29 regulatory requirements for Registered Apprenticeship programs are intended to allow sponsors of such programs to tailor programs to meet their workforce needs while maintaining the high quality that has characterized Registered Apprenticeship for decades.

The regulation at part 30 requiring nondiscrimination and equality of opportunity in Registered Apprenticeship programs was first issued by the Department in 1963, and was subsequently updated by the Department in 1971, 1978, and 2016. Across these iterations, the part 30 regulation evolved from a prohibition against discrimination (also described as a requirement for sponsors to select apprentices ''solely on the basis of their qualifications compared to those of other applicants''), to include various other requirements for sponsors and State agencies. For sponsors, additional requirements imposed by the part 30 regulation included: developing and posting a policy committing to equal opportunity; conducting anti-harassment training; providing a written notice to apprentices informing them of their right to file discrimination complaints and the process for doing so; and (for those Registered Apprenticeship programs enrolling five or more apprentices) conducting utilization analyses as part of their affirmative action plans and inviting apprentices to voluntarily disclose their disability status. The part 30 regulation also included a requirement for State agencies to develop a ''State EEO plan'' in order to seek or maintain recognition as an SAA, among other requirements.

Acting on the Department's authority to promulgate apprenticeship regulations under the NAA, the Department issued a Notice of Proposed Rulemaking (NPRM) entitled *Prohibiting Illegal Discrimination in Registered Apprenticeship Programs* in the **Federal Register** on July 2, 2025, (90 FR 28947) as the first step in a transparent process to update the part 30 regulation.[3] This first step of the rulemaking process for Federal agencies, which is governed by the Administrative Procedure Act (APA), as amended, at 5 U.S.C. 553, supports transparent policymaking by allowing the Department to publish its proposed approach to updating the regulation and explain its rationale for the proposed changes, and by allowing the public to examine, assess, and provide public comments in response to the Department's proposal. In the NPRM, the Department proposed to update and significantly streamline the part 30 regulation to return to a more straightforward nondiscrimination requirement for Registered Apprenticeship program sponsors and clarify the most appropriate and effective processes and forums for raising and remediating issues related to alleged illegal discrimination in Registered Apprenticeship programs. The Department assessed public comments on its proposal and reexamined its rationale and goals for the rulemaking in light of the views, arguments, and data shared by public commenters, in developing this final rule in accordance with the APA.

B. Registered Apprenticeship: Opportunities for Expansion

For nearly a century, the Department has supported the administration of Registered Apprenticeship programs and overseen the National Apprenticeship System. Registered Apprenticeship is a proven workforce development strategy that combines paid on-the-job learning (OJL) and related instruction, providing tangible benefits to employers and career-seekers alike. Registered Apprenticeship enables employers to design training programs that meet their workforce development needs, empowers apprentices to advance their careers

[3] The Department's NPRM can be found at *https://www.federalregister.gov/documents/2025/07/02/2025-12317/prohibiting-illegal-discrimination-in-registered-apprenticeship-programs.*

through structured training that develops critical occupational skills and competencies and ultimately leads to an apprentice becoming proficient in an occupation. What began as a training strategy for the skilled trades has evolved and expanded to include a wider range of occupations across industries, including growth sectors such as information technology, health care, and financial services.

At the end of fiscal year (FY) 2025, according to OA data on Registered Apprenticeship programs nationwide, 26,628 active Registered Apprenticeship programs provided training to more than 700,000 apprentices.[4] These programs provide training in more than 1,000 occupations determined to be ''apprenticeable'' [5] across industries ranging from advanced manufacturing and construction to education, financial services, information technology, and health care. The number of apprentices has grown steadily over the past decade; the total number of active apprentices at the end of FY 2025 represented a 77% increase from the 395,764 active apprentices in FY 2016. Since 2016,[6] the Department has expanded its role in administering the National Apprenticeship System to include targeted investments to support Registered Apprenticeship growth. These investments have grown from around $90 million in FY 2016 to $185 million in FY 2021, $235 million in FY 2022,[7] and $285 million in FYs 2023, 2024, 2025, and 2026.[8]

Despite the steady growth of the National Apprenticeship System, the Department recognizes that Registered Apprenticeship's impact on the U.S. economy, overall, remains limited. Registered Apprenticeship is underutilized as a workforce development solution in the United States when compared to the impact of apprenticeship in other developed nations. In the United States, apprentices comprise a significantly smaller share of the overall workforce than in other countries with strong and established apprenticeship systems (such as Australia, Canada, Germany, and the United Kingdom).[9] Given this underutilization of apprenticeship in the United States, the Department is determined to address factors that serve to limit the accelerated expansion and utilization of the model, including removing burdensome regulatory requirements like the complex and legally questionable set of requirements contained in the existing part 30 regulation.

While the Department is supportive of efforts to expand Registered Apprenticeship into new sectors and occupations where the training model is not currently widespread, the preponderance of Registered Apprenticeship programs remain within the skilled trades. In 2026, OA's data on apprenticeship participation by industry indicates there are nearly 270,000 apprentices in Registered Apprenticeship programs in the construction sector, a significant plurality compared to other industries.[10] This concentration of programs in the skilled trades limits Registered Apprenticeship's potential economy-wide impact and contributes to the false narrative that this training model is only suitable for that sector. Registered Apprenticeship's combination of structured OJL and related instruction is a proven training strategy that has consistently benefited both employers and career-seekers and can be adapted across industries (including growth sectors like information technology and healthcare).

The Registered Apprenticeship model has significant potential to meet the workforce development needs of more employers and provide more apprentices with opportunities to develop their careers, and as such, the Department views the expansion of the model as a pathway to greater economic prosperity in the United States. In a 2023 report (updated in February 2026), the U.S. Chamber of Commerce analyzed economic trends in job openings, labor force participation, and other labor market indicators.[11] This analysis showed that over the past two decades, job openings have increased, on average, while the number of unemployed workers has decreased, resulting in a persistent shortage of workers available to fill open positions. The analysis shows that while the gap between job openings and available workers has evened out following economic shocks and disruptions related to the COVID–19 pandemic (when unemployment spiked to 23 million unemployed workers in 2020), State-level economic data indicates that some States face significant challenges in filling job openings. South Dakota, for example, had 41 available workers for every 100 open jobs, and nationwide, only ten States report a surplus of available workers.

In general, labor force participation has been on the decline for the past two decades, due to a range of factors including retirements, an aging workforce, and reliance on means-tested public benefits. Further, employers increasingly point to a mismatch in the skills they need for their workforce and the skills possessed by job seekers when describing challenges in filling open positions. Surveys and analyses of hiring trends indicate that, while many employers have open positions and are seeking to hire employees, they struggle to fill these positions because they struggle to find candidates that possess the skills they need. One recent analysis estimates a potential shortage of approximately 5.25 million workers with education and training beyond high school through 2032, including projected shortages in several occupations that have historically relied on work-based training.[12]

[4] Data discussed in this paragraph are available to the public on OA's website, ''Apprenticeship—Data and Statistics,'' *https://www.apprenticeship.gov/data-and-statistics.*

[5] Part 29 defines an ''apprenticeable'' occupation as an occupation that must involve skills customarily learned through structured, systematic OJL, must be clearly identified and commonly recognized throughout an industry, must involve the progressive attainment of skills that would require the completion of at least 2,000 hours of OJL to attain, and must require a related instruction component to supplement OJL. *See* 29 CFR 29.4, *https://www.ecfr.gov/current/title-29/subtitle-A/part-29#29.4.*

[6] Prior to 2016, the Department invested around $30 million per year to support Registered Apprenticeship. Since 2016, these investments have steadily increased and diversified, and are supplemented by State funds supporting the Registered Apprenticeship expansion goal. *See* the Urban Institute's analysis of strategic investment in Registered Apprenticeship, ''Strategic Investments to Expand Apprenticeships in the US,'' *https://www.urban.org/sites/default/files/2025-03/Strategic_Investments_to_Advance_Apprenticeships_in_the_US.pdf.*

The Department sees Registered Apprenticeship as a critical strategy for increasing job seekers' skills and empowering employers to design training programs that develop in-demand skill sets. Registered Apprenticeship programs' training plans are based on industry training standards, meaning that industry leaders have input into the skills and competencies needed for an occupation. Sponsors of Registered Apprenticeship programs use these industry-derived inputs in designing programs that fit their specific needs (or the needs of employers who participate in the program). During the past two decades, the Registered Apprenticeship model has expanded into industries beyond the skilled trades, but still accounts for a small share of the overall labor force that lags far behind other advanced economies.[13] The Department views Registered Apprenticeship as a successful strategy for helping more employers meet their workforce development needs, a view that is more pronounced and relevant in the labor market of 2026, when job openings increasingly require higher levels of technical and specialized skills. As such, the Trump Administration has made the expansion of Registered Apprenticeship a top priority.

Registered Apprenticeship stakeholders, including those with established programs and those interested in starting programs, have pointed to the administrative burdens and direct costs of starting and operating a program as factors that limit the expansion and uptake of the model.[14] While Federal and State funds have helped mitigate these challenges, stakeholders still report impediments, including compliance with the administrative requirements found in Federal and State regulation. The Department has determined that substantially reducing the regulatory burdens that were imposed upon program sponsors by the part 30 regulation is an indispensable prerequisite for achieving the Department's ongoing goal of expanding Registered Apprenticeship to meet the needs of the labor market.

The Department's determination to update the part 30 regulation with this final rule also aligns with the Administration's priorities for the Department and Registered Apprenticeship. On January 31, 2025, in the first days of his Administration, President Trump signed E.O. 14192, *Unleashing Prosperity Through Deregulation,* which directed Federal agencies to identify opportunities to review and revise or rescind any regulations that impose undue burdens on Americans and American businesses, with the goal of increasing flexibility for businesses and accelerating economic prosperity.[15] The President also issued E.O. 14278, *Preparing Americans for High-Paying Skilled Trade Jobs of the Future,* which directed Federal agencies to prioritize investments and develop strategies to support workforce development, and specifically instructed the Departments of Labor, Education, and Commerce to develop a plan to achieve 1,000,000 active apprentices in Registered Apprenticeship programs.[16] The Department views this final rule rescinding the burdensome and legally questionable elements of the part 30 regulation as a critical step towards meeting the Administration's directives, growing Registered Apprenticeship's footprint in the broader economy, and supporting economic prosperity for employers and job seekers in the modern labor market.

C. Historical Background on Part 30 and on Prohibiting Illegal Discrimination in Apprenticeship

In issuing this final rule, the Department has determined that it can fulfill the NAA's statutory mandate to ''safeguard the welfare of apprentices'' by simply requiring that sponsors comply with already applicable Federal and State employment nondiscrimination laws. The importance of establishing clarity and consistency in the laws and policies governing nondiscrimination in Registered Apprenticeship programs is best understood by tracing the evolution of the part 30 regulation, the pertinent provisions of applicable Federal nondiscrimination laws, and relevant Supreme Court decisions relating to the constitutionality of group-based preferences generally.

The original version of the 29 CFR part 30 regulation [17] (issued by the Department in December 1963) barred Registered Apprenticeship program sponsors from engaging in discrimination against apprentices on the basis of race, color, creed, or national origin in all phases of apprenticeship, stipulated that the selection of apprentices by programs be made ''solely on the basis of their qualifications compared to those of other applicants,'' and provided for the deregistration of apprenticeship programs that failed to comply with those mandates.[18] In effect, the Department's issuance of the 1963 part 30 regulation prohibiting illegal discrimination by Registered Apprenticeship programs formulated a new minimum standard of apprenticeship designed to safeguard the welfare of apprentices, one that was later supplemented by the establishment of additional labor standards of apprenticeship (at 29 CFR part 29) concerning, among other things, the payment of progressive wages and the provision of safe working environments to apprentices. However, it is important to note that neither the 1963 part 30 regulation nor its later iterations (in 1971, 1978, and 2016) provided apprentices with meaningful, individualized remedies (such as make-whole relief) to address instances of illegal discriminatory conduct against such persons by a program sponsor.

The absence of such individualized remedies for illegal discrimination against apprentices under the part 30 regulation, however, was addressed in the following year, when Congress enacted the Civil Rights Act of 1964, 78 Stat. 257 (the Act). Title VII of the Act (which applies to employers with 15 or more employees, among other covered

[18] This potential deregistration sanction against sponsors who are found to have engaged in program-wide discriminatory conduct against apprentices on the basis of protected characteristics has been retained in all subsequent iterations of the part 30 regulation, including the latest version contained in this final rule. As a Registration Agency's grant of registration to an apprenticeship program serves as an official recognition of that program's overall quality and represents the conferral of a valuable governmental benefit upon the program sponsor, the Department maintains that the potential deregistration of an apprenticeship program is an appropriate sanction against those sponsors that have been shown to operate their programs in a discriminatory manner and that have failed to address or rectify such illegal conduct.

entities) prohibits employment discrimination against individuals on the basis of their race, color, religion, national origin, and sex. In particular, section 703(d) of the Act states that ''[i]t shall be an unlawful employment practice for any employer, labor organization, or joint labor-management committee controlling apprenticeship or other training or retraining, including on-the-job training programs to discriminate against any individual because of his race, color, religion, sex, or national origin in admission to, or employment in, any program established to provide apprenticeship or other training.'' [19] Section 706(g) of the Act further authorizes a wide range of remedies for employees (including apprentices) who have experienced discrimination at the hands of a covered entity based upon their race, color, religion, sex, or national origin.[20] The Act also established the Equal Employment Opportunity Commission (EEOC), a specialized Federal agency vested by Congress with the authority to receive and investigate complaints from job applicants and employees (including apprentices) alleging violations of Title VII (as well as alleged violations of other Federal employment discrimination statutes subsequently enacted by Congress).

Significantly, the text of Title VII contains no provision requiring employers or apprenticeship programs to adopt a compulsory, nonremedial scheme of group-based preferences (such as affirmative action arrangements) in hiring or employment that takes into consideration the race, color, religion, sex, or national origin of job applicants.[21] The absence of such a general mandate in Title VII is highlighted by the inclusion (at section 703(j) of the Act [22]) of a proscriptive rule of statutory construction specifically governing the provisions of Title VII. Section 703(j) stipulates, in relevant part, that nothing contained in Title VII shall be interpreted to require any employer, employment agency, labor organization, or joint labor-management committee subject to the title ''to grant preferential treatment'' to any individual or to any group based on the race, color, religion, sex, or national origin of such individual or group in order to address an imbalance which may exist in the demographic composition of an employer's or other covered entity's work force or membership, including those individuals ''admitted to, or employed in, any apprenticeship or training program,'' as compared to the demographic composition ''in any community, State, section, or other area, or in the available work force in any community, State, section, or other area.''

In effect, the language of section 703(j) precludes governmental entities, such as Federal courts and relevant Federal administrative agencies, from interpreting Title VII's provisions in such a way as to require an employer or an apprenticeship program subject to the Act to grant preferential treatment to individuals or groups in hiring and employment based upon their race, color, religion, sex, or national origin for the purpose of achieving or maintaining demographic ''balance'' in that employer's or apprenticeship program's workforce. However, in those limited instances where a court finds that an employer or apprenticeship program has intentionally engaged in illegal, discriminatory employment practices under Title VII, the court has the discretion under section 706(g) of the Act to impose a narrowly tailored, time-limited affirmative action plan to remedy such discriminatory conduct. *See Loc. 28 of Sheet Metal Workers' Int'l Ass'n* v. *E.E.O.C.,* 478 U.S. 421, 444–45 (1986) (plurality opinion); *id.* at 483 (Powell, J., concurring in part and concurring in judgment) (finding that the District Court had acted within the remedial authority under section 706(g) in establishing a numerical membership goal based on the percentage of nonwhites in the relevant labor pool where the union had repeatedly and egregiously violated Title VII and ignored prior judicial orders).

Taken together, the foregoing provisions of Title VII established a comprehensive statutory framework under which Congress outlawed all employment discrimination in apprenticeship and training programs covered by the Act based upon race, color, religion, sex, or national origin; provided effective remedies to individual apprentices who were subjected to such forms of illegal discrimination by covered employers and apprenticeship programs; precluded interpreting Title VII to require the utilization of nonremedial, group-based preferences by covered apprenticeship and training programs to address imbalances in the demographic composition of a program's workforce; and established a Federal agency (the EEOC) with the statutory authority and subject-matter expertise to investigate discrimination complaints by apprentices and to identify violations of Title VII by covered apprenticeship programs. The express inclusion of apprentices and apprenticeship and training programs within the scope of Title VII's statutory protections demonstrates that Congress was concerned about the prevalence of discrimination in these programs in the early 1960s, and was intentional in enacting legislation specifically prohibiting program sponsors from engaging in such egregious employment practices.[23]

In 1971, subsequent to the enactment of Title VII, the Department modified the part 30 regulation by adding sex as a protected category with respect to nondiscrimination by program sponsors; this particular amendment effectively aligned the text of part 30 with the protected nondiscrimination categories that were established by Congress in Title VII. However, the 1971 version of the part 30 regulation also introduced and imposed upon apprenticeship programs enrolling five or more apprentices a compulsory, nonremedial affirmative action requirement of indefinite duration, and mandated the establishment of numerical hiring goals by such programs in the selection of apprentices from minority groups.[24] Clearly, the Department's 1971 issuance of a regulation mandating the establishment by such apprenticeship programs of a permanent system of nonremedial, nonvoluntary, group-based preferences in the selection of apprentices was fundamentally at odds with the unambiguous policy direction charted by Congress in sections 703(d) and (j) of Title VII regarding apprenticeship: namely, that *all* employment discrimination against

[19] 42 U.S.C. 2000e–2(d).

[20] 42 U.S.C. 2000e–5(g).

[21] During the lengthy floor debate preceding the Senate's passage of the bill (H.R. 7152) that became the Act, Senator Edmund Muskie of Maine defended the Title VII provisions of the legislation, noting that the measure ''seeks to afford to all Americans equal opportunity in employment without discrimination. Not equal pay. Not 'racial balance.' Only equal opportunity.'' Senator Muskie further stated that ''[d]iscrimination in this bill means just what it means anywhere: a distinction in treatment given to different individuals because of their race.'' 110 Cong. Rec. 12617 (1964). Senator Hubert Humphrey of Minnesota, the floor manager of the bill in the Senate, maintained during the debate that ''Title VII prohibits discrimination. In effect, it says that race, religion, and national origin are not to be used as the basis for hiring and firing. Title VII is designed to encourage hiring on the basis of ability and qualifications, not race or religion.'' 110 Cong. Rec. 6549 (1964).

[22] 42 U.S.C. 2000e–2(j).

[23] Congressional concern about discrimination in apprenticeship programs led to the convening of hearings on the topic a few years before the enactment of Title VII. See ''Equal Opportunity in Apprenticeship Programs: Hearings Before the Special Subcommittee on Labor of the House Committee on Education and Labor,'' 87th Congress, 1st Session, Aug. 21, 22, and 23, 1961, *https://books.google.com/books?id=mSy_Rm9wF7oC&pg=PP1#v=onepage&q&f=false.*

[24] See 36 FR 6810 (Apr. 8, 1971).

apprentices based upon their race, color, religion, sex, or national origin is illegal, and that the use of group-based preferences to adjust demographic imbalances which may exist in an apprenticeship program's workforce must never be required (unless such preferences are temporarily imposed by a court to remedy proven instances of manifest, intentional discriminatory conduct by a program). In a broader sense, however, the Department's regulatory imposition of affirmative action requirements for certain Registered Apprenticeship programs in the 1971 part 30 regulation—and the retention of these requirements in the 1978 and 2016 versions of the regulation—effectively substituted the policy preferences of an agency of the administrative state for the considered legislative judgments of the nation's elected representatives in delineating the appropriate scope and content of Federal employment nondiscrimination laws and policies relating to apprenticeship.

On June 29, 2023, the Supreme Court of the United States handed down a decision in a landmark case involving the use of race-based preferences in university admissions, *Students for Fair Admissions, Inc.* v. *President and Fellows of Harvard College,* 600 U.S. 181 (2023) (*SFFA*). In *SFFA,* the Supreme Court held that the use of such racial preferences by Harvard and the University of North Carolina in their admissions processes violated the Equal Protection Clause of the Fourteenth Amendment to the Constitution. Several NPRM commenters mischaracterized the extent to which the Department relied upon the decision in *SFFA* in proposing to rescind the race-, sex-, and ethnicity-based affirmative action provisions contained in part 30. To be clear, the Department did not and does not claim that *SFFA's* holding regarding race-based admissions in higher education *compels* the rescission of part 30's affirmative action provisions. Nevertheless, the Department considers the Supreme Court's decision in *SFFA* to be relevant to this rulemaking insofar as it signals the Court's apparent willingness to revisit the constitutionality of race-based selection and admissions procedures that it had previously upheld in earlier decisions. In his *SFFA* opinion striking down these types of preferences, Chief Justice Roberts opined that ''[e]liminating racial discrimination means eliminating all of it,'' 600 U.S. at 206, and further observed that the Court has ''time and time again forcefully rejected the notion that governmental actors may intentionally allocate preferences to those 'who may have little in common with each other but the color of their skin,' '' *id.* at 220 (quoting *Shaw* v. *Reno,* 509 U.S. 630, 647 (1993)). These categorical and pointed expositions of nondiscrimination and equal protection principles by the Chief Justice in *SFFA*—as well as similar viewpoints expressed by other justices in their concurring opinions—certainly do not augur well for the Court's future sanctioning of mandatory, nonremedial race-, ethnic-, and sex-based affirmative action efforts in Registered Apprenticeship.

Recognizing that government-mandated, group-based affirmative action schemes such as those contained in the 1971, 1978, and 2016 versions of the part 30 regulation ''violate the text and spirit of our longstanding Federal civil-rights laws,'' President Trump issued E.O. 14173, ''Ending Illegal Discrimination and Restoring Merit-Based Opportunity,'' on January 21, 2025.[25] Among other things, section 2 of E.O. 14173 directed ''all executive departments and agencies to terminate all discriminatory and illegal preferences, mandates, policies, programs, activities, guidance, regulations, enforcement actions, consent orders, and requirements.'' Noting that longstanding Federal civil rights laws such as Title VII ''protect individuals from discrimination based on race, color, religion, sex, or national origin'' and serve ''as a bedrock supporting equality of opportunity for all Americans,'' E.O. 14173 affirmed that the President of the United States has ''a solemn duty to ensure that these laws are enforced for the benefit of all Americans.'' The issuance of this final rule by the Department prohibiting all illegal discrimination in Registered Apprenticeship programs fulfills President Trump's directive in E.O. 14173; moreover, it demonstrates appropriate respect for, and deference to, the nondiscrimination policies relating to apprenticeship that were enacted by Congress as part of Title VII of the Act.

In revising the content and scope of the part 30 regulation, the Department has determined that the affirmative action provisions described above are administratively burdensome and likely unlawful. Moreover, the Department is convinced that affirmative action schemes tend to promote the development of pernicious and divisive group-based preferences within our society, thereby undermining the goal of ensuring equality of opportunity for every American participating in the workforce. Accordingly, in issuing this final rule, the Department affirms that all applicants seeking admission to a Registered Apprenticeship program should be evaluated and selected strictly on the basis of individual merit and demonstrated potential, and that a person's race, color, religion, sex, or national origin must never be considered by a sponsor as a basis for either rejecting or granting preferential treatment to anyone seeking admission to a Registered Apprenticeship program.

D. Need for the Rulemaking: The Burdens and Challenges Imposed on Sponsors by the Part 30 Regulation

The Department has known for some time that, as its Task Force on Apprenticeship Expansion reported, ''many employers choose to establish apprenticeship programs outside of the registered apprenticeship program, in part because of the paperwork and process involved in registering a program.'' Apprenticeship Programs, Labor Standards for Registration, Amendment of Regulations, 85 FR 14294, 14295 (Mar. 11, 2020). The Department has determined that this final rule updating the part 30 regulation is necessary to accomplish the Department's and Administration's goals of eliminating unnecessary and burdensome regulatory requirements and accelerating the expansion of Registered Apprenticeship. The part 30 regulation contains the type of onerous regulatory requirements targeted by the Administration's deregulatory directive contained in E.O. 14192; in particular, the Department has identified the affirmative action requirements of the part 30 regulation as illustrative of the complicated, burdensome, and ineffective regulations that Federal agencies are directed to rescind or revise under the E.O.

Accordingly, the Department has determined that revising the part 30 regulation is necessary to discontinue the regulatory imposition of a legally questionable, nonremedial, group-based preference scheme for certain Registered Apprenticeship program sponsors. Moreover, the Department has determined that this final rule is necessary to achieve cost savings for Registered Apprenticeship stakeholders and reduce the cost and administrative burden of establishing and maintaining Registered Apprenticeship programs. As outlined in the Regulatory Impact Analysis (RIA) accompanying this final rule, over a 10-year period, Registered Apprenticeship stakeholders stand to save more than $1 billion on costs related to compliance with the part 30

[25] See 90 FR 8633 (Jan. 31, 2025).

regulation, including developing and maintaining affirmative action programs and complying with other part 30 requirements. The E.O. directing Federal agencies to identify opportunities for increased regulatory flexibility established the potential for financial relief for the regulated community as a criterion for targeting burdensome regulations. Eliminating the costs of compliance with the part 30 regulation further informs the Department's determination that this final rule's significant revisions to the part 30 regulation are necessary.

E. Goals of the Revised Part 30 Regulation

The fundamental aims of this final rule are threefold: (1) to simplify sponsors' obligations with respect to nondiscrimination in apprenticeship by affirming the applicability and sufficiency of existing Federal and State laws governing nondiscrimination in the workplace; (2) to rescind the regulatory, nonremedial affirmative action mandate that the Department has imposed upon program sponsors since 1971—a mandate that the Department is concerned would not survive legal challenge and that was plainly inconsistent with the policies underlying the statutory, apprenticeship-related, nondiscrimination provisions of Title VII applicable to many of these same sponsors; and (3) to reduce the regulatory and administrative burdens on Registered Apprenticeship program sponsors—burdens that could inhibit the accelerated establishment and expansion of such vital workforce development programs—by removing all onerous, conflicting, duplicative, or unnecessary requirements found in the part 30 regulation.

The Legal and Practical Challenges Imposed Upon Program Sponsors by the Affirmative Action Provisions of the Part 30 Regulation

Alleviating the legal and practical challenges imposed on program sponsors by the affirmative action provisions of the part 30 regulation is a primary objective of the Department's final rule. As stated in the foregoing section, the part 30 regulation's affirmative action mandate for certain apprenticeship programs imposed an onerous administrative burden upon these program sponsors and is inconsistent with this Administration's efforts to enforce merit-based opportunity, as the requirements may induce these sponsors to engage in the unequal and illegal treatment of individual apprentices (as well as applicants for apprenticeship) based upon their race, sex, or ethnicity.

In the public comments submitted to the Department in response to the NPRM, several commenters discounted or glossed over the significant and self-evident administrative burdens that the affirmative action provisions of the part 30 regulation imposed upon certain program sponsors, particularly those that operate small- and medium-sized enterprises. These commenters opined that the affirmative action provisions of the part 30 regulation imposed no undue burdens, simply requiring certain sponsors (*i.e.,* those that employ five or more apprentices) to identify imbalances in the demographic composition of the sponsor's apprenticeship workforce, to set ''aspirational'' hiring goals based upon that analysis, and to make ''good faith'' efforts to address such imbalances, while simultaneously adhering to the general prohibition on making apprenticeship hiring decisions based upon an applicant's race, ethnicity, or sex. These commenters, however, failed to either recognize or acknowledge that the part 30 regulation's nondiscrimination and affirmative action provisions, taken together, imposed fundamentally contradictory and irreconcilable legal mandates upon apprenticeship programs.

The internally inconsistent regulatory requirements contained in the part 30 regulation are illustrated by examining the content of the affirmative action provisions of that regulation at § 30.4. While § 30.4(a)(5) states that the ''commitments made in an affirmative action program are not intended and must not be used to discriminate against any qualified applicant or apprentice'' on the basis of race, color, religion, sex, disability, age or national origin, § 30.4(a)(2) admonishes sponsors that ''if women, individuals with disabilities, or individuals from a particular minority group . . . are not being admitted into apprenticeship at a rate to be expected given their availability in the relevant labor pool, the sponsor's affirmative action program must include specific, practical steps designed to address any barriers to equal opportunity that may be contributing to this underutilization.'' Such ''practical steps'' will frequently involve the establishment of ''utilization goals'' based upon an individual's race, sex, and ethnicity to address such demographic imbalances in the apprenticeship program's workforce (see § 30.4(d)).

The fundamental policy premise underlying the affirmative action provisions contained in the part 30 regulation was that ''absent discrimination, over time a sponsor's apprenticeship program, generally, will reflect the sex, race, ethnicity, and disability profile of the labor pools from which the [apprenticeship] sponsor recruits and selects.'' *See* 29 CFR 30.4(a)(2). This premise was and is constitutionally dubious, however, and the Department's concomitant regulatory requirement of setting utilization goals in the hiring of apprentices based upon the race, sex, and ethnicity of a program applicant had the effect of inducing program sponsors to meet such numerical targets. The mandating of such numerical hiring goals, combined with the prospect of apprenticeship program deregistration for failing to take ''good faith efforts'' to meet such goals, plainly incentivized employers to engage in legally questionable, group-based preferential hiring practices in order to prevent an administrative finding by the Department that they had failed to engage in such affirmative action efforts.

The part 30 regulation (at 29 CFR 30.5(b)) further stipulated that sponsors with 5 or more apprentices enrolled in their programs conduct, at least once every 3 years, detailed demographic and utilization analyses to assess and address the existence of imbalances with respect to certain demographic groups enrolled in their programs. By requiring the permanent, ongoing conduct of such analyses by certain program sponsors—and potentially requiring the establishment of group-based numerical hiring goals based upon the results—this regulatory provision constituted a mandate that such sponsors not only strive to achieve, but also continuously maintain, a demographic ''balance'' in their apprenticeship programs based upon race, sex, and ethnicity. Such a regulatory purpose, however, was and is plainly contrary to the fundamental policy thrust of Title VII, as demonstrated by the text of section 703(j) of the Act (discussed *supra*) and by the following passage contained in an interpretative, joint memorandum drafted by Senators Joseph Clark of Pennsylvania and Clifford Case of New Jersey that was addressed to their Senate colleagues at the time of the floor debate on H.R. 7152 (the bill that was later enacted by Congress as the Act): ''There is no requirement in Title VII that an employer maintain a racial balance in his work force. On the contrary, any deliberate attempt to maintain a racial balance, whatever such a balance may be, would involve a violation of Title VII because maintaining such a balance

would require an employer to hire or refuse to hire on the basis of race . . .'' 110 Cong. Rec. 7213 (1964). This joint statement by Senators Clark and Case neatly encapsulates the inescapable legal and practical dilemmas faced by Title VII-covered Registered Apprenticeship programs that attempted to comply in good faith with the open-ended, compulsory, nonremedial, and legally questionable affirmative action requirements that were contained in the part 30 regulation.

Accordingly, by rescinding the affirmative action requirements contained in the part 30 regulation, this final rule relieves Registered Apprenticeship program sponsors from vexing legal and practical dilemmas, while ensuring that an individual's admission to a Registered Apprenticeship program is made on a nondiscriminatory basis and solely on the basis of their qualifications compared to those of other applicants. The Department is confident that the provision of such regulatory relief to a large segment of program sponsors will accelerate the establishment and expansion of Registered Apprenticeship programs, resulting in a more skilled and productive American workforce.

Alleviating Undue Regulatory Burdens for Registered Apprenticeship Stakeholders

The Department has determined that the changes to the part 30 regulation codified in this final rule serve the Department's ongoing policy goal of expanding the Registered Apprenticeship model and its imprint on the national economy, a goal which aligns with the Administration's directive to the Department to expand Registered Apprenticeship and to achieve and surpass 1 million active apprentices. The part 30 regulation included a wide range of requirements that imposed administrative and financial burdens on Registered Apprenticeship program sponsors, and the Department expects that the rescission of these requirements will have a significant impact on Registered Apprenticeship program expansion. In particular, the Department expects that the rescission of the general obligation to engage in affirmative action for all sponsors, and the affirmative action program requirement for programs with five or more apprentices, will attract new sponsors to the National Apprenticeship System and encourage existing sponsors to expand their programs by substantially reducing the administrative burden necessary to establish and maintain a Registered Apprenticeship program.

E.O. 14192 directed Federal agencies to identify and rescind regulations that impose significant administrative or financial burdens (including on American businesses). The burdensome administrative requirements of the part 30 regulation began impacting Registered Apprenticeship programs from their very inception, even before they are registered with a Registration Agency. Registration of a program depends on compliance with the requirements at parts 29 and 30, and sponsors must review both parts to understand what elements they need to develop or commit to at the program development stage. Under the part 30 regulation, all prospective program sponsors were required to identify their process for the selection of apprentices (per § 30.10); identify staff responsible for overseeing the program's commitment to equal opportunity (per § 30.3(b)(1)); develop and disseminate an equal opportunity policy, including posting the Equal Opportunity pledge in the program's standards and at sites where apprentices are trained (per § 30.3(b)(2)); and plan for and address various other requirements, all before their program was even registered. These requirements presented challenges for prospective sponsors new to the system in designing Registered Apprenticeship programs that satisfied all of the requirements contained in parts 29 and 30.

In Registered Apprenticeship, compulsory affirmative action programs were the clearest example of regulatory requirements that imposed significant administrative and financial burdens on the regulated community, without providing tangible benefits to either the regulated entities, the individuals they serve, or the Federal Government. Under the part 30 regulation, all sponsors had a general duty to engage in affirmative action. In addition, sponsors with five or more apprentices were required to develop and adhere to affirmative action programs, including creating and updating a written document that memorializes the affirmative action program (per § 30.4(e)). The part 30 regulation required sponsors to include in their written affirmative action program, and adopt as an ongoing operational practice, a utilization analysis examining race, sex, and ethnicity, utilization goals for race, sex, and ethnicity; a utilization analysis and goal for individuals with disabilities; targeted outreach, recruitment, and retention policies; ongoing review of personnel policies; and annual reminders to apprentices to voluntarily disclose their disability status. These requirements were detailed at §§ 30.4 through 30.9 and 30.11 of the part 30 regulation.

Developing and maintaining an affirmative action program was a significant undertaking for Registered Apprenticeship program sponsors under the existing part 30 regulation, and OA provided significant technical assistance to both prospective and existing programs to explain these requirements. As affirmed by commenters in the public comments received in response to the Department's NPRM, some commenters reported investing significant administrative and financial resources in-house (or even externally, with consultants or outside legal assistance) to train staff, conduct the required analyses objectively and accurately, and address any legal issues related to apprentice recruitment, hiring, and retention policies. The development of an affirmative action program has been a resource-intensive undertaking for many sponsors (even with the 2-year timeframe from the point of program registration that new sponsors were allowed to develop the plan at § 30.4(e)(1)(ii)), a mandate which significantly complicated the efforts of sponsors in establishing and maintaining their apprenticeship programs. Many sponsors also faced ongoing and significant administrative burdens related to establishing and maintaining affirmative action programs, including conducting the required analyses, and updating their written plan every time the sponsor completes such analyses.

Aside from the foregoing administrative elements of developing and maintaining affirmative action programs, the part 30 regulation imposed regulatory burdens on Registered Apprenticeship program sponsors by dictating key aspects of their recruitment, hiring, and retention policies through utilization analyses that incentivized them to consider arbitrary aspects of applicants' backgrounds—namely, their group-based demographic characteristics. In the case of individuals with disabilities, the requirement even extended to setting a fixed percentage utilization goal that sponsors were charged with meeting, which created an even more prescriptive framework that infringed on a sponsor's freedom to make hiring decisions based purely on their business and workforce needs.

Several commenters advocated for the retention of the existing part 30 regulation, asserting that its requirements were instrumental in raising rates of participation in

Registered Apprenticeship programs by women and minority groups. However, as detailed later in this preamble, the Department maintains that the correlation posited by these commenters between post-2016 participation outcomes for certain demographic groups and the part 30 regulation's affirmative action requirements is inconclusive. Moreover, such statistical inferences do not alter the fundamental and inescapable reality that compulsory, nonremedial, group-based preferences and affirmative action schemes are inherently discriminatory—and therefore legally suspect—because they treat individuals differently based upon their race, sex, or ethnicity. Accordingly, any arguments advanced to justify affirmative action arrangements that are based upon the general notion of achieving and maintaining greater demographic ''balance'' or ''diversity'' in the apprenticeship workforce are not only contrary to the principle of hiring individuals solely on the basis of merit and without reference to their ancestry or group identity, but are also unlikely to withstand legal scrutiny by the courts. Even a noted proponent of affirmative action based upon race, Professor Randall Kennedy of the Harvard Law School, has candidly acknowledged that ''[r]acial affirmative action *does* distinguish between people on a racial basis. It *does* discriminate. It *does* redistribute resources. It *does* favor preferred racial categories of candidates . . . It *does* generate stigma and resentment. These issues cannot be hidden for long behind verbal tricks (emphasis in original).'' [26] Similarly, any system of group-based hiring preferences that makes distinctions among individuals based upon their sex or ethnicity is inherently discriminatory in its purpose and effect.

In issuing this final rule prohibiting illegal discrimination in Registered Apprenticeship programs, the Department seeks to ensure that a candidate's admission to such a training program is based solely upon their individual merit and their demonstrated potential for success. Accordingly, such an approach necessitates the rescission of all of the part 30 regulatory provisions that imposed affirmative action requirements on sponsors (such as those setting numerical, nonremedial hiring goals in the selection of apprentices based upon an individual's race, sex, ethnicity, religion, or national origin), as such mandates are contrary to the fundamental goal of guaranteeing genuine equality of opportunity for each and every American who participates in the workforce. At a time when the accelerated expansion of Registered Apprenticeship training is needed to equip American workers of all backgrounds with the occupational skills they need to succeed in a competitive global marketplace, it is essential that the Department rescind such burdensome and legally vulnerable regulatory provisions that could effectively inhibit the growth of this proven workforce development model.

III. Overview of the Revised Part 30 Regulation

A. Summary of the Final Rule's Provisions

This final rule rescinds or significantly revises the burdensome requirements of the part 30 regulation and replaces them with a more straightforward Federal standard for nondiscrimination in Registered Apprenticeship. The final rule explains how Registration Agencies will monitor and enforce program sponsors' compliance with the revised part 30 regulation. The final rule also changes requirements for SAAs related to the part 30 regulation and clarifies the Department's expectation that Registered Apprenticeship program sponsors must not be subject to inhibitive or contradictory nondiscrimination requirements in apprenticeship laws or regulations across States. With this final rule, the Department eliminates the apprenticeship-specific framework for EEO and nondiscrimination contained in the part 30 regulation. Under the part 30 regulation as revised by this final rule, program sponsors are still bound by a firm nondiscrimination requirement that clearly incorporates applicable Federal and State laws and regulations prohibiting illegal discrimination on the basis of race, color, religion, national origin, sex, age, genetic information, or disability. Under this final rule, Registered Apprenticeship program sponsors are no longer bound by a separate, apprenticeship-specific, and administratively burdensome nondiscrimination framework.

This final rule's purpose and applicability section, at 29 CFR 30.1, lays out the Department's intent for the part 30 regulation going forward—to establish a ''uniform Federal standard prohibiting illegal discrimination against apprentices (including applicants for apprenticeship)'' and to clarify the scope of enforcement and compliance assistance by Registration Agencies (either OA or an SAA). Section 30.1 also clarifies that the part 30 regulation applies to all sponsors of Registered Apprenticeship programs, whether registered by OA or an SAA. It eliminates the prior part 30 regulation's § 30.1(c) on the regulation's ''relationship to other laws,'' which is covered under the revised § 30.3. The final rule also rescinds definitions specific to the part 30 regulation and instead clarifies that definitions contained in the part 29 regulation (at 29 CFR 29.2) also apply to part 30. The prior part 30 regulation's definition section contained definitions already established in the part 29 regulation, or definitions specific to the prior part 30 regulation's requirements that are being rescinded in this final rule.

This final rule establishes the streamlined and clarified nondiscrimination requirement for all Registered Apprenticeship program sponsors at 29 CFR 30.3. The updated § 30.3 language requires that Registered Apprenticeship program sponsors must comply with all applicable Federal and State laws prohibiting illegal discrimination on the basis of race, color, religion, national origin, sex, age (40 or older), genetic information, or disability. The Department notes that these protected characteristics align with the Federal nondiscrimination protections contained in Title VII of the Act and subsequent nondiscrimination statutes enacted by Congress, including the Age Discrimination in Employment Act of 1967 (ADEA),[27] the Americans with Disabilities Act of 1990 (ADA),[28] and title II of the Genetic Information Nondiscrimination Act of 2008.[29] This section also lays out, at a high level, the consequences of a failure to comply with this nondiscrimination requirement, which include enforcement actions up to and including deregistration of the Registered Apprenticeship program. Under § 30.3, apprentices and applicants for apprenticeship are protected from discrimination ''with respect to any benefit, term, or condition of employment associated with an apprenticeship.''

This final rule eliminates the EEO requirements applicable to all sponsors contained in part 30 regulation at § 30.3, as well as the regulation's affirmative action program requirements which are referenced at § 30.3 and elaborated on at §§ 30.4 through 30.9 and 30.11. These sections included a description of the

[26] Randall Kennedy, *For Discrimination: Race, Affirmative Action, and the Law* (Pantheon Books, New York, 2013), pp. 18–19.

[27] 29 U.S.C. ch. 14.

[28] 42 U.S.C. ch. 126.

[29] 42 U.S.C. ch. 21F.

rule's prohibition on discrimination and discrimination standards and defenses; the general duty to engage in affirmative action applicable to all sponsors; the requirement to develop and disseminate an equal opportunity policy and post an Equal Opportunity pledge; universal outreach and recruitment requirements applicable to all sponsors; a prohibition on harassment, intimidation, and retaliation specific to apprenticeship; and the requirement for sponsors with five or more apprentices to establish demographic utilization goals (when appropriate) and maintain an affirmative action program.

This final rule eliminates the part 30 regulation's requirement (at § 30.11) that sponsors invite apprentices to voluntarily disclose their disability status upon enrollment in the program and annually thereafter. Under this final rule, however, apprentices are not precluded from voluntarily disclosing their disability status to Registered Apprenticeship program sponsors and are encouraged to do so, especially if they need to request reasonable accommodation related to their disability. In rescinding the part 30 regulation's affirmative action program requirements, the Department also eliminates the requirement that Registered Apprenticeship program sponsors conduct utilization analyses for individuals with disabilities and pursue a utilization goal for such persons established by the Administrator. The final rule also rescinds the part 30 regulation's requirements for sponsors related to the procedure for the selection of apprentices (at § 30.10), the recordkeeping requirements related to the part 30 regulation (at § 30.12), and the apprenticeship-specific prohibition against intimidation and retaliation (at § 30.17).

The final rule updates the part 30 regulation's section on complaints to clarify that complaints alleging illegal discrimination against apprentices should be referred to the EEOC or another relevant enforcement agency with the jurisdiction and expertise to adequately investigate and potentially remedy the issue. Under current practice, apprentices may submit complaints alleging instances of discrimination or other violations of part 30 requirements through ETA Form 9039 to the Registration Agency. In practice, Registration Agencies then forward complaints to the most relevant nondiscrimination enforcement agency, including the EEOC, the U.S. Attorney General, or a State-level Fair Employment Practices Agency (FEPA). The part 30 regulation contained a requirement for Registration Agencies to conduct investigations and provide written notice of findings to the respondent and the complainant, along with other regulatory requirements outlining who can file complaints, what information must be included in the complaint, a requirement for sponsors to provide written notice to apprentices of their right to file complaints, and a requirement for the Registration Agency to ''attempt to resolve the matter quickly . . . whenever appropriate'' (at § 30.14(c)(2)).

The revised part 30 regulation's section on complaints, at § 30.4 of this final rule, removes the investigative requirements for Registration Agencies and the notice requirement for program sponsors. The final rule establishes a simpler and less duplicative process that recognizes that the investigation and adjudication of complaints alleging illegal discrimination should be conducted by the appropriate investigative and enforcement agency. The revised section on complaints at § 30.4 of this final rule states that Registration Agencies in receipt of complaints alleging illegal discrimination against apprentices will ''immediately'' refer the complainant to the EEOC, the U.S. Attorney General, a State FEPA, or another appropriate enforcement entity. In accordance with this change to the part 30 regulation, the Department is also rescinding ETA Form 9039.

The part 30 regulation, as finalized in this rulemaking, also revises the process for Registration Agencies to assess compliance with part 30 requirements. The section on nondiscrimination compliance reviews and enforcement, at § 30.5 of this final rule, revises the current part 30 regulation's section on EEO compliance reviews (at § 30.13) to align with the content of the updated part 30 regulation and its streamlined nondiscrimination in apprenticeship requirement for program sponsors. Section 30.5 of this final rule clarifies that Registration Agency reviews for part 30 compliance will occur when a program is assessed for compliance with the part 29 regulation. The final rule's revised compliance review and enforcement section stipulates that a Registration Agency may initiate enforcement actions against a sponsor for failing to comply with the final rule's nondiscrimination requirement at § 30.3 when a final determination of a violation of an applicable nondiscrimination law (without any remaining right to appeal) has been made by an enforcement agency or court with jurisdiction over the matter and the authority to issue such final determinations.

This revision aligns with the change in the complaints section that eliminates the Registration Agency's duplicative role in investigating and adjudicating instances of alleged illegal discrimination against apprentices. Registration Agency staff, whether employed by OA or an SAA, lack the subject-matter background, expertise, and jurisdictional authority to investigate or adjudicate potential violations of Federal or State nondiscrimination law that FEPAs or courts possess. This final rule therefore returns this function and responsibility to the agencies and courts that do possess such authority. To provide additional clarity on the compliance framework for the part 30 regulation, the Department has added a provision in this final rule that requires sponsors to disclose to the Registration Agency any instances when a relevant enforcement entity or court has made a final determination that an applicable nondiscrimination violation has occurred with respect to an apprentice or applicant for apprenticeship in their Registered Apprenticeship program. This addition in the final rule is responsive to public comments that requested additional clarity on the compliance framework and will promote transparency and accountability regarding Registered Apprenticeship programs' adherence to applicable nondiscrimination laws.

Section 30.5(c) of this final rule stipulates that the Registration Agency may work with a sponsor who is the subject of a final determination from an enforcement entity or court to develop a compliance action plan, in alignment with any remedies prescribed by the enforcement entity or court. A sponsor's failure to adhere to such compliance action plans may lead to additional enforcement actions, including the suspension of the sponsor's right to register new apprentices or the initiation of full deregistration proceedings (as described in the part 29 regulation at § 29.8). In addition to requiring sponsors to disclose any final determinations to the Registration Agency, the Department has added a provision requiring sponsors to disclose to the Registration Agency any remedies prescribed by the enforcement entity or court that issued the final determination.

Section 30.6 of this final rule carries forward the reinstatement of the program registration section of the part 30 regulation (at § 30.16). This section allows programs that have been deregistered pursuant to a violation of

the part 30 nondiscrimination requirement to present evidence in support of reinstatement and permits Registration Agencies to reinstate programs in instances where such evidence is determined to be adequate.

This final rule also includes significant revisions to the part 30 regulation's requirements for SAAs, which are contained in § 30.7 of this final rule. This section stipulates that, within 1 year of the effective date of this final rule, State agencies seeking to obtain or maintain recognition as an SAA must submit a State plan for nondiscrimination in apprenticeship that demonstrates that the State's laws, regulations, policies, and operational procedures specific to nondiscrimination or equal opportunity in apprenticeship conform to the requirements of the part 30 regulation. In this final rule, the Department updated the language at § 30.7 based, in part, on public comments received on the NPRM, which proposed that States' laws and regulations conform only to the part 30 regulation. To better align with the Department's intention to create a more uniform set of requirements for all Registered Apprenticeship programs as set forth in the NPRM, this final rule clarifies that State laws and regulations must conform to the part 30 Federal standard, and that the Department will only assess State laws and regulations specific to nondiscrimination or equal opportunity in apprenticeship for conformity with part 30.

A primary goal motivating the Department's determination to update the part 30 regulation is the establishment of a uniform Federal standard for nondiscrimination in apprenticeship. Registered Apprenticeship stakeholders, particularly those with a national or multi-regional interest and operational imprint, have long requested that the Department promote a more coherent National Apprenticeship System, where Registered Apprenticeship stakeholders are not faced with conflicting or contradictory requirements depending on where their program operates. The Department has determined that establishing a uniform Federal standard for nondiscrimination in apprenticeship serves this goal and will work with States to identify discrepancies in nondiscrimination requirements for apprenticeship stakeholders that must be resolved under this final rule's requirement that State laws and regulations conform to the Federal standard in the part 30 regulation.

Section 30.7 of this final rule requires States seeking new or continued recognition as a SAA to submit their State laws and regulations in a State plan for nondiscrimination in apprenticeship and lays out the required elements and the Department's process for reviewing State plans. To determine whether the State plan conforms to the part 30 regulation, the Department will consider whether the State's laws and regulations include nondiscrimination or equal opportunity elements that constitute a separate, State-level legal or regulatory compliance framework specific to apprenticeship, and whether such laws and regulations would serve to restrict the growth and impact of Registered Apprenticeship in the State by imposing administrative barriers, excessive costs, or requirements that conflict with Federal or State nondiscrimination laws. OA will review State laws and regulations on a case-by-case basis and will provide technical assistance to States as needed to identify which elements of State laws and regulations do or do not conform to the Federal part 30 regulation.

The Department's decision to modify the regulatory language proposed in the NPRM to require that State laws and regulations ''conform to'' (rather than ''conform only to'') the part 30 regulation aligns with the existing regulatory language found in the part 29 regulation governing labor standards for Registered Apprenticeship programs and the recognition of SAAs. Specifically, this change aligns with the regulatory language at 29 CFR 29.13(a)(1), which provides that States' apprenticeship laws and regulations ''conform to'' the requirements of the part 29 regulation. At § 29.13(a)(5), the part 29 regulation requires that States submit ''a description of policies and operating procedures which depart from or impose requirements in addition to those prescribed in [the part 29 regulation].'' The Department will apply this same approach in determining whether State laws and regulations pertaining specifically to nondiscrimination or equal opportunity in apprenticeship conform to the Federal nondiscrimination in apprenticeship standard in this final rule. State plans for nondiscrimination in apprenticeship must conform to the revised part 30 regulation's prohibition on illegal discrimination stated at § 30.3, and must also describe any laws, regulations, or policies that depart from or impose additional requirements on Registered Apprenticeship program sponsors, including any apprenticeship-specific equal employment laws or regulations. Examples of nonconforming State laws or regulations include any laws or regulations that establish unlawful compulsory, nonremedial group-based preference schemes for sponsors, such as affirmative action programs, or laws or regulations that establish burdensome restrictions or administrative requirements specific to apprenticeship that could restrict or inhibit the growth of Registered Apprenticeship programs or that may conflict with the nondiscrimination requirements contained in this final rule and in applicable Federal laws.

This final rule retains the exemptions provision from the part 30 regulation, redesignating the provision as § 30.8 of this final rule. This provision allows sponsors to request exemptions from the part 30 regulation, ''or any part thereof,'' in writing, to the Registration Agency, which may grant exemptions for good cause. The provision also stipulates that SAAs must receive approval from the Department before granting any exemptions to program sponsors in their State. Finally, the final rule adds a severability provision (at § 30.9). This provision stipulates that, should a court of competent jurisdiction find that any provision of the revised part 30 regulation is invalid, the finding will not impact any other provision of the regulation.

B. The Role of Registration Agencies Under the Final Rule

The Department expects that this final rule will significantly reduce administrative burdens for both Registered Apprenticeship program sponsors and Registration Agency staff. The Department recognizes that Registration Agency staff expertise is rooted in analyzing labor standards for Registered Apprenticeship programs and providing technical assistance to program sponsors. The prior requirements of the 2016 version of the part 30 regulation introduced an entirely separate set of issues that required a distinct expertise—namely, the ability to provide technical assistance and oversight on affirmative action programs and nondiscrimination and EEO matters. The removal of these requirements in this final rule allows Registration Agency staff to focus on the issues they know best—supporting quality across all Registered Apprenticeship programs—and leaves the investigation and adjudication of issues pertaining to nondiscrimination and EEO to the agencies and courts that do possess the appropriate expertise and jurisdiction.

The revised part 30 regulation requires that all sponsors of Registered Apprenticeship programs adhere to applicable Federal and State laws and

regulations prohibiting illegal discrimination. This streamlined nondiscrimination requirement applies with respect to both apprentices and applicants to an apprenticeship program, and covers any benefit, term, or condition of employment associated with an apprenticeship. Registration Agencies must begin enforcing this requirement on the effective date of this final rule. Such enforcement will primarily occur through program reviews, and a review for compliance with the revised part 30 regulation will occur when the Registration Agency conducts program reviews for compliance with the part 29 regulation. Registered Apprenticeship programs will be deemed out of compliance with the revised part 30 regulation only if a final determination of a violation of an applicable nondiscrimination law against an apprentice or an applicant to an apprenticeship program, without any remaining right to appeal, is made by an enforcement agency or court with jurisdiction over the matter.

To support accountability and transparency, the Department added a provision to this final rule requiring sponsors to disclose any final determinations from a relevant enforcement entity or court regarding violations of applicable nondiscrimination law with respect to an apprentice or applicant for apprenticeship to the Registration Agency, as well as any remedies provided by such entities. To further support awareness of any such final determinations regarding Registered Apprenticeship programs, the Department recommends that Registration Agencies consider establishing Memoranda of Understanding (MOUs) or other arrangements with these governmental enforcement agencies to maintain awareness of any final determinations concerning nondiscrimination violations against apprentices or applicants to an apprenticeship program by Registered Apprenticeship programs in their State. Registration Agencies may also consider contacting such enforcement agencies when a program comes up for review to identify any instances of final determinations concerning nondiscrimination violations.

When such a final determination has been issued, the Registration Agency may work with the program sponsor in question to develop a compliance action plan to address and remedy the issue. Any such plans must align with any remedies prescribed by the enforcement entity or court that issued the final determination. The Department's addition of a disclosure requirement in this final rule is intended to facilitate alignment of compliance action plans with the remedies for nondiscrimination violations prescribed by relevant enforcement entities. Under this final rule, the Registration Agency must monitor the sponsor's progress in implementing the compliance action plan and remediating the issue. If the Registration Agency determines that the sponsor is not following or implementing the compliance action plan, the Registration Agency may initiate enforcement actions, including suspension of the right to register new apprentices or the initiation of deregistration proceedings. This framework ultimately reflects a more efficient and fair approach to addressing instances of illegal discrimination in Registered Apprenticeship that incorporates the expertise, transparency, and due process protocols associated with enforcement entities or courts with jurisdiction over such matters.

Under this final rule, Registration Agencies will no longer investigate complaints alleging instances of illegal discrimination in Registered Apprenticeship programs and will instead forward any such complaints they receive to the relevant enforcement agency or court. These entities include the EEOC, State-level FEPAs or their equivalents, the U.S. Attorney General, or another appropriate enforcement entity. Registration Agency staff are not equipped to conduct such investigations, which require legal interpretations of both the substance of the alleged complaint as well as any relevant nondiscrimination laws or regulations.

Finally, SAAs, the State agencies recognized to perform the functions of Registration Agencies under 29 CFR 29.13, must submit State plans for nondiscrimination in apprenticeship that show their State's laws, regulations, and policies pertaining specifically to nondiscrimination or equal opportunity in apprenticeship conform to the revised Federal part 30 regulation. With this final rule, the Department requires any State seeking new or continued recognition as an SAA to revise any aspects of State law, regulation, or policy pertaining specifically to nondiscrimination or equal opportunity in apprenticeship that do not conform to the Federal part 30 regulation. This includes repealing, rescinding, or revising any such laws, regulations, or policies that undermine the goals of this rulemaking, such as overly burdensome requirements that may impede Registered Apprenticeship expansion or requirements specific to nondiscrimination or equal opportunity in apprenticeship that are inconsistent with existing Federal or State nondiscrimination laws. The Department expects that the Federal standard established in this final rule will promote the expansion and success of Registered Apprenticeship programs nationwide, and the Department will examine State laws and regulations pertaining specifically to nondiscrimination or equal opportunity in apprenticeship to verify that any additional State-level requirements do not impose undue burdens on sponsors and do not adversely impact efforts to expand Registered Apprenticeship.

C. Transition Timelines

This final rule is effective on January 5, 2027, 60 days from its publication in the **Federal Register**. Registered Apprenticeship program sponsors must comply with the final rule's streamlined nondiscrimination requirement by this date, and Registration Agencies must assess programs' compliance with this final rule starting on the final rule's effective date. The Department determined that this compliance timeline would be feasible because sponsors were already required to comply with applicable Federal and State nondiscrimination requirements, which is retained as the core nondiscrimination requirement at § 30.3 of this final rule. State agencies seeking new or continued recognition as an SAA must submit State plans for nondiscrimination in apprenticeship that conform to the final rule within 1 year of the final rule's effective date. The Department will provide technical assistance to all Registered Apprenticeship stakeholders, including program sponsors and SAAs, on all aspects of this final rule, including its transition timelines and the process for requesting extension for good cause.

IV. Public Comments Received on the Proposed Rule

A. General Description of Comments

The Department received 372 public comment submissions, which included a form letter campaign that accounted for 311 comments, and 56 unique comments. Additionally, five comments were duplicates or not related to the subject of this rulemaking. The commenters represented a range of stakeholders from the public, non-profit, and private sectors. Public sector commenters included State and local government agencies and elected officials. Non-profit sector commenters included think tanks, advocacy groups, national and local labor unions,

professional associations, and trade associations. Private sector commenters included employers, employer associations, and program sponsors. The Department also received comments from individuals and anonymous commenters. Below, the Department addresses general comments on the proposed rule and the rulemaking process, and the section-by-section discussion of this final rule (sections V and VI) addresses comments about the specific regulatory changes the Department proposed in the NPRM.

B. Requests To Extend the Comment Period and Comments on Public Participation

Requests for Comment Period Extension

Comments: A commenter requested that the Department extend the comment period for the proposed rule by 30 days to ensure that interested parties have a meaningful opportunity to participate in the rulemaking process. Another commenter requested a 45-day extension of the comment period to allow them to develop more comprehensive and well-supported commentary in support of the proposed rule.

Department Response: The Department maintains that the 60-day comment period for public comments on the NPRM afforded stakeholders and any interested members of the public with sufficient time and opportunity to review the Department's proposal and rationale and develop critical public comments. The Department notes that the 60-day comment period aligns with the length of the comment period established for its previous NPRM, *National Apprenticeship System Enhancements* (89 FR 3118, Jan. 17, 2024), which was a longer and more complex rule that proposed additional regulatory requirements alongside rationale for such additions. The Department further notes that a 30-day comment period is generally considered to be the minimum period sufficient to provide the public with a meaningful opportunity to comment on a Federal agency rulemaking, and that Federal agencies often adhere to this minimum timeframe. The Department's 60-day comment period for this rulemaking is twice the length of this generally adhered to minimum timeframe under the APA. Accordingly, the Department rejected requests to extend the comment period and communicated this decision to public commenters by posting a response letter to the public docket for the NPRM indicating that the Department had received, and was rejecting, requests to extend the comment period. This response provided stakeholders with notice on the Department's decision with respect to the comment period early in the comment period and affirmed that commenters must submit their comments by September 2, 2025, as communicated in the NPRM.

Comments on Public Participation and Other Concerns

Comments: A commenter expressed concern that the Department is issuing overlapping regulations at an aggressive pace, and that this makes it difficult for the public to provide meaningful assessments of the proposals. The commenter recommended pausing the current suite of regulatory efforts and taking time to assess their collective impact if implemented, including by conducting a community impact assessment. Similarly, another commenter expressed concern about the cumulative impact of these rulemakings on women.

A commenter requested that the Department extend the comment period for the proposed rule, particularly because the Department issued six proposed rules on July 1 and 2, and stakeholders for those rules significantly overlap; the commenter reasoned that this timing undermines stakeholders' ability to assess and respond to the proposals. The commenter recommended that the Department double the length of the comment periods for each rule, or stagger their deadlines to be no less than 21 days apart.

A commenter opposed the Department's statement that it ''reserves the right to redact or refrain from posting sensitive information, libelous, or otherwise inappropriate comments, including those that contain obscene, indecent, or profane language; that contain threats or defamatory statements; or that contain hate speech.'' The commenter reasoned that terms like ''hate speech'' and ''inappropriate comments'' are vague and provide officials with too much discretion over what commentary to publish, and that the First Amendment protects such expression anyway.

Department Response: The Department maintains that the 60-day comment period provided Registered Apprenticeship stakeholders with ample time and opportunity to provide comprehensive reactions and criticisms to its proposal to revise the part 30 regulation, and is in keeping with the Department's practice of providing 60 days to comment on apprenticeship NPRMs. The Department does not consider the issuance of other NPRMs unrelated to the Registered Apprenticeship regulations as sufficient rationale for extending the comment period for this rulemaking, and rejected requests to extend the comment period beyond the 60 days communicated in the NPRM early in the comment period for this rulemaking.

The Department's statement that it reserves the right to redact certain sensitive, libelous, or inappropriate information in posting public comments reflects longstanding practice that is motivated by several factors, including the need to redact personally identifiable information or other sensitive personal information. In addition, while commenters are free to submit comments that include profane or indecent language, the Department is not obligated to post any such language publicly. While the Department favors transparency in the rulemaking process and has sought to establish transparency, as appropriate, throughout the process, such comments are not suitable for public posting and do not advance the public discourse on the proposal.

C. General Comments on the Proposed Rule

General Support

Comments: The Department received several general comments in support of the proposed rule from public commenters, with some commenters agreeing with the Department's assertions in the NPRM that revising the part 30 regulation would reduce administrative burdens on Registered Apprenticeship program sponsors and stimulate growth throughout the National Apprenticeship System. Supportive commenters argued that eliminating the part 30 regulation's affirmative action requirements would make Registered Apprenticeship more attractive for prospective program sponsors, especially for smaller businesses and other stakeholders who view the extensive and complicated part 30 regulation as a barrier to entry into the National Apprenticeship System.

Some supportive commenters remarked that the part 30 regulation may have fostered discriminatory race- and sex-based preferences in Registered Apprenticeship programs and expressed appreciation for the Department's proposal to move to a merit-based system. Some commenters characterized the proposal as a needed step towards achieving equal opportunity in Registered Apprenticeship by removing what they referred to as race-and sex-based mandates, with one commenter suggesting that employers in their

industry were already incentivized to recruit inclusively due to business needs or economic factors like labor shortages. Some commenters supportive of the proposal also appreciated that, under the Department's proposal to remove documentation and reporting requirements related to affirmative action programs, sponsors would be free to focus on developing quality training programs that serve the needs of both employers and apprentices.

Department Response: The Department appreciates the comments received in support of the proposed rule and the Department's objective to streamline and align part 30 with existing Federal nondiscrimination laws. The Department agrees with commenters who asserted that the proposed rule would reduce unnecessary administrative burdens on program sponsors, and with commenters who supported the Department's goal of establishing a robust, merit-based framework for all qualified Americans to enroll in an apprenticeship program.

The Department is committed to reducing duplicative or overlapping requirements that fail to directly serve the National Apprenticeship System. The Department agrees with commenters who agreed that apprenticeship stakeholders should focus on the development of strong, skills-based apprenticeship programs that effectively serve both employers and apprentices. The Department further agrees with the observation made by one commenter that competitive labor market conditions found in a number of industries, including construction, already necessitate broad recruitment from the available talent pool, independent of regulatory reporting mandates. The Department concurs that a streamlined regulatory framework that eliminates the requirement to establish affirmative action plans, among other things, will allow sponsors to focus on program quality.

General Opposition

Comments: The Department received comments opposing the proposed rule, including some commenters who urged the Department to withdraw the proposed rule. Some commenters generally argued that the Department's proposal would undermine progress in expanding access to Registered Apprenticeship for underrepresented groups. Some commenters who opposed the proposed rule urged the Department to maintain the EEO, affirmative action, or other requirements contained in the part 30 regulation, asserting that these requirements have made a difference in increasing access to Registered Apprenticeship for underrepresented groups. Some commenters urged the Department to focus more of its efforts on implementing and enforcing the requirements contained in the part 30 regulation to maximize their impact.

Department Response: The Department considered all public comments received in response to the NPRM and acknowledges that some commenters opposed the proposal and urged the Department to retain or strengthen the part 30 regulation. As explained later in this final rule's section-by-section discussion, the Department maintains that data on demographic trends in Registered Apprenticeship is inconclusive with respect to the correlation between the extensive EEO and affirmative action requirements contained in the part 30 regulation and any increases in participation by certain demographic groups. More fundamentally, however, the Department maintains that any arguments advanced to justify the retention of requirements intended to increase diversity in Registered Apprenticeship are contrary to the underlying purpose of this rulemaking, which is to ensure that apprentices are hired and retained based solely on the basis of individual merit without consideration of their race, sex, or ethnic origin. This final rule also reflects the Department's position that establishing a clear, consistent nondiscrimination standard for Registered Apprenticeship program sponsors provides a more legally sound and practical framework to support equal access to apprenticeship opportunities for all qualified individuals.

General Comments on the Department's Rationale

Comments: Commenters provided general reactions to the Department's rationale for the proposal, with some commenters arguing that the Department had overstated or exaggerated the administrative burdens associated with the part 30 regulation. Other commenters asserted that the proposal would increase the prevalence of illegal discrimination in Registered Apprenticeship, and that the Department was incorrect in asserting that the proposal would clarify and strengthen nondiscrimination requirements in Registered Apprenticeship. Some commenters asserted that the proposal would restrict growth in Registered Apprenticeship by removing affirmative action requirements contained in the part 30 regulation, which the commenters described as a necessary tool for establishing widespread and equitable access to Registered Apprenticeship. One commenter critical of the proposal argued that the Department sought to return to a ''bygone era'' when discrimination was permissible and prevalent in Registered Apprenticeship.

Department Response: The Department does not agree with commenters who asserted that the NPRM overstated the administrative burden associated with the part 30 regulation. The Department's conclusion that the current regulatory framework imposes significant compliance costs on program sponsors, as communicated in the NPRM and reinforced in this final rule, is supported by ongoing analysis of empirical data, including the economic analysis required under the rulemaking process. The Department's conclusion that the part 30 regulation imposes excessive administrative burdens on program sponsors is also supported by OA's experience overseeing the administration of Registered Apprenticeship programs. The Department has received consistent feedback from sponsors and other apprenticeship stakeholders on the administrative burden imposed by the part 30 regulation, including in the public comments received in response to the NPRM. Registered Apprenticeship stakeholders have consistently noted that program sponsors must dedicate substantial staff time and resources to meet the extensive requirements of the part 30 regulation.

Further, the Department maintains that some requirements contained in the part 30 regulation may have improperly induced sponsors to hire an apprentice based solely on their race, sex, or other demographic characteristics. The Department has determined that establishing a clearer and more concise nondiscrimination requirement for all Registered Apprenticeship programs aligns the apprenticeship regulations more closely with Federal nondiscrimination laws, and that clarifying and simplifying regulatory compliance requirements for program sponsors will support the expedited growth of Registered Apprenticeship programs.

The Department firmly rejects some commenters' characterizations of the proposal as a return to a ''bygone era'' that permitted discrimination and maintains that this final rule does not weaken the prohibition on illegal discrimination for all Registered Apprenticeship programs. It is the Department's position that this final

rule reaffirms and reinforces a prohibition on illegal discrimination by aligning the final part 30 regulation with established Federal nondiscrimination law.

General Impacts on Registered Apprenticeship Programs

Comments: Several commenters expressed concern that the proposed rule would undermine Registered Apprenticeship programs' efforts to diversify programs and extend equal opportunities for all demographic groups. One of these commenters argued that Registered Apprenticeship programs can be a powerful tool for promoting economic mobility and establishing greater equity in the workplace, and warned that removing requirements to establish affirmative action plans would undo decades of progress in remediating discrimination and improved labor market outcomes for diverse groups. One commenter expressed concern that the Department's proposal would eliminate their ability to market their program to demographic groups that are underrepresented in their program, which would shrink the available talent pool and restrict apprenticeship growth.

Other commenters expressed concern about the impact of the proposed rule on their specific programs, including one commenter who discussed the proposal's potential impact on educator apprenticeship programs. The commenter stated that all students should have access to teachers who they relate to, who affirm their identities, and who teach with an understanding of the cultural context of their lives. The commenter added that when the teaching workforce is homogenous, students may feel invisible, which harms their learning outcomes. Another commenter asserted that the proposed rule would restrict active and expansive recruitment efforts that address gaps in the educator workforce.

Department Response: The Department considered commenters' feedback on the potential impact of the proposed rule on existing Registered Apprenticeship programs and appreciates the opportunity to respond to such comments in this final rule. The Department agrees with commenters who asserted that Registered Apprenticeship is a pathway to greater economic mobility and career development for all qualified individuals. The Department does not agree that updating the part 30 regulation to remove burdensome requirements for program sponsors will undermine Registered Apprenticeship's efficacy or success as a strategy for career development and improved economic mobility. The Department emphasizes that Registered Apprenticeship opportunities will remain an attractive and comprehensive professional development solution and career path for all qualified individuals under this final rule. Further, the Department expects that reducing regulatory burdens for program sponsors will facilitate the expansion of the Registered Apprenticeship model and increased opportunities for career seekers. This final rule does not preclude Registered Apprenticeship program sponsors from engaging in recruitment efforts that fit their business needs, so long as such efforts do not constitute illegal discrimination in violation of Federal or State nondiscrimination laws and the streamlined nondiscrimination requirement for all sponsors at § 30.3 of this final rule.

The Department acknowledges the important role that educator apprenticeship programs can play in fortifying the teaching workforce. The Department's final rule does not prohibit sponsors from engaging in lawful recruitment efforts. Program sponsors, including those operating educator apprenticeship programs, should retain significant flexibility to design lawful outreach and recruitment strategies. The Department maintains that reducing prescriptive Federal mandates for all Registered Apprenticeship program sponsors, including those in the education sector, will provide program sponsors with greater flexibility in the design of their programs, including the structuring of outreach and recruitment strategies that best serve a sponsor's workforce needs.

General Comments on Economic Impacts

Comments: Some commenters cautioned that the proposed rule could undermine participation in Registered Apprenticeship programs and obstruct progress towards achieving the Trump administration's goal of reaching 1 million active apprentices. One commenter added that the proposed rule would derail innovative recruitment strategies in apprenticeship and worsen the labor shortage in the construction industry. Another commenter maintained that research shows that workforce diversity, inclusion, and emotional intelligence are essential for innovation, and warned that the proposed rule could exacerbate labor shortages, especially in the construction industry, and undermine U.S. global competitiveness. Similarly, another commenter expressed concern that the proposed changes would create a less robust pipeline to fill broadband jobs during a period of major expansion of fiber-optic infrastructure.

Department Response: The Department does not agree with commenters who asserted that updating the part 30 regulation to remove affirmative action and other requirements will reduce participation in Registered Apprenticeship programs. The Department expects that this final rule will have the opposite effect, and that significantly revising the part 30 regulation by removing burdensome requirements for program sponsors will drive expansion of the system. As such, this final rule aligns with and supports the Administration's ambitious goals to expand Registered Apprenticeship, along with other Administration directives (such as the directive to reduce regulatory burdens contained in E.O. 14192, *Unleashing Prosperity Through Deregulation*).

The Department also disagrees with the concern expressed by some commenters that the rule will exacerbate labor shortages, including in the construction industry. To the contrary, the Department expects that this final rule will support the expansion of both existing and new Registered Apprenticeship programs, including those in the construction sector, by eliminating administrative burdens that serve as a barrier to entry and an ongoing drain on administrative resources for program sponsors. As such, the Department does not agree with the commenter who suggested that the Department's proposal would undermine U.S. global competitiveness. It is the Department's position that this final rule will strengthen Registered Apprenticeship by replacing ineffective, administratively burdensome, and likely unlawful affirmative action requirements with a clearer and more concise nondiscrimination requirement. The Department expects that eliminating these requirements in favor of a system that prioritizes merit and employer needs will strengthen U.S. businesses and bolster U.S. global competitiveness.

General Comments on Recommended Alternatives

Comments: Some commenters provided alternative suggestions to the changes proposed in the NPRM, including simplifying the regulations and compliance requirements or establishing a more concise set of EEO requirements. One commenter supportive of the Department's proposal to streamline nondiscrimination requirements suggested that the

Department consider funding incentives for sponsors who hire apprentices from underrepresented groups, stating that this approach would expand access to talent pools and maintain regulatory compliance.

Department Response: The Department appreciates that commenters suggested alternative approaches to streamline the part 30 regulation, and notes that this final rule aligns with commenters who generally suggested that the Department should simplify nondiscrimination requirements in the Federal regulations governing Registered Apprenticeship. The Department further notes that establishing financial incentives for sponsors to hire apprentices from underrepresented groups is outside the scope of this final rule, fundamentally at odds with the policy priorities of the Administration and the Department, and potentially violates Federal law by incentivizing race-based selections.

D. Comments on Regulatory History and the Background of the Proposed Rule

Comments Regarding General History of Apprenticeship EEO Regulations

Comments: Several commenters provided remarks on the Department's discussion of the history of the Registered Apprenticeship regulations, including the part 30 regulation. Some commenters said that since 1937, when the NAA was passed into law, the Department's apprenticeship regulations have evolved, with a consistent focus on implementing the NAA's directive to safeguard apprentice welfare. These commenters argued that the proposed rule threatens to undermine this core objective for the Department. The commenters added that EEO efforts became a major component of the Department's role in protecting apprentices' welfare due to a long history of racial and sex discrimination. The commenters stated that the Department's oversight and enforcement of regulatory requirements was central to the Department's success in protecting apprentice welfare, citing research that the commenter described as finding that weak oversight in the 1960s led to discrimination against Black apprentices with limited consequences. The commenters added that the existing regulations provide the Department with important regulatory tools for safeguarding the welfare of apprentices, ensuring that apprentices are positioned to succeed, and supporting an apprenticeship system that reflects the breadth of workers and communities across the United States.

Another commenter added that early activism and executive actions, specifically President Kennedy's 1963 E.O. 1114, was a ''directive for the Federal government to require nondiscrimination in apprenticeships.'' The commenter asserted that affirmative action in apprenticeship programs has been key to addressing exclusion in the trades, especially for young adults and youth with disabilities. A commenter criticized the Department's goal of restoring the original focus and purpose of the 1963 version of the regulation, reasoning that the 1963 version did not prohibit discrimination based on sex, including pregnancy, childbirth, and related medical conditions, which the commenter stated was both rampant and lawful at that time. A different commenter stated that the most recent update to the part 30 regulation, finalized in 2016, expanded protected categories to align with current employment discrimination law and employed a graduated enforcement approach.

Another commenter also described the historical development of 29 CFR parts 29 and 30, agreeing with others that part 30 was initially established in 1963 in response to E.O.s 10925 and 11114. However, the commenter stated that since that time, employment law has matured with the passage of Title VII of the Act, the ADEA, and the ADA, among other laws. The commenter reasoned that, given these significant changes, it is appropriate to revisit whether the standards imposed by part 30 are necessary and whether they create unnecessary barriers to participation in Registered Apprenticeship.

Department Response: The Department agrees with commenters who noted that employment law has matured since the part 30 regulation was initially promulgated in 1963, and that subsequent developments in the legal framework for prohibiting discrimination in employment justify the Department's proposal to revisit elements of the part 30 regulation that may be duplicative or that may conflict with the existing set of such laws. The Department notes that President Kennedy's memorandum directive to the Secretary of Labor on June 4, 1963, (Statement on Equal Employment Opportunity in Federal Apprenticeship and Construction Programs) was implemented by the issuance of the first iteration of the part 30 regulation (Nondiscrimination in Employment and Training) on December 18, 1963 (28 FR 13775). However, the 1963 version of the part 30 regulation did not mandate that Registered Apprenticeship programs establish nonremedial, compulsory affirmative action plans. As described earlier in the preamble to this final rule, the Department takes the position that affirmative action programs in apprenticeship are inherently discriminatory, and therefore likely unlawful.

The Department disagrees with the commenter that characterized the Department's proposal as an effort to restore the 1963 version of the part 30 regulation, which did not protect against discrimination based on sex, pregnancy, or childbirth. Under this final rule, the part 30 regulation does prohibit discrimination on such bases because it requires compliance with all Federal nondiscrimination laws, including Title VII. Further, the Department's role in providing technical assistance, which one commenter characterized as an important tool for protecting apprentice welfare, will continue under the final rule.

General Comments on the Department's Implementation of the Part 30 Regulation

Comments: A commenter asserted that the current regulations have not been more effective because the Department adopted a prolonged, phased approach to implementing the regulation's requirements. The commenter asserted that the Department failed to fully phase in such requirements, noting that sponsors were not required to fully implement the changes finalized in the 2016 version of the part 30 regulation until their first compliance reviews, with the first compliance reviews reflecting updated part 30 requirements occurring after January 18, 2019. The commenter stated that, because those reviews occur on a 5-year cycle, some sponsors may not have had their first review until 2024 (and further noting that in some SAA States, compliance was delayed even further.)

The same commenter argued that the Department's implementation efforts were inadequate for numerous reasons, including what the commenter described as insufficient funding to implement the regulation and OA's consistent failure to request adequate funding from Congress. The commenter asserted that training for the Department's staff was limited, and updates to OA's staff manual were slow, as were the Department's efforts to make a data analysis tool available for the utilization analyses required under the regulation. The commenter asserted that OA's staff's efforts to implement the part 30 regulation were diverted due to the Department's pursuit of an alternative

apprenticeship model during the first Trump Administration. The commenter further noted that Circulars and Bulletins that conflicted with the part 30 regulation remained published for years, and that the Department failed to provide conforming templates for elements like selection procedures to clarify the regulation's requirements for program sponsors. The commenter also asserted that the Department was slow to review States' required EEO plans, remarking that even now, some States have failed to adopt conforming EEO plans.

Another commenter supportive of the existing part 30 regulation's requirements agreed that stakeholder education regarding the part 30 regulation's requirements only began recently, and suggested that increases in the number of females and African Americans in the trades, while promising, may have been more substantial had there been greater investment in oversight and enforcement of the current regulations.

A different commenter said that their Registered Apprenticeship program had diligently implemented the requirements of the part 30 regulation, and that the regulation's requirements were helpful in identifying a wider talent pool for recruitment. However, the commenter added that they understand the Department's decision to revisit the regulations due to the changing landscape in nondiscrimination law, and acknowledged the Department's efforts to reduce regulatory complexity and streamline the program registration process.

Department Response: The Department disagrees with commenters' assertions that OA had failed to fully implement the part 30 regulation in a timely or practical manner. The Department's 2016 final rule establishing the most recent version of the part 30 regulation contained different compliance timelines for distinct provisions of the final rule, and the Department clearly communicated such timelines to program sponsors in the final rule and in technical assistance provided to sponsors and SAAs. OA staff did receive extensive training on the part 30 regulation, and OA developed several resources to support sponsor awareness and compliance with the regulation's numerous and complex requirements.

Ultimately, the Department strongly disagrees with commenters' assertions that implementation failures undermined the effectiveness of the part 30 regulation. As one commenter conceded, sufficient time has passed since the rule became effective for every sponsor to have undergone at least one compliance review. The Department does agree that sponsors and SAAs have experienced significant challenges in complying with the part 30 regulation, and it attributes such challenges to the complex and burdensome nature of the regulation. Moreover, the requirement that sponsors adopt a form of affirmative action predated the 2016 version of the part 30 regulation. In the Department's view, there is no empirical evidence to suggest that the effectiveness of the affirmative action requirements contained in any version of the part 30 regulation has been adversely impacted by the Department's implementation of such regulations.

E. Comments on Legal Authority

1. General Comments on the Department's Legal Authority

Comments: A few commenters argued that the proposed rule would not satisfy the NAA's requirement that the Department promote labor standards necessary to safeguard the welfare of apprentices. These commenters asserted that the NAA charges the Department with establishing standards stricter than those applicable to the general workforce and that the proposed rule's limitations on Registration Agencies' investigative and enforcement authority would reduce apprentices' access to timely remedies. One commenter further argued that the NAA requires the Department to balance employer burden against apprentice protections, and that the proposed rule would deter sponsors from maintaining such protections. The same commenter added that the proposed rule would undermine the extensive network of labor-management programs designed to increase apprenticeship participation.

Department Response: The Department has determined that it has the authority under the NAA to promulgate this regulation. The NAA ''is written in very broad terms'' and ''contains a wide grant of authority to the Secretary of Labor.'' *Gregory Elec. Co.* v. *U.S. Dep't of Labor,* 268 F. Supp. 987, 991 (D.S.C. 1967). The NAA, in relevant part, requires that the Department formulate and promote the furtherance of labor standards necessary to safeguard the welfare of apprentices. The NAA does not dictate that the Department follow a specific approach and does not prescribe specific steps to safeguard the welfare of apprentices.

The Department maintains that requiring program sponsors to establish race-, ethnicity-, sex-, or disability-based utilization goals, engage in affirmative action based upon protected characteristics, or conduct employer-initiated inquiries into disability status does not safeguard the welfare of apprentices. Pursuing demographic balancing or proportional representation within apprenticeship programs, in fact, threatens the welfare of apprentices in that it undermines equal opportunity for all apprentices and applicants.

As discussed elsewhere in this preamble, the race- and sex-based affirmative action provisions of the prior regulation raise serious constitutional concerns. Those provisions required covered sponsors to conduct utilization analyses based on race, ethnicity, and sex, establish utilization goals when underutilization was identified, and undertake affirmative measures designed to address demographic disparities. At the very least, these provisions trigger heightened scrutiny under the Constitution's equal-protection principles. The Department declines to exercise its authority in a way that incentivizes sponsors to impermissibly consider protected characteristics when making employment decisions.

The Department exercises its authority in line with the policy choices expressed by Congress in other Federal civil rights statutes. Congress has enacted comprehensive nondiscrimination laws governing employment, including Title VII, and has expressly limited the reach of some of those statutes to employers meeting specified coverage thresholds. For example, Title VII generally applies only to employers with fifteen or more employees. The Department is reluctant to construe the NAA's vague and open-ended delegation as authorizing the Department to impose obligations on small employers that Congress expressly chose to exempt from nondiscrimination statutes. Furthermore, when Congress intends to authorize or require affirmative action based on protected characteristics, it generally does so expressly. *See, e.g.,* section 503 of the Rehabilitation Act of 1973.[30] Even assuming the NAA could be construed to authorize such requirements, the Department declines to exercise that authority and instead respects Congress's policy judgment regarding the scope and applicability of Federal employment-discrimination obligations.

The Department has also explained below in this preamble that part 30's affirmative action requirements create significant tension with Title VII's substantive protections. Such

[30] 29 U.S.C. 793.

requirements encouraged race- and sex-based employment practices that conflict with Title VII's plain text prohibiting employment decisions motivated by race, color, religion, sex, or national origin and that do not fit comfortably within the narrow, judicially created exemption for affirmative action. The Department is reluctant to exercise the NAA's general grant of authority to maintain a regulatory scheme that creates substantial tension with Title VII.

Similarly, the disability-related provisions of the prior regulation created tension with the ADA. The prior regulation required sponsors to invite applicants and apprentices to disclose disability status upon enrollment and annually thereafter and required covered sponsors to pursue a nationwide disability utilization goal established by the Department. Section 102(d) of the ADA, however, prohibits employer-initiated inquiries concerning disability status of applicants and permits such inquiries of employees only in narrow, specified circumstances.[31] The Department is reluctant to exercise the NAA's general grant of authority to broadly require employer-initiated disability inquiries that are restricted under the ADA.

At bottom, the Department should exercise its authority under the NAA to formulate and promote only labor standards that are consistent with Federal statutes. That means the Department should not impose nondiscrimination obligations on small businesses that Congress expressly exempted, require sponsors to take action to meet race- and sex-based goals that would be unlawful under Title VII, or mandate employer-initiated inquiries of disability status that would run afoul of the ADA's restrictions on such inquiries.

The Department also disagrees with commenters who claim the NAA requires that the Department prescribe a heightened standard that is different from existing laws that are applicable to the general public. Rather, the Department has a wide grant of authority to determine the approach necessary to safeguard the welfare of apprentices. As set forth in the preamble to this final rule and in the section-by-section discussion of the changes to specific provisions, the Department determined that the revisions to the current part 30 will safeguard the welfare of apprentices by aligning with existing legal authorities in Federal and State law, ensuring that apprenticeship programs remain aligned with the full scope of civil rights protections. Enforcement agencies such as the EEOC and State FEPAs possess greater expertise in discrimination law and broader authority to provide individualized relief, including make-whole relief, than Registration Agencies. Accordingly, relying on those enforcement mechanisms, rather than a duplicative apprenticeship-specific process, will better protect apprentices who experience unlawful discrimination.

The Department also disagrees with the commenter that asserted that the proposed rule contradicts the labor-management provisions of the NAA. The NAA, in relevant part, directs the Department to bring together employers and labor for the formulation of programs of apprenticeship. As set forth in the preamble of this final rule and in the section-by-section analysis of the revisions to the current part 30, the Department has determined that the elimination of redundant, and likely illegal, requirements and the reduction of administrative burden will further the expansion and growth of the National Apprenticeship System. Specifically, this final rule, contrary to the commenter's assertion, promotes, rather than inhibits, the convening of employers and labor to establish apprenticeship programs by lowering barriers and associated burdens, consistent with the NAA.

2. Administrative Procedure Act

Comments: One commenter argued that the NPRM is unlawful or violates the APA. Another commenter argued that the NPRM relies on unsubstantiated problems, such as concerns about ''reverse discrimination'' or pressures for sponsors to discriminate under the 2016 regulations. A commenter stated that, in contrast to the prior rulemaking in 2016—which they said did review apprenticeship data and analyze national labor force data to justify changes to the regulation—the Department did not include any examples, a quantitative analysis, or a factual record to support its claims under the NPRM. For example, one commenter stated they were unable to find any examples of recent EEOC charges brought against employers for discriminating against White males in apprenticeship programs, construction jobs, or trades jobs, while there are numerous examples of such cases concerning discrimination against racial minorities. Another commenter asserted that data demonstrates that discrimination against women and racial minorities is still a real concern. This commenter further stated that the Department ignored relevant available data and case law that did not align with the arguments presented under the proposed rule.

Given these perceived issues, a commenter argued that the NPRM failed to meet the APA standard that regulatory actions must examine the relevant data and articulate a satisfactory explanation for the action, including a rational connection between the facts found and the choice made. Another commenter asserted that the NPRM lacks sufficient data or a factual record, and therefore violates the APA's arbitrary and capricious standard, and does not satisfy the APA requirements for notice-and-comment rulemaking designed to ensure that the Department has made an informed decision.

Department Response: As emphasized earlier in this preamble, the Department takes the position that while program sponsors should be held accountable for findings of illegal discrimination against apprentices, the affirmative action provisions contained in the part 30 regulation do not prevent such discrimination, and, in fact, may induce such discriminatory conduct by sponsors. The Department did not refer to the concept of ''reverse discrimination'' in the preamble to the NPRM; moreover, the Department's position, consistent with that of the EEOC, is that there is no such thing as ''reverse'' discrimination; there is only discrimination and workers are protected from such discrimination under the Constitution and nondiscrimination laws regardless of their race, ethnicity, or sex.[32] As some commenters noted, when the Department issued the 2016 version of part 30, the preamble to the rule that appeared in the **Federal Register** stated that Department had ''analyzed participant demographics in apprenticeship programs . . . and the demographics of the national labor force'' and had determined that ''notable disparities exist in apprenticeship participation and completion.'' 81 FR 92028 (Dec. 19, 2016). However, those comparative analyses of the prevalence of certain demographic groups in the national apprenticeship workforce and in the broader national labor force were incapable of establishing that such demographic ''disparities'' were caused by, or were proof of, discriminatory conduct by particular program sponsors. Rather, these analyses were undertaken to support the Department's stated

[31] *See* 42 U.S.C. 12112(d).

[32] EEOC, ''What You Should Know About DEI-Related Discrimination at Work,'' Question 4, *https://www.eeoc.gov/wysk/what-you-should-know-about-dei-related-discrimination-work#_ednref7* (last visited June 26, 2026).

policy goals at the time of ''[i]ncreasing diversity'' in Registered Apprenticeship programs generally (81 FR 92027, Dec. 19, 2016) and of addressing the ''underutilization of historically disadvantaged worker groups in apprenticeship.'' 81 FR 92035 (Dec. 19, 2016).

However, in issuing this final rule, the Department has determined that the prior regulatory effort in part 30 to increase overall demographic diversity in Registered Apprenticeship programs through the establishment by certain apprenticeship programs of compulsory, group-based numerical hiring goals—while also seeking to protect individual apprentices in those programs against illegal employment discrimination on the basis of race, sex, and ethnicity—imposed distinct and fundamentally irreconcilable mandates on certain sponsors. Moreover, the Department maintains that the obligation to set such apprenticeship hiring goals in the existing and previous versions of part 30 were inherently discriminatory and legally questionable because they induced program sponsors to treat individuals differently based upon their group-based demographic identities. Therefore, the Department's prior analysis as to the prevalence of overall, global demographic disparities among certain groups enrolled in Registered Apprenticeship programs ought not be used to justify the retention of the compulsory, burdensome, and legally questionable affirmative action requirements contained in the existing part 30 regulation.

As some commenters noted, maintaining utilization goals that classify apprentices on the basis of race, ethnicity, and sex may induce sponsors to consider these protected bases as factors in their employment decisions. The Department's concern about discrimination is not unsubstantiated, as a commenter asserted. Rather, it is substantiated by the text of the regulations. The absence of formal complaints against sponsors for engaging in unlawful preferential treatment neither disproves the existence of such treatment nor undermines the Department's position that the part 30 affirmative action provisions incentivize sponsors to use improper governmental racial classifications in their selection decisions. *See Lutheran Church-Missouri Synod* v. *F.C.C.,* 154 F.3d 487, 492 (D.C. Cir. 1998) (rejecting the Federal Communications Commission (FCC)'s argument that strict scrutiny should not apply to its EEO regulations because there was no evidence that a regulated entity had engaged in racial hiring, stating that ''such an evidentiary obligation would turn equal protection analysis inside out.''). The developing case law regarding affirmative action also makes such classifications more vulnerable to challenge than they have been in the past. *See, e.g., Vitolo* v. *Guzman,* 999 F. 3d 353 (6th Cir. 2021) (invalidating a program under the American Rescue Plan Act of 2021 that disbursed funding to restaurant owners on the basis of the applicants' race and sex); *Mid-Am. Milling Co., LLC* v. *United States Dep't of Transportation,* No. 3:23–CV–00072–GFVT, 2024 WL 4267183, at *7 (E.D. Ky. Sept. 23, 2024) (citing to *SFFA* and finding that Plaintiffs were likely to succeed in their claim that the Department of Transportation's use of race and sex-based presumptions in the preferential award of Federal highway and transit funds violated the Constitution's guarantee of Equal Protection), *opinion clarified,* No. 3:23–CV–00072–GFVT, 2024 WL 4635430 (E.D. Ky. Oct. 31, 2024); *Ultima Servs. Corp.* v. *U.S. Dep't of Agric.,* 683 F. Supp. 3d 745, 764 (E.D. Tenn. 2023).

Regarding the Department's decision to rely on external enforcement agencies to investigate allegations of illegal discrimination against apprentices, the Department maintains that this will result in more thorough investigations and more tailored, individualized remedies for apprentices who experience illegal discrimination. In the nearly 10 years since part 30 was last updated, the Department has determined that OA's limited expertise in nondiscrimination law and its inability to provide individual remedies prevents it from effectively remedying unlawful discrimination. The Department's reference in the NPRM to a lack of complaints and enforcement actions under the existing part 30 was not meant to convey that there is no discrimination. Instead, in the Department's view, the scarcity of complaints and enforcement actions related to part 30 suggests that the apprentice-specific enforcement scheme administered by the Department has provided little relief to apprentices outside of what is otherwise available through FEPAs, especially since the Department's usual practice has been to refer any complaints alleging illegal discrimination to the EEOC.

Because of the lack of effective enforcement, growing legal risks, and sponsor compliance costs under the current part 30, the Department has concluded that it is inappropriate to maintain this race- and sex-based approach to nondiscrimination in apprenticeship. Instead, the Department contends that a more streamlined approach will help expand apprenticeships for all workers and return the enforcement of nondiscrimination laws to the agencies properly equipped for the task. By accounting for these considerations in its determination that the current part 30 regulation is no longer ''necessary to safeguard the welfare of apprentices,'' [33] the Department has clearly provided a ''reasoned explanation for the change,'' satisfying the APA's requirements. *Cboe Glob. Markets, Inc.* v. *Sec. & Exch. Comm'n,* 155 F.4th 704, 716 (D.C. Cir. 2025) (quoting *Encino Motorcars, LLC* v. *Navarro,* 579 U.S. 211, 221 (2016)); *see also Mozilla Corp.* v. *Fed. Commc'ns Comm'n,* 940 F.3d 1, 55–56 (D.C. Cir. 2019) (upholding the FCC's adoption of a ''light-touch'' policy for governing internet rather than maintaining a utility-style regulation where the FCC determined that the harms the prior Order ''was designed to prevent did not require the prior Order's regulatory measures but could instead be mitigated—at a lower cost—with transparency requirements, consumer protection, and antitrust enforcement measures'').

F. Comments on the Department's Goals for the Rulemaking

1. Ensuring Apprenticeship Regulations Comply With Nondiscrimination Law

Comments on the Department's Interpretation of Students for Fair Admissions v. Harvard

Comments: Some commenters stated that the Department misinterpreted the Supreme Court's decision in *SFFA* in justifying the rescission of the current part 30 regulations. These commenters reasoned that *SFFA* held only that race cannot be explicitly considered as a factor in individual higher education admissions decisions and did not address race-neutral measures or outreach efforts in employment or training contexts and, therefore, the Department's claim that the part 30 regulations ''closely resemble'' policies struck down by the Court is false.

Commenters further argued that part 30 is distinguishable from the type of affirmative action addressed in *SFFA* because part 30 expressly prohibits selection preferences and also prohibits using quotas in the context of apprenticeship programs, requiring only the establishment of aspirational goals. Some commenters asserted that, under part 30, Registered Apprenticeship program sponsors may be sanctioned for falling short of the established target. A

[33] 29 U.S.C. 50.

couple of commenters also maintained that the Department did not offer evidence that program sponsors were using protected characteristics in hiring decisions.

One commenter opined that Registered Apprenticeship program outreach is not ''zero sum,'' like the admissions processes addressed in the *SFFA* decision, in that there are frequent occasions when employer-demand outpaces the number of applicants requiring outreach, and nothing in the *SFFA* decision would prevent labor training programs from expanding selection pools by deploying targeted outreach as one strategy for growth. This commenter stated that the need for joint apprenticeship and training committees (JATCs) to engage in successful outreach, recruitment, and retention programs is underscored by the reality of acute, nationwide labor shortages for skilled labor in the construction industry. Another commenter cited to cases that it claimed upheld broad recruitment efforts like those conducted under part 30 because such measures function only to bring more candidates into consideration while remaining race-neutral in the selection of candidates.

Although the above commenters disagreed with the Department's use of *SFFA* to support this rulemaking, other commenters who favored the revision and streamlining of part 30 agreed with the Department's position that *SFFA* is relevant, noting that the Constitution prohibits actions that discriminate on the basis of race unless such measures are narrowly tailored to serve a compelling state interest. These commenters cited several Supreme Court decisions, including the *SFFA* ruling, which they said clarified that race-preferential educational programs are illegal unless they satisfy the ''twin protections'' of the Equal Protection Clause. Another commenter noted that in the *SFFA* decision the court held that race-conscious admissions policies violate the Equal Protection Clause of the Fourteenth Amendment, and that existing regulations that establish a race-conscious preference would not survive legal challenge. Yet another commenter stated that the existing part 30 regulations require ''arbitrary line drawings'' related to ''race'' and ''national origin'' designations which have been rejected by the Supreme Court.

Department Response: Commenters who suggested *SFFA*'s reasoning is cabined to the higher education context are mistaken. While *SFFA* was decided in the context of university admissions, the decision rests on longstanding and enduring equal-protection principles that predate and extend well beyond that context, and it reaffirmed that race-based governmental decision-making is presumptively invalid absent an exceedingly narrow justification. The Department cited *SFFA* in the NPRM precisely because it reaffirmed these bedrock equal-protection principles. 90 FR 28950, 28955 (July 2, 2025). Indeed, the Supreme Court recently relied upon *SFFA* outside the higher education context to reiterate that ''the general rule [is] that the Constitution almost never permits the Federal Government or a State to discriminate on the basis of race. Such discrimination triggers strict scrutiny'' under the Constitution's equal-protection guarantee. *Louisiana* v. *Callais,* 146 S. Ct. 1131, 1152 (2026) (quoting *SFFA,* 600 U.S. at 207).

Lower courts have likewise relied on equal-protection principles articulated in *SFFA* to halt or strike down race-based governmental programs in a variety of contexts. *See, e.g., Mid-Am. Milling Co., LLC* v. *United States Dep't of Transportation,* No. 3:23–CV–00072–GFVT, 2024 WL 4267183, at *7 (E.D. Ky. Sept. 23, 2024) (citing to *SFFA* and finding that Plaintiffs were likely to succeed in their claim that the Department of Transportation's use of race and sex-based presumptions in the preferential award of Federal highway and transit funds violated the Constitution's guarantee of Equal Protection), *opinion clarified,* No. 3:23–CV–00072–GFVT, 2024 WL 4635430 (E.D. Ky. Oct. 31, 2024); *Ultima Servs. Corp.* v. *U.S. Dep't of Agric.,* 683 F. Supp. 3d 745, 764 (E.D. Tenn. 2023) (citing *SFFA* and finding that the race-based presumption used by the Small Business Administration (SBA) and the Department of Agriculture in determining eligibility for preferencing in Federal contract awards failed strict scrutiny).

Contrary to some commenters' assertions, the constitutional relevance of *SFFA* does not depend upon whether apprenticeship programs are analogous to university admissions programs. The question is whether the government has employed racial classifications or induced race-based decision-making. The affirmative action provisions of the current part 30 regulation do exactly that. The regulation requires covered sponsors to conduct utilization analyses based on race and ethnicity, determine whether particular racial or ethnic groups are ''underutilized,'' establish race- and ethnicity-based utilization goals, and undertake affirmative measures designed to address such underutilization.

Although provisions in part 30 prohibit discrimination on the basis of race, sex, and ethnicity, the regulation's race-based provisions conflict with that legitimate mandate. Long before *SFFA,* courts repeatedly held that governmental policies pressuring or encouraging regulated entities to consider race in hiring, promotion, assignment, or other employment decisions constitute racial classifications attributable to the government. *See, e.g., Monterey Mechanical Co.* v. *Wilson,* 125 F.3d 702, 710–13 (9th Cir. 1997); *Lutheran Church—Missouri Synod* v. *FCC,* 141 F.3d 344, 351–54 (D.C. Cir. 1998); *MD/DC/DE Broadcasters Ass'n* v. *FCC,* 236 F.3d 13, 19–20 (D.C. Cir. 2001). A racial classification must survive strict scrutiny, meaning it must be narrowly tailored to achieve a compelling governmental interest. *SFFA,* 600 U.S. at 206. Sex-based classifications may be sustained only if they satisfy intermediate scrutiny—they must serve an important governmental objective and are substantially related to the achievement of that objective. *Vitolo,* 999 F.3d at 364 (citation modified).

As stated in the NPRM, the affirmative action provisions currently found at 29 CFR 30.5(d) require covered sponsors to establish specific numerical goals exclusively for the inclusion of women and racial and ethnic minorities in the program. Contrary to the commenters' assertion, the fact that part 30 requires setting ''utilization goals'' instead of ''quotas'' does not render these provisions race-neutral. It simply does not matter ''whether a government hiring program imposes hard quotas, soft quotas, or goals. Any one of these techniques induces an employer to hire with an eye toward meeting the numerical target. As such, they can and surely will result in individuals being granted a preference because of their race.'' *Lutheran Church,* 141 F.3d at 354. Nor does it matter that § 30.4(a)(2) suggests that the race-based regulations are needed to achieve a demographic balance that would exist ''absent discrimination.'' 29 CFR 30.4(a)(2). As Chief Justice Roberts explained nearly twenty years ago: ''The way to stop discrimination on the basis of race is to stop discriminating on the basis of race.'' *Parents Involved in Cmty. Schs.* v. *Seattle Sch. Dist. No. 1,* 551 U.S. 701, 748 (2007). That is because governmental actions that create '' '[d]istinctions between citizens solely because of their ancestry, are by their very nature odious to a free people whose institutions are founded upon the doctrine of equality.' '' *Callais,* 146 S. Ct.

1131, 1152 (quoting *SFFA,* 600 U.S. at 208).

Under the existing part 30, sponsors are also required to engage in outreach targeted to specific groups, as well as other burdensome activities when women or racial or ethnic minorities are underrepresented. Thais targeted outreach based on race, ethnicity, and sex, however, is legally vulnerable. *See MD/DC/DE Broadcasters Ass'n* v. *F.C.C.,* 236 F.3d 13, 20 (D.C. Cir. 2001) (disagreeing with the premise that ''preferential recruiting 'disadvantag[es] no one' '' and subjecting the affirmative recruiting requirement to strict scrutiny). This focus on ''utilization'' and race- or sex-based responses to such underutilization undermines the justification that these goals and targeted efforts are meant to achieve EEO for *all* apprentices. *Cf. Monterey Mech. Co.* v. *Wilson,* 125 F.3d 702, 711 (9th Cir. 1997) (system where contractors must subcontract percentages of work to minority or female owned subcontractors or show good faith effort to comply with the non-rigid ''goals'' is a racial classification under the Equal Protection Clause).

The premise underlying part 30's affirmative action provisions was that ''absent discrimination, over time a sponsor's apprenticeship program, generally, will reflect the sex, race, ethnicity, and disability profile of the labor pools from which the sponsor recruits and selects.'' 29 CFR 30.4(a)(2). This premise, however, is flawed because ''[i]t is completely unrealistic to assume that unlawful discrimination is the sole cause of people's failing to gravitate to jobs and employers in accord with the laws of chance.'' *See Watson* v. *Fort Worth Bank & Trust,* 487 U.S. 977, 992 (1988). Section 30.4(a)(2)'s ''completely unrealistic'' premise also places unconstitutional pressure on sponsors to reach these goals. ''The very term 'underrepresentation' necessarily implies that, if such a situation exists, the [employer] is behaving in a manner that falls short of the desired outcome. The regulations pressure [employers] to maintain a workforce that mirrors the racial breakdown of their 'metropolitan statistical area.' '' *Lutheran Church-Missouri Synod* v. *F.C.C.,* 141 F.3d 344, 352 (D.C. Cir. 1998). The presence of a numerical goal, combined with the threat of deregistration for failing to take ''good faith efforts'' to meet those goals, incentivizes sponsors to engage in preferential hiring to avoid a finding that they have not engaged in such efforts. *Cf. Sussman* v. *Tanoue,* 39 F. Supp. 2d 13, 26 (D.D.C. 1999) (finding that the Federal Deposit Insurance Corporation's affirmative action program need not be reviewed under strict scrutiny because the office administering the affirmative action program ''had no authority comparable to the threat of extended government audit, license denial, and forfeiture which the Court of Appeals found would inevitably convert a potential concern about under-representation on the part of the FCC and the licensee into a hiring preference'').

To survive strict scrutiny, the Department would need to show that the race-based provisions of part 30 serve a compelling state interest. The Supreme Court's ''precedents have identified only two compelling interests that can satisfy that standard.'' *Callais,* 146 S. Ct. at 1152 (quoting *SFFA,* 600 U.S. at 207). The first is ''avoiding imminent and serious risks to human safety in prisons,'' *Id.,* which plainly has no application here. The second is ''remediating specific, identified instances of past discrimination that violated the Constitution or a statute.'' *Id.; see also City of Richmond* v. *J.A. Croson Co.,* 488 U.S. 469, 497 (1989). Generalized assertions of societal or industrywide discrimination are insufficient to meet this standard, however; there must be specific instances of past intentional discrimination in which the Federal Government itself was an active or passive participant. *Id.* at 498–500; *see also Vitolo* v. *Guzman,* 999 F.3d 353, 361 (6th Cir. 2021).

For the Department to impose the requirement to adopt race- and ethnicity-based utilization goals on all sponsors, the Department would need to show specific instances of its own participation in the discrimination, rather than that it is seeking to rectify general societal inequities. *See Wygant* v. *Jackson Bd. of Educ.,* 476 U.S. 267, 275 (1986) (citing *Hazelwood School District* v. *United States,* 433 U.S. 299, 308 (1977) for the proposition that the Court focuses ''on prior discrimination as the justification for, and the limitation on, a State's adoption of race-based remedies''). The Department cannot meet this standard as the past rulemaking record for part 30 has not identified any such instances of past discrimination.

Furthermore, the utilization goals required by existing § 30.6 lack narrow tailoring, as their application has no clear end, applies regardless of occupation or industry, and the default data used to set the goal is the respective group's representation in the civilian labor force, a statistic that bears little relationship to any individual's interest in and qualifications for an apprenticeship. *See Rothe Dev. Corp.* v. *Dep't of Def.,* 545 F.3d 1023, 1036 (Fed. Cir. 2008) (identifying the ''relationship of the stated numerical goals to the relevant labor market'' as a factor in determining narrow tailoring). Similarly, the existing part 30 sex-based goals and related affirmative action requirements are likely to trigger intermediate scrutiny, which they are unlikely to survive. The government must show that the favored sex ''actually suffer[ed] a disadvantage'' caused by discrimination in a particular field or context that the policy is designed to remedy to establish an important interest. *Mississippi Univ. for Women* v. *Hogan,* 458 U.S. 718, 727–29 (1982). Statistical disparities between workforce composition and labor-market availability, standing alone, are insufficient to demonstrate an important governmental objective to remedy discrimination. *See Vitolo,* 999 F.3d at 364 (citing *Craig* v. *Boren,* 429 U.S. 190, 200–04 (1976)). Absent evidence that women suffered intentional discrimination in each of the specific trades or occupations subject to regulation, sex-based classifications in the form of goals cannot be justified as remedial measures. *Id.* at 365. For the same reasons that the race- and ethnicity-based goals are unlikely to demonstrate narrow tailoring, the sex-based goals are also unlikely to be found to be substantially related to the goal of remedying discrimination.

Given the constitutional infirmities created by the affirmative action provisions, the Department chooses to devote its resources to more supportable methods of expanding Registered Apprenticeship opportunities. If sponsors found certain elements of their affirmative action programs, such as their outreach or recruitment activities, to be helpful, they are free to continue those practices to the extent they are lawful. The Department is choosing, however, to no longer require such practices of sponsors. As discussed below, there are more effective and legally sound methods for protecting the welfare of apprentices.

Comments on Part 30's Conflict With Title VII

Comments: A couple of commenters stated that, in the NPRM, the Department incorrectly argued that the part 30 regulations violate Title VII, and critiqued the Department's citation of the *Ames* v. *Ohio Department of Youth Services* as an inaccurate basis for some of the claims made by the Department in the NPRM. The commenters argued that existing regulations do not alter terms or conditions of employment

based on race, ethnicity, or sex, and simply require organizations to set aspirational goals which courts have permitted while prohibiting programs from making discriminatory employment decisions. The commenters maintained that the *Ames* decision determined that the standard for all plaintiffs bringing suits under Title VII should be the same regardless of whether they are a member of a historically disadvantaged group, and did not address the legality of race and sex neutral measures such as those required by part 30. One of these commenters stated that DOL also claims that affirmative action requirements in existing regulations cause employers to engage in disparate treatment based on race, sex, and ethnicity, but does not provide any evidence to support this claim. One commenter stated that multiple court rulings have found that affirmative action plans similar to the regulations in part 30 are permissible under Title VII. Another commenter also argued that the Department's reliance on *Ames* is inappropriate, reasoning that the decision focused on burden-shifting standards in individual employment disputes, and adding that the Court did not rule on the legality of proactive outreach, nonbinding affirmative action plans, or utilization goals in federally administered training programs.

A different commenter maintained that the existing regulations are in tension with Title VII because they require non-exempt program sponsors to take actions that Title VII prohibits. The commenter urged DOL to incorporate these rationales in the final rule.

A couple of commenters remarked that the proposed rule would align with several Administration E.O.s. One commenter stated that the proposed rules logically follows from President Trump's January 21, 2025, E.O. 14173, ''Ending Illegal Discrimination and Restoring Merit-Based Opportunity,'' and the reasoning underlying it.

Department Response: The Department maintains that the part 30 race-, ethnicity-, and sex-based affirmative action provisions are vulnerable to challenge under both the Constitution, for the reasons discussed above, and under Title VII. As E.O. 14173 makes clear, Federal civil rights laws, including Title VII, ''serve as a bedrock supporting equality of opportunity for all Americans'' and illegal race- and sex-based preferences violate these laws. The Department agrees with the commenter that its rescission of the 2016 version's race-, ethnicity-, and sex-based utilization goals is consistent with Title VII and the principles articulated in E.O. 14173.

Commenters, however, have mischaracterized the Department's reliance on *Ames* v. *Ohio Department of Youth.* The Department does not claim that the *Ames* decision invalidates the existing part 30 affirmative action provisions as violative of Title VII. The Department cited *Ames* for the general proposition that, under both Title VII and the Equal Protection Clause, equal opportunity must extend to all apprentices, not just historically disadvantaged groups. *Ames* held that Title VII's disparate-treatment provision prohibits discrimination against *any individual,* thus ''establishing the same protections for every 'individual'—without regard to that individual's membership in a minority or majority group.'' 605 U.S. at 309–10 (2025); *see also McDonald* v. *Santa Fe Trail Transp. Co.,* 427 U.S. 273, 280 (1976) (holding that Title VII prohibits discrimination against non-minority individuals ''upon the same standards'' as minority individuals).

However, part 30's affirmative action requirements encourage preferential treatment of certain groups, specifically racial minorities and women. 29 CFR 30.4(a), 30.5(d). *Cf. Lutheran Church,* 141 F.3d at 354 (race-based employment goals induce preferential treatment based on race). The holding in *Ames* increases the likelihood that a non-minority or male plaintiff could successfully sue a sponsor claiming that the sponsor improperly took race, ethnicity, or sex into account in making employment decisions pursuant to the part 30 affirmative action provisions. *Ames* v. *Ohio Dep't of Youth Servs.,* 605 U.S. 303, 310 (2025) (''Our case law thus makes clear that the standard for proving disparate treatment under Title VII does not vary based on whether or not the plaintiff is a member of a majority group.'').

Even without the *Ames* holding, a lawsuit by a non-minority litigants alleging disparate treatment may be meritorious. Part 30's requirement for program sponsors to establish and take action to meet race- and sex-based goals conflicts with the plain text of section 703(a)(2) of the Act,[34] which makes it an unlawful employment practice to ''classify'' employees or applicants in a manner that deprives or tends to deprive individuals of employment opportunities because of race, color, sex, or national origin. The Civil Rights Act of 1991 amended Title VII (at section 703(m) [35]) to broaden this prohibition by providing that an unlawful employment practice is established when race, color, religion, sex, or national origin was even ''a motivating factor'' for an employment practice, even if other factors also motivated, or even drove, the decision. Title VII thus adopts a broad prohibition on race- and sex-based employment practices that, on its face, bars affirmative action measures to meet numeric goals based on those characteristics.

Notwithstanding the plain statutory text, the Supreme Court has construed Title VII to permit race- or sex-based affirmative action only in extremely narrow circumstances. *See United Steelworkers* v. *Weber,* 443 U.S. 193 (1979); *Johnson* v. *Transp. Agency, Santa Clara Cnty, Cal.,* 480 U.S. 616 (1987). Subsequent Supreme Court decisions call into question the continued viability of the *Weber-Johnson* framework. *See, e.g., Louisiana* v. *Callais,* 146 S. Ct. 1131 (2026); *Ames* v. *Ohio Dep't of Youth Servs.,* 605 U.S. 303 (2025); *SFFA,* 600 U.S. 181 (2023*); and Ricci* v. *DeStefano,* 557 U.S. 557, 579 (2009). While the framework is a judge-made doctrine that interprets Title VII atextually ''to permit what its language read literally would prohibit,'' *Johnson,* 480 U.S. at 647 (O'Connor., J. concurring), the Department nonetheless assumes that *Weber-Johnson* remains controlling precedent.

Under the *Weber-Johnson* framework, an employer may voluntarily adopt a race- or sex-based measure to address a manifest imbalance in traditionally segregated job categories, provided that the measure is remedial in purpose, temporary in duration, and does not employ quotas or inflexible goals or unnecessarily trammel the interests of non-beneficiaries. *Weber,* 443 U.S. at 208; *Johnson,* 480 U.S. at 638. Such programs must be designed to eliminate the effects of past discrimination or segregation, not to maintain racial or sex balance for its own sake. *Johnson,* 480 U.S. at 639–40. As the Eighth Circuit explained: ''An affirmative action policy is valid [under Title VII] if the policy is remedial and narrowly tailored to meet the goal of remedying the effects of past discrimination.'' *Humphries* v. *Pulaski Cnty. Special Sch. Dist.,* 580 F.3d 688, 695 (8th Cir. 2009). It is often difficult for an employer to establish compliance with the strict limitations of *Weber* and *Johnson;* those who attempt such a path and fail necessarily violate Title VII with the practice in question.

To comply with the current part 30's affirmative action regulations, a covered sponsor must establish race- and sex-based employment goals and undertake related affirmative measures. The

[34] 42 U.S.C. 2000e–2(a)(2).

[35] 42 U.S.C. 2000e–2(m).

Department is concerned that such practices do not fit within the *Weber–Johnson* framework—and certainly not generally across sponsors nationwide. As explained above, part 30's race- and sex-based requirements are not remedial: sponsors must undertake good faith efforts to meet, achieve, or approach proportional representation in terms of race and sex, not to specifically remedy manifest imbalances in a traditionally segregated job category. Nor are the requirements temporary: they have existed for decades, and unless rescinded, sponsors would continue to be subject to these regulations on an indefinite basis.

''[T]he existence of an affirmative action plan . . . when combined with evidence that the plan was followed in an employment decision is sufficient to constitute direct evidence of unlawful discrimination unless the plan is valid'' under *Weber-Johnson. Frank* v. *Xerox Corp.,* 347 F.3d 130, 137 (5th Cir. 2003) (quoting *Bass* v. *Bd. of Cnty. Comm'rs,* 256 F.3d 1095, 1110 (11th Cir. 2001)). Many sponsors' actions taken to comply with part 30's affirmative action regulations would not consistently satisfy the demanding *Weber–Johnson* framework and could therefore constitute direct evidence of unlawful discrimination in violation of Title VII. Part 30's utilization goals and related requirements thus compel regulated sponsors to adopt race- and sex-based employment practices that would be, in many cases, unlawful under Title VII. The Department should exercise its authority under the NAA to formulate and promote labor standards that are consistent with Federal law, rather than standards that create tension with Federal law.

Comments on the Application of Executive Order 14168

Comments: A commenter stated that the DOL fails to acknowledge that E.O. 14168 defies settled Title VII case law. The commenter asserted that in *Bostock* v. *Clayton County, Georgia,* 590 U.S. 644 (2020), the Supreme Court held that discrimination based on gender identity is a form of sex discrimination protected by Title VII, and as Executive Orders cannot override Supreme Court case law, *Bostock* remains the law of the land. A group of commenters stated that DOL inaccurately describes prevailing Title VII legal standards by claiming that the proposed elimination of sexual orientation as a category of prohibited discrimination is required to reflect ''existing legal authorities'' or ''the current statutory language and legal standards governing nondiscrimination.'' The group of commenters asserted that, in the *Bostock* ruling, the Supreme Court recognized that Title VII's prohibitions on discrimination on the basis of sex also bars discrimination on the basis of sexual orientation.

One commenter expressed different interpretations of the *Bostock* ruling and its implications. This commenter asserted that while some claim that the *Bostock* decision prohibits discrimination based on sexual orientation and gender identity, it does not. The commenter argued that in *Bostock,* the Court did not adopt a new protected basis of sexual orientation, transgender status, or gender identity in Title VII, but rather its holding and analysis was tied to what it viewed as a form of sex discrimination. The commenter further stated that the Court did not address the broad scope of conduct associated with sexual orientation or gender identify, and therefore it is inappropriate for DOL to impose nondiscrimination requirements based on these characteristics. The commenter concluded that, accordingly, the proposed rule would bring regulations into compliance with Federal nondiscrimination laws. Another commenter stated that rescinding the reference to ''gender identity'' that appears at 29 CFR 30.3(b)(5) and (c) of the current regulations comports with President Trump's E.O. 14168 ''Defending Women from Gender Ideology Extremism and Restoring Biological Truth to the Federal Government,'' which directed Federal agencies to modify regulations or policies that use the terms ''gender'' and ''gender identity.''

Department Response: The Department is removing all apprenticeship-specific nondiscrimination requirements, including references to sexual orientation and gender identity as specified protected bases under part 30, as mandated by E.O. 14168. E.O. 14168 directs agencies to ''enforce laws governing sex-based rights, protections, opportunities, and accommodations to protect men and women as biologically distinct sexes'' and to ''remove all statements, policies, regulations, forms, communications, or other internal and external messages that promote or otherwise inculcate gender ideology[.]'' The Department therefore proposed to remove references to gender identity.

The Department disagrees with commenters who contend that these revisions improperly narrow the protections afforded by Federal nondiscrimination law. Commenters' objections rest on a misunderstanding of both the purpose and effect of this rulemaking. This final rule does not amend or limit the substantive protections afforded by Title VII or any other Federal or State nondiscrimination law. Rather, it rescinds the apprenticeship-specific nondiscrimination framework previously contained in part 30 and replaces it with a straightforward requirement that program sponsors comply with all applicable Federal and State laws prohibiting illegal discrimination. Under revised § 30.3, sponsors remain fully subject to all applicable nondiscrimination requirements imposed by Federal and State law, and apprentices retain whatever protections those laws provide.

The Department acknowledges commenters' reliance on *Bostock.* Nothing in this final rule purports to alter the legal effect of *Bostock* or to resolve questions concerning the scope of Title VII. The Department is not revising Title VII, nor is it exercising authority to define the substantive reach of that statute. Those questions remain governed by applicable law and are properly resolved by the other agencies and Federal courts charged with enforcing and interpreting Federal nondiscrimination statutes.

Accordingly, the Department has determined that it is unnecessary to maintain apprenticeship-specific regulatory provisions that separately enumerate particular protected categories or otherwise establish an independent nondiscrimination regime for Registered Apprenticeship programs. Instead, the final rule adopts a uniform standard requiring compliance with all applicable Federal and State nondiscrimination laws. To the extent those laws prohibit particular forms of discrimination, program sponsors remain bound by those requirements. To the extent those laws are interpreted, amended, or otherwise modified in the future, sponsors' obligations will change accordingly without requiring further amendments to part 30.

The Department therefore disagrees that the removal of apprenticeship-specific references to particular protected categories narrows the substantive protections available to apprentices. The final rule neither expands nor contracts the protections afforded under Federal and State nondiscrimination laws. Rather, it eliminates a duplicative apprenticeship-specific regulatory framework and returns responsibility for interpreting and enforcing those laws to other agencies and courts that possess the relevant statutory authority and expertise.

2. Streamlining Enforcement, Eliminating Duplicative Frameworks, and Aligning Apprenticeship Requirements with Federal Laws

General Comments About Streamlining Requirements

Comments: Some commenters expressed support for the Department's proposal to streamline EEO requirements for Registered Apprenticeship programs. These commenters stated that the current regulations at 29 CFR part 30 impose unique EEO obligations on Registered Apprenticeship programs that have resulted in significant confusion, operational challenges, and compliance costs, potentially deterring the establishment of new apprenticeship programs and the growth of existing ones. One commenter concluded that compliance with existing nondiscrimination laws is sufficient.

Another commenter expressed support for DOL's efforts to harmonize the Department's rules for Registered Apprenticeship programs with nondiscrimination laws, arguing that the Department's proposed revisions are necessary to resolve the consequences of overlapping or unclear jurisdictional mandates.

However, one commenter asserted that the proposed rule risks increasing employer burden by shifting responsibility for EEO requirements to the ''already overburdened'' EEOC and other State agencies. The commenter maintained that employers consistently report that navigating multiple State-specific rules is more onerous than following a single Federal standard.

Department Response: The Department appreciates the various commenters' support for the rule's streamlined and uniform approach to EEO and nondiscrimination requirements. The Department agrees that the requirements imposed under the existing rule were onerous, excessive, and impeded the goal of apprenticeship expansion. Accordingly, the Department maintains that this final rule fulfills the Administration's directive in E.O. 14192 to eliminate regulations that impose costs, create confusion, hamper innovation, or otherwise restrain economic growth and opportunities for Americans.

The Department disagrees that the final rule increases compliance burdens by shifting responsibility to the EEOC or State agencies. Those agencies and the laws they administer govern sponsors regardless of whether part 30 exists. This rule does not create any new obligations under Federal or State nondiscrimination laws, nor does it create any new enforcement mechanisms. Rather, it eliminates a separate apprenticeship-specific compliance and enforcement regime that operated alongside existing Federal and State civil-rights laws. To the extent the commenter is concerned about multiple layers of regulation and bureaucracy, the final rule reduces, rather than increases, those layers by removing an additional apprenticeship-specific framework while leaving in place the generally applicable nondiscrimination laws that already govern sponsors.

3. E.O. 14192, Unleashing Prosperity Through Deregulation

Comments: A commenter supported the proposed rule changes, arguing that the changes would provide numerous benefits, including reducing regulatory burdens, decreasing stakeholder confusion, providing clarity, and encouraging more apprenticeship program participation, and aligning with President Trump's executive orders on deregulation, merit-based opportunity, and preparing Americans for skilled trade jobs. Another commenter expressed support for the proposed rule's revisions to 29 CFR parts 29 and 30, stating that these changes would remove a duplicative set of regulations on program sponsors and employers, and eliminate requirements for an unnecessarily complex array of goals, analyses, outreach, and annual reviews. A separate commenter concurred with the proposed removal of duplicative and outdated requirements.

A commenter maintained that it is essential to ensure that participating employers are not overburdened by reporting requirements and that employers can protect proprietary information, including trade secrets, program outlines, and other sensitive materials. The commenter urged the Department to consider broader improvements to the apprenticeship registration process and remove unnecessary administrative barriers and simplify the bureaucratic requirements for small and midsize employers. Specifically, the commenter recommended avoiding ''government-centric language'' that is not aligned with workplace operations, as well as delivering technical assistance through experienced practitioners, rather than static manuals and checklists.

Other commenters, however, disagreed with the Department's assertion that the part 30 regulation should be revised and streamlined to reduce undue regulatory burdens for Registered Apprenticeship stakeholders. One commenter asserted that the part 30 regulations are not burdensome on sponsors because States and other organizations have consistently created tools and templates for sponsors that have helped sponsors easily create affirmative action plans that support equal opportunity for Registered Apprenticeship program applicants. This commenter added that sponsors have been complying with these requirements for decades, and many sponsors already have policies and practices set up to effectively complete affirmative action plans, as well as internal auditing and reporting systems.

Department Response: The Department appreciates comments that acknowledged the challenges that Registered Apprenticeship program sponsors face in complying with the existing part 30 regulation and the need for a clearer and less complex regulatory framework. The Department agrees with those commenters who opined that the existing part 30 regulation's requirements were expansive, duplicative, and unclear, and that they imposed a complex regulatory framework that did not serve sponsors' business needs. The Department further agrees that such regulatory complexity may have impeded the growth of the Registered Apprenticeship model by discouraging program uptake or expansion, and that revising and simplifying the part 30 regulation will lead to expansion of the model. As such, the Department's final rule streamlining the part 30 regulation serves the shared goals of the Department and this Administration to reduce regulatory burdens and expand Registered Apprenticeship. The Department also appreciates those commenters who acknowledged the alignment between this rulemaking and the Administration's deregulatory directive to Federal agencies (as outlined in E.O. 14192 and cited in the NPRM as a motivation for this rulemaking).

The Department disagrees with commenters who asserted that the existing part 30 regulation did not impose meaningful burdens on program sponsors. Several commenters pointed to the availability of templates, technical assistance, internal auditing systems, and established compliance practices as evidence that sponsors could readily comply with the regulation. The Department does not find these observations persuasive. The existence of specialized templates, extensive technical assistance, compliance personnel, internal auditing systems, and recurring reporting processes demonstrates that sponsors and Registration Agencies devoted substantial time and resources to

satisfying the regulation's requirements. The fact that sponsors may have developed systems to facilitate compliance over time does not establish that the underlying requirements were simple, costless, or necessary.

Moreover, the Department is concerned not only with the burden imposed on existing sponsors that have already invested in compliance systems, but also with the effect of these requirements on employers considering whether to establish a Registered Apprenticeship program in the first instance. The Department concludes that reducing apprenticeship-specific compliance obligations will lower barriers to entry and facilitate broader adoption of the Registered Apprenticeship model.

The Department also received comments from employers describing the time, administrative effort, and resources devoted to compliance with affirmative action plans, utilization analyses, reporting obligations, and related requirements under part 30. After considering these comments and the record as a whole, the Department has determined that these apprenticeship-specific requirements imposed significant compliance costs while providing limited benefits beyond those already afforded by generally applicable Federal and State nondiscrimination laws. The Department therefore concludes that rescinding these requirements is an appropriate means of reducing unnecessary regulatory burden while continuing to protect apprentices through existing nondiscrimination protections.

5. Growing Registered Apprenticeship

Expansion and Growth of Registered Apprenticeship Programs

Comments: A commenter maintained that the proposed rule lacks compelling evidence that it would lead to apprenticeship growth. Instead, this commenter suggested that, to significantly increase the number of apprentices, investments in apprenticeships would need to be of an order of magnitude higher, and that adjustments to the infrastructure through legislation, such as codifying OA and SAAs as registration entities, are needed to see growth in the program. The commenter added that the Department also should adopt more ambitious growth goals, stating that 1 million apprentices only would equate to 0.6 percent of the workforce, whereas the apprentice share of the workforce in peer countries like Canada, the United Kingdom, and Australia is roughly 2 percent. Another commenter noted that the growth in public investment has led to increased apprenticeship enrollments, as Federal investment nearly doubled between 2016 and 2020 resulting in a more than 40 percent increase in the number of apprentices.

A commenter recommended that the Department pursue evidence-based regulations to speed up and simplify the registration process, including streamlined cross-State reciprocity or expedited review for programs using high-quality occupational frameworks or national standards, reasoning that these would help expand apprenticeship and result in more effective use of public resources.

Another commenter opposed the proposed rule's description that the current regulations have limited adoption or participation, particularly among small businesses, citing personal site visits over the last 15 years showing no instances in which EEO or affirmative action requirements were reported as barriers, and over the last 3 years, the commenter said they have registered 12 new apprenticeship programs with over 200 apprentices without EEO being raised as a concern.

In contrast, a commenter supported the NPRM's statement that the costs and disincentives created by the current part 30 regulations may be greater in new and emerging industries, citing personal experience in the education sector where funding is limited (or not yet apportioned as part of existing budgets) to develop or register an existing apprenticeship program.

Additionally, a commenter expressed support for simplifying 29 CFR part 30 with Federal nondiscrimination laws, stating that the changes could ease the burden for small and medium sized businesses, but added that to meet the Administration's goal of adding 1 million new apprenticeships, sponsors would need continued guidance from OA on outreach efforts for recruiting populations not traditionally served in Registered Apprenticeship programs.

Several commenters commented in support of further growing Registered Apprenticeship and modernizing the system, citing research that employers receive a positive return on investment, that apprentices receive higher wage increases than comparable workers, and that employers report apprenticeships are effective at addressing talent shortages. A commenter said that the model is underutilized, and remarked that more can be done to modernize it to build capacity and ensure long-term resilience of mutual benefit to employers and apprentices and that the NPRM is a step towards accomplishing this goal.

Department Response: The Department agrees with the commenters that Registered Apprenticeship should continue to be expanded and that it is crucial in helping address workforce shortages. The Department anticipates that the removal of onerous and burdensome requirements, such as those that are rescinded under this final rule, should facilitate increases in system participation through burden reduction and lower barriers to entry.

The Department disagrees with commenters who asserted that this final rule's rescission of provisions of the existing regulation will harm the growth of the National Apprenticeship System and that these provisions were not onerous for small businesses. As discussed throughout this preamble and in greater depth within the sections on the rescission of the existing regulation, there is no robust causal evidence that the existing regulations led to the growth of the National Apprenticeship System. Based on its delivery of technical assistance to sponsors of various sizes (including small businesses), the Department expects that the reduction of compliance burdens associated with these rescissions will facilitate program creation and expansion.

Additionally, in response to the anecdote from a commenter that the sponsors the commenter worked with did not mention part 30 and EEO requirements as burdensome, other commenters who were sponsors themselves or represented sponsors responding to the NPRM did express that part 30 is burdensome. As a result, the Department concludes, and several commenters representing industry concurred, that the existing part 30 regulations are overly burdensome and thereby suppress, not expand, potential entities' participation in the National Apprenticeship System.

Regarding comments that suggested increased funding and the codification of the National Apprenticeship System as avenues to expand the model, the Department notes that Congress, not the Department, has the authority to pursue these activities. The Department also appreciates the suggestions to further streamline registration, such as improving reciprocity, and will consider these options if there are future rulemakings on part 29.

Recommendations for Improving Apprenticeship Programs

Comments: A commenter recommended the Department identify specific strategies to facilitate

involvement of non-profit organizations and Federal contractors and expand into new and emerging industries to achieve growth in apprenticeship programs.

Another commenter suggested that, to drive meaningful adoption, apprenticeship programs should be reframed with language and structures that align with how human resources professionals operate—prioritizing upskilling, reskilling, and internal mobility. This commenter further stated that they have an extensive network of human resources professionals, nationwide chapter system, and communication channels that could partner with the Department to help educate employers about apprenticeship regulations and work to expand Registered Apprenticeship programs.

Department Response: The Department appreciates these comments and suggestions, but deems them to be outside of the scope of this rulemaking insofar as they are unrelated to the Department' focus on streamlining and simplifying the nondiscrimination requirements related to apprenticeship.

G. Comments on the Proposal's Impacts on Women, Racial and Ethnic Minorities, and Individuals With Disabilities

1. Data and Research on Demographic Representation and Economic Factors in Apprenticeship

Comments: A couple of commenters suggested that empirical evidence shows that the part 30 regulation improved diversity within the apprenticeship system. For example, some commenters stated that women's participation in apprenticeship grew threefold over the last decade or so. One commenter noted that this increase in women's participation occurred after the Department implemented intentional investments to increase the number of women in apprenticeships. Several commenters provided evidence that showed, in their view, that this growth occurred in smaller sub-groups of apprentices as well. For example, one commenter asserted that between 2014 and 2023, the growth of women of color participating in apprenticeship was particularly strong. The commenter provided data from this time period that, according to the commenter, demonstrated that the number of Latina and Asian women apprentices grew by 349 and 302 percent respectively, while the number of Black women apprentices grew by 222 percent. The commenter added that the number of women working as apprentices in construction and extraction occupations increased from 3,789 in 2015 to 10,834 in 2024, representing a 185.9 percent change. Another commenter also noted that the gains in the share of Hispanic/Latino apprentices outpace gains in the share of Hispanic/Latinos in the total labor force. One commenter reasoned that these increases in representation demonstrate the success of current Federal regulations and feared the proposed rule's rescissions would reverse increases in diversity within the National Apprenticeship System. However, one commenter acknowledged that, while the National Apprenticeship System has diversified over the last decade, there is no clear evidence of a causal relationship between the issuance of the 2016 regulation and increases in participation rates among certain demographic groups.

Some commenters also stated that demographic groups targeted by the existing part 30 regulation are still underrepresented within the apprenticeship system. A commenter said that despite progress, women remain significantly underrepresented in apprenticeship programs, making up just 14.3 percent of apprentices according to the OA data, while comprising nearly half (47.1 percent) of the labor workforce. Similarly, another commenter noted that only 9 percent of apprentices are Black despite Black workers making up 12.3 percent of the national labor force. These commenters asserted that removing the existing part 30 regulations would further exacerbate current demographic imbalances in the representation of certain demographic groups in apprenticeship. One commenter further argued that reducing these disparities could expand the talent pool available to employers, and that apprenticeship programs would need to reflect the full diversity of the U.S. population to effectively meet employer needs. Another commenter argued that if equal access were ensured for women, people of color, and other historically excluded groups, apprenticeship programs would better fulfill the goal of providing opportunity for all workers.

However, a commenter that expressed support for the Department's proposed revisions to part 30 argued that demographic disparities between apprenticeship programs and the broader workforce should not justify race-preferential programs. This commenter argued that history and culture can explain why certain groups are more common in some jobs, rather than discrimination. The commenter also observed that national and ethnic groups are not evenly distributed across most occupations, including apprenticeship programs.

Several commenters also discussed lower wages and occupational segregation among women who are apprentices and within the broader economy and, said that rescinding elements of part 30 would harm economic gains by women within apprenticeship. For example, one commenter stated that when you compare the full-time annualized salary of female versus male apprentices based on median hourly wage rates, female apprentices only earn 63.4 percent of their male counterparts earnings. The commenter added that women's median hourly earnings were significantly lower than men's across all races and ethnicities and were lowest for Native Hawaiian or Pacific Islanders and Black women who completed an apprenticeship. Another commenter stated that women comprise over 80 percent of all nursing assistant apprentices whereas the most common apprenticeship field for men in 2023 was higher paying electrician occupations. The commenter attributed this discrepancy to a lack of proactive outreach and persistent discrimination towards women in apprenticeship. Other commenters similarly noted that non-White Apprentices—and non-White workers within the economy generally—earned lower wages and are in less lucrative occupations than their White counterparts and the proposed rescissions to part 30 would not address these differences and could worsen them.

Commenters also stated that there is ongoing discrimination within the broader economy and the National Apprenticeship System, citing research, documented instances of discrimination, and surveys regarding discrimination and harassment. For example, a commenter said that, contrary to the Department's position, racial disparities in employment and positions are the result of discriminatory practices rather than lack of skills or personal preferences, citing research showing that equally qualified Black workers remain at a disadvantage compared to White workers when trying to enter certain industries, and referencing a 2023 National Bureau of Economic Research study concluding that occupational segregation in the United States today is substantially higher than what would be expected in a race-neutral environment. The commenter added that other studies show that resumes with White-sounding names were 10 percent more likely to get chosen for an interview than resumes with Black-sounding names. Another commenter suggested that the

recent charges brought by the EEOC against apprenticeship programs and construction companies for sex and race discrimination is evidence that discrimination continues to be a rampant problem.

One commenter, who identified herself as a Black woman, described her experience as a second-year apprentice; she discussed being passed over for training in favor of a White, male, first-year apprentice, despite being told by their foreman and general foreman that they would receive training on the next stage of the project. Another commenter cited their own 2021 national survey of tradeswomen, which found that one in four female apprentices reported never or rarely being treated equally when it came to lay-offs and about one out of five reported never or rarely being treated equally in work assignments, OJL, or in hiring.

Additionally, some commenters discussed how discrimination can impact apprentices after they are enrolled in the program as well. For example, one commenter reasoned that discrimination in hiring and access to hours of work means it will take longer to reach the hours required for apprenticeship progression and completion, delaying access to higher rates of hourly pay. The commenter also said that discrimination in access to work assignments, tools, and OJL means that women may have acquired fewer skills during their apprenticeship, making it harder for them to compete for skilled trades opportunities after completion.

Finally, several commenters maintained that diversity benefits more than just minority groups, citing research stating that more diverse companies have higher average profits, higher rates of innovation, and report higher revenues from launching new products, and also record higher worker satisfaction and worker longevity rates. A commenter suggested diversity could therefore help reduce turnover and help address existing skills gaps within the construction industry. Another commenter cited reports emphasizing the importance of human capital development (including critical thinking, emotional intelligence, and cross-cultural competencies) and diversity, rather than technical efficiency, in national economic and individual corporate performance. Similarly, a commenter remarked that actively encouraging individuals of color to consider jobs in teaching is important because research has consistently shown that a diverse educator workforce results in improved academic performance for all students, and especially for students of color.

Department Response: The Department acknowledges certain commenters' use of demographic and economic data purporting to show the beneficial impact of diversity initiatives pertaining to apprenticeship. However, the Department fundamentally disagrees with the underlying premise advanced by several of these commenters: namely, that a central policy goal of the part 30 regulation should be to achieve and maintain a level of representation of certain groups in Registered Apprenticeship that mirrors the demographic prevalence of such groups in the broader labor force. Instead, in this final rule, the Department maintains that the central goal of the part 30 regulation must be the prohibition of all forms of illegal discrimination in Registered Apprenticeship.

As stated earlier in the preamble of this final rule, the Department asserts that compulsory, nonremedial, group-based preferences and affirmative action schemes are inherently discriminatory because they treat individuals differently based upon their race, sex, or ethnicity. Therefore, the use of data on the existence of demographic imbalances in the overall apprenticeship workforce to justify the indefinite continuation of affirmative action requirements runs counter to the Department's paramount goal of prohibiting all forms of illegal discrimination in Registered Apprenticeship. The Department reiterates its conviction that apprenticeship programs should be free to recruit, hire, and retain apprentices solely on the basis of merit, and without reference to an applicant's group identity, ancestry, or demographic characteristics.

The Department notes that commenters failed to provide any authoritative, persuasive, or conclusive evidence to support their assertions that the part 30 regulation has been effective in improving participation rates and outcomes for apprentices in certain demographic groups, or that the removal of part 30 requirements would lead to adverse impacts on apprentices or apprenticeship programs. While some commenters asserted that there have been meaningful gains in representation of certain groups in apprenticeship, other commenters maintained that demographic imbalances and issues of underrepresentation have persisted over the past decade. Some commenters also acknowledged that increases in representation of certain demographic groups could be tied to other factors unrelated to the part 30 regulations, including investments to expand apprenticeship, or broader labor market or economic trends. One commenter opposed to the elimination of the affirmative requirements acknowledged that there was no proof of a ''robust causal link'' between the part 30 regulation and any improvements in demographic representation in apprenticeship. As noted previously, the Department disagrees with the premise that a central policy goal of the part 30 regulation should be to achieve and maintain a level of representation of certain groups in Registered Apprenticeship that mirrors the demographic prevalence of such groups in the broader labor force. However, in order to be responsive to commenters, the Department reviewed its own apprenticeship data, labor market and economic data, and other resources to ascertain the impact of its proposal, and similarly did not identify any direct causal link between the part 30 regulation's requirements and increased representation of certain demographic groups in apprenticeship.

The Department has reviewed data on active apprentices across the prior two decades to assess changes in demographic representation in the National Apprenticeship System in developing this final rule.[36] An analysis of this data fails to demonstrate a direct correlation nor causal link between the updated affirmative action and EEO requirements in the 2016 version of the part 30 regulation and significant increases in representation of demographic groups in Registered Apprenticeship programs nationwide. From FY 2006 through FY 2015, the average annual growth rate in the total number of active apprentices was 2.3%, and from FY 2016 through FY 2025, the average annual growth rate in the total number of active apprentices was 7%. The average annual growth rate for women in Registered Apprenticeship from FY 2006 through–FY 2015 was 3.1%, and the average annual growth rate for women from FY 2016–FY 2025 was 12.3%. For Hispanic and Latino apprentices, average annual growth rates were 7.1% from FY 2006 through–FY 2015, and 11.1% from FY 2016 through–FY 2026. For African Americans, average annual growth rates were 3.7% from FY 2006–FY 2015 and 7.6% from FY 2016 through FY 2025. As discussed further below, increases in the representation of certain

[36] Data discussed in the following paragraphs are available to the public on OA's website, ''Apprenticeship—Data and Statistics,'' *https://www.apprenticeship.gov/data-and-statistics.*

demographic groups in Registered Apprenticeship programs may be attributable to increases in demographic representation in certain occupations or industries outside of the Registered Apprenticeship context, increases in Federal funding to support apprenticeship expansion, or other labor markets factors and trends. The Department does not agree with commenters who posited that the part 30 regulation's requirements, such as the affirmative action program or EEO requirements established in the 2016 regulation, directly caused increases seen in representation of certain demographic groups in Registered Apprenticeship programs.

It is important to consider a comprehensive analysis of labor market trends, both within and outside Registered Apprenticeship, in assessing the impact of the part 30 regulation on representation of certain demographic groups in Registered Apprenticeship programs over the past two decades. As mentioned earlier, across this time frame, Registered Apprenticeship has expanded and evolved from a training model primarily used in the skilled trades to include more occupations, industries, and economic sectors. Two key growth areas for Registered Apprenticeship are the information technology and healthcare sectors; Registered Apprenticeship programs in the information technology sector grew from 20 programs in FY 2016 to 132 programs in 2025, while programs in healthcare grew from 533 programs in FY 2016 to 1,170 programs in 2025. Meanwhile, women's overall representation in the workforce in those two sectors has increased substantially in recent decades. The share of women in the information technology workforce has grown from a baseline of around 9% in the early 2000s to around 23% of today's information technology workforce in the United States.[37] The growth of women's participation in the healthcare workforce is even more striking. Based on data from the American Community Survey, a study from the U.S. Census Bureau reported that women have driven 80% of labor force growth in the healthcare sector since the early 2000s, with the number of full-time women in health care occupations nearly doubling from around 5 million employees in 2000 to around 9 million employees in 2019.[38]

These examples of broader demographic trends in the labor market demonstrate that it is not possible to conclusively attribute any growth in the representation of certain demographic groups in Registered Apprenticeship to the affirmative action provisions of the part 30 regulation. The slight increases in representation of certain demographic groups over the prior two decades corresponds with an overall increase in the average annual growth rate for all apprentices, and also could be attributable, in part, to the expansion of the model into new industries (outside of construction and the skilled trades), such as information technology and healthcare. In addition, overall increases in apprenticeship numbers and the slight increases in representation of certain demographic groups coincides with the introduction of increased, sustained Federal funding to support Registered Apprenticeship growth.

In summary, several of the commenters who supported the retention of the affirmative action provisions found in the 2016 version of the part 30 posited or inferred a correlation between the compulsory regime of group-based preferences contained in the regulation and increases in the demographic representation of certain groups (particularly women and Latinos) in Registered Apprenticeship programs that occurred after the issuance of that rule. In addressing such comments, the Department reiterates its firm commitment to the principle that individuals from all backgrounds—regardless of their race, ethnicity, sex, religion, or national origin—must be afforded the opportunity to compete on an equal, nondiscriminatory basis for admission into a Registered Apprenticeship program, and that apprentices must be selected and hired by program sponsors on the basis of their qualifications alone. Furthermore, as one commenter acknowledged, the available demographic data does not provide sufficient evidence of a ''robust causal link'' between the affirmative action requirements of the part 30 regulation and the subsequent increase in the representation of discrete groups in Registered Apprenticeship programs.

Some commenters offered assertions positing a direct correlation between certain economic outcomes and benefits and the increased participation of underrepresented groups in apprenticeship, such as improved profits, greater innovation, higher wages, and improved worker satisfaction and longevity. The Department maintains that not only are these supposed correlations unsubstantiated, they do not alter the Department's conviction that affirmative action requirements induce sponsors to treat individuals differently based on demographic characteristics and are therefore inherently discriminatory.

The Department acknowledges the concerns raised by commenters that, over time, illegal discrimination has persisted in both the broader labor market and in Registered Apprenticeship. As stated earlier, the Department's primary focus with this final rule is to clarify and strengthen the nondiscrimination requirement for Registered Apprenticeship in the part 30 regulation. In eliminating a duplicative, apprenticeship-specific regulatory framework for resolving issues related to discrimination, apprentices will better understand how to obtain individualized relief (which the existing part 30 regulation fails to provide). The Department maintains that establishing a stronger and more streamlined nondiscrimination framework in the revised part 30 regulation better aligns with the Department's mandate to protect apprentice welfare under the NAA.

Other Recommendations Related to Women in Apprenticeship

Comments: A commenter stated that equitable pathways into the construction trades are sorely needed, particularly given recent legislation that provides significant investment in the Nation's infrastructure and economy. The commenter mentioned the Infrastructure Investment and Jobs Act (IIJA), the CHIPS and Science Act, and the Inflation Reduction Act as bills that would create jobs, rebuild infrastructure, and increase economic competitiveness. The commenter argued that removing equal opportunity provisions from regulations that impact Registered Apprenticeship programs—a primary pathway into the construction trades—is a move in the wrong direction.

Department Response: The Department takes the position that the investments advanced in other Federal legislation, including the IIJA, the CHIPS and Science Act, or the Inflation Reduction Act, and their potential labor market impacts, have no bearing on the Department's decision to include a streamlined nondiscrimination standard for Registered Apprenticeship in this final rule.

[37] WomenTech Network, ''Women in Tech Stats 2026: Uncovering Trends and Unseen Data by WomenTech Network,'' *https://www.womentech.net/women-in-tech-stats* (last visited June 26, 2026).

The Department maintains that Registered Apprenticeship opportunities will be more accessible to all qualified individuals regardless of their demographic background under this final rule, because sponsors will no longer be subject to onerous regulatory mandates regarding the recruitment and hiring of apprentices based on demographic characteristics.

The Department disagrees with the commenter's assertion that the final rule is a step backwards and maintains that this final rule is an important step forward in making economic opportunities more accessible for all individuals. Equal opportunity does not depend on maintaining race- or sex-based affirmative-action requirements. The final rule preserves robust nondiscrimination protections while removing requirements that encourage sponsors to make decisions based on demographic characteristics. The Department believes apprenticeship opportunities are most accessible when all individuals compete under a uniform merit-based framework.

V. Section-by-Section Analysis of the Final Rule—Rescissions of Current Part 30

A. Rescission of Equal Opportunity Standards for All Sponsors

In the NPRM, the Department proposed to remove a number of requirements that the 2016 version of the part 30 regulation had applied to all program sponsors, regardless of size; these mandates included, among other things, the internal dissemination of a sponsor's equal opportunity policy, the sponsor's ongoing maintenance of a list of current recruitment sources for apprentices, the sponsor's provision of anti-harassment training to apprentices and journeyworkers who work with apprentices, and the sponsor's establishment of a procedure for handling and resolving complaints involving such harassment. After due consideration of the comments received concerning the proposed removal of these requirements, the Department has determined to rescind these previous part 30 mandates in this final rule.

Comments: A commenter said that by revising 29 CFR 30.3 to direct program sponsors to comply with all applicable Federal and State laws and regulations prohibiting illegal discrimination, the proposed rule would relieve sponsors from establishing or undertaking a complex array of goals, analyses, outreach, and annual reviews. More specifically, the commenter also expressed support for removing the requirement to establish an EEO coordinator.

A commenter supported the simplification and streamlining of the existing nondiscrimination regulations into one standard, stating that the protected bases in proposed § 30.3 mirror the bases protected by civil rights laws passed by Congress and enforced by the EEOC—Title VII of the Act, the ADEA, the Genetic Information Nondiscrimination Act of 2008, and the ADA. The commenter added that, unlike the revised version of part 30 contained in this final rule, the content of § 30.3 overreaches by imposing nondiscrimination requirements not found in the text of statutes passed by Congress, such as requiring nondiscrimination on the basis of sexual orientation and gender identity.

However, several other commenters expressed strong opposition to the rescission of the foregoing provisions of § 30.3. One commenter opposing the rescission maintained that the equal opportunity pledge, the assignment of a person responsible for EEO, and information sessions on EEO requirements remain necessary due to continued prevalence of harassment in Registered Apprenticeship programs, as well as the need to reiterate sponsors' commitment to EEO and communicate that commitment internally to all affected parties. Another commenter asserted that the proposed rule's rationale for rescinding these requirements does not consider the end goal of Registered Apprenticeship programs, which is to ensure that sponsors receive a return on investment, adding that where appropriate accommodations and support are not provided, programs see premature apprentice dropouts. A commenter remarked that Federal standards still matter because many sponsors operate in multiple States, and without a consistent Federal framework, employers may lower compliance across the board. Another commenter expressed concern that removing EEO requirements would make it difficult for programs to demonstrate compliance with civil rights laws and protect themselves from legal risk.

Department Response: The Department agrees with the commenter that characterized the requirements under existing § 30.3 as unnecessary and complex. Accordingly, the Department notes that it is maintaining a simpler and more streamlined Federal standard under this final rule through the new nondiscrimination standard contained in § 30.3 of this final rule. Additionally, and as described in greater detail below, sponsors covered by Federal nondiscrimination laws are already obligated to post a notice describing the protections afforded under Federal laws that prohibit job discrimination based on race, color, sex, national origin, religion, age (40 and older), equal pay, disability, or genetic information, and retaliation.

The Department recognizes that many sponsors may find EEO coordinators, anti-harassment training, internal complaint procedures, and similar practices useful. Nothing in this final rule prohibits sponsors from maintaining such programs. The Department has concluded, however, that these practices need not be mandated through a separate apprenticeship-specific regulatory regime because sponsors are already subject to Federal and State nondiscrimination laws and possess strong incentives to maintain workplaces free from unlawful discrimination and harassment. Sponsors remain free to adopt compliance structures they determine are appropriate for their workforce, operations, and legal obligations. To the extent commenters assert that such practices help sponsors demonstrate compliance with applicable civil-rights laws or reduce litigation risk, sponsors remain free to retain those practices under this final rule.

1. Assertions Made About Reduced EEO Protections

Comments: A commenter expressed concern that the practical effect of rolling back comprehensive EEO protections could be to limit remedies to address discrimination in apprenticeship programs. This commenter stated that the proposed rule incorrectly asserts that ''the protected characteristics contained in § 30.3(a) of the current part 30 are duplicative of the nondiscrimination requirements contained in a number of Federal civil rights statutes.'' The commenter argued that, consequently, the proposed rule fails to account for potential harms to apprentices, as well as resultant limitations to DOL's authority to remedy discrimination in apprenticeship programs because of this change. The commenter stated that ''by eliminating the longstanding prohibition on discrimination against apprentices based on certain protected characteristics . . . and instead aligning the regulation with existing civil rights laws applicable in the private sector, the Proposed Rule adopts the small employer carveouts of these civil rights laws.'' The commenter asserted this would limit the coverage of nondiscrimination requirements and

eliminate the authority of the Department to take enforcement action against small employer sponsors who engage in discrimination.

A commenter opined that, contrary to the Department's assertion in the NPRM, the current part 30 regulations do not duplicate Title VII, and instead go well beyond Title VII in providing substantive protections from discrimination and mechanisms for preventing discrimination. Specifically, unlike 29 CFR part 30, this commenter asserted that Title VII likely does not apply to all program sponsors, or to all of the apprenticeship activities of sponsors. The commenter noted that Title VII applies to employment discrimination by ''employers, labor unions, and joint labor-management committees controlling apprenticeship or other training or retraining, including on-the-job training programs,'' and makes it unlawful for such entities ''to discriminate against any individual because of his race, color, religion, sex, or national origin in admission to, or employment in, any program established to provide apprenticeship or other training.'' In contrast, the commenter said 29 CFR part 30 applies to ''sponsors of apprenticeship programs registered with either DOL or a recognized SAA.'' The commenter noted that sponsors are responsible for not only for overseeing admission to and employment in training programs, but also a wide range of other activities, and it is unclear whether Title VII would cover the full scope of activities that sponsors engage in. Another commenter expressed concern that removing these EEO requirements would make it difficult for programs to demonstrate compliance with civil rights laws and protect themselves from legal risk.

Department Response: In response to some commenters' concerns surrounding protected characteristics, the Department notes that covered apprentices are protected from discrimination on the bases of all the same protected characteristics as under existing § 30.3(a) through the following Federal statutes or precedent set by Supreme Court cases interpreting them: Title VII of the Act, the ADEA, the ADA, and the Genetic Information Nondiscrimination Act of 2008.

In response to concerns raised by certain commenters about the statutory thresholds excluding small employers from coverage under Title VII and other Federal nondiscrimination laws, the Department notes that Congress purposefully excluded small employers from these statutory nondiscrimination requirements. The application of nondiscrimination requirements to private employers is fundamentally a matter of legislative judgment. In statutes ranging from Title VII to the ADA and ADEA, Congress made explicit policy determinations regarding which employers should be subject to Federal nondiscrimination requirements and which should be exempt. Congress repeatedly chose not to extend those statutory obligations to certain smaller employers, reflecting a legislative balancing of the benefits of nondiscrimination regulation against the burdens such requirements impose on small businesses.

The Department declines to exercise its authority under the NAA in a manner that effectively subjects small employers to regulatory obligations that Congress expressly determined should not apply to them. The Department believes that the better exercise of its authority is to respect the coverage determinations embodied in Federal civil-rights statutes and to align apprenticeship requirements with the scope of those statutes rather than creating a separate apprenticeship-specific regime that expands their reach to small employers. Congress remains free to revise the coverage thresholds contained in those laws should it determine that broader coverage is warranted.

Moreover, the alignment of part 30 with the employee size-based exclusions contained in existing Federal nondiscrimination laws or relevant State nondiscrimination laws will reduce administrative burdens on certain program sponsors—particularly small- and medium-sized enterprises—that could inhibit the accelerated establishment and expansion of programs. As certain small entities that sponsor apprenticeship programs have been excluded from coverage by applicable Federal nondiscrimination laws such as Title VII, the Department should refrain from extending apprentice nondiscrimination protections on a broader basis than Congress expressly authorized under those statutes.

The Department defers to the EEOC or other relevant enforcement agencies in determining which employment practices of sponsors are covered under the various civil rights statutes. The Department notes, however, that courts have interpreted Title VII's training program provision at section 703(d) to cover more than mere ''admission to'' such programs, contrary to the commenter's assertion. *See, e.g., Langford* v. *Int'l Union of Operating Eng'rs, Loc. 30,* 765 F. Supp. 2d 486, 499 n.6 (S.D.N.Y. 2011) (acknowledging that section 703(d) of Title VII provides a valid basis for a hostile work environment claim); *Herrera* v. *Int'l Brotherhood of Electrical Workers, Local No. 68,* 228 F. Supp. 2d 1233, 1242 (D.Colo. 2002) (stating that ''[t]he plain language of [section 703(d)] prohibits sex discrimination against an individual who is 'employed in' an apprenticeship training program'' and citing to 29 CFR 30.1 as providing similar protections).

The Department maintains that, under the final rule, the Department retains the authority to deregister an apprenticeship program in instances where there has been a finding of discrimination by a governmental agency or a court made pursuant to applicable statutory standards. In response to those commenters that expressed concern about the Department losing authority to issue individual remedies under the final rule, the Department notes that the existing part 30 does not offer individualized remedies for apprentices who suffer employment discrimination based upon their race, sex, or ethnicity, but only provides for the issuance of program-level sanctions such as deregistration. Under existing part 30, individual apprentices seeking make-whole remedies are free to pursue rights of action under other statutes such as Title VII. With respect to the steps that existing part 30 prescribes to prevent discrimination, the Department acknowledges that these steps are not required under Title VII. Removing these excessive requirements is, again, in line with the goals of this Administration and with Congressional intent in enacting Title VII. Sponsors are, however, encouraged to continue adopting any lawful preventative measures that they find effective. The Department will simply not dictate the specific measures a program must take to do so.

2. Alternative Approaches and Questions About the Proposed Changes

Comments: A commenter asked if, under the proposed rule, existing programs in SAA States would be permitted to continue using their current processes and procedures, as long as they are in compliance with applicable Federal and State nondiscrimination laws. Another commenter raised a question regarding whether, in those instances where a program operating in an SAA State experiences an increase in diversity in race or sex demographics, such a program would be considered out of compliance, or presumed to be out of compliance, with the proposed rule.

A commenter recommended establishing a simplified set of

requirements in the final rule to preserve accountability while reducing compliance complexity. The commenter recommended requiring sponsors to inform apprentices of their rights in writing, and requiring sponsors to affirm, in writing, that they will follow all relevant Federal and State nondiscrimination laws. The commenter also recommended that sponsors conduct universal outreach and employ facially neutral selection procedures to the extent possible. The commenter further recommended that the Department take certain actions to clarify compliance requirements, including integrating a review of nondiscrimination compliance into a sponsor's basic program oversight, and clarifying that youth apprenticeship programs do not violate nondiscrimination laws.

Another commenter recommended that the Department continue to consider measures to lower administrative burdens and provide incentives to participate in apprenticeship, including creating a system that promotes flexible program models that contain the most essential components of apprenticeship, and incentivizing organizations, like local industry associations, to serve as intermediaries. The commenter also recommended expanding financial incentives, such as apprentice wage reimbursement, and allowing more efficient and effective delivery of programming, including by removing the apprenticeable occupations framework.

Department Response: In response to questions posed by a commenter, and as described in § 30.5 of this final rule, a Registered Apprenticeship program only will be deregistered if there is a final determination made by an enforcement entity or court that the program has violated an applicable nondiscrimination law and the Registration Agency determines that a compliance action plan is not being implemented in accordance with the remedy prescribed by the enforcement entity or court. Accordingly, programs will not be deregistered for continuing to conduct their current activities or if their program experiences increased diversity so long as the program has not violated any applicable Federal or State nondiscrimination laws.

With respect to the commenter that suggested the inclusion of a provision in this final rule that a sponsor affirm in writing that they are in compliance with all applicable Federal and State employment nondiscrimination laws and will utilize facially neutral selection procedures, the Department takes the position that such written affirmations are unnecessary and would not necessarily enhance program accountability, as such obligations are already mandated under applicable Federal nondiscrimination laws. Nothing in this final rule prohibits sponsors from voluntarily providing written notices regarding apprentice rights, obtaining written acknowledgments or certifications from program participants, or adopting other compliance measures that sponsors determine are appropriate for their operations. Although the Department declines to mandate such practices through part 30, sponsors remain free to maintain them if they believe they assist with compliance, workforce management, apprentice retention, or risk mitigation.

Similarly, this commenter's recommendation that sponsors inform apprentices of their part 30 rights in writing is redundant, as employers with 15 or more employees that sponsor Registered Apprenticeship programs are already obligated to post a notice describing the Federal laws prohibiting job discrimination based on race, color, sex, national origin, religion, age (40 and older), equal pay, disability or genetic information, and retaliation. Title VII of the Act imposes a monetary penalty for covered employers who fail to post these notices. The ''Know Your Rights: Workplace Discrimination is Illegal'' poster, prepared by the EEOC, summarizes these laws and explains how employees or applicants can file a complaint if they believe that they have experienced discrimination.

The Department also declines to adopt this commenter's suggestion that the part 30 regulation should clarify that youth apprenticeship programs do not violate nondiscrimination laws, as such a determination should be made by the EEOC. In response to the other comments summarized above, the Department notes that the thoughtful suggestions advanced by these commenters for taking non-regulatory measures to reduce administrative burdens on program sponsors and to provide financial incentives to apprenticeship stakeholders fall outside of the scope of the part 30 rulemaking initiative; accordingly, as this final rule does not constitute a suitable regulatory or policy vehicle for addressing such suggestions, the Department refrains from providing a response to these commenters.

B. Rescission of Affirmative Action Requirements

1. Affirmative Action Programs (§ 30.4)

In the NPRM, the Department explained that existing § 30.4 required non-exempt sponsors to establish affirmative action programs, document them in a written plan, and implement components specified in §§ 30.4 through 30.9 and 30.11. These compulsory, nonremedial, and ongoing sponsor requirements included conducting demographic utilization analyses, and setting numerical hiring goals and undertaking targeted outreach, recruitment, and retention activities where apprenticeship workforce underutilization based on race, sex, and ethnicity was determined to exist. These sponsor requirements also included annually reviewing personnel processes, as well as disability-related obligations, such as tracking progress toward an OA established utilization goal and inviting apprenticeship applicants to self-identify as individuals with disabilities. The NPRM articulated the Department's position that, taken together, these affirmative action program requirements across §§ 30.4 through 30.9 and 30.11 are unduly burdensome and legally questionable. In the NPRM, the Department also solicited comments from all interested parties, including Registered Apprenticeship stakeholders, on its proposal to remove the affirmative action requirements from part 30, and invited public input on how the administrative burdens associated with these regulatory mandates affected program operations or decisions to participate in Registered Apprenticeship.

After due consideration of the comments discussed below, the Department has determined, as proposed in the NPRM, to rescind the requirements set forth in §§ 30.4 through 30.9 and 30.11 in this final rule.

Comments: A commenter expressed its appreciation for the Department's observation in the NPRM that the current part 30 requirements have limited, rather than promoted, apprenticeship opportunities without corresponding gains in program effectiveness or integrity. The commenter asserted that simplifying sponsors' EEO obligations would better achieve the Secretary of Labor's obligations under the NAA and promote expansion of Registered Apprenticeship programs, which the commenter asserted would expand opportunities for women, minorities, and underrepresented groups to enter and succeed in the construction trades. The commenter specifically supported

rescinding the affirmative action program requirements, which the commenter described as burdensome. The commenter stated that currently, these plans must be updated annually, even when there are no material changes in workforce composition or recruitment practices, and that sponsors must maintain detailed records related to these affirmative action programs because they are subject to records requests and audits. Another commenter reiterated its previous objections (expressed at the time of the 2016 part 30 rulemaking) to the affirmative action program requirements that were imposed on small programs under § 30.4, and generally supported eliminating such requirements. In particular, the commenter asserted that affirmative action program requirements were difficult for nonunion program sponsors to implement.

Another commenter critiqued the existing part 30 regulation's affirmative action requirements, stating such requirements are based on the fundamentally flawed and abstract premise that any demographic disparities in a sponsor's or employer's workforce constitute *per se* discrimination. This commenter argued that there could be nondiscriminatory reasons why the demographic makeup of a given workforce may not mirror the demographic makeup of the local labor market, and that disparities alone without evidence of actual disparate treatment should not be used as a proxy for unlawful discrimination. The commenter further asserted that the part 30 regulation simultaneously prohibits discrimination while incentivizing and inducing disparate treatment of applicants through utilization analysis, utilization goals, and targeted outreach. According to the commenter, such disparate treatment is not supported by the text of neither the NAA nor Federal nondiscrimination laws, and that in *Ames,* the Supreme Court unanimously held that ''the standard for proving disparate treatment under Title VII does not vary based on whether or not the plaintiff is a member of a majority group.''

Another commenter expressed their support for the Department's proposal, stating that the affirmative action program provisions contained in part 30 and the related emphasis on achieving particular demographic results are ''in tension with the 1963 prohibition on discrimination.'' The commenter argued that the emphasis on ''numbers for their own sake'' in the development of apprenticeship affirmative action programs encourages employers to focus on tailoring their hiring practices to achieve the numerical goals mandated by the part 30 regulation, rather than on identifying and eliminating actual discrimination.

However, the Department also received some comments opposing the proposed rescission of the affirmative action provisions contained in part 30. A commenter maintained that the nondiscrimination protections contained in Title VII are not an adequate substitute for the affirmative action measures required by part 30, and supported the Department's prior analysis (contained in the preamble to the 2016 version of the part 30 final rule) that such measures are necessary because of the ''residual impact of longstanding discrimination.'' The commenter asserted that such active measures can be successful, as illustrated by another statement from the Department in the preamble to the 2016 part 30 final rule that ''women do participate and succeed in apprenticeship programs at higher levels when provided equal opportunity and support.'' The commenter discussed a survey which, according to the commenter, illustrates that diversity goals are key contributors to tradeswomen's success in their occupations. The commenter concluded that the Department could make these active requirements less burdensome without eliminating them entirely.

Similarly, another commenter cited surveys showing that only a small percentage of apprentices and females working in manufacturing trades were directed toward their career by a school counselor or an American Job Center. The commenter concluded that in the absence of systematic outreach, many women may miss out on the opportunities presented by apprenticeships in high-paying fields, and employers would lose out because they only would access a very incomplete talent pool.

A commenter criticized the Department's assertion in the NPRM that the current regulation ''has not demonstrated clear benefits in terms of improved protections against unlawful discrimination for apprentices.'' This commenter maintained that the outreach and affirmative action tools and mandates contained in part 30 have added value for program sponsors seeking new talent. The commenter said that 36.5 percent of States identify the ''challenge of recruiting qualified applicants'' as a barrier to apprenticeship expansion. The commenter added that firms have indicated that some of the best practices for meeting labor shortages include setting realistic goals for inclusion and diversity, regularly evaluating the status of those goals, and adjusting appropriately to meet them, arguing that these are all tenets of affirmative action plans. The commenter also provided examples of successful efforts to expand diversity in apprenticeships, including a program in Massachusetts where the proportion of women in construction apprenticeships grew by over 200 percent across a 5-year period thanks to partnerships among job training providers, firms, developers, community organizations, and local government. The commenter further asserted that affirmative action practices can be valuable to new apprenticeship industries, citing that 90 percent of hiring managers in information technologies consistently report difficulties in finding and hiring talent, and 83 percent report that this worker shortage is slowing company revenue growth.

Department Response: After considering these comments, the Department remains convinced that the affirmative action requirements contained in the existing part 30 regulation effectively undermined genuine equality of opportunity for apprentices and candidates for apprenticeship, imposed excessive administrative burdens on program sponsors, and may effectively induce such program sponsors to engage in discriminatory and illegal employment practices. The existing part 30 regulation requires outreach initiatives and incentivizes hiring decisions based not upon the merits or qualifications of individual candidates, but rather upon a candidate's race, sex, and ethnicity. By abandoning this divisive and pernicious framework in this final rule, the Department is seeking to maximize apprenticeship opportunities for qualified individuals from all backgrounds, irrespective of a person's race, sex, ethnicity, national origin, disability status, or religion.

The Department also asserts that this final rule will ease the administrative burden on sponsors generally, and particularly on those smaller sponsors that have five or more apprentices but that may not possess the resources or personnel needed to conduct the complex workforce demographic analyses required under the current part 30. Similarly, the Department acknowledges one commenter's assertion that these requirements posed particular implementation challenges for non-joint group programs that do not exert close control over the hiring process for employers participating in the program. (See *Associated Builders & Contractors, Inc. Baltimore Metro.*

Chapter v. *O'Connor,* 75 F. Supp. 2d 440, 441 n.3 (D. Md. 1999) (''[N]onjoint' refers to apprenticeship programs without any participation by labor interests.'')). The Department asserts that all programs will benefit from the removal of these burdensome affirmative action requirements and this final rule's emphasis on alignment with existing, congressionally enacted nondiscrimination law.

To the extent certain outreach efforts have been helpful to sponsors, sponsors may continue to engage in such efforts as part of a broad, nondiscriminatory outreach program to all qualified individuals (regardless of their race, sex, or ethnicity). Eliminating specific, inflexible targeted outreach requirements that go beyond complying with nondiscrimination law, and that focused on recruiting from only a limited, ''underutilized'' applicant pool, will reduce burdens on sponsors by enabling them to conduct outreach and recruitment in whatever lawful way they deem makes the most sense for their program. The Department is simply rescinding the one-size-fits-all approach that was imposed upon sponsors in the 2016 version of the part 30 rule. Additionally, eliminating the requirement for covered sponsors to maintain race-, sex-, and ethnicity-based affirmative action programs removes unlawful pressure on sponsors to recruit and hire apprentices from specific demographic groups, and also eliminates potential confusion and conflict with operating under various State law interpretations of nondiscrimination requirements. *See, e.g.,* Tex. Att'y Gen. Op. No. KP–0505 (2026) (re: ''Diversity, Equity, and Inclusion'' in Texas); Op. Att'y Gen. Fla.2026–02 (2026) (''Attorney General Opinion: State Laws Requiring Racial Discrimination are Unconstitutional'').

In summary, the Department encourages program sponsors to promote genuine equality of opportunity for all apprentices and applicants for apprenticeship in any lawful manner and, under this final rule, will hold accountable those programs found to have engaged in unlawful discrimination.

2. Utilization Analysis for Race, Sex, and Ethnicity (§ 30.5) and Establishment of Utilization Goals for Race, Sex, and Ethnicity (§ 30.6)

Existing § 30.5 requires those sponsors maintaining affirmative action programs to evaluate and analyze the demographic composition of their apprenticeship workforce by race, sex, and ethnicity, and to compare the representation of those groups in their workforce with the availability of those populations within the sponsor's relevant recruitment area. After conducting this analysis, if the sponsor determines that the representation of women, Hispanics or Latinos, or a specific racial minority group in their apprenticeship workforce is significantly lower than what would be reasonably anticipated, the sponsor is obligated to establish a utilization goal for the underrepresented group in accordance with § 30.6. Pursuant to § 30.6, that utilization goal must be ''at least equal to the availability'' of the underutilized group in the relevant recruitment area.

As previously discussed, the Department remains convinced that the foregoing part 30 provisions, which have required programs to analyze and to calibrate the racial, sex, and ethnic composition of their apprenticeship workforces, effectively conflict with the express Congressional prohibition on the mandatory conduct of such utilization analyses contained in section 703(j) of the Act, and also confront the sponsors of apprenticeship programs with insoluble practical and legal dilemmas. Despite the admonitory language at § 30.6(d)(2) of the part 30 regulation stipulating that the establishment of utilization goals ''may not provide a sponsor with a justification to extend a preference to any individual, select an individual, or adversely affect an individual's status as an apprentice, on the basis of that person's race, sex, or ethnicity,'' the regulation's compulsory imposition of such goal-setting upon certain sponsors may nevertheless induce those sponsors to engage in unlawful race- and sex-based apprenticeship hiring decisions in order to avoid the prospect of adverse administrative actions or sanctions by the Department (including program deregistration). As discussed earlier in the preamble, the contradictory and incoherent regulatory mandates in part 30 that simultaneously impose nondiscrimination and affirmative action requirements upon Registered Apprenticeship programs are plainly irreconcilable, contravene the fundamental policy objectives expressed in landmark Federal employment nondiscrimination statutes enacted by Congress (such as Title VII), and effectively induce sponsors to engage in impermissible group-based discrimination in the hiring and employment of apprentices based upon their race, sex, and ethnicity.

From a constitutional standpoint, the Supreme Court's recent decision in *SFFA* makes clear that race-based selection decisions would be subject to exacting scrutiny; a system of apprenticeship that codifies and incentivizes such improper preferences would likely not withstand legal scrutiny. The relevant inquiry is whether the regulatory scheme encourages, induces, or effectively requires employment decisions because of race. *See Anderson* v. *Martin,* 375 U.S. 399, 402 (1964). Where such pressure exists, courts treat the regulatory framework itself as a racial classification subject to strict scrutiny. *Lutheran Church,* 141 F.3d at 352–53; *MD/DC/DE Broadcasters Ass'n,* 236 F.3d at 19–20. And that is precisely what the regulatory framework does. Similarly, while intermediate scrutiny is less demanding than strict scrutiny, the Department also concludes that the sex-based affirmative action requirements of the existing part 30 raise serious constitutional concerns and are unlikely to survive constitutional scrutiny.

Additionally, the Supreme Court's recent decisions in *Ames* v. *Ohio,* 605 U.S. 303 (2025), and *Muldrow* v. *St. Louis,* 601 U.S. 346 (2024) increase the likelihood that such affirmative action policies could be challenged by clarifying that the standard for proving disparate treatment under Title VII does not vary based on whether or not the plaintiff is a member of a majority group and that plaintiffs need only demonstrate that they suffered ''some harm'' in relation to an allegation of unlawful discrimination in employment (such as being adversely impacted by an employer's affirmative action policy).

After due consideration of the comments received concerning these part 30 provisions, as well as the administrative burden and legal vulnerability concerns identified above, the Department has decided to rescind, in this final rule, the foregoing part 30 affirmative action-related provisions that required sponsors to conduct a utilization analysis that takes into account the race, sex, and ethnicity of the apprentices enrolled in their programs, and to set utilization goals to address and rectify any group-based demographic imbalances revealed by such an analysis.

Comments: Several commenters expressed support for the Department's proposal to rescind the requirement that sponsors with five or more apprentices conduct utilization analyses of their apprenticeship workforces. One commenter stated that their organization's members characterized these utilization analysis requirements as ''confusing,'' ''very expensive,'' and ''onerous.'' Another commenter stated that the Department's proposed revision of part 30 would appropriately

eliminate the mandate for program sponsors to adopt separate affirmative action programs in favor of aligning compliance requirements with existing Federal and State laws prohibiting discrimination. This commenter reasoned that by focusing on compliance with established nondiscrimination laws, the proposed revisions eliminate costly and duplicative requirements. The commenter added that sponsors would be able to apply existing equal employment frameworks—already in place for their broader workforce—to apprenticeship programs. The commenter concluded that this would lead to an increase in sponsorship opportunities.

However, several other commenters expressed their opposition to the Department's proposed rescission of the utilization analysis requirement. One commenter claimed that eliminating the utilization analyses would make it more difficult for sponsors to identify disparities in their workforces and determine if they are complying with nondiscrimination law. The commenter maintained that the § 30.5 analysis should be retained to help sponsors avoid litigation risks because it is a proactive version of the burden of proof required by the courts in disparate impact cases; the commenter conceded, however, that part 30's utilization analysis does not require sponsors to identify the cause of any disparity as would be required in a disparate impact case. Finally, this commenter opined that existing legal remedies under nondiscrimination law ''are merely reactionary to incidents of discrimination'' and therefore a framework of ''proactive'' affirmative action policies, such as those outlined in §§ 30.5 through 30.10 of the 2016 part 30 regulation, are necessary to sustain ''the increased diversity of the apprenticeship workforce.''

A commenter stated that, in the NPRM, the Department misconstrued the utilization analysis provision, arguing that it is only intended to establish a benchmark to determine whether barriers to equal opportunity may exist, not to establish discrimination. The commenter added that a sponsor's determination that a utilization goal is required does not constitute a finding or admission of discrimination, and that the current regulation is carefully tailored to ensure that the availability analysis excludes nondiscriminatory factors that may explain differences between the two. The commenter further noted that sponsors are only required to establish goals when there is a ''significant disparity'' in a ''Major Occupation'' and that only 25 percent of programs are large enough to be subject to the utilization goal-setting requirement.

A group of commenters similarly stated that the Department's proposal to rescind the existing utilization goals for race, sex, and ethnicity is problematic because the proposed rule rests largely on speculation that the program provisions ''may induce'' or ''incentivize'' sponsors to engage in illegal race- or sex-based decision-making in selection decisions, even though making selection decisions based on race and sex violates existing regulations.

Department Response: The Department agrees with the comment describing the utilization analyses as confusing and onerous. Indeed, in the 2016 final rule, the Department received some comments from sponsors expressing confusion over how to complete the analyses. In response, the Department committed to working ''closely with each sponsor at its regular compliance reviews to develop and conduct an availability analysis and to set or reassess utilization goals for race, sex, and ethnicity, if necessary.'' 81 FR 92057 (Dec. 19, 2016). The Department has determined that conducting these analyses has been overly time-consuming for both sponsors and Registration Agency staff and therefore it will now devote its limited resources to more effective solutions. Maintaining §§ 30.5 and 30.6 without devoting substantial staff support only would increase the burden on sponsors in completing the analyses—a burden that the Department concludes is no longer justified or supportable.

In response to the commenter expressing concern that sponsors will not have the ability to monitor their compliance with nondiscrimination laws in the absence of the current requirements of § 30.5, the Department echoes the point made by another commenter that the utilization analyses were never intended to serve as indicators of unlawful discrimination. In fact, § 30.6(b) made clear that ''[a] sponsor's determination under § 30.5 that a utilization goal is required constitutes neither a finding nor an admission of discrimination.'' The Department therefore rejects the commenter's contention that ''[i]t is exactly the means to prove such a claim of discrimination that the Proposed Rule seeks to end.''

While the goal-setting process required by current § 30.6 and a claim of disparate-impact discrimination both rely on statistical disparities, the analyses are not identical and cannot be used interchangeably. A determination as to whether discrimination exists requires an examination of personnel activity data such as hires, promotions, or terminations, and an analysis of the affected selection process, qualification requirements, positions at issue and the reasons for the sponsor's actions. Thus, the requirement that sponsors then set a race-, ethnicity-, or sex-based utilization goal is unrelated to the detection of discrimination. Furthermore, the Department never looked to the utilization analyses in assessing whether a sponsor had engaged in unlawful discrimination or harassment. Finally, such quota-like measures are illegal under section 703(a) of Title VII.[39]

However, sponsors are encouraged to continue taking any legal steps that they find helpful in assessing their programs to prevent unlawful discrimination. And, pursuant to proposed § 30.5, the Department will continue to have the authority to deregister programs for conducting illegal discrimination against apprentices, as determined by a relevant court or agency, and thereby safeguard the welfare of apprentices in Registered Apprenticeship programs. The Department maintains that, by eliminating confusing requirements regarding utilization analyses, Registered Apprenticeship will grow and create more opportunities for all workers.

In response to this commenter's concern that the remedies available to apprentices under current Federal civil rights statutes are essentially ''reactive'' and do not address workplace cultures that create ''barriers to entry'' for apprentices from certain groups, the Department again notes that these civil rights statutes provide apprentices with additional potential remedies, such as forms of individualized relief that are not available under part 30. As one commenter noted, only about 25 percent of sponsors are currently required to comply with the current affirmative action program provisions, thereby limiting any utility claimed by the commenters. Furthermore, sponsors may choose to employ lawful, race-neutral proactive means to remove barriers to entry in their programs, rather a compulsory, nonremedial regulatory regime of hiring preferences.

Comments on the Impact on Women and Underrepresented Groups in Apprenticeships

Comments: A commenter expressed concern that the proposed removal of utilization goals for race, sex, and

[39] 42 U.S.C. 2000e–2(a).

ethnicity in certain apprenticeship programs would have devastating consequences on women's participation in apprenticeships, particularly in higher paying fields where women are a small minority of apprentices. Another commenter asserted that eliminating these regulatory provisions could hinder individuals from certain underrepresented groups from gaining access to apprenticeship opportunities on an equal basis.

A commenter expressed opposition to the Department's proposed removal of utilization goals for race, sex, and ethnicity in apprenticeship programs. This commenter asserted that, because such goals are not quotas but rather benchmarks for measuring representation, they help sponsors to identify existing workforce gaps and disparities, and also help sponsors assess next steps to correct them. The commenter further asserted that eliminating these goals would undermine data-driven equity efforts and hinder progress for underrepresented groups in apprenticeship.

Department Response: The Department completely rejects the notion advanced by these commenters that the rescission of the provisions of the 2016 version of the part 30 regulation that mandated that certain program sponsors adopt preferential utilization goals based upon the race, sex, and ethnicity of apprentices will hinder individuals from these groups ''from accessing opportunities on an equal basis.'' The Department reiterates that this final rule's removal of the pernicious, group-based demographic analyses and affirmative action mandates that were contained in the previous version of part 30 is intended to reaffirm that *all* employment discrimination against apprentices based upon their race, color, religion, sex, or national origin is illegal, and that the use of group-based preferences to promote ''equity efforts'' for select populations is legally questionable and completely contrary to the policy thrust of Title VII. The Department also challenges the assertion made by one of these commenters that the rescission of these utilization goals would result in ''devastating consequences on women's participation in apprenticeships, particularly in higher paying fields where women are a small minority of apprentices.'' The Department fundamentally rejects the abstract and invidious notion that group-based outcomes, rather than demonstrated individual merit, should influence or determine whether a person should be admitted to a Registered Apprenticeship program.

Costs Associated With Rescinding Utilization Analysis and Goals for Race, Sex, and Ethnicity

Comments: A commenter opined that rescinding the utilization analysis requirements under § 30.5 would render the Department incapable of reviewing the rule's efficacy with respect to claims of harassment and discrimination. The commenter questioned how the Department would know if its claims of more effective relief for victims would come to fruition without tracking demographic data. The commenter stated that by failing to offer any solution to collect relevant demographic data or enforcement outcomes, the Department is skirting its responsibility to ensure the welfare of apprentices as mandated by Congress.

Department Response: The Department disagrees with this commenter's assertion that the final rule's removal of the demographic data collection requirements contained in the 2016 version of the part 30 regulation will harm the welfare of apprentices. If an individual apprentice believes that they have been harmed by an employer's or program sponsor's discriminatory or harassing conduct, that person may still have recourse under Title VII and other Federal and State nondiscrimination laws to file a complaint with the EEOC or a State's FEPA. As noted earlier in this preamble, 29 CFR part 30 has never provided individualized, make-whole remedies to apprentices or applicants who have been injured by such illegal conduct, while Title VII and other employment nondiscrimination laws do provide such potential individual relief. Contrary to the commenter's assertion, the Department maintains that the removal of these burdensome and cumbersome demographic data collection requirements—requirements that were imposed on sponsors primarily to support the onerous group-based preferences and affirmative action mandates contained in the 2016 version of part 30—will serve to accelerate apprenticeship growth and will enhance the welfare of apprentices by promoting the hiring of apprentices solely on the basis of individual merit. The Department also wishes to note that, pursuant to a technical amendment to 29 CFR 29.7(l) made by this final rule with respect to the required content of apprenticeship agreements, the Department will nevertheless retain the right to request demographic data regarding individual apprentices.

Alternative Approaches

Comments: A commenter stated that while the revision and elimination of numerical goals and requirements may simplify the registration process for new and existing program sponsors, the Department should replace these eliminated regulations with a focus on and investment in activities that support veterans, individuals with disabilities, and discouraged workers in accessing Registered Apprenticeship programs.

This commenter argued these requirements help programs reach diverse candidates, especially as apprenticeships expand beyond traditionally White and male-dominated trades. The commenter suggested an alternative approach that would maintain workforce analysis requirements without specific targets, which would help modernize the apprenticeship system while ensuring diverse representation.

Department Response: The Department notes that nothing in §§ 30.5 and 30.6 specifically addressed the employment of veterans or discouraged workers. Sponsors will remain free to engage in any lawful recruitment and retention efforts focused on these groups, particularly as targeted outreach to veterans and workers with disabilities does not raise the same legal concerns as doing so on the basis of race, ethnicity, or sex. And, as stated above, removing only the goals themselves, while still requiring a race-, ethnicity-, and sex-based utilization analysis would not fully address the Equal Protection concerns identified by the Department.

No alternative option would satisfy the Department's goals of aligning the regulations with recent court decisions regarding affirmative action if the regulation continued to improperly require that sponsors take race, sex, and ethnicity into account in evaluating their program's employment processes. Additionally, removing only the requirement to set goals themselves, while still requiring the collection of demographic data, the review of personnel processes, targeted outreach, and the invitation to identify as an individual with a disability would do very little to address the associated burden identified by several commenters.

3. Utilization Goals for Individuals With Disabilities (§ 30.7) and Invitation To Self-Identify as an Individual With a Disability (§ 30.11)

As emphasized throughout this final rule preamble, the Department contends that the central goal of a program

sponsor's hiring process should be to attract, admit, and retain those individuals—regardless of their group identity—who possess the right mix of the relevant skills and capabilities that are required for the successful completion of an apprenticeship program. Accordingly, ensuring that all qualified candidates, including people with disabilities, are eligible for consideration in the hiring and promotion process on an equal, nondiscriminatory basis is critically important to realizing this goal. Similarly, in keeping with the workplace protections for individuals with disabilities that were enacted by Congress in the ADA, the Department is committed to facilitating the hiring and retention of skilled and capable workers through the provision of effective job accommodation for apprentices and other employees with disabilities. While this final rule rescinds the burdensome and problematic regulatory mandates imposed on program sponsors by §§ 30.7 and 30.11 of existing part 30, the Department nevertheless continues to encourage program sponsors to establish supportive workplace policies and practices for individuals with disabilities. The voluntary implementation of such initiatives on behalf of these workers can be instrumental in advancing the broader goal of ensuring genuine equality of opportunity for all qualified individuals who seek to participate in the American workforce.

In the NPRM, the Department noted that the current regulation, at § 30.7, requires sponsors to conduct a utilization analysis of the participation of individuals with disabilities in their program, and establishes a specific utilization goal of 7% that sponsors must aim to achieve. Under the current regulation, if the share of apprentices with disabilities in a program are found to be below this threshold, sponsors are required to identify barriers to equal opportunity and to implement targeted measures to mitigate such barriers. The Department proposed eliminating this requirement in the NPRM, as well as the requirement that sponsors invite apprentices (or applicants for apprenticeship) to self-identify as having a disability. The Department maintained that these obligations were burdensome, and that sponsors faced practical and legal challenges in meeting these requirements.

The Department also noted in the NPRM that sponsors with 15 or more employees are already subject to title I of ADA, which affords important protections against discrimination to individuals with disabilities. The apprenticeship-specific nondiscrimination requirements in part 30, including the 7% utilization goal for sponsors, do not afford apprentices with meaningful access to remedies for alleged workplace discrimination. Instead, this goal requires sponsors to consider factors other than merit and qualifications in making decisions about outreach, recruitment, and hiring for their program. Therefore, the Department proposed eliminating the requirement to conduct a disability-focused utilization analysis and the regulation's specific 7% utilization goal, in line with the Department's broader objectives to emphasize merit-based hiring and expand employment and training opportunities for all American workers, including individuals with disabilities.

The Department also proposed rescinding § 30.11, which requires sponsors maintaining an affirmative action program to invite applicants and current apprentices to self-identify as an individual with a disability. In the NPRM, the Department asserted that this requirement creates confusion among sponsors and other apprenticeship stakeholders, and that the requirement has resulted in a high level of administrative burden for program sponsors. Additionally, the Department maintained that compliance with this requirement presents practical and legal challenges for program sponsors, who must protect apprentice confidentiality and privacy while simultaneously taking actions to meet a specific 7 percent utilization goal for individuals with disabilities. Sponsors' invitations to applicants and apprentices to disclose disabilities under § 30.11 constitute ''inquiries'' prohibited by section 102(d)(2)(A) and (d)(4)(A) of the ADA.[40]

Accordingly, for the reasons discussed in the NPRM and in response to the comments summarized below, the Department is finalizing the rescission of these disability-related provisions in this final rule.

Comments Regarding the Proposals To Remove the 7-Percent Utilization Goal for People With Disabilities and the Disability Self-Identification Requirement

Comments: A commenter supported the rescission of the 7 percent utilization goal for individuals with disabilities. One commenter opined that they supported the removal of the 7 percent utilization goal for qualified individuals with disabilities and the ''voluntary self-identification'' as it was an onerous and arbitrary requirement. Another commenter stated that utilization goals require knowledge of a protected disability, which is presumably why there is an invitation to self-identify as an individual with a disability. However, the commenter asserted that the ADA prohibits disability-related inquiries prior to employment and after employment if not job-related and consistent with business necessity. The commenter argued that the ADA does not give the Department authority to create exceptions to the ADA's statutory requirements via regulations.

However, several commenters expressed opposition to the Department's proposed rescission of both the 7 percent disability goal and the requirement that all current apprentices (as well as individuals who have been approved for admission to a Registered Apprenticeship program) be provided with an opportunity to confidentially disclose to the program that they have a disability. One commenter said that individuals with disabilities are an underrepresented population that are underemployed and represent an underutilized talent pool. Another commenter cited Registered Apprenticeship Partners Information Data System (RAPIDS) data to justify that these current regulatory requirements are still necessary, noting that only 1.1 percent of participants in Registered Apprenticeship programs reported having a disability, and these participants were more likely to be in nonunion apprenticeships. This commenter added that individuals with disabilities are less likely to have work experience, a college degree, or the means to afford postsecondary career training.

Several commenters opposed removing the disability utilization analysis, stating that these requirements help sponsors identify, assess, and eliminate existing workforce gaps and encourage businesses to look at all types of talent for apprenticeships. Specifically, one commenter maintained that the existing rule has been effective at increasing apprentices with disabilities, as the number of apprentices self-identifying as having disabilities has tripled in the last 5 years (2019–2024).

A commenter also asserted that eliminating these utilization goals for individuals with disabilities would undermine data-driven equity efforts and hinder progress for underrepresented groups. One commenter expressed concern that rescinding this requirement would undermine decades of established

[40] 42 U.S.C. 12112(d)(2)(A) and (d)(4)(A).

practice and deprive Registered Apprenticeship programs of critical information necessary to assess the inclusivity of their recruitment and hiring efforts. Several commenters worried removing these requirements could result in heightened inequality, making it more difficult for affected individuals to access the same employment opportunities and exacerbating existing disparities.

Some commenters also asserted that there was no legal or factual basis for eliminating these regulatory provisions. Regarding the 7 percent utilization goal for individuals with disabilities, a commenter noted that the current regulation explicitly prohibits quotas, and asserted that the Department did not provide evidence that program sponsors were imposing quotas to meet this benchmark. One commenter asserted that the utilization goal instead functions as a neutral benchmark allowing sponsors to evaluate whether their recruitment and outreach strategies effectively create equitable opportunities for people with disabilities. A group of commenters asserted that the Supreme Court's decision in *SFFA* has no bearing whatsoever on disability-related affirmative action efforts, which are subject only to rational basis review, citing *Cleburne* v. *Cleburne Living Center, Inc.*

Similarly, several commenters disagreed with the proposition that the disability self-identification requirement in the existing part 30 is burdensome, and asserted that the Department did not provide evidence in support of this claim. For example, one commenter referenced research that the commenter described as showing that employers of apprentices do not perceive the collection of demographic apprenticeship data as a major cost or inhibitor to the growth of apprenticeship programs. Another commenter asserted that if the requirement was onerous there would be limited voluntary compliance for sponsors with fewer than five apprentices—which the commenter said is not true. Specifically, the commenter said that sponsor behavior above and below the threshold is similar, citing RAPIDS data that programs with four apprentices had a 64.7 percent disability status reporting rate compared to 67.8 percent for programs with five apprentices. This commenter concluded that sponsors must view the benefits to their program and apprentices as outweighing any administrative burden, contradicting the Department's characterization of the provision as burdensome.

Additionally, one commenter expressed concern with the proposed rescission of the utilization goal as the requirement implements section 503 of the Rehabilitation Act of 1973, which requires Federal contractors and subcontractors to ''take affirmative action to employ and advance in employment qualified individuals with disabilities.'' [41] The commenter added that in 2014, the Office of Federal Contract Compliance Programs (OFCCP) issued regulations setting a nationwide benchmark for employers to aim for 7 percent employees with disabilities and annual tracking for data collection.

Finally, a commenter expressed opposition to the elimination of requirements that sponsors invite applicants to self-identify as individuals with disabilities, asserting that this allows sponsors to access certain funding streams to grow apprenticeships depending on the population they serve. The commenter suggested that the Department could achieve its goals of reducing unnecessary paperwork while still collecting information on disability by including a self-declaration on apprenticeship intake forms.

Department Response: The Department agrees with the commenters expressing concerns over the administrative burden imposed on programs by the disability utilization analysis, as well as concerns with potential ADA conflicts resulting from the requirement to invite applicants and apprentices to identify as individuals with disabilities.

In response to commenters who discussed the benefits and value of collecting information on individuals with disabilities participation in workforce training programs and pursuing increased representation of such individuals in the workforce, the Department notes that nothing in this final rule prohibits sponsors from exercising their own judgment in making inquiries or proactive efforts to employ qualified individuals with disabilities, so long as any such actions are consistent with the ADA and its implementing regulations. With this final rule, sponsors will no longer be subject to the current part 30 regulation's mandates concerning the collection of information on individuals with disabilities, nor its requirements concerning the employment of individuals with disabilities.

In response to the commenter who suggested changing the nature of the inquiry to a ''declaration,'' the Department is not persuaded that such a recharacterization would eliminate the Department's concerns with improperly requesting disability information under the ADA, which were echoed by other commenters in response to the NPRM. In addition, the Department takes the position that such an adjustment would neither eliminate, nor meaningfully reduce, the administrative burden associated with storing responses to disability inquires in a secure and confidential manner. The Department also agrees with the commenter who suggested that the existing part 30 regulation specifies that the utilization goals should not be construed as rigid quotas.[42] However, the Department has determined that these utilization goal requirements, along with other affirmative program requirements in the existing regulation, have had the practical effect of inducing sponsors to make preferential hiring decisions based on demographic characteristics. Accordingly, the Department has decided to remove the legally questionable affirmative action requirements from the revised part 30 regulation.

The rescission of the disability utilization analysis within part 30 is consistent with the Department's decision to rescind the similar utilization analysis and goal as a form of required affirmative action under the implementing regulations for section 503 of the Rehabilitation Act of 1973. 90 FR 28494 (July 1, 2025). While the utilization goal required by existing § 30.7 was not issued pursuant to section 503, the part 30 disability utilization goal was designed to mirror the one issued by OFCCP under section 503 and the reasons for removing both goals are related. In both cases, the Department contends that the analyses and goals are unnecessarily burdensome, rely on ambiguous statutory authority, create the possibility of conflicts with the ADA, and put pressure on sponsors to use hiring quotas despite regulatory prohibitions on doing so.

The Department recognizes that the disability goal and utilization analysis would not be subject to strict scrutiny review under equal protection principles in the same way that the race- and ethnicity-based utilization goals and Canalyses would be pursuant to *SFFA.* The Department did not rely on *SFFA* in proposing to rescind existing § 30.7. However, the regulatory mandate

[41] 29 U.S.C. 793(a).

[42] The existing part 30 regulation, at § 30.6(d)(1), states that ''Utilization goals may not be rigid and inflexible quotas, which must be met, nor are they to be considered either a ceiling or a floor for the selection of particular groups as apprentices. Quotas are expressly forbidden.''

that sponsors not treat the disability goal as a quota is inherently at odds with the expectation that sponsors undertake good faith efforts to attain a workforce that meets the 7 percent utilization goal. This tension creates confusion among sponsors regarding their obligations with respect to ensuring equal opportunity for individuals with disabilities.

The Department emphasizes that, while it is no longer requiring covered sponsors to conduct these utilization analyses, sponsors remain free to assess their programs and encourage the participation of qualified apprentices with disabilities in any lawful way. As is the case for Federal contractors under section 503, the Department encourages sponsors to continue supporting the employment and advancement of qualified apprentices with disabilities in ways that do not involve the setting of a numerical goal or that depend on the sponsor's knowledge of a particular applicant's or apprentice's disability status.[43]

Legal Interpretation of ADA and Self-Identification

Comments: A commenter stated that asking applicants to voluntarily disclose a disability is not a violation of the ADA's prohibition on disability-related pre-employment inquiries. This commenter opined that the affirmative action requirements in section 503 were in place when the ADA was passed in 1990, although the utilization goal would come later in regulations. The commenter added that implementing an affirmative action plan and reporting on its success required employers to know whether they are hiring individuals with disabilities but did not end either the prohibition on pre-employment inquiries or affirmative action for people with disabilities. The commenter also cited a 2018 EEOC declaration which stated that for more than 20 years it had been recognized that ''the ADA permits affirmative action on behalf of individuals with disabilities, whether legally required or voluntarily undertaken,'' and also reaffirmed enforcement guidance from 1995 on ''Preemployment Disability-Related Questions and Medical Examinations Under the ADA,'' which explained that employers may ask job applicants to voluntarily self-identify as individuals with disabilities for affirmative action purposes under certain conditions. Similarly, another commenter stated that the EEOC has consistently upheld voluntary self-disclosure of disability at the applicant stage as permissible under the ADA.

Another commenter noted that a 2013 letter from the EEOC legal counsel indicated that such inquiries are permissible under the ADA but argued that this letter should not be relied on by DOL. The commenter said that the letter is from a single attorney at the EEOC and does not represent the Commission, does not make a statutory argument, and its conclusion contradicts the best reading of the ADA. The commenter added that, even assuming the ADA is ambiguous, whatever deference the EEOC had to interpret ambiguous provisions of the ADA is gone following *Loper Bright Enterprises* v. *Raimondo,* which directs agencies and courts to determine the best reading of a statute.

Department Response: The Department maintains that requiring covered sponsors to invite applicants and apprentices to self-identify as individuals with disabilities is in tension with the best reading of the ADA's text. With respect to job applicants, section 102(d)(2)(A) of the ADA states that an employer ''shall not . . . make inquiries of a job applicant as to whether such applicant is an individual with a disability.'' [44] But this inquiry is what § 30.11(a)(1) currently requires. (''A sponsor adopting an affirmative action program pursuant to § 30.4 must invite applicants for apprenticeship to inform the sponsor whether the applicant believes that he or she is an individual with a disability as defined in § 30.2.'') Although the disability inquiry requirement is framed as an ''invitation'' for applicants to ''self-identify'' disability status, this is a requirement imposed on the sponsor. And while congressional committee reports may have suggested that the ADA's ban on preemployment inquiries would not apply to data collected for certain affirmative action purposes, *see, e.g., Associated Builders & Contractors* v. *Shiu,* 30 F.Supp.3d 25, 37–38 (D.D.C. 2014), legislative history cannot overcome the statute's plain meaning because ''legislative history is not the law.'' *Epic Sys. Corp.* v. *Lewis,* 584 U.S. 497, 523 (2018). DOL must interpret the statute based on ''what the statute means,'' not ''what the legislature meant.'' *Id.* (quoting *Schwegmann Bros.* v. *Calvert Distillers Corp.,* 341 U.S. 384, 397 (1951) (Jackson, J., concurring)). Therefore, legislative history cannot change what section 102(d)(2)(A) and (B) of the ADA commands: a covered entity ''shall not'' make preemployment ''inquiries'' as to an applicant's disability status, except in only a few situations expressly enumerated in the ADA.[45] *See Milner* v. *Dep't of Navy,* 562 U.S. 562, 574 (2011). (''Legislative history, for those who take it into account, is meant to clear up ambiguity, not create it.'').

With respect to current apprentices/employees, section 102(d)(4)(A) of the ADA states that an employer ''shall not make inquiries of an employee as to whether such employee is an individual with a disability . . . unless such . . . inquiry is shown to be job-related and consistent with business necessity.'' [46] Current § 30.11(c), which requires all covered sponsors to annually remind apprentices that they may voluntarily update their disability status, does not limit this requirement to situations where the sponsor determines that such an inquiry is job-related and consistent with business necessity. Current § 30.11 therefore requires sponsors to make disability inquiries that likely run afoul of the ADA and the rescission of this requirement ensures that part 30 does not compel conduct that the ADA either prohibits or permits only in limited circumstances not reflected in current § 30.11.

As some commenters noted, the EEOC has issued subregulatory guidance indicating that otherwise-prohibited disability-related inquiries are lawful when made in order to benefit individuals with disabilities. Most notably, this guidance has been captured in the 1995 Enforcement Guidance and in the 2013 letter from the EEOC's Office of Legal Counsel. *See* 78 FR 58682, 58691 (Sept. 24, 2013). Upon consideration, DOL concludes that this guidance is inconsistent with the best reading of the statute and will not defer to it.

The Department first notes that it agrees with the commenter regarding the reliability and authority of the 2013 EEOC Office of Legal Counsel Letter in that it does not reflect the views of the entire Commission but only those of single attorney. Second, the substance of the letter is not clearly in line with the statutory text of the ADA. Recent Supreme Court precedent reinforces the need to adhere to the statute's best

[43] In this connection, the Department's Office of Disability Employment Programs (ODEP) offers several resources to help sponsors at *https://www.dol.gov/agencies/odep/program-areas/employers/recruitment-retention*—including the Job Accommodation Network (which is available to provide free, expert and confidential guidance on work placement accommodations and other disability employment matters) at *https://askjan.org/*and other resources on the ODEP website at: *https://www.dol.gov/agencies/odep.*

[44] 42 U.S.C. 12112(d)(2)(A); see also 29 CFR 1630.13(a).

[45] 42 U.S.C. 12112(d)(2)(A) and (B).

[46] 42 U.S.C. 12112(d)(4)(A); see also 29 CFR 1630.13(b).

reading. In *Loper Bright Enterprises* v. *Raimondo,* 603 U.S. 369 (2023), the Court emphasized that '''statutes . . . have a single, best meaning''' that is '''fixed at the time of enactment.''' 603 U.S. at 400 (quoting *Wisconsin Central Ltd.* v. *United States,* 585 U.S. 274, 284 (2018)). Applying that principle here, the Department concludes that the best reading of section 102(d)(2)(A) of the ADA [47] is that employers may not make disability-related inquiries of job applicants prior to an offer of employment, regardless of the employer's intent or the framing of the question.

Although sponsors are required to keep disability disclosures confidential and not use them in employment decisions, confidentiality requirements do not eliminate the practical pressures or risk of distress that individuals may experience when presented with an employer-initiated request to disclose disability status. Additionally, sponsors have indicated confusion over how best to keep such data confidential while integrating their program data with RAPIDS. This practical confusion, along with the questionable legality of the invitation itself, places sponsors in a challenging position. Through this final rule, the Department aims to ease any confusion sponsors may have experienced resulting from the requirement to invite disability self-identification.

Alternative Approaches and Recommendations

Comments: A commenter recommended that, while the revision and elimination of numerical goals and requirements may simplify the registration process for new and existing Registered Apprenticeship program sponsors, DOL should replace these eliminated regulations with a focus on and investment in activities that, among other groups, assist individuals with disabilities in accessing Registered Apprenticeship programs.

Department Response: The Department is committed to the expansion of Registered Apprenticeship programs for all qualified workers and encourages the full participation of individuals with disabilities in those programs. At the same time, the Department contends that mandating the use of burdensome and prescriptive analyses that fail to respect the privacy of individuals with disabilities is not the best means of accomplishing these objectives. As discussed previously, the Department maintains various resources that can assist sponsors in making their Registered Apprenticeship programs more accessible to individuals with disabilities. For example, the Department's Office of Disability Employment Policy has created an Apprenticeship Toolkit, which is designed to provide information on a series of topical areas focused on Registered Apprenticeship and how it can be used to provide employment opportunities for people with disabilities. The Department encourages sponsors to take advantage of these, and other resources, to support apprentices with disabilities.

4. Targeted Outreach, Recruitment, and Retention (§ 30.8)

Existing § 30.8 mandates that sponsors who identify instances of underutilization engage in focused outreach, recruitment, and retention strategies designed to enhance the number of applications from, and improve the retention of, apprentices belonging to the targeted group(s) or individuals with disabilities, as applicable. However, given that these requirements involve race- and sex-based data that could impact final recruitment decisions, the Department has determined that they carry similar legal risks as those associated with the utilization goals based on race, sex, and ethnicity.

These regulatory requirements may exert pressure on sponsors to prioritize recruiting candidates from specific racial, sex-based, or ethnic backgrounds, potentially resulting in unequal treatment of individuals in different demographic categories. This pressure could lead sponsors to allocate their limited recruitment resources disproportionately to benefit certain minority groups. *MD/DC/DE Broadcasters Ass'n* v. *FCC,* 236 F.3d 13, 15, 20–21 (D.C. Cir. 2001), *cert. denied,* 534 U.S. 1113 (2002). Thus, for the same reasons discussed in § 30.5, the Department is rescinding these requirements.

Additionally, the Department's rescission of existing §§ 30.5 and 30.7 removes the circumstances under which findings to engage in such activities might occur. Accordingly, the ''targeted'' activities in current § 30.8 are no longer required and the Department will proceed with rescission.

Support and Concern Regarding Reducing Outreach Requirements

Comments: A commenter stated that current rules prescribe targeted outreach strategies that may be ill-suited for certain industries or regions, and that smaller sponsors in particular often lack the staff and systems to efficiently manage the requirements of the current EEO regulations. A different commenter stated that they opposed burdens related to the outreach, recruitment, and selection processes for apprentices, particularly with regard to merit-based programs that the association does not control.

In contrast, several commenters opposed rescinding outreach requirements. One commenter asserted that current outreach, recruitment, and retention requirements do not require preferences, do not put employers at legal risk, and maintaining target outreach requirements supports pathways for opportunity for youth and other underrepresented groups in apprenticeship programs. Another commenter asserted that removing the regulatory basis for sponsors' existing outreach, recruitment and retention programs would limit the pool of apprentices available for selection. Another commenter agreed and stated growth is needed in the construction industry (which has faced an ever-increasing shortage since the mid-2000s) and that part 30's approach aligns with the measures in President Trump's plan for ''engaging and supporting the disconnected workforce.'' Several commenters stated that requiring program sponsors to consider the diversity of their apprentices in their recruitment process positively impacts Registered Apprenticeship expansion to underrepresented groups in their industry, and described successful programs that have implemented recruitment and outreach goals, especially within the construction industry. For example, one commenter said there has been a notable uptick in Registered Apprenticeship programs conducting affirmative outreach to populations underrepresented in the construction trades, and cited that in the last 4 years, there have been two new direct-entry pathways formally created in the Chicago area between local trade union apprenticeship programs and local pre-apprenticeship programs. The commenter also described a July 2024 roundtable hosted by Chicago Women in Trades with the EEOC Vice Chair where industry leaders shared the efforts they were making through the framework of 29 CFR parts 29 and 30 regulations that were improving their recruitment and retention of apprentices from diverse sex, racial, and ethnic backgrounds.

Similarly, a commenter expressed that several Registered Apprenticeship programs have identified recruitment strategies targeting certain protected classes which have proved fruitful in building and maintaining robust

[47] 42 U.S.C. 12112(d)(2)(A).

apprenticeship registrations, and shared concerns about their ability to continue to employ those strategies after the proposed rule is adopted. The commenter requested guidance regarding the extent to which such recruitment strategies are not compliant and specific examples of types of recruitment strategies that would not be deemed compliant under the proposed rule. Another commenter asserted that the part 30 regulation gives non-White and nonmale individuals a chance to enroll in apprenticeship without them having to ''know someone on the inside,'' or other historical practices that have resulted in denied equal opportunities for women and people of color.

A commenter stated that removing outreach requirements risks employers misinterpreting this as a reason to reduce deliberate recruitment of veterans, who often face barriers transitioning to civilian careers, and recommended that DOL explicitly clarify that nothing in the rule prevents or discourages sponsors from prioritizing veteran recruitment through engagement with veteran-serving organizations and workforce partners.

Department Response: The Department appreciates the comments discussing the recruitment challenges faced by sponsors. The Department maintains that this final rule gives sponsors more flexibility to lawfully recruit apprentices. By rescinding the overly prescriptive provisions in existing § 30.8, sponsors will no longer be required to expend resources on recruitment and retention activities that may not have benefited their programs. To the extent sponsors have found any partnerships or recruitment strategies to be useful, sponsors remain free to continue using those methods on a nondiscriminatory basis. The Department defers to the respective EEO enforcement agencies in determining whether specific recruitment methods are consistent with applicable nondiscrimination laws. Ultimately, the Department is confident that the removal of the onerous requirements under the existing part 30 regulation will spur expansion of the National Apprenticeship System generally, creating more opportunities for women, Americans of color, and all Americans across all demographic groups to access the training model.

In response to those commenters raising concerns about recruitment targeted towards veterans, the Department notes that targeted outreach on this basis does not raise the same constitutional concerns as outreach targeted to members of a specific race or sex. Sponsors are encouraged to continue engaging in efforts to recruit veterans. Existing § 30.8 did not contain any requirements specific to the recruitment of veterans; the rescission of this section, therefore, will not impact the ability of sponsors to continue engaging in such efforts. The same is true of other recruitment strategies relying on non-protected bases, such as geography and income status. The Department supports programs that seek to reach all potential applicants, and the rescission of existing § 30.8 enables sponsors to conduct outreach and recruitment in line with their business needs and in a lawful manner.

Impact on the Construction Industry

Comments: One commenter who opposed the proposed changes to outreach and recruitment requirements described difficulties in recruiting potential employees to the construction industry due to the nature of the work, and asserted that growing the apprenticeship pool in the industry involves successfully recruiting from every part of the population. The commenter described how apprenticeship programs conduct outreach to veterans, community groups, and institutions within relevant geographic areas; support all candidates to maximize success; and eliminate completion barriers based on factors such as language, learning deficits, addiction, and childcare responsibilities. The commenter opined that these practices are not discriminatory, but instead advance the legitimate objectives of sponsors to grow the workforce.

Another commenter stated that in the construction industry, there are legitimate business reasons for Registered Apprenticeship programs to develop geographically focused outreach and recruitment plans, including proximity to training centers and job sites to which apprentices would be dispatched for OJL. The commenter stated that recruitment in the construction industry typically involves outreach to community colleges, high schools, county or State fairs, unemployment offices, veterans groups, parks and recreation, and other entities that have historically been viable sources of candidates for admission to JATCs. The commenter added the 2016 final rule offered sponsors flexibility in defining pertinent geographic areas so long as they justify the scope of the recruitment area and do not exclude individuals based on race, sex, or ethnicity. The commenter also maintained that due to the fluctuating nature of business demands in the construction industry, development of geographic lines for recruitment based on volume of work at anticipated job sites is a legitimate business interest.

Impact on the Education Sector

Comments: A national labor union stated that teaching apprenticeships are new in the last four years and have been transformative for non-traditional students and adults who show an interest in teaching. The commenter described traditional sex-based imbalances in the teaching profession, saying that apprenticeship programs under existing regulations are making efforts to recruit more male teachers from varying backgrounds, and labeling this approach as ''illegal discrimination'' may negate recruitment efforts. The commenter cited research showing that diversifying the teacher workforce is beneficial for students. A professional association similarly expressed concern about the proposed restriction on recruitment activities under the proposed rule and the impact this change would have on the expansion of apprenticeship programs in education.

Impact on Women and Other Groups

Comments: A commenter stated that the Department's proposed changes to targeted outreach requirements would threaten participation for women in apprenticeships, particularly in high-paying fields where women are a small minority of apprentices. The commenter described research they said shows apprentices are often provided with limited information on career opportunities, particularly among women. The commenter cited additional research indicating that women who do pursue higher paying apprenticeship fields often do not have the benefit of merit-based recruitment and must be more qualified and persistent.

Another commenter stated that as apprenticeships continue to grow into new sectors, the analysis, recruitment, and reporting parameters as currently written in part 30 would serve as guidelines to allow program sponsors to strategically build apprenticeships in new job categories. The commenter stated that many types of careers benefit from intentional promotion and recruitment, and the proposed rule not only eliminates requirements for this analysis and effort but would likely chill programs from acting on their recruitment efforts to engage diverse candidates. Another commenter stated that requirements for outreach and recruitment grew out of the insular nature of the construction trade which

uses informal networks and referrals to recruit for apprenticeships, and which perpetuates issues of underrepresentation particularly for women.

Department Response: As stated elsewhere in this preamble, a fundamental purpose of this final rule is to rescind all provisions of the part 30 regulation that aimed to impose legally problematic ''equitable'' outcomes on the demographic composition of apprenticeship programs through a systematic regime of group-based preferences that are tied to an individual's race, sex, or ethnicity. Accordingly, any arguments advanced by commenters to justify retaining the targeted recruitment provisions found at existing § 30.8 and that are grounded upon the general notion of achieving or maintaining greater demographic ''balance'' or ''diversity'' in a sponsor's apprenticeship workforce through targeted recruitment efforts are contrary to the fundamental principle of hiring individuals solely on the basis of merit and without considering demographic characteristics. Additionally, nothing in the final rule precludes individual sponsors from voluntarily conducting lawful outreach or recruitment activities to attract qualified apprenticeship candidates from all backgrounds or from engaging in hiring practices they believe to be in their business interest, provided that such activities and practices conform with applicable nondiscrimination laws.

Reliance Interests and Existing Investments in Outreach Programs

Comments: A commenter stated that the rescission of outreach and recruitment requirements would strongly impact the reliance interest of their training network. The commenter stated that existing § 30.8 currently requires programs that identify underutilization to engage in neutral outreach activities (that are not race- or sex-based) but that are designed to reach underrepresented communities. The commenter stated that, relying upon these part 30 regulatory provisions, sponsors affiliated with the commenter's organization have invested significant funds and human resources to build a variety of strategies and programs that support growth. The commenter stated that the rescission of these regulations would seriously undermine these programs and imperil the years of investments which have gone into their creation, particularly by the labor-management organizations that are responsible for JATCs. The commenter also asserted that outreach and recruitment activities under § 30.8 are legal under Federal and State nondiscrimination laws.

Another commenter stated that the Department's proposed rescission of § 30.8 would adversely impact the significant reliance interests of Registered Apprenticeship programs that have adapted outreach and recruitment to comply with the part 30 regulation. The commenter stated that, under the regulation, sponsors have been required to develop a list of recruitment sources that generate referrals of women, minorities, and persons with disabilities, with contact information for each source, and to notify these sources in advance of any apprenticeship opportunities. The commenter continued that the broad rescission of this provision would disrupt past success by JATCs in developing recruitment sources and partnerships particularly in blue collar professions due to vocational training and careers becoming less popular. The commenter asserted that its recruitment efforts in schools, community colleges, and community-based organizations have been successful, but expressed concern that, under the Department's proposal, such efforts would cause a Registered Apprenticeship program to risk deregistration.

Department Response: The part 30 regulation mandated that sponsors subject to utilization goals under § 30.8 of that regulation conduct ''targeted outreach, recruitment, and retention activities that are likely to generate an increase in applications for apprenticeship and improve retention of apprentices'' from ''underutilized groups'' based upon race, sex, and ethnicity. The Department has determined that preferential treatment in the recruitment of apprentices is inherently discriminatory in nature, and thus legally suspect. The Department takes the position that the deliberate targeting of individuals from ''underutilized'' groups in apprenticeship outreach and recruitment based upon shared characteristics of race, sex, or ethnicity necessarily disadvantages the recruitment of individuals who do not belong to such groups.

In rescinding this preferential and discriminatory recruitment provision, the Department reaffirms the view that individuals from all backgrounds—regardless of their race, ethnicity, sex, religion, or national origin—must be afforded the opportunity to compete on an equal, nondiscriminatory basis for admission into a Registered Apprenticeship program. The Department takes the position that every apprentice should be recruited without regard to their race, sex, or ethnicity, and that every apprentice should be hired or retained by a program sponsor on the basis of their qualifications and performance alone.

While the Department acknowledges that certain program sponsors have made significant investments to satisfy the requirements that were contained in § 30.8 of the 2016 regulation, the Department nevertheless takes the position that a sponsor's recruitment activities must be nondiscriminatory in their operation. Accordingly, in accordance with this final rule and governing nondiscrimination law, program sponsors that have made significant investments in apprenticeship recruitment and outreach activities are free to continue such initiatives, provided that these efforts are designed to attract and retain qualified candidates from all backgrounds, and do not constitute preferential, discriminatory conduct based upon an individual's race, sex, and ethnicity.

Some commenters implicitly acknowledged the burden associated with the part 30 regulation's outreach and recruitment requirements in stating they have invested significant resources into complying with the existing § 30.8. By rescinding these provisions, the Department is reducing the administrative and regulatory burden placed on sponsors to comply with part 30 requirements. Finally, because the Department is not infringing on sponsors' ability to voluntarily maintain legally compliant outreach activities, the Department maintains that removing part 30 requirements will not adversely impact sponsors' reliance interests associated with part 30 regulatory requirements that are being rescinded with this final rule.

5. Review of Personnel Processes (§ 30.9)

As noted in the NPRM, the Department explained that existing § 30.9 required sponsors maintaining an affirmative action program to perform an annual assessment of their personnel processes concerning the administration of the apprenticeship program to ensure that the program is not operating in a discriminatory manner. The Department has concluded that this requirement is both confusing and burdensome, as sponsors are already subject to Federal and State nondiscrimination laws and have established procedures to maintain compliance, rendering this additional regulatory obligation unnecessary.

Moreover, the Department expressed the view in the preamble to the NPRM that eliminating this requirement would

enable sponsors to explore innovative strategies, reduce redundancy in compliance efforts, and align with the Administration's commitment to promoting efficiency and effectiveness in apprenticeship programs. The Department also opined that rescinding this mandate would allow sponsors to pursue innovative approaches, reduce duplication, and align with the Administration's stated policy to ''significantly reduce the private expenditures required to comply with Federal regulations to secure America's economic prosperity . . .'' as established by E.O. 14192, Unleashing Prosperity Through Deregulation.

The Department did not receive public comments specifically related to its proposed rescission of § 30.9. Therefore, for the reasons discussed in the NPRM and reiterated in this final rule, the Department is finalizing the rescission of this provision.

C. Rescission of the Anti-Harassment Training Requirement and the Provision Relating to Retaliation Against Apprentices

In the NPRM, the Department proposed rescinding the existing regulatory mandate contained in § 30.3(b)(4), which requires all Registered Apprenticeship program sponsors to conduct anti-harassment training. The Department also proposed rescinding existing § 30.17, which prohibits intimidation, retaliation, discrimination, and coercion against apprentices for filing a complaint, opposing a prohibited practice, assisting investigations, or exercising rights or privileges provided under part 30. The Department proposed eliminating these provisions in the NPRM to remove unnecessary administrative burdens or duplicative regulatory requirements on program sponsors, and to align the content of part 30 with governing Federal nondiscrimination laws prohibiting harassment in the workplace. After consideration of the comments received concerning the proposed rescission of these regulatory provisions, which are summarized and addressed below, the Department has determined to finalize these proposed changes in this final rule.

As a general matter, the Department has consistently maintained that harassing conduct in the workplace is plainly unacceptable. Depending on the facts, the harassment of an apprentice on the basis of their race, sex, or other protected characteristics may give rise to a hostile work environment allegation under Title VII of the Act or other applicable employment nondiscrimination laws, a claim which may be appropriate for further investigation by the EEOC or a State FEPA. From a labor standards perspective, the Department recognizes that the prevalence of such conduct in the workplace, including in Registered Apprenticeship programs, could undermine the dignity of individual employees and diminish worker productivity and morale.

Accordingly, while this final rule removes the overbroad and administratively burdensome requirement that all Registered Apprenticeship programs, regardless of their size, must conduct comprehensive anti-harassment training for those individuals connected with the program, the Department does not seek to discourage sponsors from voluntarily adopting lawful strategies and measures that are carefully tailored to minimize the occurrence or mitigate the impact of such impermissible conduct in their respective programs. However, the Department cautions sponsors that, to avoid giving rise to potential hostile work environment claims under Title VII or other nondiscrimination laws, any anti-harassment strategies or measures that are voluntarily instituted by a program must avoid unlawfully stereotyping or demeaning any group of employees or apprentices based upon their sex, race, or other protected characteristics.

Comments: One commenter expressed support for rescinding the part 30 anti-harassment training requirements because it would provide regulatory relief to employers while preserving nondiscrimination protections. However, another commenter opposed these rescissions, asserting that the removal of the anti-harassment training requirements would remove essential apprentice safeguards, would undermine the standard and value of Registered Apprenticeship, and would likely worsen the work environment for many apprentices, particularly those who are in occupations where they are the minority of workers. Several commenters also cited data purporting to demonstrate that the compulsory provision of anti-harassment training by sponsors has resulted in tangible benefits that have outweighed the costs of these trainings, such as higher apprenticeship completion rates, reduced levels of harassment in the workplace, and a lower risk of potential sponsor liability.

Several commenters also maintained that the anti-harassment training requirement contained in the existing part 30 remains necessary because of the ongoing prevalence of sex- and race-based harassment, intimidation, bullying, and retaliation, both generally and within the construction trades, and particularly against women. For example, one commenter cited a report stating that the majority of apprentices who failed to complete their programs identified harassment and discrimination as the reason they resigned from their apprenticeship or as one of the biggest challenges they faced during their apprenticeship, and that more than half of the apprentices who left or seriously considered leaving the trades cited harassment or lack of respect as the reason. Another commenter stated that 57.9 percent of tradeswomen who made the decision to speak up about discrimination or harassment to someone in authority felt their concerns were not addressed satisfactorily. Other commenters cited other surveys, research, and apprentice testimony as well to illustrate the prevalence of harassment.

Several commenters asserted that, in contrast to the data and research they provided purporting to show the need for retaining the compulsory anti-harassment training provisions of part 30, the Department did not offer any compelling rationales in the NPRM to support its proposed removal of the anti-harassment training requirement. One commenter asserted that, in the preamble to the proposed rule, the Department had argued that the anti-sexual harassment training regulations in part 30 conflicted with merit principles, and that the only legal standard cited for this proposition was the *SFFA* decision, which did not address the issue. The commenter stated that the proposed rule's suggestion that anti-harassment training is potentially unlawful is unfounded and likely to have a chilling effect on Registered Apprenticeship program sponsors. This commenter stated that they were not aware of an instance in which a court held that a training aimed at preventing sexual harassment was unlawful, and that numerous courts have upheld the lawfulness of trainings to encourage diversity and respect. Lastly, the commenter suggested there are other ways to reduce the burdens related to the mandatory provision of anti-harassment training without eliminating the requirement.

One commenter stated that pointing to Title VII as adequate protection for apprentices from discrimination and harassment is not accurate, considering the special contexts of the apprenticeship model and the limitations of an enforcement mechanism almost solely dependent on worker complaints. Similarly, another commenter urged the Department to

retain all provisions expressly stipulating that harassment will not be tolerated, such as the anti-intimidation and anti-retaliation provisions; this commenter maintained that removing these regulatory provisions would deprive apprentices of a viable means of redress for intimidation and retaliation.

A commenter recommended that, rather than eliminating the anti-harassment training requirement, the Department should instead require stronger diversity training for employers and mentors, covering topics including but not limited to cultural competency, inclusivity, bias awareness, and nondiscrimination law. Another commenter added that the Department should continue to provide free online trainings.

Several commenters also expressed opposition to the proposed rescission of the regulatory prohibition on intimidation and retaliation found at § 30.17, contending that the removal of this provision would reduce awareness of such protections, create delays in the resolution of complaints, and create barriers for apprentices to assert their rights if they are experiencing intimidation or retaliation. One commenter urged the Department not to rescind this provision because it would burden youth apprentices with navigating complex Federal court systems. Some commenters also stated that the elimination of this provision could discourage apprentices from speaking up about discrimination, unsafe, or unfair practices and may result in higher attrition and lower completion rates among the most vulnerable apprentices. A commenter expressed particular concern about the proposed change in combination with the other changes that require Registration Agencies to await final determinations of discrimination, reasoning that apprentices who are retaliated against for having witnessed discrimination would have to undergo lengthy processes before receiving any remedy.

Department Response: The Department agrees with those commenters who asserted that the rescission of these regulatory provisions would remove burdensome or duplicative mandates from part 30, thereby providing meaningful regulatory relief to program sponsors. Importantly, the Department notes that, by dispensing with such mandates, the final rule will enable sponsors to align their compliance obligations with the requirements of applicable nondiscrimination laws and protections with which they may be most familiar.

While the Department acknowledges the existence of reports that illustrate the harmful effects of workplace harassment on apprentice retention, the Department also notes the absence of data demonstrating the efficacy of compulsory anti-harassment training in counteracting such outcomes. As such, it disagrees with the conclusion reached by some commenters that the rescission of the existing part 30 training requirement removes an integral tool for protecting apprentices from harassing conduct. Rather, the Department maintains that existing legal protections against harassment or retaliation that are afforded under existing Federal and State nondiscrimination laws are sufficiently robust.

Title VII prohibits workplace harassment, which may occur when an employee is subjected to unwelcome remarks or conduct based on protected characteristics. As noted earlier, harassment based on a protected characteristic is illegal when it results in an adverse change to a term, condition, or privilege of employment, *Muldrow* v. *City of St. Louis,* 144 S. Ct. 967 (2024), or it is so frequent or severe that a reasonable person would consider it intimidating, hostile, or abusive. *See* Title VII of the Act, section 703(a)(1).[48] Title VII also prohibits retaliation by an employer because an individual has engaged in protected activity under the statute. *Id.* at section 704.[49]

Because of the foregoing Title VII prohibitions against harassment and retaliation, which are grounded in the language of the statute and elaborated under subsequent case law, the Department considers the existing regulatory provision at § 30.3(b)(4) mandating the provision of anti-harassment training by all Registered Apprenticeship programs to be unduly burdensome, and the existing regulatory provision at § 30.17 prohibiting retaliation for engaging in a protected activity to be largely redundant of existing Federal protections and therefore unnecessary. Moreover, under the foregoing Title VII provisions, individual apprentices who allege that they have been subjected to such impermissible employer conduct or work environments may file a complaint with, and request relief from, the EEOC or a State FEPA—and a final agency or court determination that a program sponsor has engaged in such behavior could potentially result in the Department's deregistration of that program. Given these existing protections under nondiscrimination law, the removal of these burdensome or duplicative requirements from part 30 aligns with E.O. 14278's mandate that the Department seek to expand Registered Apprenticeship and improve efficiency.

The Department does not dispute that anti-harassment training may be beneficial in some workplaces. Rather, the Department has concluded that the decision whether, how, and how often to provide such training should be left to sponsors rather than prescribed through a uniform Federal apprenticeship-specific mandate. The Department's decision to rescind the mandatory anti-harassment training requirement should not be construed as prohibiting such training. Sponsors remain free to provide anti-harassment training, establish workplace-conduct policies, and undertake other measures they determine are appropriate for their workplaces and apprenticeship programs. The final rule merely eliminates the Federal regulatory mandate that all program sponsors conduct such training regardless of their size, circumstances, and need for such training. Some sponsors may find anti-harassment training beneficial and may voluntarily choose to provide such training. The Department's conclusion is simply that Federal law does not require a separate apprenticeship-specific mandate in light of existing statutory protections against harassment and retaliation.

D. Rescission of Apprenticeship Selection Procedure Requirements

Under the NPRM, the Department suggested rescinding § 30.10, which outlined the permissible methods for sponsors to select apprentices. This provision allowed sponsors to utilize any selection method or combination of methods, so long as those methods adhered to the criteria established in the regulation. The Department concluded that these provisions were unnecessary, as they either duplicated the prohibitions against discrimination in selection and related employment practices already established under Title VII or imposed additional regulatory burdens on sponsors beyond those mandated by Title VII.

For the reasons discussed in the NPRM and in response to comments discussed below, the Department has determined to finalize the rescission of this regulatory provision as originally proposed.

Comments: Several commenters opposed rescinding the apprenticeship selection procedure requirement. For example, one commenter opposed the rescission because it enables

[48] 42 U.S.C. 2000e–2(a)(1).

[49] 42 U.S.C. 2000e–3.

Registration Agencies to know the minimum requirements for entry into a Registered Apprenticeship program, thus helping to ensure nondiscrimination in such a program. Several commenters also said that the apprenticeship selection procedure recruitment was intended to expand access and representation in apprenticeship programs. These commenter suggested retaining this requirement is important for building pipelines for individuals into the system and to ensure the apprenticeship system is accessible to all workers. One commenter stated that this apprenticeship selection requirement helps support the success of quality pre-apprenticeship and apprenticeship readiness programs in their State, as sponsors may specify in their selection procedures that completers of these preparatory programs can receive advanced standing, direct interviews, or direct entry into their Registered Apprenticeship program.

However, another commenter disagreed and supported the rescission because they said that the current apprentice selection procedure requirement is burdensome and complicates the process to recruit apprentices, particularly for industries facing shortages like construction.

Department Response: In response to these comments, the Department takes the position that the inclusion of a sponsor's procedures for the selection of apprentices in the program's standards of apprenticeship (as was required in § 30.10(b)(1) of the 2016 part 30 regulation and in § 29.5(b)(21) of the 2008 part 29 regulation) was unnecessary and unduly burdensome, and that the rescission of this requirement in this final rule is therefore appropriate.

Requiring sponsors to include selection procedures in their apprenticeship standards is not necessary to ensure compliance with applicable nondiscrimination laws or to safeguard apprentice welfare. Questions concerning the legality of selection practices are appropriately addressed under generally applicable Federal and State nondiscrimination laws and by the agencies charged with enforcing those laws. Accordingly, the Department concludes that mandatory inclusion of selection procedures in apprenticeship standards is not necessary to ensure equal opportunity within Registered Apprenticeship programs. Sponsors remain free to include selection procedures in their standards or other program materials if they determine that doing so promotes transparency, consistency, or effective program administration.

The Department also reiterates that § 30.10(b)(1) of the part 30 regulation imposed obligations on program sponsors beyond those mandated under Title VII by requiring compliance with the Uniform Guidelines on Employee Selection Procedures (UGESP), which provides discretionary guidance to the EEOC and employers regarding validation of selection procedures rather than binding substantive standards. *See* 29 CFR 1607.1. Accordingly, the rescission of that regulatory provision was appropriate in order to align part 30 with the scope of Title VII's requirements and to reduce regulatory burden upon program sponsors. Furthermore, the Department has proposed in a separate rulemaking to rescind its codification of UGESP at 41 CFR part 60–3 as applied to covered contractors because of the revocation of E.O. 11246, which provided the underlying authority for that rule. Finally, the Department of Justice's Office of Legal Counsel recently issued an opinion concluding that the EEOC's existing interpretations of the disparate impact provisions in Title VII, including as reflected in UGESP, ''embrace an unconstitutional reading of Title VII.'' *See Constitutionality of Disparate-Impact Liability Under Title VII,* 50 Op. O.L.C. __, at *2 (June 9, 2026) (''Disparate-Impact Liability'').

Similarly, the requirements contained in § 30.10(b)(3) of the part 30 regulation were redundant of the obligations already imposed upon certain program sponsors by the ADA and the EEOC's implementing regulations at 29 CFR part 1630. However, the Department notes that nothing in this final rule precludes program sponsors from voluntarily including selection procedures in their standards. This rescission simply removes a description of the program's selection procedures as a mandatory requirement. Overall, the Department maintains that the rescission of § 30.10 of the existing part 30 regulation in this final rule will significantly reduce compliance burdens on program sponsors, thereby facilitating the accelerated establishment and expansion of Registered Apprenticeship programs, particularly in those sectors and occupations that are currently facing acute labor shortages.

In response to one commenter, the Department is clarifying that nothing in this final rule prohibits sponsors from providing advanced standing, direct interviews or direct entry into their Registered Apprenticeship program for individuals that complete a pre-apprenticeship or other preparatory program. Sponsors should record their policy for granting advanced standing to preparatory program completers and must ensure this policy allows all applicants to be equally granted such standing as required by 29 CFR 29.5(b)(12).

E. Rescission of Sponsor Recordkeeping Requirements

The Department proposed to rescind § 30.12, which imposed certain recordkeeping requirements on program sponsors.

Comments: A commenter expressed concern that by eliminating recordkeeping requirements, data from sponsors about the availability of apprenticeship opportunities across demographic categories would become inconsistent and impossible to assess, significantly weakening the effectiveness of 29 CFR part 30. However, another commenter stated that it would rescind burdensome recordkeeping requirements including the obligation of retaining detailed demographic information about each apprentice and applicant for multiple years.

Department Response: The Department disagrees with commenters who suggest that the rescission of § 30.12 will prevent meaningful oversight. As discussed elsewhere in this preamble, the Department does not view the assessment of demographic proportionality as an appropriate purpose of part 30. Rather, the purpose of part 30 is to prohibit unlawful discrimination and ensure that apprenticeship opportunities are made available on an equal basis to all individuals. Therefore, the continued maintenance of extensive sponsor-level demographic records is not necessary to safeguard apprentice welfare or enforce applicable nondiscrimination laws. In the NPRM, the Department clarified that apprenticeship agreements must still include ''a request for demographic data about the apprentice.'' The elimination of sponsors' recordkeeping obligations for part 30 requirements does not eliminate part 29's requirements to collect and maintain demographic data on apprentices through the apprenticeship agreement requirements at 29 CFR 29.7(l) and recordkeeping requirements at 29 CFR 29.5(b)(23).

VI. Section-by-Section Analysis—Revised Part 30 Under the Final Rule

A. Section 30.1—Purpose and Applicability

The proposed introductory ''Purpose and Applicability'' section would have significantly updated and condensed

the previous ''Purpose, applicability, and relationship to other laws'' provision in part 30. In alignment with the policy approach described above, proposed § 30.1 eliminated references to affirmative action and removed redundant language concerning protected bases and complaint processes, which are addressed elsewhere in the regulation.

Proposed § 30.1 of this final rule explicitly stated that the part 30 regulation establishes a uniform Federal standard that prohibits unlawful discrimination against apprentices and applicants in Registered Apprenticeship programs. It also reaffirmed that these nondiscrimination requirements apply to program sponsors and must be enforced by SAAs. Furthermore, it clarified the scope of compliance reviews, compliance assistance, and enforcement actions to be conducted by the Registration Agency. For the reasons discussed in the NPRM and in response to comments discussed below, the Department is finalizing this provision as proposed.

Comments: A commenter asked if the Department considered applying the proposed changes only to employers greater than a certain size (*e.g.,* 500 or more employees).

Department Response: As stated in the final regulatory language at § 30.1, this final rule creates a uniform, non-burdensome Federal standard for all Registered Apprenticeship program sponsors to follow applicable Federal and State nondiscrimination laws. The Department considered applying the changes to the part 30 regulation only to employers greater than a certain size, but it determined that doing so would not serve the interest of establishing a uniform rule. The Department has determined that uniformity promotes greater clarity for Registered Apprenticeship program sponsors on their obligation to prevent and address illegal discrimination against apprentices, as well as part 30's applicability to all programs.

B. Section 30.2—Definitions

Under the NPRM, the Department proposed to eliminate all definitions in the current part 30 regulation and to adopt by reference the applicable existing definitions from the labor standards of apprenticeship regulation at 29 CFR part 29. In the NPRM, the Department maintained that the definitions found in existing § 30.2 are either duplicative of those in 29 CFR 29.2 or would no longer be relevant due to the significant revisions proposed to the substantive provisions of part 30.

The Department asserts that consolidating all apprenticeship-related definitions within the existing regulatory framework of 29 CFR part 29 will reduce administrative burdens on sponsors of Registered Apprenticeship programs and other stakeholders by providing a single point of reference for definitions within the Federal apprenticeship regulations. For the reasons discussed in the NPRM and in response to comments discussed below, the Department is finalizing the provision as proposed.

Comments: A commenter agreed with the proposed revision to remove definitions in 29 CFR 30.2 and adopt by reference the existing definitions found in 29 CFR 29.2, stating that the definitions in both parts should be aligned and that doing so would ''reduce confusion for the regulated community'' and simplify compliance for sponsors and employers.

This commenter recommended retaining certain definitions proposed for removal, such as ''pre-apprenticeship program,'' which is not currently defined in 29 CFR 29.2. The commenter opposed removing this as a defined term in the apprenticeship regulations, asserting that defining key terms provides clarity for apprenticeship stakeholders. Alternatively, if the Department does not retain the definition in regulation, the commenter recommended that the Department update Training and Employment Notice No. 23–23 to align with recent E.O.s, or with the definition of ''pre-apprenticeship program'' under the Workforce Innovation and Opportunity Act (WIOA) regulations at 20 CFR 681.480. The commenter also urged the Department to preserve the definition of ''selection procedure'' in a revised 29 CFR 29.2 to ensure Registration Agencies understand program entry requirements and to help prevent discrimination. Lastly, the commenter recommended preserving definitions for ''race,'' ''ethnicity,'' and ''disability,'' either in revised § 29.2 or by citing other Federal definitions, to facilitate effective data collection.

Department Response: The Department appreciates the comments regarding the consolidation of definitions within part 29 as proposed by the NPRM. Regarding a commenter's concerns about eliminating the definition for ''pre-apprenticeship,'' the Department notes that pre-apprenticeship programs are not registered by the Department pursuant to the NAA. As such, the Department does not regulate such programs. The Department maintains that this rulemaking updating part 30 requirements is not an appropriate vehicle for establishing any regulatory definitions or other regulations for pre-apprenticeship programs. The Department agrees with the commenter's suggestion to align any future guidance on pre-apprenticeship with the Administration's E.O.'s, as well as the definition for pre-apprenticeship from the WIOA regulation at 20 CFR 681.480, to support alignment among workforce development programs overseen by the Department.

In response to comments on the removal of the definition of ''selection procedures,'' the Department asserts that a definition of this term is not necessary in this final rule due to the substantial revisions to part 30 and the conforming edits to 29 CFR 29.5(b)(21), which remove all references to the term ''selection procedure'' from parts 29 and 30. Furthermore, the Department notes that the definition of ''selection procedure'' was drawn from the UGESP. As noted earlier in the preamble, the Department has proposed in a separate rulemaking to rescind its codification of UGESP at 41 CFR part 60–3.

Regarding maintaining definitions for race, ethnicity, and disability, the final rule's conforming edits to existing § 29.7(l) eliminate the requirement that a sponsor must specifically request information from apprentices on their race, sex, ethnicity, and disability status. Instead, under this final rule, sponsors only are required to include ''a request for demographic data about the apprentice'' within apprenticeship agreements. Accordingly, the Department has determined it is not necessary to include a regulatory definition for these terms to assist with data collection.

C. Section 30.3—Nondiscrimination Standards Applicable to All Sponsors

Under the NPRM, the Department proposed obligating all sponsors of a Registered Apprenticeship program to comply with all applicable Federal and State laws and regulations prohibiting illegal discrimination on the basis of race, color, religion, national origin, sex, age (40 or older), genetic information, or disability. The Department explained in the NPRM that this list of protected bases is fully consistent with the content and scope of currently applicable Federal civil rights statutes, including Title VII of the Act and its subsequent amendments, the ADEA, as amended, the ADA, as amended, and the Genetic Information Nondiscrimination Act of 2008.

The proposed regulatory provision additionally specified that non-compliance by a Registered

Apprenticeship program sponsor with relevant Federal and State nondiscrimination laws may lead to enforcement actions or deregistration proceedings by a Registration Agency, in accordance with § 30.5 of the proposed rule, if the non-compliance pertains to illegal discrimination against an apprentice or an apprenticeship applicant regarding any aspect of employment benefits, terms, or conditions related to the apprenticeship. The Department's intent is to confer the benefits of registration upon those sponsors that conduct their programs in a manner consistent with applicable Federal and State nondiscrimination laws. Further, the Department has an interest in carrying out the Administration's directive to undertake deregulatory actions where existing regulations impose unnecessary and burdensome requirements on businesses.

Accordingly, for the reasons discussed in the NPRM and in response to comments discussed below, the Department is finalizing the provision as proposed.

1. General Comments on the Proposed Nondiscrimination Standards Provision

Comments: A couple of commenters expressed support for revising § 30.3 to direct Registered Apprenticeship program sponsors to comply with all applicable Federal and State laws and regulations prohibiting illegal discrimination to eliminate unnecessarily complex requirements.

However, other commenters opposing the change stated that the proposed rule would replace § 30.3's robust protections with a generic requirement to comply with ''applicable Federal and State laws'' governing discrimination, which would weaken safeguards, reduce accountability, and would leave certain apprentices unprotected. One of these commenters concluded that, under the proposed rule, sponsors that are not joint labor-management committees or do not have at least 15 employees or members would not be covered by any nondiscrimination law. Other commenters noted that, while Title VII of the Act provides that it is unlawful for employers, labor organizations, or joint labor-management committees controlling apprenticeship to discriminate, there are apprenticeship programs run by other entities (such as non-profit trade associations) that do not fall under any of these categories. These commenters asserted that current § 30.3 helps bridge this gap and provide protections to apprentices in programs not covered by Title VII. Some of these commenters cited the case of *Salas* v. *Independent Electrical Contractors Inc.* (W.D. Wash. May 6, 2013), where an apprentice sued his non-joint apprenticeship program alleging discrimination, but the Federal district court held that because the apprentice was not an employee of the apprenticeship program and the program had only five employees, the program did not constitute an ''employer'' under Title VII. Moreover, the court noted that because the program was not associated with a union, it did not constitute a ''joint labor-management committee,'' thus leaving the apprentice without legal recourse. One of these commenters further remarked that several States' nondiscrimination laws do not seem to cover non-joint apprenticeship programs, including Kentucky, New York, Louisiana, Utah, Virginia, and Montana, and provided language from those States' nondiscrimination laws to support their position.

Department Response: The final rule adopts this provision as proposed. The Department agrees with the commenters that the revisions to § 30.3 will eliminate unnecessarily complex requirements, focusing instead on compliance with laws with which employers are already familiar.

The Department disagrees with the commenters that the proposed protections are not sufficiently robust and reiterates that apprentices retain safeguards available under Federal and State nondiscrimination laws. To the extent that certain apprentices are not covered by those existing laws, Congress and State legislatures have chosen the relevant jurisdictional thresholds, and they could seek to amend them in the future. For example, Congress specifically contemplated coverage of apprentices in Title VII, including in sections 703(d) and 704(a) and (b),[50] while also setting in section 701(b) a statutory minimum of 15 employees for covered employers.[51] In response to comments citing the *Salas* case—which dealt with the definition of ''employee'' under Title VII, the ADEA, and Washington State law—the Department recognizes that there are some entities with apprentices that are not covered by Federal or State nondiscrimination laws, including those that have fewer employees than statutory minimums. Congress and some State legislatures likewise determined that nondiscrimination laws apply to employers, labor organizations, and joint labor-management committees.

As indicated earlier in this preamble, the Department is convinced that it would be manifestly improper to retain any of the regulatory provisions contained in part 30 (such as the regulatory language delineating the scope of coverage of the nondiscrimination provision available under existing § 30.3) that may have operated to either circumvent or contravene the foregoing coverage provisions of Title VII or of other applicable Federal or State employment nondiscrimination statutes. Were the Department to retain such broadly encompassing regulatory coverage language in this final rule—as it was urged to do by several commenters—the Department would be essentially subverting the legislative intent of Congress and of State legislatures via an agency regulation, which is a plainly inadmissible course of action. The Department does not wish to exercise its authority under the NAA in a manner that contravenes clear Congressional instruction. Accordingly, as Congress did not include non-joint committees as entities falling under Title VII's definition of ''employer'' or ''labor organization,'' the Department defers to the apparent legislative intent of the Nation's elected representatives and declines to adopt these commenters' recommendations.

In this connection, the Department has consistently maintained that the sponsor of a Registered Apprenticeship program is the entity that bears responsibility for ensuring that the program is conducted and operated in a manner consistent with all governing apprenticeship-related statutes and regulations, including compliance with the nondiscrimination requirements contained in this final rule. This broad compliance obligation applies to all models of program sponsorship, regardless of whether the sponsor directly employs each of the apprentices enrolled in their program, or instead operates a ''group'' program (administered on either a joint or a non-joint basis) in which one or more participating employers have agreed, in writing, to adopt the sponsor's apprenticeship standards for the training of their respective apprenticeship cohorts. There may be instances where the sponsor of a group program receives information—either through their own monitoring or as a result of a program review by the Registration Agency—that a participating employer has not met their contractual obligation to follow the program's standards of apprenticeship, or has failed to comply with governing

[50] 42 U.S.C. 2000e–2(d) and 2000e–3(a) and (b).

[51] 42 U.S.C. 2000e(b).

apprenticeship-related laws (such as applicable Federal employment nondiscrimination statutes or the part 30 requirements contained in this final rule). In such cases, the group sponsor should promptly implement effective corrective measures to ensure participating employers' ongoing compliance with their program standards, which includes the requirement to comply with part 30.

Further, the Department notes that the current part 30 enforcement structure was largely duplicative of other Federal and State law protections, and that these revisions will remove this duplication, thereby reducing burden and confusion among sponsors, who should already be familiar with Federal and State nondiscrimination laws. This aligns with E.O. 14278's mandate that the Department seek to expand Registered Apprenticeship and improve efficiency.

2. State Law Requirements

Comments: A commenter expressed concern about the proposed regulatory provision at § 30.3, which would require compliance with ''all applicable'' Federal and State laws and regulations prohibiting discrimination. The commenter interpreted this as requiring compliance with all nondiscrimination laws that apply to a program sponsor but reasoned that ''applicable'' State laws and regulations could be read more narrowly to refer only to those that pertain exclusively to nondiscrimination in apprenticeship, as in proposed § 30.7(b)(1)(i). Therefore, the commenter asked the Department to clarify its intent and the scope of laws covered by § 30.3. Regardless, the commenter urged DOL to drop the requirement to comply with State nondiscrimination laws and regulations, expressing concern that requiring compliance with State laws would undermine the Trump administration's goals and executive orders on ''restoring biological truth, protecting women and girls, and eradicating gender ideology.'' Furthermore, the commenter cautioned that State nondiscrimination laws and regulations may not be as solicitous as Federal laws and regulations, citing *Union Gospel Mission* v. *Ferguson,* No. 23–2606, 2024 WL 3755954 (9th Cir. Aug. 12, 2024), regarding protections for religious organizations to run their organizations in accordance with their religious beliefs. Citing *World Vision* v. *McMahon,* the commenter argued, that while the First Amendment applies to State nondiscrimination laws, Federal statutory protections for religious liberty do not. The commenter proposed specific alternative regulatory text for § 30.3 to address these concerns.

Similarly, another commenter supported retaining the prohibition on religious discrimination but remarked that religious employers should have the ability to apply religious criteria when making workforce decisions. However, the commenter expressed concern that removing the language referring to legal standards and defenses applied under Title VII could prevent religious employers from invoking Title VII's exemptions in the apprenticeship context.

A commenter expressed concern that removing the detailed language currently in § 30.3 would leave SAAs with fewer tools to train sponsors and employers on compliance and to prevent discriminatory practices before they escalate to legal action. The commenter recommended that if finalized, the Department should offer guidance, training, and tools to address this concern.

A commenter recommended that the Department issue subregulatory guidance outlining when OA would exercise its authority to register apprenticeship programs in SAA States, as permitted under § 29.13(j)(2), in the context of SAAs found to be out of compliance with the proposed rule because of nondiscrimination policies that do not ''conform only'' to the rule. Refer to section V.F.7.a for additional commentary on State nondiscrimination laws and their conformity to the requirements of part 30.

Department Response: The Department agrees with the commenters' interpretation that § 30.3 requires program sponsors to comply with all applicable State laws that prohibit illegal discrimination on the delineated bases. The Department notes that there is a distinction between the language set out in § 30.3 and § 30.7. Under the final rule's revised language, § 30.7 clarifies that its provisions cover State laws, regulations, policies, and operational procedures specific to nondiscrimination or equal opportunity in apprenticeship. In this way, the Department intends for the scope of laws subject to § 30.7 to be narrower than § 30.3, as § 30.3 requires compliance with all applicable Federal and State laws prohibiting illegal discrimination on the listed bases. In response to the commenter's concern about undermining the Administration's goals if State law compliance is required, the Department notes that, absent the language in § 30.3, entities that serve as program sponsors will still be required to comply with applicable State laws as long as such laws have not been held to conflict with Federal law, regardless of whether the entity chose to become a program sponsor. Additionally, the language in § 30.5 directs Registration Agencies to assess compliance based on any final determinations of a sponsor's violation of an applicable nondiscrimination law made by an enforcement entity or court—a determination that would have been made regardless of the language in § 30.3. Thus, the final rule does not place any additional regulatory burdens or coverage requirements onto sponsors.

The Department appreciates commenters' concerns surrounding religious liberty and the availability of religious exemptions for program sponsors. The Department acknowledges that, under the United States' system of federalism, religious liberty protections are dependent on whether State or Federal law applies. The Department points out that, federally, Title VII of the Act and the ADA, provide exemptions for religious organizations, which would apply to all employers covered by those laws, including in the apprenticeship context. While Federal statutory protections for religious liberty do not apply to State nondiscrimination laws, many States have chosen to enact their own statutory and regulatory schemes to protect religious liberty and provide religious exemptions. For example, several States have enacted their own religious freedom laws that are modeled after the Religious Freedom Restoration Act.[52] The Department asserts that agencies including the EEOC and State FEPAs are better positioned to further address the applicability of religious exemptions as they enforce the applicable statutes.

Additionally, the Department notes that the provisions of part 30 have no bearing on the availability of religious exemptions under Title VII (or other nondiscrimination statutes), and that the Department will respect a court's determination that a sponsor has properly invoked an exemption when considering the sponsor's compliance with the standard in § 30.3. As such, in response to commenters requesting that the Department change the proposed text at § 30.3 to remove the requirement that sponsors must comply with State nondiscrimination laws, the Department declines to adopt the suggestion, but notes that the existing part 30 exemption provision is being retained in this final rule. This provision allows sponsors to request exemptions from part 30 requirements in writing, supported by an explanation of the

[52] 42 U.S.C. ch. 21B. *See, e.g.,* DOL, ''Workforce Discrimination Resources by State,'' *https://www.dol.gov/agencies/faith/workforce-discrimination-resources-by-state* (last visited June 26, 2026).

reasons for the request. Where a sponsor has been found to be in violation of a State law that the sponsor views as infringing on its religious liberties, the sponsor may request an exemption pursuant to § 30.8 from the Registration Agency and the Registration Agency will consider whether the sponsor has presented good cause sufficient to avoid deregistration on the grounds of such violation.

In response to the comment expressing concern that SAAs will have less compliance assistance and resources to help prevent illegal discrimination, the Department provides that it will engage in technical assistance as requested. Additionally, the Department notes that the relevant Federal and State enforcement agencies can engage in compliance assistance and may have guidance, training, and other resources available that covered entities can utilize in their compliance efforts.

3. Youth Apprenticeship

Comments: A commenter requested clarification or subregulatory guidance from the Department on how the proposed § 30.3's prohibition of discrimination based on age (40 or older) can be navigated when developing youth apprenticeship programs. The commenter said that while they are supportive of this provision to ensure no age discrimination is allowed, dedicated youth apprenticeship programs with upper age requirements at 24 may be considered discriminatory based on age. The commenter remarked that this is further challenging for instances where high school Career and Technical Education programs may seek to be sponsors of Registered Apprenticeship programs, but in most instances, a student cannot be in high school after age 21. The commenter elaborated that this tension is compounded by the fact that on April 2, 1996, the EEOC adopted a rule that ended the longstanding policy exemption for apprenticeship programs from coverage under the ADEA. The commenter noted that OA issued a policy in Circular 96–01 on May 30, 1996, which communicated that upper age limits on programs were no longer allowed, but this circular was rescinded on June 4, 2020, by Circular 2020–01.

Department Response: The Department appreciates the commenter's interest in expanding Registered Apprenticeship opportunities for youth. Under the final rule, what activity constitutes illegal discrimination on the basis of age is a matter for the EEOC to determine in their enforcement of the ADEA. Furthermore, the Department maintains that this part 30 rulemaking is not a suitable regulatory vehicle for addressing the topic of Federal registration of youth apprenticeship programs.

D. Section 30.4—Complaints

In the NPRM, the Department proposed to remove the complaint provision in the current part 30 regulation and to replace it with a substantially simplified complaint process set forth at proposed § 30.4. Under that proposal, the Registration Agency would direct individuals alleging unlawful discrimination to an enforcement authority with the appropriate jurisdiction and expertise to investigate compliance with Federal or State nondiscrimination statutes or regulations. Examples of such authorities include the EEOC, the U.S. Attorney General or a State Attorney General, and relevant State enforcement agencies (such as FEPAs). The Department proposed this change after determining that the existing part 30 complaint procedures are burdensome, difficult to navigate, and ineffective, and that Registration Agencies are less well-suited to investigating or resolving apprentice discrimination complaints than the enforcement entities identified in proposed § 30.4.

As explained in the NPRM, replacing a duplicative, apprenticeship-specific complaint mechanism with a straightforward referral process advances the Administration's deregulatory objective to eliminate unnecessary regulatory burdens, ensures that complaints are handled by agencies with the requisite expertise, and serves apprentices' interests by providing a single, clear avenue for filing complaints. Accordingly, for the reasons discussed in the NPRM and in response to comments discussed below, the Department is finalizing the provision with minimal edits. In response to comments discussed below, the Department is revising the proposed language to eliminates language in § 30.4(c) that could have been interpreted as only allowing SAAs to refer complaints to State FEPAs. The Department is also adding that a Registration Agency may refer complaints to any Federal or State enforcement entity with jurisdiction over discrimination issues. Under the revised language as adopted by this final rule, the Department is clarifying that complaints can be referred by any Registration Agency to the EEOC, the U.S. Attorney General, a State FEPA, or another Federal or State enforcement agency with jurisdiction over discrimination issues as appropriate. Furthermore, a complaint may be referred to several of these entities as appropriate.

1. Support for the Proposed Provision

Comments: A commenter expressed support for proposed § 30.4 and shifting enforcement of nondiscrimination laws and regulations to the EEOC, the U.S. Attorney General, and for an SAA, to its FEPA. The commenter stated that this change would eliminate duplicative oversight and enforcement by DOL without sacrificing necessary oversight and enforcement and still retaining the possibility of deregistration by DOL after a final determination of unlawful discrimination. The commenter also stated that nothing in the proposal would prohibit an apprentice from filing a charge of discrimination with the EEOC or State agencies directly.

Department Response: The Department appreciates the commenter's support for the proposed changes and agrees with the commenter that these changes would eliminate duplicative oversight and enforcement measures.

2. Concerns About Removing Registration Agency Authority

Comments: Several commenters expressed opposition to the proposal to eliminate the authority of Registration Agencies to investigate discrimination complaints. These commenters expressed concern that the proposal would eliminate the existing compliance review framework and restrict enforcement actions to cases where a final determination of discrimination had already been made by a court or enforcement entity, which would limit the ability of Registration Agencies to address discrimination effectively.

Several commenters further reasoned that referral-only enforcement would delay remedies, reduce the deterrent effect on noncompliant sponsors, leave apprentices unprotected during lengthy Federal investigations, severely restrict Registration Agencies' options for timely interventions, and erode the cooperative Federal-State framework that has long underpinned the success of the National Apprenticeship System. For example, one commenter said that requiring complaints to be referred to other agencies would mean that sponsors that discriminate would virtually never face deregistration because of how long final determinations will take to reach Registration Agencies. The commenter remarked that under Title VII, a party

alleging illegal discrimination can file a lawsuit in Federal court after completing the prerequisite administrative requirements, but the percentage of Federal EEOC or State FEPA investigations that result in a Federal court lawsuit is very small. Of these, only a small proportion become final through a court decision where an appeal is not filed, because most cases are settled. The commenter also said that the EEOC itself does not issue final determinations, but complainants must pursue their complaints in court after the EEOC makes a preliminary determination.

A commenter expressed concern that the proposal would render Registration Agencies as passive intermediaries and said that research suggests OA and SAAs are often able to resolve discrimination complaints with technical advice and by intervening informally. The commenter warned that such interventions, which the commenter described as timely and cost effective, may be lost under the proposed changes. The commenter further stated that under the proposed rule, if implemented, apprenticeship agencies may be less likely to become aware of potential misconduct because they would no longer be the primary recipient of complaints, thus they may be less likely to help resolve and address complaints. Another commenter stated that eliminating program complaint investigation authority without analysis of its impact on apprentices' ability to seek relief is inconsistent with the NAA's mandate, particularly in terms of how its impact on the timeline for relief for apprentices would affect the welfare of apprentices.

As a result of these concerns, several comments recommended that Registration Agencies should retain their authority to investigate and pursue remediation of discrimination complaints under the existing regulation. One commenter said the retention of this authority is particularly important for issues that implicate both nondiscrimination and broader part 29 compliance. Similarly, another commenter recommended that to align with the NAA's directive to safeguard apprentice welfare, the final rule should consider: (1) retaining investigative and enforcement authority for Registration Agencies to address complaints of discrimination, harassment, or intimidation; (2) enhancing agencies' capability to provide technical assistance in resolving issues with employers collaboratively before they escalate; and (3) clarifying referral protocols to ensure coordination with EEOC or State FEPAs.

Department Response: The Department disagrees with the concerns raised by these commenters. The Department has determined that investigation of discrimination complaints and related tasks are better left with the EEOC or State-level FEPAs because such agencies have the appropriate subject matter expertise and jurisdiction over such matters. For example, the EEOC is the most appropriate enforcement agency for making a determination that a program sponsor violated an applicable Federal nondiscrimination law. Registration Agencies, by contrast, are apprenticeship administrators whose primary responsibility is the registration, oversight, and promotion of Registered Apprenticeship programs. The Department therefore concludes that the investigation and adjudication of discrimination complaints should be conducted by entities specifically established for that purpose rather than by Registration Agencies operating under the NAA.

Under this final rule, once the Registration Agency is made aware of such a determination concerning a Registered Apprenticeship program sponsor, it may initiate appropriate administrative actions, including establishing a compliance action plan or initiating deregistration proceedings, as described in the section-by-section discussion of the nondiscrimination compliance and enforcement section at § 30.5 of this final rule.

The Department is unpersuaded that a referral-based framework will undermine apprentice welfare. To the contrary, the Department maintains that apprentice welfare is best served when allegations of unlawful discrimination are investigated by agencies with the expertise, procedural safeguards, and remedial authority necessary to resolve such claims. The EEOC, State FEPAs, the Department of Justice, and similar entities possess the expertise, jurisdiction, procedural safeguards, and remedial authority necessary to investigate discrimination claims and adjudicate alleged violations of Federal and State civil-rights laws. Registration Agencies, by contrast, lack these key capabilities. The Department is convinced that directing complainants to the appropriate enforcement authority better aligns discrimination enforcement responsibilities with the institutions specifically established to carry out those functions, rather than maintaining a parallel apprenticeship-specific process.

The Department also disagrees with some commenters' suggestion that the ability of Registration Agencies to provide informal technical assistance or facilitate voluntary resolutions justifies retaining investigative authority over discrimination complaints. While the Department recognizes that Registration Agencies have occasionally assisted sponsors and apprentices in resolving workplace disputes, the commenters' observations merely demonstrate that Registration Agencies have historically referred many discrimination complaints to appropriate Federal or State enforcement agencies while providing ancillary assistance where appropriate. Indeed, the report cited by one commenter noted that SAAs frequently refer discrimination complaints to State or Federal FEPAs, particularly where the SAA lacks the means or expertise to investigate the allegations independently.[53] This report thus confirms that the referral-based approach proposed in the NPRM is already common practice for both OA and SAAs. The final rule formalizes and clarifies this practice by directing discrimination complaints to the agencies specifically charged with enforcing nondiscrimination laws.

The Department further maintains that significant administrative consequences, including the development of compliance action plans, suspension of the right to register new apprentices, or deregistration, should be predicated upon findings made by entities possessing legal authority to investigate and adjudicate claims of unlawful discrimination. Registration Agencies should not independently make de facto determinations regarding violations of Federal or State nondiscrimination laws, which risks inconsistent enforcement and conflicting interpretations of nondiscrimination requirements.

Similarly, the Department disagrees with some commenters' assertions that a referral-based approach undermines the NAA's directive to safeguard the welfare of apprentices. The Department has determined that referring complaints alleging illegal discrimination to appropriate enforcement agencies will better safeguard the welfare of apprentices by ensuring that the substance of the complaint will be investigated by entities with the appropriate expertise

[53] Zach Boren and Shruti Nayak, ''State-Level Policies Develop Skilled Workforces through Registered Apprenticeship Programs Lessons from the Office of Apprenticeship and Four State Apprenticeship Agencies,'' Urban Institute, Apr. 2025, *https://www.urban.org/sites/default/files/2025-04/State-Level%20Policies%20Develop%20Skilled%20Workforces%20through%20Registered%20Apprenticeship%20Programs.pdf.*

and providing apprentices with a legitimate opportunity to receive individualized relief in response to the alleged illegal conduct. The Department notes that such individualized forms of relief are available under Title VII and other Federal statutes, but have never been included in the part 30 regulation.

Separately, in response to one commenter who asserted that the EEOC does not issue final determinations and that complainants must pursue complaints in court after a preliminary determination by the EEOC, the Department maintains that this and other similar enforcement agencies are the most appropriate venues for apprentices to raise allegations of discriminatory conduct by an apprenticeship program. In response to the commenter raising concerns about delayed enforcement, while the Department acknowledges that it is possible that the referral of complaints to other agencies may take additional time, such referrals nevertheless ensure that such complaints are investigated and handled appropriately, and that determinations are made accurately by entities with the relevant expertise.

3. Concerns About Reliance on Complaints

Comments: Some commenters expressed concern about the proposal's reliance on complaints to address discrimination. These commenters stated that most individuals who experience discrimination do not file formal complaints due to, among other reasons, fear of retaliation, a lack of resources, or concerns that final determinations are rare and often take years to resolve. One commenter cited research which it found that only between 6 and 13 percent of harassment incidents are formally reported in the construction trades, in part due to fears of retaliation or that their compliant will not be acted upon. Some commenters also asserted that relying on a complaints-driven civil rights compliance system would place the burden of preventing discrimination on apprentices, and maintained that such a system would be ineffective and unfair.[54] Another commenter added that the EEOC recommends that multiple people in an organization should be authorized to receive complaints, so that complainants have more reporting options.

Department Response: The Department understands commenters' concerns that some apprentices who experience discrimination may choose not to file formal complaints. The Department is not persuaded, however, that retaining apprenticeship-specific compliance reviews would meaningfully uncover instances of unlawful discrimination.

The compliance reviews conducted under the prior regulation were principally designed to assess compliance with the affirmative action requirements contained in part 30, including utilization analyses, utilization goals, action taken to meet such goals, and related recordkeeping requirements. As discussed elsewhere in this preamble, the Department has determined that these requirements were burdensome and, in many cases, likely unlawful. While there is no longer a need to conduct compliance reviews that assess compliance with the rescinded provisions of part 30, the final rule at § 30.5 does preserve a mechanism for monitoring compliance with the revised part 30 requirements pursuant to the program review provision under 29 CFR 29.6.

While affirmative action requirements can be assessed through the review of records and other objective indicators, individual allegations of intentional discrimination frequently involve fact-specific disputes concerning motive, intent, harassment, or other conduct directed at particular individuals. Such matters are frequently identified only through complaints, witness testimony, and investigative procedures conducted by agencies and courts with expertise in enforcing nondiscrimination laws. It is unsurprising that Congress and State legislatures have generally relied on complaint-driven processes to enforce nondiscrimination laws. Therefore, allegations of unlawful discrimination are more appropriately addressed through the established Federal and State nondiscrimination enforcement framework than through apprenticeship-specific compliance reviews.

Commenters' concern over the chilling effect on employees who file complaints is addressed by Federal and State nondiscrimination laws that prohibit retaliation against individuals who file complaints or otherwise participate in protected activities. If a sponsor is found to have engaged in unlawful retaliation under one of these laws or any other applicable nondiscrimination law, the EEO agency and the Department can hold the sponsor accountable pursuant to revised § 30.5. Finally, in response to one commenter's concern, the Department also clarifies that nothing in the rule prohibits sponsors from designating multiple people within their organizations as being responsible for receiving complaints related to nondiscrimination law.

4. Comments Alleging Certain Harmful Impacts That Would Result From the Department's Proposed Streamlining of Enforcement and Oversight Activities

Comments: A commenter asserted that the proposed rule would reduce Registration Agency oversight and intervention in cases of discrimination and harassment and would therefore likely increase non-completion of apprenticeship programs, preventing employers and labor markets overall from the benefits of investments in apprenticeship. The commenter also cited research finding that the lifetime costs of workplace sexual harassment and retaliation were particularly high for those pushed out of well-paid occupations, reaching $1.3 million for an apprentice in the construction trades.

Another commenter also raised questions on how Registration Agencies would become aware of final determinations. One commenter recommended that the Department consider data sharing practices or subregulatory guidance on how it will receive final judgments and pursue enforcement actions for consistency.

Department Response: While these commenters raised concerns regarding the proposed rule's adverse impacts upon apprenticeship completion rates and the lifelong costs of discrimination and harassment, they did not provide persuasive evidence that the compliance review provisions in the existing part 30 regulation have been effective in mitigating the prevalence of discrimination and other forms of egregious conduct in the apprenticeship workplace. As with discrimination, it is unclear how, for instance, compliance review can detect unreported harassment allegations. Since apprentices will retain the opportunity to file complaints in response to such conduct, and will have a more streamlined and clear approach to filing such complaints, the Department does not agree that the proposed regulatory revisions will harm completion rates or will result in an increase in the prevalence of discrimination or harassment in apprenticeship programs.

The Department received comments requesting clarity regarding how Registration Agencies will be made aware when a final determination from an enforcement entity or court regarding a violation of applicable nondiscrimination against a program's apprentice or applicant for apprenticeship. The Department appreciates these comments and has included a provision in the ''Nondiscrimination Compliance and Enforcement'' section of this final rule,

at § 30.5(b)(1) and (2), that requires sponsors to report any final determinations that an applicable nondiscrimination law has been violated with respect to an apprentice or applicant for apprenticeship to the Registration Agency within 60 days. The Department asserts that this requirement will strengthen transparency and accountability regarding sponsors' compliance with applicable nondiscrimination laws.

Further, the Department maintains that there are several ways Registration Agencies can work with the EEOC or State FEPAs and the court system to be informed of final determinations of illegal discrimination against apprentices or applicants to an apprenticeship program. For example, Registration Agencies could review court filings or could send inquiry letters to the relevant Federal and State FEPAs as part of the program review process. To the extent possible and appropriate, Registration Agencies are also encouraged to develop MOUs and other partnerships with Federal and State FEPAs to receive notifications of final determinations concerning nondiscrimination violations against apprentices or applicants to an apprenticeship program by Registered Apprenticeship program sponsors from such governmental entities or establish a mechanism by which Registration Agencies can make inquiries. The Department maintains that the addition of a self-disclosure requirement for sponsors whose program is the subject of a final determination will facilitate Registration Agencies' awareness of any relevant nondiscrimination law violations among the Registered Apprenticeship programs they oversee and declines to add any specific requirements for Registration Agencies to establish information-sharing agreements to verify such violations. Given that different options may be suitable based on different administrative structures across States, the Department maintains that imposing a uniform approach for Registration Agencies to conduct any additional verification of such information through regulatory text is not appropriate.

5. Other Administrative Concerns Related to Complaints

Comments: A commenter remarked that, among other issues, one concern with requiring complaints to be referred to State FEPAs is that in two SAA States, Alabama and Arkansas, there is no such State agency, and that in some other SAA States, there may be multiple applicable agencies, but the proposed rule does not provide clarity on identifying the correct agency. The commenter also expressed concern about the lack of discretion for Registration Agencies allowed under the proposed rule, specifically posing a hypothetical where the EEOC's budget were to shrink to the point where it could not accept additional complaints from OA. Additionally, another commenter expressed concern that the proposed changes would place investigative and resource strains on already under-resourced agencies.

A commenter warned that the proposed rule's reliance on complaints would largely inhibit Registration Agencies' ability to perform compliance reviews. The commenter stated that while the rule nominally retains the compliance review provision, the Registration Agency would not be able to initiate any enforcement action against a sponsor unless there was a final determination of wrongdoing, which would rely on the filing of complaints by apprentices. As a result, the commenter warned that the proposed reliance on complaints would mean that Registration Agencies would have no authority to take any action if they observe blatant discrimination that violates part 30 while they are conducting a part 29 review unless and until there is a final determination.

Department Response: Regarding the concern that some States do not have a State FEPA, as the preamble above clarifies, this final rule does not limit SAA States to referring complaints to their State FEPA. Under the final rule, SAA states may refer the complaint to any Federal or State agency with appropriate subject matter expertise and jurisdiction over matters concerning illegal discrimination. In response to this concern, and as noted above, the Department has changed the regulatory text at § 30.4 in this final rule to clarify that the list of enforcement entities is not limited to the EEOC, U.S. Attorney General, or State FEP, and that Registration Agencies may refer the complaint to any other appropriate enforcement entities with appropriate subject matter expertise and jurisdiction. In addition, the Department changed the regulatory text at § 30.4 to clarify that Registration Agencies are not limited to referring complaints to one enforcement entity, and may refer complaints to multiple entities as appropriate.

In response to commenters' concerns that the EEOC is facing restraints on its resources that could impact its capacity to handle complaints effectively, the Department notes that the budgetary resources and staffing capacity of the EEOC are determined by Congress and not the Department. Additionally, the Department has received only a small number of discrimination complaints from apprentices under the existing regulation, and notes that its longstanding practice has been to refer such complaints to the EEOC as the appropriate Federal agency for determining whether an allegation of discriminatory conduct has merit. EEOC data indicates that the agency received over 88,000 charges of workplace discrimination in FY 2024 alone, whereas the Department has received fewer than 60 complaints of discrimination under part 30 from apprentices since the beginning of FY 2021.[55]

Finally, the Department does not share commenters' concerns that the proposed rule would limit the ability of Registration Agencies to initiate any enforcement actions against a sponsor unless there was a final determination of illegal discrimination. The Department maintains that it is appropriate to defer adverse administrative actions under part 30 against a program sponsor until the Department has received confirmation that a violation of an applicable nondiscrimination law has occurred from an enforcement agency with the appropriate subject matter expertise and jurisdiction to make such determinations.

E. Section 30.5—Nondiscrimination Compliance Reviews and Enforcement

In the NPRM, the Department proposed eliminating the extensive EEO and affirmative action requirements in the current part 30 regulation and revising the existing compliance and enforcement framework in §§ 30.13 and 30.15 by consolidating and simplifying those provisions into a new § 30.5. Under the current rule, the Department conducts routine ''EEO compliance reviews'' to evaluate sponsors' adherence to the comprehensive set of requirements across part 30, with particular attention to the development and implementation of an affirmative action program required for programs with five or more apprentices under current § 30.4, the contents of which are detailed in §§ 30.5 through 30.9 and 30.11. Accordingly, the Department proposed to merge the compliance review and enforcement components of the regulation into a single section—''Nondiscrimination compliance reviews and enforcement''—at proposed § 30.5.

[55] EEOC, ''Enforcement and Litigation Statistics'' *https://www.eeoc.gov/data/enforcement-and-litigation-statistics-0* (last visited June 26, 2026).

This proposal was designed to focus Departmental resources—principally OA staff's expertise in apprenticeship program quality—on labor standards rather than on making legal determinations regarding compliance with the extensive EEO and affirmative action obligations in the existing part 30 regulation. Consistent with this approach, the Department proposed to rely solely on final determinations issued by an enforcement entity or court with jurisdiction over the matter. The Department anticipated that deferring to the authority and expertise of these entities to decide whether sponsors or other apprenticeship stakeholders (such as employers participating in Registered Apprenticeship programs) have engaged in unlawful discrimination under applicable Federal or State statutes or regulations would yield a more efficient oversight system, strengthen accountability, provide clearer expectations for stakeholders, and result in more appropriate and effective remedies for individuals subjected to discrimination, harassment, or other unlawful treatment in Registered Apprenticeship.

The Department also proposed that compliance reviews related to the streamlined part 30 nondiscrimination requirement occur alongside the program's routine review for compliance with part 29, and that Registration Agencies initiate enforcement actions for violations of the part 30 nondiscrimination requirement only after a court with jurisdiction over employment discrimination (including alleged discrimination involving apprentices or applicants to apprenticeship programs) issues a final, non-appealable determination finding a violation of applicable nondiscrimination laws or regulations. This sequencing was intended to ensure that Registration Agencies do not act while related matters are pending adjudication, consistent with due process principles. Proposed § 30.5(c) outlined the enforcement initiation process, including collaborating with the sponsor to develop a compliance action plan that aligns with the remedy prescribed by the enforcement entity or court. Under proposed § 30.5(c), if a Registration Agency determines that a sponsor is not carrying out the compliance action plan in accordance with the enforcement entity's or court's remedy, the Agency may take additional enforcement steps, including suspending the sponsor's authority to register new apprentices or commencing formal deregistration proceedings under 29 CFR 29.8.

The Department concluded that this streamlined compliance and enforcement framework preserves Registration Agencies' essential role in conferring the benefits of registration and, when necessary, rescinding registration. The Department received several comments requesting clarity on how the proposed compliance framework would work in practice; specifically, how Registration Agencies would be made aware when an enforcement entity or court makes a final determination that an applicable nondiscrimination law was violated with respect to an apprentice or an applicant for apprenticeship. The Department appreciates these comments and agrees that additional clarity on the enforcement framework will benefit stakeholders and support transparency and accountability regarding Registered Apprenticeship program sponsors' compliance with applicable nondiscrimination laws. Accordingly, in this final rule, the Department has added a requirement that sponsors notify the Registration Agency of any final determinations regarding a violation of an applicable nondiscrimination law with respect to an apprentice or applicant for apprenticeship made by a relevant enforcement entity or court within 60 days at § 30.5(b)(1). In addition, at § 30.5(b)(2) of this final rule, the Department has added a requirement for sponsors to disclose the details of any remedies prescribed by the enforcement entity or court to the Registration Agency. The Department has determined that this additional disclosure requirement will facilitate the requirement that the Registration Agency work with the sponsor to develop a compliance action plan that aligns with any such remedy set forth in § 30.5(c) of this final rule. Aside from these additions to the final rule, the Department is adopting § 30.5 as proposed.

Support for the Proposed Compliance Review and Enforcement Provision

Comments: A commenter expressed support for the proposed review and enforcement provision. This commenter reasoned that empowering sponsors to tailor compliance plans to their unique operations, rather than imposing a rigid, one-size-fits-all model, would more effectively promote adherence to Title VII and other nondiscrimination laws in apprenticeship programs. This commenter expressed further support for the proposed enforcement regime, stating that the proposed rule appropriately recognizes that Congress established particular enforcement regimes for nondiscrimination laws and established specific remedies, and that it does not seek to add new enforcement regimes or sanctions on top of those established by Congress. However, the commenter expressed concern about the discretion that would be granted to Registration Agencies to assess whether a compliance plan is being followed and when a violation is resolved, stating that these determinations should remain the purview of the court or agency that issued the original order.

While expressing general support for the provision, a commenter recommended that the Department consider establishing a new regulatory provision that creates a ''rebuttable presumption of compliance'' for programs that demonstrate adherence to key voluntary practices in nondiscrimination and equal opportunity. This commenter remarked that this approach is used successfully by other agencies, and suggested that this approach could assist in addressing reliance interests of existing sponsors who are already complying with the 2016 final rule and reduce the overall regulatory burden while still providing regulatory incentives for programs to exceed the minimum nondiscrimination requirements with good practices and behaviors. The commenter provided alternative regulatory text to effect this suggestion.

Department Response: The Department appreciates these supportive comments. The Department understands the concern regarding the wide degree of discretion available to Registration Agencies under the proposed rule. The Department agrees that it is crucial that there be consistency across Registration Agencies in determining if compliance plans are being followed and that Registration Agencies defer to the remedial actions that enforcement agencies direct sponsors who have been found to have engaged in discriminatory conduct to undertake. In response to comments discussing the need for compliance action plans to adhere to the remedies to nondiscrimination violations provided by enforcement entities or courts, the Department has added a disclosure requirement for sponsors whose programs are the subject of such final determinations. This disclosure requirement will ensure that Registration Agencies are aware of the remedy provided by the enforcement entity or court, and that any compliance action plans established to address violations of nondiscrimination laws are suitably aligned with any such remedies. The Department confirms that the

enforcement framework established in this final rule does not add any new enforcement mechanisms beyond those established by Congress.

In response to a commenter's suggestion to create a ''rebuttable presumption of compliance,'' the Department maintains that the proposed enforcement framework would effectively establish such a presumption of compliance, as a program only would be found noncompliant if there is a final determination that the program violated an applicable nondiscrimination law.

1. Comments on the Status Quo and the Department's Reasoning

Comments: One commenter stated that compliance reviews serve important functions in an enforcement scheme that are not and cannot be served by relying solely on complaints. The commenter remarked that apprentices and applicants are not always aware of discriminatory practices, especially with regard to recruitment and hiring decisions, and that compliance reviews can uncover such practices. The commenter further argued that the Department's reasoning for the proposed change, that Registration Agency staff do not have the required expertise to enforce nondiscrimination requirements, does not stand up to scrutiny. The commenter said that the Department underestimates staff abilities and knowledge; that the Department has substantial resources it can provide to Registration Agency staff to train and support them in their enforcement of nondiscrimination requirements; and that while other enforcement authorities may have more expertise in nondiscrimination law, they are unlikely to have expertise in apprenticeship, which may be necessary to understand forms of discrimination unique to the apprenticeship setting. The commenter also stated that the Department has extensive resources in other departments, mainly the Solicitor's Office, that could provide training, back-up, assistance, and legal analysis to Registration Agency staff and that the Department did not evaluate utilizing the Solicitor's or other existing resources as an alternative to the proposed rule.

Another commenter stated that the proposed rule is correct in arguing that OA lacks the capacity to properly enforce the EEO regulations under 29 CFR part 30, and there are not enough career staff to perform compliance reviews, as required under § 30.13. However, the commenter did not agree that Registration Agency staff lack the knowledge and experience to ensure compliance with the affirmative action requirements. The commenter concluded that any challenges with enforcing the existing framework could be solved by hiring additional staff to perform compliance reviews of affirmative action requirements or utilizing SAAs to perform compliance reviews.

Department Response: In response to these comments, the Department reiterates that, as a general matter, FEPAs are better suited than Registration Agencies to make authoritative administrative determinations regarding whether a program sponsor's hiring practices or other workplace practices constitute illegal discrimination against apprentices or applicants. One commenter acknowledged this reality, agreeing with the Department that FEPAs possess more subject-matter expertise in assessing and identifying discriminatory conduct by employers. Accordingly, the Department has determined that it is wasteful and duplicative for a Registration Agency to conduct investigations into allegations of illegal discrimination, to attempt to resolve issues locally, or to make determinations with respect to discriminatory workplace practices when a referral to the EEOC or other FEPA with subject-matter expertise may be the most appropriate course of action. The Department maintains that providing additional training on nondiscrimination law for Registration Agency staff would be an inefficient use of limited agency resources, particularly since there are other enforcement agencies, such as the EEOC and State FEPAs, that have been directed by Federal and State laws to evaluate allegations of illegal discrimination.

In response to the commenter who suggested Registration Agencies' expertise in apprenticeship matters is useful in determining whether discrimination has occurred in a Registered Apprenticeship program, the Department notes that nothing in this final rule prevents Registration Agency staff from responding to inquiries from enforcement agencies during their investigation. The commenter did not provide any concrete examples of how the expertise of Registration Agencies regarding apprenticeship matters is specifically beneficial in investigating discrimination complaints. The Department maintains that investigating complaints alleging discrimination against apprentices should not differ from the investigation of complaints in other employment settings.

F. Section 30.6—Reinstatement of Program Registration

The Department proposed to retain the ''Reinstatement of program registration'' provision at current § 30.16. As part of the streamlined part 30 framework under the NPRM, sponsors would retain the right to request reinstatement of registration by demonstrating—to the Registration Agency and to the court that issued the final determination of a violation of applicable nondiscrimination law or regulation—that the program was being operated in compliance with nondiscrimination law and this part. The proposal preserved the existing requirement that sponsors present ''adequate evidence'' of compliance with part 30. Because violations under part 30 would have been confirmed by a court of competent jurisdiction, sponsors would have been required to provide evidence satisfactory to that court that they had addressed the issues underlying the nondiscrimination complaint, including implementing any ordered remedies. Retaining a reinstatement provision was consistent with the proposed compliance approach and supported the Department's objective, in streamlining the regulation, to enhance regulatory flexibility for Registered Apprenticeship stakeholders.

The Department did not receive public comments related to proposed § 30.6. Accordingly, for the reasons discussed in the NPRM, the Department finalizes the provision as proposed.

G. Section 30.7—State Apprenticeship Agencies

In the NPRM, the Department proposed to rescind parts of current § 30.18, the provision covering SAAs, in the existing part 30 regulation. The Department explained that the current part 30 regulation, and the existing regulatory requirements for SAAs under part 30, have not been fully successful in achieving a uniform national standard for nondiscrimination and equality of opportunity in Registered Apprenticeship, as evidenced by the variations in content and requirements in the State EEO plans required by existing § 30.18. Given the inconsistencies the existing part 30 regulation has created across SAAs, the Department proposed a new section for SAA requirements related to the part 30 regulation, at proposed § 30.7, that reflects the Department's determination that sponsors operating Registered Apprenticeship programs should not be required to comply with excessive and legally suspect requirements that only apply to Registered Apprenticeship and

not their general workforce. In the NPRM, the Department argued that proposed § 30.7 would facilitate the establishment of a uniform Federal standard governing nondiscrimination in Registered Apprenticeship and reduce administrative burdens for SAAs by stipulating that compliance with applicable Federal and State nondiscrimination laws is sufficient to conform with the requirements of an updated part 30 regulation.

As proposed, § 30.7(a) would have required that, within 1 year of the effective date of the final rule, all SAAs seeking to obtain or maintain recognition under current § 29.13 must ensure that their State's apprenticeship laws, regulations, policies, and procedures specifically pertaining to nondiscrimination for apprentices ''conform only to the requirements of this part [30].'' This provision was proposed to relieve SAA States from having to impose the complex, burdensome, and legally suspect set of regulatory obligations that are found in current version of part 30 and would substitute a straightforward requirement that such states conform to the nondiscrimination requirements found in applicable Federal and State laws. The Department explained that the purpose of this proposed provision was to establish a nationally uniform standard for nondiscrimination protections across all States participating in the National Apprenticeship System.

In proposing to establish a uniform Federal standard at proposed § 30.7(a), the Department sought to ensure that State laws and regulations concerning nondiscrimination or equality of opportunity in Registered Apprenticeship were coextensive in their substance and scope with the requirements of the proposed revision to part 30 and consistent with Federal and State nondiscrimination laws. The Department explained that attaining a uniform standard across all States would be particularly helpful for sponsors that register and operate their programs in multiple States, and would foster an environment that is conducive to accelerating the expansion of Registered Apprenticeship programs. In addition, proposed § 30.7(a) would have allowed States to seek an extension for ''good cause'' to provide needed flexibility for States with differing legislative or regulatory processes to enact and implement laws that conform only to the requirements stipulated at proposed § 30.7.

Proposed § 30.7(b) and its subordinate paragraphs set forth the elements of State plans for nondiscrimination in apprenticeship for States seeking new or continued SAA recognition. Proposed § 30.7(b)(1)(i) stipulated that State plans include all of a State's statutes, regulations, and policies pertaining specifically to nondiscrimination in apprenticeship, and that such statutes, regulations, and policies conform only to the requirements of the proposed part 30. The Department explained that this language would help to prevent operational fragmentation among State-registered programs and would ensure consistent application of nondiscrimination standards. Proposed § 30.7(b)(1)(ii) further stipulated that all State-registered programs comply with a State's Department-approved State plan within 180 days from the date that the Department approved the State plan submitted under proposed § 30.7(a). The Department determined that a 180-day compliance window would allow for an orderly and timely transition to full implementation at the program level, particularly since sponsors must already be operating their apprenticeship program in compliance with the applicable Federal and State nondiscrimination laws.

Proposed § 30.7(b)(2) mirrored the purpose of existing § 30.18(a)(2)(i-iii) in outlining the review process that OA will undertake upon receipt of the State plan, including providing technical assistance to support conformity with Federal regulations. Similarly, proposed § 30.7(b)(3) stipulated that if an SAA State did not submit a revised State plan that adequately responded to OA's provision of technical assistance on nonconformity issues within 90 days, OA may initiate derecognition proceedings set forth in § 29.14 and proposed § 30.7(e) to formally derecognize the SAA. The Department explained that this provision was intended to provide both due process and accountability for the State. Proposed § 30.7(b)(4) reaffirmed the requirement at existing § 30.18(a)(4) that any subsequent amendments to the State plan for nondiscrimination in apprenticeship must be submitted to the OA Administrator for review and approval prior to implementation to promote alignment between State plans and the Federal nondiscrimination framework described herein.

The recordkeeping requirements stipulated by proposed § 30.7(c) largely replicated the SAA recordkeeping obligations currently found in § 30.18(b), which require a recognized SAA to keep records pertaining to program compliance reviews, complaint investigations, and any other records pertinent to a determination of compliance with the part 30 regulation. These records must be maintained for five years from the date of their creation. The proposed recordkeeping provision was intended to reinforce OA's ability to continue overseeing and auditing compliance over time, including by requiring SAAs to maintain adequate documentation to enable OA to make informed decisions about SAAs' recognition status.

Proposed § 30.7(d)(1) stated that OA would retain full authority to conduct compliance reviews of all registered programs for Federal purposes, even programs registered by an SAA. Similarly, proposed § 30.7(d)(2) reiterated that any SAA that fails to comply with the requirements of this proposed rulemaking would be subject to deregistration proceedings as provided in the part 29 regulation at §§ 29.8(b) and 29.10. The Department explained that the rescission of existing § 30.18(c)(2) and (4)(i) through (iii) was intended to align with proposed § 30.4, which proposed a significantly streamlined complaints framework for complaints alleging illegal discrimination against apprentices. The Department determined that these revisions would more efficiently deploy agency resources and would prevent duplication of investigatory efforts with those civil rights enforcement agencies that possess the statutory authority and expertise to conduct such inquiries. Under this approach, the Department would no longer independently investigate or resolve complaints of discrimination in Registered Apprenticeship. However, OA would retain the authority to refer complaints to appropriate civil rights enforcement agencies (under proposed § 30.4), and to take appropriate enforcement action (under proposed § 30.5) based on another agency's findings regarding discriminatory conduct by program sponsors.

Proposed § 30.7(e) replicated the content of current § 30.18(d). This derecognition provision may be utilized by the Department in appropriate circumstances to assure full conformity by SAA states with Federal nondiscrimination obligations contained in this part.

The Department received some public comments on proposed § 30.7, with some focused on the proposed standard that State laws, regulations, and policies on nondiscrimination in apprenticeship conform only to the revised part 30 regulation. The Department considered all public comments, including comments discussing the proposed ''conform only to'' standard for SAAs, in developing this final rule. In response to concerns raised by public commenters,

the Department has made adjustments to the final regulatory text at § 30.7, including changing the standard to require that SAAs' State laws and regulations ''conform to'' the revised part 30 regulation, and specifying in the regulatory text throughout § 30.7 that such standard applies to State laws and regulations that pertain specifically to nondiscrimination or equal opportunity in apprenticeship. The Department also clarified its requirements for the content of State plans for nondiscrimination in apprenticeship necessary for recognition or continued recognition. These changes to the final rule regulatory text are described below in the Department's responses to public comments on this proposed provision, as are instances where the Department is adopting the regulatory text proposed in the NPRM.

1. Comments on the Proposed Requirement That State Laws Relating to Nondiscrimination in Apprenticeship Must ''Conform Only to the Requirements of [Part 30]'' (§ 30.7(a))

Clarification of the ''Conform Only to'' Requirement

Comments: A commenter expressed concern that the proposed rule did not describe how SAAs' autonomy would be maintained or clarify the extent to which it would supersede SAAs' prerogatives for addressing specific needs within their jurisdictions. Another commenter criticized the proposed provision as contradicting the cooperative federalist model of the NAA. These commenters recommended allowing SAAs to continue exercising their current level of apprenticeship system oversight to preserve innovation and local regulatory responsiveness. A group of commenters opined that the NPRM contains contradictory statements about States' ability to establish their own nondiscrimination laws (*e.g.,* that States have the ability to establish nondiscrimination laws but that States must ''conform only'' to part 30) and expressed concern that, as written, the proposed rule would create confusion about the interaction of State and Federal laws, thereby undercutting States' rights. One commenter requested that the Department clarify whether SAAs are prohibited from retaining or enforcing additional EEO-related provisions, how the Department would treat enforcement of requirements that are ''in addition to'' but not inconsistent with part 30, and what options would be available to sponsors in SAA States where such additional EEO-related provisions are being enforced.

One commenter requested that the Department provide guidance on situations where apprenticeship programs may be subject to conflicting State and Federal requirements, such as if a State maintains nondiscrimination provisions that go beyond the streamlined Federal requirements. This commenter recommended that the Department establish clear procedures for resolving such conflicts, adding that failure to do so could burden sponsors and deter prospective sponsors from registering their programs. This commenter also requested that the Department clarify that the requirement for regulatory uniformity would be confined to part 30 nondiscrimination requirements, and not expand to apprenticeship registration requirements under part 29. The commenter reasoned that the flexibility of the existing OA–SAA system is important for allowing programs to reflect local- and State-level labor market conditions, trade-specific considerations, and collective bargaining agreements, such as setting wages appropriate to local cost of living and journeyworker-to-apprentice ratios and training curricula appropriate for an occupation's safety and training requirements. The commenter also requested that the Department affirm that the proposed rule would not override State laws or policies governing apprenticeship program standards outside the scope of EEO requirements.

One commenter expressed support for the Department taking steps to ensure that SAAs conform to Federal standards and do not discriminate against merit-based apprenticeship programs. Another commenter, which expressed support for this provision and recommended removing the State law requirement from the § 30.3 nondiscrimination standard, opined that the Department may need to modify the provision to clarify that sponsors are not obligated to comply with State nondiscrimination requirements where they go beyond or conflict with Federal requirements.

Some commenters opposed the provision at proposed § 30.7(a), arguing that it would improperly impede States' constitutional authority to implement their own State laws and programs that meet local needs. Some commenters asserted that this change would set a ''concerning'' precedent for undermining States' rights. One commenter expressed opposition to what it characterized as the Department's effort to reduce proactive and innovative policymaking at the State level. This commenter opined that women's participation rate in apprenticeships varies widely across States, but that women have made significant strides in high-paying fields in SAA States due to proactive policies, such as data analysis and reporting, research, funding, and cooperation among industry stakeholders; the commenter concluded that limiting States' ability to innovate and take initiative would stifle these gains.

A commenter expressed opposition to limiting States' authority to promote EEO and advance civil rights beyond Federal requirements. The commenter reasoned that the NAA contemplates shared authority between the Federal Government and the States. This commenter asserted that the NAA's language on shared authority means that States can meet or exceed the minimum requirements set by OA, adding that States have implemented additional protections, such as for marital status and gender identity. The commenter characterized the proposed conformity requirement as improper overreach.

Another commenter expanded on these sentiments, arguing that the NPRM exceeds the Department's authority under the NAA by restricting the ability of States to go above and beyond the Federal rules for preventing discrimination, and reasoning that, while Congress may preempt State laws, it declined to do so with respect to apprenticeship standards. This commenter opined that the plain meaning of the statute is that States have their own authority to effectuate standards of apprenticeship, and that Federal requirements are a floor that States must meet, not a ceiling they cannot exceed. The commenter further asserted that the rule would force many SAAs to abandon their unique protective nondiscrimination and affirmative action requirements.

While similarly arguing that the Congress did not intend for the NAA to have a preemptory effect, a group of commenters asserted that Title VII expressly disavows preemption of State nondiscrimination laws, adding that a State law exceeding the proposed rule's narrow standards does not mean that there is a conflict with Federal law warranting preemption.

Department Response: The Department appreciates commenters' concerns and requests for clarity as to the scope of this rule's nondiscrimination standard and SAA conformity. Upon review and analysis of the comments, the Department views it as necessary to clarify its intent regarding the applicability of the conformity analysis to State laws, regulations, or policies that specifically pertain to nondiscrimination in Registered Apprenticeship. The Department intends to focus solely on

any additional nondiscrimination or equal opportunity requirements imposed upon sponsors that are specific to Registered Apprenticeship. Because SAAs are recognized by the Department to register apprenticeship programs for Federal purposes, the Department is exercising its authority under the NAA to review State requirements that are specific to Registered Apprenticeship to determine conformity with Federal requirements. In other words, the Department is not purporting to regulate generally applicable State nondiscrimination laws and requirements but rather to ensure that, in exercising the Department's delegation of authority to register apprenticeship programs for Federal purposes to SAAs, such delegated authority is not provided to States with nondiscrimination or equal opportunity laws and requirements that apply specifically to Registered Apprenticeship that conflict with Federal nondiscrimination law or the overall purpose of the NAA. This is in furtherance of the Department's interest in uniformity within the Registered Apprenticeship system, reduced burden on sponsors, and facilitation of the growth of Registered Apprenticeship. Thus, the Department only will consider State laws and requirements specifically pertaining to nondiscrimination or equal opportunity in apprenticeship when determining whether to confer initial or continued recognition to an SAA under the revised part 30 regulation.

To that end, and to address commenters' concerns about the interaction of Federal and State nondiscrimination requirements, the final rule modifies § 30.7(a) to clarify that § 30.7 of this final rule only applies to State statutes, regulations, policies, and operational procedures that specifically pertain to nondiscrimination or equal opportunity in apprenticeship. This refers to those nondiscrimination or equal employment requirements that apply to sponsors by virtue of their participation in the Registered Apprenticeship system; it does not refer to laws that specifically include program sponsors among the covered entities but that do not impose obligations that are unique to such sponsors. This modification is responsive to commenters' concerns that the Department's proposed language sought to infringe upon States' authority to regulate nondiscrimination requirements in their States, which may exceed Federal nondiscrimination laws, and clarifies the Department's intent to analyze any additional nondiscrimination or equal opportunity requirements that are specific to Registered Apprenticeship. As stated throughout the preamble, with this final rule, the Department intends to remove burdensome, duplicative, and legally questionable requirements for Registered Apprenticeship program sponsors that discourage or disincentivize sponsors from participating in Registered Apprenticeship.

This change to the final rule at § 30.7 clarifies that the Department will review State-level laws, regulations, and policies specific to nondiscrimination or equal opportunity in apprenticeship when assessing a State's request to obtain or retain recognition as an SAA. SAAs must include any State laws, regulations, or policies that contain nondiscrimination or equal opportunity requirements specific to Registered Apprenticeship in their State plans for nondiscrimination in apprenticeship so that the Department can assess whether any apprenticeship-specific requirements are unduly burdensome, unlawful, or detrimental to the expansion of Registered Apprenticeship opportunities for all qualified individuals. The Department does not intend to preempt State nondiscrimination laws; however, it does intend to create a uniform Federal standard for nondiscrimination and equal opportunity in Registered Apprenticeship that applies to SAAs seeking to register apprenticeships for Federal purposes.

In conjunction with this modified language in the final rule, the Department has also modified the conformity language from ''conform only to'' to ''conform to'' in § 30.7(a) and (b). The Department acknowledges the concerns raised by the commenters regarding federalism, States' authority to regulate nondiscrimination laws in their states, and the various questions raised about the impact of a ''conform only to'' analysis on the recognition of SAAs. The Department has determined that using the ''conform to'' language in part 30 provides consistency across the apprenticeship regulations, meets the Department's goals of streamlining nondiscrimination requirements, and provides sufficient basis for review, technical assistance, and SAA derecognition, if necessary. The Department has also determined that this change addresses concerns about Federalism and the balance between State and Federal authority in regulating nondiscrimination within each State. As described below, the Department views this change from ''conform only to'' to ''conform to'' as addressing commenters' concerns by: (1) providing consistency in the review of SAAs across parts 29 and 30; (2) mitigating concerns about preemption of State nondiscrimination laws; and (3) allowing the Department to review SAA recognition under the revised part 30 with an individualized analysis of whether each SAA conforms to the revised regulations.

In addition, in this final rule, the Department has added ''equal opportunity'' to the regulatory text at § 30.7(a), and at § 30.7(b)(1)(i) and (ii), to clarify that the Department intends to review any State-level laws, regulations, and policies on equal opportunity that are specific to Registered Apprenticeship in determining whether a State's laws, regulations, and policies conform to the requirements of this part. The Department's decision to add ''equal opportunity'' to the apprenticeship-specific State laws, regulations, and policies that it will review in determining whether a State's laws, regulations, and policies conform to the requirements of this part provides clarity to Registered Apprenticeship stakeholders on the scope of the Department's part 30 analysis for SAA recognition. The Department recognizes that States have established apprenticeship-specific equal opportunity requirements based on the existing part 30 requirements that are being revised, including the requirements for the State EEO plan contained in § 30.18 of the existing regulation. The Department is concerned that such requirements may have restricted growth of the Registered Apprenticeship system by discouraging employers from becoming sponsors, and that some of those requirements may induce disparate treatment of applicants for apprenticeship programs based on their race or sex. Both of these impacts run counter to the Department's goals with this rulemaking, which include removing barriers to participation in Registered Apprenticeship, aligning the Department's apprenticeship regulations with applicable Federal and State nondiscrimination laws, and safeguarding apprentice welfare by removing requirements for sponsors to consider factors other than an applicant's merit in recruiting and hiring apprentices.

Consistency in the Review of SAAs

The Department has long applied the ''conform to'' analysis when recognizing SAAs. This is the standard articulated in part 29 under which the Department reviews State applications for recognition as SAAs and under which the Department has successfully

derecognized an SAA due to its failure to conform to part 29 regulations. The ''conform to'' analysis is familiar to SAAs and ensures consistency in SAA review across both parts 29 and the revised part 30. This more uniform approach across the regulations allows for consistency in review and recognition of SAAs and avoids differing approaches to monitoring conformity with both parts 29 and 30. This approach is also responsive to commenters' concerns that SAAs continue exercising their current level of apprenticeship system oversight, innovation, and responsiveness to local conditions—indeed, this uniformity across both parts 29 and 30 will allow for a continuation of this same level of SAA autonomy within the requirements of the revised part 30. This change relaxes the rigidity of the ''conform only'' language, allows flexibility to the States to consider their own unique circumstances so long as they conform to the revised part 30, and ensures that the Department maintains the ability to recognize or derecognize SAAs based on their conformity to the revised part 30 regulations.

Federalism and State Nondiscrimination and Equal Opportunity Laws

The Department intends to review State plans for nondiscrimination in apprenticeship to ensure that State laws, regulations, policies, or operational procedures specific to nondiscrimination or equal opportunity in apprenticeship conform to the nondiscrimination standard in § 30.3. This does not mean that State laws must mirror exactly the language of the regulations, nor does it mean that any deviation will result in a finding of nonconformity. The Department does, however, expect that the part 30 revisions will create greater uniformity in the application of nondiscrimination in Registered Apprenticeship across the Registered Apprenticeship system as a whole and expects SAAs to adopt their laws, regulations, policies, or operational procedures in accordance with the revised part 30 requirements in order to obtain or maintain recognition as SAAs. With respect to commenters' concerns about State nondiscrimination laws that may be in addition to those in part 30, the Department views its clarification regarding the scope of its review of SAAs and the adjustment of the conformity language to be responsive to these concerns. Indeed, the Department envisions review of SAAs to largely follow the review process in part 29, whereby the Department reviews for conformity, provides technical assistance as needed, and works cooperatively with the State to ensure conformity with the revised part 30 regulations. The Department does not view its interest in uniformity and clarity in nondiscrimination requirements specific to Registered Apprenticeship across the National Apprenticeship System to be a barrier to State innovation as the nondiscrimination standard is firmly rooted in Federal nondiscrimination law that is applicable across the National Apprenticeship System. Further, the nondiscrimination standard in § 30.3 does not serve to supplant State nondiscrimination law (instead, the standard incorporates such laws), and States laws regarding nondiscrimination are not preempted by this rule; rather, States must conform to the revised part 30 regulations should they include or wish to include additional nondiscrimination or equal opportunity requirements, beyond any broadly applicable State nondiscrimination requirements, that are specific to registering apprenticeship programs for Federal purposes. In this vein, the Department is acting well within its authority to promote standards of apprenticeship applicable across the National Apprenticeship System as a whole; ease the regulatory burden upon sponsors, employers, and SAAs alike; and further its goal of expanding Registered Apprenticeship.

Additionally, with respect to concerns about the Department's review of affirmative action requirements, as discussed more fully below, it is indeed the Department's intent to eliminate illegal consideration of protected characteristics in Registered Apprenticeship, and it will consider any SAA affirmative action provisions—in addition to other nondiscrimination requirements—that require consideration of protected characteristics that may induce race-based decision-making in Registered Apprenticeship, as determined by an enforcement authority or court with jurisdiction over such claims. Furthermore, the Department will review an SAA's additional nondiscrimination requirements, affirmative action or otherwise, to assess whether they infringe upon the Department's authority under the NAA and its core duties of overseeing and expanding the Registered Apprenticeship system.

Individualized Assessments of Conformity

The Department intends to analyze SAA plans to ensure that they do not interfere with the Department's goals of expanding the National Apprenticeship System and establishing a more uniform set of requirements for Registered Apprenticeship programs across all States. The Department's review for conformity under the well-established ''conform to'' standard will allow for the flexibility necessary to make an individualized determination as to each SAA's conformity to revised part 30 requirements. The Department also intends to take any such action that it deems necessary under the authority of the NAA and the regulations at parts 29 and 30 to deny recognition to SAAs that fail to conform to the revised part 30 requirements. In reviewing for conformance, the Department will analyze whether a State's statutes, regulations, policies, and operational procedures specific to nondiscrimination or equal opportunity in apprenticeship comply with this part and with the Department's responsibilities under the NAA, including whether they limit the expansion of apprenticeship opportunities.

With respect to the concerns and requests for clarity about sponsors' rights if there are additional EEO protections within a State with a recognized SAA, the Department expects sponsors to follow State laws regarding nondiscrimination so long as the SAA continues to be recognized by the Department. Should sponsors have concerns about an SAA's compliance with the revised part 30 regulations, they may submit complaints to the Department through the established complaint process in part 29. Further, should sponsors encounter barriers to registration with an SAA for any reason, they may seek to register directly with OA. The Department emphasizes that sponsors must continue to follow State nondiscrimination laws that are applicable to them as sponsors of Registered Apprenticeship programs or employers of apprentices and that the Department's recognition of an SAA should provide the necessary assurance to the sponsors of their obligations under nondiscrimination laws as applicable to Registered Apprenticeship. Conversely, with respect to concerns about the Department's impeding of progress made in increasing women's participation rate in Registered Apprenticeship, the Department's analysis of SAA nondiscrimination requirements will not prohibit SAAs from taking merit-based actions to increase participation in Registered Apprenticeship; rather, the Department will consider whether SAAs have requirements that limit or inhibit the

growth of Registered Apprenticeship or that permit unlawful discrimination, such as affirmative action requirements that may induce Registered Apprenticeship program sponsors to treat applicants for apprenticeship programs differently based on their race or sex.

2. State Plan for Nondiscrimination in Apprenticeship (§ 30.7(b))

Comments: A commenter requested that the Department clarify the meaning and scope of its reference to the ''policies and operational procedures related to nondiscrimination'' that would be required to conform only to the revised part 30 and to provide examples of what is meant by those terms. Another commenter requested that SAAs be permitted to continue to impose requirements contained in the existing part 30 regulation, such as its universal outreach, anti-harassment, and selection procedure requirements. The commenter described these requirements as important elements of a comprehensive approach to increasing participation in Registered Apprenticeship.

Department Response: As discussed above, the Department has adjusted the ''conform only to'' requirement to ''conform to'' and has also specified that the State laws, regulations, or policies affected by this rule are those that specifically pertain to nondiscrimination or equal opportunity in apprenticeship. For example, if a State has a law that extends certain protections specifically for apprentices in Registered Apprenticeship programs, then it would be required to include that law in its State plan. Similarly, if the State has requirements for outreach policies and procedures that involve outreach to certain demographic groups for the purpose of increasing Registered Apprenticeship participation, the SAA would be required to include such policies in its State plan.

With respect to the suggestions to include additional requirements for SAAs and their State plans, including universal outreach or other requirements from the part 30 regulation that the Department is rescinding with this final rule, the Department appreciates these suggestions but declines to add additional requirements in the State plan beyond those discussed below. This final rule streamlines nondiscrimination requirements in the part 30 regulation, and the Department's requirements for State plans follow a similar streamlining. As such, the Department declines to impose additional affirmative requirements in State plans that would include policies and procedures not required by the final rule.

Based on the Department's review and analysis of the NPRM and the public comments submitted in response to the NPRM, however, the Department has added additional provisions to the State plan requirements to clarify the contents of the State plan necessary for the Department's review of conformity. These additions further clarify the final part 30 regulatory text to explain how the Department will conduct analyses of State plans to determine whether they conform to the regulation, as requested by public commenters. The Department expects that these additions will provide additional clarity for States on what to include in State plans such that they include all relevant information regarding State nondiscrimination requirements specific to Registered Apprenticeship. The Department's review for conformity will include an assessment of whether any additional requirements frustrate or impede the Department's authority under the NAA to expand Registered Apprenticeship, including whether they impose additional unnecessary burden or cost upon sponsors, disincentivize the establishment of new Registered Apprenticeship programs or growth of existing programs, or create unnecessary bifurcation within the National Apprenticeship System. The Department additionally expects SAAs to adhere to their responsibility to prohibit illegal discrimination in Registered Apprenticeship by removing requirements that promote illegal discrimination, such as requirements that may induce sponsors to make apprentice employment decisions based on their race or sex rather than their merit and qualifications, as determined by enforcement entities or courts with jurisdiction over such claims. As the Department discussed at length above regarding affirmative action programs, whether a particular law or policy constitutes illegal discrimination is a final determination made by an enforcement entity or court. The Department emphasizes that its focus is on eliminating unnecessary barriers for the growth of Registered Apprenticeship and removing legally questionable requirements imposed upon sponsors of Registered Apprenticeship programs. SAAs are recognized by the Department to carry out the responsibilities of a Registration Agency. As such, in order to obtain or maintain recognition as an SAA, States have the responsibility to change any State laws or regulations specific to nondiscrimination or equal opportunity in apprenticeship that create such unnecessary barriers. In developing State plans for nondiscrimination in apprenticeship, the Department expects States seeking to obtain or maintain recognition as an SAA to adjust any such laws or regulations.

The Department modified § 30.7(b)(1)(i) in this final rule to remove the word ''only'' so that the provision adheres to the ''conform to'' standard that the Department has adopted in the final rule. This is consistent with the change in § 30.7(a) of this final rule and the rationale described above for using a ''conform to'' standard rather than ''conform only to'' when evaluating State plans. The Department also included a provision at § 30.7(b)(1)(ii) in this final rule to clarify that State plans must ''[i]nclude a description of any State statutes, regulations, policies, and operational procedures pertaining specifically to nondiscrimination or equal opportunity in apprenticeship which impose requirements in addition to those prescribed in this part'' to provide increased clarity for on what laws, regulations, and policies the Department will review when evaluating State plans. This is necessary to confirm that the SAA is submitting all State statutes, regulations, policies, and operational procedures relevant to the analysis of the State plan. This provision complements § 30.7(b)(1)(i) in the final rule because it serves to ensure that any State-level requirements specific to nondiscrimination in Registered Apprenticeship that go beyond the requirements of this final rule are assessed and evaluated by the Department for conformity. The Department will assess any additional requirements to determine whether they conflict with, contradict, or undermine the Department's authority under the NAA and its goal of expanding Registered Apprenticeship.

The Department also added a new § 30.7(b)(1)(iii) to this section outlining requirements for State plans for nondiscrimination in apprenticeship, which provides that States must ''Not require any sponsor seeking to register a program with the State for Federal purposes, through any State statutes, regulations, policies, or operational procedures, to engage in any activity that is unlawful under Federal or State nondiscrimination law.'' This directly addresses the Department's concerns articulated throughout this rulemaking about illegal discrimination in Registered Apprenticeship and explicitly prohibits States seeking to obtain or maintain recognition as an SAA from retaining laws or regulations

specific to nondiscrimination or equal opportunity in apprenticeship that incorporate such illegal preferences. The provision also provides clarity, as requested by commenters, on legal or regulatory requirements specific to apprenticeship that do not conform to this part. The Department is particularly concerned about legally questionable affirmative action plans that may run afoul of nondiscrimination law and will be paying particular attention to this issue as it evaluates State plans for conformity. SAAs are expected to update their statutes, regulations, policies, and operational procedures pertaining to nondiscrimination or equal opportunity in apprenticeship to remove any requirements for Registered Apprenticeship programs to engage in practices that would constitute illegal discrimination under Federal and State law.

As discussed in sections pertaining to the revised procedures for complaints and compliance reviews above, the Department will not make an independent determination about the legality of any preferential program but will rely on decisions by agencies or courts with competent jurisdiction. The Department did not receive any comments on proposed § 30.7(b)(2) through (4) regarding OA's review of the State plan for nondiscrimination in apprenticeship and adopts the provision as proposed. Similarly, because the Department did not receive any comments on proposed § 30.7(c) (Recordkeeping requirements) nor on proposed § 30.7(d) (Retention of authority), the Department adopts the provisions as proposed.

3. Program Compliance Timelines for Programs and SAAs

Comments: A commenter expressed concern about the proposed 1-year compliance timeline for States to update their laws and regulations to conform with the proposed rule, reasoning that in their State, the legislature would likely only have one session in which to complete the revisions, and that the SAA only can request that the legislature make the necessary changes, not demand it. Another commenter expressed a similar concern about the length of time necessary for the administrative rulemaking process and legislative process. A commenter criticized the proposed rule for not acknowledging the burden that States would face in updating their laws and policies. These commenters therefore recommended extending the compliance timeline to at least 2 years. Similarly, a commenter disagreed with the Department's estimate of the burden on SAAs, State legislatures, and OA staff, and commented that the time and effort involved would detract from other work necessary to support and expand Registered Apprenticeship.

Department Response: The Department appreciates commenters' concerns regarding the timeline for SAA compliance to conform with the proposed rule. The Department is well aware that State legislative timelines and processes dictate the speed with which a State can update its laws to conform with the revised part 30. The Department anticipates that its adjustments to § 30.7(a) and (b) in the final rule provide additional clarity of the Department's review of SAA State plans for nondiscrimination in apprenticeship that conform to the requirements of this part and anticipates that this will ease the burden on SAAs.

The Department has also accounted for delays and internal processes by allowing an extension for good cause to be sought by the SAA and granted by the Administrator. This balances the Department's goals of effectuating this rule in a timely manner with the understanding that States may need to seek an extension of time from the Administrator should there be barriers to achieving compliance within 1 year of the effective date of this rule. The Department has determined that the SAAs' ability to seek and be granted an extension sufficiently addresses these concerns.

Finally, the Department appreciates that this change will require effort by SAAs and the Department alike. SAAs will be required to update their laws and policies to conform to this part, and OA will be required to devote time and effort to review SAA plans. The Department disagrees, however, that this will detract from its goal of expanding Registered Apprenticeship. On the contrary, the Department has determined the revised part 30 will result in efficiencies and reduced requirements that are well worth any time and effort spent on effectuating this rule and are fully consistent with the goal of expanding Registered Apprenticeship.

Comments: A commenter expressed concern that it would be challenging for SAAs to ensure program compliance with the proposed rule within 180 days of a State plan being approved, based on their past experiences with seeking statewide changes to apprenticeship programs. The commenter recommended extending the program compliance timeline to 1 year.

Department Response: The Department appreciates commenters' concern about the ability of sponsors to comply with the new requirements of the State plan within 180 days. Nonetheless, given that the State plan requirements in this final rule are fewer and less burdensome on sponsors than the existing part 30 requirements and that entities are already subject to and required to comply with applicable State and Federal nondiscrimination laws, the Department does not anticipate that there will be a need for additional time. This rule requires that sponsors comply with the nondiscrimination standard in § 30.3. To the extent that the State plan includes any additional requirements specific to nondiscrimination or equal opportunity in apprenticeship, such requirements must conform to the requirements of the revised part 30; therefore, the Department anticipates that requirements on sponsors will decrease, and compliance with the State plan will not result in additional burden on sponsors. As such, the Department is finalizing the compliance timeline for programs registered in SAA States at 180 days in this final rule at § 30.7(b)(iv).

4. Comments on Changes to SAA Compliance and Review Requirements in Part 30

Comments: A commenter expressed concern about changes to provisions related to reviews of SAAs, warning that they would result in regulatory uncertainty for SAAs and adversely impact Registered Apprenticeship programs and apprentices. The commenter recommended DOL establish clear guidelines and process descriptions that would ensure system stability and program continuity, including a description of review metrics, how reviews would be conducted, and available remedies for improvement. The commenter also recommended a description of enforcement mechanisms that include whether penalties would extend beyond loss of recognition and include other impacts such as funding. The commenter further recommended regulatory guidance framing how existing programs and apprentices would be impacted if a State were found to be noncompliant, whether options would be available to programs and apprentices, and the role of OA in that process.

A commenter recommended that the Department clarify a compliance review schedule for SAAs, including frequent program reviews or audits and the provision of actionable technical assistance. The commenter further recommended that the Department include other requirements for SAAs,

including requiring that SAAs measure program success through equity indices that show the representation of apprentices from underserved demographic groups, publish disaggregated data and center data in determining priorities, making investment decisions, and developing staff trainings and technical assistance programs. The commenter further recommended that the Department require SAAs to conduct regular, anonymized surveys of apprentices to gauge their experiences in Registered Apprenticeship programs, and to address issues that interfere with apprentices' entry into and completion of Registered Apprenticeship programs (citing aptitude tests that, according to the commenter, tend to screen out applicants from underserved groups).

Another commenter expressed support for the potential to ease the burden for small and medium size business sponsors but anticipated an added burden on SAAs to comply with the regulatory changes and a need for technical assistance regarding outreach to populations not traditionally served by Registered Apprenticeship in order to meet the Administration's goal of one million new apprentices.

Department Response: The Department appreciates that there may be a need for subregulatory guidance, technical assistance, and other cooperation with SAAs to ensure successful implementation of this final rule. The Department notes that OA already conducts SAA reviews for compliance with parts 29 and 30, and such compliance reviews will continue under the revised part 30 requirements. The Department further notes that mechanisms for accountability, review, the processing of complaints, SAA derecognition and associated impacts are addressed by part 29's conforming edits that incorporate an SAA's State plan for nondiscrimination in apprenticeship and other sections of part 30. These mechanisms are reinforced in proposed § 30.7(d) (Retention of authority), which cites to OA's authority in § 29.13 to conduct compliance reviews of all Registered Apprenticeship programs and in §§ 29.8(b) and 29.10 to deregister for Federal purposes an apprenticeship program registered with an SAA, and § 30.7(e) (Derecognition), which cites to § 29.14's derecognition proceedings for SAAs that fail to comply with the requirements of § 30.7. Given the integration into part 29 of the review of SAAs and their State plans for nondiscrimination in apprenticeship, the Department declines to create additional unnecessary and duplicative processes and procedures for review of SAA compliance with part 30 and adopts § 30.7(d) and (e) as proposed.

Finally, with respect to concerns about SAA outreach to populations less familiar with Registered Apprenticeship, the Department is eager to work with States on recruitment of apprentices and remains committed to working with SAAs to reach the goal of 1 million active apprentices in a manner that is merit-based and consistent with Federal law.

H. Section 30.8—Exemptions

The Department proposed to maintain the ''Exemptions'' provision from the current part 30 at § 30.19. The proposed revisions were intended to reduce burdens on Registered Apprenticeship stakeholders, and the Department determined that preserving the part 30 exemptions supports this objective and maintains the regulatory flexibility embedded in the existing rule. Under the existing provision, which the Department proposed to keep, sponsors were required to submit written requests for exemptions from part 30 requirements to the Registration Agency, which could grant exemptions for good cause. The Department also proposed to retain the requirement that SAAs receiving exemption requests from sponsors in their State obtain OA approval before issuing an exemption. Therefore, proposed § 30.8 reflected the same regulatory text as § 30.19.

Accordingly, for the reasons discussed in the NPRM and in response to comments discussed below, the Department is finalizing the provision as proposed.

1. Religious Exemptions

Comments: A commenter expressed support for adding a specific religious exemption to the regulations, arguing that religious organizations have protections under the First Amendment, the Religious Freedom Restoration Act, and Title VII, proposing specific regulatory text stating that regulations ''do not apply to a religious organization to the extent that application of these regulations would be inconsistent with the religious tenets of the organization,'' similar to title IX exemption language.

Another commenter expressed support for religious employer exemptions on the basis of ''sex,'' ''disability,'' and ''religion'' as protected characteristics, and stated that religious employers should be able to invoke the ADA's religious exemption in the apprenticeship context. The commenter maintained that some courts have held that ''gender dysphoria'' is a disability, despite the exclusion in the ADA and section 7(20)(F) of the Rehabilitation Act of 1973 [56] of ''gender identity disorders'' from the definition of ''disability,'' and that religious program sponsors would not be able to invoke the ADA's religious exemption, and that program sponsors would be required to accommodate the ''disability'' of gender dysphoria. Additionally, because of the proposal to remove the language at § 30.3 referring to legal standards and defenses applied under Title VII, the commenter recommended that the Department include an explicit exemption for religious employers from applications of the nondiscrimination rule that conflict with their religious tenets and suggested incorporating language, with necessary revisions, from the religious exemption in title IX of the Education Amendments of 1972 and its implementing regulations.

This commenter and another also objected to particular terminology used in the NPRM. A commenter said that in several instances, the NPRM used the term ''gender-based,'' which is inappropriate because it is not as clear as ''sex-based,'' because ''sex'' mirrors the text of the statutes from which the Department derives its authority to issue the rule, and because the use of ''gender'' is inconsistent with the directives of E.O. 14168. Another commenter echoed this concern, reasoning that ''sex'' is commonly understood to refer to genetic and biological, attributes of human beings, but ''gender'' is a less precise term.

Department Response: The Department appreciates the comments raising concerns about the need for religious exemptions. The Department will take seriously any request for an exemption from this regulation under proposed § 30.8, including those citing religious freedom as the reason supporting the request. Because the Department will, pursuant to this final rule, defer to other enforcement agencies in determining compliance with applicable nondiscrimination laws, it no longer needs to incorporate into part 30 the standards and exemptions from external statutes, such as Title VII and the ADA. As noted earlier in the preamble, the Department will respect the application of religious exemptions as determined by the relevant enforcement agency in determining a sponsor's compliance with proposed § 30.3. As such, the Department does not think a specific exemption for religious sponsors is necessary, particularly as such an exemption would not relieve the sponsor from complying with the applicable

[56] 29 U.S.C. 705(20)(F).

nondiscrimination law in general, and would instead only apply as it pertains to the sponsor's standing as a program sponsor. Accordingly, the Department declines to incorporate the suggestion to establish a specific religious exemption provision in this final rule.

In response to some commenters' preference for different terminology, including using ''sex'' instead of ''gender,'' the Department agrees that the terminology the Department uses should align with the terminology used in relevant Federal nondiscrimination statutes, such as Title VII. The Department concurs that aligning its language with existing nondiscrimination laws promotes clarity for the regulated community.

2. Other Exemption Comments

Comments: A commenter urged the Department to clarify the exemption process by providing examples and guidance on when exemptions may be granted, expressing concern that exemptions in industries with prevailing wage projects could create unfair competitive advantages, particularly in high-hazard industries like construction and energy. The commenter recommended developing guidance detailing the exemption process and evaluation criteria.

Department Response: Under the text of proposed § 30.8, which mirrors the existing exemption provision at § 30.19, exemption requests must be in writing and must identify the provision(s) of part 30 from which the applicant is seeking exemptive relief. The provision further clarifies that all exemption requests to the Registration Agency must demonstrate ''good cause'' to support the applicant's exemption request.

The Department declines to provide specific examples of permissible exemptions in this final rule, as the exemption provision is meant to provide flexibility to sponsors on a case-by-case basis. The Department notes, however, that an exemption issued pursuant to § 30.8 of this final rule only would extend to requirements covered by part 30 (as has been the case under existing § 30.19). This final rule's exemption provision does not authorize a Registration Agency to grant an exemption from the part 29 requirements, or any other applicable law, including those related to prevailing wages.

I. Section 30.9—Severability

As a prudential measure, the Department has decided to add (at § 30.9) a severability provision to the text of this revised and streamlined part 30. This new provision states that, to the extent that any provision of part 30 is declared invalid by a court of competent jurisdiction, the Department intends for all other provisions of part 30 that are capable of operating in the absence of the specific provision that has been invalidated to remain in effect. The Supreme Court has previously held that a statute or regulation is severable if its separate provisions are ''wholly independent of each other'' and can operate independently. *Brockett* v. *Spokane Arcades, Inc.,* 472 U.S. 491, 502 (1985). In the case of this final rule, the Department takes the position that no other provisions of the revised part 30 would be affected if a particular provision of the regulation is found to be unlawful or invalid. Moreover, the Department expects that courts and regulated parties would be able to apply the remaining provisions of this final rule if one of its provisions was held to be invalid. See *Department of Education et al* v. *Louisiana,* 603 U.S. 866, 868 (2024) (*per curiam*) (denying the government's request to stay a preliminary injunction against an entire rule where only parts of the rule were found to be invalid).

J. Technical and Conforming Edits to Part 29

The Department proposed limited technical and conforming amendments to 29 CFR part 29 to align that part with the proposed revisions to 29 CFR part 30. The Department proposed updating cross-references and terminology in part 29 to reflect the revised nondiscrimination framework in part 30. For example, the Department proposed to amend part 29 at §§ 29.3(b)(2) and 29.5(b)(21) to align with the streamlined nondiscrimination requirements in revised part 30, including referencing the proposed ''State plan for nondiscrimination in apprenticeship'' in § 29.5(b)(21) and removing other references to requirements from the existing part 30 regulation (such as the equal opportunity pledge and affirmative action requirements) in the part 29 section covering standards of apprenticeship.

The Department proposed revising part 29 at § 29.12 (Complaints) to clarify that allegations of unlawful discrimination—based on race, color, religion, national origin, sex, age, disability, genetic information, or other protected characteristics—would be referred by the Registration Agency to the appropriate enforcement authority, consistent with proposed § 30.4. This revision conformed to the proposed structure under which enforcement for discrimination would be handled by agencies with jurisdiction to administer applicable nondiscrimination laws, such as the EEOC, the U.S. Department of Justice, State FEPAs, or other enforcement agencies as appropriate.

The Department proposed amendments to § 29.7 (Apprenticeship Agreement) to reflect the protected characteristics specifically covered by applicable Federal nondiscrimination statutes. As proposed, § 29.7(j) would prohibit discrimination in apprenticeship on the bases of race, color, religion, national origin, sex, age (40 or older), genetic information, and disability, thereby ensuring consistency with the statutory text of Title VII of the Act, the ADEA, the ADA, and the Genetic Information Nondiscrimination Act.

The Department also proposed modifying § 29.7(l) by removing explicit references to an apprentice's race, sex, ethnicity, and disability status and replacing them with a general request for demographic information. The Department determined that a broad authorization to request ''demographic information'' would provide greater flexibility for apprenticeship stakeholders and Registration Agencies regarding the collection of demographic information in Registered Apprenticeship.

In addition, the Department proposed edits to the provisions governing SAA recognition and operation. The Department proposed revising §§ 29.13 and 29.14 to require State apprenticeship statutes, nondiscrimination plans, and enforcement procedures to conform to the streamlined Federal requirements in revised part 30. These changes were intended to reduce divergence between OA and SAA jurisdictions, eliminate inconsistent nondiscrimination standards across States, and promote uniform application and enforcement nationwide.

Finally, the Department proposed conforming updates throughout part 29 to replace outdated references and to clarify that nondiscrimination enforcement responsibilities rest with the appropriate governmental entities with jurisdiction to administer Federal or State nondiscrimination laws. These included proposed revisions to § 29.11 (Limitations) to reflect applicable law and Executive Orders, and updates to recordkeeping provisions in §§ 29.13 and 29.14 to align with the proposed updates to the part 30 regulation and the recordkeeping requirements for SAAs that would be necessary under the revised part 30 regulation and its updated requirements for SAAs.

The Department received public comments on several of these proposed technical and conforming edits to the part 29 regulation, which are discussed below.

1. Section 29.7—Apprenticeship Agreements

Proposed Changes Would Reduce Quality and Quantity of Data

Comments: Some commenters expressed concern that the proposed revisions to 29 CFR 29.7 would reduce the quality and quantity of data collected and published about apprenticeships, and that a lack of uniformity in the collected demographic data for apprenticeship agreements would generate significant challenges. Some commenters suggested that the proposed changes would reduce accountability and transparency. One commenter echoed this argument, indicating that without consistent definitions and demographic reporting, employers and apprenticeship stakeholders would face significant challenges in integrating data across systems and operationalizing the data to evaluate progress.

Commenters also expressed concern that poor quality data would complicate the understanding of current participation rates and eliminates the ability to measure progress towards serving the intended populations. One commenter said that the change would undermine efforts to understand who is participating in apprenticeships, in which fields, and with what outcomes, as well as progress or innovative best processes for outreach and inclusive practices. The commenter concluded that rather than providing greater flexibility or minimizing confusion, as DOL claims, such changes would instead hinder individual apprentices, apprentice stakeholders, and Registered Apprenticeship programs from gaining valuable insights for strategic ventures—including efforts to build a workforce development system that can meet the challenges of the 21st-century labor market through apprenticeship. Several commenters therefore urged the Department to continue demographic data collection in a uniform manner and to retain demographic specificity in its data collection activities. Alternatively, a group of commenters urged the Department to allow States to use their own discretion in what demographic data they collect to ensure Registered Apprenticeship is reaching as many people as possible and ensure compliance with State programs and law.

A commenter also raised concerns that a lack of uniform data would complicate aggregation and assessment of data. One commenter argued that at the Federal level, standardized demographic data are used to demonstrate adherence to regulations and policies. The commenter suggested that States have invested in systems to aggregate cross-agency data and, the commenter argued, without standardized demographic fields these States would face challenges in aggregating data. The commenters suggested that educational institutions also use these demographic data to demonstrate the value of apprenticeships across the community and population and researchers rely on these demographic data to understand how different groups respond to different program designs or policy interventions. The commenter also mentioned that apprenticeship stakeholders have repeatedly called for higher data quality and validation processes to inform return on investment calculations, inform outreach, and improve program design and outcomes.

A commenter argued that evidence shows that employers do not perceive the collection of apprenticeship demographic data as a major cost or inhibitor to growth of Registered Apprenticeship. Another commenter stated that the Department made it voluntary for apprentices to provide their demographic data to avoid undue burden and protect privacy, and with a response rate of over 80 percent for apprentices' race, the commenter suggested that the data submission and collection is not overly burdensome.

Another commenter requested additional guidance on the bounds of the collected data including whether the proposed rule would give autonomy to State agencies to mandate a set of demographic data requests in all apprenticeship agreements or whether the proposed rule would allow program sponsors to request whatever demographic data they wish. One commenter asked the Department to clarify what demographic information it intends to collect, and recommended collecting information pertaining to veteran status, as it applies to the Post 9–11 Veterans Educational Assistance Act of 2008 (title V of Pub. L. 110–252), the Veterans Apprenticeship and Labor Opportunity Reform Act (VALOR Act) (Pub. L. 115–89), and the Support for Veterans in Effective Apprenticeships Act (Pub. L. 116–134). Another commenter recommended that the Department utilize tools, such as artificial intelligence, to minimize reporting burden, create public dashboards to track this data, and use that data to evaluate the impact of the final rule within 3 years of its implementation and every 5 years thereafter.

Department Response: The Department understands the comments raised by commenters but disagrees that the conforming edits raise concern for data collection. The Department maintains that a general request for demographic information is consistent with existing practice, and that removing reference to specific categories of demographic information would not adversely affect data quality nor stakeholders' ability to aggregate, analyze, and identify trends, outcomes, and other data-drive insights related to Registered Apprenticeship. The Department expects a general request for apprentices' demographic information will still yield valuable data on apprentices' race, sex, and ethnicity, along with other demographic characteristics that apprentices may report about themselves. In response to one commenter specifically, the Department confirms that it intends to continue to collect information on veteran status. Veteran status is not listed in the description of demographic characteristics at existing § 29.7(l), and as such, the Department's conforming edit to that provision does not alter the section of ETA Form 671, Section II (the apprenticeship agreement form), that provides for the collection of information on apprentices' veteran status, which supports compliance with the VALOR Act and the other laws cited by the commenter.

The Department notes that the collection of additional demographic data at the SAA level is not necessarily precluded under this final rule. However, the Department encourages SAAs to align demographic data collections with the Department's approach and afford stakeholders with flexibility in the collection of demographic data to reduce burdens and challenges associated with requiring that sponsors solicit particular demographic information in apprenticeship agreements.

In response to one commenter's request that the Department review and make accessible data to evaluate the impacts of the rule in the years following publication, the Department notes it will continue to monitor and evaluate the impacts of this rule (and other policies implemented throughout the National Apprenticeship System) using relevant apprenticeship data.

K. Final Rule Implementation

Under the NPRM, the Department proposed requiring SAAs to submit a State plan for nondiscrimination in apprenticeship that demonstrates that the State's apprenticeship laws, regulations, policies, and operational procedures related to the nondiscrimination obligation conform only to the requirements of this part. The NPRM required the plan's submission within 1 year of the effective date of the final rule and provided that extensions may be granted for good cause by the OA Administrator. The proposed rule further stipulated that SAAs must require all apprenticeship programs registered with the State for Federal purposes to comply with the requirements of the State's plan within 180 days from the date that OA provides written approval of the State plan for nondiscrimination in apprenticeship.

The NPRM did not include a specific transition date for sponsors registered with OA directly to comply with the new rule. In this final rule, the Department clarifies that these sponsors are expected to comply with the final rule when it becomes effective 60 days after its publication in the **Federal Register**. In addition, the Department reiterates that it has changed the provision at § 30.7 of this final rule to require that SAAs' laws, regulations, and policies specific to nondiscrimination or equal opportunity in apprenticeship conform to the requirements of this part.

To provide clarity regarding implementation of the final rule, the following tables summarize the applicable compliance timeframes for Registration Agencies and sponsors.

Compliance Timeframes Under the Final Rule

For Sponsors

Entity	Registration agency	Requirement	Compliance timeframe
Sponsors with a Registered Apprenticeship Program.	DOL Office of Apprenticeship	Comply with the applicable requirements of this final rule.	Beginning on the effective date of the final rule, 60 days after publication in the **Federal Register**.
Sponsors with a Registered Apprenticeship Program.	State Apprenticeship Agency	Comply with the applicable requirements of the State's OA-approved plan for nondiscrimination in apprenticeship.	Within 180 days after OA provides written approval of the State plan.

State Plans for Non-Discrimination

Entity	Requirement	Compliance timeframe
State Apprenticeship Agency	Submit to OA a State plan for nondiscrimination in apprenticeship that satisfies the requirements of § 30.7.	Within 1 year after the effective date of the final rule, unless OA grants an extension for good cause.

Based on this clarification and the response to comments below, the Department is adopting the final rule implementation timeline as proposed.

1. Effective Date and Timeline for Implementation

Comments: A few commenters expressed concern that the 1-year implementation timeline for SAAs to submit State plans for nondiscrimination in apprenticeship that reflect the proposed rule's requirements would not be sufficient. The commenters remarked that State processes that would be required for full implementation of the final rule include public comment and public hearings by legislative bodies and enacting legislation to revise statutory provisions that conflict with the rule, a process that can vary by State and may require longer than 1 year. The commenters provided several suggestions for extending the implementation timeline, including extending to 2 years or allowing for two legislative sessions.

Department Response: The Department maintains that 1 year is sufficient for SAAs to comply with the final regulation, especially given the final rule adopts a ''conform to'' instead of a ''conform only to'' standard for State plans for nondiscrimination in apprenticeship. Additionally, through a review of relevant State laws, regulations, and policies, the Department determined that many SAAs are presently complying with the requirements of current part 30 because they incorporate the Federal part 30 regulation by reference in their State laws, regulations, or policies. Therefore, these States will not need to undertake State legislative or administrative rulemaking, or other processes, to comply with and implement the final rule.

For States that will require updates to State laws, regulations, or other policies to implement this final rule, the Department has determined that the 1-year implementation timeline is sufficient for States to make any such changes. Because of the nature of the revisions to part 30, any updates to State laws, regulations, or policies would primarily involve the removal of elements that are no longer required by part 30. The Department acknowledges that changes to State laws or regulations may require additional time, and the final rule accounts for this possibility by providing the OA Administrator with the authority to grant extensions of the implementation timeline for good cause. The Department intends to provide extensions for good cause to any State that needs an extension of the implementation timeline to make updates to State laws, regulations, and policies if the State is making good faith efforts to comply with this final rule.

2. Other Comments on Sponsor and SAA Compliance

Comments: A commenter recommended establishing a clear process for Registered Apprenticeship programs to maintain their Federal registration status if an SAA is derecognized as a result of failing to comply with the final rule by the implementation deadline. The commenter suggested that the Department could adopt a similar process to the approach used when California's SAA was derecognized in 2007, where apprenticeship programs had 30 days to register with DOL if they wished to retain authority. The commenter recommended allowing programs 60 days (rather than 30) to register with OA to ensure continuity and minimize disruption, particularly since multiple States could be faced

with the need to register programs in multiple jurisdictions.

A commenter asked for clarification on the consequences for SAAs and Registered Apprenticeship programs that fail to comply with the rule, and whether DOL would seek immediate derecognition or deregistration of non-compliant entities, or whether those entities be given opportunity to come into compliance via a corrective action plan or similar means of achieving compliance. The commenter further asked whether there would be any attempt to seek penalties or other types of punitive enforcement actions not currently contemplated by the Federal apprenticeship statutes or rules. The commenter also suggested that more than 180 days are needed for apprenticeship programs to comply with proposed rule, given the need to update all apprenticeship agreements and policies related to nondiscrimination in apprenticeship.

A commenter expressed concern that once the rule is implemented, all existing apprenticeship standards would be out of compliance and require updates, creating significant burden for sponsors, employers, State agencies, and OA. The commenter recommended that the Department issue guidance for transition arrangements, allowing programs to operate under existing standards for a specified period, or creating a process for programs to opt into a blanket modification of program standards.

A commenter requested that the Department provide clear technical assistance and guidance to existing sponsors regarding any required activities or updates to their standards of apprenticeship, and that the Department establish a reasonable implementation timeframe. The commenter suggested such technical assistance could include updating the Department's Boilerplate Standards of Apprenticeship through a bulletin or other public method and should identify the Department's process for updating existing apprenticeship program standards.

Department Response: The Department appreciates these comments requesting clarification on compliance expectations under the final rule for program sponsors. As noted above, the Department will require sponsors registered with OA to comply with the final rule beginning on its effective date, which is 60 days after publication. Programs registered with SAAs must comply within 180 days from the date that OA provides written approval of the SAA's State plan for nondiscrimination in apprenticeship submitted pursuant to the final rule. The Department maintains that this approximately 6-month period provides sufficient time to update program standards, especially given that sponsors will mainly be required to remove elements from their standards instead of drafting new components from scratch. As such, the Department is finalizing the compliance timelines for programs registered with OA and with SAAs as proposed.

The Department agrees with commenters who suggested that technical assistance and subregulatory guidance would support systemwide compliance. The Department further agrees that updating technical assistance tools such as the Boilerplate Standards of Apprenticeship will be an important aspect of the Department's implementation of this final rule. OA's Apprenticeship Training Representatives and other staff whose roles include providing technical assistance to sponsors will play a key role in supporting sponsors' transition under the final rule, including answering questions, identifying elements of program standards that are no longer required under the revised part 30 regulation, and otherwise providing technical assistance to Registered Apprenticeship stakeholders. The Department will also consider providing an extension for sponsors to comply with the final rule, if needed, and is available to review and approve case-by-case exemption requests, as needed.

In response to one commenter's question regarding whether the Department intends to immediately pursue derecognition or deregistration of SAAs or program sponsors that have not come into compliance with the revised part 30 regulation within the specific compliance timeline, the Department confirms that this final rule includes provisions on providing technical assistance to SAAs and a process for establishing a compliance action plan for program sponsors as proposed in the NPRM. At § 30.5(c) of this final rule, the Department specifies that when Registration Agencies learn of a final determination regarding a sponsor's violation of a relevant nondiscrimination law, it may work with the sponsor to establish a compliance action plan aligned with any remedies prescribed by the enforcement entity that issued the determination, and will monitor the sponsor's adherence to the established compliance action plan to ultimately bring the program into compliance with the part 30 regulation. Similarly, at § 30.7(2)(ii) of this final rule, the Department specifies that OA will provide any necessary technical assistance to SAAs regarding State plans for nondiscrimination in apprenticeship to facilitate SAA conformity with the revised part 30 regulation. In addition, at § 30.7(a) of this final rule, the Department included language allowing States to request extensions on the 1-year timeline for submitting a conforming State plan for nondiscrimination in apprenticeship for good cause.

In response to a commenter's request that the Department establish a clear process for sponsors to maintain their program registration should the SAA that registered their program be derecognized, the Department notes that 29 CFR 29.14(e) provides such a process and is appropriate to address this potential scenario. The Department maintains that the 30 days provided under § 29.14(e) is sufficient for sponsors to request registration with OA. Finally, the Department confirms that it will not pursue any enforcement or punitive actions not currently contemplated under the existing apprenticeship regulations against program sponsors or SAAs.

VII. Procedural Issues and Regulatory Review

A. Executive Orders 12866 (Regulatory Planning and Review), 13563 (Improving Regulation and Regulatory Review), and 14192 (Unleashing Prosperity Through Deregulation) and Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996

Under E.O. 12866, the Office of Management and Budget's (OMB) Office of Information and Regulatory Affairs (OIRA) determines whether regulatory action is significant and, therefore, subject to the requirements of the executive order and review by OMB. *See* 58 FR 51735 (Oct. 4, 1993). This final rule is an economically significant regulatory action under section 3(f)(1) of E.O. 12866, and OIRA has reviewed it.

E.O. 13563 directs agencies to propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs; the regulation is tailored to impose the least burden on society, consistent with achieving the regulatory objectives; and in choosing among alternative regulatory approaches, the agency has selected those approaches that maximize net benefits. E.O. 13563 recognizes that some benefits are difficult to quantify and provides that, where appropriate and permitted by law, agencies may consider and discuss

qualitatively values that are difficult or impossible to quantify.

The Department derived costs and cost savings for this final rule by comparing the baseline (the costs and benefits of the current part 30 regulation) with the costs and benefits of implementing the provisions in the final rule. Only the additional impacts that are expected to be incurred due to the changes in this regulation are included in the analysis.

The Department sought to quantify and monetize the costs and cost savings of the final rule where feasible. Where we were unable to quantify impacts—for example, due to data limitations—we describe them qualitatively. This analysis covers a 10-year period (2026 through 2035) to ensure it captures major impacts that accrue over time. In this analysis, we have sought to present impacts both undiscounted and discounted at 7 and 3 percent, respectively.[57]

This rule is considered a deregulatory action under E.O. 14192, ''Unleashing Prosperity Through Deregulation.''

Using a perpetual time horizon to allow for cost comparisons under that order, the Department estimates that the annualized cost savings amount to $93 million in 2024 dollars, using a 7 percent discount rate. For the purpose of this analysis, the Department assumed the cost savings from the rule remain constant after the last year of the analysis period, resulting in a perpetual cost savings estimate that may have a tendency toward understatement.

Pursuant to subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA),[58] also known as the Congressional Review Act,[59] OIRA has found that this rule meets the criteria at 5 U.S.C. 804(2).

1. Relevant Federal Rules Duplicating, Overlapping, or Conflicting With the Proposed

The Department has not identified any Federal rules that may duplicate, overlap, or conflict with this final rule. Instead, this final rule is removing duplication that currently exists because sponsors will no longer be required to refer complaints to SAAs. Requiring sponsors to refer complaints to the SAAs is duplicative because, in practice, SAAs referred complaints to the appropriate nondiscrimination enforcement agencies and employers are already required to refer such complaints to the relevant nondiscrimination enforcement agency.

2. Summary of the Analysis

The Department estimates that the rule will result in costs and cost savings. As shown in Exhibit 1, the rule is expected to have an annualized quantifiable cost of $1.31 million and a 10-year quantifiable cost of $9.23 million, each at a discount rate of 7 percent. All costs from the final rule are incurred in the first year. The rule is estimated to result in annualized quantifiable cost savings of $100.18 million and a total 10-year quantifiable cost savings of $703.64 million at a discount rate of 7 percent. Additional benefits of the final rule were not monetized.

EXHIBIT 1—ESTIMATED MONETIZED COSTS AND COST SAVINGS OF THE FINAL RULE

[2025 $millions]

	Costs	Cost savings
Undiscounted 10-Year Total	$9.87	$1,016.11
10-Year Total with a Discount Rate of 3%	9.58	861.39
10-Year Total with a Discount Rate of 7%	9.23	703.64
Annualized Undiscounted	0.99	101.61
Annualized at a Discount Rate of 3%	1.12	100.98
Annualized at a Discount Rate of 7%	1.31	100.18

After considering both the quantified and non-quantified impacts of the final rule, the Department has concluded that the estimated cost savings would justify the costs of the final rule. Below, we present an analysis of the costs and cost savings of the final rule in the year and over the 10-year analysis period.

3. Significant Issues Raised in Public Comments

Several commenters submitted feedback in response to the NPRM's RIA or otherwise addressing the potential impact of this rulemaking on affected entities. This section describes how the Department adjusted the regulatory analysis in response to public comment.

Comments: A commenter submitted feedback that the RIA was incomplete because it should consider: (1) whether eliminating certain part 30 requirements could cause some individuals to miss apprenticeship opportunities and therefore experience lower career earnings; and (2) whether apprentices may incur costs from lengthier investigative processes at Federal or State agencies due to the requirement that sponsors refer all complaints to relevant civil rights agencies.

Department Response: In response to these comments, the Department examined available data sources, including a Government Accountability Office report and EEOC case load data to determine whether such impacts could be quantified or monetized.[60] With respect to potential missed opportunities or reduced lifetime earnings, the Department found no reliable data sources that would allow for assessing case-specific impacts, and such considerations are beyond the scope of this rulemaking. Furthermore, the Department does not anticipate, and commenters did not provide evidence that, the final rule will cause individuals to miss apprenticeship opportunities.

Additionally, the Department concluded that there is no evidence indicating investigative processes would lengthen as a result of the rule, or sufficient data to determine that any hypothetical impacts might not occur within existing investigation timeframes (and thereby not lengthen the response time).

Comments: Several commenters expressed skepticism about the NPRM's estimated cost savings associated with removing affirmative action

[57] OMB, Circular A–4, ''Regulatory Analysis,'' Sept. 17, 2003, *https://trumpwhitehouse.archives.gov/sites/whitehouse.gov/files/omb/circulars/A4/a-4.pdf.* As noted in E.O. 14192, ''Unleashing Prosperity Through Deregulation,'' on January 31, 2025, regulations should be consistent with the 2003 version of Circular A–4.

requirements. The commenters cited a study finding that compliance with existing 29 CFR part 30 accounts for only 0.13 percent of total sponsor costs and noted that sponsors generally do not identify regulatory compliance as a major barrier to program operation. Some of the commenters further stated that, based on their estimate of an average annual total cost of program delivery of $80,768 per apprentice, compliance with part 30 amounts to approximately $102 per apprentice annually. The commenters also referenced an analysis indicating that the NPRM's estimate of regulatory compliance at registration is 1.88 times the total median registration costs reported by employers and more than 37 percent of total mean registration costs, concluding that the NPRM's characterization of part 30 as a ''substantial barrier to employer entry and program sustainability'' is incorrect.

Department Response: In response to these comments, the Department acknowledges the data and comparisons submitted but disagrees with the conclusion that existing part 30 requirements are not burdensome. In the Department's view, the 2016 final rule imposed excessive administrative requirements, as well as affirmative action obligations that are legally vulnerable, and that impede the goal of apprenticeship expansion. Revisions to part 30 are necessary to eliminate a duplicative EEO framework that applies only to Registered Apprenticeship. This final rule therefore adopts a streamlined approach consistent with the Administration's directive to reduce regulatory burdens. Recent U.S. Supreme Court decisions have clarified the legal limitations on race- and sex-based measures under the Equal Protection Clause and Federal nondiscrimination laws. These developments raise serious questions about the validity of certain affirmative-action-related provisions in part 30, particularly those that incentivize or induce sponsors to make decisions based on protected characteristics. In light of recent court decisions, the Department has determined that revising part 30 is necessary to ensure the regulatory framework for Registered Apprenticeship is fully aligned with nondiscrimination standards and legal precedent.

The Department also notes that comparisons expressing part 30 compliance costs as a share of total apprenticeship program costs are of limited value. The majority of program costs identified in the analyses cited by commenters consist of apprentice wages, which are associated with well-documented benefits to sponsors. These wages lead to increased productivity and improve long-term workforce development, which are the benefit returns that are under study in the source provided by the commentor. By contrast, the administrative and affirmative action obligations imposed by part 30 represent non-productive overhead costs that do not generate operational benefits. Accordingly, even when expressed as a relatively small share of total program expenditures, compliance costs may nonetheless constitute a meaningful barrier to employer entry and program sustainability, particularly for small or first-time sponsors, because these costs are not an investment with meaningful returns to the sponsor. The Department therefore does not agree that a per-apprentice compliance cost of approximately $102 annually is inconsequential, or that such figures undermine the NPRM's conclusion that existing part 30 requirements impose a substantial and disproportionate administrative burden. The Department maintains that the NPRM's estimates reflect the best available data on the administrative activities required of sponsors under part 30 and that the projected cost savings from removing these requirements remain appropriate.

Comments: A commenter said that the analysis conflates the one-time cost of developing anti-discrimination training materials from scratch with the smaller, ongoing cost of periodically updating those materials. The commenter also suggested that routine updates to anti-discrimination training, under the current regulation, do not require extensive time or the senior-level involvement assumed in the Department's calculations.

Department Response: The Department disputes the notion that this is a one-time cost, and disagrees that the cost estimates for developing and maintaining anti-discrimination training materials are inflated. The Department finds it reasonable to assume that human resources personnel conduct periodic orientation and informational sessions that include anti-harassment and anti-discrimination content, and that a fee for updating materials as needed is assessed by the sponsor. Additionally, the Department acknowledges the cyclical administrative burden related to the preparation, review, and implementation of updated materials. Accordingly, the Department has not adjusted the cost estimates in response to this comment.

Comments: Some commenters commented that the six requirements in 29 CFR part 30 do not impose a substantial burden, comparing the cost estimates in the 2016 final rule with the cost-savings estimates in the NPRM. The commenters stated that the assumptions underlying the 2016 final rule and the NPRM were similar and noted that the 2016 final rule estimated $63.9 million in costs for the selected provisions, whereas the NPRM estimated $75.1 million in savings for those same provisions, contributing to a total estimated savings of $77.4 million when all provisions are considered. The commenters further asserted that the NPRM's estimate of regulatory compliance costs at registration is unrealistically high, stating that their analysis shows the NPRM estimate is 1.88 times the total median registration costs reported by employers and more than 37 percent of the total mean registration costs. They also cited a return-on-investment study in which only one of six manufacturing sponsors listed administrative costs, suggesting minimal burden under existing 29 CFR part 30 requirements.

Department Response: In response to these comments, the Department acknowledges the comparison submitted. The Department notes that the commenters' comparison relies on the median registration cost reported in the cited study rather than the mean. The study itself reflects a highly skewed distribution of costs, with a median of approximately $240 but a mean exceeding $1,200, indicating that some sponsors incur substantially higher registration-related costs. The presence of this long right tail is likely driven by variations in sponsor size and structure, particularly for those establishing new programs. The Department also notes that the return-on-investment study cited by the commenters does not assess the ongoing compliance obligations imposed by current 29 CFR part 30. Rather, the study is limited to a small sample of six program sponsors and focuses primarily on initial program establishment costs and sponsor perceptions relevant to return-on-investment calculations. The study does not attempt to measure the ongoing administrative, recordkeeping, reporting, or affirmative action activities required under the current 29 CFR part 30. Accordingly, the Department does not consider the study an appropriate basis for evaluating the regulatory burden of the existing rule, and the Department disagrees with the conclusion that the requirements of current 29 CFR part 30 are not burdensome. The Department maintains that the NPRM's burden estimates

reflect the best available data and appropriately account for the administrative activities required of sponsors under the regulation.

Comments: A commenter commented that the Department's regulatory analysis should include the expenses that employers and SAAs would incur to familiarize themselves with the new regulations, asserting that these costs were omitted due to difficulties in quantification and that including them would temporarily reduce projected savings.

Department Response: The Department agrees in part with this comment and has updated the analysis to include familiarization costs for SAAs, including time required by human resources managers and attorneys. The Department, however, did not separately value familiarization costs for employers who are not sponsors, as sponsors are the entities required to review and comply with the rule, while non-sponsor employers will not need to do so.

Comments: A commenter submitted feedback that the Department relied on inaccurate data and underestimated the time and effort required for sponsors to update compliance standards in response to the regulatory changes proposed in the NPRM. The commenter disagreed with the Department's estimate that these updates only would require 20 minutes of administrative assistant time, arguing instead that meaningful revisions demand substantial involvement from management and key stakeholders and would exceed the Department's estimated labor costs.

Department Response: In response to these comments, the Department reviewed its assumptions and determined that the RIA's time estimates appropriately reflect the typical tasks required for these updates. Accordingly, the Department has made no changes to the RIA.

Comments: Several commenters submitted feedback that the proposed rule would impose a greater burden on SAAs and State legislatures than estimated, particularly regarding the work required to update State apprenticeship plans and related State laws. These commenters stated that the Department's 1-year estimate for a full-time staff member to complete plan updates understates the complexity and duration of the multi-stage approval processes, including legal review, legislative cycles, and regulatory revisions, and urged the Department to significantly simplify the approval process for State plans for nondiscrimination in apprenticeship in the final rule to reduce burden on OA and SAA staff.

Department Response: In response to these comments, the Department reviewed these assumptions and acknowledges that State plan revisions can involve multi-stage processes and varying legislative timelines. The Department added explanatory text accompanying the RIA calculations to note that State apprenticeship plans may proceed on different schedules; however, the best available data support the Department's existing estimates, and the RIA was not adjusted in response to this comment.

Although the original estimates in the RIA were found to be reasonable, several methodological adjustments were made to the analysis and assumptions, in addition to adding rule familiarization costs for SAAs, to better align with the approach used in the 2016 final rule and to respond to public comments. These revisions included updating the annualization formula for cost savings to reflect methodologies applied in prior rulemakings, adjusting the assumed average annual sponsor growth rate to be consistent with historical trends, and revising wage and fringe benefit rates based on 2025 historical data and published 2026 wage rates. Detailed descriptions of the assumptions and methodologies and assumptions used in the analysis are presented in the sections below.

Comments: Commenters expressed concern that the proposed requirement that SAA nondiscrimination laws ''conform only to'' part 30 could undermine State autonomy, conflict with the cooperative federalism framework, and create uncertainty regarding the interaction between Federal and State requirements, including whether States could maintain or enforce additional EEO provisions and how potential conflicts would be resolved. Several commenters requested clarification on the scope of the requirement and its application to State policies and procedures, while others emphasized the importance of preserving flexibility for States to address local labor market conditions and maintain broader apprenticeship program authorities.

Department Response: As discussed earlier in the preamble, the Department revised the regulatory text to require that State laws ''conform to'' part 30. Retaining a ''conform to'' standard preserves State flexibility by allowing SAAs to maintain or adopt requirements that are compatible with, but not limited to, Federal rules. This approach avoids Federal preemption of State policies while maintaining Departmental oversight to ensure consistency with baseline Federal standards. Because the existing CFR framework already requires State plans and programs to ''conform to'' Federal requirements, this provision does not introduce new compliance obligations. As a result, the final rule is not expected to impose incremental costs or generate additional regulatory impacts relative to the current baseline.

4. Estimates of Sponsors Impacted by the Rule Across the 10-Year Period

The Department's analysis considered the expected costs, cost savings, and benefits of the changes to part 30. This analysis measured the costs, cost savings, and benefits as they accrue to sponsors and State agencies. It is estimated that the number of sponsors will grow over time and our annual cost calculations reflect this growth. The Department based its estimate of the number of sponsors in each year using data from RAPIDS regarding the number of Registered Apprenticeship programs and based its estimate of the annual growth in Registered Apprenticeship programs on the average annual growth rate from FY 2021 to 2025. Because 2025 program data became available between publication of the NPRM and issuance of the final rule, the Department updated growth rates to reflect changes observed between FY 2021 and FY 2025, where data permitted. In addition, the average annual sponsor growth rate used to project future program participation was revised to align more closely with historical patterns. The final RIA presents updated sponsor data incorporating these revisions. The Department also used the same RAPIDS data to develop an estimate of the number of Registered Apprenticeship programs that have five or more apprentices in each year of the analysis.[61] While the Department expects that the number of apprentices will increase after part 30 is streamlined, we used prior data to estimate future growth because it is common practice in cost-benefit analysis and because it is difficult to quantify how much the streamlining of

[61] The Department identified 26,466 total programs and 7,429 programs with five or more apprentices in RAPIDS as the starting point. The annual average growth rate for all programs was 1.30 percent and 5.17 percent for programs with five or more apprentices between FY 2021 and FY 2025. For the purpose of this analysis, we assume that each program is supported by a single sponsor. Therefore, these data are used to estimate the projected number of total programs and total sponsors as well as those with five or more apprentices for each year in the analysis.

part 30 will increase the growth of apprenticeship programs.[62]

This analysis primarily discusses how the first-year costs were calculated and indicates that the analysis repeats that calculation across the 10-year time frame using the appropriate number of sponsors in any given year. Exhibit 2 presents the estimated number of total active and new active program sponsors, and the estimated number total and new active sponsors with five or more apprentices projected for each year in the analysis.

EXHIBIT 2

A	B	C	D	E
Year	Total active sponsors	New sponsors [a]	Total active sponsors with five or more apprentices	New sponsors with five or more apprentices
2026	26,810	344	7,813	384
2027	27,158	348	8,217	404
2028	27,511	353	8,642	425
2029	27,869	358	9,089	447
2030	28,231	362	9,559	470
2031	28,598	367	10,053	494
2032	28,970	372	10,573	520
2033	29,346	377	11,119	547
2034	29,728	381	11,694	575
2035	30,114	386	12,299	605

[a] New sponsors (column C) includes only sponsors that newly register in a given year. In contrast, new sponsors with five or more apprentices (column E) includes both (1) newly registered sponsors that have hired five or more apprentices, and (2) existing sponsors that expand their programs to reach the five-apprentice threshold for the first time. As a result, the annual growth rate and count of new sponsors with five or more apprentices exceeds that of the total number of newly registered sponsors.

5. Cost Savings

The Department first presents the cost savings that will accrue under the final rule. Most of these cost savings accrue to the sponsors of Registered Apprenticeship programs because the final rule eliminates several requirements for sponsors under the current part 30 regulations. The savings from eliminating these requirements are discussed in greater detail below.

Eliminating One-Time Costs for Sponsors of New Registered Apprenticeship Programs

Under the current part 30 regulation, sponsors must post their equal opportunity pledge on bulletin boards and through electronic media, such that it is accessible to all apprentices and applicants to apprenticeship programs. This requirement imposes costs on sponsors operating a Registered Apprenticeship program for the first time, as they are required to take staff time to post this pledge. Under Title VII[63] and the ADA,[64] employers are already required to post a notice summarizing Federal laws prohibiting discrimination in employment. Removing this comparable requirement from part 30 would therefore lead to savings for new sponsors of Registered Apprenticeship programs without depriving apprentices of crucial information about their employment rights.

The Department assumed that new sponsors would choose to put up a physical copy of the pledge and also post it on their website. The Department assumed it takes a sponsor 5 minutes (0.08 hours) to post the pledge and that this task is performed by an administrative assistant. To calculate the hourly compensation rate, the Department used the median hourly wage rate for Secretaries and Administrative Assistants, Except Legal, Medical, and Executive (Standard Occupational Classification code 43–6014) of $22.70,[65] and assumed a 17% overhead cost[66] and a 42-percent benefit cost.[67] The total hourly compensation rate is [$22.70 + ($22.70 × 42%) + ($22.70 × 17%)], or $36.10. We multiplied the time estimate for this provision by the hourly compensation rate to obtain a total labor cost per sponsor of $2.89 ($36.10 × 0.08). To estimate the materials cost, the Department assumed that the pledge is one page, and that the cost per page for photocopying is $0.10, resulting in a materials cost of $0.10 ($0.10 × 1) per sponsor. The total cost of putting up a physical copy of the pledge per sponsor is therefore $2.99 ($2.89+$0.10). Additionally, the Department also assumed it takes a sponsor 10 minutes (0.17 hours) to post the pledge on its website and that this task is performed by a web developer at an hourly compensation rate of $72.57.[68] The cost of posting the pledge on the sponsor's website is $12.34 ($72.57×0.17). In total, the Department estimated the cost of the current provision requiring the posting of physical copy of the pledge and the posting of the pledge on the sponsor's website of $15.32 ($2.99+$12.34) per new sponsor.

The Department estimated that there are 344 new sponsors in the first year (see Exhibit 2) that would incur these costs. Multiplying this sum ($15.32) by the estimate of new sponsors (344) in the first year (2026) resulted in a cost

[62] The Department's cost-benefit analysis finds that the majority of the benefits from streamlining part 30 accrue to sponsors of Registered Apprenticeship programs. If the Department estimated a higher growth rate to Registered Apprenticeship, the estimated benefits of the final rule would be higher.

[66] Cody Rice, EPA, ''Wage Rates for Economic Analyses of the Toxics Release Inventory Program,'' June 10, 2002, *https://www.regulations.gov/document?D=EPA-HQ-OPPT-2014-0650-0005.*

[67] Benefit cost is derived from the ''Employer Costs for Employee Compensation Summary'' for June 2025 release from BLS, can be found at *https://www.bls.gov/news.release/ecec.t04.htm.* The total benefits value was compared to the wages and salary amount at the 50th wage percentile for private industry workers. This calculation, $13.58 ÷ $32.07, produced a benefits cost of 42 percent of wages.

[68] Median wage for Web Developer (Occupation code: 15–1134) is $45.64. BLS, ''National Occupation Employment and Wage Estimates by Ownership,'' accessed January 15, 2026, *https://www.bls.gov/oes/current/000001.htm#11-0000.* The fully adjusted wage rate for a web developer accounting for overhead and benefits is 45.64 + (45.64 × 0.17) + (45.64 × 0.42), which equals $72.57.

savings of $5,271 from eliminating this provision. Looking over the full ten-year period, we estimated the annualized cost savings from eliminating the cost of posting the EEO pledge of $5,573 with 3 percent discounting and $5,551 with 7 percent discounting.

Eliminating Ongoing Costs for All Sponsors

The current part 30 regulations also require that each sponsor conduct orientation and periodic information sessions for apprentices, journeyworkers who directly supervise apprentices, and other individuals connected with the administration or operation of the sponsor's apprenticeship program to inform and remind such individuals of the sponsor's EEO policy with regard to apprenticeship (current § 30.3(b)(2)(iii)). Under current § 30.3(b)(4)(i), sponsors are also required to provide anti-harassment training, which we assume is incorporated into periodic orientation and information sessions. This training must include active participation by trainees, such as attending a training session in person or completing an interactive training online and includes, at a minimum, communications to apprentices and journeyworkers who directly supervise apprentices that harassing conduct will not be tolerated, the definition of harassment and types of conduct that constitute harassment, and the right to file a harassment complaint.

Using data from RAPIDS, the Department calculated that there are on average 25.4 apprentices per sponsor, rounded down to 25 apprentices per program.[69] The Department further assumed a one-to-one ratio between apprentices and journeyworkers in estimating the cost of orientations and periodic information sessions. The Department first estimated that the 26,810 program sponsors in the first year (2026) will hold one 45-minute regular orientation and information session with an average of 25 apprentices ($37.07 per hour)[70] and 25 journeyworkers ($57.18 per hour)[71] per sponsor. The Department estimated that a human resources manager ($113.78)[72] will need to spend 2 hours to develop and prepare written materials for the session in the first year, and 2 hours to maintain and update the training materials in subsequent years.

Using this calculation, we estimated a total cost savings for removing this provision of approximately $53.48 million in the first year (2026). The Department assumed that all sponsors would hold one 45-minute regular orientation and information session annually if this requirement was not eliminated by the rule. We therefore repeated this calculation in subsequent years. We estimated the annualized savings from the elimination of this cost at $56.54 million with 3 percent discounting and $56.31 million with 7 percent discounting.

Additionally, under the current part 30, all sponsors are required to reach out to a variety of recruitment sources, including organizations that serve individuals with disabilities, to ensure universal recruitment (current § 30.3(b)(3)). Sponsors are required to develop a list of recruitment sources that generate referrals of women, minorities, and persons with disabilities with contact information for each source. Further, sponsors are required to notify these sources in advance of any apprenticeship opportunities and while a firm deadline is not set, the part 30 regulations suggest 30 days' notice if possible. This current outreach protocol may lead employers to incur costs due to the additional delay it introduces into the hiring process. The Department, however, does not have enough information to estimate the potential costs sponsors currently incur from these delays.

The kinds of activities sponsors engage in to satisfy this outreach requirement include distributing announcements and flyers detailing job prospects, holding seminars, and visiting some of the sources who are likely able to provide access to designated groups. The Department assumed that the cost to sponsors to distribute information to designated groups will be the labor cost to comply with this provision. We also assumed that the activity to satisfy this provision will be performed by a human resources manager and an administrative assistant with hourly compensation rates of $113.78 and $36.10, respectively. We assumed this task takes 30 minutes (0.5 hour) of a human resources manager's time and 30 minutes (0.5 hour) of an administrative assistant's time per targeted source. We calculated the cost of this provision per affected sponsor by multiplying the time each staff member devotes to this task by their associated hourly compensation rates. We then multiplied the total labor cost by the assumed number of outreach sources (5) and by the total number of sponsors. All sponsors are assumed to conduct this outreach in all years. We estimated the cost savings from eliminating this outreach provision at $10.05 million in the first year, with an annualized savings from the elimination of this cost for sponsors at $10.62 million with 3 percent discounting and $10.58 million with 7 percent discounting.

Savings From Eliminating Costs of Performing Utilization and Workforce Analysis Costs for Sponsors With Five or More Apprentices

The current part 30 regulations require sponsors with five or more apprentices to establish utilization goals for women and minorities (current §§ 30.5 through 30.7). First, sponsors conduct a workforce analysis to identify the racial, sex, and ethnic composition of their apprentices. Second, an availability analysis will establish a benchmark against which the existing composition of apprentices will be compared. Sponsors establish utilization goals and engage in targeted outreach, recruitment, and retention efforts when the sponsor's utilization of women, Hispanics or Latinos, or individuals in racial minority groups are ''significantly less than would be reasonably expected given the availability of such individuals for apprenticeship.'' Registration Agencies work closely with sponsors during compliance reviews to assist in the development of an availability analysis and setting or reassessing utilization goals for race, sex, and ethnicity. The Department also provides a data tool to assist in the collection and analysis of relevant demographic data for the purposes of goal setting.

The Department determined that eliminating the utilization goal requirement will create three types of cost savings: Savings from the elimination of costs associated with the familiarization with the data tool for new sponsors, savings from the elimination of costs associated with the workforce analysis, and savings from

[69] This estimate is from RAPIDS data at the end of FY2024.

[70] We calculated the hourly compensation rate for an apprentice by multiplying the average hourly wage of $23.32 (inflation adjusted annual average hourly rate published by ZipRecruiter, last updated Mar. 4, 2026), *https://www.ziprecruiter.com/Salaries/Apprenticeship-Salary*) by 1.59 to account for private-sector employee benefits and overhead. Thus, the hourly compensation rate for an apprentice is $37.07 ($23.32 × 1.59).

[71] We calculated the hourly compensation rate for a journeyworker by multiplying the average hourly wage of $35.96 (inflation adjusted annual average hourly rate published by ZipRecruiter, last updated Mar. 4, 2026, *https://www.ziprecruiter.com/Salaries/Journeyman-Salary*) by 1.59 to account for private-sector employee benefits and overhead. Thus, the hourly compensation rate for a journeyworker is $57.18 ($35.96 × 1.59).

[72] We calculated the hourly compensation rate for a human resources manager (Occupation code 11–3121) by multiplying the median hourly wage of $71.56 by 1.59 to account for private-sector employee benefits and overhead. Thus, the hourly compensation rate for a human resources manager is $113.78 (71.56 × 1.59).

the elimination of costs associated with the utilization analysis.

To quantify the savings from the elimination of costs associated with new sponsors' familiarization with the data tool, the Department assumed that new sponsors with five or more apprentices (384 in 2026) will incur one hour of human resources manager labor ($113.78 per hour) to familiarize the organization with the tool. We estimated this will create $43,700 in cost savings from the elimination of these tool familiarization costs in the first year of 2026. We repeated this calculation for the following years. We estimated that removing the utilization goal requirement from part 30 therefore creates an annualized savings of $54,729 with 3 percent discounting and $53,872 with 7 percent discounting from the elimination of new sponsors' tool familiarization costs.

To calculate the savings from removing the workforce analysis requirements from part 30, the Department determined that the methodology for conducting workforce analyses under the current part 30 results in 2 hours of human resources manager labor ($113.78 per hour) for all sponsors with five or more apprentices (7,813 in 2026). Under the current part 30 regulations, all sponsors with five or more apprentices must conduct workforce analysis every 2.5 years. In calculating the savings for each year, the Department divided the number of applicable sponsors in each year by 2.5 to reflect the assumption that sponsors would have conducted the analysis once per the 2.5-year timeline. This means that in any given year 40 percent of sponsors with five or more apprentices would have conducted the workforce analysis, or that it would have taken 2.5 years to have these sponsors conduct new workforce analyses. We estimated the cost savings from eliminating the requirement to conduct workforce analyses in the first year at $711,149 ($7{,}813 \times 0.4 \times \$113.78 \times 2$ hours). We repeated this calculation for the following years using the appropriate number of sponsors in any given year, resulting in an annualized savings from the removal of the workforce analysis requirement of $890,620 with 3 percent discounting and $876,680 with 7 percent discounting for sponsors.

To calculate the savings from the removal of the utilization analysis requirement, the Department determined that the utilization analysis resulted in 0.5 hour of human resources manager time ($113.78 per hour) for all sponsors with five or more apprentices (7,813 in 2026) every 5 years (because the utilization analysis is completed in support of the compliance review process, which has typically been performed at 5-year intervals for programs in OA States). The cost savings from removing the requirement to conduct utilization analyses in the first year is $88,894 (0.5 hour $\times$ $113.78 $\times$ (7,813/5 years)). We repeated this calculation for the following years, and the savings to sponsors from not having to conduct utilization analyses results in an annualized cost savings of $111,327 with 3 percent discounting and $109,585 with 7 percent discounting for sponsors.

In addition to the normal outreach, recruitment, and retention activities required of all sponsors under current part § 30.3(b), current § 30.8 requires a sponsor of an apprenticeship program to engage in targeted outreach, recruitment, and retention, if: (1) the sponsor's utilization analyses revealed underutilization of a particular designated group or groups of individuals pursuant to current § 30.6; or (2) the sponsor has determined pursuant to current § 30.7(e) that there are impediments to EEO for individuals with disabilities. We assumed that this additional outreach happens in the same manner as the universal outreach discussed above.

We assumed that the current cost to sponsors to distribute information about apprenticeship opportunities to organizations serving individuals with disabilities is the labor cost. We also assumed that the labor for this provision will be performed by a human resources manager and an administrative assistant with hourly compensation rates of $113.78 and $36.10, respectively. The Department estimated that this dissemination task takes 30 minutes (0.5 hour) of a human resources manager's time and 30 minutes (0.5 hour) of an administrative assistant's time per targeted source. We estimated the cost of the current provision per affected sponsor is the time each staff member devotes to this task multiplied by their associated hourly compensation rates. Based on this calculation we estimated a labor cost of $74.94 (($113.78 $\times$ 0.5) + ($36.10 $\times$ 0.5)) per source.

We estimated that the number of sponsors who need to engage in targeted outreach and recruitment for at least one relevant demographic group is 95 percent of the total sponsors with five or more apprentices. We understand this is likely an over-estimate of the number of sponsors that must conduct this outreach, as more than 5 percent of sponsors may meet their utilization goal for all demographic groups and may not have to conduct outreach; however, the Department does not have complete or reliable data to produce an alternative estimate. We then multiplied this total labor cost by the number of sponsors with five or more apprentices (7,813 in 2026), the share of sponsors that undertake a utilization analysis in any given year (20 percent), and the share of sponsors that are estimated to identify underutilization or problem areas in one or more of the relevant demographic groups (95 percent).[73] This calculation ($\$74.94 \times 7{,}813 \times 0.20 \times 0.95$) results in a total cost of the current outreach provision of approximately $111,242 in 2026. The cost savings from eliminating this requirement is equal to these estimated costs since sponsors will no longer need to conduct this outreach. We repeated this calculation for the following years using the appropriate number of sponsors in any given year. We estimated the annualized cost savings to sponsors from not having to conduct this additional outreach at $139,316 with 3 percent discounting and $137,135 with 7 percent discounting.

Savings From Eliminating Affirmative Action Program Review Costs for Sponsors With Five or More Apprentices

EEO compliance reviews in the current part 30 regulations result in three additional costs for sponsors: personnel process reviews, written affirmative action plan updates during compliance reviews, and written affirmative action plan updates within 3 years of compliance reviews. The current part 30 requires sponsors with five or more apprentices to review personnel processes annually (§ 30.9). The Department estimated the current costs of each of these components and summed them to estimate the cost savings to sponsors from eliminating EEO compliance reviews.

To calculate the current costs imposed on sponsors from personnel process reviews, the Department estimated that each review takes 8 hours for a human resources manager ($113.78 per hour). Therefore, we estimated this provision to result in an undiscounted cost, for all sponsors in 2026 with five or more apprentices (7,813), of $7.11 million ($7{,}813 \times 8$ hours $\times$ $113.78).

To determine the current cost of the written affirmative action plan update at the time of the compliance review, the Department calculated the cost for all sponsors in 2026 with five or more apprentices (7,813) to spend 12 hours of

[73] This is the percentage of sponsors that undergo compliance review each year, as determined by the 5-year schedule on which sponsors undergo compliance reviews.

human resources manager labor every 5 years at the time of the compliance review.[74] With the existing compliance review rate at 20 percent, this means that approximately one in five of these sponsors undergoes a compliance review every year. We estimated this provision to currently result in an undiscounted cost of approximately $2.13 million in 2026 (7,813 × 12 hours × 0.20 × $113.78).

To determine the cost of the written affirmative action plan update within 3 years of the compliance review, the Department calculated the cost for all sponsors in 2026 with five or more apprentices (7,813) to spend 6 hours (estimated to be less because of the lesser workload from not overlapping with the compliance review) of human resources manager time every 5 years.[75] We estimated this provision to result in an undiscounted cost of $1.07 million in 2026 (7,813 × 6 hours × 0.20 × $113.78). We repeated this calculation for the following years using the appropriate number of sponsors in any given year.

Based on the assumptions above, we estimated the total cost of the current affirmative action plan program provision, and therefore the cost savings from it being eliminated, to be $10.31 million in 2026 ($7.11 million + $2.13 million + $1.07 million). We estimated the annualized savings from eliminating EEO compliance reviews to be $12.91 million and $12.71 million at 3 percent and 7 percent discounting, respectively.

Invitation To Self-Identify as an Individual With a Disability

Current § 30.11 requires sponsors with five or more apprentices to invite applicants for apprenticeship to voluntarily self-identify as an individual with a disability protected by this part at two stages: (1) at the time they apply or are considered for apprenticeship; and (2) after they are accepted into the apprenticeship program but before they begin their apprenticeship. Additionally, all sponsors with five or more apprentices are required to administer the invitation to self-identify to existing apprentices annually.

The Department estimated that sponsors will post 42 positions in 2026 and receive 15 applicants per posting.[76] Of those positions, the Department estimated that 42 offers of enrollment are made and 42 apprentices choose to enroll in 2026. The Department estimated that it would take an apprentice ($37.07 per hour) 5 minutes (0.08 hours) to complete the form. Furthermore, an administrative assistant ($36.10 per hour) would need to spend 0.5 hour annually to record and keep the forms. For the final RIA, the Department reevaluated and revised the calculation of this cost to more accurately account for labor costs associated with inviting applicants and hired apprentices to self-identify as an individual with a disability. As a result, we estimated this requirement to have an undiscounted cost in 2026 of $15.71 million (7,813 sponsors × ((15 applications × 42 job listings × 0.08 hours) + (42 offers of apprenticeship × 0.08 hours)) × $37.07 + 7,813 programs × 0.5 hour × $36.10). For the 10-year analysis period, we estimated this provision's annualized cost as $19.68 million and $19.37 million (at 3 percent and 7 percent discounting, respectively).[77]

In addition, sponsors with five or more apprentices are required to remind apprentices yearly that they can update their invitation to self-identify. The Department assumed that these sponsors send out an annual reminder email at the cost of $22,563 (7,813 × 0.08 hour × $36.10). We repeated this calculation for each remaining year in the analysis period using the estimated number of sponsors for each year. We therefore estimated that eliminating this provision will result in an annualized cost savings of $28,257 and $27,814 (at 3 percent and 7 percent discounting, respectively).

Non-Quantified Cost Savings

In addition to the cost savings discussed above, there are several other cost savings from streamlining the nondiscrimination requirements under part 30 that are not included in the Department's quantitative analysis. Under the final rule, sponsors will benefit from a more streamlined and less complex part 30 regulation, reducing confusion and the time required to answer questions or address confusion regarding compliance requirements. The final rule will also benefit sponsors by removing the legally questionable components of the current part 30 regulations, thereby eliminating legal risk that sponsors could be sued or legally challenged for actions taken to comply with part 30, such as setting utilization goals regarding the race or sex of program participants. Additionally, the final rule will eliminate the costs associated with discrimination complaint investigations involving obtaining full complaint information, gathering relevant materials (*e.g.,* interview statements, transcripts, pertinent documents), and developing a narrative report of the allegations and investigation findings.[78]

Since the final rule reduces the barriers for sponsors to create and operate Registered Apprenticeship programs, it may also lead to the registration of additional apprenticeship programs. The enhanced growth of Registered Apprenticeship programs could improve access for individuals to enroll in apprenticeships and receive high-quality job training—boosting their long-term earnings and having spill-over effects in the local economy. The proliferation of Registered Apprenticeship programs also could benefit local employers, as the training of additional skilled apprentices could expand local talent pools and allow employers to more easily fill positions for in-demand occupations.

[74] A compliance review includes: (1) a workforce analysis; (2) a utilization analysis; (3) goal-setting (if necessary); and (4) a full update of the written affirmative action plan. Because we have already costed out items (1), (2), and (3), the sponsor would need additional 12 hours to fully update the written affirmative action plan.

[75] An EEO compliance review within three years of compliance reviews contains (1) workforce analysis and (2) updating the written affirmative action plan to include the updated workforce analysis and a description of the review of personnel practices and any changes made as a result of that review (see § 30.9(b)). Because we have already costed out (1), the 6 hours are for including updated the workforce analysis and a description of the review of personnel practices and any changes made as a result of that review (see current § 30.9(b)).

[76] The Department determined the number of positions posted from conversations with programs of various sizes. We determined that the largest, statewide programs post more than 15 jobs, but the Department used this as an average for all apprentices to avoid under-estimating the costs.

[77] It is assumed that there will be 100 percent participation in the invitation to self-identify and therefore, the cost of this provision is likely overestimated.

[78] The Department did not quantitatively estimate the cost savings from the elimination of discrimination complaint investigations due to the lack of data and the lack of understanding of the frequency with which investigations occurred.

Finally, chief among these cost savings is the elimination of regulatory provisions that have the effect of encouraging the use of race- and sex-based preferences in apprenticeship selection and advancement decisions. By removing these requirements, the final rule promotes a return to individual, merit-based evaluation, consistent with the principle that all Americans should be treated as individuals rather than as members of demographic groups. This shift will strengthen public confidence in the fairness of the apprenticeship system, reduce legal uncertainty, and encourage broader participation by sponsors who may have been deterred by the prior rule's prescriptive and group-based mandates.

While these cost savings could be substantial, the Department did not estimate these cost savings because of data limitations that impede our ability to accurately quantify these cost savings. Collectively, however, these cost savings reinforce the Department's conclusion that the advantages of this proposal outweigh any potential costs.

6. Costs

Below, the Department presents the costs estimated to be incurred by relevant stakeholders, mainly program sponsors and SAAs, from this final rule. These costs are broken into three major categories: costs to sponsors and SAAs of familiarizing themselves with the regulatory change, costs to sponsors and Registration Agencies of updating standards for compliance, and costs to SAAs of updating State plans for nondiscrimination in apprenticeship. The following sections present estimates for each of these cost categories imposed by the final rule.

Familiarization With Regulatory Change

To estimate the cost of rule familiarization for sponsors, we multiplied the number of program sponsors in 2026 (26,810), the first year in which the change will be in effect, by the amount of time required to read the new rule (which we estimate to be 1 hour) and by the average hourly compensation of a private-sector human resources manager with fringe benefits included ($113.78). This cost is only incurred in the first year of the change, so the total cost to sponsors for time spent on familiarization is approximately $3.05 million in labor costs.

In response to public comments, the Department also estimated the cost of rule familiarization for SAAs. The Department assumed that for SAAs, both a human resources manager and a lawyer would review the regulatory change in the first year. The Department estimated the cost of rule familiarization by SAAs by multiplying the number of SAA states (33) by the amount of time required to read the new rule (1 hour) and by the sum of the average hourly compensation of a public-sector human resources manager ($92.04) and a State-level lawyer ($98.84). The total cost to SAAs for time spent on familiarization is approximately $6,299 in labor costs.[79]

There are no familiarization costs for future years because sponsors and SAAs will already be familiar with the rule and new sponsors would have had to familiarize themselves with the prior part 30 regulations. Therefore, we estimated the total cost of initial rule familiarization of $3.06 million in labor costs, realized entirely in the first year.

Updating Standards for Compliance

Pre-existing sponsors of Registered Apprenticeship programs will also need to develop language or make adjustments and updates to existing standards to comply with the changes to part 30. The Department estimated that this will be a one-time cost only imposed on pre-existing sponsors that already had standards prior to the publication of the final rule. The Department estimated that updating standards to comply with part 30 will mainly involve removing items currently required by part 30 and therefore estimated the burden will be minimal. Accordingly, the Department estimated the average response time for the projected 26,466 pre-existing apprenticeship programs in 2026 to ensure standards comply with part 30 is 20 minutes (0.33 hours).[80] We estimated an annual burden of 8,734 hours (26,466 × 0.33). The Department assumed the standards will be updated by an administrative assistant. Therefore, the Department estimated a one-time cost of $315,266 (8,734 × $36.10).

Registration Agency staff are responsible for reviewing and providing input on a sponsor's apprenticeship program standards to ensure compliance with the requirements in part 30. Registration Agencies will therefore incur a one-time cost to review updated standards for pre-existing programs. The Department estimated that the review and input provided by Registration Agency staff for program sponsors will take 10 minutes, which resulted in 4,499 annual burden hours (26,466 × 0.17 hours). Using the State employee wage calculated above, we estimated a total cost to Registration Agencies of this one-time review of $399,891 (4,499 hours × $88.88).

Revision of State Plan

The process of updating a State plan (under current part 30, a ''State EEO plan,'' and in the final rule, a ''State plan for nondiscrimination in apprenticeship'') may potentially involve various people at different stages of implementation. Updating the plan will include drafting the new plan, ensuring conformity and that State laws and practices do not exceed the final rule, and completing all administrative procedures that may apply, such as revisions to a State's apprenticeship law or policy that may require a public notice-and- comment period, training for SAA staff on the revised State plan, and outreach to program sponsors to inform them of the relevant aspects of the revised State plan once it has been approved by the Department. The

[79] The Department notes that there are 32 officially recognized SAA. Additionally, one State, California, also operates a SAA that is not recognized by the Department but registers apprenticeship programs for State purposes. Many of the programs registered by the Department's OA for Federal purposes in California are also recognized by California's SAA for State purposes. The Department therefore anticipates that the California SAA will review the final rule, despite not being recognized by the Department to register programs for Federal purposes under the NAA and its regulations. To ensure the most accurate estimate of burden, the Department is choosing to include costs related to the California SAA's review of this final rule within the RIA.

[80] There are 26,466 pre-exiting sponsors in FY 2026 because there are 26,810 projected sponsors in FY 2026 and 344 of these sponsors are new. (26,810 − 344 = 26,466).

updates to State plans include changing language and existing requirements such that they align with the regulatory changes herein. To calculate the costs, the Department assumed that the process to revise the State plan will take a full year of effort (2,080 hours) to complete.[81] The Department acknowledges that State plan revisions can involve multi-stage processes and varying legislative timelines, but these assumptions used in the analysis represent the best data available and the Department's best estimate for updating the existing State plan. As noted above, many State apprenticeship laws incorporate part 30 requirements through referencing the Federal regulations and will not need to be updated, likely leading to lower costs for some SAA States than others. However, the Department assumes that all SAA States will experience the same cost. As a result, the Department is likely overstating the true cost of revising State plans. For simplicity, we assumed that an SAA human resources manager will complete the task at an hourly compensation rate of $88.88.[82] Based on this calculation we estimated a one-time cost of $6.10 million in the first year (2,080 hours × $88.88 × 33 SAA States).[83]

Complaint Referral Procedures

Section 30.4, Complaint referral procedures, directs the Registration Agencies to refer complainants alleging illegal discrimination against apprentices to the appropriate enforcement agency. Since the complaint process is not a new process, the Department does not expect that these provisions will result in any incremental change in the burden on Registration Agencies as these agencies are already required to refer complaints to other EEO agencies under current § 30.14(c)(3). Therefore, the Department does not estimate any additional costs associated with complaint referrals under the final rule.

Nondiscrimination Compliance Reviews and Enforcement

In response to public comment, the section on nondiscrimination compliance reviews and enforcement (§ 30.5) within the final rule adds a requirement that sponsors disclose to the Registration Agency any final determinations by an enforcement entity or court with jurisdiction over an applicable nondiscrimination law that the sponsor violated such law with respect to an apprentice or applicant for apprenticeship. Sponsors must provide this written disclosure within 60 days of the final determination and must include, at a minimum, copies of relevant final determinations, judgments, decisions, and orders. Sponsors must also include, as part of this disclosure, a description of any remedies prescribed by the enforcement entity or court to address the violation.

The Department expects that this requirement may impose some administrative burden on sponsors in the limited circumstances in which a final, non-appealable determination of a violation of a nondiscrimination law has been made. In such cases, a sponsor may need to review the final determination and related orders, prepare a written disclosure to the Registration Agency, and describe any prescribed remedies. The Department expects these activities will involve legal, managerial, or administrative staff time, depending on the sponsor's size, organizational structure, and the complexity of the final determination or ordered remedy.

The Department is not aware of prior instances in which sponsors have been subject to final, non-appealable determinations of nondiscrimination violations that would trigger this requirement, and it expects such events to occur infrequently. The Department does not have data that would allow it to estimate how often enforcement entities or courts will issue such determinations involving apprentices or applicants, nor how often those determinations will result in prescribed remedies that sponsors must describe to the Registration Agency or the extent to which any such disclosures will vary in complexity. Because the requirement is triggered only when an external enforcement entity or court has issued a final determination of a nondiscrimination violation relating to an apprentice or applicant, the Department cannot estimate whether this requirement will be triggered frequently, infrequently, or at all for many sponsors. For these reasons, the Department discusses the potential administrative costs of this disclosure requirement qualitatively but does not include a quantified estimate in the RIA.

7. Analysis Summary

Exhibit 3 presents a summary of the first-year cost savings and costs of the final rule, as described above. As shown in the exhibit, the total first-year cost savings of the final rule are $90.53 million and the total first-year costs are $9.87 million.

EXHIBIT 3

Provision	Entity affected	Monetized costs ($ million)
No longer posting equal opportunity pledge	Sponsor	−$0.01
No longer conducting equal opportunity training	Sponsor/Apprentice	−53.48
No longer conducting universal outreach	Sponsor	−10.05
No longer conducting utilization and workforce analysis	Sponsor	−0.95
No longer conducting EEO compliance reviews	Sponsor	−10.31
No longer providing an invitation to self-identify as an individual with a disability	Sponsor/Apprentice	−15.73
Familiarization with regulatory change	Sponsor	3.05
Familiarization with regulatory change	SAA	0.01

[81] Note that this calculation is only the administrative costs of updating the State plan, as opposed to the costs of implementing the new plan, or any new burdens on State Agencies. Since the updated State plan for nondiscrimination in apprenticeship should reflect the Federal regulations, these costs should be accounted for and addressed elsewhere in the analysis under discussions of costs.

[82] We calculated the hourly compensation rate for a human resources manager at a State agency by multiplying the hourly wage of $48.07 (GS–13 step 5) by 1.63 for public sector employee benefits. BLS, ''National Compensation Survey, Employer Costs for Employee Compensation,'' last modified June 12, 2026, *https://www.bls.gov/news.release/ecec.t03.htm*. For State and local government workers, wages and salaries averaged $49.38 per hour worked in 2025, while benefit costs averaged $24.63, which is a benefits rate of 63 percent) and 1.17 to account for overhead costs. Cody Rice, EPA, ''Wage Rates for Economic Analyses of the Toxics Release Inventory Program,'' June 10, 2002, *https://www.regulations.gov/document/EPA-HQ-OPPT-2014-0650-0005* to account for State and local employee benefits. The hourly compensation rate for a human resources manager at a State agency is thus $88.88 (($49.38 × 1.17) + ($49.38 × 1.63)).

[83] The estimated time to complete the revisions is 12 months (2,080 hours). The calculation used the hourly compensation rate for a State human resources manager ($88.88) multiplied by 2,080 (the assumed number of work hours in a year) and by the total number of State Apprenticeship Agencies (33) to obtain the total cost. This cost only accrues in the first year of the ten-year analysis period.

EXHIBIT 3—Continued

Provision	Entity affected	Monetized costs ($ million)
Updating standards to align with revised part 30 regulation	Sponsor/Registration Agencies	0.72
Revision of State plan for nondiscrimination in apprenticeship	SAA	6.10
Total First-Year Costs		−80.66

Exhibit 4 presents a summary of the monetized costs and cost savings associated with the final rule over the 10-year analysis period. The monetized costs and cost savings displayed are the yearly summations of the calculations described above. Costs and cost savings are presented as undiscounted 10-year totals, and as present values with 7 and 3 percent discount rates.

EXHIBIT 4

Year	Monetized cost savings ($Million)	Monetized cost ($million)
2026	$90.53	$9.87
2027	92.75	
2028	95.06	
2029	97.45	
2030	99.93	
2031	102.51	
2032	105.19	
2033	107.97	
2034	110.86	
2035	113.86	
Undiscounted	1,016.11	9.87
7% Discounted	703.64	9.23
3% Discounted	861.39	9.58
Annualized Undiscounted	101.61	0.99
Annualized 7%	100.18	1.31
Annualized 3%	100.98	1.12

As mentioned above, due to data limitations, the Department did not quantify several important benefits to society provided by the final rule. The final rule is expected to result in several overarching benefits to apprenticeship programs and specific benefits resulting from a less legally ambiguous and more streamlined part 30. The final rule will reduce barriers to register and operate an apprenticeship program, allowing the creation of additional programs that allow more individuals to receive training and benefiting businesses in meeting their skills needs.

8. Regulatory Alternatives

In addition to the final rule, the Department considered three regulatory alternatives: (a) repeal part 30 entirely; (b) only eliminate the additional affirmative action requirements pertaining to sponsors with five or more apprentices while retaining the reminder of the 2016 final rule; and (c) take no action (*i.e.,* leave the 2016 final rule intact).

The Department conducted economic analyses of the three alternatives to better understand their costs and cost savings and the implied tradeoffs (in terms of the costs and cost savings that would be realized) relative to the final rule. Below is a discussion of each alternative along with an estimation of their costs and cost savings. All costs and cost savings use the 2016 final rule as the baseline for the analysis.

Repeal Part 30 Entirely

This alternative yields many of the same cost savings as the final rule but also would remove the cost to Registration Agencies (OA or SAAs) related to the referral of complaints, leading to additional cost savings.

The Department assumed that, when a Registration Agency receives a complaint, it takes 15 minutes (0.25 hours) for a public-sector human resources manager ($88.88 per hour) to refer the complaint to the correct entity. The Department estimated that 421 apprentices will file a complaint in the first year and that the number of complaints rises by 9 percent each year.[84] Based on this assumption, the Department estimated that the savings to Registration Agencies from not having to refer complaints would be $37,507 in the first year. The Department estimated that this would have an annualized savings of $56,428 and $54,889 (at 3 percent and 7 percent discounting, respectively).

Additionally, removing part 30 would remove the costs associated with deregistering programs and derecognizing SAAs that are violating part 30. However, instance in which a program or an SAA has been deregistered or derecognized because of failure to comply with part 30 (current §§ 30.15, 30.16, and 30.18(d)) are rare. The Department therefore assumed that removing the deregistration or

[84] The EEOC reports that there were 88,531 charges in FY2024 and that the number of complaints between FY 2023 to FY 2024 rose by 9.22%. EEOC, ''Enforcement and Litigation Statistics,'' *https://www.eeoc.gov/data/enforcement-and-litigation-statistics-0* (last visited June 26, 2026). Based on this growth rate, we estimate there will be 105,616 complaints in 2026. We assume apprentices file the same percentage of complaints as their share of the workforce. We understand this may be an over or underestimate as apprentices may be less or more likely to fill complaints than the broader workforce. Since apprentices make up 0.4% of the workforce, we assumed that they file 422 complaints a year (105,616 × 0.4%). We repeat this calculation each year to account for the growth in complaints each year.

derecognition components of the current part 30 rule would create minimal to no cost savings. The Department estimated that the cost savings of this alternative would therefore be the same in each year as the final rule, with additional cost savings from the elimination of referral requirements.

In estimating costs, the Department expects that the elimination of part 30 entirely would remove conformity across the Registered Apprenticeship system by creating an inconsistent regulatory framework across states. If some States left their current apprenticeship affirmative action laws in place, it may be harder for sponsors to navigate and comply with this system and these sponsors may not receive the same amount of regulatory relief. This lack of conformity would therefore create confusion and hinder the deregulatory goals of the rulemaking from being achieved on a nationwide basis. Additionally, if some states retained the use of race- and sex-based preferences in apprenticeship selection and advancement decisions, the apprenticeship system in these states would continue to conflict with the merit-based principles that the apprenticeship system, and overall American workforce, should represent.

Eliminating part 30 entirely also would remove an important standard of apprenticeship that was designed to safeguard the welfare of apprentices. As mentioned previously, a Registration Agency's grant of registration to an apprenticeship program serves as an official recognition of that program's overall quality and represents the conferral of a valuable governmental benefit upon the program sponsor. Accordingly, the Department takes the position that there should be appropriate sanctions available (such as program deregistration) if it is determined that a sponsor has engaged in illegal discriminatory conduct against the apprentices enrolled in its program. Rescinding part 30 entirely would remove this important quality safeguard protecting the welfare of apprentices and the mechanism for holding sponsors accountable for illegal discrimination.

While the Department expects that the costs associated with a lack of conformity and conflicts with merit principles could be substantial, these costs are largely intangible and would be difficult to estimate. As a result, the Department estimated that the only monetized costs would be the one-time cost of removing references to part 30 in apprenticeship program standards, which we estimated to be $715,157, and due to data and other limitations referenced above, there would be no quantifiable costs to repealing part 30 entirely because States would not have to submit updated State plans and sponsors would not need to familiarize themselves with the rule change. Exhibit 5 presents a summary of the monetized costs of this alternative over the 10-year analysis period. Costs are presented as undiscounted 10-year totals, and as present values, using 7 percent and 3 percent discount rates.

EXHIBIT 5

Year	Monetized cost savings ($million/year)	Monetized cost ($million/year)

3% Discounted	861.88	0.69
Annualized Undiscounted	101.67	0.07
Annualized 7%	100.24	0.10
Annualized 3%	101.04	0.08

Only Remove Additional Requirements Pertaining to Programs With Five or More Apprentices

This alternative yields only the cost savings that come from eliminating the provisions under the current part 30 regulations that require sponsors with five or more apprentices to take additional affirmative action steps. This more limited change would therefore eliminate the following costs: new sponsors' familiarization with the apprenticeship utilization data tool, the cost of the workforce analysis, the cost of the utilization analysis, the additional dissemination of resources for designated demographic groups if a sponsor is found to be underutilizing said group, costs related to EEO compliance reviews, and the cost of inviting apprentices to self-identify as an individual with a disability (as well as sending email reminders about this self-identification). Sponsors would still incur the costs of orientation and information sessions and universal outreach. New sponsors also would continue to incur the cost of posting EEO pledges.

Under this alternative, the Department assumed that sponsors and SAAs would still incur the same rule familiarization costs and SAAs would still have to submit revised State plans under current § 30.18. Only pre-existing programs with five or more apprentices would incur costs from updating standards. The Department estimated that there will be 7,429 pre-existing programs with more than 5 apprentices in 2026.[85] Based on the methodology described above, we estimated sponsors with five or more apprentices would incur $88,495 from the cost of updating standards and Registration Agencies would incur $112,249 in costs from

[85] There were estimated to be 7,813 sponsors with five or more apprentices in total in FY 2026, 401 of which would be new sponsors. Subtracting new programs, it is estimated that there will be 7,501 pre-existing sponsors with five or more apprentices in FY 2026.

reviewing updated standards, for a total cost of $200,372 for updating standards for programs with five or more apprentices. This cost is lower because fewer sponsors (*i.e.,* only those with five or more apprentices) would need to update standards. We estimated the total cost of this option at $9.36 million.

Exhibit 6 presents a summary of the monetized costs of this alternative over the 10-year analysis period. Costs are presented as undiscounted 10-year totals, and as present values, using 7 percent and 3 percent discount rates. As shown in the table, this alternative option of only removing additional requirements pertaining to programs with five or more apprentices fails to provide the same cost-savings as the final rule because, as outlined above, sponsors would still need to conduct several additional activities to comply with part 30.

EXHIBIT 6

Annualized 7%	33.29	1.25
Annualized 3%	33.82	1.07

Take No Action

This alternative yielded no additional costs or cost savings to society because it does not deviate from the baseline, that is, the 2016 final rule. However, the Department notes that taking no action would prevent the cost savings that would accrue from this final rule. In addition to decreasing the burden on sponsors and Registration Agencies, chief among the cost savings from the final rule is the elimination of regulatory provisions that have the effect of encouraging the use of race- and sex-based preferences in apprenticeship selection and advancement decisions. By removing these requirements, the final rule promotes a return to individual, merit-based evaluation, consistent with the principle that all Americans should be treated as individuals rather than as members of demographic groups. Without this change, the Department is concerned that the public's confidence in the fairness of the apprenticeship system could be undermined, that legal uncertainty would remain for current sponsors, and that prospective sponsors may be deterred by the 2016 final rule's prescriptive and group-based mandates.

Additionally, as noted throughout the preamble, the Department anticipates that the removal of these burdensome requirements from part 30 will spur further growth of the National Apprenticeship System, providing more opportunities for American workers to up-skill and for employers to fill their workforce shortages. While the Department has not monetized these benefits due to data limitations, they are likely to be significant. However, if the Department took no action and did not streamline the part 30 regulation, these benefits would not occur.

B. Regulatory Flexibility Act, Small Business Regulatory Enforcement Fairness Act of 1996, and Executive Order 13272 (Proper Consideration of Small Entities in Agency Rulemaking)

The Regulatory Flexibility Act of 1980,[86] as amended by subtitle D of SBREFA, requires agencies to prepare an initial regulatory flexibility analysis when proposing, and a final regulatory flexibility analysis when issuing, regulations that will have a significant economic impact on a substantial number of small entities.

The Department conducted the analysis below of the burden on small entities from the proposed rule, and based on that analysis, certifies that the costs of this rule will not have a significant economic impact on a substantial number of small entities.

1. Why Action Is Being Taken

The Department has determined that this deregulatory action is necessary to remove administrative barriers to participation in Registered Apprenticeship. As described throughout the preamble for this final rule, in the Department's view, this final rule's changes to the regulation at 29 CFR part 30 will significantly reduce administrative burdens for existing program sponsors, and will alleviate concerns expressed by employers (including small businesses) regarding the amount of administrative burden they would have to take on to participate in Registered Apprenticeship. The Department is finalizing these changes to the regulation at 29 CFR part 30 because these outcomes will help accelerate the expansion of Registered Apprenticeship, in line with the Administration's and the Department's ambitious goals to grow the system, including in industries and sectors where Registered Apprenticeship is not currently widespread. In addition, the Department is finalizing this deregulatory action in light of the Administration's call for Federal agencies to review their regulations and remove regulations that impose undue or unnecessary burdens on stakeholders. Finally, as discussed throughout the preamble in depth, the Departments finds that the existing part 30 regulations impose mandates that may induce the utilization of race and sex-based preferences in a manner that

[86] 5 U.S.C. 601 *et seq.*

is unlawful and in direct conflict with controlling Supreme Court precedent. Accordingly, the Department is removing these requirements.

2. Objectives of, and Legal Basis for, the Final Rule

A primary objective of the final rule is to alleviate administrative burden for Registered Apprenticeship stakeholders and promote a more straightforward framework for the regulated community to participate in the system and maintain compliance with the governing regulations (at 29 CFR parts 29 and 30). In addition, this final rule seeks to eliminate a duplicative and ineffective (and, in light of recent case law, legally questionable) regulatory framework for nondiscrimination protections in Registered Apprenticeship. These objectives align with the broader goals of the Administration and the Department to identify and modify burdensome regulations, preserve limited enforcement resources, and keep pace with evolving issues in nondiscrimination law. The NAA stands as the Department's statutory basis for promulgating regulations on apprenticeship.

3. Classes of Small Entities

A small entity is one that is independently owned and operated and that is not dominant in its field of operation.[87] The definition of small entity varies from industry to industry to properly reflect industry size differences. 13 CFR 121.201. An agency must either use the SBA definition for a small entity or establish an alternative definition for the industry. Using SBA size standards, the Department has conducted a small entity impact analysis on small entities in the five industry categories with the most Registered Apprenticeship programs and for which data were available: Construction, Educational Services, Manufacturing, Other Services, and Healthcare.[88]

One industry, Public Administration, made the initial top-five list but is not included in this analysis because no data on the revenue of small local jurisdictions were available. Local jurisdictions are classified as small when their population is less than 50,000.[89]

Registered Apprenticeship program sponsors may be employers, employer associations, industry associations, or labor management organizations and, thus, may represent businesses, multiple businesses, and not-for-profit organizations. The requirements of the final rule, however, fall on the sponsor, and therefore we used sponsor data to create industry breakdowns.

4. Impact on Small Entities

The Department estimated the incremental costs for small entities from the baseline of the 2016 final rule.[90] This analysis reflects the incremental cost of the final rule, as it adds to the requirements of the 2016 final rule. Using available data, we estimated the costs to sponsors of familiarizing themselves with the rule change. A significant economic burden results when the total incremental annual cost as a percentage of total average annual revenue is equal to or exceeds 3 percent.[91] Because the estimated annual burden of the final rule is less than 1 percent of the average annual revenue of each industry category, the final rule is not expected to cause a significant economic impact to small entities. These entities include individual employers, groups of employers, labor management organizations, or industry associations that sponsor apprenticeships. As explained in detail below, the total impact amounts to approximately $125.69 per affected small entity in the first year. All costs are incurred in the first year. Because all the final rule provisions will have a similar impact on entities across economic sectors, we calculated impacts to a representative single entity.[92]

Costs

Familiarization With Regulatory Change

During the first year after implementation of the final rule, sponsors will need to learn about the new regulatory requirements. We estimated this cost for a hypothetical small entity by multiplying the time required to read the new rule (1 hour) by the average hourly compensation rate of a human resources manager ($113.78, as calculated above). Thus, the resulting cost per small entity is $113.78 ($113.78 × 1). This cost occurs only in the year after the final rule is published.

Updating Standards for Compliance

Sponsors of Registered Apprenticeship programs will also need to develop language or make adjustments and updates to existing standards to comply with the proposed changes to part 30. The Department assumed that updating standards to comply with part 30 will mainly entail removing items currently required by part 30 and therefore estimated the burden will be minimal. The Department assumed new sponsors will take a similar amount of time to ensure the standards they develop do not conflict with part 30. Accordingly, the Department estimated the average response time for sponsors to ensure standards comply with part 30 is 20 minutes (0.33 hours). Thus, the Department estimated a cost per small entity of $11.91 (0.33 × $36.10).

Total Cost Burden for Small Entities

Based on the cost estimates above, for a hypothetical small entity in the top five industry categories, the estimated first-year cost of this rule is $125.69 ($113.78 + $11.91). There are no costs in subsequent years. The total cost impacts, as a percentage of revenue, are all well below the 3 percent threshold for determining a significant economic impact.

The Department used the following steps to estimate the cost of the final rule per Registered Apprenticeship program sponsor as a percentage of annual receipts. First, the Department used the SBA's Table of Small Business Size Standards to determine the size thresholds for small entities within each major industry.[93] Next the Department obtained data on the number of firms, number of employees, and annual revenue by industry and firm size category from the Census Bureau's Statistics of U.S. Businesses.[94] Then, the Department divided the estimated first-year cost per sponsor by the average annual receipts per firm to determine whether the final rule will have a significant economic impact on sponsors in each size category.[95] Finally, the Department divided the number of firms in each size category by

[87] 5 U.S.C. 601(3); 15 U.S.C. 632.

[88] According to RAPIDS, the percent of programs (of all sizes) in the selected sectors in 2024 were as follows: Construction, 33.5 percent; Educational Services, 24.1 percent; Manufacturing, 4.3 percent; Other Services, 3.7 percent; Health Care and Social Assistance, 3.6 percent. Public Administration was 24.1 percent, and 11.6 percent of programs did not have an industry available.

[91] See SBA, ''A Guide for Government Agencies: How to Comply with the Regulatory Flexibility Act,'' pp.17–19, (Aug. 2017), *https://advocacy.sba.gov/wp-content/uploads/2019/07/How-to-Comply-with-the-RFA-WEB.pdf.* The Department has used the 3 percent threshold in previous regulations.

[92] A large entity could have a single apprentice or a small entity could have multiple apprentices.

[93] SBA, ''Table of Small Business Size Standards,'' Mar. 17, 2023, *https://www.sba.gov/document/support-table-size-standards.* The size standards, which are expressed in either average annual receipts or number of employees, indicate the maximum allowed for a business in each subsector to be considered small.

[94] U.S. Census Bureau, ''Statistics of U.S. Businesses,'' last revised March 11, 2025, *https://www.census.gov/programs-surveys/susb.html.*

[95] For purposes of this analysis, the Department used a 3-percent threshold for ''significant economic impact.'' The Department has used a 3-percent threshold in prior rulemakings.

the total number of small firms in the industry to determine whether the final rule will have a significant economic impact on a substantial number of small entities.[96]

[96] For purposes of this analysis, the Department used a 15-percent threshold for ''substantial number of small entities.'' The Department has used a 15-percent threshold in prior rulemakings.

The results are presented in the following five tables, one for each major industry sector with the most Registered Apprenticeship programs and for which data are available: Construction, Educational Services, Manufacturing, Other Services, and Healthcare. As shown in the five tables below, the first-year costs for sponsors in these five industries are not expected to have a significant economic impact (3 percent or more) on small entities of any size. Therefore, the Department certifies that the final rule is not expected to have a significant economic impact on a substantial number of small entities.

Enterprises with receipts of $40,000,000 to $49,999,999	903	0.1%	357,594	$ 37,602,128,000	$ 41,641,338	$126	0.0%

BILLING CODE 4510–FR–C

5. Alternatives to the Final Rule

Regarding significant alternatives to the final rule that accomplish the objectives of applicable statutes and minimize any significant economic impact of the final rule on small entities, there are limited options. Repealing part 30 entirely would still require sponsors that are small entities to update their standards to remove reference to part 30, costing $11.91 per sponsor. There could be lower to no rule familiarization costs for small entities if part 30 was removed entirely, since there would be no rule that entities would have to be familiarized with, but sponsors would still need to be informed of the change and may review the **Federal Register** notice. However, the Department is concerned that removing part 30 entirely would prevent conformity across the National Apprenticeship System, as some states may choose to impose additional requirements for sponsors to conduct legally questionable affirmative action or other EEO activities that expand beyond the scope of the Department's proposed part 30 rule. If part 30 was repealed entirely and states were to impose additional EEO requirements, these new requirements and the resulting confusion from a patchwork of different requirements across jurisdictions could ultimately lead to greater costs for small entities.[97]

Alternatively, the Department considered publishing a direct final rule or an interim final rule to make changes to the part 30 regulation. However, the Department determined that these approaches to rulemaking would have given smaller entities no advanced notice of changes to the part 30 regulation, given that the changes would take effect immediately upon (or soon after) publication, and would have denied small entities the opportunity to provide robust feedback on the changes. Accordingly, the Department determined notice-and-comment rulemaking to be more appropriate, in part because it would allow the Department to better account for small businesses' viewpoint and needs.

C. Paperwork Reduction Act

The purpose of the Paperwork Reduction Act (PRA) [98] includes minimizing the paperwork burden on affected entities. The PRA requires certain actions before an agency can adopt or revise a collection of information, including publishing for public comment a summary of the collection of information and a brief description of the need for and proposed use of the information.

As part of its continuing effort to reduce paperwork and respondent burden, the Department conducts a preclearance consultation program to provide the public and Federal agencies with an opportunity to comment on proposed and continuing collections of information in accordance with the PRA.[99] Furthermore, the PRA requires all Federal agencies to analyze proposed and final regulations for potential time burdens on the regulated community created by provisions in the regulations that require any party to obtain, maintain, retain, report, or disclose information. The information collection requests (ICRs) also must be submitted to OMB for approval. Such submissions often accompany a proposed and final rulemaking that seeks to modify an existing information collection (IC), introduce new ICs, or both.

A Federal agency may not conduct or sponsor a collection of information unless it is approved by OMB under the PRA and displays a currently valid OMB control number. The public also is not required to respond to a collection of information unless it displays a currently valid OMB control number. In addition, notwithstanding any other provisions of law, no person will be subject to penalty for failing to comply with a collection of information if the collection of information does not display a currently valid OMB control number.[100]

This rulemaking affects specific ICRs (OMB Control Number 1205–0223, which includes OMB-approved forms ETA–671, ETA–9186, and ETA–9039). Changes to these collections will be communicated through an upcoming 60-day **Federal Register** Notice.

1. Labor Standards and Equal Employment Opportunity for Registered Apprenticeship Programs—Registration and Reporting Requirements

Agency: DOL–ETA.

Title of Collection: Labor Standards and Equal Employment Opportunity for Registered Apprenticeship Programs—Registration and Reporting Requirements.

Type of Review: Revision.

OMB Control Number: 1205–0223.

Description:

Affected Public: State, Local, and Tribal Governments; Private Sector; Individuals or Households.

Obligation to Respond: Required to Obtain or Retain Benefits.

Estimated Total Annual Respondents: placeholder.

Estimated Total Annual Responses: placeholder.

Estimated Total Annual Burden Hours: placeholder.

Estimated Total Annual Burden Costs: placeholder.

Estimated Total Annual Other Burden Costs: placeholder.

Regulations Sections: placeholder.

[97] The Department is not able to estimate or monetize the cost of the additional potential EEO requirements states may pursue if part 30 is repealed, because it is unknown what requirements states would impose on small entities.

[98] 44 U.S.C. 3501 *et seq.*

[99] *See* 44 U.S.C. 3506(c)(2)(A).

[100] See 44 U.S.C. 3512.

Comments: A commenter expressed confusion about whether the Department will continue to collect apprentice data, through ETA Form 671, related to race, sex, ethnicity, and disability. The commenter recommended that, given the Department's proposed removal of the definitions for those terms, and because the Department proposed to revise § 29.7 to only require ''demographic data,'' rather than specific types of demographic data, that the Department clarify what data would be collected under a revised Form 671.

Department Response: As noted in the ICR referenced in an August 25, 2025, **Federal Register** Notice (90 FR 41414) following the NPRM's publication, there is no change to the collection of demographic data under ETA Form 671, Section II. Accordingly, race, sex, and ethnicity will still be collected through this form on a voluntary basis. As noted in the ICR, Form 671, Section IIA, which allows an apprentice to voluntarily self-report their disability status, is discontinued and therefore the Department will cease collecting disability information on apprentices.

D. Congressional Notification

As required by 5 U.S.C. 801, once finalized, DOL will report to Congress on the promulgation of this rule at least 60 days before its effective date. The report will state that it has been determined that the rule meets the criteria set forth in 5 U.S.C. 804(2).

Comments: The Department did not receive any comments on its congressional notification analysis.

E. Executive Order 13132 (Federalism)

The Department has reviewed this final rule in accordance with E.O. 13132 and found that it will have Federalism implications because it will have substantial direct effects on States. As stated in the Federalism analysis that accompanied the Department's NPRM, matters of Federalism in the National Apprenticeship System are primarily related to the regulatory requirements established in part 29, Labor Standards for Registration of Apprenticeship Programs, which establishes the requirements for the recognition of SAAs as Registration Agencies. However, this final rule's revisions to the part 30 regulation also have direct effect on a State's method of administering Registered Apprenticeship for Federal purposes. In particular, the final rule requires a State that seeks to obtain or maintain recognition as a Registration Agency to submit State apprenticeship legislation, regulations, policies, and operational procedures that pertain specifically to nondiscrimination or equal opportunity in apprenticeship to the Department so that the Department may assess whether any such laws, regulations, policies, and operational procedures conform to the revised part 30 regulation.

The Department has determined that requiring States to submit State laws, policies, regulations, and procedures that pertain specifically to nondiscrimination or equal opportunity in apprenticeship to the Department is essential to ensure that SAAs conform to the new requirements of part 30. OA regularly consults and collaborates with State partners and organizations, including on matters pertaining to the Federal regulations governing Registered Apprenticeship at 29 CFR parts 29 and 30. More specifically, such engagement with State partners often relates to States' conformity with these regulations, in particular those States with State agencies that have been recognized (or are seeking recognition) as SAAs that serve as the Registration Agency responsible for registering apprenticeship programs for Federal purposes in the State. These engagements are critical for determining whether the Department should confer the distinct responsibility of acting as a Registration Agency to a State agency. The Department and OA will continue consulting and collaborating with State partners, which the Department views as central to OA's role in promoting and maintaining quality Registered Apprenticeship programs.

Comments: The Department did not receive any comments on its Federalism analysis required under E.O. 13132. The Department did receive several comments raising Federalism concerns in the context of the Department's proposal to require SAAs to ''conform only to'' the part 30 requirements in proposed § 30.7. As discussed above in addressing SAA requirements in § 30.7, the Department has considered this issue and has determined to change the language in § 30.7 of this final rule to require that States' laws, regulations, policies, and procedures specific to nondiscrimination or equal opportunity in apprenticeship ''conform to'' to the part 30 regulation. In addition, in this final rule, the Department has made additional clarifications regarding the scope of the Department's analysis of State laws, regulations, policies, and procedures, specifically clarifying that the Department only will assess those laws, regulations, policies, and procedures specific to nondiscrimination in Registered Apprenticeship in determining whether the Department will confer recognition to a State agency as a Registration Agency for Federal purposes.

F. Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) [101] requires each Federal agency to prepare a written statement assessing the effects of any Federal mandate in a final rule that may result in $100 million or more in expenditures (adjusted annually for inflation) in any 1 year by State, local, and Tribal governments, in the aggregate, or by the private sector. The current threshold after adjustment for inflation is $177 million, using the most current (2022) Implicit Price Deflator for the Gross Domestic Product.

This final rule does not meet or exceed the expenditure threshold in any 1 year when adjusted for inflation. The requirements of title II of UMRA, therefore, do not apply, and the Department has not prepared a statement under UMRA.

Comments: The Department did not receive any comments on its UMRA analysis.

G. Executive Order 13175 (Indian Tribal Governments)

The Department has reviewed this final rule in accordance with E.O. 13175 and has determined that it does not have Tribal implications. The final rule does not have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

Comments: The Department did not receive any comments on its Indian Tribal Governments analysis.

List of Subjects

29 CFR Part 29

Administrative practice and procedure, Employment, Intergovernmental relations, Labor, Licensing and registration, Manpower training programs, Reporting and recordkeeping requirements, State and local governments.

29 CFR Part 30

Administrative practice and procedure, Employment, Equal employment opportunity, Manpower training programs, Reporting and recordkeeping requirements.

For the reasons stated in the preamble, the Department amends 29 CFR parts 29 and 30 as follows:

[101] 2 U.S.C. 1532.

PART 29—LABOR STANDARDS FOR THE REGISTRATION OF APPRENTICESHIP PROGRAMS

■ 1. The authority citation for part 29 continues to read as follows:

Authority: 29 U.S.C. 50; 40 U.S.C. 3145; 5 U.S.C. 301; 5 U.S.C. App. P. 534.

■ 2. Amend § 29.3 by revising paragraph (b)(2) to read as follows:

§ 29.3 Eligibility and procedure for registration of an apprenticeship program.

* * * * *

(b) * * *

(2) It is in conformity with the requirements of the Department's nondiscrimination in apprenticeship regulation at 29 CFR part 30, as amended.

* * * * *

■ 3. Amend § 29.5 by revising paragraph (b)(21) to read as follows:

§ 29.5 Standards of apprenticeship.

* * * * *

(b) * * *

(21) Compliance with 29 CFR part 30, including a statement that the program will be conducted, operated, and administered in conformity with applicable provisions of 29 CFR part 30, as amended, or if applicable, an approved State plan for nondiscrimination in apprenticeship.

* * * * *

■ 4. Amend § 29.6 by revising paragraph (b)(1)(ii) to read as follows:

§ 29.6 Program performance standards.

* * * * *

(b) * * *

(1) * * *

(ii) Compliance Reviews; and

* * * * *

■ 5. Amend § 29.7 by revising paragraphs (j) and (l) to read as follows:

§ 29.7 Apprenticeship agreement.

* * * * *

(j) A statement that the apprentice will not be illegally discriminated against on the basis of race, color, religion, national origin, sex, age (40 or older), genetic information, or disability in any phase of apprenticeship employment and training.

* * * * *

(l) A request for demographic data about the apprentice.

■ 6. Amend § 29.11 by revising paragraph (b) to read as follows:

§ 29.11 Limitations.

* * * * *

(b) Any special provision for veterans in the standards, apprentice qualifications or operation of the program, or in the apprenticeship agreement, which is not prohibited by law, Executive order, or authorized regulation.

■ 7. Amend § 29.12 by revising paragraph (a) to read as follows:

§ 29.12 Complaints.

(a) This section is not applicable to any complaint concerning illegal discrimination; all such complaints received by a Registration Agency must be submitted to the relevant enforcement authority, as set forth in 29 CFR 30.4, or according to applicable provisions of the State plan for nondiscrimination in apprenticeship.

* * * * *

■ 8. Amend § 29.13 by revising paragraphs (a)(3), (b)(4), (h)(2), and (j) to read as follows:

§ 29.13 Recognition of State Apprenticeship Agencies.

(a) * * *

(3) The State Apprenticeship Agency must submit a State plan for nondiscrimination in apprenticeship that conforms to the requirements published in 29 CFR part 30;

* * * * *

(b) * * *

(4) Establish policies and procedures to prohibit illegal discrimination in registered apprenticeship programs in conformity with the requirements set forth in 29 CFR part 30;

* * * * *

(h) * * *

(2) Provide all apprenticeship program standards, apprenticeship agreements, completion records, cancellation and suspension records, Compliance Review files, and any other documents relating to the State's apprenticeship programs, to the Department; and

* * * * *

(j) *State apprenticeship programs.* (1) An apprenticeship program submitted to a State Registration Agency for registration must, for Federal purposes, be in conformity with the State apprenticeship law, regulations, and with the State plan for nondiscrimination in apprenticeship as submitted to, and approved by, the Office of Apprenticeship pursuant to 29 CFR part 30.

(2) In the event that a State Apprenticeship Agency is not recognized by the Office of Apprenticeship for Federal purposes or that such recognition has been withdrawn, or if no State Apprenticeship Agency exists, registration with the Office of Apprenticeship may be requested. Such registration must be granted if the program is conducted, administered, and operated in accordance with the requirements of this part and the nondiscrimination in apprenticeship regulation in 29 CFR part 30, as amended.

■ 9. Amend § 29.14 by revising paragraphs (a) and (h)(1) to read as follows:

§ 29.14 Derecognition of State Apprenticeship Agencies.

* * * * *

(a) Derecognition proceedings for failure to adopt or properly enforce a State plan for nondiscrimination in apprenticeship must be processed in accordance with the procedures prescribed in this part.

* * * * *

(h) * * *

(1) Provide all apprenticeship program standards, apprenticeship agreements, completion records, cancellation and suspension records, Compliance Review files, and any other documents relating to the State's apprenticeship programs, to the Department.

* * * * *

■ 10. Revise part 30 to read as follows:

PART 30—PROHIBITING ILLEGAL DISCRIMINATION IN REGISTERED APPRENTICESHIP PROGRAMS

Sec.

30.1 Purpose and applicability.
30.2 Definitions.
30.3 Nondiscrimination standards applicable to all sponsors.
30.4 Complaints.
30.5 Nondiscrimination compliance reviews and enforcement.
30.6 Reinstatement of program registration.
30.7 State apprenticeship agencies.
30.8 Exemptions.
30.9 Severability.

Authority: Sec. 1, 50 Stat. 664, as amended (29 U.S.C. 50; 40 U.S.C. 276c; 5 U.S.C. 301); Reorganization Plan No. 14 of 1950, 64 Stat. 1267, 3 CFR, 1949–53 Comp., p. 1007.

§ 30.1 Purpose and applicability.

(a) *Purpose.* The purpose of this part is to establish a uniform Federal standard prohibiting illegal discrimination against apprentices (including applicants for apprenticeship) in registered apprenticeship programs. To achieve this purpose, this part sets forth nondiscrimination requirements for program sponsors and State Apprenticeship Agencies (SAAs), and clarifies the scope and content of compliance reviews, compliance assistance, and enforcement actions by Registration Agencies.

(b) *Applicability.* This part applies to all sponsors of apprenticeship programs registered with either the U.S. Department of Labor or a recognized SAA.

§ 30.2 Definitions.

The definitions in § 29.2 of this title also apply to this part.

§ 30.3 Nondiscrimination standards applicable to all sponsors.

Registered apprenticeship program sponsors must comply with all applicable Federal and State laws and regulations prohibiting illegal discrimination on the basis of race, color, religion, national origin, sex, age (40 or older), genetic information, or disability. Failure to comply with such nondiscrimination laws is grounds for deregistration or the imposition of other enforcement actions in accordance with § 30.5(c), if such non-compliance is related to illegal discrimination against apprentices or an applicant to an apprenticeship program with respect to any benefit, term, or condition of employment associated with an apprenticeship.

§ 30.4 Complaints.

If the Registration Agency receives any complaints from apprentices (including applicants for apprenticeship) alleging illegal discrimination, it will immediately refer the individual to any of the following:

(a) The Equal Employment Opportunity Commission;

(b) The U.S. Attorney General;

(c) A State Fair Employment Practices Agency; or

(d) Another Federal or State enforcement entity with jurisdiction over discrimination issues, as appropriate.

§ 30.5 Nondiscrimination compliance reviews and enforcement.

(a) *Conduct of compliance reviews.* Concurrently with a Registration Agency's review of a registered apprenticeship program for conformity with the requirements of part 29 of this title, a Registration Agency will assess a program's compliance with the nondiscrimination requirement of § 30.3.

(b) *Determining compliance.* For the purpose of determining compliance under this part, the Registration Agency may initiate enforcement actions against a sponsor for failure to comply with the nondiscrimination requirement at § 30.3 in instances where a final determination of a violation of an applicable nondiscrimination law, without any remaining right to appeal, has been made by an enforcement entity or court with jurisdiction over a matter, and authority to issue a final determination, relating to an apprentice or an applicant to an apprenticeship program.

(1) Sponsors must disclose in writing to the Registration Agency any instances when an enforcement entity or court with jurisdiction over an applicable nondiscrimination law has rendered a final determination, without any remaining right to appeal, that the sponsor has violated such laws relating to an apprentice or an applicant to an apprenticeship program within 60 days of the final determination. The disclosure must include, at a minimum, a copy of all relevant final determinations, judgments, decisions and orders.

(2) As a part of the self-disclosure requirement under paragraph (b)(1) of this section, sponsors must include a description of any prescribed remedies mandated by the enforcement entity or court to address the violation of applicable nondiscrimination law.

(c) *Compliance and enforcement actions.* Upon learning of a final determination made by an enforcement entity or court with respect to a sponsor's violation of an applicable nondiscrimination law (as described in paragraph (b) of this section), the Registration Agency may work with the sponsor to develop a compliance action plan that aligns with the remedy prescribed by the enforcement entity or court and brings the program into compliance with this part. If the Registration Agency determines that a compliance action plan is not being implemented in accordance with the remedy prescribed by the enforcement entity or court, the Registration Agency may initiate enforcement actions that will remain in place until the violation is resolved to the satisfaction of the Registration Agency. Enforcement actions by the Registration Agency include:

(1) Suspension of the sponsor's right to register new apprentices; or

(2) The initiation of deregistration proceedings set forth in part 29 of this title.

§ 30.6 Reinstatement of program registration.

An apprenticeship program that has been deregistered pursuant to this part may be reinstated by the Registration Agency upon presentation of adequate evidence that the apprenticeship program is operating in accordance with this part.

§ 30.7 State apprenticeship agencies.

(a) *State laws specific to nondiscrimination in apprenticeship.* Within 1 year of January 5, 2027, unless an extension for good cause is sought and granted by the Administrator, an SAA that seeks to obtain or maintain recognition under § 29.13 of this title must submit a State plan for nondiscrimination in apprenticeship, as described in paragraph (b) of this section, that demonstrates that the State's laws, regulations, policies, and operational procedures specific to nondiscrimination or equal opportunity in apprenticeship conform to the requirements of this part and part 29 of this title.

(b) *Elements of the State plan for nondiscrimination in apprenticeship.* (1) The State plan for nondiscrimination in apprenticeship must—

(i) Include all State statutes, regulations, policies, and operational procedures pertaining specifically to nondiscrimination or equal opportunity in apprenticeship that conform to the requirements of this part;

(ii) Include a description of any State statutes, regulations, policies, and operational procedures pertaining specifically to nondiscrimination or equal opportunity in apprenticeship which impose requirements in addition to those prescribed in this part;

(iii) Not require any sponsor seeking to register an apprenticeship program with the State for Federal purposes, through any State statutes, regulations, policies, or operational procedures, to engage in any activity that is unlawful under Federal or State nondiscrimination law; and

(iv) Require all apprenticeship programs registered with the State for Federal purposes to comply with the requirements of the State's plan within 180 days from the date that the Office of Apprenticeship (OA) provides written approval of the State plan submitted under paragraph (a) of this section.

(2) Upon receipt of the State plan, OA will review the plan to determine if the plan conforms to this part. OA will:

(i) Grant the SAA continued recognition during this review period;

(ii) Provide technical assistance, if necessary, to facilitate conformity, and provide written notification of the areas of nonconformity, if any; and

(iii) Upon successful completion of the review process, notify the SAA of OA's determination that the State plan conforms to this part.

(3) If the State does not submit a revised State plan that adequately responds to OA's technical assistance within 90 days from the date that OA provides the SAA with written notification of the areas of nonconformity, OA is authorized to

initiate the process set forth in § 29.14 of this title to rescind recognition of the SAA.

(4) An SAA that seeks to obtain or maintain recognition must obtain the Administrator's written concurrence in any proposed State plan, as well as any subsequent modification to that plan, as provided in § 29.13(b)(9) of this title.

(c) *Recordkeeping requirements.* A recognized SAA must keep all records pertaining to program compliance reviews and any other records pertinent to a determination of compliance with this part. These records must be maintained for 5 years from the date of their creation.

(d) *Retention of authority.* As provided in § 29.13 of this title, OA retains the full authority to:

(1) Conduct compliance reviews of all registered apprenticeship programs; and

(2) Deregister for Federal purposes an apprenticeship program registered with a recognized SAA as provided in §§ 29.8(b) and 29.10 of this title.

(e) *Derecognition.* A recognized SAA that fails to comply with the requirements of this section will be subject to derecognition proceedings, as provided in § 29.14 of this title.

§ 30.8 Exemptions.

Requests for exemption from this part, or any part thereof, must be made in writing to the Registration Agency and must contain a statement of reasons supporting the request. Exemptions may be granted for good cause by the Registration Agency. SAAs must receive approval to grant an exemption from the Administrator, prior to granting an exemption from this part.

§ 30.9 Severability.

Should a court of competent jurisdiction hold any provision(s) of this part to be invalid, such action will not affect any other provision of this part.

Marek Laco,

Acting Assistant Secretary for Employment and Training, Labor.

BILLING CODE 4510–FR–P

FEDERAL REGISTER

Vol. 91 Friday,
No. 214 November 6, 2026

Part IV

Department of Agriculture

Food and Nutrition Administration

7 CFR Part 246

Special Supplemental Nutrition Program for Women, Infants, and Children (WIC): Online Ordering and Transactions and Food Delivery Revisions To Meet the Needs of a Modern, Data-Driven Program; Final Rule

DEPARTMENT OF AGRICULTURE

Food and Nutrition Administration

7 CFR Part 246

[FNA–2026–0595]

RIN 0584–AE85

Special Supplemental Nutrition Program for Women, Infants, and Children (WIC): Online Ordering and Transactions and Food Delivery Revisions To Meet the Needs of a Modern, Data-Driven Program

AGENCY: Food and Nutrition Administration (FNA), Department of Agriculture (USDA).

ACTION: Final rule with request for comment.

SUMMARY: This final rule considers public comments submitted in response to the proposed rule to remove barriers to online ordering and internet-based transactions in the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) published on February 23, 2023. USDA FNA is issuing this regulatory action to support State innovation and develop and implement modernized systems, while underscoring program integrity. It allows for the use of new technologies to improve the WIC shopping experience while increasing access to healthy foods for WIC participants. This final rule also complements the Program's complete transition to electronic benefit transfer (EBT) by streamlining and modernizing certain WIC food delivery regulations to support current technology and future innovation, and introduces measures to support a modern, data-driven program that uses new technologies for food delivery.

DATES:

Effective Date: This rule is effective December 7, 2026. Online comments submitted through the Federal eRulemaking Portal must be received on or before January 5, 2027 to be assured of consideration.

Implementation Dates: See section VI of the **SUPPLEMENTARY INFORMATION**.

Compliance Dates: This rulemaking consists of multiple provisions. Compliance for each provision is referenced in section VI of the **SUPPLEMENTARY INFORMATION** section of this final rule and detailed in the section-by-section analysis.

• Severability. If any provision of such section promulgated through this final rule, ''Special Supplemental Nutrition Program for Women, Infants, and Children (WIC): Online Ordering and Transactions and Food Delivery Revisions to Meet the Needs of a Modern, Data-Driven Program'' (FNA–2026–0595; RIN 0854–AE85) is held to be invalid or unenforceable by its terms, or as applied to any person or circumstances, it shall be severable and not affect the remainder thereof.

ADDRESSES: The Food and Nutrition Administration, USDA, invites interested persons to submit written comments on this final rule. USDA seeks comment on the impacts to stakeholders, specifically State agencies and their Management Information Systems (MIS), Electronic Benefit Transfer (EBT), and vendor system partners. Comments may be submitted to the Federal eRulemaking Portal at *http://www.regulations.gov.* Follow the online instructions for submitting comments. All comments submitted in response to this final rule will be included in the record and will be made available to the public. Please be advised that the substance of the comments and the identity of the individuals or entities submitting the comments will be subject to public disclosure. FNA will make the comments publicly available on the internet via *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Allison Post, Supplemental Nutrition and Safety Programs, Food and Nutrition Administration, USDA, 201 14th Street SW, Washington, DC 20227, 703–457–7708 or *sm.fn.WICPolicy@usda.gov.*

SUPPLEMENTARY INFORMATION:

I. Overview

This rule sets forth regulatory flexibilities, encourages innovation, and modernizes WIC food delivery regulations. The rule ensures WIC participants have the same shopping options as non-WIC shoppers to transact their WIC benefits as the retail marketplace innovates and evolves. This rule also clarifies requirements so that State agencies can effectively carry out a modern, data-driven program that uses current technologies for food delivery. This final rule considers public comments on the proposed rule ''Special Supplemental Nutrition Program for Women, Infants, and Children (WIC): Online Ordering and Transactions and Food Delivery Revisions to Meet the Needs of a Modern, Data-Driven Program'' (88 FR 11516) published on February 23, 2023, referred to as ''the proposed rule.'' The changes finalized in this rule better serve families across the country by improving the WIC shopping experience and ensuring that WIC participants have access to healthy foods, while maintaining security and oversight measures at the federal and State agency levels. This rule:

(1) Removes barriers to online shopping and internet-based transactions in WIC, including a current prohibition of the authorization of internet-based vendors. This provides State agencies the flexibility to determine how to offer online shopping to participants in a way that maintains program integrity. The revisions support oversight measures and policies appropriate for current technologies, and adaptable for future ones (*e.g.,* Europay, Mastercard, and Visa (''EMV'') chip cards, mobile apps), as well as security requirements to support program integrity as the retail marketplace innovates.

(2) Streamlines and modernizes WIC food delivery requirements to reflect the Program's complete transition to electronic benefit transfer (EBT), supports current technology and future innovation, and expands opportunities for WIC participants to utilize innovations in the retail grocery industry. The revisions allow State agencies to use new types of food instruments (*e.g.,* mobile payments) and provide State agencies with more flexibility in the issuance of WIC benefits.

(3) Updates reporting requirements to reflect a modern, data-driven program.

II. Background

This part provides an overview of the WIC Program and key terms used throughout this preamble.

A. Overview of the WIC Program

The WIC Program is administered by 88 WIC State agencies, including the 50 States, 32 Indian Tribal Organizations, the District of Columbia, and 5 U.S. Territories (American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, and the U.S. Virgin Islands).[1] WIC is an evidence-based public health program, with a long history of improving health outcomes for nutritionally at risk and income-eligible pregnant, breastfeeding, and non-breastfeeding postpartum women, and infants and children up to age five. In fiscal year (FY) 2025, WIC served an average of 6.9 million participants per month.[2] As of the most recent published estimates (2023), WIC

[1] The number of WIC State agencies operating as of September 2026.

[2] U.S. Department of Agriculture Food and Nutrition Administration, ''WIC Data Tables,'' 2026. *https://www.fna.usda.gov/pd/wic-program.*

participants included around 40 percent of all infants in the United States.[3]

The USDA provides grants to WIC State agencies to provide supplemental foods, referrals to health care and other social services, and nutrition education, including breastfeeding promotion and support, to WIC participants. WIC participation is associated with purchasing healthier foods and improved diets for pregnant women and children and has been shown to reduce prevalence of childhood obesity.[4] [5] According to their participant category and nutritional needs, WIC participants receive supplemental foods on a monthly basis from one of seven evidence-based food packages. The amounts and categories of foods provided in each package are intended to supplement participants' diets and provide specific nutrients known to be lacking in the diets of WIC's target population.

WIC participants typically access supplemental foods through a retail food delivery system. In such systems, a WIC shopper goes to a WIC-authorized vendor (*i.e.,* a retail grocery store authorized by the State agency), selects foods available in their benefit balance, and uses an electronic benefit transfer (EBT) card to purchase the items. In FY 2023, there were approximately 37,368 WIC-authorized vendors nationwide and, as of August 2024, all WIC State agencies completed the transition from paper vouchers to EBT. This rule does not fully remove references to paper food instruments because when the proposed rule was published in early 2023, there were still State agencies in the midst of implementing EBT. The Department intends to use a future rulemaking to update WIC regulations to reflect that EBT is now the sole benefit delivery method in the retail food delivery system.

WIC State agencies are responsible for making sure the distribution of WIC-authorized vendors in their geographic area provides sufficient access to WIC foods for participants, and vendors stock an adequate amount and variety of WIC foods. The regulatory changes in this final rule aim to reduce some of the burden associated with shopping for WIC foods, and support State agency vendor management operations in maintaining strong program integrity efforts. The Department recognizes that the development and expansion of online shopping is a novel and developing component in WIC. In order to protect both participants and taxpayer funds, the Department is committed to ensuring all available resources are deployed toward increased oversight and prevention of potential vendor fraud and abuse.

B. Introduction of Key Terms

The following are key terms used throughout this final rule preamble:

- ''WIC shopper'' means a person shopping using WIC benefits (*i.e.,* a WIC participant, proxy, or a parent or caretaker of an infant or child participant).
- ''Online shopping'' means the general use of an online, internet-based ordering system, platform, or site. It can encompass online ordering with or without internet-based transactions (*i.e.,* the transaction can occur via the internet, in store, curbside, or at the point of delivery).
- ''Online ordering'' means the process a customer (including a WIC shopper) uses to select food items for purchase via an internet-based ordering system, platform, or site.
- ''Transaction'' means the process by which a WIC shopper exchanges their WIC benefits for supplemental foods.
- ''Internet-based transaction'' means a transaction where the WIC payment is completed through the payment section of the online ordering system, platform, or site. This terminology is being used in lieu of ''online transaction'' to avoid confusion with transactions that occur using online EBT technology.
- ''Redemption'' means the process in which a vendor submits records of electronic benefit transactions for redemption and the State agency (or its financial agent) makes payment to the vendor.

III. Approach To Rulemaking and Status of WIC Online Shopping

This rulemaking finalizes regulatory changes in consideration of public comments received on the proposed rule published February 23, 2023. In developing the proposed rule, the Department considered technical materials developed by a wide variety of WIC stakeholders, lessons learned from the Supplemental Nutrition Assistance Program (SNAP) online shopping projects that began in 2019, as well as feedback from WIC State agencies, Indian Tribal Organizations, and participants. The following technical resources informed the Department's identification of regulatory barriers to online shopping and provisions in this rulemaking:

- Blueprint for WIC Online Ordering: Through a cooperative agreement with FNA, The Center for Nutrition and Health Impact (CNHI), an independent non-profit research institute, developed a comprehensive plan for implementing online shopping in WIC. This Blueprint, which initially identified waivers to federal regulations necessary to begin online shopping projects and provided guidance to begin implementing, has since been revised and republished in May 2026, with up-to-date information to support WIC State agencies as they develop their WIC online shopping projects.[6]
- The Task Force on Supplemental Foods Delivery: This task force convened WIC providers, retailers, manufacturers, EBT processors, advocacy organizations, and WIC participants to develop an online shopping Recommendation Report for the Department.[7]

The Department initially supported WIC State agencies in pursuing online shopping projects by issuing waivers under the American Rescue Plan Act (ARPA, Pub. L. 117–2) authority, which allowed FNA to waive regulatory barriers to support outreach, innovation and modernization in WIC and the WIC Farmers' Market Nutrition Program (FMNP). Online shopping waivers were issued through September 2024 and remain in effect to support ongoing projects. With these waivers, the Department provided State agencies with the necessary regulatory flexibility and technical assistance to pursue online shopping projects, regardless of whether or not they received a subgrant from CNHI. The Department recognizes and appreciates the WIC State agencies and authorized retailers that have developed different ways to provide online ordering to WIC participants. Through the cooperative agreement with CNHI, 22 WIC State agencies have received subgrants to pursue online shopping including the necessary

[6] *https://www.wicshopplus.org/the-blueprint.*

[7] *https://www.fna.usda.gov/wic/food-delivery-task-force-recommendations-report.*

development of internet-based transactions.

This final rulemaking permanently removes regulatory barriers to allow State agencies to implement online shopping in WIC and eliminates the need for waiver flexibility; therefore, the online shopping waivers will be superseded by regulation once this rulemaking is effective. Additional waivers supporting mobile pay and remote issuance will also be superseded by this rulemaking once effective.

IV. Proposed Rule Comment Summary

The proposed rule published in the **Federal Register** on February 23, 2023, with a 90-day comment period closing on May 24, 2023. During this time, USDA received 1,664 comments. Five form letter campaigns comprised 881 submissions. There were 752 unique comments of which 216 were substantive, providing specific input on the topics included in this final rule. A total of 31 comments were either duplicates or out of the scope of this rule, as they did not provide feedback related to topics in this final rule. The comments came from a variety of sources, including WIC State and local agencies, state representatives, professional organizations and associations, advocacy groups, health care professionals, universities, the food industry, WIC participants, and private citizens. USDA worked in collaboration with a data analysis company to code and analyze the public comments using a commercial web-based software product. This analysis provided data showing support for or opposition to each proposed change. Over 1,070 commenters provided broad support for revisions to the regulations while approximately 10 commenters provided general comments in opposition to the proposed rule. The Final Summary of Public Comments is available online at *www.regulations.gov* in docket FNS-2022-0015. The Final Summary of Public Comments includes the specific number of comments in support or opposition to each provision in the proposed rule, with a detailed narrative describing the key points made by commenters. USDA used the Final Summary of Public Comments and a supplementary review of individual comments to finalize provisions within this final rule. USDA refers to the Final Summary of Public Comments for numbers of comments received on each provision, with general summaries of comments provided in the preamble of this final rule.

As required under the Administrative Procedure Act, FNA considered all relevant, timely-submitted comments received on the proposed rule. Some comments addressed topics out of scope for the revisions and therefore are not addressed in this final rule.

V. Discussion of Final Rule

The following is a discussion of the provisions set forth in the proposed rule, a summary of the comments received that addressed these provisions, and the Department's rationale for either retaining or modifying the proposed provisions in the final rule. Provisions not discussed in this preamble did not receive significant or substantial public comments and are retained in this final rule as proposed.

This preamble communicates the rationale for modifications to the proposed rule codified in this final rulemaking. The Department re-examined the goals of this rulemaking while reviewing the comments to determine the continued applicability of each proposed change. Unless otherwise stated in the preamble of this final rule, the rationales included in the preamble of the proposed rule are regarded as a basis for the final regulations. Therefore, an understanding of the rationales for the final regulations may require reference to the preamble of the proposed rule.

USDA appreciates the many comments expressing support for the proposed revisions and urging USDA to implement the changes included in the proposed rule. USDA agrees the changes improve access to healthy foods and the efficiency of the WIC shopping experience while ensuring State agencies have the flexibility to oversee new types of vendors and to maintain program integrity and security. Before addressing each provision specifically, the following is a summary of overarching themes related to online shopping that the Department is acknowledging broadly.

(i) Technical assistance to support online shopping: the Department received numerous comments requesting guidance and technical assistance to support the implementation of online shopping in WIC.

The Department is committed to providing ongoing technical assistance and guidance to State agencies to ensure they have the support and resources necessary to implement online shopping and can do so while preserving program integrity. The Department is developing best practices, lessons learned, and technical resources to support State agencies in the implementation of online shopping using the many recommendations and ideas stakeholders provided during the public comment period for the proposed rule.

(ii) Internet vendor authorization: Many commenters expressed concern the State agency-by-State agency approach to internet vendor authorization would be lengthy and cumbersome, and instead recommended the Department adopt a national authorization process for online shopping, including national monitoring and management, similar to that of SNAP.

The Department notes there is a significant difference in how SNAP and WIC are authorized in legislation. The Child Nutrition Act expressly delegates responsibility for vendor authorization, monitoring, and oversight to WIC State agencies. Therefore, the Department did not propose a national process related to the authorization of WIC internet vendors.

(iii) Costs of technology innovations and online shopping: Many comments discussed concerns around the cost of adopting new technologies and stated the need for more federal funding to implement the various changes included in this rulemaking.

The Department notes the majority of the changes in this rulemaking either, (1) increase options and flexibilities for State agencies in vendor management activities without increased costs, or (2) provide the opportunity for State agencies to pursue new technologies at their discretion. The Department recognizes funding is a consideration for State agencies and therefore is not requiring implementation of any new technologies at this time. This rulemaking allows State agencies the opportunity to determine an appropriate and feasible timeline to implement new technologies. The Department recognizes the costs associated with authorizing internet vendors, largely due to the EBT and MIS changes necessary to allow new types of transactions and is therefore prioritizing flexibility and has recently supported State agencies through various funding opportunities, including subgrant opportunities from CNHI.

(iv) Modernizing offline EBT systems: Some commenters questioned how State agencies with offline EBT systems (*i.e.,* chipped EBT cards in which benefits cannot be used or issued online) would be able to implement some of the provisions in this rule, such as those related to online shopping or issuing benefits remotely. Commenters asked for technical assistance and funding to help transition to online EBT systems.

The Department recognizes that offline EBT systems will not be able to operate WIC online shopping or issue

benefits remotely. The Department is actively working with all offline State agencies to transition to online EBT systems so that they can also take part in these opportunities. The Department also highlights that neither online shopping nor remote benefit issuance are requirements for State agencies under this rulemaking. This rule creates the necessary flexibilities for the State agencies that are interested and able to develop online shopping and encourages the flexible issuance of benefits where possible.

(v) Impact to small vendors and accessibility: Some commenters expressed concerns that implementing online shopping would be especially challenging for small vendors.

To support small vendors, CNHI conducted a survey and hosted listening sessions to hear directly from small, Tribal, and rural vendors, and farmers and farmers' markets, to understand the perceptions, experiences, and potential barriers vendors face in implementing online shopping.[8] The Department recognizes different types of support and guidance may be needed to initiate WIC online shopping. USDA is committed to gathering feedback and learning from implementation projects to develop technical resources and assistance.

Commenters also noted that access to online shopping through the inclusion of alternative languages to English, as well as alternative online formats for persons with disabilities are key to ensuring all participants can access online shopping opportunities. The Department will explore opportunities to provide ongoing technical assistance to ensure that State agencies are encouraging vendors to equip their online platforms to meet the needs of their participants.

Following this summary of overarching themes, the Department presents a summary comparison of the proposed and final provisions of this rule with detailed discussion on each following.

Section	Summary of proposed revision	Summary of final revisions based on public comment
1. Remove Barriers to Allow for Online Ordering and Internet Based Transactions.	Clarify which vendor agreement provisions apply only to paper food instruments and modernize the purchase price provision to be inclusive of EBT transactions. (section 1.a.i).	Finalize as proposed.
	Remove the requirement that WIC shoppers must sign printed food instruments in the presence of a cashier. (section 1.a.ii).	Finalize as proposed.
	Remove the requirement to use a personal identification number (PIN) in lieu of a signature. (section 1.a.iii).	Finalize as proposed.
	Create new provisions to allow WIC State agencies to explore and identify options to authenticate EBT transactions and require vendors, farmers, and farmers' markets to authenticate EBT transactions in accordance with State agency policy. (section 1.a.iv).	Modify to remove reference to Department standards that are not yet published and require FNA approval to use an authentication method other than PIN.
	Create a new definition for ''brick-and-mortar vendor.'' (section 1.b.i).	Finalize as proposed.
	Create a new definition for ''internet vendor.'' (section 1.b.ii).	Modify to clarify the transactions at each internet vendor must be assigned to that internet vendor.
	Create a new definition for ''mobile vendor.'' (section 1.b.iii).	Modify to clarify the transactions at mobile vendors must be assigned to that specific vendor.
	Update the definition of ''above-50-percent vendor'' to be applicable to all vendor types. (section 1.b.iv).	Finalize as proposed.
	Modernize the current definition of ''vendor'' by removing the requirement that vendors must have a single, fixed location, simplifying the definition of vendor, and clarifying that all vendors must be authorized separately. (section 1.c.i).	Modify to remove the reference to SNAP and clarify each entity must be separately authorized.
	Remove a clause in the definition of ''vendor'' requiring a special needs justification for mobile vendors and remove associated language from the State Plan requirements. (section 1.c.ii).	Finalize as proposed.
	Clarify that cash refunds are still prohibited and update the exchange policy to accommodate recalls, ensuring that WIC shoppers are treated the same as other customers in the event of a recall. (section 1.d.i).	Modify the refunds provision to clarify the different types of cash refunds that are prohibited and modify the exchange provision to reflect changes from the Implementation of the Access to Baby Formula Act of 2022 and Related Provisions Final Rule[9] by clearly defining a supplemental food recall in 7 CFR § 246.2.
	Allow for the return of electronic benefits to a participant's balance when items in an online order are not fulfilled and for the use of returned electronic benefits. (section 1.d.ii).	Modify to allow returns for purchases that took place at any vendor type, not just online orders.

Section	Summary of proposed revision	Summary of final revisions based on public comment
	Require State agencies to provide participants with no less than seven (7) days to transact returned electronic benefits, which could go beyond the last date of use (LDTU). (section 1.d.iii).	Modify to clarify that State agencies must allow participants to use returned electronic benefits through the end of the benefit issuance month. Make the use of returned electronic benefits after the last date of use (LDTU) a State agency option and set a maximum of seven (7) days for benefit use beyond the LDTU. The Department is requesting comment on the impacts this would have on stakeholders and their systems if this flexibility were to be a requirement.
	Update the definitions of ''routine monitoring'' and ''compliance buy'' to remove the on-site requirement. (section 1.e.i).	Finalize as proposed.
	Introduce virtual visits as an allowable type of preauthorization visit. (section 1.e.ii).	Finalize as proposed.
	Prohibit vendors, farmers or farmers' markets from charging State agencies fees associated with WIC purchases and permit WIC shoppers to pay such fees. (section 1.f.i).	Modify to apply the prohibition to all fees associated with a WIC purchase (*e.g.,* delivery, service, convenience, bag fees) for any vendor type, not just online shopping fees, to ensure consistent treatment of all vendor types.
	Clarify costs associated with home food delivery and direct distribution to ensure State agencies still pay for the cost of transporting food under these two food delivery systems. (section 1.f.ii).	Modify to further clarify that food funds can be used to pay for the cost of transporting foods in home food delivery and direct distribution but cannot be used in retail food delivery systems.
2. Streamline and Modernize WIC Food Delivery.	Allow the remote issuance of electronic benefits by separating the benefit issuance provisions for paper food instruments and cash-value vouchers from electronic benefit issuance and updating signature requirements. (section 2.a.i).	Modify to ensure State agencies have procedures for recipient proof of receipt to ensure program integrity measures, and to clarify that signatures are required only when benefits are received in person.
	Create new definitions of ''electronic benefits,'' ''cash-value benefit,'' and ''cash-value voucher'' to reflect a modern WIC Program. (section 2.a.ii).	Finalize as proposed.
	Expand the definition of ''food instrument.'' (section 2.b).	Finalize as proposed.
	Allow State agencies to develop and test new WIC food instrument types. Clarify uniform food delivery systems and system combinations. (section 2.c.i).	Modify to clarify that State agencies can have more than one food instrument type within a food delivery system at a time.
	Remove the requirement for State agencies to collect shelf price data, as EBT data are a sufficient replacement. (section 2.d).	Modify to clarify that State agencies can use existing EBT data for vendors applying for re-authorization.
	Allow State agencies using a non-retail, home food delivery system to ship supplemental foods to a location designated by participants and approved by the State agency. (section 2.e).	Modify to allow State agencies to confirm delivery location of supplemental foods as an additional measure of program integrity.
	Extend vendor application and agreement periods from three to five years.	FNA will not finalize as proposed; no change to current provision.
3. Meet the Needs of a Modern, Data Driven Program.	Update the reporting requirements for WIC food delivery systems, including the timing of reporting and information required. (section 3.a).	Modify to remove the proposed requirement for quarterly submissions, maintaining the current annual minimum.
	Increase the staffing standards for the position of the WIC Food Delivery Coordinator.	FNA will not finalize as proposed; no change to current provision. State agencies may optionally implement more stringent standards at the State level.
	Add staffing standards to create a WIC Quality Improvement Coordinator.	FNA will not finalize as proposed; no change to current provision. State agencies may optionally implement more stringent standards at the State level.
4. Request for Public Comment on Key Topic Areas.	The Department requested comment on whether there is a need to authorize vendors that sell a specific subset of supplemental foods (*e.g.,* dairies, bakeries, produce sellers) but would not meet the minimum variety and quantity of supplemental foods, as required by WIC regulations. (section 4.a).	Due to feedback received discussing concerns related to cost containment, program integrity, and the impact on small vendors, the Department will not allow exceptions to minimum stocking requirements for authorizing specialty vendors in this rulemaking.

1. Remove Barriers To Allow for Online Ordering and Internet-Based Transactions

This final rule allows vendors and WIC shoppers to complete internet-based transactions, creates new definitions for internet and mobile vendors, modernizes the definition of brick-and-mortar and above-50-percent vendors, allows vendors to return benefits to a participant's benefit balance, allows State agencies to develop virtual methods of oversight, permits WIC shoppers to pay fees associated with WIC purchases, and clarifies that State agencies may use non-WIC funds to pay fees associated with WIC purchases.

a. Allow vendors and WIC shoppers to complete internet-based transactions [§§ 246.12(h)(3)(v), (vi), and (xxxii), 246.12(v)(1)(iv), and 246.12(bb)(2)]. The changes to provisions in this section that clarify which vendor agreement provisions apply only to paper food instruments and modernize the purchase price provision, § 246.12(h)(3)(v) and (vi), are finalized as proposed. The provisions that allow vendors, farmers and farmers' markets, and WIC shoppers to complete internet-based transactions by removing requirements that WIC shoppers must sign food instruments, or enter a personal identification number (PIN), in the presence of a cashier, § 246.12(h)(3)(v) and (vi), and § 246.12(v)(1)(iv), are also finalized as proposed. The provisions requiring vendors, farmers and farmers' markets to authenticate transactions in accordance with State agency policies, § 246.12(h)(3)(xxxii) and § 246.12(v)(1)(iv), are finalized as proposed, and the provision requiring State agencies to develop policies on transaction authentication methods, § 246.12(bb)(2), is finalized with modifications.

i. Clarify which vendor agreement provisions apply only to paper food instruments and modernize the purchase price provision to be inclusive of EBT transactions. (§ 246.12(h)(3)(v) and (vi))

This final rule codifies the change from ''printed'' to ''paper'' at § 246.12(h)(3)(vi) as proposed to clarify which vendor agreement provisions apply only to paper food instruments. This final rule also codifies proposed revisions to the purchase price provision at § 246.12(h)(3)(v) to ensure the requirement that WIC shoppers are made aware of the total purchase price before transactions are completed continues to be applicable to EBT transactions.

Commenters expressed general support for the changes that clarify which provisions apply to paper food instruments versus EBT transactions, especially the requirement that participants be made aware of the purchase price before the transaction is completed, affirming these requirements enable WIC participants to make informed choices and ensure program integrity. No comments were opposed.

Some commenters requested flexibility on how State agencies meet the requirement that participants be made aware of the total purchase price, and recommended the Department require vendors ensure the price of produce for online purchases does not increase during fulfillment so that the amount of cash-value benefits transacted is not higher than what the participant agreed to during the shopping process.

The Department does not define in regulation how vendors must ensure participants are made aware of the total purchase price. Vendors should make WIC participants aware of prices in the same ways they show all other customers prior to the completion of the transaction, while still meeting the WIC receipt requirements outlined in the WIC EBT Operating Rules.[10] The Department will incorporate feedback on best practices on handling produce during the fulfillment process into future policy guidance.

ii. Remove the requirement that WIC shoppers must sign in the presence of a cashier. (§ 246.12(h)(3)(vi))

This final rule codifies revisions as proposed at § 246.12(h)(3)(vi) to remove the requirement that WIC shoppers must sign printed food instruments in the presence of a cashier.

This change received overwhelming support, with commenters stating this change will enhance convenience for participants and reduce burdens associated with the current WIC shopping experience. The Department agrees this change supports modernization of the WIC Program and the changing retail landscape, and makes WIC shopping less burdensome, which also supports greater benefit utilization. No comments were opposed.

iii. Remove the requirement to use a personal identification number (PIN) in lieu of a signature. (§ 246.12(h)(3)(vi))

This final rule codifies revisions as proposed at § 246.12(h)(3)(vi) to remove the requirement to use a PIN in lieu of a signature.

Many comments supported removing the requirement to use a PIN in lieu of a signature, stating it would allow State agencies to modernize alongside the grocery industry as PIN authentication is just one of many authentication models employed in the commercial marketplace. The Department agrees that allowing for new types of authentication methods facilitates security innovation in the WIC Program.

An opposed commenter expressed concern that eliminating the PIN requirement could lead to fraud. The Department clarifies this change does not remove the State agency's responsibility to ensure a secure transaction, nor the requirement for transaction authentication, but instead eliminates regulatory barriers, supporting State agency innovation, and allows State agencies to use new types of transaction authentication methods to better reflect industry modernization.

The Department expects State agencies that do not choose to use new transaction authentication methods will continue to use the PIN as the required transaction authentication methodology for their jurisdiction. Modifications to the provision at § 246.12(bb)(2) establish this expectation by requiring State agencies to receive written approval to adopt an authentication method other than the PIN. The Department will provide further detail on expectations for transaction authentication in forthcoming guidance, discussed in section 1.a.iv below.

Some commenters stated the differences in WIC and SNAP PIN requirements could lead to confusion among participants using both programs, as all SNAP online purchase transactions still require the PIN. Commenters encouraged the Department to implement uniform authentication standards and payment models across all programs that use EBT.

The Department agrees there is value in consistency across SNAP and WIC and works to achieve this where possible while allowing for new types of authentication methods when feasible and appropriate. With the implementation of new technologies in WIC, the Department encourages State agencies to continue educating participants on the use of any modern food instruments and how to transact their WIC benefits.

iv. Create new provisions to allow WIC State agencies to explore and identify options to authenticate EBT transactions and require vendors, farmers, and farmers' markets to authenticate EBT transactions in accordance with State agency policy. (§§ 246.12(bb)(2), 246.12(h)(3)(xxxii) and 246.12(v)(1)(iv))

[10] *https://www.fna.usda.gov/wic/ebt/technical-implementation-guide-operating-rules.*

This final rule codifies a new provision at § 246.12(bb)(2) requiring that State agencies have appropriate transaction authentication policies for the specific technologies they choose to allow in their jurisdiction, with modifications to remove reference to FNA standards that have not yet been developed. The Department has also modified this provision to establish PIN authentication as the default authentication method. As discussed above, the expectation that State agencies utilize a PIN until more modern technology meets or exceeds the security of a PIN is reinforced by codifying specific reference to the PIN in the amendatory text.

This final rule also codifies a new provision as proposed requiring vendors to authenticate transactions in accordance with State agency policies at § 246.12(h)(3)(xxxii), and that transactions at farmers and farmers' markets also occur in accordance with the procedures established by the State agency at § 246.12(v)(1)(iv).

Multiple commenters expressed support for these changes, agreeing they will allow State agencies flexibility to create a plan that works for their participants and a variety of modern vendors, while ensuring program integrity. No comments were opposed.

The Department appreciates the extensive feedback that commenters provided regarding the transaction authentication standards referenced in the proposed rule, including the recommendations on the content of the standards and on where the standards will be posted. Because the standards are not yet published, the Department is removing the reference to them in this final rule. The Department will, however, still develop guidance on transaction authentication for State agencies that incorporates this feedback. Commenters recommended that transaction authentication standards be developed via the Technical Standards Workgroup (TSW) to ensure they can continue to be updated on an ongoing basis with stakeholder feedback as technology evolves. The Department agrees that input from the WIC community is important for the development of standards in the evolving retail marketplace. Therefore, transaction authentication standards will be developed and finalized via the TSW to allow for maximum engagement with affected parties and partners.

Commenters requested that the implementation of the provisions related to new transaction authentication methods not be required until the Department's transaction authentication standards are published.

The Department recognizes the development of transaction authentication standards will take time and does not want to prevent State agencies from exploring modernization initiatives. Because FNA has not yet published such standards, the Department has removed the regulatory reference to the FNA standards as noted above. While the provisions in this section will be effective upon publication of the final rule to allow State agencies to take advantage of the flexibilities created in this rulemaking, State agencies will not be expected to wait for publication of final transaction authentication standards to continue their online shopping projects. Following this rulemaking, the Department will provide interim guidance on transaction authentication. The Department encourages State agencies to explore new payment technologies and expects that State agencies will continue to use PIN authentication until more modern technology meets or exceeds the security of a PIN.

Some commenters questioned how these changes would impact industry partners, such as vendors and EBT processors. They expressed concerns that competing transaction standards across WIC State agencies could result in challenges for multi-state retailers, and that current EBT contractual provisions may not allow new transaction authentication methods.

As discussed above, the Department will develop transaction authentication standards for State agencies, with interim guidance provided following this rulemaking, to support implementation of new technologies and encourage uniformity across State agencies. The Department recommends vendors continue to work closely with the State agencies in which they are authorized to ensure they are following all respective State agency specific policies. The Department also recognizes each State agency has different procurement policies and procedures and recommends that State agencies continue to work closely and maintain open communication with their procurement offices and EBT contractors as they pursue any new technologies.

Some commenters stated that participants should be able to use their EBT cards with farmers or farmers' markets and purchase farm fresh produce online. WIC regulations currently allow State agencies to authorize farmers and farmers' markets to accept cash-value benefits (CVB). The Department encourages all State agencies to allow participants to transact their CVB with farmers and at farmers' markets to support the purchase of local produce. With the changes from this rulemaking, authorized farmers and farmers' markets will be allowed to sell their produce online.

b. Create new types of vendors [§ 246.2]. The provisions to define ''Brick-and-mortar vendor'' and ''Above-50-percent vendor'' are finalized as proposed. The provisions to define ''Internet vendor'' and ''Mobile vendor'' are finalized with modifications to ensure all vendors are authorized separately and transactions that take place at each vendor are assigned specifically to that vendor.

There was a significant discussion from commenters regarding the new vendor types, and while many commenters supported the proposed definitions, other commenters shared concerns and requests for clarification from the Department. The following discussion is related to overarching concerns regarding the new vendor types. A discussion on the specific definitions for each vendor type follows.

Commenters requested guidance from USDA on how the creation of new vendor types will impact various State agency vendor management activities such as selection criteria, peer groups, preauthorization, above-50-vendor assessment, cost containment, monitoring, training, and sanctions. Many commenters also provided recommendations for how vendor management activities should take place for the new vendor types. Some commenters requested clarification on whether the authorization of internet and mobile vendors is a State agency option. The Department recognizes adding new vendor types warrants revised approaches to vendor management. The Department appreciates the feedback and recommendations on how to adequately manage the new vendor types and will incorporate this feedback into the development of guidance and technical assistance, expanding on current efforts to develop guidance and technical assistance based on lessons learned from online shopping projects. While the Department confirms the authorization of internet and mobile vendors is a State agency option, the Department also encourages State agencies to consider authorizing these new vendor types to better serve families across the country, including in rural areas.

Many commenters strongly agreed with the Department's proposal that all vendors, regardless of type, must adhere to all regulations pertaining to vendors

and discussed the importance of applying consistent and fair program requirements regardless of vendor type. However, some commenters disagreed and recommended different requirements by vendor type, such as different federal selection criteria or minimum stock for internet and mobile vendors than brick-and-mortar vendors.

The Department recognizes that different vendor types will inherently have different training, monitoring, and investigative needs, and the specific ways in which vendor management activities take place may be different. However, the State agency must hold all vendors to the same federal accountability measures and minimum requirements to ensure effective management and oversight. Therefore, the Department maintains that all authorized vendors, no matter the type, are subject to federal regulations governing authorized WIC vendors, but that State agencies may tailor their vendor management approach depending on vendor type. For example, State agency training for internet vendors may include new content for web designers, such as online shopping navigation and pricing, and may focus less on transaction details which may not be applicable for an internet vendor using automated product compliance controls. Further, as discussed in section 1.e, the Department is introducing virtual methods of oversight to provide State agencies with the appropriate tools for monitoring all vendor types. While different vendor types do not have distinct requirements, vendors of different types may be able to show compliance with requirements in distinct manners. For example, an authorized internet vendor sourcing orders from multiple fulfillment locations would not need to demonstrate that each fulfillment location meets stocking standards so long as the vendor can prove to the State agency that their online ordering operations as a whole meet those standards. Similarly, internet vendors may have different mechanisms for demonstrating compliance with inventory audits, which are just one State agency option for investigating their vendor population.

Some commenters stated that the word ''store'' as used throughout the current regulations appears to refer to a single, fixed location, and therefore would only apply to brick-and-mortar stores. Commenters requested clarification of the Department's application of the word ''store'' considering the new vendor types that do not have single, fixed store locations.

The Department clarifies that the word ''store'' as used throughout the regulation is synonymous with the term ''vendor'' and applies to brick-and-mortar, internet, and mobile vendors.

Many commenters requested the inclusion of a ''hybrid vendor'' defined by the Task Force Report as a ''physical store location that also operates a virtual platform,'' [11] so internet vendors do not have to be separately authorized if they fulfill orders from a brick-and-mortar vendor. Commenters requested a similar inclusion for mobile vendors.

The Department appreciates the input from commenters and thoroughly considered the Task Force report as well as the public comments recommending the inclusion of ''hybrid vendor'' as another vendor type. While the Department recognizes the fulfillment of many online orders may come from brick-and-mortar vendors, the Department determined ''hybrid vendors'' are not feasible due to challenges they would pose for cost containment and program integrity. State agencies must be able to apply cost containment methods to brick-and-mortar vendor operations independently from any affiliated internet operations as prices for food purchased online are often higher than prices for food purchased in-store.[12] To ensure vendors are charging State agencies appropriate and reasonable prices for WIC foods and are remaining cost competitive relative to peer vendors, State agencies must authorize internet, mobile, and brick-and-mortar vendors separately, regardless of any association. Further, State agencies must maintain the ability to take administrative action against individual vendors at fault for violations when they occur. If the State agency found a violation associated with the internet operations of a ''hybrid vendor'' while the brick-and-mortar operations remained in compliance, the State agency would be required to take action against both entities together if they were under one authorization. Such action could limit participant access if the brick-and-mortar operations were no longer authorized. By separating the authorizations by brick-and-mortar operations from internet operations, the State agency is better equipped to manage program integrity. Finally, it is an important component of vendor management and cross program integrity efforts that WIC and SNAP can take reciprocal administrative action against vendors when a vendor commits a violation. For these reasons, the Department decided the use of a ''hybrid vendor'' is not feasible for the WIC Program and maintains that brick-and-mortar, internet, and mobile vendors are the only three vendor types and must be separately authorized, with their own distinct vendor identification numbers (vendor IDs).

i. Create a new definition for ''brick-and-mortar vendor.'' (§ 246.2)

This final rule codifies the new definition of ''brick-and-mortar vendor'' as proposed, requiring this type of vendor to be defined separately and distinctly from internet or mobile vendors.

Multiple commenters supported the proposed definition and reasoned that permitting new types of WIC vendors enhances program modernization, and expanding vendor definitions supports small businesses and participant access. No comments were opposed.

Some commenters requested clarification if brick-and-mortar vendors can offer online ordering, that is, when a WIC participant places an order through the internet and then comes to the store to swipe their EBT card and pick up their order. Online ordering with curbside payment and pick-up remains allowable with the new vendor types. In this scenario, the transaction is occurring at the brick-and-mortar store, so this transaction would be assigned to the brick-and-mortar vendor.

ii. Create a new definition for ''internet vendor.'' (§ 246.2)

This final rule codifies the new definition of ''internet vendor'' with modifications to clarify transactions that take place at the internet vendor must be assigned to the internet vendor, and each internet vendor must be separately authorized.

Many commenters supported the creation of a new definition for internet vendor, stating it will enhance access to healthy foods for participants and could facilitate the use of more modern retail solutions. No comments were opposed.

Some commenters requested the language used in the brick-and-mortar vendor definition indicating ''transactions that take place at a brick-and-mortar vendor must be assigned to that vendor'' should be applicable to internet vendors as well. Further, multiple commenters requested clarification on the meaning of ''location'' for each vendor type, as the brick-and-mortar vendor explicitly specifies the meaning of a ''single, separate location'' for the vendor.

[11] Task Force on Supplemental Foods Delivery in the WIC Program—Recommendations Report, page 16 (September 2021). *https://www.fna.usda.gov/wic/food-delivery-task-force-recommendations-report.*

[12] Roerink, A.M. (June 2021). Grocery E-Commerce—Opportunity Remains. Produce Business, 37(6), p.12. *https://producebusiness.com/issue/produce-business-june-2021/.*

For internet vendors, the location of the transaction is online, which could include the online ordering system, platform, or site used by an internet vendor to transact benefits. To ensure consistency in the authorization of vendor types, the Department added language to the definition to indicate that all transactions taking place via an online ordering system, platform, or site must be assigned to the authorized internet vendor. This is to ensure all vendor types are held to the same requirements and that transactions are properly assigned. A similar change was made to the definition of ''mobile vendor.'' The Department recognizes that internet vendors may use different eCommerce platform providers, eCommerce Marketplaces, or delivery partners to transact WIC benefits. These third-party platforms may not be authorized as vendors themselves, and all transactions that take place on these platforms must be assigned to the internet vendor authorized to transact WIC benefits.

Some commenters requested clarification on whether an internet vendor can have any affiliation with a brick-and-mortar vendor, while others requested a new definition of ''internet only vendor'' for vendors that have no affiliation with a brick-and-mortar storefront.

The Department reiterates that internet vendors provide authorized supplemental foods to participants through internet-based transactions, regardless of their affiliation with any physical store. This includes, but is not limited to:

- Vendors operating only online with no physical storefront,
- Vendors operating online and fulfilling from a brick-and-mortar vendor, and
- Vendors operating online and fulfilling from a warehouse and a separately authorized brick-and-mortar vendor.

Regardless of where the order is fulfilled from or if the order is delivered to the participant or picked up in a physical store, the vendor type depends on the location of the transaction. Therefore, if the transaction happened online then it must be assigned to the internet vendor. This is consistent with SNAP's authorization and management of internet retailers.

iii. Create a new definition for ''mobile vendor.'' (§ 246.2)

This final rule codifies the new definition of ''mobile vendor'' with modifications to clarify transactions that take place at the mobile vendor must be assigned to the mobile vendor, and each mobile vendor must be authorized separately.

Multiple commenters supported the proposed definition, stating that allowing mobile vendors will enhance participant access to healthy foods. No comments were opposed.

Some commenters requested the language used in the ''brick-and-mortar vendor'' definition indicating ''transactions that take place at a brick-and-mortar vendor must be assigned to that vendor'' should be applicable to mobile vendors as well. Further, multiple commenters requested clarification on the meaning of ''location'' for each vendor type, as the definition of a brick-and-mortar vendor explicitly specifies there is a ''single, separate location'' for the vendor.

For a mobile vendor, the location of the transaction is the truck, bus, pushcart, or other mobile vehicle at which the transaction takes place. To ensure consistency in the authorization of vendor types, the Department added language to the definition to indicate that all transactions that take place at a mobile vendor must be assigned to that authorized mobile vendor. This is to ensure all vendor types are held to the same requirements and transactions are properly assigned.

Multiple commenters expressed concern about the feasibility for mobile vendors to operate the WIC Program, including their ability to meet minimum stocking requirements, manage updating the authorized product list (APL), and use EBT systems. Commenters also recommended prices for mobile vendors be restricted to the same prices as brick-and-mortar vendors.

The Department clarifies authorizing mobile vendors is an option, not a requirement, for State agencies. If a State agency chooses to authorize this type of vendor, all vendor requirements must be met. The Department highlights that State agencies have flexibility in managing their vendor populations and can set different minimum stocking requirements by peer group, as long as they meet the federal minimum stocking requirements defined at § 246.12(g)(3)(i). State agencies that choose to authorize mobile vendors as a new vendor type must meet all vendor regulations, including cost containment.

iv. Update the definition of ''above-50-percent vendors'' to be applicable to all vendor types. (§ 246.2)

This final rule codifies the revised definition of ''above-50-percent vendor'' as proposed to ensure any type of authorized vendor could also be classified as an above-50-percent vendor if it meets the conditions of the definition.

Commenters expressed general support for the new definition.

An opposed comment requested the ''above-50-percent vendor'' classification not apply to internet vendors for fear it would inhibit small vendors starting their internet presence with WIC. Other commenters stated that assessing for above-50-percent status would not be relevant for internet vendors as their statewide sales operations would be so large that they would never derive more than half of their sales from WIC.

Assessing for and monitoring above-50-percent vendors is an important part of the WIC Program's efforts to ensure State agencies can continue containing costs and avoiding fraudulent activity. The Department believes it remains important to evaluate all vendors, including internet and mobile vendors, for above-50-percent vendor status to ensure vendors that derive more than 50 percent of their annual sales revenue from WIC are appropriately monitored to prevent fraud. While it may be the case for some internet vendors, the Department cannot say with full certainty that all internet vendors will operate statewide and process enough in online sales to not meet the above-50-percent threshold. Therefore, it will remain a requirement for all vendor types to be assessed for ''above-50-percent vendor'' status.

The Department received a comment requesting clarification on whether an above-50-percent vendor is considered a vendor type, similar to how brick-and-mortar, internet, and mobile vendors are all types of vendors, or if instead it is a classification of vendor.

The Department clarifies an above-50-percent vendor is not a vendor type, but a classification of vendor. Any vendor that meets the definition of above-50-percent vendor, regardless of type, must be classified as an above-50-percent vendor.

Finally, a commenter recommended that USDA include a definition of ''regular vendor'' to account for vendors not classified as above-50-percent vendors.

The Department considered this request but concluded it was unnecessary and may cause additional confusion. The regulations at § 246.12 refer to ''regular vendors'' only when making comparisons to above-50-vendor vendors. As a ''regular vendor'' is any type of vendor that is not classified as an above-50-vendor, it is the assumed normal classification and does not need further defining.

c. Modernize the definition of ''vendor'' to be inclusive of new vendor types. [§§ 246.2 & 246.4(a)(14)(xv)]. The

provision revising the definition of vendor at § 246.2 is finalized with modifications to streamline the definition and remove the SNAP reference while maintaining that all vendors, regardless of type, must be separately authorized. The provision requiring State agencies to justify the need for mobile stores in their State Plans at § 246.4(a)(14)(xv) is removed as proposed.

i. Remove the requirement that vendors must have a single, fixed location, simplify the definition of vendor, and clarify that all vendors must be authorized separately. (§ 246.2)

This final rule codifies the revised definition of vendor at § 246.2 allowing State agencies to authorize the vendor types included in this final rule by removing the requirement that vendors must have a single, fixed location and that State agencies must delineate the different business structures of vendor applicants. The Department modified the provision to streamline the definition and removed the reference to SNAP.

Comments were overwhelmingly supportive of removing the requirement that State agencies may only authorize vendors with a single, fixed location. Commenters also supported simplifying the definition of vendor by replacing current regulatory language delineating different business structures that a vendor may have (*i.e.,* a sole proprietorship, partnership, cooperative association, corporation, or other business entity) with the term ''business entity.'' Commenters asserted this would benefit State agencies and vendors by decreasing the burden of determining the business structure during the vendor application process. No comments were opposed. Commenters generally supported the requirement that all vendors be authorized separately to support vendor management activities.

Some commenters stated the new vendor definition complicated whether each vendor, regardless of type, must be separately authorized, and recommended the definition be more concise. Some expressed concern about how to interpret the entity to be authorized as an internet or mobile vendor, as the proposed definition only discussed separate ''store'' locations. Some commenters expressed concern about the general reference to SNAP authorization in the definition, with some stating the reference should be either further clarified or removed.

The Department added ''each store, internet retailer, and mobile vehicle constitutes a unique vendor and must be authorized separately'' to the revised definition of vendor to clarify the unique entity that must be separately authorized as a vendor, regardless of affiliation with other vendors. This will require internet and mobile vendors to be separately authorized from brick-and-mortar vendors, which will support State agency vendor management activities such as authorizing, monitoring, and sanctioning individual vendors without impacting other authorized vendors that may be under the same responsible entity.

The Department agrees with streamlining the definition by removing the reference to SNAP authorization. At the time of the proposed rule, the Department believed that tying one SNAP authorization to one WIC authorization per State agency would be the most efficient way to ensure that cross-program integrity efforts could continue without interruption following the introduction of internet vendors. However, the WIC online shopping projects have since demonstrated that doing so may limit State agency options and flexibility for effectively managing their internet vendor population.

Requiring State agencies to authorize internet vendors separately from brick-and-mortar vendors (as discussed above in section V.1.b.ii) is sufficient to allow for ongoing coordination of vendor/retailer activities between WIC and SNAP (*e.g.,* reciprocal disqualifications, etc.) and enables WIC vendor integrity efforts to move forward consistently. Removing the reference to SNAP authorization in the vendor definition provides WIC State agencies the flexibility to authorize internet vendors using a method that best meets their vendor management needs. The separate authorization of each unique vendor is consistent with how the WIC Program currently authorizes vendors, and the separate authorization of internet vendors from brick-and-mortar vendors aligns with SNAP's authorization practices.

The Department would like to highlight that § 246.12(g)(9), which requires the State agency to collect a vendor applicant's SNAP authorization number if the vendor applicant is authorized in SNAP, is maintained in this final rule, which will continue to support State agency ability to ensure cross-program integrity efforts.

Commenters requested clarification on whether § 246.12(h)(1)(i) remains applicable, which permits State agencies to use a single agreement to cover multiple vendors operated by the same responsible entity (*e.g.,* chain stores).

The Department confirms § 246.12(h)(1)(i) remains applicable, and a vendor representative may obligate more than one vendor (*e.g.,* a single agreement to cover multiple vendors), as long as each vendor itself is authorized separately, and the agreement specifies all vendors covered by the agreement. Any administrative action the State agency applies must only be applied to the specific vendor with which the violation was found. This allows the State agency to, for example, disqualify a single store of a large chain without impacting other stores that are in compliance. This will continue to support State agencies in ensuring adequate participant access to vendors throughout their jurisdictions. As § 246.12(h)(1) is maintained in this final rule, State agencies can continue to sanction multiple vendors for a vendor violation committed by owners, officers, or managers of the responsible entity if the State agency determines that the vendor violation involves multiple vendors. Requirements related to changes in ownership of the vendor, per § 246.12(h)(3)(xviii), will apply to all vendors under the responsible entity as is currently required.

Some commenters expressed concern that the separate authorization of internet vendors would substantially increase the number of authorized vendors and associated vendor management activities.

The Department reiterates that an internet vendor completing internet-based WIC transactions through an online ordering system, platform, or site must be authorized as a unique vendor. However, the Department clarifies that a State agency may choose to authorize an internet vendor that fulfills its orders from any number of brick-and-mortar stores, fulfillment centers, or warehouses to serve throughout a State agency's entire jurisdiction as a single authorized vendor. The Department believes this will mitigate a State agency's vendor count increasing exponentially and allow retailers sourcing orders from multiple fulfillment locations the flexibility to participate in WIC in a minimally burdensome manner. The Department further notes an authorized internet vendor sourcing orders from multiple fulfillment locations would not need to show that each fulfillment location meets federal and State agency selection criteria, such as the minimum variety and quantity of supplemental foods, so long as the vendor can prove that their online ordering operations as a whole meet those criteria. State agencies retain the option to authorize each fulfillment location that meets the definition of a vendor and all federal and State agency selection criteria as a unique internet

vendor, if that approach allows them to best manage and oversee their internet vendor population.

ii. Remove a clause in the definition of ''vendor'' requiring a special needs justification for mobile vendors and remove associated language from the State Plan requirements. (§§ 246.2 and 246.4(a)(14)(xv))

This final rule codifies the removal of the requirement in the definition of vendor at § 246.2 for State agencies to justify mobile vendors in the State Plan at § 246.4(a)(14)(xv).

This change received overwhelming support, with commenters stating this will allow State agencies to authorize mobile vendors more efficiently and will remove the burden of justifying authorization. Commenters suggested this change will better serve WIC participants with barriers to accessing brick-and-mortar vendors. No comments were opposed.

d. Allow vendors to return electronic benefits to a participant's benefit balance [§§ 246.12(h)(3)(ii) No substitutions, cash, credit, cash refunds, or exchanges, (ii)(A) and (C), § 246.12(x)(2)(iii), and § 246.12(x)(4) Return of benefits, (4)(i), (4)(ii), and (4)(iii)]. The provisions clarifying cash refunds are still prohibited, § 246.12(h)(3)(ii) No substitutions, cash, credit, cash refunds, or exchanges, and (ii)(A), are finalized with modifications to clarify further what types of cash refunds are prohibited. The provision to update the exchange policy to accommodate recalls, § 246.12(h)(3)(ii)(C), is finalized with modifications to reflect changes from the Implementation of the Access to Baby Formula Act of 2022 and Related Provisions Final Rule by clearly defining a supplemental food recall in 7 CFR 246.2. The provision to allow vendors to return electronic benefits to a participant's balance, § 246.12(x)(4) Return of benefits, is finalized with modifications to allow returns with any vendor type, not just internet vendors, and to include timeframes in which benefits must be returned in § 246.12(x)(4)(i) and (ii), and to clarify State agencies must provide at least until the end of the original benefit issuance period for participants to use returned electronic benefits, and that it is a State agency option to allow participants to transact returned benefits after the last date of use (LDTU) for up to seven (7) days after the LDTU, § 246.12(x)(4)(iii). The provision describing the last date of use, § 246.12(x)(2)(iii), is finalized with modifications to reflect this new flexibility of using returned benefits after the last date of use.

i. Clarify that cash refunds are still prohibited and update the exchange policy to accommodate recalls, ensuring that WIC shoppers are treated the same as other customers in the event of a recall. (§ 246.12(h)(3)(ii) No substitutions, cash, credit, cash refunds, or exchanges, (ii)(A), and (ii)(C))

This final rule codifies the revised provision regarding prohibition of cash refunds, § 246.12(h)(3)(ii) No substitutions, cash, credit, cash refunds, or exchanges, and (ii)(A), with modification to specify the types of refunds for supplemental foods that are not allowable. This final rule also codifies the provision § 246.12(h)(3)(ii)(C) explaining the requirement for exchanging supplemental foods to ensure all customers, including WIC shoppers, are treated the same in the event of a supplemental food recall, as defined at § 246.2.

Multiple commenters supported the clear prohibition of cash refunds, and no comments were opposed. One commenter noted there are other types of refunds commonly used beyond cash that should also be prohibited, such as store credit and gift cards.

The Department agrees that refunds other than cash should not be provided in exchange for supplemental foods and modified § 246.12(h)(3)(ii)(A) accordingly to include a prohibition on cash-like refunds, including but not limited to store credit and gift cards.

Many commenters supported the new provision at § 246.12(h)(3)(ii)(C) requiring vendors to treat all customers, including WIC shoppers, the same in the event of a supplemental food recall. Commenters referenced the infant formula recall of 2022 and how the changes would help ensure that WIC participants can be treated like all other customers.

One commenter understood this new provision to conflict with the updated prohibition on cash refunds at § 246.12(h)(3)(ii)(A), and other commenters requested clarification on what is considered a ''substitute product.'' Others expressed concern that customers would be charged for new items in the replacement process.

The Department clarifies that under ordinary circumstances, cash refunds are not allowed in WIC. Vendors are only allowed to provide cash refunds when supplemental foods are recalled, as described in § 246.12(h)(3)(ii)(C), and only if (1) doing so aligns with store policies and (2) cash refunds are also provided to non-WIC customers impacted by the recall. Similarly, if the vendor provides replacement products or store credit during a recall, this provision requires WIC participants to be allowed those same courtesies.

Following publication of the Implementation of the Access to Baby Formula Act of 2022 and Related Provisions Final Rule, which codified the definition of recall at § 246.2 as it pertains to supplemental foods, the Department modified the provision at § 246.12(h)(3)(ii)(C) to clarify this provision only applies during a supplemental food recall, rather than any type of supply chain disruption. The Department will not strictly define ''substitute product'' or require the vendor or State agency to approve substitute products for supplemental foods in the event of a recall. The Department believes doing so would negate the intent of this provision, that vendors treat WIC participants the same as non-WIC shoppers in the event a supplemental food is recalled. Vendors treating WIC participants the same as any non-WIC shopper in the instance of a supplemental food recall includes not charging participants for replacement items.

ii. Allow for the return and use of returned electronic benefits. (§ 246.12(x)(4) Return of benefits, (4)(i), and (4)(ii))

This final rule codifies provisions for the return of electronic benefits to a participant's benefit balance at § 246.12(x)(4) Return of benefits, with modifications to allow for the return and use of electronic benefits for all WIC shoppers regardless of vendor type and clarifies the timeframes in which benefits must be returned in § 246.12(x)(4)(i) and (ii). Many commenters supported these provisions with no comments opposed.

The Department originally proposed that benefits only be returned in instances when an online order is not fulfilled. Multiple commenters discussed concerns related to this provision as proposed, stating that WIC participants shopping in-store do not have the option to make returns and suggesting the return of benefits should not only apply to those shopping online. Commenters also discussed the technical infeasibility of only allowing returns for online orders, and that if implemented as proposed, the burden of confirming the original transaction took place online would fall on each individual cashier.

The Department recognizes and agrees with the concerns raised by commenters. With the proposed provision, the Department intended to ensure WIC participants shopping online have recourse in the event an item is missing or incorrectly fulfilled and that the State agency is only

charged for foods received by the participant. The Department modified this provision to allow for the return of electronic benefits for all vendor types. This is intended to promote an improved WIC shopping experience for participants, to ensure vendors are treated consistently regardless of vendor type, and to accommodate the technical capabilities of vendor systems. If the State agency authorizes internet vendors, they must also allow for the return of electronic benefits for all other vendor types, to include transactions that take place at a brick-and-mortar or mobile vendor. If a State agency does not authorize internet vendors, they have the option—but are not required—to allow for the return of electronic benefits for other authorized vendor types.

Some commenters expressed concern with the lack of required timeframe for an internet vendor to initiate the return of electronic benefits. The Department agrees that a required timeframe for the return of electronic benefits will help ensure participants can use returned electronic benefits within a reasonable timeframe. Therefore, the Department modified the provision to include language requiring the timeframes in which the vendor must process the return of electronic benefits. If the participant returns an item in-person, regardless of where the item was purchased, the vendor must process the return of electronic benefits immediately so that the participant has the option to use their benefits while at the store. For post-delivery returns, such as those returned via mail or for an order that was incorrectly fulfilled or not fulfilled at all, the vendor must process the return of electronic benefits within two (2) company business days after receipt of the returned item or indication of an incorrectly fulfilled or unfulfilled item. This aligns with SNAP policies for returning items ordered online.

One commenter noted current regulations require State agencies to issue a three-year sanction to vendors that charge for food not received, without exceptions for returned electronic benefits.

The commenter is correct that per § 246.12(l)(1)(iii)(E), the State agency must disqualify a vendor for three years for a pattern of charging for supplemental foods not received by the participant. The Department highlights that each State agency develops their own definition of a pattern for each violation, with discretion over what constitutes a pattern including frequency of violation, time periods, and dollar amounts. As discussed above, the Department added language requiring vendors to initiate the return of electronic benefits within two (2) days of indication that an order was unfulfilled. So, for example, if the State agency determines there is a pattern of unfulfilled orders from a given vendor and the electronic benefits are not being appropriately returned to the participant's balance, the State agency may use its definition of pattern to identify this as a violation and take appropriate follow up action per § 246.12(l)(1)(iii)(E).

Some commenters stated that as EBT, MIS, and vendor systems exist now, it is not possible to return electronic benefits to the participant's balance. The Department understands that currently, systems do not allow for the return of electronic benefits because of the previous regulatory prohibition. With this final rulemaking, the Department encourages system updates to accommodate the return of electronic benefits, a requirement for State agencies authorizing internet vendors and an option for all others.

Many commenters highlighted the need for guidance on managing substitutions when an order is submitted but the specific item requested is not available when the order is fulfilled.

The Department agrees and intends to work with State agencies to develop guidance and provide best practices for managing substitutions separate from this rulemaking.

iii. At State agency option, allow participants the flexibility to transact returned electronic benefits up to seven (7) days beyond the last date of use (LDTU). (§§ 246.12(x)(2)(iii) and 246.12(x)(4)(iii))

This final rule codifies a State agency option to allow participants to use returned electronic benefits up to seven (7) days beyond the LDTU at § 246.12(x)(4)(iii) and makes related modifications to the last date of use provision at § 246.12(x)(2)(iii). This is a modification from the proposed rule which *required* State agencies to provide this flexibility. This final rule requests comment specifically on the impacts of requiring the return of benefits after the LDTU to better understand the costs and burdens that these required flexibilities could have on stakeholders and their systems.

Multiple commenters expressed support for this provision noting it allows participants time to use electronic benefits returned to their benefit balance.

The Department originally proposed that State agencies must allow returned benefits to be available for participant use for a minimum of seven (7) days after the return, which could extend into the next benefit period. Many commenters expressed concerns related to the technical challenges of allowing for the use of electronic benefits after the LDTU, explaining this would require significant changes to MIS and EBT systems, and could impact vendor systems. Many commenters strongly recommended that returned electronic benefits only be allowed for use within the current benefit period to implement this change more easily and cost-effectively. Multiple commenters also said the instances in which participants would need to use returned benefits after the LDTU would be rare and that these situations were better mitigated with continued participant education that encourages participants to use their electronic benefits well before the benefit LDTU.

The Department recognizes the technical challenges of allowing the use of returned electronic benefits after the LDTU and does not want these to be a barrier to innovating the WIC shopping experience, including implementing online shopping. Due to the concerns raised and the desire to support State agencies implementing online shopping, the Department modified the minimum amount of time State agencies must provide participants to use returned electronic benefits from ''no less than 7 calendar days'' to ''the remainder of the benefit issuance month.'' Electronic benefits that are returned to a participant's balance must be available for use within the original benefit issuance month, but the State agency is not required to allow use of returned electronic benefits beyond the LDTU. This minimum amount of time better aligns with program operations and benefit issuance systems. To support those State agencies with providing greater flexibility to their participants, the Department is making the use of returned electronic benefits after the LDTU allowable as a State agency option. The Department recognizes that for State agencies that do not take this option, there may be some participants who will have a reduced amount of time to transact their returned benefits if they are returned in the last few days of the benefit issuance month. However, the Department agrees with public comment that the instances in which participants would need to use returned benefits beyond the LDTU would be rare and are better mitigated with continued participant education. In these situations, where State agencies do not opt to allow the use of returned benefits beyond the LDTU, the Department notes

that all participants maintain the ability to exchange identical authorized supplemental foods per § 246.12(h)(3)(ii)(A).

To support State agencies in implementing this flexibility in the long term, the Department is requesting comment regarding the impact on stakeholders if State agencies were required to allow the use of returned electronic benefits beyond the LDTU. The Department requests input that includes a discussion of:

- The technical changes that would be necessary to allow this functionality,
- The cost of changing the MIS and EBT systems to allow this functionality,
- The cost of this type of change for vendor systems,
- The specific impact on reporting and infant formula rebates and contracts, and
- Any other comments or concerns related to this type of functionality.

The Department appreciates specific, detailed comments on the use of returned electronic benefits beyond the LDTU and will use feedback received to inform future rulemaking.

Commenters also requested clarification on whether there was a maximum number of days beyond the LDTU in which a participant may use returned electronic benefits, expressing concern that as proposed, returned electronic benefits would be available in the benefit balance indefinitely.

It is a core tenet of the WIC Program that benefits are intended to be used within the month they are issued, and it would be inconsistent with that tenet for benefits to be available indefinitely. The Department has modified the provision to establish a maximum of seven (7) days that returned electronic benefits can be used after the LDTU for State agencies that allow this flexibility. This provides uniform direction for State agencies regarding how long returned electronic benefits may be available for participants to transact, should State agencies pursue this option.

Commenters discussed issues of fairness with the provision as proposed, stating that participants facing transaction challenges in-store do not have an opportunity to use their electronic benefits beyond the LDTU in the event of issues such as vendor system problems, card errors, or family crises. As a solution to this issue, many commenters requested a full rollover of all unredeemed electronic benefits to the next month.

The Department clarifies that because the return of electronic benefits is allowed for all vendors and not just internet vendors, the option for using returned benefits beyond the LDTU applies to all participants, not just those using online shopping. Additionally, it is important to note this provision is addressing a specific situation that applies to those electronic benefits that have been transacted but subsequently returned to the participant's benefit balance. This provision is not permitting the ''rollover'' of electronic benefits that were never transacted. Other scenarios that impact benefit transaction, such as issues related to vendor system problems and card errors, are out of the scope of this rulemaking.

Some commenters expressed concern about the over-issuance of electronic benefits if participants are allowed to transact electronic benefits from one issuance month during the following issuance month. The Department clarifies that this is not over-issuance as the State agency is not issuing benefits in excess of the participant's maximum quantities of supplemental foods but is instead extending the dates of use for validly issued electronic benefits.

e. Allow State agencies to develop virtual methods of oversight [§§ 246.2 and 246.12(g)(5) and (j)(6)(ii)(B)]. Provisions in this section allowing virtual methods of routine monitoring, compliance buys, and preauthorization visits are finalized as proposed.

i. Update the definitions of ''routine monitoring'' and ''compliance buy'' to remove the on-site requirement. (§ 246.2)

This final rule codifies revisions to the definitions at § 246.2 of ''routine monitoring'' and ''compliance buy'' as proposed to remove the requirement that routine monitoring visits and compliance buys must occur on-site.

Multiple commenters expressed general support for allowing State agencies to develop virtual methods of oversight, stating that it will be necessary to support the authorization of internet vendors. Commenters also stated it would support consistent monitoring in the face of environmental challenges and referenced the success of virtual monitoring during the COVID–19 pandemic. No comments were opposed.

Commenters requested clarification on whether on-site monitoring is still an option, or if all oversight must take place virtually.

The new definitions do not require State agencies to use virtual methods of oversight, they instead provide State agencies the opportunity to develop virtual methods of oversight to ensure that monitoring and investigative methods are appropriate for the types of vendors authorized (*e.g.,* internet vendors) and environmental conditions. With this change, State agencies can pursue new types of monitoring and investigative methodologies, yet still retain discretion over how these activities are implemented.

Commenters requested clarification on if the new vendor types change the requirements regarding monitoring and compliance, specifically the number of monitoring and compliance activities the State agency must complete each fiscal year.

The only changes to routine monitoring and compliance buys in this rulemaking are to remove the on-site requirement. The number of monitoring and compliance investigation activities that the State agency must complete remains the same.

ii. Introduce virtual visits as an allowable type of preauthorization visit. (§ 246.12(g)(5))

This final rule codifies revisions as proposed to introduce virtual visits as an allowable type of preauthorization visit at § 246.12(g)(5). Commenters supported this provision, stating the proposed change is effective and will reduce costs, and the flexibility proved helpful in supporting State agencies in continued authorization of vendors during the COVID–19 pandemic. No comments were opposed.

Some comments sought clarification on whether virtual preauthorization visits were a requirement and asked the Department to define a virtual visit.

As with virtual options for routine monitoring and compliance buys made possible through this rulemaking, virtual preauthorization visits are not a requirement, but an option for the State agency to use to authorize new vendor types efficiently and to respond to environmental conditions appropriately. The Department clarifies virtual preauthorization visits can be used for any vendor type and are not just for internet vendors. The Department does not define a virtual visit in regulation but clarifies the purpose of the preauthorization visit is to verify the information provided on the vendor application, and to ensure the vendor applicant meets the selection criteria used by the State agency to select vendors for program authorization. This applies to internet and mobile vendors the same as it applies to brick-and-mortar vendors.

f. Prohibit vendors, farmers or farmers' markets from charging State agencies fees associated with WIC purchases and permit WIC shoppers to pay such fees [§§ 246.12(h)(3)(xxxiii) and (v)(1)(ix) and 246.14(b)(1)(i)]. The finalized provisions prohibiting vendors at § 246.12(h)(3)(xxxiii) and farmers or farmers' markets at § 246.12(v)(1)(ix)

from charging State agencies fees associated with online shopping are modified to include the prohibition of charging fees associated with any WIC purchase, not just online shopping purchases. The provisions clarifying that State agencies can still pay costs associated with home food delivery and direct distribution at § 246.14(b)(1)(i) and (c)(4) are modified to clarify that State agencies can continue using food funds to pay for the cost of transporting food under these two food delivery systems, as opposed to the retail food delivery system in which State agencies cannot use food funds to pay for the cost of transporting food.

i. Prohibit vendors, farmers, and farmers' markets from charging State agencies fees associated with WIC purchases and permit WIC shoppers to pay such fees. (§§ 246.12(h)(3)(xxxiii) and 246.12(v)(1)(ix))

This final rule codifies the provision at § 246.12(h)(3)(xxxiii) prohibiting vendors from charging State agencies fees associated with online ordering and with modifications to clarify this prohibition applies to all vendors and fees associated with WIC purchases to ensure consistency for vendors and shoppers. The provision at § 246.12(v)(1)(ix) regarding farmers and farmers' markets is finalized with similar modifications to reflect the prohibition on all fees, rather than just online shopping fees. This final rule also codifies in both provisions that participants must be allowed to pay such fees using a different form of tender.

Many commenters supported these provisions, expressing that State agencies should not pay online shopping fees as online shopping is a customer preference. Commenters also supported the requirement that participants be allowed to pay these fees using another tender type, if the same fees are charged to non-WIC shoppers, to ensure WIC customers are treated the same as non-WIC customers.

As the proposed provision only prohibited vendors from charging fees associated with online ordering, some commenters recommended modification to include fees charged by other WIC vendor types, such as bag fees or convenience fees. Commenters stated that to ensure vendor types are treated equally, any fees vendors charge shoppers as part of or in addition to their purchase should not be charged to State agencies.

The Department agrees the prohibition of vendors charging State agencies fees associated with WIC purchases should not be dependent on the type of vendor. To ensure State agencies hold all vendor types to the same federal regulatory requirements, the Department modified the regulatory language to reflect that vendors must not charge State agencies for any fees associated with a WIC purchase, including but not limited to delivery, service, convenience, or bag fees. If there is a fee associated with the purchase, the participant must have the opportunity to pay that fee using another tender type. To ensure the same policy applies to farmers and farmers' markets, related changes were made to § 246.12(v)(1)(ix). These provisions are not applicable to EBT costs, including operational costs, interchange fees, and third-party processing fees. The regulations related to EBT fees are governed by § 246.12(h)(3)(xxviii), (xxix), (xxx), § 246.12(aa)(3) and (4) and remain unchanged by this rulemaking.

The Department requested specific feedback on whether State agencies should have the option to pay for fees associated with online shopping in a retail food delivery system with either (1) non-federal funding at State agency discretion and/or (2) federal funding in situations where it is deemed necessary to meet special needs. The Department appreciates the robust discussion provided by commenters and addresses this below.

Many commenters requested State agencies retain discretion on the use of non-federal funds to pay for such fees. Commenters shared that the use of federal funds under special circumstances would be particularly helpful for rural, remote, isolated, under-resourced, and participants with disabilities, and those impacted by disasters and public health emergencies, if targeted appropriately. Some commenters, however, stated that expanding the food package and serving all eligible participants should be the focus of discretionary federal WIC funds, and expressed concern about adequately containing the costs and ensuring program integrity if paying such fees using federal funds was deemed necessary.

The Department appreciates concerns regarding access to WIC benefits and efficient use of taxpayer funds. The Department also acknowledges State agencies are best suited to understand the unique needs of their participant population and believes State agencies should have flexibility to use non-WIC funds when available. Therefore, the Department confirms that non-WIC funds can be used at State agency discretion. This includes but is not limited to funds provided to the State agency by state, tribal or territorial governments, funds provided from non-profit organizations, or non-WIC federal funds available to the State agency, if it is an allowable use of those funds.

The Department thoroughly considered the comments regarding the special circumstances under which it would benefit participants to use federal WIC funds to pay these fees, especially to support access for participants in rural and remote locations or participants with disabilities. However, the Department also recognizes the concerns related to the limited federal funding available and the many questions related to how costs would be adequately contained, and ensuring program integrity if federal funds were to be used to pay such fees. Therefore, to maintain the integrity of the WIC Program and ensure that federal WIC dollars continue to be used for only food costs and the administration of WIC, the Department finalizes that federal WIC funds may not be used to pay these fees.

Some commenters requested the Department amend the equal treatment provision at § 246.12(h)(3)(iii) to allow for preferential treatment of WIC shoppers so that vendors can waive delivery fees for WIC customers. Some commenters likened delivery fees to sales taxes, and requested the Department create a similar regulation to § 246.12(h)(3)(vii) which prohibits the collection of sales tax on WIC foods.

The equal treatment provision at § 246.12(h)(3)(iii) has implications for program integrity and vendor management, both of which support cost containment in the WIC Program. Any revision to the equal treatment provision is out of the scope of this rulemaking. The Department acknowledges the collection on sales tax on WIC foods is prohibited, pursuant to the Child Nutrition Act at 42 U.S.C. 1786(c)(4). However, sales tax generates revenue for government services and is inherently different from the costs associated with shopping, such as delivery fees, which are fees charged by the vendor to provide a service. If the Department were to prohibit vendors from charging these fees altogether, it could force vendors to cover a cost that they do not cover for non-WIC shoppers and discourage vendors from providing online shopping options for WIC.

ii. Clarify costs associated with home food delivery and direct distribution to ensure State agencies still pay for the cost of transporting food under these two food delivery systems. (§ 246.14(b)(1)(i))

This final rule codifies the provision § 247.14(b)(1)(i) with modifications clarifying that WIC State agencies operating home food delivery or direct distribution food delivery systems may

continue using the food grant to pay for the cost of transporting food under these delivery systems. Commenters expressed general support for the clarifications, and no comments were opposed.

One comment recommended revising the provision on the grounds that it was difficult to understand.

The revisions to § 246.14(b)(1)(i) are intended to differentiate the costs that the State agency can charge to the food grant by food delivery system. To summarize, food funds can be used to pay for:

- Supplemental foods purchased by participants using WIC electronic benefits in a retail food delivery system, and/or
- The acquisition of supplemental foods provided to State agencies, local agencies, or participants, whichever receives the supplemental foods first, in a home food delivery system or a direct distribution delivery system.

The edits clarify that in a retail food delivery system, participants, not State agencies, purchase supplemental foods from retail vendors and that food funds cannot be used to pay for the delivery of those foods. In home food delivery and direct distribution systems, food funds can continue to be used to pay for shipping supplemental foods to State or local agencies, or participants, whichever receives the supplemental foods first.

2. Streamline and Modernize WIC Food Delivery

This final rule permits the remote issuance of electronic benefits to a participant's benefit balance, expands the definition of food instrument, updates the uniform food delivery systems provision to support State agency innovation, streamlines food delivery operations by recognizing that EBT data are a sufficient replacement for routine shelf price collection, and allows State agencies using a non-retail, home food delivery system to ship supplemental foods to a location designated by participants.

a. Permit the remote issuance of electronic benefits to a participant's benefit balance [§§ 246.4(a)(23), 246.7(f)(2)(iv), and 246.12(r)(2), (4), and (5)]. The provisions clarifying that paper food instruments must be picked up in person when in-person nutrition education or certification appointments are scheduled, § 246.12(r)(4), is finalized as proposed. The provision updating processing timeframes to support the remote issuance of benefits, § 246.7(f)(2)(iv), and the State Plan provision discussing remote benefit issuance policies, § 246.4(a)(23), are finalized as proposed. The provision allowing for the remote issuance of benefits and mailing of EBT cards at § 246.12(r)(5) is finalized with modifications that ensure the State agency has adequate program integrity measures in place for proof of participant receipt when EBT cards are issued remotely, and the provision at § 246.12(r)(2) describing signature requirements for benefit issuance is finalized with modifications that clarify a signature is only required when benefits are received in person.

i. Allow for the remote issuance of electronic benefits by separating the benefit issuance provisions for paper food instruments and cash-value vouchers from electronic benefit issuance, and update signature requirements. (§§ 246.12(r)(2), (4) and (5), and 246.7(f)(2)(iv))

This final rule codifies revisions separating paper food instrument and cash-value voucher issuance requirements from EBT card and electronic benefit issuance requirements. Changes to § 246.12(r)(4) describing the paper food instrument and cash-value voucher pick up are finalized as proposed. The EBT card and electronic benefit issuance provision, § 246.12(r)(5), is finalized with modifications requiring the State agency to have program integrity procedures in place for EBT cards that are issued remotely. This final rule codifies signature requirements for benefit issuance at § 246.12(r)(2), modifying the language to more explicitly state that a signature is required only when benefits are received in person. Updates to the processing timeframe requirements to support remote benefit issuance at § 246.7(f)(2)(iv) are finalized as proposed.
