Vol. 91 Thursday,

No. 222 November 19, 2026

Pages 74471–75160

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 91 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

The Federal Register Printing Savings Act of 2017 (Pub. L. 115–120) placed restrictions on distribution of official printed copies of the daily **Federal Register** to members of Congress and Federal offices. Under this Act, the Director of the Government Publishing Office may not provide printed copies of the daily **Federal Register** unless a Member or other Federal office requests a specific issue or a subscription to the print edition. For more information on how to subscribe use the following website link: *https://www.gpo.gov/frsubs.*

Rules and Regulations

Federal Register
Vol. 91, No. 222
Thursday, November 19, 2026

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2025–5401; Project Identifier MCAI–2025–01313–A; Amendment 39–23525; AD 2026–24–01]

RIN 2120–AA64

Airworthiness Directives; General Atomics AeroTec Systems GmbH (Type Certificate Previously Held by RUAG Aerospace Services GmbH) Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all General Atomics AeroTec Systems GmbH (General Atomics) Model Dornier 228–100, Dornier 228–101, Dornier 228–200, Dornier 228–201, Dornier 228–202, and Dornier 228–212 airplanes. This AD was prompted by reports of specific part-numbered hydraulic pump motors becoming severely damaged by excessive heat. This AD requires replacing the affected hydraulic pump motor with an improved design hydraulic pump motor. This AD also prohibits installing an affected hydraulic pump motor on any airplane. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 24, 2026.

ADDRESSES:

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2025–5401; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Doug Rudolph, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (816) 329–4059; email: *doug.rudolph@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all General Atomics Model Dornier 228–100, Dornier 228–101, Dornier 228–200, Dornier 228–201, Dornier 228–202, and Dornier 228–212 airplanes. The NPRM was published in the **Federal Register** on January 5, 2026 (91 FR 205). The NPRM was prompted by AD 2025–0172, dated August 4, 2025 (EASA AD 2025–0172) (also referred to as the MCAI), issued by the European Union Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union. The MCAI states that several occurrences were reported where the hydraulic pump motor became severely damaged by excessive heat. The MCAI further states that it was determined that carbon brushes installed on the affected hydraulic pump motor were the root cause of the failures. This condition, if not corrected, could lead to an uncontained fire, possible injury to passengers and crew, and consequent loss of control of the airplane.

In the NPRM, the FAA proposed to require replacing the affected hydraulic pump motor with an improved design hydraulic pump motor. The proposed AD also prohibits installing an affected hydraulic pump motor on any airplane. The FAA is issuing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2025–5401.

Discussion of Final Airworthiness Directive

Comments

The FAA received comments from two commenters. The commenters were Bighorn Airways (Bighorn) and Consolidated Aircraft Supply Company, Inc. (Consolidated Aircraft). The following presents the comments received on the NPRM and the FAA's response to each comment.

Request To Withdraw the NPRM

Bighorn requested that the FAA withdraw the NPRM since it has not encountered the unsafe condition addressed by the NPRM. Bighorn based its request on its extensive operational experience of a multi-airplane fleet with over 14,000 hours.

The FAA disagrees with the request to withdraw the NPRM. The condition is based on data extrapolated from the worldwide fleet by EASA and the type certificate holder and confirmed by the FAA. The FAA has determined that this condition is unsafe and could exist or develop on other airplanes of the same type design. The FAA did not change this AD as a result of this comment.

Request To Withdraw the NPRM

Consolidated Aircraft stated that it has not experienced high motor failures in other motor assembly types with the 1259A motor.

The FAA infers that the commenter wants the NPRM withdrawn and disagrees to withdraw the NPRM based on other motor assembly types not having the same failure issues. Service history of the motor assemblies on the affected airplanes reveals failure issues. Therefore, an unsafe condition exists or could develop on other airplanes of this same type design that must be addressed by AD action. If other motor assemblies develop a similar condition, the FAA will consider additional rulemaking action. The FAA did not change this AD as a result of this comment.

Request To Redefine the Actions of AD

Consolidated Aircraft disagreed with changing the part number of the pump motor as required per the service material. Consolidated Aircraft stated that this limits available support, which affects safety. Additionally, Consolidated Aircraft stated that changing the base part number prevents unmodified hydraulic pump motors from being installed, but pointed out that this could have been done by adding a dash to the base number of the old part number.

The FAA disagrees with this comment. The type certificate holder chose to change the part number of the modified pump motor after modification per their procedures to address this

unsafe condition. The FAA will consider alternative methods of compliance (AMOCs) to address this differently if the AMOCs are submitted following paragraph (i) of this AD. Therefore, the FAA did not change this AD as a result of this comment.

Request To Extend the Compliance Time

Bighorn requested that the FAA revise the compliance time in paragraph (g), ''Required Actions'' of the proposed AD, from 200 hours time-in-service (TIS) to 600 hours TIS. The commenter stated that this interval should coincide with the next overhaul of the hydraulic pump motor to reduce the burden of an additional compliance time for replacing the hydraulic pump motor.

The FAA disagrees with the request to extend the compliance time. In developing an appropriate compliance time for this action, the FAA considered the recommendations of the manufacturer and EASA, the risk associated with the subject unsafe condition, the availability of required parts, and the practical aspect of accomplishing the required modification within a period of time that corresponds to the normal scheduled maintenance for most affected operators. According to the manufacturer, an ample number of required parts will be available to modify the U.S. fleet within the proposed compliance time. In consideration of these items as well as the reports of severely heat damaged hydraulic pump motors, the FAA has determined that the 200-hour TIS compliance time is necessary to provide an acceptable level of safety. The FAA did not change this AD as a result of this comment.

Request To Mandate Removal Time

Consolidated Aircraft requested that the FAA add a mandatory removal time for overhaul of the hydraulic pump assembly in the NPRM.

The FAA disagrees with adding a mandatory removal time for overhaul of the hydraulic pump assembly in the NPRM. Per data supplied by the type certificate holder, the motor of the pump assembly is the focus of the unsafe condition and thus the replacement of the motor per paragraph (g) of this AD is the action that addresses the unsafe condition. The pump part of the assembly is replaced on condition as opposed to a time limit replacement schedule.

Request To Require Pump Part Numbers

Consolidated Aircraft stated that it often receives the pump for overhaul, separate from the motor, resulting from extensive wear.

The FAA infers that the commenter wants the FAA to include the part numbers of the pump in the Applicability of this AD. Although there may be signs of extensive wear on the pumps of hydraulic pump assemblies, the pump motor of the assembly is specifically the focus of the MCAI and this AD. The FAA has no data, including nothing from the type certificate (TC) holder, that indicates that wear on the pumps leads to pump motor issues on affected airplanes, so the hydraulic pump part numbers are not included within the scope of the MCAI and this AD. The TC holder has not identified any instances or reports of extensive wear in these pumps. The FAA did not change this AD as a result of this comment.

Request To Add Time Between Overhaul (TBO) for Hydraulic Pump Motor and Pump/Motor Assembly

Consolidated Aircraft asked if the hydraulic pump motor [part number 1259A], and pump/motor assembly, part numbers 40178–02 and –03, have a TBO.

The FAA has confirmed there is no TBO for the hydraulic pump motor addressed by this AD, which is part number 1259A. This AD does not address the hydraulic pump/motor assembly. The FAA did not change this AD as a result of this comment.

Concern Not To Allow Pilots To Handle Tripped Circuit Breakers

Consolidated Aircraft expressed concern about the possibility that pilots having less training could incorrectly handle a hydraulic pump motor circuit breaker when it trips and mentioned that if it does trip, there should be no resetting but instead to tow the airplane if necessary.

It is common airmanship for pilots to be trained to handle not resetting the circuit breaker unless it is deemed necessary. This situation is also addressed in the ''Pilot's Operating Handbook.'' There is no additional need to include pilot actions for tripped circuit breakers within this AD. The FAA did not change this AD as a result of this comment.

Request To Include the Pump Assembly in the AD Applicability

Consolidated Aircraft stated that motor and pump serial numbers are sequential when produced and that traceability of the pump assembly is lost when the pairing of the pump assemblies and hydraulic pump motors are changed.

The FAA infers that the commenter wants the FAA to include the pump assembly in the Applicability of this AD. The FAA disagrees with including the pump assembly in the Applicability of this AD. Since there is no data indicating a safety risk with the pump assemblies paired with the hydraulic pump motors, the FAA has determined that the unsafe condition is only on the pump motor. The FAA did not change this AD as a result of this comment.

Request To Include a Placard in the Cockpit

Consolidated Aircraft requested that the FAA require a placard in the cockpit for pilots to have an observable message regarding the hydraulic pump motor duty cycle.

The FAA disagrees with requiring a placard. Since the pump assembly and the hydraulic pump motor do not continuously operate and are not used more than specified, there would be no need for an additional placard in the cockpit. The FAA did not change this AD as a result of this comment.

Request To Allow FAA-Approved Repair Stations To Complete the Modification

Consolidated Aircraft requested that FAA-approved repair stations be allowed to complete the modification to the hydraulic pump motor assembly.

The FAA infers that the commenter is wanting to modify the internal components of the old motor part number (P/N) 1259A to make it a new P/N A–752511A00B. The FAA disagrees. Currently the General Atomics service bulletin (SB) states to contact the company for a slot for modification of the pump motor to make it a new part number motor or exchange old part number motor for the new part number motor. The SB and this AD do not allow the modification/re-identification of these motors by non-company outside sources. The repair station can still modify the hydraulic pump assembly per General Atomics AeroTec Dornier 228 Service Bulletin No. SB–228–360, Rev. 0. The FAA did not change this AD as a result of this comment.

Conclusion

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority

has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Costs of Compliance

The FAA estimates that this AD affects 16 airplanes of U.S. registry.

The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Replace hydraulic pump motor	3 work-hours × $85 per hour = $255	$8,900	$9,155	$146,480

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2026–24–01 General Atomics AeroTec Systems GmbH (Type Certificate Previously Held by RUAG Aerospace Services GmbH): Amendment 39–23525; Docket No. FAA–2025–5401; Project Identifier MCAI–2025–01313–A.

(a) Effective Date

This airworthiness directive (AD) is effective December 24, 2026.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all General Atomics AeroTec Systems GmbH (type certificate previously held by RUAG Aerospace Services GmbH) Model Dornier 228–100, Dornier 228–101, Dornier 228–200, Dornier 228–201, Dornier 228–202, and Dornier 228–212 airplanes, certificated in any category.

(d) Subject

Joint Aircraft System Component (JASC) Code 2913, Hydraulic Pump, (Elect/Eng), Main.

(e) Unsafe Condition

This AD was prompted by reports of several occurrences of hydraulic pump motors becoming severely damaged by excessive heat. The FAA is issuing this AD to prevent the overheating of the hydraulic pump motor. The unsafe condition, if not addressed, could result in an uncontained fire, possible injury to passengers and crew, and loss of control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

For airplanes with an installed hydraulic pump motor having part number (P/N) 1259A, within 200 hours time-in-service of the hydraulic pump motor (for airplanes equipped with a hydraulic system elapsed time indicator), or 600 landings (for airplanes not equipped with a hydraulic system elapsed time indicator), as applicable, after the effective date of this AD, replace the hydraulic pump motor with a hydraulic pump motor having P/N A–752511A00B.

Note to Paragraph (g): General Atomics AeroTec Dornier 228 Service Bulletin No. SB–228–360, Rev. 0, dated May 28, 2025, contains information related to this AD.

(h) Installation Prohibition

As of the effective date of this AD, do not install a hydraulic pump motor having P/N 1259A on any airplane.

(i) Alternative Methods of Compliance (AMOCs)

The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (j)(1) of this AD and email to: *AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(j) Additional Information

(1) For more information about this AD, contact Doug Rudolph, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (816) 329–4059; email: *doug.rudolph@faa.gov.*

(2) For material identified in this AD that is not incorporated by reference, contact General Atomics AeroTec Systems GmbH, Galileostraße 396, D–82131 Gauting, Germany; phone: +49 8153 302280; email:

custsupport.dornier228@ga-ats.com; website: *ga-ats.com/.*

(k) Material Incorporated by Reference

None.

Issued on November 17, 2026.

Steven W. Thompson,

Acting Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[Docket Number USCG–2026–1359]

RIN 1625–AA00

Safety Zones; Annual Events Requiring Safety Zones in the Captain of the Port Lake Michigan Zone—Magnificent Mile Fireworks Display

AGENCY: Coast Guard, Department of Homeland Security.

ACTION: Notification of enforcement of regulation.

SUMMARY: The Coast Guard will enforce a safety zone for the Magnificent Mile Fireworks Display on November 21, 2026, to provide for the safety of life on navigable waterways during this fireworks display. Our regulation for marine events within the Great Lakes Coast Guard District identifies the safety zone for this event in Chicago, IL. During the enforcement period, entry into, transiting, or remaining within the safety zone is prohibited unless authorized by the Captain of the Port (COTP) Lake Michigan or his or her designated representative.

DATES: The regulations in 33 CFR 165.929 will be enforced for the Magnificent Mile Fireworks Display regulated area listed in Event 20 in Table 1 to § 165.929, from 6:55 p.m. until 7:05 p.m. on November 21, 2026.

FOR FURTHER INFORMATION CONTACT: If you have questions about this rule, call or email Lieutenant Michael Vega, Marine Safety Unit Chicago, U.S. Coast Guard; telephone (206) 815–6711, email *D09-SMB-MSUChicago-WWM@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce a safety zone regulation in 33 CFR 165.929 for the Magnificent Mile Fireworks Display listed in Event 20 in Table 1 to § 165.929, from 6:55 p.m. to 7:05 p.m. on Saturday November 21, 2026. The regulation for recurring marine events within the State of Illinois, in Event 20 in Table 1 to § 165.929, specifies the location of the safety zone for this event.

During the enforcement period, vessels must obtain permission from the COTP Lake Michigan or his or her designated representative to enter, move within, or exit a safety zone. Vessels and persons granted permission to enter the safety zone must obey all lawful orders or directions of the COTP Lake Michigan or his or her designated representative. Upon being hailed by the U.S. Coast Guard by siren, radio, flashing light or other means, the operator of a vessel must proceed as directed.

In addition to this notification of enforcement in the **Federal Register**, the Coast Guard will provide the maritime community with notification of this enforcement period via Broadcast Notice to Mariners. The COTP Lake Michigan may be reached by contacting the Coast Guard Sector Lake Michigan Command Center at (833) 900–2247. An on-scene designated representative may be reached via VHF–FM Channel 16.

R.N. Macon,

Captain, U.S. Coast Guard, Captain of the Port, Lake Michigan.

33 CFR Part 165

[Docket Number USCG–2026–0830]

RIN 1625–AA00

Safety Zone; Hackensack River, Kearny and Secaucus, NJ

AGENCY: Coast Guard, Department of Homeland Security.

ACTION: Temporary interim rule and request for comments.

SUMMARY: The Coast Guard is establishing a temporary safety zone for navigable waters on the Hackensack River, in Kearny and Secaucus, NJ. The safety zone is needed to protect personnel, vessels, and the marine environment from potential hazards associated with the demolition of the existing Portal Bridge. When subject to enforcement, entry of vessels or persons into this zone is prohibited unless specifically authorized by the Captain of the Port, Sector New York, or their designated representative.

DATES:

Effective date: This rule is effective without actual notice from 6 a.m. November 19, 2026 through 11:59 p.m. on May 27, 2027. For purposes of enforcement the Coast Guard will use actual notice from 6 a.m. on November 17, 2026, through 6 a.m. November 19, 2026 The Coast Guard will only enforce this temporary safety zone during periods during which barges are within the channels at the existing bridge and demolition operations are in progress.

Comments due date: Comments and related material must be received by the Coast Guard on or before December 21, 2026.

FOR FURTHER INFORMATION CONTACT: If you have questions about this rule, contact MST1 Angelina Gerber, Sector New York Waterways Management Division, U.S. Coast Guard; telephone 718–801–2932, or email *SectorNYWWM@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port, Sector New York
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
PNB Portal North Bridge
§ Section
U.S.C. United States Code
WGS#84 World Geodetic System

II. Background and Authority

On September 28, 2026, the Coast Guard received sufficient information to be able to fulfill a request from the Skanska Traylor Portal North Bridge Joint Venture for a safety zone on the Hackensack River while demolishing the existing Portal North Bridge (PNB) span (River Mile 5.0). Hazards from this project include but are not limited to deployment of heavy equipment and anchored barges which will continuously obstruct vessel traffic through the navigable channel, during demolition of the existing superstructure, footings, and fender systems, which create hazards for workers and the public. The Captain of the Port, Sector New York (COTP) has determined that potential hazards associated with demolition of the existing bridge are a safety concern for anyone within the work area. Under the authority of 46 U.S.C. 70034, the COTP is issuing this rule, to protect personnel, vessels, and the marine environment in the navigable waters within the safety zone.

The Coast Guard is issuing this rule without prior notice and comment. As authorized by 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed

rulemaking (NPRM) with respect to this rule because it is impracticable. The Coast Guard was not notified of this schedule and safety zone request with sufficient time to be able to publish this rule by November 17, 2026, when the safety zone must be in place to protect personnel, vessels, and the marine environment.

For the same reason, the Coast Guard finds that under 5 U.S.C. 553(d)(3), good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**.

III. Discussion of the Rule

This temporary interim rule establishes a safety zone from 6 a.m. on November 17, 2026, until 11:59 p.m. on May 27, 2027. The safety zone will cover all navigable waters of the Hackensack River, surface to bottom, shoreline to shoreline, between the New Jersey Turnpike/I–95 Fixed Bridge (River Mile 5.3) and a line drawn from 40°44′54.52″ N, 74°05′37.59″ W, thence to 40°45′02.07″ N, 74°05′31.69″ W, approximately 1,650 feet south of the existing PNB. These coordinates are based on the World Geodetic System (WGS 84). Vessels and persons will not be allowed to enter the zone during this time, unless authorized by the Captain of the Port.

One full eight-week enforcement period prohibiting vessels or individuals from entering the safety zone is planned from approximately November 17, 2026, through January 29, 2027.

The exact dates and times of the enforcement period, during which all vessel transits through the safety zone will be prohibited, will be published in the Local Notice to Mariners, posted on the Coast Guard Navigation Center Maritime Safety Information Products page at *https://www.navcen.uscg.gov/msi,* and issued in a Broadcast Notice to Mariners via marine channel 16 (VHF–FM) as soon as practicable in response to an emergency or hazardous condition.

This rule will remain in effect through May 27, 2027, which should accommodate the possibility of project delays due to unforeseen circumstances. If the project is completed before May 27, 2027, enforcement of the safety zone will be suspended, and notice will be provided via the Local Notice to Mariners.

The Coast Guard Northeast District Local Notice to Mariners can be found at: *https://www.navcen.uscg.gov/maritime-safety-information.*

IV. Public Participation and Request for Comments

Although this regulation is published as a temporary interim rule without prior notice, public comment is nevertheless desirable to ensure that the regulation is both workable and reasonable. Commenters should identify the docket number for the regulation and give reasons for their comments. If the Coast Guard determines that changes to the temporary interim rule are necessary, the Coast Guard will publish a temporary final rule or other appropriate document.

Submitting comments. We encourage you to submit comments at *https://www.regulations.gov.* To do so, go to *https://www.regulations.gov,* type USCG–2026–0830 in the search box and click ''Search.'' Next, look for this document in the Search Results column, and click on it. Then click on the Comment option. If you cannot submit your material by using *https://www.regulations.gov,* call or email the person in the **FOR FURTHER INFORMATION CONTACT** section of this proposed rule for alternate instructions.

Viewing material in the docket. To view available documents, find the docket as described in the previous paragraph, and then select ''Supporting & Related Material'' in the Document Type column. We will post public comments in our online docket. Additional information is on the *https://www.regulations.gov* Frequently Asked Questions web page.

Personal information. We accept anonymous comments. Comments you post to *https://www.regulations.gov* will include any personal information you have provided. Contact information (such as email or mailing address) will not be available for public viewing, however, unless the submitter includes that information in the body of the docket submission. For more about privacy and submissions to the docket in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analysis based on a number of these statutes and Executive orders.

A. Impact on Small Entities

The regulatory flexibility analysis provisions of the Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, do not apply to rules that are not subject to notice and comment. Because the Coast Guard has, for good cause, waived the notice and comment requirement that would otherwise apply to this rulemaking, the Regulatory Flexibility Act's flexibility analysis provisions do not apply here.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), if this rule will affect your small business, organization, or governmental jurisdiction and you have questions, contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards by calling 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

B. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

C. Federalism and Indian Tribal Governments

We have analyzed this rule under Executive Order 13132, Federalism, and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in that Order.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

D. Unfunded Mandates Reform Act

As required by The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538), the Coast Guard certifies that this rule will not result in an annual expenditure of $100,000,000 or more (adjusted for inflation) by a State, local, or tribal government, in the aggregate, or by the private sector.

E. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National

Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment.

This rule is a safety zone. It is categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A Record of Environmental Consideration supporting this determination is available in the docket.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051, 70124; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.4.

2. Add § 165.T01–0830 to read as follows:

§ 165.T01–0830 Safety Zone; Hackensack River, Kearny and Secaucus, NJ.

(a) *Location.* The following area is a safety zone: All waters of the Hackensack River from surface to bottom, shoreline to shoreline, between the New Jersey Turnpike/I–95 Fixed Bridge (River Mile 5.3) and a line drawn from 40° 44′54.52″ N, 74°05′37.59″ W, thence to 40°45′02.07″ N, 74°05′31.69″ W, approximately 1,650 feet south of the existing Portal Bridge. These coordinates are based on the World Geodetic System (WGS 84).

(b) *Definitions.* As used in this section, *designated representative* means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer operating a Coast Guard vessel and a Federal, State, and local officer designated by or assisting the Captain of the Port New York (COTP) in the enforcement of the safety zone.

(c) *Regulations.* (1) Under the general safety zone regulations in subpart C of this part, you may not enter the safety zone described in paragraph (a) of this section unless authorized by the COTP or the COTP's designated representative.

(2) To seek permission to enter, contact the COTP or the COTP's representative on VHF–FM channel 16 or by telephone at (718) 354–4353. Those in the safety zone must comply with all lawful orders or directions given to them by the COTP or the COTP's designated representative.

(d) *Enforcement period.* This section is effective from 6 a.m. on November 17, 2026, through 11:59 p.m. on May 27, 2027, but will only be enforced during periods when barges are within the channels at the existing bridge and demolition operations are in progress. The Coast Guard will issue information of the enforcement period through Local Notice to Mariners, the Coast Guard Navigation Center Maritime Safety Information Products page at *https://www.navcen.uscg.gov/msi,* and Broadcast Notice to Mariners via marine channel 16 (VHF–FM) as soon as practicable. In addition, if the project is completed before May 27, 2027, enforcement of the safety zone will be suspended, and notice given via Local Notice to Mariners.

Doreen McCarthy

Captain, U.S. Coast Guard, Captain of the Port Sector New York.

Mammoth Cave National Park; Bicycling and Horses

AGENCY: National Park Service, Interior.

ACTION: Final rule.

SUMMARY: The National Park Service (NPS) amends the special regulations for Mammoth Cave National Park to allow bicycle use on approximately 37 miles of multi-use trails throughout the park. This rule also will allow visitors to ride horses on the 5.4-mile Houchin Ferry North/Ollie Road.

DATES: This rule is effective December 21, 2026.

ADDRESSES: Comments received on the proposed rule are available on *https://www.regulations.gov* in Docket No. NPS–2026–0001. A copy of the Mammoth Cave National Park Comprehensive Land and River Trails Plan and Environmental Assessment and the associated Finding of No Significant Impact are available online at *https://parkplanning.nps.gov/maca* by clicking the link entitled ''Develop Land and River Trail Management Plan for Mammoth Cave National Park'' and then clicking the link entitled ''Document List.''

FOR FURTHER INFORMATION CONTACT: Barclay Trimble, Superintendent, Mammoth Cave National Park; (202) 758–2180; *Barclay_Trimble@nps.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:

Background

History, Establishment and Purpose of the Park

Mammoth Cave National Park comprises more than 52,000 acres of land within Edmonson, Hart, and Barren Counties in Kentucky. Within Mammoth Cave National Park is Mammoth Cave. Named for the enormity of its subterranean vaults and the unparalleled extent of its passages, Mammoth Cave is the longest known cave system in the world with over 400 miles surveyed to date. The geologic features within the extensive cave system are the product of a unique set of conditions found nowhere else, all of which contribute to the largest, most complex, and best-known karst area in the world. Karst is a geologic term that refers to areas of irregular limestone in which erosion has produced features such as fissures, sinkholes, underground streams, sinking springs, and caverns. The land above the underground formations is characterized by rugged hills, valleys, and forests.

Congress authorized the establishment of the park in 1926, which was officially established in 1941 and added to in 1961 with the acquisition of Great Onyx Cave and Crystal Cave. The legislative history of the establishment of the park recognized the need to protect and conserve the stunning and unique underground formations of the cave system, but also opportunities for recreation that could be provided by lands above ground. The park's enabling legislation directs the NPS to administer the park in accordance with the laws generally applicable to the National Park System, including the NPS Organic Act. That act requires the NPS to promote and

regulate the scenery, natural and historic objects, and wild life in parks and to provide for the enjoyment of the same in such manner and by such means that will leave them unimpaired for the enjoyment of future generations. 54 U.S.C. 100101.

In 2014, the NPS published the foundation document for the park. The document states that the park's purpose is to preserve, protect, interpret, and study the internationally recognized biological and geologic features and processes associated with the longest known cave system in the world, the park's diverse forested, karst landscape, the Green and Nolin rivers, and extensive evidence of human history; and to provide and promote public enjoyment, recreation, and understanding. Today, visitors are drawn to the park by its caves, scenic river valleys, bluffs, forests, and abundant wildlife. Above ground, the park offers opportunities for ranger-led tours, surface walks, camping, hiking, horseback riding, bicycling, scenic drives, canoeing and kayaking, fishing, accessible trails, and picnicking.

Trail Use in the Park

Bicycling is allowed on approximately 19 of the 85 miles of land-based trails within the park. These multi-use trails are the Connector Trail from the Big Hollow Trailhead to the Maple Springs Trailhead (Maple Springs Connector Trail), the Big Hollow Trail, the Mammoth Cave Railroad Bike & Hike Trail, and the White Oak Trail. Bicycles also are allowed on roads that are open to public motor vehicle traffic and on four administrative roads that are closed to motor vehicle use by the public but open to motor vehicle use by the NPS for administrative purposes (the Crystal Cave, Great Onyx, Three Springs, and Union City administrative roads).

Trails, public roads, and administrative roads that are open to traditional bicycles also are open to two-wheeled electric bicycles (e-bikes). Trail-use of three-wheeled e-bikes is limited to the Mammoth Cave Railroad Bike & Hike Trail and the Maple Springs Connector Trail. The use of traditional bicycles and e-bikes is governed by State law and NPS regulations that address topics such as speed limits, operation during periods of low visibility, obeying traffic control devices, and unsafe operation. See 36 CFR 4.30.

In addition to opportunities for hiking and bicycling, visitors can ride horses on 54 miles of trail within the park, featuring wooded backcountry routes suitable for different skill levels and ages. The trails include wide, smooth dirt paths that accommodate two riders as well as narrower, single-file ridgeline trails. Horseback riding is prohibited on all park roads pursuant to NPS general regulations that prohibit the use of horses on park roads except in limited circumstances. See 36 CFR 2.16.

Comprehensive Land and River Trails Plan and Environmental Assessment

In 2022, the NPS began developing a new land and river trails management plan for the park. The NPS initiated this planning process because previous plans had become outdated, and the condition of the park's trail system had deteriorated in a way that was adversely impacting park resources and the experience of trail users. The new plan would guide trail management for several decades with the purpose of improving access to high-quality land and river-based recreational opportunities for a diverse group of trail users, including hikers, equestrians, mountain bikers, and paddlers.

After the conclusion of a preliminary planning phase that sought feedback from trail users, community groups, and the general public, the NPS published the ''Mammoth Cave National Park Comprehensive Land and River Trails Plan and Environmental Assessment'' (EA) in 2024. The EA analyzed the potential environmental impacts of a no-action alternative that would have continued current management of the trail system and an action alternative that was identified as the NPS's preferred alternative. Under the action alternative, the NPS would add approximately 66 miles of land-based trails to the park trail system. This 72 percent increase in trail mileage would create new opportunities for hiking, horseback riding, and bicycling.

Specific to bicycle use, under the preferred alternative, the NPS would (1) discontinue bicycle use on the White Oak Trail; (2) close and restore to natural conditions the Maple Springs Connector Trail; and (3) construct eight new multi-use trails where bicycle use would be allowed, resulting in a total of approximately 37 miles of trail open to bicycle use.

As described in the EA, trail construction activities would use sustainable trail techniques to manage water and limit erosion, such as trail hardening, grade reversals, outslopes, and other earthwork strategies that improve drainage. These measures would minimize trail widening and trail braiding on new and rehabilitated trails, resulting in less vegetation trampling. The NPS would implement mitigation measures to minimize the impact on native vegetation during construction.

In addition to evaluating the potential impacts of trail construction and modification activities, the EA evaluated the potential impacts of allowing bicycles on the new trails. The EA and an associated written determination required by NPS regulations evaluate the suitability of trail surfaces and soil conditions for accommodating bicycle use, life cycle maintenance costs, safety considerations, methods to prevent or minimize user conflict, and methods to protect natural and cultural resources and mitigate impacts from bicycle use. Under the preferred alternative, the NPS would convert a one-mile section of the Ugly Creek Road from a public road to an administrative road that is closed to motor vehicle use other than vehicles used by the NPS for administrative purposes. Hiking and bicycling would be allowed on the converted section of this road.

The preferred alternative also would open the Houchin Ferry North/Ollie Road (5.4 miles) to horseback riding. This change would improve the experience of equestrians by providing multiple opportunities for shorter loop rides, and a new opportunity to ride to the river and back from the northern boundary of the park. The NPS does not anticipate there will be conflicts between vehicles, equestrian users, hikers, and bicyclists because the road is used rarely by motor vehicles. All other public and administrative roads would continue to remain closed to equestrian use.

The NPS accepted public comments on the EA for 30 days. In December 2024, following a recommendation by the park superintendent, the Regional Director for Interior Region 2, South Atlantic—Gulf, signed a Finding of No Significant Impact (FONSI) that identified the preferred alternative in the EA as the selected alternative. As stated in the FONSI, the NPS believes the selected alternative will improve the conditions and sustainability of the aboveground land and water trail networks in the park and enhance the diversity and quality of visitor experiences while protecting natural and cultural resources. Implementation of the selected alternative will expand opportunities for visitors to enjoy and recreate within the park.

Final Rule

This rule implements part of the selected alternative in the FONSI by amending the special regulations for the park in 36 CFR 7.36. This rule authorizes the superintendent to

designate approximately 37 miles of multi-use trails for bicycle use in the park. The rule identifies 12 distinct trails that could be designated for bicycle use. Two trails currently designated for bicycle use—the Maple Springs Connector Trail and the White Oak Trail—are removed, consistent with plans to close those trails to bicycle use under the selected alternative. Another currently designated trail—the Mammoth Cave Railroad Bike & Hike Trail—remains on the list and another—the Big Hollow Trail—is listed as three separate segments as identified on park maps.

The rule adds the following eight new trails that will be constructed under the selected alternative:

- Brooks Knob Road Cemetery Trail;
- Brooks Knob Road Trail (up to gate);
- Crystal Cave Road Trail;
- East Entrance Trail;
- Little Hope Cemetery Trail;
- Sugar Sink Connector Trail;
- Sugar Sink Trail; and
- West Entrance Trail.

The rule includes the approximate mileage of all the identified trails. The rule requires the superintendent to notify the public of designated trails through one or more of the methods identified in 36 CFR 1.7, including publication in the Superintendent's Compendium (or written compilation) of discretionary actions and on maps available at the visitor center and on the park website. NPS regulations at 36 CFR 4.30(i) authorize superintendents to allow electric bicycles on park roads, parking areas, and administrative roads and trails that are otherwise open to traditional bicycles. Accordingly, the superintendent may decide to allow electric bicycles on any of the trails identified in the rule that are open to traditional bicycles and will notify the public pursuant to 36 CFR 1.7.

NPS general regulations in 36 CFR 2.16(c) prohibit the use of horses or pack animals on a park road, except where such travel is necessary to cross to or from designated trails, areas, or privately owned property when no alternative trails or routes have been designated, and when the road is closed to motor vehicles. Neither of these exceptions to the general rule apply to riding horses on the Houchin Ferry North/Ollie Road, which is called for in the selected alternative. Special regulations for the park, however, can amend, modify, relax, or make more stringent general regulations in 36 CFR parts 1 through 5 and part 12. See 36 CFR 1.2(c). Accordingly, this rule adds a new paragraph (d) to the special regulations for the park that allows equestrian use on the approximately 5.4-mile Houchin Ferry North/Ollie Road.

Compliance With NPS Bicycle Regulations

The EA constitutes the planning document and evaluates the criteria required by the NPS's general bicycle regulations at 36 CFR 4.30. Under the selected action in the FONSI, the NPS will allow bicycle use on approximately 37 miles of multi-use trails in the park. The EA evaluates the suitability of each trail surface and soil conditions for accommodating bicycle use, and life cycle maintenance costs, safety considerations, methods to prevent or minimize user conflict, and methods to protect natural and cultural resources and mitigate impacts associated with bicycle use.

The final trail alignments shown on the maps in the EA are based on field surveys and geographic information system (GIS) analysis. The new trail alignments have been determined at the corridor level, defined as a 60-foot-wide corridor within which the new trail would be constructed. Final trail alignments will be determined on the ground upon implementation and in consultation with park natural and cultural resources specialists, which could result in minor adjustments to the trail locations shown on the maps. If a need existed to align a trail outside of the identified corridor, the amended alignment would undergo additional review to avoid or minimize impacts on sensitive resources, and the change would be documented as an amendment to the trails management plan.

The superintendent of the park signed a written determination that bicycle use on all of the trails identified in this rule and certain administrative roads that will be open to bicycle use under the selected action in the FONSI, is consistent with the protection of the park's natural, scenic, and aesthetic values; safety considerations; management objectives; and will not disturb wildlife or park resources, as required by 36 CFR 4.30. The NPS made the written determination available on the park's planning website and accepted comments on the written determination during the public comment period for the proposed rule. The Regional Director approved the written determination on August 26, 2026. The written determination is available at the URL listed in the **ADDRESSES** section.

Summary of Public Comments

The NPS published a proposed rule in the **Federal Register** on February 9, 2026 (91 FR 5700). The NPS accepted public comments for 60 days via the mail, hand delivery, and the Federal eRulemaking Portal at *https://www.regulations.gov.* Comments were accepted through April 10, 2026. The NPS received approximately 150 comments on the proposed rule. Overall, commenters broadly supported expanding recreation opportunities but stressed that effective communication, monitoring, and adaptive management will be essential to protect park resources and ensure safe, enjoyable multi-use trail experiences. Several commenters addressed potential environmental impacts of expanding bicycle use on the trail system, including impacts on soils and erosion, the aquatic ecosystem, plant communities, and park wildlife. These comments are not addressed in this final rule because they raise environmental issues that the NPS considered in the EA and FONSI. The NPS evaluated the environmental impacts of the no-action and preferred alternatives in the EA and explained the reasons for selecting the preferred alternative in the FONSI. The NPS did not identify any new significant environmental issues in the public comments on the proposed rule. After considering public comments and additional review of the proposed rule, the NPS is finalizing the proposed rule without change. A summary of the pertinent issues raised by commenters and NPS responses are provided below:

1. Comment: Some commenters stated that allowing horses on a shared-use road creates safety risks because horses may react unpredictably to bicycles or vehicles.

NPS Response: Houchin Ferry Road North experiences very low levels of use which should mitigate the potential for conflicts among vehicles, horseback riders, hikers, and bicyclists. As described in Appendix A of the EA, the NPS employs a monitoring program to track conditions related to visitor experiences, including reports of user conflicts. Monitoring helps assess progress toward desired conditions within the park, such as ensuring that:

- visitors can confidently choose appropriate recreational opportunities,
- conflicts among user groups are minimized, and
- signage and trail markings provide accurate, reliable information.

If monitoring indicates that conditions are trending away from these desired outcomes, the NPS would manage visitor concerns by implementing management strategies listed in Appendix A of the EA, such as providing appropriate trip-planning information to visitors based on

motivation and separating use types further.

2. Comment: One commenter expressed concern that transporting horses requires large pickup trucks and trailers (often 25 to 55 feet long) which would necessitate more paved parking and turnaround areas. The commenter stated that during busy periods insufficient parking could lead to parking along road shoulders, which would contribute to soil erosion and create additional traffic hazards.

NPS Response: As part of the selected alternative in the EA, both the McCoy Hollow and Wildcat Hollow parking areas will be improved to support horse-trailer use. These improvements are designed to enhance maneuverability and safe trailer parking without expanding the footprint beyond what is consistent with desired conditions and resource-protection goals. In addition to physical improvements, the NPS may implement several management strategies if monitoring indicates that parking demand is approaching or exceeding established thresholds. One such strategy is to enforce parking lot capacity limits and prevent overflow parking, including shoulder parking, to avoid soil erosion and maintain roadway safety.

3. Comment: Some commenters questioned who would be responsible for cleaning up manure from equestrian use on the road.

NPS Response: The NPS does not have sufficient staff and equipment to collect excrement on trails and roads where horseback riding is allowed. The Superintendent's Compendium for the park states that—at trailheads—manure spilled from the trailering unit and any fresh excrement must be placed in the trailering unit. This requirement will be applied to equestrian use on the Houchin Ferry North/Ollie Road to help prevent the introduction of exotic plant seeds into the park and to promote visitor enjoyment of park resources.

4. Comment: Some commenters opposed constructing new multi-use trails, citing potential impacts on the natural environment and recommending that the NPS focus on maintaining existing trails instead. Others supported creating more pedestrian-only trails due to safety concerns associated with shared-use routes. Several commenters encouraged the NPS to construct purpose-built mountain bike trails rather than additional multi-use trails, while others suggested that equestrian and bicycle use is incompatible and should occur on separate trails.

NPS Response: The NPS appreciates the range of views on shared use of trail networks within the park. The purpose of the EA was to improve the sustainability of the above-ground trail system, protect natural and cultural resources, and enhance the diversity and quality of visitor experiences. The selected alternative addresses longstanding issues such as inconsistent trail design standards, erosion, trail widening, and visitor-use conflicts and will serve as the guiding framework for trail development, maintenance, and visitor-use management over the long term. Under the selected alternative, the overall mileage of designated trails available for public use in the park would increase substantially. Many existing trails at the park follow old roadbeds or utility corridors that were never designed for recreational use. As a result, they often experience recurring erosion, poor drainage, widening, braiding, and safety issues that cannot be effectively corrected through routine maintenance alone.

A combination of new trails, improvements to degraded existing routes, decommissioning of unsustainable trails, and rehabilitation of visitor-created paths, will allow for greater resource stewardship as the trail system becomes more sustainable overall.

The NPS did not analyze an alternative that would include construction of purpose-built mountain bike trails. The preferred alternative focused on improving and managing a shared-use trail system consistent with the EA's purpose and need. A key element of the selected alternative is the development of shared-use trails designed to safely accommodate multiple user groups—hikers, bicyclists, and in some areas, equestrians. Because these trails must safely serve different types of users, they will be constructed using shared-use design principles rather than incorporating many of the specialized features typical of purpose-built mountain bike trails, such as tight berms, rollers, jumps, or flow-specific technical elements that are not safe or sustainable for hikers or equestrians.

The selected alternative will provide multiple recreational opportunities while applying trail-by-trail decisions to separate uses where safety concerns, resource sensitivities, or known user conflicts warrant it. For example, the selected alternative includes decommissioning the Maple Springs Connector due to documented conflicts between bicycle and equestrian use. Some trails will remain pedestrian-only where terrain or resource conditions make multi-use unsustainable, and equestrian use will remain north of the Green River to protect the park's highly sensitive cave and karst resources concentrated beneath the landscape to the south.

5. *Comment:* Several commenters supported allowing e-bikes on trails open to traditional bicycles, while others raised concerns about potential visitor-safety issues and resource impacts from e-bike use. One commenter stated that e-bikes belong on roads rather than trails. One organization noted that prohibiting e-bikes could hinder economic opportunity and exclude an entire user group.

NPS Response: Under existing regulations, the Superintendent has discretion to allow e-bikes in locations where traditional bicycles are allowed, including on roads or trails. 36 CFR 4.30(i). Among other policy requirements for visitor activities, the Superintedent may allow e-bikes only when doing so will not impede attainment of desired conditions for resource protection or create an unsafe environment for visitors. NPS Management Policies 2006, Section 8.1.1. Since 2021, e-bikes have been allowed on park roads and on trails where traditional bicycles are allowed. The use of e-bikes is subject to the same requirements that apply to the use of traditional bicycles, including requirements to obey traffic control devices, travel no faster than 15 mph, yield the right of way to horses and pedestrians, and avoid travel abreast of another bicycle. After trail construction, the Superintendent will have discretion to allow e-bikes on the new trails, subject to the same policy considerations that apply to all visitor activities. Successful management of visitor use relies on monitoring and informed decision-making. The NPS will use information it gains to manage the use of e-bikes and all other visitor activities to avoid unacceptable impacts to resources and visitors. The NPS will adjust indicators and thresholds for adaptive management as needed, with opportunities for stakeholder engagement when appropriate.

6. Comment: One commenter observed that, although the rule would increase the total mileage of trails eligible for bicycle use, the Superintendent must designate such trails for bicycle use before they can be used. The commenter recommended that bicycles be allowed on at least 19 miles of trails without the need for designation by the Superintendent and not subject to any closures and restrictions.

NPS Response: Establishing a fixed minimum mileage would limit the Superintendent's ability to manage trail access based on current conditions and

informed decision-making for visitor and resource protection. Consistent with the selected alternative, the NPS intends to allow bicycles on the 37-mile trail network identified for bicycle use, subject to closures and restrictions that may become necessary to protect public health and safety, natural and cultural resources, and to meet other management activities and considerations. Some trails have not been constructed and therefore will need to be designated later in time. Allowing the Superintendent to adaptively manage bicycle use is necessary to implement the selected alternative, which requires monitoring and establishes indicators and thresholds for managing visitor use to avoid unacceptable impacts.

7. Comment: Some commenters emphasized the importance of clear, consistent signage and visitor education to reduce safety conflicts on multi-use trails, including right-of-way information for hikers, cyclists, and equestrians, and guidance for safely navigating trailheads and horse-trailer areas. Many supported additional measures such as speed limits for bicycles, trail-etiquette education, and clear communication of rules, seasonal closures, and user responsibilities.

NPS Response: As stated above, bicycles and e-bikes are subject to 15 mph speed limits on all roads and trails, and the NPS intends to upgrade parking areas to support horse trailers at trailheads and at the start of the Houchin Ferry North/Ollie Road. The selected alternative includes improvements to ensure clear, consistent trail information and to enhance safety for all users. Trail names will be formally designated and used consistently on signs, maps, and other visitor materials to improve wayfinding and create a stronger sense of place. Trailheads will feature standardized signs that clearly describe trail type, allowed uses (hiking, biking, equestrian), difficulty, distance, estimated time, accessibility information, and maps, with additional wayfinding available through on-trail markers or QR codes linking to digital resources. To reduce safety conflicts on shared-use trails, the park will expand education about proper trail etiquette—such as cyclists yielding to pedestrians and pedestrians yielding to horses—and reinforce Leave No Trace principles.

Compliance With Other Laws, Executive Orders and Department Policy

Regulatory Planning and Review (E.O.s 12866 and 14192)

This rule has been determined to be not significant for purposes of E.O. 12866. This rule is a ''one-time'' enabling regulation that will authorize the Superintendent to expand consumption options for the American public by increasing opportunities for access and recreation at the park. As a result, this rule qualifies as an E.O. 14192 deregulatory action pursuant to M–25–20, ''Guidance Implementing Section 3 of Executive Order 14192, Titled 'Unleashing Prosperity Through Deregulation''' issued by the Office of Management and Budget, Office of Information and Regulatory Affairs, on March 26, 2025.

Regulatory Flexibility Act (RFA)

This rule will not have a significant economic effect on a substantial number of small entities under the RFA (5 U.S.C. 601 *et seq.*). No small entities will be directly regulated by this rule, which will allow bicycle use on approximately 37 miles of multi-use trails throughout the park and allow visitors to ride horses on the 5.4-mile Houchin Ferry North/Ollie Road. This action will not impose restrictions on local businesses in the form of fees, training, record keeping, or other measures that will increase costs. Rather, this action could lead to a slight increase in park visitation and thereby generate benefits for businesses, including small entities, through increased visitor spending. Therefore, the NPS certifies that this rule will not have a significant economic impact on a substantial number of small business entities.

Congressional Review Act

This rule is not a major rule under 5 U.S.C. 804(2). This rule:

(a) Will not have an annual effect on the economy of $100 million or more.

(b) Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.

(c) Will not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

Unfunded Mandates Reform Act

This rule will not impose an unfunded mandate on State, local, or Tribal governments or the private sector of more than $100 million per year. This rule will not have a significant or unique effect on State, local or Tribal governments, or the private sector. It addresses public use of national park lands and imposes no requirements on other agencies or governments. A statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et seq.*) is not required.

Takings (E.O. 12630)

This rule will not effect a taking of private property or otherwise have takings implications under E.O. 12630. A takings implication assessment is not required.

Federalism (E.O. 13132)

Under the criteria in section 1 of E.O. 13132, this rule will not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement. This rule will only affect use of federally administered lands and waters. It will have no direct effects on other areas. A federalism summary impact statement is not required.

Civil Justice Reform (E.O. 12988)

This rule complies with the requirements of E.O. 12988. This rule:

(a) Meets the criteria of section 3(a) requiring that all regulations be reviewed to eliminate errors and ambiguity and be written to minimize litigation; and

(b) Meets the criteria of section 3(b)(2) requiring that all regulations be written in clear language and contain clear legal standards.

Consultation With Indian Tribes (E.O. 13175 and Department Policy)

The Department of the Interior strives to strengthen its government-to-government relationship with Indian Tribes through a commitment to consultation with Indian Tribes and recognition of their right to self-governance and sovereignty. The NPS has evaluated this rule under the criteria in E.O. 13175 and under the Department's Tribal consultation policy. As a result, the NPS determined that Tribal consultation is not required because this rule will have no substantial direct effect on federally recognized Indian Tribes.

Nevertheless, in support of the Department of the Interior's and the NPS's commitment to government-to-government consultation, the NPS initiated Tribal consultation for the EA on April 30, 2024, by sending letters to the following Native American Tribes affiliated with lands and waters within

the park and inviting consultation: Absentee Shawnee Tribe (Absentee-Shawnee Tribe of Indians of Oklahoma); The Chickasaw Nation; Cherokee Nation; Eastern Band of Cherokee Indians; Eastern Shawnee Tribe of Oklahoma; The Osage Nation; Shawnee Tribe; and United Keetoowah Band of Cherokee Indians in Oklahoma.

Additionally, the NPS developed a phased programmatic agreement to guide the treatment of cultural resources in the different project areas identified in the EA. The NPS invited each of these Tribes to sign on to the phased programmatic agreement. None chose to do so. The Cherokee Nation responded that they would consult with the NPS when there are defined undertakings for any project involving ground disturbance. No other Tribal responses were received.

Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.)

This rule contains no new information collections. All information collections require approval under the Paperwork Reduction Act of 1995 (PRA; 44 U.S.C. 3501 *et seq.*). The NPS may not conduct or sponsor, and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 et seq.)

The NPS prepared the EA to determine whether this rule would have a significant impact on the quality of the human environment under NEPA. This rule does not constitute a major Federal action significantly affecting the quality of the human environment. A detailed statement under NEPA is not required because the EA resulted in FONSI. A copy of the EA and FONSI are available online at the like provided in the **ADDRESSES** section.

Effects on the Energy Supply (E.O. 13211)

This rule is not a significant energy action under the definition in E.O. 13211. The Office of Information and Regulatory Affairs (OIRA) determined this rule is not significant under E.O. 12866. Consequently, this rule does not meet the first criteria of a significant energy action. Also, the OIRA Administrator has not otherwise designated this rule as a significant energy action. A statement of energy effects in not required.

List of Subjects in 36 CFR Part 7

National parks, Reporting and recordkeeping requirements.

In consideration of the foregoing, the National Park Service amends 36 CFR part 7 as set forth below:

PART 7—SPECIAL REGULATIONS, AREAS OF THE NATIONAL PARK SYSTEM

■ 1. The authority citation for part 7 continues to read as follows:

Authority: 54 U.S.C. 100101, 100751, 320102; Sec. 7.96 also issued under D.C. Code 10–137 and D.C. Code 50–2201.07.

■ 2. In § 7.36:

■ a. Revise paragraph (c) heading and paragraph (c)(1); and

■ b. Add paragraph (d).

The revisions and addition read as follows:

§ 7.36 Mammoth Cave National Park.

* * * * *

(c) *Bicycle use.* (1) The Superintendent may designate all or a portion of the following trails as open to bicycle use. A map showing trails open to bicycle use will be available at the park visitor center and posted on the park website, and all trails or portions of trails designated for bicycle use will be published in the Superintendent's Compendium (or written compilation) of discretionary actions referred to § 1.7(b) of this chapter.

(i) Big Hollow North (approximately 5.0 miles);

(ii) Big Hollow North Shortcut (approximately 0.1 miles);

(iii) Big Hollow South (approximately 3.7 miles);

(iv) Brooks Knob Road Cemetery Trail (approximately 0.4 miles);

(v) Brooks Knob Road Trail (up to gate) (approximately 0.2 miles);

(vi) Crystal Cave Road Trail (approximately 0.1 miles);

(vii) East Entrance Trail (approximately 2.8 miles);

(viii) Little Hope Cemetery Trail (approximately 0.1 miles);

(ix) Mammoth Cave Railroad Bike & Hike Trail (approximately 9.3 miles);

(x) Sugar Sink Connector (approximately 0.2. miles);

(xi) Sugar Sink Trail (approximately 3.8 miles); and

(xii) West Entrance (approximately 11.2 miles).

* * * * *

(d) *Horses.* Equestrian use is allowed on Houchin Ferry North/Ollie Road (approximately 5.4 miles).

Kevin J. Lilly,

Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 2026–23563 Filed 11–18–26; 8:45 am]

BILLING CODE 4312–52–P

POSTAL SERVICE

39 CFR Part 111

Domestic Competitive Products Pricing and Mailing Standards Changes

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The Postal Service is amending *Mailing Standards of the United States Postal Service,* Domestic Mail Manual (DMM®), to reflect changes to prices and certain mailing standards changes scheduled for competitive products.

DATES: *Effective Date:* January 17, 2027.

FOR FURTHER INFORMATION CONTACT: Catherine Knox (202) 268–5636, Heather Lewis, (703) 659–3812, or Garry Rodriguez at (202) 268–7281.

SUPPLEMENTARY INFORMATION: This final rule describes new prices and product features for competitive products, by class of mail, established by the Governors of the United States Postal Service®. New prices are available under Docket Number CP2027–1 on the Postal Regulatory Commission (PRC) website at *http://www.prc.gov,* and on the Postal Explorer® website at *http://pe.usps.com.*

The Postal Service will revise *Mailing Standards of the United States Postal Service,* Domestic Mail Manual (DMM), to reflect changes to certain prices and mailing standards for the following competitive products:

- Priority Mail Express®.
- Priority Mail®.
- USPS Ground Advantage®.
- Parcel Select®.
- Extra Services.
- Mailer Services.
- Recipient Services.
- Other.

Competitive product prices and changes are identified by product as follows:

Priority Mail Express

Prices

Overall, Priority Mail Express prices will increase 5.9 percent. Priority Mail Express will continue to offer zone and Flat Rate pricing.

Retail prices will increase an average of 5.9 percent. The Flat Rate Envelope price will increase to $34.90, the Legal Flat Rate Envelope will increase to $35.20, and the Padded Flat Rate Envelope will increase to $35.85.

Commercial Base prices will increase an average of 5.9 percent.

Priority Mail

Prices

Overall, Priority Mail prices will increase 5.9 percent. Priority Mail will continue to offer zoned and Flat Rate, Retail and Commercial pricing.

Retail prices will increase an average of 5.9 percent. The Flat Rate Envelope price will increase to $12.65, the Legal Flat Rate Envelope will increase to $12.95, and the Padded Flat Rate Envelope will increase to $13.70. The Small Flat Rate Box price will increase to $13.40, and the Medium Flat Rate Boxes will increase to $24.30. The Large Flat Rate Box will increase to $33.35, and the APO/FPO/DPO Large Flat Rate Box will increase to $32.00.

Commercial prices will increase an average of 5.9 percent.

USPS Ground Advantage

Prices

Overall, USPS Ground Advantage prices will increase 5.9 percent.

USPS Ground Advantage—Retail prices will increase 5.9 percent.

USPS Ground Advantage—Commercial prices will increase 5.9 percent.

Parcel Select

Prices

The prices for Parcel Select Destination Entry will increase an average of 5.9 percent.

The prices for USPS Connect® Local will increase 6.0 percent.

Extra Services

Adult Signature Service

Adult Signature Required and Adult Signature Restricted Delivery service prices will increase 8.2 percent and 8.0 percent, respectively.

Mailer Services

Pickup on Demand Service

The Pickup on Demand® service fee will increase 7.9 percent.

USPS Tracking Plus Service

The USPS Tracking Plus® service prices will increase 8.0 percent.

USPS Label Delivery Service

The USPS Label Delivery Service™ prices will increase 9.1 percent.

USPS Delivered Duty Paid (DDP) Service

The USPS Delivered Duty Paid (DDP) Service prices will remain the same.

Recipient Services

Post Office Box Service

The competitive Post Office Box™ service prices will remain the same.

Premium Forwarding Service

Premium Forwarding Service® (PFS®) prices will increase an average of 6.8 percent.

Premium Forwarding Service Redesign

The Postal Service is redesigning Premium Forwarding Service (PFS) under a multi-phase plan. In Phase 1, the Postal Service is redesigning PFS as follows:

a. PFS Residential will be revised as follows:

1. The online enrollment fee is revised to be paid annually in full.

2. The Postal Service is adding Priority Mail Express as an option for customer reshipments of mail.

b. PFS Commercial will be revised as follows:

1. The shipment frequency is changed to daily, weekly, and monthly.

2. The Postal Service is implementing a PFS Sack Rehandling Fee, in addition to postage for shipments sent in sacks.

c. The Postal Service is revising PFS Residential and PFS Commercial to add an opt-in automatic renewal feature.

d. The Postal Service is simplifying the hazardous materials text under PFS Residential and PFS Local that prohibits their inclusion in shipments and is adding this text prohibiting hazardous materials in PFS Commercial shipments for consistency.

USPS Package Intercept Service

The USPS Package Intercept® fee will increase 8.0 percent.

USPS Package Intercept Service With Hazardous Materials and Perishables

The Postal Service is revising the DMM to also allow USPS Ground Advantage mailpieces containing eligible hazardous materials to be intercepted by removing it from the items listed as not eligible. The DMM will also be revised to clarify that mailpieces containing perishable matter are not eligible to be intercepted.

Other

Address Enhancement Service

Address Enhancement Service competitive product prices will increase 20 percent.

Package Quality Noncompliance Fee

The Package Quality Noncompliance Fee will remain the same.

Nonstandard Fees

Nonstandard Fees will increase an average of 16 percent.

Dimension Noncompliance Fee

The Dimension Noncompliance Fee will remain at $3.00.

Dimension Noncompliance Fee Renamed and Revised

On July 12, 2026, the Postal Service implemented the first phase of the Dimension Noncompliance fee requiring mailers to accurately report all parcel dimensions in a manifest. The Postal Service is implementing the second phase of this initiative. The second phase will consist of the following:

a. The Postal Service is removing accuracy as an element of the fee.

b. The Postal Service is adding weight as an element of the fee.

c. As a result of the addition of weight, the Postal Service is renaming the fee Dimension and Weight Noncompliance Fee.

d. The Postal Service is commencing to charge the Dimension and Weight Noncompliance Fee for omitting all dimensions, weight, or ESC, in the manifest.

Fuel Surcharge

The Postal Service is implementing a Fuel Surcharge. The Fuel Surcharge will be assessed on all retail and commercial priced Priority Mail Express, Priority Mail, and USPS Ground Advantage pieces, including USPS Returns, and Parcel Select pieces (except for USPS Connect Local).

In its initial phase, the Fuel Surcharge will be set at 11 percent across applicable products and must be calculated as a percentage of the base postage price of each product. In the future, the Fuel Surcharge is intended to be dynamic and self-adjusting based on relevant fuel prices. The data used to create the Fuel Surcharge will be leveraged from the U.S. Energy Information Administration website available at *eia.gov.* The ground products (USPS Ground Advantage and Parcel Select) surcharge will be based on National U.S. Average On-Highway Diesel Fuel (EPD2D) and the air products (Priority Mail Express and Priority Mail) surcharge will be based on U.S. Gulf Coast Kerosene-type Jet Fuel prices (EPJK). As such, the structure for a dynamic Fuel Surcharge is being implemented now with a fixed 11 percent surcharge across all fuel prices, with the intent that such percentages will likely be adjusted and varied in future proceedings.

The surcharge will be posted on the Postal Explorer website at *pe.usps.com,*

no later than Thursday for use on the second Sunday (10-days) following the posting by product, based on the prices of diesel and jet fuel, as described on the *eia.gov* website.

For additional information see **USPS.COM** and Publication 199, *Intelligent Mail Package Barcode (IMpb) Implementation Guide for Confirmation Services and Electronic Payment Systems,* available on the PostalPro website at *postalpro.usps.com.*

Shipping Label Noncompliance Fee

The Postal Service is implementing a Shipping Label Noncompliance Fee of $5.00. A mailpiece will be considered noncompliant when mail processing equipment detects a label with an incorrect Intelligent Mail® package barcode (IMpb®) symbology or incorrect barcode construct (content within the barcode).

This fee will be assessed on each noncompliant domestic commercial Priority Mail Express, Priority Mail, USPS Ground Advantage, and Parcel Select mailpiece, including USPS Returns (Priority Mail Express Return, Priority Mail Return, and USPS Ground Advantage Return).

Insufficient Postage (Shortpaid) and Overpaid Postage Standards for USPS Ship, APV, and PC Postage

The Postal Service is establishing standards for pieces that have insufficient postage (shortpaid) and for the refund of postage on overpaid pieces, manifested through USPS Ship, captured through the Automated Package Verification (APV) program, or with postage paid using PC Postage. The standards set forth below for insufficient postage and overpaid pieces will apply to commercial Priority Mail Express, Priority Mail, USPS Ground Advantage and Parcel Select.

The Postal Service is revising DMM section 604.8.0, *Insufficient or Omitted Postage,* to add new subsection 8.1.12 to provide the standards for the collection of postage due on pieces detected by USPS Ship or the APV program with insufficient postage. Mailers will be liable for the total amount of postage due. The Postal Service is implementing a ''Repricing Fee'' of 20 percent of the postage due on each piece detected by USPS Ship and the APV program with insufficient postage. The total postage due (insufficient postage amount plus repricing fee) will be deducted from the mailer's account.

Additionally, the Postal Service is revising DMM section 604.9.0, *Exchanges and Refunds,* to add a new subsection 9.7 to provide the standards for the refund of postage on eligible pieces mailed through USPS Ship or with PC Postage. Mailers will be required to request a refund for overpaid pieces. Refund requests for overpaid pieces will be subject to a $5.00 threshold (only refund requests for more than $5.00 will be eligible for a refund). The Postal Service is implementing a ''Repricing Fee'' of 20 percent on each piece that is eligible for a refund. Mailers will be required to apply for a refund under DMM 9.2.5, *Applying for Refund,* within the time limits provided in DMM Exhibit 604.9.2.1, *Postage and Fees Refunds,* and receive payment as provided under DMM 9.2.6, *Refund Payment.*

Overweight and Oversize Items Fee

The overweight and oversize items fee will increase 100 percent, from $200 to $400.

Resources

The Postal Service provides additional resources to assist customers with this price change for competitive products. These tools include price lists, downloadable price files, and **Federal Register** Notices, which may be found on the Postal Explorer® website at *http://pe.usps.com.*

The Postal Service adopts the described changes to *Mailing Standards of the United States Postal Service,* Domestic Mail Manual (DMM), incorporated by reference in the *Code of Federal Regulations.* We will publish an appropriate amendment to 39 CFR part 111 to reflect these changes.

List of Subjects in 39 CFR Part 111

Administrative practice and procedure, Postal Service.

Accordingly, the Postal Service amends *Mailing Standards of the United States Postal Service,* Domestic Mail Manual (DMM), incorporated by reference in the Code of Federal Regulations as follows (*see* 39 CFR 111.1):

PART 111—INCORPORATION BY REFERENCE; MAILING STANDARDS OF THE UNITED STATES POSTAL SERVICE, DOMESTIC MAIL MANUAL

■ 1. The authority citation for 39 CFR Part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 13 U.S.C. 301–307; 18 U.S.C. 1692–1737; 39 U.S.C. 101, 401–404, 414, 416, 3001–3018, 3201–3220, 3401–3406, 3621, 3622, 3626, 3629, 3631–3633, 3641, 3681–3685, and 5001.

■ 2. Revise *Mailing Standards of the United States Postal Service,* Domestic Mail Manual (DMM) as follows:

7.0 Premium Forwarding Services

* * * * *

7.2 Premium Forwarding Service Residential

7.2.1 Description

[Revise the text of 7.2.1 to read as follows:]

Premium Forwarding Service Residential (PFS-Residential) provides certain residential customers (see 7.2.4), an option to have all mail addressed to their primary address shipped to a temporary address by a weekly Priority Mail Express or Priority Mail shipment. Service is available for a period of not less than 2 weeks and not more than 1 year. This optional service is separate from the forwarding service offered in 507.2.0. Customers must pay a nonrefundable enrollment fee and a weekly charge for each Priority Mail Express or Priority Mail shipment for each week of service requested as provided under 7.2.4.

* * * * *

7.2.4 Use

Participation in PFS-Residential is subject to the following additional standards:

[Revise the text of item a by adding a new last sentence to read as follows:]

a. * * * The annual online enrollment fee and amount due for the total weeks requested must be paid in full. (See Notice 123—Price List.)

[Revise the text of item b to read as follows:]

b. Service is available to eligible residential street delivery (not P.O. Box delivery) customers who submit an application online at *www.usps.com/manage/forward.htm.* Customers must pay an annual enrollment fee in full and weekly shipment charges as services are rendered, by credit card. Customers may also opt in to the automatic renewal option. Modification or cancellation of the service can only be made online when the initial request was completed online.

* * * * *

7.2.6 Weekly Priority Mail Shipments

[Revise the introductory text of 7.2.6 to read as follows:]

Premium Forwarding Service Residential shipments are dispatched weekly (on Wednesday) as Priority Mail Express or Priority Mail with USPS Tracking service. Regardless of any mailer's ancillary service endorsement on a mailpiece, and provided it fits within the shipment container, all mail

is included in the weekly Priority Mail Express or Priority Mail shipment, except as follows:

[*Revise the text of item a to read as follows:]*

a. Any mailpiece arriving at the primary address that indicates hazardous materials markings is not included in the weekly Priority Mail Express or Priority Mail shipment and must be rerouted separately via surface transportation.

* * * * *

[Revise the text of item c to read as follows:]

c. Priority Mail Express or Priority Mail is not included in the shipment if such inclusion may delay its delivery to the temporary address.

[Revise the introductory text of item d to read as follows:]

d. Any mailpiece arriving postage due at the Post Office serving a customer's primary address is not included in the weekly Priority Mail Express or Priority Mail shipment and will be rerouted separately as follows:

* * * * *

7.3 Premium Forwarding Service Commercial

* * * * *

7.3.2 Activation

[Revise the second sentence of 7.3.2 to read as follows:]

* * * Customers must specify the business P.O. Boxes (or Caller Service) or business street delivery addresses, destination address, and frequency. * * *

7.3.3 Conditions

Only the authorized recipient (or legal agent) of the business' (or organization's) mail may activate the request for PFS-Commercial service. PFS-Commercial service is subject to these conditions:

[Revise the text of 7.3.3a by adding a new second sentence to read as follows:]

a. * * * Customers may also opt in to the automatic renewal option. * * *

* * * * *

[Revise the introductory text of item c to read as follows:]

c, The postage is charged by frequency (daily, weekly, monthly) per shipment container as follows:

[Revise the text of item c1 to read as follows:]

1. A sack and its contents are considered one piece for calculating the postage price and must not exceed 70 pounds. Postage is calculated by the weight of the sack and the zone, based on the ZIP Code of the servicing Post Office and the delivery address for the shipment, minus the tare weight. Shipments in sacks are also subject to the PFS Sack Rehandling Fee (see Notice 123—Price List).

* * * * *

[Revise the text of item d to read as follows:]

d. If no mail is collected for a shipment on a designated frequency, no postage is charged.

* * * * *

[Revise the text of 7.3.3 by adding a new item k to read as follows:]

k. Any mailpiece addressed to business P.O. Boxes (including Caller Service) or business street addresses that indicates hazardous materials markings is not included in the Priority Mail Express or Priority Mail shipment and must be rerouted separately via surface transportation.

* * * * *

7.4 Premium Forwarding Service Local

* * * * *

7.4.3 Conditions

Only the residential/individual use P.O. Box customer or authorized recipient (or legal agent) of a business' (or organization's) P.O. Box mail that is on file may activate the request for PFS-Local service. PFS-Local service is subject to these conditions:

* * * * *

[*Revise the text of item g to read as follows:*]

g. Any mailpiece indicating hazardous materials markings is not included in the Priority Mail Express or Priority Mail reshipment and a delivery notice will be provided in the PFS-Local reshipment.

* * * * *

600 Basic Standards for All Mailing Services

601 Mailability

1.0 General Standards

* * * * *

1.2 Overweight Items or Oversize Items

* * * * *

1.2.3 Fee

[*Revise the text of 1.2.3 to read as follows:*]

Except for overweight or oversize items discovered during a retail transaction and returned to the mailer, mailers of retail and commercial paid overweight or oversize items reported in a manifest or found in the Postal Service network will be assessed the overweight- or oversize-items fee of $400. When applicable, the fee must be paid before the Postal Service will release the item to the mailer or addressee. The $400 overweight- or oversize-item fee may be paid by any authorized retail payment method or through USPS Ship.

* * * * *

604 Postage Payment Methods and Refunds

* * * * *

8.0 Insufficient or Omitted Postage

8.1 Insufficient Postage

8.1.1 Definition

[*Revise the first sentence of 8.1.1 to read as follows:*]

Except under 8.1.12, mail of any class, including mail indicating extra services (except Priority Mail Express, Registered Mail, and nonmachinable First-Class Mail), that is received at either the office of mailing or office of address without enough postage is marked to show the total (rounded off) deficiency of postage and fees. * * *

* * * * *

[*Revise 8.1 by adding new 8.1.12 to read as follows:*]

8.1.12 Insufficient Postage (Shortpaid) USPS Ship and APV

Commercial Priority Mail Express, Priority Mail, USPS Ground Advantage and Parcel Select detected to have insufficient postage (shortpaid) by USPS Ship or the APV program will be assessed the total postage due. Pieces detected to have insufficient postage will be subject to a 20 percent ''Repricing Fee'' on the insufficient postage due per piece. The total postage due (insufficient postage amount plus repricing fee) will be deducted from the mailer's account.

* * * * *

9.0 Exchanges and Refunds

* * * * *

9.2 Postage and Fee Refunds

* * * * *

9.2.3 Full Refund

[*Revise the introductory text of 9.2.3 to read as follows:*]

Except under 9.7, a full refund (100 percent) may be made when:

* * * * *

[*Add new 9.7 to read as follows:*]

9.7 USPS Ship or PC Postage Refunds

A refund of postage on overpaid parcels manifested using USPS Ship or paid with PC Postage will be paid on commercial Priority Mail Express,

Priority Mail, USPS Ground Advantage and Parcel Select pieces as follows:

a. A threshold for the refund of postage on eligible overpaid parcels manifested using USPS Ship or paid with PC Postage will be $5.00 (Mailers may only request a refund if the postage overpaid exceeds $5.00).

b. A Repricing Fee of 20 percent will be assessed against the refund for each parcel that exceeds the $5.00 threshold in 9.7a.

c. Customers must apply for a refund under 9.2.5, within the time limits provided in Exhibit 9.2.1, and receive payment as provided under 9.2.6.

BILLING CODE P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2024–0627; FRL–12536–03–R9]

Air Plan Revisions; California; San Joaquin Valley Unified Air Pollution Control District; New Source Review; Stationary Source Permits

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is finalizing a limited approval and limited disapproval of three permitting rules as a revision to the San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD or ''District'') portion of the California State Implementation Plan (SIP). These are revisions to the District's New Source Review (NSR) air permitting program rules for new and modified sources of air pollution under Clean Air Act (CAA or ''Act'') section 110(a)(2)(C) and part D of title I.

DATES: This rule is effective on December 21, 2026.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R09–OAR–2024–0627 at *https://www.regulations.gov.* All documents in the docket are listed on the *https://www.regulations.gov website.* Although listed in the index, some information is not publicly available, *e.g.,* Confidential Business Information (CBI) or other information the disclosure of which is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through *https://www.regulations.gov,* or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. If you need assistance in a language other than English or if you are a person with a disability who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Nidia K. Trejo, EPA Region IX, 75 Hawthorne St., San Francisco, CA 94105; by phone: (415) 972–3968; or by email to *trejo.nidia@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, the use of ''we,'' ''us,'' and ''our'' is intended to refer to the EPA. We use multiple abbreviations and terms in this final rule. While this list may not be exhaustive, for ease of reading and for reference purposes, the EPA defines the following terms and acronyms here:

ASTM American Society for Testing and Materials
CAA Clean Air Act
CARB California Air Resources Board
CBI confidential business information
IFD Interim Final Determination
FIP Federal Implementation Plan
NSR New Source Review
NNSR Nonattainment New Source Review
PM2.5 PM less than 2.5 μm in diameter
SIP State Implementation Plan
SJVUAPCD San Joaquin Valley Unified Air Pollution Control District
TSD Technical Support Document
VOC Volatile organic compound

Table of Contents

I. Executive Summary

B. What is the legal authority and what are the requirements?
II. Background of the Proposed Action and Interim Final Determination To Defer Sanctions
III. Public Comments and EPA Responses
IV. EPA Action
V. Incorporation by Reference
VI. Statutory and Executive Order Reviews

I. Executive Summary

A. What action is the EPA taking?

The Environmental Protection Agency (EPA) is finalizing a limited approval and limited disapproval of three permitting rules submitted by the San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD or ''District'') as a revision to the California SIP. The submitted rules address the District's New Source Review (NSR) air permitting program rules for new and modified sources of air pollution pursuant to CAA section 110(a)(2)(C) and part D of title I. This action will update the California SIP with rules that the District has revised to address deficiencies identified in a previous limited disapproval action and to incorporate other revisions related to Nonattainment New Source Review (NNSR) requirements. We proposed this action on January 21, 2025, and held a 30-day public comment period.

B. What is the legal authority and what are the requirements?

CAA sections 110(k)(3) and 301(a) provide the EPA's statutory authority for finalizing a limited approval and limited disapproval of Rules 1020, 2020, and 2201. We have evaluated the rule revisions for compliance with CAA sections 172(c)(5), 173, 182(e), and 189(b), which establish the requirements for stationary source preconstruction permitting programs, including those specifically applicable for an Extreme ozone nonattainment area and Serious $PM_{2.5}$ nonattainment area, as well as the Federal regulations applicable to stationary source permitting at 40 CFR 51.160 through 51.165. Additionally, the EPA reviewed the rules for consistency with other general CAA requirements for SIP submittals, including requirements at CAA section 110(a)(2)(A) regarding rule enforceability and requirements at CAA sections 110(l) and 193 for SIP revisions. We have also considered whether the rules meet the Federal visibility requirements related to State NNSR programs as described in 40 CFR 51.307.

II. Background of the Proposed Action and Interim Final Determination To Defer Sanctions

On January 21, 2025 (90 FR 6928), the EPA proposed a limited approval and limited disapproval of three rules submitted for approval into the California SIP. Table 1 lists the rules addressed by this proposal with the dates they were amended or revised by the District and submitted by the California Air Resources Board (CARB), the agency that serves as the governor's designee for California SIP submittals.

TABLE 1—SUBMITTED RULES

Rule No.	Rule title	Adoption/amendment date	Submitted date
1020	Definitions	4/20/2023	10/13/2023
2020	Exemptions	12/18/2014	10/13/2023
2201	New and Modified Stationary Source Review Rule	4/20/2023	10/13/2023

The October 13, 2023 submittal of these three rules was intended to resolve deficiencies identified in our July 10, 2023 final action (''2023 NSR Action''), which included a limited disapproval of a prior version of Rule 2201. In the 2023 NSR Action, specific issues included missing and deficient definitions, impermissible interprecursor trading provisions, unapprovable exemptions to offsetting and public notice provisions, among other assorted deficiencies. The EPA also identified concerns related to the ''offset equivalency tracking system'' used to ensure that the District's permitting program collected the federally-required amount of creditable emissions reductions.

In our January 21, 2025 action, we proposed to determine that the District had fully addressed the deficiencies identified in the 2023 NSR Action, but we also proposed a limited approval of the District's October 2023 submittal because we identified other aspects of the submitted rules that were not approvable. Specifically, we identified the following deficiencies:

1. Rule 1020—Definitions

The definition of VOC in Rule 1020 is deficient because it does not include an exemption for trans-1,1,1,4,4,4-hexafluorobut-2-ene (also known as HFO–1336mzz(E)). The EPA added trans-1,1,1,4,4,4-hexafluorobut-2-ene to the list of compounds 40 CFR 51.100(s)(1) that are exempted from the definition of VOC at 40 CFR 51.100(s) on February 8, 2023 (effective April 10, 2023).[1] While this compound was added to the Federal regulations nearly contemporaneously to the District's adoption of the amendments to Rule 1020 on April 10, 2023, the absence of trans-1,1,1,4,4,4-hexafluorobut-2-ene in the Rule 1020 list of exempt compounds creates a new rule deficiency. In addition, on November 12, 2024, the EPA proposed to add (Z)-1-chloro-2,3,3,3-tetrafluoropropene (also known as HCFO–1224yd(Z)) to the list of compounds exempted from the definition of VOC.[2] The District must revise the Rule 1020 definition of VOC to match the most recent Federal definition in effect at 40 CFR 51.100(s), including the exemptions listed at 40 CFR 51.100(s)(1).[3]

2. Rule 2020—Exemptions

Several American Society for Testing and Materials (ASTM) test method citations provided in Rule 2020 are deficient because they do not include the revision or reissuance date of the specific ASTM methods.

3. Rule 2201—New and Modified Stationary Source Review Rule

The term ''Emission Reduction Credit'' is used in Rule 2201, but the term is not defined in the rule or in Rule 1020, ''Definitions.'' We note that the term is defined in Rule 2301—Emission Reduction Credit Banking, but this rule has not been submitted for SIP approval. Therefore, we find Rule 2201 deficient because it does not provide a definition for the term Emission Reduction Credit, and the term is a necessary component of an approvable NNSR program.

Please see our proposed rule for more information concerning the background for this action and for a more detailed discussion of the rationale for our limited approval and limited disapproval of the submitted rules. As described in the proposed rule, the rules listed in Table 1 are intended to replace older versions of the rules currently in the SIP.

In addition, on January 21, 2025, the EPA published an Interim Final Determination (IFD) to defer the imposition of the offset and highway sanctions triggered by the limited disapproval component of the 2023 NSR Action. [4] [5] An EPA IFD to defer sanctions is an administrative action that temporarily pauses the automatic implementation of Federal penalties against a State for failing to meet specific CAA requirements.

III. Public Comments and EPA Responses

The EPA's proposed action provided a 30-day public comment period. During this period, we received three comment letters, which are included in the docket for this action. Two comment letters are from individuals; their comments are supportive and do not raise any discernable issues that are adverse to our action as proposed. The third comment letter was submitted by the Central Valley Air Quality Coalition, Committee for a Better Arvin, Committee for a Better Shafter, Delano Guardians, and the Center on Race, Poverty & the Environment (collectively, ''Environmental Organizations''). Issues raised in this comment letter are summarized with responses below.

Comment 1: The Environmental Organizations stated that the District has not corrected all deficiencies that the EPA identified in the 2023 NSR Action, and that the EPA's proposed limited approval of the revised rules and accompanying IFD deferring sanctions are therefore unlawful and arbitrary. The commenters highlighted the EPA's findings from the 2023 NSR Action that the prior version of Rule 2201 was less stringent than Federal requirements because it did not provide an equivalent amount of time-of-use surplus emissions reductions as would have been required under the Federal program and did not provide a remedy to correct the negative VOC and NO_X balances from the District's 2019–2020 and 2020–2021 Annual Offset Equivalency Reports. According to the commenters, the revised Rule 2201 does not address this deficiency because it fails to provide sufficient offsetting emissions reductions and does not correct the VOC and NO_X deficits in the offset equivalency program.

Response: We disagree with the commenters' characterizations of our proposed action. As described below, neither the 2023 NSR Action nor the present action would require the District to provide additional offsetting emissions reductions as part of an approvable SIP submittal, and our review in each case is limited to

[1] 88 FR 8226 (February 8, 2023).

[2] 89 FR 88940 (November 12, 2024).

[3] Our proposal for this action also notes the EPA's November 12, 2024 proposal to add (Z)-1-chloro-2,3,3,3-tetrafluoropropene (also known as HCFO–1224yd(Z)) to the list of compounds exempted from the definition of VOC at 40 CFR 51.100(s)(1). 89 FR 88940 (November 12, 2024). While we have not finalized the addition of this compound to the list, the District's revision of Rule 1020 should consider any final revisions to 40 CFR 51.100(s)(1).

[4] 90 FR 6809 (January 21, 2025).

[5] 88 FR 43434 (July 10, 2023).

ensuring that the submitted rules meet applicable CAA requirements.

As an initial matter, comments relating solely to the 2023 NSR Action are outside the scope of this rulemaking because this action refers to the January 21, 2025 limited approval limited disapproval proposed action, not the 2023 NSR Action. However, we wish to clarify aspects of the 2023 NSR Action's characterization of deficiencies in the previous Rule 2201 to the extent that they are relevant to the present rulemaking. As the commenters have noted, the 2023 NSR Action includes a finding that the previous Rule 2201 equivalency system did not provide a mechanism to require the District to quantify or restore VOC and NO_X negative balances from the District's 2019–2020 and 2020–2021 Annual Offset Equivalency Reports. We explained this deficiency in the proposal for that action as follows:

> [B]ecause neither remedy provides a mechanism to require the District to quantify or restore a negative balance in the equivalency system, both remedies fail to ensure full Federal offset equivalency in the event of a shortfall. Thus, even where the District adopts all offset requirements of the Federal program in response to an equivalency failure, it will retain an historic deficit relative to the Federal program, which is not made whole under the rule. Therefore, the EPA finds that the District must revise the rule to address these deficiencies.[6]

The proposal for the 2023 NSR Action also identified as deficiencies Rule 2201's failure to require sources to provide the federally-required quantity of offsets following an equivalency failure and the lack of requirements that would prevent the equivalency system from operating with a negative balance once creditable emissions reductions had been exhausted.[7]

In describing these deficiencies, we noted that ''several shortcomings in the District's equivalency system ha[d] become apparent'' following the equivalency failures shown in the 2019–2020 and 2020–2021 annual offset equivalency reports.[8] While these ''shortcomings'' were made prominent through the annual equivalency reports, the deficiencies identified in the 2023 NSR Action relate specifically to the content of the rule (and in particular, the rule's ability to address hypothetical future offset shortfalls). At the time, we noted that the ''most straight forward way'' to address the identified deficiencies would be to directly implement the Federal offset program requirements going forward.[9] We did not require the District to retroactively apply Federal offset requirements to past permitting actions or otherwise restore a negative balance in the equivalency system. As we stated in the 2023 NSR Action, there is nothing in the SIP-approved version of Rule 2201 to require this,[10] and we are similarly unaware of any other authority to require such action.

Turning to the present action, we have considered whether SJVUAPCD has fully addressed the Rule 2201 deficiencies identified in the 2023 NSR Action. As described elsewhere in this notice and in the proposal and TSD, which are included in the docket for this action, we find that it has.[11] Specifically, we find that changes to directly apply the Federal requirements to NOx and VOC and to revise the equivalency demonstration and remedies for other pollutants have sufficiently addressed the problems identified in the previous rule and will ensure equivalency with Federal requirements going forward. Importantly, contrary to the commenters' suggestion, our proposed action did not include a finding ''that the District corrected the NSR program's negative balance of VOC and NOx offsets.'' Rather, our review is limited to ensuring that the rule meets applicable Federal requirements for NSR permitting of new and modified sources, including those requirements that were the basis for our prior limited disapproval in the 2023 NSR Action.

Comment 2: The Environmental Organizations noted that several of the commenting organizations have filed a CAA citizen suit alleging violations of Rule 2201 by the District. The commenters recounted and critiqued aspects of the 2023 NSR Action and argued that that action does not affect the enforceability of or otherwise diminish Rule 2201's requirements or remedies. The commenters indicated that the EPA should not construe their comments as waiving or conceding allegations in that suit.

Response: Comments relating to the commenters' lawsuit against the District are outside the scope of this action. The EPA is not a party to the suit, and we take no position regarding the allegations or arguments raised. As noted previously, comments related solely to the 2023 NSR Action are also outside the scope of this action.

IV. EPA Action

The comments we received on our proposed action and on our interim final determination do not change our assessment of the submitted rules, as described in our proposed action. Therefore, as authorized in CAA sections 110(k)(3) and 301(a), the EPA is finalizing a limited approval and limited disapproval of Rules 1020, 2020, and 2201. This action incorporates the submitted rules into the California SIP, including those provisions identified as deficient.

This approval is limited because the EPA is simultaneously finalizing a limited disapproval of the rules under CAA section 110(k)(3). Our limited disapproval of Rules 1020, 2020, and 2201 triggers an obligation for the EPA to promulgate a Federal Implementation Plan (FIP) unless we approve subsequent SIP revisions that correct the rule deficiencies within 24 months of this final action. Additionally, because the deficiency relates to NNSR requirements under part D of title I of the Act, the offset sanction in CAA section 179(b)(2) will be imposed in the San Joaquin Valley nonattainment area 18 months after the effective date of this action, and the highway funding sanction in CAA section 179(b)(1) will be imposed in the area six months after the offset sanction is imposed, unless the EPA approves subsequent SIP revisions that correct the rule deficiencies prior to the implementation of the sanctions. The EPA intends to work with the District to correct the deficiencies in a timely manner.

Note that the rules have been adopted by the District, and the EPA's final limited disapproval does not prevent the local agency from enforcing them. The limited disapproval would also not prevent any portion of the rules from being incorporated by reference into the federally enforceable SIP.[12]

V. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR

[6] 87 FR 45730, 45734 (July 29, 2022).

[7] *Id.*

[8] *Id.* at 45733. We noted in particular that the 2020–2021 report ''showed a significant disconnect between the section 7 tests and remedies for all pollutants.'' *Id.* at 45734.

[9] EPA Region 9, ''Technical Support Document (TSD), Notice of Proposed Rulemaking, Revisions to the California State Implementation Plan, San Joaquin Valley Air Pollution Control District, Rule 2201—New and Modified Stationary Source Review Rule, EPA Docket # EPA–OAR–R09–2022–0420,'' June 29, 2022, 24.

[10] 88 FR 43434, 43436 (July 10, 2023).

[11] While this action includes a limited disapproval, this disapproval is based on deficiencies unrelated to the those identified in the 2023 NSR Action.

[12] Memorandum dated July 9, 1992, from John Calcagni, Director, Air Quality Management Division, Office of Air Quality Planning and Standards, U.S. EPA, to EPA Regional Air Directors, Regions I–X, Subject: ''Processing of State Implementation Plan (SIP) Submittals.''

51.5, the EPA is incorporating by reference the rules listed in Table 1 of this preamble. These rules are intended to address the CAA's statutory and regulatory requirements for NNSR permit programs for major sources emitting nonattainment air pollutants under CAA section 110(a)(2)(C) and part D of title I. The EPA has made, and will continue to make, these materials available through *https://www.regulations.gov* and at the EPA Region IX Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

VI. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to review State choices, and approve those choices if they meet the minimum criteria of the Act. Accordingly, this action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law.

Additional information about these statutes and Executive Orders can be found at *https://www.epa.gov/laws-regulations/laws-and-executive-orders.*

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was therefore not submitted to the Office of Management and Budget (OMB) for review.

B. Executive Order 14192: Unleashing Prosperity Through Deregulation

This action is not expected to be an Executive Order 14192 regulatory action because this action is not significant under Executive Order 12866.

C. Paperwork Reduction Act (PRA)

This action does not impose an information collection burden under the PRA because this action does not impose additional requirements beyond those imposed by State law.

D. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities beyond those imposed by State law.

E. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. This action does not impose additional requirements beyond those imposed by State law. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, will result from this action.

F. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

G. Executive Order 13175: Coordination With Indian Tribal Governments

This action does not have Tribal implications, as specified in Executive Order 13175, because the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction, and will not impose substantial direct costs on Tribal governments or preempt Tribal law. Thus, Executive Order 13175 does not apply to this action.

H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of ''covered regulatory action'' in section 2–202 of the Executive Order. Therefore, this action is not subject to Executive Order 13045 because it merely approves State law as meeting Federal requirements. Furthermore, the EPA's Policy on Children's Health does not apply to this action.

I. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

J. National Technology Transfer and Advancement Act (NTTAA)

Section 12(d) of the NTTAA directs the EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. The EPA believes that this action is not subject to the requirements of section 12(d) of the NTTAA because application of those requirements would be inconsistent with the CAA.

K. Congressional Review Act (CRA)

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

L. Petitions for Judicial Review

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 19, 2027. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (*see* section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Administrative practice and procedure, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur dioxide, Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: November 9, 2026.

Michael Martucci,

Acting Regional Administrator, Region IX.

For the reasons stated in the preamble, the Environmental Protection Agency amends part 52, chapter I, title 40 of the Code of Federal Regulations as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

■ 2. Amend § 52.220, paragraph (c), table 29 by:

■ a. Revising the entry for ''1020'' under the heading ''Regulation I—General Provisions''; and

■ b. Revising the entries for ''2020'' and ''2201'' under the heading ''Regulation II—Permits''.

The revisions read as follows:

§ 52.220 Identification of plan.

[FR Doc. 2026–23572 Filed 11–18–26; 8:45 am]

BILLING CODE 6569–60–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R03–OAR–2026–3764; FRL–13384–03–R3]

Air Plan Approval; Reasonably Available Control Technology (RACT) for Volatile Organic Compounds (VOC) Control Technique Guidelines (CTG) Under the 2008 and 2015 Ozone National Ambient Air Quality Standards (NAAQS)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving four State implementation plan (SIP) revisions submitted by the Commonwealth of Pennsylvania on May 10, 2023, January 20, 2026, February 17, 2026, and April 10, 2026, through the Pennsylvania Department of Environmental Protection (PADEP). The SIP revisions address reasonably available control technology (RACT) requirements for the 2008 and 2015 ozone national ambient air quality standards (NAAQS) relating to control technique guidelines (CTGs) for volatile organic compounds (VOC) via previously adopted CTG regulations, three new CTG regulations and permits for four facilities covered by the CTG for the Manufacture of High-Density Polyethylene, Polypropylene, and Polystyrene Resins respectively. The EPA is approving these revisions to the Pennsylvania SIP in accordance with the requirements of the Clean Air Act (CAA).

DATES: This final rule is effective on December 21, 2026.

ADDRESSES: The EPA has established a docket for this action under Docket ID Number EPA–R03–OAR–2026–3764. All documents in the docket are listed on the *www.regulations.gov* website. Although listed in the index, some information is not publicly available, *e.g.,* confidential business information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through *www.regulations.gov,* or please contact the person identified in the **FOR FURTHER INFORMATION**

CONTACT section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Sean Silverman, Planning & Implementation Branch (3AD30), Air & Radiation Division, U.S. Environmental Protection Agency, Region III, 1600 John F Kennedy Boulevard, Philadelphia, Pennsylvania 19103. The telephone number is (215) 814–5511. Mr. Silverman can also be reached via electronic mail at *silverman.sean@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this rule, the use of ''we,'' ''us,'' or ''our'' is intended to refer to the EPA. We use multiple abbreviations and terms in this rule. While this list may not be exhaustive, for ease of reading and for reference purposes, the EPA defines the following terms and acronyms here:

CAA—Clean Air Act
CBI—Confidential Business Information
CFR—Code of Federal Regulations
CTG—Control Technique Guidelines
EPA—Environmental Protection Agency
FR—Federal Register
IFD—Interim Final Determination
NAAQS—National Ambient Air Quality Standards
NPRM—Notice of Proposed Rulemaking
PADEP—Pennsylvania Department of Environmental Protection
NSR—New Source Review
RACT– Reasonably Available Control Technology
ppb—Parts per billion
PSD—Prevention of Significant Deterioration
SIP—State Implementation Plan
SOCMI—Synthetic Organic Chemical Manufacturing Industry
tpy—Tons per year
TSD—Technical Support Document
VOC—Volatile Organic Compounds

Table of Contents

I. Background
II. Summary of SIP Revision and EPA Analysis
III. EPA's Response to Comments Received
IV. Final Action
V. Incorporation by Reference
VI. Statutory and Executive Order Reviews

I. Background

On August 16, 2024,[1] the EPA took final action to disapprove portions of two Pennsylvania SIP revisions received on August 13, 2018, that among other things, were intended to satisfy the VOC CTG RACT requirements for the 2008 ozone NAAQS. Specifically, the EPA disapproved the portions of both SIP submittals related to CTGs for the 2008 8-hour ozone NAAQS but approved certain clarifying amendments and a negative declaration submitted by PADEP. In that disapproval, the EPA determined that it erred in its previous December 14, 2020 approval[2] of the VOC CTG RACT portion of PADEP's RACT certification SIP, as the record did not provide sufficient support that the regulations identified by PADEP implemented the VOC CTG RACT requirements of the 2008 8-hour ozone NAAQS.

On May 10, 2023, January 20, 2026, February 17, 2026, and April 10, 2026, PADEP submitted four SIP revisions to the EPA to address VOC CTG RACT SIP requirements for the 2008 and 2015 ozone NAAQS. On July 16, 2026, the EPA proposed approval of these SIP revisions.[3] In that July 16, 2026 notice of proposed rulemaking (NPRM), the EPA proposed that through a combination of new CTG regulations, permits adopting standards from CTGs incorporated into the SIP, recertification of previously approved CTG regulations, and a robust record and supporting analysis that Pennsylvania met the VOC CTG RACT standards for the 2008 and 2015 ozone NAAQS. Furthermore, in that NPRM the EPA proposed that PADEP had addressed the deficiencies laid out in the August 16, 2024 disapproval, and as a result, simultaneously issued an Interim Final Determination (IFD)[4] staying the application of the offset sanction and deferring the application of the highway sanction triggered by the EPA's August 16, 2024 disapproval. The reasons for the proposed approval and the IFD were stated in the proposal for this action and will not be restated here.

The public comment period for the proposed approval and IFD ended on August 17, 2026. The EPA received no comments on either the proposed approval or IFD.

II. Summary of SIP Revision and EPA Analysis

On January 20, 2026, PADEP submitted a revision to its SIP certifying that through a combination of: (1) regulations previously approved into the SIP; (2) regulations proposed to be approved into the SIP; and (3) portions of redacted permits proposed to be incorporated into the SIP that RACT is being implemented for VOC sources covered by a CTG to meet Pennsylvania's RACT requirements under the CAA and implementing regulations for the 2008 and 2015 ozone NAAQS. PADEP submitted four SIP revisions to accomplish this (herein collectively referred to as the VOC CTG RACT SIP) and a robust supporting analysis. A description of these submissions is summarized below.

On May 10, 2023, PADEP submitted the first of the four revisions to its SIP establishing RACT requirements to control VOC emissions from sources covered by the following CTGs: (1) Shipbuilding and Ship Repair Operations (Surface Coating), 61 FR 44050 (August 27, 1996);[5] (2) Large Petroleum Dry Cleaners, EPA–450/3–82–009;[6] (3) Control of Volatile Organic Compound Leaks from Synthetic Organic Chemical Polymer and Resin Manufacturing Equipment, EPA–450/3–83–006;[7] (4) Control of Volatile Organic Compound Emissions from Air Oxidation Processes in Synthetic Organic Chemical Manufacturing Industry (SOCMI), EPA–450/3–84–015;[8] and (5) Control of Volatile Organic Compound Emissions from Reactor Processes and Distillation Operations in Synthetic Organic Chemical Manufacturing Industry, EPA–450/4–91–031.[9]

On January 20, 2026, a second SIP submission was received which contained supporting analysis for all four SIP submissions demonstrating that the submittals meet VOC CTG RACT requirements for the 2008 and 2015 ozone NAAQS. The bulk of this submission relates to PADEP's previously SIP-adopted regulations and associated analysis.

On February 17, 2026, a third SIP submission was received containing portions of three redacted permits for specific facilities. In lieu of adopting new regulations to address VOC CTG RACT from manufacturing high density polyethylene, polypropylene and polystyrene resins (CTG EPA 450/3–83–008, November 1983),[10] PADEP sought to incorporate by reference into the Pennsylvania SIP portions of redacted permits for each source subject to this

[1] *See* 89 FR 66599 (Aug. 16, 2024).

[2] *See* 85 FR 80625 (Dec. 14, 2020).

[3] *See* 91 FR 43577 (July 16, 2026).

[4] *See* 91 FR 43544 (July 16, 2026).

[5] The CTG for Shipbuilding and Ship Repair Operations (Surface Coating) has no standalone document, it is a combination of the information in 61 FR 44050 (August 27, 1996) and the previously published ACT. Alternative Control Technology Document—Surface Coating Operations at Shipbuilding and Ship Repair Facilities.

[6] Control of Volatile Organic Compound Emissions from Large Petroleum Dry Cleaners.

[7] Control of Volatile Organic Compound Leaks from Synthetic Organic Chemical Polymer and Resin Manufacturing Equipment.

[8] Control of Volatile Organic Compound Emissions from Air Oxidation Processes in Synthetic Organic Chemical Manufacturing Industry.

[9] Control of Volatile Organic Compound Emissions from Reactor Processes and Distillation Operations in Synthetic Organic Chemical Manufacturing Industry.

[10] See Control of Volatile Organic Compound Emissions from Manufacture of High-Density Polyethylene, Polypropylene, and Polystyrene Resins.

CTG. The February 17, 2026 SIP submission certifies that these redacted permits contain conditions that are consistent with or more stringent than the CTG and implement VOC CTG RACT Requirements for these sources for the 2008 and 2015 ozone NAAQS. The February 17th submission contained the redacted permits for Multiplastics Extrusions Hazelton (permit 40–00083), Rohm & Haas Co Bristol (permit 09–00015), and Shell Chemical Appalachia (permit 04–00740).

On April 10, 2026, a fourth SIP submission was received from PADEP certifying that a permit for the BASF Monaca Plant (permit 04–00306), which was submitted to and approved by the EPA as RACT for the 1997 ozone NAAQS, meets or exceeds the CTG requirements for controlling VOC emissions from manufacturing high density polyethylene, polypropylene and polystyrene resins (EPA–450/3–83–008, November 1983) and remains sufficient to implement VOC CTG RACT for the 2008 and 2015 ozone NAAQS.

Other specific requirements of Pennsylvania's VOC CTG RACT SIP revisions for the 2008 and 2015 ozone NAAQS and the rationale for the EPA's proposed (and now final) action are explained in the NPRM, and its associated technical support document (TSD) and will not be restated here.

III. EPA's Response to Comments Received

No public comments were received on the NPRM.

IV. Final Action

The EPA is approving Pennsylvania's May 10, 2023, January 20, 2026, February 17, 2026, and April 10, 2026 SIP revisions to the Pennsylvania SIP as proposed in the EPA's July 16, 2026 NPRM. In addition, the EPA is determining that these SIP revisions addressed the requirements of the 2008 and 2015 ozone NAAQS for CTGs and addressed the deficiencies identified in EPA's August 16, 2024 partial disapproval. Finalization of this approval permanently stops the offset sanctions which took effect on March 16, 2026 and prevents the imposition of highways sanctions which were set to take effect on September 16, 2026.

V. Incorporation by Reference

In this document, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of the amendments to 25 Pa. Code Chapters 121.1, 129.52, and newly added 25 Pa. Code Chapters 129.63b and 129.71a effective January 21, 2023 (see annex A of the May 10, 2023 submission). The EPA is also finalizing the incorporation by reference of portions of permits described in section II of this preamble as redacted in Pennsylvania's February 20, 2026 SIP revision. The EPA has made, and will continue to make, these materials generally available through *www.regulations.gov* and at the EPA Region III Office (please contact the person identified in the For Further Information Contact section of this preamble for more information). Therefore, these materials have been approved by the EPA for inclusion in the SIP, have been incorporated by reference by the EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rule of the EPA's approval, and will be incorporated by reference in the next update to the SIP compilation.[11]

VI. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Clean Air Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve State choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Is not an Executive Order 14192 (90 FR 9065, February 6, 2025) regulatory action because this action is not significant under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a State program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have Tribal implications and will not impose substantial direct costs on Tribal governments or preempt Tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

This action is subject to the Congressional Review Act, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 19, 2027. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Amy Van Blarcom-Lackey,

Regional Administrator, Region III.

For the reasons stated in the preamble, the EPA amends 40 CFR part 52 as follows:

[11] 62 FR 27968 (May 22, 1997).

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart NN—Pennsylvania

■ 2. In § 52.2020:

■ a. The table in paragraph (c)(1) is amended:

■ i. Under ''Chapter 121—General Provisions'' by revising the first entry for ''Section 121.1''; and

■ ii. Under ''Chapter 129—Standards for Sources'' by:

■ A. Revising the entry for ''Section 129.52''; and

■ B. Adding the entries for ''Section 129.63b'' and ''Section 129.71a'' in alphanumerical order;

■ b. The table in paragraph (d)(1) is amended by adding entries for ''Multiplastics Extrusions Inc/Hazelton'', ''Rohm & Haas Co/Bristol'', and ''Shell Chem Appalachia/Petrochemicals Complex'' at the end of the table; and

■ c. The table in paragraph (e)(1) is amended by adding entries for ''PA VOC CTG RACT Certification for the 2008 and 2015 Ozone National Ambient Air Quality Standard'' and ''PA BASF VOC CTG RACT Certification'' at the end of the table.

The revisions and additions read as follows:

§ 52.2020 Identification of plan.

BILLING CODE 6569–60–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 62

[EPA–R06–OAR–2023–0478; FRL–12671–02–R6]

Approval and Promulgation of State Air Quality Plans for Designated Facilities and Pollutants; Texas; Control of Emissions From Existing Municipal Solid Waste Landfills

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Pursuant to the Federal Clean Air Act (CAA or the Act), the Environmental Protection Agency (EPA) is approving the CAA section 111(d) State plan submitted by the State of Texas for sources subject to the Municipal Solid Waste (MSW) Landfills Emission Guidelines (EG). The Texas MSW landfills plan was submitted to fulfill the State's obligations under CAA section 111(d) to implement and enforce the requirements under the MSW Landfills EG. The EPA is approving the State plan and amending the agency regulations in accordance with the requirements of the CAA.

DATES: This rule is effective on December 21, 2026. The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of December 21, 2026.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R06–OAR–2023–0478. All documents in the docket are listed on the *https://www.regulations.gov* website. Although listed in the index, some information is not publicly available, *e.g.,* Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet. Publicly available docket materials are available electronically through *https://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Kevin Kim, EPA Region 6 Office, SO_2 and Regional Haze Section; telephone number: 214–665–8554; email address: *kim.kevin@epa.gov.* Please call or email the contact listed above if you need alternative access to material indexed but not provided in the docket.

SUPPLEMENTARY INFORMATION: Throughout this document ''we,'' ''us,'' and ''our'' means the EPA.

I. Background

The background for this action is discussed in detail in our March 4, 2026, proposed rule (91 FR 10556) and accompanying Technical Support

Document (TSD). In that document, we proposed to approve the Texas MSW landfills plan submitted by the Texas Commission on Environmental Quality (TCEQ) in accordance with the requirements of CAA section 111(d) and to amend 40 CFR part 62, subpart SS, to codify the EPA's approval. We proposed to find that the Texas MSW landfills plan, submitted by TCEQ on September 15, 2023, is as protective as the Federal requirements provided under the MSW landfills EG, codified at 40 CFR part 60, subpart Cf.

II. Response to Comments

We received three comments on our proposed rule: two in support and one in opposition. We appreciate the supportive comments and have noted them in the record; no changes are made in response. A summary of the adverse comment and our response to it are provided below.

Comment: The commenter asserted that proposed rules must secure stronger landfill gas capture and monitoring, faster organics diversion so that less methane is generated, and more public transparency about which sites may get exemptions. The commenter additionally provided their perspective on the landfill industry and operators and expressed concern for nearby communities while providing their comments. The commenter asked why the EPA is allowing less stringent rules from the State and stated that landfill operators should be accountable for their landfill emissions and put up safeguards for methane capture.

Response: The EPA acknowledges the commenter's concerns on addressing landfill emissions and protecting affected communities. Under CAA section 111(d), the EPA must approve a State plan that meets Federal requirements and appropriately implements the applicable emission guidelines, including provisions for enforceable limits, monitoring, reporting, and compliance schedules. Under 40 CFR 60.24(f), a State may apply less stringent emission standards or longer compliance schedules than otherwise required if the State demonstrates one or more of the following: (1) that, due to plant age, location, or basic process design, the cost of control is unreasonable; (2) that installing the necessary control equipment is physically impossible; or (3) that other factors specific to the facility (or class of facilities) make a less stringent standard or a later final compliance date significantly more reasonable.

Texas adopted 30 TAC section 113.2406(a) to explicitly exempt MSW landfills that have not accepted waste since October 9, 1993, and have no remaining design capacity from State regulations at Chapter 113, Subchapter D, Division 6, continuing an existing Division 1 exemption (30 TAC section 113.2060(2)(A)) but rephrasing it as a stand-alone exemption rather than embedding it in the definition of ''existing MSW landfill.'' This exemption is less stringent than the default Federal applicability in 40 CFR part 60, subparts Cc and Cf, because it excludes landfills that stopped accepting waste between November 8, 1987, and October 9, 1993.[1] TCEQ justifies the change under 40 CFR 60.24(f), which allows less stringent standards or longer compliance schedules for any of the three potential justifications detailed in the previous paragraph. In 1998, TCEQ[2] found only one landfill (City of Killeen) was briefly above the 50 megagrams per year (Mg/yr) nonmethane organic compound (NMOC) control threshold (to install a gas collection and control system for closed landfills) and projected that landfill would fall below this threshold by 2004. The EPA's 1999 approval likewise concluded that controlling these closed landfills would yield little emission benefit relative to cost. Given the passage of time, TCEQ asserts that none of the landfills that closed between 1987–1993 would currently exceed 50 Mg/yr NMOC, and TCEQ includes the prior State plan analysis[3] in support of maintaining the exemption. Therefore, these closed landfills in Texas would not be subject to gas collection and control system requirements nor would it likely result in a reduction in NMOC or landfill emissions even if Texas did not exempt these landfills as part of its current MSW landfills plan. The EPA finds that TCEQ has adequately demonstrated, consistent with 40 CFR 60.24(f), that a less stringent standard is reasonable for the applicable facilities, and approves of the provision, as adopted at 30 TAC section 113.2406(a).

In its assessment of Texas's plan, the EPA concluded that Texas's plan met Federal requirements under CAA section 111(d), the CAA section 111(d) implementing regulations at 40 CFR part 60, subpart B, and the applicable provisions under the MSW landfill emission guidelines at 40 CFR part 60, subpart Cf. While the EPA's action does not mandate organics diversion or rules beyond the landfill emission guidelines, the plan requires landfill gas collection and control, surface monitoring, corrective action, and reporting, with the EPA and TCEQ retaining full enforcement authority alongside citizens' recourse. Approving this plan would allow State implementation of substantively similar requirements from the Federal Plan that are already in effect and would provide for better enforcement oversight of landfill gas regulation. The EPA would continue to provide Federal oversight of landfill requirements under the emission guidelines.

III. Final Action

In this final action, the EPA is amending 40 CFR part 62, subpart SS, to reflect approval of the Texas MSW landfills plan from TCEQ, received on September 15, 2023, in accordance with CAA section 111(d). As part of that plan approval, the EPA is approving the State regulations at Texas Administrative Code Title 30, Chapter 113: Standards of Performance for Hazardous Air Pollutants and for Designated Facilities and Pollutants, Subchapter D: Designated Facilities and Pollutants, Division 6: 2016 Emission Guidelines For Existing Municipal Solid Waste Landfills, sections 113.2400 through 113.2412 (30 TAC sections 113.2400 through 113.2412) as the enforceable mechanism of the State plan.

IV. Incorporation by Reference

In accordance with the requirements of 1 CFR 51.5, we are finalizing regulatory text that includes the incorporation by reference of Texas Administrative Code Title 30, Chapter 113: Standards of Performance for Hazardous Air Pollutants and for Designated Facilities and Pollutants, Subchapter D: Designated Facilities and Pollutants, Division 6: 2016 Emission Guidelines For Existing Municipal Solid Waste Landfills, sections 113.2400 through 113.2412, adopted July 14, 2023, and effective July 19, 2023 (30 TAC sections 113.2400 through 113.2412), which is part of the CAA section 111(d) Plan applicable to existing MSW landfills subject to the MSW Landfills Emission Guidelines, at 40 CFR part 60, subpart Cf, within TCEQ's jurisdiction in the State of Texas. The regulatory provisions of 30 TAC sections 113.2400 through

[1] The MSW landfills EG contains gas collection and control system requirements for designated facilities (as defined in the EG) that have accepted waste after November 8, 1987, that meet specific design capacity and NMOC (nonmethane organic compound) emission rate thresholds (50 megagrams per year (Mg/yr) for closed landfills).

[2] At the time the Texas 1998 MSW landfill plan was submitted, TCEQ was called the Texas Natural Resource Conservation Commission (TNRCC).

[3] *See* (1) 23 TexReg 10876 (October 1998); (2) EPA's previous approval of Texas's 1998 MSW landfill plan at 64 FR 32427 (June 17, 1999); and (3) appendix C.5, attachment 1 of Texas's 2023 MSW landfill plan submission.

113.2412 incorporate the MSW Landfills Emission Guidelines promulgated by the EPA at 40 CFR part 60, subpart Cf, and establish emission standards and compliance times for the control of municipal solid waste landfills, as defined in subpart Cf, that commenced construction, modification, or reconstruction on or before July 17, 2014. The EPA has made and will continue to make 30 TAC sections 113.2400 through 113.2412 generally available at the EPA Region 6 office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information). They are also available at: *https://www.regulations.gov* and *http://www.sos.texas.gov/tac/index.shtml.* This incorporation by reference has been approved by the Director of the Federal Register and the State plan is federally enforceable under the CAA as of the effective date of this final rulemaking.

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a CAA section 111(d)/129 submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7411(d); 42 U.S.C. 7429; 40 CFR part 60, subparts B and Cf; and 40 CFR part 62, subpart A. Thus, in reviewing CAA section 111(d)/129 State plan submissions, the EPA's role is to approve State choices, provided that they meet the criteria of the Act and implementing regulations. Accordingly, this action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason:

A. Executive Order 12866: Regulatory Planning and Review

This action is not a significant regulatory action as defined in Executive Order 12866 (58 FR 51735, October 4, 1993) and was therefore not subject to a requirement for Executive Order 12866 review.

B. Executive Order 14192: Unleashing Prosperity Through Deregulation

This action is not an Executive Order 14192 (90 FR 9065, February 6, 2025) regulatory action because this action is not significant under Executive Order 12866.

C. Paperwork Reduction Act (PRA)

This action does not impose an information collection burden under the PRA (44 U.S.C. 3501 *et seq.*) because it does not contain any information collection activities.

D. Regulatory Flexibility Act (RFA)

This action is certified to not have a significant economic impact on a substantial number of small entities under the RFA (5 U.S.C. 601 *et seq.*). This action will approve a State plan pursuant to CAA section 111(d) and will therefore have no net regulatory burden for all directly regulated small entities.

E. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531 through 1538, and does not significantly or uniquely affect small governments. This action imposes no enforceable duty on any State, local, or Tribal governments or the private sector.

F. Executive Order 13132: Federalism

This action does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action will not apply to areas of Indian country within Texas and therefore does not have Tribal implications as specified in E.O. 13175 (65 FR 67249, November 9, 2000). This action will neither impose substantial direct compliance costs on federally recognized Tribal governments, nor preempt Tribal law. This action will not impose substantial direct compliance costs on federally recognized Tribal governments because no actions will be required of Tribal governments. This action will also not preempt Tribal law as no Texas Tribe implements a regulatory program under the CAA and thus does not have applicable or related Tribal laws.

H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 (62 FR 19885, April 23, 1997) as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definitions of ''covered regulatory action'' in section 2–202 of the Executive Order. Therefore, this action is not subject to Executive Order 13045 because it approves a State program.

I. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution and Use

This action is not subject to Executive Order 13211 (66 FR 28355, May 22, 2001), because it is not a significant regulatory action under Executive Order 12866.

J. National Technology Transfer and Advancement Act

This rulemaking does not involve technical standards. This action is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act.

This action is subject to the Congressional Review Act, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 19, 2027. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see CAA section 307(b)(2)).

List of Subjects in 40 CFR Part 62

Environmental protection, Administrative practice and procedure, Air pollution control, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements, Waste treatment and disposal.

Dated: November 9, 2026.

Walter Mason,

Regional Administrator, Region 6.

For the reasons stated in the preamble, the Environmental Protection Agency amends 40 CFR part 62 as follows:

PART 62—APPROVAL AND PROMULGATION OF STATE PLANS FOR DESIGNATED FACILITIES AND POLLUTANTS

■ 1. The authority citation for part 62 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart SS—Texas

■ 2. Amend § 62.10850 by revising paragraph (b)(3) to read as follows:

§ 62.10850 Identification of plan.

* * * * *

(b) * * *

(3) Control of landfill gas emissions from existing municipal solid waste landfills, submitted by the Texas Commission on Environmental Quality on September 15, 2023.

* * * * *

■ 3. Revise § 62.10880 to read as follows:

§ 62.10880 Texas Commission on Environmental Quality.

(a) *Identification of plan.* Control of air emissions from existing municipal solid waste landfills, as adopted by the State of Texas on July 14, 2023, effective July 19, 2023, and submitted on September 15, 2023, by the Texas Commission on Environmental Quality (TCEQ) Commissioner in a letter dated September 15, 2023. The plan includes the regulatory provisions cited in paragraph (d) of this section, which the EPA incorporates by reference.

(b) *Identification of sources.* The plan, as adopted by the State of Texas on July 14, 2023, effective July 19, 2023, and submitted on September 15, 2023, applies to existing municipal solid waste landfills subject to the Municipal Solid Waste Landfills Emission Guidelines, at 40 CFR part 60, subpart Cf, within its jurisdiction in the State of Texas.

(c) *Effective Date.* The effective date of the plan is December 21, 2026.

(d) *Incorporation by reference.* The material listed in this paragraph (d) is incorporated by reference in this section with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved incorporation by reference (IBR) material is available for inspection at the EPA and at the National Archives and Records Administration (NARA). Contact the EPA Region 6 office at 1201 Elm Street, Suite 500, Dallas, Texas 75270; telephone number: 214–665–2200. For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.* The material may be obtained from the State of Texas, Office of the Secretary of State, Texas Register, P.O. Box 12887, Austin, Texas 78711; telephone number: (512) 463–5561; email address: *register@sos.texas.gov;* website: *https://www.sos.texas.gov/tac/index.shtml.*

(1) Texas Administrative Code Title 30, Chapter 113: Standards of Performance for Hazardous Air Pollutants and for Designated Facilities and Pollutants, Subchapter D: Designated Facilities and Pollutants, Division 6: 2016 Emission Guidelines For Existing Municipal Solid Waste Landfills, sections 113.2400 through 113.2412; effective July 19, 2023. (30 TAC sections 113.2400 through 113.2412)

SUPPLEMENTARY INFORMATION:

I. Background

In FR Doc. 2015–28214 of November 18, 2015 (80 FR 72150), there was a technical error that is identified and corrected in this correcting document.

II. Summary of Errors

On page 72165 in the regulations text for section 332.702, we included an erroneous statutory reference.

III. Correction of Errors

In section 332.702, the statutory citation ''13 U.S.C. 1342'' is being corrected to read ''31 U.S.C. 1342''.

List of Subjects in 48 CFR Part 332

Government procurement.

For the reasons stated in the preamble, HHS amends 48 CFR part 332 as follows:

PART 332—CONTRACT FINANCING

■ 1. The authority citation for part 332 continues to read as follows:

Authority: 5 U.S.C. 301; 40 U.S.C. 121(c)(2).

332.702 [Amended]

■ 2. Amend section 332.702 by removing ''13 U.S.C. 1342'' and adding ''31 U.S.C. 1342'' in its place.

Liesl I. Fowler,

Executive Secretary to the Department, Department of Health and Human Services.

[FR Doc. 2026–23617 Filed 11–18–26; 8:45 am]

BILLING CODE 4150–24–P

Proposed Rules

Federal Register
Vol. 91, No. 222
Thursday, November 19, 2026

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2026–13820; Project Identifier MCAI–2025–01552–T]

RIN 2120–AA64

Airworthiness Directives; ATR—GIE Avions de Transport Régional Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2021–12–17, which applies to certain ATR—GIE Avions de Transport Régional Model ATR42–300, –320, and –500 airplanes; and all Model ATR72–101, –102, –201, –202, –211, –212, and –212A airplanes. AD 2021–12–17 requires a detailed visual inspection of each affected part for deficiencies (sealant blockage and out of tolerance ligaments), and depending on findings, accomplishment of applicable corrective actions. Since the FAA issued AD 2021–12–17, it was determined that additional seat track part numbers and airplanes may be affected. This proposed AD would continue to require the actions in AD 2021–12–17 and would require inspections of additional parts. This proposed AD would also limit the installation of affected parts. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by January 4, 2027.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2026–13820; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For European Union Aviation Safety Agency (EASA) material identified in this proposed AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.* It is also available at *regulations.gov* under Docket No. FAA–2026–13820.
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

FOR FURTHER INFORMATION CONTACT: Yaser Osman, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 860–386–1786; email: *9-AVS-AIR-BACO-COS@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments using a method listed under the **ADDRESSES** section. Include ''Docket No. FAA–2026–13820; Project Identifier MCAI–2025–01552–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Yaser Osman, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 860–386–1786; email: *9-AVS-AIR-BACO-COS@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2021–12–17, Amendment 39–21604 (86 FR 34621, June 30, 2021) (AD 2021–12–17), for certain ATR—GIE Avions de Transport Régional Model ATR42–300, –320, and –500 airplanes; and all Model ATR72–101, –102, –201, –202, –211, –212, and –212A airplanes. AD 2021–12–17 was prompted by an MCAI originated by EASA, which is the Technical Agent for the Member States of the European Union. EASA issued AD 2020–0097R1, dated May 28, 2020 (EASA AD 2020–0097R1), to correct an unsafe condition.

AD 2021–12–17 requires a detailed visual inspection of each affected part for deficiencies (sealant blockage and out of tolerance ligaments), and depending on findings, accomplishment of applicable corrective actions. The FAA issued AD 2021–12–17 to address structural failure of the seat track

attachment during an emergency landing, possibly resulting in injury to occupants, and affecting emergency evacuation.

Actions Since AD 2021–12–17 Was Issued

Since the FAA issued AD 2021–12–17, EASA superseded EASA AD 2020–0097R1 and issued EASA AD 2025–0205R3, dated December 8, 2025 (EASA AD 2025–0205R3) (also referred to as the MCAI), to correct an unsafe condition for all ATR—GIE Avions de Transport Régional Model ATR42–200, –300, –320, –400, and –500 airplanes; and all Model ATR72–101, –102, –201, –202, –211, –212, and –212A airplanes. Model ATR42–400 airplanes are not certificated by the FAA and are not included on the U.S. type certificate data sheet; this proposed AD therefore does not include those airplanes in the applicability. The MCAI states that since EASA AD 2020–0097R1 was issued it was determined additional seat track part numbers might be affected and additional airplanes need to be inspected. EASA AD 2025–0205R3 also specifies that airplanes with certain configurations do not need to do the inspection and corrective actions.

The FAA is proposing this AD to address a structural failure of the seat track attachment during an emergency landing, possibly resulting in injury to occupants, and affecting emergency evacuation. You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2026–13820.

Explanation of Retained Requirements

Although this proposed AD does not explicitly restate the requirements of AD 2021–12–17, this proposed AD would retain all of the requirements of AD 2021–12–17. Those requirements are referenced in EASA AD 2025–0205R3, which, in turn, is referenced in paragraph (g) of this proposed AD.

Material Incorporated by Reference Under 1 CFR part 51

The FAA reviewed EASA AD 2025–0205R3, which specifies procedures for a detailed visual inspection of each affected seat track for deficiencies (sealant blockage and out of tolerance ligaments), and corrective actions if necessary. Corrective actions include replacement of seat track sections, and replacement of the entire seat track. EASA AD 2025–0205R3 specifies configurations on which the inspection and corrective actions are not required as well as conditions under which the corrective actions may be postponed. EASA AD 2025–0205R3 also limits the installation of affected parts.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in EASA AD 2025–0205R3 described previously, except for any differences identified as exceptions in the regulatory text of this proposed AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate EASA AD 2025–0205R3 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2025–0205R3 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in EASA AD 2025–0205R3 does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in EASA AD 2025–0205R3. Material required by EASA AD 2025–0205R3 for compliance will be available at *regulations.gov* under Docket No. FAA–2026–13820 after the FAA final rule is published.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 33 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Up to 40 work-hours × $85 per hour = $3,400	$0	$3,400	$112,200

The FAA estimates the following costs to do any necessary on-condition actions that would be required based on the results of any required actions. The FAA has no way of determining the number of aircraft that might need these on-condition actions:

ESTIMATED COSTS OF ON-CONDITION ACTIONS

Labor cost	Parts cost	Cost per product
Up to 270 work-hours × $85 per hour = $22,950	(*)	$22,950

*The FAA has received no definitive data on which to base the cost estimates for the parts cost for the on-condition actions specified in this proposed AD.

According to the manufacturer, some or all of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected individuals. The FAA does not control warranty coverage for affected individuals. As a result, the FAA has included all known costs in the cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2021–12–17, Amendment 39–21604 (86 FR 34621, June 30, 2021); and

■ b. Adding the following new AD:

ATR—GIE Avions de Transport Régional: Docket No. FAA–2026–13820; Project Identifier MCAI–2025–01552–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 4, 2027.

(b) Affected ADs

This AD replaces AD 2021–12–17, Amendment 39–21604 (86 FR 34621, June 30, 2021) (AD 2021–12–17).

(c) Applicability

This AD applies to all ATR—GIE Avions de Transport Régional Model ATR42–200, –300, –320, and –500 airplanes; and all Model ATR72–101, –102, –201, –202, –211, –212, and –212A airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Unsafe Condition

This AD was prompted by reports of defective seat tracks and a determination that additional airplanes and seat track part numbers are affected. The FAA is issuing this AD to address a structural failure of the seat track attachment during an emergency landing, possibly resulting in injury to occupants, and affecting emergency evacuation.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2025–0205R3, dated December 8, 2025 (EASA AD 2025–0205R3).

(h) Exceptions to EASA AD 2025–0205R3

(1) Where EASA AD 2025–0205R3 refers to October 6, 2025 (the effective date of the original issue of EASA AD 2025–0205), this AD requires using the effective date of this AD.

(2) Where paragraph (2) EASA AD 2025–0205R3 specifies ''deficiencies are found, as defined in the SB'', this AD requires replacing that text with ''any sealant blockage or out of tolerance ligament is found''.

(3) This AD does not adopt the ''Remarks'' section of EASA AD 2025–0205R3.

(i) No Reporting Requirement

Although the material referenced in EASA AD 2025–0205R3 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(j) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (k) of this AD and email to: *AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or EASA; or ATR—GIE Avions de Transport Régional's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(k) Additional Information

For more information about this AD, contact Yaser Osman, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 860–386–1786; email: *9-AVS-AIR-BACO-COS@faa.gov.*

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2025–0205R3, dated December 8, 2025.

(ii) [Reserved]

(3) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on November 17, 2026.

Steven W. Thompson,

Acting Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2026–13822; Project Identifier MCAI–2025–01841–T]

RIN 2120–AA64

Airworthiness Directives; Dassault Aviation Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2024–15–02, which applies to all Dassault Aviation Model MYSTERE–FALCON 900 airplanes. AD 2024–15–02 requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. Since the FAA issued AD 2024–15–02, the FAA has determined that new or more restrictive airworthiness limitations are necessary. This proposed AD would continue to require the actions in AD 2024–15–02 and would require revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by January 4, 2027.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2026–13822; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For European Union Aviation Safety Agency (EASA) material identified in this proposed AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.* It is also available at *regulations.gov* under Docket No. FAA–2026–13822.
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

FOR FURTHER INFORMATION CONTACT: Christopher J. Spencer, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7332; email: *9-AVS-AIR-BACO-COS@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments using a method listed under the **ADDRESSES** section. Include ''Docket No. FAA–2026–13822; Project Identifier MCAI–2025–01841–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Christopher J Spencer, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7332; email: *9-AVS-AIR-BACO-COS@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2024–15–02, Amendment 39–22793 (89 FR 72974, September 9, 2024) (AD 2024–15–02), for all Dassault Aviation Model MYSTERE–FALCON 900 airplanes. AD 2024–15–02 was prompted by an MCAI originated by EASA, which is the Technical Agent for the Member States of the European Union. EASA issued EASA AD 2024–0036, dated January 31, 2024 (EASA AD 2024–0036), to correct an unsafe condition.

AD 2024–15–02 requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. The FAA issued AD 2024–15–02 to address reduced structural integrity of the airplane.

Actions Since AD 2024–15–02 Was Issued

Since the FAA issued AD 2024–15–02, EASA superseded EASA AD 2024–0036 dated January 31, 2024, and issued EASA AD 2025–0292, dated December 19, 2025 (EASA AD 2025–0292) (also referred to as the MCAI), for all Dassault Aviation Model MYSTERE–FALCON 900 airplanes. The MCAI states that new or more restrictive airworthiness limitations have been developed.

The FAA is proposing this AD to address reduced structural integrity of the airplane.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2026–13822.

Explanation of Retained Requirements

Although this proposed AD does not explicitly restate the requirements of AD 2024–15–02, this proposed AD would

retain all of the requirements of AD 2024–15–02. Those requirements are referenced in EASA AD 2025–0292, which, in turn, is referenced in paragraph (g) of this proposed AD.

Material Incorporated by Reference Under 1 CFR Part 51

EASA AD 2025–0292 specifies new or more restrictive airworthiness limitations for airplane structures and safe life limits.

This proposed AD would also require EASA AD 2024–0036, which the Director of the Federal Register approved for incorporation by reference as of October 15, 2024 (89 FR 72974, September 9, 2024).

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would retain all requirements of AD 2024–15–02. This proposed AD would require revising the existing maintenance or inspection program, as applicable, to incorporate additional new or more restrictive airworthiness limitations, which are specified in EASA AD 2025–0292 already described, as proposed for incorporation by reference. Any differences with EASA AD 2025–0292 are identified as exceptions in the regulatory text of this proposed AD.

This proposed AD would require revisions to certain operator maintenance documents to include new actions (*e.g.,* inspections). Compliance with these actions is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by this proposed AD, the operator may not be able to accomplish the actions described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an alternative method of compliance (AMOC) according to paragraph (m)(1) of this proposed AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to retain the Incorporation by Reference (IBR) of EASA AD 2024–0036 and incorporate EASA AD 2025–0292 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2024–0036 and EASA AD 2025–0292 through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in EASA AD 2024–0036 or EASA AD 2025–0292 does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in EASA AD 2024–0036 or EASA AD 2025–0292. Material required by EASA AD 2024–0036 is available at *regulations.gov* by searching for and locating Docket No. FAA–2024–1300 and material required by EASA AD 2025–0292 for compliance will be available at *regulations.gov* by searching for and locating Docket No. FAA–2026–13822 after the FAA final rule is published.

Airworthiness Limitation ADs Using the New Process

The FAA's process of incorporating by reference MCAI ADs as the primary source of information for compliance with corresponding FAA ADs has been limited to certain MCAI ADs (primarily those with service bulletins as the primary source of information for accomplishing the actions required by the FAA AD). However, the FAA is now expanding the process to include MCAI ADs that require a change to airworthiness limitation documents, such as airworthiness limitation sections.

For these ADs that incorporate by reference an MCAI AD that changes airworthiness limitations, the FAA requirements are unchanged. Operators must revise the existing maintenance or inspection program, as applicable, to incorporate the information specified in the new airworthiness limitation document. The airworthiness limitations must be followed according to 14 CFR 91.403(c) and 91.409(e).

The previous format of the airworthiness limitation ADs included a paragraph that specified that no alternative actions (*e.g.,* inspections) or intervals may be used unless the actions and intervals are approved as an AMOC in accordance with the procedures specified in the AMOCs paragraph under ''Additional AD Provisions.'' This new format includes a ''New Provisions for Alternative Actions and Intervals'' paragraph that does not specifically refer to AMOCs, but operators may still request an AMOC to use an alternative action or interval.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 138 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

The FAA estimates the total cost per operator for the retained actions from AD 2024–15–02 to be $7,650 (90 work-hours × $85 per work-hour).

The FAA has determined that revising the existing maintenance or inspection program takes an average of 90 work-hours per operator, although the agency recognizes that this number may vary from operator to operator. Since operators incorporate maintenance or inspection program changes for their affected fleet(s), the FAA has determined that a per-operator estimate is more accurate than a per-airplane estimate. Therefore, the FAA estimates the average total cost per operator for the new proposed actions to be $7,650 (90 work-hours × $85 per work-hour).

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or

develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2024–15–02, Amendment 39–22793 (89 FR 72974, September 9, 2024); and

■ b. Adding the following new AD:

Dassault Aviation: Docket No. FAA–2026–13822; Project Identifier MCAI–2025–01841–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 4, 2027.

(b) Affected ADs

This AD replaces AD 2024–15–02, Amendment 39–22793 (89 FR 72974, September 9, 2024) (AD 2024–15–02).

(c) Applicability

This AD applies to all Dassault Aviation Model MYSTERE–FALCON 900 airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks.

(e) Unsafe Condition

This AD was prompted by a determination that new or more restrictive airworthiness limitations are necessary. The FAA is issuing this AD to address reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Revision of the Existing Maintenance or Inspection Program, With a New Terminating Action

This paragraph restates the requirements of paragraph (j) of AD 2024–15–02, with a new terminating action. Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2024–0036, dated January 31, 2024 (EASA AD 2024–0036). Accomplishing the revision of the existing maintenance or inspection program required by paragraph (j) of this AD terminates the requirements of this paragraph.

(h) Retained Exceptions to EASA AD 2024–0036, With No Changes

This paragraph restates the exceptions specified in paragraph (k) of AD 2024–15–02, with no changes.

(1) This AD does not adopt the requirements specified in paragraphs (1) and (2) of EASA AD 2024–0036.

(2) Paragraph (3) of EASA AD 2024–0036 specifies revising ''the approved AMP'' within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, within 90 days after October 15, 2024 (the effective date of AD 2024–15–02).

(3) The initial compliance time for doing the tasks specified in paragraph (3) of EASA AD 2024–0036 is at the applicable ''limitations'' and ''associated thresholds'' as incorporated by the requirements of paragraph (3) of EASA AD 2024–0036, or within 90 days after October 15, 2024 (the effective date of AD 2024–15–02), whichever occurs later.

(4) This AD does not adopt the provisions specified in paragraphs (4) and (5) of EASA AD 2024–0036.

(5) This AD does not adopt the ''Remarks'' section of EASA AD 2024–0036.

(i) Retained Restrictions on Alternative Actions and Intervals, With a New Exception

This paragraph restates the requirements of paragraph (l) of AD 2024–15–02, with a new exception. Except as required by paragraph (j) of this AD, after the existing maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (*e.g.,* inspections) or intervals are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2024–0036.

(j) New Revision of the Existing Maintenance or Inspection Program

Except as specified in paragraph (k) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2025–0292, dated December 19, 2025 (EASA AD 2025–0292). Accomplishing the revision of the existing maintenance or inspection program required by this paragraph terminates the requirements of paragraph (g) of this AD.

(k) Exceptions to EASA AD 2025–0292

(1) This AD does not adopt the requirements specified in paragraphs (1) and (2) of EASA AD 2025–0292.

(2) Paragraph (3) of EASA AD 2025–0292 specifies revising the approved aircraft maintenance program (AMP) within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, within 90 days after the effective date of this AD.

(3) The initial compliance time for doing the tasks specified in paragraph (3) of EASA AD 2025–0292 is at the applicable limitations and associated thresholds as incorporated by the requirements of paragraph (3) of EASA AD 2025–0292, or within 90 days after the effective date of this AD, whichever occurs later.

(4) This AD does not adopt the provisions specified in paragraphs (4) and (5) of EASA AD 2025–0292.

(5) This AD does not adopt the ''Remarks'' section of EASA AD 2025–0292.

(l) New Provisions for Alternative Actions and Intervals

After the existing maintenance or inspection program has been revised as required by paragraph (j) of this AD, no alternative actions (*e.g.,* inspections) and intervals are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2025–0292.

(m) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (n) of this AD and email to: *AMOC@faa.gov*. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or EASA; or Dassault Aviation's EASA Design Organization Approval (DOA). If approved by the DOA,

the approval must include the DOA-authorized signature.

(n) Additional Information

For more information about this AD, contact Christopher J Spencer, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7332; email: *9-AVS-AIR-BACO-COS@faa.gov.*

(o) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following material was approved for IBR on [DATE 35 DAYS AFTER PUBLICATION OF THE FINAL RULE].

(i) European Union Aviation Safety Agency (EASA) AD 2025–0292, dated December 19, 2025.

(ii) [Reserved]

(4) The following material was approved for IBR on October 15, 2024 (89 FR 72974, September 9, 2024).

(i) EASA AD 2024–0036, dated January 31, 2024.

(ii) [Reserved]

(5) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.*

(6) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(7) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on November 17, 2026.

Steven W. Thompson,

Acting Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[FR Doc. 2026–23584 Filed 11–18–26; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2026–13818; Project Identifier MCAI–2026–00537–R]

RIN 2120–AA64

Airworthiness Directives; Airbus Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2026–12–08, which applies to all Airbus Helicopters Model AS350B2, AS350B3, EC130B4, and EC130T2 helicopters. AD 2026–12–08 requires revising the airworthiness limitations section (ALS) of the existing maintenance manual (MM) or instructions for continued airworthiness (ICA) and the existing approved maintenance or inspection program, as applicable. Since the FAA issued AD 2026–12–08, a determination was made that new and more restrictive airworthiness limitations and maintenance tasks are necessary. This proposed AD would require incorporating these airworthiness limitations and maintenance tasks into the ALS of the existing MM or ICA and the existing approved maintenance or inspection program, as applicable. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this NPRM by January 4, 2027.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2026–13818; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI) any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For European Union Aviation Safety Agency (EASA) material identified in this proposed AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: *ADs@easa.europa.eu;* website: *easa.europa.eu.*
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 10101 Hillwood Parkway, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110.

FOR FURTHER INFORMATION CONTACT: Raymond Miller, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (316) 946–4190; email: *raymond.f.miller@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments using a method listed under **ADDRESSES**. Include ''Docket No. FAA–2026–13818; Project Identifier MCAI–2026–00537–R'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Raymond Miller, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2026–12–08, Amendment 39–23378 (91 FR 36077, June 16, 2026), (AD 2026–12–08), for all Airbus Helicopters Model AS350B2, AS350B3, EC130B4, and EC130T2 helicopters. AD 2026–12–08 was prompted by an MCAI originated by EASA, which is the Technical Agent for the Member States of the European Union. EASA issued EASA AD 2025–0137, dated June 27, 2025; corrected October 29, 2025, (EASA AD 2025–0137).

AD 2026–12–08 requires revising the ALS of the existing MM or ICA and the existing approved maintenance or inspection program, as applicable. The FAA issued AD 2026–12–08 to prevent failure of critical parts and primary structural components, which if not addressed, could result in loss of control of the helicopter.

Actions Since AD 2026–12–08 Was Issued

On May 26, 2026, EASA superseded AD 2025–0137 and issued EASA AD 2026–0101 (EASA AD 2026–0101) (also referred to as the MCAI). The MCAI states that new or more restrictive airworthiness limitations and maintenance tasks have been developed. Additionally, the MCAI states that the airworthiness limitations are identified as mandatory for continued airworthiness and that Airbus Helicopters has issued applicable ALS revisions to specify new and more restrictive life limits and maintenance tasks.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2026–13818.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed EASA AD 2026–0101, which specifies replacing components before exceeding their life limits and accomplishing all applicable maintenance tasks within thresholds and intervals specified in the ALS. Depending on the results of the maintenance tasks, EASA AD 2026–0101 specifies accomplishing corrective action(s) or contacting Airbus Helicopters for approved instructions and accomplishing those instructions.

In addition, EASA AD 2026–0101 specifies revising the Aircraft Maintenance Programme (AMP) by incorporating the limitations, tasks, and associated thresholds and intervals described in the specified ALS, as applicable. Revising the AMP constitutes terminating action for the requirement to record accomplishment of the actions of replacing components before exceeding their life limits and accomplishing maintenance tasks within thresholds and intervals specified in the applicable ALS as specified in EASA AD 2026–0101, for demonstration of AD compliance on a continued basis.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

These products have been approved by the civil aviation authority (CAA) of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in EASA AD 2026–0101, described previously, as incorporated by reference, except for any differences identified as exceptions in the regulatory text of this proposed AD. See ''Differences Between this Proposed AD and the MCAI'' for a discussion of the general differences included in this proposed AD.

Differences Between This Proposed AD and the MCAI

Where EASA AD 2026–0101 specifies revising the approved AMP within 12 months after the effective date of EASA AD 2026–0101, this proposed AD would require revising the ALS of the existing MM or ICA and the existing approved maintenance or inspection program, as applicable, within 30 days after the effective date of this proposed AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some CAA ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate EASA AD 2026–0101 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2026–0101 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in EASA AD 2026–0101 does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in EASA AD 2026–0101. Material required by EASA AD 2026–0101 for compliance will be available at *regulations.gov* under Docket No. FAA–2026–13818 after the FAA final rule is published.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 1,163 helicopters of U.S. registry.

The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Revise ALS	1 work-hour × $85 per hour = $85	$0	$85	$98,855

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in

Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive 2026–12–08, Amendment 39–23378 (91 FR 36077, June 16, 2026); and

■ b. Adding the following new airworthiness directive:

Airbus Helicopters: Docket No. FAA–2026–13818; Project Identifier MCAI–2026–00537–R.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 4, 2027.

(b) Affected ADs

This AD replaces AD 2026–12–08, Amendment 39–23378 (91 FR 36077, June 16, 2026).

(c) Applicability

This AD applies to all Airbus Helicopters Model AS350B2, AS350B3, EC130B4, and EC130T2 helicopters, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 05, Time limits/maintenance checks.

(e) Unsafe Condition

This AD was prompted by new or more restrictive airworthiness limitations and maintenance tasks. The FAA is issuing this AD to prevent failure of critical parts and primary structural components, which if not addressed, could result in loss of control of the helicopter.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraphs (h) and (i) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency AD 2026–0101, dated May 26, 2026 (EASA AD 2026–0101).

(h) Exceptions to EASA AD 2026–0101

(1) Where EASA AD 2026–0101 refers to its effective date, this AD requires using the effective date of this AD.

(2) This AD does not adopt paragraphs (1), (2), (4), and (5) of EASA AD 2026–0101.

(3) Where paragraph (3) of EASA AD 2026–0101 specifies ''Within 12 months after the effective date of this AD, revise the approved AMP'', this AD requires replacing that text with ''Within 30 days after the effective date of this AD, revise the airworthiness limitations section of the existing maintenance manual or instructions for continued airworthiness and the existing approved maintenance or inspection program, as applicable''.

(4) The initial compliance time for doing the tasks specified in paragraph (3) of EASA AD 2026–0101 is on or before the applicable ''limitations'' and ''associated thresholds'' as incorporated by the requirements of paragraph (3) of EASA AD 2026–0101 or within 30 days after the effective date of this AD, whichever occurs later.

(5) This AD does not adopt the ''Remarks'' section of EASA AD 2026–0101.

(i) Provisions for Alternative Actions and Intervals

After the action required by paragraph (g) of this AD has been done, no alternative actions and associated thresholds and intervals, including life limits, are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2026–0101.

(j) Alternative Methods of Compliance (AMOCs):

(1) The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (k) of this AD and email to: *AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(k) Additional Information

For more information about this AD, contact Raymond Miller, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (316) 946–1490; email: *raymond.f.miller@faa.gov.*

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2026–0101, dated May 26, 2026.

(ii) [Reserved]

(3) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: *ADs@easa.europa.eu;* website: *easa.europa.eu.* You may find the EASA material on the EASA website at *ad.easa.europa.eu.*

(4) You may view this material FAA, Airworthiness Products Section, Operational Safety Branch, 10101 Hillwood Parkway, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on November 17, 2026.

Steven W. Thompson,

Acting Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[FR Doc. 2026–23569 Filed 11–18–26; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2026–13819; Project Identifier MCAI–2025–01531–R]

RIN 2120–AA64

Airworthiness Directives; Airbus Helicopters Deutschland GmbH (AHD) Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain Airbus Helicopters Deutschland GmbH (AHD) Model EC135P1, EC135P2, EC135P2+, EC135P3, EC135T1, EC135T2, EC135T2+, EC135T3 and EC635T2+ helicopters. This proposed AD was prompted by a determination that the manufacturer's service material does not provide complete instructions for the inspections after a hard landing. This proposed AD would require a one-time inspection of the tail rotor control system and, depending on the inspection results, corrective actions. This proposed AD would also require revision of the existing aircraft maintenance manual (MM) or instructions for continued airworthiness (ICA) and the existing approved maintenance or inspection program, as applicable. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this NPRM by January 4, 2027.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2026–13819; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For European Union Aviation Safety Agency (EASA) material identified in this proposed AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: *ADs@easa.europa.eu;* website: *easa.europa.eu.* You may find the EASA material on the EASA website at *ad.easa.europa.eu.*
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 10101 Hillwood Parkway, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110.

FOR FURTHER INFORMATION CONTACT: Shailesh Malla, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410 Westbury, NY 11590; phone: (817) 222–5584; email: *shailesh.malla@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments using a method listed under **ADDRESSES**. Include ''Docket No. FAA–2026–13819; Project Identifier MCAI–2025–01531–R'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Shailesh Malla, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410 Westbury, NY 11590. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2020–0102, dated May 6, 2020 (EASA AD 2020–0102) (also referred to as the MCAI), to correct an unsafe condition on certain AHD Model EC135 P1, EC135 P2, EC135 P2+, EC135 P3, EC135 T1, EC135 T2, EC135 T2+, EC135 T3, EC635 P2+, EC635 P3, EC635 T1, EC635 T2+ and EC635 T3 helicopters. The MCAI states that the master service manual (MSM) for Model EC135 and EC635 does not provide complete instructions for the inspections after a hard landing. This condition, if not corrected, could lead to missed identification of tail rotor control damage, which could result in component or system failure and reduced control of the helicopter.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2026–13819.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed EASA AD 2020–0102, which specifies procedures for inspecting the tail rotor control system and, if a discrepancy is found, accomplishing the applicable corrective actions. EASA AD 2020–0102 also specifies that accomplishing the inspection of the tail rotor control system in accordance with the instructions of the aircraft MM is an alternative method for the inspection in accordance with the service material. Additionally, EASA AD 2020–0102 specifies that revising the Aircraft Maintenance Program (AMP) of a helicopter by incorporating the qualified instructions as defined in EASA AD 2020–0102 is a terminating action for recording compliance.

The FAA also reviewed Aircraft Maintenance Manual 05–51–00, 6–3, Conditional Inspections after Special Operational Incidents—Inspection,

Dated March 28, 2025, which specifies conditional inspections after a hard landing.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

These products have been approved by the civil aviation authority (CAA) of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in EASA AD 2020–0102, described previously, as incorporated by reference, except for any differences identified as exceptions in the regulatory text of this AD. See ''Differences Between this Proposed AD and the MCAI'' for a discussion of the general differences included in this proposed AD.

Differences Between This Proposed AD and the MCAI

The MCAI applies to AHD Model EC635 P2+, EC635 P3, EC635 T1, and EC635 T3 helicopters, whereas this proposed AD would not because these model helicopters do not have an FAA type certificate. The MCAI requires accomplishing corrective actions in accordance with the qualified instructions as defined in the MCAI, whereas this proposed AD would require those corrective actions be accomplished in accordance with a method approved by the Manager, International Validation Branch, FAA; or EASA; or AHD Design Organization Approval (DOA).

Additionally, the MCAI requires for certain helicopters, inspecting the helicopter after each hard landing, whereas this proposed AD would require all applicable helicopters to perform these inspections within 12 months after the effective date of this proposed AD. Furthermore, the MCAI specifies that revising the AMP by incorporating the qualified instructions as defined in the MCAI is a terminating action for recording compliance, whereas this proposed AD would require revising the existing aircraft MM or ICA and the existing approved maintenance or inspection program, as applicable, by incorporating certain qualified instructions.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some CAA ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate EASA AD 2020–0102 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2020–0102 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in EASA AD 2020–0102 does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in EASA AD 2020–0102. Material required by EASA AD 2020–0102 for compliance will be available at *regulations.gov* under Docket No. FAA–2026–13819 after the FAA final rule is published.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 289 helicopters of U.S. registry.

The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspect the tail rotor control system	4 work-hours × $85 per hour = $340	$0	$340	$98,260
Revise maintenance program	1 work-hour × $85 per hour = $85	0	85	24,565

The conditional inspections, repairs, or replacements needed as a result of inspecting the tail rotor control system could vary significantly from helicopter to helicopter. The FAA has no way of determining the costs to accomplish these actions or the number of helicopters that may require repair.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Airbus Helicopters Deutschland GmbH (AHD): Docket No. FAA–2026–13819; Project Identifier MCAI–2025–01531–R.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 4, 2027.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Airbus Helicopters Deutschland GmbH (AHD) Model EC135P1, EC135P2, EC135P2+, EC135P3, EC135T1, EC135T2, EC135T2+, EC135T3 and EC635T2+ helicopters, certificated in any category, all serial numbers up to and including 1276.

Note 1 to paragraph (c): Helicopters with an EC135P3H designation are Model EC135P3 helicopters, and helicopters with an EC135T3H designation are Model EC135T3 helicopters.

(d) Subject

Joint Aircraft System Component (JASC) Code 6720, Tail rotor control system.

(e) Unsafe Condition

This AD was prompted by a determination that the manufacturer's service material does not provide complete instructions for the inspections after a hard landing. The FAA is issuing this AD to address and correct incomplete inspection instructions. The unsafe condition, if not addressed, could result in missed identification of tail rotor control damage, which could result in component or system failure and reduced control of the helicopter.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraphs (h) and (i) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2020–0102, dated May 6, 2020 (EASA AD 2020–0102).

(h) Exceptions to EASA AD 2020–0102

(1) Where EASA AD 2020–0102 refers to its effective date, this AD requires using the effective date of this AD.

(2) Where paragraph (1) of EASA AD 2020–0102 applies only to Group 1 helicopters, this AD requires paragraph (1) of EASA AD 2020–0102 to apply to Group 1 and Group 2 helicopters.

(3) This AD does not adopt paragraph (2) of EASA AD 2020–0102.

(4) Where paragraph (5) of EASA AD 2020–0102 specifies ''Revising the AMP of a helicopter by incorporating the qualified instructions, as defined in this AD, ensures continued accomplishment of those instructions for that helicopter. Consequently, after that AMP revision, it is not necessary that accomplishment of any action as required by this AD is recorded for AD compliance demonstration on a continued basis.'', this AD requires replacing this text with ''For Group 1 and Group 2 helicopters, within 30 days after the effective date of this AD, revise the existing maintenance manual or instructions for continued airworthiness and the existing approved maintenance or inspection program, as applicable, by incorporating the Aircraft Maintenance Manual 05–51–00, 6–3, Conditional Inspections after Special Operational Incidents—Inspection, Dated March 28, 2025''.

(5) Where the material referenced in EASA AD 2020–0102 specifies to contact the manufacturer prior to doing the special instructions after a hard landing, this AD requires corrective actions in accordance with a method approved by the Manager, International Validation Branch, FAA; or EASA; or Airbus Helicopters Deutschland GmbH Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(6) Where the material referenced in EASA AD 2020–0102 specifies to perform an ''Ease of Movement check'', this AD requires replacing that text with ''Ease of movement inspection''.

(7) This AD does not adopt the ''Remarks'' section of EASA AD 2020–0102.

(i) No Reporting Requirement

Although the material referenced in EASA AD 2020–0102 specifies to submit certain information to the manufacturer, this AD does not require that action.

(j) Special Flight Permits

Special flight permits, as described in 14 CFR 21.197 and 21.199, are not allowed.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (l) of this AD and email to: *AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(l) Additional Information

For more information about this AD, contact Shailesh Malla, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410 Westbury, NY 11590; phone: (817) 222–5584; email: *shailesh.malla@faa.gov.*

(m) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2020–0102 dated May 6, 2020.

(ii) Aircraft Maintenance Manual 05–51–00, 6–3, Conditional Inspections after Special Operational Incidents—Inspection, Dated March 28, 2025.

(3) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: *ADs@easa.europa.eu;* website: *easa.europa.eu.* You may find the EASA material on the EASA website at *ad.easa.europa.eu.*

(4) For AHD material identified in this AD, contact Airbus Helicopters, 2701 North Forum Drive, Grand Prairie, TX 75052; phone: (972) 641–0000 or (800) 232–0323; fax: (972) 641–3775; website: *airbus.com/en/products-services/helicopters/hcare-services/airbusworld.*

(5) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 10101 Hillwood Parkway, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110.

(6) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on November 17, 2026.

Steven W. Thompson,

Acting Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[Docket No. FAA–2026–13821; Project Identifier MCAI–2025–01619–T]

RIN 2120–AA64

Airworthiness Directives; Dassault Aviation Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2024–14–09, which applies to certain Dassault Aviation Model FALCON 7X, FALCON 900EX, and FALCON 2000EX airplanes. AD 2024–14–09 requires replacement of certain titanium screws, adds other locations for screw replacement, and revises the applicability from AD 2022–02–10. Since the FAA issued AD 2024–14–09, affected parts have been found in other areas of certain FALCON 7X airplanes as well as in additional FALCON 7X airplanes. This proposed AD would continue to require the actions in AD 2024–14–09 and would require expanding the applicability to additional airplanes, expanding the locations for screw replacement, and revising the compliance times for parts replacement. This AD would also limit the installation of affected parts under certain conditions. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by January 4, 2027.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2026–13821; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For Dassault Aviation material identified in this proposed AD, contact Dassault Falcon Jet Corporation, Teterboro Airport, P.O. Box 2000, South Hackensack, NJ 07606; telephone 201–440–6700; website *dassaultfalcon.com*.
- For European Union Aviation Safety Agency (EASA) material identified in this proposed AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu*. You may find this material on the EASA website at *ad.easa.europa.eu*. It is also available at *regulations.gov* under Docket No. FAA–2026–13821.
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

FOR FURTHER INFORMATION CONTACT: Amanda F. Pieraccini, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7329; email: *9-AVS-AIR-BACO-COS@faa.gov*.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments using a method listed under the **ADDRESSES** section. Include ''Docket No. FAA–2026–13821; Project Identifier MCAI–2025–01619–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Amanda F. Pieraccini, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7329; email: *9-AVS-AIR-BACO-COS@faa.gov*. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2024–14–09, Amendment 39–22790 (89 FR 72966, September 9, 2024) (AD 2024–14–09), for certain Dassault Aviation Model FALCON 7X, FALCON 900EX, and FALCON 2000EX airplanes. AD 2024–14–09 was prompted by MCAI originated by EASA, which is the Technical Agent for the Member States of the European Union. EASA issued EASA AD 2023–0207, dated November 21, 2023 (EASA AD 2023–0207), to correct an unsafe condition.

AD 2024–14–09 requires replacement of certain titanium screws, adds other locations for screw replacement, and revises the applicability. The FAA issued AD 2024–14–09 to address failure of an affected screw installed in a critical location, possibly resulting in reduced structural integrity of the airplane.

Actions Since AD 2024–14–09 Was Issued

Since the FAA issued AD 2024–14–09, EASA superseded EASA AD 2023–0207 and issued EASA AD 2025–0228R1, dated February 6, 2026 (EASA AD 2025–0228R1) (also referred to as the MCAI), to correct an unsafe condition for certain Dassault Aviation Model FALCON 7X, FALCON 900EX, and FALCON 2000EX airplanes. The MCAI states that since EASA issued EASA AD 2023–0207, it was determined that affected parts have been installed in additional areas of certain Model FALCON 7X airplanes already included in the applicability of EASA AD 2023–0207. The MCAI also states that it was

determined that additional Model FALCON 7X airplanes were not included in the applicability of EASA AD 2023–0207. The MCAI further states that the compliance time for parts replacement specified in EASA AD 2023–0207 can be defined in flight cycles (FC) only; therefore, the calendar-based compliance times were removed.

The FAA is proposing this AD to address failure of an affected screw installed in a critical location, possibly resulting in reduced structural integrity of the airplane. You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2026–13821.

Explanation of Retained Requirements

Although this proposed AD does not explicitly restate the requirements of AD 2024–14–09, this proposed AD would retain all of the requirements of AD 2024–14–09. Those requirements are referenced in EASA AD 2025–0228R1, which, in turn, is referenced in paragraph (g) of this proposed AD.

Material Incorporated by Reference Under 1 CFR Part 51

EASA AD 2025–0228R1 specifies procedures for replacing certain Decomatic titanium screws, including an inspection of the bore dimension and corrective actions (oversizing or repair). EASA AD 2025–0228R1 also limits installation of certain Decomatic titanium screws.

This proposed AD would also require Dassault Service Bulletin 7X–467, Revision 2, dated March 20, 2023, which the Director of the Federal Register approved for incorporation by reference as of October 15, 2024 (89 FR 72966, September 9, 2024).

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI and material referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in EASA AD 2025–0228R1 described previously, except for any differences identified as exceptions in the regulatory text of this proposed AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate EASA AD 2025–0228R1 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2025–0228R1 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in EASA AD 2025–0228R1 does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times'', compliance with this AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in EASA AD 2025–0228R1. Service information required by EASA AD 2025–0228R1 for compliance will be available at *regulations.gov* under Docket No. FAA–2026–13821 after the FAA final rule is published.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 52 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Up to 250 work-hours × $85 per hour = $21,250.	Up to $524 *	Up to $21,774	Up to $1,132,248.

* The FAA estimates that the rental of special tooling to accomplish replacement of any affected Decomatic titanium screw on Model FALCON 7X airplanes, serial number (S/N) 423 through 443 (inclusive), to be $524 per day.

According to the manufacturer, some or all of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected individuals. The FAA does not control warranty coverage for affected individuals. As a result, the FAA has included all known costs in the cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2024–14–09, Amendment 39–22790 (89 FR 72966, September 9, 2024); and

■ b. Adding the following new AD:

Dassault Aviation: Docket No. FAA–2026–13821; Project Identifier MCAI–2025–01619–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 4, 2027.

(b) Affected ADs

This AD replaces AD 2024–14–09, Amendment 39–22790 (89 FR 72966, September 9, 2024) (AD 2024–14–09).

(c) Applicability

This AD applies to Dassault Aviation airplanes identified in paragraphs (c)(1) through (3) of this AD, certificated in any category, as identified in European Union Aviation Safety Agency (EASA) AD 2025–0228R1, dated February 6, 2026 (EASA AD 2025–0228R1).

(1) Model FALCON 7X airplanes.

(2) Model FALCON 900EX airplanes.

(3) Model FALCON 2000EX airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 51, Standard Practices/Structures.

(e) Unsafe Condition

This AD was prompted by a report of an improper heat treatment process applied during the manufacturing of certain Decomatic titanium screws, and by the determination that affected parts in additional areas on certain airplanes, as well as additional airplanes, are subject to the unsafe condition. The FAA is issuing this AD to address failure of an affected screw installed in a critical location, possibly resulting in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2025–0228R1.

(h) Exceptions to EASA AD 2025–0228R1

(1) Where EASA AD 2025–0228R1 refers to October 30, 2025 (the effective date of the original issue of EASA AD 2025–0228), this AD requires using the effective date of this AD.

(2) Where the ''Ref Publications'' section of EASA AD 2025–0228R1 specifies ''Dassault SB 7X–467 original issue dated 16 November 2020, Rev. 1 dated 12 December 2022, Rev. 2 dated 20 March 2023, Rev. 03 dated 11 March 2024, Rev. 04 dated 22 April 2024, Rev. 05 dated 09 September 2024 and Rev. 06 dated 10 April 2025 (including its Erratum dated 09 June 2025)'', this AD requires replacing that text with ''Dassault Service Bulletin 7X–467, Rev. 06 dated April 10, 2025 (including its Erratum dated June 09, 2025)''.

(3) This AD does not adopt the ''Remarks'' section of EASA AD 2025–0228R1.

(i) Credit for Previous Actions

(1) For Model FALCON 7X airplanes: This paragraph provides credit for the actions specified in paragraph (g) of this AD, if those actions were performed before October 15, 2024 (the effective date of AD 2024–14–09) using Dassault Service Bulletin 7X–467, dated November 16, 2020, provided the additional work specified in Dassault Service Bulletin 7X–467, Revision 2, dated March 20, 2023, and the additional work specified in the applicable SB as defined in EASA AD 2025–0228R1 is accomplished within the applicable compliance time specified in EASA AD 2025–0228R1.

(2) For Model FALCON 7X airplanes: This paragraph provides credit for the actions specified in paragraph (g) of this AD, if those actions were performed before the effective date of this AD using Dassault Service Bulletin 7X–467, Revision 2, dated March 20, 2023, Dassault Service Bulletin 7X–467, Revision 3, dated March 11, 2024, Dassault Service Bulletin 7X–467, Revision 4, dated April 22, 2024, or Dassault Service Bulletin 7X–467, Revision 5, dated September 9, 2024, provided the additional work specified in the applicable SB as defined in EASA AD 2025–0228R1 is accomplished within the applicable compliance time specified in EASA AD 2025–0228R1.

(j) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (k)(1) of this AD and email to: *AMOC@faa.gov*. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or EASA; or Dassault Aviation's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(k) Additional Information

(1) Amanda F. Pieraccini, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7329; email: *9-AVS-AIR-BACO-COS@faa.gov*.

(2) Material identified in this AD that is not incorporated by reference is available at the address specified in paragraph (l)(5) of this AD.

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following material was approved for IBR on [DATE 35 DAYS AFTER PUBLICATION OF THE FINAL RULE].

(i) European Union Aviation Safety Agency (EASA) AD 2025–0228R1, dated February 6, 2026.

(ii) [Reserved]

(4) The following material was approved for IBR on October 15, 2024 (89 FR 72966, September 9, 2024).

(i) Dassault Service Bulletin 7X–467, Revision 2, dated March 20, 2023.

(ii) [Reserved]

(5) For Dassault Aviation material identified in this AD, contact Dassault Falcon Jet Corporation, Teterboro Airport, P.O. Box 2000, South Hackensack, NJ 07606; telephone 201–440–6700; website *dassaultfalcon.com*.

(6) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu*. You may find this material on the EASA website at *ad.easa.europa.eu*.

(7) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(8) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov*.

Issued on November 17, 2026.

Steven W. Thompson,

Acting Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF THE TREASURY

Financial Crimes Enforcement Network

31 CFR Part 1010

RIN 1506–AB78

Customer Due Diligence Requirements for Covered Financial Institutions

AGENCY: Financial Crimes Enforcement Network (FinCEN), Treasury.

ACTION: Proposed rule.

SUMMARY: FinCEN is issuing this proposed rule to strengthen customer due diligence requirements under the Customer Due Diligence Rule consistent with the policy goals of, and as directed by, Executive Order 14406, *Restoring Integrity to America's Financial System.* Specifically, the proposal ensures financial institutions covered by the Customer Due Diligence Rule collect sufficient information to verify the identities of beneficial owners of legal entity customers and maintain the authority, where warranted, to obtain additional information, including information relevant to whether the beneficial owners of legal entity customers possess lawful immigration status and employment authorization in the United States when such information is relevant to assessing risks.

DATES: Comments must be received by January 19, 2027.

ADDRESSES: Comments must be submitted in one of the following two ways (please choose only one of the ways listed):

• Electronically at *https://www.regulations.gov.* Follow the ''Submit a comment'' instructions under Docket FINCEN–2026–0298. If you are reading this document on federalregister.gov, you may use the green ''SUBMIT A PUBLIC COMMENT'' button beneath this rulemaking's title to submit a comment to the *regulations.gov* docket.

• You may mail written comments to the following address: Regulatory and Strategic Affairs Division, Financial Crimes Enforcement Network, P.O. Box 39, Vienna, VA 22183. Mailed comments must be received by the close of the comment period.

All comments will be made available to the public. Do not include personal identifiable information in submissions; submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication a comment that contains threats of violence, classified information, or information potentially related to a whistleblower submission or that identifies a whistleblower. Comments may be submitted anonymously. When multiple comments are submitted with identical or near-identical content, FinCEN may post only a single representative example of identical or substantially identical comments. All related documents and comments are posted on *https://www.regulations.gov.*

In accordance with 5 U.S.C. 553(b)(4), a summary of this proposed rule may be found at *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: FinCEN's Regulatory Support Section by submitting an inquiry at *www.fincen.gov/contact.*

SUPPLEMENTARY INFORMATION:

I. Scope

This proposed rule would amend the Customer Due Diligence (CDD) Rule, which was promulgated under authorities provided by the Bank Secrecy Act (BSA), to strengthen certain customer due diligence requirements. This proposed rule supports the efforts of the Department of the Treasury to make the CDD Rule more effective, risk-based, and focused on the greatest threats to financial institutions and national security, as well as promote Treasury's efforts to reduce unnecessary regulatory burden consistent with Executive Order 14192, *Unleashing Prosperity Through Deregulation.* This proposal implements the directive in Executive Order 14406, *Restoring Integrity to America's Financial System* (hereinafter ''Executive Order 14406'') to propose changes to applicable BSA regulations to strengthen risk-based customer due diligence requirements.

II. Background and Authority

A. The Bank Secrecy Act

Enacted in 1970 and amended several times since, the BSA is designed to combat money laundering, the financing of terrorism, and other illicit finance risks.[1] Congress has authorized the Secretary of the Treasury to administer the BSA. The Secretary has in turn delegated the authority to implement, administer, and enforce compliance with the BSA and its associated regulations to the Director of FinCEN.[2]

Since its original enactment, Congress has expanded the BSA to address various aspects of anti-money laundering (AML) and countering the financing of terrorism (CFT) compliance, including through expansion of the BSA. In 1992, the Annunzio-Wylie Anti-Money Laundering Act[3] gave the Secretary authority to require financial institutions, as defined in the BSA regulations, to ''carry out'' AML programs and to prescribe minimum standards for such programs, including: ''(A) the development of internal policies, procedures, and controls; (B) the designation of a compliance officer; (C) an ongoing employee training program; and (D) an independent audit function to test programs.''[4]

Later, the USA PATRIOT Act further amended the BSA, reinforcing the Annunzio-Wylie framework by making it mandatory for financial institutions to maintain AML programs that meet minimum prescribed standards.[5] The USA PATRIOT Act also, among other things, directed the Secretary to set minimum standards for financial institutions regarding customer identity in connection with the opening of accounts, commonly referred to as customer identification program (CIP) requirements,[6] and expanded the definition of ''financial institution'' under the BSA, and by extension the AML program requirement, to cover certain other financial industry participants (*e.g.,* credit unions and futures commission merchants).[7]

[1] Certain parts of the Currency and Foreign Transactions Reporting Act, its amendments, and the other statutes relating to the subject matter of that Act, are collectively referred to as the Bank Secrecy Act or BSA. These statutes are codified at 12 U.S.C. 1829b, 12 U.S.C. 1951–1960, and 31 U.S.C. 5311–5314 and 5316–5336 and notes thereto, with implementing regulations at 31 CFR chapter X.

[2] *See* Treasury Order 180–01, at ¶ 3 (Jan. 14, 2020), *https://home.treasury.gov/about/general-information/orders-and-directives/treasury-order-180-01; see also* 31 U.S.C. 310(b)(2)(I) (providing that the Director of FinCEN shall ''[a]dminister the requirements of subchapter II of chapter 53 of this title, chapter 2 of title I of Public Law 91–508, and section 21 of the Federal Deposit Insurance Act, to the extent delegated such authority by the Secretary of the Treasury'').

[3] Section 1517 of Public Law 102–550, 106 Stat. 3672 (Oct. 28, 1992) (Annunzio-Wylie).

[4] Section 1517(b) of Public Law 102–550 (amending 31 U.S.C. 5318(h)(1)).

[5] *See* 31 U.S.C. 5318(h), as added by section 352 of the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (USA PATRIOT Act), Public Law 107–56, 115 Stat. 272 (Oct. 26, 2001).

[6] *See* 31 U.S.C. 5318(*l*) as added by section 326 of the USA PATRIOT Act.

[7] *See* 31 U.S.C. 5312(a)(2)(E) and 31 U.S.C. 5312(c), as added by section 321 of the USA PATRIOT Act.

Finally, on January 1, 2021, Congress enacted the William M. (Mac) Thornberry National Defense Authorization Act for Fiscal Year 2021 (FY 2021 NDAA), of which the Anti-Money Laundering Act (AML Act) was a component.[8] Among the purposes of the AML Act, as stated by Congress, was to reinforce that required policies, procedures and controls should support the need for AML/CFT programs to be ''risk-based.'' [9] Consistent with the goals of the AML Act, Treasury recognizes the urgent need to modernize the AML/CFT regime in the United States so that it is effective, risk-based, and focused on the greatest threats to financial institutions and national security.[10]

B. The Customer Due Diligence Rule

FinCEN has implemented these statutory mandates and authorities by promulgating program rules, among other requirements. Most notably in a 2016 rulemaking, FinCEN, in consultation with the Federal functional regulators, incorporated both general and specific customer due diligence (CDD) requirements into FinCEN's regulations.[11]

First, the 2016 rulemaking required banks, brokers and dealers in securities, mutual funds, and futures commission merchants and introducing brokers in commodities (collectively ''covered financial institutions'') to implement and maintain, as part of their AML programs, ''appropriate risk-based procedures for conducting ongoing customer due diligence,'' including ''[u]nderstanding the nature and purpose of customer relationships for the purposes of developing a customer risk profile'' and ''[c]onducting ongoing monitoring'' both ''to identify and report suspicious transactions'' and ''on a risk basis, to maintain and update customer information.'' [12] This became what is now colloquially known as the ''fifth pillar'' of an AML compliance program.[13]

Second, the CDD rulemaking codified at 31 CFR 1010.230 a requirement that covered financial institutions ''identify and verify beneficial owners of legal entity customers.'' [14] Under what became known as the ''ownership prong'' of this requirement, covered financial institutions collect the names and identifying information of ''[e]ach individual, if any, who, directly or indirectly . . . owns 25 percent or more of the equity interests'' of the legal entity customer.[15] Under what became known as the ''control prong'' of this requirement, covered financial institutions collect the name and identifying information of ''[a] single individual with significant responsibility to control, manage, or direct a legal entity customer.'' [16] For the status of the specified individuals as beneficial owners of the legal entity customer, covered financial institutions could ''rely on the information supplied by the legal entity customer . . . provided that [the covered financial institution] has no knowledge of facts that would reasonably call into question the reliability of such information.'' [17] For verification of the identity of the individual beneficial owners, covered financial institutions, at a minimum, would have to follow procedures containing all of the elements required for verification of individual account-holders under applicable CIP regulations.[18] Covered financial institutions were required to undertake this identification and verification ''at the time a new account is opened,'' meaning every time that a legal entity customer opened a new account.[19]

C. Recent Modifications to CDD Rule Obligations

In 2026, FinCEN used its authority under the BSA to grant exceptive relief to covered financial institutions from the requirement to identify and verify the identities of beneficial owners of legal entity customers at each new account opening.[20] That order, FIN–2026–R001, acknowledged that the CDD Rule requires a covered financial institution to identify and verify a legal entity customer's beneficial owners each time that customer opens an account with the covered financial institution, regardless of how little time passes between account openings or whether the covered financial institution has knowledge of facts that would reasonably call into question the reliability of beneficial ownership information last obtained about the customer. Consistent with the Trump Administration's policy of reducing unnecessary regulatory burden and enhancing the risk-based framework of the AML/CFT regulations, FinCEN granted relief so that a covered financial

[8] William M. (Mac) Thornberry National Defense Authorization Act for Fiscal Year 2021, Public Law 116–283, 134 Stat. 3388 (Jan. 1, 2021).

[9] Section 6002(4) of the FY 2021 NDAA; *see also* 31 U.S.C. 5311(2), (3) as added by section 6101 of the AML Act (establishing that among the purposes of the BSA are to prevent money laundering and terrorist financing through the establishment of ''risk-based programs'' and facilitate the ''tracking of money that has been sourced through criminal activity''). Section 5318(h), as amended by section 6101 the AML Act, also requires that when prescribing minimum standards for programs under this section, the Secretary shall take into account certain factors: (i) financial institutions are spending private compliance funds for a public and private benefit, including protecting the United States financial system from illicit finance risks; (ii) extension of financial services to the underbanked and the facilitation of financial transactions, including remittances, coming from the United States and abroad in ways that simultaneously prevent criminal persons from abusing formal or informal financial services networks are key U.S. policy goals; (iii) effective AML/CFT programs safeguard national security and generate significant public benefits by preventing flow of illicit funds in the financial system and by assisting law enforcement and national security agencies with identification and prosecution of persons attempting money laundering and other illicit activity in the financial system; and (iv) AML/CFT programs should be reasonably designed to assure and monitor compliance with BSA requirements and be risk-based, including ensuring that more attention and resources of financial institutions be directed towards higher risk customers and activities than lower risk. FinCEN took these factors into consideration when preparing this proposal.

[10] *See, e.g.,* FinCEN, *Anti-Money Laundering and Countering the Financing of Terrorism Programs,* 91 FR 18704, 18708 (Apr. 10, 2026) (discussing Treasury's guiding principles for BSA reform and providing examples of steps taken to implement a modernized BSA regulatory and supervisory regime).

[11] FinCEN, *Customer Due Diligence Requirements for Financial Institutions,* 81 FR 29398 (May 11, 2016).

[12] FinCEN, *Customer Due Diligence Requirements for Financial Institutions,* 81 FR at 29457 (setting out the regulatory text); *see also id.* at 29450, note 185; 31 CFR 1020.210(b)(2)(v), 1023.210(b)(5), 1024.210(b)(5), 1026.210(b)(5).

[13] As indicated above, the other pillars are the four requirements listed in 31 U.S.C. 5318(h): ''(A) the development of internal policies, procedures, and controls; (B) the designation of a compliance officer; (C) an ongoing employee training program; and (D) an independent audit function to test programs.''

[14] FinCEN, *Customer Due Diligence Requirements for Financial Institutions,* 81 FR at 29451 (*codified at* 31 CFR 1010.230(a)).

[15] *Id.* (*codified at* 31 CFR 1010.230(d)(1)).

[16] *Id.* (*codified at* 31 CFR 1010.230(d)(2)).

[17] *Id. (codified at* 31 CFR 1010.230(b)(2)).

[18] *Id.* (*codified at* 31 CFR 1010.230(b)(2)). The CIP regulations are category-specific rules establishing the requirements for some categories of financial institutions, including all covered financial institutions, in connection with customer identification and verification of identity. *See* 31 CFR 1020.220 (CIP for banks), 31 CFR 1023.220 (CIP for brokers and dealers in securities), 31 CFR 1024.220 (CIP for mutual funds), 31 CFR 1026.220 (CIP for futures commission merchants and introducing brokers in commodities).

[19] FinCEN, *Customer Due Diligence Requirements for Financial Institutions,* 81 FR at 29451 (*codified at* 31 CFR 1010.230(a)(1)). CDD Rule requirements were effective long before the passage of the Corporate Transparency Act, and the two legal authorities differ in numerous ways. The CTA's objective, creating a nationwide system of direct reporting to the federal government of highly useful information related to beneficial ownership, is different from that of the CDD Rule, as are its definition of beneficial owner, the information in which it is interested, the entities reporting that information, and the recipients of that information.

[20] *See* FinCEN, FIN–2026–R001, *Exceptive Relief from Requirement to Identify and Verify Beneficial Owners at Each Account Opening* (Feb. 13, 2026), *https://www.fincen.gov/system/files/2026-02/FinCEN-Order-CCDExceptiveRelief.pdf.*

institution—instead of being required to undertake identification and verification ''at the time a new account is opened''—''may instead limit its identification and verification of the identities of beneficial owners . . . to the following scenarios: (1) when a legal entity customer first opens an account with a covered financial institution; (2) any time thereafter when the covered financial institution has knowledge of facts that would reasonably call into question the reliability of beneficial ownership information previously obtained about the legal entity customer; and (3) as needed based on a covered financial institution's risk-based procedures for conducting ongoing customer due diligence.'' [21] FinCEN noted in its exceptive relief order that it would consider whether to codify this relief via a rulemaking.

D. Executive Order 14406: Restoring Integrity to America's Financial System

On May 19, 2026, President Donald J. Trump issued Executive Order 14406 to further the Administration's policy of ''restor[ing] integrity to America's financial system, safeguard[ing] financial institutions against structural risks, and deter[ring] fraud and abuse.'' [22] The Executive Order highlighted risks to the financial system caused by illicit cross-border financial activity and extension of credit or financial services to the inadmissible and removable alien population. To address these risks, it emphasized the importance of the Federal government adopting tailored measures to safeguard the financial system from illicit use and promote safe and sound lending and other practices by financial institutions and stated the need for financial institutions to have in place ''proper know-your-customer practices'' to prevent abuse of the system and be attentive to ''credit risks posed by the extension of . . . consumer credit to the inadmissible and removable alien population.'' [23] The Executive Order requires actions by various Federal agencies, including changes to the CDD Rule and consideration of changes to CIP rules.[24]

This proposal would implement section 3(b) of Executive Order 14406. Section 3(b) directs the Secretary—in consultation with the ''appropriate Federal functional financial regulators,'' defined in the Executive Order as the Board of Governors of the Federal Reserve System (FRB), the Office of the Comptroller of the Currency (OCC), the Federal Deposit Insurance Corporation (FDIC), and the National Credit Union Administration (NCUA)—to propose changes to applicable implementing regulations of the BSA to strengthen risk-based customer due diligence requirements for covered financial institutions. Section 3(b) of the Executive Order specifies that such changes should ensure that ''(i) institutions collect and verify sufficient customer identity information to reasonably identify the nominal and beneficial owners of accounts in order to assess risks related to illicit finance, sanctions evasion, fraud, or other unlawful activity; and (ii) institutions maintain the authority, where warranted by other risk indicators or supervisory concerns, to obtain additional information necessary to resolve material compliance concerns, including information relevant to whether account holders possess lawful immigration status and employment authorization in the United States when such information is relevant to assessing risks associated with fraud, identity misrepresentation, sanctions evasion, or other illicit financial activity, as part of a risk-based customer due diligence program.''

E. Other FinCEN Proposed Rules

In developing its proposal to implement section 3(b) of Executive Order 14406, FinCEN has considered other relevant FinCEN regulations—both those in effect and those in consideration—that are relevant to customer due diligence and mitigation of customer risk to inform the specifics of this proposed rule.

FinCEN has issued proposed rules further emphasizing the risk-based approach to AML/CFT programs for covered financial institutions, as well as permitted payment stablecoin issuers (PPSIs).[25] Those rules, if finalized as proposed, would, among other things, require each covered financial institution and PPSI to establish a risk-based set of internal policies, procedures, and controls that must be reasonably designed to conduct ongoing customer due diligence. Under these proposed requirements, if finalized, covered financial institutions must establish and maintain a written AML/CFT program that includes appropriate risk-based procedures for conducting ongoing customer due diligence, to include, but not be limited to, understanding the nature and purpose of customer relationships for the purpose of developing a customer risk profile.

Notably, those proposals are consistent with Executive Order 14406's directive to adopt tailored measures to safeguard the financial system from illicit use and ensure that institutions maintain risk-based customer due diligence programs.[26] Most importantly,

[25] FinCEN, *Anti-Money Laundering and Countering the Financing of Terrorism Programs,* 91 FR 18704 (Apr. 10, 2026); FinCEN, *Permitted Payment Stablecoin Issuer Anti-Money Laundering/Countering the Financing of Terrorism Program and Sanctions Program Requirements,* 91 FR 18582 (Apr. 10, 2026); *see also* FinCEN, OCC, FRB, FDIC, and NCUA, *Permitted Payment Stablecoin Issuer Customer Identification Program,* 91 FR 37234 (June 22, 2026). FinCEN's proposal implementing the GENIUS Act's anti-money laundering obligations for PPSIs also proposes changes to 31 CFR 1010.230. The potential changes under both proposals would be complementary rather than conflicting.

[26] This proposal is one element of broader CDD Rule revisions, including those required by the Corporate Transparency Act. The CTA directed Treasury to revise the CDD Rule to: (1) bring it into conformity with the AML Act of 2020, including the CTA; (2) account for financial institutions' access to beneficial ownership information reported to FinCEN so financial institutions may confirm beneficial ownership information provided directly to them for the purpose of facilitating their compliance with anti-money laundering, countering the financing of terrorism, and customer due diligence requirements; and (3) reduce any burdens on financial institutions and legal entity customers that are, in light of the CTA, unnecessary or duplicative. Section 6403(d)(1)(A)-(C) of the FY 2021 NDAA. The current proposal is not the

the proposals would, if finalized, ensure internal policies, procedures, and controls—including those relating to conducting ongoing customer due diligence—must be reasonably designed to mitigate assessed risk, including by allocating more attention and resources toward higher-risk customers and activities rather than toward lower-risk customers and activities.[27]

III. Overview of the Proposal

In drafting this proposed rule, FinCEN has considered how it can best strengthen the CDD Rule by adopting tailored measures to safeguard the financial system, including by ensuring that covered financial institutions have risk-based collection and verification requirements and direct compliance resources towards higher risk customers as directed by Executive Order 14406. In addition to implementing the directive in section 3(b) of Executive Order 14406, FinCEN also seeks to further the Trump Administration's efforts to modernize the AML/CFT regime by making it more effective, risk-based, and focused on the greatest threats to national security, while reducing unnecessary regulatory burden.

After considering the existing regulations, proposals, and obligations, as well as the directives in Executive Order 14406, FinCEN assesses that targeted amendments to the CDD Rule—specifically, § 1010.230—best effectuate the goals of Executive Order 14406. Specifically, this proposal includes three targeted revisions to the CDD Rule codified at § 1010.230, in addition to other minor regulatory clarifications.

First, consistent with Executive Order 14406, the proposal would strengthen risk-based customer due diligence requirements for covered financial institutions by making explicit that, where warranted by other risk indicators or supervisory concerns, a covered financial institution may obtain additional information necessary to resolve material compliance concerns, including information relevant to whether account holders possess lawful immigration status and employment authorization in the United States when such information is relevant to assessing risks associated with fraud, identity misrepresentation, sanctions evasion, or other illicit financial activity, as part of a risk-based customer due diligence program.

Second, FinCEN is proposing to formally incorporate the exceptive relief provided in FIN–2026–R001. This change would formally eliminate the requirement for covered financial institutions to repeatedly collect and verify beneficial ownership information in cases where there is no reason to believe that the customer's beneficial ownership information has changed since it was last collected, and the circumstances do not indicate a risk-based need to collect and verify beneficial ownership information. By codifying this relief, FinCEN is ensuring that covered financial institutions will continue to benefit from the flexibility to direct compliance resources consistent with their own assessments of risk.

Third, the proposal would specify in § 1010.230 the pieces of information a covered financial institution must collect relating to beneficial owners. This would involve moving the specific details of the requirement to collect information about beneficial owners from the rule's Appendix A into the rule itself. Most, but not all, of those details would not change. The proposal would, however, restrict the ability to satisfy the information collection requirement by collecting a beneficial owner's Individual Taxpayer Identification Number (ITIN). Additional flexibilities described in the proposal would allow institutions to obtain information from third parties. FinCEN assesses that these proposed changes would ensure that covered financial institutions collect sufficient, appropriate information to be able to verify the identities of beneficial owners while making it less burdensome for covered financial institutions to reasonably identify beneficial owners. As a result, FinCEN expects covered financial institutions will be both able to use their resources more efficiently and better positioned to assess risks related to illicit finance, sanctions evasion, fraud, or other unlawful activity.

In developing this proposal, as directed by Executive Order 14406, FinCEN consulted with the Board of Governors of the Federal Reserve System, the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the National Credit Union Administration. Additionally, FinCEN consulted the staff of the Securities and Exchange Commission and the Commodity Futures Trading Commission, which are the primary Federal functional regulators for additional categories of institutions covered by the CDD Rule, specifically brokers and dealers in securities, mutual funds, and futures commission merchants and introducing brokers.[28]

IV. Section-By-Section Analysis

A. Proposed Amendment to 31 CFR 1010.230(a)—In General

As mentioned above, this rulemaking is rooted in FinCEN's authority to ''prescribe minimum standards for programs'' intended to ''guard against money laundering and the financing of terrorism through financial institutions . . . including . . . the development of internal policies, procedures, and controls[.]'' [29] Consistent with Executive Order 14406's emphasis on assessing the risk associated with beneficial owners, the proposed language would clarify that covered financial institutions are required to establish and maintain written procedures reasonably designed to identify and verify *the identity of* beneficial owners of legal entity customers. This proposed addition of the words ''the identity of'' to § 1010.230(a) is intended to make clear that covered financial institutions are required to collect and verify *identifying information* on a beneficial owner (*i.e.,* to verify the individual's existence and identity), not whether that individual is actually a beneficial owner of the legal entity that is the covered financial institution's customer. This is consistent with language in the current rule that a covered financial institution may rely on the information supplied by the legal entity customer regarding the identity of its beneficial owner or owners, provided that it has no knowledge of facts that would reasonably call into question the reliability of such information.[30] This proposed language is intended as a clarification and does not change covered financial institutions' existing obligations to verify the identities of beneficial owners.

FinCEN is also proposing to add ''countering the financing of terrorism'' to the reference in § 1010.230 to ''anti-

revision to the CDD Rule that addresses the issues specified by the CTA. FinCEN recently issued a final rule regarding beneficial ownership reporting requirements, which limits reporting to foreign entities registered to do business in the United States. FinCEN, *Beneficial Ownership Information Reporting Requirement Revision,* 91 FR 52508 (Aug. 14, 2026). FinCEN has determined that, given how recently the new beneficial ownership reporting regime has been finalized, such changes are more appropriately considered as part of a separate rulemaking. Additionally, FinCEN has proposed, as required by the GENIUS Act, applying CDD obligations to PPSIs. *See* OFAC and FinCEN, *Permitted Payment Stablecoin Issuer Anti-Money Laundering/Countering the Financing of Terrorism Program and Sanctions Program Requirements,* 91 FR at 18604. This proposal, with respect to PPSIs, if finalized, would apply to PPSIs as a category of institution covered by CDD obligations.

[27] *See, e.g.,* 91 FR at 18717–18.

[28] As noted in note 26 above, if FinCEN's proposed rule regarding PPSIs is finalized, the list will also include PPSIs.

[29] *See* 31 U.S.C. 5318(h)(1)(A), (2).

[30] FinCEN, *Customer Due Diligence Requirements for Financial Institutions,* 81 FR at 29407.

money laundering compliance programs.'' The inclusion of countering the financing of terrorism is a technical change, consistent with other FinCEN proposals, which reflects a statutory change requiring institutions to account for risks related to terrorist financing.[31]

B. Proposed Amendment to 31 CFR 1010.230(b)—Identification and Verification

1. Proposed 31 CFR 1010.230(b)(1)(i)—Timing

The proposal would codify the exemptive relief provided in FIN–2026–R001 by amending § 1010.230(b)(1)(i). FinCEN expects that this proposed change, if finalized, will ensure covered financial institutions continue to benefit from the flexibility to allocate compliance resources to focus on customers that present higher risks related to illicit finance, sanctions evasion, fraud, and other unlawful activity as indicated in Executive Order 14406.

The current rule requires a covered financial institution to identify the beneficial owner(s) of each legal entity customer every time a new account is opened, subject to certain limited exemptions. Covered financial institutions and their trade associations have characterized this requirement as unnecessarily burdensome, particularly in situations involving legal entity customers whose business happens to involve the frequent creation of new accounts. Where there is no reason to think that the customer's beneficial ownership information has changed since last collected, they have pointed out, repeated collection and verification of the same information wastes resources that, deployed in a more risk-conscious manner, could improve overall risk management.

The proposed rule would address these concerns by replacing the rigid account opening requirement with a more flexible, risk-based approach. The proposed rule provides that a covered financial institution must identify the beneficial owner(s) of a legal entity customer: (1) when the legal entity customer first opens an account with the covered financial institution; (2) any time thereafter when the covered financial institution has knowledge of facts that would reasonably call into question the reliability of beneficial ownership information previously obtained about the legal entity customer; and (3) as needed based on a covered financial institution's risk-based procedures for conducting ongoing customer due diligence. The proposal would eliminate the requirement for covered financial institutions to collect a legal entity customer's beneficial ownership information at each new account opening except, among other circumstances, as needed based on a covered financial institution's risk-based procedures for conducting ongoing customer due diligence. Whether a financial institution has knowledge of facts that would reasonably call into question the reliability of previously obtained beneficial ownership information would depend upon the facts and circumstances. Notably, if a covered financial institution elects, as part of its risk-based procedures, to continue collecting beneficial ownership information at each account opening, it would be permitted to do so under the proposed rule. FinCEN expects this change would, consistent with the policy goals of Executive Order 14406, improve the risk-based nature of the CDD Rule by allowing financial institutions to focus on higher risk customers, including those that present risks related to illicit finance, sanctions evasion, fraud, and other unlawful activity.

FinCEN requests comment on the timing element of the proposal. Specifically, FinCEN seeks comment on whether ''any time thereafter when the covered financial institution has knowledge of facts that would reasonably call into question the reliability of beneficial ownership information previously obtained about the legal entity customer'' is an appropriate trigger for identification and verification of beneficial owners.

Additionally, one of the three circumstances in which FinCEN's exceptive relief specifies that beneficial ownership information should be collected—and therefore one of the circumstances in which this proposal requires that it be collected—is ''when the covered financial institution has knowledge of facts that would reasonably call into question the reliability of beneficial ownership information previously obtained about the legal entity customer.'' FinCEN requests comment on its use of ''reliability.'' If, for example, the covered financial institution has reason to believe there has been a change in ownership of the legal entity, the covered financial institution might not be questioning the ''reliability'' so much as the continuing accuracy of the information originally provided. FinCEN therefore requests comment on whether ''reliability'' should be used, defined in a more specific fashion, or supplemented.

2. Proposed 31 CFR 1010.230(b)(1)(ii)—Information To Collect

The proposed rule would make two changes relating to the information potentially collected by financial institutions under § 1010.230. Both changes support the policy directives of Executive Order 14406 by ensuring institutions collect information sufficient to reasonably identify the beneficial owners of legal entity customers for the specific purpose of assessing risks related to illicit finance, sanctions evasion, fraud, or other unlawful activity. One change would make explicit the information a covered financial institution must collect, while the second would ensure that covered financial institutions can collect additional information, where warranted by other risk indicators or supervisory concerns, to assess risks associated with fraud, identity misrepresentation, sanctions evasion, or other illicit financial activity.

This combination reinforces the original CDD Rule's balancing of categorical and risk-based elements. FinCEN has assessed that this balance not only ensures that a covered financial institution will collect sufficient information with regard to beneficial owners of its legal entity customers, but also provides flexibility for a covered financial institution to collect additional information for particular beneficial owners where warranted by risk. In doing so, FinCEN aims to strengthen the risk-based element of the CDD Rule, including by ensuring that institutions maintain the authority to collect additional information based on risk, while still maintaining the categorical aspect of the CDD Rule.

The proposed rule in general requires that a covered financial institution must obtain information about each beneficial owner of a legal entity customer sufficient to allow the institution to identify, and to verify the identity of, the beneficial owner. FinCEN proposes these changes to make plain the specific information that covered financial institutions are required to obtain about beneficial owners of legal entities. The proposed rule specifies a discrete list of information that a covered financial institution must obtain about each beneficial owner of a legal entity customer, which includes a qualifying identifying number for the individual.

[31] *See, e.g.,* FinCEN, *Anti-Money Laundering and Countering the Financing of Terrorism Programs,* 91 FR at 18711 (proposing adding ''countering the financing of terrorism'' to references to ''anti-money laundering program'' to reflect USA PATRIOT Act obligation to account for risks related to terrorist financing and to reflect new statutory language in the AML Act amending 31 U.S.C. 5318(h)(1)).

Under this proposal the regulatory text would set out a list of identifying numbers that may be used to satisfy this requirement, including a Social Security number, or for non-U.S. persons a passport number with country of issuance, an alien identification card, or a number and country of any other government-issued document evidencing nationality or residence and bearing a photograph—all of which are included in the existing certification form in Appendix A to the current rule. The proposal also specifies that an Individual Taxpayer Identification Number (ITIN) is not an acceptable substitute for a Social Security number.[32] This specification recognizes that an ITIN, as the IRS has noted, is ''issued . . . for federal tax purposes only.'' [33] It also reinforces the analysis set forth in FinCEN's recent advisory that recognized the use of an ITIN in lieu of a Social Security number or valid employment authorization document may be identified as a risk factor requiring enhanced due diligence.[34] Recognizing the risk associated with ITINs, FinCEN proposes to exclude their use as an identifying number for a beneficial owner. It expects that ITIN holders legally in the United States and authorized to work will have alternative identification including, for example, a foreign passport or an alien identification card.

While new in the rule itself, the proposed language identifying core pieces of information is substantively the same as the current rule's optional Appendix A form. The proposed rule returns the appendix to its proper function of providing material supplementary to the regulation, rather than stating the regulatory requirement itself. In maintaining that continuity, FinCEN seeks to preserve a workable level of flexibility for covered financial institutions in complying with this requirement. FinCEN seeks comment on the workability of its specific proposal that an ITIN cannot substitute for a Social Security number under this provision, as well as whether it should make other changes, either specifically to permit or to prohibit acceptance of other identification numbers or documents.

As noted earlier in this section, the proposed rule has a second goal: that covered financial institutions maintain the authority to collect additional information. The proposed rule does this by proposing regulatory text stating that, where warranted by other risk indicators or supervisory concerns, a covered financial institution may obtain additional information necessary to mitigate indicated risk or address supervisory concerns, including when relevant to assessing risks associated with fraud, identity misrepresentation, sanctions evasion, or other illicit financial activity, lawful immigration status or employment authorization in the United States. This is intended to make clear that, in situations of heightened risk or supervisory concern, a financial institution may consider obtaining additional information in order to confirm a beneficial owner's identity. It is also intended to make clear that such additional information can include immigration status and employment authorization information.

FinCEN anticipates providing additional guidance, alerts, or advisories to financial institutions, including highlighting new and emerging threats and typologies that may further feed into financial institutions' risk-based assessments. Providing this type of feedback through supplemental documents, rather than in specific regulatory text, will allow both Treasury and the financial institutions to more quickly adapt to address new and emerging threats and typologies and allow financial institutions to assess risks associated with fraud, identity misrepresentation, sanctions evasion, or other illicit financial activity, including illicit activity relating to a lack of lawful immigration status or employment authorization in the United States.

This proposal does not specify situations that present heightened risks, instead deferring that judgment to financial institutions and allowing them greater flexibility to identify such situations, relying on appropriate risk-based practices. However, such situations may well be judged to include instances where the identifying information for a beneficial owner residing in the United States presented to covered financial institutions includes documentation issued by a foreign government, rather than an identity document issued by a United States federal or state government agency. An individual may even present an ITIN and represent it to be a Social Security number, which could be a risk factor warranting additional inquiry.

Moreover, the CDD Rule is critical to aiding a covered financial institution's efforts to detect and report suspicious activity, including activity that could expose the institution to loss. Immigration and employment status would also be germane to reasonably assessing risk if the beneficial owner were providing a financial guarantee based on the beneficial owner's income from U.S. employment—income that might be in jeopardy if the beneficial owner were not legally authorized to work in the United States. Thus, a covered financial institution's compliance with the CDD Rule and its efforts to detect and report suspicious activity may aid the institution in evaluating risk outside of illicit finance.[35]

This permissiveness, however, should not be misinterpreted. The proposed language providing that a covered financial institution ''may'' obtain such additional information is not intended to suggest any reduction of the requirement to conduct ongoing due diligence or to verify the identity of each beneficial owner according to risk-based procedures that contain, at a minimum, the same elements financial institutions are required to use to verify the identity of individual customers under applicable CIP requirements. It is intended to reinforce the individual covered financial institution's authority, where warranted by other risk indicators or supervisory concerns, to demand additional information as part of a risk-based customer due diligence program.

FinCEN is interested in receiving comments on whether this rulemaking strikes an appropriate balance between mandating information collection and recognition that covered financial institutions may be better placed to assess what information they should

[32] IRS, *Instructions for Form W–7 (12/2024)* (revised Dec. 2024), *https://www.irs.gov/instructions/iw7* (directing individuals not to apply for an ITIN if they ''have an SSN or [are] eligible to get an SSN'').

[33] *See, e.g.,* IRS, *Individual taxpayer identification number (ITIN)* (last accessed Nov. 3, 2026), *https://www.irs.gov/tin/itin/individual-taxpayer-identification-number-itin.* Notably, to obtain an ITIN an individual must provide documents that both establish identity and connection to a foreign country. IRS, *Instructions for Form W–7 (12/2024)* (revised Dec. 2024), *https://www.irs.gov/instructions/iw7.* In some cases, documents required by the IRS to establish either foreign status or identity could also be used under the proposed rule, including a passport, a visa issued by the U.S. Department of State, or national identification card meeting certain requirements. *Id.*

[34] FinCEN, FIN–2026–A002, *Joint Advisory on Non-Work Authorized Populations and Their Employers and Risks to the Integrity of the U.S. Financial System* (June 5, 2026), *https://www.fincen.gov/system/files/2026-06/FinCEN-Advisory-Non-Work-Authorized-Populations.pdf* (noting that ''the use of an ITIN in lieu of an SSN or valid employment authorization document may be identified as a risk factor requiring enhanced due diligence to ensure the account is not being utilized to facilitate the unlawful employment of unlawful aliens'').

[35] Immigration status or status as a permanent resident of the United States may be relevant for financial institutions in evaluating risks other than illicit finance risks, such as credit risks of borrowers. *See Interagency Guidance on Lending to Individuals Not Legally Authorized to Work in the United States, supra* note 24; *see also* 12 CFR 1002.6(b)(7).

collect. FinCEN is also interested in receiving comments on whether its proposed approach mitigates the risks identified in Executive Order 14406, including by providing covered financial institutions sufficient authority to collect necessary information.

3. Proposed 31 CFR 1010.230(b)(1)(iii)—Sources of Information

The proposed rule also would improve the risk-based nature of the CDD Rule by providing more flexibility in how a covered financial institution obtains information, which is expected to reduce compliance burden. In doing so, this change supports Executive Order 14406 by allowing those financial institutions to direct resources to higher risk customers and activities, including customers that present risks related to illicit finance, sanctions evasion, fraud, and other unlawful activity as indicated in Executive Order 14406.

The CDD Rule specifies that covered financial institutions must obtain information about a legal entity customer's beneficial owners ''from the individual opening the account on behalf of the legal entity customer,'' using the optional certification form found at Appendix A to the rule or its substantive equivalent.[36] Some have attempted to read the regulation as allowing the collection of information from third parties along the lines of the bank-specific CIP Rule's special provision for the opening of individual credit card accounts, provided that a representative of the legal entity customer certified the accuracy of the information.[37] However, given the equivocal support that the CDD Rule's preamble provides for this interpretation, many covered financial institutions have been collecting beneficial ownership directly from their customers every time it was required, despite the time and expense of this practice.[38]

The proposed addition of paragraph (b)(1)(iii) would offer covered financial institutions clarity by providing that a covered financial institution may obtain any information described in paragraph (b)(1)(ii) by acquiring it from a third-party source. Regardless of the source from which information is obtained, a covered financial institution must comply with the certification requirement set forth in paragraph (b)(1)(iv). Similarly, regardless of the source from which information was obtained, a covered financial institution must comply with the requirement to identify the beneficial owner(s) of a legal entity customer any time after the legal entity customer first opens an account with the covered financial institution when the covered financial institution has knowledge of facts that would reasonably call into question the reliability of beneficial ownership information previously obtained about the legal entity customer.

4. Proposed 31 CFR 1010.230(b)(1)(iv)—Certification

Relatedly, the proposed rule also would improve the risk-based nature of the CDD Rule by providing more flexibility about when an institution must obtain a new certification for an existing legal entity customer. This enables a covered financial institution to rely on beneficial ownership information previously obtained from a certification provided in connection with the initial opening of an account by the legal entity customer with the covered financial institution. This change supports Executive Order 14406 by allowing financial institutions to focus on higher risk customers and activities, instead of activities that result in unnecessary information collection untethered from the risk of a particular customer.

The proposal provides that when a legal entity customer first opens an account with a covered financial institution, the covered financial institution obtaining information on the legal entity customer's beneficial owners must obtain a certification from the individual opening the account on behalf of the legal entity customer that the information obtained is accurate to the best of the individual's knowledge. A covered financial institution may, but is not required, to use the standardized certification form contained in Appendix A to § 1010.230. If the standardized certification form is not used, a covered financial institution must obtain from the individual opening the account the information required by the standardized certification form by another means.

The proposal also provides that, when obtaining information on beneficial owners as needed based on a covered financial institution's risk-based procedures for conducting ongoing customer due diligence, a covered financial institution may rely on beneficial ownership information previously obtained from a certification provided in connection with the initial opening of an account by the legal entity customer with the covered financial institution. In order to rely on such a prior certification, the covered financial institution must obtain from a representative of the legal entity customer either oral or written confirmation that such information is up to date and accurate to the best of the individual's knowledge. This confirmation may, but is not required to, take the form of the standardized certification form in Appendix A of this section. Thus, certification remains essential to collection of beneficial ownership information, but the proposal grants flexibility to institutions with respect to the form of certification obtained.

The covered financial institution must maintain a record of such certification or confirmation, whether the certification or confirmation is oral or written. If a covered financial institution is unable to obtain a necessary certification or confirmation that previously obtained beneficial ownership information is up-to-date and accurate, or if the covered financial institution has knowledge of facts that would reasonably call into question the reliability of beneficial ownership information previously obtained about the legal entity customer, the covered financial institution must identify and verify the identities of the beneficial owners of the legal entity customer in accordance with the general requirements of § 1010.230.

5. Proposed 31 CFR 1010.230(b)(2)—Verification

Under this proposal, § 1010.230 would contain a discrete list of information that covered financial institutions must collect, which would serve as the factual basis for their verification of the identities of the beneficial owners of their legal entity customers. The presence of this list could create confusion given § 1010.230's current cross-reference to the CIP rules, which encompass those rules' own list of information that must

[36] 31 CFR 1010.230(b)(1).

[37] *See, e.g.,* 31 CFR 1020.220(a)(2)(i)(C) (credit card account opening CIP rule for banks). Notably, in the CIP Rule context FinCEN and the Federal Banking Agencies granted exceptive relief to permit banks to obtain Tax Identification Number information from a third-party source rather than the customer for all accounts, provided that the bank otherwise complies with the CIP Rule. *See* FinCEN, OCC, FDIC, NCUA, *Order—Customer Identification Program* (June 27, 2025), *https://www.fincen.gov/system/files/2025-06/CIP-TIN-Exemption-Order-final508.pdf; FinCEN and Board, Order—Customer Identification Program* (July 31, 2025), *https://www.fincen.gov/system/files/shared/CIP-TIN-Exemption-Order-Board-only-508.pdf.*

[38] *See* FinCEN, *Customer Due Diligence Requirements for Financial Institutions,* 81 FR at 29405–29406. The best argument for the expansive reading is based on the negative inference to be drawn from the statement ''FinCEN declines to permit reliance solely upon previously gathered alternate sources of beneficial ownership information.'' *See* 81 FR at 29406.

be collected for CIP compliance purposes. The cross-reference currently requires covered financial institutions to have procedures that ''contain the elements required for verifying the identity of customers that are individuals under § 1020.220(a)(2) of this chapter (for banks); § 1023.220(a)(2) of this chapter (for brokers or dealers in securities); § 1024.220(a)(2) of this chapter (for mutual funds); or § 1026.220(a)(2) of this chapter (for futures commission merchants or introducing brokers in commodities).'' [39] Sections (a)(2)(ii) and (a)(2)(iii) of the CIP rules concern procedures for customer verification and procedures in situations where verification is impossible. Section (a)(2)(i) of those rules, however, is a list of customer information that a financial institution is required to collect about each individual or corporate customer. Among other things, section (a)(2)(i) of those rules specifically allows use of ''a taxpayer identification number,'' *i.e.* an ITIN, for a non-U.S. person, which would not be permitted under this proposal and should not be misinterpreted to apply to the CDD Rule.

To clarify which aspects of the CIP rules do and do not apply for purposes of the CDD Rule, FinCEN proposes amending § 1010.230(b)(2). That change will clarify that a covered financial institution must have customer due diligence verification procedures that reflect the requirements of that institution's CIP rule, but also that covered financial institutions must adhere to proposed § 1010.230(b)(1)(ii), which specifies the information to be collected. This change is designed to clarify but not change the current CDD Rule's adoption of CIP verification procedural standards while recognizing that the information a financial institution can use to verify an identity will, if this proposal is adopted, be different under the CIP and CDD Rules. FinCEN requests comment on challenges that may arise from different information collection requirements for CIP and CDD obligations, and whether the revised cross-reference is sufficiently clear.

In addition, given the continuing reference to, and incorporation of the standards of, the CIP rule, FinCEN solicits comments about the need for the CDD Rule itself to qualify the compliance standard of its verification requirement with the phrase ''to the extent reasonable and practicable''—a phrase that is already found in the CIP rule.[40] Alternatively, FinCEN solicits comments on whether it should dispense with cross-references altogether and insert in the CDD Rule all of the specific appropriate procedural language now found in the CIP rule itself, even if such insertion simply reproduces relevant CIP rule language.

V. Effective Date

FinCEN proposes that the rule would be effective 90 days after publication in the **Federal Register**.

VI. Requests for Comment

FinCEN seeks comments on all aspects of the proposed rule and specifically seeks comments on the following topics. For all responses, commenters are encouraged to provide the basis for any conclusions drawn in their comments.

1. Do the information collection requirements proposed in this rulemaking strike an appropriate balance, including between providing covered financial institutions sufficient direction in information collection, as well as discretion to require more information when risk warrants additional collection?

2. Is the information that the proposal requires covered financial institutions to collect and verify sufficient for them to reasonably identify most beneficial owners and assess beneficial ownership-related risks related to illicit finance, sanctions evasion, fraud, or other unlawful activity? If not, what additional or alternative information should covered financial institutions be required to collect?

3. Does the proposal provide covered financial institutions sufficient certainty that, where warranted, they maintain the ability to collect additional information, including relating to whether beneficial owners possess lawful immigration status and employment authorization in the United States? Should the proposed text be refined in any way?

4. Under the proposal, a covered financial institution may be required to collect beneficial ownership information ''any time thereafter [that is, after the initial collection] when the covered financial institution has knowledge of facts that would reasonably call into question the reliability of beneficial ownership information previously obtained about the legal entity customer.'' Is this circumstance an appropriate trigger for identification and verification of beneficial owners? Does it need to be refined or clarified, and if so how? For example, could ''reliability'' be supplemented with another measure, such as ''accuracy'' or ''continuing accuracy,'' given that, if the covered financial institution has reason to believe there has been a change in ownership of the legal entity, the covered financial institution might not be questioning the ''reliability'' so much as the continuing accuracy of the information originally provided?

5. Does the proposal's prohibition on use of an ITIN in lieu of a Social Security number appropriately balance risk? Does it represent any compliance challenges for covered financial institutions, including because of the potential divergent approach between the information permitted to be collected under the CIP rules and the CDD Rule? Would additional FinCEN guidance help address those challenges?

6. Should FinCEN consider alternatives to prohibiting use of an ITIN? For example, should FinCEN allow collection of an ITIN for verification purposes but require a covered financial institution to undertake additional steps, such as further due diligence measures or submission of additional information or documentation? Describe benefits and drawbacks of such alternatives.

7. Are there circumstances where an individual lawfully present in the United States would have an ITIN, but no other number or document specified in the proposal? If yes, how could FinCEN account for such scenarios while still accounting for the risk addressed by Executive Order 14406?

8. The CDD Rule incorporates some language borrowed from the CIP rules, and it also cross-references the CIP rules. In general, should FinCEN dispense with cross-references altogether and insert in the CDD Rule all of the specific appropriate procedural language of the CIP rule itself? Whether or not FinCEN adopts this global solution, should FinCEN retain the phrase ''to the extent reasonable and practicable,'' borrowed from the CIP rules, in the verification section of the CDD Rule? Should it use an alternative standard? If the phrase is deleted, what will be the effect?

9. The CDD Rule requirement is, generally speaking, ''categorical,'' imposing essentially the same core requirements with respect to all of a covered financial institution's non-exempt legal entity customers. Should FinCEN provide greater flexibility to covered financial institutions to adjust their due diligence efforts with respect to legal entity customers and their beneficial owners downward with decreased risk, not simply upward with

[39] 31 CFR 1010.230(b)(2).

[40] *See, e.g.,* 31 CFR 1020.220(a)(2).

respect to increased risk? What lower risk scenarios might be identified, under which on a risk-basis financial institutions should be permitted to collect less or different information related to beneficial ownership?

10. Should the recordkeeping requirement of the CDD Rule, 31 CFR 1010.230(i), be amended to better account for written or verbal confirmations contemplated under the proposed revisions to 31 CFR 1010.230(b)(1)(iv)(B)? The existing language of 31 CFR 1010.230(i)(1)(i) requires covered financial institutions to keep records that include ''For identification, any identifying information obtained by the covered financial institution pursuant to paragraph (b) of this section [the paragraph requiring collection of information], including without limitation the certification (if obtained)[.]'' Is it clear that the phrase ''any identifying information obtained'' includes a confirmation that information previously collected has not changed, or should the text be amended to explicitly address the matter of such confirmations about previously collected information?

11. The Appendix A form provides a list of corporate positions that could have ''significant responsibility for managing the legal entity,'' which includes ''Vice President'' and ''Treasurer.'' Should these or any other positions be listed as possible control persons? Alternatively, should any of these or other positions be excluded from the category of control person?

12. Should FinCEN consider a longer or shorter implementation period? Why?

VII. Severability

As part of this proposal, FinCEN proposes that if one portion of the proposed regulation, if finalized, is found to be invalid, the invalidated portion of the regulation should be severed with the remaining portions of the regulation remaining in full force and effect. FinCEN's position is that invalidation of any one provision, or application thereof to any one person or circumstance, does not, and should not, affect any other provision in this proposed regulation. Each provision serves an important, related, but distinct purpose and application, designed to benefit the public by protecting the U.S. financial system from illicit financial activity. FinCEN accordingly has proposed each provision such that invalidity to one provision would not undermine the operability or usefulness of the other provisions.

VIII. Executive Order 14294 Fighting Overcriminalization in Federal Regulations

Executive Order 14294 *Fighting Overcriminalization in Federal Regulations* requires that agencies promulgating regulations potentially subject to criminal enforcement explicitly describe the conduct subject to criminal enforcement, the authorizing statutes, and the *mens rea* standard applicable to those offenses.[41] Section 5 of Executive Order 14294 directs that all future notices of proposed rulemaking and final rules published in the **Federal Register**, the violation of which may constitute criminal regulatory offenses, should include a statement identifying that the rule or proposed rule is a criminal regulatory offense and the authorizing statute.[42] Executive Order 14294 directs agencies to draft this statement in consultation with the Department of Justice.[43]

Executive Order 14294 further directs that the regulatory text of all NPRMs and final rules with criminal consequences published in the **Federal Register** after May 9, 2025 should explicitly state a *mens rea* requirement for each element of a criminal regulatory offense, accompanied by citations to the relevant provisions of the authorizing statute.

Willful violations of the regulations set forward in this proposed rule, if finalized, may be subject to criminal penalties pursuant to 31 U.S.C. 5322 and regulations promulgated in 31 CFR chapter X. The statutory authority for criminal liability requires a *mens rea* of willfulness as an element pursuant to 31 U.S.C. 5322(a) and 31 U.S.C. 5322(b). FinCEN's existing regulation, 31 CFR 1010.840, that sets out criminal penalties for violations of regulations promulgated in 31 CFR chapter X also includes a *mens rea* of willfulness. In drafting this statement, FinCEN has consulted with the Department of Justice.

IX. Regulatory Impact Analysis

FinCEN has analyzed this proposed rule as required under Executive Orders 12866, 13563, and 14192; the Regulatory Flexibility Act (RFA); the Unfunded Mandates Reform Act (UMRA); and the Paperwork Reduction Act (PRA). This section presents the findings of its analysis, including a discussion of the expected incremental economic effects of the proposed rule relative to the current regulatory baseline and invites comment on all aspects of this analysis, including any data or information that would assist FinCEN in better quantifying the costs, cost savings, or other effects of the proposed rule.

The proposed rule would amend the CDD Rule, 31 CFR 1010.230, primarily by making three overarching revisions, and introduce certain minor regulatory clarifications. These revisions, as discussed in section III: (1) make it explicit that covered financial institutions may obtain additional information necessary to mitigate indicated risk or address supervisory concerns; (2) incorporate FinCEN's exceptive relief and required information, permissible sources, and certification; and (3) specify pieces of information required to be collected, while providing additional flexibility in how such information is obtained. The following analysis focuses on the expected incremental economic effects of these revisions.

As a threshold matter, FinCEN does not expect the proposed amendments would have a significant economic effect. Among other things, the proposal would not expand the set of covered financial institutions, would not expand the definition of legal entity customer, would not require covered financial institutions to collect beneficial ownership information from a new class of customers, and would not impose a new mandatory reporting or recordkeeping requirement. Instead, the proposal would codify regulatory flexibility that reduces duplicative beneficial ownership identification and verification at repeat account openings while identifying select risk-based triggers for obtaining and updating information when appropriate. The proposed clarification regarding the collection of additional information in heightened-risk circumstances is itself risk based; it does not impose a categorical obligation to collect any particular additional document or information, nor does it expand the pre-existing authority or obligation of covered financial institutions to collect risk-relevant information.[44]

A. Analysis of Impact

1. Broad Economic Considerations

As it proposes these amendments to § 1010.230, FinCEN remains mindful of the fundamental economic tensions observed in the original rule. The analysis in the CDD Rule framed beneficial ownership requirements as addressing externalities associated with

[41] Executive Order 14292 of May 9, 2026, *Fighting Overcriminalization in Federal Regulations,* 90 FR 20363, 20364 (May 14, 2025).

[42] *Id.*

[43] *Id.*

[44] *See supra* section IV.B.2.

illicit finance. Covered financial institutions bear the private costs of collecting and verifying beneficial ownership information, while many of the benefits of improved transparency, including reduced money laundering, terrorist financing, fraud, sanctions evasion, and related illicit activity, accrue broadly to the public, law enforcement, national security agencies, and the financial system as a whole. Absent a standard of collection requirements, covered financial institutions may underinvest in beneficial ownership information collection, particularly if they believe more rigorous requirements could place them at a competitive disadvantage relative to institutions with less comprehensive practices.

Prior FinCEN analysis also recognized cross-border spillovers.[45] Jurisdictions with less stringent AML/CFT standards may become more attractive destinations for laundering proceeds generated by illicit activity elsewhere, allowing those jurisdictions to receive capital inflows without bearing the full social costs of the underlying crimes. A clear and consistent CDD framework can help mitigate this concern by improving beneficial ownership transparency and making it more costly for illicit actors to misuse legal entities to access the U.S. financial system.

The proposed revisions build on that same general framework but are expected to have more limited incremental economic effects than the original CDD Rule. Rather than creating a new beneficial ownership information-collection obligation, the proposal would clarify and refine existing CDD requirements, reduce duplicative collection at repeat account openings, and preserve risk-based authority to obtain additional information when warranted by risk indicators or supervisory concerns. Thus, the relevant economic trade-off is not whether to impose a new beneficial ownership framework, but how best to preserve the benefits of beneficial ownership transparency while reducing unnecessary or duplicative compliance activity.

Having taken the original animating concerns into consideration, FinCEN believes the proposed amendments would enhance the balance of imposing private costs on financial institutions for the public benefit of standardized due diligence practices.

2. Institutional Baseline and Affected Parties

a. Regulatory Baseline

The anticipated incremental economic effects of the proposed rule were analyzed against a counterfactual state of the world in which a covered financial institution's obligations under the BSA would maintain the *status quo.* For purposes of this analysis, FinCEN considered the most salient component of the regulatory baseline to be comprised of both the original CDD Rule, as currently implemented and interpreted, and FinCEN's February 2026 exceptive relief.[46] Additionally, the impact analysis takes into account that covered financial institutions continue to be subject to, among other obligations, applicable AML/CFT program, customer identification, suspicious activity reporting, and recordkeeping requirements under the BSA. FinCEN further took into consideration that covered financial institutions' business practices may be subject to other regulatory standards and requirements that govern operating risks.[47]

Using this baseline, FinCEN does not expect the proposed rule to impose significant incremental costs because the primary change is to codify and make durable an existing form of relief, while clarifying that covered financial institutions may obtain additional information in risk-based circumstances. In the alternative, if the proposed rule were evaluated relative to the pre-relief requirement to identify and verify beneficial owners each time a legal entity customer opened a new account, the proposed rule would be expected to generate cost savings by eliminating duplicative beneficial ownership collection and verification at repeat account openings.

b. Baseline of Affected Parties

The primary affected parties of the proposed amendments are the covered financial institutions already subject to the CDD Rule and, indirectly, their current and prospective legal entity customers and beneficial owners. Because the proposal would not expand the definition of covered financial institution, legal entity customer, account, or beneficial owner, FinCEN does not expect the proposal to impose new compliance costs on any newly affected population. FinCEN encourages commenters who do not share this expectation to submit comments on the subject, ideally supported by specific information.

i. Covered Financial Institutions

The proposed rule would apply to all financial institutions currently subject to the CDD Rule: banks, brokers or dealers in securities (broker-dealers), mutual funds, and futures commission merchants (FCMs) and introducing brokers in commodities (IBCs). FinCEN estimates that there are approximately 14,554 potentially affected covered financial institutions, consisting of 8,988 banks; 3,277 brokers-dealers; 1,335 mutual funds; and 954 FCMs and IBCs.[48] While these estimates provide a useful reference point for the total population of financial institutions with CDD obligations, they do not identify how many covered financial institutions have legal entity customers that open more than one account with the same institution during a given period. As such, the estimates of expected affected covered financial institutions summarized in table 1 are provided for illustrative purposes only.

[45] *See* FinCEN, *Customer Due Diligence Requirements for Financial Institutions,* 81 FR at 29432–33; FinCEN, *Notice of Availability of Regulatory Impact Assessment and Initial Regulatory Flexibility Analysis Regarding the Customer Due Diligence Requirements for Financial Institutions,* 80 FR 80308 (Dec. 24, 2015).

[46] Covered financial institutions also currently have flexibility under the February 2026 exceptive relief order to identify and verify beneficial owners at the first account opening, when facts reasonably call previously obtained information into question, and as otherwise required by risk-based ongoing customer due diligence procedures.

[47] *See, e.g., Interagency Guidance on Lending to Individuals Not Legally Authorized to Work in the United States, supra* note 24.

[48] For a complete description of the sources of data and methodologies utilized to form these estimates, see the endnotes provided in table 1. As previously discussed, FinCEN has separately proposed to apply CDD Rule obligations to a proposed new type of regulated financial institution, PPSIs. *See supra* section II.E, note 28. Because that proposal is not yet finalized, meaning that PPSIs are not currently a covered financial institution, this analysis does not incorporate PPSIs. Notably, however, FinCEN has estimated that the number of PPSIs would be small. *See* OFAC and FinCEN, *Permitted Payment Stablecoin Issuer Anti-Money Laundering/Countering the Financing of Terrorism Program and Sanctions Compliance Program Requirements,* 91 FR at 18628 (estimating 50 PPSIs).

TABLE 1—ESTIMATES OF COVERED FINANCIAL INSTITUTIONS BY TYPE

Covered financial institution type [a]	Number of financial institutions
Banks with a Federal functional regulator [b]	[c] 8,623
Banks without a Federal functional regulator [d]	[e] 365
Broker-dealers [f]	[g] 3,277
Mutual funds [h]	[i] 1,335
FCMs and IBCs [j]	[k] 954
Total	14,554

[a] *See* 31 U.S.C. 5312(a)(2); *see also* 31 CFR 1010.100(t) (definition of financial institution).
[b] *See* 31 CFR 1010.100(t)(1); *see also* 31 CFR 1010.100(d), 31 CFR 1020.210(a).
[c] This includes 4,336 FDIC-insured depository institutions (*i.e.,* federally regulated banks) according to the FDIC's *Quarterly Bank Profile* for 2025 Q4, p. 2 (*https://www.fdic.gov/quarterly-banking-profile/past-quarterly-banking-profiles*). It also includes 4,287 NCUA-insured credit unions as of December 31, 2025, according to the NCUA's *Quarterly Credit Union Data Summary: 2025 Q4,* p. i (*https://ncua.gov/analysis/credit-union-corporate-call-report-data/quarterly-data-summary-reports*).
[d] *See* 31 CFR 1020.210(b).
[e] The Board of Governors of the Federal Reserve System Master Account and Services Database (*https://www.federalreserve.gov/paymentsystems/master-account-and-services-database-existing-access.htm*) contains data as of November 30, 2025, on financial institutions that use Federal Reserve Bank financial services, including those with no additional Federal regulator. FinCEN used this data to identify 365 banks and credit unions with no additional Federal regulator using Federal Reserve Bank financial services.
[f] *See* 31 U.S.C. 5312(a)(2)(G); *see also* 31 CFR 1010.100(t)(2).
[g] This estimate is based on U.S. Securities and Exchange Commission (SEC) data on active broker-dealers, *see Company Information About Active Broker-Dealers* (last updated Oct. 1, 2026), December 2025 Data table (*https://www.sec.gov/foia-services/frequently-requested-documents/company-information-about-active-broker-dealers*), which listed 3,277 active broker-dealers registered with the SEC as of December 31, 2025.
[h] *See* 31 U.S.C. 5312(a)(2)(I); *see also* 31 CFR 1010.100(t)(10) and 31 CFR 1010.100(gg).
[i] This estimate is based on the number of registered investment companies filing Form N–1A in SEC's *Annual Registered Investment Company Update: Form N–CEN Data, Period Ending December 2025* (May 2026), table 1.3, p. 4 (*https://www.sec.gov/files/annual-registered-investment-company-update-20260512.pdf*).
[j] *See* 31 U.S.C. 5312(a)(2)(H); *see also* 31 CFR 1010.100(t)(8–9).
[k] According to Commodity Futures Trading Commission data on FCMs, *see Financial Data for FCMs,* December 31, 2025 data, (*https://www.cftc.gov/MarketReports/financialfcmdata/index.htm*), there were 66 registered FCMs as of December 31, 2025. The number of IBCs as of December 31, 2025 (888) was obtained from the National Futures Association "NFA Membership and Registration" website (*https://www.nfa.futures.org/registration-membership/membership-and-directories.html*). Because deduplication of entities registered as both FCMs and IBCs was not feasible, this estimate may double-count some entities registered in both categories. FinCEN, however, believes this subpopulation may be small.

ii. Legal Entity Customers and Their Beneficial Owners

Legal entity customers and their beneficial owners are also affected because covered financial institutions obtain and verify beneficial ownership information when a legal entity customer first opens an account and, as applicable, when facts call prior information into question or risk-based procedures otherwise require it. FinCEN cannot estimate the total number of unique legal entity customers or beneficial owners that may be directly affected parties from the estimated 5,465,250 [49] annual responses projected using its historical methodology because that measure may include multiple responses for the same legal entity customer and information concerning multiple beneficial owners. Because the 1.5-account-per-day assumption that informed that estimate is based on limited information developed for the CDD Rule in 2016, and a 2024 banking-industry survey has since suggested that it may be low,[50] FinCEN considers 5,457,750 a rough estimate and requests comments that include current data on legal entity account openings, including variation by institution type and size.

c. Current Market Practices

Covered financial institutions currently use a range of processes to manage account-opening, customer due diligence, customer identification, and beneficial ownership information-related activities. These processes may be implemented through internal systems, third-party vendors, core processors, transfer agents, introducing and carrying broker relationships, or other operational arrangements, depending on the institution type and business model. Many covered financial institutions maintain customer or party master files and account master records that allow the institution to associate multiple accounts with the same legal entity customer. The degree of centralization, comingling of data and automation varies by institution size, product mix, and technology architecture.

FinCEN expects that covered financial institutions have already developed policies and procedures to obtain and verify beneficial ownership information for legal entity customers and to update customer information on a risk basis. FinCEN also expects that some covered financial institutions have revised or begun revising their procedures in response to the February 2026 exceptive relief. As a result, the proposed rule is expected to align the text of the CDD Rule with practices that many

[49] *See* FinCEN, *Customer Due Diligence Requirements for Financial Institutions Final Rule,* 81 FR at 29448 (explaining that FinCEN had no direct data on annual legal entity account openings by small financial institutions and that the estimate, based in part on information from one very large financial institution, assumed small institutions would open at most 1.5 such accounts per day, and probably fewer); *see also* FinCEN, *Agency Information Collection Activities; Proposed Renewal; Comment Request; Renewal Without Change of the Beneficial Ownership Requirements for Legal Entity Customers,* 84 FR 72137, 72138 n.9 (Dec. 30, 2019); FinCEN, *Agency Information Collection Activities; Proposed Renewal; Comment Request; Renewal Without Change of the Beneficial Ownership Requirements for Legal Entity Customers,* 89 FR 14148, 14149 n.16 (Feb. 26, 2024) (applying an average of 1.5 new legal entity accounts per business day to all covered financial institutions). Applying that rate to the 14,554 covered financial institutions identified in Table 1 and 250 business days yields 5,457,750 legal entity customer accounts opened per year (14,554 × 1.5 × 250). Industry comments suggest the estimate may be low, at least for banks.

[50] *See* American Bankers Association, *Letter to FinCEN on CDD PRA Rule,* Docket No. FINCEN–2024–0008, OMB Control No. 1506–0070, at 5 (Apr. 26, 2024) (reporting that 92 percent of 141 surveyed banks disagreed with the 1.5-account estimate and that 94 percent of those respondents characterized it as ''very low''), *https://www.aba.com/-/media/documents/comment-letter/clfincencdd20240426.pdf?rev=07c23ff3932e4fe5a5f3f7033bb57344.*

institutions may already have adopted or planned to adopt.

3. Description of Proposed Regulation

For purposes of the RIA, FinCEN considered the various components of the proposed rule with a view towards the specific features or elements that may generate, either directly or indirectly, an economic benefit or cost or lead to changes in a market participant's incentives in a way that may generate economic benefits or costs.[51] To balance the completeness of the RIA with the desire for expositional clarity and ease of tractability between the proposed regulatory text and sections IV (Section-by-Section Analysis) and IX (Regulatory Impact Analysis), FinCEN has included table2, to provide a mapping of the various components of the proposed rulemaking as presented in sectionIV to their analogous categorization in the RIA.

TABLE 2—OVERVIEW/MAPPING OF THE PROPOSED RULE

Elements of the proposed rule	Section IV analysis	Discussed in RIA subsection(s)	Proposed regulatory text location
Revise the general requirement to clarify that covered financial institutions must establish and maintain written procedures reasonably designed to identify and verify the identity of beneficial owners of legal entity customers, and include such procedures in their AML/CFT programs.	IV.A	IX.A.3	1010.230(a).
Add ''countering the financing of terrorism'' to the reference to anti-money laundering compliance programs.	IV.A	IX.A.3	1010.230(a).
Replace the current requirement to identify and verify beneficial owners at each new account opening with a timing framework requiring identification and verification: (1) when the legal entity customer first opens an account with the covered financial institution; (2) when the institution has knowledge of facts that would reasonably call into question the reliability of beneficial ownership information previously obtained about the legal entity customer; and (3) as needed based on risk-based procedures for conducting ongoing customer due diligence.	IV.B.1	IX.A.1, IX.A.3, IX.A.4.a, IX.A.4.b, IX.C, IX.E.	1010.230(b)(1)(i).
Specify the minimum information that a covered financial institution must obtain about each beneficial owner, including name, date of birth, address, and an identifying number, unless risk-based procedures warrant obtaining more information.	IV.B.2	IX.A.3, IX.A.4.a, IX.A.4.b, IX.E.	1010.230(b)(1)(ii)(A)–(D)
Clarify that, for a U.S. person beneficial owner, the required identifying number is a Social Security number, and that for U.S. and non-U.S. persons, an ITIN is not an acceptable substitute for a Social Security number.	IV.B.2	IX.A.3, IX.A.4.a, IX.A.4.b, IX.E.	1010.230(b)(1)(ii)(D)
Clarify that, where warranted by other risk indicators or supervisory concerns, a covered financial institution may obtain additional information necessary to mitigate indicated risk or address supervisory concerns, including when relevant to assessing risks associated with fraud, identity misrepresentation, sanctions evasion, or other illicit financial activity, information relevant to lawful immigration status and employment authorization in the United States.	IV.B.2	IX.A.1, IX.A.3, IX.A.4.a, IX.A.4.b, IX.E.	1010.230(b)(1)(ii)
Permit covered financial institutions to obtain required beneficial ownership information from a third-party source, subject to compliance with the certification requirement.	IV.B.3	IX.A.1, IX.A.3, IX.A.4.a, IX.A.4.b, IX.E.	1010.230(b)(1)(iii)
Require a covered financial institution, when obtaining beneficial ownership information at the first account opening, to obtain a certification from the individual opening the account on behalf of the legal entity customer that the information obtained is accurate to the best of that individual's knowledge; retain use of the standardized certification form as optional.	IV.B.4	IX.A.3, IX.A.4.a, IX.A.4.b, IX.E.	1010.230(b)(1)(iv)(A)
Permit a covered financial institution, when obtaining beneficial ownership information as needed based on risk-based ongoing CDD procedures, to rely on information previously obtained from a certification provided at the first account opening, provided that a representative of the legal entity customer gives oral or written confirmation that the information is up to date and accurate to the best of the individual's knowledge.	IV.B.4	IX.A.1, IX.A.3, IX.A.4.a, IX.A.4.b, IX.E.	1010.230(b)(1)(iv)(B)
Clarify the verification cross-reference to the applicable CIP rules so that covered financial institutions must use verification procedures containing the elements required for verifying the identity of individual customers, while avoiding ambiguity that the CIP information-collection list governs beneficial ownership information collection under the CDD Rule.	IV.B.5	IX.A.3, IX.A.4.b	1010.230(b)(2)
Retain the provision allowing a covered financial institution to rely on information supplied by the legal entity customer regarding the identity of its beneficial owner or owners, provided that the institution has no knowledge of facts that would reasonably call into question the reliability of such information.	IV.B.5	IX.A.3	1010.230(b)(2)

4. Anticipated Economic Effects

a. Expected Benefits

FinCEN expects the proposed rule to produce several categories of benefits. First, codifying the relief from beneficial ownership identification and verification at every repeat account opening should reduce duplicative compliance activity. Covered financial institutions would be able to rely on beneficial ownership information obtained at the first account opening unless facts reasonably call the reliability of that information into question or risk-based procedures otherwise require additional or updated information. This should reduce repetitive customer outreach, duplicative collection of identification information, and associated account-opening delays.

Second, the proposed rule should improve regulatory clarity. Codifying the February 2026 exceptive relief in the CDD Rule would reduce uncertainty about the continued availability and operation of that relief and would allow covered financial institutions to design policies, procedures, systems, and training around the text of the regulation. Clearer regulatory text may also promote more consistent supervisory expectations across covered financial institutions and functional regulators, possibly reducing examination costs.

Third, the proposal should better align the CDD Rule with a risk-based

[51] *See infra* section IX.A.4.

approach to AML/CFT compliance. The proposal would preserve the ability, and where applicable the obligation, of covered financial institutions to update or obtain additional information when facts call previously obtained beneficial ownership information into question or when risk-based procedures indicate that additional or updated information is appropriate. At the same time, the proposal would avoid requiring covered financial institutions to repeat the same identification and verification steps at every account opening without regard to risk or whether the institution already has reliable information about the legal entity customer.

Fourth, the proposed clarification concerning additional information in heightened-risk or supervisory-concern circumstances may help covered financial institutions resolve material compliance concerns involving fraud, identity misrepresentation, sanctions evasion, or other illicit financial activity. By clarifying that covered financial institutions may obtain additional information where warranted by risk indicators or supervisory concerns, the proposal may support more effective risk assessment while avoiding a categorical, one-size-fits-all requirement.

FinCEN has not quantified these benefits at this stage because public data are limited regarding the number of repeat account openings by the same legal entity customer at the same covered financial institution and regarding the degree to which institutions have already implemented the February 2026 exceptive relief.

b. Expected Costs

FinCEN does not expect the proposed rule to impose significant economic costs. The proposal would not impose a new obligation to file reports with FinCEN, would not require covered financial institutions to retain a new category of records, would not expand the population of covered financial institutions, and would not impose a new mandatory customer due diligence procedure for all accounts or all customers.

Covered financial institutions may incur limited one-time costs to review the final rule and revise policies, procedures, forms, account-opening workflows, monitoring processes, or training materials. FinCEN expects these costs to be small because covered financial institutions already maintain CDD policies and procedures and because the proposed rule generally aligns with existing exceptive relief and ordinary-course risk-based due diligence practices. To the extent an institution has already implemented the February 2026 exceptive relief, any incremental implementation cost attributable to this proposal should be further reduced.

FinCEN does not expect that its specification of information covered financial institutions must collect and exclusion of ITINs will impose significant costs. FinCEN believes its proposed regulatory text largely aligns with current practices, though some institutions may incur limited one-time costs to review the final rule and revise policies, procedures, forms, account-opening workflows, monitoring processes, or training materials accordingly.

FinCEN does not expect the proposed clarification regarding additional information in heightened-risk circumstances to require covered financial institutions to collect additional information in every case. The proposed language would clarify that an institution may consider obtaining additional information where warranted by risk indicators or supervisory concerns and where the information is relevant to resolving material compliance concerns. FinCEN does not expect this clarification to result in significant recurring costs.

FinCEN also does not expect the proposed rule to have significant adverse effects on competition, innovation, access to financial services, or market structure. By reducing duplicative collection and verification requirements, the proposal may reduce account-opening friction for legal entity customers, including small businesses.

5. Consideration of Alternatives

In developing the proposed rule, FinCEN considered several policy alternatives, including alternatives specifically tailored to accommodate small entities that may otherwise be disproportionately burdened by regulatory compliance. FinCEN invites comment on these alternatives, and on any other alternatives that were not considered here but could reasonably be expected to accomplish the same policy objectives with equal or greater efficiency.

a. Alternative 1: Strictly Risk-Based Information Collection

First, FinCEN considered adopting an entirely risk-based approach to the determination of the types of information that covered financial institutions would have to collect in order to identify and verify the identity of beneficial owners of legal entity customers.[52] In contrast to the proposed rule, the alternative considered would eliminate the proposed list of required information and instead grant covered financial institutions complete discretion to determine what information to obtain from a beneficial owner of a legal entity customer, based upon the institution's own risk-based analysis.

FinCEN believes that the proposed rule, which specifies certain information that a covered financial institution must collect, appropriately acknowledges a continuing need for a minimum standard, supplemented, rather than replaced, by tailoring based on risk. FinCEN is concerned that declining to set a minimum requirement for information to be collected across covered financial institutions would make it easier for illicit actors to enter into the financial system by persuading covered financial institutions that they are low-risk customers and therefore should not provide much, if any, identifying information, or by targeting covered financial institutions with less comprehensive CDD programs or less sophisticated risk-analysis capabilities. In return for focusing on heightened risks, the financial services industry as a whole might obtain some regulatory relief, but in FinCEN's judgment not significantly more than the proposal itself provides. Accordingly, FinCEN has opted against this alternative. This alternative could reduce compliance costs for some covered financial institutions by allowing them to collect less information for beneficial owners they determine to present lower risk. The cost savings would likely arise from reduced customer outreach, fewer information fields collected, and potentially shorter account-opening processes in low-risk cases. The magnitude of those savings, however, is uncertain and may be limited because the proposed rule already reduces duplicative compliance activity by eliminating repeated beneficial ownership identification and

[52] The proposed rule sets out a discrete list of information that a covered financial institution must obtain about each beneficial owner of a legal entity customer: name; date of birth; residential or business street address, or if the beneficial owner does not have a residential or business street address an Army Post Office (APO) or Fleet Post Office (FPO) box number, or the residential or business street address of next of kin or of another contact individual; and (1) for a U.S. person, a Social Security number (not including an ITIN), or (2) for a non-U.S. person, (a) a Social Security number (not including an ITIN); (b), a passport number and country of issuance; (c) an alien identification card number; or (d) a number and country of issuance of any other government-issued document evidencing nationality or residence and bearing a photograph or similar safeguard.

verification at repeat account openings unless facts or risk-based procedures call for updated information. The proposed rule also already permits covered financial institutions to obtain additional information only where warranted by risk indicators or supervisory concerns, rather than imposing a categorical obligation to collect additional information in every case.

This alternative would also likely provide greater discretion and potentially greater burden reduction in some low-risk circumstances, but at the cost of reduced uniformity, less regulatory certainty, and potentially weaker beneficial ownership transparency. This trade-off may be particularly important for smaller or less technologically sophisticated covered financial institutions. Although the alternative could appear less burdensome because it would allow such institutions to collect less information in some cases, it could also require them to make and document more case-specific judgments about what information is sufficient to identify and verify beneficial owners. That added discretion could increase uncertainty, training needs, supervisory risk, and inconsistency in implementation.

FinCEN therefore expects that the proposed rule would better balance costs and benefits. Compared with the alternative, the proposed rule is expected to preserve more of the AML/CFT, countering fraud, countering sanctions-evasion, and countering illicit-finance benefits associated with a uniform beneficial ownership identification baseline, while still reducing burden through relief from duplicative collection at repeat account openings, greater flexibility to use third-party sources, and risk-based authority to obtain additional information when warranted. Accordingly, FinCEN preliminarily assesses that the alternative would likely provide, at most, modest additional compliance cost savings relative to the proposal, while presenting greater risks to regulatory consistency and the effectiveness of customer due diligence.

b. Alternative 2: Additional Data Collection Requirements

FinCEN separately considered a version of the proposed rule that would have required covered financial institutions to collect additional information beyond what this proposal would require by expanding the list of information an institution must obtain about each beneficial owner of a legal entity customer beyond the beneficial owner's name, date of birth, address, and qualifying identifying number. The goal of such an enhanced data collection requirement would be to reduce uncertainty about whether the information that a covered financial institution can be relied upon to collect will be sufficient to perform a meaningful analysis of beneficial ownership-related risks.

FinCEN believes that such an approach would be overly prescriptive and inconsistent with the aim of Executive Order 14406 to improve the risk-based nature of the CDD Rule by allowing financial institutions to focus on higher-risk customers, including those that present risks related to illicit finance, sanctions evasion, fraud, and other unlawful activity. FinCEN believes that the proposed rule would ensure that covered financial institutions collect sufficient information concerning the beneficial owners of their legal entity customers, while providing the necessary flexibility for a covered financial institution to collect additional information for specific beneficial owners where such collection is warranted by risk. The small benefit in terms of increased regulatory certainty that the alternative would achieve would come at significant cost to covered financial institutions. Thus, FinCEN rejected this alternative approach.

This alternative would likely produce greater regulatory certainty than the proposed rule by specifying additional information that covered financial institutions must obtain from each beneficial owner of a legal entity customer. A more prescriptive information-collection requirement could reduce ambiguity about whether an institution has collected enough information to conduct a meaningful beneficial ownership risk assessment and could promote more uniform practices across covered financial institutions.

However, relative to the proposed rule, this alternative would likely impose materially greater costs, by requiring additional information in all cases, including for legal entity customers and beneficial owners that present lower risk and for whom the additional information may have limited marginal value. The principal costs of this alternative would likely include increased customer outreach, longer account-opening processes, additional form and system changes, additional training, and greater compliance and quality-control burdens. These costs would be recurring because institutions would have to collect any additional information for each covered beneficial owner whenever beneficial ownership information is required. The alternative could also increase burden on legal entity customers and beneficial owners by requiring them to provide additional information even when no risk-based factor suggests that the information is needed.

FinCEN preliminarily assesses that the proposed rule better balances costs and benefits. Compared with the alternative, the proposed rule preserves a clear minimum standard, maintains flexibility to collect additional information in higher-risk circumstances, and avoids imposing additional recurring burden on all covered financial institutions, legal entity customers, and beneficial owners.

c. Alternative 3: Delayed Effective Date for Small Financial Institutions

FinCEN separately and additionally considered modifying the proposed rule to provide a delayed effective date for small financial institutions as defined by the RFA, as a way of minimizing costs to small businesses. However, FinCEN does not believe that implementation of the proposed rule would impose a significant burden on small financial institutions, as much of the proposal is permissive rather than prescriptive or captures existing industry practices. Additionally, FinCEN is mindful that by introducing a staggered effective date by financial institution size, this may inadvertently create confusion or unequal burdens for the small businesses that are the legal entity customers of covered financial institutions by causing them to face different standards of information provision based on the size of the institutions where they maintain an account. Accordingly, FinCEN has opted against this alternative.

This alternative could reduce near-term implementation burden for small covered financial institutions by giving them additional time to review the final rule and make any needed updates to policies, procedures, forms, workflows, systems, or training materials. A delayed effective date could be most useful in providing additional time for small institutions with less automated account-opening systems, fewer compliance personnel, or greater reliance on third-party vendors or core processors whose services might be more difficult to obtain or more expensive for small financial institutions if required to compete with larger institutions in the run-up to a universal, industry-wide effective date.

FinCEN expects, however, that the incremental benefit of this alternative

would be limited. The proposed rule is not expected to impose significant costs because it would not expand the population of covered financial institutions, legal entity customers, accounts, or beneficial owners, and would not impose new mandatory reporting, recordkeeping, or customer information collection requirements. A delayed effective date for small financial institutions would also delay the benefits of regulatory clarity and burden reduction for those institutions.

FinCEN preliminarily assesses that the proposed rule better balances costs and benefits. A delayed effective date for small financial institutions could provide some additional implementation flexibility, but the likely cost savings would be modest because the proposal is expected to reduce, rather than increase, recurring beneficial ownership collection and verification obligations. The proposed rule also aligns with practices that at least some institutions have already revised or begun revising in response to the February 2026 exceptive relief.

B. Executive Orders 12866, 13563, and 14192

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, to the extent permitted by law, to select regulatory approaches that maximize net benefits, including potential economic, environmental, public health and safety, distributive, and equity effects. Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility.

FinCEN has considered the expected costs and benefits of the proposed rule and does not anticipate that it would introduce an effect of $100 million or more on the economy in a given year. Notwithstanding a lack of expected economic significance under section 3(f)(1) of Executive Order 12866, the proposed rule has been reviewed by the Office of Management and Budget (OMB) and found to otherwise meet the criteria for a significant regulatory action under section 3(f) of Executive Order 12866. Accordingly, FinCEN has conducted the requisite regulatory impact analysis and included a summary thereof in section IX.A.

FinCEN expects that this action, when finalized, would be an Executive Order 14192 deregulatory action because it is expected to reduce compliance burden and to have total costs less than zero. The proposal would codify relief from duplicative beneficial ownership identification and verification at repeat account openings and would not impose a new mandatory reporting, recordkeeping, or customer information collection requirement.

C. Regulatory Flexibility Act

The RFA requires an agency either to provide an initial regulatory flexibility analysis with a proposed rule or to certify that the proposed rule, if promulgated, would not have a significant economic impact on a substantial number of small entities. The proposed rule would apply to covered financial institutions, some of which are small entities. However, the proposal would not expand the categories of covered financial institutions, would not impose a new reporting or recordkeeping requirement, and would not require covered financial institutions to collect additional information in all cases.

FinCEN expects that any one-time costs for small covered financial institutions would be limited to ordinary-course review of the final rule and conforming updates to policies, procedures, forms, training, or workflows. FinCEN expects those costs to be small because small covered financial institutions already maintain CDD procedures and because the proposal is expected to reduce rather than increase recurring beneficial ownership collection and verification obligations for repeat account openings. Accordingly, FinCEN certifies that the proposed rule, if finalized, would not have a significant economic impact on a substantial number of small entities.

D. Unfunded Mandates Reform Act

Section 202 of the UMRA,[53] Public Law 104–4, requires that an agency prepare a budgetary impact statement before promulgating a rule that may result in new, incremental expenditures by State, local, and Tribal governments, in the aggregate, or by the private sector, of $193 million or more in any one year ($100 million in 1995, adjusted for inflation).[54] If a budgetary impact statement is required, section 202 of the UMRA also requires an agency to identify and consider a reasonable number of regulatory alternatives before promulgating a rule. FinCEN has determined that this rule will not result in increased expenditures by State, local, and Tribal governments, or by the private sector, of $193 million or more. Accordingly, FinCEN has not prepared a budgetary impact statement.

E. Paperwork Reduction Act

Under the PRA, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by OMB. Written comments and recommendations for the proposed information collection can be submitted by visiting *https://www.reginfo.gov/public/do/PRAMain*. Find this particular document by selecting ''Currently Under Review—Open for Public Comments'' or by using the search function. Comments are welcome and must be received by January 19, 2027.

In accordance with requirements of the PRA, 44 U.S.C. 3506(c)(2)(A), and its implementing regulations, 5 CFR part 1320, the following information concerns the collection of information as it relates to the amendments to covered financial institutions' AML/CFT program regulations.

1. Description of Affected Financial Institutions and OMB Control Numbers

OMB Control Number(s): 1506–0020, 1506–0035, 1506–0081, 1506–0088, and 1506–0070.

The proposed amendments, if adopted, may affect covered financial institutions' recordkeeping activities, and as a result, burdens incurred. To the extent that covered financial institutions' CDD-related recordkeeping burdens are currently accounted for under FinCEN OMB control numbers, they have been so primarily under OMB control number 1506–0070,[55] with additional components currently accounted for under 1506–0081 (applicable to Investment Advisers)[56] or under proposal to be accounted for under OMB control numbers 1506–0020 (Mutual Funds), 1506–0035 (Banks Without a Federal Functional Regulator), and 1506–0088 (PPSIs).[57]

[53] 2 U.S.C. 1532.

[54] The U.S. Bureau of Economic Analysis reports the annual value of the gross domestic product implicit price deflator for calendar year 1995 (the year UMRA was enacted) as 66.939, and as 128.974 for calendar year 2025 (the most recent available). Thus, the inflation-adjusted estimate for $100 million is 128.974 ÷ 66.939 × $100 million, or $192.7 million. *See* U.S. Bureau of Economic Analysis, Table 1.1.9. Implicit Price Deflators for Gross Domestic Product, BEA Interactive Data Application.

[56] *See* FinCEN, *Financial Crimes Enforcement Network: Anti-Money Laundering/Countering the Financing of Terrorism Program and Suspicious Activity Report Filing Requirements for Registered Investment Advisers and Exempt Reporting Advisers,* 89 FR 72156, 72261–64 (Sept. 4, 2024).

[57] *See* FinCEN, *Anti-Money Laundering and Countering the Financing of Terrorism Programs,* 91 FR at 18746–50. As proposed, a covered financial

2. Estimated Annual Burden

The PRA requires that agencies consider the impact of paperwork and other information collection burdens imposed on the public. FinCEN does not estimate any incremental burden under the PRA associated with this proposed rule because the proposal would not impose any new reporting, recordkeeping, or third-party disclosure requirement. The proposal would codify existing relief from the requirement to identify and verify beneficial owners at each repeat account opening and would clarify that covered financial institutions may obtain additional information in heightened-risk circumstances where warranted by risk indicators or supervisory concerns. The decision by a covered financial institution to obtain additional information in a particular case would depend on its own risk-based assessment and the need to resolve a material compliance concern. FinCEN requests comment on whether the proposed rule could reasonably be expected to introduce incremental PRA effects that should be identified and included in this burden analysis.

3. General Request for Comments Under the PRA

Comments submitted in response to this proposed rule will be summarized and included in a request for OMB approval. All comments will become a matter of public record. FinCEN invites comments on: (1) whether the collection of information is necessary for the proper performance of FinCEN's mission, including whether the information shall have practical utility; (2) the accuracy of FinCEN's estimate of the burden of the collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; (4) ways to minimize the burden of the collection of information on reporting persons, including through the use of technology; and (5) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services required to provide information.

institution would be required to establish and maintain a written AML/CFT program that includes: ''appropriate risk-based procedures for conducting ongoing customer due diligence, to include, but not be limited to: understanding the nature and purpose of customer relationships for the purpose of developing a customer risk profile.'' *Id.; see also* OFAC and FinCEN, *Permitted Payment Stablecoin Issuer Anti-Money Laundering/ Countering the Financing of Terrorism Program and Sanctions Compliance Program Requirements,* 91 FR 18582.

F. Additional Requests for Comment

1. FinCEN requests comment on the appropriate baseline and on any data that would help quantify cost savings relative to either baseline.

2. FinCEN requests comment on current practices, including the extent to which covered financial institutions have already adjusted procedures, forms, systems, training, or quality-control processes in response to the February 2026 exceptive relief.

3. FinCEN requests data on the distribution of accounts per legal entity customer, the annual number of repeat account openings by legal entity customers, the time required to collect and verify beneficial ownership information at repeat account openings, and the extent of any implementation costs or savings associated with the proposed rule.

4. FinCEN requests comment on whether the proposed clarification could cause covered financial institutions to change policies, procedures, training, systems, or customer-facing practices in ways that would generate incremental costs not identified here.

5. FinCEN requests comment on any potential distributional effects, including whether the proposal would have different effects across banks, brokers or dealers in securities, mutual funds, futures commission merchants, and introducing brokers in commodities, or across small and large covered financial institutions.

6. FinCEN requests comment on the expected cost savings and any potential costs associated with implementing the proposed rule.

7. FinCEN invites comment from small entities on all aspects of its certification pursuant to RFA requirements that the proposed rule is not expected to have a significant economic impact on a substantial number of small entities, including any data on implementation costs, cost savings, or operational effects.

8. FinCEN requests comment on the extent of any one-time implementation costs and on whether such costs vary materially by institution type or size.

9. FinCEN requests data on the distribution of accounts per legal entity customer, the annual number of repeat account openings by legal entity customers, the time required to collect and verify beneficial ownership information at repeat account openings, and the extent of any implementation costs or savings associated with the proposed rule.

List of Subjects in 31 CFR Part 1010

Administrative practice and procedure, Aliens, Authority delegations (Government agencies), Banks, Banking, Brokers, Business and industry, Citizenship and naturalization, Commodity futures, Crime, Currency, Electronic filing, Federal savings associations, Federal-State relations, Fiduciaries, Foreign banking, Foreign currencies, Foreign persons, Gambling, Holding companies, Indians, Indians—law, Indians—tribal government, Insurance companies, Investigations, Investment companies, Law enforcement, Penalties, Reporting and recordkeeping requirements, Savings associations, Securities, Small business, Terrorism, Time.

Amendment to FinCEN Regulations

For the reasons discussed in the preamble, the Financial Crimes Enforcement Network proposes to amend 31 CFR part 1010 as follows.

PART 1010—GENERAL PROVISIONS

■ 1. The authority citation for part 1010 continues to read as follows:

Authority: 12 U.S.C. 1829b and 1951–1959; 31 U.S.C. 5311–5314 and 5316–5336; title III, sec. 314, Pub. L. 107–56, 115 Stat. 307; sec. 2006, Pub. L. 114–41, 129 Stat. 457; sec. 701 Pub. L. 114–74, 129 Stat. 599; sec. 6403, Pub. L. 116–283, 134 Stat. 3388.

■ 2. Section 1010.230 is amended by:
■ a. Revising paragraph (a) to read as follows:

(a) *In general.* Covered financial institutions are required to establish and maintain written procedures that are reasonably designed to identify and verify the identity of beneficial owners of legal entity customers and to include such procedures in their anti-money laundering/countering the financing of terrorism program required under 31 U.S.C. 5318(h) and its implementing regulations.
■ b. Revising paragraph (b) to read as follows:

(b) *Identification and verification.* With respect to legal entity customers, the covered financial institution's customer due diligence procedures shall enable the institution to:

(1) Identify the beneficial owner(s) of each legal entity customer, unless the customer is otherwise excluded pursuant to paragraph (e) of this section or the account is exempted pursuant to paragraph (h) of this section.

(i) *Timing.* A covered financial institution must identify the beneficial owner(s) of a legal entity customer:

(A) when the legal entity customer first opens an account with the covered financial institution;

(B) any time thereafter when the covered financial institution has knowledge of facts that would reasonably call into question the reliability of beneficial ownership information previously obtained about the legal entity customer; and

(C) as needed based on a covered financial institution's risk-based procedures for conducting ongoing customer due diligence.

(ii) *Information necessary for identification and verification of identity.* A covered financial institution must obtain information about each beneficial owner sufficient to allow the covered financial institution to identify, and to verify the identity of, the beneficial owner. The financial institution must obtain, at minimum, the information described in paragraph (b)(1)(ii)(A)–(D) about each beneficial owner, and may obtain additional information as described in paragraph (b)(1)(ii)(E):

(A) name;

(B) date of birth;

(C) residential or business street address, or if the beneficial owner does not have a residential or business street address an Army Post Office (APO) or Fleet Post Office (FPO) box number, or the residential or business street address of next of kin or of another contact individual; and (D) (*1*) for a U.S. person, a Social Security number (not including an Individual Taxpayer Identification Number), or (*2*) for a non-U.S. person, (*i*) a Social Security number (not including an Individual Taxpayer Identification Number); (*ii*) a passport number and country of issuance; (*iii*) an alien identification card number; or (*iv*) a number and country of issuance of any other government issued document evidencing nationality or residence and bearing a photograph or similar safeguard.

(E) Where warranted by other risk indicators or supervisory concerns, including but not limited to indicators of risks associated with fraud, identity misrepresentation, sanctions evasion, or other illicit financial activity, the covered financial institution may obtain additional information useful in mitigating risk or addressing supervisory concerns, including but not limited to information relevant to lawful immigration status and employment authorization in the United States.

(iii) *Sources of Information.* Subject to compliance with the certification requirement in paragraph (b)(1)(iv) of this section, a covered financial institution may obtain any information described in paragraph (b)(1)(ii) of this section by acquiring it from a third-party source.

(iv) *Certification.*

(A) When obtaining information at a time described in paragraph (b)(1)(i)(A) of this section, a covered financial institution must obtain a certification from the individual opening the account on behalf of the legal entity customer that the information obtained is accurate to the best of the individual's knowledge. This certification may, but is not required to, take the form of the certification in Appendix A of this section.

(B) When obtaining information at a time described in paragraph (b)(1)(i)(C) of this section, a covered financial institution may rely on information to which a certification provided in connection with obtaining information at a time described in paragraph (b)(1)(i)(A) of this section applies, provided that a representative of the legal entity customer provides oral or written confirmation that such information is up to date and accurate to the best of the individual's knowledge. Written confirmation may, but is not required to, take the form of the certification in Appendix A of this section.

(2) Verify the identity of each beneficial owner identified to the covered financial institution, according to risk-based procedures, to the extent reasonable and practicable. At a minimum, these procedures must require collection of information specified in paragraph (b)(1)(ii) and contain the elements required for verifying the identity of customers that are individuals under § 1020.220(a)(2), other than § 1020.220(a)(2)(i), of this chapter (for banks); § 1023.220(a)(2), other than § 1023.220(a)(2)(i), of this chapter (for brokers or dealers in securities); § 1024.220(a)(2), other than § 1024.220(a)(2)(i), of this chapter (for mutual funds); or § 1026.220(a)(2), other than § 1026.220(a)(2)(i), of this chapter (for futures commission merchants or introducing brokers in commodities); provided, that in the case of documentary verification, the financial institution may use photocopies or other reproductions of the documents listed in paragraph (a)(2)(ii)(A)(*1*) of § 1020.220 of this chapter (for banks); § 1023.220 of this chapter (for brokers or dealers in securities); § 1024.220 of this chapter (for mutual funds); or § 1026.220 of this chapter (for futures commission merchants or introducing brokers in commodities). A covered financial institution may rely on the information supplied by the legal entity customer regarding the identity of its beneficial owner or owners, provided that it has no knowledge of facts that would reasonably call into question the reliability of such information.

Jenna H. Casanova,

Acting Director, Financial Crimes Enforcement Network.

BILLING CODE 4810–02–P

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 21

[Docket No. VA–2026–VBA–0463]

RIN 2900–AS94

Veteran Readiness and Employment Program: Update to Reduced Work Tolerance and Basic Eligibility Period

AGENCY: Department of Veterans Affairs.

ACTION: Proposed rule.

SUMMARY: The Department of Veterans Affairs (VA) proposes to amend the Veteran Readiness and Employment (VR&E) regulations to align with current practice and statute. The rule would expand the list of approved providers for reduced work tolerance (RWT) documentation, allowing for more accurate and timely processing by a Vocational Rehabilitation Counselor (VRC). VA also proposes to clarify that a veteran who is subject to a basic period of eligibility would receive a new 12-year period of eligibility if such veteran obtains a compensable service-connected disability rating based on a subsequent period of active-duty service. Finally, the rule would remove the eligibility termination date for veterans discharged on or after January 1, 2013, consistent with the Johnny Isakson and David P. Roe, M.D. Veterans Health Care and Benefits Improvement Act of 2020.

DATES: Comments must be received by January 19, 2027.

ADDRESSES: You may submit comments through *www.regulations.gov* under RIN 2900–AS94. That website includes a plain-language summary of this rulemaking. Comments will be posted for viewing by the public on *www.regulations.gov,* including any personally identifiable information (*e.g.,* a social security number or address) within a comment and its supporting materials. However, VA retains discretion to redact personal or sensitive information, including but not limited to personal or sensitive information pertaining to third parties. Additionally, VA will not post public comments that make threats to individuals or institutions or suggest that the

commenter will take actions to harm an individual. Instructions for accessing agency documents, submitting comments, and viewing the rulemaking docket, are available on *www.regulations.gov* under ''FAQ.'' Any public comment received after the comment period's closing date is considered late and will not be considered in the final rulemaking.

FOR FURTHER INFORMATION CONTACT: Kathryn Upham, Policy Analyst, Veterans Benefits Administration, (202) 461–9600.

SUPPLEMENTARY INFORMATION:

Reduced Work Tolerance

In accordance with 38 U.S.C. 3100, the purpose of the Chapter 31 VR&E program is to provide for all services and assistance necessary to enable veterans with one or more compensable service-connected disabilities to achieve maximum independence in daily living and, to the maximum extent possible, to become employable and to obtain and maintain suitable employment.

In some instances, a veteran's functional limitations, as a result of his or her disability(ies), impact his or her ability to participate in a rehabilitation program on a full-time basis. VA may approve a veteran for RWT following documentation from an approved medical provider. VA considers a veteran with an RWT to be pursuing his or her rehabilitation program full time when he or she is devoting as much time to the program as the effects of his or her disability(ies) permit. This allows VA, under certain circumstances, to pay the veteran a subsistence allowance at the full-time rate for the type of program being pursued when he or she meets the standard for full-time pursuit, *i.e.,* the rate of pursuit that VA considers to be equivalent to full-time pursuit, established for the veteran in his or her rehabilitation plan.

Section 21.312(e) of title 38 Code of Federal Regulations, currently requires a VA physician to make the RWT determination or redetermination. However, because an RWT determination or redetermination is an appealable benefits determination that is based on the evidence of record, VA proposes to revise the regulation to require a VRC to make the final determination or redetermination of RWT and to document such determination in the case file.

VA also proposes to amend 38 CFR 21.312(e) to allow for documentation to support an RWT to be provided by a veteran's medical provider rather than being limited to a VA physician. The documentation is necessary for a VRC to determine the veteran's ability to pursue a rehabilitation program under the VR&E program and to specify the rate of pursuit that VA will consider to be equivalent to full-time pursuit, so that the veteran may participate in a program of rehabilitation and receive a subsistence allowance at the full-time rate. Expanding the list of approved medical providers to those who have knowledge of the veteran's disability conditions would allow a VRC to make a more accurate and timely RWT determination or redetermination that is consistent with the veteran's regular care.

Furthermore, VA seeks to clarify in proposed § 21.312(f) that a veteran generally may not be approved for RWT and also be employed, to include participating in work study, because it would further reduce the veteran's ability to fully participate in a program of rehabilitation. RWT is developed relative to the current impact of the veteran's disabilities and the amount of time the veteran needs to spend treating their disabilities. However, if a veteran accepts employment while receiving RWT, he or she may maintain the RWT rate until the end of the semester or term.

Finally, approval for an RWT redetermination under § 21.312(c) would be contingent on the veteran's documented cooperation and participation in line with his or her medical treatment plan and on his or her ability to participate in a rehabilitation plan. A feasibility determination would be required with each yearly evaluation. This is to ensure the veteran continues to benefit from, and is in need of, RWT. The RWT program is not intended for the life of the case, but only until such a time as when the veteran establishes enough stability in his or her condition to return to the normal rate of pursuit approved by his or her VRC or case manager, as established under 38 CFR 21.310.

VA also proposes to amend § 21.312(d) to remove the outdated reference to electing benefits at the Chapter 34 rate. Chapter 34 benefits are not payable beyond December 31, 1989, and any previous election of benefits at the Chapter 34 rate terminated as of that date. 38 U.S.C. 3462(e); 38 CFR 21.334(e). VA also proposes grammatical updates to § 21.312.

Basic Period of Eligibility

Under 38 U.S.C. 3103(a), (b)(3), and (g), VA generally may not provide a Chapter 31 rehabilitation program to a veteran after the end of the 12-year period beginning on the date of the veteran's discharge or release from active military, naval, air, or space service or the date the veteran receives a compensable service-connected disability rating, whichever is later, if the discharge occurred before January 1, 2013. VA implemented section 3103(a) in 38 CFR 21.41(a) by referring to the 12-year period as beginning on the date of the veteran's discharge or release from his or her ''last'' period of service, which is calculated at the time of the veteran's initial application for Chapter 31 benefits. Based on VA's interpretation of 38 U.S.C. 3102 and 3103(a), VA proposes adding § 21.41(d) to establish a new 12-year period of eligibility for a veteran who is subject to a basic period of eligibility and who has a subsequent period of service that independently gives rise to a new qualifying disability for Chapter 31 benefits.

Under 38 U.S.C. 3103(f) and 38 CFR 21.46, if VA determines that a veteran who is subject to a basic period of eligibility is prevented from participating in, or continuing in, a program of vocational rehabilitation as a result of being ordered to active duty, VA will extend the veteran's basic period of eligibility by the length of time the veteran serves on active duty plus 4 months. However, as reflected in proposed §§ 21.41(d) and 21.46, VA does not interpret section 3103(f) as precluding the application of section 3103(a) to establish a new 12-year period of eligibility when the veteran could qualify for Chapter 31 benefits based independently on the new period of service. This is a veteran-friendly interpretation that is consistent with both 38 U.S.C. 3103(a) and (f) and would allow such veterans the time needed to pursue a rehabilitation program, despite being rated for their first condition potentially many years ago. We revised the authority citation for 38 CFR 21.46 to refer to both 38 U.S.C. 3102 and 3103.

Additionally, on January 5, 2021, section 1025 of the Johnny Isakson and David P. Roe, M.D. Veterans Health Care and Benefits Improvement Act of 2020, Public Law 116–315, added 38 U.S.C. 3103(g). Section 3103(g) eliminated the 12-year eligibility termination date for veterans discharged or released from active military, naval, or air service on or after January 1, 2013. VA proposes adding 38 CFR 21.41(e) to reflect the elimination of the eligibility termination date for veterans discharged or released from active military, naval, air, or space service on or after January 1, 2013. VA interprets section 3103(g) as eliminating the eligibility termination date for all veterans who were discharged or released on or after January 1, 2013,

including veterans who were discharged or released from space service. We note that section 3103(a) refers to an eligibility termination date applying to veterans ''discharge[d] or release[d] from active military, naval, air, or space service'' and believe that the omission of the reference to space service in section 3103(g) was a Congressional oversight. See Public Law 116–283, sec. 926 (adding space service to title 38 references to ''military, naval, or air service''); Public Law 116–315, sec. 1025 (adding section 3103(g)). VA also proposes adding a reference to proposed paragraph (e) in § 21.41(a)(2).

We also propose a technical revision in proposed § 21.46 to refer to 10 U.S.C. 12304a and 12304b as additional authority under which a veteran may be ordered to active duty, to make the regulation consistent with 38 U.S.C. 3103(f), to which section 12034a and 12304b were added by Public Law 115–48 after VA had promulgated § 21.46.

Executive Orders 12866, 13563 and 14192

VA examined the impact of this rulemaking as required by Executive Orders 12866 (Sept. 30, 1993) and 13563 (Jan. 18, 2011), which direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. The Office of Information and Regulatory Affairs has determined that this rulemaking is not a significant regulatory action under Executive Order 12866, as supplemented by Executive Order 13563. This proposed rule is an Executive Order 14192 deregulatory action.

Economic Impact: VA has determined that this rule does not create any new entitlements, expand benefit levels, or alter existing payments under Chapter 31. All proposed regulatory updates reflect practices that VR&E has already implemented since fiscal year 2021, such as eliminating the eligibility termination date for veterans discharged on or after January 1, 2013, and applying the updated 12-year eligibility period when a new qualifying service-connected disability is incurred. Expanding the list of medical providers who may determine RWT also does not change the amount or nature of benefits; it simply allows more timely and accurate documentation by providers who already work with the veteran. Because the rule updates regulations to match current law and existing VA practice, there are no new expenditures, transfers, or burdens on veterans, providers, small entities, or governments.

VA characterizes the rule as deregulatory because it removes outdated restrictions and reduces administrative barriers. By eliminating unnecessary limitations, such as requiring RWT determinations solely from VA physicians and maintaining an obsolete eligibility termination date, the rule streamlines program administration and reduces compliance burdens on both veterans and VA. These changes make the regulations clearer, more efficient, and more aligned with current statutory authority, thereby reducing regulatory friction without imposing any costs.

Regulatory Flexibility Act

The Secretary hereby certifies that this proposed rule would not have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act (5 U.S.C. 601–612). This certification is based on the fact that the technical changes made by this rule would affect individuals but would not affect any small entities. Therefore, under 5 U.S.C. 605(b), the initial and final regulatory flexibility analysis requirements of 5 U.S.C. 603 and 604 do not apply.

Unfunded Mandates

This proposed rule would not result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of $100 million or more (adjusted annually for inflation) in any one year.

Paperwork Reduction Act

This proposed rule contains no provisions constituting a collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521).

List of Subjects in 38 CFR Part 21

Administrative practice and procedure, Armed forces, Claims, Colleges and universities, Education, Employment, Manpower training programs, Reporting and recordkeeping requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Signing Authority

Douglas A. Collins, Secretary of Veterans Affairs, approved this document on November 13, 2026, and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs.

Marie Chung,

Alternate Federal Register Liaison Officer, Department of Veterans Affairs.

For the reasons stated in the preamble, the Department of Veterans Affairs proposes to amend 38 CFR part 21 as set forth below:

PART 21—VETERAN READINESS AND EMPLOYMENT AND EDUCATION

Subpart A—Veteran Readiness and Employment

■ 1. The authority citation for part 21, subpart A continues to read as follows:

Authority: 38 U.S.C. 501(a), chs. 18, 31, and as noted in specific sections.

§ 21.41 [Amended]

■ 2. Amend § 21.41 by revising paragraph (a)(2), adding paragraphs (d) and (e), removing the authority citation after paragraphs (b) and (c), and adding an authority citation after paragraph (e) to read as follows:

§ 21.41 Basic period of eligibility.

(a) * * *

* * * * *

(2) Except as provided in paragraph (b), (c), or (e) of this section, the period during which an individual may receive a program of vocational rehabilitation benefits and services under 38 U.S.C. chapter 31 is limited to his or her basic period of eligibility.

* * * * *

(d) *New period of eligibility.* If a veteran who is subject to a basic period of eligibility has a subsequent period of active military, naval, air, or space service, the veteran may receive a new 12-year period of eligibility under paragraph (a)(1) if the veteran receives a service-connected disability rating of 10 percent or more based on this new active-duty period.

(e) *Elimination of eligibility termination date.* Veterans who are discharged or released from active military, naval, air, or space service on or after January 1, 2013, are not subject to a time limit for eligibility to receive vocational rehabilitation and will therefore not be subject to a 12-year period of eligibility.

(Authority: 38 U.S.C. 3102, 3103)

§ 21.46 [Amended]

■ 3. Revise § 21.46 to read as follows:

§ 21.46 Veteran ordered to active duty; extension of basic period of eligibility.

Extension of basic eligibility period. If VA determines that a veteran who is subject to a basic period of eligibility is

prevented from participating in, or continuing in, a program of vocational rehabilitation as a result of being ordered to active duty under 10 U.S.C. 688, 12301(a), 12301(d), 12301(g), 12302, 12304, 12304a, or 12304b, the veteran's basic period of eligibility will be extended by the length of time the veteran serves on active duty plus 4 months. However, if the veteran receives a service-connected disability rating of 10 percent or more based on this new active-duty period, the veteran may receive a new 12-year period of eligibility under § 21.41(a)(1).

(Authority: 38 U.S.C. 3102, 3103)

§ 21.312 [Amended]

■ 4. Amend § 21.312 by revising paragraphs (c), (d), and (e) and adding paragraph (f) to read as follows:

§ 21.312 Reduced Work Tolerance

* * * * *

(c) *Redetermination of work tolerance.* The veteran's work tolerance will be reevaluated one time per year, or more frequently if needed. The rate of pursuit required for VA to consider it equivalent to full-time pursuit will be modified if there is either an increase or decrease in the work tolerance of the veteran. Continued approval for reduced work tolerance is contingent on the veteran's documented cooperation and participation in line with his or her treatment plan and on his or her ability to participate in a rehabilitation plan. Feasibility determination is required with each yearly evaluation.

(d) *Payment of allowance.* A veteran with a reduced work tolerance will be paid a subsistence allowance at the full-time rate for the type of program being pursued when the veteran meets the standard for full-time pursuit established for the veteran in the rehabilitation plan.

(e) *Determining work tolerance.* Documentation must be submitted by a licensed or certified medical or mental health professional, to include but not limited to a physician, physician assistant, nurse practitioner, psychiatrist, or psychologist, and must support a determination or redetermination regarding the veteran's work tolerance. A Vocational Rehabilitation Counselor will make the final determination based on the evidence of record.

(f) *Limitations.* A veteran may not be approved for reduced work tolerance and participate in employment, including work study. If a veteran with a determined reduced work tolerance accepts employment, the veteran may maintain the reduced work tolerance rate until the end of the current term or semester.

(Authority: 38 U.S.C. 3108(d))

Notices

Federal Register

Vol. 91, No. 222

Thursday, November 19, 2026

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Policies on the Use of Generative Super Intelligence in Agency Adjudication; Request for Comments

AGENCY: Administrative Conference of the United States.

ACTION: Notice; request for comments.

SUMMARY: The Office of the Chairman of ACUS is requesting public input on the development of policies regarding the use of generative super intelligence, previously referenced as generative artificial intelligence,[1] by agency adjudicators, other agency personnel, parties, representatives, and other participants in federal agency adjudications. Responses to this request may inform an ongoing ACUS project, *Policies on the Use of Generative Super Intelligence in Agency Adjudication,* which will recommend best practices for agencies.

DATES: Comments must be received no later than 10 a.m. (ET) January 19, 2027.

ADDRESSES: You may submit comments by email to *lrobbins@acus.gov* (with ''Policies on the Use of Generative Super Intelligence in Agency Adjudication'' in the subject line of the message), or by U.S. Mail addressed to Policies on the Use of Generative Super Intelligence in Agency Adjudication, Administrative Conference of the United States, 1120 20th Street NW, Suite 706 South, Washington, DC 20036. ACUS will ordinarily post comments on the project web page as they are received. Commenters should not include information, such as personal information or confidential business information, that they do not wish to appear on the ACUS website. For the full ACUS public comment policy, please visit *https://www.acus.gov/policy/public-comment-policy.*

FOR FURTHER INFORMATION CONTACT: Lea Robbins, Attorney Advisor, Administrative Conference of the United States, 1120 20th Street NW, Suite 706 South, Washington, DC 20036; Telephone (202) 480–2080; email *lrobbins@acus.gov.*

SUPPLEMENTARY INFORMATION: The Administrative Conference Act, 5 U.S.C. 591–596, established the Administrative Conference of the United States. The Conference studies the efficiency, adequacy, and fairness of the administrative procedures used by federal agencies and makes recommendations to agencies, the President, Congress, and the Judicial Conference of the United States for procedural improvements (5 U.S.C. 594(1)). For further information about the Conference and its activities, see *www.acus.gov.*

Policies on the Use of Generative Super Intelligence by Agency Adjudicators and Other Agency Personnel

Generative super intelligence (GenSI) systems are SI ''models that are able to generate new content.'' [2] Unlike other SI models—which classify data or make predictions, recommendations, and decisions—GenSI systems create ''various outputs, including texts, images, videos, computer code, or music'' based on user-input prompts.'' [3]

There has been a rapid expansion in the availability and use of GenSI tools since the public release of ChatGPT in November 2022. Today, more than half of Americans regularly use chatbots and virtual assistants such as ChatGPT and Google Gemini to ''create responses using algorithms that are trained often on open-source information, such as text and images from the internet.'' [4] Adoption rates also continue to rise among legal service providers,[5] and the number of GenSI use cases within the federal government ''increased about nine-fold'' between 2023 and 2024.[6]

When used responsibly, GenSI has the potential to help agencies perform adjudication-related tasks more efficiently and accurately. Adjudicators and other agency personnel might use GenSI to assist in preparing written communications such as notices, orders, and decisions; summarizing and analyzing lengthy written submissions and voluminous evidence; conducting legal and nonlegal research; transcribing hearings; and translating documents.[7]

At the same time, agencies must consider potential risks, including how the use of GenSI might affect adjudicators' analysis of the law and facts of individual cases and how the use of non-secure GenSI tools might affect privacy and other sensitive interests.

Agencies are required to ''develop a policy that sets the terms for acceptable use of [GenSI] for their missions and establishes adequate safeguards and oversight mechanisms that allow [GenSI] to be used in the agency without posing undue risk.'' [8] This project will identify best practices to help agencies develop specific policies regarding the use of GenSI by adjudicators and other agency personnel involved in agency adjudications. In addition to identifying best practices for developing, disseminating, and periodically reevaluating such policies, it will identify practices that promote the effective use of GenSI and innovation in adjudication while guarding against misuse and undue risks.

Policies on the Use of Generative Super Intelligence by Parties and Representatives

GenSI also has the potential to benefit parties and their representatives, who can use the technology to assist in conducting legal research and analysis more efficiently and prepare pleadings, briefs, and other written communications more effectively. GenSI

[1] Executive Order 14434, *Inaugurating the Era of Super Intelligence,* directs agencies to use the terms ''Super Intelligence'' and ''SI'' in place of ''Artificial Intelligence'' and ''AI'' in official correspondence, public communications, websites, reports, policy documents, and other nonstatutory documents. 91 FR 63129 (Oct. 2, 2026).

[7] *Id.* at 14–15 (2025).

[8] Memorandum for the Heads of Executive Departments and Agencies from Russell T. Vought, Dir., Off. of Mgmt. & Budget, M–25–21, Accelerating Federal Use of AI through Innovation, Governance, and Public Trust (Apr. 3, 2025), *https://www.whitehouse.gov/wp-content/uploads/2025/02/M-25-21-Accelerating-Federal-Use-of-AI-through-Innovation-Governance-and-Public-Trust.pdf.*

may be especially useful for self-represented parties by offering ''new, highly accessible tools that provide answers to basic questions, including where to find templates and court forms, how to fill them out, and where to bring them for presentation to the judge—all without leaving home.[9]

At the same time, there are potential risks associated with parties' and representatives' use of the developing technology. Most prominently, GenSI tools can hallucinate (generating false or misleading information), and there have been well-publicized instances in which parties and representatives cited nonexistent legal authorities, inaccurately represented legal authorities, or relied on false or misleading information.[10] The use of GenSI tools may implicate representatives' responsibilities to engage fairly, truthfully, and ethically with tribunals and clients.[11] And concerns have been raised that GenSI tools could be used to fabricate deepfake evidence.[12]

Agencies have taken different approaches to regulating the use of GenSI by parties, representatives, and other participants in agency adjudications. The Executive Office for Immigration Review (EOIR) and U.S. Patent and Trademark Office, for example, have published specific policies on parties' and representatives' use of GenSI.[13] Some adjudicators independently inform parties and representatives about proper and improper uses of GenSI. Adjudicators at some agencies affirmatively require representatives to disclose when and how they used GenSI. Some adjudicators require representatives to certify that they did not use GenSI or that they analyzed its output before relying on it. Adjudicators at several agencies have considered alleged misuse of GenSI in the context of individual proceedings, including how existing rules of representative conduct should apply in such cases.

This project will identify best practices to help agencies develop specific policies regarding the use of GenSI by parties, representatives, and other participants in agency adjudications. In addition to identifying best practices for developing, disseminating, and periodically reevaluating such policies, it will identify practices that promote the effective use of GenSI and innovation in adjudication while guarding against misuse and undue risks.

Specific Topics for Public Comment

ACUS welcomes views, information, and data on all aspects of the development of policies regarding the use of GenSI by agency adjudicators, other agency personnel, parties, representatives, and other participants in federal agency adjudications. ACUS also seeks specific feedback on the following questions:

1. How are you using, or have you considered using, GenSI to accomplish any tasks associated with federal agency adjudications, such as drafting filings, conducting legal or nonlegal research, summarizing evidence, conducting discovery, transcribing depositions? What GenSI tools do you use? What benefits and drawbacks have you experienced in using GenSI to accomplish tasks associated with agency adjudications?

2. How do you feel about how agency adjudicators and other agency personnel are using, or might someday use, GenSI to assist in adjudicating cases? What are the benefits and drawbacks of agency adjudicators and other agency personnel using GenSI tools?

3. Do existing agency rules and policies regarding the qualifications and conduct of representatives—such as rules regarding competence, diligence, communication, confidentiality, fees, and candor with the tribunal—provide sufficient guidance regarding proper and improper uses of GenSI in agency adjudications?

4. Do you think it would be useful for agencies to issue specific rules, regulations, policies, guidance, practice guides, benchbooks, standing orders, or other materials regarding the use of GenSI in agency adjudications? Why or why not?

5. Have you encountered any agency rules, regulations, policies, guidance, practice guides, benchbooks, standing orders, or other materials regarding the use of GenSI in agency adjudications? If so, what do they do well, and how could they be improved?

6. Do you have thoughts on rules, regulations, policies, guidance, practice guides, benchbooks, standing orders, and other materials adopted or considerd by federal courts, state courts, state and local agencies, and state bars and other professional associations?

7. What restrictions, if any, should agencies place on the use of GenSI by agency adjudicators, other agency personnel, parties, representatives, and other participants in agency adjudications?

8. Should agencies require parties and/or representatives in agency adjudications to disclose when and how they used GenSI, or at least require parties and/or representatives to certify that they reviewed any content generated by a GenSI tool for accuracy? Why or why not?

9. What consequences, if any, should parties and/or representatives face for using GenSI improperly in agency adjudications?

10. Should the same or different rules apply to private representatives who are lawyers, private representatives who are not lawyers, self-represented parties, and lawyers who represent an agency in agency adjudications?

Authority: 5 U.S.C. 595.

Dated: November 16, 2026.

Shawne C. McGibbon,

General Counsel.

DEPARTMENT OF COMMERCE

Census Bureau

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; National Survey of Children's Health

AGENCY: U.S. Census Bureau, Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act (PRA) of 1995, invites the general public and other Federal agencies to comment on

proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment on the proposed revision of the National Survey of Children's Health, prior to the submission of the information collection request (ICR) to OMB for approval.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before January 19, 2027.

ADDRESSES: Interested persons are invited to submit written comments by email to *ADDP.NSCH.List@census.gov.* Please reference National Survey of Children's Health in the subject line of your comments. You may also submit comments, identified by Docket Number USBC–2026–0793, to the Federal e-Rulemaking Portal: *http://www.regulations.gov.* All comments received are part of the public record. No comments will be posted to *http://www.regulations.gov* for public viewing until after the comment period has closed. Comments will generally be posted without change. All Personally Identifiable Information (for example, name and address) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information. You may submit attachments to electronic comments in Microsoft Word, Excel, or Adobe PDF file formats.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Christine Flanagan Borman, Survey Director, by way of phone (301–763–4315) or email (*christine.flanagan.borman@census.gov*).

SUPPLEMENTARY INFORMATION:

I. Abstract

Sponsored primarily by the U.S. Department of Health and Human Services' Health Resources and Services Administration's Maternal and Child Health Bureau (HRSA MCHB), the National Survey of Children's Health (NSCH) is designed to produce data on the physical and emotional health of children under 18 years of age who live in the United States. For each year of the NSCH annual survey, there are a variety of partnering agencies that sponsor supplemental content on the NSCH. Partnering agencies that have participated in prior cycles of the NSCH include the United States Department of Health and Human Services' Centers for Disease Control and Prevention (CDC), the United States Department of Agriculture (USDA), and the Environmental Protection Agency (EPA). Partnering agencies may decide to provide support between now and the submission of the full ICR. A full list of these partnering agencies will be included within the Supporting Statements. The upcoming cycle of the NSCH also plans to include state oversamples again. These oversamples are sponsored by the interested state and support more targeted assessment, program planning, and evaluation within their state.

The NSCH collects information on factors related to the well-being of children, including access to health care, in-home medical care, family interactions, parental health, school and after-school experiences, and neighborhood characteristics. The goal of the 2027 NSCH is to provide HRSA MCHB, the supplemental sponsoring agencies, states, and other data users with the necessary data to support the production of national estimates yearly and state- or region-based estimates with pooled samples on the health and well-being of children, their families, and their communities as well as estimates of the prevalence of and impact on children with special health care needs. The MCHB sponsored NSCH sample plus the separately sponsored state-based oversamples will be approximately 500,000 addresses for the 2027 NSCH.

NSCH is seeking clearance to make the following changes:

- *Increased sample size*—The MCHB sponsored NSCH sample plus the separately sponsored age-, state-, or region-based oversamples will be approximately 500,000 addresses for the 2027 NSCH, compared with approximately 375,000 in 2026. The increased sample will allow individual states and agencies to produce statistically sound child health estimates in a fewer number of pooled years than if the sample were to remain the same annually, thereby resulting in more timely state- and region-based health estimates of children. For example, with this sample size, more states can anticipate having approximately 2,000 interviews within two years of data collection, an important threshold for a number of state-level health indicators.
- *Revised questionnaire content*—Newly proposed and revised NSCH content from the sponsors at HRSA MCHB underwent both expert review and two rounds of cognitive testing. This testing request was submitted under the generic clearance package and approved by OMB.[1] Based on the results, a list of modified content will be included in the full OMB ICR for the 2027 NSCH.
- *Oversamples*[2]—To inform various priorities that are otherwise not supported by the NSCH base sample, some stakeholders are interested in sponsoring an oversample of particular populations as part of the annual NSCH administration. Currently, there are eight states interested in contributing to an oversample as part of the 2027 NSCH. Seven (7) states (California, Kansas, Minnesota, New Mexico, Ohio, Pennsylvania, and West Virginia), have been oversampled in one or more previous cycle(s) of the NSCH since 2020 and are likely continuing with the option as part of the 2027 NSCH. The District of Columbia may pursue an oversample for the first time in 2027.
- *Digital incentive test*—To evaluate the feasibility of digital incentives for the NSCH, the sponsors at HRSA MCHB would like to conduct a small test using pre-paid digital incentives that are comparable to the current design element of a $5 cash incentive to evaluate its impact at reducing non-response bias as well as to assess how they perform operationally. Results of this test will be used to inform mailout strategies used in future cycles of the survey.
- *Web topical invite*—Previously, due to limitations within legacy systems, providing a topical web instrument for respondents who completed (and returned) a paper screener was not possible. Since the transition of the NSCH survey into the new DICE (Data Ingest and Collection for the Enterprise) system, the feasibility of loading the required data needed for directing the respondent into the correct age-based topical instrument is now something that can be done. Due to this, HRSA MCHB would like to evaluate the feasibility of this new mode offering at the topical stage within the instrument while still providing a topical paper questionnaire as a method of response.

Besides the proposed changes listed above, the 2027 NSCH will proceed with a slightly modified design as outlined in the previous OMB ICR package, including the use of incentives. Response rates for the unconditional monetary incentive group continues to

[1] Paperwork Reduction Act Guidance *https://www.reginfo.gov/public/do/PRAViewIC?ref_nbr=202512-0607-004&icID=280764.*

[2] State Oversampling in the National Survey of Children's Health: Feasibility, Cost, and Alternative Approaches *https://census.gov/content/dam/Census/programs-surveys/nsch/NSCH_State_Oversample_Summary_Document.pdf.*

show a statistically significant difference over the control group that did not receive an unconditional monetary incentive. As part of the initial screener mailing, approximately 95% will include a $5 incentive (cash with a small treatment group receiving digital) and approximately 5% will not receive an incentive (serving as the control.) The incentive assignment to each sampled address will still be random as was done in prior cycles and approved by OMB. In the final screener mailing, a subset of approximately 10,000 households with children that started the web instrument but did not finish will receive a final web push invite with a secondary unconditional incentive in an attempt to have the household log back into the web instrument and finish the survey. For those households that are eligible for an initial paper topical mailing, this package will also include an additional $5 cash incentive. Additional incentives, mailing, and contact strategies may be used to both reduce nonresponse bias and improve response rates, including email, text, and telephone reminders, per request of the sponsor and as funding allows. We will continue to make modifications to data collection strategies based on modeled information about paper or internet response preference. Results from prior survey cycles will continue to be used to inform the decisions made regarding future cycles of the NSCH.

From prior cycles of the NSCH, using American Association for Public Opinion Research definitions of response, we can expect for the 2027 NSCH an overall screener completion rate to be about 38.8% and an overall response rate to be about 34.7%.[3]

II. Method of Collection

The 2027 NSCH plan for the web push data collection design includes approximately 70% of the production addresses receiving an initial invite with instructions on how to complete an English or Spanish-language screener questionnaire via the web. This group will receive two web survey invitation letters requesting their participation in the survey prior to receiving up to two additional paper screener questionnaires in the second and third follow-up mailings. Households that decide to complete the web-based survey will be taken through the screener questionnaire to determine if they are eligible for one of three topical instruments. Households that list at least one child who is 0 to 17 years old in the screener are directed into a topical questionnaire immediately after the last screener question. If a household in the web push treatment group decides to complete the paper screener, the household will receive an additional topical questionnaire incentive.

The 2027 NSCH plan for the mixed-mode data collection design includes up to 30% of the production addresses receiving a paper screener questionnaire in the initial mailing with instructions on how to complete an English or Spanish language screener questionnaire via the web as well. This group will receive both a web survey invitation letter along with a mailed paper screener questionnaire with either the initial invitation or the first follow-up and each additional nonresponse follow-up mailing. Households that decide to complete the web-based survey will follow the same screener and topical selection path as the web push. Households that choose to complete the paper screener questionnaire rather than completing the survey on the internet and that have eligible children will be mailed a topical questionnaire invitation package upon receipt of their completed paper screener at the Census Bureau's National Processing Center. If a household in the mixed-mode group chooses to complete the paper screener instead of completing the web-based screener via the internet, then the household will receive an additional topical questionnaire incentive.

III. Data

OMB Control Number: 0607–0990.

Form Number(s): NSCH–S1 (English Screener), NSCH–T1 (English Topical for 0- to 5-year-old children), NSCH–T2 (English Topical for 6- to 11-year-old children), NSCH–T3 (English Topical for 12- to 17-year-old children), NSCH–S–S1 (Spanish Screener), NSCH–S–T1 (Spanish Topical for 0- to 5-year-old children), NSCH–S–T2 (Spanish Topical for 6- to 11-year-old children), and NSCH–S–T3 (Spanish Topical for 12- to 17-year-old children).

Type of Review: Regular submission, Request for a Revision of a Currently Approved Collection.

Affected Public: Individuals and households.

Estimated Number of Respondents: 150,260.

Estimated Time per Response: 5 minutes per screener response and 35–36 minutes per topical response, which in total is approximately 40–41 minutes for households with eligible children.

Estimated Total Annual Burden Hours: 49,460.

Estimated Total Annual Cost to Public: $0 (This is not the cost of respondents' time, but the indirect costs respondents may incur for such things as purchases of specialized software or hardware needed to report, or expenditures for accounting or records maintenance services required specifically by the collection.)

Respondent's Obligation: Voluntary.

Legal Authority: Title 13 U.S.C. 8(b); Section 501(a)(2) of the Social Security Act (42 U.S.C. 701).

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include, or summarize, each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Departmental PRA Compliance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

[FR Doc. 2026–23557 Filed 11–18–26; 8:45 am]

BILLING CODE 3510–07–P

[3] Overall Response Rate is the probability a resolved address completes a screener questionnaire and then, when eligible, completes a topical questionnaire.

DEPARTMENT OF COMMERCE

International Trade Administration

[C–122–858]

Certain Softwood Lumber Products From Canada: Amended Final Results of Countervailing Duty Administrative Review; 2024

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) is amending the final results of the administrative review of the countervailing duty (CVD) order on certain softwood lumber products (softwood lumber) from Canada to correct a ministerial error. The period of review (POR) is January 1, 2024, through December 31, 2024.

DATES: Applicable November 18, 2026.

FOR FURTHER INFORMATION CONTACT: Elizabeth Talbot Russ, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–5516.

SUPPLEMENTARY INFORMATION:

Background

On October 19, 2026, Commerce published the *Final Results* of the 2024 administrative review of the CVD order [1] on softwood lumber from Canada in the **Federal Register**.[2] On October 15, 2026, Commerce notified interested parties of the deadline for the submission of ministerial error comments concerning the *Final Results*.[3] On October 20, 2026, Commerce received a timely filed allegation of a ministerial error from Resolute FP Canada Inc. (Resolute).[4] No other interested party filed an allegation or commented on Resolute's allegation.

Legal Framework

A ''ministerial error'' is defined as an error ''in addition, subtraction, or other arithmetic function, clerical error resulting from inaccurate copying, duplication, or the like, and any other similar type of unintentional error which {Commerce} considers ministerial.'' [5] Any issue raised by an interested party as a ministerial error which is, in fact, the result of a methodological decision by Commerce will not be considered a ministerial error because it would not meet the definition of the term in the controlling regulation and under the Act.[6]

Commerce's regulations stipulate that the agency will disclose its calculations to parties to the proceeding and that those parties may submit comments concerning any ministerial error in such calculations in the final results of a review.[7] Commerce will analyze any comments received and, if appropriate, correct any ministerial error by amending the final results of review.[8]

Ministerial Errors

Resolute alleges that Commerce made a ministerial error in the calculations underlying the *Final Results*. Commerce reviewed the record and agrees that the error alleged by Resolute constitutes a ministerial error within the meaning of section 751(h) of the Act and 19 CFR 351.224(f).[9] Specifically, for Resolute, Commerce made an inadvertent error by using an incorrect figure in the final calculations.[10]

Pursuant to 19 CFR 351.224(e), Commerce is amending the *Final Results* to reflect the correction of the ministerial error, as described in the Ministerial Error Memorandum.[11] Based on the correction, Resolute's final subsidy rate changed from 12.42 percent to 12.35 percent, and the non-selected companies' final subsidy rate changed from 14.11 percent to 14.08 percent. The amended net subsidy rates are listed in the ''Amended Final Results'' section below.

For a complete discussion of the ministerial error allegation, as well as Commerce's analysis, *see* the Ministerial Error Memorandum. The Ministerial Error Memorandum is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov*.

Amended Final Results of Review

As a result of correcting the ministerial error described above, Commerce determines that the following net countervailable subsidy rates exist for the following producers/exporters for which this administrative review was conducted for the period January 1, 2024, through December 31, 2024:

Company	Subsidy rate (percent *ad valorem*)
Resolute [12]	12.35
West Fraser Mills Ltd.* [13]	15.31
Non-Selected Companies [14]	14.08

* This rate is not affected by the amended final.

Disclosure

Commerce intends to disclose the calculations performed in connection with these amended final results of review to interested parties within five days after public announcement of the amended final results or, if there is no public announcement, within five days of the date of publication of this notice in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Assessment Rates

In accordance with section 751(a)(2)(C) of the Act and 19 CFR 351.212(b)(2), Commerce shall determine, and U.S. Customs and Border Protection (CBP) shall assess, countervailing duties on all appropriate entries covered by this review. Commerce intends to issue assessment instructions to CBP no earlier than 41 days after the date of publication of these amended final results of review in the **Federal Register**, in accordance with 19 CFR 356.8(a).

[10] *Id.*

[11] *Id.*

[12] Commerce finds the following companies to be cross-owned with Resolute FP Canada Inc: Forest Products Mauricie L.P., Fibrek General Partnership, Resolute Engineered Wood St. Prime Limited Partnership, Resolute Engineered Wood Larouche Inc., Profor Renaissance LP, 15477468 Canada Inc., 9340939 Canada Inc., Resolute Forest Products Inc., Bowater Canadian Holdings Incorporated, AbitibiBowater Canada Inc., and Bowater Canadian Limited.

[13] Commerce finds the following companies to be cross-owned with West Fraser Mills Ltd.: Blue Ridge Lumber Inc., Manning Forest Products, Ltd., Spray Lake Sawmills (1980) Ltd., Sundre Forest Products Inc., West Fraser Alberta Holdings, Ltd., and West Fraser Timber Co., Ltd.

[14] The 215 non-selected companies receiving the review-specific rate are listed in the appendix.

Cash Deposit Requirements

In accordance with section 751(a)(1) of the Act and 19 CFR 351.107(f)(3), the following amended cash deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after October 19, 2026, the publication date of the *Final Results,* as follows: (1) the cash deposit rate for Resolute and the companies listed in the appendix will be equal to the company-specific estimated individual countervailable subsidy rates determined in these amended final results of this review, except if the rate is less than 0.50 percent and, therefore, *de minimis* within the meaning of 19 CFR 351.106(c)(1), in which case the cash deposit rate will be zero; (2) if both the producer and exporter of the subject merchandise have company-specific estimated subsidy rates assigned, and their rates differ, then the applicable cash deposit rate will be the higher of these two rates; (3) if either the producer or the exporter, but not both, of the subject merchandise has a company-specific estimated subsidy rate assigned, the applicable cash deposit rate will be that company's company-specific rate; and (4) the cash deposit rate for all other producers and exporters will be 14.19 percent, the all-others subsidy rate established in the investigation.[15] These cash deposit requirements, when imposed, shall remain in effect until further notice.

Administrative Protective Order (APO)

This notice also serves as a final reminder to parties subject to an APO of their responsibility concerning the destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation subject to sanction.

Notification to Interested Parties

These amended final results are issued and published in accordance with sections 777(i)(1), 777A(e), and 782 of the Act, and 19 CFR 351.221(b)(5) and 351.224(e).

[15] *See Order.* Effective October 29, 2026, the all-others rate is 12.80 percent. *See Certain Softwood Lumber Products from Canada: Notice of NAFTA Panel Decision,* 91 FR 69242 (November 3, 2026).

Dated: November 12, 2026.

Steven Presing,

Executive Director for AD/CVD Policy and Negotiations.

[A–549–833]

Citric Acid and Certain Citrate Salts From Thailand: Final Results of Antidumping Duty Administrative Review; 2024–2025

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that producers and exporters subject to this administrative review did not make sales of subject merchandise at less than normal value (NV) during the period of review (POR), July 1, 2024 through June 30, 2025.

DATES: Applicable November 19, 2026.

FOR FURTHER INFORMATION CONTACT: Joy Zhang or Anjali Mehindiratta, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–1168 or (202) 482–9127, respectively.

SUPPLEMENTARY INFORMATION:

Background

On July 16, 2026, Commerce published the *Preliminary Results* of the 2024–2025 administrative review of the antidumping duty order on citric acid and certain citrate salts (citric acid) from Thailand [1] in the **Federal Register** and invited interested parties to comment.[2] The deadline for the final results of review is November 13, 2026. We received no comments from interested parties on the *Preliminary Results,* and we made no changes to the *Preliminary Results*. Accordingly, no decision memorandum accompanies this **Federal Register** notice. The *Preliminary Results* are hereby adopted as the final results. Commerce conducted this administrative review in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act).

Scope of the Order

The products covered by this *Order* include all grades and granulation sizes of citric acid, sodium citrate, and potassium citrate in their unblended forms, whether dry or in solution, and regardless of packaging type from Thailand. For a full description of the scope of the *Order, see* the *Preliminary Results* PDM.

Rate for Non-Selected Company

The Act does not directly address the establishment of a rate to be applied to individual companies not selected for examination when Commerce limits its examination in an administrative review pursuant to section 777A(c)(2) of the Act. However, 19 CFR 351.109(g) states that Commerce will determine the rate for non-selected companies by applying the methodology set forth in 19 CFR 351.109(f)(1)–(2), which generally parallels the methodology for determining the all-others rate in an investigation under section 735(c)(5) of

[1] *See Citric Acid and Certain Citrate Salts from Belgium, Colombia and Thailand: Antidumping Duty Orders,* 83 FR 35214 (July 25, 2018) (*Order*).

[2] *See Citric Acid and Certain Citrate Salts from Thailand: Preliminary Results of Antidumping Duty Administrative Review; 2024–2025,* 91 FR 43612 (July 16, 2026) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum (PDM).

the Act. Under 19 CFR 351.109(f)(1) and section 735(c)(5)(A) of the Act, the all-others rate is normally ''an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero or de minimis margins, and any margins determined entirely {on the basis of facts available}.'' Where the weighted-average dumping margin for each of the individually examined companies is zero, *de minimis,* or based entirely on facts available, 19 CFR 351.109(f)(2) and section 735(c)(5)(B) of the Act provide that Commerce may use ''any reasonable method'' for determining the all-others rate, including averaging the margins of the individually examined companies.

In this administrative review, we determined a zero percent rate for the non-examined company, based on the rates calculated for the two mandatory respondents. No party commented on this rate, and therefore it remains unchanged in these final results.

Final Results of Review

We determine that the following weighted-average dumping margins exist for the period July 1, 2024, through June 30, 2025:

Producer/exporter	Weighted-average dumping margin (percent)
COFCO Biochemical (Thailand) Co., Ltd.	0.00
Sunshine Biotech International Co., Ltd.	0.00
Xitrical Group Co. LTD.	0.00

Disclosure

Normally, Commerce discloses to interested parties the calculations of the final results of an administrative review within five days of a public announcement or, if there is no public announcement, within five days of the date of publication of the notice of final results in the **Federal Register**, in accordance with 19 CFR 351.224(b). However, because we have made no changes to the *Preliminary Results,* there are no calculations to disclose.

Assessment Rates

Consistent with section 751(a)(2)(C) of the Act and 19 CFR 351.212(b), upon completion of the administrative review, Commerce shall determine, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise covered this review. Because the respondents' weighted-average dumping margins or importer-specific assessment rates are zero or *de minimis* in the final results of review, we intend to instruct CBP to liquidate entries without regard to antidumping duties.[3] The final results of this administrative review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the final results of this review and for future deposits of estimated duties, where applicable.[4]

In accordance with Commerce's ''automatic assessment'' practice, for entries of subject merchandise during the POR produced by each respondent which did not know that its merchandise was destined for the United States, we will instruct CBP to liquidate entries not reviewed at the all-others rate established in the original less-than-fair value (LTFV) investigation (*i.e.,* 11.25 percent)[5] if there is no rate for the intermediate company(ies) involved in the transaction.

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of these final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication in the **Federal Register** of the notice of final results of administrative review for all shipments of citric acid from Thailand entered, or withdrawn from warehouse, for consumption on or after the date of publication as provided for by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for the companies listed above will be equal to the weighted-average dumping margin established in the final results of this administrative review (*i.e.,* 0.00 percent); (2) for merchandise exported by a company not covered in this review but covered in a prior completed segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published in the completed segment for the most recent period; (3) if the exporter is not a firm covered in this review or another completed segment of this proceeding, but the producer is, then the cash deposit rate will be the company-specific rate established for the completed segment for the most recent period for the producer of the merchandise; and (4) the cash deposit rate for all other producers or exporters will continue to be 11.25 percent, the all-others rate established in the less-than-fair-value investigation.[6] These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during the POR. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Administrative Protective Order

This notice also serves as a final reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation subject to sanction.

Notification to Interested Parties

Commerce is issuing and publishing the final results of this review in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(5).

Dated: November 13, 2026.

Kasey O'Connor,

Deputy General Counsel, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XG201]

Western Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The Western Pacific Fishery Management Council (Council) will hold its Executive and Budget Standing Committee (SC) and 209th Council meetings to take actions on fishery management issues in the Western Pacific Region.

DATES: The meetings will be held between December 11 and December 16, 2026. For specific times and agendas, see **SUPPLEMENTARY INFORMATION.** Written public comments on final action items at the 209th Council meeting should be received at the Council office by 5 p.m. Hawaii Standard Time (HST), Thursday, December 10, 2026, see **ADDRESSES**.

ADDRESSES: The Executive and Budget SC meetings will be held by web conference via Webex. The 209th Council Meeting will be held as hybrid meetings for members and the public, with a remote participation option available via Webex. In-person attendance for the 209th Council meeting will be hosted at the Ala Moana Hotel, Hibiscus Ballroom, 410 Atkinson Drive, Honolulu, HI 96814.

Specific information on joining the meetings and connecting to the web conference will be posted on the Council website at *https://www.wpcouncil.org.* For assistance with the web conference connection, contact the Council office at (808) 522–8220.

FOR FURTHER INFORMATION CONTACT: Kitty M. Simonds, Executive Director, Western Pacific Fishery Management Council; phone: (808) 522–8220.

SUPPLEMENTARY INFORMATION: The Executive and Budget SC meeting will be held between 2 p.m. and 5 p.m. HST on December 11, 2026. The 209th Council meeting will be held between 10 a.m. and 3 p.m. HST on December 14, 2026, between 8:30 a.m. and 5:30 p.m. HST on December 15, 2026, and between 8:30 a.m. and 2 p.m. HST on December 16, 2026. Public Comment on Non-Agenda Items will be held between 4 p.m. and 4:30 p.m. HST on December 15, 2026.

Background documents for the 209th Council meeting will be available at *https://www.wpcouncil.org.* Written public comments on final action items at the 209th Council meeting should be received at the Council office by 5 p.m. HST, Thursday, December 10, 2026, and should be sent to Kitty M. Simonds, Executive Director; Western Pacific Fishery Management Council, 1164 Bishop Street, Suite 1400, Honolulu, HI 96813, phone: (808) 522–8220 or fax: (808) 522–8226; or email: *info@wpcouncil.org.* Written public comments on all other agenda items may be submitted for the record by email throughout the duration of the meeting. Instructions for providing oral public comments during the meeting will be posted on the Council website.

Agenda items noted as ''Final Action'' refer to actions that may result in Council transmittal of a proposed fishery management plan, proposed plan amendment, or proposed regulations to the U.S. Secretary of Commerce, under Sections 304 or 305 of the Magnuson-Stevens Fishery Conservation and Management Act (MSA). In addition to the agenda items listed here, the Council and its advisory bodies will hear recommendations from Council advisors. An opportunity to submit public comment will be provided throughout the agendas. The order in which agenda items are addressed may change and will be announced as soon as practicable before the listed agenda item during the Council meeting. The meetings will run as late as necessary to complete scheduled business.

This meeting will be recorded (audio only) for the purposes of generating the minutes of the meeting. As public comments will be made publicly available, participants and public commenters are urged not to provide personally identifiable information at this meeting. Participation in the meeting by web conference, or by telephone, constitutes consent to the audio recording.

Agenda for the Executive and Budget SC Meeting

Friday, December 11, 2026, 2 p.m. to 5 p.m. HST

1. Introduction and Approval of Agenda
2. Financial Reports
3. Administrative Reports
4. Council Family Changes
5. Election of Officers
6. Meetings and Workshops
7. Other Business
8. Public Comment
9. Discussion and Recommendations

Agenda for the 209th Council Meeting

Monday, December 14, 2026, 10 a.m. to 3 p.m. HST

1. Welcome and Introductions/Land Acknowledgment
2. Oath of Office
3. Approval of the 209th Council Meeting Agenda
4. Approval of the 208th Council Meeting Minutes
5. Executive Director's Report
6. Agency Reports
   - A. National Marine Fisheries Service
   - A.1. Pacific Islands Regional Office
   - A.2. Pacific Islands Fisheries Science Center
   - B. NOAA Office of General Counsel Pacific Islands Section
   - C. U.S. Coast Guard
   - D. Enforcement
   - D.1. NOAA Office of Law Enforcement
   - D.2. NOAA Office of General Counsel Enforcement Section
   - E. U.S. State Department
   - F. U.S. Fish and Wildlife Service
   - G. Pacific States Marine Fisheries Commission
   - H. Public Comment
   - I. Council Discussion and Action
7. Hawaii Archipelago and Pacific Remote Island Area
   - A. Island Reports
   - B. Department of Land and Natural Resources/Division of Aquatic Resources Report
   - C. Experimental Fishing Permit for NWHI Bottomfish
   - D. Shark Depredation Policy Workshop
   - E. Advisory Group Report and Recommendations
   - E.1. Advisory Panel
   - E.2. Fishing Industry Advisory Committee
   - E.3. Social Science Planning Committee
   - E.4. Scientific and Statistical Committee (SSC)
   - F. Public Comment
   - G. Council Discussion and Action

Tuesday, December 15, 2026, 8:30 a.m. to 5:30 p.m. HST

8. Program Planning and Research
   - A. Update on Restoring Commercial Fishing in Marine National Monuments
   - B. National Legislative Report
   - C. Seafood Updates
   - C.1. America First Seafood Strategy Report
   - C.2. Seafood Roundtable Preparation
   - C.3. U.S. Department of Agriculture Office of Seafood Updates

Non-emergency issues not contained in this agenda may come before the Council for discussion during its 209th meeting. However, Council final decisions will be restricted to those issues specifically listed in this document and any regulatory issue arising after publication of this document that requires emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take action to address the emergency.

Special Accommodations

These meetings are accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Kitty M. Simonds, (808) 522–8220 (voice) or (808) 522–8226 (fax), at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 17, 2026.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[FR Doc. 2026–23588 Filed 11–18–26; 8:45 am]

BILLING CODE 3510–22–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed Additions to and Deletions from the Procurement List.

SUMMARY: The Committee is proposing to add service(s) to the Procurement List

that will be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and delete product(s) and service(s) previously furnished by such agencies.

DATES: Comments must be received on or before: December 19, 2026.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 250 E Street SW, Suite 3100, Washington DC, 20024.

FOR FURTHER INFORMATION CONTACT: For further information or to submit comments contact: Michael R. Jurkowski, Telephone: (703) 489–1322, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503 (a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Additions

In accordance with 41 CFR 51–5.3(b), the Committee intends to add this services requirement to the Procurement List as a mandatory purchase only for the contracting activity at the location listed, with the proposed qualified nonprofit agency as the authorized source of supply. Prior to adding the service to the Procurement List, the Committee will consider other pertinent information, including information from Government personnel and relevant comments from interested parties regarding the Committee's intent to geographically limit this services requirement.

The following service(s) are proposed for addition to the Procurement List for production by the nonprofit agencies listed:

Service(s)

Service Type: Laundry Service
Mandatory For: US Air Force, Robins Air Force Base, Warner Robins Air Logistic Complex, Robins AFB, GA, 480 Richard Ray Blvd., Robins AFB, GA
Authorized Source of Supply: Power Works Industries, Inc., Columbus, GA
Contracting Activity: DEPT OF THE AIR FORCE, FA8501 AFSC PZIO

Deletions

The following product(s) and service(s) are proposed for deletion from the Procurement List:

Product(s)

NSN(s)—Product Name(s):
7520–01–496–5477—Calendar, Wall, Custom, Erasable, 12-Month, 48'' x 36''
Authorized Source of Supply: Chicago Lighthouse Industries, Chicago, IL
Contracting Activity: GENERAL SERVICES ADMINISTRATION, GSA/FAS FURNITURE SYSTEMS MGT DIV
NSN(s)—Product Name(s):
7520–01–658–0691—Pen, Retractable, Erasable, Blue Gel Ink, .7mm
7520–01–658–0692—Pen, Retractable, Erasable, Black Gel Ink, .7mm
Authorized Source of Supply: West Texas Lighthouse for the Blind, San Angelo, TX
Contracting Activity: GENERAL SERVICES ADMINISTRATION, GSA/FAS ADMIN SVCS ACQUISITION BR(2)

Service(s)

Service Type: Third Party Logistics Support Services
Mandatory For: 3PL Support Services, US Army, ACC–APG, Aberdeen Proving Ground, MD—TO3—LEEK, 6515 Integrity Court, Bldg 4310, Aberdeen Proving Ground, MD
Authorized Source of Supply: Goodwill Industries of South Florida, Inc., Miami, FL
Contracting Activity: DEPT OF THE ARMY, W6QK ACC–APG
Service Type: Janitorial/Grounds and Related Services
Mandatory For: GSA PBS Region 9, Chet Holifield Federal Building, Laguna Niguel, CA, 24000 Avila Road, Laguna Niguel, CA
Authorized Source of Supply: Landmark Services, Inc., Santa Ana, CA
Contracting Activity: GENERAL SERVICES ADMINISTRATION, PBS R9 AMD SERVICES CONTRACTING BRANCH
Service Type: Custodial service
Mandatory For: US Department of Agriculture, APHIS, Veterinary Services and Plant Protection and Quarantine, Gainesville, FL, 8100 NW 15th Pl., Gainesville, FL
Authorized Source of Supply: CARC-Advocates for Citizens with Disabilities, Inc., Lake City, FL
Contracting Activity: DEPARTMENT OF AGRICULTURE, USDA APHIS MRPBS
Service Type: Food Service
Mandatory For: Marine Corps: Mess Hall #MCA 602, Norfolk, VA
Authorized Source of Supply: Louise W. Eggleston Center, Inc., Norfolk, VA
Contracting Activity: DEPT OF DEFENSE, DOD/OFF OF SECRETARY OF DEF (EXC MIL DEPTS)
Service Type: Facility Maintenance Support Service
Mandatory For: U.S. Marshals Service, U.S. Marshals Service Headquarters, Arlington, VA, 1215 S. Clark St., VA
Authorized Source of Supply: Chimes District of Columbia, Baltimore, MD
Contracting Activity: DEPARTMENT OF JUSTICE, USMS

Michael R. Jurkowski,

Director, Business Operations.

[FR Doc. 2026–23597 Filed 11–18–26; 8:45 am]

BILLING CODE 6353–01–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Deletions from the Procurement List.

SUMMARY: This action deletes service(s) from the Procurement List that were furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

DATES: *Date added to and deleted from the Procurement List:* December 20, 2026.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 250 E Street SW, Suite 3100, Washington DC, 20024.

FOR FURTHER INFORMATION CONTACT: For further information or to submit comments contact: Michael R. Jurkowski, Telephone: (703) 489–1322, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION:

Deletions

On October 15, 2026 (91 FR 65533), the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed deletions from the Procurement List. This notice is published pursuant to 41 U.S.C. 8503(a)(2) and 41 CFR 51–2.3.

After consideration of the relevant matter presented, the Committee has determined that the service(s) listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action may result in authorizing small entities to furnish the service(s) to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the service(s) deleted from the Procurement List.

End of Certification

Accordingly, the following service(s) are deleted from the Procurement List:

Service(s)

Service Type: Custodial service
Mandatory For: US Army Corps of Engineers, Central Area Office, Davenport, IA, 1910 E. Kimberly Road, Suite 105, Davenport, IA
Authorized Source of Supply: The Arc of the Quad Cities Area, Rock Island, IL
Contracting Activity: DEPT OF DEFENSE, W07V ENDIST ROCK ISLAND
Service Type: Laundry Service
Mandatory For: US Army, Fort Campbell, Fort Campbell, KY, 8th and Desert Storm, Bldg 5212, Fort Campbell, KY
Authorized Source of Supply: Great Plains Enterprises, Inc., Las Vegas, NV
Contracting Activity: DEPT OF DEFENSE, W6QM MICC–FT CAMPBELL

Michael R. Jurkowski,

Director, Business Operations.

BILLING CODE 6353–01–P

DEPARTMENT OF EDUCATION

[Docket ID ED–2026–FSA–2839]

Privacy Act of 1974; Matching Program

AGENCY: Federal Student Aid, U.S. Department of Education.

ACTION: Notice of a new matching program.

SUMMARY: This matching program will support the U.S. Department of Education (ED) and the Department of War (DoW) in meeting the requirements set forth in Section 559(b) of the Servicemember Quality of Life Improvement and National Defense Authorization Act for Fiscal Year 2025, which requires the Secretary of Education and the Secretary of War to enter into a matching program to identify servicemembers and staff eligible for certain public service loan forgiveness programs. Under this matching program, DoW (source agency) will disclose to the ED, Federal Student Aid (FSA), (recipient agency), information on individuals who, at any time beginning on or after October 1, 2007, were members of the Armed Forces serving on active duty for a period of more than 30 consecutive days or civilian employees of DoW, for the purposes of: (1) identifying whether they made one or more student loan payments eligible to be counted for purposes of the Public Service Loan Forgiveness (PSLF) Program under subsection 455(m) of the Higher Education Act of 1965 (HEA) and Temporary Expanded PSLF (TEPSLF) program; and (2) without requiring further information from them, certifying the total period of such service or employment for purposes of such program and counting the total number of qualifying payments made by them for purposes of such program during such period. ED will evaluate the information that it receives from DoW to create a count of qualifying payments under PSLF made by covered employees on their respective Title IV Loans (as defined herein). In addition, ED will create customized notifications for covered employees based on the status of their respective Title IV Loans and whether they have already submitted a PSLF and TEPSLF Certification and Application (PSLF form).

DATES: Submit your comments on the proposed establishment of the matching program on or before December 21, 2026.

The matching program will become effective on the later of the following two dates: (1) December 1, 2026, or (2) 30 days after the publication of this notice, on November 19, 2026, unless comments have been received from interested members of the public requiring modification and republication of the notice. The matching program will continue for 18 months after the effective date and may be renewed for up to an additional 12 months if, within 3 months prior to the expiration of the 18 months, the respective Data Integrity Boards of ED and the DoW determine that the conditions specified in 5 U.S.C. 552a(o)(2)(D) have been met.

ADDRESSES: Comments must be submitted via the Federal eRulemaking Portal at *regulations.gov*. However, if you require an accommodation or cannot otherwise submit your comments via *regulations.gov*, please contact the program contact person listed under **FOR FURTHER INFORMATION CONTACT**. The Department will not accept comments submitted by fax or by email, or comments submitted after the comment period. To ensure that the Department does not receive duplicate copies, please submit your comments only once. In addition, please include the Docket ID at the top of your comments.

Federal eRulemaking Portal: Go to *www.regulations.gov* to submit your comments electronically. Information on using *Regulations.gov*, including instructions for accessing agency documents, submitting comments, and viewing the docket, is available on the site under the ''FAQ'' tab.

Privacy Note: The Department's policy is to make all comments received from members of the public available for public viewing in their entirety on the Federal eRulemaking Portal at *www.regulations.gov*. Therefore, commenters should be careful to include in their comments only information that they wish to make publicly available.

FOR FURTHER INFORMATION CONTACT: Corinne Sauri, Management and Program Analyst, Office of Operations and Governance, Federal Student Aid, U.S. Department of Education, 77 K Street NE, Washington, DC 20202. Telephone: (202) 245–5612.

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

SUPPLEMENTARY INFORMATION: In accordance with the Privacy Act of 1974, as amended (Privacy Act) (5 U.S.C. 552a); Office of Management and Budget (OMB) Final Guidance Interpreting the Provisions of Public Law 100–503, the Computer Matching and Privacy Protection Act of 1988, published in the **Federal Register** on June 19, 1989 (54 FR 25818); and OMB Circular No. A–108, notice is hereby provided of the establishment of the matching program between ED and DoW.

Participating Agencies

U.S. Department of Education and the Department of War.

Authority for Conducting the Matching Program

ED's legal authority to enter into this matching program is provided by subsection 455(m) of the HEA (20 U.S.C. 1087e(m)), and the regulations set forth in 34 CFR 685.219. DoW's legal authority for this matching program and the associated disclosures is provided by subsection 455(o) of the HEA (20 U.S.C. 1087e(o)) and the Privacy Act of 1974 (5 U.S.C. 552a). The Privacy Act (5 U.S.C. 552a(b)(3)) authorizes a Federal agency to disclose information about an

individual that is maintained in a system of records without the individual's prior written consent, when the disclosure is pursuant to a routine use published in a System of Records Notice (SORN) as required by 5 U.S.C. 552a(e)(4)(D). DoW published routine use Y in the applicable SORN, Uniformed Services Human Resources Information System (91 FR 10373) (March 3, 2026), to authorize the disclosures made under this matching program.

Purpose(s)

This matching program will assist DoW and ED in sharing information on individuals who, at any time beginning on or after October 1, 2007, were members of the Armed Forces serving on active duty for a period of more than 30 consecutive days or civilian employees of DoW (collectively referred to as ''covered employees''), for the purposes of: (1) identifying whether they made one or more student loan payments eligible to be counted for purposes of the PSLF program under subsection 455(m) of the HEA (20 U.S.C. 1087e(m)) and TEPSLF program; and (2) without requiring further information from them, certifying the total period of such service or employment for purposes of such program and counting the total number of qualifying payments made by them for purposes of such program during such period.

ED will evaluate the information that it receives from DoW to create a count of qualifying payments under PSLF made by covered employees of their respective Title IV Loans (as defined herein). In addition, ED will create customized notifications for covered employees based on the status of their respective Title IV Loans and whether they have already submitted a PSLF form. If ED determines that a covered employee, with approved certified employment on record as a result of a previously submitted PSLF form, has the requisite number of qualifying Title IV Loan payments under PSLF, then ED will automatically discharge the covered employee's Title IV Loans without requiring the covered employee to submit a PSLF form and will so notify the covered employee. Separately, if a covered employee has never submitted a PSLF form before but has met the requirements to receive loan discharge, ED will contact the covered employee and provide the ability to opt-out of forgiveness within 30 days from the date that ED sends the notification to the borrower before administering the discharge.

Categories of Individuals

This matching program covers individuals who, at any time beginning on or after October 1, 2007, were members of the Armed Forces serving on active duty for a period of more than 30 consecutive days or civilian employees of DoW.

Categories of Records

This matching program covers the following records on the aforementioned individuals: the name (first, middle, and last), date of birth (DOB), and Social Security number (SSN), and an indicator if the individual is military or civilian, beginning and end dates of employment or active duty service, and average number of hours in work schedule.

System(s) of Records

ED will disclose information to, and maintain information received from, DoW in ED's system of records titled ''National Student Loan Data System (NSLDS)'' (18–11–06), last published in the **Federal Register** in full on April 22, 2026 (91 FR 21480) and available at *https://www.federalregister.gov/documents/2026/04/22/2026-07817/privacy-act-of-1974-system-of-records.* ED will disclose to DoW the Notification File (data elements described in Attachment B) pursuant to routine use (1)(a) of NSLDS.

DoW will disclose to ED information from DoW's system of records titled ''Uniformed Services Human Resources Information System'', last published in full in the **Federal Register** on March 3, 2026 (91 FR 10373) and available at *https://www.federalregister.gov/documents/2026/03/03/2026-04170/privacy-act-of-1974-system-of-records.* DoW will disclose to ED the Response File (data elements described in Attachment B) pursuant to routine use Y.

ED will redisclose the information obtained from DoW to ED's Digital and Customer Care (DCC) Information Technology (IT) system covered under the system of records titled ''Aid Awareness and Application Processing'' (18–11–21), last published in the **Federal Register** in full on April 22, 2026 (91 FR 21450) and available at *https://www.federalregister.gov/documents/2026/04/22/2026-07825/privacy-act-of-1974-system-of-records* pursuant to 5 U.S.C. 552a(b)(1). DoW and ED have respectively determined that the routine uses set forth in Sections VI.A.1 through 3 of this CMA are compatible with the purposes for which the information was collected. In accordance with Section VIII of this CMA, ED will notify all borrowers contained in the DoW Response File via written letter that their information matched.

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at *www.federalregister.gov*. Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Wayne Sullivan,

Acting Principal Deputy Chief Operating Officer, Federal Student Aid.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2026–SCC–3400]

Agency Information Collection Activities; Comment Request; Guaranty Agencies Security Self-Assessment and Attestation

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing a revision of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before January 19, 2027.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by

searching the Docket ID number ED–2026–SCC–3400. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. If the *regulations.gov* site is not available to the public for any reason, the Department will temporarily accept comments at *ICDocketMgr@ed.gov.* Please include the docket ID number and the title of the information collection request when requesting documents or submitting comments. Please note that comments submitted after the comment period will not be accepted. Written requests for information or comments submitted by postal mail or delivery should be addressed to Carolyn Rose, U.S. Department of Education, Federal Student Aid, 400 Maryland Avenue SW, Washington, DC 20202–1200.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Carolyn Rose, (202) 453–5967.

SUPPLEMENTARY INFORMATION: The Department, in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. The Department is soliciting comments on the proposed information collection request (ICR) that is described below. The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Guaranty Agencies Security Self-assessment and Attestation.

OMB Control Number: 1845–0134.

Type of Review: Revision of a currently approved ICR.

Respondents/Affected Public: Private Sector.

Total Estimated Number of Annual Responses: 9.

Total Estimated Number of Annual Burden Hours: 5,058.

Abstract: This is a request for a revision of the approved information collection used by Federal Student Aid (FSA) to ensure that all data collected and managed by Guaranty Agencies (GAs) in support Federal student financial aid programs are secure. FSA continues to use a formal assessment program that ensures the GAs have security protocols in place to protect the confidentiality and integrity of data entrusted to FSA by students and families. This assessment will identify security deficiencies based on the federal standards described in the National Institute of Standards and Technology (NIST) publications.

Ross Santy,

Chief Data Officer, Office of Planning, Evaluation and Policy Development.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL27–11–000]

Exelon Corporation v. PJM Interconnection, L.L.C.; Notice Establishing Comment Period

On November 4, 2026, PJM Interconnection, L.L.C. (PJM) filed a preliminary answer opposing fast-track processing and a motion requesting a four-week extension of time, until December 21, 2026, to answer the complaint filed by Exelon Corporation (Exelon) in the above-captioned proceeding. PJM argues that there is good cause to grant the extension because the additional time will permit PJM to incorporate into its response the outcome of the deliberations by the PJM Board, which will meet on November 17, 2026. PJM also argues that Exelon has failed to demonstrate any compelling reason for Commission action by the requested January 31, 2027, date and therefore a four-week extension of the answer deadline will not impair the Commission's ability to act.

On November 9, 2026, Exelon filed a motion for leave to answer and answer. Exelon supports an extension of the comment period to December 7, 2026, but argues that the scale of PJM's proposed extension is excessive for the narrow scope of the allegations it must answer. Exelon also urges the Commission to act sufficiently in advance of the May 2027 Base Residual Auction.

Upon consideration, notice is hereby given that PJM's motion for extension of time is granted and the deadline to file the answer to Exelon's complaint, comments, and interventions is December 21, 2026.

(Authority: 16 U.S.C. 824e)

Dated: November 13, 2026.

Carlos D. Clay,

Deputy Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP27–12–000]

Freeport LNG Development, L.P., FLNG Liquefaction, LLC, FLNG Liquefaction 2, LLC, FLNG Liquefaction 3, LLC, FLNG Liquefaction 4, LLC; Notice of Application and Establishing Intervention Deadline

Take notice that on October 30, 2026, Freeport LNG Development, L.P., FLNG Liquefaction, LLC, FLNG Liquefaction 2, LLC, FLNG Liquefaction 3, LLC, and FLNG Liquefaction 4, LLC (collectively, Freeport LNG), 333 Clay Street, Suite 5050, Houston, Texas 77002, filed an application under section 3 of the Natural Gas Act (NGA) and Part 153 of the Commission's regulations requesting an amendment to Freeport LNG's FERC authorizations in Docket Nos. CP12–29–000 and CP12–509–000 to install a flare gas recovery system at the existing natural gas pretreatment facility (PTF) of the Freeport LNG Liquefaction Project, located on Quintana Island, Brazoria County, Texas (PTF Flaring Reduction Project or Project). Freeport LNG states that the Project is designed to capture and reprocess gas currently being sent to the flare header in order to reduce flaring and the resultant air emissions at the pretreatment facility, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page

(*http://www.ferc.gov*). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at (202) 502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

Any questions regarding the proposed project should be directed to Erin Piper, Supervisor, Regulatory Projects and Audit, Freeport LNG Development, L.P., 333 Clay Street, Suite 5050, Houston, Texas 77002, by phone at (713) 980–2888, or by email at *epiper@freeportlng.com.*

Pursuant to section 157.9 of the Commission's Rules of Practice and Procedure,[1] within 90 days of this Notice the Commission staff will either: complete its environmental review and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or environmental assessment (EA) for this proposal. The filing of an EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file comments on the project, you can protest the filing, and you can file a motion to intervene in the proceeding. There is no fee or cost for filing comments or intervening. The deadline for filing a motion to intervene is 5:00 p.m. Eastern Time on December 7, 2026. How to file protests, motions to intervene, and comments is explained below.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation (OPP) at (202) 502–6595 or *OPP@ferc.gov.*

Comments

Any person wishing to comment on the project may do so. Comments may include statements of support or objections, to the project as a whole or specific aspects of the project. The more specific your comments, the more useful they will be.

Protests

Pursuant to sections 157.10(a)(4)[2] and 385.211[3] of the Commission's regulations under the NGA, any person[4] may file a protest to the application. Protests must comply with the requirements specified in section 385.2001[5] of the Commission's regulations. A protest may also serve as a motion to intervene so long as the protestor states it also seeks to be an intervenor.

To ensure that your comments or protests are timely and properly recorded, please submit your comments on or before 5:00 p.m. Eastern Time on December 7, 2026.

There are three methods you can use to submit your comments or protests to the Commission. In all instances, please reference the Project docket number CP27–12–000 in your submission.

(1) You may file your comments electronically by using the eComment feature, which is located on the Commission's website at *www.ferc.gov* under the link to Documents and Filings. Using eComment is an easy method for interested persons to submit brief, text-only comments on a project;

(2) You may file your comments or protests electronically by using the eFiling feature, which is located on the Commission's website (*www.ferc.gov*) under the link to Documents and Filings. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''eRegister.'' You will be asked to select the type of filing you are making; first select ''General'' and then select ''Comment on a Filing''; or

(3) You can file a paper copy of your comments or protests by mailing them to the following address below. Your written comments must reference the Project docket number (CP27–12–000).

To file via USPS: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other courier: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission encourages electronic filing of comments (options 1 and 2 above) and has eFiling staff available to assist you at (202) 502–8258 or *FercOnlineSupport@ferc.gov.*

Persons who comment on the environmental review of this project will be placed on the Commission's environmental mailing list, and will receive notification when the environmental documents (EA or EIS) are issued for this project and will be notified of meetings associated with the Commission's environmental review process.

The Commission considers all comments received about the project in determining the appropriate action to be taken. However, the filing of a comment alone will not serve to make the filer a party to the proceeding. To become a party, you must intervene in the proceeding. For instructions on how to intervene, see below.

Interventions

Any person, which includes individuals, organizations, businesses, municipalities, and other entities,[6] has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders issued in this proceeding and to subsequently challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and Procedure[7] and the regulations under the NGA[8] by the intervention deadline for the project, which is 5:00 p.m. Eastern Time on December 7, 2026. As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as your interest in the proceeding. For an individual, this could include your status as a landowner, ratepayer, resident of an

[7] 18 CFR 385.214.

[8] 18 CFR 157.10.

impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at *https://www.ferc.gov/resources/guides/how-to/intervene.asp.*

There are two ways to submit your motion to intervene. In both instances, please reference the Project docket number CP27–12–000 in your submission.

(1) You may file your motion to intervene by using the Commission's eFiling feature, which is located on the Commission's website (*www.ferc.gov*) under the link to Documents and Filings. New eFiling users must first create an account by clicking on ''eRegister.'' You will be asked to select the type of filing you are making; first select ''General'' and then select ''Intervention.'' The eFiling feature includes a document-less intervention option; for more information, visit *https://www.ferc.gov/docs-filing/efiling/document-less-intervention.pdf.;* or

(2) You can file a paper copy of your motion to intervene, along with three copies, by mailing the documents to the address below. Your motion to intervene must reference the Project docket number CP27–12–000.

To file via USPS: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other courier: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission encourages electronic filing of motions to intervene (option 1 above) and has eFiling staff available to assist you at (202) 502–8258 or *FercOnlineSupport@ferc.gov.*

Protests and motions to intervene must be served on the applicant either by mail at: Erin Piper, Supervisor, Regulatory Projects and Audit, Freeport LNG Development, L.P., 333 Clay Street, Suite 5050, Houston, Texas 77002, or by email (with a link to the document) at *epiper@freeportlng.com.* Any subsequent submissions by an intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online. Service can be via email with a link to the document.

All timely, unopposed [9] motions to intervene are automatically granted by operation of Rule 214(c)(1).[10] Motions to intervene that are filed after the intervention deadline are untimely, and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations.[11] A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from OPP at (202) 502–6595 or on the FERC website at *www.ferc.gov* using the ''eLibrary'' link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to *www.ferc.gov/docs-filing/esubscription.asp.*

Intervention Deadline: 5:00 p.m. Eastern Time on December 7, 2026.

Combined Notice of Filings

Take notice that the Commission received the following Natural Gas Pipeline Rate and Refund Report filings:

Filings Instituting Proceedings

Docket Numbers: PR27–17–000.

Applicants: Eagle Ford Midstream LLC.

Description: § 284.123 Rate Filing: Petition for Approval of Rates for Transportation Service Under NGPA Section 311 to be effective 11/12/2026.

Filed Date: 11/13/26.

Accession Number: 20261113–5150.

Comment Date: 5 p.m. ET 12/4/26.

Docket Numbers: RP27–169–000.

Applicants: Northern Natural Gas Company.

Description: Northern Natural Gas Company submits report of the penalty and daily delivery variance charge (DDVC) revenues that have been credited to shippers.

Filed Date: 11/13/26.

Accession Number: 20261113–5168.

Comment Date: 5 p.m. ET 11/25/26.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

Filings in Existing Proceedings

Docket Numbers: RP26–797–000.

Applicants: National Fuel Gas Supply Corporation.

Description: Report Filing: Update of Test Period Data (Updated Statements) to be effective N/A.

Filed Date: 11/16/26.

Accession Number: 20261116–5117.

Comment Date: 5 p.m. ET 11/30/26.

Any person desiring to protest in any the above proceedings must file in accordance with Rule 211 of the Commission's Regulations (18 CFR 385.211) on or before 5:00 p.m. Eastern time on the specified comment date.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). ENVIRONMENTAL PROTECTION AGENCY

[EPA–R10–OAR–2026–2906; FRL–13718–01–OFA]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Federal Implementation Plans Under the Clean Air Act for Indian Reservations in Idaho, Oregon and Washington (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), Federal Implementation Plans under the Clean Air Act for Indian Reservations in Idaho, Oregon and Washington (EPA ICR Number 2020.09, OMB Control Number 2060–0558) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through November 30, 2026. Public comments were previously requested via the **Federal Register** on June 4, 2026, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before December 21, 2026.

ADDRESSES: Submit your comments, referencing Docket ID No. EPA–R10–OAR–2026–2906, to EPA online using *www.regulations.gov* (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Matthew Jentgen, EPA Region 10, Air and Radiation Division, 1200 6th Avenue, Seattle, WA 98101; telephone number: (206) 553–0340; email address: *jentgen.matthew@epa.gov.*

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through November 30, 2026. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on June 4, 2026, during a 60-day comment period (91 FR 33720). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets.*

Abstract: The EPA promulgated Federal Implementation Plans (FIPs) under the Clean Air Act for Indian reservations located in Idaho, Oregon, and Washington in 40 CFR part 49 (70 FR 18074, April 8, 2005). This final rule, also referred to as the Federal Air Rules for Indian Reservations in Idaho, Oregon, and Washington (FARR), includes information collection requirements. Regulated entities can assert claims of business confidentiality and the EPA will address these claims in accordance with the provisions of 40 CFR part 2, subpart B.

Form Numbers: The forms associated with this ICR are:

EPA Form 7630–1 Nez Perce Reservation Air Quality Permit: Agricultural Burn
EPA Form 7630–2 Nez Perce Reservation Air Quality Permit: Forestry Burn
EPA Form 7630–3 Nez Perce Reservation Air Quality Permit: Large Open Burn
EPA Form 7630–4 Initial or Annual Source Registration
EPA Form 7630–5 Report of Change of Ownership
EPA Form 7630–6 Report of Closure
EPA Form 7630–7 Report of Relocation
EPA Form 7630–8 CTUIR Umatilla Indian Reservation Small Burn Air Quality Permit Application
EPA Form 7630–8 NPT Nez Perce Reservation Small Burn Air Quality Permit
EPA Form 7630–9 Non-Title V Operating Permit Application Form
EPA Form 7630–10 Umatilla Indian Reservation: Agricultural Burn Permit Application
EPA Form 7630–11 Umatilla Indian Reservation: Forestry Burn Permit Application
EPA Form 7630–12 Umatilla Indian Reservation: Large Open Burn Permit Application
EPA Form 5800–057 FARR Online Reporting System Initial or Annual Source Registration
EPA Form PFN–3520–38 Combined Air Emissions Reporting System Initial or Annual Source Registration

The forms listed above are available for review in the EPA docket.

Respondents/affected entities: Respondents or entities potentially affected by this action include owners and operators of air emission sources in all industry groups and tribal governments, located in the identified Indian reservations.

Respondent's obligation to respond: Respondent's obligation to respond is

mandatory. See 40 CFR 49.122, 49.124, 49.126, 49.130 through 135, 49.138, and 49.139.

Estimated number of respondents: 1,502 (total).

Frequency of response: Annual or occasional.

Total estimated burden: 4,034 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: $395,412 (per year), which includes $0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase of 433 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. The increases were primarily associated with a slight increase in the number of respondents and burden estimate for conducting an annual survey and adjusting fugitive particulate matter control plans under the fugitive particulate matter rule (49.126), and an increase in the number of respondents registering air pollution sources and reporting emissions (49.138).

Courtney Kerwin,

Deputy Director, Data & Enterprise Programs Division (DEPD).

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Pesticide Establishment Application, Notification of Registration, and Pesticide Production Reports for Pesticide-Producing and Device-Producing Establishments (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), Application for Registration and Pesticide Report for Pesticide-Producing and Device-Producing Establishment (EPA ICR Number. 0160.14, OMB Control Number 2070–0078) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through November 30, 2026. Public comments were previously requested via the **Federal Register** on July 30, 2026 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before December 21, 2026.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OECA–2011–0824, to EPA online using *www.regulations.gov* (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Michelle Yaras, Office of Compliance, Compliance, Inspector, and Training Division, Pesticides, Waste & Toxics Compliance Branch 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564–4153; email address: *yaras.michelle@epa.gov*.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through November 30, 2026. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on July 30, 2026 during a 60-day comment period (91 FR 48,107). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets*.

Abstract: The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7(a) requires that any person who produces pesticides, active ingredients or devices subject to the Act must register with the Administrator of EPA the establishment in which the pesticide, active ingredient or device is produced. This section further requires that applications for registration of any establishment shall include the name and address of the establishment and of the producer who operates such an establishment. EPA Form 3540–8, Application for Registration of Pesticide-Producing and Device-Producing Establishments, is used to collect the establishment registration information required by this section.

FIFRA Section 7(c) requires that any producer operating an establishment registered under Section 7(a) report to the Administrator within 30 days after it is registered, and annually thereafter by March 1st for certain pesticide or device production and sales or distribution information. The producers must report which types and amounts of pesticides, active ingredients, or devices are currently being produced, were produced during the past year, or sold or distributed in the past year. The supporting regulations at 40 CFR part 167 provide the requirements and time schedules for submitting production information. EPA Form 3540–16, Pesticide Report for Pesticide-Producing and Device-Producing Establishments, is used to collect the pesticide production information required by Section 7(c) of FIFRA.

Establishment registration information, collected on EPA Form 3540–8, is a one-time requirement for all pesticide-producing and device-producing establishments. Pesticide and device production information, reported on EPA Form 3540–16, is required to be submitted within 30 days after the company is notified of its pesticide-producing or device-producing establishment number, and annually thereafter on or before March 1. Pesticide-producing and device-producing establishments may electronically submit their establishment registration information and pesticide production information through EPA's Central Data Exchange (CDX).

Form Numbers: 3540–8 and 3540–16.

Respondents/affected entities: Establishments producing pesticides.

Respondent's obligation to respond: Mandatory (40 CFR part 167).

Estimated number of respondents: 20,003 (total).

Frequency of response: Initial and Annually.

Total estimated burden: 32,155 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: $2,899,331.40 (per year), which includes $0 annualized capital or operation & maintenance costs

Changes in the Estimates: There is a decrease of 1,065 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to a reduction in the number of forms submitted. There was a decrease in the number of respondents submitting each form, which decreased the total burden hours, but there is an overall increase in the total estimated cost of respondent burden due to an increase in the estimated labor costs (increase in hourly wages). The total estimated increase in respondent costs from these changes in labor costs and adjustment to the total hours is $163,363.26.

Courtney Kerwin,

Deputy Director, Data and Enterprise Programs Division.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–R06–OW–2025–0307; FRL–12770–02–R6]

Proposed Modification of NPDES General Permit for New and Existing Sources and New Dischargers in the Offshore Subcategory of the Oil and Gas Extraction Category for the Western Portion of the Outer Continental Shelf of the Gulf of America (GMG290000)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final NPDES General Permit Modification.

SUMMARY: The Regional Administrator of Region 6 today provides notice that the National Pollutant Discharge Elimination System (NPDES) General Permit No. GMG290000 for existing and new sources and new dischargers in the Offshore Subcategory of the Oil and Gas Extraction Point Source Category, located in and discharging to the Outer Continental Shelf offshore of Louisiana and Texas, was modified on November 2, 2026 with an effective date of November 2, 2026. The discharge of produced water to that portion of the Outer Continental Shelf from Offshore Subcategory facilities located in the territorial seas of Louisiana and Texas is also authorized by this permit.

DATES: This permit was issued November 2, 2026, is effective on November 2, 2026, and expires May 10, 2028. This effective date is necessary to provide dischargers with the immediate opportunity to comply with Clean Water Act (CWA) requirements in light of the expiration of the compliance period for acute Whole Effluent Toxicity Testing for Well Treatment, Completion and Workover Fluids. In accordance with 40 CFR 23, this permit shall be considered issued for the purpose of judicial review on December 2, 2026. Under section 509(b) of the CWA, judicial review of this general permit can be held by filing a petition for review in the United States Court of Appeals within 120 days after the permit is considered issued for judicial review. Under section 509(b)(2) of the CWA, the requirements in this permit may not be challenged later in civil or criminal proceedings to enforce these requirements. In addition, this permit may not be challenged in other agency proceedings.

FOR FURTHER INFORMATION CONTACT: Ms. Nichole Young, Region 6, U.S. Environmental Protection Agency, 1201 Elm Street, Dallas, Texas, 75270; telephone number: (214) 665–6447; email address: *young.nichole@epa.gov*.

SUPPLEMENTARY INFORMATION: Notice of the proposal of the draft modified permit, Draft Environmental Assessment (EA) and Preliminary Finding of No Significant Impact (FONSI) was published in the **Federal Register** on January 27, 2026 (91 FR 3492). EPA Region 6 has considered all comments received and made changes as listed below. A copy of the Region's responses to comments and the final permit may be found online from the Federal eRulemaking Portal: *http://www.regulations.gov* with Docket ID No EPA–R06–OW–2025–0307. Changes include:

1. Removed Footnote 56 from the permit.

2. Environmental Assessment has been corrected to clarify acute WET testing performed on well treatment, completion, and workover (TCW) discharges from February 2023 to April 2025 showed an ~13% failure rate.

Other Legal Requirements

Other statutory and regulatory requirements are discussed in the fact sheet that include: Executive Order 14192 (90 FR 9065, January 31, 2025); Ocean Discharge Criteria Evaluation; Marine Protection, Research, and Sanctuaries Act; National Environmental Policy Act; Magnuson-Stevens Fisheries Conservation and Management Act; Endangered Species Act; State Water Quality Standards and State Certification; Coastal Zone Management Act; Paperwork Reduction Act; Regulatory Flexibility Act; National Historic Preservation Act; Offshore Subcategory of the Oil and Gas Extraction Point Source Category; 40 CFR 122.62; 40 CFR 124.13; and 40 CFR 124.5(c)(2). Under Executive Order 12866 (58 FR 51735, October 4, 1993), this notice is a ''significant regulatory action.'' Accordingly, EPA submitted this notice to the Office of Management and Budget (OMB) for review under Executive Orders 12866 and 13563 (76 FR 3821, January 21, 2011) and any changes made in response to OMB recommendations have been documented in the docket for this notice.

Walter Mason,

Region 6 Administrator, U.S. Environmental Protection Agency.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0668; FR ID 378382]

Information Collection Being Reviewed by the Federal Communications Commission Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice; request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

DATES: Written PRA comments should be submitted on or before January 19, 2027. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION: The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

OMB Control Number: 3060–0668.

Title: Section 76.936, Written Decisions.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; State or Local, or Tribal government.

Number of Respondents and Responses: 150 respondents; 150 responses.

Estimated Hours per Response: 1 hour.

Frequency of Response: Third party disclosure requirement; On occasion reporting requirement.

Total Annual Burden: 150 hours.

Total Annual Cost: No cost.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in Section 4(i) of the Communications Act of 1934, as amended.

Needs and Uses: The information collection requirements contained in 47 CFR 76.936 require that a franchising authority must issue a written decision in a rate-making proceeding whenever it disapproves an initial rate for the basic service tier or associated equipment in whole or in part, disapproves a request for a rate increase in whole or in part, or approves a request for an increase in whole or in part over the objection of interested parties. Franchising authorities are required to issue a written decision in rate-making proceedings pursuant to Section 76.936 so that cable operators and the public are made aware of the proceeding.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

RIN 0938–AV85

Medicare Program; CY 2027 Part A Premiums for the Uninsured Aged and for Certain Disabled Individuals Who Have Exhausted Other Entitlement

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: This notice announces Medicare's Hospital Insurance Program (Medicare Part A) premium for uninsured enrollees in calendar year (CY) 2027. This premium is paid by enrollees aged 65 and over who are not otherwise eligible for benefits under Medicare Part A (hereafter known as the ''uninsured aged'') and by certain individuals with disabilities who have exhausted other entitlement. The monthly Medicare Part A premium for the 12 months beginning January 1, 2027 for these individuals will be $597. The premium for certain other individuals as described in this notice will be $328.

DATES: The premium announced in this notice is effective on January 1, 2027.

FOR FURTHER INFORMATION CONTACT: Yaminee Thaker, (410) 786–7921.

SUPPLEMENTARY INFORMATION:

I. Background

Section 1818 of the Social Security Act (the Act) provides for voluntary enrollment in Medicare Part A, subject to payment of a monthly premium, of certain persons aged 65 and older who are uninsured under the Old-Age, Survivors, and Disability Insurance (OASDI) program or the Railroad Retirement Act and do not otherwise meet the requirements for entitlement to Medicare Part A. These ''uninsured aged'' individuals are uninsured under the OASDI program or the Railroad Retirement Act, because they do not have 40 quarters of coverage under Title II of the Act (or are/were not married to someone who did). (Persons insured under the OASDI program or the Railroad Retirement Act and certain others do not have to pay premiums for Medicare Part A.)

Section 1818A of the Act provides for voluntary enrollment in Medicare Part A, subject to payment of a monthly premium for certain individuals with disabilities who have exhausted other entitlement. These are individuals who were entitled to coverage due to a disabling impairment under section 226(b) of the Act, but who are no longer entitled to disability benefits and premium-free Medicare Part A coverage because they have gone back to work and their earnings exceed the statutorily defined ''substantial gainful activity'' amount (section 223(d)(4) of the Act).

Section 1818A(d)(2) of the Act specifies that the provisions relating to premiums for the aged under section 1818(d) through section 1818(f) of the Act will also apply to certain individuals with disabilities as described above.

Section 1818(d)(1) of the Act requires us to estimate, on an average per capita basis, the amount to be paid from the Federal Hospital Insurance Trust Fund for services incurred in the upcoming calendar year (CY) (including the associated administrative costs) on behalf of individuals aged 65 and over who will be entitled to benefits under Medicare Part A. We must then determine the monthly actuarial rate for the following year (the per capita amount estimated above divided by 12) and publish the dollar amount for the monthly premium in the succeeding CY. If the premium is not a multiple of $1, the premium is rounded to the nearest multiple of $1 (or, if it is a multiple of 50 cents but not of $1, it is rounded to the next highest $1).

Section 13508 of the Omnibus Budget Reconciliation Act of 1993 (Pub. L. 103–66) amended section 1818(d) of the Act to provide for a reduction in the premium amount for certain voluntary enrollees (sections 1818 and 1818A of the Act). The reduction applies to an individual who is eligible to buy into the Medicare Part A program and who, as of the last day of the previous month:

- Had at least 30 quarters of coverage under Title II of the Act;
- Was married, and had been married for the previous 1-year period, to a person who had at least 30 quarters of coverage;
- Had been married to a person for at least 1 year at the time of the person's death if, at the time of death, the person had at least 30 quarters of coverage; or
- Is divorced from a person and had been married to the person for at least 10 years at the time of the divorce if, at the time of the divorce, the person had at least 30 quarters of coverage.

Section 1818(d)(4)(A) of the Act specifies that the premium that these individuals will pay for CY 2027 will be equal to the premium for uninsured aged enrollees reduced by 45 percent.

Section 1818(g) of the Act requires the Secretary of the Department of Health and Human Services (the Secretary), at the request of a State, to enter into a Medicare Part A buy-in agreement with a State to pay Medicare Part A premiums for Qualified Medicare Beneficiaries (QMBs). Under the QMB program, State Medicaid agencies must pay the Medicare Part A premium for those not eligible for premium-free Medicare Part A if those individuals meet all of the eligibility requirements for the QMB program under the State's Medicaid State plan. Entering into a Medicare Part A buy-in agreement would permit a State to avoid any Medicare Part A late enrollment penalties that the individual may owe and would allow States to enroll persons in Medicare Part A at any time of the year, without regard to Medicare enrollment periods. Other individuals may be eligible for the Qualified Disabled Working Individuals program, through which State Medicaid programs provide coverage of Medicare Part A premiums for individuals eligible to enroll in Medicare Part A by virtue of section 1818A of the Act who meet certain financial eligibility criteria.

II. Monthly Premium Amount for CY 2027

The monthly premium for the uninsured aged and certain individuals with disabilities who have exhausted other entitlement for the 12 months beginning January 1, 2027, is $597. The monthly premium for the individuals eligible under section 1818(d)(4)(B) of the Act, and therefore, subject to the 45 percent reduction in the monthly premium, is $328.

III. Monthly Premium Rate Calculation

As discussed in section I of this notice, the monthly Medicare Part A premium is equal to the estimated monthly actuarial rate for CY 2027 rounded to the nearest multiple of $1 and equals one-twelfth of the average per capita amount, which is determined by projecting the number of Medicare Part A enrollees aged 65 years and over, as well as the benefits and administrative costs that will be incurred on their behalf.

The steps involved in projecting these future costs to the Federal Hospital Insurance Trust Fund are:

- Establishing the present cost of services furnished to beneficiaries, by type of service, to serve as a projection base;
- Projecting increases in payment amounts for each of the service types; and
- Projecting increases in administrative costs.

We base our projections for CY 2027 on—(1) current historical data; and (2) projection assumptions derived from current law and the Midsession Review of the President's Fiscal Year 2027 Budget.

For CY 2027, we estimate that 63,981,910 people aged 65 years and over will be entitled to (enrolled in) benefits (without premium payment) and that they will incur about $458,587 billion in benefits and related administrative costs. Thus, the estimated monthly average per capita amount is $597.29 and the monthly premium is $597. Subsequently, the full monthly premium reduced by 45 percent is $328.

IV. Costs to Beneficiaries

The CY 2027 monthly premium of $597 is approximately 5.7 percent higher than the CY 2026 premium of $565. We estimate that approximately 904,000 enrollees will voluntarily enroll in Medicare Part A by paying the full premium. We estimate that over 90 percent of these individuals will have their Medicare Part A premium paid by States, since they are enrolled in the QMB program. Furthermore, the CY 2027 reduced monthly premium of $328 is approximately 5.5 percent higher than the CY 2026 premium of $311. We estimate that an additional 129,000 enrollees will pay the reduced premium. Therefore, we estimate that the total aggregate cost to enrollees paying these premiums in CY 2027, compared to the amount that they paid in CY 2026, will be about $373 million.

V. Waiver of Proposed Rulemaking

We ordinarily publish a notice of proposed rulemaking in the **Federal Register** and invite public comment prior to a rule taking effect in accordance with section 1871 of the Act. Section 1871(a)(2) of the Act provides that no rule, requirement, or other statement of policy (other than a national coverage determination) that establishes or changes a substantive legal standard governing the scope of benefits, the payment for services, or the eligibility of individuals, entities, or organizations to furnish or receive services or benefits under Medicare shall take effect unless it is promulgated through notice and comment rulemaking. Unless there is a statutory exception, section 1871(b)(1) of the Act generally requires the Secretary to provide for notice of a proposed rule in the **Federal Register** and provide a period of not less than 60 days for public comment before establishing or changing a substantive legal standard regarding the matters enumerated by the statute. Section 1871(b)(2)(C) of the Act also provides exceptions from the notice and 60-day comment period, under the good cause standard set forth in 5 U.S.C. 553(b)(B). Section 553(b)(B) authorizes an agency to dispense with notice and comment rulemaking for good cause if the agency makes a finding that notice and comment procedures are impracticable, unnecessary, or contrary to the public interest.

The annual Medicare Part A premium announcement set forth in this notice does not establish or change a substantive legal standard regarding the matters enumerated by the statute or constitute a substantive rule which would be subject to the notice requirements in section 1871(b) of the Act. However, to the extent that an opportunity for public notice and comment could be construed as required for this notice, we find good cause to waive this requirement.

Section 1818(d) of the Act requires the Secretary during September of each year to determine and publish the amount to be paid, on an average per capita basis, from the Federal Hospital Insurance Trust Fund for services incurred in the impending CY (including the associated administrative costs) on behalf of individuals aged 65 and over who will be entitled to benefits under Medicare Part A. Further, the statute requires that the agency determine the applicable premium amount for each CY in accordance with the statutory formula, and we are simply notifying the public of the changes to the Medicare Part A premiums for CY 2027. We have calculated the Medicare Part A premiums as directed by the statute; the statute establishes both when the premium amounts must be published and the information that the Secretary must factor into the premium amounts, so we do not have any discretion in that regard. We find notice and comment procedures to be unnecessary for this notice and we find good cause to waive such procedures under section 553(b)(B) and section 1871(b)(2)(C) of the Act, if such procedures may be construed to be required at all. Through this notice, we are simply notifying the public of the updates to the Medicare Part A premiums, in accordance with the statute, for CY 2027.

VI. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. *3501 et seq.*).

VII. Regulatory Impact Analysis

We have prepared this Regulatory Impact Analysis (RIA) section in the interest of ensuring that the impacts of this notice are fully understood.

A. Statement of Need

This notice announces the CY 2027 Medicare Part A premiums for the uninsured aged and for certain disabled individuals who have exhausted other entitlement, as required by sections 1818 and 1818A of the Act. It also responds to section 1818(d) of the Act, which requires the Secretary to provide for publication of these amounts in the **Federal Register** during the September that precedes the start of each CY. As this statutory provision prescribes a detailed methodology for calculating these amounts, we do not have the discretion to adopt an alternative approach to these issues.

B. Overall Impact

We have examined the impacts of this rule as required by Executive Order 12866, ''Regulatory Planning and Review''; Executive Order 13132, ''Federalism''; Executive Order 13563, ''Improving Regulation and Regulatory Review''; Executive Order 14192, ''Unleashing Prosperity Through Deregulation''; the Regulatory Flexibility Act (RFA) (Pub. L. 96–354); section 1102(b) of the Social Security Act; section 202 of the Unfunded

Mandates Reform Act of 1995 (Pub. L. 104–4); and the Congressional Review Act (5 U.S.C. 804(2)).

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select those regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts.). Section 3(f) of Executive Order 12866 defines a ''significant regulatory action'' as any regulatory action that is likely to result in a rule that may: (1) have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, or the President's priorities.

An RIA must be prepared for a regulatory action that is significant under section 3(f)(1) of Executive Order 12866. As stated in section IV. of this notice, we estimate that the overall effect of the changes in the Medicare Part A premium will be a cost to voluntary enrollees (sections 1818 and 1818A of the Act) of about $373 million. Based on our estimates, Office of Information and Regulatory Affairs (OIRA) has determined this notice is significant under section 3(f)(1). Accordingly, we have prepared an RIA that to the best of our ability presents the costs and benefits of this notice.

In accordance with subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (also known as the Congressional Review Act), OIRA has determined that this notice meets the criteria set forth in 5 U.S.C. 804(2). For the reasons given, however, we find for good cause that notice and public procedure are impracticable, unnecessary, and contrary to the public interest and have determined that this policy will take effect on January 1, 2027, pursuant to 5 U.S.C. 808(2).

C. Accounting Statement and Table

Consistent with OMB Circular A–4 (available at *https://www.whitehouse.gov/wp-content/uploads/2025/08/CircularA-4.pdf*), in the Table 1, we have prepared an accounting statement showing the total aggregate cost to enrollees paying premiums in CY 2027, compared to the amount that they paid in CY 2026. This amount is approximately $373 million. As stated in section IV. of this notice, the CY 2027 premium of $597 is approximately 5.7 percent higher than the CY 2026 premium of $565. We estimate that approximately 904,000 enrollees will voluntarily enroll in Medicare Part A by paying the full premium. We estimate that over 90 percent of these individuals will have their Medicare Part A premium paid by States, since they are enrolled in the QMB program. Furthermore, the CY 2027 reduced premium of $328 is approximately 5.5 percent higher than the CY 2026 premium of $311.

TABLE 1—ESTIMATED TRANSFERS FOR CY 2026 MEDICARE PART A PREMIUM

Category	Transfers	Period covered
Annualized Monetized Transfers	$373 million	2027
From Whom to Whom	Beneficiaries to Federal Government	

D. Regulatory Flexibility Act

The RFA requires agencies to analyze options for regulatory relief of small entities, if a rule has a significant impact on a substantial number of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Most hospitals and most other providers and suppliers are small entities, either by being nonprofit organizations or by meeting the Small Business Administration's (SBA) definition of a small business (having revenues of less than $9.0 million to $47 million in any 1 year). Individuals and States are not included in the definition of a small entity. This annual notice announces the Medicare Part A premiums for CY 2027 and will have an impact on certain Medicare beneficiaries, but not on small entities as defined by the SBA. As a result, we are not preparing an analysis for the RFA because the Secretary has certified that this notice will not have a significant economic impact on a substantial number of small entities.

In addition, section 1102(b) of the Act requires us to prepare an RIA if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a metropolitan statistical area and has fewer than 100 beds. This annual notice announces the Medicare Part A premiums for CY 2027 and will have an impact on certain Medicare beneficiaries. As a result, we are not preparing an analysis for section 1102(b) of the Act, because the Secretary has certified that this notice will not have a significant impact on the operations of a substantial number of small rural hospitals.

E. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. In 2026, that threshold is approximately $193 million. This notice would not impose a mandate that will result in the expenditure by State, local, and Tribal Governments, in the aggregate, or by the private sector, of more than $193 million in any 1 year.

F. Federalism

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. This notice will not have a substantial direct effect on State or local governments, preempt State law, or otherwise have Federalism implications.

G. Congressional Review

This notice is subject to the Congressional Review Act and has been transmitted to the Congress and the Government Accountability Office's Comptroller General for review. Mehemet Oz, Administrator of the Centers for Medicare & Medicaid

Services, approved this document on November 16, 2026.

Robert F. Kennedy, Jr.,

Secretary, Department of Health and Human Services.

SUPPLEMENTARY INFORMATION:

I. Background

The Centers for Medicare & Medicaid Services (CMS) is responsible for administering the Medicare and Medicaid programs and coordination and oversight of private health insurance. Administration and oversight of these programs involves the following: (1) furnishing information to Medicare and Medicaid beneficiaries, health care providers, and the public; and (2) maintaining effective communications with CMS regional offices, State governments, State Medicaid agencies, State survey agencies, various providers of health care, all Medicare contractors that process claims and pay bills, National Association of Insurance Commissioners (NAIC), health insurers, and other interested parties. To implement the various statutes on which the programs are based, we issue regulations under the authority granted to the Secretary of the Department of Health and Human Services under sections 1102, 1871, 1902, and related provisions of the Social Security Act (the Act) and Public Health Service Act. We also issue various manuals, memoranda, and statements necessary to administer and oversee the programs efficiently.

Section 1871(c) of the Act requires that we publish a list of all Medicare manual instructions, interpretive rules, statements of policy, and guidelines of general applicability not issued as regulations at least every 3 months in the **Federal Register**.

II. Format for the Quarterly Issuance Notices

This quarterly notice provides only the specific updates that have occurred in the 3-month period along with a hyperlink to the full listing that is available on the CMS website or the appropriate data registries that are used as our resources. This is the most current up-to-date information and will be available earlier than we publish our quarterly notice. We believe the website list provides more timely access for beneficiaries, providers, and suppliers. We also believe the website offers a more convenient tool for the public to find the full list of qualified providers for these specific services and offers more flexibility and ''real time'' accessibility. In addition, many of the websites have listservs; that is, the public can subscribe and receive immediate notification of any updates to the website. These listservs avoid the need to check the website, as notification of updates is automatic and sent to the subscriber as they occur. If assessing a website proves to be difficult, the contact person listed can provide information.

III. How To Use the Notice

This notice is organized into 15 addenda so that a reader may access the subjects published during the quarter covered by the notice to determine whether any are of particular interest. We expect this notice to be used in concert with previously published notices. Those unfamiliar with a description of our Medicare manuals

should view the manuals at *http://www.cms.gov/manuals.*

The Director of the Office of Strategic Operations and Regulatory Affairs of CMS, Kathleen Cantwell, having reviewed and approved this document, authorizes Trenesha Fultz-Mimms, who is the **Federal Register** Liaison, to electronically sign this document for purposes of publication in the **Federal Register**.

Trenesha Fultz-Mimms,

Federal Register Liaison, Department of Health and Human Services.

BILLING CODE 4169–69–P

Publication Dates for the Previous Four Quarterly Notices

We publish this notice at the end of each quarter reflecting information released by CMS during the previous quarter. The publication dates of the previous four Quarterly Listing of Program Issuances notices are: December 1, 2025 (90 FR 55117), February 23, 2026 (91 FR 8482), May 14,2026 (91 FR 27339) and July 27, 2026 (91 FR 46923). We are providing only the specific updates that have occurred in the 3-month period along with a hyperlink to the website to access this information and a contact person for questions or additional information.

Addendum I: Medicare and Medicaid Manual Instructions (July through September 2026)

The CMS Manual System is used by CMS program components, partners, providers, contractors, Medicare Advantage organizations, and State Survey Agencies to administer CMS programs. It offers day-to-day operating instructions, policies, and procedures based on statutes and regulations, guidelines, models, and directives. In 2003, we transformed the CMS Program Manuals into a web user-friendly presentation and renamed it the CMS Online Manual System.

How to Obtain Manuals

The Internet-only Manuals (IOMs) are a replica of the Agency's official record copy. Paper-based manuals are CMS manuals that were officially released in hardcopy. The majority of these manuals were transferred into the Internet-only manual (IOM) or retired. Pub 15-1, Pub 15-2 and Pub 45 are exceptions to this rule and are still active paper-based manuals. The remaining paper-based manuals are for reference purposes only. If you notice policy contained in the paper-based manuals that was not transferred to the IOM, send a message via the CMS Feedback tool.

Those wishing to subscribe to old versions of CMS manuals should contact the National Technical Information Service, Department of Commerce, 5301 Shawnee Road, Alexandria, VA 22312 Telephone (703-605-6050). You can download copies of the listed material free of charge at: http://cms.gov/manuals.

How to Review Transmittals or Program Memoranda

Those wishing to review transmittals and program memoranda can access this information at a local Federal Depository Library (FDL). Under the FDL program, government publications are sent to approximately 1,400 designated libraries throughout the United States. Some FDLs may have arrangements to transfer material to a local library not designated as an FDL. Contact any library to locate the nearest FDL. This information is available at http://www.gpo.gov/libraries/.

In addition, individuals may contact regional depository libraries that receive and retain at least one copy of most Federal government publications, either in printed or microfilm form, for use by the general public. These libraries provide reference services and interlibrary loans; however, they are not sales outlets. Individuals may obtain information about the location of the nearest regional depository library from any library. CMS publication and transmittal numbers are shown in the listing entitled Medicare and Medicaid Manual Instructions. To help FDLs locate the materials, use the CMS publication and transmittal numbers. For example, to find the manual Update to Pub. 100-04, Quarterly Update of Healthcare Common Procedure Coding System (HCPCS) Codes Used for Home Health Consolidated Billing Enforcement (CMS- Pub. 100-04) Transmittal No. 13794.

Addendum I lists a unique CMS transmittal number for each instruction in our manuals or program memoranda and its subject number. A transmittal may consist of a single or multiple instruction(s). Often, it is necessary to use information in a transmittal in conjunction with information currently in the manual.

Fee-For Service Transmittal Numbers

Please Note: Beginning Friday, March 20, 2020, there will be the following change regarding the Advance Notice of Instructions due to a CMS internal process change. Fee-For Service Transmittal Numbers will no longer be determined by Publication. The Transmittal numbers will be issued by a single numerical sequence beginning with Transmittal Number 10000.

For the purposes of this quarterly notice, we list only the specific updates to the list of manual instructions that have occurred in the 3-month period. This information is available on our website at www.cms.gov/Manuals.

These Change Request (CR) are being released on a limited approved basis due to the moratorium.

Transmittal Number	Manual/Subject/Publication Number
Medicare General Information (CMS-Pub. 100-01)	
Medicare Benefit Policy (CMS-Pub. 100-02)	
13889	Update to Pub. 100-02 Medicare Benefit Policy Manual, Chapter 15, Section 110.8 Durable Medical Equipment Prosthetics Orthotics and Supplies (DMEPOS) Benefit Category Determinations
Medicare National Coverage Determination (CMS-Pub. 100-03)	
Medicare Claims Processing (CMS-Pub. 100-04)	
13789	Implement Operating Rules - Phase III Electronic Remittance Advice (ERA) Electronic Funds Transfer (EFT): Committee on Operating Rules for Information Exchange (CORE) 360 Uniform Use of Claim Adjustment Reason Codes (CARC), Remittance Advice Remark Codes (RARC) and Claim Adjustment Group Code (CAGC) Rule - Update

For questions or additional information, contact Ronda Allen-Bonner (410-786-4657).

Addendum II: Regulation Documents Published in the Federal Register (July through September 2026) *Regulations and Notices*

Regulations and notices are published in the daily **Federal Register**. To purchase individual copies or subscribe to the **Federal Register,** contact GPO at *www.gpo.gov/fdsys*. When ordering individual copies, it is necessary to cite either the date of publication or the volume number and page number.

The **Federal Register** is available as an online database through *GPO Access*. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) through the present date and can be accessed at http://www.gpoaccess.gov/fr/index.html. The following website http://www.archives.gov/federal-register/ provides information on how to access electronic editions, printed editions, and reference copies.

For questions or additional information, contact Gittel Treitel (410-786-4673).

Addendum III: CMS Rulings (July through September 2026)

CMS Rulings are decisions of the Administrator that serve as precedent final opinions and orders and statements of policy and interpretation. They provide clarification and interpretation of complex or ambiguous provisions of the law or regulations relating to Medicare, Medicaid, Utilization and Quality Control Peer Review, private health insurance, and related matters.

The rulings can be accessed at https://www.cms.gov/medicare/regulations-guidance/cms-rulemaking/rulings.

For questions or additional information, contact Tiffany Lafferty (410-786-7548).

Addendum IV: Medicare National Coverage Determinations (July through September 2026)

Addendum IV includes completed national coverage determinations (NCDs), or reconsiderations of completed NCDs, from the quarter covered by this notice. Completed decisions are identified by the section of the NCD Manual (NCDM) in which the decision appears, the title, the date the publication was issued, and the effective date of the decision. An NCD is a determination by the Secretary for whether or not a particular item or service is covered nationally under the Medicare Program (title XVIII of the Act), but does not include a determination of the code, if any, that is assigned to a particular covered item or service, or payment determination for a particular covered item or service. The entries below include information concerning completed decisions, as well as sections on program and decision memoranda, which also announce decisions or, in some cases, explain why it was not appropriate to issue an NCD. Additional information on NCDs, including open NCDs and pending NCDs, can be found on the NCD Dashboard, which is posted on the CMS website at https://www.cms.gov/medicare/coverage/determination-process.

For the purposes of this quarterly notice, we are providing only the specific updates to NCDs, or reconsiderations of completed NCDs published in the 3-month period.

For questions or additional information, contact Wanda Belle, MPA (410-786-7491).

Title	NCDM Section	Transmittal Number	Issue Date	Effective Date
Colorectal Cancer Screening Tests	NCD 210.3	13921	08/27/2026	08/08/2026

Addendum V: FDA-Approved Category B Investigational Device Exemptions (IDEs) (July through September 2026)

(Inclusion of this addenda is under discussion internally.)

Addendum VI: Approval Numbers for Collections of Information (July through September 2026)

All approval numbers are available to the public at Reginfo.gov. Under the review process, approved information collection requests are assigned OMB control numbers. A single control number may apply to several related information collections. This information is available at *www.reginfo.gov/public/do/PRAMain.*

For questions or additional information, contact William Parham (410-786-4669).

Addendum VII: Medicare-Approved Carotid Stent Facilities (April through June 2026)

Addendum VII includes listings of Medicare-approved carotid stent facilities. All facilities listed meet CMS standards for performing carotid artery stenting for high-risk patients. On March 17, 2005, we issued our decision memorandum on carotid artery stenting. We determined that carotid artery stenting with embolic protection is reasonable and necessary only if performed in facilities that have been determined to be competent in performing the evaluation, procedure, and follow-up necessary to ensure optimal patient outcomes. We have created a list of minimum standards for facilities modeled in part on professional society statements on competency. All facilities must at least meet our standards to receive coverage for carotid artery stenting for high-risk patients. For the purposes of this quarterly notice, we are providing only the specific updates that have occurred in the 3-month period. There were no additions, deletions, or editorial changes to the listing for Medicare-approved carotid stent facilities for this 3-month period. This information is available at: http://www.cms.gov/MedicareApprovedFacilitie/CASF/list.asp#TopOfPage .

For questions or additional information, contact Sarah Fulton, MHS (410-786-2749).

Addendum VIII: American College of Cardiology's National Cardiovascular Data Registry Sites (April through June 2026)

The initial data collection requirement through the American College of Cardiology's National Cardiovascular Data Registry (ACC-NCDR) has served to develop and improve the evidence base for the use of ICDs in certain Medicare beneficiaries. The data collection requirement ended with the posting of the final decision memo for Implantable Cardioverter Defibrillators on February 15, 2018.

For questions or additional information, contact Sarah Fulton, MHS (410-786-2749).

Addendum IX: Active CMS Coverage-Related Guidance Documents (April through June 2026)

CMS published three final guidance documents on August 7, 2024, to provide a framework for more predictable and transparent evidence development and encourage innovation and accelerate beneficiary access to new items and services. The documents are available at:

Coverage with Evidence Development: https://www.cms.gov/medicare-coverage-database/view/medicare-coverage-document.aspx?mcdid=38.

CMS National Coverage Analysis Evidence Review: https://www.cms.gov/medicare-coverage-database/view/medicare-coverage-document.aspx?mcdid=37.

Clinical Endpoints Guidance: Knee Osteoarthritis: https://www.cms.gov/medicare-coverage-database/view/medicare-coverage-document.aspx?mcdid=36.

For questions or additional information, contact Lori Ashby, MA (410 786 6322).

Addendum X: List of Special One-Time Notices Regarding National Coverage Provisions (April through June 2026)

There were no special one-time notices regarding national coverage provisions published in the 3-month period. This information is available at http://www.cms.gov.

For questions or additional information, contact JoAnna Baldwin, MS (410-786 7205).

Addendum XI: National Oncologic PET Registry (NOPR) (April through June 2026)

Addendum XI includes a listing of National Oncologic Positron Emission Tomography Registry (NOPR) sites. We cover positron emission tomography (PET) scans for particular oncologic indications when they are performed in a facility that participates in the NOPR.

In January 2005, we issued our decision memorandum on PET scans, which stated that CMS would cover PET scans for particular oncologic indications, as long as they were performed in the context of a clinical study. We have since recognized the National Oncologic PET Registry as one of these clinical studies. Therefore, in order for a beneficiary to receive a Medicare-covered PET scan, the beneficiary must

receive the scan in a facility that participates in the registry. There were no additions, deletions, or editorial changes to the listing of National Oncologic Positron Emission Tomography Registry (NOPR) in the 3-month period. This information is available at http://www.cms.gov/MedicareApprovedFacilitie/NOPR/list.asp#TopOfPage.

For questions or additional information, contact David Dolan, MBA (410-786-3365).

Addendum XII: Medicare-Approved Ventricular Assist Device (Destination Therapy) Facilities (April through June 2026)

Addendum XII includes a listing of Medicare-approved facilities that receive coverage for ventricular assist devices (VADs) used as destination therapy. All facilities were required to meet our standards in order to receive coverage for VADs implanted as destination therapy. On October 1, 2003, we issued our decision memorandum on VADs for the clinical indication of destination therapy. We determined that VADs used as destination therapy are reasonable and necessary only if performed in facilities that have been determined to have the experience and infrastructure to ensure optimal patient outcomes. We established facility standards and an application process. All facilities were required to meet our standards in order to receive coverage for VADs implanted as destination therapy.

For the purposes of this quarterly notice, we are providing only the specific updates to the list of Medicare-approved facilities that meet our standards that have occurred in the 3-month period. This information is available at http://www.cms.gov/MedicareApprovedFacilitie/VAD/list.asp#TopOfPage.

For questions or additional information, contact David Dolan, MBA, (410-786-3365).

Addendum XIII: Lung Volume Reduction Surgery (LVRS) (April through June 2026)

Addendum XIII includes a listing of Medicare-approved facilities that are eligible to receive coverage for lung volume reduction surgery.

Until May 17, 2007, facilities that participated in the National Emphysema Treatment Trial were also eligible to receive coverage. The following three types of facilities are eligible for reimbursement for Lung Volume Reduction Surgery (LVRS):

- National Emphysema Treatment Trial (NETT) approved (Beginning May 7, 2007, these will no longer automatically qualify and can qualify only with the other programs);
- Credentialed by the Joint Commission (formerly, the Joint Commission on Accreditation of Healthcare Organizations (JCAHO)) under their Disease Specific Certification Program for LVRS; and
- Medicare approved for lung transplants.

Only the first two types are in the list. For the purposes of this quarterly notice, there are no additions and deletions to a listing of Medicare-approved facilities that are eligible to receive coverage for lung volume reduction surgery. This information is available at *www.cms.gov/MedicareApprovedFacilitie/LVRS/list.asp#TopOfPage.*

For questions or additional information, contact Sarah Fulton, MHS (410-786-2749).

Addendum XIV: Medicare-Approved Bariatric Surgery Facilities (April through June 2026)

Addendum XIV includes a listing of Medicare-approved facilities that meet minimum standards for facilities modeled in part on professional society statements on competency. All facilities must meet our standards in order to receive coverage for bariatric surgery procedures. On February 21, 2006, we issued our decision memorandum on bariatric surgery procedures. We determined that bariatric surgical procedures are reasonable and necessary for Medicare beneficiaries who have a body-mass index greater than or equal to 35, have at least one co-morbidity related to obesity and have been previously unsuccessful with medical treatment for obesity. This decision also stipulated that covered bariatric surgery procedures are reasonable and necessary only when performed at facilities that are: (1) certified by the American College of Surgeons (ACS) as a Level 1 Bariatric Surgery Center (program standards and requirements in effect on February 15, 2006); or (2) certified by the American Society for Bariatric Surgery as a Bariatric Surgery Center of Excellence (program standards and requirements in effect on February 15, 2006).

There were no additions, deletions, or editorial changes to Medicare-approved facilities that meet CMS' minimum facility standards for bariatric surgery that have been certified by ACS and/or American Society for Metabolic and Bariatric Surgery in the 3-month period. This information is available at *www.cms.gov/MedicareApprovedFacilitie/BSF/list.asp#TopOfPage.*

For questions or additional information, contact Sarah Fulton, MHS (410-786-2749).

Addendum XV: Fluorodeoxyglucose (FDG)-PET for Dementia and Neurodegenerative Diseases Clinical Trials (April through June 2026)

There were no FDG-PET for Dementia and Neurodegenerative Diseases Clinical Trials published in the 3-month period.

This information is available on our website at *www.cms.gov/MedicareApprovedFacilitie/PETDT/list.asp#TopOfPage.*

For questions or additional information, contact David Dolan, MBA (410-786-3365).

Medicare Program; Medicare Part B Monthly Actuarial Rates, Premium Rates, and Annual Deductible Beginning January 1, 2027

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: This notice announces the monthly actuarial rates for aged (age 65 and over) and disabled (under age 65) beneficiaries enrolled in Part B of the Medicare Supplementary Medical Insurance (SMI) program beginning January 1, 2027. In addition, this notice announces the monthly premium for aged and disabled beneficiaries, the deductible for 2027, and the income-related monthly adjustment amounts to be paid by beneficiaries with modified adjusted gross income above certain threshold amounts. The monthly actuarial rates for 2027 are $418.70 for aged enrollees and $452.40 for disabled enrollees. The standard monthly Part B premium rate for all enrollees for 2027 is $209.40, which is equal to 50 percent of the monthly actuarial rate for aged enrollees (or approximately 25 percent of the expected average total cost of Part B coverage for aged enrollees). The 2027 premium is 3.2 percent or $6.50 higher than the 2026 standard premium rate of $202.90. The Part B deductible for 2027 is $292.00 for all Part B beneficiaries. If a beneficiary has to pay an income-related monthly adjustment amount, that individual will have to pay a total monthly premium of about 35, 50, 65, 80, or 85 percent of the total cost of Part B coverage. Beginning in 2023, certain Medicare enrollees who are 36 months post kidney transplant, and therefore no longer eligible for full Medicare coverage, can elect to continue Part B coverage of immunosuppressive drugs by paying a premium. For 2027, the immunosuppressive drug premium is $125.70.

DATES: The rates take effect January 1, 2027.

FOR FURTHER INFORMATION CONTACT: M. Kent Clemens, (410) 786–6391.

SUPPLEMENTARY INFORMATION:

I. Background

Part B is the voluntary portion of the Medicare program that pays all or part of the costs for physicians' services; outpatient hospital services; certain home health services; services furnished by rural health clinics, ambulatory surgical centers, and comprehensive outpatient rehabilitation facilities; and certain other medical and health services not covered by Medicare Part A, Hospital Insurance. Medicare Part B is available to individuals who are entitled to Medicare Part A, as well as to U.S. residents who have attained age 65 and are citizens and to non-citizens who were lawfully admitted for permanent residence and have resided in the United States for 5 consecutive years. Part B requires enrollment and payment of monthly premiums, as described in 42 CFR part 407, subpart B, and part 408, respectively. The premiums paid by (or on behalf of) all enrollees fund approximately one-fourth of the total incurred costs, and transfers from the general fund of the Treasury pay approximately three-fourths of these costs.

The Secretary of Health and Human Services (the Secretary) is required by section 1839 of the Social Security Act (the Act) to announce the Part B monthly actuarial rates for aged and disabled beneficiaries as well as the monthly Part B premium. The Part B annual deductible, income-related monthly adjustment amounts, and immunosuppressive drug premium are included because their determinations are directly linked to the aged actuarial rate.

The monthly actuarial rates for aged and disabled enrollees are used to determine the correct amount of general revenue financing per beneficiary each month. These amounts, according to actuarial estimates, will equal, respectively, one-half of the expected average monthly cost of Part B for each aged enrollee (age 65 or over) and one-half of the expected average monthly cost of Part B for each disabled enrollee (under age 65).

The Part B deductible to be paid by enrollees is also announced. Prior to the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173), the Part B deductible was set in statute. After setting the 2005 deductible amount at $110.00, section 629 of the MMA (amending section 1833(b) of the Act) required that the Part B deductible be indexed beginning in 2006. The inflation factor to be used each year is the annual percentage increase in the Part B actuarial rate for enrollees age 65 and over. Specifically, the 2027 Part B deductible is calculated by multiplying the 2026 deductible by the ratio of the 2027 aged actuarial rate to the 2026 aged actuarial rate. The amount determined under this formula is then rounded to the nearest $1.00. For 2027, the calculation is ($418.70/$405.40) * $283.00 = $292.28, which rounds to $292.00.

The monthly Part B premium rate to be paid by aged and disabled enrollees is also announced. (Although the costs to the program per disabled enrollee are different than for the aged, the statute provides that the two groups pay the same premium amount.) Beginning with the passage of section 203 of the Social Security Amendments of 1972 (Pub. L. 92–603), the premium rate, which was determined on a fiscal-year basis, was limited to the lesser of the actuarial rate for aged enrollees, or the current monthly premium rate increased by the same percentage as the most recent general increase in monthly Title II Social Security benefits.

However, the passage of section 124 of the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) (Pub. L. 97–248) suspended this premium determination process. Section 124 of TEFRA changed the premium basis to 50 percent of the monthly actuarial rate for aged enrollees (that is, 25 percent of program costs for aged enrollees). Section 606 of the Social Security Amendments of 1983 (Pub. L. 98–21), section 2302 of the Deficit Reduction Act of 1984 (DEFRA 84) (Pub. L. 98–369), section 9313 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA 85) (Pub. L. 99–272), section 4080 of the Omnibus Budget Reconciliation Act of 1987 (OBRA 87) (Pub. L. 100–203), and section 6301 of the Omnibus Budget Reconciliation Act of 1989 (OBRA 89) (Pub. L. 101–239) extended the provision that the premium be based on 50 percent of the monthly actuarial rate for aged enrollees (that is, 25 percent of program costs for aged enrollees). This extension expired at the end of 1990.

The premium rate for 1991 through 1995 was legislated by section 1839(e)(1)(B) of the Act, as added by section 4301 of the Omnibus Budget Reconciliation Act of 1990 (OBRA 90) (Pub. L. 101–508). In January 1996, the premium determination basis would have reverted to the method established by the 1972 Social Security Act Amendments. However, section 13571 of the Omnibus Budget Reconciliation Act of 1993 (OBRA 93) (Pub. L. 103–66) changed the premium basis to 50 percent of the monthly actuarial rate for aged enrollees (that is, 25 percent of program costs for aged enrollees) for 1996 through 1998.

Section 4571 of the Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33) permanently extended the provision that the premium be based on 50 percent of the monthly actuarial rate for aged enrollees (that is, 25 percent of program costs for aged enrollees).

The BBA included a further provision affecting the calculation of the Part B actuarial rates and premiums for 1998 through 2003. Section 4611 of the BBA modified the home health benefit payable under Part A for individuals enrolled in Part B. Under this section, beginning in 1998, expenditures for home health services not considered ''post-institutional'' are payable under Part B rather than Part A. However, section 4611(e)(1) of the BBA required that there be a transition from 1998 through 2002 for the aggregate amount of the expenditures transferred from Part A to Part B. Section 4611(e)(2) of the BBA also provided a specific yearly proportion for the transferred funds. The proportions were one-sixth for 1998, one-third for 1999, one-half for 2000, two-thirds for 2001, and five-sixths for 2002. For the purpose of determining the correct amount of financing from general revenues of the Federal Government, it was necessary to include only these transitional amounts in the monthly actuarial rates for both aged and disabled enrollees, rather than the total cost of the home health services being transferred.

Section 4611(e)(3) of the BBA also specified, for the purpose of determining the premium, that the monthly actuarial rate for enrollees age 65 and over be computed as though the transition would occur for 1998 through 2003 and that one-seventh of the cost be transferred in 1998, two-sevenths in 1999, three-sevenths in 2000, four-sevenths in 2001, five-sevenths in 2002, and six-sevenths in 2003. Therefore, the transition period for incorporating this home health transfer into the premium was 7 years while the transition period for including these services in the actuarial rate was 6 years.

Section 811 of the MMA, which amended section 1839 of the Act, requires that, starting on January 1, 2007, the Part B premium a beneficiary pays each month be based on that individual's annual income. (The MMA specified that there be a 5-year transition period to reach full implementation of this provision. However, section 5111 of the Deficit Reduction Act of 2005 (DRA) (Pub. L. 109–171) modified the transition to a 3-year period, which ended in 2009.) Specifically, if a beneficiary's modified

adjusted gross income is greater than the legislated threshold amounts (for 2027, $112,000 for a beneficiary filing an individual income tax return and $224,000 for a beneficiary filing a joint tax return), the beneficiary is responsible for a larger portion of the estimated total cost of Part B benefit coverage. In addition to the standard 25-percent premium, these beneficiaries now have to pay an income-related monthly adjustment amount. The MMA made no change to the actuarial rate calculation, and the standard premium, which will continue to be paid by beneficiaries whose modified adjusted gross income is below the applicable thresholds, still represents 25 percent of the estimated total cost to the program of Part B coverage for an aged enrollee. However, depending on income and tax filing status, a beneficiary can now be responsible for 35, 50, 65, 80, or 85 percent of the estimated total cost of Part B coverage, rather than 25 percent. Section 402 of the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) (Pub. L. 114–10) modified the income thresholds beginning in 2018, and section 53114 of the Bipartisan Budget Act of 2018 (BBA of 2018) (Pub. L. 115–123) further modified the income thresholds beginning in 2019. For years beginning in 2019, the BBA of 2018 established a new income threshold. If a beneficiary's modified adjusted gross income is greater than or equal to $500,000 for a beneficiary filing an individual income tax return and $750,000 for a beneficiary filing a joint tax return, the beneficiary is responsible for 85 percent of the estimated total cost of Part B coverage. The BBA of 2018 specified that these new income threshold levels be inflation-adjusted beginning in 2028. The result of the higher premium is that the Part B premium subsidy is reduced, and less general revenue financing is required, for beneficiaries with higher income because they are paying a larger share of the total cost with their premium. That is, the premium subsidy continues to be approximately 75 percent for beneficiaries with income below the applicable income thresholds, but it will be reduced for beneficiaries with income above these thresholds.

The Consolidated Appropriations Act, 2021 (Pub. L. 116–260) established a new basis for Medicare Part B eligibility for post-kidney-transplant immunosuppressive drug coverage only. Medicare eligibility due solely to end-stage renal disease generally ends 36 months after a successful kidney transplant. Beginning in 2023, post-kidney-transplant individuals without certain types of insurance coverage can elect to enroll in Part B and receive coverage of immunosuppressive drugs only. The premium for this continuation of coverage is 15 percent of a different aged actuarial rate, which is equal to 100 percent of the costs for aged enrollees (rather than the standard aged actuarial rate, which is equal to one-half of the costs for aged enrollees). Enrollees paying the immunosuppressive premium are not subject to the late enrollment penalty and the $3.00 repayment amounts, but they are subject to the hold-harmless provision (described later) and the income-related monthly adjustment amounts. The law requires transfers equal to the reduction in aggregate premiums payable that results from enrollees with coverage only for immunosuppressive drugs paying the immunosuppressive drug Part B premium rather than the standard Part B premium. These transfers are to be treated as premiums payable for general revenue matching purposes.

Section 4732(c) of the BBA added section 1933(c) of the Act, which required the Secretary to allocate money from the Part B trust fund to the State Medicaid programs for the purpose of providing Medicare Part B premium assistance from 1998 through 2002 for the low-income Medicaid beneficiaries who qualify under section 1933 of the Act. This allocation, while not a benefit expenditure, was an expenditure of the trust fund and was included in calculating the Part B actuarial rates through 2002. For 2003 through 2015, the expenditure was made from the trust fund because the allocation was temporarily extended. However, because the extension occurred after the financing was determined, the allocation was not included in the calculation of the financing rates for these years. Section 211 of MACRA permanently extended this expenditure, which is included in the calculation of the Part B actuarial rates for 2016 and subsequent years.

Another provision affecting the calculation of the Part B premium is section 1839(f) of the Act, as amended by section 211 of the Medicare Catastrophic Coverage Act of 1988 (MCCA 88) (Pub. L. 100–360). (The Medicare Catastrophic Coverage Repeal Act of 1989 (Pub. L. 101–234) did not repeal the revisions to section 1839(f) of the Act made by MCCA 88.) Section 1839(f) of the Act, referred to as the hold-harmless provision, provides that, if an individual is entitled to benefits under section 202 or 223 of the Act (the Old Age- and Survivors Insurance Benefit and the Disability Insurance Benefit, respectively) and has the Part B premium deducted from these benefit payments, the premium increase will be reduced, if necessary, to avoid causing a decrease in the individual's net monthly payment. This decrease in payment occurs if the increase in the individual's Social Security benefit resulting from the cost-of living adjustment under section 215(i–) of the Act is less than the increase in the premium. Specifically, the reduction in the premium amount applies if the individual is entitled to benefits under section 202 or 223 of the Act for November and December of a particular year and the individual's Part B premiums for December and the following January are deducted from the respective month's section 202 or 223 benefits. The hold-harmless provision does not apply to beneficiaries who are required to pay an income-related monthly adjustment amount.

A check for benefits under section 202 or 223 of the Act is received in the month following the month for which the benefits are due. The Part B premium that is deducted from a particular check is the Part B payment for the month in which the check is received. Therefore, a benefit check for November is not received until December, but December's Part B premium has been deducted from it.

Generally, if a beneficiary qualifies for hold-harmless protection, the reduced premium for the individual for that January and for each of the succeeding 11 months is the greater of either—

- The monthly premium for January reduced as necessary to make the December monthly benefits, after the deduction of the Part B premium for January, at least equal to the preceding November's monthly benefits, after the deduction of the Part B premium for December; or
- The monthly premium for that individual for that December.

In determining the premium limitations under section 1839(f) of the Act, the monthly benefits to which an individual is entitled under section 202 or 223 of the Act do not include retroactive adjustments or payments and deductions on account of work. Also, once the monthly premium amount is established under section 1839(f) of the Act, it will not be changed during the year even if there are retroactive adjustments or payments and deductions on account of work that apply to the individual's monthly benefits.

Individuals who have enrolled in Part B late or who have re-enrolled after the termination of a coverage period are subject to an increased premium under

section 1839(b) of the Act. The increase is a percentage of the premium and is based on the new premium rate before any reductions under section 1839(f) of the Act are made.

Section 1839 of the Act, as amended by section 601(a) of the Bipartisan Budget Act of 2015 (Pub. L. 114–74), specified that the 2016 actuarial rate for enrollees age 65 and older be determined as if the hold-harmless provision did not apply. The premium revenue that was lost by using the resulting lower premium (excluding the forgone income-related premium revenue) was replaced by a transfer of general revenue from the Treasury, which was repaid over time.

Similarly, section 1839 of the Act, as amended by section 2401 of the Continuing Appropriations Act, 2021 and Other Extensions Act (Pub. L. 116–159), specified that the 2021 actuarial rate for enrollees age 65 and older be determined as the sum of the 2020 actuarial rate for enrollees age 65 and older and one-fourth of the difference between the 2020 actuarial rate and the preliminary 2021 actuarial rate (as determined by the Secretary) for such enrollees. The premium revenue lost by using the resulting lower premium (excluding the forgone income-related premium revenue) was replaced by a transfer of general revenue from the Treasury, which was repaid over time.

Starting in 2016, in order to repay the balance due (which includes the transfer amounts and the forgone income-related premium revenue from the Bipartisan Budget Act of 2015 and the Continuing Appropriations Act, 2021 and Other Extensions Act), the Part B premium otherwise determined was increased by $3.00. For 2016 through 2026, the repayment amounts were added to the Part B premium otherwise determined each year and were paid back to the general fund of the Treasury.

High-income enrollees paid the repayment amount plus an additional income-related repayment amount as part of the income-related monthly adjustment amount (IRMAA) premium dollars, which reduced (dollar for dollar) the amount of general revenue received by Part B from the general fund of the Treasury. Because of this general revenue offset, the repayment IRMAA premium dollars were not included in the direct repayments made to the general fund of the Treasury from Part B in order to avoid a double repayment. (Only the monthly repayment amount was included in the direct repayments.)

The repayment amounts (excluding those for high-income enrollees) were subject to the hold-harmless provision. The original balance due was $9,066,409,000, consisting of $1,625,761,000 in forgone income-related premium revenue plus a transfer amount of $7,440,648,000 from the provisions of the Bipartisan Budget Act of 2015. The increase in the balance due in 2021 was $8,799,829,000, consisting of $946,046,000 in forgone income-related premium income plus a transfer amount of $7,853,783,000 from the provisions of the Continuing Appropriations Act, 2021 and Other Extensions Act. The balance due was zero by the end of 2026.

II. Provisions of the Notice

A. Notice of Medicare Part B Monthly Actuarial Rates, Monthly Premium Rates, and Annual Deductible

The Medicare Part B monthly actuarial rates applicable for 2027 are $418.70 for enrollees age 65 and over and $452.40 for disabled enrollees under age 65. In section II.B. of this notice, we present the actuarial assumptions and bases from which these rates are derived. The Part B standard monthly premium rate for all enrollees for 2027 is $209.40. The Part B immunosuppressive drug premium is $125.70.

The following are the 2027 Part B monthly premium rates to be paid by (or on behalf of) beneficiaries with full Part B coverage who file either individual tax returns (and are single individuals, heads of households, qualifying widows or widowers with dependent children, or married individuals filing separately who lived apart from their spouses for the entire taxable year) or joint tax returns.

Full Part B Coverage			
Beneficiaries who file individual tax returns with modified adjusted gross income:	**Beneficiaries who file joint tax returns with modified adjusted gross income:**	**Income-Related Monthly Adjustment Amount**	**Total Monthly Premium Amount**
Less than or equal to $112,000	Less than or equal to $224,000	$0.00	$209.40
Greater than $112,000 and less than or equal to $141,000	Greater than $224,000 and less than or equal to $282,000	$83.70	$293.10
Greater than $141,000 and less than or equal to $177,000	Greater than $282,000 and less than or equal to $354,000	$209.40	$418.80
Greater than $177,000 and less than or equal to $212,000	Greater than $354,000 and less than or equal to $424,000	$335.00	$544.40
Greater than $212,000 and less than $500,000	Greater than $424,000 and less than $750,000	$460.60	$670.00
Greater than or equal to $500,000	Greater than or equal to $750,000	$502.40	$711.80

For beneficiaries with immunosuppressive drug only Part B coverage who file either individual tax returns (and are single individuals, heads of households, qualifying widows or widowers with dependent children, or married individuals filing separately who lived apart from their spouses for the entire taxable year) or joint tax returns, the 2027 Part B monthly premium rates are as follows:

Part B Immunosuppressive Drug Coverage Only			
Beneficiaries who file individual tax returns with modified adjusted gross income:	**Beneficiaries who file joint tax returns with modified adjusted gross income:**	**Income-Related Monthly Adjustment Amount**	**Total Monthly Premium Amount**
Less than or equal to $112,000	Less than or equal to $224,000	$0.00	$125.70
Greater than $112,000 and less than or equal to $141,000	Greater than $224,000 and less than or equal to $282,000	$83.70	$209.40
Greater than $141,000 and less than or equal to $177,000	Greater than $282,000 and less than or equal to $354,000	$209.40	$335.10
Greater than $177,000 and less than or equal to $212,000	Greater than $354,000 and less than or equal to $424,000	$335.00	$460.70
Greater than $212,000 and less than $500,000	Greater than $424,000 and less than $750,000	$460.60	$586.30
Greater than or equal to $500,000	Greater than or equal to $750,000	$502.40	$628.10

In addition, the monthly premium rates to be paid by (or on behalf of) beneficiaries with full Part B coverage who are married and lived with their spouses at any time during the taxable year, but who file separate tax returns from their spouses, are as follows:

Full Part B Coverage		
Beneficiaries who are married and lived with their spouses at any time during the year, but who file separate tax returns from their spouses, with modified adjusted gross income:	**Income-Related Monthly Adjustment Amount**	**Total Monthly Premium Amount**
Less than or equal to $112,000	$0.00	$209.40
Greater than $112,000 and less than $388,000	$460.60	$670.00
Greater than or equal to $388,000	$502.40	$711.80

The monthly premium rates to be paid by (or on behalf of) beneficiaries with immunosuppressive drug only Part B coverage who are married and lived with their spouses at any time during the taxable year, but who file separate tax returns from their spouses, are as follows:

Part B Immunosuppressive Drug Coverage Only		
Beneficiaries who are married and lived with their spouses at any time during the year, but who file separate tax returns from their spouses, with modified adjusted gross income:	**Income-Related Monthly Adjustment Amount**	**Total Monthly Premium Amount**
Less than or equal to $112,000	$0.00	$125.70
Greater than $112,000 and less than $388,000	$460.60	$586.30
Greater than or equal to $388,000	$502.40	$628.10

The Part B annual deductible for 2027 is $292.00 for all beneficiaries.

B. Statement of Actuarial Assumptions and Bases Employed in Determining the Monthly Actuarial Rates and the Monthly Premium Rate for Part B Beginning January 2027

The actuarial assumptions and bases used to determine the monthly actuarial rates and the monthly premium rates for Part B are established by the Centers for Medicare & Medicaid Services' (CMS') Office of the Actuary (OACT). The estimates underlying these determinations are prepared by actuaries meeting the qualification standards and following the actuarial standards of practice established by the Actuarial Standards Board.

1. Actuarial Status of the Part B Account in the Supplementary Medical Insurance Trust Fund

Under section 1839 of the Act, the starting point for determining the standard monthly premium is the amount that would be necessary to finance Part B on an incurred basis. This is the amount of income that would be sufficient to pay for services furnished during that year (including associated administrative costs) even though payment for some of these services will not be made until after the close of the year. The portion of income required to cover benefits not paid until after the close of the year is added to the trust fund and used when needed.

Because the premium rates are established prospectively, they are subject to projection error. Additionally, legislation enacted after the financing was established, but effective for the period in which the financing is set, may affect program costs. As a result, the income to the program may not equal incurred costs.

Beginning in 2027, the Part B financing will include the consideration of a Part D risk to the Part B assets. An additional source of uncertainty exists in Part B to the extent CMS may be able to reallocate Part B assets to the Part D account if Part D financing is inadequate, such as in the case of a lapse of funding resulting from a government shutdown. The 2027 Part B financing has not been increased to reflect this uncertainty, because sufficient Part D funding will be available to pay Part D expenses in case the established Part D financing is temporarily inadequate during 2027. This financing would be available in the case of a prolonged government shutdown and would be used prior to any Part B funds being needed.

Trust fund assets must be maintained at a level that is adequate to cover an appropriate degree of variation between actual and projected costs, and the amount of incurred, but unpaid, expenses. Numerous factors determine what level of assets is appropriate to cover variation between actual and projected costs. For 2027, the three most important of these factors are: (1) the difference from prior years between the actual performance of the program and estimates made at the time financing was established; (2) the likelihood and potential magnitude of expenditure changes resulting from enactment of legislation affecting Part B costs in a year subsequent to the establishment of financing for that year; and (3) the expected relationship between incurred and cash expenditures.

Table 1 summarizes the estimated actuarial status of the trust fund as of the end of the financing period for 2025 and 2026.

TABLE 1: ESTIMATED ACTUARIAL STATUS OF THE PART B ACCOUNT IN THE SUPPLEMENTARY MEDICAL INSURANCE TRUST FUND AS OF THE END OF THE FINANCING PERIOD

Financing Period Ending	Assets (in millions)	Liabilities[1] (in millions)	Assets less Liabilities[1] (in millions)
December 31, 2025	$147,828	$38,473	$109,354
December 31, 2026	$178,148	$41,889	$136,259

[1] These amounts include only items incurred but not paid. They do not include the amounts that are to be paid back to the general fund of the Treasury over time as specified by section 1839 of the Act as amended by section 601(a) of the Bipartisan Budget Act of 2015 and further amended by section 2401 of the Continuing Appropriations Act, 2021 and Other Extensions Act, nor do they include the Accelerated and Advance Payments Program amounts that are to be repaid by providers and returned to the general fund of the Treasury.

2. Monthly Actuarial Rate for Enrollees Age 65 and Older

The monthly actuarial rate for enrollees age 65 and older is one-half of the sum of monthly amounts for: (1) the projected cost of benefits; and (2) administrative expenses for each enrollee age 65 and older, after adjustments to this sum to allow for interest earnings on assets in the trust fund and an adequate contingency margin. The contingency margin is to be an amount appropriate to provide for possible variation between actual and projected costs and to amortize any surplus assets or unfunded liabilities.

The monthly actuarial rate for enrollees age 65 and older for 2027 is determined by first establishing per enrollee costs by type of service from program data through 2025 and then projecting these costs for subsequent years. The projection factors used for financing periods from January 1, 2024 through December 31, 2027 are shown in Table 2.

As indicated in Table 3, the projected per enrollee amount required to pay for one-half of the total of benefits and administrative costs for enrollees age 65 and over for 2027 is $415.86. The monthly actuarial rate of $418.70 provides an adjustment of $7.13 for a contingency margin and −$4.28 for interest earnings.

Starting in 2011, manufacturers and importers of brand-name prescription drugs pay a fee that is allocated to the Part B account of the SMI trust fund. For 2027, the total of these brand-name drug fees is estimated to be $2.8 billion. The contingency margin for 2027 has been reduced to account for this additional revenue.

The traditional goal for the Part B reserve has been that assets minus liabilities at the end of a year should represent between 15 and 20 percent of the following year's total incurred expenditures. To accomplish this goal, a 17-percent reserve ratio, which is a fully adequate contingency reserve level, has been the normal target used to calculate the Part B premium. At the end of 2026, the reserve ratio is expected to be 18.6 percent. When the reserve ratio is somewhat below 17 percent, the typical approach in the premium determination is to target a reserve ratio of 17 percent the following year. OACT has estimated that a target reserve ratio of 14 percent is the minimally financially adequate level for the Part B premium determination. The 2027 financing targets an 18.6-percent reserve ratio.

The actuarial rate of $418.70 per month for aged beneficiaries, as announced in this notice for 2027, reflects the combined effect of the factors and legislation previously described and the projected assumptions listed in Table 2.

3. Monthly Actuarial Rate for Disabled Enrollees

Disabled enrollees are those persons under age 65 who are enrolled in Part B because of entitlement to Social Security disability benefits for more than 24 months or because of entitlement to Medicare under the End-stage Renal Disease (ESRD) program. Projected monthly costs for disabled enrollees (other than those with ESRD) are prepared in a manner parallel to the projection for the aged using appropriate actuarial assumptions (see Table 2). Costs for the ESRD program are projected differently because of the different nature of services offered by the program.

As shown in Table 4, the projected per enrollee amount required to pay for one-half of the total of benefits and administrative costs for disabled enrollees for 2027 is $526.08. The monthly actuarial rate of $452.40 also provides an adjustment of −$8.70 for interest earnings and −$64.98 for a contingency margin, reflecting the same factors described previously for the aged actuarial rate at magnitudes applicable to the disabled rate determination. Based on current estimates, the assets associated with the disabled Medicare beneficiaries at the end of 2026 are sufficient to cover the amount of incurred, but unpaid, expenses and to provide for a significant degree of variation between actual and projected costs, and accordingly a negative margin is needed.

The actuarial rate of $452.40 per month for disabled beneficiaries, as announced in this notice for 2027, reflects the combined net effect of the factors described previously for aged beneficiaries and the projection assumptions listed in Table 2.

4. Sensitivity Testing

Several factors contribute to uncertainty about future trends in

medical care costs. It is appropriate to test the adequacy of the rates using alternative cost growth rate assumptions, the results of which are shown in Table 5. One set represents increases that are higher and, therefore, more pessimistic than the current estimate, and the other set represents increases that are lower and, therefore, more optimistic than the current estimate. The values for the alternative assumptions were determined from a statistical analysis of the historical variation in the respective increase factors.

As indicated in Table 5, the monthly actuarial rates would result in an excess of assets over liabilities of $136,666 million by the end of December 2027 under the cost growth rate assumptions shown in Table 2 and under the assumption that the provisions of current law are fully implemented. This result amounts to 18.4 percent of the estimated total incurred expenditures for the following year.

Assumptions that are somewhat more pessimistic (and that therefore test the adequacy of the assets to accommodate projection errors) produce a surplus of $71,537 million by the end of December 2027 under current law, which amounts to 8.6 percent of the estimated total incurred expenditures for the following year. Under fairly optimistic assumptions, the monthly actuarial rates would result in a surplus of $200,444 million by the end of December 2027, or 30.7 percent of the estimated total incurred expenditures for the following year.

The sensitivity analysis indicates that, in a typical year, the premium and general revenue financing established for 2027, together with existing Part B account assets, would be adequate to cover estimated Part B costs for 2027 under current law, should actual costs prove to be somewhat greater than expected.

5. Premium Rates and Deductible

As determined in accordance with section 1839 of the Act, the following are the 2027 Part B monthly premium rates to be paid by (or on behalf of) beneficiaries with full Part B coverage who file either individual tax returns (and are single individuals, heads of households, qualifying widows or widowers with dependent children, or married individuals filing separately who lived apart from their spouses for the entire taxable year) or joint tax returns.

Full Part B Coverage			
Beneficiaries who file individual tax returns with modified adjusted gross income:	**Beneficiaries who file joint tax returns with modified adjusted gross income:**	**Income-Related Monthly Adjustment Amount**	**Total Monthly Premium Amount**
Less than or equal to $112,000	Less than or equal to $224,000	$0.00	$209.40
Greater than $112,000 and less than or equal to $141,000	Greater than $224,000 and less than or equal to $282,000	$83.70	$293.10
Greater than $141,000 and less than or equal to $177,000	Greater than $282,000 and less than or equal to $354,000	$209.40	$418.80
Greater than $177,000 and less than or equal to $212,000	Greater than $354,000 and less than or equal to $424,000	$335.00	$544.40
Greater than $212,000 and less than $500,000	Greater than $424,000 and less than $750,000	$460.60	$670.00
Greater than or equal to $500,000	Greater than or equal to $750,000	$502.40	$711.80

For beneficiaries with immunosuppressive drug only Part B coverage who file either individual tax returns (and are single individuals, heads of households, qualifying widows or widowers with dependent children, or married individuals filing separately who lived apart from their spouses for the entire taxable year) or joint tax returns, the 2027 Part B monthly premium rates are as follows:

Part B Immunosuppressive Drug Coverage Only			
Beneficiaries who file individual tax returns with modified adjusted gross income:	**Beneficiaries who file joint tax returns with modified adjusted gross income:**	**Income-Related Monthly Adjustment Amount**	**Total Monthly Premium Amount**
Less than or equal to $112,000	Less than or equal to $224,000	$0.00	$125.70
Greater than $112,000 and less than or equal to $141,000	Greater than $224,000 and less than or equal to $282,000	$83.70	$209.40
Greater than $141,000 and less than or equal to $177,000	Greater than $282,000 and less than or equal to $354,000	$209.40	$335.10
Greater than $177,000 and less than or equal to $212,000	Greater than $354,000 and less than or equal to $424,000	$335.00	$460.70
Greater than $212,000 and less than $500,000	Greater than $424,000 and less than $750,000	$460.60	$586.30
Greater than or equal to $500,000	Greater than or equal to $750,000	$502.40	$628.10

In addition, the monthly premium rates to be paid by (or on behalf of) beneficiaries with full Part B coverage who are married and lived with their spouses at any time during the taxable year, but who file separate tax returns from their spouses, are as follows:

Full Part B Coverage		
Beneficiaries who are married and lived with their spouses at any time during the year, but who file separate tax returns from their spouses, with modified adjusted gross income:	**Income-Related Monthly Adjustment Amount**	**Total Monthly Premium Amount**
Less than or equal to $112,000	$0.00	$209.40
Greater than $112,000 and less than $388,000	$460.60	$670.00
Greater than or equal to $388,000	$502.40	$711.80

The monthly premium rates to be paid by (or on behalf of) beneficiaries with immunosuppressive drug only Part B coverage who are married and lived with their spouses at any time during the taxable year, but who file separate tax returns from their spouses, are as follows:

Part B Immunosuppressive Drug Coverage Only		
Beneficiaries who are married and lived with their spouses at any time during the year, but who file separate tax returns from their spouses, with modified adjusted gross income:	**Income-Related Monthly Adjustment Amount**	**Total Monthly Premium Amount**
Less than or equal to $112,000	$0.00	$125.70
Greater than $112,000 and less than $388,000	$460.60	$586.30
Greater than or equal to $388,000	$502.40	$628.10

The Part B annual deductible for 2027 is $292.00 for all beneficiaries.

TABLE 2: PROJECTION FACTORS[1]
12-MONTH PERIODS ENDING DECEMBER 31 OF 2024–2027 (IN PERCENT)

Calendar Year	Physician Fee Schedule	Durable Medical Equipment	Practitioner Lab[2]	Physician-Administered Drugs	Other Practitioner Services[3]	Outpatient Hospital	Home Health Agency	Hospital Lab[4]	Other Institutional Services[5]	Managed Care
Aged:

Assets less liabilities	$109,354	$116,123	$71,537
Ratio[1]	16.8%	15.9%	8.6%

[1]Ratio of assets less liabilities at the end of the year to the total incurred expenditures during the following year, expressed as a percent.

BILLING CODE 4169–69–C

III. Collection of Information Requirements

This document does not impose information collection requirements—that is, reporting, recordkeeping, or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

IV. Regulatory Impact Analysis

A. Statement of Need

This notice announces the monthly actuarial rates and premium rates, as required by section 1839(a) of the Act, and the annual deductible, as required by section 1833(b) of the Act, for beneficiaries enrolled in Part B of the Medicare Supplementary Medical Insurance (SMI) program beginning January 1, 2027. It also responds to section 1839(a)(1) of the Act, which requires the Secretary to provide for publication of these amounts in the **Federal Register** during the September that precedes the start of each calendar year. As section 1839 of the Act prescribes a detailed methodology for calculating these amounts, we do not have the discretion to adopt an alternative approach on these issues.

B. Overall Impact

We have examined the impacts of this notice as required by Executive Order 12866, ''Regulatory Planning and Review''; Executive Order 13132, ''Federalism'';''; Executive Order 13563, ''Improving Regulation and Regulatory Review''; Executive Order 14192, ''Unleashing Prosperity Through Deregulation''; the Regulatory Flexibility Act (RFA) (Pub. L. 96–354); section 1102(b) of the Social Security Act; section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4); and the Congressional Review Act (5 U.S.C. 804(2)).

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select those regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts.). Section 3(f) of Executive Order 12866 defines a ''significant regulatory action'' as any regulatory action that is likely to result in a rule that may: (1) have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, or the President's priorities.

A regulatory impact analysis (RIA) must be prepared for a regulatory action that is significant under section 3(f)(1) of E.O. 12866.

The 2027 standard Part B premium of $209.40 is $6.50 higher than the 2026 premium of $202.90. We estimate that the total premium increase, for the approximately 66 million Part B enrollees in 2027, will be $5.2 billion. Based on our estimates, OIRA has determined this notice is significant under section 3(f)(1) of E.O. 12866.). Accordingly, we have prepared a Regulatory Impact Analysis that to the best of our ability presents the costs and benefits of the rulemaking. Therefore, OMB has reviewed these proposed regulations. Pursuant to Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (also known as the Congressional Review Act), OIRA has also determined that this notice is a ''major rule'' as defined in 5 U.S.C. 804(2). For the reasons given in section V. of this notice, however, we find for good cause that notice and public procedure are impracticable, unnecessary, and contrary to the public interest and have determined that this policy will take effect on January 1, 2027, pursuant to 5 U.S.C. 808(2).

C. Detailed Economic Analysis

As discussed earlier, this notice announces that the monthly actuarial rates applicable for 2027 are $418.70 for enrollees age 65 and over and $452.40 for disabled enrollees under age 65. It also announces the 2027 monthly Part B premium rates to be paid by (or on behalf of) beneficiaries with full Part B coverage who file either individual tax returns (and are single individuals, heads of households, qualifying widows or widowers with dependent children, or married individuals filing separately

who lived apart from their spouses for the entire taxable year) or joint tax returns.

Full Part B Coverage			
Beneficiaries who file individual tax returns with modified adjusted gross income:	**Beneficiaries who file joint tax returns with modified adjusted gross income:**	**Income-Related Monthly Adjustment Amount**	**Total Monthly Premium Amount**
Less than or equal to $112,000	Less than or equal to $224,000	$0.00	$209.40
Greater than $112,000 and less than or equal to $141,000	Greater than $224,000 and less than or equal to $282,000	$83.70	$293.10
Greater than $141,000 and less than or equal to $177,000	Greater than $282,000 and less than or equal to $354,000	$209.40	$418.80
Greater than $177,000 and less than or equal to $212,000	Greater than $354,000 and less than or equal to $424,000	$335.00	$544.40
Greater than $212,000 and less than $500,000	Greater than $424,000 and less than $750,000	$460.60	$670.00
Greater than or equal to $500,000	Greater than or equal to $750,000	$502.40	$711.80

For beneficiaries with immunosuppressive drug only Part B coverage who file either individual tax returns (and are single individuals, heads of households, qualifying widows or widowers with dependent children, or married individuals filing separately who lived apart from their spouses for the entire taxable year) or joint tax returns, the 2027 Part B monthly premium rates are announced and shown below.

Part B Immunosuppressive Drug Coverage Only			
Beneficiaries who file individual tax returns with modified adjusted gross income:	**Beneficiaries who file joint tax returns with modified adjusted gross income:**	**Income-Related Monthly Adjustment Amount**	**Total Monthly Premium Amount**
Less than or equal to $112,000	Less than or equal to $224,000	$0.00	$125.70
Greater than $112,000 and less than or equal to $141,000	Greater than $224,000 and less than or equal to $282,000	$83.70	$209.40
Greater than $141,000 and less than or equal to $177,000	Greater than $282,000 and less than or equal to $354,000	$209.40	$335.10
Greater than $177,000 and less than or equal to $212,000	Greater than $354,000 and less than or equal to $424,000	$335.00	$460.70
Greater than $212,000 and less than $500,000	Greater than $424,000 and less than $750,000	$460.60	$586.30
Greater than or equal to $500,000	Greater than or equal to $750,000	$502.40	$628.10

In addition, the monthly premium rates to be paid by (or on behalf of) beneficiaries with full Part B coverage who are married and lived with their spouses at any time during the taxable year, but who file separate tax returns from their spouses, are also announced and listed in the following table:

Full Part B Coverage		
Beneficiaries who are married and lived with their spouses at any time during the year, but who file separate tax returns from their spouses, with modified adjusted gross income:	**Income-Related Monthly Adjustment Amount**	**Total Monthly Premium Amount**
Less than or equal to $112,000	$0.00	$209.40
Greater than $112,000 and less than $388,000	$460.60	$670.00
Greater than or equal to $388,000	$502.40	$711.80

The monthly premium rates to be paid by (or on behalf of) beneficiaries with immunosuppressive drug only Part B coverage who are married and lived with their spouses at any time during the taxable year, but who file separate tax returns from their spouses, are announced and listed in the following table:

Part B Immunosuppressive Drug Coverage Only		
Beneficiaries who are married and lived with their spouses at any time during the year, but who file separate tax returns from their spouses, with modified adjusted gross income:	**Income-Related Monthly Adjustment Amount**	**Total Monthly Premium Amount**
Less than or equal to $112,000	$0.00	$125.70
Greater than $112,000 and less than $388,000	$460.60	$586.30
Greater than or equal to $388,000	$502.40	$628.10

D. Accounting Statement and Table

As required by OMB Circular A–4 (available at *https://www.whitehouse.gov/omb/information-resources/guidance/circulars/*), in Table 6 we have prepared an accounting statement.

TABLE 6: ACCOUNTING STATEMENT: THE ESTIMATED AGGREGATE PART B PREMIUM INCREASE FOR ALL ENROLLEES FOR 2027

Category	
Annualized Monetized Transfers	$5.2 billion
From Whom to Whom?	Beneficiaries to Federal Government

E. Regulatory Flexibility Act (RFA)

The RFA requires agencies to analyze options for regulatory relief of small businesses, if a rule or other regulatory document has a significant impact on a substantial number of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Individuals and States are not included in the definition of a small entity. This notice announces the monthly actuarial rates for aged (age 65 and over) and disabled (under age 65) beneficiaries enrolled in Part B of the Medicare SMI program beginning January 1, 2027. Also, this notice announces the monthly premium for aged and disabled beneficiaries as well as the income-related monthly adjustment amounts to be paid by beneficiaries with modified adjusted gross income above certain threshold amounts. As a result, we are not preparing an analysis for the RFA because the Secretary has determined that this notice will not have a significant economic impact on a substantial number of small entities.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis if a rule or other regulatory document may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 100 beds. As we discussed previously, we are not preparing an analysis for section 1102(b) of the Act because the Secretary has determined that this notice will not have a significant effect on a substantial number of small rural hospitals.

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. In 2026, that threshold is approximately $193 million. Part B enrollees who are also enrolled in Medicaid have their monthly Part B premiums paid by Medicaid. The cost to each State Medicaid program from the 2027 premium increase is estimated to be more than the threshold. This notice does not impose mandates that will have a consequential effect of the threshold amount or more on State, local, or tribal governments or on the private sector.

Executive Order 13132 establishes certain requirements that an agency must meet when it publishes a proposed rule or other regulatory document (and subsequent final rule or other regulatory document) that imposes substantial direct compliance costs on State and local governments, preempts State law, or otherwise has Federalism implications. We have determined that this notice does not significantly affect the rights, roles, and responsibilities of States. Accordingly, the requirements of Executive Order 13132 do not apply to this notice.

V. Waiver of Proposed Rulemaking

We ordinarily publish a notice of proposed rulemaking in the **Federal Register** and invite public comment prior to a rule taking effect in accordance with section 1871 of the Act. Section 1871(a)(2) of the Act provides that no rule, requirement, or other statement of policy (other than a national coverage determination) that establishes or changes a substantive legal standard governing the scope of benefits, the payment for services, or the eligibility of individuals, entities, or organizations to furnish or receive services or benefits under Medicare shall take effect unless it is promulgated through notice and comment rulemaking. Unless there is a statutory exception, section 1871(b)(1) of the Act generally requires the Secretary of the Department of Health and Human Services (the Secretary) to provide for notice of a proposed rule in the **Federal Register** and provide a period of not less than 60 days for public comment before establishing or changing a substantive legal standard regarding the matters enumerated by the statute. Section 1871(b)(2)(C) of the Act provides exceptions from the notice and 60-day comment period, under the good cause standard set forth in 5 U.S.C. 553(b)(B). Section 553(b)(B) expressly authorizes an agency to dispense with notice and comment rulemaking for good cause if the agency makes a finding that notice and comment procedures are impracticable, unnecessary, or contrary to the public interest.

The annual updated amounts for the Part B monthly actuarial rates for aged and disabled beneficiaries, the Part B premium, and the Part B deductible set forth in this notice do not establish or change a substantive legal standard regarding the matters enumerated by the statute or constitute a substantive rule that would be subject to the notice requirements in section 1871(b) of the Act. However, to the extent that an opportunity for public notice and comment could be construed as required for this notice, we find good cause to waive this requirement.

Section 1839 of the Act requires the Secretary to determine the monthly actuarial rates for aged and disabled beneficiaries, as well as the monthly Part B premium (including the income-related monthly adjustment amounts to be paid by beneficiaries with modified adjusted gross income above certain threshold amounts), for each calendar year in accordance with the statutory formulae, in September preceding the year to which they will apply. Further, the statute requires that the agency promulgate the Part B premium amount, in September preceding the year to which it will apply, and include a public statement setting forth the actuarial assumptions and bases employed by the Secretary in arriving at the amount of an adequate actuarial rate for enrollees age 65 and older. We include the Part B annual deductible, which is established in accordance with a specific formula described in section 1833(b) of the Act, because the determination of the amount is directly linked to the rate of increase in actuarial rate under section 1839(a)(1) of the Act. We have calculated the monthly actuarial rates for aged and disabled beneficiaries, the Part B deductible, and the monthly Part B premium as directed by the statute; since the statute establishes both when the monthly

actuarial rates for aged and disabled beneficiaries and the monthly Part B premium must be published and what information must be factored into those amounts by the Secretary, we do not have any discretion in that regard. We find notice and comment procedures to be unnecessary for this notice, and we find good cause to waive such procedures under section 553(b)(B) and section 1871(b)(2)(C) of the Act, if such procedures may be construed to be required at all. Through this notice, we are simply notifying the public of the updates to the monthly actuarial rates for aged and disabled beneficiaries and the Part B deductible, as well as the monthly Part B premium amounts and the income-related monthly adjustment amounts to be paid by certain beneficiaries, in accordance with the statute, for CY 2027.

Dr. Mehmet Oz, Administrator of the Centers for Medicare & Medicaid Services, approved this document on November 16, 2026.

Robert F. Kennedy, Jr.,

Secretary, Department of Health and Human Services.

RIN 0938–AV84

Medicare Program; CY 2027 Inpatient Hospital Deductible and Hospital and Extended Care Services Coinsurance Amounts

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: This notice announces the inpatient hospital deductible and the hospital and extended care services coinsurance amounts for services furnished in calendar year (CY) 2027 under Medicare's Hospital Insurance Program (Medicare Part A). The Medicare statute specifies the formulae used to determine these amounts. For CY 2027, the inpatient hospital deductible will be $1,776. The daily coinsurance amounts for CY 2027 will be as follows: $444 for the 61st through 90th day of hospitalization in a benefit period; $888 for lifetime reserve days; and $222 for the 21st through 100th day of extended care services in a skilled nursing facility in a benefit period.

DATES: The deductible and coinsurance amounts announced in this notice are effective on January 1, 2027.

FOR FURTHER INFORMATION CONTACT: Suzanne Codespote, (410) 786–7737 or Yaminee Thaker (410) 786–7921.

SUPPLEMENTARY INFORMATION:

I. Background

Section 1813 of the Social Security Act (the Act) provides for an inpatient hospital deductible to be subtracted from the amount payable by Medicare for inpatient hospital services furnished to a beneficiary. It also provides for certain coinsurance amounts to be subtracted from the amounts payable by Medicare for inpatient hospital and extended care services. Section 1813(b)(2) of the Act requires the Secretary of the Department of Health and Human Services (the Secretary) to determine and publish each year the amount of the inpatient hospital deductible and the hospital and extended care services coinsurance amounts applicable for services furnished in the following calendar year (CY).

II. Computing the Inpatient Hospital Deductible for CY 2027

Section 1813(b) of the Act prescribes the method for computing the amount of the inpatient hospital deductible. The inpatient hospital deductible is an amount equal to the inpatient hospital deductible for the preceding CY, adjusted by the Secretary's best estimate of the payment-weighted average of the applicable percentage increases (as defined in section 1886(b)(3)(B) of the Act) used for updating the payment rates to hospitals for discharges in the fiscal year (FY) that begins on October 1 of the same preceding CY, and adjusted to reflect changes in real casemix. The adjustment to reflect real casemix is determined on the basis of the most recent case-mix data available. The amount determined under this formula is rounded to the nearest multiple of $4 (or, if midway between two multiples of $4, to the next higher multiple of $4).

Under section 1886(b)(3)(B)(i)(XX) of the Act, the percentage increase used to update the payment rates for FY 2027 for hospitals paid under the inpatient prospective payment system (IPPS) is the IPPS operating market basket percentage increase, otherwise known as the IPPS market basket update, reduced by an adjustment based on changes in the economy-wide productivity (productivity adjustment) (see section 1886(b)(3)(B)(xi)(II) of the Act). Under section 1886(b)(3)(B)(viii) of the Act, for FY 2027, the applicable percentage increase for hospitals that do not submit quality data as specified by the Secretary is reduced by one quarter of the market basket update. We are estimating that after accounting for those hospitals receiving the lower market basket update in the payment-weighted average update, the calculated deductible will not be affected, since the majority of hospitals submit quality data and receive the full market basket update. Section 1886(b)(3)(B)(ix) of the Act requires that any hospital that is not a meaningful electronic health record (EHR) user (as defined in section 1886(n)(3) of the Act) will have three-quarters of the market basket update reduced by 100 percent for FY 2017 and each subsequent FY. We are estimating that after accounting for these hospitals receiving the lower market basket update, the calculated deductible will not be affected, since the majority of hospitals are meaningful EHR users and are expected to receive the full market basket update.

Under section 1886 of the Act, the percentage increase used to update the payment rates (or target amounts, as applicable) for FY 2027 for hospitals excluded from the inpatient prospective payment system is as follows:

- The percentage increase for long term care hospitals (LTCH) is the LTCH market basket percentage increase reduced by the productivity adjustment (see section 1886(m)(3)(A) of the Act). In addition, these hospitals may also be impacted by the quality reporting adjustments and the site-neutral payment rates (see section 1886(m)(5) and (6) of the Act).
- The percentage increase for inpatient rehabilitation facilities (IRF) is the IRF market basket percentage increase reduced by the productivity adjustment in accordance with section 1886(j)(3)(C)(ii)(I) of the Act. In addition, these hospitals may also be impacted by the quality reporting adjustments (see section 1886(j)(7) of the Act).
- The percentage increase used to update the payment rate for inpatient psychiatric facilities (IPF) is the IPF market basket percentage increase reduced by the productivity adjustment (see section 1886(s)(2)(A)(i) of the Act). In addition, these hospitals may also be impacted by the quality reporting adjustments (see section 1886(s)(4) of the Act).
- The percentage increase used to update the target amounts for other types of hospitals that are excluded from the inpatient prospective payment system and that are paid on a reasonable cost basis, subject to a rate-of-increase

ceiling, is the IPPS operating market basket percentage increase, which is described at section 1886(b)(3)(B)(ii)(VIII) of the Act and 42 CFR 413.40(c)(3). These other types of hospitals include cancer hospitals, children's hospitals, extended neoplastic disease care hospitals, and hospitals located outside the 50 States, the District of Columbia, and Puerto Rico.

The IPPS operating market basket percentage increase for FY 2027 is 3.2 percent and the productivity adjustment is 0.9 percentage point, as announced in the final rule that appeared in the **Federal Register** on August 4, 2026 entitled, ''Medicare Program; Hospital Inpatient Prospective Payment Systems for Acute Care Hospitals (IPPS) and the Long-Term Care Hospital Prospective Payment System and Policy Changes and Fiscal Year (FY) 2027 Rates; Requirements for Quality Programs; Other Policy Changes; and Adoption of Updated Versions of Certain Health Information Technology Standards'' (91 FR 49570). Therefore, the percentage increase for hospitals paid under the inpatient prospective payment system that submit quality data and are meaningful EHR users is 2.3 percent (that is, the FY 2027 IPPS operating market basket update of 3.2 percent less the productivity adjustment of 0.9 percentage point). The average payment percentage increase for hospitals excluded from the inpatient prospective payment system is 2.48 percent. This average includes long term care hospitals, inpatient rehabilitation facilities, inpatient psychiatric facilities and other hospitals excluded from the inpatient prospective payment system. Weighting these percentages in accordance with payment volume, our best estimate of the payment-weighted average of the increases in the payment rates for FY 2027 is 2.32 percent.

To develop the adjustment to reflect changes in real casemix, we first calculated an average casemix for each hospital that reflects the relative costliness of that hospital's mix of cases compared to those of other hospitals. We then computed the change in average casemix for hospitals paid under the Medicare inpatient prospective payment system in FY 2026 compared to FY 2025. (We excluded from this calculation hospitals whose payments are not based on the inpatient prospective payment system because their payments are based on alternate prospective payment systems or reasonable costs.) We used Medicare bills from prospective payment hospitals that we received as of July 2026. These bills represent a total of about 5.6 million Medicare discharges for FY 2026 and provide the most recent case-mix-data available at this time. Based on these bills, the change in average casemix in FY 2026 is −0.2 percent. Based on these bills and past experience, we expect the overall FY 2026 casemix change to be −0.1 percent as the year progresses and more FY 2026 data become available.

Section 1813(b) of the Act requires that the inpatient hospital deductible be adjusted only by that portion of the case mix change that is determined to be real. Real casemix is that portion of casemix that is due to changes in the mix of cases and not due to coding optimization. We are assuming that this increase in casemix is real and not a result of coding optimization.

Thus, the estimate of the payment-weighted average of the applicable percentage increases used for updating the payment rates is 2.32 percent, and the real case-mix adjustment factor for the deductible is −0.1 percent. Therefore, using the statutory formula as stated in section 1813(b) of the Act, we calculate the inpatient hospital deductible for services furnished in CY 2027 to be $1,776. This deductible amount is determined by multiplying $1,736 (the inpatient hospital deductible for CY 2026) by the payment-weighted average increase in the payment rates of 1.0232 multiplied by the increase in real casemix of 0.999, which equals $1,774.50 and is rounded to $1,776 (based on rounding to the nearest multiple of 4).

III. Computing the Inpatient Hospital and Extended Care Services Coinsurance Amounts for CY 2027

The coinsurance amounts provided for in section 1813 of the Act are defined as fixed percentages of the inpatient hospital deductible for services furnished in the same CY. The increase in the deductible generates increases in the coinsurance amounts. For inpatient hospital and extended care services furnished in CY 2027, in accordance with the fixed percentages defined in the law, the daily coinsurance for the 61st through 90th day of hospitalization in a benefit period will be $444 (one-fourth of the inpatient hospital deductible as stated in section 1813(a)(1)(A) of the Act); the daily coinsurance for lifetime reserve days will be $888 (one-half of the inpatient hospital deductible as stated in section 1813(a)(1)(B) of the Act); and the daily coinsurance for the 21st through 100th day of extended care services in a skilled nursing facility (SNF) in a benefit period will be $222 (one-eighth of the inpatient hospital deductible as stated in section 1813(a)(3) of the Act).

IV. Cost to Medicare Beneficiaries

Table 1 summarizes the deductible and coinsurance amounts for CYs 2026 and 2027, as well as the number of each that is estimated to be paid.

TABLE 1—MEDICARE PART A DEDUCTIBLE AND COINSURANCE AMOUNTS FOR CYS 2026 AND 2027

Type of cost sharing	Value		Number paid (in millions)	
	2026	2027	2026	2027
Inpatient hospital deductible	$1,736	$1,776	5.59	5.68
Daily coinsurance for 61st—90th day	434	444	1.30	1.32
Daily coinsurance for lifetime reserve days	868	888	0.65	0.66
SNF coinsurance	217.00	222.00	26.56	27.50

The estimated total increase in costs to beneficiaries is about $770 million (rounded to the nearest $10 million) due to: (1) the increase in the deductible and coinsurance amounts; and (2) the change in the number of deductibles and daily coinsurance amounts paid. We determine the increase in cost to beneficiaries by calculating the difference between the 2026 and 2027 deductible and coinsurance amounts multiplied by the estimated change in the number of deductible and coinsurance amounts paid.

V. Waiver of Proposed Rulemaking

We ordinarily publish a notice of proposed rulemaking in the **Federal Register** and invite public comment

prior to a rule taking effect in accordance with section 1871 of the Act. Section 1871(a)(2) of the Act provides that no rule, requirement, or other statement of policy (other than a national coverage determination) that establishes or changes a substantive legal standard governing the scope of benefits, the payment for services, or the eligibility of individuals, entities, or organizations to furnish or receive services or benefits under Medicare shall take effect unless it is promulgated through notice and comment rulemaking. Unless there is a statutory exception, section 1871(b)(1) of the Act generally requires the Secretary to provide for notice of a proposed rule in the **Federal Register** and provide a period of not less than 60 days for public comment before establishing or changing a substantive legal standard regarding the matters enumerated by the statute. Section 1871(b)(2)(C) of the Act provides exceptions from the notice and 60-day comment period, under the good cause standard set forth in 5 U.S.C. 553(b)(B). Section 553(b)(B) authorizes an agency to dispense with notice and comment rulemaking for good cause if the agency makes a finding that notice and comment procedures are impracticable, unnecessary, or contrary to the public interest.

The annual inpatient hospital deductible and the hospital and extended care services coinsurance amounts announcement set forth in this notice does not establish or change a substantive legal standard regarding the matters enumerated by the statute or constitute a substantive rule which would be subject to the notice requirements in section 1871(b) of the Act. However, to the extent that an opportunity for public notice and comment could be construed as required for this notice, we find good cause to waive this requirement.

Section 1813(b)(2) of the Act requires publication of the inpatient hospital deductible and the hospital and extended care services coinsurance amounts between September 1 and September 15 of the year preceding the year to which they will apply. Further, the statute requires that the agency determine and publish the inpatient hospital deductible and hospital and extended care services coinsurance amounts for each CY in accordance with the statutory formulae, and we are simply notifying the public of the changes to the deductible and coinsurance amounts for CY 2027. We have calculated the inpatient hospital deductible and hospital and extended care services coinsurance amounts as directed by the statute; the statute establishes both when the deductible and coinsurance amounts must be published and the information that the Secretary must factor into the deductible and coinsurance amounts, so we do not have any discretion in that regard. We find notice and comment procedures to be unnecessary for this notice, and we find good cause to waive such procedures under section 553(b)(B) and section 1871(b)(2)(C) of the Act, if such procedures may be construed to be required at all. Through this notice, we are simply notifying the public of the updates to the inpatient hospital deductible and the hospital and extended care services coinsurance amounts, in accordance with the statute, for CY 2027.

VI. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

VII. Regulatory Impact Analysis

We have prepared this Regulatory Impact Analysis (RIA) section in the interest of ensuring that the impacts of this notice are fully understood.

A. Statement of Need

This notice announces the Medicare Part A inpatient hospital deductible and associated coinsurance amounts for hospital and extended care services applicable for care provided in CY 2027, as required by section 1813 of the Act. It also responds to section 1813(b)(2) of the Act, which requires the Secretary to provide for publication of these amounts in the **Federal Register** between September 1 and September 15 of the year preceding the year to which they will apply. As this statutory provision prescribes a detailed methodology for calculating these amounts, we do not have the discretion to adopt an alternative approach to these issues.

B. Overall Impact

We have examined the impacts of this notice as required by Executive Order 12866, ''Regulatory Planning and Review''; Executive Order 13132, ''Federalism''; Executive Order 13563, ''Improving Regulation and Regulatory Review''; Executive Order 14192, ''Unleashing Prosperity Through Deregulation''; the Regulatory Flexibility Act (RFA) (Pub. L. 96–354); section 1102(b) of the Social Security Act; section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4); and the Congressional Review Act (5 U.S.C. 804(2)).

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select those regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts). Section 3(f) of Executive Order 12866 defines a ''significant regulatory action'' as any regulatory action that is likely to result in a rule that may: (1) have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, or the President's priorities.

A regulatory impact analysis (RIA) must be prepared for a regulatory action that is significant under section 3(f)(1) of E.O. 12866. As stated in section IV. of this notice, we estimate that the total increase in costs to beneficiaries is about $770 million due to: (1) the increase in the deductible and coinsurance amounts; and (2) the change in the number of deductibles and daily coinsurance amounts paid. Based on our estimates, OIRA has determined this notice is significant under section 3(f)(1). Accordingly, we have prepared an RIA that to the best of our ability presents the costs and benefits of this notice.

In accordance with subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (also known as the Congressional Review Act), OIRA has determined that this notice meets the criteria set forth in 5 U.S.C. 804(2). For the reasons given, however, we find for good cause that notice and public procedure are impracticable, unnecessary, and contrary to the public interest and have determined that this policy will take effect on January 1, 2027, pursuant to 5 U.S.C. 808(2).

C. Accounting Statement and Table

As required by OMB Circular A–4 (available at *https://www.whitehouse.gov/wp-content/*

uploads/2025/08/CircularA-4.pdf), in Table 2, we have prepared an accounting statement showing the estimated total increase in costs to beneficiaries of about $770 million. As stated in section IV. of this notice, we determined the increase in cost to beneficiaries by calculating the difference between the 2026 and 2027 deductible and coinsurance amounts multiplied by the estimated change in the number of deductible and coinsurance amounts paid.

TABLE 2—ESTIMATED TRANSFERS FOR CY 2027 DEDUCTIBLE AND COINSURANCE AMOUNTS

Category	Transfers	Period covered
Annualized Monetized Transfers	$770 million	2027
From Whom to Whom	Beneficiaries to Providers	

D. Regulatory Flexibility Act

The RFA requires agencies to analyze options for regulatory relief of small entities, if a rule has a significant impact on a substantial number of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Most hospitals and most other providers and suppliers are small entities, either by being nonprofit organizations or by meeting the Small Business Administration's definition of a small business (having revenues of less than $9.0 million to $47.0 million in any 1 year). Individuals and States are not included in the definition of a small entity. This annual notice announces the Medicare Part A deductible and coinsurance amounts for CY 2027 and will have an impact on the Medicare beneficiaries. As a result, we are not preparing an analysis for the RFA because the Secretary has certified that this notice will not have a significant economic impact on a substantial number of small entities.

In addition, section 1102(b) of the Act requires us to prepare an RIA if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a metropolitan statistical area and has fewer than 100 beds. This annual notice announces the Medicare Part A deductible and coinsurance amounts for CY 2027 and will have an impact on certain Medicare beneficiaries, but not on small entities as defined by the SBA. As a result, we are not preparing an analysis for section 1102(b) of the Act because the Secretary has certified that this notice will not have a significant impact on the operations of a substantial number of small rural hospitals.

E. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. In 2026, that threshold is approximately $193 million. This notice would not impose a mandate that will result in the expenditure by State, local, and Tribal Governments, in the aggregate, or by the private sector, of more than $193 million in any 1 year.

F. Federalism

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. This notice will not have a substantial direct effect on State or local governments, preempt State law, or otherwise have Federalism implications.

G. Congressional Review

This notice is subject to the Congressional Review Act and has been transmitted to the Congress and the Government Accountability Office's Comptroller General for review.

Mehmet Oz, Administrator of the Centers for Medicare & Medicaid Services, approved this document on November 16, 2026.

Robert F. Kennedy, Jr.,

Secretary, Department of Health and Human Services.

Food and Drug Administration

[Docket No. FDA–2026–N–3532]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Good Laboratory Practice Requirements for Nonclinical Laboratory Studies

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Submit written comments (including recommendations) on the collection of information by December 21, 2026.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be submitted to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function. The OMB control number for this information collection is 0910–0119. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Kelly Covington, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 240–402–5661, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed

collection of information to OMB for review and clearance.

Good Laboratory Practice Requirements for Nonclinical Laboratory Studies

OMB Control Number 0910–0119—Extension

Sections 409, 505, 512, and 515 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348, 355, 360b, and 360e) and related statutes require manufacturers of food additives, human drugs and biological products, animal drugs, and medical devices to demonstrate the safety and utility of their product by submitting applications to FDA for research or marketing permits. Such applications contain, among other important items, full reports of all studies done to demonstrate product safety in man and/or other animals. In order to ensure adequate quality control for these studies and to provide an adequate degree of consumer protection, the Agency issued good laboratory practice (GLP) regulations for nonclinical laboratory studies in part 58 (21 CFR part 58). The regulations specify minimum standards for the proper conduct of safety testing and contain sections on facilities, personnel, equipment, standard operating procedures (SOPs), test and control articles, quality assurance, protocol and conduct of a safety study, records and reports, and laboratory disqualification, and include information collection provisions.

Part 58 requires testing facilities engaged in conducting toxicological studies to retain, and make available to regulatory officials, records regarding compliance with GLPs. Records are maintained on file at each testing facility and examined there periodically by FDA inspectors. The GLP regulations require that, for each nonclinical laboratory study, a final report be prepared that documents the results of quality assurance unit inspections, test and control article characterization, testing of mixtures of test and control articles with carriers, and an overall interpretation of nonclinical laboratory studies. The GLP regulations also require written records pertaining to: (1) personnel job descriptions and summaries of training and experience; (2) master schedules, protocols and amendments thereto, inspection reports, and SOPs; (3) equipment inspection, maintenance, calibration, and testing records; (4) documentation of feed and water analyses and animal treatments; (5) test article accountability records; and (6) study documentation and raw data.

Description of Respondents: Respondents to the collection of information are sponsors of nonclinical laboratory studies that support or are intended to support applications for research or marketing permits for products regulated by FDA.

In the **Federal Register** of April 30, 2026 (91 FR 23273), FDA published a 60-day notice requesting public comment on the proposed collection of information. Two comments were received; however, they did not respond to the questions posed in 5 CFR 1320.8(d).

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

21 CFR part	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
58.35(b)(7); Quality assurance unit	300	60.25	18,075	1	18,075
58.185; Reporting of nonclinical laboratory study results	300	60.25	18,075	27.65	499,774
Total					517,849

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

TABLE 2—ESTIMATED ANNUAL RECORDKEEPING BURDEN [1]

21 CFR Part	Number of recordkeepers	Number of records per recordkeeper	Total annual records	Average burden per recordkeeping	Total hours
58.29(b); Personnel	300	20	6,000	.21 (13 mins.)	1,260
58.35(b)(1)–(6), and (c); Quality assurance unit	300	270.76	81,228	3.36	272,926
58.63(b) and (c); Maintenance and calibration of equipment.	300	60	18,000	.09 (5 mins.)	1,620
58.81(a)–(c); SOPs	300	301.80	90,540	.14 (8 mins.)	12,676
58.90(c) and (g); Animal care	300	62.70	18,810	.13 (8 mins.)	2,445
58.105(a) and (b); Test and control article characterization.	300	5	1,500	11.8	17,700
58.107(d); Test and control article handling	300	1	300	4.25	1,275

Food and Drug Administration

[Docket No. FDA–2026–N–3070]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; National Youth Tobacco Survey

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Submit written comments (including recommendations) on the collection of information by December 21, 2026.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be submitted to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function. The OMB control number for this information collection is 0910–0932. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Amber Barrett, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–8867, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

National Youth Tobacco Survey 2027–2029

OMB Control Number 0910–0932—Revision

This information collection supports the development and implementation of the National Youth Tobacco Survey (NYTS), which is a key component of FDA's youth tobacco surveillance. By providing national estimates of youth tobacco use, the NYTS directly contributes to FDA's ability to effectively regulate tobacco use and prevent youth access to tobacco products in the United States. FDA's Center for Tobacco Products (CTP) was created to carry out the authorities granted under the Family Smoking Prevention and Tobacco Control Act (Tobacco Control Act) (Pub. L. 111–31) to educate the public about the dangers of tobacco use and to serve as a public health resource for tobacco and health information. CTP's tobacco surveillance research, including the NYTS, directly contributes to advancing the goals of Executive Order 14212: Establishing the President's Make America Healthy Again Commission, including the Make Our Children Healthy Again assessment, in three ways. First, the NYTS helps FDA CTP evaluate the effect of policies and regulations on efforts to reduce tobacco use, the leading cause of chronic disease and mortality in the United States. Second, the NYTS protects the health of children by influencing policies, regulatory action, public education campaigns, and compliance and enforcement efforts designed to decrease the likelihood of youth tobacco initiation and reduce youth tobacco use. Third, the NYTS gathers information about youth tobacco use by means of rigorous scientific methods.

The NYTS has been conducted since 1999 and serves as the gold-standard source of nationally representative estimates of youth tobacco use in the United States. In 2025, FDA assumed leadership of the NYTS from the Centers for Disease Control and Prevention (CDC). The collection was previously approved under OMB Control No. 0920–0621. The NYTS supports FDA's CTP in its efforts to reduce tobacco related disease and protect the health of children.

The survey will be conducted among a nationally representative sample of students attending public and private schools in grades 6–12. The survey will be digital, web-based, anonymous, self-administered, and will be taken on school or personal computers, tablets, or mobile devices. Information supporting the NYTS also will be collected from state-, district-, and school-level administrators and teachers. Information collected through the NYTS will be used to identify trends in youth tobacco use over time, and to inform the development of public education campaigns, policies and rules, and compliance and enforcement programs for tobacco products.

The survey will examine the following topics: use of e-cigarettes, cigarettes, cigars, smokeless tobacco (chewing tobacco, snuff, dip), hookahs, pipes, snus, nicotine pouches, other oral nicotine products, bidis, heated tobacco products, and roll-your-own cigarettes; knowledge and attitudes; media and advertising; access to tobacco products and enforcement of restrictions on access; secondhand smoke and e-cigarette aerosol exposure, and cessation.

In the **Federal Register** of May 4, 2026 (91 FR 23995), FDA published a 60-day notice requesting public comments on the proposed collection of information. Eight comments were responsive to the Paperwork Reduction Act (PRA) information collection topics solicited.

(Comment) Seven commenters expressed support for the continuation of the NYTS, with several describing it as the ''gold-standard'' and only nationally representative, school-based survey focused exclusively on youth tobacco use. Commenters emphasized the survey's value in tracking product trends, identifying emerging tobacco products, informing regulatory and enforcement actions, and supporting public health programs at the federal, state, and local levels. The State Attorneys General specifically endorsed the proposed sample size increase to maintain statistical rigor in light of declining school-based response rates.

(FDA response) FDA acknowledges and appreciates the strong support for NYTS continuation expressed across all comments. The NYTS has been administered since 1999 and has served as an essential surveillance tool for identifying trends in youth tobacco and nicotine product use, informing regulatory action, guiding public health programs, and supporting enforcement at the federal and state levels. FDA remains committed to the annual administration of the NYTS and to maintaining the scientific rigor necessary for the data to serve these functions.

(Comment) One commenter expressed support for the continuation of the NYTS and urged FDA to publish the 2025 NYTS analysis and results consistent with prior years, noting that the release of raw data without an accompanying analysis limits the

accessibility and utility of the data for clinicians, public health practitioners, and policy makers. The commenter also made recommendations regarding FDA's review of premarket tobacco applications for flavored electronic nicotine delivery systems.

(FDA response) FDA appreciates the commenter's support for the NYTS and acknowledges the concern regarding the timely publication of analysis and results. FDA is committed to ensuring that NYTS findings are made publicly available in a timely manner. To comply with Executive Order 14303, titled ''Restoring Gold Standard Science,'' FDA plans to simultaneously release the public use dataset to coincide with the first publication for a given year of the NYTS. The commenter's recommendations regarding premarket tobacco product applications are outside the scope of this information collection request and will not be addressed here.

(Comment) One comment raised methodological concerns regarding declining school-based response rates, which fell from 77.2% in 2019 to 36.0% in 2025. This decline was attributed in part to the proliferation of state laws requiring active parental consent for youth surveys and expressed concern about potential nonresponse bias and diminished representativeness of recent NYTS estimates. The commenter recommended FDA: (1) conduct and publish an updated nonresponse bias analysis; (2) explore passive (opt-out) parental consent procedures where permissible; (3) evaluate alternative or complementary sampling approaches, such as address-based sampling; (4) enhance transparency around methodology changes and data limitations; and (5) support triangulation with other national and subnational data sources to validate findings.

(FDA response) FDA shares the concern about declining response rates and recognizes that this trend may have meaningful implications for the representativeness and comparability of NYTS data. The proposed increase in the total numbers of schools and students sampled for 2027–2029 reflects FDA's effort to accommodate declining response rates in school-based surveys and continue producing nationally representative data. Responses to each recommendation are as follows:

(1) *Nonresponse bias analysis:* FDA conducts a nonresponse bias analysis each year in accordance with OMB requirements. While the full nonresponse bias report is not made publicly available due to concerns about the potential disclosure of school-level information that could compromise respondent confidentiality, the publicly available methodology report provides a detailed description of the development of nonresponse bias-adjusted weights and calibration procedures. Additionally, a recently published paper reported findings from a nonresponse bias analysis assessing the impact of early termination of the 2025 NYTS data collection (Park-Lee et al., 2026).

(2) *Passive parental consent:* NYTS already employs passive parental consent as its default procedure. Unless a school requires active parental permission, NYTS follows passive parental consent procedures. Based on recent NYTS data collection cycles, approximately 10% of respondents are estimated to require active parental consent. FDA will continue to monitor developments in state-level consent requirements and their potential effects on survey participation and representativeness.

(3) *Alternative or complementary sampling:* Meaningful changes to the NYTS sampling design would need to be evaluated carefully against potential impacts on data comparability, the financial and logistical resources required, and the ability to maintain the precision of national estimates and estimates of population groups. FDA will consider assessing the feasibility of alternative or complementary sampling strategies, including address-based sampling (ABS).

(4) *Transparency around methodology and data limitations:* FDA remains committed to transparency regarding methodological changes and data limitations. The annual methodology report published with the public-use files provides clear guidance on the appropriate interpretation of NYTS data, including the implications of weighting adjustments and changes in sampling procedures.

(5) *Triangulation with other data sources:* As part of its nonresponse bias analysis and dissemination efforts, FDA triangulates with other national and subnational data sources to validate and contextualize estimates. These include both school-based and household surveys, including the Youth Risk Behavior Survey (YRBS), Monitoring the Future (MTF), the Population Assessment of Tobacco and Health (PATH) Study, and the National Survey on Drug Use and Health (NSDUH). Continued cross-survey triangulation enables FDA to identify potential nonresponse bias and assess consistency of trend estimates.

(Comment) Another comment suggests FDA to: (1) include brand-specific product images alongside brand-name response options for e-cigarette use questions, citing published studies and original analyses of NYTS 2024–2025 data demonstrating substantial discordance between self-reported brand use and reported device type and flavor; and (2) reinstate the 2024 NYTS follow-up question on the age of social sources of e-cigarettes, which was removed from the 2025 survey, to help assess the potential impact of device-access restrictions.

(FDA response) FDA appreciates the recommendations regarding the visual presentation of product options and the reinstatement of a follow-up question on social sources of e-cigarettes.

(1) *Brand-specific product images:* FDA acknowledges the evidence of discordance between self-reported brand use and reported device type and flavor. However, NYTS includes selected non-branded product images because a brand encompasses a wide variety of products, and it is not feasible to include every product available on the market. Non-branded images representing commonly recognizable device types are intended to aid respondent comprehension of the product category, and respondent burden is considered when evaluating expansions to the image set.

(2) *Reinstatement of the follow-up question on age of social sources:* Question-level decisions reflect careful consideration of scientific priority, policy relevance, and respondent burden. FDA will consider the recommendation as part of its ongoing review of the NYTS questionnaire for future data collection cycles.

(Comment) One commenter expressed support for the continuation of the NYTS and raised concerns about the timeliness and transparency of the NYTS data dissemination, recommending that FDA publish a prospective calendar of NYTS milestones, including questionnaire availability, fielding periods, data release dates, and report publication timelines, and that datasets be released concurrently with initial findings rather than in a piecemeal fashion. With respect to survey content, it was recommended that FDA incorporate emerging product categories and brands as response options more quickly and increase stakeholder engagement to inform timely survey updates; consider a supplemental fall NYTS to provide more frequent trend monitoring; add consumption frequency and initiation questions across all product categories; expand reasons-for-use questions to cover heated tobacco products, nicotine pouches, and oral nicotine products; and refine access source measures to

better distinguish between commercial and social sources of tobacco products.

(FDA response) Regarding the timeliness of survey results and data dissemination, there are several factors that affect how quickly analysis results are released, including the peer-review process for publications and several levels of internal and external review. Because publication schedules and timelines vary across products we cannot always predict publication dates in advance. To comply with Executive Order 14303, titled 'Restoring Gold Standard Science,' FDA plans to simultaneously release public-use datasets to coincide with the first publication for a given year of the NYTS. FDA will also explore opportunities to improve transparency around the NYTS process and timeline to the extent practicable. Additionally, as part of the PRA review process, the proposed survey instrument is made publicly available in the docket, allowing the public to view the instrument. A copy of the questionnaire is also included with the release of the public-use dataset and its accompanying documentation, providing further transparency and access for researchers and other data users. With respect to incorporating emerging product categories, NYTS is a federal survey subject to the Paperwork Reduction Act and regulated by OMB. Thus, NYTS is not designed as a rapid surveillance tool with the opportunity to add new items quickly in response to emerging products. FDA conducts environmental scans using a variety of sources to predict potential items to add or remove in advance of seeking OMB approval and consults with subject matter experts and stakeholders. Regarding the recommendation for a supplemental fall NYTS, any meaningful change to the frequency or structure of NYTS data collection would require additional OMB approval and careful evaluation of associated burden and resource implications. Within these constraints, FDA will take the commenter's survey content recommendations under consideration for future data collection cycles.

(Comment) One commenter recommends that FDA add a standalone NYTS measure for ''premium cigars'' as a distinct product category, using the definition codified at 21 CFR 1107.12, accompanied by plain-language descriptors and respondent clarifications to help youth distinguish premium cigars from cigarillos, filtered cigars, flavored cigars, and other mass-market cigar products. The commenter argues that the current aggregation of premium cigars with other cigar product types is inconsistent with FDA's own regulatory treatment of premium cigars and produces data of insufficient utility for FDA's current regulatory functions.

(FDA response) FDA appreciates the commenter's recommendation and acknowledges that premium cigars are treated as a distinct product category under 21 CFR 1107.12. However, FDA does not believe it is appropriate or feasible to incorporate this regulatory definition into the NYTS instrument. The definition requires that a product satisfy eight specific technical criteria. Even with plain-language descriptors and clarifications, it is unlikely that youth could reliably identify whether a product they used meets this definition, introducing significant measurement error. The explanatory text necessary to operationalize this definition for youth would also substantially increase respondent burden. Additionally, available evidence suggests that premium cigars, as defined under 21 CFR 1107.12, represent a small share of cigar use among youth, who are more likely to use mass-market products such as cigarillos and filtered cigars.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN

Activity	Form name	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
State administrators	State-level Recruitment Script.	42	1	42	0.5 (30 min)	21
District administrators	District-level Recruitment Script.	384	1	384	0.5 (30 min)	192
School administrators	School-level Recruitment Script.	555	1	555	0.5 (30 min)	278
Teachers	Data Collection Administration Script.	1,388	1	1,388	0.25 (15 min)	347
Parents/guardians	Active Consent Script	3,500	1	3,500	0.17 (10 min)	595
Students	National Youth Tobacco Survey.	29,579	1	29,579	0.75 (45 min)	22,184
	Screening for Cognitive Interviews.	417	1	417	0.08 (5 min)	33
	Cognitive Interviews	97	1	97	1 (60 min)	97
Total		35,962				23,747

Our estimated burden for the information collection reflects an overall increase of 1,147 hours and a corresponding increase of 4,461 responses. For 2027–2029, there are no changes to the frequency of data collection for the survey instrument. The burden per response is approximately the same for state and district administrators, school administrators, and teachers. We added burden estimates for parents who complete active consent forms (*i.e.,* forms that must be returned in order for their child to participate) to account for states' increased reliance on this type of consent. The total number of students sampled increased slightly between 2024–2026 and 2027–2029, increasing the burden slightly. This change is to accommodate declining response rates for school-based studies, in other words, the need to sample a greater number of students to get the same number of survey responses. The burden for cognitive interviews is roughly equivalent.

Grace R. Graham,

Deputy Commissioner for Policy, Legislation, and International Affairs.

National Institutes of Health

National Institute of Nursing Research; Notice of Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the National Advisory Council for Nursing Research.

The meeting will be partially open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting. The open session will be videocast and can be accessed from the NIH Videocasting and Podcasting website: *https://videocast.nih.gov/.*

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory Council for Nursing Research.

Date: January 26, 2027.

Open: 10:00 a.m. to 2:45 p.m.

Agenda: Director's update and other Council business.

Address: National Institutes of Health, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Closed: 2:45 p.m. to 3:15 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Dr. William Duval, Ph.D., Division of Extramural Science Programs, National Institute of Nursing Research, Bethesda, MD 20817, *duvalw@mail.nih.gov.*

Registration is not required to attend the open portion of this meeting.

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

Information is also available on the Institute's/Center's home page: *https://www.ninr.nih.gov/aboutninr/nacnr,* where an agenda and any additional information for the meeting will be posted when available.

BILLING CODE 4167–05–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Statement of Organization, Functions, and Delegations of Authority

AGENCY: National Institute of Health.

ACTION: Notice.

SUMMARY: National Center for the Advancement of Translational Sciences of the National Institute of Health has modified its organizational structure.

SUPPLEMENTARY INFORMATION: Part N, National Institutes of Health (NIH), of the Statement of Organization and Functions for the Department of Health and Human Services (HHS), is amended as set forth below to reflect the reorganization of the National Institute of Health, National Center for the Advancement of Translational Science (NCATS) by retitling and updating the functional Statements (1) the Chemical Genomics Branch to the Translational Models Branch under the Division of Preclinical Innovation within NCATS, (2) revise functional statement of the Office of Special initiatives, (3) abolishing the Office of Drug Development Partnership Programs, and the Office of Translational Medicine under the Office of the Director within NCATS.

Section N, *Organization and Functions,* is amended as follows:

(1) In the *Division of Preclinical Innovation (N92, formerly HN92)* retitle the following:

Chemical Genomics Branch (N924, formerly HN924) to *Translational Models Branch (N924, formerly HN924).* (1) Develop and advance human-based Non-Animal Models (NAMs) as transformative drug discovery and biomedical research tools; (2) Accelerate therapeutic discovery and regulatory science for rare and common diseases using predictive human model systems; (3) Accelerate target discovery using predictive human model systems; (4) Establish the predictive value and usefulness of human-based NAMs as pharmacology and toxicology assessment tools to reduce reliance on animal models; (5) Generate high-quality human biological data to enable AI-driven predictive modeling of drug efficacy and toxicity; (6) Integrate stem cells, tissue engineering, functional genomics, toxicology and data science into a unified human-based translational research enterprise; and (7) Serve as an NIH-wide resource for advancing human-based models research and technologies.

(2) *In the Office of the Director (N91, formerly HN91)* revise functional statement of the following:

Office of Special Initiatives (N917, formerly HN917). (1) Provides transformative programs extramurally that address barriers and bottlenecks to pre-clinical and clinical translation; (2) Drives development and dissemination of novel and disruptive technologies, approaches, and solutions for issues that impede translational research through promotion to the scientific, research, and industry sectors; (3) Incentivizes groundbreaking expansion of the therapeutic landscape for rare and chronic diseases through discovery and exploration of novel therapeutic targets and programs; and (4) Promotes and engenders partnerships and interagency collaborations with key stakeholders including government, industry, and academia, to advance innovation in early-stage clinical trials.

(3) In the *Office of the Director (N91, formerly HN91)* remove the following:

- *Office of Drug Development Partnership Programs (N918, formerly HN918)*
- *Office of Translational Medicine (N919, formerly HN919)*

Authority: 44 U.S.C. 3101

Robert F. Kennedy, Jr.,

Secretary, Department of Health and Human Services.

[FR Doc. 2026–23537 Filed 11–18–26; 8:45 am]

BILLING CODE 4167–05–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of Neurological Disorders and Stroke; Notice of Partially Closed Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the NIH National Advisory Neurological Disorders and Stroke Council.

The meeting will be partially open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend as well as those who need special assistance, such as sign language interpretation or other reasonable accommodations, must notify the Contact Person listed below in advance of the meeting. The open session will be videocast and can be accessed from the NIH Videocasting and Podcasting website (*https://videocast.nih.gov/*).

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory Neurological Disorders and Stroke Council.

Date: May 19–20, 2027.

Open: May 19, 2027, 10:00 a.m. to 4:00 p.m.

Agenda: Report by the Acting Director, NINDS; Report by the Director, Division of Extramural Activities; and Administrative and Program Developments; HEAL update; State of Intramural Program; To discuss upcoming Concept Clearance Initiatives and other business of the Council.

Address: National Institutes of Health, Neuroscience Center, Room 1131, 6001 Executive Boulevard, Rockville, MD 20852.

Meeting Format: Virtual and In-Person Meeting

Closed: May 19, 2027, 4:00 p.m. to 5:30 p.m.; May 20, 2027, 10:00 a.m. to 3:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Neuroscience Center, Room 1131, 6001 Executive Boulevard, Rockville, MD 20852.

Meeting Format: Virtual and In-Person Meeting.

Contact Person: Andrea Lynn Meredith, Ph.D. Director of Extramural Activities, National Institute of Neurological Disorders and Stroke, NIH, DHHS, Neuroscience Center, 6001 Executive Boulevard Bethesda, MD 20892, (301) 496–9248, *andrea.meredith@nih.gov.*

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice at least 10 days in advance of the meeting. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has procedures at *https://www.nih.gov/about-nih/visitor-information/campus-access-security* for entrance into on-campus and off-campus facilities. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors attending a meeting on campus or at an off-campus federal facility will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

Information is also available on the Institute's/Center's home page: *www.ninds.nih.gov,* where an agenda and any additional information for the meeting will be posted when available.

(Catalogue of Federal Domestic Assistance Program Nos. 93.853, Extramural Research Programs in the Neurosciences and Neurological Disorders; 93.854, Biological Basis Research in the Neurosciences, National Institutes of Health, HHS)

Dated: November 16, 2026.

Rosalind M. Niamke,

Program Analyst, Office of Federal Advisory Committee Policy.

BILLING CODE 4167–05–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of Neurological Disorders and Stroke; Notice of Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the Advisory Council on Parkinson's Research, Care, and Services (ACPRCS).

This is the fourth meeting of the ACPRCS, which was established by the Dr. Emmanuel Bilirakis and Honorable Jennifer Wexton National Plan to End Parkinson's Act of 2024 (Pub. L. 118–66). The Advisory Council is charged with providing advice to the Secretary of Health and Human Services (HHS) on issues that affect people with Parkinson's and related disorders (PDRDs), which include progressive supranuclear palsy, multiple system atrophy, corticobasal degeneration, and Lewy body dementias.

The meeting will focus on strategies to provide timely and responsive care to PDRD patients, including how care teams can improve care across settings. The meeting is virtual and will be open to the public to view via HHS Live Streaming: *www.hhs.gov/live.* Registration is not required.

Name of Committee: Advisory Council on Parkinson's Research, Care, and Services (ACPRCS).

Date: December 7, 2026.

Time: 9:00 a.m. to 5:30 p.m.

Agenda: Improving care for Parkinson's and related disorders; public comments; discussion and next steps for PDRD priorities.

Address: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852.

Meeting Format: Virtual Meeting.

Cost: The meeting is free and open to the public.

Deadlines: Public Comment Due Date: November 30th by 5:00 p.m. ET. For public comment instructions and guidelines, see below.

Contact Person: Jordan Gladman, Ph.D., Deputy Executive Officer, National Institute of Neurological Disorders and Stroke, National Institutes of Health, Bethesda, MD 20892, *nationalPDplan@nih.gov.*

Public Comments: The ACPRCS welcomes written and oral/virtual public comments and asks the public to review and adhere to its Public Comment Guidelines provided at *https://www.ninds.nih.gov/current-research/trans-agency-activities/national-plan-end-parkinsons-act/parkinsons-council.*

Submissions are accepted in writing via email addressed to *NationalPDplan@nih.gov.* Please include the phrase ''public comment'' in the subject line as well as the body of the message. A limited number of slots are available for individuals to provide a 2–3-minute oral summary or excerpt of their written comment to the Council during the meeting in person or via videoconference. For those interested in that opportunity, please indicate ''Interested in providing oral/virtual comment'' in your written submission, along with your name, email, and professional/organizational affiliation so that Council support staff can contact you if a slot is available. *Note that in order to provide oral public comment, requesters must register for the meeting using the instructions above.*

For any given meeting, comment slots will be assigned on a first-come, first-served basis, with priority given to individuals and organizations that have not previously provided comments. This will help ensure that as many individuals and organizations as possible have an opportunity to share comments. Commenters going over their allotted 3-minute slot may be asked to conclude immediately to allow other comments and the rest of the meeting to proceed on schedule.

Public comment submissions received by 5:00 p.m. ET on November 30th will be provided to the Council prior to the meeting for their consideration; all comments received after the deadline will be included in the next Council meeting's materials. The Council is not able to respond individually to comments. All public comments become part of the public record. Attachments of copyrighted publications are not permitted, but web links or citations for any copyrighted works cited may be provided.

Technical issues: If you experience any technical problems with the webcast, please email *nationalPDplan@nih.gov.*

Disability Accommodations: All ACPRCS Full Council Meetings provide Closed Captioning through *www.hhs.gov/live.* Individuals whose full participation in the meeting will require special accommodations (*e.g.,* sign language or interpreting services) must submit a request to the Contact Person listed on the notice at least seven (7) business days prior to the meeting. Such requests should include a detailed description of the accommodation needed and a way for the ACPRCS to contact the requester if more information is needed to fill the request.

Meeting schedule subject to change.

More Information: More information about this meeting is available on the ACPRCS Events page: *https://www.ninds.nih.gov/news-events/events/december-2026-advisory-council-meeting-parkinsons-research-care-and-services.*

Dated: November 16, 2026.

Rosalind M. Niamke,

Program Analyst, Office of Federal Advisory Committee Policy.

BILLING CODE 4167–05–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of Neurological Disorders and Stroke; Notice of Partially Closed Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the NIH National Advisory Neurological Disorders and Stroke Council.

The meeting will be held virtually and will be partially open to the public as indicated below. Individuals who plan to view the virtual meeting and need special assistance or other reasonable accommodations to view the meeting should notify the Contact Person listed below in advance of the meeting. The open session will be videocast and can be accessed from the NIH Videocasting and Podcasting website (*https://videocast.nih.gov/*).

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory Neurological Disorders and Stroke Council.

Date: February 10–11, 2027.

Open: February 10, 2027, 10:00 a.m. to 4:00 p.m.

Agenda: Report by the Acting Director, NINDS; Report by the Director, Division of Extramural Activities; Administrative and Program Developments; BRAIN Initiative Update; To discuss upcoming Concept Clearance Initiatives and other business of the Council.

Address: National Institutes of Health, Neuroscience Center, Room 1131, 6001 Executive Boulevard, Rockville, MD 20852.

Meeting Format: Virtual Meeting.

Closed: February 10, 2027, 4:00 p.m. to 5:30 p.m.; February 11, 2027, 10:00 a.m. to 3:00 p.m.

Agenda: To evaluate and review the Board of Scientific Counselors Report; To review and evaluate grant applications.

Address: National Institutes of Health, Neuroscience Center, Room 1131, 6001 Executive Boulevard, Rockville, MD 20852.

Meeting Format: Virtual Meeting.

Contact Person: Andrea Lynn Meredith, Ph.D., Director of Extramural Activities, National Institute of Neurological Disorders and Stroke, NIH, DHHS, Neuroscience Center, 6001 Executive Boulevard, Bethesda, MD 20892, (301) 496–9248, *andrea.meredith@nih.gov.*

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice at least 10 days in advance of the meeting. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

Information is also available on the Institute's/Center's home page: *www.ninds.nih.gov,* where an agenda and any additional information for the meeting will be posted when available.

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2026–0377]

Proposed Decommissioning and Disposition of USCGC Smilax (WLIC 315)

AGENCY: Coast Guard, DHS.

ACTION: Notice and request for comments on the decommissioning and disposal of USCGC *Smilax* (WLIC 315).

SUMMARY: The U.S. Coast Guard (USCG) announces its intent to decommission and dispose of U.S. Coast Guard Cutter (USCGC) *Smilax* (WLIC 315), homeported in Atlantic Beach, NC. Commissioned in 1944, the *Smilax* is a historic vessel, and we publish this notice to provide information on the proposed action, and to seek public input on our efforts to mitigate the adverse effects of this undertaking.

DATES: Comments must be submitted to the online docket via *https://www.regulations.gov* on or before December 21, 2026.

ADDRESSES: You may submit comments identified by docket number USCG–

2026–0377 at *https://www.regulations.gov.* See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: For information about this document call or email CWO4 Jonathan Becker U.S. Coast Guard; telephone (571) 608–2489, email *Jonathan.P.Becker@uscg.mil.*

SUPPLEMENTARY INFORMATION:

Public Participation and Comments

We encourage you to submit comments (or related material) regarding the resolution of adverse effects related to the decommissioning and disposition of the USCGC *Smilax.* We will consider all submissions and may adjust our final action based on your comments. If you submit a comment, please include the docket number for this notice (USCG–2026–0377), indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

Submitting comments. We encourage you to submit comments at *http://www.regulations.gov.* To do so, go to *https://www.regulations.gov,* type USCG–2026–0377 in the search box and click ''Search.'' Next, look for this document in the Search Results column, and click on it. Then click on the Comment option. If your material cannot be submitted using *http://www.regulations.gov,* contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

Viewing public comments in docket. To view public comments placed in our online docket use following instructions on the *https://www.regulations.gov* ''Frequently Asked Questions'' web page. Documents mentioned in this notice as being available in the docket, find the docket as described in the previous paragraph, and then select ''Supporting & Related Material'' in the Document Type column.

Personal information. We accept anonymous comments. Comments we post to *https://www.regulations.gov* will include any personal information you have provided, except that contact information (such as email or mailing address) will not be available for public viewing unless the submitter includes that information in the body of the docket submission. For more about privacy and submissions in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

Background: The Coast Guard's Efforts To Comply With the National Historic Preservation Act

The National Historic Preservation Act

Section 106 of the National Historic Preservation Act (NHPA), codified as 54 U.S.C. 306108, requires:

> [t]he head of any Federal agency having . . . jurisdiction over a proposed Federal . . . undertaking in any State . . ., prior to the approval of the expenditure of any Federal funds on the undertaking . . ., [to] take into account the effect of the undertaking on any historic property.

''Historic property'' [1] includes any historic structure or object included in *or eligible for inclusion* in the National Register of Historic Places. The term ''eligible for inclusion'' in the National Register includes both properties formally determined as such in accordance with regulations of the Secretary of the Interior and all other properties that meet the National Register criteria.

Applying the National Register criteria, the Coast Guard has determined that the USCG *Smilax* is eligible for inclusion on the National Register. The Coast Guard has also determined that the decommissioning and disposal of the USCG *Smilax* is an undertaking, and that the undertaking is likely to have an adverse effect on the USCG *Smilax.* In accordance with 36 CFR 800.6(a)(4), the Coast Guard is now inviting members of the public to express their views on resolving adverse effects of the undertaking.

Short History of the Smilax

USCGC *Smilax* (WLIC 315) was constructed at Dubuque Boat & Boiler Works in Dubuque, IA and was commissioned on 01 November 1944. USCGC *Smilax* was designed for the express purpose of maintaining Aids to Navigation (AtoN) on the inland waterways of the United States, including repair and alterations of fixed AtoN structures and the routine retrieval, servicing and setting of buoys, thereby enabling the safe navigation of waters that support the nation's economy through maritime commerce.

After commissioning, USCGC *Smilax* was homeported in Ft. Pierce, FL from November 1944 to June 1954, then in New Smyrna Beach, FL from June 1954 to November 1965. In 1964 she was re-outfitted with new engines and assigned a 70′ work barge and transferred to Brunswick, GA in 1965 to July 1999. Finally, the *Smilax* was transferred to Atlantic Beach, NC in July 1999, where she remains to the present time.

In March 2011, with 66 years of active service at that time, USCGC *Smilax* became the oldest operational commissioned cutter in the Coast Guard and was designated the ''Queen of the Fleet.'' She has held this designation for the last 15 years.

Now, with over 80 years of continuous service, the Coast Guard plans to utilize the services of the Defense Logistics Agency (DLA) to carry out the final disposition of this ship, the last phase of its life cycle. DLA is a separate Federal agency with the capabilities to carry out the final disposition using the steps of Reutilize, Transfer, Donate, Sales (RTDS) of the vessel to another Federal agency, State or Qualified Local government or sales via the commercial market.

Steps Taken To Identify Historic Attributes of the Smilax

The Coast Guard considered the criteria outlined in 36 CFR part 63 to determine whether the *Smilax* would be considered eligible for listing on the National Register of Historic Places and it consulted with State Historic Preservation Officers (SHPO). Additionally, the Coast Guard referred to the Historic American Engineering Record (HAER) to better understand the *Smilax's* history. The HAER is a collection of documents that provides detailed information with drawings, photographs and historic reports in conformance with the Secretary of the Interior's Standards and Guidelines for Architectural and Engineering Documentation. The HAER study and SHPO Consultations to date are available for viewing in the docket for this notice.

Undertaking's Effects on Historic Properties

The decommissioning and disposition of the vessel was determined to have an adverse effect on this historic property. Upon decommissioning, USCGC *Smilax* will be demilitarized. Military markings will be removed or covered and items that are found to have historical significance will be transferred to the Coast Guard Historians Office. Other gear or materials with Coast Guard markings or decals not in a usable or serviceable condition will be destroyed. Property and parts that are found to be of use will be identified and put back into the Coast Guard supply system for future use. Any other gear will be conveyed with the ship and upon completion of decommissioning, DLA

[1] Historic property, effect, eligible for inclusion in the National Register, National Register criteria, undertaking, and most other terms of art used here are defined at 36 CFR 800.16.

will provide disposition services as needed.

National Register Criteria for Evaluation

The National Park Service has developed the National Register Criteria for Evaluation. These criteria, which are set out at 36 CFR 60.4, are standards by which every property that is nominated to the National Register is judged. The Coast Guard has evaluated the *Smilax* under these criteria to determine whether it is eligible for listing on the National Register.

USCGC *Smilax* was found to be eligible under Criterion ''A'' with a period of historical significance extending from 1944 to 1976, fifty years before the present. USCGC *Smilax* has performed its mission of maintaining aids to navigation to promote maritime safety for more than 80 years. During this span there have been 5 major military conflicts and dozens of overseas contingency operations and armed conflicts. In 2013, USCGC *Smilax* assisted maritime archaeologists with the North Carolina Department of Natural and Cultural Resources to raise a number of artifacts from the site of Queen Anne's Revenge, the pirate Blackbeards's flagship that wrecked just offshore Beaufort Inlet, North Carolina in 1718. Due to the operational longevity, USCGC *Smilax* became the fifth ship to hold the title as ''Queen of the Fleet'' and it has held this honor for the past 15 years, demonstrating its place in Coast Guard history.

USCGC *Smilax* was found not to meet Criterion ''B'' since it is not associated with individuals important in United States history.

USCGC *Smilax* was found not to meet Criterion ''C'' since its original integrity has been compromised by engine refits, equipment upgrades, including the addition of a barge, and the modification of interior spaces.

USCGC *Smilax* was found not to meet Criterion ''D,'' as it is unlikely to yield information important in prehistory or history.

Summary of Consultations to Date

The Coast Guard has consulted with the Florida, Georgia, Iowa and North Carolina SHPO's concerning the proposed decommissioning and final disposition of USCGC *Smilax.* Florida, Georgia, Iowa, have commented that since USCGC *Smilax* is currently homeported in Atlantic Beach, NC they will agree with any findings or actions that the North Carolina SHPO recommends. The North Carolina SHPO has agreed with the findings of the US Coast Guard regarding the following.

Criteria of Adverse Effects

In accordance with the criteria for assessing whether an undertaking will have an adverse effect enunciated in 36 CFR 800.5, the Coast Guard has determined its proposed action will have an adverse effect. The steps the Coast Guard has conducted to mitigate the adverse effect of its proposed action are provided in the Evaluation of Alternatives or Mitigation Measures below.

Evaluation of Alternatives or Mitigation Measures

The Coast Guard has mitigated the adverse effects through the preparation of an HAER study, as mentioned earlier. The HAER study will be provided to the Library of Congress, where a copy will be made available for view. See *https://www.loc.gov/pictures/collection/hh/* for information about the Library of Congress' HAER collection.

Dated: November 13, 2026.

J. Sky Holm,

Captain, U.S. Coast Guard, Chief, Office of Cutter Forces.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2026–0826; OMB No. 1660–0040]

Agency Information Collection Activities: Proposed Collection, Comment Request; Standard Flood Hazard Determination Form (SFHDF)

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: 60-Day Notice of extension and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public to take this opportunity to comment on an extension without change of a currently approved information collection. In accordance with the requirements of the Paperwork Reduction Act of 1995, this notice seeks comments concerning this instrument, which is used by Federally-regulated lending institutions when making, increasing, extending, renewing or purchasing each loan for the purpose of determining whether flood insurance is required and available.

DATES: Comments must be submitted on or before January 19, 2027.

ADDRESSES: To avoid duplicate submissions to the docket, please submit comments at *http://www.regulations.gov* under Docket ID FEMA–2026–0826. Follow the instructions for submitting comments.

All submissions received must include the Agency name and Docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy and Security Notice that is available via a link on the homepage of *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Michael Windle, Marketing Section Chief, Customer Service Division, Federal Insurance Directorate, Resilience, FEMA at (202) 236–6419 or *michael.windle@fema.dhs.gov.* You may contact the Information Management Division for copies of the proposed collection of information at email address: *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: Section 1365 of the National Flood Insurance Act of 1968 (NFIA) (42 U.S.C. 4104b), as added by Section 528 of the National Flood Insurance Reform Act of 1994 (Pub. L. 103–325, Title V), requires that the Federal Emergency Management Agency (FEMA) develop a standard hazard determination form for recording the determination of whether a structure is located within an identified Special Flood Hazard Area and whether flood insurance is available. Regulated lending institutions, federal agency lenders, the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation, and the Government National Mortgage Association must complete use this form for any loan made, increased, extended, renewed or purchased by these entities. The requirement for Federally-regulated lending institutions to determine whether a building or mobile home securing a loan is located in an area having special flood hazards and whether flood insurance is available has been in effect since the enactment of the Flood Disaster Protection Act of 1973, although the use of a standard form was not required until the enactment of the Section 1365 of the NFIA. The establishment of the Standard Flood Hazard Determination Form (SFHDF) has enabled lenders and

mortgage servicers to provide consistent information.

FEMA established this information collection as a common form collection in its 2023 revision since FEMA does not collection information using the SFHDF, but other federal agencies do.

Collection of Information

Title: Standard Flood Hazard Determination Form (SFHDF).

Type of Information Collection: Extension, without change, of a currently approved information collection.

OMB Number: 1660–0040.

FEMA Forms: FEMA Form FF–206–FY–21–116 (formerly 086–0–32), Standard Flood Hazard Determination.

Abstract: This instrument is used by Federally-regulated lending institutions, Federal Agency lenders, the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation, and the Government National Mortgage Association. Federally-regulated lending institutions use this form when making, increasing, extending, renewing, or purchasing each loan for the purpose of determining whether flood insurance is required and available. FEMA is responsible for creating and updating the form and making it available but does not collect any information itself.

Affected Public: Businesses or other For-Profit; and Individuals or Households.

Estimated Number of Respondents: 1.

Estimated Number of Responses: 1.

Estimated Average Time per Response: 1 hour.

Estimated Total Annual Burden Hours: 1.

Estimated Total Annual Respondent Cost: $32.

Estimated Respondents' Operation and Maintenance Costs: $0.

Estimated Respondents' Capital and Start-Up Costs: $0.

Estimated Total Annual Cost to the Federal Government: $1,918.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the Agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Russell R. Bard,

Acting Senior Director for Information Management, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

[FR Doc. 2026–23602 Filed 11–18–26; 8:45 am]

BILLING CODE 9111–52–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7109–N–17; OMB Control No.: 2577–0304]

60-Day Notice of Proposed Information Collection: Tribal Housing and Urban Development—Veteran Administration Supportive Housing Program

AGENCY: Office of the Assistant Secretary for Public and Indian Housing (PIH), HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* January 19, 2027.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Written comments and recommendations for the proposed information collection can be sent within 60 days of publication of this notice to *www.regulations.gov.* Interested persons are also invited to submit comments regarding this proposal and comments should refer to the proposal by name and/or OMB control number and should be sent to: Leea Thornton, Office of Public and Indian Housing, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410.

FOR FURTHER INFORMATION CONTACT: Leea Thornton, Office of Public and Indian Housing, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email *PIH-PRAPublicComments@hud.gov;* telephone (202) 402–6455. This is not a toll-free number. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.* Copies of available supporting documents for the proposed collection may be obtained from Ms. Thornton.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in section A.

A. Overview of Information Collection

Title of Information Collection: Tribal Housing and Urban Development—Veteran Administration Supportive Housing Program.

OMB Approval Number: 2577–0304.

Type of Request: Revision of a currently approved collection.

Form Number: HUD–5980A.

Description of the Need for the Information and Proposed Use: This information collection contains application materials to obtain benefits under the Tribal Housing and Urban Development—Veteran Administration Supportive Housing Program (Tribal HUD–VASH), which provides rental housing assistance and supportive services to Native American veterans who are homeless or at risk of homelessness living on or near a reservation or other Indian areas. Housing assistance under this program is available by grants to Tribes and tribally designated housing entities that are eligible to receive Indian Housing Block Grant funding under the Native American Housing Assistance and Self Determination Act (25 U.S.C. 4101). Grants and renewal funds are awarded and approved by HUD. Grants include an additional amount for administrative costs and eligible homeless veterans receive case management services through the Department of Veterans Affairs.

Respondents: Tribes and Tribally Designated Housing Entities.

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Annual cost
Tribal HUD–VASH Family Report, Form HUD–5980A	35	1	35	1.50	52.50	$30.49	$1,604.72
Tribal HUD–VASH Application Materials	32	1	32	0.13	4.16	30.49	127.84
Tribal HUD–VASH Leasing Performance Report, Form HUD–5980 (OMB 2577–0169)	35	1	35	1.50	52.50	30.49	1,604.72
Total	102		102		109.16		3,328.28

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–HQ–FAC–2026–3995; FXFR13360900000–278–FF09F14000]

Aquatic Nuisance Species Task Force Meeting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of meeting.

SUMMARY: The U.S. Fish and Wildlife Service gives notice of a virtual public meeting of the Aquatic Nuisance Species Task Force (ANSTF) in accordance with the Federal Advisory Committee Act.

DATES: The ANSTF will meet virtually Tuesday through Wednesday, December 1–2, 2026, from 12:30 p.m. to 5:00 p.m. (eastern time) each day.

Registration: Registration is required. The deadline for registration is November 27, 2026.

Accessibility and Other Accommodations: The deadline for accessibility and other accommodation requests is November 27, 2026. Please see *Requests for Accommodations,* below.

ADDRESSES: The meeting will be held virtually. Participation will be available via teleconference and broadcast over the internet. To register and receive the telephone number or web address for virtual participation, contact the Executive Secretary (see **FOR FURTHER INFORMATION CONTACT**) or visit the ANSTF website at *https://www.fws.gov/program/aquatic-nuisance-species-task-force.*

FOR FURTHER INFORMATION CONTACT: Susan Pasko, Executive Secretary, ANSTF, by telephone at (571) 623–0608, or by email at *susan_pasko@fws.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The ANSTF was established by the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 (16 U.S.C. 4701 *et seq.*) and is composed of Federal and ex-officio members. The purpose of the ANSTF is to develop and implement a program for U.S. waters to prevent introduction and dispersal of aquatic invasive species; to monitor, control, and study such species; and to disseminate related information. This virtual meeting is open to the public.

Meeting Agenda

The meeting agenda will focus on identifying and establishing priority objectives and strategies to inform and guide the development of the next ANSTF Strategic Plan. The agenda also includes reports from ANSTF members, reports and recommendations from regional panels and subcommittees, and a public comment period. The final agenda and other related meeting information will be posted on the ANSTF website, *https://www.fws.gov/program/aquatic-nuisance-species-task-force.*

Public Input

If you wish to provide oral public comment or provide a written comment for the ANSTF to consider, contact the Executive Secretary (see **FOR FURTHER INFORMATION CONTACT**) no later than November 27, 2026.

To ensure the opportunity for broad participation, each individual will be limited to a maximum of 3 minutes for their statement. Interested parties should contact the Executive Secretary (see **FOR FURTHER INFORMATION CONTACT**) for placement on the public speaker list for this meeting. Requests to address the ANSTF during the meeting will be accommodated in the order they are received. Registered speakers who wish to expand upon their oral statements, or those who had wished to speak but could not be accommodated on the agenda, may submit written statements to the Executive Secretary up to 30 days following the meeting.

Requests for Accommodations

Please make requests in advance for sign language interpreter services, assistive listening devices, or other reasonable accommodations. Please contact the Executive Secretary (see **FOR FURTHER INFORMATION CONTACT**) no later than November 27, 2026, to give the

Service sufficient time to process your request. All reasonable accommodation requests are managed on a case-by-case basis.

Authority: 5 U.S.C. Ch. 10.

Martha Balis-Larsen,

Acting Co-Chair, Aquatic Nuisance Species Task Force, U.S. Fish and Wildlife Service.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–HQ–IA–2026–4094; FXIA16710900000–278–FF09A30000; OMB Control Number 1018–0192]

Agency Information Collection Activities; Submission to the Office of Management and Budget; Big Cat Public Safety Act

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, we, the U.S. Fish and Wildlife Service (Service), are proposing to revise a currently approved information collection.

DATES: Interested persons are invited to submit comments on or before December 21, 2026.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function. Please provide a copy of your comments to the Service Information Collection Clearance Officer, U.S. Fish and Wildlife Service, MS: PRB (JAO/3W), 5275 Leesburg Pike, Falls Church, VA 22041–3803 (mail); or by email to *Info_Coll@fws.gov.* Please reference ''1018–0192'' in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: Madonna L. Baucum, Service Information Collection Clearance Officer, by email at *Info_Coll@fws.gov,* or by telephone at (703) 358–2503. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. You may also view the information collection request (ICR) at *https://www.reginfo.gov/public/do/PRAMain.*

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act (PRA; 44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR part 1320, all information collections require approval under the PRA. We may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a currently valid OMB control number.

On June 12, 2023, we published in the **Federal Register** (88 FR 38358) an interim rule (RIN 1018–BH23) which announced our intention to request OMB approval of the information collections contained in this rule. In that interim rule, we solicited comments for 60 days on the information collections, ending on August 11, 2023. All comments received in response to the interim rule were addressed with the ICR for that interim rule submitted to OMB on October 20, 2023 and approved on December 4, 2023. The Service expects to publish a final rule by summer 2027.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again inviting the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: Due to delays in publishing the final rule under RIN 1018–BH23, ''Regulations to Implement the Big Cat Public Safety Act,'' pursuant to the Big Cat Public Safety Act (BCPSA; Pub. L. 117–243, December 20, 2022, 136 Stat. 2336), this submission serves as an interim renewal to prevent the information collection from lapsing into noncompliance. As required by 5 CFR 1320, we intend to publish this 30-day **Federal Register** notice to provide the public with an additional opportunity to comment on the information collection, supplementing the 60-day comment period associated with the interim rule (88 FR 38358; June 12, 2023). We are not implementing any changes to the information collection contained in the final rule at this time. Any revisions will be incorporated into the PRA submission when the final rule is published.

The BCPSA was signed into law on December 20, 2022. The purpose of the BCPSA is to amend the Lacey Act Amendments of 1981 (16 U.S.C. 3371–3378) to clarify provisions enacted by the Captive Wildlife Safety Act (CWSA; Pub. L. 108–191, December 19, 2003) and to further the conservation of certain wildlife species. ''Prohibited wildlife species'' (also referred to as ''big cats'') is defined as ''any live species of lion, tiger, leopard, cheetah, jaguar, or cougar or any hybrid of such species'' (16 U.S.C. 3371(h)). This includes any of the following species, or hybrids of any of these species: Lion (*Panthera leo*), tiger (*Panthera tigris*), leopard (*Panthera pardus*), snow leopard (*Uncia uncia*), clouded leopard (*Neofelis nebulosa*), jaguar (*Panthera onca*), cheetah (*Acinonyx jubatus*), cougar (*Puma concolor*) (50 CFR14.252).

The BCPSA built on and amended the CWSA by making it unlawful to import, export, transport, sell, receive, acquire, or purchase in interstate or foreign commerce, or in a manner substantially affecting interstate or foreign commerce, or breed or possess prohibited wildlife species (lions, tigers, leopards, snow leopards, clouded leopards, jaguars,

cheetahs, and cougars, or any hybrids thereof), with certain exceptions. In enacting the BCPSA, Congress recognized the need to end the private ownership of big cats as pets and prohibit exhibitors from allowing public contact with big cats, including cubs. The BCPSA did, however, grant private owners a one-time, 180-day period in which to register their big cats, allowing them to keep their current animals if they registered each such animal with the Service not later than June 18, 2023. This registration allows pre-BCPSA private owners to continue to possess their animals under the pre-BCPSA exception if the owners continue to meet all of the BCPSA's requirements, which are described in our June 12, 2023, interim rule (88 FR 38358). Certain entities outlined in the BCPSA, including exhibitors with valid U.S. Department of Agriculture (USDA) Class C licenses, State agencies, State colleges and universities, State-licensed veterinarians, and wildlife sanctuaries, that meet the requirements for other BCPSA exceptions, were not required to register their big cats with the Service.

In summary, the BCPSA helps to ensure the health and welfare of big cats, protects the public from the dangers associated with private ownership of big cats, and strengthens the Service's ability to combat wildlife trafficking. Additional background on the Lacey Act, CWSA, and BCPSA is available in the preamble to our June 12, 2023, interim rule (88 FR 38358).

The existing and new reporting and/or recordkeeping requirements identified below require review and approval by OMB in conjunction with this submission:

(1) *Amendments—Form 3–200–11, ''Registration Form—Big Cat Public Safety Act'' (Pub. L. 117–243, December 20, 2022, 136 Stat. 2336)—Burden Reduction and Change to Form 3–200–11.* As required by the Service in Form 3–200–11, owners must provide the Service with updates if information concerning the registered big cats changes, as follows:

50 CFR 14.255(d)—Within 10 calendar days as required by the Service in Form 3–200–11, a registered pre-BCPSA owner must update the registration with the Service when a prohibited wildlife species dies or any of the following information changes: The location where the prohibited wildlife species is housed; the protocols taken to prevent breeding; the protocols taken to prevent direct contact between the public and big cat; ownership; or a unique identifier.

Form 3–200–11, ''*Registration Form—Big Cat Public Safety Act* (Pub. L. 117–243, December 20, 2022, 136 Stat. 2336), collected the following information during the initial registration process:

- Name, birth date, and contact information of individual applicant;
- Name, tax ID number, and contact information of business, corporation, or trust, if applicable;
- Information for officer of business, corporation, or trust, if applicable;
- Detailed information for big cats possessed (not including hybrids), to include:

—Common name of big cat;
—Name given to individual big cat, if applicable,
—Genus, species, and subspecies;
—Birthdate and date of acquisition, including supporting documentation;
—Unique identifier information (*i.e.,* microchip or tattoo);
—Sex;
—Description (*e.g.,* eye color, scars, ear tags);
—Photographs of big cat;
—Physical location of individual big cat (if different from registrant's contact information);
—Protocols taken to prevent breeding;
—Protocols taken to prevent direct contact between public and prohibited wildlife species; and
—Copies of all local, State, or Federal licenses held in relation to the big cats, if applicable.

- Detailed information for hybrid big cats possessed, to include:

—Name of hybrid big cat;
—Name given to individual big cat, if applicable,
—Genus, species, and subspecies;
—Birthdate and date of acquisition, including supporting documentation;
—Unique identifier information (*e.g.,* microchip or tattoo);
—Sex;
—Description (*e.g.,* eye color, scars, ear tags);
—Photographs of big cat;
—Physical location of big cat (if different from registrant's contact information);
—Protocols taken to prevent breeding;
—Protocols taken to prevent direct contact between public and prohibited wildlife species; and
—Copies of all local, State, or Federal licenses held in relation to the big cats, if applicable.

- Information collected to amend original registration, to include:

—Genus, species, subspecies, name of big cat, and unique identifier;
—Information for new location when individual big cat is relocated after registration;
—Description of any changes in protocols to prevent breeding as previously described in original registration;
—Description of any changes in protocols to prevent direct contact between the public and the prohibited wildlife as previously described in original registration;
—Change in unique identifier (*i.e.,* microchip or tattoo);
—Contact information for new owner;
—Notification of big cat's death, to include date; and
—The manner of disposal of big cat's remains (requires documentation from veterinarian or other authority describing cause of death and how the remains were disposed).

Justification for Burden Decrease—We are decreasing the estimated burden associated with amendments of Form 3–200–11 to account for a lower number of amendments anticipated to be submitted by owners to the Service per year.

Proposed Changes to Form 3–200–11—We are proposing the following changes to Form 3–200–11 since OMB's last approval at the interim rule stage to:

- Remove registration instructions and initial registration fields, since the BCPSA required owners to register all big cats with the Service by June 18, 2023.
- Retain the amendment portion of the form, which allows registered pre-BCPSA owners to update their existing registrations, including reporting the death of an animal or changes in housing location, breeding-prevention protocols, public-contact prevention protocols, ownership, or unique identifier.

(2) *Population Management and Care Plan (50 CFR14.254(a)(3))*—To qualify for an exception in § 14.257, under certain circumstances, a USDA-licensed entity or USDA-registered Federal facility must provide a population management and care plan to the Service for consideration in accordance with the BCPSA (16 U.S.C. 3372(e)(2)(A)(i)(III)). If a licensed entity or registered Federal facility allows any person who is neither (1) a trained professional employee or contractor of the licensed entity (or an accompanying employee receiving professional training) nor (2) a licensed veterinarian (or a veterinary student accompanying such a veterinarian) to come into direct physical contact with prohibited wildlife, then prior to allowing any such individual to come into direct physical contact with prohibited wildlife species the conservation program of the licensed entity or registered Federal facility must meet certain requirements. One requirement is that the licensed

entity or registered Federal facility must provide a species-specific, publicly available, peer-edited population management and care plan to the Director with justifications that the plan:

- Reflects established conservation science principles;
- Incorporates genetic and demographic analysis of a multi-institution population of animals covered by the plan;
- Promotes animal welfare by ensuring that the frequency of breeding is appropriate for the species;

(3) *Recordkeeping Requirements*—We do not anticipate the recordkeeping requirements will impose any significant burden, because the maintenance of these records is typically a normal business practice. Therefore, complying with the requirement to make records available can likely be met by making available and copying, if needed, a small number of documents pertaining to the possession, transportation, acquisition, disposition, importation, or exportation of the prohibited wildlife species, which we estimate can be completed in an hour or less.

a. *50 CFR 14.254(c), Licensed Entity or Registered Federal Facility*—To qualify for an exception in § 14.257, a licensed entity or a registered Federal facility must maintain complete and accurate records of any possession, breeding, transportation, acquisition, receipt, purchase, sale, disposition, importation, or exportation of prohibited wildlife species.

1. These records must be up to date and include the names and addresses of persons to or from whom any prohibited wildlife species has been acquired, received, imported, exported, purchased, sold, or otherwise transferred (including loans for exhibition, breeding, or otherwise), and the dates of these transactions.

2. The licensed entity or registered Federal facility must maintain these records for the lifespan of each prohibited wildlife species and for 5 years after its death or disposition and must copy these records for Service officials, if requested.

3. The licensed entity or registered Federal facility must make these records available and allow access to its facilities and its prohibited wildlife specimens for inspection by Service officials at reasonable hours.

b. *50 CFR 14.255(d) and (e), Registered Pre-BCPSA Owners—Burden Decrease*—A registered pre-BCPSA owner must maintain complete and accurate records of information for each individual prohibited wildlife species in their possession as required by the Service in the BCPSA registration form (Form 3–200–11) for the lifespan of each individual prohibited wildlife species and for 5 years after its death or disposition and must copy these records for Service officials, if requested.

1. Pre-BCPSA owners are required to maintain records of their BCPSA activities with big cats and provide the Service with updates on registered big cat(s). Owners must update the registration within 10 calendar days if a big cat dies or if there is any change in: the location where the big cat is housed; protocols taken to prevent breeding; protocols taken to prevent direct contact between the public and big cat; ownership; or unique identifier.

2. While the pre-BCPSA owner may not sell or otherwise engage in commerce with prohibited wildlife species, if the pre-BCPSA owner is no longer able to continue to possess their prohibited wildlife species, the pre-BCPSA owner may make arrangements to donate the prohibited wildlife species to a licensed entity, State college, State university, State agency, State-licensed veterinarian, or a wildlife sanctuary, or may make arrangements to abandon the prohibited wildlife species to the Federal Government. The disposition must not be reasonably likely to result in the registered pre-BCPSA owner's economic use, gain, or benefit, including, but not limited to, profit (whether in cash or in kind).

3. These records must be up to date, and the registered pre-BCPSA owner must make these records available and allow access to their facilities and prohibited wildlife specimens for inspection by Service officials at reasonable hours.

Justification for Burden Decrease—We are decreasing the estimated burden associated with the recordkeeping requirements at 50 CFR 14.255(e). Our initial estimates in the previous submissions were higher than the actual number of registered owners and we are now lowering the burden to correct that overage.

c. *50 CFR 14.256(b), Wildlife Sanctuaries*—A wildlife sanctuary must maintain complete and accurate records of any possession, transportation, acquisition, receipt, disposition, importation, or exportation of prohibited wildlife species.

1. These records must be up to date and must include the names and addresses of persons to or from whom any prohibited wildlife species has been acquired, received, imported, exported, or otherwise transferred, and the dates of these transactions.

2. The wildlife sanctuary must maintain these records for the lifespan of each prohibited wildlife species and for 5 years after its death or disposition and must copy these records for Service officials, if requested.

3. The wildlife sanctuary must make these records available and allow access to its facilities and its prohibited wildlife specimens for inspection by Service officials at reasonable hours.

d. *50 CFR 14.257(a), Documentation to Transport Live Prohibited Wildlife*—The prohibitions of § 14.253 do not apply to licensed entities or registered Federal facilities that meet all of the requirements of § 14.254; State colleges, State universities, or State agencies; State-licensed veterinarians; wildlife sanctuaries that meet all of the requirements of § 14.256; or persons who:

1. Can produce documentation showing that they are transporting live prohibited wildlife species solely for the purpose of expeditiously transporting the prohibited wildlife species to individuals or entities that are excepted from the prohibitions in § 14.253; and

2. Has no financial interest (whether in cash or in kind) in the prohibited wildlife species other than payment received for transporting them.

e. *(Removed) 50 CFR 14.257(b), Documentation of Date of Breeding*—The prohibition on possession in § 14.253 does not apply to a registered pre-BCPSA owner who is in possession of any prohibited wildlife species that was:

1. Born and possessed by the registered pre-BCPSA owner before the date of enactment of the BCPSA and meets all of the requirements of § 14.255 for each of the prohibited wildlife species in their possession; or

2. Bred before and born on or after the date of enactment of the BCPSA, to a prohibited wildlife species possessed by the registered pre-BCPSA owner before the date of enactment of the BCPSA, if the registered pre-BCPSA owner provides documentation demonstrating that the breeding occurred before the date of enactment of the BCPSA, and the person meets all of the requirements of § 14.255 for each of the prohibited wildlife species in their possession.

Justification for Removal— We are removing this recordkeeping IC because the requirement to document breeding dates under 50 CFR 14.257(b) is no longer necessary, as registration has ended and breeding is no longer authorized under the BCPSA unless an applicable exception is met.

Copies of Form 3–200–11 associated with this ICR is available via the docket [FWS–HQ–IA–2026–4094] on the

Regulations.gov website. Additionally, the public may request a copy of the form by sending a request to the Service Information Collection Clearance Officer in **ADDRESSES** above.

Title of Collection: Big Cat Public Safety Act (50 CFR part 14, subpart K).

OMB Control Number: 1018–0192.

Form Number: 3–200–11.

Type of Review: Revision of a currently approved collection.

Respondents/Affected Public: Individuals, private sector, and State/local/Tribal governments.

Estimated Number of Annual Respondents: 1,830.

Estimated Number of Annual Responses: 1,830.

Estimated Completion Time per Response: 1 hour.

Estimated Annual Burden Hours: 1,830.

Respondent's Obligation: Required to obtain or retain a benefit.

Frequency of Collection: On occasion.

Total Estimated Annual Nonhour Burden Cost: $730.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Madonna Baucum,

Information Collection Clearance Officer, U.S. Fish and Wildlife Service.

Bureau of Land Management

[A2407–014–004–065516; #O2509–014–004–125222.1; LLESJ00000; FLES106810794]

Notice of Application for 299 ROW Application for Coastal Connect Services, LLC; Florida

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of application.

SUMMARY: The Bureau of Land Management (BLM) has received a right-of-way (ROW) application from Coastal Connect Services, LLC for a proposed intrastate natural gas pipeline in Cape Canaveral, Florida. The BLM will complete environmental analysis under the National Environmental Policy Act (NEPA) before deciding whether to authorize the pipeline ROW.

DATES: The application was accepted by BLM Southeastern States District Office on September 30, 2026.

ADDRESSES: The ROW application and maps of the project are available for review at the BLM Southeastern States District Office located at 273 Market Street, Flowood, Mississippi 39232.

NEPA documents associated with this proposal will be released to the public upon completion. Once available, these documents may be accessed online via the following link: *https://eplanning.blm.gov/Project-Home/?id=c6d2b2a5-c9bd-f111-aaae-001dd8029bbb.*

FOR FURTHER INFORMATION CONTACT: Shayne Banks, Acting District Manager, telephone: (601) 919–4652; address: 273 Market Street, Flowood, MS 39232; email: *sbanks@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Ms. Banks. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The applicant seeks a ROW for a 16-inch diameter natural gas pipeline and related facilities totaling approximately 20.3 miles, including temporary workspaces and minor above ground components such as mainline valves and rust-prevention equipment. The pipeline would provide natural gas services to Space Launch Complex 37 and Launch Complex 39A at Cape Canaveral, Florida, to support future launch operations, and eliminate the need for fuel truck deliveries at these locations. For more detailed information regarding the application, maps, and overall project, refer to **ADDRESSES** section above.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[A2407–014–004–065516, #O2509–014–004–125222.1]

Realty Action: Modified Competitive Sale of 20 Parcels of Public Land in Clark County, Nevada; Modification of Recreation and Public Purposes Act Classification

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action.

SUMMARY: The Bureau of Land Management (BLM) proposes to offer 20 parcels of public land, totaling 200.64 acres in the Las Vegas Valley (Valley), by modified competitive sale at no less than each parcel's fair market value (FMV) pursuant to the Southern Nevada Public Land Management Act of 1998 (SNPLMA), as amended. The sale would be processed in conformance with applicable provisions of the Federal Land Policy and Management Act of 1976 (FLPMA) and BLM regulations. A 4.88-acre parcel proposed for inclusion in the sale was previously part of Recreation and Public Purposes (R&PP) Act lease N–75746. At the request of the lessee, the City of Las Vegas, the BLM approved the relinquishment of these acres from the lease. Because the parcel is no longer subject to the R&PP lease, the BLM proposes to modify the R&PP classification by removing the classification from the 4.88-acre portion of the parcel. This modification is necessary because lands that retain R&PP classification are not available for disposal under SNPLMA, and removing the classification makes parcel NVNV106381471 eligible for nomination in the 20-Parcel SNPLMA Land Sale.

DATES: The BLM will accept written comments regarding the proposed sale and modification to the R&PP classification until January 4, 2027. The BLM will publish this notice of realty action once a week for 3 consecutive weeks in the Las Vegas Review-Journal newspaper. The BLM intends to open the sale for bidding on February 9, 2027, at 8:00 a.m. Pacific Time (PT).

ADDRESSES:

Comments: Mail written comments on the proposed sale and modification to the R&PP classification to the BLM Las Vegas Field Office, Assistant Field Manager, Division of Lands, 4701 North Torrey Pines Drive, Las Vegas, NV 89130.

Availability of sale information: Prior to the sale, a sales matrix will be published on the following website: *https://www.efficientmarkets.com.* The sale matrix provides information specific to each proposed sale parcel such as legal description, physical location, encumbrances, acreage, and FMV. The FMV for each parcel will be available in the sales matrix no later than 30 days prior to the sale.

Bidding site: Bids must be submitted on Efficient Markets website at: *https://www.efficientmarkets.com.*

Additional information: For general information on previous BLM public land sales, go to *https://www.blm.gov/snplma* then click the land sales link. Information concerning the sale parcels, including encumbrances of record,

appraisals, reservations, procedures and conditions, Comprehensive Environmental Response, Compensation and Liability Act, 42 U.S.C. 9620(h) (CERCLA) documents, and other environmental documents that may appear in the BLM public files for the sale parcels are available for review by appointment only during business hours from 8:00 a.m. to 4:30 p.m. PT Monday through Friday, at the BLM Las Vegas Field Office (LVFO), except during Federal holidays.

FOR FURTHER INFORMATION CONTACT: Stephen ''Brad'' Gallimore, BLM Supervisory Realty Specialist, by email: *BLM_NV_LVFO_LandTenureTeam@blm.gov,* or by telephone: (702) 515–5017.

Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: It is the buyer's responsibility to be aware of all applicable Federal, State, and local government laws, regulations, and policies that may affect the subject lands, including any required dedication of lands for public uses. It is the buyer's responsibility to be aware of existing or prospective uses of nearby properties. When conveyed out of Federal ownership, the lands would be subject to any applicable laws, regulations, and policies of the applicable local government for proposed future uses. It is the responsibility of the purchaser to be aware through due diligence of those laws, regulations, and policies, and to seek any required local approvals for future uses. Buyers should make themselves aware of any Federal, state, or local law or regulation that may impact the future use of the property. Any land lacking access from a public road or highway would be conveyed as such and acquiring future access would be the responsibility of the buyer.

The subject public lands are legally described as:

Mount Diablo Meridian, Nevada

The areas described aggregate 200.64 acres, according to the official plats of the surveys of the said lands on file with the BLM.

The Las Vegas Valley Disposal Boundary Environmental Impact Statement (Record of Decision issued on December 23, 2004) and the Las Vegas In-Valley Area Multi-Action Analysis Environmental Assessment (EA), DOI–BLM–NV–S010–2016–0054–EA (*https://eplanning.blm.gov/eplanning-ui/project/60096/510*), analyzed the sale parcels. Parcel-specific determinations of NEPA adequacy, DOI–BLM–NV–S010–2025–0006–DNA and DOI–BLM–NV–S010–2026–0019–DNA, were prepared in connection with this notice of realty action.

Submit comments to the address in the **ADDRESSES** section. Before including your address, phone number, email address, or other personally identifiable information in your comment, you should be aware that your entire comment—including any personally identifiable information—may be made publicly available at any time. While you can ask us in your comment to withhold your personally identifiable information from public review, we cannot guarantee that we will be able to do so.

Any comments regarding the proposed sale will be reviewed by the BLM Nevada State Director or other authorized official of the Department of the Interior, who may sustain, vacate, or modify this realty action in response to such comments. In the absence of any comments, this realty action will become the final determination of the Department of the Interior.

The use of the modified competitive sale method is consistent with 43 CFR 2711.3–2. Public lands may be offered for sale by modified competitive bidding procedures when the authorized officer determines it is necessary based on public policies. Utilizing an online auction would support Presidential Memorandum, *Delivering Emergency Price Relief for American Families and Defeating the Cost-of-Living Crisis* (January 20, 2025) and encourage greater participation by qualified bidders.

Federal law requires that bidders must be:

(1) A citizen of the United States, 18 years of age or older;

(2) A corporation subject to the laws of any state or of the United States;

(3) A state, State instrumentality, or political subdivision authorized to hold property; or

(4) An entity legally capable of conveying and holding lands or

interests therein under the laws of the State of Nevada.

The successful bidder must submit proof of citizenship or articles of incorporation within 30 days from receipt of acceptance of bid letter. Evidence of United States citizenship is a birth certificate, passport, or naturalization papers. Citizenship documents or Articles of Incorporation (as applicable) must be provided to the BLM LVFO for each sale.

To participate in the BLM bidding process, you must register and obtain a bidder number. Registration for online bidding will be available prior to the sale date at Efficient Markets' website *https://www.efficientmarkets.com.* In the listings section of the website, click on the ''Register'' button on the ''BLM Nevada SNPLMA Land Sale'' tile to register for the sale. A free Efficient Markets account is required to register. To review the listings, obtain maps, and get information on how to submit competitive online bids, click on the ''View Listings'' button on the ''BLM Nevada SNPLMA Land Sale'' tile in the listings section of the website. A submitted online internet bid is a binding offer to purchase.

To participate in this sale, prospective buyers must create an Efficient Markets account, complete the Efficient Markets Bidding Terms Agreement, request a bidding allowance, and register for the BLM Nevada 20-Parcel SNPLMA Land Sale. Efficient Markets may require approximately five business days to determine bidder's financial qualifications. Additional information on how to register at Efficient Markets may be found at *https://www.efficientmarkets.com.* Assistance creating an Efficient Markets account and registering for the sale is available by telephoning the Efficient Markets' Government Resources department at 877–351–4488 and by using the following link to create a Buyer's Account: *https://www.efficientmarkets.com* and create a Basic Account. After the account is created, complete your profile by submitting bank account information and requesting a bid allowance. The following information will be required:

- Bank Name
- Banker's Name
- Telephone Number of Banker
- Address of Bank
- Requested Bid Allowance amount.

Efficient Markets will verify the Bank Name is a recognized financial institution and contact the banker to ask if the prospective buyer has the financial means to cover the requested Bid Allowance, which is the limit or ceiling for bids and is NOT recorded as a bid or offer per property at auction. Upon receiving an affirmative answer, the allowance will be granted.

Important notes regarding your Bid Allowance: For security reasons, a bidder must contact its banker and grant permission to speak to Efficient Markets about its Bid Allowance request. Efficient Markets will not request the account balance or ask any questions about assets or lines of credit. Efficient Markets will not request the bank account number, nor can it withdraw funds.

The auction website is open to the public. The internet-based land sale can be observed in real-time. However, you must register as a bidder on the website in advance to submit bids for a parcel. The auction website will be active and available for use approximately 10 days after the date of this notice and will remain available for viewing until the completion of the auction. The available parcels listed in this notice will be detailed on Efficient Markets website. Interested parties may visit the website at any time. Potential bidders may register for the online auction as soon as the auction website is active.

Potential bidders are encouraged to visit the website prior to the start of the open bidding period to become familiar with the site and review the bidding instructions available at *https://www.efficientmarkets.com.* Supporting documentation is available on the website to familiarize new users to the process and answer frequently asked questions.

Payments to the BLM will not be made through the auction website. At the conclusion of the final parcel's bidding period, the successful bidder for each parcel will be provided instructions by the online auction system via email on how to make the required payment to the BLM. In addition, you may be required to pay a commission fee to Efficient Markets of 1.5 percent of the highest qualifying bid for each parcel purchased by successful bidders. Efficient Markets will submit a separate invoice via email to each successful bidder for the total amount due to the BLM and a separate invoice for the amount due to Efficient Markets.

Parcels will begin online bidding at the established FMV. Each parcel will have its own unique open bidding period, with start and stop times clearly identified on the auction website. The open bidding period for each parcel will run for 24 hours from start to finish, and only bids placed during this 24-hour period will be accepted. Each parcel will close bidding sequentially so that each bidder will know if it is the highest winning bid before subsequent parcels close. The website will display each current high bid, and the high bid bidder's number.

The online system allows participants to submit maximum bids, which is the highest amount a bidder is willing to pay for each parcel, to enable a bidder to participate in the online auction without having to be logged into the website at the time the auction period closes. The auction website provides a full explanation of placing maximum bids, as well as an explanation of how it works to place bids on your behalf to maintain your high bidder status up to the chosen maximum bid amount. The BLM strongly encourages potential bidders to review the bidding tutorial in the Frequently Asked Questions area on the auction website in advance of the sale. Efficient Markets will declare the highest qualifying bid as the high bid. The successful bidder must submit a deposit of not less than 20 percent of the successful bid amount by 4:00 p.m. PT on the first business day following the close of the sale, in the form of a certified check, postal money order, electronic fund transfer, bank draft, or cashier's check made payable in U.S. dollars to the ''Department of the Interior, Bureau of Land Management.''

The BLM will send the successful bidder(s) an acceptance of bid letter with detailed information for full payment. In accordance with 43 CFR 2711.3–1(d), the successful bidder will forfeit the bid deposit if it fails to pay the full purchase price within 180 days of the sale. The BLM will make no exceptions. The BLM cannot accept the remainder of the bid price at any time following the 180th day after the sale.

If a bidder is the apparent successful bidder with respect to multiple parcels and that bidder fails to submit the minimum 20 percent bid deposit resulting in default on any single parcel following the sale, the BLM may cancel the sale of all parcels to that bidder. If a successful bidder cannot consummate the transaction for any reason, the BLM may consider the second highest bidder to purchase the parcel. If there are no acceptable bids, a parcel may remain available for sale on a future date without further legal notice.

The BLM LVFO must receive the request for escrow instructions prior to 30 days before the prospective patentee's scheduled closing date. There are no exceptions.

All name changes and supporting documentation must be received at the BLM LVFO by 4:30 p.m. PT, 30 days from the date on the high-bidder letter. There are no exceptions. To submit a name change, the apparent successful bidder must submit the name change in

writing on the Certificate of Eligibility form to the BLM LVFO.

The BLM must receive the remainder of the full bid price for the parcel no later than 4:30 p.m. PT, within 180 days following the day of the sale. The successful bidder must submit payment in the form of a certified check, postal money order, bank draft, cashier's check, or make available by electronic fund transfer payable in U.S. dollars to the ''Department of the Interior—Bureau of Land Management'' to the BLM LVFO. The BLM will not accept personal or company checks.

Arrangements for electronic fund transfer to the BLM for payment of the balance due must be made a minimum of two weeks prior to the payment date. The BLM will not sign any documents related to 1031 Exchange transactions. The bidder is responsible for timing for completion of such an exchange. The BLM cannot be a party to any 1031 Exchange.

In accordance with 43 CFR 2711.3–1(f), the BLM may accept or reject any or all offers to purchase or withdraw any parcel of land or interest therein from sale within 30 days, if the BLM authorized officer determines consummation of the sale would be inconsistent with any law, or for other reasons as may be provided by applicable law or regulations. No contractual or other rights against the United States may accrue until the BLM officially accepts the offer to purchase and the full bid price is paid.

If a parcel is not sold pursuant to this Notice of Realty Action, the parcel may remain available for sale on a continuing basis for a limited period of time, as determined by the Authorized Officer, until sold, as specified in this Notice. Per 43 CFR 2711.3–1(e), if there are no acceptable bids, a parcel may remain available for direct sale on a continuing basis until sold or until termination of segregation, without further legal notice to any party who did not originally bid on the parcel during the auction period. Unsold parcel(s) will be listed on the BLM SNPLMA land sales web page under the land sales tab. The first qualified party to submit the required 20 percent deposit of the Fair Market Value to the Las Vegas Field Office, in the form and manner required by this Notice, will be deemed the qualified buyer and will be subject to all timelines, due dates, terms, and conditions set forth in this Notice of Realty Action.

According to the SNPLMA, as amended, Public Law 105–263 section 4(c), lands identified within the Las Vegas Valley Disposal Boundary are withdrawn from location and entry under the mining laws and from operation under the mineral leasing and geothermal leasing laws until such time as the Secretary of the Interior (Secretary) terminates the withdrawal or the lands are patented.

Upon publication of this notice in the **Federal Register**, and until completion of this sale, the BLM will no longer accept land use applications affecting the parcels identified for sale. The parcels may be subject to land use applications received prior to publication of this notice if processing the application would have no adverse effect on the marketability of title, or the FMV of the parcel.

Terms and Conditions: FLPMA Section 209, 43 U.S.C. 1719(a), states that ''all conveyances of title issued by the Secretary . . . shall reserve to the United States all minerals in the lands.'' Accordingly, all minerals for the sale parcels will be reserved to the United States. The patents, when issued, will contain a mineral reservation to the United States for all minerals.

In response to requests to clarify this mineral reservation as it relates to mineral materials, such as sand and gravel, we refer interested parties to the regulations at 43 CFR 3601.71(b), which provides that the owner of the surface estate of lands with reserved Federal minerals may ''use a minimal amount of mineral materials'' for ''personal use'' within the boundaries of the surface estate without a sales contract or permit. The regulation provides that all other use, absent statutory or other express authority, requires a sales contract or permit. The BLM refers interested parties to the explanation of this regulatory language in the preamble to the final rule published in the **Federal Register** in 2001, available at *https://www.federalregister.gov/d/01-29001,* which states that minimal use ''would not include large-scale use of mineral materials, even within the boundaries of the surface estate'' (66 FR 58892). Further explanation is contained in the BLM Instruction Memorandum No. 2014–085 (April 23, 2014), available on the BLM's website at *https://www.blm.gov/policy/im-2014-085.*

The following numbered terms and conditions will appear on the conveyance documents for the sale parcels:

1. All mineral deposits in the lands so patented, and to it, or persons authorized by it, the right to prospect for, mine, and remove such deposits from the same under applicable law and regulations to be established by the Secretary are reserved to the United States, together with all necessary access and exit rights.

2. A right-of-way is reserved for ditches and canals constructed by authority of the United States under the Act of August 30, 1890 (43 U.S.C. 945).

3. The parcels are subject to valid existing rights.

4. The parcels are subject to reservations for roads, public utilities, and flood control purposes, both existing and proposed, in accordance with the local governing entities' transportation plans.

5. An appropriate indemnification clause protecting the United States from claims arising out of the patentee's use, occupancy, or occupations on the patented lands.

To the extent required by law, the parcel is subject to the requirements of section 120(h) of the CERCLA, as amended. Accordingly, notice is hereby given that the lands have been examined, and no evidence was found to indicate that any hazardous substances have been stored for one year or more, nor that any hazardous substances have been disposed of or released on the subject properties.

No warranty of any kind, express or implied, is given by the United States as to the title, whether or to what extent the land may be developed, its physical condition, future uses, or any other circumstance or condition. The conveyance of a parcel will not be on a contingency basis.

Authority: 43 CFR 2711.3–2.

Bruce Sillitoe,

Field Manager, Las Vegas Field Office.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[A2407–014–004–065516, O2509–014–004–125222.1; LLUTC03000]

Realty Action: Recreation and Public Purposes Act Classification and Segregation of Public Land for Ivins City, Washington County, Utah

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action.

SUMMARY: The Bureau of Land Management (BLM) has examined 80 acres of public land in Washington County, Utah, and has found them suitable for classification for lease and subsequent conveyance under the provisions of the Recreation and Public Purposes (R&PP) Act, as amended. Ivins City applied under the R&PP Act and proposes to use the land to develop a

cemetery, public works yard, and regional recreation park.

DATES: Interested parties must submit written comments, postmarked or delivered no later than January 4, 2027.

ADDRESSES: Written comments may be mailed or hand delivered to: Field Manager, BLM St. George Field Office, 4001 E Aviator Drive, St. George, Utah 84790. Comments may also be submitted by email to *BLM_UT_SGFO_Comments@blm.gov*. The BLM will not consider comments received by telephone. Further information regarding the project is available for review during business hours, (8 a.m. to 4:30 p.m. Mountain Time), Monday through Friday, except during Federal holidays, at the address listed above.

FOR FURTHER INFORMATION CONTACT: Lennie McConnell, Realty Project Manager, by email at *BLM_UT_SGFO_Comments@blm.gov,* by telephone at 435–688–3200, or you may visit the BLM St. George Field Office (SGFO) at the above-listed address. Further information regarding the project is available for review at the SGFO during business hours, (8 a.m. to 4:30 p.m. Mountain Time), Monday through Friday, except during Federal holidays. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: Ivins City is a political subdivision of the State of Utah and is therefore a qualified applicant under the R&PP Act.

Conveyance of the lands for recreational or public purposes use is consistent with the St. George Field Office Resource Management Plan (1999), as amended. A parcel-specific environmental assessment (EA), Document No. DOI–BLM–UT–C030–2026–0022–EA, was prepared in connection with this realty action and may be viewed at *https://eplanning.blm.gov/Project-Home/?id=130aa8d8-e238-f111-88b3-001dd802f839*. The lands are legally described as:

Salt Lake Meridian, Utah

T. 42 S., R. 16 W.,
sec. 7, S½NE¼.

The area described contains 80 acres, according to the official plat of survey of said land, on file with the BLM.

All interested parties will receive a copy of this notice once it is published in the **Federal Register**. A copy of the notice will also be published in a newspaper of local circulation once a week for three consecutive weeks.

Upon publication of this notice in the **Federal Register**, the lands will be segregated from all other forms of appropriation under the public land laws, including locations under the mining laws, except for lease or conveyance under the R&PP Act and leasing under the mineral leasing laws.

The lease or conveyance of the land, if it occurs, will be subject to the following terms, conditions, and reservations:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States Act of August 30, 1890 (43 U.S.C. 945).

2. Provisions of the R&PP Act and to all applicable regulations of the Secretary of the Interior.

3. All mineral deposits in the land so patented, and the right to prospect for, mine, and remove such deposits from the same under applicable law and regulations as established by the Secretary of the Interior are reserved to the United States, together with all necessary access and exit rights.

4. Lease or conveyance of the parcel is subject to valid existing rights.

5. An appropriate indemnification clause protecting the United States from claims arising out of the lessee's or patentee's use, occupancy, or operations on the leased or patented lands.

6. For public works and park areas, a reversionary provision stating that title shall revert to the United States upon a finding, after notice and opportunity for a hearing, that, without the approval of the Secretary of the Interior or delegate, the patentee or its approved successor attempted to convey title to or control over the lands to another, the lands have been devoted to a use other than that for which the lands were conveyed, the lands have not been used for the purpose for which the lands were conveyed for a 5-year period, or the patentee has failed to follow the approved development plan or management plan. No portion of the lands shall, under any circumstances, revert to the United States if any such portion has been used for solid waste disposal or for any other purpose which may result in the disposal, placement, or release of any hazardous substance.

7. For cemetery use area, a limited reversionary provision that may cause the land to revert to the United States if, at the end of 5 years after the date of conveyance, the land is not being used in accordance with the approved plan of development. If, at any time, the patentee transfers to another party ownership of any portion of the land not used for the purpose(s) specified in the application and the approved plan of development, the patentee shall pay the BLM the fair market value, as determined by the authorized officer, of the transferred portion as of the date of transfer, including the value of any improvements thereon. No portion of the lands shall, under any circumstance, revert to the United States if any such portion has been used for cemetery purposes, solid waste disposal or for any other purpose which may result in the disposal, placement, or release of any hazardous substance.

8. Any other terms or reservations the authorized officer determines appropriate to ensure public access and proper management of Federal lands and interests therein.

Classification Comments: Comments on the classification are restricted to whether the land is physically suited for the public and recreational uses as proposed, whether the use will maximize the future use or uses of the land, whether the use is consistent with local planning and zoning, or if the use is consistent with State and Federal programs.

Application Comments: Interested parties may also submit comments regarding the specific use proposed in the application and plan of development and management, whether the BLM followed proper administrative procedures in reaching the decision, or any other factor not directly related to the suitability of the lands for a cemetery, public works facilities, and park as proposed. The EA, maps, and associated documents are available for review at the location listed in the **ADDRESSES** section earlier. Comments must be submitted to the addresses listed in the **ADDRESSES** section by the deadline listed in the **DATES** section.

Adverse comments will be treated as protests which will be reviewed by the BLM Utah State Director or other authorized officials, who may sustain, vacate, or modify this realty action. In the absence of any adverse comments, the classification will become effective on January 19, 2027. The lands will not be offered for lease until after the classification becomes effective.

Before including your address, phone number, email address, or other personal identifying information in your comment, be aware your entire comment, including your personal identifying information, may be made publicly available at any time.

(Authority: 43 CFR 2741.5)

Christina Price,

State Director, Acting.

BILLING CODE 4331–25–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[A2407–014–004–065516, #O2509–014–004–125222.1; LLUTP02000]

Realty Action: Recreation and Public Purposes Act Classification and Conveyance of Public Land in Kane County, UT

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action.

SUMMARY: The Bureau of Land Management (BLM) examined 20 acres of public land in Kane County, Utah, and has found it suitable for classification for conveyance to the Western Kane County Special Service District #1 (district) under the provisions of the Recreation and Public Purposes (R&PP) Act, as amended. The district proposes to use the land to expand its existing landfill.

DATES: Interested parties must submit written comments regarding this classification and conveyance of public land, postmarked or delivered no later than January 4, 2027.

ADDRESSES: Written comments may be mailed, or hand delivered to the BLM Kanab Field Office, 669 South Highway 89A, Kanab, UT 84741. Comments may also be submitted by email to *BLM_UT_KN_Mail@blm.gov.* The BLM will not consider comments received by telephone.

FOR FURTHER INFORMATION CONTACT: Levi LeFevre, Realty Specialist, by email at *llefevre@blm.gov* or telephone at 435–644–1276. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The proposed conveyance is in the public interest, consistent with the 2008 Kanab Field Office Resource Management Plan. The parcel is legally described as:

Salt Lake Meridian, Utah

T. 40 S., R. 7 W.,
Sec. 26, SW¼SE¼SW¼;
Sec. 35, NW¼NW¼NW¼.

The areas described aggregate 20 acres, according to the official plats of the surveys of the said land, on file with the BLM.

The land is contiguous to the current landfill operated by the district. The district will move and/or expand the landfill operations campus facilities (*i.e.,* truck scale, attendant office, equipment shed, etc.) onto the westernmost 10-acre parcel to improve customer and worker traffic flows. The district will continue expansion of the existing landfill buried waste cells to the east onto the easternmost 10-acre parcel to handle future waste disposal needs.

The proposed conveyance would enable the district to continue providing essential waste-disposal services to the rural communities of Orderville, Alton, Glendale, Mount Carmel, and the district's northwestern region. Expanding the landfill would sustain local employment required to operate the facility and manage solid waste from the district's growing recreational area. The expanded landfill would also support businesses that rely on waste-management services for recreation-based visitation in the region.

Upon publication of this notice in the **Federal Register**, the land will be segregated from all other forms of appropriation under the public land laws, including location under the mining laws, except for lease and/or conveyance under the R&PP Act and leasing under the mineral leasing laws. The segregation will terminate upon issuance of a patent, upon final rejection of the application, or 18 months from the date of this notice, whichever occurs first. All interested parties will receive this notice after it is published in the **Federal Register**. It will also appear in a local newspaper once a week for 3 consecutive weeks.

The conveyance of the land, if it occurs, will be subject to the following terms, conditions, and reservations:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States Act of August 30, 1890 (26 Stat. 391; 43 U.S.C. 945).

2. Provisions of the R&PP Act and to all applicable regulations of the Secretary of the Interior.

3. All mineral deposits in the land so patented, and the right to prospect for, mine, and remove such deposits from the same under applicable law and regulations as established by the Secretary of the Interior are reserved to the United States, together with all necessary access and exit rights.

4. Conveyance of the parcel is subject to valid existing rights.

5. An appropriate indemnification clause protecting the United States from claims arising out of the patentee's use, occupancy, or operations on the patented land.

6. A limited reversionary provision stating that the title shall revert to the United States upon a finding, after notice and opportunity for a hearing, that the patentee has not substantially developed the lands in accordance with the approved POD on or before the date five years after the date of conveyance. No portion of the land shall under any circumstance revert to the United States if any such portion has been used for solid waste disposal, or for any other purpose, which may result in the disposal, placement, or release of any hazardous substance.

7. The patentee shall comply with all Federal and State laws applicable to the disposal, placement, or release of hazardous substances.

8. Any other reservations that the authorized officer determines as appropriate to ensure public access and proper management of Federal lands and interests therein.

Classification Comments: Interested parties may submit comments involving the classification and suitability of the land for expansion and development of the existing landfill. Comments on the classification are restricted to whether the land is physically suited for the proposal, whether the use will maximize the future use or uses of the land, whether the use is consistent with local planning and zoning, or if the use is consistent with State and Federal programs.

Application Comments: Interested parties may also submit comments regarding the specific use proposed in the application and Plan of Development, and whether the BLM followed proper administrative procedures in considering the decision to convey under the R&PP Act.

Any adverse comments will be reviewed by the BLM Utah State Director or other authorized officials of the Department of the Interior, who may sustain, vacate, or modify this realty action. In the absence of any adverse comments, the classification will become effective on January 19, 2027. The land will not be offered for lease or conveyance until after the classification becomes effective.

Before including your address, phone number, email address, or other personal identifying information in any comment, be aware that your entire comment including your personal

identifying information may be made publicly available at any time.

(Authority: 43 CFR 2741.5)

Christina J. Price,

State Director, Acting.

[FR Doc. 2026–23559 Filed 11–18–26; 8:45 am]

BILLING CODE 4331–25–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Dave Allen Wright, M.D.; Decision and Order

On May 6, 2026, the Drug Enforcement Administration (DEA or Government) issued an Order to Show Cause (OSC) to Dave Allen Wright, M.D., of Cincinnati, Ohio (Registrant). Request for Final Agency Action (RFAA), Exhibit (RFAAX) 1, at 1, 3. The OSC proposed the revocation of Registrant's Certificate of Registration No. BW4012720, alleging that Registrant is ''currently without authority to prescribe, administer, dispense, or otherwise handle controlled substances in the State of Ohio, the state in which [he is] registered with DEA.'' *Id.* at 2 (citing 21 U.S.C. 824(a)(3)).

The OSC notified Registrant of his right to file a written request for hearing, and that if he failed to file such a request, he would be deemed to have waived his right to a hearing and be in default. *Id.* at 2 (citing 21 CFR 1301.43). Here, Registrant did not request a hearing, and the Agency finds him to be in default. RFAA, at 2.[1] ''A default, unless excused, shall be deemed to constitute a waiver of the registrant's/applicant's right to a hearing and an admission of the factual allegations of the [OSC].'' 21 CFR 1301.43(e).

Further, ''[i]n the event that a registrant . . . is deemed to be in default . . . DEA may then file a request for final agency action with the Administrator, along with a record to support its request. In such circumstances, the Administrator may enter a default final order pursuant to [21 CFR] 1316.67.'' *Id.* 1301.43(f)(1). Here, the Government has requested final agency action based on Registrant's default pursuant to 21 CFR 1301.43(c), (f), and 1301.46. RFAA, at 3; *see also* 21 CFR 1316.67.

Findings of Fact

The Agency finds that, in light of Registrant's default, the factual allegations in the OSC are deemed admitted. 21 CFR 1301.43(e). According to the OSC, on October 1, 2025, Registrant's Ohio medical license expired by its own terms. RFAAX 1, at 1. According to Ohio online records, of which the Agency takes official notice, Registrant's Ohio medical license remains expired.[2] eLicense Ohio Professional Licensure License Lookup, https://elicense.ohio./oh_verifylicense (last visited date of signature of this Order). Accordingly, the Agency finds that Registrant is not licensed to practice medicine in Ohio, the state in which he is registered with DEA.[3]

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under 21 U.S.C. 823 ''upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.''

With respect to a practitioner, DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner's registration. *Gonzales* v. *Oregon,* 546 U.S. 243, 270 (2006) (''The Attorney General can register a physician to dispense controlled substances 'if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.' . . . The very definition of a 'practitioner' eligible to prescribe includes physicians 'licensed, registered, or otherwise permitted, by the United States or the jurisdiction in which he practices' to dispense controlled substances. 802(21).'').[4] The Agency has applied these principles consistently. *See, e.g., Lawrence Rudolph, D.M.D.,* 89 FR 79310 (2024); *Henry-Norbert O. Ndekwe, M.D.,* 90 FR 15990 (2025); *Benson Sergiles, P.A.,* 90 FR 32016 (2025).

According to Ohio statute, ''[n]o person shall knowingly obtain, possess, or use a controlled substance or a controlled substance analog,'' except pursuant to a ''prescription issued by a licensed health professional authorized to prescribe drugs if the prescription was issued for a legitimate medical purpose.'' Ohio Rev. Code § 2925.11(A),

[1] Based on the Government's submissions in its RFAA dated August 5, 2026, the Agency finds that service of the OSC on Registrant was adequate. The included declaration from a DEA Diversion Investigator (DI) indicates that on May 14, 2026, the DI attempted to contact Registrant via his registered telephone number because the DI had previously found out that Registrant was no longer employed at his registered address and had retired on or around September 2025. RFAAX 2, at 1–2. On the same date, the DI attempt to contact Registrant via his registered email address. *Id.* at 2. Later, on the same date, Registrant returned the DI's phone call and informed the DI that he was no longer domiciled in Ohio or practicing at his registered location, nor was his registered email address a valid means of contact. *Id.* Upon the DI's request to provide an alternative address to personally serve or mail the OSC to Registrant, Registrant declined to inform DEA where he was currently residing for the purposes of updating his registration or receiving mail. *Id.* Registrant did, however, provide the DI with an alternative email address and stated that he could be contacted at this alternative email address. *Id.* Following the telephone conversation, the DI emailed a copy of the OSC to the alternative email address that Registrant had provided and later received an e-receipt confirming successful delivery of the email. *Id.; see also id.,* Appendixes A–B. Here, the Agency finds that Registrant was successfully served the OSC by email and that the DI's efforts to serve Registrant by other means were ''reasonably calculated, under all the circumstances, to apprise [Registrant] of the pendency of the action.''' *Jones* v. *Flowers,* 547 U.S. 220, 226 (2006) (quoting *Mullane* v. *Central Hanover Bank & Trust Co.,* 339 U.S. 306, 314 (1950)). Therefore, due process notice requirements have been satisfied. *See Mohammed S. Aljanaby, M.D.,* 82 FR 34552, 34552 (2017) (finding that service by email satisfies due process where the email is not returned as undeliverable and other methods have been unsuccessful); *Emilio Luna, M.D.,* 77 FR 4829, 4830 (2012) (same).

[2] Under the Administrative Procedure Act, an agency ''may take official notice of facts at any stage in a proceeding—even in the final decision.'' United States Department of Justice, Attorney General's Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979).

[3] Pursuant to 5 U.S.C. 556(e), ''[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.'' The material fact here is that Registrant, as of the date of this Order, is not licensed to practice medicine in Ohio. Accordingly, Registrant may dispute the Agency's finding by filing a properly supported motion for reconsideration of findings of fact within fifteen calendar days of the date of this Order. Any such motion and response shall be filed and served by email to the other party and to the Office of the Administrator, Drug Enforcement Administration, at *dea.addo.attorneys@dea.gov*.

[4] This rule derives from the text of two provisions of the Controlled Substances Act (CSA). First, Congress defined the term ''practitioner'' to mean ''a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.'' 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner's registration, Congress directed that ''[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.'' 21 U.S.C. 823(g)(1). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, DEA has held repeatedly that revocation of a practitioner's registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. *See, e.g., Elias Garcia Garcia, P.A.,* 90 FR 31242 (2025); *Jason Weakley, R.N., A.P.R.N.,* 90 FR 10085 (2025); *Khursheed Haider, M.D.,* 90 FR 21950 (2025).

(B)(1)(d) (2025). Further, a '''[l]icensed health professional authorized to prescribe drugs or 'prescriber' means an individual who is authorized by law to prescribe drugs or dangerous drugs or drug therapy related devices in the course of the individual's professional practice.'' *Id.* § 4729.01(I)(2026).[5] The Ohio statute further defines an authorized prescriber as ''[a] physician authorized under Chapter 4731. of the Revised Code to practice medicine and surgery, osteopathic medicine and surgery, or podiatric medicine and surgery.'' *Id.* § 4729.01(I)(5)(2026). Additionally, Ohio law permits ''[a] licensed health professional authorized to prescribe drugs, if acting in the course of professional practice, in accordance with the laws regulating the professional's practice'' to prescribe or administer schedule II, III, IV, and V controlled substances to patients. *Id.* § 3719.06(A)(1)(a)–(b)(2025).

Here, the undisputed evidence in the record is that Registrant lacks a license to practice medicine in Ohio. As already discussed, an individual must be a licensed health professional authorized to prescribe drugs in order to handle controlled substances in Ohio. Thus, because Registrant is not a licensed health professional authorized to prescribe drugs in Ohio, and, therefore, is not authorized to handle controlled substances in Ohio, Registrant is not eligible to maintain a DEA registration in Ohio. Accordingly, the Agency will order that Registrant's DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. BW4012720 issued to Dave Allen Wright, M.D. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(g)(1), I hereby deny any pending applications of Dave Allen Wright, M.D., to renew or modify this registration, as well as any other pending application of Dave Allen Wright, M.D., for additional registration in Ohio. This Order is effective December 21, 2026.

Signing Authority

This document of the Drug Enforcement Administration was signed on November 6, 2026, by DEA Administrator Terrance C. Cole. That document with the original signature and date is maintained by DEA. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DEA Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of DEA. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Heather Achbach,

Federal Register Liaison Officer, Drug Enforcement Administration.

[FR Doc. 2026–23508 Filed 11–18–26; 8:45 am]

BILLING CODE 4410–09–P

[5] Section 4729.01 of the Ohio Revised Code was updated on October 9, 2026, but does not change any of the material parts or alter the Agency's decision in this matter.

NATIONAL MEDIATION BOARD

Notice of Proposed Information Collection Request

AGENCY: National Mediation Board.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the National Mediation Board (NMB) will be submitting an information Collection Request (ICR) entitled ''Application for Investigation of Representation Dispute'' to the Office of Management and Budget (OMB) for review and approval. The NMB is seeking the reinstatement, with non-substantive change, of this previously approved collection of information. The change to the information collection is a non-substantive one related to the change in the agency's Washington, DC headquarters address, which was effective August 1, 2026. The NMB did not receive comments on this information collection during the 60-day notice and comment period. OMB will accept comments from the public during the review and approval period. OMB may act on the NMB's ICR only after the 30-day comment period in this notice has closed.

DATES: Comments are due by December 21, 2026.

ADDRESSES: Submit written comments and recommendations for this information collection to the following website: *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function and entering either the title of the information collection or the OMB control number: 3140–0001.

FOR FURTHER INFORMATION CONTACT: To request a copy of the proposed information collection, email NMB Program Management Specialist Keaira Butler at *keaira.butler@nmb.gov.* Please specify the complete title of the information collection when making your request. If you have questions about the information collection or the NMB's reinstatement request, contact John Gross, Counsel, National Mediation Board, Office of Legal Affairs, P.O. Box 23300, Washington, DC 20026; telephone number: 202–815–1647; email address: *gross@nmb.gov.*

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The NMB publishes that notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection contains the following: (1) Type of review requested, *e.g.,* new, revision extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Record keeping burden.

The proposed information collection was previously published in the **Federal Register**, 91 FR 58712–58714, on September 16, 2026 and allowed 60 days for public comment. No comments were received. The purpose of this notice is to allow an additional 30 days for public comment. We encourage written comments and suggestions addressing the following issues: (1) Is this collection necessary to the proper functions of the agency; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the agency enhance the quality, utility, and clarity of the information to be collected; and (5) how might the agency minimize the burden of this collection on the respondents, including through the use of information technology.

Title of Collection: Application for Investigation of Representation Dispute.

OMB Control Number: 3140–0001.

Type of Review: Reinstatement, with non-substantive change, of a previously approved collection of information.

Affected Public: Carrier and Union Officials, and employees of railroads and airlines.

Frequency of Collection: On occasion.

Respondent's Obligation: Voluntary.

Estimated Reporting and Recordkeeping Hour Burden:

Responses: 25 annually.

Burden Hours: 6.25.

1. *Abstract:* When a dispute arises among a carrier's employees as to who will be their bargaining representative, the NMB is required by Section 2, Ninth of the Railway Labor Act (RLA), 45 U.S.C. 152, Ninth, to investigate the dispute, to determine who is the authorized representative, if any, and to certify such representative. The NMB's duties do not arise until its services have been invoked by a party to the dispute. The RLA is silent as to how the invocation of a representation dispute is to be accomplished and the NMB has not promulgated regulations requiring any specific vehicle. Nonetheless, 29 CFR 1203.2, provides that applications for the services of the NMB under Section 2, Ninth, to investigate representation disputes may be made on printed forms secured from the NMB's Office of Legal Affairs or on the internet at *http://www.nmb.gov.* The application requires the following information: the name of the carrier involved; the name or description of the craft or class involved; the name of the petitioning organization or individual; the name of the organization currently representing the employees, if any; the names of any other organizations or representatives involved in the dispute; and the estimated number of employees in the craft or class involved. This basic information is essential in providing the NMB with the details of the dispute so that it can determine what resources will be required to conduct an investigation.

2. The application form provides necessary information to the NMB so that it can determine the amount of staff and resources required to conduct an investigation and fulfill its statutory responsibilities. Without this information, the NMB would have to delay the commencement of the investigation, which is contrary to the intent of the RLA.

3. There is no improved technological method for obtaining this information. The burden on the parties is minimal in completing the Application for Investigation of Representation Dispute.

4. There is no duplication in obtaining this information.

5. Rarely are representation elections conducted for small businesses. Employers are not permitted to request our services regarding representation investigations. The labor organizations, which are the typical requesters, are national in scope and would not qualify as small businesses. Even in situations where the invocation comes from a small labor organization, we believe the burden in completing the application form is minimal and that no reduction in burden could be made.

6. The NMB is required by Section 2, Ninth, to investigate the dispute, to determine who is the authorized representative, if any, and to certify such representative. The NMB has no ability to control the frequency, technical, or legal obstacles, which would reduce the burden.

7. The information requested by the NMB is consistent with the general information collection guidelines of 5 CFR 1320.6 and 5 CFR 1320.8(b)(3). The NMB has no ability to control the data provided or timing of the invocation. The burden on the parties is minimal in completing the Application for Investigation of Representation Dispute.

8. No payments or gifts have been provided by the NMB to any respondents of the form.

9. There are no questions of a sensitive nature on the form.

10. The total time burden on respondents is 6.25 hours annually—this is the time required to collect information. After consulting with a sample of people involved with the collection of this information, the time to complete this information collection is estimated to average 15 minutes per response, including gathering the data needed and completion and review of the information.

Number of respondents per year: 25.

Estimated time per respondent: 15 minutes.

Total burden hours per year: 6.25 (25 × .25 hours).

11. The total collection and mail cost burden on respondents is estimated at $222.00 annually ($201.50 time cost burden + $20.50 mail cost burden.)

a. The respondents will not incur any capital costs or start up costs for this collection.

b. Cost burden on respondents—detail:

The total time burden annual cost is $201.50.

Time burden basis: The total hourly burden per year, upon respondents, is 6.25.

Staff cost = $201.50.

$32.24 per hour—based on mid level clerical salary.

$32.24 × 6.25 hours per year = $201.50.

We are estimating that a mid-level clerical person, with an average salary of $32.24 per hour, will be completing the Application for Investigation of Representation Dispute form. The total burden is estimated at 6.25 hours, therefore, the total time burden cost is estimated at $201.50 per year.

The total annual mailing cost to respondents is $20.50.

Number of applications mailed by:

Respondents per year: 25.

Total estimated cost: $20.50 (25 × $.82 stamp).

The collection of this information is not mandatory; it is a voluntary request from airline and railroad carrier employees seeking to invoke an investigation of a representation dispute. After consulting with a sample of people involved with the collection of this information, the time to complete this information collection is estimated to average 15 minutes per response, including gathering the data needed and completion and review of the information. However, the estimated hour burden costs of the respondents may vary due to the complexity of the specific question in dispute.

The application form is available from the NMB's Office of Legal Affairs and is also available on the internet at *http://www.nmb.gov,* which is the primary source of the form.

12. The total annualized Federal cost is $340.00. This cost represents the processing cost of the applications once they are received by the NMB. There are no printing or mailing costs. (The NMB has not received any requests to print and mail a form for a number of years.) The completed applications are maintained by the Office of Legal Affairs.

a. Processing Cost = $340.00.

Basis (processing cost): Representation is requested approximately 25 times per year and it takes approximately 20 minutes to process each application.

Staff Cost = $340.00.

$.68 per minute (GS 11 Step 1 base hourly rate of $40.94 per hr. ÷ 60).

$.68 × 20 minutes per mailing = $13.60.

$13.60 × 25 times per year = $340.00.

13. Item 13—no change in annual reporting and recordkeeping hour burden.

14. The information collected by the application will not be published.

15. The NMB will display the OMB expiration date on the form.

16(a)—the form does not reduce the burden on small entities; however, the burden is minimized and voluntary.

16(b)—the form does not indicate the retention period for record keeping requirements.

16(c)—not applicable, the form is not part of a statistical survey.

Dated: November 17, 2026.

Michael Jerger,

Chief Financial Officer, Acting Director of Administration, National Mediation Board.

[FR Doc. 2026–23589 Filed 11–18–26; 8:45 am]

BILLING CODE 7550–01–P

POSTAL REGULATORY COMMISSION

[Docket No. MC2027–31; Order No. 9801]

Competitive Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is recognizing a recent filing by the Postal Service to make minor classification changes for International Mail and to make accompanying classification changes to the Mail Classification Schedule. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* December 4, 2026.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov*. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Commission Action
III. Ordering Paragraphs

I. Introduction

On November 13, 2026, pursuant to 39 CFR 3040.190, the Postal Service filed a notice to make minor changes to Part D, which refers to the Country Price Lists for International Mail, in the *Mail Classification Schedule* (MCS) section 4000, and to make minor changes to the list of countries with postal operators that dispatch Inbound Express Mail Service (EMS) 2 to the U.S. in MCS section 2515.6.7.[1] Effective January 17, 2027, the Postal Service plans to change the country name ''Nauru'' to ''Naoero'' or the ''Republic of Naoero'' in MCS sections 4000 and 2515.6.7, as a result of changes to the official name of Nauru as notified by the designated operator of Nauru to the Universal Postal Union (UPU). Notice at 1. The Postal Service provides a discussion of the proposed changes' compliance with 39 CFR 3040.190. Notice at 2–6.

II. Commission Action

The Commission establishes Docket No. MC2027–31 for consideration of matters raised by the Notice.

Pursuant to 39 CFR 3040.191, the Commission has posted the Notice on its website and invites comments on whether the Postal Service's filings are consistent with the policies and applicable criteria of chapter 36 of title 39 of the United States Code, 39 CFR 3040.190–192, and any applicable Commission directives and orders. Comments are due December 4, 2026. The public portions of the filings can be accessed via the Commission's website (*https://www.prc.gov*).

The Commission appoints Christopher Mohr to represent the interests of the general public (Public Representative) in this docket, pursuant to 39 CFR 3040.191(d). The Public Representative does not represent any individual person, entity, or particular point of view, and, when Commission attorneys are appointed, no attorney-client relationship is established.

III. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket No. MC2027–31 for consideration of matters raised by the Postal Service's Notice.

2. Pursuant to 39 CFR 3040.191(d), Christopher Mohr is appointed to serve as an officer of the Commission (Public Representative) to represent the interests of the general public in this proceeding.

3. Comments are due December 4, 2026.

4. This Order, or an abstract thereof, shall be published in the **Federal Register**.

By the Commission.

Danielle LeFlore,

Legal Assistant.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Public Proceeding(s)
III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). The Public Representative does not represent any individual person, entity or particular point of view, and, when Commission attorneys are appointed, no attorney-

[1] Notice of United States Postal Service of Minor Classification Changes, November 13, 2026, at 1 (Notice).

client relationship is established. Section II also establishes comment deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s) identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041. Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. *See* 39 CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR 3041.405(c)–(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests.

II. Public Proceeding(s)

1. *Docket No(s).:* MC2027–36 and K2027–38; *Filing Title:* USPS Request to Add Priority Mail, USPS Ground Advantage & Parcel Select Contract 11 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 16, 2026; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Kenneth Moeller; *Comments Due:* November 24, 2026.

III. Summary Proceeding(s)

None. *See* Section II for Public Proceedings.

This Notice will be published in the **Federal Register**.

Danielle LeFlore,

Legal Assistant.

BILLING CODE 7710–FW–P

POSTAL REGULATORY COMMISSION

[Docket No. C2026–25; Presiding Officer's Ruling No. 2]

Complaint

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: This document provides the deadline date to file a notice of intervention and discusses aspects of the procedural schedule and case management procedures.

ADDRESSES: For additional information, Presiding Officer's Ruling No. 2 can be accessed electronically through the Commission's website at *https://www.prc.gov.*

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Background
II. Ordering Paragraphs

I. Background

This complaint stems from a dispute between the Postal Service and Complainant regarding delivery of mail to his home. Complainant asserts three causes of action in his Complaint. Specifically, Count I alleges that the Postal Service has breached a settlement agreement between the parties. Counts II alleges that the Postal Service violated 39 U.S.C. 403(1) by failing to maintain an efficient system of sorting and delivering the mail. Count III alleges that the Postal Service violated 39 U.S.C. 403(c) by discriminating against him in the delivery of his mail.

After determining that Complainant has raised sufficient issues of material law and fact as to Count III, the Commission appointed a presiding officer to preside over the conduct of the proceedings, including but not limited to scheduling, discovery, potential hearings, and briefing in this matter. The Presiding Officer therefore enumerates the provisions that will govern discovery as well as other related procedures. The Presiding Officer also denies certain procedural motions as moot or premature.

II. Ordering Paragraphs

It is ordered:

1. The deadline to file a notice of intervention pursuant to 39 CFR 3010.142 is December 1, 2026.

2. The parties and counsel shall follow the procedural schedule and case management procedures established by this Presiding Officer's Ruling.

3. The United States Postal Service's Motion to Strike Complainant's Premature Discovery, filed September 25, 2026, is denied.

4. Commission dockets staff shall remove the Complainant's Response in Opposition to Respondent's Answer to the Complaint, filed September 22, 2026, from this docket.

5. United States Postal Service's Motion to Strike Complainant's Opposition to the Answer to the Complaint, filed September 25, 2026, is denied.

6. This Order, or an abstract thereof, shall be published in the **Federal Register**.

By the Commission.

Mallory Richards,

Attorney-Advisor.

I. Introduction and Overview
II. Initial Administrative Actions
III. Ordering Paragraphs

I. Introduction and Overview

On November 12, 2026, the Postal Service filed notice with the Commission concerning changes in rates and classifications of general

applicability for Competitive products.[1] The Postal Service represents that, as required by 39 CFR 3035.102(b) and 39 CFR 3035.104(b), the Notice includes an explanation and justification for the changes, the effective date, and a schedule of the changed rates. *See* Notice at 1–2. The changes are scheduled to take effect on January 17, 2027. *Id.* at 1.

Attached to the Notice is Governors' Decision No. 26–8, which states the new prices are in accordance with 39 U.S.C. 3632 and 3633 and 39 CFR 3035.102.[2] The Governors' Decision provides an analysis of the Competitive products' price and classification changes intended to demonstrate that the changes comply with 39 U.S.C. 3633 and 39 CFR part 3035. Governors' Decision No. 26–8 at 1. The attachment to the Governors' Decision sets forth the classification and price changes and includes draft *Mail Classification Schedule* (MCS) language for Competitive products of general applicability.

The Notice also includes an application for non-public treatment of the attributable costs, contribution, and cost coverage data in the unredacted version of the annex to the Governors' Decision, as well as the supporting materials for the data. Notice at 1–2.

Planned price and classification changes. The Governors' Decision includes an overview of the Postal Service's planned price changes which are summarized in the table below.

TABLE I–1—PROPOSED PRICE CHANGES

Product name	Average price increase (%)
Domestic Competitive Products	
Priority Mail Express	5.9
Retail	5.9
Commercial	5.9
Nonstandard Fees	16.0
Priority Mail	5.9
Retail	5.9
Commercial	5.9
Nonstandard Fees	16.0
Parcel Select	5.9
Destination Delivery Unit	5.8
Destination Sectional Center Facility	5.9
Connect Local	6.0
Nonstandard Fees	16.0
USPS Ground Advantage	5.9
Retail	5.9
Commercial	5.9
Alaska Limited Overland Routes	9.9
Nonstandard Fees	16.0
Domestic Extra Services	
Package Intercept Service	8.0
Adult Signature Service	
Required	8.2
Restricted Delivery	8.0
Address Enhancement Services (AMS API)	20.0
Premium Forwarding Service	
Weekly Reshipment (Priority Mail)	4.2
Per-Container Reshipment (Local)	4.2
Enrollment (annual)—online	8.0
Enrollment—retail	7.8
Priority Mail Half Tray Box	15.1
Priority Mail Full Tray Box	0
Priority Mail Express Half Tray Box	28.0
Priority Mail Express Full Tray Box	9.6
Competitive Post Office Box	0
Label Delivery Service	9.1
Pickup On Demand	7.9
Premium Data Retention and Retrieval Service	8.0
International Competitive Products	
Priority Mail Express International	7.9
Retail	7.9
Commercial	7.4
Priority Mail International	7.9
Retail	8.1

[1] USPS Notice of Changes in Rates and Classifications of General Applicability for Competitive Products, November 12, 2026 (Notice). Pursuant to 39 U.S.C. 3632(b)(2), the Postal Service is obligated to publish the Governors' Decision and record of proceedings in the **Federal Register** at least 30 days before the effective date of the new rates.

[2] Notice, Decision of the Governors of the United States Postal Service on Changes in Rates and Classification of General Applicability for Competitive Products (Governors' Decision No. 26–8), at 1 (Governors' Decision No. 26–8).

TABLE I–1—PROPOSED PRICE CHANGES—Continued

Product name	Average price increase (%)
Commercial	6.2
International Priority Airmail	7.9
First-Class Package International Service	7.9
Retail	7.9
Commercial	7.4
International Ancillary Services and Special Services	
International Certificate of Mailing	6.3
International Insurance	0
Customs Clearance and Delivery Fee	8.0

Source: *See* Governors' Decision No. 26–8 at 2–7. Percentage increases for Premium Forwarding Services are based on the proposed rates specified in the supporting materials.

Further classification changes are summarized as follows:

- The Postal Service will apply a flat 11 percent fuel surcharge to domestic Priority Mail Express, Priority Mail, Parcel Select, and USPS Ground Advantage packages. Initially, the fuel surcharge will be static but eventually the Postal Service intends that it will adjust the surcharge on a weekly basis, based on average fuel prices reported by the Energy Information Administration (EIA). The new, permanent surcharge is set to take effect on the expiration date of the current time limited price change that has been in place since April 26, 2026.
- The Postal Service will introduce a repricing fee for postage overpayments and underpayments caused by inaccurate dimensions or weight. For an underpayment, the fee will equal 20 percent of the unpaid amount and will be added to the postage due. For an overpayment, 20 percent will be deducted from the refundable amount, subject to Postal Service refund rules.
- The Noncompliance Fee will be renamed the Dimension and Weight Noncompliance Fee and will apply only when dimensions or weight are missing.
- The proposed changes to Premium Forwarding Service clarify that the online enrollment fee is annual. The Postal Service will also add Priority Mail Express as an option under Premium Forwarding Service Residential (PFSR) and Premium Forwarding Service Commercial (PFSC) and add Priority Mail Flat Rate Envelopes, Priority Mail Sacks, Priority Mail Express Flat Rate Envelopes, and Priority Mail Express Sacks options for PFSC. PFSC customers may control reshipment frequency for periods of up to 12 months.
- The Postal Service will introduce a Shipping Label Noncompliance Fee under Domestic Competitive products for incorrect barcode symbology or constructs.
- The Postal Service will expand the number of Price Groups for Priority Mail Express International (PMEI) Flat Rate Envelope from 8 to 20 groups and the number of Price Groups for Priority Mail International (PMI) Flat Rate Envelopes and Boxes from 8 to 20 groups.
- The Postal Service will add USPS Delivered Duty Paid (DDP) as an optional feature for International Priority Airmail (IPA) to more accurately reflect timing, payment and procedures related to USPS DDP.
- The Postal Service will revise the country group assignments for PMEI, PMI, IPA, and First-Class Package International Service (FCPIS) in, and to the format of, Part D Country Price Lists for International Mail so that it can price these products more effectively.

Notice at 2–5; Governors' Decision No. 26–8 at 2–5.

II. Initial Administrative Actions

The Commission establishes Docket No. CP2027–1 to consider the Postal Service's Notice. Interested persons may express views and offer comments on whether the planned changes are consistent with 39 U.S.C. 3632, 3633, and 3642, 39 CFR part 3035, and 39 CFR 3040 subparts B and E. Comments are due no later than December 4, 2026. For specific details of the planned price changes, interested persons are encouraged to review the Notice, which is available on the Commission's website at *www.prc.gov.*

Pursuant to 39 U.S.C. 505, Christopher Mohr is appointed to serve as Public Representative to represent the interests of the general public in this docket. The Public Representative does not represent any individual person, entity or particular point of view, and, when Commission attorneys are appointed, no attorney-client relationship is established.

III. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket No. CP2027–1 to provide interested persons an opportunity to express views and offer comments on whether the planned changes are consistent with 39 U.S.C. 3632, 3633, and 3642, 39 CFR part 3035, and 39 CFR 3040 subparts B and E.

2. Comments are due no later than December 4, 2026.

3. Pursuant to 39 U.S.C. 505, the Commission appoints Christopher Mohr to serve as an officer of the Commission (Public Representative) to represent the interests of the general public in this docket.

4. The Secretary shall arrange for publication of this Order in the **Federal Register**.

By the Commission.

Sarah Wessel,

Senior Paralegal Specialist.

BILLING CODE 7710–FW–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106907; File No. SR–24X–2026–32]

Self-Regulatory Organizations; 24X National Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Warrant Performance Incentive Program

November 16, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934

(''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that, on November 5, 2026, 24X National Exchange LLC (''24X'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to make certain amendments to its warrant performance incentive program.[3] The proposed rule change is available on the Exchange's website at *https://equities.24exchange.com/regulation* and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange adopted a warrant performance incentive program (''Program'') to allow Members of the Exchange who participate in the Program (''Participants'')[4] to earn the right to purchase Non-Voting Common Units[5] of 24X US Holdings LLC (''24X US Holdco''), the Exchange's parent company.[6] As described in the Warrant Program Release, each Member of the Exchange may become a Participant in the Program by prepaying $500,000 in Exchange fees (''Prepayment Fee'') and satisfying the Program eligibility requirements.[7] Upon joining the Program, each Participant will receive a warrant that vests based on the Participant's achievement of certain minimum trading volumes (''Target Volume'')[8] on the Exchange during each designated pre-determined period in which the Program is in effect (''Measurement Period'')[9] and the Exchange's achievement of a minimum market share during such Measurement Periods (''24X Minimum Overall Market Share'').[10] When the warrants vest, Participants will have the right to exercise the warrants to purchase a certain number of 24X US Holdco Non-Voting Common Units.

The Exchange has determined to revise the Program to make additional Non-Voting Common Units available to be purchased by Participants starting in the first Measurement Period of 2027 (''Additional Equity''), under different terms than those applicable to the Non-Voting Common Units currently available to be purchased through the Program (''Original Equity''). Specifically, the right to purchase Additional Equity would extend through two additional Measurement Periods in 2028, would be subject to a reduced Prepayment Fee, and would be based on maker volume only instead of total trading volume.

The Exchange also proposes to make two additional changes to the terms of the Program that would apply to the right to purchase both the Original Equity and the Additional Equity. Specifically, as described below, the Exchange proposes to eliminate the 24X Minimum Overall Market Share threshold requirement and exclude certain dates from the calculation of Target Volume in each Measurement Period. All other aspects of the Program would remain the same as described in the Warrant Program Releases.[11]

a. Proposed Changes With Respect to Additional Equity Only

i. Description and Timing of Additional Equity

The Original Equity consists of 1,098,040 Non-Voting Common Units representing 10% of the outstanding total Units on a fully diluted basis of 24X US Holdco as of September 29, 2025. The Original Equity may be purchased by Participants upon the exercise of warrants that vest in accordance with the Program based on trading that occurs during the Program Period, which begins on and including October 14, 2025 and ends on and including December 31, 2027.[12] The Original Equity is allocated among the Measurement Periods for each of the three years of the Program as follows:[13]

---

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The proposed rule change was originally filed as SR–24X–2026–26 on October 1, 2026 (withdrawn on October 28, 2026) and SR–24X–2026–27 on October 29, 2026 (withdrawn on November 5, 2026). SR–24X–2026–26 and SR–24X–2026–27 have been replaced by the instant filing.

[4] A recent amendment to the Program also allows Sponsored Participants to be joint Participants in the Program together with a Sponsoring Member of the Exchange. *See* Securities Exchange Act Rel No. 105481 (May 13, 2026), 91 FR 28695 (May 18, 2026) (SR–24X–2026–16). For purposes of this proposed rule change, ''Participant'' collectively refers to both Members of the Exchange who are Participants of the Program and Sponsored Participants of the Exchange who jointly participate in the Program together with a Sponsoring Member of the Exchange.

[5] 24X notes that it filed a proposed rule change for immediate effectiveness to amend the Second Amended and Restated Limited Liability Company Agreement of 24X US Holdings LLC, as amended (''24X US Holdco LLC Agreement'') to accommodate aspects of the proposal that affected the 24X US Holdco LLC Agreement. The changes to the 24X Holdco LLC Agreement included amendments to authorize the issuance of Non-Voting Common Units as well as the implementation of the liquidity program related to the Program. Securities Exchange Act Rel. No. 104098 (Sept. 26, 2025), 90 FR 47029 (Sept. 30, 2025) (SR–24X–2025–11).

[6] Securities Exchange Act. Rel. No. 104018 (Sept. 23, 2025), 90 FR 46437 (Sept. 26, 2025) (SR–24X–2025–04) (''Warrant Program Release''). The Exchange later amended certain dates in the Program. Securities Exchange Act Rel. No. 104257 (Nov. 25, 2025), 90 FR 55207 (Dec. 1, 2025) (SR–24X–2025–12) (''Amended Warrant Program Release''). These two releases are collectively referred to as the ''Warrant Program Releases.''

[7] *See* Warrant Program Release at 46437–46438.

[8] As discussed in more detail in the Warrant Program Release, the ''Target Volume'' is 5% of the average daily trading volume on the Exchange, where the daily trading volume is calculated based on total aggregated average daily volume traded over each Measurement Period.

[9] As discussed in more detail in the Warrant Program Releases, the ''Measurement Period'' for Year 1 (2025) is October 14, 2025 through December 31, 2025; the Measurement Periods for Year 2 (2026) are (1) January 1–March 31, 2026, (2) April 1–June 30, 2026, (3) July 1–September 30, 2026, and (4) October 1–December 31, 2026; and the Measurement Periods for Year 3 (2027) are (1) January 1–March 31, 2027, (2) April 1–June 30, 2027, (3) July 1–September 30, 2027 and (4) October 1–December 31, 2027.

[10] As discussed in more detail in the Warrant Program Release, the ''24X Minimum Overall Market Share'' is defined as follows: (1) for each Measurement Period of Year 2, the 24X Minimum Overall Market Share is 0.50% of the Consolidated Average Daily Volume (''CADV'') for all NMS Stocks eligible for trading on 24X; and (2) for each Measurement Period of Year 3, the 24X Minimum Overall Market Share is 1.00% of the CADV for all NMS Stocks eligible for trading on 24X.

[11] *See supra* note 3.

[12] *See* Warrant Program Release at 46438–46439.

[13] *See id.*

Measurement period	Non-voting common units	Percentage of outstanding total units on a fully diluted basis of 24X US Holdco as of September 29, 2025 (%)
October 14, 2025–December 31, 2025	219,608	2.00
January 1, 2026–March 31, 2026	82,353	0.75
April 1, 2026–June 30, 2026	82,353	0.75
July 1, 2026–September 30, 2026	82,353	0.75
October 1, 2026–December 31, 2026	82,353	0.75
January 1, 2027–March 31, 2027	137,255	1.25
April 1, 2027–June 30, 2027	137,255	1.25
July 1, 2027–September 30, 2027	137,255	1.25
October 1, 2027–December 31, 2027	137,255	1.25
Total	1,098,040	10

The Exchange proposes to also make the Additional Equity available for purchase by Participants upon the exercise of warrants that vest in accordance with the Program based on trading that occurs during the last four Measurement Periods of the existing Program (from and including January 1, 2027 through and including December 31, 2027) and also during two additional Measurement Periods that would begin on and including January 1, 2028 and end on and including June 30, 2028. The Additional Equity would consist of 2,759,103 Non-Voting Common Units representing 20% of the outstanding total Units on a fully diluted basis of 24X US Holdco as of September 29, 2025. The Additional Equity would be allocated among the above-mentioned Measurement Periods as follows:

Measurement period	Non-voting common units	Percentage of outstanding total units on a fully diluted basis of 24X US Holdco as of September 29, 2025 (%)
January 1, 2027–March 31, 2027	1,023,038	7.50
April 1, 2027–June 30, 2027	310,012	2.25
July 1, 2027–September 30, 2027	310,012	2.25
October 1, 2027–December 31, 2027	310,012	2.25
January 1, 2028–March 31, 2028	310,012	2.25
April 1, 2028–June 30, 2028	496,017	3.50
Total	2,759,103	20

The following table describes the overall number and allocation of Non-Voting Common Units that would be available for purchase by Participants in accordance with the proposed revised Program: [14]

Measurement period	Original equity non-voting common units	Additional equity non-voting common units	Combined original equity and additional equity non-voting common units	Combined Percentage of outstanding total units on a fully diluted basis of 24X US Holdco as of September 29, 2025 (%)
October 14, 2025–December 31, 2025	219,608	.....	219,608	1.60
January 1, 2026–March 31, 2026	82,353	.....	82,353	0.60
April 1, 2026–June 30, 2026	82,353	.....	82,353	0.60
July 1, 2026–September 30, 2026	82,353	.....	82,353	0.60
October 1, 2026–December 31, 2026	82,353	.....	82,353	0.60
January 1, 2027–March 31, 2027	137,255	1,023,038	1,160,293	8.50
April 1, 2027–June 30, 2027	137,255	310,012	447,267	3.25
July 1, 2027–September 30, 2027	137,255	310,012	447,267	3.25
October 1, 2027–December 31, 2027	137,255	310,012	447,267	3.25
January 1, 2028–March 31, 2028	.....	310,012	310,012	2.25

[14] Note that the Original Equity percentages of outstanding total Units on a fully diluted basis of 24X US Holdco as of September 29, 2025 are now reduced due to the dilutive effect of adding the Additional Equity Non-Voting Common Units to the Program.

Measurement period	Original equity non-voting common units	Additional equity non-voting common units	Combined original equity and additional equity non-voting common units	Combined Percentage of outstanding total units on a fully diluted basis of 24X US Holdco as of September 29, 2025 (%)
April 1, 2028–June 30, 2028	.....	496,017	496,017	3.50
Total	1,098,040	2,759,103	3,857,143	28.00

As described below, the Exchange proposes that depending on which Prepayment Fee they elect to pay, Participants of the Program may become eligible to earn either (i) the right to purchase both Original Equity and Additional Equity or (ii) the right to purchase Additional Equity only.

ii. Prepayment Fee

The Exchange proposes that current Participants of the Program who have already paid the $500,000 Prepayment Fee will be automatically eligible to earn the right to purchase Additional Equity for any Measurement Period in which the Program thresholds are met, as long as those Participants continue to meet the other Program eligibility requirements. The Exchange also proposes that any Participant who joins the Program after the proposed rule change goes into effect can either (i) prepay $500,000 in Exchange fees to become eligible to earn the right to purchase both Original Equity and Additional Equity, or (ii) prepay a reduced amount of $250,000 in Exchange fees to become eligible to earn the right to purchase Additional Equity only. The Prepayment Fee must be tendered by the first day of each quarter of the Program Period to participate in the Program as of such quarter until April 1, 2028.

The following are examples of the timing of participation in the Program:

- If Participant A joined the Program by tendering the $500,000 Prepayment Fee and executing the required documentation on October 14, 2025 (the date trading commenced on the Exchange), then Participant A's trading starting on October 14, 2025 would be counted toward the Target Volume for Year 1 and thereafter until the end of the Program Period. Participant A would be eligible to earn the right to purchase both Original Equity and Additional Equity for the entire Program Period.
- If Participant B joined the Program by tendering the $500,000 Prepayment Fee and executing the required documentation on October 22, 2026, then Participant B's trading starting on January 1, 2027 would be counted toward the Target Volume for the first quarter of Year 3 (*i.e.,* the first Measurement Period for Year 3) and thereafter until the end of the Program Period. Participant B would be eligible to earn the right to purchase both Original Equity and Additional Equity starting with the Measurement Period that begins on January 1, 2027 throughout the end of the Program Period.
- If Participant C joined the Program by tendering the $250,000 Prepayment Fee and executing the required documentation on October 22, 2026, then Participant C's trading starting on January 1, 2027 would be counted toward the Target Volume for the first quarter of Year 3 (*i.e.,* the first Measurement Period for Year 3) and thereafter until the end of the Program Period. Participant C would be eligible to earn the right to purchase Additional Equity only starting with the Measurement Period that begins on January 1, 2027 throughout the end of the Program Period.
- If Participant D joined the Program by tendering the $500,000 Prepayment Fee and executing the required documentation on October 1, 2027, then Participant D's trading starting on October 1, 2027 would be counted toward the Target Volume for the fourth quarter of Year 3 (*i.e.,* the last Measurement Period in Year 3) and the first quarter of Year 4 (*i.e.,* the only Measurement Period in Year 4). Participant D would be eligible to earn both the right to purchase Original Equity for the last Measurement Period in Year 3 and the right to purchase Additional Equity for the last Measurement Period in Year 3 and the only two Measurement Periods in Year 4. No Member may become a Participant that is eligible to earn Original Equity after October 1, 2027.
- If Participant E joined the Program by tendering the $250,000 Prepayment Fee and executing the required documentation on April 1, 2028, then Participant E's trading starting on April 1, 2028 would be counted toward the Target Volume for the second quarter of Year 4 (*i.e.,* the second Measurement Period in Year 4). Participant E would be eligible to earn the right to purchase Additional Equity for the second Measurement Period in Year 4. No Member may become a Participant after April 1, 2028.

All other terms regarding the Prepayment Fee would remain unchanged as described in the Warrant Program Releases.

iii. Target Volume Calculation

As described in the Warrant Program Release, the Target Volume that Participants must meet in order for their warrants to vest is 5% of the average daily trading volume on the Exchange, where the daily trading volume is calculated based on total aggregated average daily volume traded over each Measurement Period.[15] The Exchange proposes that with respect to Additional Equity only, Target Volume for each Measurement Period will be calculated based solely on Participants' maker volume (*i.e.,* trading volume which adds liquidity to the Exchange). Target Volume will continue to be calculated based on total trading volume with respect to Original Equity.

Pursuant to the Program requirements, the Non-Voting Common Units subject to the Program would be allocated among Participants who have met or outperformed the Target Volume during each Measurement Period on a pro rata basis based on volume contributions to the 24X market. As described in the Warrant Program Release, the volumes for each Participant are calculated for each of the Measurement Periods,[16] and the Non-Voting Common Units indicated are allocated among Participants after the end of each Measurement Period. With respect to Additional Equity only, the Exchange proposes to add two Measurement Periods during the first and second quarters of Year 4.

[15] *See* Warrant Program Release at 46439.

[16] The volume for the Exchange is also calculated for each of the Measurement Periods.

Therefore, the Non-Voting Common Units that would be available to be purchased for the first Measurement Period of Year 4 in accordance with the Program will be allocated among Participants that meet the Target Volume on or before April 5, 2028 and after March 31, 2028, based on trading during the first Measurement Period of Year 4, which is the quarterly period from January 1, 2028 through March 31, 2028. The Non-Voting Common Units that would be available to be purchased for the second Measurement Period of Year 4 in accordance with the Program will be allocated among Participants that meet the Target Volume on or before July 5, 2028 and after June 30, 2028, based on trading during the second Measurement Period of Year 4, which is the quarterly period from April 1, 2028 through June 30, 2028. All other terms regarding Target Volume would remain unchanged as described in the Warrant Program Releases.

b. Proposed Changes With Respect to Both Original Equity and Additional Equity

i. Elimination of 24X Minimum Overall Market Share Threshold

As described in the Warrant Program Releases, the 24X Minimum Overall Market Share is a designated target percentage of the CADV for all NMS Stocks eligible for trading on 24X for each relevant Measurement Period.[17] The CADV is calculated based on the volume reported by all exchanges and trade reporting facilities to a consolidated transaction reporting plan for the relevant Measurement Period.

In order to incentivize participation in the Program and bring greater volume and liquidity to the Exchange, the Exchange proposes to eliminate the 24X Minimum Overall Market Share requirement with respect to Original Equity, and to not implement a 24X Minimum Overall Market Share requirement with respect to Additional Equity. Elimination of the requirement would make Program outcomes more predictable for Participants because Exchange market share depends on the trading activity of all Members and on changes in overall U.S. equity market volume, rather than the individual actions of each Participant. By allowing Participants to determine whether their warrants will vest solely by choosing to meet the Target Volume and not having to rely on other factors outside their control, the proposed revised Program would both attract more new Participants and encourage existing Participants to increase the amount of liquidity they contribute to the Exchange. The Exchange also notes that another national securities exchange offers a warrant program that does not include an exchange market share threshold as a warrant vesting condition.[18]

ii. Exclusion of Dates

With respect to both Original Equity and Additional Equity, the Exchange also proposes to exclude the following dates from the calculation of the Target Volume that Participants must meet in each Measurement Period in order for their warrants to vest:

Date	Description
November 30, 2026	MSCI Index Rebalance.
December 11, 2026	Russell Index Reconstitution.
December 18, 2026	S&P 500, S&P MidCap 400, and S&P SmallCap 600 Quarterly Rebalances.
February 28, 2027	MSCI Index Rebalance.
March 19, 2027	S&P 500, S&P MidCap 400, and S&P SmallCap 600 Quarterly Rebalances.
May 27, 2027	MSCI Index Rebalance.
June 18, 2027	S&P 500, S&P MidCap 400, and S&P SmallCap 600 Quarterly Rebalances.
June 25, 2027	Russell Index Reconstitution.
August 31, 2027	MSCI Index Rebalance.
September 17, 2027	S&P 500, S&P MidCap 400, and S&P SmallCap 600 Quarterly Rebalances.
November 30, 2027	MSCI Index Rebalance.
December 10, 2027	Russell Index Reconstitution.
December 17, 2027	S&P 500, S&P MidCap 400, and S&P SmallCap 600 Quarterly Rebalances.
February 29, 2028	MSCI Index Rebalance.
March 17, 2028	S&P 500, S&P MidCap 400, and S&P SmallCap 600 Quarterly Rebalances.
May 31, 2028	MSCI Index Rebalance.
June 16, 2028	S&P 500, S&P MidCap 400, and S&P SmallCap 600 Quarterly Rebalances.
June 23, 2028	Russell Index Reconstitution.

On equivalent rebalance and reconstitution dates in the past, a significant percentage of consolidated trading volume has occurred during the closing auctions on the primary listing exchanges. Because these auction executions were not available to the Exchange or Program Participants, they artificially increased consolidated market volume while providing no realistic opportunity for Participants to increase trading volume on 24X. The Exchange therefore proposes to exclude the above dates from the calculation of Target Volume given that their inclusion would create a diluting effect that would make it more difficult for Participants to achieve Target Volume through ordinary trading activity.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Exchange Act[19] in general, and furthers the objectives of Section 6(b)(5) of the Exchange Act[20] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) of the Exchange Act[21] requirement that the rules of an

[17] *See* Warrant Program Release at 46439.

[18] *See* Securities Exchange Act Rel. No. 105090 (Mar. 26, 2026), 91 FR 16044 (Mar. 31, 2026) (SR–TXSE–2026–003).

[19] 15 U.S.C. 78f.

[20] 15 U.S.C. 78f(b)(5).

[21] *See id.*

exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed rule change is consistent with Section 6(b)(4) of the Exchange Act,[22] which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees and other charges among its members and other persons using its facilities.

The Exchange believes that the proposed changes to the Program are consistent with the Act. Making the Additional Equity available for purchase through the Program at a reduced Prepayment Fee and based on maker volume only would both encourage additional Participant enrollment in the Program, and encourage Participants to provide additional volume and liquidity to the Exchange. The Exchange believes that an increase in volume and liquidity would benefit all market participants by providing more trading opportunities and tighter spreads, even to those market participants that do not participate in the Program, thereby perfecting the mechanism for a free and open market and national market system.

Moreover, the elimination of the 24X Minimum Overall Market Share requirement and exclusion of certain dates from the calculation of Target Volume with respect to both Original Equity and Additional Equity would make it more likely that Participants' warrants would vest in any given Measurement Period. As described above, elimination of the 24X Minimum Overall Market Share requirement would allow Participants to have more control over whether their warrants vest in any given Measurement Period,[23] and exclusion of certain dates from the calculation of Target Volume would remove a potential diluting effect that otherwise would hamper Participants' ability to achieve Target Volume through ordinary trading activity. These incentives would promote the long-term interests of the Exchange by attracting new Participants and encouraging existing Participants to contribute to the growth and success of the Exchange via actively providing liquidity on the 24X market, and to provide additional investment and funding which could be used for the regulation and operation of the Exchange. The Exchange believes that the additional funds provided as a result of these changes would enable the Exchange to have greater capacity to carry out the purposes of the Act and to comply with the provisions of the Act, the rules and regulations thereunder, and the rules of the Exchange, which, in turn, would protect investors and the public interest.

The Exchange believes that the proposed changes are equitable and not unfairly discriminatory because all Participants may earn the right to purchase both Original Equity and Additional Equity on the same terms and conditions. The additional Measurement Period, Prepayment Fee schedule, and Target Volume modification with respect to Additional Equity are objective and the same for all Participants. Likewise, the elimination of the 24X Minimum Overall Market Share requirement and exclusion of certain dates from the calculation of Target Volume with respect to both Additional Equity and Original Equity are based on objective standards and would have the same effect for all Participants.

A Participant's total equity ownership of 24X US Holdco Units, including any purchased through the exercise of vested warrants via the Program, shall be subject to the ownership limitations of the 24X US Holdco LLC Agreement.[24] Accordingly, a Participant will not be able to exercise warrants for Non-Voting Common Units to the extent that such exercise would violate such ownership limitations.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act. The Exchange believes that the Program as amended by this proposed rule change would increase both intermarket and intramarket competition by incentivizing Participants to add liquidity to the Exchange, which will enhance the quality of quoting and increase the volume of securities traded on the Exchange. To the extent that there is an additional competitive burden on non-Participants, the Exchange believes that such burden is appropriate because the Program should incentivize Participants to add liquidity to the Exchange and thus enhance the volume of securities traded on the Exchange. To the extent that this purpose is achieved, the Exchange believes that all of the Exchange's market participants would benefit from the improved market liquidity.

Given the robust competition for volume among equities markets, implementing a program to attract liquidity addition like the one proposed in this filing is consistent with the abovementioned goals of the Exchange Act. This is especially true for the smaller exchange markets, such as 24X, which are competing for volume with much larger exchanges that dominate the equities trading industry. As a new exchange, 24X will likely continue to have a nominal percentage of the average daily trading volume in equities in the near term, so it is unlikely that the Program could cause any competitive harm to the equities market or to market participants. Rather, the Program is a modest attempt to attract order volume away from larger competitors by adopting an innovative pricing strategy. The Exchange notes that if the Program results in a modest percentage increase in the average daily trading volume on 24X, while such percentage would represent a large volume increase for 24X, it would represent a minimal reduction in volume of its larger competitors in the industry. The Exchange believes that the Program will help further competition, because market participants will have yet another option in determining where to post liquidity if they factor the benefits of 24X equity participation into the determination.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)[25] of the Act and subparagraph (f)(2) of Rule 19b-4 thereunder,[26] because it establishes a due, fee, or other charge imposed by the Exchange. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the

[22] 15 U.S.C. 78f(b)(4).

[23] The proposed removal of the 24X Minimum Overall Market Share requirement is also consistent with the structure of the warrant program of another national securities exchange. *See supra* n. 18.

[24] *See, e.g.,* Section III of the 24X US Holdco LLC Agreement.

[25] 15 U.S.C. 78s(b)(3)(A).

[26] 17 CFR 240.19b–4(f)(2).

Commission shall institute proceedings under Section 19(b)(2)(B) [27] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–24X–2026–32 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–24X–2026–32. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–24X–2026–32 and should be submitted on or before December 10, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[28]

Vanessa A. Countryman,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106908; File No. SR–ICC–2026–011]

Self-Regulatory Organizations; ICE Clear Credit LLC; Notice of Filing of Proposed Rule Change Relating to the Treasury Rules, Treasury Clearing Service Initial Margin Approach Model Description Document, Treasury Clearing Service Guaranty Fund and Stress Test Approach Model Description Document, and Treasury Clearing Service Risk Parameter Setting and Review Policy

November 16, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Securities Exchange Act'' or the ''Act''), 15 U.S.C. 78s(b)(1) and Rule 19b–4 thereunder, 17 CFR 240.19b–4, notice is hereby given that on November 3, 2026, ICE Clear Credit LLC (''ICC'' or ''ICE Clear Credit'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared primarily by ICC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The principal purpose of the proposed rule change is to make revisions to ICC's Treasury Clearing Rules (''Treasury Rules'' or ''Rules'') and certain Treasury Clearing Service policies and procedures (''Treasury Risk Documentation''), including the Treasury Clearing Service Initial Margin Approach Model Description Document (''IM Approach Model Description''), Treasury Clearing Service Guaranty Fund and Stress Test Approach Model Description Document (''GF and Stress Test Approach Model Description''), and Treasury Clearing Service Risk Parameter Setting and Review Policy (''Risk Parameter Policy'').[1]

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, ICC included statements concerning the purpose of and basis for the proposed rule change, security-based swap submission, or advance notice and discussed any comments it received on the proposed rule change, security-based swap submission, or advance notice. The text of these statements may be examined at the places specified in Item IV below. ICC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of these statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) Purpose

ICC proposes changes to the Treasury Rules and Treasury Risk Documentation. As background, ICC filed an application on Form CA–1 (''Application'') under Section 17A of the Securities Exchange Act of 1934 (the ''Act'') [2] with the Securities and Exchange Commission (''Commission'') to register as a clearing agency to provide central counterparty services for transactions involving U.S. Treasury (''Treasury'') securities on August 1, 2025. Notice of ICC's Application was published in the **Federal Register** on August 21, 2025.[3] The Application contained the Treasury Rules and certain other policies and procedures governing the Treasury Clearing Service, including the GF and Stress Test Approach Model Description, IM Approach Model Description, and Risk Parameter Policy. The Commission issued an order granting ICC's Application for registration as a clearing agency to provide central counterparty services for transactions involving Treasury securities on January 30, 2026.[4]

ICC proposes additional changes to the Treasury Rules and Treasury Risk Documentation to facilitate the clearing of Treasury repurchase and reverse repurchase (''repo'') contracts and to make additional clarifications. The proposed changes to the Treasury Rules (i) update and clarify the rules for Variation Payments, (ii) introduce a new margin and settlement model for eligible money funds (the ''Money Fund Margin Model'' or ''Fund Model''), (iii) expand the rules governing Treasury physical settlement to include triparty settlement, (iv) expand the contract terms applicable to repo contracts, and (v) make additional clarification or clean-up changes. The proposed

[1] ICC's Treasury Rules are available on ICC's public website: *https://www.ice.com/publicdocs/clear_credit/ICE_Clear_Credit_Treasury_Clearing_Rules.pdf.* Capitalized terms used but not defined herein have the meanings specified in the Treasury Rules.

[4] *See* Securities Exchange Act Release No. 104762 (January 30, 2026), 91 FR 5528 (February 6, 2026) (File No. 600–45).

changes to the Treasury Risk Documentation provide detail on ICC's risk management approach for repo contracts and make general clarifications throughout the documentation. ICC believes that such revisions will facilitate the prompt and accurate clearance and settlement of securities transactions. ICC proposes to make such changes effective following Commission approval of the proposed rule change. The proposed revisions are described in detail as follows.

Treasury Rulebook Changes

Variation Payments

ICC proposes revising Rule 404 to update and clarify the rules for calculating Variation Payments. The proposed amendments expand the definition of Variation Payment in paragraph (a) to include additional payment types and clarify that Variation Payment calculations may differ for contracts subject to the different Treasury physical settlement provisions in Chapters 22 through 24.

ICC proposes to introduce new defined terms and revise certain existing defined terms in Rule 404. A new defined term, Variation Payment Cycle, is introduced in Rule 404(a)(i) referring to each time as of which ICC determines Variation Payment Requirements.[5] The definition of Variation Payment Requirement would be revised in Rule 404(a)(ii) to refer to the Variation Payment Cycle. As amended, a Treasury Participant's Variation Payment Requirement for a margin category (''Variation Payment Category'') for a Variation Payment Cycle would be the net sum of applicable components, further described below. The revised definition of Variation Payment Requirement also lists specific components that may be included in the variation calculation, depending on the particular contract and manner of settlement. ICC also proposes to specify in Rule 404(a) which Variation Payment-related amounts are expressed as negative or positive values.

ICC proposes to rename Mark-to-Market Price to Mark-to-Market Amount in Rule 404(b) and provide additional detail on such calculation. Currently, Mark-to-Market Price generally refers to a price determined by ICC pursuant to its procedures. The revised definition provides greater specificity. The Mark-to-Market Amount for an open position means the difference between the position's current value and the value of the position determined by reference to the price, rate and other economic terms agreed by the original parties to the trade.

Pursuant to Rule 404(b), for a repo contract, Mark-to-Market Amount would consist of three components capturing the change in value of the repo contract attributable to (i) the change in value of the Purchased Securities[6] (''MTM Collateral Component''); (ii) the prevailing spot repo rate applicable to that repo contract and the remaining term thereof (''MTM Spot Repo Rate Component''); and (iii) the forward repo rate specified in the repo contract and the prevailing repo rate determined by ICC for comparable collateral and residual tenor (''MTM Forward Repo Rate Component''). Additional provisions clarify when such components apply. For example, Rule 404(b)(iv) provides that, in respect of a spot contract,[7] only the MTM Collateral Component applies, because a spot contract does not involve a repurchase contract for which repo rates that would be captured in the MTM Spot Repo Rate Component or the MTM Forward Repo Rate Component are relevant.

ICC proposes MTM Change Payments as a new defined term in Rule 404(c) to refer to the net amount of the Mark-to-Market Amount as of the current Variation Payment Cycle less the Mark-to-Market Amount as of the immediately preceding Variation Payment Cycle. Under Rule 404(c)(i), for the first Variation Payment Cycle for a position, the Mark-to-Market Amount as of the immediately preceding Variation Payment Cycle will be zero, as no Mark-to-Market Amount has previously been determined for that position (and as a result the first MTM Change Payment for that position will equal the full current Mark-to-Market Amount). Each MTM Change Payment transfer would constitute a settlement of the Mark-to-Market Amount, as further described in Rule 404(c)(ii) and (iii).

Rule 404(d) would introduce Price Alignment Amount Payments, calculated using a Price Alignment Rate that is defined as the overnight interest rate determined by ICC for the relevant currency. The Price Alignment Amount Payment means the amount determined by ICC on each Variation Payment Cycle by applying the Price Alignment Rate to the cumulative MTM Change Payments of that Treasury Participant for that Variation Payment Category, as set out in further detail in Rule 404(d). As specified in Rule 404(d)(iii), Price Alignment Amount Payments are determined and settled to account for the funding effect of settling Mark-to-Market Amounts under Rule 404(c), so that the pricing of contracts cleared by ICC is not distorted by reason of such settlement relative to equivalent transactions that are not cleared.

ICC proposes to define Coupon Adjustment Payments and Redemption Adjustment Payments in Rules 404(e) and (f), respectively. ICC would determine a Coupon Adjustment Payment where a coupon or other periodic distribution is paid in respect of Purchased Securities during the term of a repo contract in an amount equal to that coupon or distribution. ICC would determine a Redemption Adjustment Payment where Purchased Securities are redeemed at maturity during the term of a repo contract in an amount equal to the redemption proceeds of those Purchased Securities. Amended Rule 404(g) would revise the definition of Transaction Adjustment Payment, which would reflect the difference between the relevant transaction price and the current ICC Settlement Price.[8]

Additional variation payment provisions are added in Rules 404(h) through (l). Where a settlement obligation is not settled on its scheduled settlement date and the related obligations constitute a fail position, ICC would determine a Fail Settlement Adjustment Payment under paragraph (h) in order to preserve the original economic terms of the failed delivery or receipt obligation. A Fail Charge Payment, as specified in paragraph (i), would be determined under existing Treasury Rule 2205, in the case of certain failures in DVP settlement. Miscellaneous Adjustment Payments would be defined in paragraph (j) as any other amount payable by or to a Treasury Participant for contracts settled through Variation Payments. ICC would maintain a record of the Variation Payment balance of each Treasury Participant for each Variation Payment Category, as specified in paragraph (k). In paragraph (l), ICC would clarify that Variation Payments described in Rule 404 constitute final settlements.

[5] ICC would determine and settle Variation Payments as of the start of each ICE Business Day. An ICE Business Day refers to any day (other than Saturdays, Sundays and holidays observed by ICC) on which ICC is open for business for the Treasury Clearing Service pursuant to Rule 101.

[6] *See infra* note 22.

[7] Each spot contract consists of an agreement by one party to purchase from another party a specified principal amount of an identified Treasury security for an agreed purchase price, for settlement on the next ICC Settlement Day.

[8] *See* amended Rule 2201. ICC proposes to more generally define ICC Settlement Price as the price for a security as determined by ICC.

Money Fund Margin Model

ICC proposes to amend the Treasury Rules to introduce the Money Fund Margin Model, which is intended to facilitate access for registered funds to participate in the Treasury Clearing Service. ICC proposes to adopt a new Treasury Rule 411 to introduce a new margin model. ICC designed this Money Fund Margin Model to be consistent with applicable regulatory requirements for registered funds under the Investment Company Act of 1940,[9] including the full collateralization requirements for repos by registered funds pursuant to Rule 5b–3 and related existing market practices for repos by registered funds.[10] To facilitate participation by registered funds in the Treasury Clearing Service, the Money Fund Margin Model makes certain modifications to the standard margin model applicable to other market participants. Additional details are described below.

Under new Treasury Rule 411(a), ICC may, on written request of a Non-Participant Party (*i.e.,* a customer of a Treasury Participant) that is an Eligible Money Fund, permit such Eligible Money Fund to comply with the Money Fund Margin Model with respect to Eligible Money Fund Transactions (such an Eligible Money Fund, a ''Covered Money Fund'').

New Treasury Rule 411(b) sets out key defined terms applicable to the Money Fund Margin Model. Such terms include Eligible Money Fund, defined as an investment company registered under the Investment Company Act of 1940 [11] and such other types of investment funds as ICC may permit; Eligible Money Fund Transactions, which are eligible repo contracts in which the Covered Money Fund is acting as the Repo Buyer; [12] and Money Fund Custodial Account, which is an account in the name of the Covered Money Fund at a triparty bank acceptable to ICC (the ''Money Fund Custody Bank'').

Rule 411(c) through (l) set out additional legal, risk, operational, and default management provisions for the Money Fund Margin Model, as follows.

- Paragraph (c) describes how an Eligible Money Fund may be designated as a Covered Money Fund. Each Covered Money Fund must enter into an agreement with ICC in such form designated by ICC.
- Paragraph (d) requires each Covered Money Fund to establish a Money Fund Custodial Account, subject to an agreement entered into by the Covered Money Fund, the Money Fund Custody Bank, ICC, and such other persons as ICC may designate.
- Paragraph (e) requires each Eligible Money Fund Transaction to specify an initial haircut (the ''Initial Haircut'') agreed between the Covered Money Fund and its original counterparty (the ''Original Counterparty'').
- Paragraph (f) describes the settlement of the delivery of the Purchased Securities to and from the Money Fund Custodial Account.
- Paragraph (g) restricts a Covered Money Fund generally from transferring, using, rehypothecating or otherwise disposing of any securities transferred to or credited to the Money Fund Custodial Account.
- Paragraph (h) provides for a first priority lien and security interest granted by each Covered Money Fund to ICC in (i) its Money Fund Custodial Account, (ii) the Purchased Securities transferred to such Covered Money Fund, (iii) all securities, financial assets, cash and other property that may be transferred, credited to, or held in the Money Fund Custodial Account, and (iv) all cash or non-cash proceeds of any of the foregoing (collectively, the ''Money Fund Account Collateral''), to secure the obligations in favor of ICC.
- In light of the security interest provided under paragraph (h), paragraph (i) provides generally that neither the Covered Money Fund nor its Treasury Participant is obligated to provide Initial Margin (''IM'') or Variation Payments, and ICC is not obligated to provide Variation Payments.
- Paragraph (j) describes how, upon authorization and direction from the Covered Money Fund and its Treasury Participant, ICC effects settlement of the Final Leg of an Eligible Money Fund Transaction by instructing the Money Fund Custody Bank to transfer the relevant securities from the Money Fund Custodial Account against payment of the applicable cash amount.
- Paragraph (k) provides that the Covered Money Fund is obligated as principal for the performance of its settlement obligations to ICC and the Covered Money Fund's Treasury Participant is not obligated to ICC to perform such obligations. For the avoidance of doubt, Eligible Money Fund Transactions of a Covered Money Fund are considered Client-Related Positions of that Covered Money Fund's Treasury Participant (subject to the provisions in Rule 411), and accordingly are taken into account in determining the Treasury Participant's Treasury Guaranty Fund (''GF'') requirements.[13] This provision also sets out when ICC's obligations to the Treasury Participant and Covered Money Fund in respect of settlement obligations are discharged.
- Paragraph (l) sets out default management provisions and corresponding default management actions to be taken by relevant parties, including in the case of a client default with respect to a Covered Money Fund, a default of the Covered Money Fund's Treasury Participant, and a default of the Original Counterparty or its Treasury Participant. In the case of a client default with respect to a Covered Money Fund, ICC manages such default with respect to any Eligible Money Fund Transactions and is entitled to apply the Money Fund Account Collateral to the settlement obligations of the Covered Money Fund (against payment of any amount owed to the Covered Money Fund in respect of such settlement). In the case of a default of the Covered Money Fund's Treasury Participant, ICC may, to the extent it is legally permitted and otherwise feasible to do so on a timely basis, apply the Money Fund Account Collateral to the settlement obligations of the Covered Money Fund in respect of Eligible Money Fund Transactions as and when they become due (against payment of any amount owed by ICC to the Covered Money Fund in respect of such settlement). Otherwise, ICC may terminate the Eligible Money Fund Transactions of the Covered Money Fund in accordance with the Rules applicable to client positions of the defaulting Treasury Participant and determine the net cash amount owed in respect thereof by the Covered Money Fund or ICC. In the case of a default of the Original Counterparty (or its Treasury Participant), upon receiving notice from ICC, the Covered Money Fund may, to the extent permitted by applicable law on a timely basis, elect to terminate its Eligible Money Fund Transactions, in which case (i) the corresponding transaction between ICC and the Original Counterparty will simultaneously terminate, (ii) the Covered Money Fund will be entitled to

[9] 15 U.S.C. 80a–1.

[10] 17 CFR 270.5b–3.

[11] 15 U.S.C. 80a–1.

[12] Repo Buyer is defined in existing Rule 30B–02(a). Each repo contract consists of (i) an initial obligation (the ''Initial Leg'') of one party (the ''Repo Buyer'') to purchase from another party (the ''Repo Seller'') a specified principal amount of Treasury securities for an agreed purchase price on an initial settlement date and (ii) an obligation on a later settlement date of the Repo Seller to repurchase the same principal amount of Treasury securities for a defined repurchase price.

[13] Since Eligible Money Fund Transactions of a Covered Money Fund are considered Client-Related Positions, the portability rules in Chapter 20A also apply to Covered Money Fund transactions.

withdraw the Money Fund Account Collateral, (iii) ICC will have no further obligation in favor of the Covered Money Fund or its Treasury Participant in respect of the Eligible Money Fund Transactions, and (iv) ICC will have no further obligation to the Original Counterparty (or its Treasury Participant) in respect of the Eligible Money Fund Transactions. If the Covered Money Fund does not timely make such election, ICC may terminate the Eligible Money Fund Transactions of the Covered Money Fund and determine the net cash amount owed by the Covered Money Fund or ICC. In such case, ICC may liquidate the Money Fund Account Collateral of such Covered Money Fund. ICC may apply such collateral or the proceeds thereof to any amount owed in respect of such termination.

Treasury Physical Settlement

ICC proposes to expand its Treasury physical settlement rules by amending existing Chapter 22 and introducing new Chapters 23 and 24.[14] Amended Chapter 22 would govern DVP physical settlement and would be renamed from ''Treasury Physical Settlement'' to ''Treasury DVP Physical Settlement.'' In general, DVP physical settlement refers to a settlement mechanism around the delivery of securities against payment. The proposed amendments add a ''DVP'' prefix to certain terms throughout Chapter 22, including Delivery Failure, Fail Charge, Net Settlement Obligation, Settlement Instructions, and Settlement Payment Failure.

In addition, ICC proposes to revise Rule 2201 by replacing cross-referenced definitions of Delivering Party and Receiving Party with standalone definitions. The definitions of deliver or delivery obligation and receive obligation would also be updated to refer generally to ''an account'' in Rule 2201. Further revisions include clarifying that a Settling Fail Position [15] is designated by ICC and updating the cross-reference in Rule 2205 to refer generally to the applicable Rules. ICC also proposes amendments to Rules 2202, 2203, and 2204 to clarify that such provisions apply to Settling Open Positions [16] and Settling Fail Positions subject to DVP physical settlement. In addition, the amendments state that determinations under these rules may be made on a same-day settlement basis. These revisions are intended to reflect that for certain transactions, as specified in the relevant terms, the initial leg of the repo may be settled on a same-day basis through ICC. In Chapter 22, ICC proposes updating references to ''ICE Business Day'' and ''ICC Settlement Day'', as appropriate,[17] to reflect that an ICC Settlement Day is an ICE Business Day on which ICC is open for settlement of transactions in Treasury securities, whereas an ICE Business Day is any day on which ICC is open for business for the Treasury Clearing Service.[18]

ICC proposes new Chapter 23, titled ''Treasury Standard Triparty Settlement'' which would govern transactions designated under the Rules for standard triparty settlement. While largely mirroring the structure of Chapter 22, Chapter 23 would establish a framework for triparty settlement of cleared repo transactions through a designated Triparty Bank. As noted above, in general, DVP physical settlement refers to a settlement mechanism providing for the delivery of securities to the account of the receiving party at its custodian against payment (without any restriction on the use of such securities by the receiving party). In contrast, triparty settlement is affected through accounts of both relevant parties at a designated Triparty Bank, which facilitates the settlement of deliveries and payments, on terms in which securities are generally not removed from the Triparty Bank absent a default by a relevant party. New Rule 2301 introduces key definitions, including Triparty Bank, the bank ICC designates to establish triparty accounts; Triparty Settlement Accounts, which include any of the CP House, CP Client, or Individual Client Triparty Settlement Accounts; [19] ICC Triparty Settlement Account, which is an account maintained by ICC at the Triparty Bank; and Triparty Settlement Obligation, which refers to a gross or net settlement obligation to deliver or receive Eligible Triparty Securities.[20]

Rule 2302 sets out the methodology for calculating Triparty Settlement Obligations for Settling Open Positions subject to net triparty settlement. Based on the Required Securities Value [21] for applicable positions, ICC would calculate deliver and receive obligations, as set out in paragraphs (a)(i) through (v), for applicable triparty accounts on a net basis. In contrast, Rule 2303 governs Triparty Settlement Obligations subject to gross triparty settlement. Rule 2303(c) describes how ICC would calculate Triparty Settlement Obligations with respect to Settling Open Positions subject to gross triparty settlement in paragraphs (c)(i) through (iii). The difference in drafting between Rule 2302(a) and 2303(c) reflects the distinction between net triparty settlement and gross triparty settlement. ICC would determine if a transaction is subject to net or gross triparty settlement based on the instrument transaction type as set out in Chapter 30 of the Rules and the terms submitted for clearing. For open positions subject to gross triparty settlement, ICC maintains a record associating each such position with the offsetting counter position and Original Counterparty. Treasury Participants and Non-Participant Parties, as applicable, would be required to maintain separate Triparty Settlement Accounts for each house origin or Non-Participant Party portfolio for each counterparty pairing (a ''Counterparty Relationship'') subject to gross triparty settlement. ICC would calculate deliver and receive obligations based on positions subject to gross triparty settlement on a gross basis per Counterparty Relationship. Rule 2303(c)(iii) further clarifies that ICC will not net a deliver obligation for one Counterparty Relationship against a receive obligation for another.

Rule 2304 establishes the mechanics applicable to Triparty Settlement Obligations, which are structured in two

[14] ICC determines whether a cleared transaction is subject to Delivery versus Payment (''DVP'') physical settlement or triparty settlement based on the instrument transaction type, as set forth in Chapter 30 of the Rules and the terms of the transaction as submitted for clearing.

[15] Settling Fail Position refers to an unsettled fail position in a settling security. *See* Treasury Rule 2201.

[16] Settling Open Position refers to an open Treasury position that provides for delivery or receipt of a Treasury security on such day. *See* Treasury Rule 2201.

[17] For the avoidance of doubt, there may be days on which ICC's Treasury Clearing Service is open (and thus are ICE Business Days), but on which ICC would not settle transactions consistent with market practice (*e.g.,* Veterans Day and Columbus Day).

[18] For example, in Rules 2202(d) and 2203(e), ICC proposes to change ''preceding ICC Settlement Day'' to ''preceding ICE Business Day'' for purposes of determinations made following the close of business, as such determinations may be made on a day on which ICC is open for business. In Rules 2205(a) and 2206(a), ICC proposes to change ''ICE Business Day'' to ''ICC Settlement Day'' in relation to DVP Net Settlement Obligations.

[19] CP House Triparty Settlement Account and CP Client Triparty Settlement Account refer to accounts established by the Treasury Participant with the Triparty Bank for settlement in respect of house positions and client-related positions, respectively. Individual Client Triparty Settlement Account refers to an account established by a Non-Participant Party of a Treasury Participant at the Triparty Bank for direct settlement in respect of client-related positions.

[20] ICC proposes to define Eligible Triparty Securities in proposed Rule 30B–10 as securities that satisfy ICC's eligibility criteria.

[21] The Required Securities Value is defined in proposed Rule 30B–10(e) as an amount determined by ICC based on the Triparty Repo Cash Amount (*i.e.,* the purchase price of the Initial Leg) and the initial haircut for that repo contract.

''legs'', through facilities operated by the Triparty Bank (''Triparty Facilities''). Under Triparty Settlement Leg 1, the Delivering Party delivers securities to the ICC Triparty Settlement Account and receives the applicable repurchase price from ICC. Under Triparty Settlement Leg 2, ICC delivers securities to the Receiving Party and receives the corresponding amount. This Rule also permits, with consent from ICC and the relevant Treasury Participant, the use of Individual Client Triparty Settlement Accounts for Non-Participant Parties for standard triparty settlement, and clarifies that ICC bears no responsibility for any default, failure, delay or unavailability affecting the Triparty Bank or Triparty Facilities.

Rules 2305 and 2306 set out provisions that apply in the case of a failure to perform a Triparty Settlement Leg. Treasury Rule 2305 addresses a Triparty Delivery Deficiency, which occurs when a Delivering Party fails to transfer required securities under Triparty Settlement Leg 1, and sets out the actions that ICC may take in response. These actions are set out in paragraphs (a)(i) through (vi) and include, among other things, directing the Triparty Bank to allocate available Eligible Triparty Securities toward curing the deficiency, imposing a late fee and requiring the failing party to reimburse ICC for any costs or expenses resulting from the failure. Pursuant to Rule 2305(b), ICC generally has no obligation to acquire any security to satisfy any Triparty Settlement Obligation. Rule 2305(c) also provides that ICC may in its discretion determine to settle the Triparty Settlement Leg 2 notwithstanding the failure by the Delivering Party, in which case the Delivering Party must pay ICC any losses, costs or expenses incurred in such settlement. Pursuant to Rule 2305(c), ICC may acquire or borrow the relevant securities at a price and on such terms as it determines appropriate. Rule 2306 addresses a Triparty Settlement Payment Failure, which occurs when a Receiving Party fails to make the required payment under Triparty Settlement Leg 2, and sets out the actions that ICC may take in response. These actions are set out in further detail in paragraphs (a)(i) and (ii) and include, among other things, determining to settle Triparty Settlement Leg 1 notwithstanding the failure (in which case the Receiving Party must pay ICC any losses, costs or expenses incurred in such settlement) or terminating the Triparty Settlement Obligation (including both settlement legs thereof) and providing for cash settlement in lieu thereof. In case of a failure by a Delivering or Receiving Party, ICC retains the right to determine that the relevant party (or its Treasury Participant) is in Default and exercise its default remedies under the Rules.

ICC proposes new Chapter 24, titled ''Fund Model Triparty Settlement,'' which applies only to transactions involving Covered Money Funds under the Money Fund Margin Model as described above and provides for triparty settlement of relevant delivery and receive obligations through a designated Triparty Bank. Rule 2401 introduces relevant definitions, including Covered Money Fund Settlement Account, which refers to the Money Fund Custodial Account established at the Triparty Bank for direct settlement, and the Fund Model Settlement Account, which includes any of the Covered Money Fund Settlement Account or the CP House, CP Client, or Individual Client Triparty Settlement Accounts.

Rule 2402 sets out the calculation of Fund Model Settlement Obligations. To facilitate this calculation, ICC would maintain a record associating each open position in an Eligible Money Fund Transaction with its offsetting counter position and Original Counterparty. Further, each Covered Money Fund would maintain a single Covered Money Fund Settlement Account with separate sub-accounts for each Original Counterparty (a ''Money Fund Counterparty Relationship''). ICC would calculate Fund Model Settlement Obligations with respect to Settling Open Positions subject to Fund Model triparty settlement for each Money Fund Counterparty Relationship for applicable Eligible Triparty Securities, as detailed in Rule 2402(c). ICC would not net any delivery obligation in respect of a Fund Model Settlement Obligation against any receive obligation. This is consistent with the design of the Fund Model and preserves the association between positions in Eligible Money Fund Transactions, their offsetting counter positions and Original Counterparties, as well as the separate sub-account structure maintained for each Original Counterparty. Unlike Rule 2303(e), Rule 2402(e) provides that ICC makes determinations in Rule 2402 following the close of business on the preceding ICE Business Day and does not provide that determinations may be made on a same-day settlement basis. This is because, under the Fund Model, the initial leg is not settled through ICC.

Rule 2403 governs the settlement of Fund Model Settlement Obligations and generally follows the triparty settlement framework proposed in Chapter 23. A Fund Model Settlement Obligation in securities between two Fund Model Settlement Accounts would require the Delivering Party to deliver securities to the Receiving Party, and the Receiving Party would pay the applicable repurchase price to the Delivering Party (the ''Fund Model Settlement Payment'') through the Triparty Facilities. Fund Model Settlement would occur directly between the Delivering Party's and Receiving Party's accounts at the Triparty Bank (and not through an account of ICC). Rule 2403 also specifies the responsibility for settlement obligations among Treasury Participants and Covered Money Funds. Under this Rule, ICC has no responsibility for any default, failure, delay, or unavailability by or affecting the Triparty Bank or Triparty Facilities.

Rule 2405 addresses Triparty Settlement Payment Failure under the Fund Model. Pursuant to paragraph (a), where the Original Counterparty, as Receiving Party, fails to pay the Fund Model Settlement Payment by the deadline (a ''Triparty Settlement Payment Failure''), ICC may determine to proceed with settlement notwithstanding the failure, in which case the Receiving Party would be obligated to pay ICC for any resulting losses, costs and expenses. This provision would not apply if ICC had otherwise determined the Receiving Party or its Treasury Participant in default, in which case the default provisions of Rule 411 as described above or other applicable ICC default rules would apply instead.

Repo Contract Terms

ICC proposes amendments to Chapter 30, which describes Treasury contracts that ICC may clear. With respect to spot contracts under Rule 30A–02, ICC proposes to clarify that it may establish and publish on its website categories of spot contracts accepted for clearing. ICC also proposes new Rule 30A–03 to provide that spot contracts are subject to DVP physical settlement. Spot contracts are subject to DVP physical settlement, consistent with market practice, because triparty settlement is designed to support repo contracts and generally does not support spot contracts. ICC proposes additional revisions in Subchapter 30B governing Treasury repo contracts. ICC proposes to retitle Rule 30B–02 from ''Repurchase Contract Terms'' to ''General Repurchase Contract Terms'' to clarify that this Rule sets forth general terms for repo contracts. ICC would introduce and clarify certain defined terms relevant to repo contracts, including Purchased Securities, Initial Settlement Date, Final

Leg, and Final Settlement Date.[22] Amended Rule 30B–02 would clarify that the Initial Leg for certain repo contracts may be settled under the Rules, replace a generic reference to ''settlement date'' with the defined term ''Final Settlement Date,'' and add references to ICC procedures. This Rule would also specify additional types of repo contracts that ICC may choose to clear, including specified term, extendable and evergreen repo contracts.

ICC would also expand Rule 30B–02 to address certain additional features of repo transactions. Paragraph (f) would describe the treatment of coupons, income, or other distributions received with respect to the Purchased Securities, paragraph (g) would establish how repurchase prices are determined (*e.g.,* as a fixed price or through a specified repo pricing rate applied to the purchase price), and paragraph (h) would permit repo contracts to specify an initial haircut with respect to the value of the purchased securities. Amended paragraph (i) provides that ICC would establish and publish on its website the specific categories of repo contracts accepted for clearing.

Rules 30B–03 through –06 describe the characteristics of particular types of repo contracts that ICC may choose to clear. ICC will not be obligated to accept any particular type of repo contract for clearing unless it has specified such type on its website as described above. Rule 30B–03 would define overnight repo as a repo contract maturing one ICC Settlement Day following the Initial Settlement Date. Rule 30B–04 would define a term repo as a repo contract with a Final Settlement Date more than one ICC Settlement Day following the Initial Settlement Date. Rule 30B–05 would introduce variable maturity repos, including term repos with put/call features, extendable repos, and evergreen repos, each of which permits adjustment or extension of the Final Settlement Date under specified conditions. Rule 30B–06 would define open repos as repo contracts that do not initially specify a Final Settlement Date but for which ICC or the Treasury Participant may designate the Final Settlement Date by notice. Each of these types of repo contracts may involve Specific Collateral or General Collateral, as defined below.

Rule 30B–07 would define Specific Collateral Repos as repo contracts involving Purchased Securities that are designated to be a particular issue of Treasury security with a specific CUSIP, such that only securities of that CUSIP may be delivered. These contracts would be subject to DVP physical settlement.[23] Rule 30B–08 would define General Collateral Repos as repo contracts where the Purchased Securities may consist of any eligible Treasury security within a defined pool of securities associated with a generic CUSIP or other identifier. General Collateral Repos could be settled through DVP physical settlement, standard triparty settlement on either a gross or net basis, or, in the case of Eligible Money Fund Transactions involving Covered Money Funds, through Fund Model triparty settlement.

ICC additionally proposes Rule 30B–09, which would permit a Repo Seller to substitute eligible Treasury securities for the outstanding Purchased Securities under the repo contract. For DVP-settled repo contracts, substitutions would be permitted for the Repo Seller during a specified period,[24] subject to ICC's consent. For repo contracts subject to standard triparty settlement or Fund Model triparty settlement, substitutions would be permitted as, and to the extent, permitted under the terms of the Triparty Facilities and provided that applicable collateral value requirements are satisfied. Rule 30B–09 would also permit ICC to accelerate the termination of a repo contract if the Purchased Securities are redeemed and not substituted with other eligible securities.

ICC proposes new Rule 30B–10 describing repo contracts subject to standard triparty settlement or Fund Model triparty settlement (''Triparty Settlement Contracts''). This Rule would define key terms, including Eligible Triparty Securities; [25] Triparty Margin Percentage, which is the percentage by which the securities' market value is discounted to determine the Triparty Securities Value; Triparty Securities Value, which is defined as the aggregate value of Eligible Triparty Securities allocated to a Triparty Settlement Contract; and the Triparty Repo Cash Amount and Required Securities Value.[26] Rule 30B–10 would also specify that the amount and identity of the Purchased Securities allocated to a Triparty Settlement Contract may change during its term through the Triparty Facilities. Further, on each ICC Settlement Day, ICC would compare the Triparty Securities Value of the Eligible Triparty Securities in respect of a Triparty Settlement Contract with the Required Securities Value, and Eligible Triparty Securities will be transferred through the Triparty Facilities to eliminate any difference between such amounts. This Rule would provide that coupon payments, income, redemptions, and other distributions paid on Eligible Triparty Securities would be credited through the Triparty Facilities, and would authorize ICC to establish and publish categories of Treasury securities that constitute Eligible Triparty Securities, the applicable Triparty Margin Percentage, as well as concentration limits. In addition, ICC would not transfer, use, rehypothecate, or otherwise dispose of Eligible Triparty Securities credited to an ICC Triparty Settlement Account, except in limited circumstances.

Additional Clarification or Clean-Up Changes

ICC proposes additional clarification or clean-up changes throughout the Rules. Such changes are intended for clarity and consistency and include the following:

- Clarifying that ''Defaulting Treasury Participant'' is synonymous with ''Defaulting Participant'' in Rules 101 and 20–605;
- Updating defined terms throughout the Rules for consistency, including changing ''Mark-to-Market Price'' to ''Mark-to-Market Amount'' and changing ''Customer IM Account'' to ''Client IM Account'';
- Clarifying that a reference to a ''Participant'' refers to ''Treasury Participant'' throughout the Rules;
- Updating ''Risk Committee Reconstruction Date'' to refer to ''Risk Committee Reconstitution Date'' to align with the term in Rule 503;
- Updating cross-references, including in Rules 101 and 316, to reference applicable provisions;
- Replacing ''Parts'' with ''Chapters'', and adding references to new Chapters, Rules, or defined terms (*e.g.,* adding and

[22] Each repo contract would consist of (i) an initial obligation (the ''Initial Leg'') of one party (the ''Repo Buyer'') to purchase from another party (the ''Repo Seller'') a specified principal amount or value of Treasury securities (the ''Purchased Securities'') for an agreed cash purchase price on an initial settlement date (the ''Initial Settlement Date''); and (ii) an obligation (the ''Final Leg'') on a later settlement date (the ''Final Settlement Date'') of the Repo Seller to repurchase the same principal amount or value of Treasury securities for a defined cash repurchase price (taking into account the initial purchase price and an agreed pricing rate).

[23] For the avoidance of doubt, because Eligible Money Fund Transactions of a Covered Money Fund are subject to Fund Model triparty settlement (see proposed Rule 30B–08(c)), they cannot be Specific Collateral Repos.

[24] Such period refers to the period commencing with the ICC Settlement Day following the completion of the on-leg settlement or novation to ICC, whichever is later, and ending with the ICC Settlement Day prior to the final settlement date.

[25] *See supra* note 20.

[26] *See supra* note 21.

updating references to DVP and triparty terminology) throughout the Rules; and

• Minor grammatical changes, including correcting capitalizations and minor typographical errors.

Treasury Risk Documentation

ICC's risk management practices for the Treasury Clearing Service are documented in various policies and procedures, including the IM Approach Model Description, the GF and Stress Test Approach Model Description, and Risk Parameter Policy. The IM Approach Model Description sets forth the quantitative risk models and associated methods and techniques used to estimate IM requirements for cleared portfolios of Treasury-related instruments. The GF and Stress Test Approach Model Description describes the general stress testing framework for GF computations developed by ICC for the Treasury Clearing Service and used for financial resources modeling and GF design. The Risk Parameter Policy describes the process of setting and reviewing the risk management model core parameters and their underlying assumptions for the Treasury Clearing Service, as described in the IM Approach Model Description and the GF and Stress Test Approach Model Description.[27] ICC proposes changes to the Treasury Risk Documentation to reflect ICC's risk management approach for repo contracts as well as to make clarifications throughout the documentation.

IM Approach Model Description

As set out in the IM Approach Model Description, ICC's risk management modeling approach features computations of statistical IM risk measures and add-on requirements. The IM Approach Model Description remains substantively the same under the proposed changes. ICC's risk management model for the Treasury Clearing Service continues to include a statistically calibrated U.S. interest rate (''IR'') dynamics component and liquidation risk add-ons. The IR dynamics component continues to be the main component of the total portfolio IM requirements, which provides collateralization of potential losses in response to mark-to-market changes. The liquidation risk add-on components continue to capture the losses associated with the liquidation process of cleared portfolios, informed from adverse effects of market frictions encountered during major market events.

The proposed changes further reflect ICC's risk management approach for repo transactions and make certain general clarifications (*i.e.,* not repo-specific) throughout the document. ICC proposes to amend Section I, which describes the IM methodology, to add references to repo contracts and related terminology. The proposed changes add triparty and bilateral repo financing rates to the list of IR term structures considered in ICC's methodology. ICC proposes language describing repo contracts and how such contracts are represented in ICC's risk management approach, including in terms of exposure and key terms and features relevant to the IM methodology. In addition, ICC proposes general clarifications, noting that the risk measure used for establishing certain IM requirements is augmented with correlation breakdown and anti-procyclicality components and that the liquidation risk add-ons feature liquidity charge and concentration charge components.

ICC proposes additional changes in Section I.1, which introduces the distributions of IR changes used as part of ICC's IM methodology. In Section I.1, ICC proposes general clarifications to revise certain equations and their descriptions. ICC proposes to amend Equation 11 to incorporate a term that was previously defined in Equation 10 and conform the equation to the existing description. ICC proposes explanatory language regarding the analyzed time series for Equation 12, and to replace one symbol with another symbol in Equation 13. ICC further proposes to add new Equation 14 and to revise the accompanying discussion on the construction of the referenced sample. In Section I.1.ii, ICC proposes to provide additional support for the utilized Treasury repo time series based on observed Secured Overnight Financing Rate (''SOFR'') and historical proxies as well as revisions to the description of a scale to avoid procyclicality (''APC scale''), including the removal of language on sample size. In Section I.1.iii, ICC proposes explanatory language regarding Equations 22 and 23 to clarify the rationale for certain parameter settings.

ICC proposes additional edits in Section I.2, which describes ICC's approach to the construction, estimation, and simulation of the dependence structure among the distributions introduced in Section I.1. In Sections I.2.ii and I.2.iii, ICC proposes explanatory language regarding Figure 3 to clarify that such figure illustrates the simulated distributions and regarding Figure 4 to specify the relevant implementation for Equation 33. ICC also proposes clarifications to the description of the block simulation approach to reflect the production implementation. In Section I.2.iv, ICC proposes revisions to the description of the interest rate level floor in the methodology, including updates specifying that, for each tenor, a minimum rate level ''can be'' rather than ''is'' considered.

ICC proposes additional revisions in Section I.3, which relates to risk estimations. ICC proposes to add new equations along with explanatory text to describe the methodology for calculating the profit and loss response with respect to repo positions. For example, new Equation 40 would provide the profit and loss response to a repo rate scenario for an in flight repo position and would indicate that the computational approach introduces some conservative bias along with anti-procyclical features. New Equation 41 would provide the profit and loss response to a repo rate scenario for a forward starting repo position. ICC proposes additional explanatory language describing the relevant notations, inputs, and other characteristics of such approach. ICC proposes additional revisions to explain its treatment of constant maturity repo tenors shorter than two weeks and to incorporate repo-rate exposure sub-portfolios in Equation 44. In Section I.3.ii, ICC proposes general clarifications to specify that certain reviews relating to concentration charges will occur at least monthly.

ICC also proposes various non-substantive revisions or clarifications throughout the IM Approach Model Description, including grammatical updates, notation changes in equations for clarity, minor language edits and clarifications, and typographical corrections.

GF and Stress Test Approach

The purpose of the GF and Stress Test Approach Model Description is to describe the general stress testing framework for GF computations used for financial resources modeling and GF design for the Treasury Clearing Service. The GF and Stress Test Approach Model Description remains substantively the same under the proposed changes. ICC continues to establish a separate GF for the Treasury Clearing Service designed to provide mutualization of losses associated with extreme but plausible market scenarios where the considered stress losses exceed the collateralized

[27] *See* Securities Exchange Act Release No. 105974 (July 23, 2026), 91 FR 47264 (July 28, 2026) (File No. SR–ICC–2026–005) (containing additional information on ICC's IM approach, GF and stress test approach, and risk parameter setting and review approach).

losses corresponding to the IR dynamics component of the computed IM requirements. ICC continues to utilize statistical stress testing and scenario-based stress loss analysis techniques to estimate potential stress loss over IM for every portfolio.

The proposed changes further reflect ICC's risk management approach for repo transactions and make certain general clarifications (*i.e.,* not repo-specific) throughout the document. ICC proposes to amend Section I, which describes ICC's overall GF and stress test methodology, to add references to repo contracts and related terminology. ICC proposes to clarify that the considered Treasury market term structures include both Treasury cash instruments and repo instruments, including triparty and bilateral repo term structures. Additional language describes the computation of the IR dynamics component in the presence of repo instruments and explains the treatment of repo instruments for risk management purposes based on the underlying security and interest rate payments. Additional revisions amend Equation 1 to specify that the IR dynamics component is defined as a negative quantity. ICC also proposes a new notation for repo-only positions for use in relevant equations, including in Equation 2 where ICC would incorporate such notation. In Section I.1, ICC proposes a terminology update to replace ''Participant'' with ''Proprietary'' in reference to Treasury Participant House portfolios for clarity, and an updated reference to relevant historical stress periods.

ICC proposes additional edits to Sections I.2 through I.4. In Section I.2, ICC proposes to remove explanatory language associated with Equation 4 to streamline the description, while leaving the equation unchanged. ICC proposes clarifications to the description of the tail loss calculation in Equation 5, as well as updates to Equation 6 and related notations throughout the document to maintain consistency. In Section I.3, ICC proposes explanatory language associated with Equations 10 and 11 to clarify that the calculation in Equation 11 reflects the exclusion of certain accounts, as identified by Equations 8 and 9. In Equation 13, ICC proposes to replace one notation with a notation used earlier in the document (see Equation 5) for consistency.

In Section I.4, with respect to Equation 16, ICC proposes to update this same notation for consistency and to clarify the calculation of stress loss over IM. ICC proposes to specify that Equation 17 represents the total stress loss over IM for a Treasury Participant and to identify the notation used to represent this amount. ICC proposes conforming changes to incorporate that notation in the introductory text of Equation 18. In addition, ICC proposes to amend Equation 19 and related text to revise the notation used for Treasury Participant-specific GF contributions, which are expressed as positive quantities, and to conform the notations used in this section (including in Equation 18 and the text following Equation 19). ICC further proposes clarifying that the worst cumulative stress losses over IM are defined as non-positive quantities in the text that follows Equation 19.

ICC also proposes various non-substantive revisions throughout the GF and Stress Test Approach Model Description, including grammatical updates, notation revisions in equations for clarity, equation simplifications, minor language edits and clarifications, and typographical corrections.

Risk Parameter Policy

The Risk Parameter Policy describes the process of setting and reviewing the risk management model core parameters and their underlying assumptions for the Treasury Clearing Service. The Risk Parameter Policy remains substantively the same under the proposed changes. The Risk Parameter Policy continues to describe the tools and methods used to estimate core parameters, determine appropriate parameter settings, and review the IM and GF model assumptions.

The proposed changes further reflect ICC's risk management approach for repo transactions and make certain general clarifications (*i.e.,* not repo-specific). In Section 1.2, which describes liquidity charge parameters, ICC proposes to correct a duplicative notation by revising the affected reference. In Section 1.3, which describes concentration charge parameters, ICC would add that, because repo transactions feature underlying Treasury security instruments as collateral, the same liquidity charge and concentration charge risk management approach applies to outright and repo-related security positions. In Section 1.4, which describes IR dynamics parameters, ICC proposes language describing the analyzed time series for Treasury repo clearing services. In Section 1.4.2 and throughout the document, ICC would incorporate references to ICC's repo clearing services. In Section 1.4.3, which describes the IM anti-procyclicality parameters, ICC proposes to clarify the treatment of constant maturity Treasury repo tenors shorter than two weeks.

ICC proposes additional changes to the appendices to the document. ICC proposes to incorporate references to repo contracts and related terminology. Revisions in Appendix 2 would also amend the stress scenario sets to add repo-specific risk factors to the current stress scenario sets and to add an additional stress scenario set. ICC's stress scenario sets would continue to be constructed by considering market realizations during stress periods and events, as described in Section 2.6. ICC proposes to amend Appendix 3, which presents exponentially weighted moving average (''EWMA'') factors, to incorporate EWMA factors for triparty and bilateral Treasury repo constant maturity tenors. ICC also proposes to amend Appendix 4, which presents minimum rate levels for Treasury constant maturity tenors, to incorporate minimum rate levels for triparty and bilateral Treasury repo constant maturity tenors.

ICC also proposes various non-substantive revisions throughout the Risk Parameter Policy, including grammatical updates, minor language edits and clarifications, and typographical corrections.

(b) Statutory Basis

ICC believes that the proposed rule change is consistent with the requirements of Section 17A of the Act[28] and the regulations thereunder applicable to it, including the applicable standards under Rule 17ad–22.[29] In particular, Section 17A(b)(3)(F) of the Act[30] requires, among other things, that the rules of a clearing agency be designed to promote the prompt and accurate clearance and settlement of securities transactions, to assure the safeguarding of securities and funds in the custody or control of the clearing agency or for which it is responsible, and to protect investors and the public interest.

The proposed rule change would facilitate participation in ICC's Treasury Clearing Service by establishing clear and transparent terms for the clearing of contracts, including repo contracts. The proposed changes facilitate the clearing of such contracts by amending the Rules to (i) update and clarify the rules for Variation Payments, (ii) introduce a new margin model for eligible money funds to facilitate participation by such funds in the Treasury Clearing Service, (iii) expand the rules governing Treasury

[28] 15 U.S.C. 78q–1.

[29] 17 CFR 240.17ad–22.

[30] 15 U.S.C. 78q–1(b)(3)(F).

physical settlement to include triparty as well as DVP settlement, (iv) expand the contract terms applicable to repo contracts, and (v) make additional clarification or clean-up changes. The proposed changes to the Treasury Risk Documentation provide further detail on ICC's risk management approach for repo contracts and make clarifications throughout the documentation, thereby extending ICC's risk management documentation to address the risks presented by repo contracts and ensuring that such documentation remains clear and transparent. The proposed rule change would also facilitate access for registered funds to participate in the Treasury Clearing Service by accommodating applicable regulatory requirements for registered funds through the introduction of the Money Fund Margin Model. Taken together, the proposed changes ensure that the Treasury Rules and Treasury Risk Documentation remain effective, up-to-date and transparent, thereby supporting ICC's ability to continue to maintain clear and comprehensive rules and procedures that provide sufficient information to market participants and promoting the prompt and accurate clearance and settlement of securities transactions and protecting investors and the public interest, within the meaning of Section 17A(b)(3)(F) of the Act.[31]

Rule 17ad–22(e)(1)[32] requires each covered clearing agency to establish, implement, maintain, and enforce written policies and procedures reasonably designed to provide for a well-founded, clear, transparent, and enforceable legal basis for each aspect of its activities in all relevant jurisdictions. The proposed amendments to Chapter 30, which governs cleared Treasury products, establish clear and comprehensive terms applicable to the various contracts that ICC may clear. Similarly, the proposed amendments to Rule 404 provide for a well-defined and comprehensive rule explaining the calculation and treatment of Variation Payments. The proposed amendments to Chapters 22 through 24 establish a clear and comprehensive settlement framework covering DVP physical settlement, standard triparty settlement, and Fund Model triparty settlement. Such changes ensure that the Treasury Rules provide a well-founded, clear, transparent, and enforceable legal basis for ICC's clearing activities, including ICC's repo clearing activities. As such, the proposed rule change is consistent with Rule 17ad–22(e)(1).[33]

Rule 17ad–22(e)(4)[34] requires each covered clearing agency to establish, implement, maintain, and enforce written policies and procedures reasonably designed to effectively identify, measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes by maintaining sufficient financial resources to cover its credit exposure to each participant fully with a high degree of confidence. ICC believes the proposed changes to the Treasury Risk Documentation appropriately extend ICC's existing risk management framework to the Treasury repo market without substantively altering its underlying risk management approach. The proposed changes ensure that ICC continues to effectively identify, measure, monitor, and manage its credit exposures to Treasury Participants across the expanded product set that will include repo contracts. As such, ICC believes the proposed rule change meets the requirements of Rule 17ad–22(e)(4).[35]

Rule 17ad–22(e)(6)[36] requires each covered clearing agency to establish, implement, maintain, and enforce written policies and procedures reasonably designed to cover its credit exposure to its participants by establishing a risk-based margin system that, at a minimum, considers, and produces margin levels commensurate with, the risks and particular attributes of each relevant product, portfolio, and market. ICC proposes to extend its IM methodology to consider repo instruments, as described in the amended Treasury Risk Documentation, including new equations along with explanatory text to describe the methodology for calculating the profit and loss response with respect to repo positions. In addition, the Money Fund Margin Model introduced in proposed Rule 411 establishes a new margin model for eligible money funds, which does not rely on IM or Variation Payments, but instead requires that the fund grant a first priority lien and security interest to ICC, as further described above. ICC believes that this approach appropriately reflects the regulatory requirements applicable to registered funds, while continuing to ensure that ICC appropriately covers its credit exposure to its participants. Accordingly, ICC believes that it continues to establish a risk-based margin system that, at a minimum, considers, and produces margin levels commensurate with, the risks and particular attributes of each relevant product, portfolio, and market. As such, ICC believes the proposed rule change is consistent with the requirements of Rule 17ad–22(e)(6).[37]

Rule 17ad–22(e)(10)[38] requires each covered clearing agency to establish, implement, maintain, and enforce written policies and procedures reasonably designed to establish and maintain transparent written standards that state its obligations with respect to the delivery of physical instruments, and establish and maintain operational practices that identify, monitor and manage the risks associated with physical deliveries. Proposed New chapters 23 and 24 of the Rules set out procedures for settlement of physical delivery obligations under repo contracts through triparty settlement at a triparty bank, and establish the rights and obligations of participants and ICC in respect of such settlements. The amendments also deal with the procedures for addressing a delivery or payment failure in triparty settlement. As such, ICC believes the proposed rule change is consistent with the requirements of Rule 17ad–22(e)(10).[39]

Rule 17ad–22(e)(13)[40] requires each covered clearing agency to establish, implement, maintain, and enforce written policies and procedures reasonably designed to ensure that it has the authority and operational capacity to take timely action to contain losses and liquidity demands and continue to meet its obligations. Proposed Rule 411(l) sets out default management provisions and corresponding default management actions to be taken by relevant parties, including in the case of a client default with respect to a Covered Money Fund, a default of the Covered Money Fund's Treasury Participant, and a default of the Original Counterparty or its Treasury Participant. Additional provisions in chapters 23 and 24 of the Rules address failures to make required deliveries or payments on settlement. Under the proposed rule change, ICC will continue to have the authority and operational capacity to take timely action to contain losses and liquidity demands arising in connection with repo contracts, consistent with Rule 17ad–22(e)(13).[41]

[40] 17 CFR 240.17ad–22(e)(13).

[41] *Id.*

Rule 17ad–22(e)(18)(iv)(C)[42] requires, in part, that when the covered clearing agency provides central counterparty services for transactions in Treasury securities, it establish objective, risk-based, and publicly disclosed criteria for participation, which ensure that it has appropriate means to facilitate access to clearance and settlement services of all eligible secondary market transactions in Treasury securities, including those of indirect participants. ICC believes that the proposed changes facilitate access to its Treasury Clearing Service by accommodating applicable regulatory requirements for registered funds. ICC designed the Money Fund Margin Model to be consistent with applicable regulatory requirements for registered funds under the Investment Company Act of 1940,[43] including the full collateralization requirements and existing market practices for repos by registered funds pursuant to Rule 5b–3.[44] As such, ICC believes the proposed rule change is consistent with the requirements of Rule 17ad–22(e)(18)(iv)(C).[45]

Rule 17ad–22(e)(19)[46] under the Act requires that each covered clearing agency establish, implement, maintain and enforce written policies and procedures reasonably designed to identify, monitor, and manage the material risks to the covered clearing agency arising from arrangements in which firms that are indirect participants in the covered clearing agency rely on the services provided by direct participants to access the covered clearing agency's payment, clearing, or settlement facilities. The proposed Money Fund Margin Model in Rule 411 would address the indirect participation of eligible money funds in the Treasury Clearing Service, providing ICC with a clear framework to identify, monitor, and manage any associated risks. In particular, Rule 411(c) through (l) would set out additional legal, risk, operational, and default management provisions applicable to the Money Fund Margin Model, which provide, among other things, a first priority lien and security interest granted by each Covered Money Fund to ICC as well as default management actions to be taken by relevant parties. As such, ICC believes the proposed rule change is consistent with the requirements of Rule 17ad–22(e)(19).[47]

(B) Clearing Agency's Statement on Burden on Competition

ICC does not believe the proposed rule change would have any impact, or impose any burden, on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed changes to the Treasury Rules and Treasury Risk Documentation will apply uniformly across all market participants. Certain proposed changes, including amendments to establish the Money Fund Margin Model, are intended to facilitate access to clearing by money funds and thus expand access to clearing for a broader range of market participants. ICC does not believe the proposed amendments would adversely affect the costs of clearing or the ability of market participants to access clearing. Therefore, ICC does not believe the proposed rule change would impose any burden on competition that is inappropriate in furtherance of the purposes of the Act.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments relating to the proposed rule change have not been received. ICC will notify the Commission of any written comments received by ICC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve or disapprove such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

(IV) Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–ICC–2026–011 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–ICC–2026–011. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of such filings will be available for inspection and copying at the principal office of ICE Clear Credit and on ICE Clear Credit's website at *https://www.ice.com/clear-credit/regulation.* Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to File Number SR–ICC–2026–011 and should be submitted on or before December 10, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[48]

Vanessa A. Countryman,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106904; File No. SR–CboeBZX–2026–093]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Invesco Galaxy Bitcoin ETF and the Invesco Galaxy Ethereum ETF

November 16, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 9, 2026, Cboe BZX Exchange, Inc. (the ''Exchange'' or ''BZX'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule

[48] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (''BZX'' or the ''Exchange'') is filing with the Securities and Exchange Commission (''Commission'' or ''SEC'') a proposed rule change to amend the Invesco Galaxy Bitcoin ETF (the ''Bitcoin Trust'') and the Invesco Galaxy Ethereum ETF (the ''ETH Trust'' and, together with the Bitcoin Trust, the ''Trusts''), shares (''Shares'') of which have been approved by the Commission to list and trade on the Exchange pursuant to BZX Rule 14.11(e)(4) under approval orders, to permit the Trusts to list and trade under the generic listing standards of that rule.

The text of the proposed rule change is also available on the Commission's website (*https://www.sec.gov/rules/sro.shtml*), the Exchange's website (*https://www.cboe.com/us/equities/regulation/rule_filings/bzx/*), and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Commission has previously approved the listing and trading of shares for the Bitcoin Trust [3] and the ETH Trust [4] under Rule 14.11(e)(4), and each Trust currently lists and trades on the Exchange. The Exchange now proposes to transition the Trusts to operate under the recently Commission-approved generic listing standards for Commodity-Based Trust Shares pursuant to Rule 14.11(e)(4) (''Amended Rule 14.11(e)(4)'').[5] Each Trust will meet the requirements of Amended Rule 14.11(e)(4) and will be required to comply with the continued listing requirements set forth in such Rule.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[6] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [7] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [8] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes the proposed rule change is designed to remove impediments to and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest because it would provide for the transition of the Trusts from being listed pursuant to the Approval Orders to Amended Rule 14.11(e)(4) instead. The proposed change would allow the Shares to continue listing and trading on the Exchange and permit the Trusts to operate in reliance on the generic listing standards in Amended Rule 14.11(e)(4) instead of the terms of the Approval Orders, thereby facilitating the continued listing and trading of exchange-traded products that will enhance competition among market participants, to the benefit of investors and the marketplace. Each Trust will meet the requirements of Amended Rule 14.11(e)(4) and will be required to comply with the continued listing standards set forth in Amended Rule 14.11(e)(4).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Act. As discussed above, the proposed change is intended to facilitate the continued listing and trading of the Fund on the Exchange, thereby promoting competition among exchange-traded products to the benefit of investors and the marketplace.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A) of the Act [9] and Rule 19b–4(f)(6) [10] thereunder. Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; or (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [11] and Rule 19b–4(f)(6) [12] thereunder.

[11] 15 U.S.C. 78s(b)(3)(A).

[12] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires the Exchange to give the Commission written notice of its intent to file the

Continued

A proposed rule change filed under Rule 19b–4(f)(6) [13] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[14] the Commission may designate a shorter time if such action is consistent with protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposed rule change may become operative immediately upon filing. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because it will allow the Exchange to implement the proposed rule change without delay, thereby providing for the continued listing and trading of the Trusts' Shares, and does not introduce any novel regulatory issues. Accordingly, the Commission designates the proposed rule change to be operative upon filing.[15]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include file number SR–CboeBZX–2026–093 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CboeBZX–2026–093. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CboeBZX–2026–093 and should be submitted on or before December 10, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

Vanessa A. Countryman,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106910; File No. SR–TXSE–2026–048]

Self-Regulatory Organizations; Texas Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend TXSE Rule 14.001 Regarding Information Circular Requirements

November 16, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 3, 2026, Texas Stock Exchange LLC (''Exchange'' or ''TXSE'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend TXSE Rule 14.001 to: (1) add express cross-references to TXSE Rules 3.007 and 3.021; (2) delete Rule 14.001(b)(1), thereby removing the requirement that the Exchange distribute a product-specific information circular prior to the commencement of trading in each UTP Exchange Traded Product that generally includes the same information as contained in the information circular provided by the listing exchange; (3) amend Rule 14.001(b)(2)(B) to require that any written description be provided in a form approved by the listing exchange or prepared by the open-ended management company issuing such securities; (4) renumber Rules 14.001(b)(2) through (6) as Rules 14.001(b)(1) through (5), respectively, and (5) removing the specific reference to subparagraph (2) from current Rule 14.001(b)(2). The Exchange has designated the proposed rule change as non-controversial pursuant to Section 19(b)(3)(A)(iii) [3] of the Act and has provided the Commission with the notice required by Rule 19b–4(f)(6)(iii).[4] The proposal is based on and substantially similar to recent proposals filed by Cboe BZX Exchange, Inc. (''Cboe BZX''), MIAX PEARL, LLC (''MIAX Pearl''), Investors Exchange LLC (''IEX''), and MEMX LLC (''MEMX'').[5] The text of the proposed rule change is provided in Exhibit 5. The text of the proposed rule change is available on the Commission's website (*https://www.sec/gov/rules/sro.shtml*) at the Exchange's website (*https://www.txse.com/reuglations/rules-filings*), and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change

proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[13] 17 CFR 240.19b–4(f)(6).

[14] 17 CFR 240.19b–4(f)(6)(iii).

[15] For purposes only of waiving the 30-day operative delay, the Commission also has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[5] *See* Securities Exchange Act Release No. 105715 (June 17, 2026), 91 FR 37477 (June 23, 2026) (SR–CboeBZX–2026–054); Securities Exchange Act Release No. 105835 (July 1, 2026), 91 FR 41671 (July 7, 2026) (SR–PEARL–2026–28); Securities Exchange Act Release No. 105940 (July 17, 2026), 91 FR 46193 (July 22, 2026) (SR–IEX–2026–20); Securities Exchange Act Release No. 106068 (August 10, 2026), 91 FR 52384 (August 13, 2026) (SR–MEMX–2026–22).

and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to eliminate the requirement in Rule 14.001(b)(1) that the Exchange distribute an information circular to Members prior to the commencement of trading in each UTP Exchange Traded Product. The information circular generally includes the same information as contained in the information circular provided by the listing exchange. The Exchange also proposes to add express cross-references to Rules 3.007 and 3.021 in Rule 14.001(a), amend the written description provision in Rule 14.001(b)(2)(B), and make conforming renumbering changes.

Rule 14.001(b) governs the trading of UTP Exchange Traded Products on the Exchange. UTP Exchange Traded Products are derivative securities products listed on another national securities exchange that trade on the Exchange pursuant to unlisted trading privileges (''UTP''). Under current Rule 14.001(b)(1), the Exchange must distribute an information circular prior to the commencement of trading in each UTP Exchange Traded Product that generally mirrors the information circular provided by the listing exchange, including: (a) the special risks of trading the UTP Exchange Traded Product; (b) the Exchange Rules that will apply to the product, including Rule 3.007; (c) information about the dissemination of the value of the underlying assets or indices; and (d) the applicable trading hours for the UTP Exchange Traded Product and the risks of trading during the period from 8:00 a.m. to 9:30 a.m. and from 4:00 p.m. to 5:00 p.m. due to the lack of calculation or dissemination of the underlying index value, the IIV or a similar value. The Exchange proposes to delete Rule 14.001(b)(1) in its entirety.

The product-specific information circular requirement is unnecessary because the primary listing exchange's information circular already provides Members [6] with the same disclosures the Exchange would otherwise be required to reproduce. Members have access to the primary listing exchange's information circular prior to the commencement of UTP trading and may rely upon it for the same purposes.[7] Requiring the Exchange to prepare and distribute a separate circular containing duplicative information serves no independent investor-protection function.

The Exchange also proposes to amend Rule 14.001(a) to add express cross-references to Rule 3.007 (Recommendations to Customers) and Rule 3.021 (Customer Disclosures). These rules already apply to Members by operation of the Exchange's rulebook. The cross-references are intended to preserve the visibility of the applicable customer-protection framework in the context of UTP Exchange Traded Products after deletion of Rule 14.001(b)(1). Rule 3.007 independently requires a Member recommending a UTP Exchange Traded Product to have reasonable grounds for believing the recommendation is suitable for the customer based on the facts disclosed by the customer after reasonable inquiry into the customer's other securities holdings, financial situation, and needs. Similarly, Rule 3.021 independently requires Members to disclose the material risks of extended-hours trading before accepting a customer order for execution in the Pre-Market or Post-Market Session. These standing obligations are not contingent on the Exchange's issuance of a product-specific circular.

Because Rule 14.001(b)(1) has historically served as the mechanism through which the Exchange informs Members of the application of the written-description provisions in Rule 14.001(b)(2)(B), the Exchange proposes a conforming amendment to that paragraph. The Exchange will continue to inform Members of the application of the written-description provisions by information circular, but proposes to require that any written description referenced therein be provided in a form approved by the listing exchange, rather than the Exchange, or prepared by the open-ended management company issuing the securities. The Exchange will notify Members by information circular that such written description will only be required when mandated by the listing exchange. This amendment is consistent with the broader purpose of the proposed rule change: where the listing exchange's information circular already provides Members with the information necessary to assess a UTP Exchange Traded Product, a duplicative written description obligation serves no independent investor protection function. Members may rely on the listing exchange's information circular in the same manner and to the same effect.

The Exchange also proposes to renumber existing Rules 14.001(b)(2) through (6) as Rules 14.001(b)(1) through (5), respectively.

Finally, the Exchange proposes to delete the reference to subparagraph (2) in current Rule 14.001(b)(2) (as proposed to be re-numbered to Rule 14.001(b)(1) herein) such that instead of reading ''this subparagraph (2) apply only to'' it would read ''this subparagraph apply only to.''

The proposal is based on and substantially similar to the Cboe BZX proposal and the subsequent MIAX Pearl, IEX, and MEMX proposals.[8]

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[9] in general, and specifically with the objectives of Section 6(b)(5),[10] in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. The Exchange also believes the proposal is consistent with the requirements of Section 6(b)(5) that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.[11]

The proposed deletion of Rule 14.001(b)(1) is consistent with the Act because the primary listing exchange's information circular already provides Members with the same disclosures that the Exchange's information circular would contain. The investor protection functions historically served by the product-specific circular requirement are independently addressed by the primary listing exchange's information circular and by the Member-level obligations imposed by Rules 3.007 and 3.021, which the Exchange proposes to cross-reference expressly in Rule

[6] *See* TXSE Rule 1.005(q) (defining ''Member'')

[7] Such information circulars are generally available on the primary listing exchange's website.

[8] *See supra* note 5.

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(5).

[11] *Id.*

14.001(a). Members will therefore continue to have access to the relevant product information and remain subject to the same suitability, disclosures, supervisory, and trading obligations after the proposed deletion.

The proposed amendment to Rule 14.001(b)(2)(B) is also consistent with the Act because it requires any written description referenced therein to be provided in a form approved by the listing exchange or prepared by the open-ended management company issuing the securities. The amendment aligns the Exchange's requirement with the disclosure framework of the primary listing market and eliminates duplicative Exchange review without reducing the information available to Members or customers. The proposed renumbering of Rules 14.001(b)(2) through (6) as Rules 14.001(b)(1) through (5), respectively, and the deletion of the specific reference to paragraph (2) in current Rule 14.001(b)(2) are ministerial.

As discussed above, the proposal is substantially similar to rule changes previously filed by other national securities exchanges and does not raise novel regulatory issues.[12] For these reasons, the Exchange believes the proposed rule change is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposal eliminates a duplicative procedural obligation applicable to the Exchange in its capacity as a UTP trading venue. It does not alter the terms or conditions under which UTP Exchange Traded Products may be traded on the Exchange, impose any new requirement on Members, or affect the ability of any market participant to access the Exchange's market. Members will continue to have access to the primary listing exchange's information circular prior to the commencement of UTP trading and may rely upon it for the same purposes as the Exchange's current circular.

The proposed amendment to Rule 14.001(b)(2)(B) aligns the written-description obligation with the primary listing market's disclosure framework and does not impose a burden beyond the requirements applicable to the product on its listing market. Accordingly, the Exchange does not believe the proposed rule change imposes any burden on intramarket or intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A) of the Act[13] and Rule 19b–4(f)(6)[14] thereunder. Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; or (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[15] and Rule 19b–4(f)(6)[16] thereunder.

A proposed rule change filed under Rule 19b–4(f)(6)[17] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b4(f)(6)(iii),[18] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposed rule change may become operative immediately upon filing. The Exchange states that the proposed rule change eliminates duplicative procedural obligations applicable to the Exchange in its capacity as a UTP trading venue because the primary listing exchange's information circular already provides Members with the same disclosures the Exchange would otherwise be required to produce.[19] The Exchange also notes that the proposed rule change does not alter the terms or conditions under which UTP Exchange Traded Products may be traded on the Exchange. For these reasons, the Commission finds that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Therefore, the Commission hereby waives the 30-day operative delay and designates the proposed rule change to be operative upon filing.[20]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–TXSE–2026–048 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–TXSE–2026–048. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–TXSE–2026–048 and

[15] 15 U.S.C. 78s(b)(3)(A).

[16] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires the Exchange to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[17] 17 CFR 240.19b–4(f)(6).

[18] 17 CFR 240.19b–4(f)(6)(iii).

[19] The Exchange represents that such information circulars are generally available on the primary listing exchange's website. *See supra* note 7.

[20] For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

should be submitted on or before December 10, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[21]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106909; File No. SR–DTC–2026–007]

Self-Regulatory Organizations; The Depository Trust Company; Notice of Designation of Longer Period for Commission Action on Proposed Rule Change To Amend the DTC Operational Arrangements (Necessary for Securities To Become and Remain Eligible for DTC Services)

November 16, 2026.

On May 11, 2026, the Depository Trust Company (''DTC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change SR–DTC–2026–007 (''Proposed Rule Change'') pursuant to Section 19(b) of the Securities Exchange Act of 1934 (''Exchange Act'')[1] and Rule 19b–4[2] thereunder to amend the DTC Operational Arrangements (Necessary for Securities to Become and Remain Eligible for DTC Services) (the ''OA'')[3] to consolidate and update the documentation for Agents processing Participant instructions for a corporate action offer, election, solicitation or tabulation (each, an ''Offer'') through the DTC Automated Tender Offer Program (ATOP) or DTC Automated Subscription Offer Program (ASOP). The Proposed Rule Change was immediately effective upon filing with the Commission pursuant to Section 19(b)(3)(A) of the Exchange Act.[4] The Proposed Rule Change was published for public comment in the **Federal Register** on May 22, 2026.[5] The Commission has received comments regarding the substance of the changes proposed in the Proposed Rule Change.[6]

On July 9, 2026, pursuant to Section 19(b)(3)(C) of the Exchange Act,[7] the Commission temporarily suspended and instituted proceedings under Section 19(b)(2)(B) of the Exchange Act[8] to determine whether to approve or disapprove the Proposed Rule Change.[9]

Section 19(b)(2) of the Exchange Act[10] provides that, after initiating proceedings, the Commission shall issue an order approving or disapproving the proposed rule change not later than 180 days after the date of publication of notice of filing of the proposed rule change. The Commission may extend the period for issuing an order approving or disapproving the proposed rule change, however, by not more than 60 days if the Commission determines that a longer period is appropriate and publishes its reasons for such determination.[11] As noted above, the Proposed Rule Change was published for public comment in the **Federal Register** on May 22, 2026.[12] November 18, 2026 is 180 days from that date, and January 15, 2027 is 240 days from that date.

The Commission finds it appropriate to designate a longer period within which to issue an order approving or disapproving the Proposed Rule Change so that the Commission has sufficient time to consider the Proposed Rule Change and its comments. Accordingly, pursuant to Section 19(b)(2) of the Act,[13] the Commission designates January 15, 2027, as the date by which the Commission should either approve or disapprove the Proposed Rule Change (File No. SR–DTC–2026–007).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[14]

Vanessa A. Countryman,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106905; File No. SR–TXSE–2026–049]

Self-Regulatory Organizations; Texas Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Amending its Fee Schedule, Amending Certain Definitions, and Adding Notes to the Lead Market Maker Program

November 16, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 10, 2026, Texas Stock Exchange LLC (''TXSE'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to: (i) increase the rebate provided for orders that add displayed liquidity in securities priced at or above $1.00; (ii) increase the fee for orders that add or remove non-displayed liquidity in securities priced at or above $1.00; (iii) reduce the fee for orders that add or remove non-displayed liquidity in securities priced below $1.00; (iv) introduce an enhanced rebate designed to incentivize displayed liquidity in TXSE-listed corporate securities; and (v) amend certain definitions and add notes to the Lead Market Maker Program The text of the proposed rule change is available on the Commission's website (*https://www.sec/gov/rules/sro.shtml*) at the Exchange's website (*https://www.txse.com/reuglations/rules-filings*), and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below.

The self-regulatory organization has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Section A (Transaction Fees) and Section F (Lead Market Maker Program) of the TXSE Fee Schedule to: (i) increase the rebate provided for orders that add displayed liquidity in securities priced at or above $1.00; (ii) increase the fee for orders that add or remove non-displayed liquidity in securities priced at or above $1.00; (iii) reduce the fee for orders that add or remove non-displayed liquidity in securities priced below $1.00; (iv) introduce an enhanced rebate designed to incentivize displayed liquidity in TXSE-listed corporate securities; and (v) amend certain definitions and add notes to the Lead Market Maker Program. The Exchange proposes to implement these changes effective on November 2, 2026.[3]

The Exchange's Fee Schedule sets forth the standard rebates and fees applied per share for orders that add and remove liquidity, respectively. Currently, TXSE provides a rebate of $0.0031 per share for orders priced at or above $1.00 that add displayed liquidity to the Exchange and charges a fee of $0.0030 per share for orders that remove displayed liquidity from the Exchange.[4] For securities priced below $1.00, the Exchange provides a rebate of 0.15% of total dollar value (''TDV'') for orders that add displayed liquidity to the Exchange and charges a fee of 0.15% of TDV for orders that remove displayed liquidity from the Exchange.[5] The Exchange currently charges a fee of $0.0002 per share for orders that add non-displayed liquidity to the Exchange or remove non-displayed liquidity from the Exchange in securities priced at or above $1.00. The Exchange currently charges a fee of 0.05% of TDV for orders that add non-displayed liquidity to the Exchange or remove non-displayed liquidity from the Exchange in securities priced below $1.00.

Base Rates

The Exchange now proposes to amend its base rates applicable to orders that add displayed liquidity in securities priced at or above $1.00. The proposed rebate for orders that add displayed liquidity to the Exchange is $0.0032 per share, an increase of $0.0001 from the current rate of $0.0031 per share. In addition, the Exchange proposes to amend its base rates applicable to orders that add or remove non-displayed liquidity in both securities priced at or above $1.00 and securities priced below $1.00. For orders that add or remove non-displayed liquidity in securities priced at or above $1.00, the Exchange proposes to charge a fee of $0.0006, an increase of $0.0004 from its current rate of $0.0002 per share. For orders that add or remove non-displayed liquidity in securities priced below $1.00, the Exchange proposes to make these executions free.

The purpose of revising the rates associated with adding and removing displayed and non-displayed liquidity is for business and competitive reasons, as the proposed change is intended to incentivize Members[6] to submit displayed liquidity to the Exchange by providing a higher rebate for displayed orders that add liquidity to the Exchange and charging a higher fee for non-displayed orders that add liquidity to the Exchange or remove liquidity from the Exchange in securities priced at or above $1.00. The Exchange notes that its proposed base rebate for orders that add liquidity to the Exchange in securities priced at or above $1.00 would remain significantly higher than the base rebates provided by competitors for orders that add displayed liquidity in securities priced at or above $1.00.[7] The Exchange notes that its proposed fee for orders that add non-displayed liquidity in securities priced at or above $1.00 is similar to at least one competitor.[8] The Exchange's proposed fee for orders that remove non-displayed liquidity in securities priced at or above $1.00 would remain lower than the fees assessed by competitors for orders that remove non-displayed liquidity in securities priced at or above $1.00.[9] The Exchange's proposal to make executions free in all non-displayed orders that add liquidity to the Exchange in securities priced below $1.00 aligns with the pricing that competitors offer for similar executions.[10] In addition, the Exchange's proposal to make executions free in all orders that remove non-displayed liquidity in securities priced below $1.00 differs from competitors in that many competitors assess a fee for non-displayed orders that remove liquidity.[11] In totality, the Exchange believes its proposed fee structure is appropriate in furthering its goal of encouraging Members to submit displayed liquidity to the Exchange as it provides a competitive rebate to Members who add displayed liquidity to the Exchange and charges a fee to those Members who either remove displayed liquidity in all securities or who add or remove non-displayed liquidity in securities priced at or above $1.00.

Displayed Liquidity Enhanced Rebate

The Exchange next proposes to introduce an enhanced rebate designed to incentivize quoting in TXSE-listed corporate securities. The Exchange proposes to provide an enhanced rebate of $0.0038 per share in securities priced at or above $1.00 to Members that add displayed liquidity in a TXSE-listed corporate security. The enhanced rebate would not apply to securities priced below $1.00.

The proposed enhanced rebate is designed to encourage Members to submit displayed liquidity to the Exchange in TXSE-listed corporate securities, which contributes to a deeper, more liquid market and provides additional execution opportunities for active market participants. By offering enhanced rebate opportunities to incentivize increased liquidity provision, the

[3] The Exchange initially submitted the proposed rule change on November 2, 2026 (SR–TXSE–2026–044). On November 10, 2026, the Exchange withdrew that filing and submitted this proposal.

[4] *See* Texas Stock Exchange Fee Schedule, Section A—Transaction Fees.

[5] *Id.*

[6] *See* TXSE Rule 1.005(q). The term ''Member'' shall mean any registered broker or dealer that has been admitted to membership in the Exchange. A Member will have the status of a ''member'' of the Exchange as that term is defined in section 3(a)(3) of the Act. Membership may be granted to a sole proprietor, partnership, corporation, limited liability company or other organization which is a registered broker or dealer pursuant to Section 15 of the Act and which has been approved by the Exchange.

[7] *See, e.g.,* Cboe BZX Exchange Fee Schedule, Standard Rates (BZX provides a standard rebate of $0.0016 per share for orders that add displayed liquidity to BZX in securities priced at or above $1.00); MEMX Equities Fee Schedule, Transaction Fees (MEMX provides a standard rebate of $0.0015 per share for orders that add liquidity to MEMX).

[8] *See, e.g.,* IEX Equities Fee Schedule, Transaction Fees, Base Rates (IEX changes a fee of $0.0010 per share for non-displayed orders that add liquidity in securities priced at or above $1.00

[9] *See, e.g.,* IEX Equities Fee Schedule, Transaction Fees, Base Rates (IEX changes a fee of $0.0010 per share for non-displayed orders that remove liquidity in securities priced at or above $1.00)

[10] *See, e.g.,* IEX Equities Fee Schedule, Transaction Fees, Base Rates (IEX charges a fee of 0.10% of TDV per share to add non-displayed liquidity in securities priced below $1.00).

[11] *See, e.g.,* IEX Equities Fee Schedule, Transaction Fees, Base Rates (IEX assesses a fee of 0.10% of TDV in securities priced below $1.00 for orders that remove non-displayed liquidity); MIAX Pearl Equities Exchange Fee Schedule, Transaction Rebates/Fees, Standard Rates (MIAX Pearl assesses a rate of $0.0030 per share in securities priced at or above $1.00 and a rate of $0.20% of Dollar Value in securities priced below $1.00 for orders that remove non-displayed liquidity).

Exchange seeks to encourage greater trading activity and additional execution opportunities for Members, thereby promoting more robust price discovery and improving overall market quality for all market participants.

Lead Market Maker Program

The Exchange next proposes edits to certain definitions found within Section F (Lead Market Maker Program) of the Fee Schedule. The Exchange introduced its Lead Market Maker (''LMM'') Program in September 2026.[12] The Exchange's LMM Program offers daily stipends paid by the Exchange to LMMs that achieve certain Minimum Performance Standards [13] in TXSE-listed symbols. The Exchange now proposes to amend the definition of ''Size Near the Inside'' and ''Time at NBBO'' to more accurately reflect the Exchange's calculation of those criteria. ''Size Near the Inside'' is currently defined as ''. . .the average notional depth within 25 basis points of the NBBO.'' [14] The Exchange proposes to revise the definition of ''Size Near the Inside'' to state ''. . .the minimum notional value of both bids and offers within 0.25% of the NBBO for at least 95% of the trading day.'' The Exchange notes that this change will continue to measure notional depth relative to the NBBO, but would require the LMM to have a notional depth within 0.25% of each of the NBB and NBO for 95% of the trading day rather than looking at an average of total depth within 25 basis points of the NBBO. The Exchange notes that each of the Signature, Premier, and Core Tiers on the current Fee Schedule indicates the minimum notional value that must be provided on each side of the NBB and NBO.[15] The addition of the 95% threshold is intended to align the calculation of ''Size Near the Inside'' with the calculation of ''Layered Depth'' [16] and is generally in-line with similar criteria of competitor exchange LMM programs.[17]

''Time at NBBO'' is currently defined as ''. . .the percentage of time during Regular Trading Hours [18] in which the LMM maintains both a bid and offer at the NBBO with at least $10,000 notional at each of the NBB and NBO.'' [19] The Exchange proposes to revise the definition of ''Time at NBBO'' to state ''. . .the average of (a) the percentage of time the LMM has at least $10,000 notional at the NBB and (b) the percentage of time the LMM has at least $10,000 notional at the NBO.'' This change is designed to account for situations where an LMM may have a valid business reason for quoting the NBB or NBO with the required notional value at different times throughout a trading day. For instance, an LMM's inventory position and exposure to additional purchases or sales may warrant greater participation at the inside market on one side of the NBB or NBO than the other.[20] Under the current definition of ''Time at the NBBO'', an LMM participating at the NBB or NBO without the required notional value throughout Regular Trading Hours would not satisfy the ''Time at NBBO'' criteria if it did not have the required depth at the NBB and NBO for the requisite amount of time during Regular Trading Hours. Under the proposed definition, however, the Exchange would use the average of the percentage of time that the LMM quoted at each of the NBB and NBO, which would reward LMMs that have valid business cases for having different notional at the NBB and NBO at different times during Regular Trading Hours.

In addition, the Exchange proposes to introduce a ''Notes'' section to Section F of the Fee Schedule. Under the proposed ''Notes'' section, the Exchange proposes to add two notes that provide additional clarity to how it performs certain calculations related to the Minimum Performance Standards. First, the Exchange proposes to add the following note: ''Periods during which the SIP NBBO is missing, invalid, locked, or crossed are treated as ineligible and excluded from denominators for NBBO-referenced metrics.'' Second, the Exchange proposes to add a note stating: ''Certain percentage-based thresholds set forth in the Program shall be adjusted for leveraged ETPs to reflect the product's stated leverage factor. The adjusted threshold shall equal the stated threshold multiplied by the absolute value of the leverage factor (*e.g.,* 2 for a 2x product, 3 for a 3x product, irrespective of direction). The percentage adjustment applies to the following standards: the basis point threshold of Maximum LMM Spread; [21] the basis point threshold of Size Near the Inside; the percentage threshold of Layered Depth; the basis point threshold of Opening/Closing Auction Depth; [22] the basis point threshold of Opening/Closing Auction Reference Price.[23] Notional dollar thresholds are not

[12] *See* Securities Exchange Act Release No. 106505 (September 28, 2026), 91 FR 62572 (October 1, 2026), SR–TXSE–2026–030 (''LMM Fee Filing'').

[13] *See* TXSE Rule 11.024. The term ''Minimum Performance Standards'' means a set of standards applicable to an LMM that may be determined from time to time by the Exchange. Such standards will vary between LMM Securities depending on the applicable listing tier, liquidity, and volatility of the LMM Security in which the LMM is registered. The Minimum Performance Standards include the following measurements: Maximum LMM Spread, Size Near the Inside, Layered Depth, Time at NBBO, Opening Auction Depth, Closing Auction Depth, Opening Auction Reference Price, and Closing Auction Reference Price. *See also* TXSE Fee Schedule, Section F—Lead Market Maker Program, Definitions.

[14] *See* Texas Stock Exchange Fee Schedule, Section F—LMM Program, Definitions.

[15] *See* Texas Stock Exchange Fee Schedule, Section F—LMM Program, LMM Minimum Performance Standards. For example, the Signature Tier requires an LMM to provide ''$80,000 on each side of the NBB and NBO'' to satisfy the ''Size Near the Inside'' criteria for High Volume Products.

[16] *See* Texas Stock Exchange Fee Schedule, Section F—LMM Program, Definitions. ''Layered Depth'' means the minimum notional value of both bids and offers within a certain percentage of the NBBO for at least 95% of the trading day.

[17] *See, e.g.,* Cboe BZX Exchange Equity Fee Schedule, Footnote 14, subsection (B)(3), which requires a minimum notional value within a certain percentage of the NBBO at least 90% of the trading day.

[18] *See* Texas Stock Exchange Fee Schedule, Section F—LMM Program, Definitions. *See also* TXSE Rule 1.005(z). The term ''Regular Trading Hours'' shall mean the time between 9:30 a.m. and 4:00 p.m. Eastern Time.

[19] The threshold amount of time that an LMM must maintain $10,000 notional at each the NBB and NBO varies based on the asset class, tier, and CADV of the ETP being quoted. For example, the Signature Tier requires an LMM to have $10,000 notional at each of the NBB and NBO for 15% of the time during Regular Trading Hours in High Volume Products, but requires an LMM to have $10,000 notional at each of the NBB and NBO for 45% of the time during Regular Trading Hours if the ETP has less than a 250,000 30-DayCADV. *See* Texas Stock Exchange Fee Schedule, Section F—LMM Program, LMM Minimum Performance Standards.

[20] For example, an LMM that has accumulated a long position through the creation of a basket of exchange-traded product shares may seek to reduce that position by maintaining a competitive offer. Requiring the LMM to simultaneously maintain a quotation at the NBB to receive credit for its quotation at the NBO could encourage additional purchases that increase the inventory exposure the LMM is seeking to reduce.

[21] *See* Texas Stock Exchange Fee Schedule, Section F—LMM Program, Definitions. ''Maximum LMM Spread'' means the time weighted average of the LMM's displayed two-sided spread, calculated as (LMM Best Offer minus LMM Best Bid) divided by the SIP NBBO midpoint, expressed in basis points, for a trading day.

[22] *See* Texas Stock Exchange Fee Schedule, Section F—LMM Program, Definitions. ''Closing Auction Depth'' means the aggregate size, expressed in notional value, of all LMM Eligible Auction Orders that are executable in the closing auction and priced within fifty basis points (0.50%) of the NBBO midpoint, as measured immediately prior to the execution of the closing auction. ''Opening Auction Depth'' means the aggregate size, expressed in notional value, of all LMM Eligible Auction Orders that are executable in the opening auction and priced within 100 basis points (1.00%) of the NBBO midpoint, as measured immediately prior to the execution of the opening auction.

[23] *See* Texas Stock Exchange Fee Schedule, Section F—LMM Program, Definitions. ''Closing Auction Reference Price'' means the difference between the midpoint of the NBBO immediately prior to the closing auction and the closing auction price. ''Opening Auction Reference Price'' means the difference between the midpoint of the NBBO immediately prior to the opening auction and the opening auction price.

subject to the leverage adjustment and apply as stated in the applicable tier.'' Each of the proposed revisions to the definitions of ''Size Near the Inside'' and ''Time at NBBO'' and proposed additions to the proposed ''Notes'' section is intended to provide additional clarity to LMMs and other market participants regarding how the Minimum Performance Standards are calculated.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of the Exchange Act. The Exchange believes that the proposed fee changes are consistent with the objectives of Section 6(b)(5) of the Act [24] in that they are designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and national market system, and, in general, to protect investors and the public interest, and, particularly, are not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes that the proposed rule change is consistent with the provisions of Section 6(b)(4) of the Act,[25] in that it is designed to provide for the equitable allocation of reasonable dues, fees, and other charges among its Members and other persons using its facilities.

The Exchange operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. The Exchange believes that its proposed changes reflect a simple and competitive pricing change designed to incentivize market participants to direct their order flow to the Exchange, which the Exchange believes would promote price discovery and price formation and deepen liquidity that is subject to the Exchange's transparency, regulation, and oversight as an exchange, thereby enhancing market quality to the benefit of all Members and investors. The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and self-regulatory organization revenues, and also recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [26]

The proposed changes are intended to attract additional executable interest to the TXSE Book [27] and encourage Members to compete through displayed quotations. Displayed liquidity informs market participants of available trading interest and contributes to the public price discovery process. Increasing the incentive to display orders, together with providing competitively priced access to those orders, is intended to encourage participation on both sides of a transaction. To the extent these incentives attract additional liquidity, Members seeking executions may benefit from greater available size and additional opportunities to transact, including Members that do not receive an enhanced rebate.

The Exchange competes with other exchanges and off-exchange trading venues for order flow. Members may consider competing venues when evaluating the proposed rates, together with execution quality and other routing considerations. The Exchange believes that the proposed pricing reflects its business judgment concerning the incentives needed to attract order flow and develop its displayed market. The specific relationship between the proposed charges, rebates, and the trading activity they are intended to encourage provides the basis for the Exchange's conclusions concerning reasonableness and equitable treatment, as discussed below.

The Exchange believes that increasing the base rebate for adding displayed liquidity in securities priced at or above $1.00 from $0.0031 to $0.0032 per share is reasonable because the additional $0.0001 per share rewards Members for making their trading interest publicly available and exposing that interest to execution. For non-displayed executions in securities priced at or above $1.00, the Exchange proposes to increase the fee for both adding and removing liquidity from $0.0002 to $0.0006 per share. The Exchange believes that this increase is reasonable in light of its objective of encouraging displayed interest. Non-displayed liquidity provides execution opportunities, but does not communicate publicly available trading interest in the same manner as displayed liquidity. The proposed structure therefore assigns a greater financial incentive to orders that contribute directly to displayed price discovery. A Member may continue to use non-displayed orders when confidentiality or other execution considerations warrant paying the applicable fee.

For securities priced below $1.00, eliminating the existing fee of 0.05% of TDV for adding or removing non-displayed liquidity would reduce transaction charges for both participants in the execution. The Exchange believes that eliminating these charges is reasonable because it removes a direct cost of interacting with non-displayed interest in these securities and may encourage additional executions. The distinction between pricing for securities below $1.00 and pricing for securities at or above $1.00 also recognizes that a fixed per-share charge represents a larger proportion of transaction value as a security's price declines. The proposal addresses that concern by charging neither side of a non-displayed execution in securities below $1.00.

The Exchange believes that the proposed base rates are equitably allocated and do not permit unfair discrimination because each rate applies to all Members executing the same category of transaction. The distinctions depend on the security's execution price, whether liquidity is displayed, and whether an order supplies or accesses that liquidity. These characteristics bear a direct relationship to the transaction being priced and the proposal's objectives. The rates do not depend on a Member's identity or business model. In particular, the different treatment of displayed and non-displayed liquidity recognizes the additional public price discovery contribution of displayed interest, while the elimination of sub-dollar non-displayed charges benefits all Members executing those transactions on the same terms.

The Exchange further believes that the proposed enhanced rebate for adding displayed liquidity in TXSE-listed corporate securities is reasonable because it directs enhanced incentives to displayed interest in TXSE-listed corporate securities. The proposed $0.0038 per-share enhanced rebate rewards the addition of displayed

[24] 15 U.S.C. 78f(b)(5).

[25] 15 U.S.C. 78f(b)(4).

[26] *See* Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005) (''Regulation NMS Adopting Release'').

[27] *See* TXSE Rule 1.005(ii). The term ''TXSE Book'' shall mean the System's electronic file of orders.

liquidity, which contributes to a deeper, more liquid market in TXSE-listed corporate securities and provides additional execution opportunities for active market participants. By offering enhanced rebate opportunities to incentivize increased liquidity provision, the Exchange seeks to encourage greater trading activity and additional execution opportunities for Members, thereby promoting more robust price discovery and improving overall market quality for all market participants.. The Exchange notes that while the proposed enhanced rebate is only available for Members that quote in TXSE-listed corporate symbols and is not more broadly available to Members that quote in any name, the Exchange does not believe this is unfairly discriminatory as all Members are eligible to provide quotations in TXSE-listed corporate symbols and the Exchange does not limit this enhanced rebates to Members to register to quote in TXSE-listed corporate symbols. Additionally, Members whose orders do not qualify for the enhanced rebate remain eligible for the applicable base pricing and may benefit from the additional displayed interest the enhanced rebate is intended to attract.

The Exchange believes that encouraging executable displayed interest at competitive prices promotes just and equitable principles of trade and helps perfect the mechanism of a free and open market and a national market system by improving the information and trading opportunities available to market participants. Publicly displayed quotations can inform routing and execution decisions by brokers and other intermediaries. In this manner, the proposal supports coordination among persons processing securities information and facilitating securities transactions.

Additionally, the Exchange's proposed amendments to the definitions of ''Size Near the Inside'' and ''Time at NBBO'' promotes just and equitable principles of trade, helps perfect the mechanism of a free and open market and a national market system, and contributes to the protection of investors and the public by clarifying the definition so that market participants have a more accurate description of the requirements needed to satisfy the Minimum Performance Standards. The proposed amendments to Section F of the Fee Schedule explain the revised calculations the Exchange would use to determine whether an LMM satisfies the Minimum Performance Standards. The proposed changes to the ''Size Near the Inside'' definition continue to measure notional size within 0.25% of the NBBO, but replace the average-depth calculation with a minimum-depth requirement that must be met for at least 95% of the trading day, which is similar to the criteria found on competitor exchanges. Similarly, the proposed change to the ''Time at NBBO'' definition is designed to account for situations where an LMM may have a business justification for not having the requisite notional depth on both the NBB and NBO at the same time during Regular Trading Hours by looking at an average of the percentage of time at each of the NBB and NBO throughout Regular Trading Hours rather than a set percentage at each of the NBB and NBO. The proposed changes are also not unfairly discriminatory as they apply to all LMMs equally, in that all LMMs are subject to the same criteria and calculations when seeking to achieve the daily stipends provided under the LMM Program.

Further, the proposed addition of the ''Notes'' section to Section F of the Fee Schedule promotes just and equitable principles of trade, helps perfect the mechanism of a free and open market and a national market system, and contributes to the protection of investors and the public because the Exchange believes the proposed notes will provide greater clarity and transparency regarding the calculation and application of certain Minimum Performance Standards under the LMM Program, thereby promoting the consistent and equitable application of such standards to participating LMMs. In particular, including a note about SIP NBBO availability and its application to the calculation of NBBO-referenced metrics promotes a more accurate and consistent assessment of LMM performance, while ensuring that LMMs are not unfairly disadvantaged by market conditions or data irregularities that may be outside their control.

In addition, the Exchange believes its proposal to adjust certain percentage-based performance thresholds for leveraged ETPs based on the absolute value of the product's stated leverage factor is consistent with Section 6(b)(5) of the Act because leveraged ETPs are designed to provide returns corresponding to a multiple of the performance of an underlying index or reference asset, which may result in greater price volatility and more pronounced price movements relative to comparable unleveraged products. As such, the Exchange believes that applying identical percentage-based thresholds to leveraged and unleveraged ETPs, without accounting for differences in their respective investment objectives and price characteristics, could impose disproportionately restrictive quoting and liquidity obligations on LMMs assigned to leveraged ETPs. The proposed adjustment is designed to account for these differences by scaling the applicable percentage-based thresholds in proportion to the product's stated leverage factor, thereby establishing performance standards that more appropriately reflect the characteristics of the underlying product. The Exchange also believes that limiting the adjustment to specified percentage-based and basis point thresholds, while maintaining the existing notional dollar thresholds, appropriately balances recognition of the distinct characteristics of leveraged ETPs with the Program's objective of encouraging meaningful liquidity provision. In particular, maintaining the applicable notional dollar thresholds will preserve the existing minimum dollar-denominated liquidity requirements, while the adjustments to the specified percentage-based thresholds will provide LMMs with greater flexibility to accommodate the price characteristics of leveraged products.

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 6(b)(8) of the Act [28] requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, as discussed above, the Exchange believes that the proposed fee change would encourage the submission of additional displayed order flow to a public exchange, thereby promoting market depth, execution incentives, and enhanced execution opportunities, as well as price discovery and transparency for all Members. As a result, the Exchange believes that the proposed change furthers the Commission's goal in adopting Regulation NMS of fostering competition among orders, which promotes ''more efficient pricing of individual stocks for all types of orders, large and small.'' [29]

The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in

[28] 15 U.S.C. 78f(b)(8).

[29] *See* Regulation NMS Adopting Release at 37499.

furtherance of the purposes of the Act because the proposed fees and rebates would apply equally to all Members. The proposed fee changes are intended to encourage market participants to add displayed liquidity to the Exchange by increasing the base rebate for adding displayed liquidity in securities priced at or above $1.00, increasing the fees for adding and removing non-displayed liquidity in securities priced at or above $1.00, eliminating the fees for adding and removing non-displayed liquidity in securities priced below $1.00, and introducing an enhanced rebate for adding displayed liquidity in TXSE-listed corporate securities priced at or above $1.00, which the Exchange believes will help to encourage Members to send orders to the Exchange to the benefit of all Exchange participants. As the proposed rates are equally applicable to all market participants, the Exchange does not believe there is any burden on intramarket competition. In addition, the Exchange does not believe the proposed amendments to the definitions found within LMM Program and proposed introduction of a ''Notes'' section under Subsection F of the Fee Schedule will burden competition as these changes are being proposed to provide additional clarity to LMMs and market participants about the calculations used to determine whether an LMM satisfies the Minimum Performance Standards and are not being introduced for competitive reasons.

The Exchange does not believe that the proposed rule change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the Exchange believes that the proposed fee change will increase competition and is intended to draw volume to the Exchange. The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can shift order flow or reduce use of certain categories of products in response to new or different pricing structures being introduced into the market. Accordingly, competitive forces constrain the Exchange's transaction fees, and market participants can readily trade on competing venues if they deem pricing levels at those other venues to be more favorable. Although this fee change is intended to attract liquidity to the Exchange, most other exchanges in operation today already offer multiple incentives to their participants, including tiered pricing that provides discounted executions, and other exchanges will be able to modify such incentives in order to compete with the Exchange. Accordingly, with respect to a participant deciding to submit an order to remove liquidity, there are multiple exchanges that will continue to be competitively priced for such orders when compared to the Exchange's pricing. Further, while pricing incentives can cause shifts of liquidity between trading centers, market participants make determinations on where to provide liquidity or route orders to take liquidity based on factors other than pricing, including execution quality, technology, functionality, and other considerations. Consequently, the Exchange believes that the degree to which its fees could impose any burden on competition is extremely limited and does not believe that such fees would burden competition of Members or competing venues in a manner that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [30] and Rule 19b–4(f)(2) thereunder,[31] because it establishes or changes a due, or fee. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–TXSE–2026–049 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–TXSE–2026–049. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–TXSE–2026–049 and should be submitted on or before December 10, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[32]

Vanessa A. Countryman,

Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106912; File No. SR–OCC–2026–012]

Self-Regulatory Organizations; The Options Clearing Corporation; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by The Options Clearing Corporation Concerning the Implementation of a Fee Holiday for the Period Beginning December 1, 2026, and Ending December 31, 2026

November 16, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Exchange Act'' or ''Act''),[1] and Rule

[30] 15 U.S.C. 78s(b)(3)(A).

[31] 17 CFR 240.19b–4(f)(2).

[32] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

19b–4 thereunder,[2] notice is hereby given that on November 4, 2026, The Options Clearing Corporation (''OCC'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared primarily by OCC. OCC filed the proposed rule change pursuant to Section 19(b)(3)(A)[3] of the Act and paragraph (f) or Rule 19b–4[4] thereunder, such that the proposed rule change was immediately effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

This proposed rule change would implement a fee holiday for the period beginning December 1, 2026, and ending December 31, 2026. Pursuant to OCC's Capital Management Policy, which the Commission has approved as an OCC rule, when OCC's liquid net assets funded by equity (''LNAFBE'') exceed 110% of OCC's Target Capital Requirement and other approved capital needs, OCC may use tools it deems appropriate to lower costs for clearing members including by implementing a fee holiday. OCC has filed proposed changes to its schedule of fees as Exhibit 5 to File Number SR–OCC–2026–012. Material proposed to be added to OCC's schedule of fees as currently in effect is underlined and material proposed to be deleted is marked in strikethrough text. All capitalized terms not defined herein have the same meaning as set forth in the OCC By-Laws and Rules.

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, OCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. OCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of these statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

Founded in 1973, OCC operates as a central counterparty (''CCP'') under the jurisdiction of both the SEC and the Commodity Futures Trading Commission (''CFTC''). As a registered clearing agency under the SEC's jurisdiction, OCC is the sole clearing agency for equity options listed on national securities exchanges. As a registered Subpart C DCO under the CFTC's jurisdiction, OCC clears and settles transactions in futures and options on futures. OCC also provides central counterparty clearing and settlement services for securities lending transactions. In its role as a CCP, OCC guarantees the performance of its Clearing Members for all transactions cleared by OCC by becoming the buyer to every seller and the seller to every buyer. Given OCC's critical role, OCC has been designated by the Financial Stability Oversight Council as a systemically important financial market utility (''SIFMU'') under Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, entitled the Payment, Clearing and Settlement Supervision Act of 2010 (''Clearing Supervision Act'').[5]

Beginning in January 2025, OCC increased its clearing fee to $0.025 per contract in part to cover increased capital expenditures and decreasing interest income. Over the past several years, OCC has incurred significant expenses due to investments in a modernized technology infrastructure tied to the development and future launch of OCC's new clearing system, Ovation. This new system will improve efficiency both for the industry and OCC. This has come with increased costs, however, with expense growth in cloud technology, hardware, software, data centers, and disaster recovery; headcount increases and wage inflation; and increased costs related to regulatory obligations. However, given the high clearing volumes over the first half of 2025, OCC implemented a fee holiday for December 2025 effectively returning excess capital to market participants. Clearing volume during the first half of 2026 has been similarly strong and OCC's LNAFBE exceeds 110% of its Target Capital Requirement and appears likely to remain above that mark for the remainder of 2026 and 2027. OCC is therefore using the tools outlined in its Capital Management Policy and returning capital to market participants by implementing a fee holiday for December 2026.

1. Purpose

Background

As the sole clearing agency for standardized equity options listed on national securities exchanges registered with the Commission, and with respect to OCC's clearance and settlement of futures and stock loan transactions, OCC maintains policies and procedures to manage the risks borne by OCC as a central counterparty. One such risk that OCC manages is general business risk, that is, the risk of potential impairment to OCC's financial position resulting from a decline in revenues or an increase in expenses. To manage this risk and help to ensure that OCC can continue operations and services as a going concern if general business losses materialize, OCC has adopted its Capital Management Policy,[6] which provides the framework by which OCC manages its capital. Amending OCC's schedule of fees is one action used by OCC to manage its capital.

Pursuant to OCC's rule-filed Capital Management Policy, and as required by Exchange Act rules applicable to OCC,[7] OCC must maintain LNAFBE[8] sufficient to cover at least six months of operating expenses, among other measures

[2] 17 CFR 240.19b–4.

[6] *See* Notice of Filing and Immediate Effectiveness of Proposed Rule Change Concerning Updates to OCC's Capital Management Policy, Exchange Act Release No. 101151 (Sep. 24, 2024), 89 FR 79668 (Sep. 30, 2024) (File No. SR–OCC–2024–012); Order Approving Proposed Rule Change to Establish OCC's Persistent Minimum Skin-In-The-Game, Exchange Act Release No. 92038 (May 27, 2021), 86 FR 29861 (June 3, 2021) (File No. SR–OCC–2021–003); Order Approving Proposed Rule Change, as Modified by Partial Amendment No. 1, Concerning a Proposed Capital Management Policy That Would Support the Option Clearing Corporation's Function as a Systemically Important Financial Market Utility, Exchange Act Release No. 88029 (Jan. 24, 2020), 85 FR 5500 (Jan. 30, 2020) (File No. SR–OCC–2019–007); see also Notice of Filing of Partial Amendment No. 1 and Notice of No Objection to Advance Notice, as Modified by Partial Amendment No. 1, Concerning a Proposed Capital Management Policy That Would Support the Options Clearing Corporation's Function as a Systemically Important Financial Market Utility, Exchange Act Release No. 87257 (Oct. 8, 2019), 84 FR 55194 (Oct. 15, 2019) (File No. SR–OCC–2019–805).

[7] *See* 17 CFR 240.17ad–22(e)(15)(ii).

[8] While the relevant rules under the Exchange Act do not define the term, the Commission-approved Capital Management Policy defines LNAFBE as the level of cash and cash equivalents, no greater than shareholders' equity, less any approved adjustments. These approved adjustments exclude cash that would not be available to cover general business expenses, including (1) cash collected by OCC in an agency-related capacity, including the SEC Section 31 fees that OCC collects monthly and transmits to the Commission semi-annually on behalf of the options exchanges, and (2) OCC's Minimum Corporate Contribution, which is the minimum level of OCC funds (often referred to as ''skin-in-the-game'') maintained exclusively to cover credit losses or liquidity shortfalls arising from a Clearing Member default.

(''Target Capital Requirement''). Because OCC is required to maintain such funds, the LNAFBE used to meet the Target Capital Requirement cannot be used to cover operational expenses and any increase in expenses must be covered by current revenue or cash held in excess of the Target Capital Requirement. The Capital Management Plan further sets 110% of the Target Capital Requirement as an early warning threshold. If LNAFBE falls below the early warning threshold, OCC management and Board must discuss whether a fee increase is necessary.

In the filing to implement the 2025 fee increase (''2025 Fee Filing''),[9] OCC projected that its LNAFBE would fall below OCC's Target Capital Requirement by the end of Q1 2025 and took action prior to hitting the early warning threshold. At the time, OCC stated it did not believe it would be prudent, given its designation as a SIFMU, to allow its LNAFBE to decline past the early warning threshold prior to taking action to ensure that OCC maintains sufficient LNAFBE to satisfy its regulatory requirements and so that it may continue to operate as a going concern if it were to experience general business losses.[10] However, in the 2025 Fee Filing, OCC emphasized its commitment to aligning its revenues with its costs and capital needs and stated that, consistent with its past practice, if revenues exceed costs and OCC's LNAFBE is above the early warning threshold, OCC would consider utilizing tools to lower the cost of clearing for market participants, as provided under its Capital Management Policy.[11] Later in 2025, OCC followed through and implemented a fee holiday for December 2025 to help lower clearing costs for market participants.[12] Today, OCC is continuing this practice and instituting a fee holiday for December 2026.

Proposed Fee Holiday

OCC proposes to implement a fee holiday for the month of December 2026. OCC has in place policies and procedures, including the Capital Management Policy, to control costs and regularly review fees and operating expenses, including during its annual budgeting process. Consistent with the Capital Management Policy, OCC set its clearing fees based on factors including OCC's annual budgeted or forecasted operating expenses and projected revenue. However, clearing volume, and therefore revenue, have outpaced projections and OCC currently has LNAFBE in excess of its early warning threshold. In addition to clearing fees, OCC receives revenue from the interest paid on the cash margin collateral it holds with the Federal Reserve System and elsewhere. In October 2026, OCC began paying Clearing Members interest on their margin cash at a rate based on the interest rate OCC receives from the Federal Reserve, less a cash management fee. For budgeting purposes, OCC assumed it would begin paying interest on margin cash in July 2026. Therefore, OCC had three fewer months of interest expenses than anticipated, further contributing to the amount of LNAFBE OCC has in excess of the early warning threshold. The fee holiday will allow OCC to return excess capital to market participants and clearing members while still maintaining sufficient capital to maintain compliance with the Capital Management Policy and regulatory requirements.

In evaluating its current LNAFBE and projections for 2027, OCC determined that a fee holiday is warranted for December 2026. Based on recent volumes, OCC estimates that the fee holiday for the month of December will lead to approximately $77 million in lost revenue. Despite this, OCC believes it will remain above the 2026 early warning threshold ($355.3 million) as well as its projected early warning threshold for 2027 ($390.8 million). To make this determination, OCC evaluated revenue and LNAFBE under a wide range of volume scenarios including current average daily volume (''ADV''), 60 million ADV, and –4% ADV growth. In all scenarios except the negative growth scenario, OCC remained above its early warning threshold through the end of 2027 even with the fee holiday. OCC, however, does not believe the negative growth scenario is realistic, and it would result in ADV decreasing by 50% to 35.5 million contracts a day by the end of 2027. The scenario was selected to illustrate the level of volume decrease that would cause OCC to drop below its early warning threshold. Nonetheless, under this extreme scenario, OCC remained above its early warning threshold through October 2027, meaning OCC would have time to react if the negative ADV growth scenario becomes more realistic.[13]

To enact the proposed changes, OCC would update its schedule of fees as set out below.

Current fee schedule (Clearing fees)	Proposed fee schedule (fee Holiday December 2026)
All Transactions $0.025/contract	All transactions $0.00/contract.
Minimum Monthly Clearing Fee $200	$0.00.

OCC proposes to make the removal of the $.025 fee per contract effective December 1, 2026. The removal of the minimum monthly fee of $200 will be made once OCC receives all necessary regulatory approvals. Effective the first trading day of 2027, clearing fees will revert to the fee schedule in effect before December 1, 2026 and OCC will remove the fee holiday from its schedule of fees.

2. Statutory Basis

OCC believes the proposed rule change is consistent with the Act [14] and the rules and regulations thereunder.

Compliance With Section 17A(b)(3)(D) of the Act

In particular, OCC believes that the proposed fee change is consistent with Section 17A(b)(3)(D) of the Act,[15] which requires that the rules of a clearing agency provide for the equitable allocation of reasonable dues, fees, and other charges among its participants. OCC believes that the proposed fee holiday is reasonable because it is designed to decrease the cost of clearing while maintaining sufficient LNAFBE to cover OCC's operating expenses and address potential business or

[11] *Id.* at 20–21.

[12] *See* Exchange Act Release No. 34–104274 (Nov. 28, 2025), 90 FR 55768 (Dec. 3, 2025), (File No. SR–OCC–2025–019).

[13] OCC has filed a chart showing projected cash outflows and LNAFBE compared to OCC's Target Capital Requirement as Exhibit 3 to File No. SR–OCC–2026–012.

[14] 15 U.S.C. 78a, *et seq.*

[15] 15 U.S.C. 78q–1(b)(3)(D).

operational losses so that OCC can continue to meet its obligations as a SIFMU. The reasonableness of the proposal is supported by oversight, transparency, and OCC's past practice, wherever circumstances allow, to utilize tools to lower the cost of clearing for participants.

First, OCC's funding and operations are subject to oversight by OCC's Board and the Commission. OCC's annual budget, compensation for senior management, and capital initiatives are reviewed and approved by its Board-level CPC. OCC's Board is made up of a broad cross-section of options market participants, including public representatives, Clearing Member representatives from Clearing Members of various sizes, and options exchange representatives. At least a majority of the CPC is composed of independent directors, consistent with Commission Rule 17ad–25(e)[16] and the judgment of the Board.

OCC is also supervised by the Commission throughout the year. Pursuant to Section 807(a) of the Clearing Supervision Act, the Commission's Division of Examinations conducts annual examinations of OCC to determine, among other things, (1) the nature of the operations of, and the risks borne, by OCC; (2) the financial and operational risks presented by OCC to financial institutions, critical markets, or the broader financial system; and (3) the resources and capabilities of OCC to monitor and control such risks.[17] In addition, changes to OCC's rules, procedures and operations that could materially affect the nature or level of risk presented by OCC are also subject to review by the Commission, in consultation with the Federal Reserve, under Section 806(e) of the Clearing Supervision Act.[18] Furthermore, the SEC publishes such proposed changes for public comment.

Second, OCC's commitment to reasonable funding is further supported by the transparency it provides on an ongoing basis regarding its financial performance. Each year, OCC publishes its Annual Report, inclusive of its audited financial statements prepared in accordance with generally accepted accounting principles. OCC maintains a dedicated website that consolidates its annual reports in a readily accessible place.[19] On a quarterly basis, OCC also provides unaudited information concerning its total revenues, average daily contract volume and LNAFBE on its ''Schedule of Fees'' website to aid Clearing Members in assessing the risk associated with a potential Operational Loss Fee in accordance with OCC's capital replenishment plan under its Capital Management Policy.[20]

Third, OCC is committed to aligning its revenues with its costs and capital needs. Consistent with OCC's past practice, if revenues exceed costs and OCC's LNAFBE is above the early warning threshold, OCC would consider utilizing tools to lower the cost of clearing for market participants, as provided under its Capital Management Policy. Such tools may include fee decreases like those OCC implemented in 2020 and 2021,[21] fee holidays like the one OCC implemented from November through December of 2021 and December 2025[22] and proposed to be implemented in December 2026, or fee refunds like the $156 million refund in 2020 and the $76.3 million refund in 2021.

Finally, OCC believes that the fee holiday would be equitably allocated because it applies equally to all transaction types and clearing members.

Compliance With Rule 17ad–22(e)(15)

In addition, OCC believes that the proposed rule change is consistent with Rule 17ad–22(e)(15), which requires that OCC establish, implement, maintain and enforce written policies and procedures reasonably designed to identify, monitor, and manage OCC's general business risk and hold sufficient LNAFBE to cover potential general business losses so that OCC can continue operations and services as a going concern if those losses materialize.[23] The Rule also requires OCC to hold LNAFBE equal to at least six months of OCC's current operating expenses, among other measures.[24] As described above, OCC will be able to continue to meet its ongoing obligations and hold the required amount of LNAFBE following the fee holiday. OCC estimates that the fee holiday will result in approximately $77 million in missed revenue. Nonetheless, based on a wide range of trading volume projections, OCC expects to remain above its Target Capital Requirement and early warning threshold throughout 2026 following the fee holiday.[25]

(B) Clearing Agency's Statement on Burden on Competition

Section 17A(b)(3)(I) of the Act[26] requires that the rules of a clearing agency not to impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. OCC does not believe that the proposed rule change would have any impact or impose a burden on competition. OCC believes that the proposed rule change would not disadvantage or favor any particular user of OCC's services in relationship to another user because the proposed fee holiday would apply equally to all Clearing Members. Accordingly, OCC does not believe that the proposed rule change would have any impact or impose a burden on competition.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments were not and are not intended to be solicited with respect to the proposed change and none have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[27] and paragraph (f) of Rule 19b–4[28] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

The proposal shall not take effect until all regulatory actions required with respect to the proposal are completed.[29]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–OCC–2026–012 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–OCC–2026–012. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of such filing will be available for inspection and copying at the principal office of OCC and on OCC's website at *https://www.theocc.com/Company-Information/Documents-and-Archives/By-Laws-and-Rules.* Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to File Number SR–OCC–2026–012 and should be submitted on or before December 10, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[30]

Vanessa A. Countryman,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106893; File No. SR–NYSEAMER–2026–17]

Self-Regulatory Organizations; NYSE American LLC; Order Approving a Proposed Rule Change To Amend Sections 1003 and 1009 of the NYSE American Company Guide

November 13, 2026.

I. Introduction

On March 6, 2026, NYSE American LLC (''NYSE American'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'' or ''SEC''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend Sections 1003 and 1009 of the NYSE American Company Guide (''Company Guide'') to establish that an issuer must maintain a certain market capitalization in order to remain listed on the Exchange. The proposed rule change was published for comment in the **Federal Register** on March 20, 2026.[3] On April 29, 2026, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to take action on the proposed rule change.[5] On June 2, 2026, the Commission instituted proceedings pursuant to Section 19(b)(2)(B) of the Act [6] to determine whether to approve or disapprove the proposed rule change.[7] On September 14, 2026, the Commission issued a notice of designation of a longer period of time for Commission action on proceedings to determine whether to approve or disapprove the proposed rule change.[8] The Commission received several comment letters, which are addressed below.[9] This order approves the proposed rule change.

II. Description of the Proposed Rule Change

Section 1003 of the Company Guide sets forth minimum quantitative and qualitative continued listing standards for securities listed on the Exchange.[10] Currently, Section 1003(b)(i) of the Company Guide enumerates circumstances where the Exchange will consider suspension and delisting of a class of common stock because of a sufficiently limited distribution of shares.[11] Section 1003(b)(i) of the Company Guide does not contain a minimum market capitalization requirement.[12]

The Exchange states that it has noticed a recent increase in companies that have a very small market capitalization.[13] According to the Exchange, an issuer with a small market capitalization is potentially susceptible to manipulation and more likely to experience trading volatility in its shares because, at smaller sizes, less capital is required to undertake manipulative trading activity.[14] Therefore, the Exchange proposes to amend Section 1003 of the Company Guide to require an issuer to maintain a certain market capitalization in order to remain listed on the Exchange.[15]

Specifically, the Exchange proposes to adopt new Section 1003(b)(i)(D) of the Company Guide to specify that if an issuer's class of common stock is determined to have average market capitalization over a consecutive 30 trading-day period of less than $5 million, the Exchange will immediately suspend trading and commence delisting proceedings with respect to such security in accordance with the procedures in Section 1010 of the Company Guide.[16] This order refers to

[8] *See* Securities Exchange Act Release No. 106348, 91 FR 58947 (Sept. 17, 2026). The Commission designated November 15, 2026, as the date by which the Commission must issue an order approving or disapproving the proposed rule change. *See id.*

[9] Comments received on the proposed rule change are available at: *https://www.sec.gov/rules-regulations/public-comments/sr-nyseamer-2026-17.*

[10] *See* Notice, *supra* note 3, at 13645. Specifically, the Exchange stated that Section 1003 of the Company Guide requires issuers of common stock to maintain certain quantitative minimum standards related to stockholders' equity, publicly held shares, public shareholders, and aggregate market value of publicly held shares. In addition, Section 1003 of the Company Guide sets forth qualitative continued listing standards related to, among other things, operations contrary to public interest and reduction of operations. *See id.*

[11] *See id. See also* Section 1003(b) of the Company Guide.

[12] *See* Notice, *supra* note 3, at 13645.

[13] *See id.*

[14] *See id.*

[15] *See id.*

[16] *See id.* For purposes of Section 1003 of the Company Guide, market capitalization includes the total common stock outstanding (excluding treasury shares) as well as any common stock that would be

average market capitalization for an issuer's class of common stock over a consecutive 30 trading-day period of $5 million as the ''Minimum Market Capitalization Criteria.'' The Exchange also proposes that an issuer that falls below the Minimum Market Capitalization Criteria would not be eligible to follow the procedures to regain compliance outlined in Section 1009 of the Company Guide.[17] The Exchange further proposes to amend Section 1009 of the Company Guide to add to the list of continued listing standards for which noncompliance does not entitle the issuer to a compliance period a reference to proposed Section 1003(b)(i)(D) of the Company Guide.[18] The Exchange states that all issuers would retain the right to appeal an Exchange delisting decision.[19]

The Exchange states that, in its experience, an issuer with a sustained market capitalization below $5 million is likely to be financially distressed and is increasingly susceptible to manipulation due to its small size.[20] The Exchange also states that having a market capitalization below $5 million is frequently a leading indicator that an issuer has other financial concerns that often require a substantial amount of regulatory oversight, and accordingly, the Exchange does not believe that an issuer fitting this profile is appropriate for continued listing on the Exchange.[21] Further, the Exchange states that, in its experience, a company trading at a sustained market capitalization below $5 million is unlikely to regain financial stability and it is therefore appropriate to subject the company to immediate suspension and delisting.[22]

The Exchange states that the proposal would become effective immediately upon Commission approval.[23]

III. Discussion and Commission Findings

The Commission has given careful consideration to the Exchange's proposal and all comments submitted to determine whether the proposal is consistent with the Act and the rules and regulations issued thereunder. Under Section 19b(2)(C) of the Act, the Commission must approve the proposed rule change of a self-regulatory organization (''SRO'') if the Commission finds that the proposed rule change is consistent with the Act and the applicable rules and regulations thereunder; if it does not make such a finding, the Commission must disapprove the proposed rule change.[24]

For the reasons discussed herein, the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to national securities exchange. In particular, the Commission finds that the record before the Commission demonstrates that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.[25] More specifically, the Commission finds that the proposed rule change is consistent with Section 6(b)(5) of the Act,[26] which requires, among other things, that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest, and not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Commission also finds that the proposed rule change is consistent with Section 6(b)(7) of the Act,[27] which requires, among other things, that the rules of an exchange provide fair procedure for the prohibition or limitation by the exchange of any person with respect to access to services offered by the exchange. In addition, the Commission finds that the proposed rule change is consistent with Section 6(b)(8) of the Act,[28] which requires that the rules of an exchange do not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

The Commission has consistently recognized that the development and enforcement of meaningful listing standards [29] by an exchange is of critical importance to financial markets and the investing public.[30] Among other things, the Commission has stated that listing standards provide the means for an exchange to screen issuers that seek to become listed, and to provide listed status only to bona fide companies that have or will have sufficient public float, investor base, and trading interest to provide the depth and liquidity to promote fair and orderly markets.[31] Those listing standards are informed by an exchange's regulatory and commercial considerations and the Act provides exchanges with discretion, subject to the requirements of the Act, to set those standards as they see fit with the understanding that not all companies will meet those standards initially or over time. Meaningful listing standards also are important given investor expectations regarding the nature of securities that have achieved an exchange listing, and the role of an exchange in overseeing its market and assuring compliance with its listing standards.[32] The imprimatur of listing on a particular exchange correlates to investors' expectations that the listed issuer meets the standards set by the exchange and that the exchange has used its judgment regarding the level at which to set those standards.[33]

issued upon conversion of another outstanding equity security, if such other security is a ''substantial equivalent'' of common stock. *See* footnote to Section 1003 of the Company Guide.

[29] This reference to ''listing standards'' refers to both initial and continued listing standards.

[30] *See, e.g.,* Securities Exchange Act Release No. 57785 (May 6, 2008), 73 FR 27597 (May 13, 2008) (SR–NYSE–2008–17).

[31] *See, e.g.,* Securities Exchange Act Release Nos. 105494 (May 14, 2026), 91 FR 29183 (May 19, 2026) (SR–NASDAQ–2025–069); 105603 (Jun. 3, 2026), 91 FR 34675 (Jun. 8, 2026) (SR–NASDAQ–2026–009); 106134 (Aug. 14, 2026), 91 FR 53436 (Aug. 18, 2026) (SR–NYSEAMER–2025–72) (''Minimum Bid Price Proposal''); 10633 (Aug. 14, 2026), 91 FR 53458 (Aug. 18, 2026) (NYSE–2025–43). In these releases, the Commission also stated that adequate listing standards, by promoting fair and orderly markets, are consistent with Section 6(b)(5) of the Act, in that they are, among other things, designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, and protect investors and the public interest.

[32] *See, e.g.,* Securities Exchange Act Release Nos. 88716 (Apr. 21, 2020), 85 FR 23393 (Apr. 27, 2020) (SR–NASDAQ–2020–001); 88389 (Mar. 16, 2020), 85 FR 16163 (Mar. 20, 2020) (SR–NASDAQ–2019–089). *See also* Securities Exchange Act Release No. 81856 (Oct. 11, 2017), 82 FR 48296, 48298 (Oct. 17, 2017) (SR–NYSE–2017–31) (stating that ''[a]dequate standards are especially important given the expectations of investors regarding exchange trading and the imprimatur of listing on a particular market'' and that ''[o]nce a security has been approved for initial listing, maintenance criteria allow an exchange to monitor the status and trading characteristics of that issue . . . so that fair and orderly markets can be maintained'').

[33] *See* Securities Exchange Act Release No. 38961 (Aug. 22, 1997), 62 FR 45895, 45899 (Aug. 29, 1997) (SR–NASD–97–16) (finding Nasdaq's proposal to raise its listing standards consistent with the Act because the proposal ''reflects the NASD's judgment that it wants only higher quality companies to avail themselves of the Nasdaq marketplace, and the imprimatur that such inclusion confers'' and the increased standards ''are directly related to the NASD's intended goals of enhancing its listing standards'').

The Exchange's proposal is reasonably designed to enhance the Exchange's continued listing standards. The proposal will accelerate the timeframe within which the Exchange will delist an issuer's class of common stock in instances where the security is below the Minimum Market Capitalization Criteria and result in immediate suspension from trading on the Exchange.[34] Such issuers will not be eligible to receive a cure or compliance period before receiving an Exchange delisting decision. The Exchange states that a company with a sustained market capitalization below $5 million is likely to be financially distressed and is more susceptible to market manipulation.[35]

As discussed further below, a few commenters stated that the proposal is inadequate because it failed to conduct certain analyses that the Commission would generally conduct for its own rulemaking, such as a cost-benefit analysis and an analysis of the combined effect of the proposal together with pending proposals from other exchanges.[36] When submitting a proposed rule change, an SRO is subject to the requirements of Section 19 of the Act,[37] Rule 19b–4 thereunder,[38] and Form 19b–4,[39] which are not the same requirements that apply when the Commission proposes new or amended Federal securities rules and regulations. There presently are 29 registered national securities exchanges[40] that operate trading venues. As private commercial enterprises, the Act provides exchanges with a considerable degree of discretion to operate. This proposal is about listing standards, which the Federal securities laws do not prescribe. Rather, the securities laws leave the establishment of listing standards to the individual exchanges, which have broad discretion to establish such standards as they, in their expertise and judgment, see fit, subject to the requirements of Section 6 of the Act.[41] Those requirements do not include that an exchange conduct a cost-benefit analysis or analyze the effects of its proposals when considered in combination with the proposals or rules of its competitors. Nor does the Act require the Commission to perform such analyses when considering an exchange proposal.

Two commenters expressed support for the Exchange's proposal.[42] One commenter stated that the proposal is a direct response to widespread concerns over the growth of manipulative trading schemes in highly speculative, low priced securities listed on exchanges, which harms investors and undermines confidence in the fairness and efficiency of U.S. equity markets.[43] This commenter stated that the proposal ''supports market integrity and protects investors, strengthens U.S. financial markets, and is clearly consistent with the Exchange Act.'' [44] This commenter further stated that the trend of ''highly speculative, low priced securities listing on exchanges in recent years,'' and the accompanying growth in manipulative trading schemes, are ''directly linked to current listing standards being insufficient and susceptible to circumvention.'' [45] This commenter stated that actions taken thus far by regulators in response ''have yet to stem the tide,'' therefore the commenter has urged the listing exchanges to enhance their continued listing requirements.[46]

Another commenter stated that the Exchange's proposal is a ''meaningful enhancement to its continued listing standards'' and is aligned with its duties as an SRO to design and enforce ''meaningful listing standards that ensure listed companies have sufficient public float, investor base, and trading interest to support fair and orderly markets.'' [47] This commenter stated the number of low-priced securities on U.S. exchanges has grown materially in recent years and that these securities exhibit ''structural fragilities'' such as ''thin trading, wider spreads, limited and unstable investor interest, and heightened vulnerability to promotion driven price spikes.'' [48] This commenter further stated that these ''characteristics make such securities disproportionately associated with manipulative schemes, including pump and dumps, ramp and dumps, serial reverse splits, wash trading, and other volume manufacturing tactics that distort price discovery and expose retail investors to significant harm.'' [49] This commenter stated that approving the proposal would address the specific risks that the Exchange has documented.[50]

Other commenters raised concerns regarding the proposed rule change.[51] Specifically, one commenter stated that the proposal does not provide empirical evidence in support of the proposed $5 million market capitalization threshold, such as evidence demonstrating that issuers below the proposed threshold present a systemic problem warranting categorical intervention.[52] This commenter stated that ''[i]f fraud or

manipulation risk is disproportionately concentrated among identifiable issuer profiles, a targeted, risk-based response focused on those characteristics would be more precise and far less damaging than a blanket market-capitalization trigger applied to all issuers regardless of domicile, governance structure, or compliance history.'' [53]

The Commission's data analysis, discussed in more detailed below, supports approval of the Exchange's proposal. Specifically, the Commission's analysis supports the Exchange's statement that there is an increasing trend of companies that have a very small market capitalization and that companies with a sustained market capitalization below $5 million are unlikely to regain financial stability.[54] As discussed further below, in the Commission's view, securities with smaller market capitalization may be more susceptible to manipulation.[55] The continued listing of securities with a market capitalization below $5 million raises concerns that these securities may have heightened susceptibility to manipulation while trading on the Exchange for an extended period. Accordingly, the Exchange's proposal to immediately suspend and delist companies that fail to comply with the Minimum Market Capitalization Criteria is reasonably designed and consistent with the requirements of Section 6(b)(5) of the Act that the rules of the Exchange be designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, protect investors and the public interest, and not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.[56]

As part of the Commission's consideration of the proposed Minimum Market Capitalization Criteria, the Commission analyzed stock price and delistings data for companies listed on The Nasdaq Stock Market LLC (''Nasdaq'') and on NYSE American from 2006 to 2025.[57] The results of the Commission's analysis show that the number of issuers whose average market capitalization over a consecutive 30 trading-day period would have fallen below $5 million (''Market Capitalization Analysis Threshold''),[58] increased sharply from 5 issuers in 2021 to 176 issuers in 2023.[59] Although the numbers decreased to 159 issuers in 2024, and 110 issuers in 2025, the 2024 and 2025 numbers are still higher than during the rest of the sample period, apart from 2008.

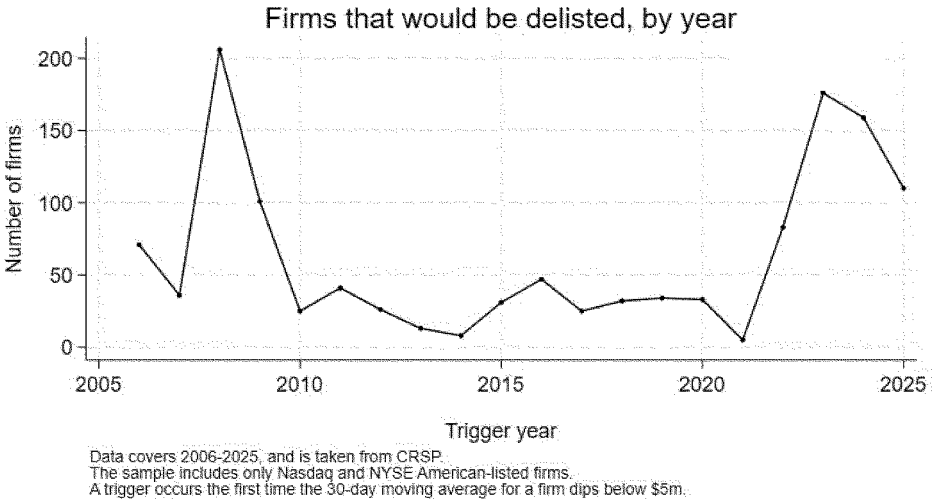

Figure 1. Number of Nasdaq and NYSE American issuers that would have been delisted pursuant to the Market Capitalization Analysis Threshold, by year.

[54] *See supra* notes 13 and 22.

[55] *See supra* notes 78–81 and accompanying text.

[56] 15 U.S.C. 78f(b)(5).

[57] The stock price data, which is at the security level, was sourced from Center for Research in Security Prices (''CRSP'') and accessed through Wharton Research Data Services. This data covers the time period from 2006 to 2025. The data provider calculated the daily market capitalization of each security by multiplying the closing price by the number of shares outstanding. If a closing trade was not available, the closing price was calculated as the midpoint of the best bid and ask quotes at the end of the regular trading session. The Commission analyzed the stock price data at the company level, excluded non-corporate issuers, and only kept issues of common equity (including American Depositary Receipts). The total equity market capitalization of each company was obtained by aggregating the market capitalization of each of the company's issues. The delistings data was sourced from CRSP. The delisting analysis included only cases where the listing exchange dropped the issue (*i.e.,* it excluded cases where an issue was delisted due to a merger, exchange or liquidation). If a company was delisted from an exchange, re-listed, and then was delisted again, only the first delisting event for the company was included in the analysis.

[58] The proposed Minimum Market Capitalization Criteria has a definition closely related to the Market Capitalization Analysis Threshold used in this analysis. The terms differ in that the Market Capitalization Analysis Threshold is based on the number of shares outstanding, as described in note 63, whereas the Minimum Market Capitalization Criteria is based on the total common stock outstanding (excluding treasury shares), as well as any common stock that would be issued upon conversion of another outstanding equity security, if such other security is a ''substantial equivalent'' of common stock. *See supra* note 16 and accompanying text. While counting the number of shares of common stock that would be issued upon conversion, consistent with the definition of the Minimum Market Capitalization Criteria, may influence the quantitative findings in the analysis, the Commission did not attempt to include such details due to the lack of readily available data on such share counts.

[59] Figure 1 and Figure 2 compare the number of issuers that would have been delisted pursuant to the Market Capitalization Analysis Threshold (number of firms) against the year in which the delisting would have taken place (trigger year). Figure 1 includes data on Nasdaq or NYSE American issuers; and Figure 2 only includes data on NYSE American issuers. If an issuer fell below the Market Capitalization Analysis Threshold multiple times during the sample period, both analyses kept only the first of such dates.

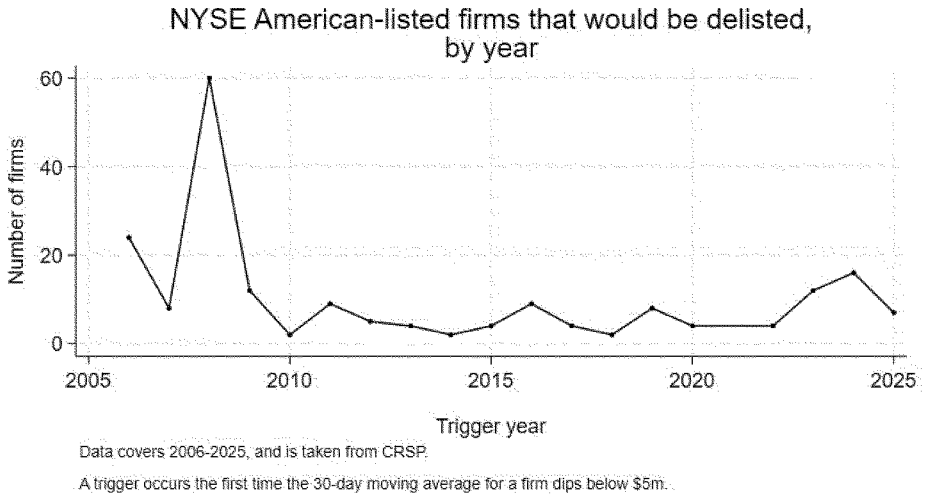

Figure 2. Number of NYSE American issuers that would have been delisted pursuant to the Market Capitalization Analysis Threshold, by year..

In addition, the Commission analyzed the relationship between securities whose average market capitalization over periods ranging between 30 and 90 trading days fell below thresholds between $1 million and $50 million, and their average market capitalization after 180 calendar days of first crossing the market capitalization threshold.[60] According to the analysis, regardless of the market capitalization threshold or time parameter selected, the median market capitalization after 180 days is below the specific market capitalization threshold. This result generally holds true for the Market Capitalization Analysis Threshold (*i.e.,* a consecutive 30 trading-day average market capitalization below $5 million) over the sample period.[61] 59% of the issuers that fell below the Market Capitalization Analysis Threshold had an average market capitalization of under $5 million after 180 days, with a median valuation of $4.1 million. The results show that, in general, issuers that fell below the Market Capitalization Analysis Threshold tend to stay below such threshold for an extended period of time. Accordingly, the Exchange's use of the Market Capitalization Analysis Threshold provides a reasonably designed standard for the Exchange to use when making assessments of compliance with its continued listing standards.

TABLE 1—MARKET CAPITALIZATION OF ISSUERS 180 CALENDAR DAYS AFTER CROSSING THE VARIOUS MARKET CAPITALIZATION THRESHOLDS AND DURATION

Market cap threshold ($, 000's)	Days of moving average	Companies that would have been delisted	Market capitalization of companies 180 calendar days after crossing the threshold ($, 000's)				
			Sample statistics:				
			Average	P25	P50	P75	P90
$50,000	30	4,567	$41,304	$16,541	$31,026	$47,743	$74,347
20,000	30	3,170	20,591	7,661	13,315	21,027	36,877
10,000	30	2,220	14,342	4,195	7,257	11,957	20,813
7,000	30	1,718	10,228	3,178	5,243	9,018	16,898
5,000	30	1,261	9,262	2,397	4,142	7,082	13,415
3,000	30	727	8,231	1,651	2,745	5,050	9,754
1,000	30	122	7,492	537	908	2,762	7,993
50,000	60	4,398	38,816	15,656	29,211	45,515	70,176
20,000	60	2,979	19,379	6,996	12,660	20,162	34,175
10,000	60	2,003	11,222	3,867	6,579	11,176	19,684
7,000	60	1,480	10,366	2,891	4,964	8,182	14,988
5,000	60	1,059	8,264	2,199	3,831	6,423	11,468
3,000	60	570	8,539	1,480	2,527	4,708	9,759

[60] Table 1 analyzes two variables: market capitalization thresholds ranging from $1 million to $50 million, and the number of consecutive trading days over which the average market capitalization is calculated. Table 1 shows the corresponding number of issuers that would have fallen below the specific market capitalization threshold and specific duration, and their average and percentile distribution of average market capitalization after 180 calendar days. For example, the sample for the first row includes the 4,567 issuers that would have been delisted under a rule with a 30 consecutive trading-day average market capitalization of $50 million. The 180-day window reflects a cure period that may be available for many failures to satisfy continued listing requirements, including under Section 1007 (late SEC filings) of the Company Guide. If the market capitalization for a company is not available at the end of the 180-day window—either because the company was delisted or because the data did not include 2026—then the last market capitalization in the window is used.

[61] Figure 3 shows the percentile distribution of average market capitalization 180 days after issuers first cross the Market Capitalization Analysis Threshold by the 25th percentile (P25), the median (P50), and the 75th percentile (75) against the year such issuers first cross the Market Capitalization Analysis Threshold.

TABLE 1—MARKET CAPITALIZATION OF ISSUERS 180 CALENDAR DAYS AFTER CROSSING THE VARIOUS MARKET CAPITALIZATION THRESHOLDS AND DURATION—Continued

Market cap threshold ($, 000's)	Days of moving average	Companies that would have been delisted	Market capitalization of companies 180 calendar days after crossing the threshold ($, 000's)				
			Sample statistics:				
			Average	P25	P50	P75	P90
1,000	60	78	8,729	537	868	2,410	4,735
50,000	90	4,251	37,582	14,801	28,102	44,967	68,157
20,000	90	2,805	20,694	6,465	11,994	19,233	32,756
10,000	90	1,800	11,060	3,651	6,420	10,799	19,431

1,000	90	53	7,240	479	867	1,876	7,859

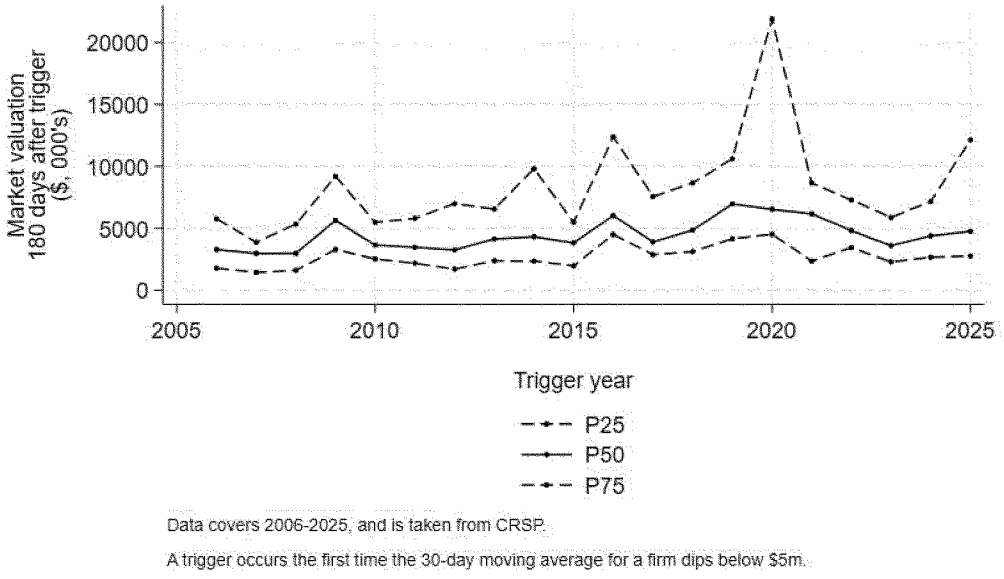

Figure 3. Percentile distribution of market capitalization 180 days after issuers first crossed the Market Capitalization Analysis Threshold.

The Commission's analysis also shows that issuers that fell below the Market Capitalization Analysis Threshold had a high likelihood of being delisted for reasons that indicate a failure to comply with other quantitative continued listing requirements.[62] Historically, when an issuer fell below the Market Capitalization Analysis Threshold and was later delisted, such delisting, at the median, occurred 230 days later, and at the 75th percentile, 621 days later.[63]

[62] The analysis, as shown in Figure 4, compared the fraction of issuers on NYSE American who were subsequently delisted after dropping below the Market Capitalization Analysis Threshold against the year such companies fell below the Market Capitalization Analysis Threshold. The analysis only took into account delistings by the Exchange, and excluded delistings by mergers and acquisitions, liquidations, and exchanges. *See* CRSP US DATABASES DATA DESCRIPTIONS GUIDE FOR CRSPACCESS (FIZ) (2026) at 247–250, *available at https://indexes.morningstar.com/docs/guide/crsp-us-stock-databases-data-descriptions-guide-for-crspaccess-fiz?isRdp=true* for the available delisting codes. In the sample described in note 63, *supra,* the following five codes represent over 75% of delistings that occurred after dropping below the Market Capitalization Analysis Threshold: ''does not meet exchange's financial guidelines for continued listing,'' ''insufficient capital, surplus, and/or equity,'' ''price fell below acceptable level,'' ''bankruptcy, declared insolvent,'' and ''delinquent in filing, non-payment of fees.'' Approximately 18% of the delistings occurred at the request of the issuer—*e.g.,* the issue moved to the over-the-counter (''OTC'') market voluntarily—and the delisting code does not indicate whether or not the issuer was in compliance with listing requirements at the time of delisting; however, most of these voluntary delistings occurred when the stock price was below $1, indicating difficulty complying with minimum price standards.

[63] The relationship between an issuer crossing the Market Capitalization Analysis Threshold and subsequently being delisted weakened over time. One reason for the weakened relationship may be the amount of time that the delisting and hearings process takes (*i.e.,* some companies that fell out of compliance with continued listing requirements in the later portion of the time period analyzed may ultimately be delisted based on these deficiencies, but remain listed at this time). *See, e.g.,* Section 1009 of the Company Guide (providing companies with an opportunity to submit a plan to come back into compliance with continued listing standards).

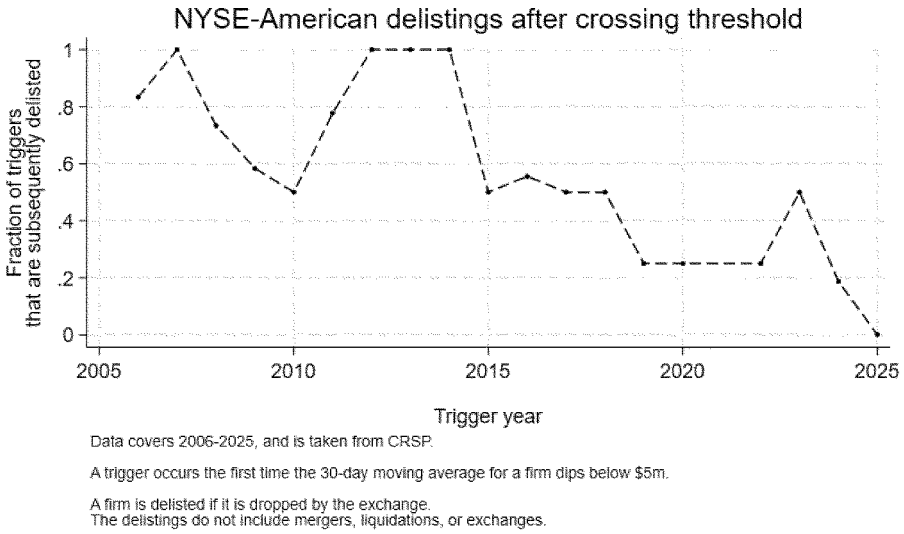

Figure 4. Fraction of NYSE American issuers that were subsequently delisted after first crossing the Market Capitalization Analysis Threshold.

Finally, the Commission's analysis indicates a fundamental tradeoff inherent in selecting a threshold for delisting: a more stringent threshold (*i.e.,* higher average market capitalization or shorter duration over which that average is calculated) would capture issuers that will eventually be delisted for other reasons, but also implicate issuers that otherwise would have remained above the threshold and stayed listed.[64]

TABLE 2—DELISTING OUTCOMES OF ISSUERS CROSSING THE VARIOUS MARKET CAPITALIZATION THRESHOLDS AND TIME DURATIONS, BETWEEN 2006 AND 2025

Market cap threshold ($,000's)	Days of moving average	Companies that would have been delisted	Expedited delistings	False positives	False negatives	False positives as a fraction of companies that would have been delisted (%)
50,000	30	4,567	1,724	2,845	266	62
20,000	30	3,170	1,470	1,700	520	54
10,000	30	2,220	1,119	1,103	871	50

3,000	90	464	223	241	1,767	52
1,000	90	53	34	19	1,956	36

[64] The Commission conducted analysis on false positives (issuers falling below the Market Capitalization Analysis Threshold, but were never delisted), and false negatives (issuers never falling below the Market Capitalization Analysis Threshold, but were delisted), as shown in Table 2. Similar to Table 1, Table 2 analyzes two variables: average market capitalization thresholds ranging from $1 million to $50 million, and the number of consecutive trading days over which the average market capitalization is calculated. Table 2 shows the corresponding number of issuers that would have been delisted based on the specific average market capitalization threshold and specific duration, issuers that would have failed to meet the relevant average market capitalization threshold and duration and were subsequently delisted (*i.e.,* expedited delistings), false positives, and false negatives. Table 2 shows a mechanical inverse relationship between false positives and false negatives. As the thresholds become more stringent (*i.e.,* higher average market capitalization or shorter duration), the number of false positives generally increases.

The Minimum Market Capitalization Criteria threshold of $5 million is substantially lower than the market capitalization initial listing standard threshold on NYSE American.[65] For example, the total value of market capitalization required in applicable standards for *initial listing* is at least $50 million.[66] Similarly, the Minimum Market Capitalization Criteria threshold is substantially lower than the average global market capitalization threshold for the existing *continued listing* standard thresholds on NYSE American.[67] The average global market capitalization standard for continued listing requires at least $50 million for a consecutive 30 trading-day period.[68] Accordingly, a company persistently and consistently trading at levels below an average $5 million market capitalization for approximately six calendar weeks (*i.e.,* 30 trading days) would be trading significantly below such initial and continued listing requirements for NYSE American-listed companies, raising questions about the company's suitability for continued listing on NYSE American. Further, it is likely that a company that substantially declines from the market capitalization at which it initially listed on NYSE American to the average $5 million market capitalization level will most likely find itself in that position without surprise and, accordingly, will have had the opportunity to raise capital, explore business opportunities, or explore other options to increase assets, reduce liabilities, and increase revenues before crossing the average $5 million market capitalization threshold and remaining below that level for a consecutive 30 trading days.[69]

The Exchange has identified risks pertaining to securities with a market capitalization below $5 million, including a heightened susceptibility to manipulation. The results of the Commission's analysis support approval of the Exchange's proposal to impose the Minimum Market Capitalization Criteria. The increased number of securities with an average market capitalization over a consecutive 30 trading-day period below $5 million in recent years, along with the significant likelihood that such securities will eventually be delisted, warrants the Exchange's consideration of the continued listing of securities with a low level of market capitalization.[70] Moreover, when securities fall below an average market capitalization of $5 million for a consecutive 30 trading-day period, there is a significant likelihood that they will continue to have an average market capitalization below $5 million for another 180 calendar days, which is a significant period of time.[71] While the delisting process sometimes affords companies experiencing truly temporary financial or business issues a cure period for them to regain compliance with continued listing standards, they necessarily prolong the delisting process which also prolongs the exposure of investors to potential harm for a company that ultimately is likely to be delisted. The Exchange's proposed $5 million market capitalization threshold and 30-day time parameter reflects a reasonably balanced approach for a continued listing requirement that provides companies with time to recover from short-term unexpected declines without prolonging the delisting process.

In the Commission's view, securities with a small market capitalization may be more prone to manipulation.[72] When a security has a smaller market capitalization, the cost required to accumulate a position that is large enough to influence the price of the security is reduced. Accordingly, a would-be manipulator may find it less costly to manipulate the price of the security. Thus, the continued listing of companies with small market capitalization raises concerns that these securities may have heightened susceptibility to manipulation. These concerns are exacerbated if companies with low market capitalization lack sufficient natural trading interest that could otherwise mitigate the susceptibility to manipulation by promoting fair and orderly markets in the security. The Commission, certain exchanges, and FINRA have allocated resources to identify and address manipulation in securities of companies with small market capitalization.[73] Despite these efforts, the Exchange's concerns about the potential for manipulation persist.[74] Manipulative schemes that target the securities of companies with small market capitalization, like ''ramp and dump'' and ''pump and dump,'' are often identified and responded to after the fact. The Exchange's proposal represents a reasonable approach to address concerns that companies with a persistent (*i.e.,* at least 30 consecutive trading days) market capitalization below $5 million may be susceptible to types of manipulation that result in harm to investors. The immediate suspension and delisting of these securities with a small market capitalization, as measured by considering average market capitalization over a consecutive 30 trading-day period, is designed to prevent fraudulent and manipulative acts and practices, and more broadly, the rule is reasonably designed to promote just and equitable principles of trade and to protect investors and the public interest.[75]

The proposal is reasonably designed to enhance the Exchange's listing standards by immediately suspending trading and commencing delisting proceedings for securities that fall below the Minimum Market Capitalization Criteria, which facilitates the continued listing of securities of issuers that are financially sound. As noted above, the imprimatur of listing on a particular exchange correlates to investors' expectations that the listed issuer meets certain standards set by the exchange and that a listing exchange will use its judgment regarding the level at which to set those standards. Those standards are informed by an exchange's regulatory and commercial considerations and exchanges have discretion, subject to the requirements of the Act, to set those standards as they see fit.

Moreover, the addition of the Minimum Market Capitalization Criteria is not unfairly discriminatory because

[65] *See, e.g.,* NYSE American Company Guide, *available at https://nyseamericanguide.srorules.com/company-guide.*

[66] *See* Section 101(c)(2) and (d)(1) of the Company Guide.

[67] *See, e.g., supra* note 71.

[68] *See* Section 1003(a) of the Company Guide.

[69] *See also infra* note 136, and accompanying text.

[70] *See* Figure 1, Figure 2, and Figure 4. *See supra* notes 20–21 and accompanying text.

[71] *See* Table 1. In addition, the Commission's analysis demonstrates that there is an inherent tradeoff to be made when selecting a numerical threshold for a continued listing requirement between eliminating those companies that are the intended target and providing increased flexibility for listed issuers. *See* Table 2 and Figure 3.

[72] This view supports the Exchange's statements that an issuer with a small market capitalization is potentially or increasingly susceptible to manipulation. *See supra* notes 14 and 20 and accompanying text. *See also supra* notes 48–56 and accompanying text.

[73] For example, the Commission has issued temporary 12(k) suspensions of trading in securities in response to potential manipulation in the last year. *See, e.g.,* Securities Exchange Act Release Nos. 104112 (Sept. 26, 2025) (Smart Digital Group Limited), 104113 (Sept. 26, 2025) (QMMM Holding Limited), 104163 (Oct. 3, 2025) (Etoiles Capital Group Co., Ltd.), 104164 (Oct. 3, 2025) (Platinum Analytics Cayman Limited), 104165 (Oct. 3, 2025) (Pitanium Limited), 104166 (Oct. 8, 2025) (Empro Group Inc.), 104167 (Oct. 8, 2025) (NusaTrip Incorporated), 104168 (Oct. 16, 2025) (Premium Catering (Holdings) Limited), 104169 (Oct. 22, 2025) (Robot Consulting Co., Ltd.), 104176 (Nov. 11, 2025) (Charming Medical Limited), 104317 (Dec. 4, 2025) (Magnitude International Ltd), 104613 (Jan. 14, 2026) (JM Group Limited), 104763 (Feb. 1, 2026) (TechCreate Group Ltd.), 105675 (June 11, 2026) (Happy City Holdings Limited), 106668 (Oct. 14, 2026) (TJGC Group Limited).

[74] *See supra* note 13 and accompanying text.

[75] *See* 15 U.S.C. 78f(b)(5).

the proposed standard is reasonably tailored to the Exchange's goal of addressing the risks that it has identified with respect to securities with a small market capitalization. The $5 million market capitalization threshold will provide for a level of market capitalization below which there may be a heightened susceptibility to manipulation and difficulties maintaining fair and orderly markets in these securities. And the requirement that a security have an average market capitalization over a consecutive 30 trading-day period of less than $5 million before being subject to immediate suspension and delisting will target instances where securities have demonstrated a significant longevity of these risks. Therefore, the Commission finds that the Exchange's proposal to immediately suspend and delist companies that fail to comply with the Minimum Market Capitalization Criteria is reasonably designed and consistent with the requirements of Section 6(b)(5) of the Act that the rules of the Exchange be designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, protect investors and the public interest, and not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.[76]

A. Comments Regarding the Minimum Market Capitalization Criteria

One commenter stated that issuers with a sustained market capitalization below $5 million ''is often a leading indicator of broader financial and compliance concerns that demand disproportionate regulatory oversight and pose significant risks to investors, who generally view companies that meet the requirements to be listed on an exchange as more financially sound and less risky than OTC securities.'' [77] This commenter stated that a bright line continued listing threshold of $5 million in market capitalization ''provides an objective, quantitative marker that is reasonably related to initial listing standards and appropriately identifies companies whose ongoing exchange listing, after failing to meet this threshold for 30 consecutive trading days, is no longer consistent with maintaining fair, orderly, and efficient markets.'' [78] This commenter further stated that the Exchange's proposal to utilize an average market capitalization threshold as measured over a consecutive 30 trading-day period would ''reduce[] the risk of gaming the threshold through short term price spikes and better reflect[] the sustained market value of the issuer.'' [79]

Several commenters stated that the proposed Minimum Market Capitalization Criteria could result in the delisting of companies based on broader market- or sector-wide conditions that may cause temporary fluctuations that are not related to their underlying business or financial condition.[80] Commenters also raised concerns that the proposal would disproportionately burden microcap and emerging growth issuers.[81] One commenter stated that the proposed rule disproportionately impacts microcap and emerging growth issuers because these types of issuers ''frequently experience temporary fluctuations in market capitalization resulting from broader market conditions, financing cycles, sector-specific developments, and investor sentiment rather than long-term business performance.'' [82]

Another commenter stated that the Exchange does not demonstrate that the $5 million market capitalization threshold ''is a reliable predictor of sustained financial distress, manipulation risk, or future non-compliance with existing listing standards.'' [83] This commenter attached a report by Professor Craig M. Lewis that presents an empirical study raising concerns that the proposal may prematurely delist companies that would otherwise regain compliance.[84] The Lewis Report analyzed approximately 190 companies that fell below the $5 million average market capitalization threshold between 2006 and 2025, and concluded that ''a temporary decline below the $5 million average market capitalization threshold does not reliably predict business failure or inevitable delisting.'' [85] The Lewis Report stated that of the 190 companies that would have been delisted based on the proposal, 64% recovered at least once above the $5 million threshold during the time period studied, 28% of the 190 companies have not been not delisted, and 37 companies are still trading with market capitalizations above $5 million, representing an average market capitalization of $61.6 million.[86]

One commenter stated that these arguments opposing the adoption of a $5 million continued listing threshold ''rest on a misunderstanding of the purpose of continued listing standards and do not undermine the investor protection rationale supporting NYSE American's proposal.'' [87] This commenter stated that listing standards are designed to protect investors and maintain fair, orderly, and efficient markets, ''not to maximize issuer survival or ensure uninterrupted access to exchange listing.'' [88] This commenter also stated that whether a subset of issuers recover does not negate that periods below $5 million in market capitalization are linked to ''thin liquidity, elevated spreads, heightened volatility, and disproportionate susceptibility to manipulative trading activity,'' which are conditions that exchanges must address through risk-based listing standards.[89] This commenter also raised concerns regarding a reliance on backward-looking data, arguing that ''[c]ontinued listing standards must operate ex ante, based on observable risk indicators'' rather than ''ex post based on whether a company eventually stabilizes.'' [90] Finally, this commenter asserted that the Act's framework relies on exchanges ''to set and refine listing standards based on front line surveillance of trading activity, issuer behavior, and market quality.'' [91]

In response to commenters, the Exchange states that the Minimum Market Capitalization Criteria is a ''measured approach to address concerns about volatility and potential manipulation in low priced stocks.'' [92] According to the Exchange, ''microcap stocks are more susceptible to manipulation because it necessarily requires a smaller capital investment to

[92] Letter from Patrick J. Troy, Senior Director and Associate General Counsel, New York Stock Exchange, dated Sept. 9, 2026 (''Exchange Letter''), at 1.

transact in a substantial percentage of a microcap issuer's securities, thereby opening the door to a wider range of potential bad actors.'' [93] The Exchange states that, based on the Lewis Report, while only 28% of the companies that fell below the Minimum Market Capitalization Criteria remain listed today on the Exchange, 72% of such companies are no longer listed on the Exchange, and this data is consistent with the Exchange's historical observation that companies falling below the $5 million average market capitalization standard frequently face additional financial challenges that require a substantial amount of regulatory oversight and make them unsuitable for public market trading.[94] The Exchange further states that its proposal is not premised on the notion that a company with an average market capitalization below $5 million is without value and instead is seeking to address problematic trading in extremely small companies, which are frequently below other Exchange listing standards.[95]

While the overall conclusion of the Lewis Report is that the Exchange's proposal to immediately suspend trading and commence delisting proceedings for securities that fail to comply with the Minimum Market Capitalization Criteria may result in delisting of companies that later recover and that some of those companies may otherwise have remained listed on the Exchange, the possibility of a meaningful recovery is not indicative that the Exchange would be acting unreasonably in determining to delist such a security, and ultimately is not determinative that the proposed rule change is inconsistent with the Act. Both the Commission's analysis and the Lewis Report agree that a significant number of companies that fell below an average market capitalization over a consecutive 30 trading-day period of $5 million did not recover.[96] Moreover, as discussed above, the Commission's analysis shows that 59% of the companies that fell below the Market Capitalization Analysis Threshold had an average market capitalization over a consecutive 30 trading-day period under $5 million after 180 days.[97] Even if some of the companies that remained below $5 million average market capitalization after 180 days eventually recovered, this analysis indicates that such companies persisted with an average market capitalization below $5 million for an extended period of time. The Commission interprets these results as indicating that, similarly, companies that fall below the Minimum Market Capitilization Criteria would likely remain below that threshold for an extended period of time.[98] Given the risks that securities with a small market capitalization have heightened susceptibility to manipulative trading activity, which could be exacerbated by a lack of trading interest sufficient to promote fair and orderly markets, the Commission finds that it is not unfairly discriminatory and is consistent with Section 6(b)(5) of the Act's requirements that the rules of the Exchange prevent fraud and manipulative acts and practices, promote just and equitable principles of trade, and protect investors and the public interest for the Exchange to immediately suspend trading and commence delisting proceedings for securities that fall below the Minimum Market Capitalization Criteria.[99]

One commenter expressed concern that factors influencing trading price, and in turn market capitalization, ''may fluctuate significantly over relatively short periods without any corresponding change in the issuer's underlying business, financial condition, governance, or compliance with other continued listing standards.'' [100] Further, this commenter stated ''a bright-line $5 million market capitalization requirement creates a framework in which immediate suspension and delisting may be triggered by temporary market dislocations rather than meaningful deterioration in an issuer's suitability for continued exchange listing,'' [101] and that the proposed 30 trading-day measurement period is not meaningful in distinguishing between such temporary market dislocations from sustained issuer deficiencies.[102] Another commenter stated that ''the proposal creates a cliff effect: issuers trading anywhere near the threshold will face persistent delisting risk based on ordinary market volatility.'' [103] In addition, commenters stated that a company's market capitalization can be impacted by directional pressure exerted by opportunistic traders and short sellers.[104]

Several commenters expressed concern that the ''rigid, time-bound'' $5 million average market capitalization threshold could create incentives for manipulative trading activity and market abuse, contrary to the Act's goals of preventing fraud and manipulation.[105] In particular, commenters stated the mechanical trigger could incentivize coordinated short selling pressure that could force a company below the $5 million market capitalization threshold for long enough to trigger delisting.[106] One commenter stated that the trigger itself would cause downward price pressure because investors will discount issuers trading near the threshold, lenders would assign additional risk premiums or tighter covenants, and counterparties may hesitate to transact.[107]

One commenter stated that the concerns that automatic delisting could create a ''cliff effect'' or incentivize strategic short selling ''do not reflect actual market dynamics.'' [108] This commenter stated that exchanges already use ''bright line, quantitative triggers—such as bid price, public float, and market value of publicly held shares requirements—without evidence of systemic cliff effects or widespread manipulation designed to force delisting.'' [109] This commenter further stated that ''sustaining depressed prices for 30 consecutive trading days requires significant capital and is constrained by market maker liquidity provision, natural buying interest, and existing anti

[98] While the Commission agrees with the commenter that raised concerns about a reliance on backward-looking data rather than observable risk factors (*see supra* note 96 and accompanying text), the Commission's data analysis helps to validate the Exchange's statements and informs the Commission's view of how securities with small market capitalization may behave in the future, thereby supporting the Commission's statutory findings.

[109] *Id.*

manipulation rules.'' [110] Another commenter stated that commenters that oppose the proposal are ''unable to explain'' why the Exchange should be prohibited from setting a $5 million market capitalization listing requirement when that level is far below the $15 million minimum market capitalization imposed by its affiliate, the New York Stock Exchange, and based on its direct experience regarding trading activity on the Exchange.[111]

In response to commenters, the Exchange states that minimum market capitalization continued listing standards have existed for many years—for example, the New York Stock Exchange requires that listed companies maintain a minimum average market capitalization of at least $15 million over a consecutive 30 trading-day period—and the Exchange is not aware that they have had an outsized detrimental effect on listed companies.[112]

Market capitalization, as a combination of the quantity of total common stock outstanding (excluding treasury shares) as well as any common stock that would be issued upon conversion of another outstanding equity security, if such other security is a ''substantial equivalent'' of common stock,[113] and their market value, is a reasonable measure to be used in a quantitative listing standard to determine whether a company should continue to be listed on the Exchange because it provides an indication of the issuer's size and how the market values the issuer's securities. The Exchange and other national securities exchanges rely on market capitalization or other measures of market value in existing initial and continued listing standards.[114] While commenters expressed concern that the Minimum Market Capitalization Criteria would create an incentive for opportunistic trading behavior, or for bad actors to manipulate the price of a company's securities to trigger automatic suspension and delisting (including that the consecutive 30 trading-day period may contribute to this risk), commenters have not provided any data showing that similarly structured, existing listing requirements based on market capitalization or other quantitative metrics have created such incentives. Moreover, the requirement to immediately suspend trading and commence delisting proceedings for securities that fall below $5 million average market capitalization over a consecutive 30 trading-day period would help mitigate the risk of actual opportunistic or manipulative activities in securities that may have a heightened susceptibility to manipulative trading activity. Therefore, the Commission finds that the Exchange's proposal to immediately suspend trading and commence delisting proceedings for securities that fail to comply with the Minimum Market Capitalization Criteria is reasonably designed and consistent with the requirements of Section 6(b)(5) of the Act that the rules of the Exchange be designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, and protect investors and the public interest.[115]

B. Comments Regarding the Lack of a Cure Period or Exchange Discretion

One commenter raised concerns about the proposal's absence of a cure period that would allow companies that fall below the Minimum Market Capitalization Criteria to regain compliance before being delisted.[116] In particular, this commenter stated that the Exchange had not explained why the proposal lacks a cure period while the Exchange affords cure periods and discretionary review for other continued listing deficiencies, such as where a company's aggregate market value of publicly-held shares is less than $1 million for more than 90 consecutive days.[117] Another commenter stated that the Exchange has historically maintained discretion in administering its continued listing standards in a manner that allows individual circumstances to be considered and that preserving Exchange discretion would better serve investors.[118] Another commenter raised concerns about the lack of discretion on the part of the Exchange in administering the Minimum Market Capitalization Criteria based on facts and circumstances.[119] For example, according to the commenter, an issuer experiencing long-term operation deterioration may be distinguishable from an issuer that is experiencing temporary market dislocation or a pending financing transaction.[120] This commenter stated that the proposal would largely eliminate the Exchange's ability to exercise judgement developed from decades of experience evaluating whether individual issuers remain suitable for continued listing.[121]

One commenter, however, stated that ''protracted appeals and cure periods'' are among the factors that can make listing standards ''susceptible to circumvention.'' [122] Another commenter stated that the proposal's immediate suspension and delisting requirement ''appropriately recognizes that, at such low market capitalization levels over an extended period, the challenges facing these companies are generally not temporary and are unlikely to be resolved within a conventional compliance period.'' [123] This commenter also stated that continued listing of such issuers can impair the Exchange's ability to maintain fair and orderly markets by making it more difficult for market makers to provide stable liquidity and for investors to rely on the exchange listing as a signal of issuer quality.[124]

In response to commenter concerns about eliminating Exchange discretion, the Exchange states that ''transparent bright-line rules . . . enable investors to

[110] *Id.*

[111] *See* Citadel Letter at 3.

[112] *See* Exchange Letter at 3 (citing Section 802.01B of the NYSE Listed Company Manual).

[113] *See supra* note 16.

[114] Existing Exchange rules include market capitalization as a component of an initial or continued listing requirement. *See* Sections 101(c)(2), 101(d)(1), and 1003(a)(1) of the Company Guide. In addition, the New York Stock Exchange (''NYSE'') will promptly initiate suspension and delisting procedures if a listed company has an average global market capitalization over a consecutive 30 trading-day period of less than $15 million. *See* Section 802.01B of the NYSE Listed Company Manual. *See also, e.g.,* Section 102.01C of the NYSE Listed Company Manual (utilizing global market capitalization in initial listing requirements); Nasdaq Rules 5505(b)(2)(A), 5505(b)(4)(A), and 5550(b)(2) (utilizing market value of listed securities in initial and continued listing requirements); TXSE Rules 16.310(c)(2) and 16.320(b)(2) (utilizing global market capitalization in initial and continued listing requirements). The Commission is not aware of any widespread concerns that the existing continued listing requirements that utilize market capitalization or similar metrics have caused an increase in opportunistic or manipulative trading.

[115] *See* 15 U.S.C. 78f(b)(5).

[116] *See* SPCC Letter I at 15. *See also* Autonomix Letter at 2.

[117] *See id.* (citing Section 1003(b)(i)(C) of the Company Guide and stating that the Exchange could provide a meaningful cure period, as it does for other continued listing standards); SPCC Letter II at 5–6. This commenter also stated that ''[b]y mandating automatic and immediate delisting for companies whose 30-day average market capitalization falls below $5 million, without any cure period, pre-deprivation process, or discretion, the rule reduces any subsequent appeal to a ministerial exercise regarding whether the company's 30-day average market capitalization did or did not fall below the threshold,'' and that there is not a ''meaningful opportunity to be heard'' on whether circumstances demonstrate that ''immediate delisting is unwarranted.'' SPCC Letter II at 5. The proposed rule change does not restrict the issues that the Exchange may consider in connection with any appeal of a delisting determination, as discussed further below.

[123] SIFMA Letter at 3.

[124] *See id.* at 3.

clearly evaluate and understand an issuer's listing status.'' [125] The Exchange also states that continued listing requirements on the Exchange related to minimum price, stockholders' equity, and filing of periodic reports all mandate ''non-discretionary regulatory action'' for issuer noncompliance.[126] The Exchange further states that ''[o]bjective application of listing rules promotes predictability and transparency which benefits issuers and investors alike.'' [127]

In addition, the Exchange states that it disagrees that the proposal does not account for temporary market downturns.[128] The Exchange states that the Minimum Market Capitalization Criteria is calculated over a consecutive 30 trading-day period (*i.e.,* at least six weeks of trading activity), thus covering only companies with a prolonged period of noncompliance with the proposed rule.[129] The Exchange also states that it proactively engages with companies whose average market capitalization falls below $15 million over 30 trading days, and therefore companies would receive meaningful advance notice of their potential noncompliance with the proposed rule.[130]

While the Commission acknowledges that Exchange rules provide for a cure period for noncompliance with certain continuing listing standards, other Exchange rules provide that the Exchange will immediately suspend trading and commence delisting proceedings, without a cure period, for violation of other continued listing standards.[131] The Exchange's practice of engaging with companies when their average market capitalization falls below $15 million over 30 trading days, along with the Minimum Market Capitalization Criteria's use of an average market capitalization over a consecutive 30 trading-day period, will provide listed companies with a period of time within which to raise their average market capitalization before they fall below the Minimum Market Capitalization Criteria. The requirement's focus on a consecutive 30 trading-day period also means that a security would have a small market capitalization for a prolonged period of time before being subject to immediate suspension of trading and commencement of delisting proceedings.

The Exchange has proposed to immediately suspend and delist companies that fall below the Minimum Market Capitalization Criteria, without any opportunity to cure, based on concerns that such companies have a heightened susceptibility to manipulation.[132] The decline of a company's average market capitalization below the Minimum Market Capitalization Criteria may be indicative of serious difficulties within such company that are likely to continue to put downward pressure on the stock price. As discussed above, according to the Commission's analysis, 59% of the issuers that fell below $5 million market capitalization continued to have a market capitalization under $5 million after 180 days, with the median market capitalization under $4.1 million. The Commission's analysis indicates that the likelihood of companies regaining $5 million market capitalization within 180 days after failing to comply with such market capitalization threshold is limited.[133] Accordingly, the Commission expects that a significant number of companies that fall below the Minimum Market Capitalization Criteria either will not recover or will persist with an average market capitalization for a prolonged period of time. Companies that remain below the Minimum Market Capitalization Criteria may have heightened susceptibility to manipulative trading activity, as discussed above, and requiring their delisting is consistent with the goal of protecting investors and the public interest. Thus, the Exchange's proposal is reasonably designed to protect investors by preventing the prolonged trading of companies with a small market capitalization that may be more susceptible to fraud and manipulation and seeks to help ensure that only financially sound issuers remain listed on the Exchange. Therefore, the Commission finds that the Exchange's proposal to immediately suspend trading and commence delisting proceedings for securities that fail to comply with the Minimum Market Capitalization Criteria is reasonably designed and consistent with the requirements of Section 6(b)(5) of the Act that the rules of the Exchange be designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, and protect investors and the public interest.[134]

The proposal is also consistent with Section 6(b)(7) of the Act in that, while the Exchange will immediately suspend trading and commence delisting proceedings without a cure period when an issuer's securities fall below the Minimum Market Capitalization Criteria, Exchange rules will continue to provide a fair procedure for the prohibition or limitation by the Exchange of any person with respect to access to services offered.[135] As discussed above, existing Exchange rules provide for immediate suspension of trading and commencement of delisting proceedings, without a cure period, when a security is out of compliance with continued listing requirements.[136] Pursuant to the Exchange's proposal, a listed company whose security is subject to immediate suspension of trading and the commencement of delisting proceedings after falling below the Minimum Market Capitalization Criteria will be able to appeal the delisting decision pursuant to Part 12 of the Company Guide.[137] Depending on the level of proceeding under Part 12 of the Company Guide, a Listing Qualifications Panel, the Committee for Review, or the Exchange Board of Directors will continue to have the authority to consider any failure to meet any quantitative standard for continued listing, and the company will continue to be given a notice of such consideration and an opportunity to respond.[138] A Listing Qualifications Panel, the Committee for Review, or the Exchange Board of Directors, as part of its respective review, may consider, among other things, the issuer's stock price or any information that the issuer

[136] *See supra* note 137 and accompanying text.

[137] *See supra* note 19 and accompanying text. *See also* Part 12 of the Company Guide (providing that a company may request review of a Staff Determination by a Listing Qualification Panel and review of a Panel Decision by the Committee for Review, whose written decisions may subsequently be called for review by the Exchange Board of Directors upon the request of one or more Directors). Under existing Exchange rules, a request for a hearing will ordinarily stay a delisting action pursuant to a Staff Determination to prohibit the continued listing of an issuer's securities in accordance with Section 1204(d) of the Company Guide, but the Exchange staff may immediately suspend trading in any security or securities pending review should it determine that such immediate suspension is necessary or appropriate in the public interest, for the protection of investors, or to promote just and equitable principles of trade. *See* Section 1203(c) of the Company Guide. The Exchange has not proposed any changes to these provisions.

[138] *See* Sections 1201(d) of the Company Guide.

releases to the public, including any additional quantitative deficiencies or qualitative considerations reflected in the released information.[139] Therefore, the Commission finds that the proposal is consistent with Section 6(b)(7) of the Act in that it provides a fair procedure for the prohibition or limitation by the Exchange of any person with respect to access to services offered.

C. Comments Regarding the Need for the Proposed Rule Change

One commenter stated that the Exchange has not demonstrated the incremental benefit of its proposal against the backdrop of its recently strengthened initial listing standards.[140] In particular, this commenter stated that the Exchange should explain how the Minimum Market Capitalization Criteria is justified on its own terms, particularly given that the Exchange originally presented the Minimum Market Capitalization Criteria and the Minimum Bid Price Criteria [141] as addressing the same underlying concern.[142] This commenter stated that the Exchange must explain the incremental work of the Minimum Market Capitalization Criteria or, if the Exchange's proposal is intended to work together with the Minimum Bid Price Criteria, the Exchange must analyze their combined effects.[143] In addition, this commenter stated that the Exchange has not explained why its existing, conduct-focused tools are inadequate to address concerns about manipulation.[144]

While existing Exchange continued listing requirements may address some similar concerns, as discussed above, the risks of heightened susceptibility to manipulative trading activity and difficulty maintaining fair and orderly markets in the securities of companies that are not able to sustain an average market capitalization of at least $5 million support the adoption of the proposed Minimum Market Capitalization Criteria.[145] The addition of a non-discretionary, objective metric for continued listing on the Exchange is reasonably designed to enhance its existing conduct-focused regulatory tools to promote administrative predictability and transparency that will benefit issuers and investors alike. Further, the Exchange has separately proposed, and the Commission has approved with separate, independent justification, certain price-based continued listing requirements that reduce the period of time for a company to regain compliance based on investor protection concerns, including the Minimum Bid Price Criteria recently implemented by the Exchange.[146] That the Exchange previously filed a proposal that included both the Minimum Bid Price Criteria and a proposed continued listing requirement that was substantially similar to the Minimum Market Capitalization Criteria, the latter of which was removed before the Commission approved the Minimum Bid Price Proposal, does not alter the Commission's required analysis regarding whether the proposal is consistent with the Act, because the two rules operate independently, and each must be independently approved if the Commission finds that it is consistent with the Act.[147]

The current proposal and prior Commission-approved rules address different continued listing requirements that independently operate to address similar Exchange concerns with lower-priced securities, while taking different approaches to target securities that another continued listing requirement may not capture. For example, the Commission stated, in the context of removing compliance periods for securities that have had excessive reverse stock splits and securities that are trading at very low prices,[148] that there were investor protection concerns with allowing the securities identified in that proposal to have an extended period of time to regain compliance with the relevant requirements.[149] Similar to the Reverse Stock Split Proposal, with respect to its current proposal, the Exchange states that companies identified in this proposal may have financial concerns that render them inappropriate for trading on the Exchange for investor protection reasons.[150] Moreover, while a reverse stock split increases a company's stock price and thus could help a security comply with the Minimum Bid Price Criteria or other continued requirements related to minimum bid price, it does not directly change the company's market capitalization.[151] If a company is trading at a price compliant with the relevant bid price requirements, but has a very small market capitalization, it could continue to be susceptible to manipulative trading. Similarly, if a company has a large market capitalization but its securities fail to meet the relevant bid price requirements, the low trading price of the securities may make these securities more prone to manipulation.[152] Therefore, the Commission finds that the Exchange's proposal is reasonably designed and consistent with the requirements of Section 6(b)(5) of the Act that the rules of the Exchange be designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, and protect investors and the public interest.[153]

D. Comments Regarding Effects on Companies and the Market

One commenter stated that delisting from the Exchange does not eliminate an issuer's ability to access public capital markets as they can continue to trade in the OTC markets, which operate under a ''regime that emphasizes disclosure, risk flagging, and heightened scrutiny of low priced and thinly traded securities.'' [154] This commenter further stated that, ''[f]rom an investor protection standpoint, this is an appropriate outcome: exchange listing is reserved for companies that meet robust quantitative and qualitative standards, while OTC markets provide an alternative venue for public trading in higher risk or less established issuers, subject to tailored safeguards.'' [155]

Other commenters stated that the proposal would negatively impact capital formation for small public companies and increase risk to investors.[156] One commenter discussed the benefits of exchange listing for both smaller companies and investors in the context of cost of capital.[157] Specifically, this commenter stated that exchange listing provides smaller companies access to a larger set of investors and greater liquidity through access to secondary markets and allows investors to benefit from a set of Commission rules designed to enhance and organize the flow of information to investors.[158] The commenter concluded that this lowers the cost of capital because investors ''are willing to pay a premium for the ability to trade easily'' and ''are more willing to make long-dated investments when they know their positions can be readily transferred to other investors.'' [159] This commenter also stated that investors are less inclined to invest in, and lenders are less willing to extend financing, to companies trading close to the bright-line threshold, which intensifies the downward price pressure.[160] Another commenter stated that the proposal would not only impact companies with a market capitalization under $5 million, but also companies between $5 million and $50 million, as those companies could face a risk of being delisted as a result of temporary market fluctuations.[161]

Several commenters discussed the negative consequences of trading in the OTC market upon immediate delisting and suspension.[162] These commenters stated that when a security is delisted and moves from a national securities exchange to the OTC market, trading occurs with reduced liquidity, diminished analyst coverage, wider bid-ask spreads, lower institutional participation, fewer financing opportunities, and reduced oversight.[163] One commenter also stated that retail shareholders may face difficulty purchasing and selling securities efficiently.[164] This commenter stated that trading in the OTC market would materially impact issuers' ability to access capital, make strategic acquisitions, attract institutional investment, and ultimately regain compliance with exchange listing standards.[165] Another commenter discussed the benefits of the regulatory framework for exchange-listed securities, which are NMS securities.[166]

The Commission acknowledges that there are many benefits to companies and their shareholders related to being listed on a national securities exchange, including increased access to capital formation and promotion of market efficiency. Commenters have raised concerns that delisting companies that fall below the Minimum Market Capitalization Criteria may lead to several negative outcomes, including, but not limited to, making raising capital more difficult for small companies.[167] However, the benefits of listing and possible consequences of delisting for issuers and their shareholders do not override the need for an exchange to maintain and enforce continued listing standards such as the proposed rule, which is consistent with Section 6(b)(5) of the Act.[168] As discussed above, the immediate suspension and delisting of companies that do not comply with the Minimum Market Capitalization Criteria will address identified risks of heightened susceptibility to manipulative trading activity, and it is not unfairly discriminatory to impose a standard that is reasonably tailored to address those risks. Moreover, companies that fail to comply with the Minimum Market Capitalization Criteria and are subsequently delisted will be able to trade in the OTC market, which provides a viable alternative for the trading of companies that do not meet the requirements for Exchange listing. While companies that are no longer eligible to list on the Exchange may apply to list on another national securities exchange, other national securities exchange may choose to impose similar continued listing requirements, as is the case with the Nasdaq MVLS Proposal. However, the OTC market remains a viable trading venue for securities that are not eligible for listing on any national securities exchange. As such, competition among issuers and national securities exchanges would not be unnecessarily or inappropriately burdened as a result of this proposed rule change. These companies may also apply for Exchange listing in the future. Therefore, the Commission finds that the Exchange's proposal to immediately suspend and delist companies that fail to comply with the Minimum Market Capitalization Criteria is reasonably designed to prevent fraudulent and

[164] *See* Lucosky Letter at 4.

[165] *See id.* One commenter stated that increasing the involuntary migration of solvent issuers to less transparent venues may alter competitive positioning among trading venues without a demonstrable investor protection justification, and the Commission must determine whether such burden on competition is necessary under Section 6(b)(8) of the Act. *See* IP Strategy Letter at 4, 9–10.

[166] *See* Lewis February Report at paragraphs 16–18. This commenter provided examples of Commission rules and industry plans designed to improve the information environment and trade execution quality that apply to NMS securities, or exchange-listed securities, but not to OTC securities. *See id.*

[167] *See supra* notes 162–166 and accompanying text.

[168] 15 U.S.C. 78f(b)(5).

manipulative acts and practices, promote just and equitable principles of trade, and protect investors and the public interest, consistent with Section 6(b)(5) of the Act.[169] The Commission also finds that the Exchange's proposal is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers, consistent with Section 6(b)(5) of the Act;[170] and will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, consistent with Section 6(b)(8) of the Act.[171]

E. Comments Suggesting Alternatives

Commenters suggested alternatives to the proposal.[172] One commenter suggested providing a reasonable cure period and adopting a ''graduated compliance framework'' similar to other continued listing standards.[173] This commenter also recommended authorizing the Hearing Panel to consider issuer-specific circumstances.[174] Another commenter suggested that the Exchange develop a targeted, risk-based response based on characteristics such as public float, insider ownership, and limitation to U.S. regulatory access; provide a meaningful cure period; or consider delisting based on the existence of an additional compliance deficiency.[175] This commenter also stated that the Exchange could employ graduated supervisory responses, such as enhanced monitoring, watch-list status, or disclosure obligations to distinguish temporary volatility from structural deficiencies.[176]

Further, this commenter suggested providing a twelve-month implementation delay for the proposed rule change to allow issuers, investors, and lenders time to adjust their capital structures, contractual arrangements, and risk assessments in an orderly manner.[177]

The Act governs the Commission's review of SRO-proposed rules. Section 19(b)(2)(C)(i) provides that the Commission ''shall approve'' a proposal if it finds that the rule is consistent with the requirements of the Act and the rules and regulations applicable to the SRO—including requirements in Section 6(b).[178] The statute does not give the Commission the ability to make any changes to the rule proposal as submitted, or to disapprove the rule proposal on the ground that the Commission would prefer some alternative rule on the same topic and the Exchange has not amended its proposal in response to commenters' suggestions. The Commission must evaluate the proposal before it and approve if it finds the proposal is consistent with the Act and the rules thereunder. Even if commenters' suggestions could provide alternative, potentially preferable means to address concerns that securities with small market capitalization are susceptible to manipulative trading activity and may present difficulties with the maintenance of fair and orderly markets in these securities, these suggestions are not part of the Exchange's proposal. For the reasons discussed herein, the Commission finds that the Exchange's proposal to immediately suspend trading and commence delisting proceedings for companies that fall below the Minimum Market Capitalization Criteria is reasonably designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and to protect investors and public interest, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers, consistent with Section 6(b)(5) of the Act.[179] The Commission also finds that the proposed rule change is consistent with Section 6(b)(7) of the Act,[180] which requires, among other things, that the rules of an exchange provide fair procedure for the prohibition or limitation by the exchange of any person with respect to access to services offered by the exchange. In addition, the Commission finds that the proposed rule change is consistent with Section 6(b)(8) of the Act,[181] which requires that the rules of an exchange do not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

IV. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[182] that the proposed rule change (SR–NYSEAMER–2026–17) be, and hereby is, approved.

By the Commission.

J. Matthew DeLesDernier,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[OMB Control No. 3235–0102]

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Extension: Tender Offer-Regulation 14D and Regulation 14E, Schedule 14D–9

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget this request for extension of the previously approved collection of information discussed below. The Commission also is requesting approval from OMB to designate this existing collection of information (OMB Control No. 3235–0102) as a ''common form'' for purposes of PRA submissions [1] because the Board of Governors of the Federal Reserve System uses this information collection (under OMB Control No. 7100–0091).

Regulation 14D (17 CFR 240.14d–1 through 240.14d–11) and Regulation 14E (17 CFR 240.14e–1 through 240.14e–8) and related Schedule 14D–9 (17 CFR 240.14d–101) require information intended to help security

[1] *See* ROCIS PRA Module User Guide v.8.2, at 110–111 (Mar. 2024), available at *https://www.rocis.gov/rocis/viewResources.do* (''A 'common form' is an information collection that can be used by two or more agencies, or government-wide, for the same purpose. The Common Forms Module [in ROCIS] allows a 'host' agency to obtain [OMB] approval of an information collection for use by one or more 'using' agencies. After OMB grants approval, any prospective using agency that seeks to collect identical information for the same purpose can obtain approval to use the 'common form' by providing its agency-specific information to OMB (*e.g.,* burden estimates and number of respondents). . . . The host agency will indicate in the **Federal Register** notices that it is requesting approval of a common form and, if known, identify other agencies that may use the information collection. Both the **Federal Register** notices and the ICR should account only for the burden imposed by the host agency's use of the common form. Once the host agency has received approval from OMB, any agency will be able to request OMB approval for its use of the common form in ROCIS by providing its agency specific information to OMB (*e.g.,* burden estimates and number of respondents). Additional public notice by those agencies will not be required.'').

holders determine how to respond to tender offers. The information required by Schedule 14D–9 is mandatory, and Schedule 14D–9 filings are publicly available on the Commission's Electronic Data Gathering, Analysis, and Retrieval (''EDGAR'') system. We estimate that Schedule 14D–9 is filed once per year by approximately 54 respondents, for a total of approximately 54 responses annually. We estimate that respondents incur 65.14 burden hours per Form 10–K response, for a total annual reporting burden of 3,518 hours (65.14 burden hours per response × 54 responses). We estimate that respondents incur $117,252 cost burden per Schedule 14D–9 response, for a total annual cost burden of $6,331,608 ($117,252 cost burden per response × 54 responses).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number.

The public may view and comment on this information collection request at: *https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202609-3235-005* or send an email comment to *MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov* within 30 days of the day after publication of this notice by December 21, 2026.

Dated: November 16, 2026.

Vanessa A. Countryman,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106911; File No. SR–NASDAQ–2026–098]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend General 4, Rule 1240 To Adopt a New Senior Leader Regulatory Element Interim Program

November 16, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 9, 2026, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, and II, below, which Items have been prepared by the Exchange. Nasdaq has designated the proposed rule change as constituting a ''non-controversial'' rule change under paragraph (f)(6) of Rule 19b–4 under the Act,[3] which renders the proposal effective under receipt of this filing by the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend General 4, Rule 1240 (Continuing Education) to adopt new Supplementary Material .03 (Senior Leader Regulatory Element Interim Program) and to harmonize General 4, Rule 1240(a)(6) (Delivery of the Regulatory Element) with recent changes to FINRA Rule 1240.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/nasdaq/rulefilings,* and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend General 4, Rule 1240 (Continuing Education) to adopt new Supplementary Material .03 (Senior Leader Regulatory Element Interim Program) and to make a conforming amendment to General 4, Rule 1240(a)(6) (Delivery of the Regulatory Element) to conform the Exchange's continuing education requirements to recent changes made by the Financial Industry Regulatory Authority, Inc. (''FINRA'') to FINRA Rule 1240.[4]

Pursuant to General 4, Rule 1240, registered persons of Exchange members are required to complete continuing education (''CE'') that consists of two mandatory programs, a Regulatory Element and a Firm Element. Regulatory Element CE, which is administered by FINRA, focuses on regulatory requirements and industry standards. Firm Element CE is provided by each member to its registered persons and focuses on the member's securities products, services, and strategies, its policies, and industry trends. The Exchange's Rule 1240 is identical to FINRA Rule 1240, and the Exchange periodically amends its rule to remain harmonized with FINRA's rule.

FINRA has represented that it received a variety of suggestions from member firms and industry groups regarding changes to the Regulatory Element CE requirement for senior leaders (*e.g.,* chief executive officer, chief financial officer), including in response to FINRA Regulatory Notice 25–07.[5] The Exchange agrees with FINRA that Regulatory Element CE provides individuals with valuable training on recent developments in regulatory requirements and industry standards and, as such, is appropriate for all registered persons, including senior leaders. Senior leaders, however, may realize greater benefit from Regulatory Element CE training that draws from the annual Regulatory Element content but is tailored to their unique roles at a member. Senior leaders may engage with applicable rules differently than frontline representatives and principals because they have broader visibility and responsibilities across their member firm, and, often, its broader organizational structure. Regulatory Element CE content for such leaders therefore may be more effective if it covers the information addressed in the various Regulatory Element CE learning plans but presents the information from a broader, firm-wide perspective, such as firm risks, control systems, approaches to pressure-test firm capabilities and vulnerabilities, and similar enterprise-level considerations.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 17 CFR 240.19b–4(f)(6).

[4] *See* Securities Exchange Act Release No. 106797 (November 2, 2026), 91 FR 69897 (November 5, 2026) (SR–FINRA–2026–023) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Adopt FINRA Rule 1240.03 (Senior Leader Regulatory Element Interim Program) to Establish an Interim Program of Regulatory Element Continuing Education) (''FINRA Filing'').

[5] *See id.* at 69867, n. 4 (citing letter from Bernard V. Canepa, Managing Director and Associate General Counsel & Alyssa Pompei, Vice President and Assistant General Counsel, Securities Industry and Financial Markets Association, to Jennifer Piorko Mitchell, Office of the Corporate Secretary, FINRA, dated July 14, 2025).

Accordingly, the Exchange proposes to adopt Supplementary Material .03 to General 4, Rule 1240 to establish a Senior Leader Regulatory Element Interim Program (''Interim Program'') identical to that adopted and administered by FINRA. A member may elect to have a covered person who is a senior leader satisfy the requirement to complete the Regulatory Element by participating in the Interim Program. For purposes of the Interim Program, the term ''senior leader'' means any covered person listed on a member's Schedule A of Form BD; any other covered person serving on a member's executive, management or operations committees; or any covered person with similar status or functions who is employed at an affiliate of a member.[6] Participating senior leaders would continue to be required to take Regulatory Element CE on an annual basis, but the content of the training and the method of delivery would be different.

The Interim Program would be administered in a manner prescribed by FINRA and as set forth in the FINRA Filing, for a period starting on November 2, 2026, and ending on December 31, 2028. The Regulatory Element material for participating covered persons would be developed by FINRA and based on the roles and responsibilities of senior leaders. As described in the FINRA Filing, FINRA would consider the annual learning plan topics assigned to each registration category, but, rather than limiting the content to the specific registration categories the senior leaders hold, the materials would cover content across all registration categories and present significant rule changes, key regulatory developments, and other Regulatory Element topics from the unique organizational vantage point of senior leaders. The materials would remain consistent with the core objectives of Regulatory Element CE.

Under the Interim Program, the chief compliance officer (''CCO'') or other senior compliance officer at a participating member would provide the training to participating senior leaders (including any participating senior leaders of affiliated entities), and would have the discretion to supplement the training materials to provide the most relevant and effective training for the member's senior leaders.[7] The CCO of a member designated under General 9, Section 21(c)[8] would provide FINRA with the list of participating senior leaders and represent to FINRA that the senior leaders completed the Regulatory Element material in a manner prescribed by FINRA. Further, a senior leader who participates in the Interim Program would certify that he or she has completed the Regulatory Element material, and the member would retain such certification.[9] Senior leaders who participate and successfully complete the training would satisfy their annual Regulatory Element requirement under Rule 1240; those who do not participate would be required to complete the Regulatory Element CE courses assigned by FINRA, as they do today.

In connection with the Interim Program, the Exchange also proposes to amend General 4, Rule 1240(a)(6) (Delivery of the Regulatory Element), which currently provides that the Regulatory Element shall be administered through Web-based delivery or such other technological manner and format as specified by the Exchange. The Exchange proposes to delete the word ''technological'' so that the rule would provide that the Regulatory Element shall be administered through Web-based delivery or such other manner and format as specified by the Exchange. This conforming amendment, which mirrors FINRA's amendment to FINRA Rule 1240(a)(6), would permit the CCO or other senior compliance officer at a member participating in the Interim Program to deliver the Regulatory Element training to participating senior leaders.

The Interim Program would be voluntary, and no member would be required to participate. While the Interim Program is in place, FINRA would evaluate demand for the program and whether it is meeting the goals of Regulatory Element CE for senior leaders.[10] If the Interim Program is not extended or Rule 1240.03, as may be amended, is not approved as permanent by the Commission, Supplementary Material .03 would automatically sunset on December 31, 2028, and covered persons who are senior leaders would not be able to participate in the Interim Program after such date.

Nasdaq has filed the proposed rule change for immediate effectiveness and has requested that the Commission waive the requirement that the proposed rule change not become operative for 30 days after the date of filing so Nasdaq can implement the proposed rule change immediately.[11]

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[12] in general, and furthers the objectives of Section 6(b)(5) of the Act,[13] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. The Exchange also believes the proposal is consistent with Section 6(c)(3) of the Act,[14] which authorizes the Exchange to prescribe standards of training, experience and competence for persons associated with Exchange members.

The proposed rule change continues the Exchange's commitment to Regulatory Element CE while providing appropriate flexibility for members and senior leaders, and maintains the requirement that all registered persons complete appropriate Regulatory Element content on an annual basis. Because participation would be voluntary, a member could require its senior leaders to continue to take the Regulatory Element CE assigned for their specific registration categories if the member concludes such training would be more appropriate. Senior leaders would not be exempt from the annual Regulatory Element requirement; only the framing and method of delivery of the training would differ. The ability of a member's CCO or other senior compliance officer to supplement the

[6] A member would determine which of its senior leaders, if any, should participate in the Interim Program based on the member's annual evaluation of the training needs for such individuals.

[7] Currently, Regulatory Element CE is provided to all individuals via the online CE platform available through FINRA's Financial Professional Gateway. FINRA made a conforming amendment to FINRA Rule 1240(a)(6) to remove the requirement that Regulatory Element CE be administered in a technological manner. *See* FINRA Filing at 69898, n. 7.

[8] Nasdaq General 9, Section 21(c) requires Nasdaq members and persons associated with a member to comply with FINRA Rule 3130 (Annual Certification of Compliance and Supervisory Processes) as if such rule were part of Nasdaq's rules. FINRA Rule 3130(a) requires each member to designate and specifically identify on Schedule A of Form BD one or more principals to serve as chief compliance officer to FINRA.

[9] In the FINRA Filing, FINRA stated that members would need to retain such certification for at least three years, and that FINRA would include in a Regulatory Notice additional information on how CCOs would demonstrate compliance. *See* FINRA Filing at 69898.

[10] FINRA anticipates collecting feedback and data from a variety of stakeholders, including CCOs and senior leaders at participating firms, as well as the CE Council. *See* FINRA Filing at 69898, n. 9.

[11] FINRA notes that the proposed rule change would not impact members that are funding portals but would impact all other members including members that have elected to be treated as capital acquisition brokers (''CABs''), given that the CAB rule set incorporates the impacted FINRA rules by reference. *See* FINRA Filing at 69898, n. 10.

[12] 15 U.S.C. 78f(b).

[13] 15 U.S.C. 78f(b)(5).

[14] 15 U.S.C. 78f(c)(3).

training materials would further help to ensure that the training is particularly effective for the member's senior leaders.

Moreover, the proposed rule change will harmonize the Exchange's continuing education rule with FINRA Rule 1240, thereby promoting consistency in CE requirements across self-regulatory organizations and avoiding the confusion and burden that could arise if dual members were subject to divergent standards. The Exchange believes this harmonization promotes just and equitable principles of trade and protects investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address competitive issues, but rather to conform the Exchange's continuing education requirements to those of FINRA. The Interim Program is voluntary and would be available equally to all members, which may elect participation based on their own evaluation of the training needs of their senior leaders and may switch senior leaders between the Interim Program and the assigned Regulatory Element CE. Because the Interim Program is voluntary, members are not expected to use it unless they believe it benefits their firms, and any potential unintended impacts would be limited due to the term of the Interim Program.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act [15] and subparagraph (f)(6) of Rule 19b–4 thereunder.[16]

A proposed rule change filed under Rule 19b–4(f)(6) normally does not become operative for 30 days after the date of filing. However, pursuant to Rule 19b–4(f)(6)(iii),[17] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. As noted in its Form 19b–4 and above in Item II, Nasdaq has requested that the Commission waive the 30-day delay requirement so that the proposed rule change may become operative immediately upon filing.

More specifically, Nasdaq stated in its request that immediate operability is consistent with the protection of investors and the public interest because the Interim Program is a FINRA program that is already in operation. As Nasdaq noted, FINRA's identical Interim Program began on November 2, 2026, and Nasdaq's proposal creates no new program, content or oversight process. Rather, Nasdaq stated that its proposal allows Exchange members to take part, on the same terms as FINRA members, in a program that is already running and that delaying the operative date of the proposal for 30 days would not change how the Interim Program is administered and would serve no investor protection purpose. Nasdaq also claimed that the absence of a waiver here would keep Exchange members, many of which are also FINRA members, out of a program already open to FINRA members and, as a result, would create a period in which Exchange and FINRA continuing education requirements diverge, which could cause confusion and burden for dual members. According to Nasdaq, the waiver would give Exchange members a meaningful opportunity to elect participation, identify eligible senior leaders, and complete necessary planning before the December 31, 2026, Regulatory Element CE deadline, and to begin evaluating participation for the 2027 CE cycle. For these reasons, the Commission believes that waiving the 30-day operative delay for this proposed rule change is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change operative upon filing.[18]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NASDAQ–2026–098 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2026–098. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to File Number SR–NASDAQ–2026–098 and should be submitted on or before December 10, 2026.

[15] 15 U.S.C. 78s(b)(3)(A)(iii).

[16] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[17] 17 CFR 240.19b–4(f)(6)(iii).

[18] For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule change's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[19]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–106913; File No. SR–C2–2026–031]

Self-Regulatory Organizations; Cboe C2 Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Rules 5.7 and 5.31(b)(1) and (c) for the Queuing Period, Order and Quote Entry, and Opening Auction Times Regarding the Global Trading Hours (''GTH'') Sessions

November 17, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 4, 2026, Cboe C2 Exchange, Inc. (''Exchange'' or ''C2'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [3] and Rule 19b–4(f)(6) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe C2 Exchange, Inc. (''C2'' or the ''Exchange'') is filing with the Securities and Exchange Commission (''Commission'' or ''SEC'') a proposed rule change to amend Rules 5.7 and 5.31(b)(1) and (c) to provide that the start of the pre-opening order Queuing Period [5] and the time at which the Exchange begins accepting orders and quotes begins at such time as the Exchange determines, but no earlier than 6:00 a.m.[6] The Exchange will announce all times it determines pursuant to this filing via Exchange Notice. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Commission's website (*https://www.sec.gov/rules/sro.shtml*), the Exchange's website (*https://www.cboe.com/us/options/regulation/rule_filings/ctwo/*), and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rules 5.7 and 5.31(b)(1) and (c) to permit the Queuing Period and order and quote entry on C2 to begin earlier than they do today. The proposed rule change is substantively identical to the changes Cboe Exchange, Inc. (''Cboe Options'') recently made to the Queuing Period, order and quote entry, and opening auction update dissemination times in Cboe Options Rules 5.7(a), 5.31(b)(1), and 5.31(c) for option classes other than index options eligible for Global Trading Hours (''GTH'').[7]

Background

C2 offers Global Trading Hours (''GTH'') for certain index options (currently, DJX options) from 8:30 a.m. to 9:15 a.m. Under current Rule 5.31(b)(1), the Queuing Period begins at 7:30 a.m. for all classes, including both RTH Only classes and classes eligible for GTH. The Queuing Period is the time period prior to the initiation of an opening rotation during which the System accepts orders and quotes in the Queuing Book for participation in the opening rotation for the applicable trading session. Under current Rule 5.31(b)(1), the Queuing Period begins at 7:30 a.m. Eastern Time for all classes. Consistent with that time, current Rule 5.7 provides that Users can enter orders into the System from 7:30 a.m. until market close, and cancel previously entered orders. Under current Rule 5.31(c), the Exchange disseminates opening auction updates for a series beginning at a time (determined by the Exchange) no earlier than one hour prior to the expected initiation of the opening rotation for a trading session and until the conclusion of the opening rotation for a series.

Pre-Opening Queuing Period Start Time

The Exchange proposes to amend Rule 5.31(b)(1) to provide that the Queuing Period for Opening Auctions begins at such time as the Exchange determines, but no earlier than 6:00 a.m., for all classes. Moving the start of the Queuing Period to no earlier than 6:00 a.m. allows the Exchange to lengthen the pre-opening Queuing Period, affording market participants additional time to enter, modify, and cancel orders and quotes for participation in the opening rotation and promoting a smoother, more orderly opening. This change is administrative and ministerial in nature. It adjusts only the time window during which orders and quotes are accepted for the Queuing Book and does not alter trading mechanics, order priority, execution logic, or price formation. Participants are not required to submit orders earlier; the extended window simply provides additional flexibility for those who choose to use it. This change affects only when orders and quotes are accepted for the Queuing Book, not when trading begins; the opening rotation times remain unchanged. The Exchange's approach provides for a start time determined by Exchange notice rather than a fixed time, affording the Exchange operational flexibility.

For consistency, the Exchange also proposes to amend the opening auction update dissemination time in Rule 5.31(c) to begin at such time as the Exchange determines, but no earlier than 6:00 a.m., so that the Exchange may begin disseminating opening auction updates at the start of the Queuing Period (and thus incorporate orders and quotes submitted during the entire Queuing Period in those updates).

The Exchange also proposes to amend Rule 5.7 to update the order and quote

[19] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(iii).

[4] 17 CFR 240.19b–4(f)(6).

[5] The term ''Queuing Period'' means the time period prior to the initiation of an opening rotation during which the System accepts orders and quotes in the Queuing Book for participation in the opening rotation for the applicable trading session. *See* Exchange Rule 5.31(a).

[6] All times referenced herein are Eastern Time, unless otherwise specifically noted.

[7] *See* Securities Exchange Act No. 106620 (October 7, 2026) 91 FR 64960 (October 13, 2026) (SR–CBOE–2026–078) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Certain Rules Regarding the Global Trading Hours (''GTH'') and Curb Trading Hours Sessions) (''Cboe Options Filing'').

entry time to conform to the proposed Queuing Period change in Rule 5.31(b)(1). As amended, Rule 5.7 will provide that Users can enter orders into the System from such time as the Exchange determines, but no earlier than 6:00 a.m., until market close, and cancel previously entered orders. These changes ensure that Users can begin entering orders and quotes at the same time the System begins accepting orders and quotes into the Queuing Book. Because Rule 5.33(c)(1) provides that the System accepts complex orders for inclusion in the COB Opening Process at the times and in the manner set forth in Rule 5.31, the proposed change to the Queuing Period start time will also apply to the entry of complex orders for the COB Opening Process.

These changes are administrative in nature. The Queuing Period concept already exists, and the opening auction update dissemination process is unchanged in substance. The change raises no novel policy questions. It merely expands an existing administrative preparation window without affecting how orders are prioritized, matched, or executed. The Exchange notes that while NYSE American LLC's (''NYSE American'') extended trading hours framework provides for a fixed 6:00 a.m. order acceptance time rather than a time determined by Exchange notice,[8] the Exchange believes its discretionary approach is appropriate. The rule merely sets a floor (''no earlier than 6:00 a.m.''); it does not mandate the Exchange to begin queuing at that time. All Exchange determinations regarding the time at which the Queuing Period will begin will be announced via Exchange Notice, so market participants will have advance notice and transparency regarding the applicable start time. In addition, the Exchange believes providing the Exchange with discretion affords operational flexibility to adjust the start time in response to feedback from market participants and evolving market conditions, which benefits investors by allowing the Exchange to optimize the preparation window based on actual market participant needs.

The proposed rule change does not amend the operation of the Queuing Period following a trading halt pursuant to Rule 5.31(g), and does not change any other aspect of the opening auction process.

The Cboe Options Filing also adopted new ''GTH Only'' and ''GTH and RTH Only'' order instructions, provided for a Curb session on trading days with shortened Regular Trading Hours, applied the Designated Primary Market-Maker opening quote obligation to the GTH session, and provided for a Queuing Period beginning no earlier than 6:00 p.m. (previous day) for index options eligible for GTH.[9] C2 does not offer Curb Trading Hours or overnight GTH (C2's GTH session runs from 8:30 a.m. to 9:15 a.m.), and therefore the Exchange is not proposing the Cboe Options GTH-specific changes at this time.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[10] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [11] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [12] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

Moving the start of the Queuing Period for the Opening Auction to no earlier than 6:00 a.m. (and conforming the related opening auction update time in Rule 5.31(c) and order entry time in Rule 5.7) protects investors and the public interest and promotes just and equitable principles of trade, as it will permit the Exchange to afford market participants additional time to enter, modify, and cancel orders and quotes ahead of the opening rotation. The change is administrative and ministerial. It adjusts only a technical parameter (the time window during which orders queue) without altering trading mechanics, order priority, execution logic, or the price discovery process. This change affects only when orders and quotes are accepted for the Queuing Book, not when trading begins; the opening rotation times remain unchanged. Participants are not required to submit orders during the extended window; the change simply provides additional flexibility for those who choose to use it, with no corresponding investor risk. The change has no impact on how the Queuing Period will work, applies uniformly to all Users, and is not unfairly discriminatory. The Exchange's approach provides for a start time determined by Exchange notice rather than a fixed time, affording the Exchange operational flexibility to adjust the preparation window based on participant feedback and market conditions.

The Exchange further believes the proposed rule change removes impediments to and perfects the mechanism of a free and open market and a national market system because it is substantively identical to the Queuing Period, order and quote entry, and opening auction update changes Cboe Options adopted for option classes other than index options eligible for GTH,[13] and is based on NYSE American's 6:00 a.m. order acceptance time.[14] Harmonizing these times across the Exchange and its affiliated options exchanges provides consistency for market participants that access multiple Cboe options exchanges.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition because it will apply equally to all similarly situated market participants. The changes to the Queuing Period start time, order and quote entry time, and opening auction update dissemination time apply uniformly to all Users entering orders and quotes for the opening rotation, and entering, modifying, or cancelling orders during an extended Queuing Period is within the discretion of Users. No participant is required to act earlier, and the extended window creates no advantage for any subset of participants.

The Exchange does not believe that the proposed rule change will impose any burden on intermarket competition. The proposed rule change is substantively identical to changes Cboe Options adopted in the Cboe Options

[8] *See* NYSE American Rule 901.1NY(d)(3).

[9] *See* Cboe Options Filing.

[10] 15 U.S.C. 78f(b).

[11] 15 U.S.C. 78f(b)(5).

[12] *Id.*

[13] *See* Cboe Options Filing.

[14] *See* NYSE American Rule 901.1NY(d)(3).

Filing and is based on NYSE American's 6:00 a.m. order acceptance time. While NYSE American provides for a fixed 6:00 a.m. order acceptance time, the Exchange's approach provides for a start time determined by Exchange notice, which does not impose any burden on competition because it merely provides the Exchange with operational flexibility to adjust order acceptance times and affects only when orders and quotes are accepted, not when trading begins. Market participants on other exchanges are welcome to become Trading Permit Holders and trade at the Exchange if they determine that this proposed rule change has made the Exchange more attractive or favorable.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not:

A. significantly affect the protection of investors or the public interest;

B. impose any significant burden on competition; and

C. become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [15] and Rule 19b–4(f)(6) [16] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–C2–2026–031 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–C2–2026–031. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–C2–2026–031 and should be submitted on or before December 10, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #22066 and #22067; TENNESSEE Disaster Number TN–20043]

Administrative Declaration of a Disaster for the State of Tennessee

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is notice of an Administrative declaration of a disaster for the state of Tennessee dated November 16, 2026.

Incident: Flooding.

DATES: Issued on November 16, 2026.

Incident Period: November 5, 2026.

Physical Loan Application Deadline Date: January 15, 2027.

Economic Injury (EIDL) Loan Application Deadline Date: August 16, 2027.

ADDRESSES: *Visit the MySBA Loan Portal at https://lending.sba.gov* to apply for a disaster assistance loan.

FOR FURTHER INFORMATION CONTACT: Sharon Henderson, Office of Disaster Recovery, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given as a result of the Administrator's disaster declaration, applications for disaster loans may be submitted online using the MySBA Loan Portal *https://lending.sba.gov* or in person at other locally announced locations. For further assistance please contact the SBA disaster assistance customer service center by email at *disastercustomerservice@sba.gov* or by phone at 1–800–659–2955. If you are deaf, hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties: Polk.

Contiguous Counties:

Tennessee: Bradley, McMinn, Monroe.

Georgia: Fannin, Murray.

North Carolina: Cherokee.

The Interest Rates are:

	Percent
For Physical Damage:	
Homeowners with Credit Available Elsewhere	6.250
Homeowners without Credit Available Elsewhere	3.125
Businesses with Credit Available Elsewhere	8.000
Businesses without Credit Available Elsewhere	4.000
Private Non-Profit Organizations with Credit Available Elsewhere	3.750
Private Non-Profit Organizations without Credit Available Elsewhere	3.750
For Economic Injury:	
Business and Small Agricultural Cooperatives without Credit Available Elsewhere	4.000
Private Non-Profit Organizations without Credit Available Elsewhere	3.750

The number assigned to this disaster for physical damage is 220666 and for economic injury is 220670.

The states which received an SBA Administrative declaration are Tennessee, Georgia, North Carolina.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #22064 and #22065; GEORGIA Disaster Number GA–20031]

Administrative Declaration of a Disaster for the State of Georgia

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is notice of an Administrative declaration of a disaster for the state of Georgia dated November 16, 2026.

Incident: Severe Flooding.

DATES: Issued on November 16, 2026.

Incident Period: November 4, 2026.

Physical Loan Application Deadline Date: January 15, 2027.

Economic Injury (EIDL) Loan Application Deadline Date: August 16, 2027.

ADDRESSES: *Visit the MySBA Loan Portal at https://lending.sba.gov* to apply for a disaster assistance loan.

FOR FURTHER INFORMATION CONTACT: Shaquille Lewis, Office of Disaster Recovery, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given as a result of the Administrator's disaster declaration, applications for disaster loans may be submitted online using the MySBA Loan Portal *https://lending.sba.gov* or in person at other locally announced locations. For further assistance please contact the SBA disaster assistance customer service center by email at *disastercustomerservice@sba.gov* or by phone at 1–800–659–2955. If you are deaf, hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

The following areas have been determined to be adversely affected by the disaster:

Primary County: Fannin.

Contiguous Counties:

Georgia: Dawson, Gilmer, Lumpkin, Murray, Union.

North Carolina: Cherokee.
Tennessee: Polk.

The Interest Rates are:

	Percent
For Physical Damage:	
Homeowners with Credit Available Elsewhere	6.250
Homeowners without Credit Available Elsewhere	3.125
Businesses with Credit Available Elsewhere	8.000
Businesses without Credit Available Elsewhere	4.000
Private Non-Profit Organizations with Credit Available Elsewhere	3.750
Private Non-Profit Organizations without Credit Available Elsewhere	3.750
For Economic Injury:	
Business and Small Agricultural Cooperatives without Credit Available Elsewhere	4.000
Private Non-Profit Organizations without Credit Available Elsewhere	3.750

The number assigned to this disaster for physical damage is 220646 and for economic injury is 220650.

The states which received an SBA Administrative declaration are Georgia, North Carolina, and Tennessee.

BILLING CODE 8026–09–P

SOCIAL SECURITY ADMINISTRATION

[Docket No. SSA–2026–0100]

Privacy Act of 1974; Matching Program

AGENCY: Social Security Administration (SSA).

ACTION: Notice of a new matching program.

SUMMARY: In accordance with the provisions of the Privacy Act of 1974, this notice announces a new matching program with the Department of Labor (DOL). Under this matching program, DOL, as the source agency, will disclose Federal Employees' Compensation Act (FECA) payment data to SSA, the recipient agency. SSA will use the FECA payment data or the purpose of facilitating the administration of title II Disability Insurance (DI) benefits to eligible beneficiaries and their auxiliaries. DOL will provide the data to SSA every 28 days, consistent with its FECA benefit payment cycle. Each data transmission is expected to include payment information for approximately 40,000 FECA beneficiaries.

DATES: The deadline to submit comments on the proposed matching program is no later than December 21, 2026.

The matching program will be applicable on December 28, 2026, or once a minimum of 30 days after publication of this notice has elapsed, whichever is later. The matching program will be in effect for a period of 18 months.

ADDRESSES: You may submit comments by any one of three methods—internet, fax, or mail. Do not submit the same comments multiple times or by more than one method. Regardless of which method you choose, please state that your comments refer to Docket No. SSA–2026–0100 so that we may associate your comments with the correct regulation *Caution:* You should be careful to include in your comments only information that you wish to make publicly available. We strongly urge you not to include in your comments any personal information, such as Social Security numbers or medical information.

1. *Internet:* We strongly recommend that you submit your comments via the internet. Please visit the Federal eRulemaking portal at *https://www.regulations.gov.* Use the *Search* function to find docket number SSA–2026–0100 and then submit your comments. The system will issue you a tracking number to confirm your submission. You will not be able to view your comment immediately because we must post each submission manually. It may take up to a week for your comments to be viewable.

2. *Fax:* Fax comments to 833–410–1631.

3. *Mail:* Matthew Ramsey, Head of Privacy and Disclosure Policy, Law & Policy, Social Security Administration, G–401 WHR, 6401 Security Boulevard, Baltimore, MD 21235–6401, or emailing *Matthew.Ramsey@ssa.gov.* Comments are also available for public viewing on the Federal eRulemaking portal at *https://www.regulations.gov* or in person, during regular business hours by arranging an appointment with the contact person identified below.

FOR FURTHER INFORMATION CONTACT: Interested parties may submit general questions about the matching program to Andrea Huseth, Division Director, Electronic Interchange, Liaison & Breach Division, Privacy and Disclosure Policy, Law & Policy, Social Security Administration, G–401 WHR, 6401 Security Boulevard, Baltimore, MD 21235–6401, at telephone: (410) 608–9675, or send an email to *Andrea.Huseth@ssa.gov.*

SUPPLEMENTARY INFORMATION: This establishment of a matching program between SSA and DOL supports SSA's efficient administration of its title II DI program.

Matthew D. Ramsey,

Head of Privacy and Disclosure Policy, Law & Policy.

Participating Agencies

SSA and DOL.

Authority for Conducting the Matching Program

Legal authority for the FECA payment data disclosures under this matching program is section 224(a) and (h)(1) of the Social Security Act (Act), 42 U.S.C. 424(a) and (h)(1), as well as 5 U.S.C. 8116(d)(1). Notably, section 224(h)(1) of the Act requires Federal agencies to provide SSA with information in their possession that SSA may require for making timely determinations as to the amounts of reduction required under section 224(a) of the Act.

Purpose(s)

This matching program establishes the terms, safeguards, and procedures under which DOL as the source agency, will disclose FECA payment data to SSA, the recipient agency. SSA will use the DOL's FECA payment data for the purpose of facilitating the administration of DI benefits to both beneficiaries and their auxiliaries. SSA will utilize this data to improve SSA's ability to accurately offset Title II DI benefits in accordance with applicable laws and regulations.

Categories of Individuals

The individuals whose information is involved in this matching program are DI beneficiaries and their auxiliaries who are concurrently receiving FECA benefit payments.

Categories of Records

The API (Application Programming Interface) communication of DI beneficiaries DOL provides to SSA every 28 days consistent with its pay cycle for FECA benefit payments will contain the FECA payment amount of approximately 40,000 FECA beneficiaries. DOL FECA payment records will be matched against SSA's Master Beneficiary Record and Master Files of Social Security Numbers (SSN) Holders and SSN Applications. SSA will match DOL FECA payment records with SSA records to identify DI beneficiaries and eligible auxiliaries who may be concurrently receiving FECA payments. The records will include the individual's SSN; primary or auxiliary beneficiary claimant name; address information (address lines, city, state, ZIP code, and country); date of

birth; roll type; time lost; weekly pay rate; compensation rate; cancellation payment flag; payee relationship code; payment details, including gross payment amount, Consumer Price Index adjustment, health benefit insurance, basic life insurance, optional life insurance, post-retirement basic life insurance, miscellaneous deductions, attendant allowance, and net payment amount; entitlement period beginning and ending dates; benefit type code; date paid; FECA case number; Federal agency employer; date of injury or illness; case status; and adjudication status. SSA will use this information to determine whether a reduction of DI benefits is applicable to the DI beneficiary or any eligible auxiliary.

System(s) of Records

DOL will provide SSA with FECA benefit data from DOL's system of records: DOL/GOVT–1, Office of Workers' Compensation Programs, Federal Employees' Compensation Act File, 81 **Federal Register** (FR) 47,418 (July 21, 2016).

SSA will match the DOL data with two SSA's systems of records:

1. Master Beneficiary Record, 60–0090, last fully published at 71 FR 1826 (January 11, 2006) and updated at 72 FR 69723 (December 10, 2007), 78 FR 40542 (July 5, 2013), 83 FR 31250–31251 (July 3, 2018), 83 FR 54969 (November 1, 2018), 89 FR 825 (January 5, 2024), 89 FR 14554 (February 27, 2024), and 90 FR 53413 (November 25, 2025); and

2. Master Files of SSN Holders and SSN Applications (Enumeration System) (60–0058), last fully published at 90 FR 10025 (February 20, 2025).

BILLING CODE 4191–02–P

DEPARTMENT OF STATE

[Public Notice: 13174]

Advisory Committee on Historical Diplomatic Documentation—Notice of Closed and Open Meeting in December 2026

The Advisory Committee on Historical Diplomatic Documentation will meet on December 15, 2026, in open and closed sessions, to discuss matters concerning declassification and transfer of Department of State records to the National Archives and Records Administration and the status of the *Foreign Relations of the United States (FRUS)* series.

Open Session. The open session for the meeting will take place online only from 10:00 a.m. until 11:00 a.m. RSVP and requests for reasonable accommodation for the meeting should be sent not later than December 8, 2026.

Closed Session. The following session will be closed in accordance with 5 U.S.C. 1009(d):

- December 15—morning.

The agenda for the closed in-person meeting calls for discussions of agency declassification decisions concerning the *FRUS* series and other declassification issues. These are matters properly classified and not subject to public disclosure under 5 U.S.C. 552b(c)(1) and the public interest requires that such activities be withheld from disclosure.

RSVP Instructions. Members of the public planning to attend the virtual open meeting should RSVP to Alina Khachatourian at *KhachatourianA@state.gov* by December 8, 2026. The platform type and instructions on how to join the virtual meeting will be provided upon receipt of RSVP. Note that requests for reasonable accommodation received after December 8 will be considered but might not be possible to fulfill.

Questions concerning the meeting should be directed to John Powers, Acting Executive Secretary, Advisory Committee on Historical Diplomatic Documentation, Department of State, Office of the Historian, Washington, DC, 20372, telephone (771) 327–0058, email *history@state.gov*.

(Authority: 5 U.S.C. 1009 and 22 U.S.C. 2651a)

John C. Powers,

Acting Director, Office of the Historian, U.S. Department of State.

BILLING CODE 4710–05–P

DEPARTMENT OF STATE

[Public Notice: 13149]

30-Day Notice of Proposed Information Collection: 1405–0241 Improving Customer Experience (OMB Circular A–11, Section 280 Implementation)

ACTION: Notice of request for public comment and submission to OMB of proposed collection of information.

SUMMARY: The Department of State has submitted the information collection described below to the Office of Management and Budget (OMB) for approval. In accordance with the Paperwork Reduction Act of 1995 we are requesting comments on this collection from all interested individuals and organizations. The purpose of this Notice is to allow 30 days for public comment.

DATES: Submit comments up to December 21, 2026.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

SUPPLEMENTARY INFORMATION:

A. Purpose

Under the PRA, (44 U.S.C. 3501–3520) Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, the Department of State is publishing notice of the proposed collection of information set forth in this document.

Whether seeking a loan, Social Security benefits, veteran's benefits, or other services provided by the Federal Government, individuals and businesses expect Government customer services to be efficient and intuitive, just like services from leading private-sector organizations. Yet the 2016 American Consumer Satisfaction Index and the 2017 Forrester Federal Customer Experience Index show that, on average, Government services lag nine percentage points behind the private sector.

A modern, streamlined and responsive customer experience means: raising government-wide customer experience to the average of the private sector service industry; developing indicators for high-impact Federal programs to monitor progress towards excellent customer experience and mature digital services; and providing the structure (including increasing transparency) and resources to ensure customer experience is a focal point for agency leadership. To support this, OMB Circular A–11 Section 280

established government-wide standards for mature customer experience organizations in government and measurement. To enable Federal programs to deliver the experience taxpayers deserve, they must undertake three general categories of activities: conduct ongoing customer research, gather and share customer feedback, and test services and digital products.

These data collection efforts may be either qualitative or quantitative in nature or may consist of mixed methods. Additionally, data may be collected via a variety of means, including but not limited to electronic or social media, direct or indirect observation (*i.e.,* in person, video and audio collections), interviews, questionnaires, surveys, and focus groups. The Department of State will limit its inquiries to data collections that solicit strictly voluntary opinions or responses. Steps will be taken to ensure anonymity of respondents in each activity covered by this request.

The results of the data collected will be used to improve the delivery of Federal services and programs. It will include the creation of personas, customer journey maps, and reports and summaries of customer feedback data and user insights. It will also provide government-wide data on customer experience that can be displayed on *performance.gov* to help build transparency and accountability of Federal programs to the customers they serve.

Method of Collection

The Department of State will collect this information by electronic means when possible, as well as by mail, fax, telephone, technical discussions, and in-person interviews. The Department of State may also utilize observational techniques to collect this information.

Data:

Form Number(s): DS–4318.

Type of Review: Extension.

B. Annual Reporting Burden

Affected Public: Collections will be targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future. For the purposes of this request, ''customers'' are individuals, businesses, and organizations that interact with a Federal Government agency or program, either directly or via a Federal contractor. This could include individuals or households; businesses or other for-profit organizations; not-for-profit institutions; State, local or tribal governments; Federal government; and Universities.

- *Estimated Number of Respondents:* 1,101,550.
- *Estimated Time per Response:* Varied, dependent upon the data collection method used. The possible response time to complete a questionnaire or survey may be 3 minutes or up to 1.5 hours to participate in an interview.
- *Estimated Total Annual Burden Hours:* 100,800.
- *Estimated Total Annual Cost to Public:* $0.

C. Public Comments

The Department of State published a 60-day notice for this collection on August 20, 2026. 91 FR 53925. There was one public comment, which stated that data collection is limited to ''non-sensitive opinions'' and feedback regarding government service, and asked if this collection satisfies those legal requirements. The Department believes that it does, and by this notice invites further comment on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Alden F. Fahy,

Acting Director, Office of Privacy and Organizational Policy, Department of State.

DEPARTMENT OF STATE

[Public Notice 13148]

30-Day Notice of Proposed Information Collection: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery

ACTION: Notice of request for public comment and submission to OMB of proposed collection of information.

SUMMARY: The Department of State has submitted the information collection described below to the Office of Management and Budget (OMB) for approval. In accordance with the Paperwork Reduction Act of 1995 we are requesting comments on this collection from all interested individuals and organizations. The purpose of this Notice is to allow 30 days for public comment.

DATES: Submit comments up to December 21, 2026.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Direct requests for additional information regarding the collection listed in this notice, including requests for copies of the proposed collection instrument and supporting documents, to Brandi Beam, who may be reached on 202–996–1881 or at *PRA@state.gov*.

SUPPLEMENTARY INFORMATION:

- *Title of Information Collection:* Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.
- *OMB Control Number:* 1405–0193.
- *Type of Request:* Extension of a Currently Approved Collection.
- *Originating Office:* Office of Privacy and Organizational Policy, A/SKS/PPKM/POP.
- *Form Number:* Various public surveys.
- *Respondents:* Individuals responding to Department of State customer service evaluation requests.
- *Estimated Number of Respondents:* 2,000,000.
- *Estimated Number of Responses:* 2,000,000.
- *Average Time per Response:* 3.5 minutes.
- *Total Estimated Burden Time:* 116,667 annual hours.
- *Frequency:* Once per request.
- *Obligation to Respond:* Voluntary.

We are soliciting public comments to permit the Department to:

- Evaluate whether the proposed information collection is necessary for the proper functions of the Department.
- Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used.
- Enhance the quality, utility, and clarity of the information to be collected.

• Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Please note that comments submitted in response to this Notice are public record. Before including any detailed personal information, you should be aware that your comments as submitted, including your personal information, will be available for public review.

Abstract of Proposed Collection

The information collection activity will measure qualitative customer feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. This qualitative feedback will provide insights into customer perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communication between the Department and its customers. It will also allow feedback to contribute directly to the improvement of program management.

Feedback collected under this generic clearance will provide useful information, but it will not yield data that can be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: the target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

Methodology

Respondents will fill out a brief customer survey after completing their interaction with a Department Program Office or Embassy. Surveys are designed to gather feedback on the customer's experiences.

Public Comment

The Department of State received one public comment in response to the proposed extension of this information collection. The commenter expressed interest in more information regarding the specific survey instruments and sub-collections included under the ''Various Public Surveys'' generic clearance; specifically, information about their scope, target audiences, administration methods, estimated respondent burden, and the availability of a public inventory. The Department appreciates the comment and directs the commenter to the data on *https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202402-1405-001*. Checking the ''All'' box at the top of that page will display a list of all of the surveys included under this information collection, along with their associated instruments and data.

Alden F. Fahy,

Acting Director, Office of Privacy and Organizational Policy, Department of State.

[FR Doc. 2026–23556 Filed 11–18–26; 8:45 am]

BILLING CODE 4710–24–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent of Waiver With Respect to Land; Marquette Sawyer Regional Airport, Gwinn, Michigan

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice.

SUMMARY: The FAA is considering a proposal to change approximately 15.78 acres of airport land from aeronautical use to non-aeronautical use and to authorize the sale of airport property located at Marquette Sawyer Regional Airport, Gwinn, Michigan. The aforementioned land is not needed for aeronautical use. The subject property is located east of the commercial terminal and parking lot generally bounded by Avenue G. and 11th Street to the north, Kelly Johnson Memorial Drive to the east, 10th Street to the south and Gerry Corkin Drive to the west. The property proposed to be released for sale contains a portion of a non-aeronautical manufacturing facility with the remainder vacant land. The proposed non-aeronautical use of the property is an expansion of the existing non-aeronautical manufacturing facility.

DATES: Comments must be received on or before December 21, 2026.

ADDRESSES: All requisite and supporting documentation will be made available for review by appointment at the FAA Detroit Airports District Office, Anthony Sebastian, Program Manager, 11677 South Wayne Road, Suite 107, Romulus MI 48174 Telephone: (734) 229–2900/ Fax: (734) 229–2950 and Duane R. DuRay, 125 G Avenue, Gwinn, MI 49841, (906) 225–8150.

Written comments on the Sponsor's request may be submitted using any of the following methods:

• *Federal eRulemaking Portal:* Go to *http://www.regulations.gov,* and follow the instructions for sending your comments electronically.

• *Mail:* Anthony Sebastian, Program Manager, Federal Aviation Administration, Detroit Airports District Office, 11677 South Wayne Road, Suite 107, Romulus MI 48174.

• *Hand Delivery:* Deliver to mail address above between 7:30 a.m. and 4:30 p.m. Monday through Friday, excluding Federal holidays.

• *Fax:* (734) 229–2950.

FOR FURTHER INFORMATION CONTACT: Anthony Sebastian, Program Manager, Federal Aviation Administration, Detroit Airports District Office, 11677 South Wayne Road, Suite 107, Romulus MI 48174. Telephone Number: (734) 229–2900/FAX Number: (734) 229–2950.

SUPPLEMENTARY INFORMATION: In accordance with section 47107(h) of Title 49, United States Code, this notice is required to be published in the **Federal Register** 30 days before modifying the land-use assurance that requires the property to be used for an aeronautical purpose.

The subject property is not needed for aeronautical purposes and is made up of an existing manufacturing facility and vacant land. The parcel consists of portions of three (3) larger airport owned parcels of which only one (1) was acquired with federal assistance. The federally acquired portion of the parcel was conveyed in a Quitclaim Deed, accepted by the Airport Sponsor on December 16, 1999, under and pursuant to the powers and authority contained in the Defense Base Closure and Realignment Act of 1990. The airport sponsor plans to sell the subject property at fair market value for the expansion of the existing manufacturing facility.

The disposition of proceeds from the sale of this airport property will be in accordance sections 47125 and 47151 of Title 49, United States Code and 14 CFR part 155, Release of Airport Property From Surplus Property Disposal Restrictions.

This notice announces that the FAA is considering the release of the subject

airport property at the Marquette Sawyer Regional Airport, Gwinn, Michigan from federal land covenants, subject to a reservation for continuing right of flight as well as restrictions on the released property as required in FAA Order 5190.6C section 22.13. Approval does not constitute a commitment by the FAA to financially assist in the disposal of the subject airport property nor a determination of eligibility for grant-in-aid funding from the FAA.

Legal Description

A PARCEL OF LAND SITUATED IN PART OF THE NORTHWEST QUARTER OF THE SOUTHWEST QUARTER (NW ¼, SW ¼) AND IN PART OF THE SOUTHWEST QUARTER OF THE SOUTHWEST QUARTER (SW¼, SW¼) AND IN PART OF THE SOUTHEAST QUARTER OF THE SOUTHWEST QUARTER (SE¼, SW/4), ALL WITHIN SECTION 25. BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA FAA–2026–7669]

Agency Information Collection Activities: Requests for Comments; Clearance of Renewed Approval of Information Collection: Monitoring, Reporting, and Verification (MRV) Program for Annex 16, Volume IV of the Convention on Civil Aviation

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval for a renewed information collection. The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on July 20, 2026. FAA received five comments to this notice. The collection involves a request that airplane operators subject to the applicability of Annex 16, Volume IV of the Convention on Civil Aviation (hereinafter the ''Chicago Convention'') submit electronically an Emissions Monitoring Plan (EMP), an annual Emissions Report (ER), and an optional annual ER Eligible Fuels Annex (EFA) to the FAA. The information to be collected is necessary because FAA will use the information to fulfill the United States' responsibilities under the Chicago Convention.

DATES: Written comments should be submitted by December 21, 2026.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Kevin Partowazam by email at: *Kevin.Partowazam@faa.gov;* phone: 202–267–3563.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity

of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information.

OMB Control Number: 2120–0790.

Title: CORSIA Monitoring, Reporting, and Verification (MRV) Program.

Form Numbers: 1. Emissions Monitoring Plan (EMP) Template; 2. Emissions Report (ER) Template; 3. ER Eligible Fuels Annex (EFA).

Type of Review: Clearance of a renewal of an information collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on July 20, 2026 (91 FR 45317). FAA received five comments in response to this notice.

The FAA MRV Program is a voluntary program for certain U.S. air carriers and commercial operators (collectively referred hereinafter as ''operators'') to submit certain airplane emissions data to the FAA to enable the United States to establish uniformity with ICAO Standards And Recommended Practices (SARPs) for Annex 16, Volume IV of the Chicago Convention, which were adopted in June 2018, as Annex 16, Volume IV to the Chicago Convention. Facilitating voluntary reporting by U.S. operators will ensure fair and reciprocal commercial competition by avoiding a patchwork of country- or regionally-based regulatory measures that are inconsistently applied, bureaucratically costly, and economically damaging.

According to Annex 16, Volume IV, all ICAO Member States whose airplane operators undertake international flights were required to develop an MRV system for emissions from those international flights starting January 1, 2019. The FAA MRV Program is intended to be the United States' MRV system for monitoring, reporting, and verification of U.S. airplane operator emissions from international flights.

Operators that are subject to the applicability of Annex 16, Volume IV will submit their EMPs, ERs, and optional ER EFAs electronically.[1] Each document uses Microsoft Excel-based templates and can be transmitted via email. EMPs that are submitted by operators will be used as a collaborative tool between the operator and FAA to document a given operator's chosen fuel use monitoring procedures. FAA will retain a copy of the EMP and will share with ICAO a list of operators that submit EMPs. FAA will not submit any specific EMPs from U.S. operators to ICAO. Operators may gather data through a ''fuel use monitoring method'' or a simplified monitoring method depending on the scale of their operations. Annual ERs that are submitted to FAA by operators and verifiers will be used to document each operators' international emissions. FAA will use the ERs, and optional ER EFAs, to calculate aggregated emissions data for all U.S. operators. FAA will submit the aggregated emissions data to ICAO to demonstrate U.S. implementation of Annex 16, Volume IV.

Respondents: Respondents will be airplane operators subject to the applicability of Annex 16, Volume IV of the Chicago Convention. FAA expects between 40 and 50 operators to submit an EMP and ER. Some additional operators could submit an EMP and ER over time based on their international aviation activities.

Frequency: An EMP is a one-time submission. An ER and optional ER EFA is an annual submission.

Estimated Average Burden per Response:

—For an EMP (one-time submission), FAA expects that filling and submitting an EMP could on average take approximately 28.6 hours.

—For an ER (annual submission), FAA expects that the reporting burden could be approximately 68 hours per operator using a Fuel Use Monitoring Method, inclusive of approximately 8 hours per operator that chooses to voluntarily submit an optional ER EFA. FAA expects the reporting burden could be approximately 21.5 hours per operator for operators using a simplified Monitoring Method, inclusive of approximately 4 hours per operator that chooses to voluntarily submit an optional ER EFA.

Estimated Total Annual Burden: Based on the above, FAA expects that the annual submission of an EMP and ER, including optional ER EFA, could take approximately 37.5 to 115.5 hours for each of the 40–50 operators.

Issued in Washington, DC, on November 17, 2026.

Julie Ann Marks,

Executive Director, Office of Environment and Energy.

BILLING CODE 4910–13–P

[1] The following activities are excluded from Annex 16, Volume IV:

—Domestic flights;

—Humanitarian, medical, and firefighting operations, including flight(s) preceding or following a humanitarian, medical, or firefighting flight provided such flight(s) were conducted with the same airplane, were required to accomplish the related humanitarian, medical, or firefighting activities or to reposition thereafter the airplane for its next activity;

—Operations using an airplane with a maximum certificated take-off mass equal to or less than 5,700 kg;

—Operations on behalf of the military.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[Docket No. FHWA–2026–1321]

Agency Information Collection Activities: Request for Comments for a New Information Collection

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice and request for comments.

SUMMARY: The FHWA has forwarded the information collection request described in this notice to the Office of Management and Budget (OMB) to approve a new information collection. We are required to publish this notice in the **Federal Register** by the Paperwork Reduction Act of 1995.

DATES: Please submit comments by December 21, 2026.

ADDRESSES: You may submit comments identified by DOT Docket ID Number 1321 by any of the following methods:

Website: For access to the docket to read background documents or comments received go to the Federal eRulemaking Portal: Go to *http://www.regulations.gov.*

Follow the online instructions for submitting comments.

Fax: 1–202–493–2251.

Mail: Docket Management Facility, U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590–0001.

Hand Delivery or Courier: U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Melissa Maiefski, *melissa.maiefski@dot.gov,* (402) 326–7960, Office of Competitive Grants and Workforce Programs, Federal Highway Administration, Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590. Office hours are from 8 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: We published a **Federal Register** Notice

with a 60-day public comment period on this information collection on May 21, 2026, at [91 FR 30024]. No comments were received.

Title: Stopping Threats on Pedestrians (STOP) Grant Program, also known as the Bollards Competitive Grant Program.

Background: The Federal Highway Administration (FHWA) administers the Stopping Threats on Pedestrians (STOP) program. It was established by Congress in Section 11502 of the Infrastructure Investment and Jobs Act (IIJA), Public Law 117–58.

The purpose of the Bollards Competitive Grant program is to provide competitive grants to local government entities and State Departments of Transportation to install bollards and other physical barriers designed to prevent death and injury from motor vehicle-pedestrian accidents. The program's goals include hardening ''soft targets'' in high-pedestrian areas, enhancing public safety in crowded spaces such as plazas and transit hubs, and reducing the frequency of vehicle-ramming incidents.

The program provides competitive grants for which the Federal share of the cost of an installation project may be up to 100 percent. The FHWA has authorized $5 million for fiscal year 2026 grants to support these critical safety and security infrastructure efforts.

Respondents: The Notice of Funding Opportunity (NOFO) announcing up to $5 million of Fiscal Year (FY) 2026 funding for STOP competitive grants will be available for State Departments of Transportation and local government entities on *grants.gov*. FHWA is expecting roughly 50 applicants to apply for STOP grant funding, 15 grant agreements, and 30 respondents during the project management phase.

Frequency: NOFOs and grant solicitations may be published annually by FHWA but, are subject to the availability of funds in appropriations or any legislation signed into law authorizing funds.

Estimated Average Burden per Response: 4 hours per respondent per applicant during the application and project management phase and 2 hours per respondent during the grant agreement phase.

Estimated Total Annual Burden Hours: It is expected that there will be an estimated total of 350 annual burden hours.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burdens; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended; and 49 CFR 1.48.

Issued on: November 17, 2026.

Jazmyne Lewis,

Information Collection Officer.

BILLING CODE 4910–22–P

DEPARTMENT OF TRANSPORTATION

Great Lakes St. Lawrence Seaway Development Corporation

Advisory Board; Meeting Notice

AGENCY: Great Lakes St. Lawrence Seaway Development Corporation, DOT.

ACTION: Notice of public meeting.

SUMMARY: This notice announces the virtual public meeting of the Great Lakes St. Lawrence Seaway Development Corporation (GLS) Advisory Board.

DATES: The virtual public meeting will be held on:

- Thursday, December 10, 2026, from 10 a.m.–12 p.m. EST.
  - Requests to participate in the meeting must be received by November 26, 2026.
  - Requests for accommodations for a disability must be received by November 26, 2026.
  - If you wish to speak during the meeting, you must submit a written copy of your remarks to GLS by November 19, 2026.
  - Requests to submit written materials to be reviewed during the meeting must be received by GLS no later than November 19, 2025.

ADDRESSES: The meeting will be held virtually. Details on how to participate will be forwarded to those who RSVP.

FOR FURTHER INFORMATION CONTACT: Sylvonica Madlock, Executive Officer, Great Lakes St. Lawrence Seaway Development Corporation, 1200 New Jersey Avenue SE, Suite W98–300, Washington, DC 20590; (202) 870–6335.

SUPPLEMENTARY INFORMATION: Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. 2), notice is hereby given of meetings of the GLS Advisory Board. The agenda for each meeting is the same and will be as follows:

1. Opening Remarks
2. Consideration of Minutes of Past Meeting
3. Quarterly Report
4. Old and New Business
5. Closing Discussion
6. Adjournment

Public Participation

Attendance at the meeting is open to the interested public. With the approval of the Administrator, members of the public may present oral statements during the meeting. Persons wishing further information should contact the person listed under the heading, **FOR FURTHER INFORMATION CONTACT**. There will be three (3) minutes allotted for oral comments from members of the public joining the meeting. To accommodate as many speakers as possible, the time for each commenter may be limited. Individuals wishing to reserve speaking time during the meeting must submit a request at the time of registration, as well as the name, address, and organizational affiliation of the proposed speaker. If the number of registrants requesting to make statements is greater than can be reasonably accommodated during the meeting, GLS will conduct a lottery to determine the speakers. Speakers are requested to submit a written copy of their prepared remarks for inclusion in the meeting records and for circulation to GLS Advisory Board members. All prepared remarks submitted will be accepted and considered as part of the meeting's record. Any member of the public may submit a written statement after the meeting deadline, and it will be presented to the committee.

The U.S. Department of Transportation is committed to providing equal access to this meeting for all participants. If you need alternative formats or services because of a disability, such as sign language, interpretation, or other ancillary aids, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. Any member of the public may present a written statement to the Advisory Board at any time.

Donna O'Berry,

Chief Counsel.

BILLING CODE 4910–61–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Agency Information Collection Activities; Comment Request on Application for Security Summit Membership

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of Information Collection; request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the IRS is inviting comments on the information collection request outlined in this notice.

DATES: Written comments should be received on or before January 19, 2027 to be assured of consideration.

ADDRESSES: Direct all written comments to Andres Garcia, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224, or by email to *pra.comments@irs.gov.* Include ''OMB Control No. 1545–2295'' in the subject line of the message.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of this collection should be directed to Jason Schoonmaker, (801) 620–6008.

SUPPLEMENTARY INFORMATION: The IRS, in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the IRS assess the impact and minimize the burden of its information collection requirements. Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record, and viewable on relevant websites. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Title: Application for Security Summit Membership.

OMB Control Number: 1545–2295.

Form Number: 15320.

Abstract: The IRS has joined with representatives of the software industry, tax preparation firms, payroll and tax financial product processors and state tax administrators to combat identity theft refund fraud to protect the nation's taxpayers. The Security Summit consists of IRS, state tax agencies and the tax community, including tax preparation firms, software developers, payroll and tax financial product processors, tax professional organizations and financial institutions.

Applicants use Form 15320 to apply for membership.

Current Actions: There is no change to the previously approved information collection.

Type of Review: Extension of a currently approved collection.

Affected Public: State, Local, or Tribal Government, business or other for-profit organizations.

Estimated Number of Responses: 62.

Estimated Time per Response: 5 minutes.

Estimated Total Annual Burden Hours: 5.

Dated: November 17, 2026.

Jason M. Schoonmaker,

Tax Analyst.

DEPARTMENT OF THE TREASURY

[TREAS–TRIP–2026–0694]

Information Collections for Claims Processing and Other Purposes Under the Terrorism Risk Insurance Program (Extension of Currently Approved Data Collections Under OMB No. 1505–0200)

AGENCY: Departmental Offices, U.S. Department of the Treasury

ACTION: Notice and request for comments.

SUMMARY: The Secretary of the Treasury (Secretary) administers the Terrorism Risk Insurance Program (TRIP or Program), including the issuance of regulations and procedures regarding the Program. The Federal Insurance Office (FIO) assists the Secretary in the administration of the Program. The Department of the Treasury (Treasury), as part of its continuing effort to reduce paperwork burdens, invites the public and other federal agencies to comment on approved information collections that are due for extension by the Office of Management and Budget (OMB) (under OMB 1505–0200), relating to claims processing and other administrative matters under the Program.

DATES: Written comments must be received not later than January 19, 2027.

ADDRESSES: Interested persons may submit comments electronically through the Federal eRulemaking Portal at *http://www.regulations.gov,* (docket number TREAS–TRIP–2026–0694) in accordance with the instructions on that site. Electronic submissions are encouraged; comments may also be mailed to the Terrorism Risk Insurance Program, Room 1410, U.S. Department of the Treasury, 1500 Pennsylvania Avenue NW, Washington, DC 20220.

All comments, including attachments and other supporting materials, are part of the public record and subject to public disclosure. You should submit only information that you wish to make available publicly. In general, Treasury will post all comments to *www.regulations.gov* without change, including any business or personal information provided such as names, addresses, email addresses, or telephone numbers.

FOR FURTHER INFORMATION CONTACT: Richard Ifft, Lead Management and Senior Insurance Policy Analyst, Terrorism Risk Insurance Program, Federal Insurance Office, Room 1410, U.S. Department of the Treasury, 1500 Pennsylvania Avenue NW, Washington, DC 20220, at (202) 622–2922 (this is not a toll-free number), Sherry Rowlett, Program Analyst, Federal Insurance Office, Room 1410, U.S. Department of the Treasury, 1500 Pennsylvania Avenue NW, Washington, DC 20220, at (202) 622–1890 (this is not a toll-free number). Persons who have difficulty hearing or speaking may access this number via TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

SUPPLEMENTARY INFORMATION:

I. Background

The Terrorism Risk Insurance Act of 2002, as amended (TRIA or the Act),[1] established the TRIP.[2] The Act establishes a temporary federal program of shared public and private compensation for insured commercial property and casualty losses resulting from an ''act of terrorism,'' as defined by

[1] 15 U.S.C. 6701 note. Because the provisions of TRIA (as amended) appear in a note, instead of particular sections, of the United States Code, the provisions of TRIA are identified by the sections of the law.

[2] *See* 31 CFR part 50.

TRIA. In order for the Program to make payments following a certified ''act of terrorism,'' the losses from an event must exceed certain thresholds and be in excess of participating insurer deductibles. Only ''acts of terrorism'' that have been certified as such by the Secretary (in consultation with the Attorney General and the Secretary of Homeland Security) are subject to the compensation provisions of the Program. In the event Treasury does make payments under the Program, it may be required, through surcharges imposed upon all commercial policyholders, to recoup some or all of amounts expended.

Since the inception of the Program in 2002, Treasury has sought and obtained from the OMB approvals for information collections that will be necessary if Treasury needs to process claims for the federal share of compensation, and potentially recoup amounts expended as required under TRIA.[3] Most of these information collections are managed through forms that have been developed by Treasury to permit participating insurers to demonstrate that they are entitled to payments for the federal share of compensation. In some cases (as explained further in this Notice), the information collection is not subject to a specific form but is based upon circumstances that may develop in the future, in the event the Program is triggered, or might be triggered, by the Secretary's certification of an act of terrorism.

The Terrorism Risk Insurance Program Reauthorization Act of 2019 extended the Program until December 31, 2027.[4] Therefore, to administer the Program, Treasury needs to continue the existing information collections to permit the receipt and resolution of claims, and potential recoupment of amounts expended by Treasury. Treasury seeks to extend these previously approved collections without substantive change. Treasury has updated the burden estimates associated with the renewal of the existing forms or collection obligations to account for the current number of insurers participating in the Program, based upon the best information now available to Treasury. As there are no proposed changes to the current forms or collection obligations, there are no changes to the previously estimated time burdens associated with the completion of those forms and collection obligations. None of the identified information collections will be triggered unless there is a certified act of terrorism (including the claims information that an insurer seeking payment of the federal share of compensation would need to provide), or in some cases where Treasury is considering certification of an act of terrorism. Treasury has designed the forms to identify elements that insurers typically collect already in their ordinary course of business when handling insurance claims, which will minimize any burden associated with their completion.

Further information concerning each of these requirements is provided below.

II. Information Collections: Existing Information Collections Under OMB Number 1505–0200

Title: Terrorism Risk Insurance Program; Commercial Property and Casualty Insurers Submission for Federal Share of Compensation.

Abstract: This information collection addresses information that participating insurers must submit in support of their claims for payment of the federal share of compensation. The forms identifying the information to be collected are as follows:

Treasury Form TRIP 01 (Notice of Deductible Erosion)
Treasury Form TRIP 02 (Certification of Loss (initial and supplementary))
Treasury Form TRIP 02A Schedule A (Declaration of Direct Earned Premium and Calculation of Insurer Deductible)
Treasury Form TRIP 02B Schedule B (Certification of Compliance with Section 103(b) of TRIA)
Treasury Form TRIP 02C Schedule C (Bordereau)

Type of Review: Extension of a currently approved data collection.

Current Expiration Date: January 30, 2027.

Affected Public: Business/Financial Institutions.

Estimated Number of Respondents: 100.[5]

Estimated Average Time per Respondent:

Treasury Form TRIP 01: 1.0 hours × 1 response = 1 hours.
Treasury Form TRIP 02 (initial and supplementary): 1.5 hours × 6 responses = 9 hours.
Treasury Form TRIP 02A Schedule A: 6.5 hours × 1 response = 6.5 hours.
Treasury Form TRIP 02B Schedule B: 0.25 hours × 6 responses = 1.5 hours.
Treasury Form TRIP 02C Schedule C: 4 hours × 6 responses = 24 hours.

Estimated Total Annual Burden Hours: 4,200 hours.[6]

Title: Terrorism Risk Insurance Program; Litigation Management—Information Collection Regarding Proposed Settlements.

Abstract: This information collection addresses settlement approval requirements under the Program that were initially adopted by Treasury by regulation and subsequently incorporated by Congress within TRIA. For third-party claims that are in excess of certain thresholds, Treasury must provide advance approval of the settlement before it is finalized by the participating insurer. The information collection provides Treasury with the necessary information to evaluate claims subject to advance approval. The form identifying the information to be collected is as follows:

Treasury Form TRIP 03 (Notice of Proposed Settlement of Third-Party Claim—Request for Approval)

Type of Review: Extension of a currently approved data collection.

Current Expiration Date: January 30, 2027.

Affected Public: Business/Financial Institutions.

Estimated Number of Respondents: 100.

Estimated Average Time per Respondent: 4.0 hours.

Estimated Total Annual Burden Hours: 5,144 hours.[7]

[3] Annual collections of information and data, outside of the claims process, that are required under TRIA are addressed in a separate notice and comment process, under OMB Control No. 1505–0257.

[4] Public Law 116–94, 133 Stat 2534. Treasury is seeking authority to continue to use the existing forms for an additional three-year period following their current expiration date of January 30, 2027. In the absence of an extension of the Program beyond December 31, 2027, the forms, if reauthorized for a three-year period following January 30, 2027, could still be utilized for the full three years, provided that the Secretary certifies an act of terrorism prior to December 31, 2027.

[5] The number of insurers required to file claims will depend upon the size and nature of the event in question. Treasury has historically estimated that 100 insurers will have insured losses as a result of a certified act of terrorism that could lead to potential claims for payment of the Federal share of compensation under the Program.

[6] The burden estimate includes assumptions regarding the number of times each form will need to be completed by an insurer making claims for the federal share of compensation, as identified above, resulting in total hours for each of the 100 insurers of 42 hours.

[7] Based upon the assumption that: (1) each of the 100 insurers will have 100 claims (10,000 in total), (2) 1 in 7 claims will involve amounts above the approval threshold (1,429 claims in total), and (3) 90 percent of those claims will be settled, and thus trigger settlement approval reporting (1,286 claims in total). This estimate of the number of claims that will require settlement approval reporting (1,286), multiplied by the 4 hours estimated to complete the form, results in the total figure of 5,144 hours. The reporting burden on insurers has not changed.

Title: Recordkeeping Requirements for Insurers Compensated Under Terrorism Risk Insurance Program.

Abstract: This requirement is for the maintenance (recordkeeping) of an insurer's records that are relevant to claims for reimbursement by participating insurers and amounts paid by Treasury as the Federal share of compensation for insured losses. The recordkeeping is needed for Treasury to conduct investigations and audits, as permitted under TRIA § 104(a)(1). 31 CFR 50.81(a) requires insurers to retain all records necessary to fully disclose material matters pertaining to insured losses. This record retention requirement is not subject to any common form or generalized reporting.

Type of Review: Extension of a currently approved data collection.

Current Expiration Date: January 30, 2027.

Estimated Number of Respondents: 100.

Estimated Average Time per Respondent: 8.33 hours.[8]

Estimated Total Annual Burden Hours: 833 hours.

Title: Surcharge Records Maintenance.

Abstract: This requirement is for the maintenance (recordkeeping) of an insurer's records that are relevant to any surcharges collected and remitted by insurers to Treasury. The recordkeeping is needed for Treasury to conduct investigations and audits as permitted under TRIA § 104(a)(1). 31 CFR 50.81(b) requires insurers to retain all records necessary to fully disclose material matters pertaining to the collection of surcharges. This record retention requirement is not subject to any common form or generalized reporting.

Type of Review: Extension of a currently approved data collection.

Current Expiration Date: January 30, 2027.

Estimated Number of Respondents: 2,250.[9]

Estimated Average Time per Respondent: 4 hours.

Estimated Total Annual Burden Hours: 9,000 hours.

Title: Recoupment Provisions of the Terrorism Risk Insurance Act (TRIA).

Abstract: Section 103(e) of TRIA extends authority to Treasury to conduct mandatory and discretionary recoupment (depending upon the circumstances presented) of federal payments made under the Program through policyholder surcharges. In order to determine the amount of recoupment that may be necessary, as well as implement any recoupment process that is required, Treasury may issue a data call for aggregate loss information. Accordingly, all insurers subject to TRIA will be required to create and maintain records concerning their direct written premium, surcharges, surcharge amounts collected, and surcharge amounts remitted to Treasury. The forms identifying the information to be collected are as follows:

Treasury Form TRIP 04A (Direct Written Premium and Monthly Surcharge Calculation)

Treasury Form TRIP 04B (Direct Written Premium and End of Year Calculation)

Treasury Form TRIP 05 (Data Call)

Type of Review: Extension of a currently approved data collection.

Current Expiration Date: January 30, 2027.

Affected Public: Business/Financial Institutions.

Estimated Number of Respondents: 2,250 (TRIP 04A and TRIP 04B recoupment processing) and 200 (TRIP 05 data call).

Estimated Average Time per Respondent:

Treasury Forms TRIP 04A and TRIP 04B: 5 hours per month (60 hours per year).

Treasury Form TRIP 05: 5 hours.

Estimated Total Annual Burden Hours: 135,000 hours (TRIP 04A and TRIP 04B), and 1,000 hours (TRIP 05).

Title: Terrorism Risk Insurance Program; Cap on Annual Liability.

Abstract: The Program is subject to a total annual cap of aggregate industry losses of $100 billion, and Treasury directed under TRIA to advise Congress within 15 days of an ''act of terrorism'' whether estimated total losses are expected to exceed the cap. In order to comply with the liability cap provisions of TRIA, Treasury may be required to conduct a data call for insured loss and deductible information to assess aggregate industry losses and determine if the $100 billion cap may be exceeded, as well as to determine and adjust the ''pro rata loss percentage'' to be applied against claim payments. The form identifying the information to be collected is as follows:

Treasury Form TRIP 05 (Terrorism Risk Insurance Program; Data Call).

Type of Review: Extension of a currently approved data collection.

Current Expiration Date: January 30, 2027.

Affected Public: Business/Financial Institutions.

Estimated Number of Respondents: 200

Estimated Average Time per Respondent: 5 hours.

Estimated Total Annual Burden Hours: 1,000 hours.

Title: Terrorism Risk Insurance Program; Certification Data Call.

Abstract: In order for the Secretary to determine whether an event is subject to certification as an ''act of terrorism'' under TRIA and 31 CFR 50.62, Treasury may need to collect loss data and estimates from affected insurers in order to confirm that losses are above statutory thresholds. The information collection includes both actual loss data, as well as estimates that may be generated in the immediate aftermath of an event that do not constitute loss data but could inform the certification determination. The form identifying the information to be collected is:

Treasury Form TRIP 06 (Certification Data Call).[10]

Type of Review: Extension of a currently approved data collection.

Current Expiration Date: January 30, 2027.

Affected Public: Business/Financial Institutions.

Estimated Number of Respondents: 20.

Estimated Average Time per Respondent: 15 hours.

Estimated Total Annual Burden Hours: 300 hours.

Title: Terrorism Risk Insurance Program; Monthly Claims Report.

Abstract: Treasury payments of the federal share of compensation require that average industry losses reach a certain threshold even if the losses of a particular insurer are in excess of its deductible. Pursuant to 31 CFR 50.53, the monthly claims report provides for truncated monthly reporting of losses so that Treasury may evaluate loss experience as it develops and make timely payments to insurers entitled to the Federal share of compensation. The report will enable payments to smaller

[8] This calculation includes assumptions regarding the number of claims that will be received for which some marginal additional costs (estimated to be 5 minutes per claim) will be incurred by the affected insurer.

[9] Treasury currently uses a figure of 2,250 insurers to approximate the number of individual insurance companies (as distinguished from groups) participating in the Program, for purposes of information collections that could apply to all participating insurers on an individual basis. *See* Information Collections for Claims Processing and Other Purposes Under the Terrorism Risk Insurance Program (Extension of Currently Approved Data Collections Under OMB No. 1505–0200), 88 FR 56123 (August 17, 2023).

[10] Although potentially available for the collection of information, the Certification Data Call will not need to be utilized if Treasury is able to confirm that statutory thresholds will, or will not, be met through other means. See 31 CFR 50.62(b).

insurers that cannot demonstrate, based upon their own losses, that the Program Trigger amount has been reached. The form identifying the information to be collected is as follows:

Treasury Form TRIP 07 (Monthly Claims Report).

Type of Review: Extension of a currently approved data collection.

Current Expiration Date: January 30, 2027.

Affected Public: Business/Financial Institutions.

Estimated Number of Respondents: 100.

Estimated Average Time per Respondent: 2 hours.

Estimated Total Annual Burden Hours: 9,600 hours.[11]

Title: Terrorism Risk Insurance Program; Commutations under Final Netting Rule.

Abstract: Under 31 CFR 50.76(b), the Secretary may set a final netting date, at which time all claims relating to an insured loss or act of terrorism become final. As part of a final netting determination, Treasury may require (or consider the request of a particular insurer for) a commutation of an insurer's future claims for the federal share of compensation. This process could require the insurer to produce information justifying a final payment estimate, including supporting actuarial factors and methodology. This information collection is not subject to any common form or generalized reporting requirement, as it will necessarily be tailored to the circumstances presented by a particular insurer, which will need to be determined at the time any particular commutation process takes place.

Type of Review: Extension of a currently approved data collection.

Current Expiration Date: January 30, 2027.

Affected Public: Business/Financial Institutions.

Estimated Number of Respondents: 15

Estimated Average Time per Respondent: 40 hours.

Estimated Total Annual Burden Hours: 600 hours.

Title: Terrorism Risk Insurance Program; Rebuttal of Controlling Influence Submissions.

Abstract: Treasury has promulgated procedures at 31 CFR 50.7 for an insurer to follow in seeking to rebut a regulatory presumption of ''controlling influence'' over another insurer (which, because of the way in which the Program operates, would affect the amount of direct earned premium attributable to the insurer's deductible calculation). These procedures require insurers to provide Treasury necessary information to determine whether a ''controlling influence'' exists, and if it does, whether it has been rebutted. This information collection is not subject to any common form or generalized reporting requirement, as it will necessarily be tailored to the circumstances presented by the ''controlling influence'' issue presented by a particular insurer. No assurance of confidentiality is provided, although applicable exemptions under the Freedom of Information Act could apply, *e.g.,* to any confidential business or trade secret material submitted.

Type of Review: Extension of a currently approved data collection.

Current Expiration Date: January 30, 2027.

Affected Public: Business/Financial Institutions.

Estimated Number of Respondents: 10.

Estimated Average Time per Respondent: 40 hours.

Estimated Total Annual Burden Hours: 400 hours.

All of the existing forms and associated instructional materials (none of which will substantively change on account of this renewal) are available for review on Treasury's website at *https://home.treasury.gov/policy-issues/financial-markets-financial-institutions-and-fiscal-service/federal-insurance-office/terrorism-risk-insurance-program/federal-share-claim-process.*

Request for Comments: An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collections; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Kathleen Shannon,

Executive Secretary.

[FR Doc. 2026–23560 Filed 11–18–26; 8:45 am]

BILLING CODE P

[11] The burden estimate includes the assumption that the monthly report will need to be completed each month over a 48-month period as all claims are resolved. Each monthly report will take 2 hours during this 48-month period, resulting in 96 hours per each insurer, or 9,600 hours for all 100 insurers combined.

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0500]

Agency Information Collection Activity Under OMB Review: Mandatory Verification of Dependents

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden, and it includes the actual data collection instrument.

DATES: Comments and recommendations for the proposed information collection should be sent by December 21, 2026.

ADDRESSES: To submit comments and recommendations for the proposed information collection, please type the following link into your browser: *www.reginfo.gov/public/do/PRAMain,* select ''Currently under Review—Open for Public Comments'', then search the list for the information collection by Title or ''OMB Control No. 2900–0500.''

FOR FURTHER INFORMATION CONTACT: VA PRA information: Dorothy Glasgow, 202–461–1084, *VAPRA@va.gov.*

SUPPLEMENTARY INFORMATION:

Title: Mandatory Verification of Dependents (VA Form 21–0538).

OMB Control Number: 2900–0500. *https://www.reginfo.gov/public/do/PRASearch.*

Type of Review: Revision of a currently approved collection.

Abstract: VA Form 21–0538 is used to request verification of the status of dependents for whom additional compensation is being paid to veterans. Without this information, determination

of entitlement would not be continued. This is a revision due to the burden increase since the previous approval resulting from the estimated number of receivables averaged over the past year.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at insert citation date: 91 FR 52402, August 13, 2026.

Affected Public: Individuals or Households.

Estimated Annual Burden: 23,033 hours.

Estimated Average Burden per Respondent: 10 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 138,197 per year.

Authority: 44 U.S.C. 3501 *et seq.*

Shunda Willis,

Acting, VA PRA Clearance Officer, Office of Information and Technology/Office of Data Governance and Analytics, Department of Veterans Affairs.

[FR Doc. 2026–23606 Filed 11–18–26; 8:45 am]

RIN 0938–AV97

Medicare, Medicaid, and Marketplace Programs; Comprehensive Regulations To Uncover Suspicious Healthcare (CRUSH)

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Proposed rule.

SUMMARY: This proposed rule would revise provisions regarding provider enrollment, medical review, investigations, and other program integrity oversight provisions to greatly strengthen our ability to crush fraud, enhance program integrity efforts across Medicare, Medicaid, Children's Health Insurance Program, and the Marketplace and maximize regulatory authorities to address inappropriate payments.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, by January 19, 2027.

ADDRESSES: In commenting, please refer to file code CMS–6098–P.

Comments, including mass comment submissions, must be submitted in one of the following three ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *https://www.regulations.gov/docket/CMS-2026-0826.* Follow the ''Submit a comment'' instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–6098–P, P.O. Box 8013, Baltimore, MD 21244–8013.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–6098–P, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: Eli Boone, (227) 232–6768, or Katie O'Malley, (410) 786–8987.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following website as soon as possible after they have been received: *https://www.regulations.gov.* Follow the search instructions on that website to view public comments. CMS will not post on *Regulations.gov* public comments that make threats to individuals or institutions or suggest that the commenter will take actions to harm an individual. CMS continues to encourage individuals not to submit duplicative comments. We will post acceptable comments from multiple unique commenters even if the content is identical or nearly identical to other comments.

Plain Language Summary: In accordance with 5 U.S.C. 553(b)(4), a plain language summary of this rule may be found at *https://www.regulations.gov/.*

I. Executive Summary

A. Purpose

On June 6, 2025, President Trump issued a Presidential Memorandum on Eliminating Waste, Fraud, and Abuse in Medicaid, expressing this Administration's commitment to preserve and protect the integrity of government programs. Similarly, President Trump, U.S. Department of Health and Human Services (HHS) Secretary Kennedy (the HHS Secretary), and Centers for Medicare & Medicaid Services (CMS) Administrator Oz (the CMS Administrator) have strongly demonstrated this Administration's dedication to crushing fraud in Medicare, Medicaid, the Children's Health Insurance Program (CHIP), and the Marketplace. In alignment with this strategic objective, as well as in line with our statutory authorities to undertake rulemaking, CMS is issuing this proposed rule to solicit stakeholder feedback on proposed regulatory changes that would strengthen CMS' ability to address vulnerabilities that make Federal health programs attractive targets to fraudsters, with the ultimate goal of ensuring greater affordability and sustainability of these programs for generations to come.

B. Summary of the Major Provisions

1. Strengthening State Medicaid and CHIP Oversight

CMS intends to enhance Federal oversight of State Medicaid programs through proposed measures that would, if finalized as proposed, expand its authority to enforce program integrity and strengthen State accountability. These initiatives include: (1) facilitating States' ability to rapidly suspend Medicaid payments based on credible allegations of fraud and strengthening State fraud reporting requirements; (2) establishing consistent provider identification requirements to increase State and Federal oversight capabilities; (3) increasing oversight of Medicaid and CHIP beneficiary eligibility determination errors; and (4) establishing strengthened State program integrity corrective action plan requirements to ensure compliance with Federal requirements. Additional provisions include:

- Requiring prompt reporting and return of Medicaid overpayments
- Enhancing managed care integrity reporting
- Broadening grounds for Medicaid provider denials and terminations
- Increasing data reporting on provider ownership
- Requiring electronic visit verification (EVV) data review for specific activities

Collectively, these enhancements aim to strengthen CMS' and States' ability to detect and address fraud, waste, and abuse in Medicaid and CHIP, while fostering improved collaboration between State and Federal efforts in program integrity.

In addition, we are including a request for information within this proposed rule. Specifically, CMS is requesting additional information and public comment regarding deductions from Medicaid payments for benefits such as union dues.

2. Reinvigorating the Medicare Advantage (MA) Risk Adjustment Data Validation (RADV) Program and Introducing New Ways To Hold Plan Sponsors Accountable

CMS proposes MA RADV program reforms to ensure oversight of a program responsible for $21 billion per year in overpayments due to the improper inflation of beneficiary risk scores, and proposes provisions to make referrals of substantiated or suspicious fraud, waste, and abuse mandatory for MA organizations and Part D plan sponsors,

as well as to expand the required reporting of credible allegation of fraud payment suspensions by pharmacies to all provider and supplier types.

3. Establishing Enhanced Medicare Provider Enrollment and Oversight Requirements

CMS proposes to tighten provider enrollment safeguards across Medicare, Medicaid, and CHIP by strengthening identity verification, accelerating reporting of changes in enrollment information, expanding grounds for enrollment denial and revocation, and adding a requirement that all providers and suppliers billing MA be enrolled in Original Medicare.

4. Stopping the Bleeding in the Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS) Benefit

CMS proposes strengthening protections against fraudulent and high-pressure marketing by DMEPOS suppliers, including expanding the prohibition on unsolicited contact and ensuring transparency regarding domestic and foreign marketers. CMS also proposes reinforcing DMEPOS surety bond requirements to reduce Medicare Trust Fund losses when overpayments occur.

5. Crushing Marketplace Fraud

CMS proposes to greatly strengthen its authority to suspend or terminate agents, brokers, and web-brokers engaging in abusive conduct and to exclude or terminate agents, brokers, and web-brokers who pose an unacceptable risk of fraud, waste, and abuse, including those convicted of certain felonies or misdemeanors. Additionally, CMS proposes to increase transparency in enforcement actions following findings of agent, broker, and web-broker noncompliance with regulatory standards and enhance the security of Exchange systems and consumer information.

C. Summary of Costs and Benefits

Currently, the CMS Office of the Actuary (OACT) has not completed a quantitative score of the Federal budgetary or trust fund impacts of this proposed rule. OACT will score the rule and provide detailed financial impact projections in the final rule once policy parameters are finalized and public comments have been evaluated. We specifically request data and feedback from commenters regarding potential administrative, operational, and utilization impacts to assist OACT in developing its final estimates.

We estimate that, taken together, the quantified provisions of this proposed rule would result in approximately $379 million in costs from 2027 to 2036. This estimate does not include the over $90 billion in transfers expected between the Federal government and State governments or private entities that may result from this proposed rule. CMS is seeking public comment on the accuracy of all cost and burden estimates included in this proposed rule.

II. Background

A. Authority

CMS' authority to issue program integrity rules flows primarily from the Social Security Act (the Act), as amended. The general authorities described here are in addition to the specific statutory authorities discussed with respect to each proposal. Sections 1102(a) and 1871(a)(1) of the Act provide general authority for the Secretary to prescribe regulations for the efficient administration of the Medicare program.

Section 1102(a) of the Act likewise provides general authority for the Secretary to prescribe regulations for the efficient administration of the Medicaid program and CHIP, while with respect to Medicaid, section 1902(a)(4) of the Act requires State plans to provide such methods of administration as are found by the Secretary to be necessary for the proper and efficient operation of the plan.

For MA, the Secretary has authority under section 1856(b)(1) of the Act to adopt standards consistent with, and to carry out, Part C. The Secretary also has authority under section 1857(e)(1) to establish new MA contract terms and conditions where necessary and appropriate and not inconsistent with Part C. For Medicare Part D, section 1860D–12(b)(3)(D) provides that the Secretary's authority under section 1857(e) of the Act also applies to Part D.

For Medicaid, section 1902(a)(4) of the Act requires State plans to provide such methods of administration as are found by the Secretary to be necessary for the proper and efficient operation of the plan. For the Exchanges, section 1312(e) of the Affordable Care Act provides the Secretary with the authority to establish procedures under which a State may allow agents or brokers to (1) enroll qualified individuals and qualified employers in QHPs offered through Exchanges, and (2) assist individuals in applying for advance payments of the premium tax credit (APTC) and cost sharing reductions (CSRs) for QHPs sold through an Exchange. Section 1321(a) of the Affordable Care Act directs the Secretary to issue regulations setting standards for meeting the applicable requirements of title I of the Affordable Care Act and the amendments made by that title. These standards concern the establishment and operation of Exchanges, the offering of qualified health plans through Exchanges, and such other requirements as the Secretary determines appropriate. Section 1313(a)(5) of the Affordable Care Act further directs the Secretary, with respect to activities carried out under title I, to provide for the efficient and nondiscriminatory administration of Exchange activities. It also directs the Secretary to implement any measure or procedure that the Secretary determines is appropriate to reduce fraud and abuse in the Administration of title I and has authority to implement under title I or another Act.

B. This Administration's Fight To Crush Health Care Fraud

Health care fraud, waste, and abuse is a pervasive issue that this Administration is tackling in an unprecedented fashion. For example, on March 16, 2026, President Trump issued Executive Order 14395, establishing the White House Task Force to Eliminate Fraud. Similarly, the HHS Secretary and the CMS Administrator have strongly demonstrated this Administration's dedication to crushing fraud in Medicare, Medicaid, the Children's Health Insurance Program (CHIP), the Basic Health Program (BHP), and the Marketplace. In June 2026, the Secretary and the Administrator joined the then-Acting Attorney General to announce the Justice Department's 2026 National Health Care Fraud Takedown, which resulted in charges against 455 defendants, including 90 doctors and other licensed medical professionals, for their alleged participation in health care fraud and opioid abuse schemes involving over $6.5 billion in false claims and significant patient harm.[1] This is an example of the significant steps this Administration has taken to crush fraud since President Trump began his second term in January 2025.

During his first term, on October 3, 2019, President Trump issued Executive Order (E.O.) 13890 on Protecting and Improving Medicare for Our Nation's Seniors. This order directed CMS to annually promulgate regulatory or subregulatory changes to Medicare to enhance program integrity and promote

[1] More information is available at *https://www.justice.gov/criminal/criminal-fraud/2026-national-health-care-fraud-takedown.*

payment accuracy and efficiency. CMS subsequently finalized a program integrity rule in 2023 (88 FR 80141) that required the disclosure of certain ownership, managerial, and other information regarding Medicare skilled nursing facilities (SNFs) and Medicaid nursing facilities (NFs). While CMS has issued many program integrity provisions in various rules or direction through subregulatory guidance, subsequent annual stand-alone program integrity rulemaking has not taken place.

Crushing fraud has been a central tenet of President Trump's second term, and undertaking rulemaking to address fraud vulnerabilities is a critical component of that fight. On February 27, 2026, CMS issued a Request for Information Related to Comprehensive Regulations to Uncover Suspicious Healthcare (CRUSH RFI) (91 FR 9803) to solicit interested parties' feedback on potential regulatory changes that might be included in this proposed rule, as well as other programmatic changes that could be implemented to make CMS more effective in crushing fraud.

Working tirelessly to crush waste, abuse, and fraudulent activities in our health care system remains a key CMS strategic priority. This includes leveraging new techniques, authorities, and policies that will enable CMS to continue shifting away from pay and chase methods to ''stop and caught'' approaches that allow us to swiftly remove bad actors from our programs which prevents dollars from going out the door towards fraud. We are issuing this Comprehensive Regulations to Uncover Suspicious Healthcare (CRUSH) proposed rule to solicit interested parties' feedback on proposed regulatory changes to make CMS more effective in crushing fraud to protect taxpayer dollars and the Americans we serve.

C. Severability

CMS proposes that if any provision of the CRUSH proposed rule, if or when finalized, were held to be invalid or unenforceable—facially or as applied to any person, plaintiff, or circumstance—or stayed pending further judicial or agency action, such provision shall be severable from other provisions finalized, and from rules and regulations otherwise in effect, and not affect the remainder of provisions finalized. It was and continues to be our intent that, unless such provision shall be held to be utterly invalid or unenforceable, it be construed to give the provision maximum effect permitted by law including in the application of the provision to other persons not similarly situated or to other, dissimilar circumstances from those where the provision may be held to be invalid or unenforceable. The CRUSH proposed rule addresses numerous stand-alone proposals that can largely operate independently of one another. We seek public comments on these proposed approaches to severability and whether similar regulatory text should be added to additional proposals within this proposed rule.

D. Effective Dates

We propose that, unless we specify otherwise with respect to a particular a provision, the effective date would be 60 days after the publication of the CRUSH final rule. We request public comment on the feasibility of effective dates for each provision.

III. Medicaid and CHIP Program Integrity Proposals

Medicaid and CHIP are Federal-State partnerships, and these partnerships are central to the programs' success. CMS provides States with guidance; technical assistance, including tools and data; Federal matching funds for expenditures; and other resources to use in meeting statutory and regulatory requirements.

The Federal Government and each State jointly fund each State's Medicaid and CHIP programs. The Federal Government matches State Medicaid program expenditures at a specified percentage, called the Federal Medical Assistance Percentage (FMAP), which has a statutory minimum of 50 percent and maximum of 83 percent, though enhanced FMAP exceeding 83 percent is available for certain covered populations and services (for example, the 90 percent FMAP available for expenditures attributable to the Medicaid expansion population under section 1905(y) of the Act).[2] State CHIP expenditures are matched at an enhanced FMAP equal to the State's regular FMAP increased by 30 percent, but bounded by an upper limit as section 2105(b) of the Act provides that the CHIP enhanced FMAP may not exceed 85 percent.[3] Total Fiscal Year (FY) 2024 Medicaid and CHIP spending exceeded $962 billion, or over 18 percent of total national health expenditures.[4] The FY 2024 Federal share of Medicaid expenditures constituted 64.7 percent of total Medicaid spending[5]—in other words, nearly ⅔ of all Medicaid expenditures were Federal dollars, evidencing the need for heightened Federal scrutiny—while the FY 2024 Federal share of CHIP expenditures was $20 billion. Because Medicaid expenditures are a large and growing portion of Federal and State budgets, controlling inappropriate Medicaid spending has been, and continues to be, an Administration priority.

States fund their share of their Medicaid programs and, within Federal and State guidelines, operate their individual programs through various activities, such as setting payment rates, paying claims, enrolling providers and beneficiaries, contracting with managed care plans,[6] improving service quality via quality improvement activities, claiming the Federal match of expenditures, and, critically, ensuring program integrity. States and CMS share responsibility for ensuring that State and Federal dollars are used to efficiently deliver quality health care services to eligible individuals and are not misused for fraud, waste, or abuse.

Effective program integrity controls are essential to ensure that Medicaid and CHIP funds are expended appropriately, providers meet applicable enrollment and screening requirements, and beneficiaries receive covered benefits and services in accordance with Federal and State requirements. Titles XIX and XXI of the Act contain provisions, several of which we describe here, establishing core State responsibilities related to provider oversight, fraud and abuse prevention, payment integrity, and proper administration of the Medicaid and CHIP programs. For example:

- Section 1902(a)(4) of the Act requires States to maintain such methods of administration as are found by the Secretary to be necessary for the proper and efficient operation of the State plan.
- Section 1902(a)(30)(A) of the Act requires States to provide methods and procedures necessary to safeguard against unnecessary utilization of care and services and to assure that

[2] The FMAP is calculated annually, and Federal law specifies that the FMAP will be no lower than 50 percent and no higher than 83 percent. See section 1905(b) of the Act.

[3] The CHIP enhanced FMAP is calculated annually, and Federal law specifies that the enhanced FMAP available for CHIP expenditures may not exceed 85 percent. See section 2105(b) of the Act.

[6] For these purposes, managed care plans refers to MCOs, PAHPs, and PIHPs as defined at § 438.2.

payments are consistent with efficiency, economy, and quality of care, reinforcing States' responsibility to maintain effective payment integrity and program oversight.

- Section 1902(a)(27) of the Act requires States to enter into agreements with providers under which such providers agree to maintain and, upon request, furnish to the State agency or CMS records sufficient to support appropriate payment for services.
- Section 1902(a)(37) of the Act, in addition to containing certain prompt payment requirements, requires States to maintain procedures for claims payment and prepayment and postpayment claims review, including review of appropriate data regarding recipients, providers, and services, to ensure proper and efficient payment of claims and management of the Medicaid program.
- Section 1902(a)(64) of the Act requires States to provide a mechanism to receive reports concerning alleged fraud, waste, and abuse, and compile data relating to such activities.
- Sections 1902(a)(77) and 2107(e)(1)(G) of the Act require States to comply with certain provider screening, oversight, and reporting requirements established by the Secretary in accordance with Section 1902(kk).
- Section 1936 of the Act establishes the Medicaid Integrity Program, which authorizes the HHS Secretary, acting through CMS, to enter into contracts with eligible third-party entities to carry out certain program integrity related activities. Pursuant to section 1936(b) of the Act, contractors may review the actions of individuals or entities providing Medicaid items or services; conduct audits of claims for payment for items or services furnished or administrative services rendered; identify overpayments to individuals or entities receiving Federal Medicaid funds; and provide education and training to providers, beneficiaries, managed care entities, and other stakeholders.

CMS has implemented many of the Medicaid and CHIP program integrity requirements established under Title XIX and XXI of the Act, including requirements implementing sections 1902(a)(38), 1902(a)(39), 1902(a)(42), 1902(a)(77), 1902(a)(78), 1936, 2107(e)(1)(C), 2107(e)(1)(D), and 2107(e)(1)(G) through regulations in 42 CFR part 455 and 42 CFR part 457, subpart I. These regulations establish Medicaid and CHIP program integrity requirements related to administering effective fraud detection and investigation programs, provider enrollment and screening, reporting, payment suspensions, provider terminations, recovery audit contractors, and related program integrity activities. Together, these statutory and regulatory provisions reflect States' primary program integrity responsibilities to maintain effective systems to identify, prevent, detect, investigate, and address program integrity risks, including improper payments and fraud, waste, and abuse.

Relatedly, section 1904 of the Act authorizes the Secretary, after reasonable notice and opportunity for a hearing, to withhold Federal payment to a State after determining that a State plan no longer complies with the requirements of section 1902 of the Act, or that the State's administration of its State plan fails to comply substantially with those requirements. Accordingly, when CMS establishes regulatory requirements implementing provisions of section 1902 of the Act, States must comply with those requirements as part of their obligations under approved Medicaid State plans and may be subject to withholding of Federal matching funds should they fail to do so. States must also comply with applicable CHIP requirements, including provisions of title XIX incorporated through specific cross-references within Title XXI. Pursuant to section 2106(d)(2) of the Act, States may also be subject to withholding for substantial noncompliance with CHIP requirements.

Although existing statutory and regulatory requirements provide a strong foundation for Medicaid and CHIP program integrity when properly executed, CMS continues to identify vulnerabilities that limit States' and CMS' ability to effectively oversee Medicaid expenditures and address evolving fraud, waste, and abuse risks. Despite State and Federal efforts, Medicaid and CHIP improper payment rates have also remained persistently high. Improper payments are not always directly attributable to fraud, waste, or abuse, but they remain an important indicator of payment integrity challenges. For example, in FY 2025, eligibility errors specifically accounted for approximately 72 percent of all Medicaid and CHIP improper payments, resulting in an estimated $27 billion in projected Federal improper payments.[7] Recognizing that fraud schemes continually evolve in response to perceived opportunity, CMS is committed to maintaining a sustained, long-term program integrity strategy that leverages advanced data analytics, innovative investigative tools and techniques, and close collaboration with State Medicaid Agencies and Federal, State, and local law enforcement partners to identify emerging threats and respond quickly as they arise.

CMS has recently intensified its efforts to crush fraud in Medicaid and CHIP nationwide. In the course of our efforts, we have identified instances of significant State noncompliance with program integrity requirements and have discerned new and emerging vulnerabilities in State program integrity operations and processes that put taxpayer dollars and beneficiaries at risk. These risks and vulnerabilities include inconsistent provider identification practices across Medicaid and CHIP systems and activities, limitations in the scope and detail of information currently reported to CMS regarding fraud and abuse investigations, and underutilization of electronic visit verification (EVV) information collected by States.

A. Overview of Proposed Policies

To strengthen Medicaid and CHIP program integrity and address the risks, vulnerabilities, and oversight challenges discussed above, we are proposing a series of regulatory changes designed to enhance provider oversight, strengthen payment integrity, improve data and reporting, support more effective fraud prevention and detection, and reinforce State accountability for meeting Federal program integrity requirements. Specifically, this rule proposes regulatory revisions at 42 CFR parts 431, 438, 447, 455, and 457 to strengthen Medicaid and CHIP program integrity oversight that would, unless otherwise stated, be effective 60 days after the publication of the final rule. We seek public comments on the following Medicaid and CHIP regulatory provisions, including the proposed effective dates:

- State Payment Suspension Updates and Reporting Requirements
  - ++ Allowing States to Rely on CMS' or Other Federal Agencies' Credible Allegation of Fraud Determinations
  - ++ Aligning Modifications to the Definition of Credible Allegation of Fraud
  - ++ Maintaining a Medicaid and CHIP Payment Suspension During an Investigation
  - ++ Verifying Good Cause Exceptions to Payment Suspension Requirements
  - ++ Updating Payment Suspension Reporting Requirements
  - ++ Applicability to CHIP

[7] 2025 Medicaid and CHIP Supplemental Improper Payment Data. *https://www.cms.gov/files/document/2025-medicaid-chip-supplemental-improper-payment-data.pdf.*

- Enhanced Electronic Visit Verification (EVV) Requirements
++ Use of EVV in Preliminary Investigations
++ EVV Data in Prepayment Claims Review
- Requiring National Provider Identifiers (NPIs) for Eligible Medicaid Provider Types
- Updating State Program Integrity Reporting Requirements
- Deregulation of the Medicaid Eligibility Quality Control (MEQC) Program
- Medicaid and CHIP Beneficiary Eligibility Audit Program
- Medicaid and CHIP Beneficiary Eligibility-Related Disallowances
- Payment Error Rate Measurement (PERM) Corrective Action Plans (CAPs)
++ State Submission of a Combined Medicaid and CHIP PERM CAP
++ Monitoring Implementation Progress and Evaluating the Effectiveness of Each Corrective Action
++ CMS Approval, Revision, Disapproval, and Implementation of State-Specific PERM CAPs
++ Semi-Annual Reporting Requirements for States with an Eligibility Improper Payment Rate Above 3 Percent for Consecutive Cycles
- Program Integrity Corrective Action Plans
- Medicaid Fee-For-Service Overpayment Reporting (60-day rule)
- Medicaid and CHIP Managed Care Oversight Policies
++ Medicaid and CHIP Eligibility Determination Requirements for Beneficiary Residency and Death
++ Overpayments for Ineligible Enrollees
++ Working Families Tax Cut (WFTC) Legislation (Pub. L. 119–21) and Capitation Overpayments
++ Request for information regarding how to protect Medicaid payments from improper deductions

CMS is also proposing a number of provisions related to Medicaid and CHIP provider enrollment, which are addressed in the larger discussion of provider enrollment in section V. of this proposed rule.

B. State Payment Suspension Updates and Reporting Requirements

Sections 1903(i)(2) and 2107(e)(1) of the Act relate to limitations on payment. In 2010, section 6402(h)(2) of the Affordable Care Act (ACA) amended the Act to provide that State payments to a Medicaid provider under investigation for a credible allegation of fraud are not eligible for Federal matching funds unless a good cause exception is met. Specifically, section 1903(i)(2)(C) of the Act provides that Federal payment shall not be made with respect to any amount expended for items or services furnished ''by any individual or entity to whom the State has failed to suspend payments under the plan during any period when there is pending an investigation of a credible allegation of fraud against the individual or entity, *as determined by the State* [emphasis added] in accordance with regulations promulgated by the Secretary for purposes of section 1395y(o) [1862(o)] of this title and this subparagraph, unless the State determines in accordance with such regulations there is good cause not to suspend such payments[.]''

Our experience working on payment suspension matters has demonstrated to us that States often apply this important administrative tool inconsistently and frequently underutilize it. Although our existing regulations do establish certain ''floor'' requirements, we also recognize that States have varying standards and processes with their respective Medicaid Fraud Control Units (MFCUs) and other law enforcement partners, reflecting individual State policies on how payment suspensions are determined, applied, and maintained, as well as the applicability of these requirements to CHIP. Some of this variation is a feature rather than a flaw: it allows States to develop best practices tailored to their own legal and administrative environments, which can then be shared with and adapted by other States. States' legal frameworks differ and we expect and respect that variation; however, we believe that all States, pursuant to their statutory and regulatory program integrity oversight obligations, should be identifying and investigating credible allegations of fraud, making referrals to law enforcement, and issuing payment suspensions when appropriate to prevent inappropriate payments. CMS expects all States to design and execute payment suspension strategies adapted to that State's fraud risk profile; both the strategies and the risk profile generally will be fluid as fraud is rarely static by location, point in time, or any other factor as fraudsters attempt to leverage and exploit vulnerabilities and points of weakness wherever they discern them. Especially given that the target is ever evolving and the administration of the programs varies based on State laws and policies within Federal contours, our goal is not attaining inter-State uniformity (indeed, among our objectives is fostering and promoting effective creativity), but instead for each State to work within its own legal landscape to maximize the effectiveness of payment suspensions as an administrative tool. States must utilize payment suspensions when appropriate and should draw on the experience of States that have implemented them successfully. States should also ensure they have the funding, staffing, data analytics, and other support needed to identify potential fraud, issue payment suspensions, and make appropriate referrals to law enforcement when potential fraud is uncovered.

At the same time, we are mindful that the consequences of a payment suspension on a provider can be significant and may adversely affect business operations well before any allegation is resolved, and that sometimes what originate as genuine credible allegations ultimately may not be indicative of fraud, waste, or abuse. We recognize that the threshold for establishing a credible allegation of fraud is intentionally lower than the evidentiary standards required for a formal fraud finding, as it is a temporary intervention to stop payments from going out the door to a potentially fraudulent actor. A payment suspension imposed against a legitimate provider, even if only temporarily, can jeopardize that provider's viability and, in turn, disrupt beneficiary access to care, which might be most acutely felt in rural or underserved areas with few alternative providers. The current regulatory framework around good cause exceptions under § 455.23(e) and the additional proposals discussed in this section help ensure that payment suspensions remain a targeted, well-supported program integrity tool.

The following proposals outline how, consistent with statutory and regulatory authority, States may rely on other agencies for credible allegation of fraud determinations and for conducting investigations of such allegations, and the roles that CMS and law enforcement agencies play along with State Medicaid Agencies (SMAs) and CHIP agencies in determining when to issue and maintain payment suspensions.

Specifically, we propose that a State may choose to rely on credible allegation of fraud determination made by CMS or by other Federal agencies. These proposed changes would aim to streamline CMS', SMAs', and CHIP agencies' efforts to ensure Medicaid and CHIP integrity by allowing States to more quickly stop payments where a credible allegation of fraud exists. The regulatory proposals in this rule would be essential to help States quickly and correctly determine whether allegations of fraud are credible so that they could

rapidly stop payments to individuals and entities and in connection with schemes under investigation for credible allegations of fraud, thus protecting the financial integrity of the Medicaid and CHIP programs and Federal taxpayer dollars.

1. Allowing States To Rely on CMS or Other Federal Agencies' Credible Allegation of Fraud Determinations

Under current regulations at § 455.23(a), an SMA must suspend all Medicaid payments to a provider after the agency determines there is a credible allegation of fraud against such provider for which an investigation is pending, unless the agency has good cause to not suspend payments or to suspend payment only in part. When an investigation leads to the initiation of a payment suspension in whole or part, § 455.23(d) requires the SMA to also make a fraud referral to either the State's MFCU or, in States with no certified MFCU, to an appropriate law enforcement agency. If the MFCU, or law enforcement agency accepts the fraud referral for investigation, the payment suspension may continue until such time as the investigation and any associated enforcement proceedings are completed. There is a similarly defined path for a MFCU to refer a credible allegation of fraud for payment suspension to the SMA at § 1007.9(e). In CHIP, § 457.915 requires the CHIP agency to refer suspected fraud and abuse cases to the CHIP program integrity unit (if such a unit is established) and to appropriate law enforcement officials.

The current payment suspension regulatory framework has led to differing interpretations of what the statutory language ''as determined by the State'' in section 1903(i)(2)(C) of the Act requires of each State. This has led to variation as to what additional verification steps SMAs or CHIP agencies take when receiving referrals from outside sources, such as CMS or a Federal law enforcement agency, with States handling this process in different ways: some accept a referral as a credible allegation of fraud and immediately impose a payment suspension, while others independently determine the credibility of the allegation(s) before imposing a payment suspension. These divergent approaches create exploitable loopholes that bad actors may use to continue receiving Medicaid and CHIP payments and that make recoupment of improperly paid funds difficult. This is particularly problematic in those States that may not have the internal resources to independently investigate and establish a credible allegation of fraud in every instance. The longer payment suspensions are delayed, the greater the chance of payments continuing to flow to actors potentially defrauding the program.

To address these issues, we propose to add subparagraph § 455.23(a)(1)(i) to specify that a State may rely on a determination by CMS or any other Federal agency that a credible allegation of fraud exists for purposes of imposing a payment suspension and may rely on these agencies' investigations to satisfy the statutory requirement that there is pending an investigation of a credible allegation of fraud against an individual or entity. This would include, for example, investigations conducted by CMS or another Federal agency, such as the U.S. Department of Justice, U.S. Department of Health and Human Services Office of Inspector General (HHS–OIG), or the Department of Veterans Affairs. We believe this proposal would ease the burden on SMAs or CHIP agencies and reduce the time between when a credible allegation of fraud is referred and a payment suspension is implemented, translating into potential monetary savings for those States and for State and Federal taxpayers, as well as additional protections for those who could experience bodily or financial harm due to the possible underlying fraudulent activity. As stated under the proposed definition of credible allegation of fraud at § 455.2, a State may rely on such other agency determinations as a credible allegation of fraud unless the State has specific information indicating that reliance on the CMS or other agency determinations would be unreasonable under the circumstances. Thus, when accepting credible allegations of fraud from CMS or Federal agencies, SMAs and CHIP agencies may choose to adopt those agencies' determinations as their own.

2. Aligning Modifications to the Definition of Credible Allegation of Fraud

''Credible allegation of fraud'' is a statutory term as reflected in section 1903(i)(2)(C) of the Act. On February 2, 2011, CMS published a final rule with comment period (CMS–6028–FC) implementing the new Medicaid payment suspension requirements with an effective date of March 25, 2011. As part of that 2011 final rule, we declined to provide a more precise definition of the term, recognizing that different States may have different considerations in determining what may be a credible allegation of fraud. Instead, we specified at § 455.2 that a credible allegation of fraud may be an allegation verified by the State from any source, and that allegations are considered to be credible when they have an indicia of reliability and the State Medicaid agency has reviewed all allegations, facts, and evidence carefully and acts judiciously on a case-by-case basis. However, as discussed in III(B)(1) of this proposed rule, although the statutory language says that a credible allegation of fraud should be ''determined by the State,'' it is left to each State in accordance with the Secretary's regulations to decide what that determination must entail. Currently, § 455.2 states that a credible allegation of fraud may arise from sources like fraud hotline tips, claims data mining, or patterns identified through audits and investigations, with credibility established through a State's review for indicia of reliability. In cases where CMS or another Federal agency has already made a credible allegation of fraud determination, requiring the State to independently re-verify that determination is duplicative, time consuming, and oftentimes not necessary. Moreover, the current definition does not explicitly address whether a State may rely on a credible allegation of fraud determination or investigation by CMS or another Federal agency. Without an explicit basis for relying on another agency's determination, we understand that some States duplicate investigative work, delay action, or forgo payment suspensions even when a credible referral already exists. Therefore, we are proposing several changes to the definition of ''credible allegation of fraud'' at 455.2 to make the Medicaid payment suspension process more efficient and to provide States with clarity as to when the imposition of a payment suspension is appropriate.

First, we propose to revise the definition to explicitly recognize determinations from CMS or another Federal agency as a potential source of a credible allegation of fraud. We are not including State agencies within this new provision; the existing referral pathway at § 1007.9(e) already addresses this category of State-level finding and is not amended by this rule. We believe this proposal would give States a clearer, faster path to act on well-supported referrals from CMS and other Federal agencies, while leaving the established MFCU referral process undisturbed and without need for a conforming amendment to the MFCU regulations at 42 CFR part 1007.

Second, we are proposing to reorganize the language of the credible allegation of fraud definition at § 455.2 to alleviate duplicative effort that we

believe the phrase ''which has been verified by the State'' has caused. We propose that the definition instead provide that a credible allegation of fraud is an allegation that has indicia of reliability that may come from any source, including but not limited to fraud hotline tips verified by further evidence, claims data mining, patterns identified through provider audits, civil false claims cases, and law enforcement investigations, or a determination by CMS or by another Federal agency that an allegation of fraud against a provider is credible.

Third, we propose at § 455.2 that an allegation has indicia of reliability through one of two pathways, depending on its source. For allegations arising from fraud hotline tips, claims data mining, or patterns identified through audits, civil false claims cases, and law enforcement investigations, an allegation has indicia of reliability when the State Medicaid agency has reviewed all allegations, facts, and evidence carefully and acts judiciously on a case-by-case basis, consistent with the existing standard. For allegations based on a determination by CMS or another Federal agency, we propose that the State may adopt the referring agency's determination as its own without conducting an independent redetermination of credibility, unless the State has specific information indicating that reliance on the referring agency's determination would be unreasonable under the circumstances. We believe this presumption would appropriately reduce duplicative State effort while preserving a State's ability to decline reliance where it has a concrete basis to question the referring agency's determination.

We are not proposing to further define ''indicia of reliability'' in this rule. We have historically left this term undefined to preserve State flexibility to evaluate allegations according to the facts and circumstances presented, consistent with our approach in the 2011 final rule. We recognize, however, that the absence of further definition may create inconsistency across States in how allegations are evaluated, particularly as States begin to rely on determinations made by CMS or other Federal agencies under this proposal, where the referring agency's own application of ''indicia of reliability'' may not be transparent to the State relying on it. We solicit comments on the following questions:

- Should CMS further define ''indicia of reliability'' in regulation, and if so, what specific factors or criteria should that definition include?
- Would a non-exclusive list of factors, for example, the specificity of the allegation, the existence of corroborating documentation, the source's track record of reliability, or the existence of a related law enforcement referral provide useful guidance without unduly constraining State discretion on a case-by-case basis?
- Are there existing State-level frameworks for evaluating indicia of reliability that CMS should consider as models if it were to adopt further criteria in future rulemaking?
- What burden, if any, would a more detailed definition impose on States, and would that burden be offset by increased consistency?
- What additional internal controls, if any, States should be required to maintain to ensure that payment suspensions sustained under this provision are subject to adequate oversight, including the appropriate length of the law enforcement notice-and-objection period?

3. Maintaining a Medicaid and CHIP Payment Suspension During an Investigation

Currently, § 455.23(d)(4) directs that a payment suspension be discontinued if law enforcement declines the fraud referral, unless the SMA has alternative Federal or State authority to impose a suspension or make a referral to another law enforcement agency.

Payment suspensions are temporary measures, subject to defined procedural timeframes, and must be terminated upon specific triggering events specified at § 455.23(c) and (d), and through cross reference at § 457.935(b)(1). However, in practice CMS has observed that payment suspensions may be terminated prematurely, potentially causing at-risk funds to go unrecovered and taxpayer dollars to be lost. For instance, law enforcement agencies may decline State or Federal referrals for various reasons unrelated to the quality of the referral, such as personnel or other resource constraints or competing priorities. As the Medicaid payment suspension regulations currently stand, we did not directly account for the extent of resource constraints that law enforcement agencies may have in accepting a referral for investigation, nor the SMA resources it may take to refer a credible allegation of fraud to multiple agencies for an investigation to commence.

Therefore, we propose revising our regulations to specify that a SMA or CHIP agency may maintain a payment suspension when a credible allegation of fraud is present while the SMA or CHIP agency completes its own investigation, regardless of whether Federal or State law enforcement accepts the referral, if the SMA or CHIP agency documents in writing that the credible allegation of fraud remains under active investigation by the SMA or CHIP agency or by another State or Federal agency. We believe this proposal would appropriately preserve State flexibility to maintain suspensions in cases where the underlying credible allegation of fraud has not been resolved to ultimately determine whether payment should be made, or whether the provider's ability to bill the Medicaid or CHIP programs should be terminated. This would allow the SMA conducting the active investigation to act on its findings, such as by determining that a claim should be denied, that an overpayment exists and can therefore be recouped, or that a provider should be terminated.

However, we are mindful that Congress tied the payment suspension authority under sections 1903(i)(2)(C) and 2107(e)(1)(O) of the Act to the existence of a pending investigation of a credible allegation of fraud, and that the new authority provided by this regulation is not intended to function as an indefinite or open-ended tool. To ensure that a suspension maintained on this basis would remain pursuant to an active ongoing investigation, we are also proposing a requirement that the SMA or CHIP agency redetermine and document in writing, at least quarterly, whether the credible allegation of fraud continues to be under active investigation warranting continuation of the suspension. We propose that, where a Federal or State law enforcement agency accepted the referral and is conducting the investigation, prior to each quarterly redetermination taking effect, the SMA or CHIP agency notify the Federal or State law enforcement agency investigating the alleged fraud of its intent to continue or terminate the suspension, and afford that law enforcement agency the right to request that the payment suspension be kept (or terminated). Should the referring agency timely make such a request, the SMA or CHIP agency would consider the request in its decision to maintain or terminate the payment suspension for that quarter. This approach would give the referring law enforcement agency a direct and time-limited mechanism to provide the least interference with a law enforcement investigation or prosecution. Where no law enforcement agency accepted the referral and the SMA or CHIP agency is conducting its own investigation, its quarterly written redetermination alone would satisfy this

requirement. Furthermore, should an SMA or CHIP agency be unable to make a finding that there remains an active investigation at any such redetermination, we propose that it must immediately terminate the suspension. We believe this would ensure payment suspensions remain time-limited and subject to meaningful review while protecting Medicaid and CHIP dollars.

We note that this redetermination and termination authority would rest with the SMA and CHIP agency, and that their conclusions could sometimes diverge from those of the agency or agencies that referred the credible allegation of fraud in the first place. We have observed that defendants in Federal matters have, in some instances, cited a State's decision to decline to impose or its decision to subsequently terminate a payment suspension following a credible allegation of fraud referral as evidence that their conduct was believed to be permissible, potentially undermining an ongoing Federal investigation or prosecution involving substantially the same conduct. We encourage coordination between the SMA or/and CHIP agency, and the referring agency before a payment suspension maintained on the basis of that agency's referral is terminated. This would not give the referring agency veto power over the redetermination of a payment suspension at an SMA or CHIP agency, but, instead, would ensure the referring agency would have notice and a meaningful opportunity to share relevant information. For example, a law enforcement agency could share that a matter remains under active investigation and that terminating a payment suspension could adversely affect a related enforcement proceeding.

4. Verifying Good Cause Exceptions to Payment Suspension Requirements

Sections 455.23(e) and (f) currently specify bases for good cause exceptions to payment suspensions. In our experience, good cause exceptions are often invoked when a MFCU or other law enforcement agency requests that a payment suspension not be imposed to prevent a provider from being made aware they are under investigation, which could jeopardize a civil or criminal case and possibly even the safety of the law enforcement officials conducting an investigation. Though that is a laudable and important goal, in recent years we have seen instances in which States seem to invoke good cause exceptions to avoid imposing payment suspensions for other reasons that do not meet the criteria outlined at § 455.23(e)(1). For example, CMS believes that some States may use the (e)(1) clause to avoid provider abrasion (that is, friction, frustration, and administrative stress) to retain providers within the State's Medicaid and/or CHIP network. Other States may want to avoid the administrative burden of implementing a payment suspension or the subsequent litigation risk inherent when payment is paused.

Data analysis bolsters our belief that States are over-relying on exercising § 455.23(e) and (f) payment suspension good cause exceptions. In CY 2025, for example, approximately 75 percent of credible allegation of fraud cases reported to CMS pursuant to State Medicaid payment suspension reporting requirements at § 455.23(g)(3) did not proceed to a payment suspension because an SMA invoked a good cause exception. Good cause exceptions have a legitimate place in payment suspension decision-making, but States should not use them as a blanket policy to reduce litigation risk or avoid their administrative responsibilities. Similarly, we encourage States to provide the most accurate good cause exception reasons and not solely rely—potentially inaccurately—on law enforcement exceptions. And while we expect variability among States, State-reported data revealed that several States had over 90 percent of their potential payment suspensions end with the exercise of a good cause exception, with some States exercising hundreds of good cause exceptions while instituting only a handful of payment suspensions. Such outlier scenarios potentially could be explained in very limited situations by events such as large law enforcement take-down operations in a State, but in no event should they, as we have seen, recur year-over-year. Instead, such patterns warrant our exercising additional oversight to ensure good cause exceptions are applied in accordance with regulatory requirements.

To address this concern, we propose to require additional verifications as to whether the exercise of a good cause exception is appropriate. Specifically, we propose to modify § 455.23(e) to require States to evaluate, and document in writing, that the specific criteria for the exception invoked have been met in each instance. Further, we propose to modify § 455.23(e)(1) to require States to verify the reasons for good cause exceptions with law enforcement and send CMS the basis for each invocation of a good cause exception. Good cause exceptions must be invoked on a case-by-case basis, and SMAs and CHIP agencies must affirmatively verify with the relevant law enforcement agency that the exception is warranted for each individual case. A general or standing request from a law enforcement agency would be insufficient to satisfy this requirement.

We would not intend for this provision, if finalized as proposed, to serve as a categorical bar to good cause exceptions in all cases involving an active law enforcement investigation, nor would we expect SMAs or CHIP agencies to receive or ask for confidential, privileged, or legally protected information from law enforcement. But we would expect the case-specific merits for a good cause exception to be reviewed, confirmed or denied, and communicated by the MFCU or other law enforcement agency to the SMA or CHIP agency. At a minimum, the shared Federal and State goals—and, we believe, universally shared goals—should be to ensure that fraudulent providers are not inappropriately paid, while being circumspect and prudent with exercising authorities to best ensure legitimate providers are not inadvertently ensnared.

5. Updating Payment Suspension Reporting Requirements

Under our current regulations at § 455.23(g)(3), States are required to annually report to CMS summary information on the State's payment suspensions, including the nature of the suspected fraud, the basis for suspension, and the outcome of the suspension. In the 2011 regulation update of the Medicaid payment suspension regulations, we contemplated balancing SMA burden and transparency as they determine whether to implement payment suspensions. At that time, we did not believe it would be necessary to review information on individual payment suspensions by a State with any regularity, and that an annual cadence would allow sufficient oversight over States' payment suspension activities. As discussed previously, however, we have observed over the past several years significant inconsistencies between States, and sometimes within each State over time, in payment suspension utilization. We understand and expect a degree of variability among States as this is a State-implemented program and States vary in program integrity risk profiles, but also expect a consistent level of due diligence in ensuring payments are made appropriately and that inappropriate payments are avoided. Important in that calculus, technological advancements

over the past decade—including greatly improved data analytics yielding the ability to act on data in near-real time—have altered how businesses and governments run and make more regular reporting more feasible without commensurate burden.

We therefore propose to update § 455.23(g) reporting requirements to increase the reporting cadence from annual to quarterly, and to remove the word ''summary'' from the description of information to accommodate the increased detail that States would need to report to CMS. As we encourage States to appropriately utilize payment suspensions to halt potentially fraudulent payments, we strive for closer-to-real-time data and analytics on how those decisions are being made. As part of our oversight duties, if finalized as proposed, we would utilize this data to foster deeper discussions within SMAs and CHIP agencies on potential payment suspensions, and provide technical assistance and guidance, when requested or needed. We believe that more frequent reporting of payment suspension data would help States use this tool more effectively and obtain the necessary guidance from CMS.

We also believe that more frequent reporting would enable CMS to compile and analyze program-wide data on payment suspension activity within and across States more effectively. This information would be used to identify systemic trends and patterns in the use of payment suspensions as a program integrity tool. Similar to how we use the data today, should our proposals be finalized as proposed, we would use this data to assess whether States are maintaining effective processes for evaluating credible allegations of fraud and making timely suspension decisions consistent with the proposed updates in §§ 455.23 and 457.935(b)(8), to inform CMS' State auditing activities, and to support aggregate reporting on Medicaid and CHIP program integrity outcomes. More frequent State reporting would also enable CMS to provide States more timely technical assistance to address any inconsistencies or other concerns.

We do not believe that more frequent reporting of this information would be substantially more burdensome to States than their current data sharing. For example, much of the data that States currently share annually with CMS already is shared quarterly, and perhaps even more frequently, between SMAs and their MFCUs through States' existing case tracking systems. In fact, § 1007.9(h) already requires MFCUs to send certain information regarding payment suspensions to SMAs, which the SMA must request quarterly per § 455.23(d)(3)(ii). Accordingly, we believe that any additional burden on States to supply such information to CMS would be nearly negligible. Similarly, while we expect that the shift to quarterly reporting would modestly increase CMS' administrative burden, we believe this increase would be negligible relative to our existing oversight infrastructure and be offset by the program integrity benefits of more timely reporting.

The proposed enhanced reporting requirements would not be intended to enable CMS to substitute its judgment for that of the State in individual cases, nor would they expand CMS' authority by permitting enforcement action based solely on disagreement with a State's individual suspension determination. Rather, CMS would use the reporting data to identify potential systemic deficiencies in a State's program integrity processes, which then could be examined through additional oversight activities, such as audits, and addressed through technical assistance or existing enforcement mechanisms, including deferral and disallowance of Federal Financial Participation (FFP) under §§ 430.40, 430.42, and 457.628(a), where appropriate.

We also propose a technical edit to update the title of § 455.23(g) to include reporting, to more accurately reflect all the subparagraphs.

6. Applicability to CHIP

Current regulations at § 438.608(a)(8) require that Medicaid managed care contracts include a provision for the suspension of payments to a network provider when the State determines there is a credible allegation of fraud, in accordance with § 455.23. Through the cross-reference at § 457.1285, we note that the requirements in § 455.23 are already applicable to CHIP managed care organizations (MCOs), prepaid inpatient health plans (PIHPs), and prepaid ambulatory health plans (PAHPs). Accordingly, any finalized provisions to § 455.23 would also apply to CHIP MCOs, PIHPs, and PAHPs.

However, we are concerned that the existing regulatory framework does not fully address payment suspensions in the CHIP fee-for-service (FFS) context. We therefore propose to update § 457.935(b) to include a cross-reference to § 455.23. This change would ensure that standalone CHIP programs would be held to the same standards as Medicaid MCOs, PIHPs, PAHPs, and FFS. We believe that including the cross-reference to § 455.23 would close potential program integrity gaps in the CHIP program and support stronger, more consistent program administration.

We seek comments on whether the proposed update to § 457.935(b) and current cross-references to § 455.23 provide sufficient clarity regarding the applicability of payment suspension requirements to CHIP. We also seek comments on whether additional regulatory text or cross-references would be needed to ensure that State CHIP agencies and their managed care partners have clear and actionable guidance on implementing these requirements.

C. Enhanced Electronic Visit Verification (EVV) Requirements

Personal care services (PCS) and home health care services (HHCS) that are delivered during an in-home visit are particularly vulnerable to fraud, waste, and abuse due to the limited direct oversight of services furnished in beneficiaries' homes. PCS are services that support beneficiaries with Activities of Daily Living (ADLs) and Instrumental Activities of Daily Living (IADLs) and generally include, but are not limited to, meal preparation, grooming, dressing, and bathing.[8] [9] PCS can be agency-based or self-directed. Under agency-based models, a personal care agency provides oversight, management, and supervision of a beneficiary's PCS. By contrast, self-directed PCS allows individuals, or their representatives, to exercise decision-making authority in the planning, accessing, managing, and purchasing of their PCS with available necessary supports and subject to applicable State oversight requirements, including, as applicable, the requirements specified at §§ 441.464 and 441.585(a).[10] Regardless of the PCS delivery model, the SMA is responsible for monitoring the quality of services.

PCS fraud and abuse schemes have been well documented in Federal oversight actions and prosecutions. Common PCS fraud and abuse schemes include personal care attendants (PCAs) billing for services not rendered, billing for excessive units, and billing for medically unnecessary services. In FY 2025, MFCUs reported 326 PCA fraud convictions, significantly higher than any other provider type.[11] PCS fraud and abuse leaves beneficiaries at risk for harm and neglect, and in severe cases

[8] § 440.167.

[9] The definition of PCS and the specific services covered vary depending on the applicable Medicaid authority.

[10] §§ 441.450 and 441.505.

[11] OEI–09–26–00140, Medicaid Fraud Control Units Annual Report: Fiscal Year 2025.

has resulted in hospitalizations and deaths.

HHCS include, at a minimum, nursing services; home health aide services; and medical supplies, equipment, and appliances. At a State's option, HHCS can include physical therapy, occupational therapy, and speech pathology and audiology services. HHCS is a mandatory State plan benefit for specified individuals under section 1902(a)(10)(D) of the Act and is described in section 1905(a)(7) of the Act. Under specific circumstances, HHCS may also be provided under a waiver of the plan. HHCS are generally susceptible to many of the same fraud and abuse schemes as PCS, including but not limited to providers billing for services not rendered, excessive units, or medically unnecessary services, and services provided by unqualified providers.[12] Like PCS, HHCS fraud and abuse can result in significant harm to beneficiaries.

In CY 2023, home and community-based services (HCBS) accounted for 63.8 percent of total Medicaid long-term services and supports (LTSS) expenditures.[13] Individuals who receive HCBS have significantly lower average expenditures than individuals who receive institutional care, but PCS and HHCS represent a substantial and growing share of HBCS spending.[14] Of the $145.9 billion in total HCBS expenditures in 2023, PCS spending totaled at least $36.1 billion and HHCS at least $6.9 billion.[15] When utilized and delivered appropriately, these services provide important supports that allow individuals to remain in home and community settings. However, they also present unique program integrity challenges because services are furnished in locations allowing for limited, if any, direct oversight.

EVV is a system used for in-home services, including PCS and HHCS, to electronically verify the service type, service recipient, date, location, provider, and service start and end time. Congress enacted EVV requirements in section 12006(a) of the 21st Century Cures Act, which added section 1903(l) of the Act, requiring States to implement an EVV system for Medicaid PCS and HHCS requiring an in-home visit by a provider. The requirements were established, in part, to reduce fraud, waste, and abuse in PCS and HHCS by increasing States' ability to validate that services are provided and monitor the accuracy of payments to providers.[16] States were generally required to have an EVV system in place for PCS by January 1, 2020, and for HHCS by January 1, 2023. States are subject to incremental FMAP reductions of up to 1 percent for failing to comply with these requirements by the applicable deadlines.[17]

States' EVV systems are required to electronically verify the following data elements for in-home PCS and HHCS visits: (1) the type of service performed; (2) the individual receiving the service; (3) the date of service; (4) the location of service delivery; (5) the individual providing the service; and (6) the time the service begins and ends.[18] Section 1903(l) of the Act does not require States to use a particular type of EVV system, affording States significant discretion in their EVV design and operation. There is also no statutory requirement for States to use global positioning system (GPS) data with respect to their EVV systems, and States are required only to collect the location of service delivery and the time the service begins and ends. States may, however, elect to collect additional information to mitigate fraud, waste, and abuse.[19]

Today, States routinely collect EVV data elements as part of program operations. However, as one commenter stated in response to the 2026 CRUSH RFI, there is currently a gap between the technical infrastructure—the EVV system—and its effective use for program integrity. The statute required that by not later than January 1, 2018, the Secretary collect and disseminate to SMAs best practices regarding the operation of EVV systems and the prevention of fraud with respect to the provision of PCS or HHCS.[20] State best practices for improved PCS and HHCS oversight include integrating EVV systems with other Medicaid systems, such as the State's Medicaid Management Information System (MMIS), Eligibility and Enrollment System (E&E), and Financial Management Systems (FMS), and conducting prepayment reviews of PCS and HHCS claims against EVV data.[21] By integrating EVV systems with claims processing systems, States can automatically compare claims with EVV data and prevent payments for PCS and HHCS claims that do not have matching EVV records. Additionally, some States have expanded EVV requirements to other in-home services beyond just PCS and HHCS.

Although CMS has published guidance on how States can use EVV to enhance quality monitoring and oversight of Medicaid services,[22] [23] neither the statute nor current regulations establish EVV-specific requirements regarding the use of EVV records in claims review or program integrity activities.[24] In this proposed rule, we propose two related but distinct regulatory changes to require SMAs to use collected EVV data for program integrity and payment oversight. First, we propose to amend § 455.14 to require that SMAs incorporate a review of EVV records as part of preliminary investigations into potential Medicaid fraud or abuse involving in-home service providers subject to EVV requirements in a State. Accordingly, this requirement would apply to Medicaid providers furnishing services subject to Federal EVV requirements, as well as those subject to State

requirements that extend EVV requirements to additional Medicaid services. Second, we propose to amend § 447.45(f)(1) to require that SMAs verify that billed Medicaid services are supported by EVV records, where applicable under Federal or State requirements, during prepayment claims review. Together, these proposals are intended to maximize States' existing EVV systems for improved program integrity oversight and better position States to crush Medicaid fraud and abuse within high-risk services.

1. Use of EVV Data in Preliminary Investigations

In accordance with § 455.14, when a SMA receives a complaint of potential Medicaid fraud or abuse from any source or identifies any questionable practices, it must conduct a preliminary investigation to determine whether the complaint warrants a full investigation. States currently have broad flexibility in establishing procedures for preliminary investigations, including for those investigations conducted by managed care plans.[25]

When a State receives an allegation or complaint of potential Medicaid fraud, the State should review all allegations, facts, and evidence carefully to determine their validity; act on a case-by-case basis; and consider the totality of the facts and circumstances associated with any allegation.[26] In accordance with § 455.15, should a State believe that an incident of provider fraud or abuse has occurred based on the findings of a preliminary investigation, it is required to refer the case of suspected fraud or abuse to the State's MFCU for investigation, except in limited cases where no referral to the MFCU is required, in which case the State must conduct a full investigation or refer the case to the appropriate law enforcement agency.[27] [28] As discussed previously, States must also suspend payments to a provider after the SMA determines that a credible allegation of fraud exists, unless good cause not to suspend or to suspend only in part exists.[29]

We propose to amend § 455.14 to require that SMAs incorporate a review of EVV records, where EVV use is required with respect to the underlying Medicaid service(s) in question under applicable Federal or State requirements, as part of preliminary investigations into potential Medicaid fraud or abuse. Specifically, we propose at new § 455.14(a)(1) that States be required to review and analyze the associated EVV records to attempt to verify the validity of an allegation of fraud or abuse or any identified questionable practice(s). This requirement would apply to any preliminary investigations of allegations of Medicaid fraud or abuse involving Medicaid services subject to EVV requirements under Federal or State requirements and the related providers suspected of such fraud or abuse.

The primary goal of this proposal would be to ensure that SMAs analyze and compare EVV records and claims to identify any discrepancies that warrant further investigation of providers subject to EVV requirements with fraud or abuse allegations or identified questionable practices. For example, during a preliminary investigation of an applicable provider, the SMA would be expected to review a sample of the provider's EVV records for the period under investigation to attempt to verify that services were delivered as billed, including for the appropriate duration and at the appropriate location, or determine if a full investigation pursuant to § 455.15 was warranted. This proposal seeks to enhance State identification and oversight of fraudulent and abusive activities by in-home service providers, including billing simultaneously for two beneficiaries in different locations, billing for improbably large volumes of services, and billing for services on the same day that would be geographically impossible to perform.[30] [31] [32]

We seek comments on this proposal, including on whether the proposed requirement should extend to investigations conducted by managed care plans under State managed care contracts and what operational steps States would need to take to integrate EVV record review into existing preliminary investigation procedures.

2. EVV Data in Prepayment Claims Review

Section 1902(a)(37)(B) of the Act requires States to have procedures for prepayment and post-payment claims review to ensure the proper and efficient payment of claims and management of the program. Regulations at 42 CFR 447.45 implement this statutory requirement. In accordance with § 447.45(f)(1), SMAs are currently required to conduct prepayment reviews for all claims consisting of: (1) verification of beneficiary and provider eligibility; (2) checks that services delivered are consistent with beneficiary characteristics and circumstances; (3) verification that the claim does not duplicate or conflict with other claims; (4) verification that payment does not exceed State plan payment rates or limits; and (5) checks for third party liability.

We propose to amend § 447.45 by adding § 447.45(f)(1)(vi) to require that SMAs verify, during prepayment review, that billed in-home Medicaid services subject to Federal or State EVV requirements are supported by an EVV record, where applicable. Specifically, we propose that for home-based services subject to the requirements of section 1903(l) of the Act, and additional Medicaid services that the State independently subjects to EVV requirements, States verify during prepayment claims review that the following data elements are supported by an EVV record: (1) the type of service performed; (2) the individual receiving the service; (3) the date of service; (4) the location of service delivery; (5) the individual providing the service; and (6) the time the service begins and ends.

With this proposal to require that States use EVV data to verify applicable service claims during prepayment review prior to payment, we aim to encourage States to begin applying automated prepayment claims edits that take into consideration EVV data to stop inappropriate payments on the front-end, an approach we have long labeled ''cost avoidance'' and that is far more effective than ''pay and chase.'' We believe this proposal, if finalized as proposed, would ensure States address Medicaid fraud in some of the highest risk services areas using technology, data analytics, and automated systems. We also believe this proposal is consistent with States' existing obligations under section 1902(a)(37) of the Act to maintain procedures for prepayment claims review to ensure the proper and efficient payment of claims. We also note that this proposal would

complement our proposed amendment to § 455.14 described earlier in this proposed rule, as well as our proposal to require consistent use of NPIs for eligible Medicaid providers described in section E of this proposed rule. Together, these proposals, if finalized as proposed, would create a more integrated and effective framework for program integrity oversight of home-based services.

CMS would not condition claiming for FFP for EVV-required services on compliance with this provision. However, evidence of noncompliance (for example, as identified in a CMS audit) could cause CMS to reassess a State's compliance determination related to Section 1903(l) of the Act (as added by Section 12006 of the 21st Century Cures Act), which could result in FMAP reductions until compliance was achieved. Under section 1903(l) of the Act, States were required to attest that EVV use was required for all Medicaid-funded PCS (for calendar quarters beginning in 2020) and HHCS (for calendar quarters beginning in 2023) or otherwise be subject to FMAP reductions up to 1 percent. Although section 1903(l) does not specifically require EVV as a prepayment condition, substantive evidence that a State's claims for EVV-required services were not supported by EVV records could indicate that the State was not sufficiently requiring EVV use for those services. Similarly, CMS could take compliance with this provision into account during the certification process for States requesting enhanced FFP for their EVV systems.[33]

We seek comments on this proposal, including on the operational feasibility of requiring EVV-based prepayment review for all Medicaid service claims subject to Federal or State EVV requirements, whether States would need a transition period before this requirement could take effect, and whether there could be circumstances in which an EVV record might not be available for a legitimate claim, and how States should handle such situations.

Additionally, we acknowledge that, because the prepayment and post-payment review requirements in § 447.45 do not apply to risk-based managed care plans (as there is no cross-reference to § 447.45(f) in § 447.46(c)), the proposals in this section would only apply to Medicaid FFS; however, we are considering extending this proposed requirement to Medicaid managed care as a part of this rulemaking and explicitly seek comments on this approach. Applying this proposed requirement to managed care would necessarily require first extending the established prepayment and post-payment claims review requirements at § 447.45(f) to MCOs, PIHPs, and PAHPs. We believe that many plans already use prepayment and post-payment processes as a part of their program integrity framework, and we request public comment on the feasibility of applying prepayment and post-payment claims review, and in turn the EVV prepayment requirements, to risk-based managed care.

D. Requiring National Provider Identifiers (NPIs) for Eligible Medicaid and CHIP Provider Types

We propose to revise § 455.440 to establish broader requirements for States to collect, maintain, and use NPIs for eligible Medicaid and CHIP providers. We would retain, without substantive change, the existing requirement that claims for ordered or referred items and services contain the NPI of the physician or other professional who ordered or referred those items or services, and designate that requirement as paragraph (a). We propose to add paragraphs (b) through (d) to establish the broader NPI requirements described below. Under § 457.990(b), the requirements of part 455, subpart E, including § 455.440, apply to separate CHIP programs in the same manner as they apply to Medicaid. Accordingly, the proposed requirements would apply to separate CHIP programs through that existing cross-reference.

Effective provider identification is foundational to Medicaid and CHIP provider enrollment, screening, ownership, and disclosure review; claims oversight; managed care oversight; auditing; reporting; and other program integrity activities. The Department adopted the NPI as the standard unique health care provider identifier under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) Administrative Simplification provisions.[34] The NPI final rule (69 FR 3434) established the NPI as the standard unique identifier for health care providers and recognized that NPIs may be used for numerous provider identification purposes, including provider enrollment systems, fraud and abuse files and other program integrity functions, and debt collection activities. The NPI was developed in part to address longstanding challenges associated with multiple provider identifiers. Prior to implementation of the NPI, providers often maintained different identifiers across health plans, programs, and administrative systems. The NPI established a nationally standardized identifier capable of supporting provider identification across operational and administrative functions.

Although NPIs are widely used throughout the health care system, CMS has observed significant variation in how provider identifiers are collected, maintained, and used within Medicaid programs, and has determined that broader and more consistent use of NPIs would strengthen States' ability to carry out their program integrity responsibilities. Under current Medicaid program requirements, however, States are not required to collect, maintain, or use NPIs consistently across all Medicaid systems and activities. As such, the same provider may be identified differently across a State's provider enrollment system, claims processing system, managed care oversight system, and program integrity system, which can lead to difficulties identifying providers in Federal reporting systems, such as the Data Exchange System (DEX). For example, a PCA who is not required to have an NPI may be assigned different State or system-specific identifiers across these systems; may be identified individually in one system but associated with an employing agency or fiscal intermediary in another; or may have variations in recorded information such as name, address, or provider type. These State inconsistencies create meaningful vulnerabilities in program oversight on both State and Federal levels. For example, providers operating across State lines may maintain multiple identifiers, making it more difficult to detect billing for overlapping shifts or other suspicious billing patterns across programs. Reliable provider identification is particularly important for providers furnishing services in home- and community-based settings, where direct oversight is limited and fraud risk is elevated.[35]

These inconsistencies also reduce the usefulness of data reported to CMS under § 455.17, limit cross-State

[33] *https://cmsgov.github.io/CMCS-DSG-DSS-Certification/Outcomes%20and%20Metrics/Electronic%20Visit%20Verification%20(EVV)/.*

[34] 45 CFR part 162, subpart D; HIPAA Administrative Simplification: Standard Unique Health Identifier for Health Care Providers, 69 FR 3434 (January 23, 2004).

[35] CMS has previously clarified that Medicaid PCAs who qualify as health care providers under applicable Federal regulations may obtain NPIs, and that a unique numeric identifier, such as the NPI, is an efficient mechanism for electronically recording which individual furnished services to a specific beneficiary. Medicaid and CHIP FAQs: Allowability of Using National Provider Identifiers (NPIs) for Medicaid Personal Care Attendants (PCAs).

matching efforts, and complicate CMS' ability to conduct national trend analysis and identify emerging fraud schemes. Program integrity professionals often use proactive data models to identify suspicious billing patterns, such as payment outliers, or to identify potential networks of fraudulent providers, but the accuracy of these analytics depends on consistent use of uniform metrics, including NPIs, and the absence of standardized provider identifiers limits CMS' and States' ability to effectively conduct this kind of analysis. Consistent use of NPIs enables States and national data aggregators, such as the Healthcare Fraud Prevention Partnership, to more accurately identify suspect providers across payors, programs, and States. Requiring consistent NPI use may also simplify States' screening of exclusion and termination lists maintained by the HHS–OIG and other oversight entities, improving States' ability to identify and act on adverse provider actions across programs. Additionally, requiring States to collect and use NPIs for all Medicaid and CHIP providers eligible to obtain an NPI would strengthen oversight of many high-risk service areas and better position States to use EVV data effectively for program integrity purposes, as discussed further in section C of this proposed rule. We believe these policies are necessary to strengthen program integrity, improve data quality and information sharing, support more effective data analytics, and promote the proper and efficient administration of State Medicaid programs under section 1902(a)(4) of the Act. Applying the proposed NPI requirements to CHIP through § 457.990(b) would similarly support consistent provider identification and program integrity oversight in separate CHIP programs.

Accordingly, we propose at § 455.440(b) through (d) to require States to collect, maintain, and use NPIs for all Medicaid and CHIP providers that are eligible to obtain an NPI under applicable Federal law and regulations. Specifically, under this proposal, States would be required to collect, maintain, and use NPIs as part of Medicaid and CHIP provider enrollment, revalidation, claims processing, managed care oversight, program integrity, and reporting activities for all providers eligible to obtain an NPI as a covered health care provider under 45 CFR part 162. As it relates to managed care oversight under 42 CFR part 438, we believe that States should ensure MCPs include applicable NPIs in any data, reporting, or other elements needed for effective oversight of MCPs. Such consistency in NPI use across Medicaid fee-for-service, managed care, and CHIP programs would allow States and CMS to conduct comprehensive and consistent data analytics and oversight.

We recognize that not all providers enrolled in Medicaid or CHIP are eligible to obtain NPIs under applicable Federal law. Eligibility for NPI enumeration is governed by the HIPAA Administrative Simplification regulations, including the definition of ''health care provider'' at 45 CFR 160.103, as discussed in the NPI final rule (69 FR 3436 through 3441, and 3466). Our proposal would not modify those existing eligibility requirements. Accordingly, some individuals or entities furnishing Medicaid and CHIP services, including certain PCAs and other non-traditional provider types, may not qualify as covered health care providers under 45 CFR 160.103 and therefore, may not be eligible for NPI enumeration. For those entities and individuals, we continue to strongly encourage as a best practice that States maintain another unique identifier capable of supporting enrollment, screening, claims oversight, reporting, and program integrity activities. Regardless of NPI eligibility, CMS encourages States to maintain a unique identifier for every provider enrolled in their Medicaid program, and we may consider proposing a formal requirement in future rulemaking as we gather more information through this comment process.

We seek comments on these proposals, including on the operational feasibility of requiring consistent NPI use across all Medicaid and CHIP systems, the timeframe States would need to come into compliance, and any challenges States anticipate in implementing these requirements for specific provider types. In the absence of comprehensive national data identifying the number and characteristics of all providers that would be newly affected by these proposed requirements, we use PCAs as a reasonable proxy when estimating the potential administrative and financial burden associated with obtaining an NPI and completing related provider enrollment activities. We also seek comment on whether PCAs are an appropriate proxy for these estimates.

E. Updating State Program Integrity Reporting Requirements

States currently report certain provider fraud and abuse information to CMS pursuant to § 455.17. These reporting requirements were established in a January 27, 1983 final rule (48 FR 3742) (hereinafter referred to as the January 1983 final rule) and designed primarily to capture basic information regarding provider fraud and abuse investigations. The authority to collect this information expired in 1986, and following that expiration, CMS did not collect the information from States under § 455.17. While these reporting requirements may have provided useful information to CMS and its oversight partners, they have not been updated to reflect significant changes in the law and regulatory landscape. They were, for example, developed decades before the 2006 enactment of the Medicaid Integrity Program at section 1936 of the Act, which significantly bolstered our development of nationwide Medicaid program integrity efforts, and before the widespread use of modern data analytics, cross-State information sharing, managed care program integrity activities, and many current fraud detection techniques.

Under the existing requirements at § 455.17(a), States are required to report to CMS the number of fraud and abuse complaints that warrant preliminary investigation. Under § 455.17(b), for each case of suspected provider fraud and abuse that warrants a full investigation, States are required to report the: (1) provider's name and number; (2) source of the complaint; (3) type of provider; (4) nature of the complaint; (5) approximate range of dollars involved; and (6) legal and administrative disposition of the case, including actions taken by law enforcement. Consistent with the January 1983 final rule, these reporting requirements have applied only to suspected provider fraud and abuse cases and have not extended to suspected beneficiary fraud cases.

These requirements have provided a foundation for Medicaid program integrity reporting for over 40 years, but CMS has determined that they no longer provide the level of detail necessary to support effective national oversight or provide CMS with sufficient information to hold States accountable for lacking program integrity operations. Specifically, existing reporting requirements do not consistently provide information necessary to support national trend analysis, identify emerging fraud schemes, evaluate investigative outcomes, or coordinate oversight activities among Federal and State partners. CMS, SMAs, MFCUs, Unified Program Integrity Contractors, managed care plans, and law enforcement entities routinely coordinate activities involving provider investigations and administrative actions, and more detailed and

standardized reporting would meaningfully strengthen those efforts. Modern data analytic systems also allow us to rapidly ingest and synthesize vast amounts of data and information, and in near-real time convert that to actionable intelligence.

We have also identified specific data gaps in existing reporting that limit its usefulness for program integrity purposes. The current language at § 455.17 only requires States to report on the six data elements enumerated earlier in this proposed rule. The prior reporting requirement did not consistently capture provider identifiers in a standardized format, limiting CMS' ability to cross-reference reported cases against other data sources or match investigation records across States and programs. It also does not capture the estimated or final overpayment amounts associated with investigated cases, limiting CMS' ability to evaluate the financial impact of fraud and abuse activity or assess the effectiveness of State investigative efforts. Finally, the prior reporting requirement does not capture administrative actions taken by SMAs (such as provider terminations, payment suspensions, and overpayment recovery actions) separately from law enforcement dispositions, limiting CMS' visibility into the full range of program integrity actions States are taking in response to identified fraud and abuse.

To address these issues, we propose to revise § 455.17 to modernize Medicaid fraud and abuse reporting requirements and improve the usefulness of information reported to CMS. Consistent with the existing scope of § 455.17, these proposed revisions would apply only to suspected provider fraud and abuse cases and would not extend reporting requirements to beneficiary fraud and abuse cases. Specifically, we propose to amend § 455.17(b) to require States to report the following data elements for cases of suspected provider fraud and abuse that warranted a full investigation, the: (1) provider's name; (2) provider's NPI or Medicaid provider identification number if the provider is ineligible to receive an NPI under applicable Federal law; (3) provider's Employer Identification Number or Taxpayer Identification Number (EIN/TIN), if available; (4) State in which the investigation is being conducted; (5) source of the complaint; (6) type of provider; (7) type of service involved; (8) nature of the complaint; (9) payor (for example, Medicaid fee-for-service or managed care); (10) relevant claim dates; (11) approximate time period covered by the investigation; (12) estimated overpayment amount; (13) final over payment amount where a final determination has been made; (14) investigation status; and (15) legal and administrative disposition of the case, including actions taken by law enforcement and administrative actions taken by the State Medicaid agency, such as provider termination, payment suspension (including good cause exceptions identified under § 455.23), and overpayment recovery status.

We also propose to renumber the existing § 455.17(b)(6) and expand is scope to include additional reporting options to expand the reporting options for include the disposition of the case to include administrative actions taken by the SMA, including provider termination, payment suspension (including good cause exceptions identified under § 455.23), and overpayment recovery status, in addition to the existing requirement to report actions taken by law enforcement.

We believe these changes would meaningfully improve CMS' nationwide visibility into program integrity activities, facilitate trend analysis, improve coordination among Federal and State oversight entities, and support evaluation of program integrity outcomes. We also believe these enhanced reporting requirements would strengthen States' ability to meet their responsibilities relating to fraud and abuse reporting, oversight, and data analysis under section 1902(a)(64) of the Act. We also specifically seek comment on the operational feasibility of the proposed data elements, whether additional data elements should be included, and the timeframe States would need to come into compliance with the revised reporting requirements.

F. Deregulation of the Medicaid Eligibility Quality Control (MEQC) Program

On July 5, 2017, we published a final regulation entitled Changes to the Payment Error Rate Measurement (PERM) and Medicaid Eligibility Quality Control (MEQC) Programs (82 FR 31158). This final rule updated the PERM and MEQC programs based on the changes to Medicaid and CHIP eligibility requirements under the Affordable Care Act. Those regulations restructured the MEQC program into an ongoing series of pilots that States are required to conduct during the two off years between triennial PERM review years, aiming to reduce repeat errors during the next PERM review.[36] The restructured MEQC program was designed to complement the PERM program by giving States [37] an opportunity to improve the quality, accuracy, and timeliness of their Medicaid and CHIP eligibility determinations before their next PERM measurement, helping ensure they make accurate and timely eligibility determinations so that Medicaid and CHIP services are appropriately provided to eligible individuals. States can use the MEQC pilots to address error-prone areas identified during past PERM reviews and prepare for upcoming triennial PERM reviews, but, importantly, MEQC requires States to conduct reviews of negative Medicaid and CHIP eligibility determinations (individuals denied or terminated from Medicaid and CHIP) whereas PERM reviews only paid claims related to active cases (individuals eligible for and enrolled in Medicaid and CHIP). During the States' MEQC review year, States are required to review at least 400 active cases and a minimum of 200 Medicaid and 200 CHIP negative cases, with flexibility to focus on vulnerable or error-prone areas. This approach allows States to assess the complete enrollment process to determine if any terminations or denials were improper.

CMS oversees the MEQC program and ensures that States implement its requirements specified at § 431.800 through § 431.820. Following the conclusion of the pilot, States must submit to CMS detailed case-level reports on the case review findings and a CAP to address all the identified errors and deficiencies. The MEQC pilots do not generate an eligibility improper payment rate, but instead allow States to implement corrective actions before their next PERM eligibility improper payment rate measurement.[38] In addition, under current regulations, participation in and compliance with the MEQC program is required for a State to qualify for a good faith waiver

[36] Under the PERM requirements at 42 CFR 431 Subpart Q, the PERM program annually measures the national Medicaid and CHIP improper payment rates using a 17-State 3-year rotation process. The national Medicaid improper payment rate includes findings from the most recent three cycle measurements so that all States are captured in one rate. As such, each State is reviewed once every 3 years, and the year in which a State is measured is known as its ''PERM year.'' A State is not required to conduct a MEQC pilot during its PERM year. When a State is not under PERM review (that is, in the 2-year interval between a State's PERM review cycles), the State is required to conduct MEQC activities, including one (1) 12-month MEQC pilot. We refer to this 2-year interval between PERM review periods as PERM ''off-years.''

[37] States defined as the 50 States, District of Columbia, and the Commonwealth of Puerto Rico; *https://www.medicaid.gov/medicaid/eligibility/downloads/meqc-updated-phase1-guidance-05132021.pdf.*

[38] For more information on the traditional MEQC program, *see generally,* 82 FR 31158.

of the disallowance should their eligibility improper payment error rate exceed the 3 percent statutory threshold.[39]

Notwithstanding our well-meaning efforts around MEQC program design and the benefits we aimed for States to achieve, our longtime experience with it has demonstrated that its significant CMS and State administrative burden has substantially outweighed its benefits. MEQC pilots have not effectively reduced PERM eligibility improper payment rates. For example, overall Medicaid and CHIP eligibility improper payment rates increased during review years 2019 through 2021 (8.36 percent to 16.62 percent, and 23.53 percent to 28.71 percent, respectively).[40]

The MEQC program is largely a State-led audit process, with States developing the case sampling and review methodologies, and determining, based on their own interpretations of Federal regulations and State policy, whether findings represent errors or technical deficiencies.

That system has not enabled CMS to render significant oversight, and we have limited ability to require States to target known areas of risk and ensure meaningful corrective action. More specifically, we currently have limited authority to direct MEQC case reviews to proactively target emerging or known high-risk areas in a State; ensure consistent application of Federal standards across State case reviews; or ensure that States properly calculate, quantify, and report confirmed overpayments, including estimated FFP. Furthermore, under § 431.812(b)(3)(ii), we may direct a State to perform focused reviews only if the State's PERM eligibility improper payment rate exceeds the 3 percent national standard for two consecutive PERM cycles.

MEQC regulations require States to provide updates on corrective actions reported for the previous MEQC pilot, but the current MEQC program design makes comprehensive oversight of those CAPs challenging. For example, should a CAP not adequately address a previously identified error, we may not become aware of this until the next MEQC or triennial PERM cycle. Also, the MEQC and PERM programs have often proved to be largely duplicative in both the errors identified and the associated corrective actions. States often rely on the same staff to administer their MEQC program and cooperate with CMS contractors and staff during PERM reviews. The labor-intensive nature of addressing findings may require States to temporarily pause MEQC work to appeal/dispute PERM findings. This overlap increases administrative burden, particularly for States balancing limited resources and staff. In fact, States have reported that limited State funding and competing priorities have, in some cases, resulted in State eligibility system errors remaining unaddressed in subsequent MEQC and PERM reviews. Additionally, the PERM and MEQC measurement cycles do not effectively align to enable States to test PERM CAP mitigation interventions during MEQC reviews before the State's next PERM review.

Although the MEQC payment review process allows us the limited ability to recover FFP associated with certain overpayments arising out of erroneous eligibility determinations, such recoveries have been minimal. Consistent with § 431.812, our May 13, 2021 MEQC guidance specifies that States must report and return the Federal share of any self-identified overpayment(s) that occurred for paid claims with dates of service in the first 3 months after the effective date of eligibility that was triggered by an identified erroneous eligibility determination.[41] This State-driven process has led to limited overpayment recoveries from the MEQC pilots and a lack of effective oversight of the accuracy of States' self-reported overpayment amounts. Also, section 1903(u) of the Act sets a 3 percent allowable threshold for program-wide eligibility improper payment rates in any full fiscal year after 1983, and specifies that the Secretary is generally required to disallow payments to States with respect to the amount of erroneous excess payments above that threshold.[42] However, the Secretary has the authority to waive all or part of the disallowance of FFP should a State be unable to reach the 3 percent allowable threshold despite a good faith effort to reduce its eligibility improper payment rate. As stated above, under current regulations, participation in and compliance with the MEQC program is required for a State to qualify for a good faith waiver of the disallowance should their eligibility improper payment error rate exceed this 3 percent statutory threshold. This is a relatively low bar that allows States to easily avoid disallowances, even if their improper payment rate for eligibility errors is well above 3 percent. In fact, to date, we have granted good faith waivers from disallowances to every State that had an eligibility improper payment rate measured through the PERM program above the 3 percent allowable threshold.

Given the program limitations and persistent beneficiary eligibility errors described previously, we do not believe that proposing changes to the MEQC regulations would effectively strengthen our beneficiary eligibility oversight efforts. Instead, to address inefficiencies and reduce burden—and as a part of an enhanced strategy to promote more robust and effective program integrity oversight of Medicaid and CHIP beneficiary eligibility determinations—we propose to deregulate (that is, eliminate) the MEQC program at §§ 431.800 through 431.820 and, separately, to codify a new audit and disallowance strategy that we describe in sections III.G. and III.H. of this proposed rule. We propose to phase out the MEQC program over the course of 3 years following publication of the final rule. We will ensure there is no overlap between PERM and beneficiary eligibility audits for purposes of disallowances in a given year. We propose that the section 1903(u) disallowance authority would be applicable under the eligibility audit program instead of PERM, starting on July 1, 2027, before the next PERM cycle begins (RY 2029). The MEQC payment review process for over and underpayments will continue to operate under current regulations § 431.812 (e) until the program is phased out for each review cycle. For the MEQC program, current good faith effort regulatory criteria would be applied until the proposed § 455.804 becomes effective. At that point MEQC participation would no longer be a factor in States receiving a good faith effort waiver from disallowance. Starting July 1, 2027, PERM CAPs would remain part of the good faith waiver criteria (under new 455.804) but disallowances would no longer by determined by the PERM program. Processes related to the other components of PERM (managed care and fee-for-service) would remain unchanged. The good faith waiver criteria in proposed § 455.804 would be applicable for disallowances arising under proposed § 455.802 once the MEQC program is phased out, should our proposals be finalized as proposed. Because the MEQC program would no

[39] § 431.1010 outlines the Secretary's authority to issue disallowances for certain eligibility-related overpayments.

[42] Section 1903(u) of the Act does not apply to Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, or American Samoa.

longer exist, MEQC participation could no longer be included as a criterion for determining a good faith waiver.

We propose to deregulate the MEQC program in phases to ensure States would have adequate transition time to unwind from a longstanding program. Should this proposal be finalized, we anticipate that we would release additional information through sub-regulatory guidance that would provide further operational details for each 17-State MEQC cycle. We propose to remove §§ 431.800 through 431.820 from the Code of Federal Regulations at the conclusion of the phase-out period, with an effective end date 3 years after the publication of the final rule is published. We seek comment on this proposal to deregulate the MEQC program.

G. Medicaid and CHIP Beneficiary Eligibility Audit Program

Beneficiary eligibility determination errors account for a significant percentage of Medicaid and CHIP improper payments. In FY 2025, these errors represented approximately 72 percent and 73 percent of Medicaid and CHIP improper payments, respectively, totaling an estimated $27 billion in projected Federal Medicaid improper payments and $1 billion in projected CHIP improper payments.[43] One way that we currently address this challenge is through beneficiary eligibility audits, which are CMS audits of States' Medicaid and CHIP beneficiary eligibility determinations. These audits, which are separate from PERM eligibility reviews and MEQC pilots, provide us with enhanced oversight of States' eligibility determination processes and enable us to offer recommendations to prospectively improve the accuracy of States' eligibility determinations.

We conducted beneficiary eligibility audits across seven States from 2019 to 2022 to verify States' compliance with Federal and State eligibility requirements.[44] The primary objective was identifying whether the selected States correctly determined Medicaid or CHIP eligibility at the point of application or renewal and claimed the appropriate FMAP. We reviewed States' eligibility determinations for sampled beneficiaries to assess compliance with Medicaid eligibility requirements under 42 CFR part 435 and where applicable, CHIP eligibility requirements under 42 CFR part 457.[45] Those Medicaid and CHIP beneficiary eligibility audits revealed significant State errors leading to frequent inaccurate beneficiary eligibility determinations and identified substantial estimated potential overpayments. Because statutory and regulatory provisions limited our ability to recover FFP associated with eligibility-related overpayments,[46] the audit focus was providing States with best practices to improve eligibility determination processes. For example, across the seven States audited, we identified $2.9 million in sampled overpayments associated with ineligible beneficiaries, which could be extrapolated to $231 million in potential overpayments for the universe sampled; as discussed in greater detail in section H of this proposed rule, we lacked the statutory and regulatory authority to recover those funds. These audits found that eligibility errors were largely attributable to caseworker and system errors, including States determining individuals to be ineligible but continuing to pay claims; incorrectly calculating income when determining eligibility; failing to verify income or resources; placing beneficiaries in incorrect eligibility categories; or not conducting required annual renewals.

Because of MEQC's limitations described in section F of this proposed rule and the need to strengthen oversight of Medicaid and CHIP beneficiary eligibility determinations, we propose to codify the Medicaid and CHIP beneficiary eligibility audits. These audits would help us better understand States' eligibility determination processes to better enable us to offer States recommendations and technical assistance to prospectively improve their eligibility determinations and, where appropriate, effect recoveries consistent with the requirements of section 1903(u) of the Act. These audits would be distinct from, and operate independently of, PERM eligibility reviews, with separate processes and purposes.[47] For example, these proposed eligibility audits would differ from PERM eligibility reviews in that they would not include the sampling and review of paid claims, but, instead, the sampling frame would consist of Medicaid and CHIP beneficiaries and applicants. Specifically, the sampling frame of enrolled Medicaid and CHIP beneficiaries would include those on whose behalf the State made Medicaid and CHIP payments for services during the audit period.

As opposed to State-run MEQC pilots that, as we explained, have not significantly reduced eligibility errors, our proposed expanded beneficiary eligibility audits would provide direct Federal oversight of States' Medicaid and CHIP beneficiary eligibility determinations. Because CMS and its contractors would conduct these Medicaid and CHIP beneficiary eligibility audits, we expect States to have reduced administrative burden compared to the MEQC program. The Secretary, acting through CMS, is authorized by the Medicaid Integrity Program (MIP) at section 1936 of the Act to enter into contracts with eligible entities to carry out specific Medicaid oversight activities. Consistent with MIP provisions, States would be required to cooperate with CMS' contractors during the beneficiary eligibility audit process just as they are obligated to engage with CMS contractors during all Medicaid program integrity audits or reviews supporting MIP oversight efforts.

We are proposing to codify a regulatory structure for these Medicaid and CHIP beneficiary eligibility audits ensuring they would be consistent with the requirements of section 1903(u) of the Act and that would, in certain circumstances and as described in more detail in section III.H. of this proposed rule, permit us to pursue potential disallowances of FFP from States for overpayments identified in such audits. Previously, such disallowances were effectuated pursuant to the PERM program. We propose in section H of this proposed rule that we would issue eligibility-related disallowances in accordance with section 1903(u) of the Act for Medicaid and section 2105(e) of the Act for CHIP pursuant to these new

[43] 2025 Medicaid and CHIP Supplemental Improper Payment Data. *https://www.cms.gov/files/document/2025-medicaid-chip-supplemental-improper-payment-data.pdf.*

[44] The eligibility audit reports are available on *CMS.gov* on the *Reports & Guidance* web page at: *https://www.cms.gov/medicare/medicaid-coordination/center-program-integrity/reports-guidance.* Eligibility audits were previously conducted in New York, Kentucky, Louisiana, Pennsylvania, Connecticut, Kansas, and Missouri. The audit target population varied across States, with three audits focusing on the Medicaid adult expansion population and four audits covering beneficiaries enrolled in the general Medicaid population, Medicaid adult expansion population, and CHIP.

[45] Individual cases were selected from a stratified random sample of beneficiaries whose eligibility was determined or redetermined during the audit period.

[46] The PERM program is used to implement section 1903(u) of the Act, and therefore, is currently the only mechanism for CMS to recover identified eligibility-related overpayments in Medicaid.

[47] The PERM program measures the national Medicaid and CHIP improper payment rates through reviews of State's FFS, managed care, and eligibility components to comply with the Payment Integrity Information Act of 2019 (PIIA; Pub. L. 116–117). Additionally, PERM eligibility reviews currently measure eligibility improper payment rates in accordance with section 1903(u) of the Act. Each State is reviewed every 3 years, with 17–18 States reviewed annually.

beneficiary eligibility audits. Additionally, to improve our oversight effectiveness, we propose explicit regulatory authority by which we could require States to submit and implement CAPs to address eligibility errors identified during these audits to help them comply with Federal requirements.

Improper payment rates reported under the Payment Integrity Information Act of 2019 (PIIA) [48] would continue to be determined solely through PERM reviews, which occur on a routine triennial cycle covering 17–18 States each year and enable the calculation of a national improper payment rate. Conversely, the proposed Medicaid and CHIP beneficiary eligibility audits would prioritize high-risk States identified using a risk formula, though also ensuring that each State would undergo an eligibility audit at least once every 5 years.[49] Assuming our proposals are finalized as proposed, we would articulate more information on the risk formula and the specific audit cadence via future sub-regulatory guidance. We believe that the PERM program, with its triennial cycle, is more appropriate for ongoing measurement of the national Medicaid and CHIP improper payment rates than the proposed eligibility audits, which, on average, would have longer intervals between audits.

The proposed eligibility audit process would allow CMS to review States' eligibility determinations with respect to individuals who are actively enrolled in or were denied enrollment or disenrolled from Medicaid or CHIP. Each beneficiary eligibility audit would include four statistically valid samples, two samples of active cases defined as individuals enrolled in Medicaid or CHIP, and two samples of negative cases defined as individuals who had been denied enrollment in or disenrolled from Medicaid or CHIP. Specifically, each audit would include a sample of active Medicaid cases, active CHIP cases, negative Medicaid cases, and negative CHIP cases. Any inaccurate eligibility determinations and deficiencies in documentation identified for sampled individuals would be reported to the State as soon as possible during the audit period to enable State correction and potential clarification. Notably, a beneficiary is entitled to Medicaid benefits unless and until a SMA determines them ineligible and provides advance notice of the termination and fair hearing rights.[50] Thus States would still be required to follow established procedures before disenrolling beneficiaries from Medicaid or CHIP due to audit findings. This proposed approach, coupled with the disallowance authority described in section H of this proposed rule, would provide us with greater oversight of Medicaid and CHIP beneficiary eligibility determinations, including State processes and the steps that States take to address any identified vulnerabilities.

This proposed rule would establish the requirements and procedures for the CMS Medicaid and CHIP beneficiary eligibility audits. Specifically, we propose to amend part 455 by establishing a new subpart H (§ 455.700, *et seq.*), titled Medicaid and CHIP Beneficiary Eligibility Audit Program. For any Medicaid and CHIP beneficiary eligibility audits that may result in a disallowance of FFP, we propose that part 455, subpart H would apply to audits initiated after the completion of the PERM review period that is underway as of the effective date of the final rule (60 days after the publication).

Proposed § 455.700 would be authorized by sections 1903(u), 2105(e), and 1936 of the Act and articulate the basis and scope of these beneficiary eligibility audits aimed at reducing eligibility errors. We propose that during these audits, we would review States' Medicaid and CHIP eligibility processes and policies, and the appropriateness of eligibility determinations for sampled cases. Should our proposals be finalized as proposed, States would be required to participate when selected for an audit. To promote clarity and ensure consistent application of requirements, at § 455.702 we propose to define the following terms for purposes of this subpart: ''corrective action,'' ''eligibility,'' ''eligibility audit,'' ''eligibility determination,'' ''eligibility error,'' ''erroneous excess payments for medical assistance,'' and ''observation.'' ''Eligibility'' would be defined as meeting the State's categorical, financial, and non-financial criteria for receipt of benefits under the Medicaid or CHIP programs. ''Eligibility audit'' would be defined as a CMS and Federal contractor conducted, primarily risk-based, audit of States' Medicaid and CHIP point of application or renewal eligibility determinations, designed to verify compliance with Federal and State eligibility requirements, reduce eligibility errors, and assist States in improving their eligibility determination processes. ''Eligibility determination'' would be defined with the same meaning as at § 435.4 for Medicaid and § 457.301 for CHIP, an approval or denial of eligibility in accordance with § 435.911 or § 457.340, as well as a renewal or termination in accordance with § 435.916 or § 457.344. ''Eligibility error'' would be defined as an error resulting from the State's improper application of Federal or State requirements, causing an improper beneficiary eligibility determination. For purposes of this definition, an eligibility error could include, but would not be limited to, authorizing an ineligible individual as eligible when they received services, providing certain ineligible services to an otherwise eligible individual, improperly denying an individual's Medicaid or CHIP application, improperly terminating a beneficiary from Medicaid or CHIP, or enrolling in managed care an individual ineligible for managed care. ''Erroneous excess payments for medical assistance'' for purposes of these proposed eligibility audits would be defined as the term is defined in section 1903(u)(1)(D)(i) of the Act to mean the total of payments under the State plan (or waiver of such plan) with respect to ineligible individuals and families, and overpayments on behalf of eligible individuals and families by reason of errors in determining the amount of expenditures for medical care required of an individual or family as a condition of eligibility.[51] To comport with section 1903(u)(1)(D)(i) of the Act, only those erroneous payments meeting this definition would be factored into determining a State's error rates for purposes of potential disallowance arising from these audits, and thus any resulting disallowance amount. ''Observation'' would be defined as an instance where a beneficiary's or applicant's eligibility was correctly determined notwithstanding the State failing to follow Federal and State eligibility requirements. For example, an observation could occur where a State incorrectly calculated a beneficiary's income, but even when correctly calculated the beneficiary's income remained under the applicable income limit for Medicaid or CHIP coverage. ''Corrective action'' would be defined as a specific action that a State would be required to implement to

[48] Public Law 116–117 (2020).

[49] As section 1903(u) does not apply to Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, or American Samoa, the territories are excluded from the proposed eligibility audit cadence and risk-based selection methodology.

[50] §§ 435.917, 435.918, 435.930(b) and part 431, subpart E.

[51] Effective beginning in FY 2030, section 71106 of the WFTC legislation revised the definition for ''erroneous excess payments for medical assistance'' in section 1903(u)(D)(i) of the Act. Proximate to the effective date of the revised language we plan to do additional rulemaking to update the definition in § 455.702.

address identified eligibility errors to achieve compliance with Federal requirements and Medicaid and CHIP State plans (or waiver of such plans). Corrective actions would only be required for eligibility errors identified during the beneficiary eligibility audit, not for standalone observations, and would be required regardless of whether the eligibility error had an associated erroneous excess payment amount.

At § 455.704, we propose the general requirements for Medicaid and CHIP beneficiary eligibility audits. Consistent with standard CMS audit practices, we propose that a State would be required to participate in an eligibility audit upon notification that we were going to conduct such an audit, though allowing for limited exceptions for rare cases where a State could demonstrate experiencing extraordinary circumstances beyond the State agency's control making audit participation impracticable during the applicable fiscal year audit period. Every State would undergo a beneficiary eligibility audit at least once every 5 years. As discussed, more information on the specific audit cadence would prospectively be made available through sub-regulatory guidance. Outside of the audit cadence, we would prioritize States with Medicaid and CHIP programs determined to be at high-risk for eligibility errors for more frequent beneficiary eligibility audits, enabling us to focus our resources on States where eligibility errors were more likely to occur and reduce the burden on States consistently compliant with Federal and State requirements. We would identify for audit States at heightened risk for eligibility errors by conducting risk-based analyses informed by findings and data from sources including, but not limited to, prior PERM eligibility reviews, HHS–OIG audits, prior Medicaid and CHIP beneficiary eligibility audits, U.S. Government Accountability Office (GAO) reports, State Auditor reports, State-reported data, data analytics, and results from other ongoing CMS Medicaid and CHIP beneficiary eligibility oversight work. Our risk-based analyses would apply varying weights using a point system based on the risk associated with States making eligibility errors to the metrics drawn from such sources. This risk formula would assign each State a risk score, enabling us to compare States based on the number of risk points received and prioritize for audit those with the highest risk scores beyond the minimum 5-year audit cadence. The risk formula would be reviewed and updated annually by CMS to reflect change in any recent Federal Medicaid and CHIP eligibility laws or regulations. The same risk formula would be continually applied in a given year to identify States to prioritize for audit, while we would exclude those already being audited pursuant to the established cadence. In limited circumstances, we propose that we could select a State for audit regardless of its annual risk score were we to receive credible information regarding eligibility issues occurring in that State requiring immediate oversight action. Sources of such credible information could include HHS–OIG audits and investigations, referrals, and other beneficiary eligibility oversight work conducted by CMS.

CMS would issue an engagement letter to the Medicaid director of a State selected for audit that specifies the audit objectives, scope, applicable disallowance authorities, data and documentation request, and corresponding data and documentation submission due dates. Pursuant to proposed § 455.704(b), States would be required to: (1) provide the requested eligibility and enrollment data (that is, the audit universe data) and documentation that could include, but not be limited to State policy manuals, eligibility operations manuals, eligibility training and guidance materials, and the State's verification plan within 10 business days from the engagement letter issuance date unless granted an extension by CMS; (2) assign at least two subject matter experts (SMEs) to navigate the necessary information contained in the State's eligibility and enrollment system(s) in coordination with the auditors during the case review portion of the audit to allow CMS to verify if eligibility determinations were made in accordance with Federal and State requirements for the sampled cases; [52] (3) provide requested copies of additional eligibility case records and any other necessary documentation within 5 business days of the written request unless granted an extension by CMS; (4) respond to the draft report in writing within 10 business days, unless granted an extension by CMS, indicating whether the State agreed or disagreed with each eligibility error cited; and (5) as applicable, submit CAPs for approval that would address each identified eligibility error by the deadline specified in the final audit report. The State's designated SMEs required under § 455.704(b)(2) would participate in scheduled case review sessions with the auditors to assist with providing the necessary supporting documentation within the State's systems for each sampled case. This approach would mean that State personnel would not have to train the auditors on their systems or provide them with system credentials. Based on experience with prior eligibility audits, this approach would reduce the overall burden on CMS and the State and allow CMS to more expeditiously and accurately complete the individual case review portion of the audit and communicate identified eligibility errors to the State, allowing it to more promptly correct identified issues. Pursuant to proposed § 455.704(b)(4), for any eligibility error with which the State would disagree, the State would have to provide a detailed written explanation of the basis for disagreement and submit supporting documentation to CMS to substantiate its position.

We propose that findings from our Medicaid and CHIP beneficiary eligibility audits would be subject to potential section 1903(u) of the Act eligibility-related disallowances at new § 455.706(d). Notably, as section 1903(u) of the Act is not explicitly listed in section 2107(e) to apply to a State's CHIP in the same manner that it applies to its Medicaid program, any eligibility-related disallowances for erroneous excess payments made on behalf of CHIP beneficiaries would be pursuant to the general payment recovery authority at section 2105(e) of the Act rather than 1903(u) of the Act. However, to ensure standardization across the Medicaid and CHIP programs, using our discretionary enforcement authority, CHIP samples in audits yielding findings subject to potential disallowance would still be treated in accordance with the requirements of section 1903(u) of the Act. That would include having an audit period covering a full fiscal year, a statistically valid random active case sample drawn from all eligibility categories included in the State's CHIP program during the audit period, and the calculation of a program-wide eligibility error rate.

Accordingly, we propose to make the requirements in new part 455, subpart H (§§ 455.700 through 455.712) applicable to CHIP in the same manner as they apply to Medicaid by amending § 457.628. The same audit methodology would therefore be used for the Medicaid and CHIP samples, ensuring consistent treatment between both programs.

[52] As part of the beneficiary eligibility audit process, CMS and its Federal contractors do not request, access, or review Federal Tax Information (FTI). Where a State used FTI during an eligibility determination, we ask the State only to confirm that FTI was used and not show it to us.

Regardless of whether this proposal is finalized as proposed, we could still, as we do now, conduct other Medicaid and CHIP beneficiary audits that would not result in disallowances and that could use different audit and extrapolation methodologies. Specifically, we may, as appropriate, conduct other Medicaid and CHIP beneficiary eligibility audits that use targeted methodologies to focus on a subset of eligibility categories or only disenrolled beneficiaries.

To ensure consistent treatment across States and compliance with section 1903(u) of the Act, at § 455.706 we propose the general audit methodology would apply to all States selected for beneficiary eligibility audits and would yield findings potentially subject to disallowance. For such audits, we propose to use statistically valid methodologies to select stratified random samples from a State's eligibility categories, calculate error rates, and extrapolate eligibility error rates to the entire universes of Medicaid and CHIP beneficiaries, and at § 455.706(a) we propose to codify general sample requirements. Every beneficiary eligibility audit would include four statistically valid random samples. As specified at new § 455.706(a)(1), one sample would include individuals enrolled in Medicaid whose eligibility was determined or redetermined and on whose behalf the State made payments for services provided during the full fiscal year audit period, while the second Medicaid sample would include individuals whose eligibility was denied or terminated during the audit period. The third sample would consist of individuals enrolled in CHIP whose eligibility was determined or redetermined and on whose behalf the State made CHIP payments for services provided during the audit period, while the fourth sample would consist of individuals whose CHIP eligibility was denied or terminated during the audit period. As proposed in § 455.706(a)(2), we would obtain the Medicaid and CHIP beneficiary and applicant data and their associated Medicaid and CHIP payments from the State's Medicaid and CHIP information systems, such as the Medicaid Management Information System (MMIS). The assigned State SMEs would provide this information to CMS auditors. As proposed in § 455.706(a)(3), we would use a statistical software package to generate random numbers to select Medicaid and CHIP samples from each corresponding stratum.[53] Strata would be nested within the program (Medicaid or CHIP) and established by statisticians based on, but not limited to, eligibility category, match rate, eligibility rules, and the dollar amount the State spent on services. As proposed at new § 455.706(a)(4), audit sample sizes would be designed to support statistically valid extrapolations of individuals associated with eligibility errors and their improper payments at a 90 percent confidence level, if applicable. For the active case samples, this would include individuals who did not meet eligibility requirements yet were improperly determined eligible and enrolled in Medicaid or CHIP and their associated payments for services during the audit period. For the negative case samples, this would include individuals who met eligibility requirements yet were improperly denied or disenrolled from Medicaid or CHIP. We propose using the lower limit of a 90 percent confidence level for these eligibility audits because 90 percent is consistent with longstanding HHS–OIG and Medicare extrapolation practices and would provide a conservative estimate accounting for statistical uncertainty.[54] Furthermore, we propose using a 90 percent confidence interval with a 5 percent precision level for the beneficiary eligibility audits, instead of a 95 percent confidence interval with a 3 percent precision level like the PERM program uses, to have smaller, more manageable audit sample sizes. Using a 95 percent confidence interval could require substantially larger sample sizes if we want to achieve greater precision, which would make the audit process more burdensome for States and CMS and mean that audits would take longer to complete.

Proposed § 455.706(b) specifies that we would use statistical software to, as applicable, estimate the total number of individuals with associated eligibility errors extrapolated to the entire Medicaid and CHIP universes based on findings from the active and negative samples, and the total extrapolated amount of erroneous excess payments made on behalf of the individuals who were improperly enrolled in Medicaid or CHIP and received services during the audit period based on findings in the active samples. We anticipate that we would use RAT–STATS for this purpose, but welcome comments regarding other statistical software that could be used. The statistical software would also be used to calculate the lower limit of the 90 percent confidence interval for the estimated numbers of individuals associated with eligibility errors and, where applicable, the total value of erroneous excess payments for medical assistance, as defined in section 1903(u)(1)(D)(i) of the Act and at proposed § 455.702.

At proposed § 455.706(c), we would calculate two error rates, one rate for Medicaid and one for CHIP, using the lower limit of the 90 percent confidence interval for the total dollar amount attributable to erroneous excess payments for medical assistance during the audit period. Each error rate would be calculated by dividing the total erroneous excess payments for medical assistance in the active sample by the total dollar amount associated with all individuals in the sample. This rate would then be statistically extrapolated to represent the overall error rate of erroneous excess payments for medical assistance for the State's entire Medicaid or CHIP population during the audit period. This proposal at new § 455.706(c) would, based on the results of the beneficiary eligibility audits, establish the path for us to determine Medicaid and CHIP eligibility error rates in accordance with the requirements of section 1903(u) of the Act. We would provide additional information on the statistical methodology in future sub-regulatory guidance.

We propose to add § 455.706(d) to specify that Federal payments associated with erroneous excess payments for medical assistance during the full fiscal year audit period could be subject to an extrapolated disallowance. We would issue such a disallowance in accordance with proposed § 455.802 and follow the requirements and procedures outlined in § 430.42. We propose that the eligibility error rates established in proposed § 455.706(c) could be used to determine the disallowance amount if above the section 1903(u) of the Act statutory allowable 3 percent eligibility error rate threshold. The eligibility error rates specified in § 455.706(c) would not include identified observations as those would not be subject to disallowances because beneficiaries' and applicants' ultimate eligibility determinations would have been found to be accurate notwithstanding discerning some underlying calculation error. Our State audit engagement letter would, where applicable, include information about potential disallowances under sections 1903(u) and 2105(e) of the Act and new § 455.706(d).

[53] We currently use HHS–OIG's Office of Audit Services (OAS) statistical software package RAT–STATS for this purpose.

[54] Medicare Program Integrity Manual, Chapter 8—Administrative Actions and Sanctions and Statistical Sampling for Overpayment Estimation.

We propose to add § 455.708 to clarify that protections of applicant and beneficiary information and due process rights, consistent with the provisions of 42 CFR part 431, subpart F, §§ 435.930(b), 435.917, 435.918, part 431, subpart E, and 457.1110 would apply during Medicaid and CHIP beneficiary eligibility audits. At new § 455.708(a) we propose that States would be required to safeguard applicant and beneficiary information and limit disclosures to information necessary to conduct the Medicaid and CHIP eligibility audits. We propose at § 455.708(b) that a State would be required to continue providing Medicaid benefits to eligible individuals in accordance with § 435.930(b) until it had made a final determination of ineligibility and provided advance notice and fair hearing rights.[55]

We also propose to add § 455.710 to make clear that States, upon our written request, would be required to provide CMS and its Federal contractors copies of eligibility case records for sampled cases and all available State policy and process documents related to eligibility determinations in effect during the beneficiary eligibility audit period. Requested documentation could include, but would not be limited to, State eligibility policy manuals, eligibility operations manuals, training and guidance materials, the State verification plan in effect during the audit period, and eligibility case record information that was not collected during the case review portion of the audit referenced at proposed § 455.704(b)(2).

At § 455.712, we propose that States would, as applicable, be required to submit CAPs in accordance with the proposed § 455.602 to implement corrective actions as specified in the final audit report. For each identified eligibility error, we would specify in the final report whether a corrective action was required, as we might determine in some instances that implementation of corrective action was not necessary. Examples of such latter instances might include where a State had already implemented system changes or other corrective measures after the audit period that would prevent similar eligibility errors from recurring.

Where a CAP would be required, we propose that a State's CAP submission to us would need to clearly address the identified eligibility errors and the underlying causes of those errors. Pursuant to the proposed § 455.602 discussed further in section III.J. of this proposed rule, States' CAP submissions would require CMS approval, and, once a CAP had been approved, a State would be required to make sufficient progress implementing it within the CAP's established milestone timeframes. Requiring States to submit CAPs for our approval and implement approved CAPs within a specified timeframe would help them more expeditiously attain compliance with Federal requirements and reduce the likely recurrence of similar eligibility errors.

This proposed enhanced audit framework would address the key deficiencies in the existing MEQC program that we describe in section F of this proposed rule and that form part of the basis for our proposal to deregulate that program. These proposed provisions would provide us with greater oversight of States' Medicaid and CHIP eligibility determination processes and enable us to focus additional resources on high-risk States. We seek comment on this proposed audit strategy for Medicaid and CHIP beneficiary eligibility determinations, explicitly on the proposed minimum five-year audit cadence, feasibility for SMA personnel to meet the specified audit timelines, and inclusion of CHIP cases.

H. Medicaid and CHIP Beneficiary Eligibility-Related Disallowances

Section 1903(u) of the Act sets a 3 percent allowable threshold for program-wide eligibility improper payment rates in any full fiscal year after 1983, and specifies that the Secretary is generally required to disallow payments to States with respect to the amount of erroneous excess payments above that threshold.[56] However, the Secretary has the authority to waive all or part of the disallowance of FFP should a State be unable to reach the 3 percent allowable threshold despite a good faith effort to reduce its eligibility improper payment rate.[57]

The Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) added section 1903(u) to the Act.[58] [59] Section 1903(u) was first implemented using the pre-existing Medicaid Quality Control (MQC) system, which was established in 1978 and reviewed the quality of eligibility determinations, third-party liability activities, and claims processing.[60] The MQC system consisted of six month sampling periods conducted by States to detect case errors, with State error rates verified using a Federal subsample.[61] The MQC system's eligibility review component became known as the MEQC program (referred to as the traditional MEQC program).[62] In 1992, the HHS Departmental Appeals Board (DAB) struck down the traditional MEQC disallowance methodology over concerns about the small sample sizes used to calculate error rates. In response, starting in 1994 we gave States the option to conduct MEQC pilots in place of traditional MEQC reviews.[63] [64] [65] States that elected to conduct MEQC pilots had their error rates frozen at the most recent traditional MEQC rate, as the pilots did not calculate error rates. Over time, most States elected to conduct pilots as they provided States with more flexibility in the review design.[66]

With the publication of the July 2017 final rule titled, ''Medicaid Program and CHIP; Changes to the Medicaid Eligibility Quality Control and Payment Error Rate Measurement Programs in Response to the Affordable Care Act,'' (82 FR 31158), we changed the mechanism for measuring and addressing Medicaid beneficiary eligibility errors under section 1903(u) of the Act from the MEQC to the PERM program. The codified MEQC program was revised to resemble the existing MEQC pilots, and we explained in the 2017 final rule that this would benefit States by allowing them to focus on refining and improving their eligibility determinations during the 2 off-years between PERM reviews, without using

[55] The State is required to provide advance notice and fair hearing rights in accordance with §§ 435.917–435.918 and Part 431, Subpart E.

[56] Section 1903(u) of the Act does not apply to Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, or American Samoa.

[57] Under current regulations, a good faith effort means the State has taken the action it believed was needed to meet the allowable threshold and still failed to achieve that threshold. See § 431.1010(b)(2).

MEQC pilot findings as a basis for payment reductions or disallowances (82 FR 31158).

Under statute and current regulations, our authority to recover the Federal share of overpayments resulting from eligibility errors is limited to those over the 3 percent error rate threshold as identified through the PERM program.[67] Even in such instances, however, section 1903(u)(1)(B) of the Act and § 431.1010(b) permit CMS to waive a disallowance should a State be unable to reach the threshold despite a good faith effort. Specifically, per § 431.1010(b)(2) a State may qualify for a good faith waiver of disallowance if it (1) participates in the MEQC program in accordance with §§ 431.800 through 431.820; and (2) implements a PERM CAP in accordance with § 431.992. Conversely, a State's failure to comply with either requirement would be considered a failure to demonstrate a good faith effort. Although there have been instances where States' calculated eligibility error rates have exceeded the 3 percent threshold, to date we have granted good faith waivers from disallowances to any such affected States.[68] Should a State not meet the good faith waiver requirements, we would reduce its FFP for medical assistance by the percentage by which the lower limit of its PERM eligibility improper payment rate exceeded the 3 percent threshold.

As discussed in section III.G. of this proposed rule, prior CMS beneficiary eligibility audits in seven States identified $231 million in potential extrapolated overpayments based on $2.9 million in sampled overpayments. When we conducted those audits, section 1903(u) of the Act was implemented solely through the PERM program and we were cognizant we would not have explicit regulatory authority to recover estimated overpayments, so we did not conduct them using methodologies designed to lead to full fiscal year disallowances under section 1903(u). As discussed in section G, we are proposing in §§ 455.700 through 455.712 to implement a Medicaid and CHIP beneficiary eligibility audit program that would operate independently from the PERM program and would be used to calculate error rates based on the total dollar amount attributable to erroneous excess payments for medical assistance and child health assistance, in a manner consistent with section 1903(u) of the Act. Accordingly, we also propose a disallowance framework for recovering overpayments identified through these eligibility audits when either the Medicaid or CHIP eligibility error rates exceeds the statutory threshold of 3 percent.

We propose to implement disallowances that meet the requirements of section 1903(u) of the Act pursuant to the proposed Medicaid and CHIP beneficiary eligibility audits that we would establish in new 42 CFR part 455, subpart H (as described in section G of this proposed rule) instead of under the PERM program established in part 431, subpart Q. We believe this approach would strengthen our ability to identify and recover erroneous excess payments and, by better holding States accountable when they make improper Medicaid and CHIP eligibility determinations, incentivize them in the first instance to make proper eligibility determinations.

We propose to remove the current PERM disallowance provision at § 431.1010 and, instead, establish comprehensive, unified eligibility-related disallowance regulations at 455 subpart I (§ 455.800, *et seq.*) that would only apply to the Medicaid and CHIP beneficiary eligibility audits proposed under 455 subpart H. We propose to use this framework to issue disallowances in compliance with the requirements of section 1903(u) of the Act and § 430.42 based on eligibility error rates calculated during the Medicaid and CHIP beneficiary eligibility audits in accordance with new § 455.706(c). We propose that the requirements in subpart I would apply to Medicaid and CHIP beneficiary eligibility audits initiated after the completion of the PERM review period that is underway as of the effective date of the final rule.

To date, we have not issued any disallowances resulting from eligibility improper payment error rates identified through the PERM program primarily because all States with error rates above the 3 percent threshold have met the good faith waiver requirements at § 431.1010(b)(2), which include, in part, participation in MEQC pilots.[69] Should our proposal be finalized as proposed, the MEQC program would, after phase out, no longer exist (see section F of this proposed rule). Accordingly, we propose to replace the existing good faith waiver framework with new criteria in new § 455.804 that would establish the process and standards by which CMS could reduce, in whole or part, eligibility-related disallowances based on a State's demonstration of a good faith effort to meet the 3 percent allowable threshold while preserving CMS' discretion to deny such a waiver in cases of systemic or persistent program integrity failures.

Under proposed § 455.802(a), we would calculate potential disallowances using the eligibility error rates derived from a Medicaid and CHIP beneficiary eligibility audit subject to disallowance, with the disallowance(s) corresponding to the audit period (that is, the full fiscal year audit period). During a beneficiary eligibility audit conducted in a fashion by which it would be susceptible to our taking a disallowance, we would calculate two error rates, one for Medicaid and one for CHIP, for the total dollar amount attributable to ''erroneous excess payments for medical assistance,'' as proposed at § 455.706(c).[70]

Under proposed § 455.802(b), we would calculate the potential Medicaid and CHIP disallowance amounts by subtracting the 3 percent allowable threshold from the lower limit of the State's error rates established in § 455.706(c), as determined through an eligibility audit subject to disallowance, and multiplying those results, if greater than zero, by the corresponding Federal share of medical assistance or child health assistance expenditures for the audit period. We propose to use the lower limit of the State's calculated error rates because that would be consistent with PERM and HHS–OIG extrapolation practices and provide reliable and conservative estimates of the true error rates accounting for statistical uncertainty. As discussed in the 2017 final rule (82 FR 31158), using the lower limit of the calculated Medicaid or CHIP error rate for disallowances would assist in ensuring there was reliable evidence that an error rate exceeded the 3 percent statutory threshold. These Medicaid and CHIP error rate calculations would result in potential extrapolated disallowance amounts consistent with section 1903(u) of the Act, and absent a good faith waiver, we would initiate disallowances in accordance with the procedures in § 430.42.

Section 1903(u)(1)(B) of the Act authorizes the Secretary to waive all or part of an eligibility-related

[67] § 431.1010.

[68] Payment reductions/disallowances were able to be issued for PERM reviews starting on and after July 1, 2020.

[69] By its terms, the 2017 PERM final rule did not allow for such disallowances until review years ending after July 1, 2020.

[70] The error rate would be calculated by dividing the total erroneous excess payments for medical assistance in the active sample by the total dollar amount associated with all beneficiaries in the sample and then statistically extrapolating this amount to determine the overall error rate of erroneous excess payments for the entire Medicaid or CHIP population.

disallowance where a State fails to achieve the statutory allowable threshold of 3 percent despite making a good faith effort to do so. Consistent with what we have articulated in prior rulemaking,[71] we believe a good faith determination should reflect both a State's efforts to establish and maintain appropriate controls before eligibility errors occur and its responsiveness after such errors are identified. As discussed, to date, we have granted good faith waivers from disallowances to every State that had an eligibility improper payment rate detected through the PERM program above the 3 percent allowable threshold. We propose to establish new good faith effort criteria, in part because one element of the current good faith waiver at § 431.1010, participation in the MEQC pilot program, is proposed to be deregulated and replaced with the Medicaid and CHIP beneficiary eligibility audit program, and because we aim to require States to take more detailed, eligibility-focused actions to be granted a good faith waiver. Accordingly, we propose in § 455.804(b) that CMS would evaluate whether a State made a good faith effort using three complementary indicators. Specifically, we would evaluate whether a State: (1) implemented all elements associated with eligibility errors in its most recent CMS-approved PERM CAP in accordance with § 431.992; (2) where applicable, submitted and made sufficient progress implementing a CMS-approved CAP under proposed § 455.712 in response to previous beneficiary eligibility audit findings; and (3) undertook additional reasonable actions to prevent, identify, or mitigate eligibility determination errors it believed were necessary to fall within the allowable 3 percent statutory threshold. We would use these complementary indicators as a comprehensive and objective framework to determine a State's good faith waiver eligibility.

Under proposed § 455.804(b)(3), CMS would evaluate whether the State undertook additional reasonable actions to prevent, identify, or mitigate eligibility determination errors based on the totality of the circumstances. Relevant considerations could include, but would not be limited to, whether the State maintained reasonable pre-existing eligibility controls; whether the same errors had been identified in previous audits or reviews; the timeliness and substance of the State's response after error identification; any corrective actions already taken; and the State's cooperation and transparency during CMS audits and reviews. We would consider these factors collectively when assessing whether the State exercised reasonable diligence to prevent and address eligibility errors beyond satisfying the CAP requirements described in proposed § 455.804(b)(1) and (2).

We also believe that including a State's implementation of the eligibility-related elements of its most recent PERM CAP in accordance with § 431.992 and, where applicable, any previous CMS-approved beneficiary eligibility audit CAP under proposed § 455.712 as indicators of a good faith effort would be appropriate and necessary because these corrective actions would represent a State's commitment to addressing eligibility errors and deficiencies identified through Federal oversight activities.

Under proposed § 455.804(c)(1), a State would, unless granted an extension by CMS, be required within 30 calendar days of CMS' issuance of a final audit report for a beneficiary eligibility audit and the associated potential disallowance amount to submit evidence demonstrating that its failure to meet the allowable threshold occurred despite a good faith effort to do so. A State could submit documentation such as policy manuals, staff training records, documentation of eligibility and enrollment system enhancements, self-audit reports, and detailed CAPs with proof of implementation and effectiveness. Should circumstances prevent a State from submitting such documentation within the proposed timeframe, it could submit a request for extension to CMS in writing and CMS could consider granting an extension commensurate with the extenuating circumstances. Pursuant to proposed § 455.804(a), CMS could grant a State a full or partial waiver based on the extent to which it demonstrated satisfaction of the proposed good faith criteria.

Under proposed § 455.804(d), CMS could determine that a State was not eligible for a good faith waiver, or was eligible for only a partial waiver, where the information and evidence available to CMS regarding the State's eligibility administration during the audit period demonstrated systemic or persistent program integrity failures inconsistent with a good faith effort to achieve the statutory allowable threshold. We believe that systemic or persistent program integrity failures may demonstrate that a State had not made a good faith effort as they indicate that known eligibility weaknesses were not abated despite prior opportunities to identify, correct, or mitigate those deficiencies. For example, CMS could consider whether similar eligibility deficiencies had been identified through previous audits, reviews, or other Federal oversight activities and if so, whether the State failed to take timely and effective corrective actions.

Proposed § 455.804(e) specifies examples of circumstances that CMS may consider in determining that a State had not demonstrated the good faith effort necessary to qualify for a full or partial waiver under section 1903(u)(1)(B) of the Act. These examples are intended to be illustrative of circumstances that may indicate systemic or persistent program integrity deficiencies but are not meant to constitute an exhaustive list or establish automatic disqualifying criteria. Such circumstances could include, but would not be limited to: repeated Medicaid and CHIP beneficiary eligibility audit or PERM findings involving the same or substantially similar errors; failure to address or implement prior CMS audit recommendations related to eligibility determination errors; known system defects, operational deficiencies, or policy weaknesses affecting eligibility determinations that remained unaddressed by the State during the audit period; or patterns of eligibility-related noncompliance identified through other Federal oversight activities, including audits, investigations, or findings by the HHS–OIG or other Federal agencies. These provisions would ensure that good faith waivers remain available for States demonstrating reasonable and proactive steps towards improving program integrity, while preserving CMS' discretion to deny a waiver or grant only a partial waiver where ongoing or unresolved deficiencies would undermine the integrity of eligibility determinations.

Proposed § 455.804(f) would establish the notification and timing requirements that would apply after CMS had made a good faith waiver determination. Under this provision, CMS would, via a single notice, notify each State with an eligibility error rate above the allowable threshold of its good faith waiver determination, including whether CMS had granted a full waiver, a partial waiver, or no waiver, and, where applicable, the amount of the disallowance. This written notification would also include the information specified in § 430.42(a), as appropriate, including notice of the State's ability to seek reconsideration or appeal under proposed § 455.806 and § 430.42. We

[71] See, for example, the previously referenced PERM rulemaking at 82 FR 31158 (''We will grant a good faith waiver only if a State both participates in the MEQC pilot program and implements PERM CAPs.'')

believe that providing States with a single written notification would promote transparency, ensure States would clearly understand the basis for CMS' determination, reduce administrative burden, and provide the information necessary to make timely and informed decisions about whether to pursue reconsideration or appeal.

Proposed § 455.806 sets forth the process by which a State could appeal a disallowance imposed under §§ 455.802 and 430.42. Under this provision, a State that disagreed with a disallowance determination could seek CMS reconsideration or appeal the decision to the DAB within 60 calendar days after receipt of the CMS' final disallowance notice. We propose that all processes outlined in § 430.42 would govern disallowances issued under this section, including the processes for notice of disallowance, reconsideration, retention of funds during the pendency of an appeal, and appeals to the DAB in accordance with 1116(e) of the Act and § 430.42.

We explicitly seek comment on this proposed eligibility-related disallowance framework and new good faith waiver criteria.

I. Payment Error Rate Measurement (PERM) Corrective Action Plans (CAPs)

The PERM program measures and reports a national improper payment rate for Medicaid and CHIP in accordance with the requirements of the PIIA, which requires government agencies to identify, report, and reduce improper payments in the government's programs and activities. The implementation guidance in Appendix C of the Office of Management and Budget (OMB) Circular No. A–123 [72] requires executive branch agency heads to review their programs and activities annually and identify those that may be susceptible to significant improper payments. For programs under our purview deemed susceptible to significant improper payments, we must obtain a statistically valid estimate of the annual amount of improper payments, implement a plan to reduce improper payments, and report annually in the Agency Financial Report. Through the measurement of three components, FFS, managed care, and eligibility, the PERM program annually yields estimates of Medicaid and CHIP improper payments via a longstanding 17-State-per-year,[73] 3-year rotation whereby each State is measured once every 3 years, not every year. All 50 States and the District of Columbia are reflected in the national Medicaid and CHIP improper payment rates from the most recent three years of measurements. In FY 2025, the Medicaid and CHIP overall improper payment rates were 6.12 percent and 7.05 percent, respectively.

We take broad steps to reduce Medicaid and CHIP improper payments at the Federal level, but Medicaid and CHIP are Federal-State partnerships and States administer their Medicaid programs, therefore bearing primary responsibility to minimize and adequately address improper payments and their root causes. States, for example, must develop and implement State-specific PERM CAPs, with the existing process described at § 431.992. In accordance with the requirements at § 431.992(a), States are required to develop a separate CAP for Medicaid and CHIP for each improper payment rate measurement. Each CAP must be designed to reduce improper payments in the respective program based on the State's analysis of the causes of improper payments in the FFS, managed care, and eligibility components. Paragraphs (a)(1) and (2) require each plan to address all errors included in the State improper payment rate and all deficiencies and, for eligibility, to evaluate whether actions intended to reduce eligibility errors will also avoid increases in improper denials.

To meet the requirements at § 431.992(b), States' CAPs are required to include, at a minimum: (1) an analysis of errors associated with improper payments, (2) the corrective actions to be implemented to address the root causes of improper payments, (3) an implementation schedule for each corrective action that must include a plan for monitoring the effectiveness of corrective actions, and (4) an evaluation of the previous PERM-related corrective actions.

To meet the requirements at § 431.992(c), a State must submit a CAP to CMS following a PERM review, and implement it no later than 90 calendar days after CMS posts its Medicaid or CHIP improper payment rates on the CMS contractor's website. Section 431.992(d) requires a State to provide CMS annually, and upon request, CAP implementation progress updates. Section 431.992(e) requires that each State with an eligibility improper payment rate over the allowable threshold of 3 percent for consecutive PERM years submit updates on the status of corrective action implementation to us every other month. Status updates must include, but are not limited to the following: (1) details on any setbacks along with an alternate corrective action or workaround; (2) actual examples of how the corrective actions have led to improvements in operations, and explanations for how the improvements will lead to a reduction in the number of errors and in the State's next PERM eligibility improper payment rate; and (3) an overall summary on the status of corrective actions, planning, and implementation that demonstrates how the corrective actions will provide the State with the ability to meet the 3 percent threshold.

As discussed previously in this proposed rule, § 431.1010 outlines the criteria States must meet to be eligible for a good faith waiver of a disallowance under section 1903(u) of the Act when a State's PERM eligibility improper payment rate exceeds the 3-percent threshold. Section § 457.628(a) applies the PERM requirements, including the good faith waiver framework to CHIP in the same manner as Medicaid. These include implementation of PERM CAPs in accordance with § 431.992 and participation in the MEQC program in accordance with subpart P (§§ 431.800 through 431.820). As discussed elsewhere in this proposed rule, we propose to replace § 431.1010 with § 455.804. The proposed § 455.804 would establish the good faith waiver framework for disallowances arising from the proposed beneficiary eligibility audits. Under proposed § 455.804(b)(1) CMS would assess whether the State implemented the eligibility-related elements of its most recent CMS approved PERM CAPs in accordance with § 431.992.

1. State Submission of a Combined Medicaid and CHIP PERM CAP

Current PERM CAP regulations at § 431.992(a) require States to develop separate CAPs for Medicaid and CHIP errors and deficiencies (§ 431.992 applies to both programs). Through our experience administering PERM CAPs and working with States throughout the CAP development and review process, we have found the separate CAP submission requirement creates inefficiencies for States and for CMS. We believe a more streamlined approach would reduce administrative burden and more effectively achieve PERM CAP goals.

[72] *https://www.whitehouse.gov/wp-content/uploads/2021/03/M-21-19.pdf.*

[73] Beginning with 2027 PERM reporting year (RY), Puerto Rico will participate in PERM's 3-year rotation used to measure improper payments. Cycle 3, including Puerto Rico, consists of 18 States (16 States, the District of Columbia, and the territory of Puerto Rico). The other two cycles consist of 17 States.

The PERM program produces separate Medicaid and CHIP improper payment rates and there may be differences between a State's Medicaid and CHIP errors. Nevertheless, we have generally found that many State errors, root causes, corrective actions, implementation activities, and evaluation methods are either identical or share sufficient commonality that could be captured in a single PERM CAP. We have long observed that in many States the same staff develop, coordinate review, clear, and submit both plans. Our current process often requires States to enter the same background information in two plans, conduct separate internal clearance processes, and respond separately to similar CMS questions on materially similar submissions.

A combined submission would allow States to complete shared administrative information once, draft common corrective actions a single time, conduct one internal clearance process rather than two sequential ones, and present related corrective actions in a coordinated manner. We acknowledge that States with fully separate Medicaid and CHIP staff may realize more modest burden reduction. For those States, the combined format would be designed so that program-specific findings and corrective actions would be presented in clearly delineated separate sections, allowing each team to identify and work within their respective program's content without having to parse an undifferentiated document. We believe this structure would preserve the benefit of a single submission while minimizing the coordination burden on States with distinct program offices.

For CMS, a single submission would streamline receipt, tracking, review, and follow-up. It would also reduce duplicative requests for information and make it easier to assess whether corrective actions are being implemented consistently across Medicaid and CHIP. A consolidated format would continue to identify Medicaid and CHIP specific findings and corrective actions in separate sections, as appropriate, so that CMS could independently evaluate compliance with the requirements applicable to each program.

We recognize the risk that a combined document could cause CMS or State staff to conflate Medicaid and CHIP requirements, findings, or corrective actions. To prevent that, the combined CAP format would require States to present Medicaid and CHIP specific findings and corrective actions in clearly labeled, separate sections. Where corrective actions would apply to both programs, States would be required to explicitly identify them as shared and confirm their applicability to each program independently. CMS reviewers would evaluate each program's section against the distinct statutory and regulatory requirements applicable to that program. We would provide States with a standardized template and accompanying guidance reinforcing that structure, and CMS staff would review combined submissions in a manner preserving independent program-level evaluation. These structural and procedural safeguards would be designed to ensure that consolidation of the submission format would not result in consolidation or confusion of the underlying program requirements. Accordingly, combining the plans would be an administrative simplification only, and would not merge, reduce, or otherwise modify the distinct statutory and regulatory obligations for Medicaid and CHIP.

We thus propose to amend § 431.992(a) to require States to submit a combined PERM CAP that would address, as applicable, Medicaid and CHIP PERM errors and deficiencies. The combined CAP would remain subject to all existing substantive requirements, including those at § 431.992(a)(1) and (2). We also propose a technical correction in paragraph (a)(1) to replace the cross-reference to § 431.960(f)(1) with § 431.960(f), which identifies the errors included in State improper payment rates.

Should our proposal be finalized as proposed, we would issue future operational guidance providing States with technical assistance for combining Medicaid and CHIP PERM CAPs, including examples.

2. Monitoring Implementation Progress and Evaluating the Effectiveness of Each Corrective Action

Current regulations at § 431.992(b)(3)(ii)(E) require that States' PERM CAPs include a plan to monitor the effectiveness of the corrective action. Under § 431.992(b)(4), States are required to submit an evaluation of the CAP from the previous measurement cycle that addresses the effectiveness of corrective actions by assessing improvements in operations, efficiencies, error rates, improper payments, and the ability to meet our assigned improper payment rate targets. In practice, we request implementation and evaluation updates from States approximately every 6 months, consistent with § 431.992(d), which requires States to provide updates at least annually, and more frequently if requested, on CAP implementation progress.

Through our experience administering the PERM CAP process, we have found that States' CAP submissions and subsequent evaluation submissions frequently fail to adequately detail how States will evaluate individual corrective actions for effectiveness and monitor implementation progress. Without a clear evaluation plan for each corrective action, we are unable to assess whether States' corrective actions are appropriately designed to address identified errors and States are unable to demonstrate measurable progress of their corrective actions over time. This limitation has resulted in recurring findings across PERM cycles, as States have implemented corrective actions that appeared responsive to identified errors but were not designed or evaluated in a manner that enabled us or the State to determine whether they were effective. Aiming to rectify that, we have issued PERM CAP guidance through templates and technical assistance, but those efforts have been inadequate to address this gap.

Accordingly, we are proposing two amendments to § 431.992(b)(3)(ii) to address these deficiencies. First, to clarify that the monitoring plan required for each corrective action must be designed to assess the progress of its implementation, not merely its effectiveness in the abstract, we propose to amend § 431.992(b)(3)(ii)(E) to read ''A monitoring plan to monitor the progress of implementation of the corrective action.'' Second, we propose to amend § 431.992(b)(3)(ii) by adding a new paragraph (F) to read: ''A plan for evaluating the effectiveness of each corrective action that includes at a minimum the following: (1) Number of samples used for each evaluation; and (2) Frequency of each evaluation.'' Codifying these requirements in regulation would ensure that they apply uniformly across all State submissions and provide CMS with a clear regulatory basis to require States to revise CAP submissions that would not include adequate monitoring or evaluation plans. We believe it essential to add these requirements to ensure that States actively measure their CAPs' effectiveness and take steps to reduce future improper payments.

The proposed prospective evaluation plan would complement the retrospective evaluation required under § 431.992(b)(4). Paragraph (b)(3)(ii)(F) would require the State to explain at the outset how it intends to evaluate each corrective action, while paragraph (b)(4) would continue to require the State to

report the results of its evaluation of the prior measurement's corrective actions. We are not proposing a separate submission or reporting process for the new evaluation plan requirement. Instead, we propose requiring this information as part of the CAP, enabling us and the State to identify any gaps early in the process. We believe this limited upfront requirement would represent the minimum information necessary to distinguish implementation monitoring from effectiveness evaluation and reduce the need for subsequent clarification and rework.

We believe that our proposals would clarify expectations, reduce administrative burden, and reinforce the intent of the PERM CAP framework of assisting States in developing, implementing, and evaluating effective corrective actions.

3. CMS Approval, Revision, Disapproval, and Implementation of State-Specific PERM CAPs

Our experience overseeing States' efforts to reduce Medicaid and CHIP improper payment rates across the PERM fee-for-service, managed care, and eligibility components has demonstrated that effective State implementation of PERM CAPs is critical to strengthening Medicaid and CHIP program integrity by identifying and addressing the root causes of improper payments. Throughout the CAP development process, we provide guidance and work collaboratively with States to strengthen their understanding of PERM findings and the underlying causes of payment errors. We also provide States guidance on how to develop specific actions aimed at eliminating or reducing major errors, error trends, and repeat errors.

Notwithstanding our guidance describing the information States should include in their PERM CAPs, the existing regulatory framework does not establish a formal CMS approval process, uniform minimum standards for determining whether each required CAP element under § 431.992 has been sufficiently addressed, or process for requiring States to revise submissions that are incomplete, insufficient, or contain information requiring revision. In administering the PERM CAP process, we have encountered submissions that did not fully address one or more required elements or provide sufficient information to evaluate whether the proposed corrective actions were appropriately targeted and capable of being assessed for effectiveness. We recognize that this variation does not necessarily reflect a lack of State commitment to reduce improper payments. States vary in their program structures, available personnel and resources, information systems, and statutory and regulatory authorities. Moreover, certain corrective actions, particularly those requiring systems or legislative changes, may take substantial time to implement. Nevertheless, absent clear regulatory authority to review and approve PERM CAPs and require revisions when necessary, we cannot consistently ensure that each CAP meets a minimum standard to support meaningful corrective action and effective Federal oversight.

Accordingly, we propose to revise § 431.992(c) to establish a uniform approval and revision process that would set a minimum floor for the completeness and sufficiency of PERM CAP submissions while preserving State flexibility to develop and implement corrective actions that are appropriate to their unique circumstances. The proposed approval process would serve the purpose of ensuring that each CAP contains adequate information to support appropriately targeted corrective actions and meaningful Federal oversight. It would also establish a consistent process for determining whether each component-specific portion was approved, still under review, or deemed disapproved. Specifically, proposed § 431.992 would govern CAP submission, review, approval, revision, and implementation, while proposed § 455.804(b)(1) would govern how CMS considers approval of the applicable eligibility portion and implementation of its corrective actions when assessing the PERM CAP condition for a good faith waiver. CMS would make these assessments separately for Medicaid and CHIP.

Under proposed § 431.992(c)(1), a State would be required to submit its combined Medicaid and CHIP CAP to CMS for approval and begin implementing corrective actions no later than 90 calendar days after CMS posts its Medicaid and CHIP improper payment rates on the CMS contractor's website. Because CMS posts both program rates on the same date, that date would start the initial submission and implementation period. This initial period is distinct from the 90-calendar day revision period that would begin with CMS' initial written notice of CAP issues under proposed § 431.992(c)(2)(i), discussed below. CMS would separately review the Medicaid and CHIP portions of the combined CAP and, within each program, separately review the eligibility and non-eligibility (fee-for-service and managed care) portions. CMS would approve each portion meeting the requirements of proposed § 431.992(a) and (b) and would notify the State in writing of each approval. CMS would follow the applicable procedures in proposed § 431.992(c)(2) before disapproving a portion. This component-specific structure would permit CMS to approve compliant portions independently and preserve separate program level review.

Under proposed § 431.992(c)(2)(i), if we determined that any portion of a State's proposed CAP failed to meet the criteria of proposed § 431.992(a) or (b), we would provide the State with an initial written notice identifying the issues in the CAP to be resolved. Such notice would include, for example, a request for additional information or other written communication clearly identifying the issues and revisions needed. The notice would identify the deadline for submission of the revisions and explain the approval and disapproval procedures applicable to that portion. For an eligibility portion, the notice would explain both the deemed disapproval rule and the exception for a timely revised portion that remains under CMS review (described below). This initial written notice would be provided to the State even in those circumstances where no separate written determination would be required for deemed disapproval. The State would be required to revise and resubmit the affected plan or program specific portion, as requested by CMS, until attaining CMS' approval.

Under proposed § 431.992(c)(2)(ii), a State would have 90 calendar days from the date of CMS' initial written notification identifying issues under paragraph (c)(2)(i) to submit a revised CAP, or affected portion of the CAP, addressing the identified issues and satisfying the applicable requirements in proposed § 431.992(a) and (b). A revised submission would not restart the 90-day revision period. CMS would work with the State during that period and communicate in writing any remaining issues identified through its review. The State would be responsible for submitting an approvable revised portion by the deadline. The pending review exception described below would protect a timely revised eligibility portion that CMS had not finished reviewing from being deemed as disapproved. We anticipate that many States would be able to obtain CAP approval well before the end of the 90-day period, and would strongly encourage that, while the full timeframe would provide additional time for States to resolve more complex issues.

- *Eligibility portions.* Under proposed § 431.992(c)(2)(iii)(A), an eligibility portion not approved by the end of the

90-calendar day revision period would be deemed disapproved for the applicable PERM year, except when CMS review of the most recent revision submitted within that period would remain pending. When the exception would not apply, deemed disapproval would occur at the end of the correction period, without separate written notice of disapproval determination. Following a deemed disapproval, States would be required to continue working toward submission of an approvable eligibility portion of the CAP that meets the applicable requirements of proposed § 431.992(a) and (b) after the 90-day period had ended. CMS' subsequent written approval would supersede the earlier deemed disapproval of that portion for the applicable PERM review year, as provided in proposed § 431.992(c)(2)(v). Such approval status would inform CMS' assessment under proposed under proposed § 455.804(b)(1).

- *Pending CMS review exception.* Under proposed § 431.992(c)(2)(iii)(B), CMS would communicate in writing when review of a timely revised eligibility portion remained pending at the correction deadline. That portion would remain under review, rather than be deemed disapproved, whether or not CMS had issued the status communication by the deadline. The status communication would neither approve nor disapprove the portion.
- *Completion of pending CMS review.* Under proposed § 431.992(c)(2)(iii)(C), CMS would approve the eligibility portion if it met the applicable requirements of proposed § 431.992(a) and (b). Otherwise, CMS would issue a written disapproval identifying the unmet requirements. The disapproval determination would take effect when CMS issued the written notice.
- *Non-eligibility portions.* Under proposed § 431.992(c)(2)(iv), fee-for-service and managed care portions would remain subject to CMS review and approval, but the eligibility-specific deemed disapproval rule would not apply. After the revision period and completion of its review, CMS would issue a written disapproval identifying the unmet requirements for any non-eligibility portion that does not meet proposed § 431.992(a) and (b). The disapproval would take effect when CMS issued the notice. The failure to obtain approval of a non-eligibility portion of the combined CAP within the 90-calendar day revision period would not affect whether the State satisfied the Medicaid and CHIP eligibility portion of the PERM CAP condition for a good faith waiver under proposed § 455.804(b)(1).
- *Continuing obligation and later approval.* Under proposed § 431.992(c)(2)(v), a State would remain required to revise and resubmit each unapproved CAP portion until CMS approval, including after the revision period or a deemed or written disapproval. This continuing obligation would apply to both eligibility and non-eligibility portions.

We also propose to clarify States' implementation obligations before and after CMS approval. Under proposed § 431.992(c)(3), a State would be required to begin implementing the corrective actions within the initial submission period and follow the implementation schedule in its most recently submitted, unapproved CAP while CMS review was pending, including during the revision period and after a disapproval unless CMS directed the State in writing to defer, modify, or discontinue a specific action. Revision or disapproval of one portion would not, by itself, require the State to restart corrective work in another portion or repeat work consistent with the approved CAP. CMS would request additional information or revisions to an affected CAP portion as necessary to address the identified issues and determine whether that portion meets the requirements of proposed § 431.992(a) and (b). This would limit requests to information needed for review while allowing changes to an action CMS finds insufficient or inappropriate.

Together, the initial written notice, defined revision period, independent approval of compliant portions, pending-review protection, and continuing revision and implementation requirements would make the process more predictable and limit unnecessary work. Deemed disapproval would apply only to eligibility portions as provided in proposed § 431.992(c)(2)(iii)(A). A timely revised eligibility portion still under review at the revision deadline would remain pending until CMS approved it or issued the written disapproval described in proposed § 431.992(c)(2)(iii)(C).

We seek comment on the proposed approval, revision, disapproval, and implementation process, including the 90-calendar-day revision period, the distinction between deemed and written disapproval, the pending-review exception and status communication, and the treatment of later approval in the good faith waiver assessment. We also seek comment on whether the requirements of § 431.992(a) and (b) provide States sufficient clarity to develop approvable CAPs. Should there be such need, we may address any such concerns through future rulemaking or the issuance of additional guidance.

4. Semi-Annual Reporting Requirements for States With an Eligibility Improper Payment Rate Above 3 Percent for Consecutive Cycles

Current PERM CAP regulations at § 431.992(e) require States with a Medicaid and/or CHIP eligibility improper payment rate over the 3 percent allowable threshold for consecutive PERM years to submit updates to CMS every other month on the status of eligibility-related corrective action implementation. Sections 431.992(e)(1) through (3) require States to provide the following information: (1) details on any setbacks along with an alternate corrective action or workaround; (2) examples of how the corrective actions have led to improvements in operations, and explanations for how the improvements will lead to a reduction in the number of errors and the State's next PERM eligibility improper payment rate; and (3) an overall summary on the status of corrective actions, planning, and implementation that demonstrates how the corrective actions will provide the State with the ability to meet the 3 percent threshold.

We have found over time that this every other month reporting cadence is excessive, as it does not permit States the necessary time to implement and evaluate corrective action effectiveness in a meaningful way. We believe we could better attain the goals of an enhanced reporting requirement while reducing State and CMS burden with a less frequent reporting cadence that would allow States longer to evaluate the effectiveness of corrective actions and report on their status and outcome.

Accordingly, we propose to implement a biannual (every 6 months) reporting requirement for States with a Medicaid and/or CHIP eligibility improper payment rate over the 3 percent allowable threshold for consecutive PERM years, which would begin 2 months after our formally approving a State's PERM CAP. We believe that new reporting cadence would be a more rational approach better reflecting operational realities within a State. We also believe that the 2-month interval before the first report needs to be submitted would provide States a reasonable period to begin implementing approved corrective actions before the first status update would be due, rather than requiring a report before implementation had meaningfully begun. We further propose to end a States' reporting obligation before we post the State's improper

payment rate for the next applicable PERM cycle, reflecting the inherent lag between the conclusion of corrective action reporting and the availability of new rate data that would determine whether the State had met the 3 percent threshold. We believe that anchoring the start and end of the reporting obligation to these two events—formal CAP approval and the posting of the next cycle's improper payment rate—would provide States an attainable timeline and avoid a reporting requirement extending into a period when new performance data would better demonstrate a State's progress than would status updates.

We recognize that States may face consecutive PERM cycles in which their eligibility improper payment rate remains over the 3 percent threshold, requiring approval of a new or updated CAP for each subsequent cycle. We propose that each such reporting window be cycle-specific, meaning that a new 6-month reporting period would begin based on CMS' approval of the CAP for that subsequent cycle, rather than treating reporting as a single continuous obligation spanning multiple PERM cycles. This approach would ensure that each reporting window would reflect the specific corrective actions approved for that cycle, and avoid confusion where a State's reporting obligations might otherwise overlap or become disconnected from the CAP actually in effect.

We also propose to clarify the scope of the required status updates when only one program would exceed the 3 percent threshold. Because § 431.992(e) would apply when a State's Medicaid and/or CHIP eligibility improper payment rate would exceed the allowable threshold, a State could exceed the threshold with respect to just one program. In such a circumstance, we propose to require that the State's status updates address only the program exceeding the threshold, irrespective whether both are out of compliance. We believe this approach would appropriately focus the reporting requirement on the program for which corrective action would be needed while avoiding the unnecessary reporting burden for a program whose improper payment rate would be within the allowable threshold. We seek comments on whether the every 6 months reporting period is an appropriate length of time or if the time period should be decreased.

J. Program Integrity CAPs

Several provisions of section 1902 of the Act address States' responsibilities related to Medicaid program integrity, including requirements concerning the proper and efficient administration of the State plan and safeguards against unnecessary utilization and inappropriate payments. Section 1936 of the Act established the MIP, authorizing the Secretary to contract with eligible entities to conduct audits, investigations, education, and training in support of State anti-fraud efforts. Through these authorities, CMS conducts audits of various areas of risk or vulnerability, including State program integrity audits of high-risk service areas, beneficiary eligibility audits, and Medical Loss Ratio (MLR) audits, all of which may result in findings and recommendations requiring States to take specific corrective actions. Currently, when a program integrity audit identifies a State as out of compliance with Federal Medicaid requirements, CMS issues a final audit report describing the findings of noncompliance and recommended corrective actions for the State to address and correct the identified deficiencies. As part of such CMS oversight activities, we often request that States develop and submit CAPs to address identified findings. CMS also works collaboratively with States to provide technical assistance and education, including through the Medicaid Integrity Institute (MII), and works with States to develop and oversee their CAPs at the conclusion of PERM reviews.

Despite our robust Medicaid and CHIP oversight and continuous improvement efforts, we continue to identify recurring State program integrity operation errors that manifest in repeat audit findings.[74] For example, our State Program Integrity Audits have historically assessed States' compliance with Federal Medicaid FFS (part 455, subparts A to F) and managed care (part 438, subparts A to K) program integrity standards. Even in States that have previously developed and implemented CAPs, too often these State Program Integrity Audits identify significant and repeat findings. Common areas of regulatory non-compliance include managed care contract compliance, high-risk provider identification, lapses in conducting independent audits, managed care overpayment reporting requirements, payment suspension policies/procedures, and verification of beneficiary services. In addition, we have encountered challenges obtaining timely and complete corrective action from States following State Program Integrity Audits. For example, States have sometimes failed to submit or revise CAPs in a timely fashion, provide requested information regarding implementation progress, or meet timelines established through the audit follow-up process. Our existing regulations do not establish a uniform mechanism for requiring and overseeing CAPs in such situations. Recurring audit findings, particularly when States fail to adequately take corrective action, underscore our need for a clearer and more consistent regulatory framework defining State obligations to develop and implement CAPs in response to CMS audit findings and providing specific regulatory requirements against which to assess States' compliance.

Accordingly, pursuant to the Secretary's general rulemaking authority under section 1102 of the Act and the Medicaid administrative authority under section 1902(a)(4) of the Act, we propose to establish standardized regulatory requirements governing program integrity CAPs to ensure that States identify and address programmatic vulnerabilities and findings of regulatory non-compliance identified through CMS oversight activities. Specifically, we propose to amend 42 CFR part 455 by adding a new subpart G (§ 455.600, *et seq.*), titled Requirements for Program Integrity Corrective Action Plans. These proposed requirements would be intended to promote greater consistency, transparency, and accountability in how States identify and correct deficiencies identified in the Medicaid program through CMS program integrity oversight activities. The proposals in this Subpart would apply exclusively to Medicaid; CHIP corrective action would continue to be governed by applicable provisions of part 457.

We propose to add a new § 455.602 establishing standardized requirements governing Program Integrity CAPs, including when a CAP would be required, the information it would be required to contain, CMS review and approval procedures, and State implementation and monitoring responsibilities. Under proposed § 455.602(a), when a CMS State Program Integrity Audit identifies Medicaid statutory or regulatory requirement noncompliance, our final audit report would identify the findings, if any, for which the State would be required to develop a Program Integrity CAP. Not every finding of noncompliance in every audit would necessarily require a CAP.

[74] CMS' State Program Integrity Review reports are available on the CMS website, here: *https://www.cms.gov/Medicare-Medicaid-Coordination/Fraud-Prevention/FraudAbuseforProfs/StateProgramIntegrityReviews.*

For example, we may determine that a CAP is unnecessary when a State demonstrates that it has fully corrected the identified deficiency before issuance of the final audit report and no further corrective action or monitoring is necessary to bring the State into and maintain compliance with the applicable Federal requirement. Where we would determine that a CAP was necessary for one or more findings, our final audit report would identify those findings and the State would be required to develop a single program integrity CAP addressing each finding for which corrective action was required.

We propose in new § 455.602(b) to define four criteria that States would have to include in each Program Integrity CAP and that would serve as a basis for us to evaluate its appropriateness. Satisfying these four criteria would be necessary to ensure that implementation of the Program Integrity CAP could meaningfully and effectively mitigate the identified program integrity risks, with the ultimate goal of reducing future Medicaid improper payments and fraud, waste, and abuse. Similar to the PERM CAP requirements specified at § 431.992(b), we propose at § 455.602(b) that each program integrity CAP would be required to include the following elements: (1) a root cause analysis to identify the specific programmatic causes to which each finding of noncompliance would be attributed; (2) the specific corrective action(s) that would be implemented to address each finding of noncompliance and bring the State into compliance; (3) an implementation schedule for each corrective action that would have to include an estimated timeline for implementation, contact information for key personnel responsible for implementation, and a monitoring plan to track the status and progress of implementation of the corrective action; and (4) a plan for evaluation of the effectiveness of each corrective action and how it would rectify the finding(s) of non-compliance.

We propose at § 455.602(c) that if the final audit report requires a program integrity CAP under paragraph (a) of this section, the State would be required to submit the CAP to CMS no later than 30 calendar days after the date of the final audit report, unless we were to grant a good-cause extension. While the proposed 30-day timeframe would be shorter than the 90-day PERM CAP timeframe under § 431.992(b), the program integrity audit and review process would differ from the PERM review process as the audit and review topics would be much narrower and States would review and provide responses to draft audit reports in advance of the issuance of final audit reports. As such, we believe States would be able to submit any required program integrity CAP within 30 calendar days of the date on the final audit report. We seek comment on this proposed timeframe, including whether and in what circumstances an extension might be appropriate.

Based on our experience with implementing PERM program corrective actions and other oversight efforts, we believe a CAP approval process would strengthen the CAP framework by helping ensure that CMS and States have a shared understanding of how findings and vulnerabilities would be addressed and mitigated. We propose to include a new § 455.602(c)(1) that would require States to submit program integrity CAPs to CMS for review and approval. Should CMS determine that a submitted CAP would not adequately address the audit findings or otherwise fail to satisfy the requirements of § 455.602(b), CMS would return the CAP to the State for revision and resubmission. We believe this review process would help ensure that approved CAPs were sufficient to address the deficiencies identified in the audit.

Further, to ensure that States would satisfactorily implement and execute the actions described in their approved program integrity CAPs, we propose at new § 455.602(c)(2) that States would be required to provide updates and verify the effectiveness of their CAP implementation at every milestone deadline established in the approved CAP and upon request by CMS. We would establish that frequency in our notice of approval of the State's CAP.

Finally, we propose at § 455.602(d) to clarify that the proposed Program Integrity CAP framework would not limit, delay, or condition CMS' exercise of any administrative action otherwise authorized under Federal law. Accordingly, where the applicable requirements for another administrative action are satisfied, CMS could, as appropriate, pursue such an action before, concurrent with, or after requiring a Program Integrity CAP. For example, section 1904 of the Act authorizes the Secretary, after reasonable notice and opportunity for hearing, to withhold further payments to a State upon determining that the State plan no longer complies with the requirements of Section 1902 of the Act or that the State's administration of the plan fails to comply substantially with those requirements. Accordingly, were CMS to determine that the applicable requirements for a withholding under section 1904 of the Act and § 430.35 were satisfied, the proposed Program Integrity CAP process would not require CMS to await completion or failure of a CAP before pursuing withholding. This proposal would not expand or otherwise modify the Secretary's existing withholding authority under section 1904 of the Act, § 430.35, or any other existing authorities. We seek comment on these proposals.

K. Medicaid Fee-for-Service (FFS) Overpayment Reporting (60-Day Rule)

Section 1128J(d)(1) of the Act requires a person who has received an overpayment to report and return the overpayment to the Secretary, the State, an intermediary, a carrier, or a contractor, as appropriate. The Act also requires that person to notify, in writing, the entity to which it returns the overpayment of the reason for the overpayment. Section 1128J(d)(2) of the Act requires individuals receiving overpayments under Medicaid or Medicare to report and return the overpayment by the later of (i) 60 days after the date on which the overpayment was identified; or (ii) the date any corresponding cost report is due, if applicable. Section 1128J(d)(3) of the Act specifies that any overpayment retained by a person after the deadline for reporting and returning an overpayment is an obligation subject to enforcement under the False Claims Act (FCA) (as defined in 31 U.S.C. 3729(b)(3)). Under section 1128J(d)(4)(C)(i) of the Act, the term ''person'' refers to any provider of services, supplier, Medicaid managed care organization, Medicare Advantage organization, or Prescription Drug Plan sponsor. Section 1128J(d)(4)(C)(ii) of the Act excludes beneficiaries from the definition of person.

Section 1903(d)(2) of the Act and § 433.312 outline States' obligations, with certain exceptions, to return the FFP associated with provider overpayments within a specified timeframe, regardless of whether they have successfully recovered those overpayments. This regulatory framework ensures State accountability and the appropriate management of Federal funds.

This proposed rule would implement the requirements of section 1128J(d) of the Act for the reporting and returning of overpayments in Medicaid FFS, the remaining CMS program to which this statutory provision applies for which regulatory requirements have not been issued. We previously issued rules implementing the requirements of

section 1128J(d) of the Act in the Original Medicare (42 CFR part 401, subpart D), Medicare Part C & D Risk Adjustment Data (§ 422.326), Medicare Part D (§ 423.360), and Medicaid Managed Care (§ 438.608) programs. To best ensure consistent application of the same provision of law across CMS programs, these proposed policies are modeled upon the Medicare FFS regulations found at § 401.305.

Consistent with this statutory requirement that arises outside of the Medicaid Act (instead, at Title XI of the Act), this proposal would establish direct requirements on Medicaid providers (which is atypical for our Medicaid regulations) by specifying a timeframe by which a person must report and return overpayments to the State and establish a standard for when an individual has identified an overpayment. Consistent with regulations at §§ 433.320 and 433.322, our proposal would also require that States keep account of the overpayments identified and returned by providers, produce those records to us upon request, and report to us the amounts of returned overpayments to us on the CMS–64 (Quarterly Medicaid Statement of Expenditures for the Medical Assistance Program) for purposes of adjusting the State's claims for FFP. The proposed requirements would be intended to ensure compliance with applicable statutes and protect the Medicaid program against fraud and other improper payments. To implement these requirements, we propose to create a new part 455 subpart J (§ 455.900, *et seq.*), titled Reporting and Returning of Overpayments in Medicaid Fee-for-Service. Section 1128J(d) is limited to overpayments under titles XVIII and XIX, so the requirements of this proposed rule would not apply to CHIP.

Mirroring the statutory definition, we propose at new § 455.902 to define an ''overpayment'' as any funds that a person received or retained under title XIX of the Act to which the person is not entitled under such title after applicable reconciliation. Also consistent with the statute at section 1128J(d)(4)(C), we propose to define ''person'' as a provider of services or a supplier that participates under a State plan (or waiver of such plan) established under title XIX of the Act, thus excluding Medicaid beneficiaries from the definition. Although the term 'supplier' is not commonly used in Medicaid, we propose to include it in the definition of 'person' to track the statutory language at section 1128J(d)(4)(C) of the Act.

Consistent with the statutory requirements in section 1128J(d)(1)(A) and (B) of the Act, we propose at new § 455.904(a)(1) that a person that has received an overpayment must report and return it to, and in a form and manner specified by, the State, and include a written reason for the overpayment. Similar to Original Medicare regulations at § 401.305, we propose at new § 455.904(a)(2) that a person has identified an overpayment when the person knowingly receives or retains an overpayment, and that the term ''knowingly'' has the meaning set forth in 31 U.S.C. 3729(b)(1). Specifically, under the proposed rule, a person would have identified an overpayment if they had actual knowledge of the existence of the overpayment or acted in reckless disregard or deliberate ignorance of the overpayment. This proposed standard for an ''identified overpayment'' would align with the statutory obligation in section 1128J(d)(4)(A) of the Act, which provides that the terms ''knowing'' and ''knowingly'' have the meaning given those terms at section 31 U.S.C. 3729(b)(1) of the Federal civil False Claims Act.

Also similar to Medicare FFS regulations at § 401.305(b), we propose at new § 455.904(b) that a person who has received an overpayment from a Medicaid FFS program must report and return the overpayment to the State by the later of: (i) 60 days after the date on which the overpayment was identified, or (ii) the date any corresponding cost report is due, if applicable. These proposed timeframes mirror the statutory requirements at section 1128J(d)(2) of the Act.

Additionally, we propose at new § 455.904(c)(1) that States would be required to establish a mechanism for a person to report to the State when an overpayment was identified. We also propose to specify at new § 455.904(c)(2) that States would be required to return the Federal share of the overpayments to us on the CMS–64 for purposes of adjusting the State's claims for FFP consistent with current requirements. Because overpayments are not eligible for FFP, the Federal share of any identified overpayments would need to be refunded to us and adjusted through the State's normal financial adjustment process. Under existing regulations at part 433, subpart F, and subject to limited exception, a State has 1 year from the date of discovery of an overpayment to recover or seek to recover the overpayment before the Federal share must be refunded to us, and importantly the State must refund the Federal share of the overpayment to us irrespective of whether the State has recovered the overpayment from the provider. This proposed rule would not alter these existing requirements. Similar to regulations at § 433.322, we also propose at new § 455.904(c)(3) that States would be required to maintain all records related to overpayments. We also propose at new § 455.904(d) that a person would be required to use the reporting mechanism established by the State to report and return an identified overpayment. Similar to related Original Medicare regulations, we propose that any person reporting and returning an overpayment calculated via a statistical sampling methodology and extrapolation would be required to describe that statistically valid sampling and extrapolation methodology in their report to the State, which the State would be required to maintain and make available to CMS upon request pursuant to paragraph (c)(3).

In addition, consistent with section 1128J(d)(3) of the Act, we propose at new § 455.904(e) that any overpayment retained by a person after the deadline for reporting and returning it would be considered an obligation for the purposes of the False Claims Act (FCA) at 31 U.S.C. 3729(b)(3).

Finally, we propose at new § 455.904(f) that overpayments would be required to be reported and returned to the State only if a person identifies the overpayment within 6 years of the date the overpayment was received. This limitation on the lookback period would be necessary to avoid imposing an unreasonable burden or cost on providers and would be consistent with related Original Medicare regulations at § 401.305(f). We seek comment on this lookback period and whether a longer or shorter lookback period would be more appropriate to address State-specific processes, such as whether there are claim/cost-report reopening limitations that could impact overpayments that would otherwise be required to be reported and returned.

Importantly, and notwithstanding our proposal to codify statutory requirements, Medicaid providers are, and since its enactment have been, subject to section 1128J(d) of the Act's statutory overpayment report and return provisions and could face potential FCA liability, Civil Monetary Penalties Law (CMPL) liability, and exclusion from Federal health care programs for failing to report and return an overpayment. Additionally, Medicaid FFS providers must continue to comply with States' current procedures when States identify an overpayment and issue a demand letter. Medicaid FFS providers are also

responsible for ensuring their Medicaid claims are accurate and proper and are encouraged to have effective compliance programs to avoid receiving or retaining overpayments. Should this rule be finalized as proposed, the overpayment-related requirements would be applicable to States 6 months after publication of the final rule. We invite comment on these proposals.

L. Medicaid and CHIP Managed Care Oversight Policies

1. Background

Beneficiaries enrolled in Medicaid managed care plans receive part or all of their Medicaid services from health care providers that are paid by managed care plans under contract with the State. In return, the managed care plan usually receives a per member per month (PMPM) payment, commonly referred to as a capitation payment, from the SMA for providing a specified benefit package. These are known as risk-based arrangements, where the capitation payment rate must be actuarially sound and projected to provide for all reasonable, appropriate, and attainable costs as required by the terms of the contract (438.4(a)). Managed care plans receive capitation payments, usually monthly, for each ''Medicaid-eligible enrollee'' (§ 438.3(c)(2)) regardless of whether the enrollee utilizes services that month. Capitation rates also account for certain administrative costs, including program integrity operations. States are required to specify in their contracts with managed care plans the applicable policies governing the disposition of recovered overpayments, including whether a plan may retain a recovered overpayment or must remit it to the State.[75] Those retention policies do not apply to recoveries retained under the FCA or through other Federal investigations, including other investigations by CMS and its contractors where the Federal government retains any recovered FFP.[76]

As part of our ongoing efforts to strengthen Medicaid program integrity, we have identified several risks and vulnerabilities that may contribute to Medicaid managed care overpayments. These include issues related to the definition of ''Medicaid-eligible enrollee,'' the requirements and timeframes for managed care plans to report changes in enrollee circumstances to the State, and the circumstances under which States must return the Federal share of Medicaid managed care overpayments to CMS. Having identified these issues, we propose rulemaking here to address these risk and vulnerabilities.

a. Medicaid and CHIP Eligibility Determination Requirements for Beneficiary Residency and Death

For most beneficiaries, under titles XIX and XXI of the Act and implementing regulations, Medicaid and CHIP eligibility is subject to periodic renewal, generally on an annual basis or every six months depending on eligibility category.[77] Separately, States conduct eligibility redeterminations when there is a change in a beneficiary's circumstances that may affect eligibility. For example, a beneficiary moving out of a State or dying would prompt an SMA to redetermine eligibility.[78] States may learn of such change in circumstance through a variety of sources, including Federal and State databases, another SMA, a managed care plan, or, with respect to an out-of-State move, possibly a beneficiary him or herself.

Managed care plans in Medicaid and CHIP are subject to reporting requirements under § 438.608(a)(3) to promptly notify the State when they receive information about changes in an enrollee's circumstances that may affect eligibility. Once notified, the State must redetermine the beneficiaries' eligibility, which involves multiple steps and sometimes may be a multi-month process. Based on the type of reported change, the State may require additional information from a beneficiary (or their family or representative) and must provide them with a reasonable time to respond. Should a State determine that a beneficiary is ineligible, it must provide the beneficiary advance notice and fair hearing rights as appropriate under §§ 435.917 and 918; § 435.952(d), as applicable; and Part 431 Subpart E, including the 10-day advance notice requirement in § 431.211, subject to applicable exceptions. Because the State must consider eligibility on all bases before determining ineligibility under § 435.916(f)(1) and must continue to furnish Medicaid to eligible individuals until they are found to be ineligible under § 435.930(b), the State may keep the enrollee in a managed care plan and continue to make capitation payments until the beneficiary's eligibility is terminated[79] or they are disenrolled from the plan and enrolled in the State's FFS program.

States have the option to contract with a managed care plan to cover beneficiaries in the entire State or to cover only those within a certain geographical area within the State. This creates State-specific circumstances where a change in address may impact a beneficiary's enrollment in managed care. For this reason, SMAs must clearly communicate to beneficiaries the importance of timely reporting changes in residence and must promptly act on reported changes to maintain accurate managed care enrollment and ensure that capitation payments align with applicable service area requirements when the change would trigger a redetermination of Medicaid eligibility. However, typically, moving within a State would not be considered a ''change in circumstance'' resulting in a redetermination of eligibility. However, as stated earlier, managed care enrollment may be affected by an in-State move, and therefore, may require the SMA to change a beneficiary's enrollment in a managed care plan if they are unable to access their existing provider network and covered services, or no longer live within the managed care plan's contracted service area.

States have broad flexibility to determine how they identify beneficiaries who are deceased. Currently, Federal requirements do not mandate that SMAs' eligibility systems routinely interface with a specific source to obtain death data; however, many States rely on Federal, State, or local databases that contain death data, such as State or local vital records systems. The Social Security Administration maintains a national record of death, the Death Master File (DMF), which is updated monthly with beneficiary death information. In 2024, to facilitate timely redeterminations based on death and reduce the risk of improper FFS and capitation payments, we reminded States of availability of data sources[80] that interface with the DMF and may be used to conduct regular, including monthly, matches against enrollment and payment data.[81]

[81] CMS Guidance. ''Identifying Deceased Medicaid Enrollees.'' April 25, 2024. *https://*

Continued

In the final rule titled ''Medicaid and Children's Health Insurance Program (CHIP) Programs; Medicaid Managed Care, CHIP Delivered in Managed Care, and Revisions Related to Third Party Liability'' (81 FR 27498) (''2016 Managed Care final rule''), we strengthened managed care plans' responsibilities to protect against overpayments due to enrollees' loss of Medicaid eligibility, such as through death or other changes in circumstances. Revisions made there to § 438.3(c)(2) clarified that MCOs, PIHPs, and PAHPs) may only retain capitation payments for ''Medicaid-eligible enrollees,'' which excludes deceased individuals.[82] That rule also finalized § 438.608(a)(3), which required States to include managed care contract provisions mandating that managed care plans promptly report to SMAs changes in an enrollee's circumstances—specifically death [83] or a change in residence—that may affect the enrollee's eligibility [84] to enable SMAs to promptly redetermine and, when appropriate, terminate eligibility.

The 2016 Managed Care final rule finalized § 438.608(a)(3) because we recognized that managed care plans are a valuable source for beneficiary information, such as current address and date of death.[85] We have encouraged States to increase their reliance on managed care plans for updating beneficiary information to prevent procedural terminations as they resumed normal eligibility operations following the COVID–19 Public Health Emergency (PHE).[86] [87] To mitigate the risk of beneficiaries inappropriately losing Medicaid coverage, we suggested that States consider partnering with managed care plans to verify and update beneficiary contact information, including addresses.[88] We believe many SMAs and managed care plans have sufficient experience and procedures in place to continue reporting and monitoring address changes, consistent with § 438.608(a)(3).

b. Overpayments for Ineligible Enrollees

Various CMS oversight and technical assistance efforts discussed later in this section have demonstrated that changes in residence or death are not always promptly reported to the State, preventing timely redetermination of Medicaid eligibility and, when appropriate, termination of Medicaid coverage. We also reviewed 2024 Medicaid enrollment data and estimated that an average of approximately 1.2 million Americans per month were concurrently enrolled in two or more State Medicaid or CHIP programs.[89] As a result of delays in the identification and reporting of these changes and concurrent enrollments, SMAs may continue making capitation payments for individuals who are no longer Medicaid-eligible and would not reasonably be expected to utilize any Medicaid services due to time and distance.

A 2022 HHS–OIG study on multi-State enrollment found that nearly all States made capitation payments for beneficiaries who were concurrently enrolled in a Medicaid managed care program in two States.[90] The OIG's analysis found that in August 2019 payments were made for 208,254 concurrently-enrolled beneficiaries, generating Medicaid program costs of approximately $72.9 million for capitation payments associated with beneficiaries in one of the two concurrently enrolled States, and in August 2020 payments were made for 327,497 concurrently-enrolled beneficiaries at a cost of $117.1 million. Additionally, the OIG released a report in 2023 summarizing findings from 14 State audits that assessed death data between July 1, 2009 and December 31, 2019 where the OIG identified more than $249 million ($172 million Federal share) in unallowable Medicaid capitation payments that States made to managed care plans on behalf of deceased enrollees across 14 States. Of that, over $41 million (Federal share) remained uncollected as of November 2022.[91] [92] [93] [94] [95]

Our Federal oversight experience has identified a variety of causes for these overpayments, including limited access to death data (especially for deaths that occur outside of the State or territory), reliance on manual processes to terminate eligibility, data interface errors, and claims processing errors. To mitigate these overpayments, some SMAs have developed procedures to obtain death data directly from managed care plans, in accordance § 438.608(a)(3). For example, one State required that managed care plan provider network agreements include a requirement for providers to notify the managed care plan when they learn of an enrollee's death, which the plan then reports to the SMA. To ensure that States are timely made aware of relevant changes, § 438.608(a)(3) requires managed care plans to provide ''prompt'' reporting of these changes; however, we did not define prompt, nor did we require States to specify how notifications were to be received.

Enhanced reporting alone will not address all causes of these overpayments, which is why we believe clearer recovery provisions are also necessary. In response to reports that managed care plans were retaining capitation payments for deceased individuals, the 2016 Managed Care final rule added § 438.3(c)(2), which establishes that ''capitation payments may only be retained by the MCO, PIHP, or PAHP for Medicaid-eligible enrollees''. In the preamble, we explained that this limitation was

implicit in the existing regulation and that capitation payments are developed based on the services and populations that are authorized for Medicaid coverage and services covered under the contract between the State and managed care plans, and that capitation payments are made for Medicaid-eligible enrollees, which would not include deceased individuals or individuals who are no longer Medicaid-eligible.[96] However, as discussed previously, our audits and data analyses have demonstrated that, in some cases, SMAs continue to improperly pay capitation payments for individuals residing in another State and therefore ineligible for coverage, or were deceased.

c. WFTC Legislation (Pub. L. 119–21) and Capitation Overpayments

Beginning in FY 2026, section 71103 of the WFTC legislation appropriates funding to establish, by October 1, 2029, a system that CMS and States will use to prevent an individual from being simultaneously enrolled under the State plans (or waivers of such plans) of multiple States. States will be required to submit data to the system at least monthly and during each eligibility determination and redetermination. Currently, States continue to be required to participate with the Public Assistance Reporting Information System (PARIS) as required by § 435.945(d). States may elect whether to utilize interstate match results as part of their program integrity activities. To ensure States have more complete address information, sections 71103(a)(2)(B) and 71103(b)(2) of the WFTC legislation amend sections 1932 and 2103(f)(3) of the Act, respectively, to require that, beginning January 1, 2027, each contract under a State plan that a State has with MCOs, primary care case managers (PCCMs), PIHPs, or PAHPs include a provision requiring the entity or plan to promptly transmit to the State any address information received directly from enrollees or verified by the entity or plan directly with the enrollee.

Also, effective January 1, 2027, section 71104 of the WFTC legislation requires that States and the District of Columbia, but not territories, screen all Medicaid enrollees against the Death Master File (DMF) (or a successor system) no less than quarterly to determine whether Medicaid enrollees are deceased. States will be required to treat such information as factual, disenroll deceased beneficiaries with notice of fair hearing rights provided no later than the date of action consistent with 42 CFR part 431 subpart E, and discontinue any payments for medical assistance on the individual's behalf. Prior to the provisions of the WFTC legislation becoming effective on January 1, 2027, pursuant to eligibility verification regulations at §§ 435.945 and 435.952, SMAs are prohibited from acting on DMF data alone and must seek to independently verify a beneficiary's death prior to disenrollment. Once verified, an SMA can terminate coverage immediately, but not retroactively to the date of death and not for items or services furnished prior to death. Section 71104 of the WFTC legislation removes the requirement for additional verification beyond the DMF effective January 1, 2027; however, if an SMA determines that an individual was misidentified as deceased, the SMAs must reenroll the individual immediately and reinstate coverage retroactive to the date of disenrollment.

2. Proposed Policies

a. Standard Contract Requirements Relating to Capitation Payments Retention

Authority for the contracting requirements at § 438.3 is based on section 1903(m)(2)(A)(iii) of the Act (for MCOs) and section 1902(a)(4) of the Act (for PIHPs and PAHPs). Section 1903(m)(2)(A)(iii) of the Act permits Federal matching dollars for State expenditures to a risk-bearing entity for Medicaid services when ''such services are provided for the benefit of individuals eligible for benefits under this title in accordance with a contract between the State and the entity under which the prepaid payments to the entity are made on an actuarially sound basis and under which the Secretary must provide prior approval for contracts.'' We are proposing to amend § 438.3(c)(2) to retain the requirement that capitation payments may only be made by States and retained by MCOs, PIHPs, or PAHPs for Medicaid-eligible enrollees, while adding provisions that would permit States to recover capitation payments made for certain periods following an individuals' death or out-of-State relocation. We propose to add § 438.3(c)(2)(i) providing that, following the provision of notice of action with fair hearing rights in accordance with §§ 435.917 and 435.918 and part 431 subpart E, a State must recover capitation payments from MCOs, PIHPs, or PAHPs for any payment periods following the death of an enrollee when verified through the DMF, and may recover capitation payments from MCOs, PIHPs, or PAHPs for any payment periods following the date of out-of-State relocation of an individual. We note that these recovery actions would be limited to financial transactions between the State and the managed care plan and would not create any liability for Medicaid beneficiaries. At § 438.3(c)(2)(ii), we propose to add that States would be required to reimburse CMS an amount equal to the Federal share of all capitation payments subject to recovery described in proposed § 438.3(c)(2)(i), taking into account applicable differences in the Federal matching rate(s) applicable to the population, benefit, and Federal Fiscal Year. We note that under § 438.3(c)(2)(ii) States would be required to return the Federal share of capitation payments for any payment periods following the enrollee's death or date of relocation regardless of whether the State elects to recover or require the plan to return the capitation payment. The CHIP regulations at §§ 457.1201(c) and 457.1285 require CHIP managed care plans to comply with all Medicaid managed care rules established within § 438.3(c); therefore, the proposed changes to § 438.3(c)(2), if finalized, would apply to CHIP managed care plans.

This proposal would ensure that States have clear authority to recover capitation payments attributed to individuals who are deceased or who have relocated out-of-State, while the contractual provisions would establish the operational mechanism for implementing those recoveries, regardless of when the State ultimately terminated Medicaid eligibility. This proposal would make clear that existing notice, fair hearing, and eligibility-redetermination requirements would continue to apply before a State may terminate coverage and initiate capitation payment recovery from a managed care plan. As such, States would have to continue to redetermine eligibility in accordance with requirements at §§ 435.916(d) and 457.343, consider all bases of eligibility before making a determination of ineligibility as required by § 435.916(f), and furnish benefits until the individual is found to be ineligible for Medicaid and provided advance notice, as applicable, as described in §§ 431.211 and 435.930(b). Following completion of notice of action with fair hearing rights and termination of coverage,

[96] ''It is implicit in the [2016 Final Rule], and we did not propose to change, that capitation payments are developed based on the services and populations that are authorized for Medicaid coverage under the State plan which are covered under the contract between the State and the managed care plan and that capitation payments are made for Medicaid-eligible enrollees. This would not include deceased individuals or individuals who are no longer Medicaid-eligible.'' 81 FR 27537.

States would initiate recovery actions from the applicable managed care plan.

Since the 2016 Managed Care final rule, most States have included sufficiently robust contract language to adequately recover capitation payments associated with deceased individuals, but some States have shared with us that they experience challenges recovering capitation payments from managed care plans for enrollees who have relocated out-of-State. When an enrollee has relocated out-of-State, and the State makes a determination of ineligibility and disenrolls the individual after providing advance notice, covered services under the managed care plan's contract should no longer be available to the enrollee because the enrollee is no longer eligible for Medicaid within the original State. Similarly, associated capitation payments would not be consistent with the requirement that capitation rates reflect reasonable, appropriate, and attainable costs under the contract (§ 438.4(a)) because a State may only make payment to a managed care plan for ''covered services to Medicaid-eligible individuals in a manner compliant with contractual requirements'' (§ 438.3(c)(1)(ii)). Therefore, a payment made for an ineligible enrollee would not be compliant with the contract between the State and the managed care plan. While most SMAs recover capitation overpayments from plans when they are identified, some SMAs are unable to recover such payments because of insufficiently robust managed care contract language.

These challenges are largely related to an inability to identify a date on which to base the recovery. Unlike a date of death, which is recorded in national or State-based sources, such as the Social Security Administration's DMF or States' Departments of Vital Statistics, residential address changes are not routinely tracked and reported. PARIS alerts notify States when a beneficiary has relocated to another State by matching certain State and Federal data, but such alerts are generated quarterly and only if the individual interacts with certain entities in that new State such as the SMA or the Department of Motor Vehicles. In addition, States have reported challenges using PARIS because they may receive a high volume of false positive alerts,[97] the alerts may be based on delayed data,[98] or the PARIS system does not retain accessible historical data. All SMAs are required to conduct PARIS data matches, but data matching agreements do not prescribe which of the three PARIS matches (the Veterans Administration Match, Department of Defense/Office of Personnel Management Match, and the Interstate Match) SMAs must conduct, nor the frequency with which any match must be conducted.[99]

Prior to initiating capitation payment recoveries based on an out-of-State relocation, States must first define feasible policies and procedures within their managed care contracts for how they will identify when an out-of-State residential change occurs, what documentation sources can be used to establish a relocation date, and how they will resolve cases of disputed residency. The ''date of out-of-State relocation'' means the date the State determines, consistent with § 435.403 and applicable State residency requirements that the individual ceased to be a resident of the State. States would also need to include clear terms in their managed care contracts that would define how they would determine which capitation payments would be subject to recovery in instances where individuals would not report the timing of their relocation. Further, these policies should align with the Federal requirements regarding State residency at § 435.403(d), and any applicable State-based residency requirements.

SMAs must treat these types of recoveries like all other recovered overpayments resulting from situations other than fraud as outlined generally at § 433.300, which is to refund all recoveries, including ones relating to changes in circumstance, to CMS within 1 year from the date of discovery.

We believe adding a new paragraph (i) to § 438.3(c)(2) within the standard contract requirements provisions would clarify States' obligation to recover capitation payments for any payment periods following a beneficiary's date of death and States' ability to recover capitation payments for any payment periods following the date of out-of-State relocation—after making a determination of ineligibility and the provision of notice of action with fair hearing rights—and would ensure that SMAs update their managed care contract terms to clearly specify their intent to recover inappropriate capitation payments. We invite comment on these proposals.

b. Prompt Reporting of Beneficiary Changes in Circumstances (§ 438.608(a)(3))

The provision added by the 2016 Managed Care final rule at § 438.608(a)(3) did not define ''prompt'' reporting or specify how changes should be reported, and we subsequently observed considerable variation in how States implemented the regulation. To ensure uniformity, we propose to amend § 438.608(a)(3) to require that Medicaid and CHIP managed care plans and Primary Care Case Management (PCCMs) report to a State changes in an enrollee's circumstances (specifically including enrollee deaths and all verified address changes) within 30 calendar days of when a plan receives information about a change that may affect the enrollee's eligibility for or access to services covered under the contract. We also propose to amend § 438.608(a)(3)(i) to require managed care plans and PCCMs to report residence changes if provided by the enrollee or verified directly with the enrollee, including both out-of-State and in-State address changes, which would protect from improper disenrollment. In the 2016 Final Rule, we finalized ''§ 438.608(a)(3) so that managed care plans *would* notify the State of changes in the enrollee's residence and death,'' in an effort to not trigger a required notification by the managed care plan when returned mail is received because the administrative burden on States outweighed the value.[100] At the same time, we acknowledged that managed care plans ''have more direct communication with enrollees than the State and can serve as valuable sources of information relevant to the enrollee's eligibility for Medicaid.'' [101] In the decade since the 2016 Final Rule, managed care plans have expanded communication from mail and telephone to text messages, email, and member portals and mobile applications. With these additional means of communication, managed care plans and PCCMs are in a better position to verify changes in residence with less burden than the State, thus making notification to the State of the verified change in residence beneficial without being overly burdensome.

The proposed change to § 438.608(a)(3) would also implement sections 71103(a)(2)(B) and 71103(b)(2)

[98] *https://www.medicaid.gov/sites/default/files/2019-12/new-hampshire-verification-plan-template-final.pdf.*

[99] *Nearly All States Made Capitation Payments for Beneficiaries Who Were Concurrently Enrolled in a Medicaid Managed Care Program in Two States* (HHS–OIG A–05–20–00025). *https://oig.hhs.gov/documents/audit/7881/A-05-20-00025-Complete%20Report.pdf.*

[100] *https://www.federalregister.gov/d/2016-09581/p-1477.* (emphasis added).

[101] *https://www.federalregister.gov/d/2016-09581/p-1478.*

of the WFTC legislation, which mandates that States include a provision in their managed care plan and PCCM contracts that requires managed care plans to promptly transmit to the State any address information for Medicaid and CHIP enrollees that is provided to the managed care plan or PCCM directly from, or that the managed care plan or PCCM verified directly with, the enrollee. We propose to amend § 438.608(a)(3) to define this prompt-transmission requirement as requiring transmission within 30 calendar days of when a managed care plan or PCCM receives information about a change in an enrollee's circumstances, which would add clarity and consistency to the implementation of the provisions in section 71103. The CHIP regulations at §§ 457.1201(c) and 457.1285 already require CHIP managed care plans to comply with all Medicaid managed care rules established within §§ 438.3(c) and 438.608, respectively; therefore, no additional regulatory changes would be necessary to implement such changes within CHIP.

In addition, we are proposing to revise § 438.608(a)(3) to require SMAs to define the procedures for prompt notification to the State when changes in an enrollee's circumstances are to be reported, which would ensure that managed care plans and PCCMs report such changes consistently to the appropriate contacts within the SMA or delegated entity. We believe that establishing a uniform timeframe of 30 calendar days would adequately position States and managed care plans and PCCMs to comply with section 71103(a)(2)(B) and 71103(b)(2) of the WFTC legislation, which requires States to include within the managed care contract a requirement that the MCOs, PIHPs, PAHPs, and PCCMs promptly transmit verified address information for enrollees. When a State receives information indicating an enrollee may have moved out-of-State through this process, it must treat such information as a potential change in circumstances and promptly redetermine eligibility in accordance with §§ 435.916(d), 457.343, and 435.952(d). We believe 30 calendar days is a reasonable amount of time for a managed care plan or PCCM to transmit any new address information to the State and would allow States to initiate timely redetermination procedures and potentially prevent transmitting to managed care plans and PCCMs inappropriate capitation payments for enrollees who have a change that may affect their eligibility, or to facilitate enrollment into a new plan for enrollees who continue to be State residents but have moved out of their current plan's service area. However, we are seeking comments on whether 30 calendar days is an appropriate length of time or if the time period should be increased or decreased. In addition, we interpret section 71103(a)(2)(B) of the WFTC legislation's use of ''promptly'' to apply this reporting rule to enrollees with new address information that differs from prior address information, and we would encourage States to leverage their experience from unwinding the Medicaid continuous enrollment provision at the end of the COVID–19 PHE to inform the development of these procedures and protocols.

Prompt reporting of an enrollee's death by managed care plans would also support provisions included within section 71104 of the WFTC legislation. Beginning January 1, 2027, section 71104 of the WFTC legislation requires States on at least a quarterly basis to review the DMF, or a successor system that provides beneficiary death data, and disenroll any deceased beneficiaries. The WFTC legislation also requires that States reinstate Medicaid coverage for a beneficiary who was erroneously disenrolled. We believe that managed care plans may learn of potential deaths or erroneous disenrollments before State or Federal entities. However, Section 71104 of the WFTC does not permit States to treat death information from managed care plans as factual, and States will still be required to verify beneficiary death consistent with § 435.952(d).

Section 438.608(a)(3) currently requires States to require managed care plans' prompt reporting to them when the managed care plan receives information about changes in an enrollee's circumstances that may affect the enrollee's eligibility, including change of address and death. We believe that adding a 30-calendar-day timeframe to report out-of-State moves and deceased beneficiary status would strengthen existing requirements and enhance program integrity and eligibility verification in Medicaid.

We propose that these revisions would be applicable for rating periods beginning on or after January 1, 2027. We believe this would also provide sufficient opportunity for States to include these new reporting requirements and recovery provisions in their new or renewed managed care contracts. We invite comment on these proposals.

c. Standard Contract Requirements Relating to Overpayments

We also propose to revise § 438.608(d)(1)(iv) to clarify that the overpayment retention policies specified under § 438.608(d)(1) do not apply to amounts recovered and retained under the False Claims Act or through other Federal or State audits or investigations, including those conducted by Federal agencies, such as CMS, or their contractors. This clarification is intended to ensure that recoveries resulting from fraud, waste, or abuse audits and investigations are treated consistently with existing authorities governing such actions and are not subject to duplicative recovery or return requirements under this section. As stated in the 2016 final rule, ''[a]lthough States have the flexibility to implement overpayment retention contract provisions, the policies in the contract would not prohibit the Federal government from retaining the appropriate share of recoveries of overpayments due to their own audits and investigations''.[102] We seek comment on this this proposed revision.

M. Request for Information on Payment Deductions Under 42 CFR 447.10(i)

CMS is issuing this request for information (RFI) to solicit public input on strengthening consent, documentation, and recordkeeping requirements related to payment deductions made under 42 CFR 447.10(i). This regulation governs deductions from certain Medicaid provider payments to make payments to third-parties, including labor unions, on behalf of the provider. CMS is concerned that existing State practices for obtaining and documenting practitioner consent to such deductions may be insufficient to protect practitioners' First Amendment rights and the financial integrity of the Medicaid program. CMS is also considering how to implement a related statutory prohibition enacted under section 71121 of Pub. L 119–21, the WFTC legislation. The information received in response to this RFI could inform potential future agency action.

1. Background

Section 1902(a)(32) of the Act generally prohibits Medicaid payment for care or services furnished to an individual to anyone other than the individual or the provider furnishing the care or services, unless a statutory exception applies. CMS' implementing regulation at § 447.10 identifies the

[102] *https://www.federalregister.gov/d/2016-09581/p-1523.*

persons to whom State Medicaid payments may be made and the limited circumstances under which payment may be made to others.

Under CMS' current interpretation of section 1902(a)(32) of the Act, as established in a 2022 final rule [103] and pursuant to regulations at § 447.10(i), the payment prohibition in section 1902(a)(32) of the Act does not apply to State payments to third-parties on behalf of individual practitioners for those individual practitioners' health insurance and welfare benefits, skills training, and other benefits customary for employees, in the case of a class of practitioners for which the Medicaid program is the primary source of revenue, if the individual practitioner voluntarily consents to such payments on their behalf.

The preamble to the 2022 final rule noted that ''most commenters stated support for the 2021 proposed rule.'' *See* 87 FR 29675, 29679 (May 16, 2022). But, at the same time, the 2022 final rule also noted that, in response to the 2021 proposed rule,[104] some commenters expressed concerns about bad actors and questionable practices for diverting Medicaid money to unions without providers' express consent, as the agency noted and described in the 2022 final rule, and argued that the consent requirements in § 447.10(i) were insufficient to protect practitioners and the financial integrity of the Medicaid program. *See* 87 FR at 29682–29683, 29686. Some commenters raised concerns about the potential for what they called the practice of ''dues skimming,'' in which a State automatically deducts union dues from a practitioner's Medicaid payment without the practitioner's affirmative consent. *Id.* at 29686. Some commenters cited *Harris* v. *Quinn,* 573 U.S. 616 (2014), and *Janus* v. *American Federation of State, County, & Municipal Employees, Council 31,* 585 U.S. 878 (2018), as examples supporting their view that such practices are impermissible and raise First Amendment concerns. *Id.*

Some commenters further described specific practices they viewed as coercive or inconsistent with the consent standard articulated in *Janus,* including so-called ''captive audience'' meetings, high-pressure tactics associated with union enrollment, and limited ability to disenroll from the union. *Id.* Commenters also expressed concern that finalizing the rule could permit States to divert Medicaid payments to unions and political campaigns. *Id.*

Despite these comments, at the time of the 2022 final rule, CMS believed the requirements at § 447.10(i), particularly the voluntary consent requirement, were sufficient from the Federal perspective and deferred to States to oversee and operationalize this requirement. *See, for example,* 87 FR at 29682–29686, 29689. Specifically, we declined to prescribe in regulation a uniform method for obtaining or documenting consent, including a written consent requirement, out of concern that doing so could conflict with State law, and we deferred to States regarding which methods of obtaining and documenting consent are sufficient. *Id.* However, since the 2022 final rule took effect, CMS has received reports suggesting that these concerns have materialized in practice. In June 2026, CMS sent letters to nine SMAs reminding them of their obligations under § 447.10(i) and of the Supreme Court's holding in *Janus.* In those letters, CMS stated that deductions made without a practitioner's voluntary and affirmative consent are inconsistent with *Janus* and may violate § 447.10. CMS directed States to review their Medicaid payment arrangements involving union dues and requested documentation sufficient to allow CMS to assess compliance.

Although the Supreme Court has not reached the specific question, the First Amendment principles articulated in *Harris* and *Janus* would appear to apply to union deductions from Medicaid payments to homecare workers and would appear to bind States in that context independently of any Federal regulation. Assuming that our understanding of the decisions is correct in this regard, any rule CMS issues with respect to union dues deductions from Medicaid payments must be consistent with those decisions and States' existing constitutional obligations are not optional: that is to say that a State's deduction of union dues from a practitioner's Medicaid payment without the practitioner's clear and affirmative prior and voluntary consent is unconstitutional regardless of whether CMS' regulations separately require it.

We are concerned that current practices in some States may not reliably ensure that consent to the deduction of union dues is obtained in a manner free from coercion or pressure. We note that § 447.10(i) applies broadly to deductions for a range of benefits, not solely union dues, but CMS believes that in the context of union dues, greater regulatory specificity regarding consent, documentation, and recordkeeping may be warranted to ensure voluntary and verifiable consent from practitioners, consistent with applicable First Amendment principles, and to ensure consistent Federal oversight across States.

Separately, section 71121 of the WFTC legislation amended section 1915(c) of the Act by adding a new paragraph (11), which establishes a new HCBS waiver option, available to States beginning July 1, 2028, under which States may provide HCBS to individuals without requiring them to meet the institutional level-of-care requirement otherwise applicable under section 1915(c). Section 1915(c)(11)(C) of the Act provides that no payments made to carry out that paragraph may be used by a State to make payments to a third-party on behalf of an individual practitioner for benefits such as health insurance, skills training, and other benefits customary for employees, in the case of a class of practitioners for which the Medicaid program is the primary source of revenue. CMS is using this RFI, in part, to inform implementation of this statutory provision.

2. Issues for Public Input

CMS continues to receive reports from practitioners and other stakeholders raising concerns regarding compliance with § 447.10(i) and applicable First Amendment principles, including practitioners reporting that consent to union dues deductions was obtained as a condition of provider enrollment, and practitioners reporting difficulty withdrawing previously given consent. These reports, together with the responses to CMS' June 2026 compliance letters, raise questions regarding whether existing State oversight and implementation of § 447.10(i) consistently ensures compliance with the voluntary consent requirement.

CMS is concerned that deduction of union dues, or other third-party payment under § 447.10(i) may in some circumstances occur without the practitioner's voluntary consent. CMS is considering whether more prescriptive Federal requirements addressing how consent to such deductions must be obtained, documented, and maintained, and how States must demonstrate compliance to CMS, are necessary to ensure the financial integrity of the Medicaid program and to safeguard practitioners' constitutional rights, consistent with *Harris* and *Janus.*

CMS is seeking additional information from States, practitioners, beneficiaries, unions, and other stakeholders to better understand current practices, the scope of the

[103] 87 FR 29675, May 16, 2022.

[104] 86 FR 41803, August 3, 2021.

potential problem, and the range of approaches that could address it, including in the context of consumer-directed service programs, where the beneficiary rather than a traditional employer may perform functions relevant to consent and payment.

3. Request for Information

CMS invites public comment on the following questions. Commenters need not respond to every question and are encouraged to provide data, examples, and supporting documentation where available. CMS is not proposing specific regulatory provisions related to this issue in this proposed rule, and nothing in this RFI should be construed as reflecting a predetermined outcome regarding any future policy development.

- What specific practices do States currently use to obtain, verify, and document practitioner consent to deductions under § 447.10(i), including deductions for union dues? How do these practices vary across States and program types (for example, fee-for-service, managed care, consumer-directed HCBS programs)?
- What roles do fiscal intermediaries, financial management services (FMS) entities, and other agents or vendors perform in administering practitioner payments, third-party deductions, and practitioner consent? On whose behalf does each entity act, who receives the Medicaid payment, and in whose name is the payment received? How do these arrangements relate to the payment arrangements addressed in § 447.10(f) and/or (i)?
- How are the respective roles of the State, the employer of record, and the fiscal intermediary defined and enforced? Who is the employer of record for self-directed or independent practitioners? What functions, including data sharing, does the fiscal intermediary perform, and under what authority?
- How do States conduct oversight (including, for example, through audits) of the fiscal intermediaries, or similar agents, as it relates to third-party payments or deductions? What oversight approaches are used, what information is collected, how frequently, and how do States act on the findings? States that have recently audited their fiscal intermediaries are encouraged to describe relevant findings from their most recent audit.
- How are the terms of collective bargaining agreements covering Medicaid practitioners relevant to State administration of deductions and payment of union dues? How would a State conduct a review, including legal review as appropriate, of such collective bargaining agreements to identify provisions that may conflict with § 447.10 or with *Janus*? What data and information would be collected, and how would a State act on the findings? States that have conducted this type of review are encouraged to describe their most recent process and findings.
- In consumer-directed service models in which the Medicaid beneficiary performs employer-related functions, what unique challenges or considerations arise in ensuring that practitioners' consent to third-party deductions under § 447.10 is voluntary? Are there additional considerations for union dues deductions?
- What processes or safeguards, if any, do States have in place to ensure that practitioners can make voluntary decisions concerning whether or not to agree to union dues deductions without coercion or improper pressure from anyone, whether in favor of or opposed to such deductions? Which individuals or entities may be involved in those interactions, and what barriers or pressures, if any, do practitioners face in exercising their choices?
- What processes or mechanisms, if any, do States have in place to: (1) allow a worker who never consented to dues deductions to avoid paying such dues; and (2) allow a worker who previously consented to union dues deductions to request revocation, subject to any applicable contractual obligations or agreed-upon revocation periods? How are disputes regarding the existence, validity, or effective date of consent or revocation resolved?
- What documentation or recordkeeping requirements would allow CMS to effectively assess State compliance with the voluntary consent requirement in § 447.10(i), without imposing unnecessary administrative burden on States or practitioners?
- What safeguards should CMS consider to ensure that consent is voluntary and not made a condition of provider enrollment or other program participation requirements?
- What data exist, or could reasonably be collected, regarding the frequency, scope, or financial magnitude of deductions made under § 447.10(i) without the voluntary consent required by that provision, or where the existence or validity of consent is disputed?
- What categories of third parties receive payments under § 447.10(i) (such as unions, benefit administrators, or other organizations), and should any future consent, documentation, or recordkeeping requirements distinguish among those categories?
- What implementation questions arise under section 1915(c)(11)(C) of the Act? What guidance, if any, would assist States in identifying payments made to carry out section 1915(c)(11) and the classes of practitioners for which the Medicaid program is the primary source of revenue, and what operational issues should CMS consider?
- What impact, including administrative, operational, or financial, might enhanced Federal consent and documentation requirements have on States, managed care plans, practitioners, fiscal intermediaries, FMS entities, and beneficiaries, particularly in consumer-directed programs?
- Are there alternative regulatory or sub-regulatory approaches that CMS should consider to address the concerns described in this RFI?
- Does the deduction of union dues from Medicaid payments to individual home care workers, with or without adequate consent, positively or negatively affect the financial integrity of the Medicaid program? If so, in what way? What evidence is there of this connection or these effects?

IV. Medicare Advantage and Medicare Part D Proposals

The Balanced Budget Act of 1997 (BBA), Pub. L. 105–33, established a new Part C of the Medicare program, known then as the Medicare+Choice (M+C) program, which became effective in January 1999. As part of the M+C program, the BBA authorized CMS to contract with public or private organizations to offer a variety of health plan options for Medicare beneficiaries. These health plans provide all Medicare Part A and Part B (also known as ''Original Medicare,'' or ''Medicare Fee-for-Service (FFS)'') benefits, and most offer additional benefits beyond those covered under the Medicare FFS program. The M+C program in Part C of Medicare was renamed the Medicare Advantage (MA) program under the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173), enacted in December 2003. The MMA updated and improved the choice of plans for beneficiaries under Part C and changed the way benefits are established and payments are made. As of calendar year 2025, over 34 million individuals receive their Medicare benefits through MA, which represents over half of the total Medicare beneficiary population.[105]

[105] CMS, *CMS Fast Facts, April 2026 Edition,* pg.1, *https://data.cms.gov/sites/default/files/2026-04/CMSFastFacts2026_508.pdf.*

The MMA also established the Medicare Prescription Drug Benefit under Part D, which began providing prescription drug coverage to Medicare beneficiaries in 2006. The Part D program operates through private plan sponsors that contract with CMS, offering coverage either through stand-alone prescription drug plans (PDPs) to supplement Original Medicare, or through Medicare Advantage prescription drug (MA–PD) plans that integrate drug coverage with all other Medicare-covered benefits. The original Part D benefit design included risk-abating mechanisms—including direct subsidy risk corridors, risk adjustment, and Federal reinsurance—enabling CMS to implement a market-based program that maintained affordable premiums over time and promoted high enrollee satisfaction. The Inflation Reduction Act of 2022 (IRA) subsequently made significant structural changes to the Part D benefit, including establishing a hard cap on annual out-of-pocket spending and authorizing the Federal Government to negotiate certain drug prices directly with manufacturers, with those changes being phased in through 2026.

Program integrity is fundamental to the proper administration of both the Part C and Part D programs. While CMS has robust program integrity controls in place, bad actors continue to find the Medicare program a financially lucrative target and use creative tactics to evade detection and adverse consequences. Accordingly, the potential for fraud, waste, and abuse (FWA) is significant, making rigorous oversight of MA organizations and Part D plan sponsors, providers, and suppliers essential to protecting both the Medicare Trust Funds and the beneficiaries who depend on these programs. Compliance oversight of our partners is also important to ensure appropriate expenditures of taxpayer dollars. For example, CMS conducts ongoing oversight of MA organizations and Part D plan sponsors through audits, monitoring, data analysis, and other program integrity activities to ensure compliance with Federal requirements and identify program vulnerabilities. In accordance with 42 CFR 422.504(h)(1) and 423.505(h)(1), MA organizations, Part D plan sponsors, and their employees, governing body members, and first-tier, downstream, and related entities agree to comply with Federal laws and regulations designed to prevent or ameliorate fraud, waste, and abuse. Through these oversight activities and its experience administering the Part C and Part D programs, CMS has identified opportunities to strengthen existing regulatory requirements to improve accountability and clarify program integrity standards.

A. Overview of Proposed Policies

In this proposed rule, CMS proposes to expand its implementation of the requirements set forth in Sections 2008 and 6063 of the Substance Use Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities (SUPPORT) Act, Public Law 115–271 (2018), previously implemented through the Contract Year 2022 Medicare Advantage and Part D Final Rule, which appeared in the **Federal Register** on January 19, 2021 (86 FR 5864). CMS further relies on the authority provided under section 1857(e)(1) of the Act, which authorizes the Secretary to include in an MA organization contract such other terms and conditions as the Secretary finds necessary and appropriate. In addition, pursuant to section 1856(b)(1) of the Act, the Secretary may establish, through regulation, other standards for MA organizations necessary to carry out the program. Pursuant to section 1860D–12(b)(3) of the Act, the provisions of section 1857—including section 1857(e)(1)—apply to Part D plan sponsor contracts in the same manner as they apply to MA organizations. Specifically, CMS relies on these provisions for its proposed expansion of mandatory fraud, waste, and abuse reporting requirements, and for the requirement to report all payment suspensions based on credible allegations of fraud. Under existing requirements at §§ 422.503(b)(4)(vi)(G)(*4*)–(*7*) and 423.504(b)(4)(vi)(G)(*4*)–(*7*), MA organizations and Part D plan sponsors are required, in accordance with §§ 422.503(b)(4)(vi)(G)(*5*) and 423.504(b)(4)(vi)(G)(*5*), to report information concerning: (1) any payment suspensions implemented by a plan sponsor, pending the investigation of credible allegations of fraud by a pharmacy, which must be implemented in the same manner as the Secretary's implementation under section 1862(o)(1) of the Act; and (2) investigations, credible evidence of suspicious activities of a provider of services (including a prescriber) or supplier, and other actions taken by the plan sponsor related to the inappropriate prescribing of opioids to the Health Plan Management System (HPMS) Fraud, Waste, and Abuse (FWA) Reporting Module. While CMS currently encourages plan sponsors to report referrals of substantiated or suspicious fraud, waste, or abuse to CMS, it is not mandatory. CMS is now proposing to make referrals of substantiated or suspicious fraud, waste, and abuse a mandatory reporting requirement, to expand plan sponsors' required reporting of payment suspensions of credible allegations of fraud against pharmacies to other provider and supplier types, and to add the definition of ''credible allegation of fraud'' to § 422.500 to ensure the Medicare Advantage program requirements align with the current definitions §§ 405.370, 423.4, and 455.2. If finalized as proposed, the requirements for mandatory reporting of fraud, waste and abuse would become effective 60 days after publication of the final rule and would be applicable January 1, 2028.

In addition, CMS is proposing changes to the regulation in Part 422 governing the MA RADV Program. These proposals include: applying extrapolation to plan year audits for payment year 2018 forward; requiring MA organizations to remit improper payments based on RADV audits, in a manner specified by CMS; and allowing MA organizations to request a hardship exception, as prescribed by CMS, if they cannot submit medical records timely as required.

B. Mandatory Reporting of Fraud, Waste, and Abuse

1. Introduction

All MA organizations (including MA organizations offering prescription drug plans (MA–PD plans)) and standalone Part D plan sponsors (collectively referred to herein as ''plan sponsors'') are required to adopt and implement effective compliance programs to oversee provider networks, benefits, and payments. Compliance programs must include measures that prevent, detect, and correct non-compliance with CMS' program requirements, as well as measures that prevent, detect, and correct fraud, waste, and abuse.[106] As part of these requirements, plan sponsors must establish and implement procedures and systems for promptly responding to compliance issues as they are raised, investigating potential compliance problems as identified in the course of self-evaluations and audits, correcting such problems promptly and thoroughly to reduce the potential for recurrence, and ensuring ongoing compliance with CMS requirements.

An important part of plan sponsors' fraud, waste, and abuse initiatives involves sharing potential leads, trends,

[106] *See* Section 1860D–4(c)(1)(D) of the Act and §§ 422.503(b)(4)(vi) and 423.504(b)(4)(vi).

or schemes resulting from the plan sponsors' own data analytics and investigative findings through referrals to CMS, which helps accomplish the following objectives:

- Enables CMS to perform data analysis to identify fraud schemes;
- Facilitates and increases transparency among CMS and plan sponsors through the exchange of information;
- Provides information and education to plan sponsors on potential fraud, waste, and abuse issues, enabling plan sponsors to investigate and take action based on such data;
- Improves fraud detection across the Medicare program, allowing for increased recovery of taxpayer dollars and enrollee expenditures (for example, premiums, co-insurance, other plan cost-sharing);
- Provides more effective support, including fraud leads, to plan sponsors and law enforcement; and
- Increases beneficiary safety through increased oversight measures.

In this proposed rule, CMS proposes to expand upon the existing requirements in sections 2008 and 6063 of the Substance Use Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities (SUPPORT) Act that CMS previously addressed in the Contract Year 2022 Medicare Advantage and Part D Final Rule (referred to as the ''January 2021 final rule'' (CMS–4190–F2)). Beginning January 1, 2022, the requirements finalized in the January 2021 Final Rule allowed CMS and plan sponsors to share data and information regarding unscrupulous actors, take swift action based on such data and information, and achieve enhanced outcomes in our efforts to fight the opioid crisis. In addition, the January 2021 Final Rule paved the way for more effective referrals to law enforcement based on plan sponsor reporting, ultimately resulting in reduced beneficiary harm and greater savings for the Medicare program.

2. SUPPORT Act Sections 2008 and 6063

The SUPPORT Act was signed into law on October 24, 2018, and amended sections 1860D–12(b) and 1859 of the Act to alleviate the nationwide opioid crisis by: (1) reducing the abuse and supply of opioids; (2) helping individuals recover from opioid addiction and supporting the families of these persons; and (3) establishing innovative and long-term solutions to the crisis. Part of CMS' role in overseeing the Medicare program is to ensure that payments are made correctly and that fraud, waste, and abuse is stemmed; failing to do so endangers the Trust Funds and can result in harm to beneficiaries. For example, a practitioner engaging in abusive behavior by prescribing unnecessary opioids to Medicare patients poses a threat to the health and safety of the affected beneficiaries, and Trust Fund dollars paid for drugs that were not needed. As a result, several of the SUPPORT Act provisions addressed important program integrity and payment safeguard topics.

Sections 2008 and 6063 of the SUPPORT Act authorized plan sponsors to suspend payments to pharmacies based on credible allegations of fraud; required plan sponsors to report such payment suspensions to CMS through a secure program integrity portal; and clarified that a fraud hotline tip, without further evidence, does not constitute sufficient evidence of a credible allegation of fraud. The SUPPORT Act also required CMS to establish a secure program integrity portal to facilitate referrals and data sharing related to fraud, waste, and abuse among CMS, plan sponsors, and Medicare program integrity contractors; define, through rulemaking, substantiated or suspicious activities of fraud, waste, or abuse and inappropriate opioid prescribing; establish reporting requirements for plan sponsors related to fraud investigations and inappropriate opioid prescribing; and provide plan sponsors with regular program integrity information and fraud, waste, and abuse trend reports.

3. CMS Actions and Contract Year 2022 Medicare Advantage and Part D Final Rule (January 2021 Final Rule)

In accordance with the requirements of sections 2008 and 6063 of the SUPPORT Act, CMS established a secure web-based program integrity portal for plan sponsor reporting in the HPMS FWA Reporting Module in the Contract Year 2022 Medicare Advantage and Part D Final Rule (January 2021 Final Rule) (86 FR 5864). Since January 1, 2022, under §§ 422.503(b)(4)(vi)(G)(*4*)–(*5*) and 423.504(b)(4)(vi)(G)(*4*)–(*5*) and the associated timelines for reporting found at §§ 422.503(b)(4)(vi)(G)(*6*) and 423.504(b)(4)(vi)(G)(*6*), plan sponsors must report to CMS: (1) payment suspensions pending investigations of credible allegations of fraud by pharmacies; and (2) information concerning investigations, credible evidence of suspicious activities of a provider (including a prescriber) or supplier related to the inappropriate prescribing of opioids, and other actions taken by the plan sponsor related to the inappropriate prescribing of opioids. In addition, under §§ 422.503(b)(4)(vi)(G)(*3*) and 423.504(b)(4)(vi)(G)(*3*), plan sponsors should have procedures to voluntarily self-report potential fraud or misconduct in the MA or Part D programs to CMS. When plan sponsors choose to report a referral of substantiated or suspicious activities of a provider or supplier related to fraud, waste, or abuse, they must also use the HPMS FWA Reporting Module to do so in accordance with §§ 422.503(b)(4)(vi)(G)(*5*) and 423.504(b)(4)(vi)(G)(*5*). In the January 2021 Final Rule, CMS also defined (or, for ''credible allegation of fraud'' in § 405.370, updated the definition for) the following terms:

- ''Substantiated or Suspicious Activities of Fraud, Waste, or Abuse'' (§ 422.500 and 423.4)
- ''Inappropriate Prescribing'' (§§ 422.500 and 423.4)
- ''Credible Allegation of Fraud'' (§§ 405.370, 423.4, and 455.2)
- ''Fraud Hotline Tip'' (§§ 405.370, 422.500, 423.4, and 455.2)

Lastly, in accordance with §§ 422.503(b)(4)(vi)(G)(*7*) and 423.504(b)(4)(vi)(G)(*7*), CMS provides a quarterly report to plan sponsors of data or information reported under these provisions.

4. Proposals To Strengthen the Reporting Requirements

In its July 2018 report, ''The MEDIC Produced Some Positive Results but More Could be Done to Enhance its Effectiveness,'' [107] the HHS–OIG recommended that CMS require plan sponsors to report Part C and Part D fraud and abuse incidents and the corrective actions taken to a centralized system. The OIG added that requiring plan sponsors to use some centralized system to report suspect providers and pharmacies, investigative information, and corrective actions would provide the Medicare Drug Integrity Contractor (MEDIC) and plan sponsors with valuable information to use in their fraud-fighting efforts. The report also stated this would enhance CMS oversight by providing transparency into the plan sponsors' efforts to protect the program from fraud, waste, and abuse.

[107] Department of Health and Human Service, Office of the Inspector General, ''The MEDIC Produced Some Positive Results but More Could be Done to Enhance its Effectiveness'' (2018), *https://oig.hhs.gov/reports/all/2018/the-medic-produced-some-positive-results-but-more-could-be-done-to-enhance-its-effectiveness/*.

The OIG recommendation for CMS to require plan sponsors to report Part C and Part D fraud and abuse incidents and the corrective actions taken to address them to a centralized system has remained an open recommendation since the release of the 2018 report, which means that it is considered by the OIG to be unimplemented. Through the authority given in the SUPPORT Act, CMS has taken steps to address the OIG's recommendations to require plan sponsor reporting, establish a centralized reporting system, and increase transparency in the Medicare Part C and Part D program, measures that are outlined in the current regulations for plan sponsors in §§ 422.503(b)(4)(vi)(G)(*4*) though (*6*) and 423.504(b)(4)(vi)(G)(*4*) though (*6*). But while plan sponsors are required to report certain information to CMS under these regulations, plan sponsors retain discretion to report referrals involving substantiated or suspicious activities of a provider (including a prescriber) or supplier related to fraud, waste, and abuse. In fact, CMS has found that less than half (46 percent in CY 2025) of Medicare Part C and Part D plan contracts reported referrals of substantiated or suspicious fraud, waste, and abuse to CMS. Additionally, while plan sponsors are required to report payment suspensions based on credible allegations of fraud by pharmacies, only 19 percent of Medicare Part C and Part D plan contracts reported any payment suspensions based on credible allegations of fraud to CMS in CY 2025, including both pharmacies and other provider and supplier types.[108] The low reporting rates for these two measures suggest there may be a significant number of additional substantiated or suspicious FWA referrals and payment suspensions for other provider or supplier types that are not being reported to CMS, severely limiting CMS' visibility into potential program integrity risks.

CMS believes that maximized reporting is essential to the oversight of the Medicare Part C and Part D programs, as this information is valuable to CMS and assists with investigations, referrals to law enforcement, and trend monitoring. In addition, more stringent reporting requirements would allow CMS to appropriately share the more robust data on referred providers or suppliers with other MA organizations and Part D contracts on a quarterly basis to assist in their own internal fraud, waste, and abuse efforts. Data transparency and information sharing with our partners are at the core of CMS' strategy to crush fraud. Therefore, CMS is proposing to: (1) require all plan sponsors to report all referrals of substantiated or suspicious fraud, waste, and abuse to CMS through the HPMS FWA Reporting Module; and (2) expand plan sponsor reporting of payment suspensions based on credible allegations of fraud by pharmacies to all provider and supplier types. As CMS is proposing to expand the reporting of payment suspensions for credible allegations of fraud beyond pharmacies, CMS is also proposing to add the definition of ''credible allegation of fraud'' to § 422.500, to ensure the Medicare Part C program requirements align with the current definitions at §§ 405.370, 423.4, and 455.2.

CMS is also proposing to specify that plan sponsors must report any inappropriate opioid prescribing to CMS no later than 30 days after the closing of the previous quarter. Based on our Part C and Part D program integrity audits and questions submitted to the HPMS FWA Reporting Module mailbox, we have determined that plan sponsors have some misperception regarding the expectations for the requirements at §§ 422.503(b)(4)(vi)(G)(*6*)(*ii*) and 423.504(b)(4)(vi)(G)(*6*)(*ii*). When the HPMS FWA Reporting Module was first launched, consistent with these regulations, plan sponsors were required to submit referrals related to inappropriate opioid prescribing, and, at their discretion, submit separate referrals involving substantiated or suspicious fraud, waste, and abuse. Feedback from plan sponsors indicated that these requirements imposed a burden because referrals related to inappropriate opioid prescribing were often part of a larger referral of substantiated or suspicious fraud, waste, and abuse. As such, CMS updated the HPMS FWA Reporting Module, beginning November 17, 2023,[109] to include a new question regarding referrals for substantiated or suspicious fraud, waste, and abuse. The new question allows plan sponsors to indicate whether the referral relates to the inappropriate prescribing of opioids. If the plan sponsor indicates that a referral is related to the inappropriate prescribing of opioids, the system will automatically mark the contracts as having submitted a referral of inappropriate prescribing of opioids for that quarter and no further action is needed by the plan sponsor. But when a plan sponsor has not submitted a referral of substantiated or suspicious fraud, waste, and abuse related to inappropriate prescribing of opioids, the system requires the plan sponsor to submit a ''No'' response as a quarterly attestation to satisfy the quarterly reporting requirement. Ultimately, this system action is meant to ensure (and allow CMS to ensure) that plan sponsors are actively aware they are submitting no referrals of inappropriate prescribing for a given quarter. However, to best ensure that plan sponsors report any inappropriate opioid prescribing to CMS no later than 30 days after the closing of the previous quarter, CMS is also proposing to specify this submission requirement.

Consistent with the previous discussion, we are also proposing the following regulatory provisions to implement mandatory reporting of referrals of substantiated or suspicious fraud, waste, and abuse and to expand the reporting of payment suspensions based on credible allegations of fraud. Our proposals modify or supplement existing regulations, while others establish new regulatory subparagraphs altogether. Regulations related to Part C are addressed in 42 CFR part 422; those pertaining to Part D are addressed in 42 CFR part 423.

CMS is also proposing to add the definition of ''credible allegation of fraud'' to § 422.500. This term is already defined in §§ 405.370, 423.4, and 455.2. Consistent with those regulations, we propose ''credible allegation of fraud'' under § 422.500 to mean an allegation from any source, including but not limited to any of the following: (1) fraud hotline tips verified by further evidence; (2) claims data mining; and (3) patterns identified thorough provider audits, civil false claims cases, and law enforcement investigations. Allegations are considered to be credible when they have indicia of reliability.

Current §§ 422.503(b)(4)(vi)(G)(*3*) and 423.504(b)(4)(vi)(G)(*3*) state that plan sponsors should have procedures to voluntarily self-report potential fraud or misconduct related to MA organizations and Part D programs, respectively, to CMS or its designee. To mitigate terminology confusion among plan sponsors and align regulatory language with what is currently reported to CMS via the HPMS FWA Reporting Module, CMS proposes to remove the existing language at §§ 422.503(b)(4)(vi)(G)(*3*) and 423.504(b)(4)(vi)(G)(*3*). The existing language at §§ 422.503(b)(4)(vi)(G)(*4*) and 423.504(b)(4)(vi)(G)(*4*), which

[108] Plan sponsors that do not report referrals or payment suspensions as required to the HPMS FWA Reporting Module may be subject to a CMS audit or compliance action in accordance with §§ 422.504(e)(2) and 423.505(e)(2) and sections 1857(c) and (h) of the Act, respectively.

[109] November 3, 2023, HPMS Memo titled ''Health Plan Management System (HPMS) Program Integrity (PI) Portal for Fraud, Waste, and Abuse (FWA) Reporting Module Enhancements.''

require reporting of payment suspensions and credible evidence of suspicious activities, would be redesignated as §§ 422.503(b)(4)(vi)(G)(*3*) and 423.504(b)(4)(vi)(G)(*3*), respectively. CMS proposes to modify subparagraph (i) to the redesignated §§ 422.503(b)(4)(vi)(G)(*3*) and 423.504(b)(4)(vi)(G)(*3*) to remove the reference to ''by a pharmacy,'' to allow for and require reporting for all payment suspensions implemented based on credible allegations of fraud. In addition, CMS proposes to add a subparagraph (iii) to the redesignated §§ 422.503(b)(4)(vi)(G)(*3*) and 423.504(b)(4)(vi)(G)(*3*) to include the new mandatory requirement for plan sponsors to report any referrals of substantiated or suspicious activities of a provider of services (including a prescriber) or a supplier related to fraud, waste, and abuse for initiating or assisting investigations conducted by CMS, or its designee, a Medicare program integrity contractor, or law enforcement partners.

Specifically, the redesignated §§ 422.503(b)(4)(vi)(G)(*3*) and 423.504(b)(4)(vi)(G)(*3*) would state that the MA organization or Part D plan sponsor, respectively, ''must have procedures to identify, and must report to CMS or its designee, any of the following in the manner described in paragraphs (b)(4)(vi)(G)(*3*) and (*4*) of this section,'' and would read and require as follows in subsections (*i*) through (*iii*):

- Any payment suspension implemented by a MA organization or Part D plan sponsor, pending investigation of credible allegations of fraud, which must be implemented in the same manner as the Secretary's requirement under section 1862(o)(1) of the Act.
- Any information concerning investigations, credible evidence of suspicious activities of a provider of services (including a prescriber) or supplier, and other actions taken by the MA organization or Part D plan sponsor related to the inappropriate prescribing of opioids.
- Any substantiated or suspicious activities of a provider of services (including a prescriber) or a supplier related to fraud, waste, or abuse for initiating or assisting investigations conducted by CMS, or its designee, a Medicare program integrity contractor, or law enforcement partners.

Secondly, we propose to redesignate §§ 422.503(b)(4)(vi)(G)(*5*) and 423.504(b)(4)(vi)(G)(*5*), which currently describe the location where the data must be submitted, as §§ 422.503(b)(4)(vi)(G)(*4*) and 423.504(b)(4)(vi)(G)(*4*), respectively, and modify the language of the redesignated provisions by replacing the individual reporting requirements language in the current §§ 422.503(b)(4)(vi)(G)(*5*) and 423.504(b)(4)(vi)(G)(*5*) with citation to the associated reporting requirements in redesignated §§ 422.503(b)(4)(vi)(G)(*3*) and 423.504(b)(4)(vi)(G)(*3*) described earlier. Because referrals of substantiated or suspicious fraud, waste, and abuse would be mandatory reporting requirements, there would be no need to distinguish between which referrals were required and which were voluntary. Removing this language streamlines the citation and makes it clearer for the reader. In addition, we propose to redesignate §§ 422.503(b)(4)(vi)(G)(*6*)(*i*)–(*ii*) and 423.504(b)(4)(vi)(G)(*6*)(*i*)–(*ii*), which require plan sponsors to report information within certain timeframes, as subsections (*i*) and (*ii*) at §§ 422.503(b)(4)(vi)(G)(*4*) and 423.504(b)(4)(vi)(G)(*4*), respectively. The reporting timeframes at §§ 422.503(b)(4)(vi)(G)(*6*)(*i*)–(*ii*) and 423.504(b)(4)(vi)(G)(*6*)(*i*)–(*ii*) are identified separately in the current regulation; however, for clarity, CMS believes it is logical to instead list the timeframes plan sponsors must report the data within as subsections to §§ 422.503(b)(4)(vi)(G)(*4*) and 423.504(b)(4)(vi)(G)(*4*), which specify where the data must be submitted. We also propose the following in these redesignated provisions: correcting a missing space in ''7day'' at § 423.504(b)(4)(vi)(G)(*6*)(*i*); updating referenced citations to align with the proposed redesignations and revisions; updating references from ''plan'' to ''MA organization'' or ''Part D plan sponsor,'' as applicable, to ensure consistency with the existing terminology used at §§ 422.503 and 423.504; adding the timeframe for reporting referrals of substantiated or suspicious fraud, waste, and abuse to match the existing timeframes for reporting inappropriate opioid prescribing; and removing information regarding the first data reporting period, as it is now outdated. Specifically, these proposed changes at redesignated §§ 422.503(b)(4)(vi)(G)(*4*) and 423.504(b)(4)(vi)(G)(*4*) would state that the MA organization or Part D plan sponsor, respectively, ''must submit data, as specified in this section, in the program integrity portal when reporting the referrals described in paragraph (b)(4)(vi)(G)(*3*) of this section. The data categories, as applicable, include referral information and actions taken by the ''MA organization,'' or ''Part D plan sponsor,'' as appropriate, ''on the referral.'' In addition, §§ 422.503(b)(4)(vi)(G)(*4*)(*i*)–(*ii*) and 423.504(b)(4)(vi)(G)(*4*)(*i*)–(*ii*) would read as follows:

- The MA organization or Part D plan sponsor is required to notify the Secretary, or the Secretary's designee, of a payment suspension described in paragraph (b)(4)(vi)(G)(*3*)(*i*) of this section 7 days prior to implementation of the payment suspension. The MA organization or Part D plan sponsor may request an exception to the 7-day prior notification to the Secretary, or the Secretary's designee, if circumstances warrant a reduced reporting time frame, such as potential beneficiary harm.
- The MA organization or Part D plan sponsor is required to submit the information described in paragraph (b)(4)(vi)(G)(*3*)(*ii*) and (*iii*) of this section, or the absence of any information, no later than January 30, April 30, July 30, and October 30 of each year for the preceding periods, respectively, of October 1 through December 31, January 1 through March 31, April 1 through June 30, and July 1 through September 30.

Lastly, we propose to redesignate §§ 422.503(b)(4)(vi)(G)(*7*)(*i*) and 423.504(b)(4)(vi)(G)(*7*)(*i*), which refer to CMS' requirements for providing plan sponsors a data report, as §§ 422.503(b)(4)(vi)(G)(*5*) and 423.504(b)(4)(vi)(G)(*5*), respectively. In addition, we propose to modify the language in redesignated (b)(4)(vi)(G)(*5*) to update the citation reference. We also propose to redesignate §§ 422.503(b)(4)(vi)(G)(*7*)(*ii*) and (*iii*) and 423.504(b)(4)(vi)(G)(*7*)(*ii*) and (*iii*), which describe requirements of the data report, as §§ 422.503(b)(4)(vi)(G)(*5*)(*i*) and (*ii*) and 423.504(b)(4)(vi)(G)(*5*)(*i*) and (*ii*). In addition, we propose to delete the existing subparagraph (iv) as it is no longer relevant. The language at §§ 422.503(b)(4)(vi)(G)(*5*) and 423.504(b)(4)(vi)(G)(*5*) would state that CMS provides MA organizations or Part D plan sponsors, respectively, ''with data report(s) or links to the information described in paragraphs (b)(4)(vi)(G)(*3*)(*i*) through (*iii*) of this section no later than April 15, July 15, October 15, and January 15 of each year based on the information in the portal, respectively, as of the preceding October 1 through December 31, January 1 through March 31, April 1 through June 30, and July 1 through September 30.'' In addition, (*i*) and (*ii*) of the redesignated regulation would read:

- Include administrative actions, pertinent information related to opioid overprescribing, and other data determined appropriate by the Secretary in consultation with stakeholders.

• Are anonymized information submitted by MA organizations or Part D plan sponsors without identifying the source of such information.

C. Medicare Advantage Risk Adjustment Data Validation (RADV) Reforms

In this proposed rule, we discuss the proposed changes to the regulations in Part 422 governing the MA program. We are proposing to reissue provisions concerning the use of extrapolation in RADV audits and our decision not to apply an FFS Adjuster when calculating RADV overpayments due to a U.S. District Court for the Northern District of Texas vacating, for procedural reasons, similar provisions of a CMS final rule published February 1, 2023.[110] We are also proposing new provisions related to improvements to the hardship exception process in RADV audits.

The following is a summary of the proposed changes included in this proposed rule:

• We propose to reissue § 422.300 as it currently appears including the phrase ''collection of improper payments.''

• We propose to reissue and amend § 422.310(e) Validation of risk adjustment data, to: (1) apply extrapolation in RADV audits for payment year 2018 and subsequent payment years, using CMS published payment error calculation methodologies; (2) require MA organizations to remit improper payments identified through RADV audits, in a manner specified by CMS and consistent with applicable HHS and CMS overpayment collection regulations; and (3) allow MA organizations to request a hardship exception, subject to CMS' discretionary review, when they are unable to timely submit medical records as required.

• We propose to reissue § 422.311 RADV Audit Dispute and Appeal Processes, to apply revised audit requirements and methodologies.

1. Introduction

a. General Overview of Risk Adjustment Payments in the MA Program

Section 1853(a)(1)(C) of the Act requires that CMS adjust payments made to MA organizations based on risk. Risk adjustment ensures that CMS is able to make appropriate and accurate payments for enrollees with differences in costs. Making accurate payments to MA organizations also ensures we are safeguarding Federal taxpayer dollars.

The risk adjustment model employed to adjust MA payments is known as the CMS Hierarchical Condition Category (CMS–HCC) model. This model functions by categorizing the International Classification of Disease, Clinical Modification (ICD–CM)[111] diagnosis codes into disease groups called Hierarchical Condition Categories, or HCCs. Each HCC includes diagnosis codes that are related clinically and have similar cost implications. MA enrollee HCCs are assigned based on data submitted to CMS by MA organizations. The HCCs contribute to an enrollee's risk score, which is used to adjust a base payment rate. Essentially, the higher the risk score for an enrollee, the higher the expected health care cost for the enrollee and the greater payment that is received by the MA organization.

The CMS–HCC model was first used for payment in 2004 and has been recalibrated numerous times since then. When CMS recalibrates the CMS–HCC risk adjustment model, it uses data from Medicare FFS claims, using diagnoses in one year to predict the following year's expenditures. Claims data from beneficiaries enrolled in the Medicare FFS program are used to calibrate the CMS–HCC model, which produces a set of coefficients that represent the marginal (additional) cost of each medical condition and demographic factor reported for a given beneficiary. (For additional information, see the Medicare Managed Care Manual, CMS Pub. 100–16, Chapter 7, section 70.1.)[112] These coefficients are then divided by the average predicted expenditure for the population, also known as the model denominator, to generate relative factors that reflect expected costs relative to the average cost FFS beneficiary. Each beneficiary's relative factors are added together to yield a risk score for that beneficiary that is used to adjust the base payment rate for that beneficiary.

For a diagnosis to be acceptable for risk adjustment, it must be from an acceptable provider type (that is, hospital inpatient facilities, hospital outpatient facilities, or physicians), coded in accordance with ICD–CM coding guidelines, result from a face-to-face visit, and be documented in a medical record, and MA organizations are required to ensure the accuracy and integrity of risk adjustment data submitted to CMS.[113]

CMS uses diagnostic information submitted by MA organizations to calculate risk scores. MA organizations are required to submit data that is accurate, complete, and truthful to the best of their knowledge. CMS pays prospectively and issues final payment through a reconciliation run. As such, the diagnosis data the MA organizations submit do not undergo CMS validation prior to use for risk score calculation and payment. CMS validation audits occur post payment reconciliation. CMS conducts post-payment audits of MA organization-submitted diagnosis data from a selection of MA organizations for specific payment years to ensure that the diagnoses they submitted are supported by their enrollees' medical records. These audits are called contract-specific MA RADV program audits. While RADV audits are intended to identify improper risk adjustment payments, they are not specifically designed to detect fraud,[114] nor are they intended to identify all improper diagnosis submissions made by MA organizations for risk adjustment payment.[115]

b. Purpose and Description of Contract-Specific RADV Audits

The improper payment measurements conducted each year by CMS that are included in the HHS Agency Financial Report, as well as audits conducted by the HHS–OIG, have demonstrated that the MA program is at high risk of improper payments. In Fiscal Year (FY) 2025 (based on calendar year 2023

[110] *Humana Inc.* v. *Becerra,* 801 F.Supp.3d 624 (N.D. Tex. 2025), *appeal docketed sub nom. Humana Inc.* v. *Kennedy,* No. 25–11082 (5th Cir. Nov. 21, 2025).

[111] The ICD–CM is a modification of the ICD, authorized by the World Health Organization, used as a source for diagnosis codes in the United States. The ICD–CM has been adopted by the Secretary as the standard medical data code set. *See* 45 CFR 162.1002.

[112] *https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/mc86c07.pdf.*

[113] Medicare Managed Care Manual, CMS Public Law 100–16, chapter 7, section 40 (2014).

[114] For example, the Department of Justice is responsible for pursuing potential violations of the False Claims Act, which includes certain elements of knowledge.

[115] CMS contract-specific RADV audits focus on specific MA organization contracts to determine and recoup improper payments. The HHS–OIG also undertakes audits of MA organizations, similar to RADV audits, as part of its oversight functions. CMS can collect the improper payments identified during those HHS–OIG audits, including the extrapolated amounts calculated by the OIG. CMS also oversees the Part C Improper Payment Measurement, previously referred to as ''national RADV,'' to determine a program-wide improper payment rate as required by the Payment Integrity Information Act of 2019 (Pub. L. 116–117). In addition to risk adjustment oversight conducted by CMS, HHS also oversees HHS–RADV, which was created by the Affordable Care Act (Pub. L. 111–148 and Pub. L. 111–152) to strengthen the integrity of the Affordable Care Act Marketplace by validating the accuracy of data submitted by issuers that is used to calculate the amount of funds transferred to insurers based on the actuarial risks of the individuals they enroll. Neither the Part C Improper Payment Measurement nor the HHS–RADV programs are subject to the provisions outlined in this proposed rule.

payments), we estimated that CMS made over $21 billion in Part C overpayments, a figure representing over 5 percent of total Part C payments.[116] The HHS–OIG has also released several reports over the past few years that demonstrate a high risk of improper payments in the MA program,[117] and for several years has identified the MA program as one of the top management and performance challenges facing HHS due to the high amount of improper payments.[118] The Medicare program, including MA, has also been identified by the Government Accountability Office (GAO) as a high-risk program due to the risk of substantial improper payments and actions were needed to reduce these risks.[119]

RADV audits are our main corrective action for overpayments made to MA organizations when there is a lack of documentation in the medical record to support the diagnoses reported for risk adjustment. We select MA organizations for RADV audits using a risk-based approach that focuses on HCCs that are more likely to be in error as identified by prior RADV audits, Part C Improper Payment Measurements, OIG findings, and other vulnerability analyses. RADV audits occur after the final risk adjustment data submission deadline for the MA contract year and after CMS calculates final payments, as described at § 422.310(g).[120]

RADV audits are intended to confirm that risk adjustment conditions (that is, diagnoses that map to HCCs) reported by MA organizations are supported by medical record documentation. RADV audits confirm the presence of the diagnoses related to the enrollee's HCC profile through the review of medical records submitted by the MA organizations for the purpose of a RADV audit; specifically, medical records from hospital inpatient facilities, hospital outpatient facilities, and physicians/practitioners (excluding suppliers of durable medical equipment, prosthetics, orthotics, and supplies). Risk adjustment discrepancies are identified when an enrollee's HCCs used for payment, which are based on MA organization self-reported data, differ from the HCCs assigned based on the medical record review performed by CMS through the RADV audit process. Risk adjustment discrepancies for sampled enrollees can then be aggregated to determine an average change in risk score as a result of RADV for sampled contract enrollees. The average change in risk score can be used to calculate an estimated total payment error amount for the larger universe of enrollees within an MA organization contract from which the sample is drawn, within specified confidence intervals using statistical extrapolation.

c. History of the Contract-Specific RADV Audits

RADV audits have existed in various forms and approaches for over 20 years. RADV audits began for payment year (PY) 1999, when the payment amounts made to MA organizations on a risk-adjusted basis were small (10 percent). During the period from PY 1999 until PY 2003, our RADV activity had an educational focus and was primarily intended to provide information that could be used by MA organizations to improve the accuracy of the risk adjustment data submitted to CMS for payment. Payment adjustments (recoveries) were limited to enrollee-level adjustments for those enrollees sampled in the audits and were not extrapolated to the overall contract. As a result, for the few MA contracts we audited, payment recovery amounts were small.

Risk adjustment payments using the CMS–HCC risk adjustment model began for the first time in PY 2004.[121] Because of various risk adjustment payment methodology changes required in the BBA and the Benefits Improvement and Protection Act of 2000 (BIPA) (Pub. L. 106–554), CMS provided a payment ''phase-in'' under the new risk adjustment methodologies from 2000 to 2007, when MA organizations' payments were ultimately 100 percent risk-adjusted using the CMS–HCC risk adjustment model methodology. To prepare for implementation of a risk adjustment model in PY 2004 that was based on multiple sites of care, in 2001 CMS required MA organizations to begin submitting data on enrollees' hospital outpatient and physician office encounters, which increased the administrative data burden on MA organizations. Because of this burden and the associated phase-in of the new methodology, CMS considered PYs 2004 through 2006 as pilot years for the purpose of the RADV program and did not seek to recover improper payments

[116] HHS, FY 2025 HHS Agency Financial Report, pg. 154, *https://www.hhs.gov/sites/default/files/fy-2025-hhs-agency-financial-report.pdf.* As identified in this report, CMS made over $23 billion in total Part C improper payments. The improper payment measurement for the MA program in FY 2025 included both overpayments ($21 billion) and underpayments ($2 billion).

for those payment years based on the audit results.

Improper payment recovery resumed for PY 2007, when we conducted two sets of RADV audits: (1) Pilot 2007, which involved 5 MA contracts; and (2) Targeted 2007, which involved 32 MA contracts. CMS began with the Pilot 2007 audit to test the methodology and make any changes needed before conducting the Targeted 2007 audit. CMS selected MA contracts after measuring the weighted average change in disease scores (risk scores) over the preceding 3-year period and grouping MA organization contracts as high, medium, or low relative to other MA contracts that were eligible for a RADV audit. Through these two sets of audits, we recouped $13.7 million. Payment adjustments were again limited to enrollee-level adjustments for those enrollees sampled in the audits and not extrapolated to the overall contract error rate. After CMS' findings were reported to each MA organization, any MA organization that disagreed with CMS' determinations could challenge them through an administrative dispute and appeals process that was established by regulation (75 FR 19678). This dispute and appeals process, as subsequently amended (75 FR 32858, 79 FR 29844, and 89 FR 30448), remains in effect and allows for the appeal of the medical record review determination and/or the payment error calculation through a three-level administrative review process, as outlined in § 422.311. To date, CMS has issued audit findings and initiated recovery activities for PYs 2011–2015.[122]

(1) Development of an Audit Methodology (PYs 2007 through 2010)

After the RADV audits were conducted for PY 2007, CMS paused RADV audits for PYs 2008, 2009, and 2010. CMS used those years to continue refining the methodology for the RADV audits, including the consideration of statistical methods to calculate extrapolated overpayments based on the errors identified in the audit sample. The use of extrapolation would enable us to make contract-specific payment adjustments rather than simply adjusting payments for specific enrollees from an audit sample, as we had done previously.

On December 20, 2010, we published an informal proposal on the CMS website that outlined our intended RADV methodology for: (1) selecting a statistically valid sample of enrollees from each audited MA contract; and (2) calculating a contract-specific payment adjustment by extrapolating the results of that sample. We invited public comment on this proposed methodology.

(2) Informal Proposal Comments and the FFS Adjuster

In response to the December 2010 informal proposal, some MA organizations suggested that CMS could not lawfully enforce the requirement of medical record documentation for diagnosis codes while making payments at the published rates. These MA organizations stated that there is a difference in auditing standards between Medicare FFS and MA diagnosis data because, in contrast to the MA organization-submitted diagnoses data, Medicare FFS data is ''unaudited'' by CMS. This difference purportedly exists because most FFS payments are made on the basis of the item or service provided and not the beneficiary's diagnosis or diagnoses. For example, an office visit is paid based on whether the evaluation and management service billed met Medicare coverage and payment rules, not based on what diagnoses are listed on the claim or in the medical record. As a result, they stated, the Medicare FFS data used to calculate MA organization payments will understate the cost of treating various conditions and, because erroneous diagnoses in the FFS claims data are used to calibrate the MA payment model, CMS must either adjust payment rates (by raising them) or adjust documentation standards (by loosening them) to resolve the alleged incompatibility between the payment rates and documentation standards. This proposed adjustment to the MA organization payment rates and/or documentation standard was referred to as an ''FFS Adjuster.''

These MA organizations ground their arguments in section 1853(a)(1)(C)(i) of the Act, which requires the Secretary to adjust payments to MA organizations for demographic and health related risk factors so as to ensure ''actuarial equivalence.'' As described previously, the Act requires that we calculate risk-adjusted payments to MA organizations to ensure that MA organizations are paid appropriately based on the enrollees' health status and demographic characteristics. The current risk adjustment model does this by calculating plan enrollees' risk scores and, in turn, using them to adjust the MA organizations' base payment rates, which are the rates for the average beneficiary.

As noted previously, CMS uses diagnostic information submitted by MA organizations to calculate risk scores using the CMS–HCC risk adjustment model, which is published in the Announcement of Medicare Advantage (MA) Capitation Rates and Part C and Part D Payment Policies each time it is updated (*see* section 1853(b) of the Act).[123] Risk scores are used to adjust payments to MA organizations. MA organizations may only report a diagnosis when that diagnosis is properly supported by the beneficiary's medical records. Medical records properly support a reported diagnosis when they comply with all CMS data and documentation requirements, which are described in current agency policy documents, including the Medicare Managed Care Manual.[124] In their annual contracts with CMS, MA organizations agree to operate in accordance with applicable Federal statutes, regulations, and policies, including policies described in the Medicare Managed Care Manual. MA organizations are also required to submit a sample of medical records for the validation of risk adjustment data, as required by CMS (*see* § 422.310(e)).

(3) The 2012 Notice of Payment Error Calculation Methodology

The feedback received from industry in response to the informal proposal in 2010 was considered by CMS, and on February 24, 2012, we issued on our website[125] what we described as a final methodology for RADV contract-specific payment error calculation, to begin with PY 2011 RADV audits (referred to herein as the ''2012 methodology''). That methodology described sampling techniques and a statistical calculation to extrapolate from the sample selected, as well as the use of an FFS Adjuster.[126] The 2012 methodology included the following components:

- *Sampling Technique:* Under the 2012 methodology, up to 201 enrollees from each audited MA contract would be selected according to certain criteria. These criteria included, but were not limited to, the enrollees': (1) continuous

[126] *Id.* at 4–5.

enrollment in the MA contract for the entire data collection year and January of the payment year; (2) lack of end-stage renal disease (ESRD) or hospice status for the entire data collection year and January of the payment year; (3) enrollment in Medicare Part B coverage for the entire data collection year; and (4) assignment of at least one CMS–HCC based on diagnoses submitted by the MA organization for risk-adjustment payment. The RADV-eligible enrollees would then be ranked by risk score and divided into three equal strata (low risk score, average risk score, and high-risk score), with an equal number of enrollees randomly selected from each stratum (for example, 67 enrollees per stratum in the case of an audit of 201 enrollees).

- *Payment Error Calculation:* After medical records were reviewed, payment errors would be calculated for each selected enrollee based on the number of months the person was enrolled in the selected MA contract (and was not in ESRD or hospice status) during the payment year. A payment error amount for each stratum would be calculated, which could include both RADV-identified overpayments and underpayments, and an overall payment error estimate for the audited contract would be derived, along with a 99 percent confidence interval around the payment error estimate.
- *FFS Adjuster:* As part of the 2012 methodology, we also stated that we would apply a FFS Adjuster before finalizing the overpayment amount. The 2012 methodology stated that the actual value of the FFS Adjuster would be calculated by CMS based on a RADV-like review of medical records submitted to support FFS claims data. CMS never calculated or implemented an FFS adjuster for any RADV audits.

(4) The 2018 RADV Proposed Rule

In the 2018 proposed rule (83 FR 54982), to enhance transparency and provide ample notice to MA organizations, we proposed to codify in regulation our methodological approach to RADV audits that would apply to all the payment year audits that had not yet been finalized. These methodologies would apply to PY 2011 and subsequent years and included our prior proposal to use extrapolation and a new proposal not to apply an FFS Adjuster to calculate RADV audit overpayments.

(5) The 2023 RADV Final Rule

In the February 1, 2023, **Federal Register** (88 FR 6643), we published a final rule. This final rule codified in regulation that, as part of the RADV audit methodology, CMS would extrapolate RADV audit findings beginning with PY 2018 and would not extrapolate RADV audit findings for PYs 2011 through 2017. We also finalized a policy whereby CMS would not apply an FFS Adjuster in RADV audits. We also finalized the requirement that MA organizations remit improper payments in a manner specified by CMS. CMS subsequently issued final, non-extrapolated RADV audit results for PYs 2011–2015 and published audit methodologies for PYs 2018–2021, and PY 2024.

On September 25, 2025, the U.S. District Court for the Northern District of Texas vacated this final rule, and CMS is currently appealing that decision.[127]

2. Discussion of Proposals

a. Extrapolation of RADV Audit Findings

(1) Use of Extrapolation in the Medicare Program

Extrapolation, or the act of estimating a value (such as an overpayment amount for a Medicare provider) based on a statistically valid sample of units (such as Medicare claims), has historically been a standard part of auditing practice at CMS. There is significant guidance, including case law and best practices from HHS and other Federal agencies, stating that extrapolation may be utilized as a valid part of calculating improper payments. Courts have held that sampling and extrapolation is a valid method of calculating improper Medicare payments, so long as statistically valid methods are used. *See United States* v. *Lahey Clinic Hosp., Inc.,* 399 F.3d 1, 18 n.19 (1st Cir. 2005) (noting that ''sampling of similar claims and extrapolation from the sample is a recognized method of proof'' for the United States in an affirmative case seeking recovery under a common-law theory); *see also Ratanasen* v. *California Dep't of Health Servs.,* 11 F.3d 1467, 1469–71 (9th Cir. 1993) (collecting cases in which sampling and extrapolation have been approved in the Medicaid context, and ''join[ing] other circuits in approving the use of sampling and extrapolation as part of audits in connection with Medicare and other similar programs''); *Chaves Cnty. Home Health Serv., Inc.* v. *Sullivan,* 931 F.2d 914, 917–23 (D.C. Cir. 1991). The authority to use sampling and extrapolation in Medicare audits is grounded in our statutory and regulatory authority to audit providers and recoup improper payments. *See Chaves,* 931 F.2d at 919 (interpreting the Medicare statute to allow for a ''sample adjudication procedure'' followed by extrapolation from that sample, which ''is reasonable given the logistical imperatives recognized by courts in other comparable circumstances'').

Sampling and extrapolation have been used to calculate improper payments in Medicare FFS (Part A and Part B) for decades. CMS formally approved of this technique in 1986 (HCFA Ruling 86–1), but Medicare Administrative Contractors (MACs), which are responsible for determining medical necessity and paying Medicare FFS claims, have been using it ''at least since 1972.'' *Chaves,* 931 F.2d at 921; *see also id.* at 913 (explaining that ''sample adjudication has been used in previous instances involving post-payment review of 'coverage determinations' under Part A,'' and that HCFA Ruling 86–1 ''simply reiterated [the agency's] belief that it had the latitude to employ sample audits on post-payment review to efficiently recoup overpayments for non-covered services''). Medicare contractors currently use established sampling and extrapolation techniques when determining overpayments in accordance with Chapter 8 of the Medicare Program Integrity Manual. In 1991, the United States Court of Appeals for the District of Columbia Circuit, in *Chaves,* upheld the use of this audit methodology against arguments that the Medicare statute required individualized review of claims submitted by providers. *Id.* at 922.

The MMA imposed limits on the use of sampling and extrapolation in Medicare payment decisions in the context of Part A and Part B. Since 2003, Medicare Part A and Part B extrapolation under section 1893(f)(3) of the Act has been limited to instances in which the Secretary determines either that ''there is a sustained or high level of payment error'' or that ''documented educational intervention has failed to correct the payment error.'' No similar limitation applies to the MA program, and CMS announced its intention to use extrapolation in RADV audits in the 2012 notice.

As previously discussed, sampling and extrapolation is a generally accepted audit technique in the Medicare context, and the Act does not apply any limits to the use of extrapolation in the MA program. Therefore, we believe that CMS has the authority to implement this audit methodology in RADV audits for any case in which a RADV audit identifies

[127] *Humana Inc.* v. *Becerra,* 801 F.Supp.3d 624 (N.D. Tex. 2025), *appeal docketed sub nom. Humana Inc.* v. *Kennedy,* No. 25–11082 (5th Cir. Nov. 21, 2025).

unsupported medical diagnoses resulting in improper risk-adjusted payments. We further believe that extrapolation is a reasonable approach to our RADV audits, given the sustained and high level of risk adjustment payment errors, as previously described, and volume of diagnosis data submitted by MA organizations.

(2) Extrapolation Proposal

CMS proposes extrapolating contract-specific RADV audit findings using statistically valid random sampling techniques. Given the volume of diagnosis data submitted by MA organizations, amount of improper payments identified under the MA program, interest in determining an accurate recovery amount for each audited MA plan, and importance of protecting the overall integrity of the program, we believe that it is in the public interest for CMS to apply extrapolation to PY 2018 and all subsequent years. Implementation of extrapolation and the other audit methodologies in this proposed rule will allow CMS to act in compliance with the improper payment obligations under the Act (most recently updated as part of the Payment Integrity Information Act of 2019 (PIIA), Pub. L. 116–117, 134 Stat. 113 (2020)), as well as our fiduciary responsibility to recover funds due to the Medicare Trust Funds.

CMS proposes to employ statistical methods to determine statistically valid sample sizes, accurately identify payment error, and extrapolate to the universe of enrollees from which the sample is selected. These statistically valid methods may include applying one or more RADV audit methodologies for any given RADV audit. In addition, while CMS views extrapolation as a statistically valid methodology for RADV audits, the agency may, at times, use its discretion to not utilize extrapolation in a particular instance. For example, there may be unforeseen circumstances in which the statistical validity of the sample is disturbed (such as the need to exclude a large number of cases from the sample due to the loss of medical records in a natural disaster) and extrapolation is no longer possible, despite the initial intent to do so. There may be other limited instances in which CMS seeks to collect overpayments associated only with enrollees in a given sample or wishes to perform only a probe sample of RADV reviews without the use of a statistically valid sample and yet will seek to recover any identified, non-extrapolated overpayments. The OIG may also independently decide not to extrapolate for reasons outside the control of CMS, and CMS will still recover those overpayments in accordance with requirements. To account for this, we are proposing § 422.311(a)(2) to read, ''CMS may apply extrapolation to audits for payment year 2018 and subsequent payment years.'' However, CMS intends for extrapolation to be the standard practice for RADV audits beginning with PY 2018.

Any sampling and extrapolation methodologies adopted by CMS for RADV audits will be focused on MA organization contracts and enrollees' HCCs that, through statistical modeling and/or data analytics, are identified as being at highest risk for improper payments. This is an appropriate approach to any Federal MA audit that seeks to recoup taxpayer dollars that have been inappropriately paid to MA organizations for diagnoses that are not supported in the medical record. This approach was also recommended by the GAO in a 2016 report titled ''Fundamental Improvements Needed in CMS' Effort to Recover Substantial Amounts of Improper Payments.'' [128] The GAO recommended that CMS ''modify [its] selection of contracts for contract-level RADV audits to focus on those contracts most likely to have high rates of improper payments by taking actions such as the following: selecting more contracts with the highest coding intensity scores; excluding contracts with low coding intensity scores; selecting contracts with high rates of unsupported diagnoses in prior contract-level RADV audits; if a contract with a high rate of unsupported diagnoses is no longer in operation, selecting a contract under the same MA organization that includes the service area of the prior contract; and selecting some contracts with high enrollment that also have either high rates of unsupported diagnoses in prior contract-specific RADV audits or high coding intensity scores.'' [129]

CMS is not required to set forth all potential sampling methodologies for calculating an extrapolated payment error through regulatory provisions. However, in the interest of transparency, we are choosing to inform MA organizations about our plans to use various sampling and extrapolation methodologies in RADV audits, as CMS deems appropriate, through rulemaking.

In the 2018 proposed rule, we stated that, given the amount of improper payments identified under the MA program, interest in determining an accurate recovery amount for each audited MA plan, and importance of protecting the overall integrity of the program, we believed that it was in the public interest for CMS to apply the RADV payment error methodology or methodologies adopted through this rulemaking to PY 2011 and all subsequent years. In the 2023 final rule, we announced that extrapolation would instead begin with the PY 2018 RADV audits rather than PY 2011, as proposed. This change was made due to our fiduciary duty to protect taxpayer dollars from overpayments, certain operational considerations, and public comments on the timeliness of RADV audits.

We also note that our publication of audit methodologies for PYs 2018–2021 put MA organizations on further notice that CMS plans to calculate a contract-specific payment error for PY 2018 and subsequent payments year by extrapolating from its review of a statistically valid sample of enrollees, and that MA organizations have never been entitled to receive or retain payments associated with HCCs that cannot be validated by medical records.

In addition to codifying our existing authority to use contract-specific extrapolation techniques in the RADV context, we also propose to use potential methodologies for sampling and extrapolation that are based on a particular sub-cohort or sub-cohorts in a given payment year. For example, a sub-cohort could be the enrollees for whom a particular HCC or one of a related set of HCCs (such as HCCs for diabetes conditions) was reported. After choosing an MA contract and a sub-cohort or sub-cohorts to audit, we would select a statistically significant sample of enrollees in the sub-cohort or sub-cohorts. After reviewing these enrollees' medical records that are submitted by the MA organization, we would use statistical extrapolation to calculate and recoup the improper payments made to the audited MA contract for all enrollees in the sub-cohort or sub-cohorts in that payment year.

Using a sub-cohort methodology, such as one focused on enrollees with high-risk HCCs, would allow us to use a smaller sample size to calculate a statistically valid extrapolated improper payment amount. This is possible because, when selecting a sample from a smaller population (that is, a sub-cohort of enrollees), one can still achieve an acceptable level of statistical confidence with that smaller sample size. This sub-cohort-based audit methodology would also allow us to spread our audit resources across a wider range of MA contracts and focus

[128] GAO, at 26, *https://www.gao.gov/assets/gao-16-76.pdf* (April 2016).

[129] *Id.*

on cohorts of enrollees that raise programmatic concerns, while also reducing operational burden on both CMS and the MA organizations due to the reduced sample size needed to calculate improper payments.

We emphasize that neither proposed methodology is meant to displace our longstanding authority to audit the medical records of specific enrollees who we believe may be associated with improper payments or to use any statistically valid audit methodology on a case-to-case basis. If we finalize one or more sampling and extrapolation methodologies through this rulemaking, we will announce any future changes to that methodology (or those methodologies) through the Health Plan Management System (HPMS) or other appropriate means.

We also propose that MA organizations would be required to remit extrapolated recovery amounts from RADV audit findings in a manner specified by CMS, typically through CMS' payment system, the Medicare Advantage and Prescription Drug system (MARx), as offsets to MA plans' monthly capitation payments. In the event that the recovery amount exceeds the payment in one month, we propose that the recovery be spread across adjustments for multiple months until the full amount plus applicable interest is recouped. In some situations, payment by wire transfer may be necessary. We also propose that CMS might likewise require MA organizations to remit such recovery amounts based upon audit findings by the HHS–OIG.

We also propose to reissue our RADV dispute and appeals regulations in § 422.311, to conform with the proposed audit methodology provisions. Specifically, consistent with our other proposed policies, we propose to reissue § 422.311 by including language to clarify that recovery of improper payments from MA organizations will be conducted according to the Secretary's payment error calculation methodologies and recovery procedures, and that CMS will apply extrapolation to RADV audits beginning with PY 2018.

b. Fee-For-Service Adjuster Concept

(1) Description of an FFS Adjuster

As previously described, risk adjustment ensures that MA organizations are paid appropriately for their plan enrollees, and section 1853(a)(1)(C) of the Act requires that we calculate risk-adjusted payments to MA organizations based on specific criteria, such as age, disability status, sex, institutional status, and health status. As discussed earlier, MA organizations' payments are calculated using the CMS–HCC risk adjustment model, which is published each time it is updated (see section 1853(b) of the Act).[130] Additionally, an MA organization may only report a diagnosis, and claim the associated payment, when that diagnosis is properly supported by the beneficiary's medical records. Medical records properly support a reported diagnosis when they comply with all CMS data and documentation requirements, which are described in current agency regulations and policy documents, including Chapter 7 of the Medicare Managed Care Manual and those on the Customer Service and Support Center website.[131] Plans are also required to submit a sample of medical records for the validation of this risk adjustment data (*see* § 422.310(e)).

Some MA organizations have suggested that CMS cannot lawfully enforce the requirement of medical record documentation for diagnosis codes while making payments at published rates. These MA organizations state that there is a difference in auditing standards between Medicare FFS and MA diagnosis data. In contrast to the MA organization-submitted diagnosis data, these MA organizations claim that Medicare FFS data is ''unaudited'' by CMS and presumably contains erroneous diagnosis codes not properly supported by beneficiaries' medical records. As a result, they state, the Medicare FFS data used to calculate MA organization payments will understate the cost of treating various conditions. MA organizations state that CMS must raise payment rates to MA organizations or relax the documentation standard that CMS applies to reported medical diagnoses to address what they refer to as the presence of erroneous diagnoses in the FFS claims used to calibrate the CMS–HCC model. MA organizations refer to this concept of a proposed adjustment to the payment rates and/or documentation standard for MA organizations as an ''FFS Adjuster.'' These MA organizations ground their arguments in section 1853(a)(1)(C)(i) of the Act, which requires the Secretary to adjust payments to MA organizations for demographic and health related risk factors to ensure ''actuarial equivalence.'' According to these MA organizations, an FFS Adjuster would either adjust payment rates (by raising them) or adjust documentation standards (by loosening them) to resolve the alleged incompatibility between the current rates and current documentation standards. In the 2012 methodology, using the term somewhat differently, CMS said that it would ''apply a Fee-for-Service Adjuster (FFS Adjuster) amount as an offset to the preliminary recovery amount'' calculated for RADV audits under that methodology.

(2) FFS Adjuster Proposal

We are proposing to not apply an FFS Adjuster to RADV audits. The ''actuarial equivalence'' and ''same methodology'' provisions in the statute do not apply to the obligation of an MA organization to report and return improper payments for diagnoses lacking medical record support, including those improper payments identified during a RADV audit, as discussed in detail later. We also believe that it would not be reasonable to interpret the Act as requiring a reduction in payments to MA organizations by at least a statutorily set minimum percentage pursuant to the coding pattern adjustment, while at the same time prohibiting CMS from enforcing longstanding documentation requirements by requiring an offset to the recovery amounts calculated for CMS audits, as discussed in detail as follows.

(3) Actuarial Equivalence

Some MA organizations have contended that an FFS Adjuster is required in RADV audits to ensure ''actuarial equivalence'' between payments to MA plans and payments under the Medicare FFS program. Some have also contended that the ''same methodology'' provision of section 1853(b)(4)(D) of the Act requires the application of an FFS Adjuster in RADV audits.

We believe that the ''actuarial equivalence'' requirement under section 1853(a)(1)(C) of the Act and ''same methodology'' provision under section 1853(b)(4)(D) of the Act do not require the use of an FFS Adjuster in RADV audits. As described by the D.C. Circuit, these provisions do not apply to the obligation to return improper payments for MA organization diagnosis codes that are unsupported by medical records. *See UnitedHealthcare Ins. Co.* v. *Becerra,* 16 F.4th 867, 869, 891–92 (D.C. Cir. 2021), *cert. denied,* 142 S. Ct. 2851 (U.S. June 21, 2022). Although the D.C. Circuit did not address the RADV

[131] See the following link to access CMS manuals: *https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/mc86c07.pdf.* See the following link for the MA Customer Service and Support website: *https://csscoperations.com/.*

audit context in its decision in *UnitedHealthcare,* our position is consistent with the D.C. Circuit's reasoning in that case. *Id.*

In *UnitedHealthcare,* a group of MA organizations challenged the Secretary's Part C Overpayment Rule (the ''Overpayment Rule'') (79 FR 29844), which implemented section 6402 of the Affordable Care Act (Pub. L. 111–148) and required MA organizations to self-report and return payments associated with MA organization diagnosis codes not supported by medical record documentation. The district court invalidated the Overpayment Rule. *See UnitedHealthcare Ins. Co.* v. *Azar,* 330 F. Supp. 3d 173, 192 (D.D.C. 2018).

However, the D.C. Circuit reversed the district court, holding that the actuarial equivalence provision applies only to how CMS risk adjusts the payments it makes to MA organizations, and not to the obligation of MA organizations to return improper payments for diagnosis codes, submitted by MA organizations to CMS, lacking medical record support. *See UnitedHealthcare,* 16 F.4th at 883–887. The D.C. Circuit also held that even if the actuarial equivalence provision applied, plaintiffs' claims would still fail because they did not meet their burden in showing, either through empirical evidence or persuasive logic, that application of the Overpayment Rule would lead to systematic underpayment of MA organizations. *Id.* at 887 through 891.

While the D.C. Circuit decision pertained only to the Overpayment Rule and declined to address RADV audits, its reasoning applies just as strongly in the RADV context and supports our proposed conclusion that an FFS Adjuster is neither required nor appropriate to reduce a RADV audit overpayment. ''The role of the actuarial-equivalence provision is to require CMS to model a demographically and medically analogous beneficiary population in Original Medicare to determine the prospective lump-sum payments to [MA organizations].'' *Id.* at 870. The RADV audit program, like the Overpayment Rule, arises post-payment to require MA organizations to refund any payment to which they are not entitled, based on diagnoses that lack support in the medical record. The purpose of RADV audits is to recover payments that were made improperly based on diagnoses not supported by medical record documentation. If a payment is made to an MA organization based on a diagnosis code not supported by medical record documentation, the entire payment for that code is in error and should be recovered in full because the payment standard has not been met.

We also believe it would be unreasonable to interpret the Act as requiring a minimum reduction in payments in one provision (the coding pattern provision), while at the same time prohibiting CMS in an adjacent provision (the actuarial equivalence provision) from enforcing those longstanding documentation requirements (by requiring a reduction to the recovery amount calculated for CMS audits). To the contrary, because the Act requires CMS to reduce payments to MA organizations by at least a specific minimum percentage, the only reasonable interpretation of the Act is that CMS would pay MA organizations at those reduced rates, under the existing payment model,[132] and enforce the longstanding documentation requirements.

Our proposal is consistent with the conclusion of the D.C. Circuit, which is that the actuarial-equivalence requirement is not an ''entitle[ment] . . . to a precise payment amount'' for a Medicare Advantage insurer, but only ''an instruction to the Secretary regarding the design of the risk adjustment model as a whole . . . describ[ing] the type of 'payment amount[s]' that the risk adjustment model should produce''; ''[i]t does not directly govern how CMS evaluates the validity of diagnoses or defines 'overpayment.'" *UnitedHealthcare,* 16 F.4th at 885–86.

(4) Coding Pattern Adjustment

Section 1853(a)(1)(C)(ii) of the Act requires the implementation of a minimum coding pattern adjustment to reduce risk scores of MA beneficiaries, and therefore MA payment rates, until the Secretary implements risk adjustment using Medicare Advantage diagnostic, cost, and use data. This minimum coding pattern adjustment accounts for differences in coding patterns between MA and Medicare FFS, given that MA organizations have a greater incentive than FFS providers to report diagnoses. To meet this requirement, each year, CMS has implemented an adjustment to offset the effects on MA risk scores of higher levels of coding patterns in MA relative to FFS. (See section 1853(a)(1)(C)(ii) of the Act.) Under section 1853(a)(1)(C)(ii)(III) of the Act, the minimum adjustment factor for 2019 and each subsequent year is 5.90 percent. CMS has, each year, implemented the minimum coding pattern adjustment reduction required by statute.

Some MA organizations have expressed concern that using extrapolation without applying an FFS Adjuster to payment recoveries achieved through RADV audits will overlap with coding pattern adjustments or create a double recovery by CMS. As CMS has explained in its annual MA Advance Notices and Rate Announcements, the coding pattern adjustment, unlike RADV, is not intended to address unsupported or inaccurate codes reported by MA organizations in particular instances but only the general practice, relative to Medicare FFS, of identifying more diagnosis codes, including codes that are nonetheless accurate.[133] The coding pattern adjustment provision of the statute supports our proposal not to apply an FFS Adjuster. We briefly review the history of that provision.

The coding pattern adjustment was enacted as part of the Deficit Reduction Act of 2005. (Pub. L. 109–171 (February 8, 2006), codified at 42 U.S.C. 1395w–23(a)(1)(C)(ii)(I) and (II).) The Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152), section 1853(a)(1)(C)(ii) of the Act was amended to require that the adjustment be at least 4.71 percent in 2014, rising annually to at least 5.7 percent in 2019. (Pub. L. 111–152, tit. I, subtit. B, section 1102(e), 124 Stat. 1046.) (For payment years 2010 to 2013, CMS applied a 3.41 percent adjustment.[134]) Section 1853(a)(1)(C)(ii)(III) of the Act was subsequently amended again in the American Taxpayer Relief Act of 2012 to require the Secretary to make a reduction of at least 4.91 percent in 2014, rising to at least 5.9 percent by 2019. (Pub. L. 112–240, tit. VI, subtit. C, section 639, 126 Stat. 2357.) As noted previously, it would be unreasonable to interpret the Act as requiring a minimum reduction in payments in one provision (the coding pattern provision), while at the same time prohibiting CMS in an adjacent provision (the actuarial equivalence provision) from enforcing those longstanding documentation requirements (by requiring an offset to the recovery amount calculated for CMS

[132] Any changes to the CMS–HCC payment model are published in the annual payment notice.

[133] Announcement of Calendar Year (CY) 2011 Medicare Advantage Capitation Rates and Medicare Advantage and Part D Payment Policies and Final Call Letter at 19 (April 5, 2010); *see also* Announcement of Calendar Year (CY) 2017 Medicare Advantage Capitation Rates and Medicare Advantage and Part D Payment Policies and Final Call Letter at 54 (April 4, 2016); Announcement of Calendar Year (CY) 2012 Medicare Advantage Capitation Rates and Medicare Advantage and Part D Payment Policies and Final Call Letter at 37–38 (April 4, 2011).

[134] Announcement of Calendar Year (CY) 2010 Medicare Advantage Capitation Rates and Medicare Advantage and Part D Payment Policies at 19–29 (April 6, 2009).

audits). Section 1853(a)(1)(C)(ii) of the Act requires a minimum coding pattern adjustment to reduce the risk scores of all MA beneficiaries, and therefore, MA payment rates. Such a minimum coding pattern adjustment accounts for differences in coding patterns between MA and Medicare FFS, given that MA organizations have a greater incentive than FFS providers to report diagnoses.

(5) Documentation Requirements

Some MA organizations have stated in prior rulemaking comments that not using an FFS adjuster imposes new documentation standards on them, but CMS audits reinforce longstanding documentation requirements. The purpose of RADV audits is to recover improper payments resulting from diagnoses that are not supported in the medical record documentation, which is a longstanding documentation standard that applies to all plans equally and regardless of whether the plan is subject to a RADV audit. The objective of an audit is to promote fair and impartial recovery of improper payments due to insufficient documentation in accordance with regulations. This proposal would not impose a new documentation standard on MA organizations, nor is there a distinction in the documentation standards between the MA and FFS Medicare programs. Under section 1857(d)(2), each MA contract provides the Secretary with the right to audit and inspect any books and records of the MA organization that pertain to services performed or determinations of amounts payable under the contract. Similarly, Section 1815(a) of the Act (Medicare Part A) states that ''no such payments shall be made to any provider unless it has furnished such information as the Secretary may request in order to determine the amounts due such provider under this part for the period with respect to which the amounts are being paid or any prior period.'' Additionally, section 1833(e) of the Act (Medicare Part B) states that ''[n]o payment shall be made to any provider of services or other person under this part unless there has been furnished such information as may be necessary in order to determine the amounts due such provider or other person under this part for the period with respect to which the amounts are being paid or for any prior period.'' Section 1172 of the Health Insurance Portability and Accountability Act (HIPAA) (Pub. L. 104–191) requires both providers and health plans to use standard content, formats, and coding for health care transactions. Accordingly, all parts of Medicare generally require program participants to submit documentation necessary to support Medicare payments.

As we noted in our April 15, 2022, Health Plan Management System (HPMS) memorandum, *Reminder of Existing Obligation to Submit Accurate Risk Adjustment Data,* MA organizations must submit data that conforms to all relevant national standards, including the International Classification of Diseases, Tenth Revision, Clinical Modification (ICD–10–CM) Guidelines for Coding and Reporting requirement that diagnoses be documented in patients' medical records. (*See* §§ 422.310(d)(1); 45 CFR 162.1002(c)(2), (3).) The diagnosis codes and other risk adjustment information that MA organizations submit directly affect the calculation of CMS payments to the MA organization. A diagnosis code that is not documented in a patient's medical record is not a valid basis for CMS risk adjustment payments to an MA organization. *UnitedHealthcare,* 16 F.4th at 869, 877.

In addition, the Secretary has adopted various organizations' formats and code sets, including the ICD–10 and the ICD Guidelines, which is the national standard for both FFS and MA. See 45 CFR 162.1002. CMS has always required proper medical record documentation in order for any reported diagnosis code or claim to be valid. (*See, for example, UnitedHealthcare,* 16 F. 4th at 869 (''[n]either Congress nor CMS has ever treated an unsupported diagnosis for a beneficiary as valid grounds for payment to a Medicare Advantage insurer''). That is the consistent policy throughout the Medicare program, including MA and FFS.[135] (See § 422.310 (''MA organizations must submit data that conform to CMS' requirements for data equivalent to Medicare fee-for-service data, when appropriate, and to all relevant national standards.'') Thus, we do not believe that RADV audits impose any new level of burden on providers or violate any initiatives to reduce that burden.

As such, we propose to not apply an FFS Adjuster to RADV audit overpayments.

c. Improving the Hardship Exceptions Process

MA record retention requirements incorporated in MA contracts have been in place since the beginning of the MA program. Under § 422.504(d), MA organizations are required to maintain records and other documentation for 10 years to accommodate the periodic auditing of financial records for such purposes as determining Medicare utilization, costs, and amounts payable under the contract. Further, § 422.504(i) extends these record retention requirements to providers of health care services under contract with the MA organization. This regulation further specifies that the Federal Government has the right to audit an MA organization through 10 years from the end of the final contract period.

However, CMS understands that there may be extraordinary circumstances beyond MA organizations' control that may make it difficult to meet medical record submission or other audit requirements. CMS historically implemented a hardship exception process through sub-regulatory guidance for prior payment year audits. We are now proposing to codify this process in regulation by adding a new subparagraph § 422.310(e)(1) to allow MA organizations to request a hardship exception, as prescribed by CMS, if they cannot submit medical records timely as required.

First, we propose that MA organizations may submit a hardship exception request for: (1) the entire MA contract; (2) a sampled enrollee and all the related audited HCCs; or (3) specific audited HCCs. An MA organization may submit multiple hardship exception requests, if necessary, but all supporting documentation must be submitted before the hardship exception request submission deadline. Deadlines to request a hardship exception would be specified in sub-regulatory guidance issued prior to the start of a payment year audit. An MA organization would be required to withdraw a specific hardship exception request before resubmitting it with modifications. For example, if an MA organization submitted a hardship exception request for one or more audited HCCs for a specific enrollee, the MA organization would be required to withdraw that existing hardship exception request submission prior to adding another HCC to the hardship exception request and resubmitting the request to CMS. If an MA organization submits a valid medical record (MR) for an audited HCC(s) for which it has submitted a hardship exception request, then the hardship exception request and any decision made by CMS (for the related audited HCC(s)) for the request would be rendered moot. In other words, the

[135] FFS Medicare claims are subject to error correction and payment adjustment when they are based on diagnosis codes not supported by the medical record. *See* Medicare Program Integrity Manual Ch. 3 & Ch. 6, §§ 3.3.1.1, 3.3.2.1, 3.6.2.4, 6.5.2, 6.5.3., *https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/internet-Only-Manuals-IOMs-Items/CMS019033.*

valid MR submission would supersede any hardship exception request.

Second, we propose that an MA organization would be required to submit supporting documentation with a hardship exception request that clearly demonstrates an extraordinary circumstance(s) exists and includes all relevant details required for CMS to comprehensively assess the incident or issue. Supporting documentation includes, but is not limited to, any communications associated with the incident and all available evidence substantiating that the incident occurred. MA organizations still have an obligation to pursue all potential medical record sources before submitting a hardship exception request and should review relevant record retention requirements. MA organizations should actively pursue and submit an alternative medical record that supports an audited HCC(s) when the initial medical record sought is unavailable or insufficient to support the audited HCC(s).

If an MA organization is unable to obtain the relevant medical record(s) and submits a hardship exception request for a sampled enrollee's, or group of sampled enrollees', audited CMS–HCCs, we propose that the MA organization would be required to submit documentation (such as verification of a United States Postal Service certified mail delivery or that a delivery attempt was made, or similar verifiable evidence) that it sought medical record documentation from all providers associated with diagnosis data that the MA organization submitted to CMS for the purpose of receiving risk adjusted payments for the sampled enrollee(s). Additionally, MA organizations should be aware of State requirements for medical records to be placed in the care of a custodian for a period of time when a health care provider's office closes. When a health care provider has closed, retired, passed away, changed ownership, or otherwise undergone a change that, according to State law, should have required their medical records to be placed in the care of a custodian, MA organizations should contact the custodian to request the relevant medical records. We propose that CMS would deny a hardship request if the MA organization failed to submit sufficient supporting documentation, including documentation of the MA organization's pursuit of all possible medical record sources. We also propose that hardship exception requests decisions would be final and not subject to appeal.

The following are examples of extraordinary circumstances that may meet CMS' definition of an extraordinary circumstance that may impede an audited MA organization's timely acquisition of medical records and the types of supporting documentation that CMS would expect to be submitted by the MA organization to substantiate the circumstances:

- *Natural Disaster or Declared Emergency:* Events such as hurricanes, wildfires, floods, or other declared emergencies that disrupt provider operations or access to records. Supporting documentation includes FEMA or State emergency declarations, provider attestations, news releases, and facility closure notices associated with the natural disaster or declared emergency.
- *Public Health Emergency:* Public health events that significantly impact staffing, operations, or access to medical records. Supporting documentation includes government-issued emergency declarations, internal contingency plans, and provider attestations.
- *Legal or Regulatory Restrictions:* Court orders, subpoenas, or legal constraints preventing access to records within required timeframes. Supporting documentation includes court orders, legal correspondence, attestation from legal counsel, and any proof of seizure or unavailability including official documentation showing records were seized.
- *Major System or Technology Failure:* Significant IT outages or cybersecurity incidents. Supporting documentation includes incident reports, vendor outage notices, and other documentation such as system logs, error reports, security audit reports, data recovery attempts, incident documentation, and/or breach or loss of data reports.
- *Provider's Office Closed and Custodial Requirements Lapsed:* A provider retired, sold, or closed their practice preventing access to records within the required timeframe and the State law custodial requirements have lapsed. Supporting documentation includes an announcement, news report, or signed attestation indicating closure. Submissions regarding provider office closures would take into consideration State law custodian of record requirements, and evidence that the enrollee's record cannot be accessed by any other provider or practice.
- *Other Extraordinary Circumstances:* Circumstances beyond the organization's control that materially impact the retrieval of medical record documentation. Supporting documentation includes a detailed written explanation and third-party attestations or corroborating documentation.

These examples are not exhaustive and would not guarantee approval of a submitted hardship exception request. Furthermore, MA organizations failing to submit sufficient supporting documentation, including documentation of the MA organization's pursuit of all possible medical record sources, will result in CMS denying a hardship exception request.

CMS would not consider the following scenarios to be justification for granting a hardship exception:

- Reliance solely on State law record retention periods that are shorter than CMS' 10-year record retention requirement.
- Health care providers not responding to a request.
- Issues related to lost records.
- Provider office closures, or retired or deceased health care providers where State law custodial requirements have not lapsed.
- Medical practice transfers.
- Human resource issues.
- Ordinary IT issues (for example, system upgrade issues, routine data migration issues, incomplete vendor handovers) that result in missing or inaccessible records.

MA organizations are reminded of their obligation to pursue alternative medical records in these situations. We seek comments on the hardship exception request process and MA organizations' requirement to submit supporting documentation.

d. Retroactivity

We do not believe that the RADV audit policies proposed in this rule impose any new requirements on MA organizations that could be construed as retroactive. We may begin to conduct new RADV audits or finalize results from existing audits for multiple payment years before finalizing the policies in this rule, pursuant to our longstanding authority under § 422.310(e) to review the medical records of any MA enrollee and recoup improper payments identified.

As discussed in the Discussion of Proposals section, CMS has a long-established historical record of using extrapolation in the Medicare program. There is significant guidance, including case law and best practices from HHS and other Federal agencies, stating that extrapolation may be utilized as a valid part of calculating improper payments. CMS first announced its intention to use extrapolation in RADV audits with the publication of an informal proposal in 2010 and reaffirmed this intention in

the 2012 methodology.[136] This intention was again announced in the 2018 RADV proposed rule (83 FR 54982) and subsequently finalized in the 2023 RADV final rule (88 FR 6643). CMS has also announced its intention not to apply an FFS adjuster in RADV audits since the 2018 RADV proposed rule and this policy intention was finalized in the 2023 RADV final rule.

Even if our proposal was determined to be a retroactive application of policy, a position with which we do not agree, it is in the public interest for CMS to apply extrapolation to past payment years, and, therefore, is authorized under the Act. CMS has the authority, in accordance with section 1871(e)(1)(A) of the Act, to apply retroactive changes in regulations, manual instructions, interpretative rules, statements of policy, or guidelines of general applicability to items and services furnished before the effective date of the change, if the Secretary determines that ''such retroactive application is necessary to comply with statutory requirements or failure to apply the change would be contrary to the public interest.'' Since the early development of RADV, CMS has repeatedly notified MA organizations and the public of its intent to extrapolate RADV audits results and published a methodology in 2012. We believe that recovering extrapolated improper amounts is necessary to comply with statutory requirements and advances the public interest by protecting the overall integrity of the Medicare program. As mentioned earlier, in fiscal year (FY) 2025 (based on calendar year 2023 payments), we estimated that CMS made over $21 billion in Part C overpayments, a figure representing over 5 percent of total Part C payments.[137] Due to significant growth in the MA program and the large volume of diagnosis data submitted by MA organizations, we are unable to recover this significant amount of overpayment without the use of extrapolation. We have a statutory mandate under the PIIA to reduce improper payments and a fiduciary responsibility to recover funds due and owed to the Medicare Trust Funds.

As previously discussed, CMS, HHS–OIG, and the GAO have identified a significant volume of improper payments in the MA program,[138] and RADV audits are the primary way CMS ensures payment accuracy to MA organizations. As further discussed in the Regulatory Impact Analysis section of this proposed rule, CMS estimates extrapolated improper payment recoveries of approximately $9 billion per audit year beginning with the PY 2018 audits. We also believe that extrapolation will foster an additional sentinel effect of RADV audits on the improper payment rate as MA organizations improve their processes to report only those diagnoses that meet CMS requirements to be documented in the medical record in accordance with ICD–CM coding guidelines.

The core component of a RADV audit is to ensure that all diagnoses are properly supported by medical records. We only seek to recover improper payments received by MA organizations for HCCs that are not substantiated by enrollees' medical records. MA organizations have never been entitled to receive or retain payments associated with HCCs that cannot be validated by medical records, and it is impossible for MA organizations to submit, and CMS to audit, every medical record. CMS has never calculated or applied an FFS adjuster to any RADV audit findings and allowing MA organizations to retain Medicare funds for unsubstantiated diagnoses on this basis runs contrary to the statute. Therefore, applying the rule under the public interest exception in section 1871(e)(1)(A) of the Act would not upset any settled or reasonable reliance interests. This all serves the public interest by reducing the improper allocation of taxpayer dollars that can otherwise be used for other purposes within the Federal Government, including solvency of the Medicare Trust Funds. Thus, a retroactive application of the rule is in the public interest within the meaning of section 1871(e)(1)(A) of the Act.

If a court were to find that any provision of this rule is impermissibly retroactive, we believe that the rule should remain in effect for any payment year that has not yet occurred or for other provisions not found to be retroactive. For example, if our proposed use of extrapolation for payment years prior to the publication of a final rule is determined to be impermissibly retroactive, the final regulation would still allow collection of extrapolated recoveries for subsequent payment years depending on what payment year is determined to be the triggering date for retroactive application.

To the extent a court may ultimately enjoin one provision of this section as finalized, CMS proposes that the other provisions should remain in effect, ensuring the continuity of the regulations. We propose that any provision of the requirements of this rule that is held to be invalid or unenforceable by its terms or as applied to any person, entity, or circumstance would be construed so as to continue to give maximum effect to the provision permitted by law, unless such holding is one of utter invalidity or unenforceability, in which event we propose that the provision would be severable from the other provisions of this rulemaking and would not affect the remainder thereof or the application of the provision to persons or entities not similarly situated or to dissimilar circumstances.

We propose that if any section, subsection, sentence, clause, phrase, word, provision, or application of this proposed rule as finalized shall be found to be invalid, illegal, unconstitutional, or unenforceable, that finding shall not affect or undermine the validity of any other section, subsection, sentence, clause, phrase, word, provision, or application which can be enforced without the use of the offending provision. We request comments from the public on severability, particularly which policies could be severable, if finalized, and how the other policies in a final rule would operate absent those particular provisions.

V. Provider Enrollment Proposals

A. Provider Enrollment Background

1. Introduction

Section 1866(j)(1)(A) of the Act requires the Secretary to establish a process for the enrollment of providers and suppliers into the Medicare program. The overarching purpose of the enrollment process is to help confirm that providers and suppliers (hereafter collectively ''providers'' unless otherwise noted) seeking to bill Medicare for services and items furnished to Medicare beneficiaries meet all applicable Federal and State requirements to do so. The process is, to

[136] CMS *Notice of Final Payment Error Calculation Methodology for Part C Medicare Advantage Risk Adjustment Data Validation Contract-Level Audits* at *https://www.cms.gov/Research-Statistics-Data-and-Systems/Monitoring-Programs/recovery-audit-program-parts-c-and-d/Other-Content-Types/RADV-Docs/RADV-Methodology.pdf.*

[137] HHS, FY 2025 HHS Agency Financial Report, pg. 154, *https://www.hhs.gov/sites/default/files/fy-2025-hhs-agency-financial-report.pdf.* CMS made over $23 billion in total Part C improper payments. The improper payment measurement for the MA program in FY 2025 included both overpayments ($21 billion) and underpayments ($2 billion).

[138] For example, the FY 2025 HHS Agency Financial Report, pg. 154, *https://www.hhs.gov/sites/default/files/fy-2021-hhs-agency-financial-report.pdf* states that Part C Improper Payment Measurement (IPM) estimated approximately $21.4 billion in overpayments for reporting year 2025. *https://www.hhs.gov/sites/default/files/fy-2025-hhs-agency-financial-report.pdf.*

an extent, a ''gatekeeper'' that prevents unqualified and potentially fraudulent individuals and entities from entering and inappropriately billing Medicare. It has proven invaluable in this regard and is a vital component of Medicare program integrity.

Under 42 CFR 424.510, a provider or supplier must complete, sign, and submit to its assigned Medicare contractor the appropriate Form CMS–855 (OMB Control No. 09380685) application in order to enroll in the Medicare program and obtain Medicare billing privileges.[139] The Form CMS–855, which can be submitted via paper or electronically through the internet-based Provider Enrollment, Chain, and Ownership System (PECOS) process, captures information about the provider or supplier that is needed for CMS or its contractors to determine whether the provider or supplier meets all Medicare requirements. Data collected during the enrollment process include but are not limited to: (1) general identifying information (for example, legal business name, tax identification number (TIN), and National Provider Identifier (NPI)); (2) licensure data; (3) practice locations; and (4) information regarding the provider's or supplier's owning and managing individuals and organizations.

The application is used for a variety of provider enrollment transactions, including the following:

- *Initial enrollment*—The provider or supplier is: (1) enrolling in Medicare for the first time; (2) enrolling in another Medicare contractor's jurisdiction; or (3) seeking to enroll in Medicare after having previously been enrolled.
- *Change of ownership*—The provider or supplier is reporting a change in its ownership.
- *Revalidation*—The provider or supplier is revalidating its Medicare enrollment information in accordance with § 424.515.
- *Reactivation*—The provider or supplier is seeking to reactivate its Medicare billing privileges after it was deactivated in accordance with § 424.540.
- *Change of information*—The provider or supplier is reporting a change in its existing enrollment information in accordance with § 424.516.

Our provider enrollment regulations are generally codified in 42 CFR part 424, subpart P (currently §§ 424.500 through 424.575 and hereafter occasionally referenced as subpart P). They address, among other things, requirements that providers must meet to obtain and maintain Medicare billing privileges. Since 2006, we have issued numerous final rules designed to strengthen and clarify the provider enrollment process, such as the following:

a. The 2006 Provider Enrollment Final Rule

We published in 2006 a final rule titled, ''Medicare Program; Requirements for Providers and Suppliers to Establish and Maintain Medicare Enrollment,'' which appeared in the **Federal Register** on April 21, 2006 (71 FR 20754). The final rule set forth certain requirements in 42 CFR part 424, subpart P that providers and suppliers must meet to obtain and maintain Medicare billing privileges.

b. The 2011 Provider Enrollment Final Rule

We published a final rule with comment period in 2011 titled, ''Medicare, Medicaid, and Children's Health Insurance Programs; Additional Screening Requirements, Application Fees, Temporary Enrollment Moratoria, Payment Suspensions and Compliance Plans for Providers and Suppliers,'' which appeared in the **Federal Register** on February 2, 2011 (76 FR 5862). This final rule with comment period implemented various provisions of the Act, as added by the Patient Protection and Affordable Care Act (Affordable Care Act) (Pub. L. 111–148) and as amended by the Health Care and Education Reconciliation Act (Pub. L. 111–152). These provisions included, among other things:

- Requiring the submission of application fees by institutional providers and suppliers as part of the Medicare, Medicaid, and CHIP provider enrollment processes.
- Establishing Medicare, Medicaid, and CHIP provider risk-based enrollment screening categories and corresponding screening requirements.
- Authorizing temporary moratoria on the enrollment of new Medicare, Medicaid, and CHIP providers and suppliers of a particular type (or the establishment of new practice locations of a particular type) in a geographic area when necessary to combat fraud, waste, or abuse.

c. The 2019 Provider Enrollment Final Rule

We published in 2019 a final rule with comment period titled ''Medicare, Medicaid, and Children's Health Insurance Programs; Program Integrity Enhancements to the Provider Enrollment Process,'' which appeared in the **Federal Register** on September 10, 2019 (84 FR 47794). This rule implemented section 1866(j)(5) of the Act (as added by the Affordable Care Act), which permitted the Secretary to deny the enrollment of a Medicare, Medicaid, and Children's Health Insurance Program (CHIP) provider or supplier if—

- The provider or supplier has or previously had an affiliation with a provider or supplier that: (1) has uncollected debt; (2) has been or is subject to a payment suspension under a Federal health care program; (3) has been or is excluded by the Office of Inspector General (OIG) from Medicare, Medicaid, or CHIP; or (4) has had its Medicare, Medicaid, or CHIP billing privileges denied or revoked; and
- The Secretary determines that this affiliation presents an undue risk of fraud, waste, or abuse to the Medicare program.

This rule also established additional grounds for denying or revoking a provider's or supplier's Medicare enrollment based, in general, on problematic or otherwise non-compliant conduct by the provider or supplier. These provisions were designed to strengthen the integrity of the Medicare program and to protect Medicare beneficiaries.

Besides these final rules, we have made other regulatory changes to 42 CFR part 424, subpart P—virtually on an annual basis since 2020—to address various payment safeguard issues that have arisen.

Despite these rulemaking efforts, and as later explained in detail, several provider enrollment vulnerabilities remain and certain regulatory clarifications are needed. Therefore, we are proposing a number of provider enrollment provisions that we believe would help resolve these issues. They focus largely on: (1) DMEPOS supplier enrollment, including DMEPOS surety bonds; (2) Medicare Advantage enrollment requirements; and (3) additional denial and revocation grounds. We also are proposing provisions regarding Medicaid provider enrollment, discussed in section V.G of this proposed rule.

2. Legal Authorities

Although additional legal authorities are addressed later in this section V., our principal authorities for this proposed rule are:

- Section 1866(j) of the Act, which furnishes specific authority regarding

[139] Medicare Diabetes Prevention Program (MDPP) suppliers complete the Form CMS–20134 (Medicare Enrollment Application; Medicare Diabetes Prevention Program (MDPP) Suppliers) in lieu of the Form CMS–855. Except as stated otherwise, all references in this proposed rule to the Form CMS–855 include the Form CMS20134.

the enrollment process for providers and suppliers; and

• Sections 1102 and 1871 of the Act, which provide general authority for the Secretary to prescribe regulations for the efficient administration of the Medicare program.

3. Medicaid and CHIP Provider Enrollment

As stated, we are also proposing a number of provider enrollment provisions relating to Medicaid and CHIP. These are addressed in section V.G. of this proposed rule.

B. DMEPOS Supplier Provisions

Among the types of providers and suppliers that must enroll in Medicare to bill the Medicare program are DMEPOS suppliers. Such suppliers include, but are not limited to, the following:

• Medical supply companies that exclusively furnish DME like wheelchairs, walkers, and canes.

• Physicians and practitioners who provide DMEPOS to their own patients.

• Home health agencies (HHAs) and hospitals that provide DMEPOS to their own patients.

• Oxygen and oxygen equipment suppliers.

• Prosthetists and orthotists.

• Pharmacies.

DMEPOS suppliers enroll in Medicare via the Form CMS–855S application (Medicare Enrollment Application—Durable Medical Equipment, Prosthetics, Orthotics and Supplies (DMEPOS); OMB Control No. 0938–1056). Per 42 CFR 424.57(b)(1)—and excluding locations it utilizes solely as warehouses or repair facilities—the supplier must separately enroll each physical location it uses to furnish Medicare-covered DMEPOS.

Suppliers of DMEPOS have long presented to the Medicare program an elevated risk of fraud, waste, and abuse—historically, perhaps the highest of all Medicare provider and supplier types. Numerous HHS–OIG reports since 1998 have noted serious program integrity problems with DMEPOS suppliers, and we recently outlined a significant number of DMEPOS supplier criminal and False Claims Act cases.[140] Recognizing this threat, CMS over the years has established particularly stringent requirements that DMEPOS suppliers must meet to enroll and maintain enrollment in Medicare. To illustrate, DMEPOS suppliers under 42 CFR 424.518(c) are one of only a few provider and supplier types subject to the highest and strictest level of screening during the enrollment process. (In fact, they were one of only two types originally assigned to this high-risk screening category in 2011—the other being HHAs). This level of screening includes: (1) a site visit; and (2) submission of fingerprints of the supplier's 5 percent or greater owners for a Federal Bureau of Investigation (FBI) criminal background check. There are other regulatory provisions besides the basic provider enrollment requirements in 42 CFR part 424, subpart P (§§ 424.500 through 424.575) that DMEPOS suppliers must meet. These requirements include, but are not limited to, the following:

• Compliance with the DMEPOS supplier standards in § 424.57(c).

• Acquisition and maintenance of a surety bond consistent with § 424.57(d).

• Compliance with DMEPOS quality standards.

• Accreditation by a CMS-approved DMEPOS accrediting organization.

The foregoing underscores the serious and continued payment safeguard challenges associated with DMEPOS suppliers. We accordingly propose several regulatory revisions related to DMEPOS supplier enrollment.

1. Medicare Surety Bonds

a. Introduction

On January 2, 2009, we published in the **Federal Register** (74 FR 166) a final rule to implement section 1834(a)(16)(B) of the Act.[3] The rule established a new § 424.57(d) requiring DMEPOS suppliers that were not otherwise exempted to submit a surety bond in the amount of at least $50,000 to the National Supplier Clearinghouse (now the National Provider Enrollment Contractors (NPECs)) to enroll in and maintain their enrollment in the Medicare program. The surety bond requirements of § 424.57(d) have been in effect since 2009. DMEPOS suppliers presently are the only Medicare provider or supplier type required to submit and maintain a surety bond as a condition of enrollment.

Section 6402(g)(1) of the Affordable Care Act amended section 1834(a)(16) of the Act by adding a provision regarding the volume of DMEPOS billing as it relates to the surety bond requirement. Section 1834(a)(16)(B) of the Act now provides that a DMEPOS supplier must furnish a surety bond of at least $50,000 that the Secretary determines is commensurate with the volume of the supplier's billing. Consistent therewith, and as discussed further, we are proposing changes to § 424.57(d) to improve the overall surety bond process.

b. Issues With Existing § 424.57(d)

In general, a surety bond—in the context of Medicare DMEPOS supplier enrollment—represents a promise by a surety that it will pay CMS a certain sum amount if the DMEPOS supplier to whom the surety issued the bond fails to repay a debt it owes to CMS; these debts include overpayments, civil money penalties, and assessments. Indeed, debt recoupment is the principal goal of CMS' surety bond requirement. The bond requirement has other benefits, too. One is that it facilitates additional screening of the DMEPOS supplier beyond that performed under § 424.518(c). Before deciding whether to issue a surety bond, the surety reviews the finances and other aspects of the DMEPOS supplier that CMS may currently lack the means to assess. This is critical given the program integrity threats that DMEPOS suppliers pose. The other is that suppliers may learn that CMS has referred their unpaid debt to the surety. Concerned that the surety might cancel the supplier's bond if the surety has to pay the debt to CMS—leaving the supplier at risk of revocation if it is unbonded—the supplier finally pays the debt. Since 2012, in fact, two of CMS' DME Medicare Administrative Contractor (MAC) jurisdictions have collected a combined $171.3 million in DMEPOS supplier payments in this manner. Hence, § 424.57(d) is not only a means of collection from sureties but also from the suppliers themselves.

Over the years, though, our surety bond collection efforts have encountered challenges. A particular difficulty has been that sureties sometimes do not make payment to CMS notwithstanding their obligation to do so under both § 424.57(d) and the surety bond's terms. To illustrate, of the approximately $32 million in DMEPOS supplier debts that CMS referred to sureties for payment between CY 2016

[140] See the proposed rule titled, ''Medicare and Medicaid Programs; Calendar Year (CY) 2026 Home Health Prospective Payment System (HH PPS) Rate Update; Requirements for the HH Quality Reporting Program and the HH Value-Based Purchasing Expanded Model; Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS) Competitive Bidding Program Updates; DMEPOS Accreditation Requirements; Provider Enrollment; and Other Medicare and Medicaid Policies'' (90 FR 29108), published in the **Federal Register** on July 2, 2025. CMS on February 27, 2026, also imposed a nationwide temporary moratorium on the enrollment of DMEPOS medical supply companies due to fraud, waste, and abuse concerns. *See* ''Medicare, Medicaid, and Children's Health Insurance Programs: Announcement of Nationwide Temporary Moratoria on Enrollment of Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS) Supplier Medical Supply Companies'' (91 FR 9855), which appeared in the **Federal Register** on February 27, 2026.

and CY 2018, CMS collected only $2.85 million from the sureties.[141] To help address this issue, we proposed in a March 1, 2016, provider enrollment rule that CMS could reject an enrolling or enrolled DMEPOS supplier's surety bond if the surety that issued the bond failed to make a required payment to CMS pursuant to § 424.57(d).[142] Though we did not finalize this provision, the problem remains very serious. To illustrate:

- CMS data from 2025 showed that a combined $37.5 million in DMEPOS supplier debts had been referred to seven sureties for payment. The sureties collectively paid only $540,000. Although the affected suppliers paid about $5.5 million of the $37.5 million amount once their debts were referred to the sureties, it is extremely disconcerting that the sureties—despite their obligation to do so under the bond's terms—paid no more than 1.5 percent of the amount of debt referred to them.
- The two previous-referenced DME MAC jurisdictions also informed CMS that since 2012 they have referred a combined $229.2 million in DMEPOS supplier debts to sureties. Of this total, sureties paid only $35.7 million.

In sum, sureties' failures to make required payments to CMS have resulted in hundreds of millions of dollars in unpaid DMEPOS supplier debts. Sureties should not be able to avoid fulfilling their legal and financial obligations to CMS. Given the resulting harm to American taxpayers and the need to protect the Trust Funds, we propose the following changes to § 424.57(d).

c. ''Sufficient Evidence'' Standard and Review of Overpayment Calculations

Section 424.57(d)(5)(i) states that the DMEPOS surety bond must guarantee that the surety will—within 30 days of receiving written notice from CMS containing ''sufficient evidence'' to establish the surety's liability under the bond of unpaid claims, civil money penalties (CMPs), or assessments—pay CMS a total of up to the full penal amount of the bond. Section 424.57(a) defines ''sufficient evidence'' as documents CMS may supply to the surety to establish that the supplier had received Medicare funds exceeding the amount due and payable under the statute and regulations, the amount of a CMP, or the amount of some other assessment against the DMEPOS supplier.

One reason a surety sometimes cites for refusing to pay CMS is that, in the surety's view, CMS did not furnish ''sufficient evidence'' that the surety is, in fact, liable for payment. This, in many cases, is incorrect, and there have been numerous instances where no matter how many documents CMS furnishes to the surety that conclusively establish the supplier's debt and the surety's obligation, the surety continuously—and, we believe, inappropriately—maintains that the evidence is insufficient. Nonetheless, and to clarify its scope, we propose to revise the ''sufficient evidence'' definition such that the term would mean that CMS has furnished documentation to the surety that establishes all of the following:

- The amount and basis of the overpayment, CMP, or assessment that the DMEPOS supplier owes.
- That it is an unpaid claim.
- A valid surety bond exists.
- The request to the surety for payment satisfies the surety bond requirements, specifically:

++ When a bond is in effect, that the unpaid claim, CMP, or assessment occurred during the term of the bond. This includes when a DMEPOS supplier changes its surety during the term of a bond; or

++ When the DMEPOS supplier fails to furnish a bond, submit a rider[143] when required, or if the DMEPOS supplier's billing privileges are revoked, that the unpaid claims, CMPs, or assessments are asserted or imposed against the DMEPOS supplier during the 2 years following, and they are based on overpayments or other events that took place during the term of the bond or rider.

This clarification is not intended to change which surety is responsible when a DMEPOS supplier obtains a bond from a new surety; in that circumstance, 42 CFR 424.57(d)(9) determines which surety is responsible. Rather, we believe these revisions would remove any ambiguity about the surety's responsibility to make payment to CMS, and we expect sureties to do precisely this after receipt of this documentation.

In addition, some sureties have declined to make required payments to CMS because: (1) CMS did not furnish documentation to the surety as to how CMS calculated the overpayment, CMP, or assessment; or (2) the supplier's appeal rights regarding the overpayment have not been exhausted. This is improper because neither the existing definition of ''sufficient evidence'' nor any other provision in current § 424.57(d) (including paragraph (d)'s required bond terms) have ever required such documentation or the exhaustion of appeal rights. Regarding the former, ''sufficient evidence'' only requires documentation ''that the DMEPOS supplier had received Medicare funds in excess of the amount due and payable under the statute and regulations, the amount of a CMP, or the amount of some other assessment against the DMEPOS supplier.'' The surety's obligation under the bond to make payment is the critical consideration, not the details of how CMS calculated the debt amount. As for appeals, CMS in the aforementioned January 2, 2009, final rule—in response to a public comment recommending that CMS not request surety payment before appeals are exhausted—was clear that: ''We do not agree that we should be prohibited from seeking payment from a surety until all supplier appeals have been exhausted. In addition, we believe that it is appropriate for the surety to pay CMS a total of up to the full penal amount of the bond when sufficient evidence is presented.'' [144]

While the foregoing reflects longstanding policy, we propose to reiterate this by revising existing paragraph (d)(5)(ii). Said paragraph currently states that the surety bond ''must provide the following: The surety is liable for unpaid claims, CMPs, or assessments that occur during the term of the bond.'' We propose to designate the clause beginning with ''The surety is liable. . . . . .'' as new paragraph (d)(5)(ii)(A). New paragraphs (d)(5)(ii)(B) and (C) would require the bond to provide that:

- The surety agrees not to challenge or dispute the amount CMS determines is owed from the obligor, the underlying calculations, or the basis for overpayment.
- The surety must make payment to CMS as required under the bond and this paragraph (d) regardless of whether the obligor has available options to appeal, or pending appeals of, the overpayment, CMP, or assessment.

d. Decline To Accept Bonds From Noncompliant Sureties

Notwithstanding the aforementioned non-finalization of our surety bond rejection proposal in 2019, we maintain that CMS should not be required to

[141] The remainder (which could not be collected) was referred to the Department of Treasury consistent with existing CMS procedures.

[142] Medicare, Medicaid, and Children's Health Insurance Programs; Program Integrity Enhancements to the Provider Enrollment Process'' (81 FR 10720).

[143] Section 424.57(a) defines ''rider'' as a notice issued by a surety that a change in the bond has occurred or will occur.

[144] 74 FR 174.

accept bonds from non-compliant sureties. Again, the bond requirement's central purpose is to help CMS recoup monies it is owed. Sureties' failure to make required payments harms the Trust Funds and taxpayers, and CMS' continued acceptance of bonds from such sureties exacerbates said harm. Measures to hold such sureties accountable are therefore needed.

A non-exempt DMEPOS supplier must obtain and maintain a surety bond from an ''authorized surety.'' The latter term is defined in part in § 424.57(a) as a surety ''that has been issued a Certificate of Authority [COA] by the U.S. Department of the Treasury [DoT] as an acceptable surety on Federal bonds . . .''. DoT is the principal overseer of processes involving surety companies that do business with the United States; indeed, 31 CFR 223.1(a) states that the regulations in 31 CFR part 223 ''govern the issuance, renewal, and revocation by the Secretary of the Treasury,'' acting through the DoT, Bureau of the Fiscal Service, of COAs ''to bonding companies to do business with the United States as sureties on, or reinsurers of, Federal surety bonds'' under 31 U.S.C. 9304–9308 and Part 223, ''and the acceptance of such obligations.'' COAs are addressed at 31 CFR 223.16. This regulatory provision states in part that a list of certificate holding companies is published annually in Department Circular No. 570 (Companies Holding Certificates of Authority as Acceptable Sureties on Federal Bonds and as Acceptable Reinsuring Companies). Per 31 CFR 223.17(a), a bond underwritten by a certified company on the 31 CFR 223.16 Department Circular No. 570 list may be presented to any agency-bond approving official for acceptance, and such agency bond-approving official may accept such bonds. To furnish DMEPOS surety bonds, a surety must be on this list as an acceptable surety.

Section 223.17(b)(1), though, states that an agency bond-approving official may decline to accept bonds underwritten by a certified company for cause if the company has been given advance written notice by said agency. The written notice must do all of the following:

- State the agency's intention to decline bonds underwritten by the company.
- State the reasons for or cause of the proposed declination of such bonds.
- Give the company an opportunity to rebut and to cure the stated reasons or cause.

Under section 223.17(b)(2), the agency may decline to accept the bonds if—after considering the company's submission under 223.17(b)(1) (or its failure to respond to the paragraph (b)(1) notice)—it issues a written determination that the bonds should not be accepted.

We believe section 223.17 is clear on its face that CMS may decline bonds in the circumstances described in said section. To this end, we propose to outline procedures for doing so in new § 424.57(d)(16). These procedures would include section 223.17(b)'s requirements (such as describing what qualifies as ''for cause''), tailored to the specifics of the DMEPOS surety bond requirements.

In new § 424.57(d)(16)(i), we propose to mirror section 223.17(b)(2)'s language for purposes of consistency. We would state that CMS may decline to accept from an authorized surety any DMEPOS supplier surety bonds required under § 424.57(d) if: (i) the ''for cause'' standard in paragraph (d)(16)(ii) is met; and (2) the written notice and opportunity for rebuttal requirements in paragraph (d)(16)(iii) are met.

In new § 424.57(d)(16)(ii), we propose that CMS' declination to accept DMEPOS surety bonds from a particular surety must be ''for cause.'' For purposes of § 424.57(d)(16), ''for cause'' would involve circumstances ''when a surety under paragraph (d) has not paid or satisfied an administratively final bond obligation'' that is owed to CMS. This latter quoted language is in section 223.17(b)(2). Section 223.17(b)(3), meanwhile, states that the agency must define when a bond obligation becomes administratively final. We propose that this occurs when: (1) CMS has furnished ''sufficient evidence'' (as that term would be defined in our proposed revision thereto) to the surety of its obligation to make payment under the bond; and (2) the surety fails to make the required payment within 30 calendar days of receiving notice from CMS or its contractor to do so. This is consistent with current CMS practice.

New § 424.57(d)(16)(iii) would outline the procedures for furnishing written notice to the surety of our intention to decline to accept its DMEPOS supplier bonds. This paragraph would state that CMS sends, via certified mail, written notice to the surety of said intention. The notice must: (1) state the intention to decline bonds underwritten by the company; (2) list the reason(s) or cause for CMS' intention; (3) identify the instance(s) in which the surety failed to make the required payment(s); (4) describe the surety's rebuttal rights; and (5) provide the surety a 30-day opportunity to cure the stated reasons for declination. These requirements would help ensure that the surety received the notice and understands the basis for CMS' action.

In new § 424.57(d)(16)(iv), we propose a process by which the surety can rebut CMS' conclusions in the § 424.57(d)(16)(iii) notice it received. This process would be similar to rebuttals in § 424.541(b) for stays of enrollment and in § 424.546 for enrollment deactivations. This approach is appropriate for three reasons. First, it has been used for many years in provider enrollment and the processes are well-established. It can hence be expeditiously expanded to include surety rebuttals. Second, section 223.17 specifically uses the term ''rebut'' as opposed to ''appeal'' or ''reconsideration''; the latter two terms represent processes addressed in 42 CFR part 498. Using a rebuttal process for section § 424.57(d)(16)(iv) would accordingly be consistent with section 223.17's ''rebut'' terminology. Third, our existing rebuttal process for enrollment affords providers and suppliers ample opportunity to be heard. We believe the same would hold true for sureties.

In paragraph (d)(16)(iv)(A)(*1*), we propose that when a surety receives the notice specified in (d)(16)(iii), the surety has 30 calendar days from the date of the notice to submit a rebuttal to CMS' intention to decline to accept DMEPOS surety bonds from the surety. Although the rebuttal timeframe for stay and deactivation rebuttals is 15 days, we believe 30 days is appropriate for sureties since this process would presumably be new to them.

In paragraph (d)(16)(iv)(A*)(2),* we propose that CMS may, at its discretion, extend the 30-day time-period referenced in paragraph (d)(16)(iv)(A)*(1).*

In paragraphs (d)(16)(iv)(B)(*1*) through (*4*), we propose that the rebuttal must meet all of the following:

- Be in writing.
- Specify the facts or issues about which the surety disagrees with CMS' intention to decline to accept bonds.
- Submit all documentation the surety wants CMS to consider in its review of the rebuttal.
- Be submitted in the form of a letter that is signed and dated by:

++ The surety's chief executive officer, chief operating officer, general partner, or equivalent official who is a W–2 employee of the surety with the authority to legally and financially bind the surety to Federal and State laws; or

++ A representative (as defined in § 498.10). If the legal representative is an attorney, the attorney must include a statement that he or she has the authority to represent the surety; this statement is sufficient to constitute

notice of such authority. If the legal representative is not an attorney, the surety must file with CMS written notice of the appointment of a representative; this notice of appointment must be signed and dated by, as applicable, the official in the previous paragraph or a legal representative.

In paragraph (d)(16)(iv)(C), we propose that the surety's failure to submit a rebuttal that is both timely under paragraph (d)(16)(iv)(A) and fully compliant with all of paragraph (d)(16)(iv)(B)'s requirements constitutes a waiver of all rebuttal rights under this section. If the surety fails to timely submit a compliant rebuttal, CMS would issue a subsequent written determination that it will not accept bonds underwritten by the surety and state the declination's effective date, which would not be before the date of this written determination.

In paragraph (d)(16)(iv)(D), we propose that upon receipt of a timely and compliant rebuttal, CMS reviews the rebuttal to determine whether to proceed with its intended declination of surety bonds from the surety.

In paragraph (d)(16)(iv)(E), we propose that after its receipt of any timely and compliant rebuttal, CMS notifies the surety in writing of the following—

- Its review of the rebuttal;
- Its decision as to whether to proceed with its intended declination to accept DMEPOS surety bonds from the surety and the basis for that decision; and
- Any such declination's effective date, which would not be before the date of the notice described in paragraph (d)(16)(iv)(E).

Although enrollment stays and deactivations can be implemented and become effective before the stay or deactivation letter is sent to the provider, we wish to give the surety an opportunity to submit the rebuttal and for CMS to consider it before deciding whether to proceed with any declination. We also believe this approach is more consistent with section 223.17(b) than one that would permit declination before CMS' completes its review of the rebuttal. In addition, a determination made under paragraph (d)(iv)(E) is not an initial determination under § 498.3(b), and, therefore, is not appealable.

Under new paragraph (d)(16)(v)(A), and as previously indicated, the surety would have a 30-day opportunity to remedy the issues leading to CMS' intention to decline to accept the surety's bonds. CMS would have the discretion to extend this 30-day period.

Under new paragraph (d)(16)(v)(B), we propose the following:

- The surety, within the required timeframe, would have to submit written proof that it has cured all the deficiencies in question. This proof could include, for example, documentation that it has fully paid or satisfied all outstanding financial obligations forming the bases of CMS' intended declination. It would not be enough for the surety to merely state that it has cured the stated reasons or cause.
- CMS would decide whether the submitted written proof is adequate and whether all deficiencies have been corrected. If the surety submitted a timely and compliant rebuttal, CMS would include its decision on the cure matter in the rebuttal decision letter described in proposed (d)(16)(v)(A). If the surety does not submit a timely and complete rebuttal, CMS would include its decision on the cure issue in a final letter to the surety confirming whether CMS will decline to accept surety bonds issued by the surety.

In paragraph (d)(16)(vi)(A), and consistent with 31 CFR 223.17(b)(4), we propose to maintain a list of sureties from which CMS would not accept DMEPOS surety bonds under paragraph (d)(16). This list would be made public on CMS' website and updated as needed so that DMEPOS suppliers understand which sureties they may and may not use for purposes of the surety bond requirement.

In paragraph (d)(16)(vi)(B), we propose that CMS may, in its discretion, at any time remove a surety from the list described in paragraph (d)(16)(vi). CMS would notify the surety in writing of said removal and the effective date thereof. This would give CMS flexibility to again accept bonds from the surety should, in CMS' judgment, circumstances warrant.

2. Medicare DMEPOS Supplier Relationship Reporting

A significant challenge CMS has faced in stemming DMEPOS fraud, waste, and abuse has been our lack of upfront knowledge of certain outside entities with which the supplier may have business relationships. While DMEPOS suppliers have for decades been required to report on the Form CMS–855S their 5 percent or greater owners, general and limited partners, managing employees and organizations, and corporate officers and directors, the supplier need not disclose various other parties with which they are associated, such as the following:

- Marketing companies, which perform services for the supplier such as advertising, mail and email solicitation to beneficiaries, and generating leads.
- Wholesalers that purchase supplies from manufacturers and then sell them to the supplier.
- Fulfillment companies, which generally are entities with which the supplier contracts to deliver items to beneficiaries (rather than the supplier directly delivering them).

Considering the excessive program integrity risk DMEPOS suppliers have long posed and the need to ensure that the products they distribute to beneficiaries are quality items, we believe we must understand the full chain of the supplier's acquisition and eventual distribution and delivery of these goods. Without knowing, for instance, the entity from which the supplier purchased its products, we may lack important information to help us ascertain the seller's credentials. Indeed, we have seen instances where certain wholesalers distribute low-quality supplies that can harm beneficiaries, sometimes with the knowledge of questionable DMEPOS suppliers seeking to limit costs at the expense of patient care. In a similar context, it can be difficult for us to verify whether a supplier will properly deliver supplies to beneficiaries if we do not know whether the supplier uses a fulfillment company for this function and, if it does, which company. Some fulfillment entities may have poor records regarding supply delivery (with beneficiaries sometimes never receiving needed items) or have participated in fraud schemes.

Awareness of these companies' identities would help CMS: (1) safeguard beneficiaries; (2) validate the supplier's compliance with the enrollment standards in § 424.57(c); (3) vet these entities for program integrity risks; and (4) ascertain whether the supplier may be acting with other entities in a larger fraud scheme, an especially important consideration given that we have seen an alarming number of such instances over the years. We also note that some of these entities may have as much (or more) involvement with the supplier's regular operations as certain parties that must currently be reported, such as indirect owners and various members of boards of directors. This, in our view, further warrants the collection of data about wholesalers and fulfillment companies.

Marketing entities are of particular concern to us. Section 424.57(c)(11) currently states that—with three exceptions outlined in § 424.57(c)(11)(i) through (iii)—suppliers may not contact a beneficiary by telephone when supplying a Medicare-covered item.

This also applies to companies with which the supplier contracts to perform marketing services on the supplier's behalf. Some suppliers have used marketing entities to convince beneficiaries that they need certain DMEPOS items when, in fact, they do not. There have been instances where a marketing company cold-calls Medicare beneficiaries to obtain their personal data (sometimes promising the beneficiary free items in return); it will then use this information to: (1) prepare orders for certain DMEPOS items; and (2) pay physicians to sign them regardless of whether the patient requested the product. The following reports and cases—some of which were outlined earlier in the cited CY 2026 Home Health Prospective Payment System (HH PPS) proposed rule (90 FR 29108)—are illustrative of this behavior:

- A May 2024 OIG report stated that Medicare paid for off-the-shelf braces marketed to beneficiaries by telemarketers using prohibited direct solicitation.[145]
- Also in May 2024, a Florida man was sentenced to 96 months in prison for his role in a DMEPOS kickback scheme. He and others owned and operated marketing call centers and telemedicine companies through which they secured physicians' orders for DMEPOS for Medicare beneficiaries without regard to medical necessity.[146]
- A California woman was sentenced in December 2023 to 15 years in prison for billing Medicare for over $24 million by submitting fraudulent claims for medically unnecessary DME—mostly power wheelchairs (PWC)—and PWC repairs. As the *de facto* owner of two DMEPOS supplier companies (both of which were Medicare-enrolled in the names of her out-of-state relatives), the individual orchestrated a scheme in which she paid marketers for patient referrals and then directed them to take patients to physicians, who prescribed medically unnecessary DME (including PWCs) that her companies used to submit fraudulent claims to Medicare.[147]
- In September 2023, a Federal district court entered a judgment against a Virginia DMEPOS supplier for damages and penalties under the False Claims Act for over $12 million. In its complaint filed in district court, the United States alleged that over a nearly 6-year period, Medicare paid the supplier over $600,000 for medical braces furnished to Medicare beneficiaries related to DMEPOS prescriptions that the supplier illegally purchased from marketing companies. The DMEPOS supplier paid a fee for each prescription that it purchased and then used these prescriptions (along with personal and medical data provided by the marketing companies) to submit 923 fraudulent Medicare claims.[148]
- A Georgia woman pled guilty in June 2024 to an information charging her with conspiracy to commit health care fraud. The individual and her conspirators owned, operated, and had a financial interest in DMEPOS companies through which they obtained physicians' orders for DMEPOS for Medicare beneficiaries without regard to medical necessity. They obtained the DMEPOS orders using marketing call centers and telemedicine companies, caused the submission of false and fraudulent Medicare claims, and paid illegal kickbacks.[149]
- A South Carolina man was sentenced to 9 years in prison in March 2024 for his role in a nearly $100 million healthcare fraud scheme. The individual controlled and operated at least 10 DMEPOS companies located throughout the United States. The companies entered into agreements with an offshore, advertised call center to purchase physicians' orders so the DMEPOS companies could bill Medicare. When a Medicare beneficiary called the applicable number, the beneficiary would be screened for eligibility and then convinced that the beneficiary needed a brace and oftentimes upsold on other braces. The call center would then contact a telemedicine company whose physician or nurse practitioner would issue a prescription without regard to the medical necessity. Beneficiaries were prescribed braces without ever being examined by, seeing, or, in some instances, even speaking to a medical professional.[150]
- A Texas man in March 2026 was sentenced to 150 months in prison for organizing and leading a $61.5 million health care fraud and wire fraud conspiracy in which thousands of Medicare beneficiaries who were the victims of deceptive telemarketing were sent thousands of orthotic braces, foot baths, and genetic tests they did not need. The defendant—who owned seven DMEPOS supply companies—owned a marketing company, too. Working with an offshore call center located in the Philippines, the defendant and others peddled medically unnecessary orthotic braces, foot baths, and genetic tests to Medicare beneficiaries nationwide. In audio recordings presented at trial, the defendant was heard pressuring beneficiaries to accept these products even after the beneficiaries protested that they did not need or want them.[151]
- A Mississippi man who owned a marketing company and was the beneficial owner of eight DMEPOS companies was sentenced in May 2026 to 196 months in prison for his role in a scheme to bilk Medicare (and another Federal health program) out of nearly $200 million by selling patient information and sham doctors' orders for orthotic braces that patients did not want or need. According to court documents and evidence presented at trial, the defendant worked with overseas telemarketing call centers that pressured elderly Americans to provide their personal and health insurance information and agree to accept medically unnecessary orthotic braces; in certain instances, the call centers altered call recordings to make it seem like Medicare patients agreed to the braces when they did not.[152]

As we have noted in prior provider enrollment rules, our goal is to stop fraud before it begins and to depart from the ''pay and chase'' model, whereby we take action only after the fraud commences. The earlier we learn of any marketing companies (domestic or foreign) the supplier uses, the sooner we can screen them and determine whether they present payment safeguard threats to the Medicare program.

In light of all these concerns, we propose the following provisions.

First, new § 424.57(i) would require all DMEPOS suppliers to report on the Form CMS–855S application (or its successor form), in a complete and accurate manner (including any documentation requested by CMS under § 424.510(d)(2)(iii)(C) to verify or explain the furnished information), all

domestic and foreign entities and individuals that do any of the following:

- Perform any marketing service of any type for the supplier.
- Furnish DMEPOS items or services to beneficiaries on the supplier's behalf, such as fulfillment companies.
- Are wholesalers from which the supplier purchases DMEPOS items for provision to the supplier's beneficiaries.

CMS would revise the Form CMS–855S via a separate Paperwork Reduction Act (PRA) package to collect this data. Stakeholders may submit comments on these form revisions during the eventual PRA notice-and-comment process.

Second, we propose in new §§ 424.530(a)(26) and 424.535(a)(31) that we may deny or revoke the DMEPOS supplier's enrollment if CMS determines that any entity or individual reported pursuant to § 424.57(i)—or the relationship or business arrangement the entity or individual has with the supplier—poses an undue risk of fraud, waste, or abuse, or of beneficiary harm. This provision would give us the ability and flexibility to address program integrity threats based on the reported information. However, CMS would not deny or revoke enrollment under these provisions as a matter of course but only when justified after carefully considering the facts and circumstances. We also propose that the effective date of a revocation under § 424.535(a)(31) would be the date on which CMS determines that a supplier should be revoked pursuant to § 424.535(a)(31). This would conform to CMS' proposal in the CY 2027 HH PPS proposed rule (placed on display at the **Federal Register** on July 1, 2026 (91 FR 41216)) [153] to make all of our revocation effective dates retroactive rather than keep some of them prospective (that is, effective 30 days after the date on which the revocation letter is mailed to the provider). As that proposed rule would designate all revocation effective dates therein as § 424.535(g)(1)(i) through (xxvi), we propose that § 424.535(a)(31)'s effective date would be designated as new § 424.535(g)(1)(xxxi).

3. Beneficiary Consent for Items

An especially disturbing DMEPOS supplier practice over the years has been the shipping of supplies to beneficiaries without the latter having requested them, followed by the supplier billing Medicare for the items. Indeed, we have seen fraud schemes involving stolen beneficiary information, which enables the supplier to report a beneficiary's data on the claim with a fictitious diagnosis and date of service and a random referring provider's information; in some cases, the supplier never even sent the item to the beneficiary. The following are several recent examples of this conduct (as noted previously, we generally use the term ''supplier'' to refer to DMEPOS suppliers and the term ''provider'' to refer to other provider and supplier types):

- A supplier submitted approximately a dozen claims for items it claimed to have sent to various beneficiaries. All of the beneficiaries: (1) denied the diagnoses the supplier reported; (2) confirmed that they never received the items; and (3) denied knowing the supplier or the referring provider.
- A beneficiary received orthotics from a supplier via shipment. The beneficiary stated that he did not know why he received the items, and that the reported diagnosis was incorrect. While he stated that he was scheduled for an appointment with the reported referring provider, he had not yet seen said provider.
- A beneficiary received a call from a party identifying itself as Medicare, advising her that she would receive orthotics for free. The beneficiary informed the caller that she did not need them, but she ultimately received the supplies. The beneficiary later told CMS that she never saw or spoke with the referring provider and had never used the services of the supplier listed on the claim.
- Another beneficiary received a call from a supplier: (1) asking her questions about her medical diagnosis; and (2) stating that she was qualified to receive DMEPOS items at no cost to her. She received the items but informed CMS that she had neither requested nor needed them; she also had never discussed needing the items with her primary care provider.

We believe that requiring prior confirmation from the beneficiary that the item was requested and needed before it is sent to the beneficiary would help stem this improper activity. Suppliers could not simply send unauthorized items to patients and receive payment for them. To this end, we propose an additional DMEPOS supplier standard in new § 424.57(c)(32) that would require DMEPOS suppliers to have a process for obtaining prior beneficiary consent for items the supplier sends to the beneficiary at their home or residence. For purposes of this standard:

- The standard only applies to the initial order the supplier receives, not to refills.
- The process must, at a minimum, include the following:

++ After receiving a valid order for the item from the ordering or prescribing provider (for example, physician), the supplier must telephone or email the beneficiary (or, if applicable, their representative (such as a caretaker or guardian)) and ask whether the beneficiary or representative: (1) is aware of the order or prescription; (2) whether the beneficiary needs the item; and (3) consents to receiving the item. The item cannot be delivered until these three conditions are met, even if the beneficiary or representative cannot be reached. If only the representative can satisfy the requirements, the supplier's process must include a means of confirming that said individual is authorized to act on the beneficiary's behalf.

++ For each such item, the supplier must document in a written log: (1) the beneficiary's or representative's name and either their phone number or email address (whichever means of communication was used); (2) time(s) and date(s) of the contact(s); and (3) a statement that the three conditions were met.

We solicit comments on any additional minimum requirements that should be included in this process.

4. Surveys and Accreditations

Section 424.58(e)(8)(i)(A) states that a DMEPOS accreditation organization (AO) must perform a survey of all DMEPOS supplier locations for which the supplier seeks accreditation or reaccreditation with the AO. (This includes, but is not limited to, accreditations: (i) for a new item type the supplier has not previously furnished; or (ii) as required under § 424.551.) Surveys help determine whether the supplier meets the DMEPOS quality standards. These standards address matters such as: (1) administration; (2) financial, human resources, and information management; (3) equipment and item delivery and set-up; (4) patient and caregiver training and instruction; and (5) patient follow-up. The standards are both extensive and detailed because of the need to confirm the supplier's legitimacy. Compliance with the quality

[153] ''Calendar Year 2027 Home Health Prospective Payment System (HH PPS) Rate Update; Requirements for the HH Quality Reporting Program and the Expanded HH Value-Based Purchasing Model; and Other Medicare and Medicaid Policies''.

standards is necessary for the supplier to enroll in Medicare.[154]

Given the importance of DMEPOS supplier surveys in protecting beneficiaries and facilitating program integrity, the following proposed changes to § 424.58(e)(8)(i)(A) would expand the instances in which a survey must be performed.

First, § 424.551 states that a DMEPOS supplier undergoing a CIMO—which is defined as an individual or organization acquiring more than a 50 percent direct ownership interest in the supplier within 36 months of its initial enrollment (or within 36 months of its most recent CIMO)—must enroll as a new DMEPOS supplier, undergo a survey, and obtain a new accreditation. There are three supplier exceptions to this ''36-month rule'' in § 424.551: (1) the supplier's parent company is undergoing an internal corporate restructuring; (2) the supplier's owners are changing the supplier's business structure, and the owners remain the same; and (3) an individual owner of the supplier dies. We are concerned that the lack of a supplier survey in these three exempted situations—as well as with suppliers that undergo CIMOs beyond the 36-month window—leaves CMS unable to confirm whether the supplier under its new majority ownership is compliant with the quality standards and is committed to patient care. To us, the central issues are the change in the supplier's controlling interest itself and the potential involvement of the new majority owner(s)—rather than the timing (for instance, more than 36 months after initial enrollment) or whether an exception applies.

We therefore propose to revise § 424.58(e)(8)(i)(A) such that any DMEPOS supplier in which an individual or organization acquires more than a 50 percent direct ownership interest requires a survey. This survey requirement would thus apply a modified version of the definition of CIMO in § 424.551(a); that is, it would apply even if the CIMO: (1) occurred more than 36 months after initial enrollment or the supplier's most recent CIMO; or (2) qualifies for an exception under § 424.551(c). We note that this change would only involve the performance of a survey. A supplier undergoing a CIMO that is excepted or occurs outside the 36-month period would not have to enroll as a new supplier or receive a new accreditation based solely on the CIMO.

[154] The quality standards can be found at *https://www.cms.gov/research-statistics-data-and-systems/monitoring-programs/medicare-ffs-compliance-programs/downloads/final-dmepos-quality-standards-eff-01-09-2018.pdf.*

Second, we propose to also include practice location changes within § 424.58(e)(8)(i)(A). If a supplier moves to another site, we have no means of ascertaining whether it is compliant with the quality standards in that new physical environment. To illustrate, several standards pertain to personnel qualifications. Since the new location may result in new employees, we must ensure that said personnel meet, for instance, licensure or certification requirements. Accordingly, we believe this proposed revision is needed to help safeguard beneficiaries.

Regarding paragraph structure, new § 424.58(e)(8)(i)(A)*(1)* and *(2)* would include the situations currently described in § 424.58(e)(8)(i)(A) as well as our two proposed new scenarios.

5. Ordering Unnecessary DMEPOS Services or Items

Several of the criminal cases cited earlier—as well as other criminal cases and situations we have seen—involve physicians ordering DMEPOS services and items that were either not reasonable or not necessary. This is sometimes done as part of a fraud scheme, with the physician receiving remuneration from the supplier that will be providing the services and items. Millions of Medicare dollars are at risk from such behavior. While we have various means of addressing these situations, a significant program integrity gap remains; specifically, our existing authority to immediately revoke the physician is limited in certain circumstances. To illustrate, under § 424.535(a)(8)(i) and (a)(21), respectively, we can revoke:

- A provider or supplier that submits a claim or claims for services that could not have been furnished to a specific individual on the date of service.
- A physician or eligible professional who has a pattern or practice of ordering, certifying, referring, or prescribing Medicare Part A or B services, items, or drugs that is abusive, represents a threat to the health and safety of Medicare beneficiaries, or otherwise fails to meet Medicare requirements.

In our aforementioned scenario, though, § 424.535(a)(8)(i) could only apply to the DMEPOS supplier (that is, the supplier submitting the claim), not to the doctor who ordered the item (Dr. X). While § 424.535(a)(21) could apply to Dr. X as the ordering physician, it may require multiple instances of Dr. X's non-compliant ordering. This effectively means we might have to wait until Dr. X engages in this behavior a second or third time (or more) before we can take revocation action, thus allowing Dr. X to continue said misconduct and threaten the Trust Funds. This would run counter to our obligation to protect taxpayer dollars and, equally important, Medicare beneficiaries from unnecessary and potentially dangerous services and items. We must be able to take swift action on the physician's enrollment. We thus propose in new § 424.535(a)(29) that CMS have the authority to revoke a physician's or practitioner's enrollment if the individual ordered a DMEPOS item or service that was not reasonable or not necessary. The revocation effective date under proposed new § 424.535(g)(1)(xxix) would be the date on which CMS determines that the supplier should be revoked under § 424.535(a)(29).

We stress that this proposed revocation ground is not restricted to demonstrated DMEPOS fraud schemes. No prior finding of fraud would be required. On the other hand, stakeholders should not assume that CMS intends to revoke every physician or practitioner who orders a DMEPOS service or item that is later determined not to be reasonable or necessary. CMS would only take revocation action when, after careful consideration of the facts and circumstances, said action is warranted. In addition, § 424.535(a)(29) would be limited to the ordering of DMEPOS items or services, in large part because of the longstanding program integrity threat that DMEPOS suppliers have posed—higher, perhaps, than any other Medicare provider or supplier type.

C. Factors for Consideration for Denial and Revocation Decisions

As already alluded to, CMS under § 424.535(a) may revoke a provider's enrollment for any reason specified in that paragraph. These reasons include, for instance, the provider's: (i) failure to adhere to Medicare enrollment requirements; (ii) exclusion by the HHS OIG; (iii) felony conviction within the previous 10 years; (iv) pattern of improper or abusive billing; and (v) termination by another Federal health care program. A revocation helps safeguard the Medicare program, the Trust Funds, and beneficiaries by removing (and preventing payment to) Medicare providers that have engaged in problematic or otherwise non-compliant behavior. When a provider is revoked, it is generally barred from reenrolling in Medicare for a period of 1 to 10 years. The length of this ''reenrollment bar'' is determined based upon the severity of the basis of the revocation.

CMS also has reasons in § 424.530(a) for which it can deny a provider's enrollment application, some of which duplicate our revocation grounds in § 424.535(a) (for instance, OIG exclusion). The general rationale for a denial mirrors that for a revocation: to protect the Medicare program and its beneficiaries from potentially fraudulent or abusive activity.

For several of our denial and revocation grounds, CMS in its determination must consider various criteria outlined within the applicable denial/revocation reason in §§ 424.530 and 424.535. As an example, § 424.535(a)(9) permits revocation if the provider fails to report a change in their enrollment information (such as a change in practice location) within the required timeframe. Section 424.535(a)(9)(i) through (iv) lists the following factors that CMS must consider in its decision: (i) whether the data in question was reported; (ii) if the data was reported, how belatedly; (iii) the data's materiality; and (iv) any other information that CMS deems relevant to its determination.

Such specified criteria have, in our view, hindered CMS' denial and revocation authority—even to the point where we could not deny or revoke the provider in a particular instance even though CMS believed that it was justified under the circumstances. Consider these two § 424.535(a)(9) scenarios:

Scenario 1—A provider was required to report a certain change to us within 30 days but did not do so until Day 50.

Scenario 2—A supplier failed to report a change involving information that, on the surface, might not appear as crucial as that in Scenario 1.

Revocation might prove challenging in both situations. In the former, the data was ultimately submitted 20 days after the deadline. This may weigh against a revocation per § 424.535(a)(9)(i) and (ii)—even if the information was material. The end result could be incorrect payments being made to the provider due to the lack of timely, updated information. For Scenario 2, an apparent lack of materiality per § 424.535(a)(9)(iii) could, in some circumstances, override the failure to disclose the change.

We outlined our concerns regarding factors in the aforementioned CY 2027 HH PPS proposed rule (91 FR 72022). One particular concern we discussed involved the criterion in several of our denial and revocation grounds that requires CMS to consider whether the provider has any history of final adverse actions as defined in § 424.502 (such as felony convictions). We stated that most aberrant billing we have seen is done by providers with no history of adverse actions. Yet the adverse action factor essentially requires us to weigh against a denial or revocation for such providers. It aids non-compliant providers so long as the provider lacks an adverse history (which it often will), hence obstructing our program integrity efforts.

The point is that the facts of every potential denial and revocation case are very different. We must accordingly have the maximum possible flexibility to address them without criteria that might effectively compel us to enroll (or maintain the enrollment of) a non-compliant provider—something that could seriously harm the Trust Funds, the taxpayers, and beneficiaries.

We proposed in the CY 2027 HH PPS proposed rule to remove the factors in § 424.535(a)(8)(ii) and § 424.530(f) (the latter addresses reapplication bars). Given the scope of the foregoing problem, though, we believe we must go much further and remove all factors from our denial and revocation reasons. Our proposed regulatory revisions would be as follows:

- In § 424.530(a)(6)(ii)(C), deleting—
  - ++ The second sentence of the opening paragraph.
  - ++ Paragraphs *(1)* through *(5).*
- In § 424.530(a)(7), deleting paragraphs (iii), (iii)(A), (iii)(B), and (iii)(C).
- In § 424.530(a)(12), deleting—
  - ++ The second sentence of the opening paragraph.
  - ++ Paragraphs (i) through (v).
- In § 424.530(a)(14), deleting—
  - ++ The second sentence of paragraph (i).
  - ++ Paragraphs (i)(A) through (C).
- In § 424.530(a)(15), deleting—
  - ++ he second sentence of paragraph (i).
  - ++ Paragraphs (i)(A) through (E);
  - ++ (i)(C)*(1)* through *(3).*
- In § 424.530(a)(17)—
  - ++ Deleting paragraphs (ii) and (ii)(A) through (F).
  - ++ Redesignating paragraph (i) as the only sentence in (a)(17).
- In § 424.535(a)(9), deleting—
  - ++ The second sentence of paragraph (a)(9)'s opening paragraph.
  - ++ Paragraphs (i) through (iv).
- In § 424.535(a)(12), deleting—
  - ++ The second sentence of paragraph (a)(12)(i)'s opening paragraph.
  - ++ Paragraphs (a)(12)(i)(A) through (C).
- In § 424.535(a)(14)—
  - ++ Revising (a)(14)'s opening paragraph to read: ''CMS determines that the physician or eligible professional has a pattern or practice of prescribing Medicare-covered drugs that is abusive, represents a threat to the health and safety of Medicare beneficiaries or both, or fails to meet Medicare requirements.''
  - ++ Deleting paragraphs (i), (i)(A) through (H), (ii), and (ii)(A) through (C).
- In § 424.535(a)(15)—
  - ++ Deleting paragraphs (ii) and (ii)(A) through (F).
  - ++ Redesignating paragraph (i) as paragraph (a)(15)'s only sentence.
- In § 424.535(a)(17), deleting—
  - ++ The second sentence of paragraph (a)(17)(i)'s opening paragraph.
  - ++ Paragraphs (a)(17)(i)(A) through (F).
- In § 424.535(a)(18), deleting—
  - ++ The second sentence of paragraph (a)(18)'s opening paragraph.
  - ++ Paragraphs (a)(18)(i) through (v).
- In § 424.535(a)(20), deleting—
  - ++ The second sentence of paragraph (a)(20)'s opening paragraph.
  - ++ Paragraphs (a)(20)(i) through (vii).
- In § 424.535(a)(21), deleting—
  - ++ The second sentence of paragraph (a)(21)'s opening paragraph.
  - ++ Paragraphs (a)(21)(i) through (ix).
- In § 424.535(a)(22), deleting—
  - ++ The second sentence of paragraph (a)(22)(i)'s opening paragraph.
  - ++ Paragraphs (a)(22)(i)(A) through (E).
  - ++ Paragraphs (a)(22)(i)(C)(*1*) through (*5*).
- In § 424.535(c)(3), which lists factors for consideration in determining the reenrollment bar length for a provider's second revocation, deleting—
  - ++ The second sentence of paragraph (c)(3)'s opening paragraph.
  - ++ Paragraphs (c)(3)(i) through (iv).
- In § 424.535(i)—
  - ++ Deleting paragraphs (i)(2) and (i)(2)(i) through (iv).
  - ++ Redesignating paragraph (i)(1) as the only sentence in paragraph (i).
- In § 424.535(j)—
  - ++ The second sentence of paragraph (j)'s opening paragraph.
  - ++ Paragraphs (j)(1)(i) through (iv).

D. Faster Enrollment Change Reporting for Medicare Providers

Providers must report changes to their enrollment data within the timeframes specified in our regulations. DMEPOS suppliers under § 424.57(c)(2) must disclose all such changes within 30 days of the change. All other provider and supplier types must report changes within 30 days or 90 days, depending on the data involved. Changes in ownership, practice location, and final adverse actions are typically subject to a 30-day timeframe, with 90 days for most others.

We propose to require that all changes of information—regardless of the type of

data involved or the provider or supplier type—be reported within 30 days. While ownership, practice location, and final adverse action changes are important (hence their general 30-day timeframes), other data changes are, too. A failure to timely report a new managing employee or corporate officer, for example, could result in CMS unknowingly paying a provider with a high-level official who poses a program integrity risk based on past or current conduct. Too, if we do not timely learn of a provider's new bank, billing agency, doing business as name, or correspondence address, CMS risks sending funds or information to—or receiving claims from—the wrong entity or individual; this could lead to incorrect payments or the inadvertent release of confidential data. In short, any outdated or erroneous enrollment information can threaten the Trust Funds, making, in our view, a 90-day reporting period much too long. We believe that a shorter, across-the-board reporting timeframe would help ensure more accurate data. It would also eliminate uncertainty as to whether a particular data element is subject to the 30-day period or, instead, the 90-day period. We note that DMEPOS suppliers are well-accustomed to the 30-day period, and we believe all other provider and supplier types will also become accustomed; this has been our past experience when we have reduced certain reporting timeframes from 90 to 30 days.

This proposal does not mean that CMS now intends to revoke every provider that fails to meet these reporting timeframes. Our authority to revoke enrollment under § 424.535(a)(9) for failing to timely report changed data is discretionary (not mandatory), and we sometimes use other vehicles to address failures to timely disclose changes, such as stays of enrollment under § 424.541 and deactivations under § 424.540.

Our specific regulatory revisions are as follows:

In § 410.33(g)(2), which pertains to independent diagnostic testing facilities, we propose to delete the existing second and third sentences. The new second sentence would state that all changes in enrollment information must be reported within 30 days of the change.

In § 424.205(c)(5), which addresses Medicare diabetes prevention programs, we would remove the current language and state that all changes in enrollment information must be reported within 30 days of the change.

Sections 424.516(d)(1), (d)(2), (e), (e)(1) and (e)(2) address reporting requirements for other provider and supplier types. We propose to delete all these paragraphs and revise § 424.516(d)'s lone sentence such that all changes in enrollment information must be reported within 30 days of the change. We would also change the title of paragraph (d) from ''Reporting requirements for physicians, nonphysician practitioners, and physician and nonphysician practitioner organizations'' to ''Reporting requirements for all other provider and supplier types''.

Section 424.516(e)(3) addresses requirements for ambulance suppliers to report license or certification revocations or suspensions. We propose to re-designate paragraphs (e)(3), (e)(3)(i), and (e)(3)(ii) as new paragraphs (e), (e)(1), and (e)(2), respectively. In addition, we would change paragraph (e)'s title from ''Reporting requirements for all other providers and suppliers'' to ''Special air ambulance supplier reporting requirements.''

E. New Bases for Medicare Provider Enrollment Denial/Revocation

1. CY 2027 HH PPS Proposed Rule Grounds

Among the denial and revocation reasons we proposed in the CY 2027 HH PPS proposed rule were the following—

- Proposed new § 424.535(a)(24) would permit CMS to revoke enrollment if the provider's or supplier's enrollment presents a high risk of fraud, waste, or abuse due to the provider's or supplier's location within a limited geographic area that has an excessive number of providers and suppliers.
- Proposed new § 424.530(a)(19) would allow denial of enrollment if the provider's or supplier's practice location is in the same suite or office as another provider or supplier whose Medicare enrollment has been revoked or denied under § 424.535 or § 424.530.
- Proposed new § 424.530(a)(20) would permit denial of a hospice's enrollment if any of the following apply—

++ The hospice's medical director: (1) is the medical director of multiple other hospices; or (2) practices at such a distance (for example, in a different State) from the enrolling hospice that the medical director cannot realistically perform all medical director functions required under 42 CFR part 418.

++ The hospice's administrator: (1) is the administrator of multiple other hospices; or (2) practices at such a distance (for example, in a different State) from the enrolling hospice that the administrator cannot realistically perform all administrator functions required under 42 CFR part 418.

++ The hospice's medical director does not have an active physician medical license in the State in which they are practicing.

We explained at great length in the proposed rule the reasons for these provisions and briefly summarize them here.

Regarding proposed § 424.535(a)(24), we noted the alarming increase in situations where numerous providers and suppliers—sometimes of the same type—are simultaneously operating within a very small geographic area (for instance, a multi-block sector), the same complex or building, or even the same office. We cited as examples: (1) 18 HHAs operating within the same building in Columbus, Ohio; and (2) hundreds of HHAs and hospices having enrolled in Los Angeles County over the span of several years. There was no medical need for such increases, which were entirely out of proportion with any increase in the region's beneficiary population and could be a strong indicator of fraud. As for proposed § 424.530(a)(19), sharing a suite or office with a provider who has been deemed non-compliant with Medicare enrollment requirements could spur concerns about the newly enrolling provider's own willingness to maintain compliance if enrolled. This is particularly true when—in cases we have seen—several providers in the same suite engage (or seek to engage) in a fraud scheme, have their Medicare enrollments revoked or denied, and another provider aims to enroll in that same office. Proposed § 424.530(a)(20), meanwhile, reflected the longstanding program integrity issues involving hospices. Of special concern were instances where an individual is a medical director or administrator of numerous hospices, sometimes at a great distance from the hospice location. This raises questions as to whether such persons are actually fulfilling these roles consistent with our regulations.

We recognized in the proposed rule—and do so again here—that some of these situations do not automatically mean fraud, waste, and abuse is occurring. Many medical facilities and complexes have a large number of providers and suppliers located therein. For example, a medical center comprising of three adjacent buildings may have seven physician practices with different specialties, two laboratories, etc.; some neighborhoods may have several types of providers and suppliers within them. Too, a physician operating in the same suite as a revoked provider is not automatically indicative of fraud. Nevertheless, some of the fraud schemes we have encountered have similarities to the situations addressed in these three proposed provisions.

Considering the hundreds of millions of taxpayer dollars that such schemes can threaten, we need the discretion to deny or revoke providers and suppliers in the three proposed circumstances if warranted. So concerned are we about such situations that we believe these three denial or revocation grounds should be both denial and revocation bases, rather than only a denial reason or only a revocation reason (for instance, the § 424.535(a)(24) scenario only permits revocation).

Thus, we propose the following provisions. First, proposed new § 424.530(a)(23) would permit denial in the circumstances described in § 424.535(a)(24) in the July 1, 2026, proposed rule. Second, proposed new revocation grounds in § 424.535(a)(26) and (27) would duplicate the §§ 424.530(a)(19) and (20) denial grounds in the July 1, 2026, proposed rule. Third, the effective dates of proposed new § 424.535(a)(26) and (27) would, under proposed new § 424.535(g)(1)(xxxiii) and (xxvii) be the date on which CMS determines that the provider should be revoked under these paragraphs; said date would align with our previously mentioned proposal in the CY 2027 HH PPS to make the remainder of our prospective revocation grounds retroactive.

2. Change in Hospice Administrators

We have already noted in the present and the CY 2027 HH PPS proposed rules the serious program integrity risks posed by hospices in recent years. Among the hospice fraud schemes we have seen involves administrators opening clusters of hospices within a small geographic area—sometimes even in the same building—without any corresponding need for such an increase in hospice services. The administrator inappropriately bills Medicare through these hospices, departs the hospices, and then repeats the pattern as administrator of other hospices the individual opens. Even if the administrator does not start up the hospices, the person may engage in misconduct at several hospices, and his or her successors as administrator may do the same. Constant changes of administrators can raise questions as to the hospice's legitimacy and stability and, more importantly, whether the provider is engaged in fraud, waste, or abuse.

While we acknowledge that administrators may depart hospices for entirely legitimate reasons (for example, retirement, taking a different position, etc.), we must protect the Medicare program against situations where the administrator turnover reflects improper conduct. We hence propose in new §§ 424.530(a)(24) and 424.535(a)(28) to have the authority to deny or revoke a hospice's enrollment if the hospice changes its administrator within 36 months following the hospice's initial enrollment or its most recent change in administrator. The revocation effective date under § 424.535(g)(1)(xxviii) would be the date on which CMS determines that the hospice should be revoked under § 424.535(a)(28). We emphasize that our proposal would not represent an across-the-board prohibition against administrator changes within 36 months, for, again, we recognize that many such changes have no nefarious intent. It would simply afford us the authority to take measures should the situation warrant it.

3. Denial and/or Revocation of Old and New Owner in Ownership Changes

We earlier referenced § 424.551, which requires DMEPOS suppliers to enroll as a new supplier and obtain a survey and accreditation if they undergo a non-exempt CIMO. A similar 36-month CIMO provision is in § 424.550(b)(1) for hospices and HHAs. The main purposes of this ''36-month rule'' are twofold. First, it helps prevent ''flipping'', whereby a provider enrolls in Medicare after receiving a survey and/or accreditation and then promptly sells the business to another party such that the latter need not receive a survey/accreditation. This makes it harder for CMS to confirm that the provider under its new ownership meets all Medicare requirements. Second, and even if ''flipping'' is not involved, the 36-month rule enables CMS to fully scrutinize the provider and the new owner via the initial enrollment and survey/accreditation processes.

Considering the failures of some providers to comply with the 36-month rule as well as efforts to circumvent it (such as by concealing the ownership change from CMS), we proposed in the CY 2027 HH PPS proposed rule to give CMS the authority to deny or revoke enrollment under §§ 424.530(a)(22) or 424.535(a)(25) if the provider does not comply with the provisions of, as applicable, § 424.550(b)(1) or § 424.551. Yet other ownership changes—depending on their particular facts—can at times pose program integrity risks, such as: (1) HHA, hospice, and DMEPOS supplier CIMOs occurring outside the 36-month period; and (2) CIMOs involving provider types that are not subject to a 36-month rule (such as skilled nursing facilities). Of considerable concern to us are situations where the owner of a provider that presents serious program integrity risks attempts to sell the business to another party, perhaps as part of a larger fraud operation. The following examples are illustrative:

Example 1—U owns Ambulance Supplier V, which has 20 employees. V was recently reactivated after having been deactivated for non-compliance with enrollment requirements. Both U and V are now under investigation for potential fraud. U decides to sell the company to W, who has previously been revoked from Medicare and intends to change V's name but retain its employees. A Form CMS–855B enrollment application is submitted to report the planned sale, though the sale is not scheduled to occur for another 60 days.

Example 2—X has owned Hospice Y for 5 years (outside of § 424.550(b)'s 36-month window). X sells Y to Z, but neither X nor Z report the sale to CMS, in violation of the requirement to report ownership changes within 30 days. X thus remains on record with CMS as the owner even though Z is the actual owner.

Both scenarios are disconcerting. In the first: (i) U might be selling V in hopes that doing so would end the investigation of U's activities; and (ii) the company—which remains under investigation—is being sold to a party with a prior revocation. In the second, the failure to report means that Medicare monies may be going to an entity whose new owner has not been vetted by CMS—at potentially significant risk to the Medicare program. The apparent risks that U, V, and W (for W, based on its prior revocation) pose and the non-compliance of X and Z raise serious questions as to whether any of them can be relied upon as current or future partners of the Medicare program. Since neither of these two situations is directly covered by §§ 424.550(b) or 424.551, we believe additional safeguards are needed to address problematic ownership changes. We accordingly propose the following in new § 424.536.

In paragraph (a), we propose that CMS, as applicable to the situation, may deny or revoke the enrollment of any provider or supplier involved in a change in majority ownership if CMS determines that the—

- The seller, buyer, or any provider or supplier involved in the change in majority ownership failed to comply with Medicare enrollment requirements; or
- The change in majority ownership, the seller, the buyer, or any provider or supplier involved in the change of majority ownership poses an undue risk

of fraud, waste, and abuse to the Medicare program.

Using our two examples, CMS could revoke V's enrollment due to U's attempt to forestall the investigation into U's activities if CMS determines this presents an undue fraud, waste, or abuse risk; if the sale of the business to W proceeds and W tries to reenroll V, CMS could deny the enrollment on the same ''undue risk'' basis. Regarding the second, neither the seller nor the buyer reported the change. This means that Y's enrollment could be revoked. Too, if Z tries to reenroll Y, CMS could deny the enrollment: (1) because Medicare requirements involving the CIMO were not met; and/or (ii) if CMS determines that an undue risk exists.

We recognize that previously proposed §§ 424.530(a)(22) and 424.535(a)(25)—as well as existing § 424.535(a)(9), which permits revocation for failing to timely report changes in ownership—may address some problematic CIMO situations. Yet proposed § 424.536 would go further in two ways. First, and unlike §§ 424.530(a)(22) and 424.535(a)(25), it would cover all CIMOs regardless of the provider or supplier type or the sale's timing. Second, denial or revocation under § 424.536 would be permitted based on an undue risk of fraud, waste, and abuse. Section 424.536 would hence enable CMS to address a greater number of circumstances surrounding a CIMO, although CMS could still utilize §§ 424.530(a)(22), 424.535(a)(9), or 424.535(a)(25) in lieu of or in conjunction with § 424.536 if the conditions for invoking any of the three former provisions exist.

In new § 424.536(b), we propose that paragraph (a) could be applied regardless of whether the provider's or supplier's name, identity, or location changes due to the CIMO. While CIMOs are sometimes accompanied by such changes, this does not negate the risk or non-compliance involved. Indeed, if we exempted § 424.536's application if the buyer changed the entity's name or identity, buyers might do precisely this to avoid a § 424.536 revocation. This concern of ours is why a number of our current denial and revocation reasons permit revocation under any of the provider's current or former names, numerical identifiers, or business identities.

In paragraph (c), we propose that a CIMO under § 424.536 occurs when a party acquires more than a 50 percent direct ownership interest in a provider (including via the cumulative effect of asset sales, stock transfers, consolidations, or mergers); this comports with the general CIMO definition in § 424.502. However, and consistent with our prior discussion, a § 424.536 CIMO could take place regardless of the provider type involved (for example, ambulance suppliers, HHAs), whether the CIMO occurred within 36 months of initial enrollment or the most recent CIMO, or whether the change in majority ownership requires a new, initial enrollment.

In paragraph (d), we propose that nothing in § 424.536 would negate the requirement that an HHA, hospice, or DMEPOS supplier enroll as a new provider or supplier and be surveyed/accredited if §§ 424.550(b) or 424.551 applies. This would merely remind stakeholders that the latter two provisions are separate and distinct from proposed § 424.536's denial and revocation authority.

Sections 424.530 and 424.535 contain procedures for denials and revocations (in addition to the denial and revocation grounds listed in §§ 424.530(a) and 424.535(a)). These procedures include, for example, reapplication and reenrollment bars, revocation effective dates, and specifications for submitting claims for services furnished before a revocation. To ensure these procedures apply to § 424.536 actions—that is, to directly tie § 424.536 to §§ 424.530 and 424.535, we propose to add new §§ 424.530(a)(27) and § 424.535(a)(32) by which CMS could deny or revoke under § 424.530 or § 424.535 if it determines that denial or revocation (as applicable) is warranted under § 424.536; the revocation effective date per new § 424.535(g)(1)(xxxii) would be the date on which CMS determines that the provider should be revoked under § 424.535(a)(32). Due to the breadth of § 424.536's provisions (such as its distinct definition of change in majority ownership), we believe our proposed approach is sounder than including all of § 424.536 within § 424.530 and § 424.535.

4. Other Improper Activity

Section 424.535(a)(7) permits revocation if the provider knowingly sells to or allows another individual or entity to use its billing number. (This does not include providers or suppliers who enter into a valid § 424.80 reassignment of benefits or a § 489.18 change of ownership.) While this provision has existed for many years, we have long been concerned about its narrowness. It only addresses a specific, unique scenario without capturing other very concerning situations directly or indirectly related to the provider's improper use of its enrollment, billing number, electronic funds transfer (EFT) arrangement, or other aspect of its relationship with Medicare. For example, there have been instances where an enrolled provider secures access to Medicare Beneficiary Identifiers and sells them to outside parties for nefarious purposes. Yet no existing revocation reason explicitly addresses such behavior. We believe § 424.535(a)(7) must be expanded to incorporate a wider range of inappropriate conduct. We thus propose to revise this paragraph to permit revocation if the provider engages in improper activity related to its Medicare enrollment, any billing number or identifier, or EFT arrangement. We would also change the paragraph title from ''Misuse of billing number'' to simply ''Improper activity.'' (For purposes of § 424.535(a)(7), the term ''improper'' would have its plain language meaning.) In addition, the § 424.535(a)(7) effective date would be that which we proposed in the CY 2027 HH PPS proposed rule at revised § 424.535(g)(1)(vii)—namely, the date on which the conduct resulting in the revocation occurred.

We acknowledge that this is a broad expansion of § 424.535(a)(7). We do not intend for this provision to supplant other current revocation grounds addressing inappropriate conduct (for example, abusive or non-compliant prescribing under § 424.535(a)(14)). In fact, we expect to utilize revised § 424.535(a)(7) only in exceptional circumstances. Nonetheless, the vast array of potential scenarios involving such conduct requires that we close all regulatory gaps that could permit the provider to remain enrolled and continue its behavior, hence the need for § 424.535(a)(7).

F. Verification of Identity and Risk Posed by Foreign and Domestic Owners and Managing Employees

Although CMS has means of validating the identities of enrolling physicians, enrolling practitioners, and an organizational provider's individual owners and managing employees, such means are mostly limited to reviewing the individual's legal name and social security number (SSN) against the Social Security Number Verification Service (SSNVN). This presents two significant problems.

One is that we have seen a disturbing increase in Medicare provider identity theft. Unscrupulous individuals and entities have attempted to: (1) enroll in and bill Medicare using the SSNs (and other identifiers) of bona fide physicians and practitioners; and (2) shield their actual (and problematic) owners and managing employees by instead listing on the Form CMS–855 application the

stolen identities of other persons as their owning and managing individuals. This has in certain instances permitted nefarious parties to enroll in Medicare—either directly or through an organization in which the party is the actual owner—and commit fraud because CMS' identity verification vehicles are limited.

The second dilemma is that providers sometimes list foreign owners and managing employees/organizations on the Form CMS–855. While there is no existing Medicare provider enrollment prohibition against a provider having a foreign owning or managing party, validation of the party's identity becomes difficult if no SSN or tax identification number (TIN) is included as many foreign parties lack one. The foreign status of such parties also makes it hard to confirm their specific location and any adverse legal history the party has (such as a criminal conviction or sanction). All this, in turn, can leave us unable to ascertain whether said foreign party poses a program integrity risk to Medicare—a vital consideration given the Medicare fraud schemes we have seen involving foreign nationals. Accordingly, although we are not seeking to bar foreign ownership or management of Medicare providers at this time, we still must strive to prevent potential threats to Medicare.

We believe the foregoing situations require that CMS have additional means of validating domestic and foreign identities and of reviewing possible risks posed by such parties. We hence propose the following regulatory revisions.

First, § 424.510(d)(2) outlines documentation that providers must submit as part of the enrollment process. Paragraph (d)(2)(ii) addresses documents that may be needed to uniquely identify the provider (though specific types of documents are not listed). To ensure our ability to verify the provider's identity and other data beyond what we currently require (such as the IRS CP–575 for TINs and legal business names), we propose the following:

- A new provision in paragraph (d)(2)(ii) by which CMS could require an individual provider, owner, managing employee, general or limited partner, or corporate officer or director to submit a copy of their driver's license, passport, social security card, birth certificate, or similar documentation if CMS determines it is needed to validate their identity. We emphasize that we would not ask for any of these documents as a matter of course but only if: (1) other verification means are unsuccessful; or (2) we suspect a possible case of identity theft. The overwhelming majority of providers would not have to submit them.
- To revise paragraph (d)(2)(iii), which permits CMS to require any other documentation needed to validate the data on the enrollment application, including, but not limited to, ''documentation regarding the provider's or supplier's ownership or management.'' In paragraph (C) thereof, we would insert ''domestic or foreign'' between ''provider's or supplier's'' and ''ownership.'' This would supplement our change to paragraph (d)(2)(ii) by reiterating our ability to request any documentation needed to validate ownership or management, including foreign.

Second, we propose in new §§ 424.530(a)(25) and 424.535(a)(30) that we may deny or revoke a provider's enrollment if the provider has a domestic or foreign owner, managing employee, managing organization, general or limited partner, or corporate officer or director: (1) whose identity or location cannot be confirmed; or (2) that CMS determines poses an undue risk of fraud, waste, or abuse to Medicare. An example of such a risk might be that the foreign party is based in a nation in which other persons and entities have been (or suspected to have been) involved in Federal health care program (including Medicare) fraud—though we emphasize that there are other factual scenarios in which an undue risk could arise, including with respect to domestic owners, managers, etc., as well as situations not involving identity verification. To a degree, our proposal is similar to existing §§ 424.530(a)(13) and 424.535(a)(19), albeit perhaps with a greater emphasis on risks posed by owners and managers themselves than on affiliations involving those parties. Indeed, it would be somewhat illogical to permit denial or revocation based on affiliations but not on individual threats that the parties in those relationships might present.

The effective date of a § 424.535(a)(30) revocation would, under § 424.535(g)(1)(xxx), be the date on which CMS determines that the provider should be revoked under this paragraph.

G. Medicaid and CHIP Provider Enrollment Reforms

As previously described, the Medicaid program (title XIX of the Act) is a joint Federal and State health care program that covers approximately 67 million low income-individuals.

States have considerable flexibility when administering their Medicaid programs within a broad Federal framework, and programs vary from State to State. CHIP (title XXI of the Act) is a joint Federal and State health care program that provides health care coverage to over 7 million children in families with incomes too high to qualify for Medicaid, but too low to afford private coverage.

In operating Medicaid and CHIP, and as required by sections 1902(a)(78) and 2107(e)(1)(D) of the Act, respectively, each State requires providers to enroll in order to furnish, order, prescribe, refer, or certify eligibility for Medicaid or CHIP items or services in that State.[155] States may also establish their own provider enrollment requirements, which must be met in addition to the applicable Federal provider enrollment requirements. Similar to Medicare provider enrollment, the purposes of the Medicaid and CHIP provider enrollment processes are to ensure that providers: (1) meet all Medicaid or CHIP requirements (and any other State-specific or Federal requirements); (2) are qualified to furnish, order, prescribe, refer, or certify Medicaid and CHIP services, items, and drugs; and (3) are eligible to receive payment, where applicable.

Different States may have different provider enrollment processes in operating their Medicaid and CHIP programs. However, all States must comply with Federal Medicaid and CHIP provider enrollment statutory and regulatory requirements, including those in part 455, subparts B and E.[156]

1. Principal Purposes of Medicaid and CHIP Provider Enrollment Proposals

There are several key reasons for our proposed Medicaid and CHIP provider enrollment revisions in this proposed rule.

First, we have not updated part 455's provider enrollment provisions in a comprehensive, wide-ranging fashion since the previously noted February 2, 2011, final rule. As certain enrollment terminology and requirements have become outdated or otherwise need enhancement given this long passage of time, we believe revisions to part 455 are warranted.

Second, the February 2, 2011, final rule emphasized the value of consistency between programs by establishing, for all three programs,

[155] Section 1902(kk)(7) of the Act also requires physicians and other eligible professionals who order or refer Medicaid services and items to be enrolled in Medicaid. This requirement is made applicable to CHIP via section 2107(e)(1)(G) of the Act.

[156] All of subpart E, and 42 CFR 455.107 in Subpart B, are applicable to CHIP in accordance with § 457.990.

common provider enrollment screening levels (limited, moderate and high) and application fee requirements. We also in that rule based other new Medicaid enrollment provisions partly on our stated desire for greater conformity to Medicare enrollment requirements. This included, for example, § 455.104(b)(1)(ii), in which we required disclosing entities, fiscal agents, and managed care entities to disclose the date of birth (DOB) and social security number (SSN) of any person with an ownership or control interest in the entity. (We similarly require owning and managing individuals of Medicare providers and suppliers to disclose their DOBs and SSNs.)

Various statutory provisions also emphasize consistency among programs. For example, under section 1902(kk)(3) of the Act, States must require providers to comply with the same requirements regarding disclosure of certain affiliations that also apply to Medicare under section 1866(j)(5) of the Act. Section 2107(e)(1) of the Act, meanwhile, makes the requirements of section 1902(kk) of the Act—including the screening, enrollment, and disclosure requirements—applicable to CHIP.

Yet the issue is not merely consistency between Medicare and Medicaid/CHIP. As already noted, and while all States must comply with the enrollment provisions in part 455, States often have different State-based Medicaid and CHIP provider enrollment requirements and processes. This can prove challenging for providers located in multiple States, for this could necessitate adherence to different requirements for many different State programs. We believe that harmonizing certain requirements via updates to part 455 could ease the burden on providers enrolling in (or enrolled in) multiple States' Medicaid programs and CHIPs. We emphasize, though, that our revisions are not intended to remove the States' traditional and general discretion over the requirements and operations of these programs.

Third, we believe it is critical to provide States with further means of preventing and combating potential and actual fraud, waste, and abuse. We presently have numerous grounds for which we can deny or revoke a Medicare provider's enrollment under §§ 424.530 and 424.535, respectively. These grounds address a broader range of circumstances than the Medicaid and CHIP denial and termination reasons specified at § 455.416. While some States may have State-specific denial and termination grounds beyond those in § 455.416, we are uncertain whether they adequately cover the many situations that could justify taking denial or termination action against a provider. To help States address such cases and protect Medicaid and CHIP monies and beneficiaries, we are proposing additional grounds for the State to deny or terminate a provider's Medicaid or CHIP enrollment, most of which mirror the existing Medicare grounds in §§ 424.530 and 424.535.

The proposed changes in section V.G. of this proposed rule are generally discussed in the numerical order of the applicable regulatory provision in part 455. Unless noted otherwise, all references to Medicaid (for example, ''Medicaid provider enrollments'') should be read to include CHIP.

2. Legal Authorities

Our principal authorities for our Medicaid and CHIP provider enrollment proposals are as follows:

- Section 1102 of the Act provides general authority for the Secretary to prescribe regulations for the efficient administration of the Medicaid program and CHIP.
- Section 1902(kk)(1), under which the State must comply with the process for screening providers and suppliers under this title, as established by the Secretary under section 1866(j)(2) of the Act.
- Section 1902(a)(27) of the Act provides general authority for the Secretary to require provider agreements under the Medicaid State Plans with every person or institution providing services under the State plan. Under these agreements, the Secretary may require information regarding any payments claimed by such person or institution for providing services under the State plan.
- Section 4313 of the Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33) amended sections 1124(a)(1) and 1124A of the Act to require disclosure of both the Employer Identification Number (EIN) and SSN of each provider or supplier, each person with an ownership or control interest in the provider or supplier, any subcontractor in which the provider or supplier directly or indirectly has a 5 percent or more ownership interest, and any managing employees, including directors and officers of corporations and non-profit organizations and charities.
- Section 2107(e) of the Act, which provides that certain title XIX and title XI provisions apply to States under title XXI.

3. Definitions (§§ 455.2 and 455.101)

We propose to: (1) revise several definitions in §§ 455.2 and 455.101 to clarify existing processes and enhance conformity to Medicare enrollment definitions; and (2) add several definitions to § 455.101.

a. ''Conviction or Convicted''

The current definition of ''Conviction or Convicted'' in § 455.2 reads, ''a judgment of conviction has been entered by a Federal, State, or local court, regardless of whether an appeal from that judgment is pending.'' We propose to change this to, ''has the same meaning as the definition of 'convicted' in 42 CFR 1001.2.'' That definition states:

- A judgment of conviction has been entered against an individual or entity by a Federal, State or local court, regardless of whether—

++ There is a post-trial motion or an appeal pending; or

++ The judgment of conviction or other record relating to the criminal conduct has been expunged or otherwise removed.

- A Federal, State or local court has made a finding of guilt against an individual or entity;
- A Federal, State or local court has accepted a plea of guilty or nolo contendere by an individual or entity; or
- An individual or entity has entered into participation in a first offender, deferred adjudication, or other program or arrangement where judgment of conviction has been withheld.

We believe this definition is more detailed, thorough, and robust than that currently in § 455.2; it would accordingly provide greater clarity as to the types of convictions falling within § 455.2's purview. Moreover, we reference the § 1001.2 definition in §§ 424.530(a)(3) and 424.535(a)(3), which permit, respectively, denial or revocation of Medicare enrollment based on a felony conviction. Since, as we discuss later, we are proposing similar felony provisions in this rule, we believe that a concomitant definition of ''Conviction or Convicted'' in part 455 is warranted.

b. Definitions Related to Disclosures

As later addressed in greater detail, a ''disclosing entity'' is required under § 455.104(b) to report certain information to the State. These data include but are not limited to:

- Any person (individual or corporation) with an ownership or control interest in the disclosing entity.
- Whether the person (individual or corporation) disclosed in the previous

bullet is related to another person with an ownership or control interest in the disclosing entity as a spouse, parent, child, or sibling.

• Any other disclosing entity in which an owner of the disclosing entity has an ownership or control interest.

• Any managing employee of the disclosing entity.

A central purpose of this information is to help the State confirm that the provider is not under the direct or indirect control of an excluded party. Various definitions in current § 455.101 apply to this disclosure requirement. These include:

• ''*Disclosing entity,*'' which means ''a Medicaid provider (other than an individual practitioner or group of practitioners), or a fiscal agent.''

• ''*Other disclosing entity,*'' which means ''any other Medicaid disclosing entity and any entity that does not participate in Medicaid but is required to disclose certain ownership and control information because of participation in any of the programs established under titles V, XVIII, or XX of the Act.'' This includes:—

++ Any hospital, skilled nursing facility, home health agency, independent clinical laboratory, renal disease facility, rural health clinic, or health maintenance organization that participates in Medicare (title XVIII of the Act);

++ Any Medicare intermediary or carrier; and

++ Any entity (other than an individual practitioner or group of practitioners) that furnishes, or arranges for the furnishing of, health-related services for which it claims payment under any plan or program established under title V or title XX of the Act.

• ''*Person with an ownership or control interest,*'' which means a person or corporation that:

++ Has an ownership interest totaling 5 percent or more in a disclosing entity;

++ Has an indirect ownership interest equal to 5 percent or more in a disclosing entity;

++ Has a combination of direct and indirect ownership interests equal to 5 percent or more in a disclosing entity;

++ Owns an interest of 5 percent or more in any mortgage, deed of trust, note, or other obligation secured by the disclosing entity if that interest equals at least 5 percent of the value of the property or assets of the disclosing entity;

++ Is an officer or director of a disclosing entity that is organized as a corporation; or

++ Is a partner in a disclosing entity that is organized as a partnership.

We propose to revise or supplement several of these definitions as follows:

c. Addition of ''Managing Organization''

We propose to add a definition of ''managing organization'' to § 455.101 that states: ''Managing organization means an entity that exercises operational or managerial control over or that directly or indirectly conducts the day-to-day operations of a provider, either under contract or through some other arrangement.'' This definition, which mirrors § 424.502's definition of this term, would be used for our proposed requirement (discussed later) that providers furnish data on entities that manage them.

d. Revisions to the Definition of ''Person with an Ownership or Control Interest''

The opening language of this definition states: ''Person with an ownership or control interest means a person or corporation that . . . .'' We propose to change this to read: ''Person or organization with an ownership or control interest is one that . . . .'' We do not believe organizational interests should be limited to corporations; any organizational interest in a provider is pertinent regardless of whether it is a corporation, partnership, limited liability company, etc.

We are not proposing to concomitantly revise paragraph (e) of this definition, which includes officers and directors of disclosing entities that are corporations as ''person[s] with an ownership or control interest''. As previously noted, sections 1124 and 1124A of the Act require providers to disclose certain information about various persons and entities associated with the provider. Per section 1124(a)(3)(B) of the Act, this includes ''officer[s] or [director[s] of the entity if the entity is organized as a corporation.'' To remain consistent with section 1124(a)(3)(B) of the Act, only officers and directors of corporations (rather than, for example, of limited liability companies) would fall within paragraph (e).

4. Expanded Medicaid and CHIP Provider Enrollment Disclosure Requirements

We propose the following changes to § 455.104:

• The current version of § 455.104(b)(1)(i) requires the disclosure of the name and address of any person (individual or corporation) with an ownership or control interest in the disclosing entity, fiscal agent, or managed care entity. The addresses for corporate entities must include (as applicable) the primary business address, every business location, and P.O. Box address. We propose two changes to this paragraph.

First, we would change the language that reads ''any person (individual or corporation) with an ownership or control interest'' to ''any person or organization with an ownership or control interest.'' We believe that disclosures of owning or controlling organizations should be made irrespective of whether the entity is a corporation, partnership, limited liability company, or other form of organization. It is important that States can screen all owning and controlling parties for potential program integrity issues. Second, we propose to remove the word ''corporate'' from the second sentence of paragraph (b)(1)(i). This is to clarify that the addresses of any organization under paragraph (b)(1), regardless of the entity's structure, must be disclosed.

• Section 455.104(b)(1)(iii) requires in part the disclosure of an ''Other tax identification number (in the case of a corporation) with an ownership or control interest in the disclosing entity (or fiscal agent or managed care entity) . . .'' We propose to change this to reference the tax identification number of any organization with an ownership or control interest in, or that serves as a managing organization of, the disclosing entity (or fiscal agent or managed care entity). This revision would: (1) accord with our proposed change to § 455.104(b)(1)(i) by removing the reference to corporations so that the paragraph applies to all organizations, regardless of type; and (2) add managing organizations to the paragraph's purview.

As we stated in the earlier noted September 10, 2019, final rule, a managing entity often has as much (or more) day-to-day control over a provider or supplier as an owner. Given the important roles that managing organizations have over providers' operations, we believe that States must know the organizations' identities to help ensure that Medicaid and CHIP program integrity is maintained. We note that Medicare providers and suppliers have long been required to disclose managing organizations as part of the enrollment process.

• Section 455.104(b)(2) generally requires disclosure of the identities of persons reported per paragraph (b)(1) who are related to each other. We propose to change the language ''person (individual or corporation) with an ownership or control interest'' in that paragraph to ''person or organization with an ownership or control interest.'' This change would conform to our proposed revision of the definition of ''person with an ownership or control interest'' in § 455.101.

• Section 455.104(b)(4) requires the disclosure of ''the name, address, date of birth, and Social Security Number of any managing employee of the disclosing entity (or fiscal agent or managed care entity).'' We propose to redesignate this as new § 455.104(b)(4)(i) and to add new § 455.104(b)(4)(ii) to read: ''The name, address, and tax identification number of any managing organization of the disclosing entity (or fiscal agent or managed care entity).'' This is consistent with our proposed revisions to § 455.104(b)(1) involving managing entities.

Meanwhile, paragraph (a) of § 455.106 states that before the Medicaid agency enters into or renews a provider agreement, or at any time upon written request by the Medicaid agency, the provider must disclose to the Medicaid agency the identity of any person who:

• Has ownership or control interest in the provider, or is an agent or managing employee of the provider (§ 455.106(a)(1)); and

• Has been convicted of a criminal offense related to that person's involvement in any program under Medicare, Medicaid, or the title XX services program since the inception of those programs (§ 455.106(a)(2)).

We propose to revise paragraph (a) to expand the types of adverse actions that must be reported to the State. We would require that before the State enters into or renews a provider agreement, or at any time upon written request by the State, the provider must identify whether the provider, any person or organization with an ownership or control interest in the provider, or any agent, managing employee or managing organization of the provider, under any current or former name, numerical identifier, or business identity—

• Was, within the preceding 10 years, convicted of a Federal or State felony offense (regardless of type);

• Has been revoked or terminated, or is currently suspended, from participation in any State Medicaid program, CHIP, Medicare, or any other Federal health care program;

• Is currently subject to a payment suspension under § 455.23 or under CHIP or Medicare; or

• Has had its health care license revoked—or whose license is currently suspended—in any State. (This includes situations where the individual or entity voluntarily surrendered the license in lieu of disciplinary action.)

These four actions would be included in revised paragraph (a)(1) and new paragraphs (a)(3), (4), and (5). We also would expand existing paragraph (a)(2)'s scope to include misdemeanors involving sexual assault or financial misconduct; this is because we proposed in the CY 2027 HH PPS proposed rule to permit denial or revocation of a provider's enrollment based on a misdemeanor conviction involving sexual assault or financial misconduct.

There are two main reasons for this proposal. First, these data—some of which, in the Medicare context, must currently be reported on the applicable Medicare provider enrollment application (OMB Control No.: 0938–0685)—would give States greater insight into potential program integrity threats that the disclosed party may pose. This, in turn, could further safeguard the Medicaid program, CHIP, and their beneficiaries. Second, and as already noted and discussed in more detail later, we are proposing a number of new Medicaid and CHIP provider enrollment denial and termination reasons. Since several of these grounds involve the reportable actions under proposed revised § 455.106(a), we believe this information would help the States determine whether a denial or termination is warranted.

We particularly note the proposed addition of the language ''under any current or former name, numerical identifier, or business identity.'' This language has been used with several existing Medicare denial and revocation reasons in §§ 424.530 and 424.535 for a number of years. The purpose is to enable us to take action against problematic parties notwithstanding any identity change. We believe States must have the same ability. We do not believe a party's demonstrated program integrity risk disappears upon a mere change in name, especially when the entity or person makes this change to circumvent an existing adverse action. Indeed, we previously saw situations where a revoked Medicare provider changed its name to evade its revocation and subsequent bar against reenrolling in Medicare. In our view, the party's risk remains, and States must base their payment safeguard actions more on said risk than on the party's current name or identity.

Existing § 455.106(c) states that the Medicaid agency may refuse—

• To enter into or renew an agreement with a provider if any person who has an ownership or control interest in the provider, or who is an agent or managing employee of the provider, has been convicted of a criminal offense related to that person's involvement in any program established under Medicare, Medicaid, or the title XX Services Program; or

• To enter into or may terminate a provider agreement if it determines that the provider did not fully and accurately make any disclosure required under § 455.106(a).

We propose to delete this paragraph because these and all other denial and termination reasons in subpart B would, per this proposed rule, be included in revised § 455.416. This would ensure that all denials and terminations are addressed in one section rather than split between multiple sections.

5. New Bases for Medicaid and CHIP Provider Enrollment Denial and Termination

a. Introduction

Pursuant to the Secretary's general authority under section 1102 of the Act to prescribe regulations for the efficient administration of the Medicaid program and CHIP, we are proposing a number of additional denial and termination reasons. Our proposed grounds would—

• Be mandatory, meaning the State (except as discussed in the next bullet) would be required to deny or terminate enrollment if the facts of the case fall within those covered by the applicable denial or termination reason; and

• Permit the State in most cases to forgo mandatory denial or termination if the State determines that the denial or termination would not be in the best interests of its Medicaid program or CHIP.

We recognize that virtually all of our Medicare denial and termination grounds are discretionary. Yet we believe that making our proposed Medicaid denial and termination reasons mandatory—with the best interests exception—is advisable, in part because it would be consistent with the mandatory nature of (and best interests exceptions within) most of 42 CFR part 455's existing denial and termination grounds. Moreover, and notwithstanding our desire for greater consistency between Medicare and State Medicaid provider enrollment programs, we maintain that substantial conformity between States in how they interpret and carry out Part 455's denial and termination reasons is also important. Indeed, this was a principal consideration behind the aforementioned February 2, 2011, final rule's establishment of additional provider enrollment requirements in subparts B and E of Part 455. We believe that having consistent, uniform interpretations of Federal Medicaid provider enrollment provisions in Part 455 is preferable to inconsistent ones and would reduce provider uncertainty

regarding the meaning of these requirements.

b. Listing of Current Denial and Termination Reasons in § 455.416

The following denial and termination reasons are in existing § 455.416:

- Under paragraph (a), the State must terminate the enrollment of any provider where any person with a 5 percent or greater direct or indirect ownership interest in the provider did not submit timely and accurate information and cooperate with any screening methods required under this subpart.
- Under paragraph (b), the State must deny or terminate enrollment if a person with a 5 percent or greater direct or indirect ownership interest in the provider has been convicted of a criminal offense related to that person's involvement with Medicare, Medicaid, or title XXI of the Act in the last 10 years.
- Under paragraph (c), the State must deny or terminate enrollment of any provider that is terminated under Medicare or under the Medicaid program or CHIP of any other State and is currently included in the termination database under § 455.417.
- Under paragraph (d), the State must deny or terminate enrollment if the provider or a person with an ownership or control interest or who is an agent or managing employee of the provider fails to submit timely or accurate information.
- Under paragraph (e), the State must deny or terminate enrollment if the provider, or any person with a 5 percent or greater direct or indirect ownership interest in the provider, fails to submit sets of fingerprints in a form and manner to be determined by the Medicaid agency within 30 days of a CMS or State Medicaid agency request.
- Under paragraph (f), the State must deny or terminate enrollment if the provider fails to permit access to provider locations for any site visits under § 455.432.
- Under paragraphs (g)(1) and (2), the State may deny or terminate enrollment if CMS or the State Medicaid agency—

++ Determines that the provider has falsified any information provided on the application; or

++ Cannot verify the identity of any provider applicant.

Paragraphs (b), (d), (e) and (f) state, however, that the State is not required to deny or terminate enrollment if it determines that denial or termination of enrollment is not in the best interests of the Medicaid program, and the State documents that determination in writing.

Also, under § 455.107(g), the State must deny a provider's enrollment if it determines under § 455.107 that a particular affiliation (as that term is defined under § 455.101) poses an undue risk of fraud, waste, or abuse.

We are proposing to delete existing § 455.416(a) through (g). This is primarily because some of these provisions fall within the larger scope of our proposed grounds. To avoid duplication and confusion by having two separate reasons involving similar conduct, we would incorporate the existing grounds within the proposed ones to the maximum extent possible. Those current § 455.416 grounds not falling within one of our proposed reasons would remain in § 455.416, though under a different paragraph designation and, in some cases, with revisions.

To summarize, revised § 455.416 would include: (1) the incorporation of several existing provisions within our proposed reasons; (2) the retention of several existing grounds with modifications; (3) the transfer of several denial and termination reasons from §§ 455.104, 455.106, and 455.107 to § 455.416; and (4) the incorporation of a number of Medicare denial and revocation grounds into Medicaid within § 455.416, though in most cases with the former's required factors and discretionary application replaced by the ''best interests'' exception referenced in current § 455.416.

c. Revised § 455.416

(1) Exclusion (§ 455.416)(a))

In paragraph (a), we propose that the State must deny or terminate enrollment if a provider, person or organization with an ownership or control interest in the provider, managing employee or managing organization or agent of the provider, or other health care or administrative or management services personnel furnishing services payable by a Federal health care program of the provider, is either—

- Excluded from Medicare, Medicaid, and any other Federal health care program, as defined in § 1001.2 of this chapter, in accordance with section 1128, 1128A, 1156, 1842, 1862, 1867, or 1892 of the Act.
- Debarred, suspended, or otherwise excluded from participating in any other Federal procurement or non-procurement activity in accordance with section 2455 of the Federal Acquisition Streamlining Act (FASA).

States are already required to deny Medicaid participation for: (1) certain exclusions under section 1128 of the Act; and (2) government-wide debarments in accordance with section 2455 of the Federal Acquisition Streamlining Act. However, there is no explicit regulatory provision in subparts B and E of part 455 to this effect. Proposed § 455.416(a), which mirrors §§ 424.530(a)(2) and 424.535(a)(2) regarding denials and revocations of Medicare enrollment based on an exclusion or debarment, would address this. Also, we propose to include in § 455.416(a) the language in § 424.530(a)(2)(ii) stating that the former would include individuals and organizations that are either W–2 employees or contracted individuals and organizations of the provider. We believe the risk from excluded or debarred parties is no less with contracted parties than with W–2 employees.

As this is a mandatory denial and revocation reason under §§ 424.530 and 424.535, and because States are generally prohibited from making payments to excluded (42 CFR 1001.1901(b)) or debarred (2 CFR 180.305(a), 2 CFR part 376) providers, revised § 455.416(a) would not contain the aforementioned ''best interests'' exception.

(2) Affiliation Posing Undue Risk (§ 455.416(b))

As mentioned previously, the State, in consultation with us, must under § 455.107(g) deny or terminate a provider's enrollment if it determines under § 455.107 that a particular affiliation poses an undue risk of fraud, waste, or abuse. To ensure that all denial and termination reasons are included within one section, we propose to delete § 455.107(g) and designate this provision as revised § 455.416(b). No ''best interests'' exception would be included, for none exists in current § 455.107(g) and because States should consider the best interests of their programs in making the determination as to whether a particular affiliation poses an ''undue risk'' of fraud, waste, or abuse.

As part of this change, existing § 455.107(h) would be redesignated as § 455.107(g).

(3) Medicare/Medicaid/CHIP Termination (§ 455.416(c))

We previously noted current § 455.416(c), which requires denial or termination based on a Medicare, Medicaid, or CHIP termination and the provider currently being in the termination database. We propose to retain this provision essentially as is, including its present paragraph designation and its existing lack of a ''best interests'' exception; we would,

though, remove the now-unnecessary qualification that the requirement applies to terminations on or after January 1, 2011.

(4) Misdemeanor Conviction (§ 455.416(d))

We propose to redesignate existing § 455.416(b) (which addresses criminal offenses related to Medicare, Medicaid, or CHIP) as revised § 455.416(d), with the ''best interests'' caveat included. Yet we also propose two other changes to redesignated § 455.416(d):

- We would restrict this denial or termination reason to misdemeanor convictions. Since felony convictions would, as discussed shortly, be addressed elsewhere in § 455.416, paragraph (d)'s limitation to misdemeanors would help prevent overlap.
- In the CY 2027 HH PPS proposed rule, we proposed in new §§ 424.530(a)(16) and 424.535(a)(16) that CMS could deny or revoke enrollment if the provider or supplier—or any owner, managing employee, managing organization, officer, or director thereof—was convicted of a Federal or State misdemeanor related to sexual assault or financial misconduct within the past 10 years that CMS deems detrimental to the best interests of the Medicare program and its beneficiaries. We propose to add this reason to revised § 455.416(d). This would not only facilitate consistency with proposed new §§ 424.530(a)(16) and 424.535(a)(16) but also allow the State to take action against problematic parties beyond those currently addressed in § 455.416(b).

As with most other existing and proposed Medicaid enrollment denial and termination reasons in Part 455, redesignated § 455.416(d) would include the previously discussed ''best interests'' exception. Too, the misdemeanor conviction would have to be detrimental to the best interests of the Medicaid program or CHIP (rather than those of the Medicare program).

(5) General Non-Compliance (New § 455.416(e))

Sections 424.530(a)(1) and 424.535(a)(1) state in part that we may deny or revoke Medicare enrollment if the provider is not in compliance with the Medicare enrollment requirements in title 42 or in the enrollment application applicable for its provider or supplier type. We propose a similar reason in revised § 455.416(e) whereby the State must deny or terminate enrollment if the provider is non-compliant with any requirement described in subpart B or E of part 455, though it may utilize the ''best interests'' exception.

We recognize that there could be some overlap between revised § 455.416(e) and certain other § 455.416 provisions. To illustrate, some providers must submit sets of fingerprints as part of the enrollment process consistent with subpart 455, subpart E. Failure to do could result in denial under existing § 455.416(e). Yet this could also fall within the scope of revised § 455.416(e) due to the provider's non-compliance with subpart E. To avoid duplicative application, we also propose to include existing § 455.416(a), (d), (e), (f), and (g)(2) within revised § 455.416(e) as examples of subpart B or E non-compliance; we would, though, combine existing paragraphs (a) and (e) due to their similarities. In addition, revised § 455.416(e) would effectively incorporate existing § 455.106(c)(2), which permits denial or termination if the provider fails to make a required disclosure under § 455.106(a).

(6) Felony Convictions (§ 455.416(f))

In revised paragraph (f), we would mirror the current Medicare denial and revocation reasons in §§ 424.530(a)(3) and 424.535(a)(3) regarding felony convictions. We propose that the State must deny or terminate enrollment if the provider, any person or organization with an ownership or control interest in the provider, or any managing employee or managing organization of the provider was, within the preceding 10 years, convicted (as that term is defined in § 1001.2) of a Federal or State felony offense that the State determines is detrimental to the best interests of its Medicaid program or CHIP and their beneficiaries. Offenses would include, but not be limited in scope or severity to—

- Felony crimes against persons, such as murder, rape, assault, and other similar crimes for which the individual was convicted;
- Financial crimes, such as extortion, embezzlement, income tax evasion, insurance fraud and other similar crimes for which the individual was convicted;
- Any felony that placed the Medicaid program or CHIP or its beneficiaries at immediate risk, such as a malpractice suit that results in a conviction of criminal neglect or misconduct; and
- Any felony that would result in mandatory exclusion under section 1128(a) of the Act.

We have long believed that any felony conviction, regardless of the type, raises questions as to whether the provider can be a reliable participant in Medicare. We believe the same concern would apply in the Medicaid program or CHIP. States thus must do whatever possible to prevent unnecessary risks to Medicaid or CHIP and those programs' beneficiaries. Nonetheless, under our proposal the State would have discretion to determine what types of convictions are ''detrimental to the best interest of the Medicaid program or CHIP or their beneficiaries'' and could utilize the ''best interests'' exception if it deems warranted.

(7) False or Misleading Information (§ 455.416(g))

Under existing § 455.416(g)(1), the State may deny Medicaid or CHIP enrollment if CMS or the State determines that the provider has falsified any information provided on the application. Per existing § 424.530(a)(4), we can deny Medicare enrollment if the provider or supplier has submitted false or misleading information on the enrollment application to gain enrollment in the Medicare program; offenders may be referred to the OIG for investigation and possible criminal, civil, or administrative sanctions.

We propose to redesignate § 455.416(g)(1) as revised § 455.416(g), combine it with § 424.530(a)(4)'s language, and add further clarification. Under revised § 455.416(g), the State must deny or terminate Medicaid or CHIP enrollment if the provider submits false or misleading information to (or omits information from) the Medicaid program or CHIP to gain or maintain enrollment.

We believe that providers submitting false or misleading data or omitting data to become or remain enrolled in Medicaid or CHIP potentially pose the same level of risk to these two programs as they do to Medicare. The language ''in order to gain or maintain enrollment'' is particularly important because it clarifies two aspects of existing practice in the Medicare context. First, the requirement to submit complete and truthful information is not restricted to initial applications but also applies to revalidations, changes of information, and all other application types. Our proposed inclusion of ''maintain'' (as opposed to merely gaining enrollment, which implies initial submissions) is therefore necessary; providers must always submit truthful and accurate information to Medicaid and CHIP. Second, we believe that any false, misleading, or omissive submission to Medicaid or CHIP—regardless of whether it was made via the enrollment application, supporting documentation,

or otherwise—should constitute grounds for denial or termination. The specific format of submission, in our view, is less crucial than the actual submission.

Under current § 455.416(g)(2), States may deny or terminate the provider's Medicaid or CHIP enrollment if CMS or the State Medicaid agency cannot verify the identity of any provider applicant. We propose to delete this provision because we would include it within the general ''Non-compliance'' category in § 455.416(e)(1)(iv)).

We note that while current paragraph (g)(1) is discretionary, we propose to make revised paragraph (g) mandatory (though with the ''best interests'' provision in proposed (g)(2)) to be consistent with most of our other proposed denial and termination grounds.

(8) Drug Enforcement Administration Certificates (§ 455.416(h))

The DEA implements and enforces titles II and III of the Comprehensive Drug Abuse Prevention and Control Act of 1970, and the Controlled Substances Import and Export Act, as amended, and collectively referred to as the Controlled Substances Act (CSA) (21 U.S.C. 801–971); the implementing regulations for these statutes are in 21 CFR parts 1300 through 1321. The CSA makes possession of authority under State law to dispense controlled substances a requirement for both obtaining and maintaining a DEA Certificate of Registration.

Sections 424.530(a)(11) and 424.535(a)(13) state, in part, that we may deny or revoke a physician's or eligible professional's Medicare enrollment if the individual's DEA Certificate of Registration to dispense a controlled substance is currently suspended or revoked or is surrendered in response to an order to show cause. We believe that a DEA Certificate of Registration to prescribe controlled substances is akin to a State's requirement that a physician or eligible professional be licensed or certified by the State to furnish health care services. The loss of the ability to prescribe drugs via a suspension or revocation of a DEA Certificate indicates that the physician or eligible professional may be misusing or abusing their authority to prescribe such substances.

Yet those concerns are not limited to Medicare. Improper prescribing activities can harm Medicaid and CHIP beneficiaries and program integrity as much as Medicare patients and program integrity. Hence, we propose in new § 455.416(h) that a State must deny or terminate enrollment if the physician's or practitioner's DEA certificate is currently suspended or revoked or is surrendered in response to an order to show cause, with the ''best interests'' provision included. The only difference would involve our use in § 455.416(h) of ''practitioner'' instead of ''eligible professional,'' since the former term is broader than 42 U.S.C. 1396b(t)(3)(B)'s somewhat narrow definition of the latter.

(9) Misuse of Enrollment (§ 455.416(i))

Under current § 424.535(a)(7), we may revoke Medicare enrollment if the provider or supplier knowingly sells to or allows another individual or entity to use its billing number. (This does not apply to providers or suppliers who enter into a valid reassignment of benefits as specified in § 424.80 or a change of ownership outlined in § 489.18.) This provision is meant to prevent providers from permitting others to utilize their Medicare enrollment. A provider's enrollment is restricted and unique to that provider. Each provider must individually meet and maintain compliance with the legal requirements specific to it and cannot use the credentials of other providers, suppliers, or other parties to do so. To permit another party to bill Medicare via the provider's enrollment would entirely undercut this principle; it could lead to fraudulent individuals and entities (or other parties that Medicare has not screened) billing the program and receiving payment under the provider's enrollment.

We have the same concerns regarding Medicaid and CHIP. Each Medicaid or CHIP enrollment is specific to the enrolled provider and does not extend to any other party. To help protect against the improper use of a provider's enrollment by other persons or entities, we propose in new § 455.416(i) that the State must terminate enrollment if the provider knowingly sells or allows another individual or entity to use its enrollment to bill Medicaid or CHIP. We believe the language ''use its enrollment to bill Medicaid or CHIP'' is more appropriate than ''use its billing number.'' The former is broader and can encompass any activity by which the other party bills Medicaid or CHIP via the provider's enrollment.

As with § 424.535(a)(7), there would be two exceptions to § 455.416(i). One would be for Medicaid and CHIP assignments of payment. Under § 447.10(g), payment for services provided by an individual practitioner may be made to—

- The employer of the practitioner, if the practitioner is required as a condition of employment to turn over the practitioner's fees to the employer;
- The facility in which the service is provided, if the practitioner has a contract under which the facility submits the claim; or
- A foundation, plan or similar organization operating an organized health care delivery system, if the practitioner has a contract under which the organization submits the claim.

We believe these provisions are akin to those under § 424.80, whereby the physician or practitioner permits a party with whom it has an employment or contractual relationship to bill for and collect payment for the services the individual provides. We thus conclude that an exception for payments permitted under § 447.10(g) is appropriate.

The second exception involves changes of ownership. Because State laws vary regarding: (1) what constitutes a change of ownership; (2) the consequences of such a change; and (3) the vetting and screening process for ownership changes, we propose that a State would not be required to terminate a provider under § 455.416(i) if State law permits another individual or entity to bill Medicaid or CHIP under the provider's enrollment in a change of ownership situation.

As with most of our other proposed grounds, the ''best interests'' exception would be included within § 455.416(i).

(10) Abusive Prescribing or Ordering of Services, Items, or Drugs (New §§ 455.416(j) and (k))

Existing §§ 424.535(a)(14) and (21) permit revocation of Medicare enrollment if we determine that the physician or eligible professional has a pattern or practice of—

- Prescribing Medicare-covered drugs that is abusive, represents a threat to the health and safety of Medicare beneficiaries, or fails to meet Medicare requirements. (§ 424.535(a)(14)); or
- Ordering, certifying, referring, or prescribing Medicare Part A or B services, items, or drugs that is abusive, represents a threat to the health and safety of Medicare beneficiaries, or otherwise fails to meet Medicare requirements (§ 424.535(a)(21)).

We outlined our concerns about improper prescribing in our discussion of proposed § 455.416(h). The inappropriate ordering, certifying, or referring of services and items is equally concerning to us. If a physician or practitioner is improperly performing these activities, patient harm can ensue. For instance, a physician ordering tests that patients do not require could subject beneficiaries to dangerous and

unnecessary procedures. Moreover, Medicaid and CHIP funds would be unnecessarily spent on these tests.

We believe States should take action against these individuals, not only to protect Medicaid and CHIP beneficiaries but also to safeguard the financial integrity of these programs. Accordingly, we propose to duplicate existing §§ 424.535(a)(14) and (21) in new § 455.416(j) and (k), though we note the following. First, all references in §§ 424.535(a)(14) and (21) to Medicare would be changed to ''Medicaid or CHIP.'' Second, to avoid overlap, we would not include improper prescribing within new § 455.416(k) because we believe § 455.416(j) would adequately address this situation. Section 455.416(k) would be limited to services and items. Third, any references in §§ 424.535(a)(14) and (21) to eligible professionals would be changed in § 455.416(j) and (k) to physician or practitioner. Fourth, both paragraphs would include the ''best interests'' exception.

6. Additional Medicaid and CHIP Provider Enrollment Proposals

a. Database Reviews (§ 455.436)

Section 455.436 lists databases that States must review when (1) enrolling Medicaid and CHIP providers and (2) confirming their eligibility to remain enrolled. Section 455.436(b) lists the Excluded Parties List System (EPLS) as one of these databases. As this database is now named the System for Award Management (SAM), we propose in § 455.436(b) to replace ''Excluded Parties List System'' with the former term. For the same reason, we propose to change ''EPLS'' in § 455.436(c) to ''SAM.''

b. Screening Levels (§ 455.450)

Section 424.518 discusses the different levels at which Medicare must screen initial applications, revalidation applications, and other application submissions. The levels are limited, moderate, and high. The categories are generally based on the assessed degree of program integrity risk each provider or supplier type poses; those types presenting the highest risk (for example, hospices) are in the ''high'' category.

Section 455.450 addresses the screening levels applicable to Medicaid enrollment. The first sentence in its opening paragraph states: ''A State Medicaid agency must screen all initial applications, including applications for a new practice location, and any applications received in response to a re-enrollment or revalidation of enrollment request based on a categorical risk level of 'limited,' 'moderate,' or 'high.'' Consistent with section 1902(kk)(1) of the Act—and as explained in the preamble to the aforementioned February 2, 2011, final rule—for provider types that exist in both Medicare and Medicaid, the State must assign providers to the same or higher risk category applicable under Medicare in accordance with § 424.518. To codify this requirement in regulatory text, we propose to amend the opening paragraph of § 455.450 to add the following language between this paragraph's two existing sentences: ''For provider types that also exist in Medicare, the State must assign such providers to the same or higher risk category applicable under Medicare in accordance with § 424.518.''

c. Application Fees (§ 455.460)

Under § 455.460(a), the State must ''collect the applicable application fee prior to executing a provider agreement from a prospective or reenrolling provider other than either of the following'' persons or entities, which are listed in § 455.460(a)(1) and (2). We propose several changes to this section.

First, we propose to change the language ''a prospective or re-enrolling provider'' in paragraph (a) to ''a prospective, revalidating or re-enrolling provider'' to clarify that revalidating institutional providers, consistent with section 1866(j)(2)(C) of the Act and current practice, must pay an application fee.

Second, we propose to remove the language ''either of'' in paragraph (a) because all parties listed in paragraph (2) are, as applicable, exempt from the fee.

Third, the purpose of the application fee is to cover the costs of screening provider applications under subpart E. As already noted, States must screen a provider's application at the same or a higher level than we use for that same provider type in Medicare and as prescribed in § 424.518. For instance, hospitals under § 424.518(a)(1) are subject to the ''limited'' risk category of screening; under § 455.450, States, too, typically screen hospital applications using the ''limited'' risk category procedures. However, States have the discretion under § 455.452 to screen an application using additional or more stringent methods than those required by subpart E. This helps States address local or statewide conditions involving provider types that may present a higher risk of fraud, waste or abuse and thus require stricter screening.

Section 455.460(a)(2)(ii) states that providers that have already paid the application fee to a Medicare contractor or to another State are exempt from paying a second fee to the State. This is because the State may rely on the screening results of the Medicare enrollment or the other State enrollment. Yet this becomes problematic when the State believes that a higher level of screening is warranted with respect to the provider's Medicaid or CHIP enrollment. Some States have expressed reluctance to screen at higher levels under § 455.452 because of the inability to collect an application fee under § 455.460(a)(2) to cover the costs of such screening. This has led to instances where the State has been unable, for financial reasons, to use enhanced screening methods when the State believed they were necessary. We are concerned that this has resulted in certain Medicaid providers having been insufficiently screened.

Section 455.460(a)(2)(ii) contains the language ''(p)roviders that have paid the applicable application fee to (A) a Medicare contractor, or (B) (a)nother State''. To address the previously mentioned concerns, we propose the following:

- Redesignating paragraphs (a)(2)(ii), (a)(2)(ii)(A), and (a)(2)(ii)(B) as, respectively, paragraphs (a)(2)(ii)(A), (a)(2)(ii)(A)(*1*), and (a)(2)(ii)(A)(*2*);
- Changing ''providers that have paid the applicable application fee'' to ''Subject to paragraph (2)(ii)(B), providers that have paid the applicable fee. . .''; and
- Establishing a revised paragraph (ii)(B) that reads: ''Paragraphs (2)(ii)(A)(*1*) and (*2*) do not apply if the State is screening the provider at a higher level under § 455.450 than the Medicare contractor or other State to which the provider paid the fee. In this situation, the State may collect a fee from the provider that represents the cost of this additional screening above and beyond the level of screening the Medicare contractor or State performed under § 455.450. However, the State shall document the reason(s) for the enhanced screening.''

To illustrate how revised paragraph (ii)(B) would work, assume State A screened a fee-paying enrolling provider at the ''moderate'' level. Said provider now submits an enrollment application to State B, which believes the provider should be screened at the ''high'' level. State B's ''high'' level screening typically costs Y dollars and its ''moderate'' level screening X dollars. State B could require the provider to pay the difference between Y and X to reflect the additional screening activities; States would have the discretion to determine the cost of this additional screening. We believe that

payment of the difference between the two screening levels' costs would be fairer to the provider than requiring payment of another full application fee. We also note that revised paragraph (ii)(B) would only apply to providers that have paid the applicable fee to the Medicare contractor or other State. Providers that, for example, received a hardship exception from paying the fee to the Medicare contractor or other State would not have the pay the costs of the additional screening.

In summary, we believe that revised paragraph (ii)(B) would assist the States in their efforts to appropriately screen Medicaid and CHIP providers by removing the disincentive for elevated screening. This would, in turn, enhance Medicaid and CHIP program integrity. To ensure that States have sufficient grounds for requiring a fee under (ii)(B), though, we believe that States should document the need for the enhanced screening.

d. Monthly Reporting of Denials and Terminations to CMS

Consistent with sections 1902(kk)(8) and 1902(ll) of the Act as well as § 455.417, CMS operates a ''termination database.'' This database contains information on certain Medicaid and CHIP terminations and Medicare revocations. Per Sections 1902(kk)(8) and 1902(a)(41) of the Act, the State must report to the Secretary all its provider terminations under Medicaid and CHIP that are ''for cause'' (as defined in § 455.101) within 30 days after the effective date of the termination, which is the later of the effective date specified in the termination notice or the date appeal rights have been exhausted. Although CMS reviews these terminations in the database, the latter does not capture: (1) denials of Medicaid or CHIP enrollment; or (2) situations where the State chose not to deny or terminate enrollment based on a best interests determination. We believe that despite the termination database's usefulness, the lack of certain information about the State's denial and termination decisions hinders our ability to detect and address vulnerabilities in the Medicaid and CHIP provider enrollment processes.

To address this gap, we propose in new § 455.418 that each State must submit to CMS on a monthly basis—and in a format required by CMS—the legal business and doing business names, address, TIN, and NPI of each provider (Medicaid or CHIP) whose enrollment, within the applicable monthly period, the State—

- Denied or terminated under § 455.416. This must include—

++ The regulatory basis for the denial or termination.

++ The facts of the case and an explanation of how the State reached its decision.

- Was required to deny or terminate under § 455.416 but declined to do so based on a best interests finding. This must include—

++ The regulatory basis for the prospective denial or termination; and

++ The facts of the case, an explanation of how the State reached its decision, and reasons for the State's best interests determination.

CMS would issue guidance to States on the required format should this provision be finalized.

In new paragraph (b), we would remind stakeholders that the requirements of § 455.418 would be in addition to, and not in lieu of, the reporting requirement under sections 1902(kk)(8) and 1902(a)(41). That said, they would only apply to denials or terminations pursuant to § 455.416 and not those under separate State authority that might meet the definition of ''for cause'' for purposes of those provisions.

H. Medicare Advantage Original Medicare Provider Enrollment Requirements

1. Background

a. General Overview

The Balanced Budget Act of 1997 (BBA) established a new Part C of the Medicare program, known as Medicare+Choice (M+C), effective January 1999. As part of the M+C program, the BBA authorized CMS to contract with public or private organizations to offer a variety of health plan options for enrollees, including both traditional managed care plans (such as those offered by HMOs, as defined in section 1876 of the Act) and new options not previously authorized. The M+C program was renamed the Medicare Advantage (MA) program under Title II of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173), which was enacted on December 8, 2003. The MMA changed how benefits are established and payments are made; under the MMA, enrollees were able to choose from additional plan options. Also, Title I of the MMA established the Medicare prescription drug benefit (Part D) program and amended the MA program to allow most MA plans to offer prescription drug coverage.

All Medicare health plans (but not Program of All-inclusive Care for the Elderly (PACE) organizations) that specify networks of providers from whom enrollees may obtain services must develop a network of qualified providers that meets CMS network adequacy standards as detailed in § 422.116. CMS reviews MA organizations' network of contracted providers on a routine basis, unless there is a triggering event that would require an expedited formal network review, such as a significant provider termination.

b. The 2016 and 2018 Part C Provider Enrollment Regulations

In November 2016, CMS issued a final rule (81 FR 80170) containing various requirements related to provider enrollment,[157] including the addition of § 422.222. This section required providers and suppliers that furnish health care items or services to a Medicare enrollee who receives their Medicare benefit through an MA organization to be enrolled in Original Medicare (also known as Medicare fee-for-service (FFS)) in an approved status no later than January 1, 2019. (The term ''MA organization'' refers to both organizations offering stand-alone MA plans and MA plans that provide drug coverage, otherwise known as MA–PD plans.)

The general purpose of this requirement was to ensure that MA providers and suppliers (hereafter collectively ''providers'' unless otherwise noted) were fully screened via the provider enrollment process used for Original Medicare Part A and Part B providers. As previously noted in this proposed rule, Original Medicare Part A and Part B provider enrollment screening is comprehensive. It involves the collection and verification of critical data such as the provider's identity, address, licensure and other qualifications, practice location, owners, managing employees, and adverse legal history. Depending on the provider type, it can also include site visits and fingerprint-based criminal background checks. The thoroughness of this process was invaluable in protecting the Medicare program from fraud, waste, and abuse as well as Medicare beneficiaries from unqualified providers. Given that many providers at the time underwent less robust screening by their prospective MA organizations before becoming MA

[157] ''Medicare Program; Revisions to Payment Policies Under the Physician Fee Schedule and Other Revisions to Part B for CY 2017; Medicare Advantage Bid Pricing Data Release; Medicare Advantage and Part D Medical Loss Ratio Data Release; Medicare Advantage Provider Network Requirements; Expansion of Medicare Diabetes Prevention Program Model; Medicare Shared Savings Program Requirements''

providers, we believed that our requirement would help safeguard the MA program and its beneficiaries (hereafter occasionally ''enrollees'').

We began outreach efforts shortly after the November 2016, final rule's publication. We communicated with provider associations and MA organizations regarding, among other things, the purpose of the enrollment process, the rationale for the new enrollment requirement, and the mechanisms of completing and submitting an enrollment application. While the vast majority of MA providers and suppliers were already enrolled in Original Medicare and thus met the new MA provider enrollment requirement, over 100,000 were not. This led the MA community to raise concerns about the potential burden of this requirement, especially since MA providers also must undergo credentialing by their respective MA organizations.

In response to these concerns, we issued a final rule in April 2018 (83 FR 16440) that eliminated the MA provider enrollment requirement at § 422.222.[158] In its place, we established in § 422.222 a ''preclusion list.'' The preclusion list for contracted and non-contracted individuals and entities is a list of providers that are precluded from receiving payment for MA services and items they furnish. Per the definition of ''preclusion list'' in § 422.2, there are three ways individuals and entities can be added to the list:

- The individual or entity is currently revoked from Medicare, is currently under a reenrollment bar, and CMS has determined that the underlying conduct that led to the revocation is detrimental to the best interests of the Medicare program.
- The individual or entity has engaged in behavior for which CMS could have revoked the individual or entity to the extent applicable if they had been enrolled in Medicare, and CMS determines that the underlying conduct that would have led to the revocation is detrimental to the best interests of the Medicare program.
- Regardless of whether they are or were enrolled in Medicare, the individual or entity has been convicted of a felony under Federal or State law within the previous 10 years that CMS deems detrimental to the best interests of the Medicare program. (We proposed in the CY 2027 HH PPS proposed rule (91 FR 41216) to expand this to include felony convictions against the individual or entity or an owner, managing employee, managing organization, director, or officer (as those terms are defined in § 424.502) thereof.))

For purposes of burden reduction, the April 2018 final rule also replaced the requirement that prescribers of Medicare Part D drugs be enrolled in Original Medicare with a preclusion list for Part D prescribers, addressed in § 423.120(c)(6).

c. Preclusion List and Part C Program Integrity Issues

The preclusion list for MA providers has been in effect since 2019. For several reasons, though, we are reevaluating its effectiveness in stemming MA fraud, waste, and abuse in comparison to the proven program integrity safeguards of our existing Medicare provider enrollment process.

First, while many MA organizations require providers to be enrolled in Original Medicare as a condition of contracting,[159] well over 100,000 in-network providers remain unenrolled. In certain cases, a particular MA organization's credentialing process may not be as comprehensive as Original Medicare enrollment screening. The latter, for example, contains the following verification mechanisms that do not necessarily exist in the MA organizations' internal process:

- Reviewing the provider and its owners and managing employees against the System for Award Management, which lists debarment actions taken by various Federal agencies.
- Reviewing the provider's adverse legal history, such as criminal convictions, health care program revocations and suspensions, and adverse State licensure actions.
- Fingerprint-based criminal background checks for 5 percent or greater owners of provider types designated as high-risk under § 424.518.
- Reviewing the Medicaid Termination Database under § 455.417 to ascertain whether the provider is terminated under Medicaid or CHIP.
- Monthly monitoring to ensure the provider's continued compliance with licensure and other enrollment requirements.
- Verifying the validity of the provider's practice location.
- Requiring the provider to revalidate its Medicare enrollment information (including upon a CMS request) by submitting a complete Medicare enrollment application.

Most disconcerting of all is that out-of-network providers that bill MA may not be credentialed by any MA organization, meaning they receive little, if any, screening. This leaves the MA program vulnerable to fraud, waste, and abuse.

As noted, Original Medicare enrollment is the front line of Medicare program integrity. It enables us to detect and stop non-compliant and potentially fraudulent parties from billing MA at the start, rather than after they begin doing so. Without this important vetting, we have limited means of preventing unqualified providers from entering MA and possibly harming the Trust Funds and MA enrollees.

Second, and in this same vein, we see the preclusion list as more of a reactive program integrity measure than a proactive one. For MA providers that are not enrolled in Original Medicare, we sometimes do not learn that the provider has engaged in fraudulent or other improper conduct until the MA organization itself discovers this and informs us. Only then can we begin the process of placing the provider on the preclusion list. By the time all this occurs, many months may have passed, hundreds of thousands of MA organization dollars may have been paid to the provider, and considerable harm to MA enrollees may have taken place. In other words, in such cases CMS effectively must wait: (1) for the inappropriate activity to happen; (2) for the inappropriate activity to be discovered by the MA organization (potentially months after it occurred); and (3) to be notified by the MA organization before CMS can commence action against the provider. This directly contradicts our stated objective of moving away from the ''pay-and-chase'' program integrity model and towards the far better approach of halting fraud before it begins.

Third, pursuant to § 422.222(a)(3), the following timing conditions apply to the addition of an individual or entity (other than an OIG-excluded party) to the MA preclusion list:

- If the individual or entity (hereafter occasionally and collectively referenced as ''party'') does not file a reconsideration request under § 498.5(n)(1), the party is added to the preclusion list upon the expiration of the 60-day period in which the party may request a reconsideration; or
- If the party files such a reconsideration request, they are added to the list effective the date on which CMS, if applicable, denies reconsideration. OIG-excluded parties

[158] ''Medicare Program; Contract Year 2019 Policy and Technical Changes to the Medicare Advantage, Medicare Cost Plan, Medicare Fee-for-Service, the Medicare Prescription Drug Benefit Programs, and the PACE Program''.

[159] Recent CMS data indicates that approximately 90 percent of in-network MA providers—over one million—are enrolled, meaning that they are already subject to the strict screening of Original Medicare enrollment.

are added to the preclusion list effective on the date of the exclusion.

This means that even though CMS believes an individual or entity has, for instance, engaged in fraud, beneficiary harm, or felonious conduct, CMS cannot take any action against that individual or entity via the preclusion list for at least 60 days—and if said party files a reconsideration request, CMS action could take considerably longer. Yet with Original Medicare provider enrollment, CMS can immediately revoke the provider's enrollment without having to wait for the expiration of any appeals process, thus providing further protection for Medicare funds and beneficiaries. In addition, many of the Medicare enrollment revocation reasons in § 424.535(a) are retroactive, meaning the revocation effective date—in general and with variations—essentially goes back to the date the provider's non-compliance with Original Medicare enrollment requirements began. This enables CMS to recoup monies paid to the provider while they were non-compliant.[160] (We also proposed in the CY 2027 HH PPS proposed rule to make the remainder of our Medicare revocation reasons retroactive.) Accordingly, requiring providers that bill MA to enroll in Original Medicare, and hence be subject to retroactive revocations in cases of non-compliance, would likely go further in the MA realm in safeguarding taxpayer monies and protecting MA enrollees than the preclusion list.

Too, we have seen a growing trend of providers foregoing Original Medicare enrollment and instead billing MA organizations as out-of-network providers. This only enhances the need for the comprehensive, up-front screening process that Medicare provider enrollment furnishes.

We recognize that proposing to require MA providers (both in-network and out-of-network) to be Original Medicare-enrolled would, if finalized, be a change in position from our prior decision to have the preclusion list replace the enrollment requirement. We also appreciate providers' likely concerns about the potential burden of having to enroll. Yet we note two things.

One is that several of the aforementioned issues concerning the preclusion list–such as the time it can take for CMS to learn of an MA provider's misconduct–were not as apparent as they are now. In fact, in September 2026, as part of the White House Anti-Fraud Task Force's ongoing efforts to crush fraud in the healthcare system and protect taxpayer dollars, CMS identified and barred via the preclusion list 11 DME companies with more than $3.4 billion in suspected fraudulent billing practices in 2025 and 2026 from receiving future Part C and Part D payments. These 11 DMEPOS suppliers: (1) had submitted no claims prior to 2025; (2) used improper billing practices for their claims; (3) had billed for medical equipment to beneficiaries already deceased; and (4) supplied equipment to beneficiaries who never requested or received it. Four of the suppliers had already been revoked from Original Medicare and began billing MA organizations instead.[161] This is one illustration of how the preclusion list is a useful tool once potential fraud has been identified but can fall short when fraud is being targeted at MA plans instead of Original Medicare, especially when those targeting MA are out-of-network providers. MA credentialing by itself is often not as rigorous as the Medicare provider enrollment process (as previously shown in the bulleted list of verification activities that some MA plans do not undertake), and the lack of screening for out-of-network providers is an extremely serious vulnerability; the increasing number of out-of-network providers greatly heightens this risk to the MA program. Circumstances have changed, and our obligation to protect the Trust Funds requires us to be flexible in our program integrity activities and to modify them as warranted.

As discussed in more detail in this proposed rule's ICR section, roughly 150,000 MA providers (many being out-of-network) would have to enroll in Medicare. While we again acknowledge this burden, we stress that the payment of MA dollars to fraudulent or otherwise unqualified providers burdens all Americans, including legitimate MA providers. Indeed, a single fraud scheme involving several MA providers that had not been adequately vetted before they began providing MA services—when strict enrollment screening might have kept them out of the MA program—could alone result in tens of millions of dollars in lost taxpayer monies. The point is that the cost burden of MA provider enrollment would, we believe, ultimately be far less than the savings to bona fide MA providers and all other Americans from MA fraud and abuse prevention.

For all these reasons, we propose to require that all providers that bill MA be enrolled in Original Medicare. This proposal is aligned with Department of Health and Human Services Office of Inspector General's September 2026 report on CMS actions to prevent durable medical equipment fraud in MA.[162] The proposed regulatory changes that follow largely mirror those we finalized in the previously mentioned November 2016 final rule. An important modification, though, would be our proposal to expand the enrollment requirement to include out-of-network MA providers, which were not required to enroll under the November 2016 final rule. CMS is proposing to include out-of-network MA providers in this requirement to address the earlier noted program integrity threats associated with these parties.

To give unenrolled MA providers adequate time to enroll in Original Medicare and MA organizations adequate time to operationalize this requirement, our changes, if finalized, would not become applicable until January 1, 2030. This timeframe is somewhat akin to that which we finalized in November 2016 final rule, which was the first day of the next plan year that begins 2 years after the date of publication of that final rule. Until this January 1, 2030, applicability date, the MA preclusion list requirements would remain in effect.

We are not at this time proposing that Part D prescribers be required to enroll in Original Medicare in lieu of the preclusion list. We may consider doing so in future rulemaking.

d. Statutory Authority

The following are the principal legal authorities for our proposed MA enrollment requirement:

- Section 1856(b) of the Act, which provides that the Secretary shall establish by regulation other standards for Medicare+Choice organizations and plans consistent with, and to carry out, Part C.
- Section 1857(e)(1), which gives CMS the authority to implement additional MA contract terms and conditions not inconsistent with Part C as the Secretary may find necessary and appropriate.
- Sections 1102 and 1871 of the Act, which provide general authority for the Secretary to prescribe regulations for the efficient administration of the Medicare program.
- Section 1866(j) of the Act, which provides specific authority with respect

[160] We are also proposing in the CY 2027 HH PPS proposed rule to make the remainder of our Medicare revocation reasons retroactive.

[161] *https://www.cms.gov/newsroom/press-releases/cms-cracks-down-massive-3-4-billion-medical-equipment-supplier-fraud-scheme.*

[162] Medicare Advantage Organizations and CMS Can Do More To Prevent Durable Medical Equipment Fraud in Medicare Advantage.

to the enrollment process for providers and suppliers in the Medicare program.

2. Specific Regulatory Changes

We propose the following regulatory revisions:

a. Proposed Provisions ''Preclusion List'' Definition (§ 422.2)

In light of the foregoing, we propose the following regulatory revisions. Note that a number of these reflect that our existing MA preclusion list provisions would remain in effect up to December 31, 2029. Also, the MA definition of ''providers'' in § 422.2 includes individuals and entities that would be considered either providers or suppliers in original Medicare; we will hence use the term ''provider'' in our proposed regulatory provisions except as other noted.

In the opening clause of this definition, we propose to replace the language that reads ''means a CMS compiled list'' with ''means, before January 1, 2030, and with respect to this part, a CMS compiled list''. This would clarify that the definition only applies to Part 422 through December 31, 2029, after which the enrollment requirement would replace the preclusion list for MA.[163]

b. Documented Process (§ 422.204(c))

Section 422.204(c) states that an MA organization must follow a documented process that ensures compliance with the preclusion list provisions in § 422.222. We propose to redesignate this paragraph as new § 422.204(c)(1) and to insert ''Before January 1, 2030,'' at the beginning of the paragraph. This would elucidate that § 422.204(c)(1) only applies through December 31, 2029.

New § 422.204(c)(2) would state that beginning January 1, 2030, an MA organization must follow a documented process that ensures compliance with the provider enrollment provisions in § 422.223 (addressed shortly). We believe this would help facilitate MA organizations' verification of the provider's Original Medicare enrollment status.

c. Various Preclusion List Requirements (§ 422.222)

Section 422.222 outlines a number of provisions and requirements regarding the preclusion list for contracted and non-contracted entities and individuals. We propose to add the following language immediately prior to subsection (a): ''The provisions of this section apply before January 1, 2030.''

d. New Enrollment Section (§ 422.223)

To address some of our new enrollment requirements (including outlining the parties to which they apply), we propose to establish a new § 422.223. We believe that promulgating a new, separate section would be clearer for stakeholders than attempting to incorporate our new provider enrollment provisions within § 422.222. Section 422.223's opening paragraph would state that beginning January 1, 2030, providers that are types of individuals or entities that can enroll in Original Medicare (in accordance with section 1861 of the Act) must be so enrolled in Original Medicare in an approved status to receive payment from an MA organization for health care items or services provided to a Medicare enrollee who receives their Medicare benefit through the MA organization. (For purposes of this requirement, ''approved status'' means the provider is neither revoked from Medicare under § 424.535 nor deactivated under § 424.540.) As outlined in new § 422.223(a)(1) through (6), this would include the following providers and suppliers:

- In-network and out-of-network MA providers.
- First-tier, downstream, and related entities (FDR), as these are defined at § 422.2.[164]
- Providers in Health Maintenance Organizations (HMOs) or Competitive Medical Plans that contract with CMS under section 1876 of the Act.
- Providers participating in demonstration programs or in pilot programs.[165]
- Locum tenens providers.
- Incident-to providers.

With the exception of out-of-network MA providers, these six provider categories were included within our MA enrollment requirement in the November 2016 final rule. Both then and now, we believe that patients of these providers should benefit from the protections afforded by the very thorough and comprehensive provider screening processes in 42 CFR part 424, subpart P. Existing § 422.222(b) states that an MA organization that does not comply with § 422.222(a) may be subject to sanctions under § 422.750 and termination under § 422.510. We propose a similar provision in new § 422.223(b) regarding our enrollment requirement. Considering the serious risks to the Medicare program and its beneficiaries from fraudulent or otherwise unqualified providers, it is necessary to stress to MA organizations the consequences of non-adherence to § 422.223(a).

e. Excluded, Revoked, and Precluded Providers

Section 422.224(a) states, in part, that an MA organization may not pay for items or services furnished to a Medicare enrollee by an individual or entity that is OIG excluded or on the preclusion list. Section 422.224(b) states, also in part, that if the MA organization receives a request for payment by, or on behalf of, such an excluded or precluded individual or entity, the MA organization must notify the enrollee and the excluded or precluded party that payment will not be made; the paragraph adds that payment cannot be made to, or on behalf of, an excluded or precluded person or entity. We propose to re-designate these paragraphs as new § 422.224(a)(1) and (a)(2). Consistent with our aforementioned revisions, we would also add the following after the paragraph (a) designation: ''Before January 1, 2030''. This will clarify these paragraphs' applicability. In new paragraph (b), we would largely duplicate proposed new §§ 422.224(a)(1) and (a)(2) but with two modifications. First, the requirements would apply beginning January 1, 2030. Second, we would leave precluded parties within the scope of these sections but change it to refer to Part D prescribers that are on the preclusion list as defined in § 423.100 and as described in § 423.120(c)(6). We believe that the program integrity risk that all parties on the preclusion list pose—be they MA or Part D—warrants the inclusion of the latter within § 422.224(b). (The existing reference in § 422.224 to precluded MA providers, though, would not be retained in § 422.224(b) because the preclusion list will not be applicable to MA providers beginning January 1, 2030.)

We also would include the language ''revoked from Medicare'' in revised § 422.224(b). As we stated in the November 2016 final rule and have reiterated in others since then, revoked providers and suppliers pose a significant risk to Medicare beneficiaries

[163] In the CY 2027 HH PPS proposed rule, we proposed to expand the preclusion list's breadth to include felony convictions against the provider/prescriber's owner, managing employee, managing organization, corporate director, or corporate officer.

[164] Current rules allow MA organizations to contract with different entities to provide services to beneficiaries. These contracted entities are referred to as first-tier, downstream, and related entities or FDRs, as defined in § 422.500.

[165] Demonstrations and pilot programs, also called research studies, are special projects that test improvements in Medicare coverage, payment, and quality of care. They usually operate only for a limited time for a specific group of people and/or are offered only in specific areas.

and the Trust Funds and should not receive Federal dollars. This is why we originally included revoked providers within the scope of § 422.224(a) in the November 2016 final rule and propose to do so in revised § 422.224(b). For this same reason, we are not proposing a ''first-time allowance'' (FTA)—similar to what we did in the April 2018 MA preclusion list final rule with respect to precluded providers—in which payment could be made the first time the revoked provider submits a claim but not thereafter. The objective behind any FTA would be to prevent beneficiaries from being liable for payment when the first claim is denied due to the provider's revocation. The beneficiary is notified that while payment will be made in this instance, future payments to the provider will not be; this means the beneficiary should seek a different provider to ensure that the beneficiary's services are covered. However, we explained in the November 2016, final rule that beneficiaries would already be protected in these situations per 42 CFR 1001.1901(b) and § 424.555(b), which prevent OIG-excluded individuals and entities (as well as revoked, deactivated, and denied providers) from recouping payment from beneficiaries. There is accordingly no need for an FTA.

f. HMOs and Competitive Medical Plans

Sections 417.478(e)(1) and (2) state, in part, that the prohibitions, procedures, and requirements relating to payment to individuals and entities on the preclusion list apply to HMO and Competitive Medical Plans that contract with CMS under section 1876 of the Act. We propose to redesignate these paragraphs as new § 417.478(e)(1)(i) and (ii) with the ''Before January 1, 2030'' caveat. Proposed new § 417.478(e)(2)(i) and (ii), meanwhile, would mostly duplicate new § 417.478(e)(1)(i) and (ii), though with (1) applicability beginning on January 1, 2030, and (2) all MA preclusion list references changed to the enrollment (and the non-payment to an unenrolled, excluded, revoked, or § 423.120(c)(6) precluded provider) requirements in §§ 422.223 and 422.224. This would make clear that these provisions, as noted, apply to HMOs and Competitive Medical Plans that contract with CMS under section 1876 of the Act.

g. Additional Regulatory Revisions To Accommodate Our Proposed Enrollment Requirements

• Under §§ 422.510(a)(4)(xiii) and 422.752(a)(13), CMS may sanction or terminate an MA organization for failure to comply with the preclusion list requirements at § 422.222 or § 422.224, such as by making payment to parties on the preclusion list. We propose to re-designate these provisions as new §§ 422.510(a)(4)(xiii)(A) and 422.752(a)(13)(i) with an applicability date before January 1, 2030. In new §§ 422.510(a)(4)(xiii)(B) and 422.752(a)(13)(ii), which would apply beginning January 1, 2030, the former would reference non-compliance with the requirements of §§ 422.223 and 422.224(b) instead of compliance with the preclusion list requirements. For § 422.752(a)(13)(ii), we propose to reference the MA organization's failure to comply with §§ 422.223 and 422.224(b), which require the MA organization not to make payment to providers that are OIG-excluded, revoked from Medicare, precluded under § 423.120(c)(6), or that can enroll in Medicare under section 1861 of the Act but are not so enrolled in an approved status.

• Sections 422.501(c)(1)(iv) and (2) state that in completing an application to become an MA organization under § 422.510, an entity must, among other things, furnish documentation that ''payment for health care services or items is not being and will not be made to individuals and entities included on the preclusion list, defined in § 422.2.'' We would redesignate these paragraphs as new §§ 422.501(c)(1)(iv)(A) and (2)(i) with a ''before January 1, 2030'' applicability date. In new §§ 422.501(c)(1)(iv)(B) and (2)(ii), which would apply beginning January 1, 2030, we proposed to reference the need for documentation demonstrating and verifying that payment for health care services and items is not being and will not be made to providers and suppliers that can enroll in Medicare in accordance with section 1861 of the Act but that are not enrolled in an approved status. These changes would align with our proposed enrollment requirement, and the addition of ''demonstrating and verifying'' will help clarify the scope of the required documentation.

• Sections 422.504(a)(6), (g)(1)(iv), (g)(1)(v)(B), and (i)(2)(v) describe several of the required terms of a CMS contract with an MA organization with respect to the preclusion list. Specifically, the MA organization must:

++ Agree under (a)(6) to comply with the preclusion list requirements in §§ 422.222 and 422.224.

++ Ensure under (g)(1)(iv) that the enrollee does not have any financial liability for services, items, or drugs furnished, ordered, or prescribed to the enrollee by an MA contracted individual or entity on the preclusion list.

++ Ensure under (g)(1)(v) that the plan's provider agreement contains the provisions in paragraphs (g)(1)(v)(A) and (B) regarding provider payment and financial liability after the expiration of the 60-day period specified in § 422.222.

++ Agree under § 422.504(i)(2)(v) to require all FDR entities to ensure that payments are not made to individuals and entities on the preclusion list.

We propose the following revisions to these paragraphs. First, we would clarify in paragraph (a)(6) that the preclusion references therein only apply before January 1, 2030. Second, new paragraph (a)(22) would require compliance with the requirements of §§ 422.223 and 422.224(b) beginning January 1, 2030. Third, we would split paragraph (g)(1)(iv) into new paragraphs (g)(1)(iv)(A) and (B). Paragraph (g)(1)(iv)(A) would consist of existing paragraph (g)(1)(iv) with the ''Before January 1, 2030'' caveat. Paragraph (g)(1)(iv)(B) would include the ''Beginning January 1, 2030'' language and replace references to the preclusion list with references to unenrolled MA providers. Fourth, we would add ''Before January 1, 2030'' at the beginning of paragraph (g)(1)(v). Lastly, we would redesignate paragraph (i)(2)(v) as new paragraph (i)(2)(v)(A) with the ''before January 1, 2030'' qualifier. In new paragraph (i)(2)(v)(B) we would include the language ''providers that are eligible to enroll in Medicare under section 1861 of the Act but that are not enrolled in Medicare in an approved status'', with an effective date of January 1, 2030.

• Section 422.2267(e) lists certain communications materials that must be provided to prospective or current MA plan enrollees. Paragraph (e)(15) references an ''excluded provider notice'' whereby plans must notify enrollees when a provider they visit or consult is OIG-excluded or is on the preclusion list. We propose to redesignate paragraph (e)(15) as new paragraph (e)(15)(i) with the ''before January 1, 2030'' caveat. In new paragraph (e)(15)(ii)-applicable beginning January 1, 2030, and consistent with our other proposed changes—we would include unenrolled, excluded, revoked, and § 423.120(c)(6) precluded providers within this notification requirement.

• Section 417.484(b)(3) pertains to ''related entities'', which is defined in paragraph (a) as any entity that is related to the HMO or Comprehensive Medical Plan by common ownership or control and meets the requirements of paragraphs (a)(1) through (3). Section (b)(3) states that the contract must provide that the HMO or

Comprehensive Medical Plan agrees to require all related entities to agree that payments must not be made to parties on the preclusion list as defined in § 422.2. We propose to redesignate this paragraph as new paragraph (b)(3)(i) with the ''before January 1, 2030'' qualifier. New paragraph (b)(3)(ii) would apply beginning January 1, 2030, regarding providers that are eligible to enroll in Medicare in accordance with section 1861 of the Act but are not enrolled in Medicare in an approved status.

• Part 498 of Title 42 addresses certain appeal rights. Section 498.3(b)(20) includes a party's placement on the preclusion list (as defined in §§ 422.2 or 423.100) as an initial determination. Section 498.5(n)(1)(i) outlines appeal rights for these parties. We propose to divide § 498.3(b)(20) into subparagraphs (i) and (ii). Sub-paragraph (i) will be limited to parties on the preclusion list as defined in § 423.100—that is, Part D prescribers; sub-paragraph (ii) will apply to precluded individuals and entities per § 422.2 before January 1, 2030. We propose the same for paragraph § 498.5(n)(1)(i), which would be split into paragraphs (n)(1)(i)(A) and (B) with the former applying to Part D precluded parties, and the latter to MA parties before January 1, 2030.

3. Solicitation of Comments

We recognize that there are certain circumstances in which an MA organization is obligated to pay a provider regardless of that party's contract status with the plan or for a benefit that is not covered under Original Medicare. The following are illustrative.

First, under § 422.113, an MA organization must cover and pay for emergency and urgently needed services, regardless of whether the provider has a contractual relationship with the plan.

Second, MA organizations are required to pay for out-of-network services in certain circumstances, such as:

• When an MA organization's provider network is insufficient to furnish a covered service (such that an in-network provider or benefit is unavailable or inadequate to meet an enrollee's medical needs), the organization must arrange for, and pay for, that service from an out-of-network provider; and

• When the enrollee is in a PPO plan, which is required to reimburse for covered services obtained out-of-network.

Third, supplemental benefits that MA organizations may offer under section 1852(a)(3) of the Act are, by definition, items and services not covered under Original Medicare Parts A and B; providers furnishing these benefits may not have a basis to maintain Medicare FFS enrollment.

We also recognize that while we believe our proposed provisions are very much necessary, stakeholders—as after the November 2016 final rule was issued—may be concerned about certain aspects of these requirements. These could involve, for example, the potential burden, impact on beneficiary financial liability and access to care, and whether certain provisions might or should be inapplicable to certain situations. We wish to be as responsive as possible to such concerns within the parameters of our program integrity objectives. Accordingly, we welcome and encourage public comments on our proposed provisions, especially concerning the following issues:

• Whether § 422.222 should include an exception for providers furnishing: (1) emergency or urgently needed services under § 422.113; (2) services furnished when the MA organization is required under § 422.112(a)(1)(iii) and § 422.4(a)(1)(v)(B) to cover or arrange for out-of-network coverage; and (3) supplemental benefits not covered under Original Medicare. In Moreover, we request feedback on how any such exception should be structured to avoid creating a loophole that could be exploited to circumvent the enrollment requirement's program integrity purpose.

• Whether the payment safeguards proposed at § 422.224 should still apply to these three aforementioned illustrations.

• Whether there should be any other exceptions to our enrollment requirements and, if so—

++ The reason(s) for the exception(s);

++ The situations in which they should or should not apply; and

++ The sub-category or sub-categories of MA providers to which they should apply.

• Whether any of our proposed six categories of applicability in proposed § 422.223 should or should not be included therein—as well as any clarification needed regarding the scopes and meanings of said categories (for example, the scope of the locum tenens and incident-to categories). Conversely, we ask stakeholders whether any provider types not listed in § 422.223—such as PACE providers—should be subject to our enrollment requirements.

We ask stakeholders to be as specific and detailed as possible in describing their recommended exemptions, requested clarifications, etc. Suggested regulatory text—and its location within the CFR—would be appreciated, as well as recommended limitations or clarifications on the scope of any of the proposed categories.

• The network adequacy requirements in § 422.116, including whether our provider enrollment proposals would impact the ability of MA organizations to meet network adequacy standards, especially in Rural or Counties with Extreme Access Considerations (CEAC) areas.

• The extent of any access to care issues that stakeholders believe might arise, where and why they may occur, and recommendations on how they could be alleviated within the context of our proposal, including any recommended regulatory text.

• Suggestions regarding the limitation of beneficiary financial liability for services performed by unenrolled providers—for instance:

++ Whether enrollee liability should be capped at normal in-network cost-sharing whenever the plan is barred from paying a provider under § 422.224 for services the enrollee was otherwise permitted to receive under §§ 422.4, 422.112, or 422.113.

++ Whether and how MA organizations should ensure the MA enrollee is not liable for care provided by unenrolled providers.

++ Additional situations where stakeholders believe that beneficiary liability should be restricted, including suggested regulatory text and their locations with the CFR.

• Requested CMS educational activities concerning our proposed requirements (such as those we performed following the November 2016 final rule).

• Costs that MA organizations might incur in implementing our provisions.

• Any other CFR sections that stakeholders believe should be added, revised, or updated to accommodate our proposed MA enrollment requirements.

VI. Marketplace

In recent years, there has been a substantial increase in complaints from consumers who reported that they were unaware they had been enrolled in Exchange coverage or that their Exchange plan had been switched without their consent by an agent, broker, or web-broker. From 2023 through 2025, CMS received over 624,000 consumer complaints attesting to unauthorized Exchange

enrollments [166] or unauthorized plan switching [167] by agents, brokers, or web-brokers and confirmed by issuer and CMS review; 300,000 of the 624,000 were received in 2025 alone.[168] These improper enrollments constitute abusive conduct that costs Federal taxpayers billions of dollars. For example, the HHS Agency Financial Report for Fiscal Year 2025 estimates improper payments of Premium Tax Credits totaled about $1.13 billion.[169]

Abusive conduct by agents, brokers, and web-brokers, such as unauthorized enrollments and unauthorized plan switching, can cause significant medical or financial harm to consumers. For example, enrolling consumers in Exchange plans or changing a consumer's Exchange plan without their consent can cause financial harm, such as unexpected tax liabilities and higher copayments and deductibles. It can also cause physical harm by interrupting their access to medical care when an unauthorized new plan does not cover their medications or include their established providers in-network.[170] CMS has identified an ongoing pattern of unauthorized enrollment, unauthorized plan switching, and other fraudulent, unauthorized, or noncompliant enrollment activity involving a subset of agents, brokers, and web-brokers participating in the Federally-facilitated Exchange (FFEs) and State-based Exchanges on the Federal platform (SBE–FPs).[171] While CMS has taken a number of steps to address this conduct, the conduct has persisted. For example, on August 31, 2026, CMS canceled approximately 315,000 enrollments covering over 760,000 consumers after following its standard issuer investigation process to confirm that these enrollments were unauthorized. Similarly, CMS is also holding agents, brokers, and web-brokers accountable for violating Marketplace standards. Since January 2026, CMS has issued termination notices to more than 200 non-compliant agents and brokers. Furthermore, in the summer of 2026, CMS issued 569 notices of intent to terminate to agents and brokers who submitted 2026 applications without key-identifying applicant information, such as Social Security Numbers (SSN).

When an agent, broker, or web-broker enrolls someone in a Marketplace health plan without their knowledge or consent, or switches plans without their knowledge or consent, that action can trigger Advance Premium Tax Credit (APTC) payments on behalf of a person who never actually agreed to the coverage — resulting in improper payments, because the subsidy is based on an eligibility determination tied to an application the enrollee did not knowingly submit or a plan the person did not select. These improper payments can result in the improper disbursement of taxpayer dollars. Accordingly, we propose to strengthen the integrity of the vetting and oversight processes for agents, brokers, and web-brokers participating in the FFEs and SBE–FPs to reduce waste, fraud, and abuse, protect Exchange consumers, and safeguard Exchange systems.

A. Statutory and Regulatory Authority

Section 1312(e) of the Patient Protection and Affordable Care Act (the Affordable Care Act) provides the Secretary with the authority to establish procedures under which a State may allow agents or brokers to: (1) enroll qualified individuals and qualified employers in qualified health plans (QHPs) offered through Exchanges; and (2) assist individuals in applying for premium tax credits and cost-sharing reductions (CSRs) for QHPs sold through an Exchange. Section 1313(a)(5) of the Affordable Care Act provides that, with respect to activities carried out under Title I of the Affordable Care Act, the Secretary shall provide for the efficient and non-discriminatory administration of Exchange activities and implement any measure or procedure that— (A) the Secretary determines is appropriate to reduce fraud and abuse in the administration of Title I; and (B) the Secretary has authority to implement under Title I or any other Act. Section 1321 of the Affordable Care Act also authorizes the Secretary to issue regulations setting standards for meeting the requirements under Title I of the Affordable Care Act with respect to the establishment and operation of Exchanges (including Small Business Health Options Program), the offering of QHPs through such Exchanges, and such other requirements as the Secretary determines appropriate.

Regulations at 45 CFR 155.220 implement the statutory requirements in section 1312(e) of the Affordable Care Act, establishing standards governing Exchange participation by agents, brokers, and web-brokers, including Exchange Agreement(s) requirements, standards of conduct, and enforcement authorities. The proposals in this rule would revise these existing requirements and strengthen oversight, improve enforcement procedures, and better protect consumers and taxpayer dollars.

B. Overview of Proposed Policies

These proposed policies would improve CMS' [172] ability to prevent abusive conduct by agents, brokers, and web-brokers, better protect consumers within the FFEs and SBE–FPs, and support the efficient, non-discriminatory administration of the FFEs and SBE–FPs. First, this proposed rule would add participation standards to 45 CFR 155.220(g)(3) that would prevent agents, brokers, and web-brokers from participating in the FFEs and SBE–FPs in the circumstances described below, which CMS believes present an unacceptable risk because continued participation may pose a substantial likelihood of consumer harm, improper enrollment activity, misuse of Exchange information, or material program integrity concerns (defined in section VI.B. of this proposed rule). Specifically, agents, brokers, and web-brokers that CMS determines pose such an unacceptable risk would not be permitted to register, complete training, or enter into agreements with the FFEs and SBE–FPs as described in § 155.220(d) (hereinafter referred to as ''Exchange agreement(s)''), preventing them from assisting

[166] An unauthorized enrollment is when an enrollment occurred in Exchange coverage without consumer consent.

[167] An unauthorized plan switch is when an Exchange plan was changed without consumer consent.

[171] *See supra note 3.* From 2023 through 2025, CMS received over 624,000 consumer complaints attesting to unauthorized enrollments or unauthorized plan switching in the Federally-facilitated Exchanges by agents or brokers and confirmed by issuer review; approximately 300,000 of the 624,000 consumer complaints were received in 2025 alone (web-brokers are excluded from this count).

[172] Although 45 CFR 155.220 references ''HHS,'' CMS is the agency taking the actions discussed, therefore ''CMS'' will be used throughout this preamble when referencing the agency administering this regulatory framework.

consumers with enrolling in Exchange coverage, including insurance affordability programs, through the FFEs and SBE–FPs. Additionally, this proposed rule would update § 155.220(g)(3) to allow CMS to immediately terminate agents, brokers, and web-brokers who the agency determines pose such an unacceptable risk from participating in the FFEs and SBE–FPs, without waiting 30 calendar days from the date of notice.

To strengthen oversight and improve fairness in enforcement proceedings arising from findings of agent, broker, and web-broker noncompliance under § 155.220(g)(2), we propose additional revisions to § 155.220. Specifically, we propose to amend § 155.220(g)(3)(i) to replace the existing opportunity for agents, brokers, and web-brokers to ''resolve'' a noncompliance determination with an opportunity to ''refute'' before CMS terminates their Exchange agreement(s) for cause or imposes other penalties. As discussed in section VI.C.1. of this proposed rule, this change would clarify that the 30-calendar day period is primarily for submitting information to dispute or rebut a noncompliance determination.

We also propose to codify the factors that CMS would consider when determining whether to terminate an agent, broker, or web-broker's Exchange agreement(s) with the FFEs and SBE–FPs for cause and to impose other penalties under § 155.220(k)(1) after making a noncompliance determination. In addition, we propose to amend § 155.220(h) to clarify that agents, brokers, or web-brokers may request reconsideration when CMS denies them the right to enter into Exchange Agreement(s) in addition to when CMS terminates their Exchange Agreement(s) for cause.

We also propose to add a new standard in § 155.220(j) to codify a term in the existing FFEs and SBE–FP Exchange agreement(s) requiring agents, brokers, and web-brokers to implement and maintain reasonable safeguards to ensure that access and attempted access to the FFEs and SBE–FPs, systems that support the FFEs and SBE–FPs, and consumer personally identifiable information (PII) obtained through those Exchanges only occur from locations within the United States.

We have also determined changes to § 155.220(g)(5) are necessary and appropriate to enhance transparency measures (for example, the public registration termination list) around program integrity oversight of the FFEs and SBE–FPs and further strengthen our administrative actions against suspected bad actors. Specifically, this proposed rule would make several amendments to § 155.220(g)(5), including moving from a fraud-based standard to an abusive conduct-based framework. This proposed rule would also adjust the standard of proof CMS would apply to suspensions and terminations for cause of an agent, broker, or web-broker's Exchange agreement(s) under § 155.220(g)(5). Specifically, under § 155.220(g)(5)(ii), CMS could suspend an agent's, broker's, or web-broker's agreements if CMS finds that there is a credible allegation of abusive conduct. Under § 155.220(g)(5)(iii), CMS could terminate those agreements if CMS determines, by a preponderance of the evidence, that abusive conduct occurred. Furthermore, this proposed rule would amend § 155.220(j)(2)(i) and (ii) by adding illustrative, non-exhaustive examples of agent, broker, and web-broker behavior that CMS has observed and considers harmful. CMS would also amend § 155.220(j)(4) to limit its scope as applied to abusive conduct as proposed in § 155.220(g)(5)(1). We seek comment on these proposals.

C. Expand Authority To Deny and Terminate Agents, Brokers, and Web-brokers' Exchange Participation

There are certain instances in which participation by an agent, broker, or web-broker can pose an unacceptable risk to the FFEs and SBE–FPs, including when certain administrative actions have been taken by Federal programs and State licensure authorities, as well as when an agent, broker, or web-broker has been convicted of a Federal or State misdemeanor or felony offense that CMS determines is detrimental to the best interests of the FFEs, SBE–FPs, and their consumers. Similar authorities regarding providers or suppliers with felony convictions have long existed in the Original Medicare program, also known as Medicare fee-for-service.[173] Medicare suppliers and providers, as well as agents, brokers and web-brokers in the Exchange, are entrusted with safeguarding program integrity, public health, and taxpayer money. Better alignment between the Federal Exchange platform approach with similar longstanding authorities that exist in the Medicare program would create consistency and strength through a unified voice and are necessary to increase program integrity and better protect consumers and taxpayer dollars by preventing agents, brokers, and web-brokers that pose unacceptable risk from participating in the FFEs and SBE–FPs.

[173] 42 CFR 424.535(a)(3), 424.535(a)(19).

1. Suspension, Termination, or Debarment From Any Federal Program, or Suspension or Revocation of State Licensure in Any State (§ 155.220(g)(3)(iii))

We propose to add § 155.220(g)(3)(iii) to provide that CMS may deny registration for, or immediately terminate the Exchange Agreement(s) of, any agent, broker, or web-broker who is currently terminated, suspended, revoked, debarred, or excluded from participation in any Federal program, or whose license is currently revoked or suspended for conduct that may cause harm to consumers or program integrity in a State other than that in which the agent, broker, or web-broker is enrolling consumers, regardless of whether any appeals are pending. If the appeal is successful and no other grounds for denial of registration exist, CMS would allow the agent, broker, or web-broker to register (or re-register if they were terminated) with the FFEs and SBE–FPs. Agents, brokers, and web-brokers with a history of these adverse actions imposed by a Federal program or a State licensing entity pose an unacceptable risk for the FFEs, SBE–FPs, and their consumers because they have demonstrated an inability to abide by the rules of other programs to such an extent that serious sanctions were warranted. Accordingly, if codified, we believe this proposal would better protect the FFEs, SBE–FPs, and consumers by preventing agents, brokers, and web-brokers who have a track record of misconduct from participating in the Exchange agent-broker program. We seek comment on the potential need for any exceptions to this proposed bar on participation, as well as if there are any reasons why an agent, broker, or web-broker who is currently terminated, suspended, revoked, debarred, or excluded from participation in a Federal program should not also be barred from participation in the FFEs and SBE–FPs. CMS also believes it is prudent to take such action even if an appeal, which can take months if not years to complete, is pending, and seeks public comment on whether any exceptions to this approach are warranted.

Additionally, CMS seeks comment on whether agents, brokers, and web-brokers who are terminated for noncompliance on the Exchanges should also be referred for nonprocurement suspension and debarment. HHS has adopted OMB's guidelines (2 CFR 180) for nonprocurement suspension and debarment at 2 CFR 376, but CMS does not currently refer terminated agents,

brokers, and web-brokers for suspension or debarment.

Agents, brokers, and web-brokers enter into public agreements with the Federal Government in order to gain access to the Exchanges where they enroll consumers in QHPs and earn commissions on such enrollments. Such commissions are paid to these agents, brokers, and web-brokers by QHP issuers who, in turn, receive PTC subsidy funding from the Federal Government for eligible enrollments. Per 2 CFR 180.970, a nonprocurement transaction means any transaction, regardless of type (except procurement contracts), including, but not limited to, subsidies, § 180.970(a)(8), and insurances, § 180.970(a)(9). As specified in 2 CFR 180.970(b) a nonprocurement transaction at any tier does not require the direct transfer of Federal funds. Therefore, the actions of an agent, broker, or web-broker enrolling a consumer in a QHP could constitute nonprocurement transactions under this meaning and these regulations.

If CMS were to implement such a policy, when we have adequate evidence that there may be a cause for debarment of an agent, broker, or web-broker and conclude that immediate action is necessary to protect the Federal interest, we could impose a 12-month suspension and initiate proceedings for debarment. Because the standard of proof for pursuing debarment is the same as the standard of proof for pursuing termination (*i.e.,* the preponderance of the evidence, 45 CFR 155.220(g)(2); 2 CFR 180.850(a)), CMS could impose suspension and consider debarment for all agents, brokers, and web-brokers that are terminated for noncompliance. Suspension could occur immediately upon effectuation of agent, broker, or web-broker termination. If such a termination were to be reversed upon reconsideration per 45 CFR 155.220(h), then this suspension would be lifted. If such a termination were to be sustained upon reconsideration or no request for reconsideration were submitted, then proceedings for debarment could be initiated where the grounds for termination meets the criteria for debarment specified at 2 CFR 180.800(b)(2) (that is, a history of failure to perform or of unsatisfactory performance of one or more public agreements or transactions). Generally, debarment cannot exceed three years, however, if circumstances warrant, an agency may impose a longer period of debarment (2 CFR 180.865). If CMS were to implement such a policy, therefore, we could pursue a term of debarment that mirrors the length of the penalty imposed under 45 CFR 155.220(k)(1)(i) (that is, the period that a terminated agent, broker, or web-broker may be denied the right to enter into agreements with the Exchanges in future years). If CMS were to implement such a policy, then updates to the forms completed by agents, brokers, and web-brokers (for example, OMB Control Nos. 0938–1204 and 0938–1463) as well as all relevant enforcement notices (for example, Notices of Intent to Terminate, Final Notices of Termination, and Final Agency Determinations after reconsideration) could be necessary. The Final Notice of Termination could constitute the Notice of Proposed Debarment (2 CFR 180.805), and the process to appeal such nonprocurement suspension and debarment actions could occur through a process similar to that used to appeal the termination action (that is, the request for reconsideration under 45 CFR 155.220(h)).

We seek comment on all aspects of this discussion of nonprocurement suspension and debarment for agents, brokers, and web-brokers who are terminated for noncompliance on the Exchanges, including the potential need for any exceptions, as well as if there are any reasons why an agent, broker, or web-broker who is terminated should not be referred for non-procurement suspension or debarment.

In addition, while § 155.220(g)(3)(ii) already authorizes CMS to immediately terminate an agent, broker, or web-broker's Exchange Agreement(s) if the agent, broker, or web-broker fails to maintain the appropriate license in every State in which they actively assist consumers with applying for the APTC or enrolling in a QHP through the FFEs or SBE–FPs, no comparable regulatory authority currently exists to deny registration for, or terminate the agreement of, an agent, broker, or web-broker whose license has been suspended or revoked in a State in which the agent, broker, or web-broker is not currently enrolling consumers. This gap is problematic because health insurance license reciprocity derives from an agent, broker, or web-broker's resident State, and disciplinary actions in non-resident States may not affect an agent, broker, or web-broker's ability to continue to enroll consumers in other States. Under our current authority, an agent, broker, or web-broker whose license has been revoked for misconduct in one State could potentially continue enrolling consumers in QHPs through the Exchanges and pose a risk to consumers in other States where the agent, broker, or web-broker is still licensed. Under these proposed regulatory changes, we would be able to better protect consumers in States with FFEs or SBE–FPs from agents, brokers, or web-brokers that pose unacceptable risk due to their suspension or revocation of a license in a State where they are not enrolling consumers, or their suspension, termination, or debarment from a Federal program.

Also, we propose to update § 155.220(g)(3)(i), which currently provides agents, brokers, and web-brokers with 30 calendar days after the date of notice to rebut a noncompliance determination prior to termination. The update to § 155.220(g)(3)(i) would allow CMS to immediately terminate agents, brokers, and web-brokers that pose unacceptable risk from participating in the FFEs and SBE–FPs due to suspension, termination, or debarment from any Federal program, or suspension or revocation of State licensure in any State.

2. Misdemeanor and Felony Convictions (§ 155.220(g)(3)(iv))

We also propose to add § 155.220(g)(3)(iv) to provide CMS with the ability to deny registration to, or immediately terminate the agreement for cause with, any agent, broker, or web-broker who was convicted of a Federal or State misdemeanor or felony offense that HHS determines is detrimental to the best interests of the FFEs, SBE–FPs, or their consumers.

Similar authorities already exist with respect to felonies in the Original Medicare program related to provider and supplier enrollment.[174] Similar to the rationale for imposing these requirements in Original Medicare, we believe that certain misdemeanor and felony offenses indicate a history of conduct that could undermine the integrity of Exchange operations or Exchange information systems, or place consumers and their PII at heightened risk of harm. Codifying this change would also better align the FFEs and SBE–FPs participation standards with similar longstanding authorities that exist in the Original Medicare program, ensuring consistency across CMS programs.

We also propose adding 45 CFR 155.220(g)(3)(iv)(A)(1) through (4) to clarify that misdemeanor and felony offenses detrimental to the best interests of the FFEs, SBE–FPs and their consumers include, but are not limited in scope or severity to: (1) misdemeanor and felony crimes against persons, such as murder, rape, assault, and other similar crimes for which the individual was convicted,; (2) financial crimes,

[174] 42 CFR 424.530(a)(3); 42 CFR 424.535(a)(3).

such as extortion, embezzlement, income tax evasion, insurance fraud, identity theft, forgery, bribery, falsification or destruction of records, receiving stolen property, making false statements or claims, violation of consumer protection laws, and other similar crimes for which the individual was convicted; (3) any misdemeanor or felony that places the FFE program or its consumers at immediate risk, such as a conviction for criminal neglect or misconduct; and (4) any misdemeanor or felony that would result in mandatory exclusion under section 1128(a) of the Act.[175] If CMS denies an agent, broker, or web-broker registration or terminates their Exchange agreement(s) under § 155.220(g)(3)(iv), CMS will provide the agent, broker, or web-broker with notice of the decision, and the agent, broker, or web-broker may request reconsideration as described under § 155.220(h). We also propose amending 45 CFR 155.20 to add a definition of ''convicted,'' defining it to mean: (1) a judgment of conviction has been entered against an individual or entity by a Federal or State court, regardless of whether there is a post-trial motion or an appeal pending, or the judgment of conviction or other record relating to the criminal conduct has been expunged or otherwise removed; (2) a Federal, State, or local court has accepted a plea of guilty or *nolo contendere* or an Alford plea by an individual or entity; or (3) an individual or entity has entered into participation in a first offender, deferred adjudication or other program or arrangement where judgment of conviction has been withheld. This definition closely mirrors Medicare's definition of conviction. The underlying conduct is the primary risk; thus, this definition is intended to protect consumers medically and financially as well as the FFE's and SBE–FPs' program integrity. If the appeal is successful and no other grounds for denial of registration exist, CMS would allow the agent, broker, or web-broker to register with the Exchange.

In addition, we propose to update § 155.220(g)(3)(i) to include paragraph (g)(3)(iv) as an exception to the requirement of providing 30 calendar days from the date of notice prior to termination of the agreement. This would allow CMS to immediately terminate agents, brokers, and web-brokers who pose unacceptable risk from participating in the FFEs and SBE–FPs due to certain misdemeanor and felony convictions.

We believe these policies are appropriate and necessary to strengthen program integrity, better protect consumers and taxpayer dollars, and better align the FFEs and SBE–FPs with longstanding Medicare program integrity authorities. More specifically, these policies would strengthen the vetting and oversight processes for agents, brokers, and web-brokers participating in FFEs and SBE–FPs to reduce waste, fraud, and abuse; support transparency around program integrity oversight of the FFEs and SBE–FPs to further strengthen our administrative actions against suspected bad actors; better protect consumers and taxpayer dollars by preventing agents, brokers, and web-brokers that pose unacceptable risk from participating in the FFEs and SBE–FPs; and better align the Federal Exchange platform approach with similar longstanding authorities that exist in Original Medicare.

D. Strengthen CMS' Authority To Terminate an Agent, Broker, or Web-Broker for Cause

1. Opportunity To Refute Determinations of Noncompliance (45 CFR 155.220(g)(3)(i))

We propose to revise § 155.220(g)(3)(i) to provide agents, brokers, and web-brokers with an opportunity to refute determinations of noncompliance prior to the termination of their Exchange agreement(s) for cause[176] and imposition of other penalties under § 155.220(k)(1), which would replace the existing opportunity to ''resolve'' identified noncompliance. Specifically, we propose that, except as provided in proposed paragraphs (g)(3)(ii) through (g)(3)(iv),[177] when CMS issues a determination of noncompliance against an agent, broker, or web-broker in accordance with § 155.220(g)(1), CMS would provide the agent, broker, or web-broker with 30 calendar days to submit information to refute the non-compliance determination. Further, we propose to provide that after reviewing any rebuttal evidence submitted, CMS may terminate the agent, broker, or web-broker's agreements required under §§ 155.220(d) and 155.260(b), for cause, if CMS determines, based on the evidence available to CMS, that a preponderance of the evidence establishes that noncompliance occurred. The failure to submit evidence to refute would not preclude CMS from making such a determination based on the evidence otherwise available to CMS. We also propose to make corresponding edits to the heading of paragraph (g) and to paragraphs (g)(3)(ii), (g)(4), (k)(1), and (k)(2) to reflect this change. For purposes of this provision, ''refute'' means to submit information, documentation, or explanation disputing or rebutting a determination of noncompliance, which CMS would consider in determining whether termination and imposition of other penalties is appropriate. This opportunity to refute would not apply to findings of abusive conduct as proposed to be defined at § 155.20 and subsequent enforcement actions carried out under proposed § 155.220(g)(5), discussed later in this preamble.

The current regulation at § 155.220(g)(3)(i) governing termination for cause of agent, broker, and web-broker Exchange agreement(s) in FFEs and SBE–FPs for noncompliance states that CMS will notify the agent, broker, or web-broker of the specific finding of noncompliance or pattern of noncompliance made under § 155.220(g)(1), and after 30 calendar days from the date of the notice, may terminate their Exchange agreement(s) if the matter is not resolved to the satisfaction of CMS. Many agents, brokers, and web-brokers have interpreted this 30-calendar day period to mean that if the agent, broker, or web-broker takes corrective action or makes assurances that they will maintain compliance moving forward, that CMS may not proceed with termination. This interpretation is not consistent with our original intent with this regulation: to take enforcement action, as appropriate, in response to noncompliance notwithstanding corrective action or assurances by the agent, broker, or web-broker.[178] Further, if agents, brokers, and web-brokers continue to have this belief, they may not be incentivized to refrain from noncompliant behavior and may instead believe that they can correct it before they are subject to any

[175] Section 1128(a) of the Act calls for the mandatory exclusion of the following individuals and entities from participation in any Federal healthcare program: (1) conviction of program-related crimes; (2) conviction relating to patient abuse; (3) felony conviction relating to health care fraud; and (4) felony conviction relating to controlled substance.

[176] Section 155.220(f) establishes the framework for an agent, broker, or web-broker to terminate an agent's, broker's, or web-broker's Exchange agreement(s) with HHS. We are not proposing any changes with respect to the terminations under § 155.220(f).

[177] *See* § 155.220(g)(3)(ii), which provides that HHS may immediately terminate Exchange Agreement(s) upon notice to the agent or broker if they fail to maintain the appropriate license under State law, and § 155.220(g)(3)(iii) and (iv) in this proposed rule, which propose additional exceptions and allows for immediate termination without any further opportunity to refute the noncompliance determination.

[178] *See* Patient Protection and Affordable Care Act; Program Integrity: Exchange, SHOP, and Eligibility Appeals final rule (78 FR 54080).

negative consequences. Therefore, we are proposing to reframe the 30-calendar day period as a time for the agent, broker and web-broker to refute the noncompliance rather than resolve the noncompliance, to clarify that nothing prevents CMS from terminating an agent, broker, or web-broker's Exchange agreement(s) where the agency makes a finding of noncompliance, even if the agent, broker, or web-broker takes corrective action or makes assurances that they will maintain compliance moving forward. Compliance with all terms and conditions of Exchange agreement(s), any State law applicable to agents, brokers or web-brokers, and any Federal law, including HHS regulations implementing those laws, is required at all times under § 155.220. Further, CMS expects compliance at all times with CMS' regulatory enforcement framework.

Further, by framing the 30-calendar-day period primarily as a time to *resolve* the matter to CMS' satisfaction, agents, brokers, and web-brokers have expressed concerns that they cannot refute the noncompliance finding or determination prior to a termination action going into effect. Instead, they can only do so after a termination action goes into effect and the agent, broker, or web-broker is offered a reconsideration in accordance with § 155.220(h). This belief is based on an incorrect reading of the current regulatory text. The existing language at § 155.220(g)(3)(i) frames the 30-calendar-day period as a time to resolve the matter ''to the satisfaction of HHS,'' which some agents, brokers, and web-brokers have interpreted as being limited to corrective action or assurances of future compliance rather than as a time to dispute the underlying findings of noncompliance. Because the current regulatory text does not explicitly specify this 30-calendar-day period as a time to refute whether noncompliance occurred, agents, brokers, and web-brokers have mistakenly concluded that the reconsideration process under § 155.220(h), which occurs after a termination action goes into effect, is their first meaningful chance to refute the findings themselves.

As such, we have seen that some agents, brokers, and web-brokers choose not to respond during the 30-calendar-day notice period but will request reconsideration to dispute the findings. The intent of the 30-calendar-day notice period is to provide agents, brokers, and web-brokers the chance to provide CMS with information to inform a decision on whether the alleged noncompliance actually occurred. Bypassing this 30-calendar-day period to engage with CMS subverts the intent of the review and enforcement processes and wastes the time and resources of both CMS and agent, broker, and web-broker. If agents, brokers, and web-brokers have information that can refute a noncompliance determination, and they submit that information within the 30-calendar-day period, CMS would be able to make more fully informed decisions on the front end of the process and reduce resources expended on imposing enforcement actions, conducting reconsideration reviews, and in some instances, rescinding previously imposed terminations. This would also protect agents, brokers, and web-brokers from interruptions to their ability to assist consumers with enrollment through the FFEs or SBE–FPs as a result of an avoidable termination that was imposed due, in part, to their failure to refute during the 30-calendar-day period.

While CMS may consider any actions the agent, broker, or web-broker has taken to address or correct the identified noncompliance, these actions alone may not be determinative of whether CMS may proceed to terminate an agent, broker, or web-broker's Exchange agreement(s) and impose a penalty other than termination. As explained in section VI.D.2. of this proposed rule, under proposed § 155.220(g)(1)(i), CMS may consider the nonexclusive factors identified in § 155.285(b)(1) and (2), to the extent relevant to the facts and circumstances of the particular case, to assess the nature and circumstances of the noncompliance and the impact of that noncompliance before deciding whether termination, another penalty under § 155.220(k)(1), or both are appropriate. This approach would preserve CMS' flexibility to account for unusual circumstances. For example, analysis under the non-exclusive factors would allow CMS to consider an individual's history with the FFEs and SBE–FPs, which could include consideration of any proactive actions taken to address or correct identified noncompliance. CMS may determine, based on consideration of the factors proposed in section VI.D.2. of this proposed rule, that despite corrective action, the noncompliance warrants enforcement action under § 155.220(g)(1) and (k)(1).

In summary, by aligning the regulation text to clarify and mirror the original intent of the policy, this proposed approach would protect the integrity of the FFEs and SBE–FPs and the interests of consumers; clarify that agents, brokers, and web-brokers have an opportunity to refute findings of noncompliance before termination goes into effect or CMS imposes a penalty; and help to ensure that enforcement decisions are based on a complete and accurate assessment of the noncompliance. We seek comment on these proposals.

2. Factors CMS May Consider in Enforcement Determinations (45 CFR 155.220(g)(1)(i))

We propose to revise § 155.220(g)(1) and add a new paragraph at § 155.220(g)(1)(i) to specify how CMS would determine whether to terminate an agent, broker, or web-broker's Exchange agreement(s) and impose a penalty under § 155.220(k)(1) when CMS has made a determination of noncompliance under § 155.220(g)(1).

Specifically, we propose to remove the ''sufficiently severe'' language in § 155.220(g)(1) and replace it with a new framework under proposed § 155.220(g)(1)(i). The removal of the ''sufficiently severe'' language is intended to reduce ambiguity regarding what is sufficient to trigger termination and instead replace it with explicit factors CMS would consider that are clear and transparent. The proposed framework would provide that, except for terminations made in accordance with paragraphs (g)(3)(ii) through (g)(3)(iv) of this section, when CMS makes a noncompliance determination under paragraph (g)(1), CMS would consider the factors identified in § 155.285(b)(1) and (2) to the extent relevant to the facts and circumstances of each case, as well as any additional relevant factors supported by the evidence when it: (A) decides whether to terminate an agent, broker, or web-broker's Exchange agreement(s) for cause; or (B) selects among the penalties identified in paragraph (k)(1) of this section, including the length of the penalty imposed under paragraph (k)(1)(i) of this section.

The factors listed under § 155.285(b)(1) and (2) are the factors that CMS has established for consideration in determining the amount of a civil money penalty (CMP) imposed against an individual for providing false or fraudulent information to an Exchange. CMPs, terminations, and the imposition of other penalties are all enforcement mechanisms that aim to address and correct noncompliance. Thus, utilizing these factors when making determinations on whether to terminate for cause an agent, broker, or web-broker's Exchange agreement(s) and the imposition of penalties other than terminations, when relevant, would help to ensure consistency throughout CMS' enforcement mechanisms. Use of

a single, nonexclusive factor framework across related enforcement decisions would reduce divergence in factors considered, increase consistency in decision making, and promote transparency while preserving CMS' flexibility to terminate Exchange agreement(s) and impose other penalties when supported by the facts of the identified noncompliance. The factors listed under § 155.285(b)(1) and (2) reflect the considerations most relevant to the full range of noncompliance CMS has encountered in overseeing the FFEs and SBE–FPs and are expected to apply in the vast majority of enforcement actions. The nonexclusive nature of the list preserves CMS' flexibility to account for case-specific circumstances not captured by the codified factors. We propose that CMS would consider additional factors to the extent they are relevant to the particular case and supported by the evidence. These additional factors could include, but would not be limited to, failure to cooperate with CMS monitoring, audit, or enforcement activities, or the submission of incomplete, inaccurate, or misleading information to CMS.

As explained in section VI.C.1. of this proposed rule, if CMS were to find that a preponderance of available evidence supports a finding that an agent, broker, or web-broker violated a standard under this section, an applicable Exchange agreement term, or Federal or State law, and that such noncompliance justifies termination of the agent, broker, or web-broker's Exchange agreement(s), or imposition of other penalties based on an assessment of the proposed factors in § 155.285(b)(1) and (2), CMS will make a refutable determination of noncompliance under § 155.220(g)(3)(i). In accordance with proposed § 155.220(g)(3)(i), following the 30-calendar-day refutation period, CMS would review all refutation evidence provided and reassess whether a preponderance of the evidence still supports a finding of noncompliance that, based on an assessment of the proposed relevant factors in § 155.285(b)(1) and (2), justifies termination or imposition of other penalties under § 155.220(k)(1) before moving forward. If the information provided does not refute the noncompliance, meaning that a preponderance of the evidence still supports the noncompliance determination based on CMS' assessment of the proposed factors in § 155.285(b)(1) and (2), CMS may proceed to terminate an agent, broker, or web-broker's Exchange agreement(s) and impose other penalties. This approach aligns with § 155.285(b)(1)(vii) that contemplates evaluating ''any additional information provided by the individual to refute performing the violation.''

Under this proposal, CMS would weigh both mitigating and aggravating facts, but would retain discretion to weigh the proposed factors as appropriate and would not be required to consider all of the factors in every case. CMS would only consider a factor listed in § 155.285(b)(1) and (2) if the factor is relevant to the noncompliance at issue and applicable to the facts and circumstances of the particular case, and would consider both the presence and absence of a relevant factor when making a termination decision and selecting penalties. For example, not all findings of noncompliance as described in § 155.220(g)(2) involve the disclosure of false or fraudulent information as referenced in § 155.285(b)(2)(v). A finding of noncompliance may instead involve, for example, an agent, broker, or web broker's failure to obtain or maintain required consumer consent documentation. Similarly, even if an agent, broker, or web-broker did not receive compensation associated with the violation as described in § 155.285(b)(1)(vi), or CMS is not able to determine whether the agent, broker, or web-broker received compensation, assessment of other relevant factors may still support termination and imposition of a penalty other than termination. In such circumstances, CMS may determine that enforcement action is appropriate based on its assessment of the other factors relevant to the particular case. We have determined that codifying these factors would provide greater transparency into CMS' enforcement decision-making under § 155.220(g)(1) and reflect that enforcement determinations are based on the totality of the circumstances.

Section 155.285(b)(1) provides that CMS may take into account the nature and circumstances of the conduct, including, but not limited to: the number of violations; the severity of the violations; the individual's history with the Exchange, including any prior violations that would indicate whether the violation is an isolated occurrence or represents a pattern of behavior; the length of time of the violation; the number of individuals affected or potentially affected; the extent to which a person received compensation or other consideration associated with the violation; any documentation provided in any complaint or other information, as well as any additional information provided by the person alleged to have committed the violation to refute performing the violation; and whether other remedies or penalties have been imposed on the person alleged to have committed the violation for the same conduct or occurrence.

When considering the number of and length of time of violations, as described in § 155.285(b)(1)(i) and (iv), CMS may look at, among other things, the number of regulatory requirements the agent, broker, or web-broker violated; the number of times CMS identified the agent, broker, or web-broker violated such requirements; compliance with previously provided technical assistance; and for how long the agent, broker, and web-broker sustained the noncompliance. For example, if an audit or other oversight action results in findings of many instances in which an agent, broker, or web-broker failed to document consumer consent and eligibility application information review in accordance with § 155.220(j)(2)(iii) and (j)(2)(ii)(A) for a large number of different consumers and applications, CMS may consider this more significant than an audit that identifies only a few instances of failure to document consumer consent across a small number of consumers and applications.

Similarly, in considering an agent, broker, or web-broker's history with the Exchange, as described in § 155.285(b)(1)(iii), CMS would consider any previously identified violations of agency regulatory requirements, such as those described in §§ 155.220 and 155.221, to assess whether the violation is an isolated occurrence or represents a pattern of behavior. However, the absence of a documented history of noncompliance would not preclude CMS from taking enforcement action as appropriate, including termination of an Exchange agreement required under § 155.220(d), against an agent, broker, or web-broker. If, after assessment of the other factors described in § 155.285(b)(1) and (2), CMS determines that totality of the circumstances warrants enforcement action, CMS would retain authority to terminate the Exchange agreement required under § 155.220(d) and impose a penalty other than termination under § 155.220(k)(1), regardless of whether the agent, broker, or web-broker had a prior history of noncompliance.

In considering the severity of any identified noncompliance with regulatory requirements, as described in § 155.285(b)(1)(ii), CMS would assess the nature and degree to which the agent, broker, or web-broker violated the regulatory requirement(s) at issue, including the extent to which the violation departed from the applicable requirement and whether the

documented facts reflect a partial or complete failure to meet the requirement. Using noncompliance with the consent documentation requirements at § 155.220(j)(2)(iii) as an example, CMS would likely consider less severe a procedural or technical noncompliance in which an agent, broker, or web-broker clearly obtained and documented consumer consent, but the documentation did not include an adequate description of the process by which the consumer or their authorized representative may rescind the consent, as required by § 155.220(j)(2)(iii)(B). This type of violation would likely be considered less severe because the documentation demonstrated that the consumer knowingly consented to the enrollment, which is the core purpose of the consent requirement, and the deficiency was limited to an incomplete description of a procedural right.

In contrast, CMS would likely consider noncompliance with regulatory requirements to be more severe if it impacted the enrollee's ability to provide actual, informed consent before the agent, broker, or web-broker enrolled them in coverage through the FFEs or SBE–FPs, as we would not be able to determine if the consumer named on the application provided such consent. This uncertainty directly undermines the core purpose of the consent requirement to ensure that enrollments are made with the consumer's knowing and voluntary authorization. Another example of a severe violation might include an instance in which an agent, broker, or web-broker failed to document the name of the consumer or consumer's authorized representative providing consent to be enrolled, creating a situation where we cannot determine if the consumer named on the application provided consent to the agent, broker, or web-broker's assistance with this enrollment. As a further example, CMS would likely consider enrolling a consumer in a health plan without *any* documented evidence that the consumer authorized the enrollment to be a severe violation because, as previously described, the consent requirement is a fundamental safeguard that helps ensure enrollments and application updates are authorized by the consumer. Failure to obtain or maintain any consent documentation prevents CMS from verifying that consumer authorization was obtained, undermines the integrity of the FFE and SBE–FP enrollment process, and increases the risk of consumer financial and medical harm. Because maintaining adequate consent documentation is a condition of participation in the FFEs and SBE–FPs, agents, brokers, and web brokers are responsible for retaining records sufficient to demonstrate compliance.

In considering the number of individuals affected by the noncompliance, as described in § 155.285(b)(1)(v), for instances in which the number of affected individuals cannot be readily determined from the documented instances of noncompliance, CMS could, for example, consider the total number of applications submitted by the agent, broker, or web-broker during the relevant period to determine the number of affected individuals should findings suggest a pattern of noncompliance likely existed across a large portion of the agent, broker, or web-broker's book of business. CMS may also consider the nature of the noncompliance because certain types of noncompliance may affect a broader population of consumers than others. For example, if CMS finds that an agent, broker, or web-broker engaged in misleading marketing in violation of § 155.220(j)(3), CMS may consider the potential reach and impact of the misleading marketing to estimate the number of people affected, including the number of advertisements publicly posted, the number and type of platforms on which the advertisements were posted, the length of time the postings were made public or how often they were posted, available information regarding consumer exposure or engagement, complaints or referrals that mention the misleading marketing, and any related application or enrollment activity. CMS would consider such information, as available and appropriate, in assessing the number of individuals potentially affected and may not necessarily presume that all individuals who may have been exposed to a misleading advertisement were actually impacted by the advertisement.

In considering the extent to which a person received compensation or other consideration associated with the violation as an aggravating factor, as described in § 155.285(b)(1)(vi), CMS could, for example, weigh whether an agent, broker, or web-broker received commissions from QHP issuers for enrollments the agent, broker, or web-broker assisted with or facilitated while engaging in noncompliance.

In considering any additional information provided by the agents, brokers, and web-brokers to refute performing the violation, as described in § 155.285(b)(1)(vii), CMS would consider any information the agent, broker, or web-broker submits to refute a determination of noncompliance as described in proposed § 155.220(g)(3)(i). CMS could consider events or conditions outside the control of the agent, broker, or web-broker that affected their ability to comply with applicable requirements, such as a natural disaster that limits the agent, broker, or web-broker's access to records described under § 155.220(j)(2)(ii) and (iii) requested during a compliance an investigation. However, CMS would not consider a claim that an agent, broker, or web-broker is unable to produce documentation requested during an investigation, for example, because it is maintained by a former employer, as a mitigating factor in assessing noncompliance with the requirements to produce documentation of consent or eligibility application review upon request. This is because, as required in §§ 155.220(j)(2)(ii)(A)(3) and (j)(2)(iii)(D), the individual or entity that assists with or facilitates enrollment of qualified individuals, qualified employers, or qualified employees, in coverage in a manner that constitutes enrollment through a FFEs or SBE–FPs, or assists individuals in applying for APTC and CSRs for QHPs sold through a FFEs or SBE–FPs, is responsible for maintaining the required documentation and providing it to HHS upon request.[179]

Further, we clarify that § 155.285(b)(1)(viii), which provides that CMS may consider whether other remedies or penalties have been imposed for the same conduct or occurrence, would not prevent CMS from terminating an agent, broker, or web-broker's Exchange agreement(s) or imposing a penalty under § 155.220(k)(1) should CMS identify new conduct that constitutes noncompliance with regulatory requirements, even after previously identifying or imposing penalties for noncompliance with the same regulatory requirements. Repeated noncompliance could be viewed as an aggravating factor and may weigh in favor of more significant enforcement action, such as the imposition of other penalties under § 155.220(k)(1). However, CMS would evaluate each instance of noncompliance based on the facts and circumstances and the

[179] *See 45 CFR 155.220(j)(2)(iii)(C). See also* CMS, *Frequently Asked Questions: Consumer Consent & Application Review Requirements,* Question 35 (Oct. 28, 2024) *available at https://www.cms.gov/marketplace/agents-brokers/files/frequently-asked-questions-consumer-consent-application-review-requirements.pdf* providing that an agent, broker, or web-broker must maintain documentation of consumer consent and review of eligibility application information for a minimum of 10 years for all Marketplace consumers even if they stopped working for their former employer.

applicable factors described in § 155.285(b)(1).

Section 155.285(b)(2) provides that CMS may also consider the nature of the harm resulting from, or reasonably expected to result from, a violation, including but not limited to: whether the violation resulted in actual or potential financial harm, such as unexpected tax liabilities for an individual; whether there was actual or potential harm to an individual's reputation; whether the violation hindered or could have hindered an individual's ability to obtain health insurance coverage; whether there was actual or potential harm resulting from providing false or fraudulent information or from the improper use or disclosure of the information; and whether any person received a more favorable eligibility determination for enrollment in a QHP or insurance affordability program, such as greater APTCs or CSRs than they would have been eligible for if the correct information had been provided. In the context of determining whether to terminate an agent's, broker's, or web-broker's Exchange agreement(s) and impose a penalty other than termination under § 155.220(k)(1), it would be within CMS' discretion to assess whether the identified noncompliance resulted in actual or potential financial harm to an individual applicant or to taxpayers should CMS find that the agent, broker, or web-broker's noncompliance resulted in payment of APTCs or CSRs on behalf of individuals who were ineligible or who did not consent to enrollment in coverage through the FFEs or SBE–FPs with the assistance of the agent, broker, or web-broker. CMS may also consider other circumstances in which the noncompliance resulted in, or created a significant risk of, financial harm to consumers or to the Federal Government, based on the facts and circumstances of the particular case.

We note that our proposal to cross-reference only § 155.285(b)(1) and (2) would adopt the nonexclusive factor list in § 155.285(b)(1) and (2) but would not incorporate the CMP procedures outlined in § 155.285(c) through (f) because those procedures apply only when CMS imposes CMPs under § 155.285 and there are existing adequate procedures under § 155.220(g) and (k) that govern terminations and the imposition of other penalties. For termination and other penalties for noncompliance under § 155.220(g)(1) and (2), excluding CMPs, CMS would continue to follow the procedures described in proposed § 155.220(g)(1) through (4) and (k), and, for CMPs, CMS would continue to follow the procedures in § 155.285(c) through (f). Further, if CMS makes a finding or determination by a preponderance of the evidence under § 155.220(g)(5)(iii), CMS would terminate an agent's, broker's, or web-broker's Exchange agreement(s) and impose any penalties deemed appropriate consistent with that provision. For suspensions under § 155.220(g)(5)(ii), CMS would evaluate any rebuttal evidence submitted during the suspension period. The factor list would not apply to the suspension decision. Additionally, in cases that fall under § 155.220(g)(3)(ii) and proposed paragraphs (g)(3)(iii) and (iv), CMS may immediately terminate Exchange agreements and impose additional penalties without the 30-day notice period in § 155.220(g)(3)(i) or consideration of the factor list.

When the factor assessment would apply to selection of penalties and CMS determines that it is appropriate to impose a denial of the right to enter into Exchange agreement(s), we are proposing that the length of such denial would be based on the totality of the circumstances and an assessment of the proposed factors. For example, denial of the right to enter future agreements for one year may be appropriate for violations with several mitigating factors or of lesser severity, such as deficiencies limited to an incomplete description of a procedural right rather than a failure to obtain or record meaningful consumer consent. More severe noncompliance and violations with several aggravating factors, such as noncompliance that likely impacted the enrollee's ability to provide actual, informed consent before the agent, broker, or web-broker enrolled them in coverage, would generally support a longer denial of right to enter into agreements with the FFEs and SBE–FPs. While the duration of the denial of right to enter into agreements with the FFEs and SBE–FPs would vary based on the totality of the circumstances and evidence, denial for a period of 10 years or more may be appropriate for the most severe violations with several aggravating factors. We also propose a conforming revision to § 155.220(g)(3)(ii) to replace the phrase ''without any further opportunity to resolve the matter'' with ''without any opportunity to refute a finding of noncompliance under § 155.220(g)(1),'' consistent with the proposed revisions to the refutation process under § 155.220(g)(3)(i). In addition, as an alternative, instead of cross referencing the factors in § 155.285(b), CMS is considering reproducing or adapting relevant factors from § 155.285(b) directly into § 155.220 in the final rule. Should CMS finalize regulatory text that reproduces or adapts relevant factors from § 155.285(b) directly into § 155.220, such a list would be nonexclusive and not all factors would apply in every case, as described in this proposal. We invite comment on which factors identified in this proposal should apply and how they should be adapted for § 155.220, if at all. We seek comment on these proposals.

3. Clarification on the Scope of an Agent, Broker, or Web-Broker's Right To Request Reconsideration (45 CFR 155.220(h)(1))

We propose to revise 45 CFR 155.220(h)(1) to state that an agent, broker, or web-broker may request a reconsideration of CMS' decisions to terminate their Exchange agreement(s), deny registration under proposed § 155.220(g)(3)(iii) or (iv), or impose a penalty described in § 155.220(k)(1)(i) in the manner and form established by CMS.

Section 155.220(h)(1) currently provides agents, brokers, and web-brokers with the opportunity to request a reconsideration when HHS terminates an agent, broker, or web-broker's Exchange agreement(s), but does not explicitly address whether agents, brokers, and web-brokers are afforded the same reconsideration opportunity when HHS denies registration under proposed § 155.220(g)(3)(iii) or (iv), or imposes penalties other than termination under § 155.220(k)(1)(i). For example, if CMS determines that an agent, broker, or web-broker has failed to comply with the requirements in § 155.220, CMS may deny the agent broker, or web-broker the right to enter into Exchange agreement(s) as a penalty other than termination under § 155.220(k)(1)(i). Therefore, we propose in § 155.220(h)(1) to outline three instances in which an agent, broker, or web-broker may request reconsideration in the manner and form established by CMS. First, proposed § 155.220(h)(1)(i) would allow an agent, broker, or web-broker to request reconsideration of CMS' decision to terminate the agent, broker, or web-broker's Exchange agreement(s) under § 155.220(g). Second, proposed § 155.220(h)(1)(ii) would allow an agent, broker, or web-broker to request reconsideration of CMS' decision to deny registration with the Exchange under § 155.220(g)(3)(iii) or (iv). Third, proposed § 155.220(h)(1)(iii) would allow an agent, broker, or web-broker to request reconsideration of CMS' decision to

impose a penalty under paragraph (k)(1)(i).

We believe this proposal would help ensure consistency in the application of reconsideration opportunities by expressly providing agents, brokers, and web brokers with the same opportunity to request reconsideration regardless of whether CMS terminates an Exchange agreement, denies registration, or imposes a penalty under 45 CFR 155.220(k)(1)(i). We also believe this would provide greater clarity and predictability regarding the availability of reconsideration and promote uniform administration of CMS' enforcement process.

Along those same lines, we also propose corresponding changes to § 155.220(g)(6) to clarify that CMS would notify the applicable State Department(s) of Insurance or other State agent or broker licensing authority whenever CMS imposes penalties other than termination under § 155.220(k)(1)(i), in addition to suspensions or terminations as stated in the current regulation. Because agents and brokers are licensed and regulated by States, such notifications support coordination between Federal and State regulators and enable State licensing authorities to evaluate whether additional action under State law is appropriate.

Furthermore, we clarify the nature and scope of the existing reconsideration process. Operationally, the form and manner currently specified by CMS is that requests for reconsideration must be handled independently by a separate administrative unit of CMS than that which imposed the original penalty. Specifically, CMS' Center for Consumer Information and Insurance Oversight (CCIIO) and Center for Program Integrity (CPI) handle investigations and imposition of penalties, while CMS' Office of Program Operations and Local Engagement (OPOLE) handles requests for reconsideration. OPOLE adjudication of requests for reconsideration constitutes a *de novo* review of the enforcement action based on the totality of the facts and circumstances of the particular case, including potentially exculpatory information submitted by the agent, broker, or web-broker and verification that all internal CMS enforcement policies and procedures were followed. OPOLE evaluates whether the preponderance of the evidence supports the enforcement action. OPOLE administration of requests for reconsideration generally result in one of three outcomes: sustaining the enforcement action, reversing the enforcement action, or modifying the enforcement action (for example, reducing the duration of the termination imposed).

We seek comment on this proposal.

4. Policies To Address Abusive Conduct

a. Purpose and Description of Abusive Conduct Standards

Abusive conduct by agents, brokers, and web-brokers can adversely impact consumers, resulting in significant medical or financial harm. Consumers enrolled in Exchange QHPs without their knowledge or consent can experience interruptions in access to medical care and unexpected tax liabilities associated with receiving APTCs. Through our investigations and data analytics in the FFEs and SBE–FPs, we have identified specific actions and patterns of inappropriate behavior by agents, brokers, and web-brokers that violate the standards of conduct listed in § 155.220(j)(2). These activities ultimately result in consumers being misled about important aspects of their Exchange coverage, including their eligibility for APTC based on their income, the cost-sharing implications (that is, deductibles and copayments) associated with the insurance plans they sign up for, and other material information necessary to make informed enrollment decisions.

Through our investigations of consumer complaints and analyses of enrollment activity in the FFEs and SBE–FPs, we have found that significant consumer harm arises from abusive conduct by agents, brokers, and web-brokers that may not initially rise to the level of fraud under current § 155.220(g)(5). The proposed standard of abusive conduct would better reflect the nature of the misconduct we are seeing that often involves deceptive or coercive enrollment practices, material misrepresentations, unauthorized application or enrollment activity, or the submission of inaccurate application information that misleads consumers and undermines the integrity of Exchange operations. Under the current regulatory framework, the suspension authority at § 155.220(g)(5) is tied in part to a reasonable suspicion of fraud, which may not capture a significant portion of the types of misconduct CMS encounters through its Marketplace oversight activities. Based on this experience, we have determined it is appropriate to propose revising our regulations to establish an enforcement framework that would more directly address the misconduct we are seeing while applying a clear and transparent evidentiary standard.

Accordingly, we believe revisions to our suspension and termination authorities are necessary to better align our enforcement authorities with the types of abusive conduct encountered through our Marketplace oversight. We therefore propose to amend § 155.220(g)(5) by removing reference to a ''reasonable suspicion of fraud'' in § 155.220(g)(5) and replacing it with a standard under which CMS may suspend an agent, broker, or web-broker when CMS finds there exists a credible allegation of abusive conduct by the agent, broker, or web-broker. We further propose amending § 155.20 to add a definition of ''a credible allegation of abusive conduct,'' defining it to mean: an allegation from any source, including but not limited to the following: (1) consumer, Marketplace call center, or agent, broker, or web-broker complaints verified by further evidence; (2) data or information identified during investigation; or (3) patterns identified through data analysis. Additionally, the definition would state that allegations are considered to be credible when they have indicia of reliability. The presence of one of these sources alone could be sufficient to meet this standard as a credible allegation of abusive conduct, depending on the facts of each individual case.

Unlike a general finding of noncompliance or pattern of noncompliance under § 155.220(g)(1) and (2), enforcement actions under § 155.220(g)(5) would apply to the most egregious behaviors. Specifically, enforcement actions would apply when the conduct is likely to or has caused harm to the Federally facilitated Exchange, SBE–FP, or their consumers. Conduct that does not meet this harm standard, though it may cause harm, would be addressed through enforcement actions authorized under § 155.220(g)(1) through (3). We seek comment on this proposal.

Likewise, we propose to amend § 155.220(g)(5)(ii) and (iii) to establish standards for suspension and termination based on a finding of abusive conduct. Specifically, we propose that CMS may suspend an agent, broker, or web-broker based on a credible allegation of abusive conduct and may terminate the agreement of an agent, broker, or web-broker based on a preponderance of evidence of abusive conduct. We believe the proposed credible allegation of abusive conduct standard for suspensions is consistent with Medicare's payment suspension authority, which uses a credible allegation of fraud standard, and mirroring these standards is appropriate because the resulting impact is similar

between a Marketplace suspension and Medicare payment suspension. We believe the proposed preponderance of the evidence standard for terminations is appropriate because it is the evidentiary standard generally applied in Federal administrative and civil cases, and it would create a fair, well-established, and transparent basis for final enforcement actions. Adopting these standards would better align our enforcement framework with the nature of these administrative proceedings while providing agents, brokers, and web-brokers with greater clarity regarding the evidentiary standard CMS would apply when determining whether termination is warranted. This proposal would also align with the standards we have used for other enforcement actions against agents, brokers, and web-brokers. We seek comment on these standards and alternative standards that could be used for suspensions and terminations.

We also propose to amend § 155.220(g)(5)(i) to define abusive conduct as any conduct that is likely to cause or has caused harm to the Exchange or its consumers that includes, but is not limited to: (1) a violation of the standards of conduct at 45 CFR 155.220(j)(2); (2) providing the Exchange with inaccurate application information related to the consumer's eligibility for Medicaid, CHIP, a QHP offered through the Exchange, advance premium tax credit, or cost-sharing reductions; or (3) a violation of any term or condition of the agreements with the Exchange that relates to the agent, broker, or web-broker's conduct toward consumers.

This would incorporate the proposed examples of violations of the existing standard of conduct to provide consumers with correct information by adding § 155.220(j)(2)(i)(A) and (B). These include:

- Having a website that HHS determines could mislead a consumer into believing the consumer is visiting *HealthCare.gov,* an official Marketplace, Affordable Care Act or Exchange enrollment website, certified Exchange enrollment partner website, or any other official website of the Federal or a State government. To do this, we would move the existing parenthetical in the current § 155.220(j)(2)(i) that states: ''including by having a direct enrollment website that HHS determines could mislead a consumer into believing they are visiting *HealthCare.gov*'' to a new paragraph (A).
- Falsely claiming to represent the FFE or SBE–FPs or falsely suggesting that coverage from the FFE or SBE–FP is free. We would do this by creating a new paragraph (B).

The proposed definition of abusive conduct at § 155.220(g)(5)(i) would also incorporate the proposed amendments to § 155.220(j)(2)(ii)(E) through (K):

- Paragraph (E)*(1)* would state: An agent, broker, or web-broker may not project, or mislead or coerce a consumer to project, one of the following:

++ An annual income that is not based on any actual or reasonably expected source of income.

++ Income the consumer is unlikely to earn.

++ Income that omits one or more tax household members.

++ Income based on inappropriate modified adjusted gross income calculations, such as projecting income based on income after income tax withholding.

++ A predetermined income amount that the consumer is coached, targeted, or steered towards by the agent, broker, or web-broker.

- Paragraph (F) would state: Submitting application and enrollment data only for consumers who are not deceased at the time of enrollment.
- Paragraph (G) would state: Accurately entering information provided and confirmed by the consumer pertaining to any existing minimum essential coverage as defined by 45 CFR part 156 Subpart G, that the consumer is eligible for or enrolled in.
- Paragraph (H) would state: Accurately entering information provided and confirmed by the consumer pertaining to all tax household members. Agents, brokers, and web-brokers must ask consumers about their household composition to the same extent consumers are asked about household composition on the Exchange eligibility application and accurately report each consumer response.
- Paragraph (I) would state: Accurately entering information provided and confirmed by the consumer regarding residence address in accordance with § 155.305(a)(3).
- Paragraph (J) would state: Accurately entering information provided and confirmed by the consumer regarding household contact information including names, phone number and mailing address, and if the consumer chooses to provide them, accurate email address and mobile phone number for text messages. Consumer contact information must only be the consumer's personal contact information and cannot be contact information accessible or controlled by an agent, broker, web-broker or any other non-consumer persons or entities.
